UNIVERSITY OF ILLINOIS LIBRARY AT URBANA-CHAMPAIGN

DEC 01 1987

Scottish Provident Institution.

HEAD OFFICE: 6 ST. ANDREW SQUARE, EDINBURGH.

THIS SOCIETY combines the advantages of Mutual Assurance with Moderate Premiums.

THE PREMIUMS are so moderate that an Assurance of £1200 or £1250 may generally be secured from the first for the same yearly payment which would elsewhere assure (with profits) £1000 only—the difference being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

The Whole PROFITS go to the Policyholders, on a system at once safe and equitable,—no share being given to those by whose early death there is a loss.

The effect of *reserving* the Surplus for the survivors has been that—in addition to the above immediate advantage—the earlier Policies had at last investigation received reversionary Bonuses of 40 to 70 per cent and upwards. Further additions will fall to be made at end of 1887.

Examples of Premiums for £100 at Death—With Profits.

Age.	Payable during Life.	Limited to 21 Payments.	Age.	Payable during Life.	Limited to 21 Payments.	Age.	Payable during Life.	Limited to 21 Payments.
	£1 16 8	£2 10 6	31	£2 2 6	£2 16 2	41	£2 16 8	£3 9 1
	1 18 9	2 11 0	32	2 3 5	2 17 1	42	2 18 8	3 11 1
	1 17 2	2 11 6	33	2 4 5	2 18 0	43	3 0 11	3 13 1
	1 17 7	2 12 1	34	2 5 7	2 19 0	44	3 3 3	3 15 6
	1 18 0	2 12 6	35	2 6 10	3 0 2	45	3 5 9	3 17 6
	1 18 6	2 13 0	36	2 8 2	3 1 5	46	3 8 5	4 0 0
27	1 19 2	2 13 6	37	2 9 8	3 2 9	47	3 11 5	4 2 3
28	1 19 11	2 14 1	38	2 11 3	3 4 3	48	3 14 3	4 5 5
29	2 0 8	2 14 8	39	2 12 11	3 5 9	49	3 18 1	4 8 0
30	2 1 6	2 15 4	40	2 14 9	3 7 6	50	4 1 7	4 12 1

* Thus, a person of 30 may secure £1000 at Death by a yearly payment, *during life*, of £20 15s. This Premium in any other of the Scottish Mutual Offices would secure £800 only, instead of £1000.

OR, if unwilling to burden himself with payments during his whole life, he may secure the same sum of £1000 by *twenty-one* yearly payments of £27 13s 4d—being thus free of payment after age 50.

[The usual *non-participating* rates differ very little from these Premiums.]

† At age 40 the Premium ceasing at 60 is, for £1000, £33 14s 2d, about the same as most Offices during life. Before the Premiums have ceased, the Policy will have shared in at least one division of

The New Business (entirely home) has for many years exceeded a Million.

The EXPENSES are much under those of any Office doing so large a New Business.

The FUNDS (increased in year by £341,000) exceed £5,800,000.

Only Two Offices in the Kingdom, both older, have as large a Fund.

The INCREASE of the FUNDS in last five years exceeds that of any other Office.

The SOCIETY has taken a leading part in the removal of restrictions and challenges. The rules relating to foreign residence, revival of Policies, claims, etc., are specially liberal. The SURRENDER VALUES (given in an original fixed Table) compare favourably with those of other firms.

REPORTS containing TABLES of RATES may be had on application.

JAMES WATSON, Manager.

J. MUIR LEITCH, London Secretary.

OCTOBER 1887.

LONDON: 17 KING WILLIAM STREET, E.C.

PURE PORT WINE

AS DRUNK IN PORTUGAL.

VINTAGE 1873.

36/- per Dozen.

17/- per Gallon.

CASH WITH ORDER.

Less 5 per cent. Discount.

THE above will be found a very delicious light wine, of the style generally drunk by the higher classes in Portugal. Being a Pure Wine matured entirely in the Wood, it is perfectly wholesome, and will be appreciated by those who cannot drink with impunity the heavy and highly brandied Port Wines usually shipped to this country.

It is universally acknowledged by the highest Medical Authorities that **PURE PORT WINE** well matured in the Cask, is one of the most wholesome and strengthening Wines.

DR. ANNA KINGSFORD, M.D., says: "Good Port Wine occasionally is a great help. Let me recommend Messrs. GRIERSON, OLDHAM & CO.'s Wine."

As Sample, a Single Bottle will be sent free by Parcel Post on receipt of 3/-; or the Wine may be tasted at the following address between the hours of 9 and 6 (Saturdays, 9 and 2).

All Orders, assorted or otherwise, amounting to £10 and upwards (if accompanied by remittance) are sent, Carriage Paid, to any Railway Station in the United Kingdom.

GRIERSON, OLDHAM & CO.,

"FAIRY" LAMPS & "FAIRY" LIGHTS

For Ornamentally Lighting

DRAWING AND BALL-ROOMS, CONSERVATORIES, EVENING FÊTES,
TABLE DECORATIONS, ETC., ETC.

No. 12.—FOR CONSERVATORIES.
No. 12—2/6 each complete.

No. 13.
No. 13—2/- each complete.

No. 17.—FLOWER CIRCLE.
No. 17—4/- each complete.

These Lamps are made entirely of Glass, thus the greatest amount of light possible is obtained, with absolute Safety from Fire and dropping of Grease—both inseparable with Candles. Each Lamp is fitted with Opal Shades, and packed in a Cardboard Box.

The Patent "Fairy" Lights have double wicks, give a beautiful soft, steady Light; are always the same height, so essential when placed before a mirror; and the last hour's burning is as brilliant as the first; are not affected by the strongest draught, require no attention after lighting, and will burn upwards of 10 hours—at a very moderate cost; they can be instantly extinguished by use of the "Fairy" Extinguisher supplied with every Lamp, and readily re-lighted.

The Lamps require no cleaning and never wear out; when burning they fully realize their title of "FAIRY" LIGHTS. The Lights are sold in boxes containing 6 Lights—price 1/- per box—to be obtained Retail from all respectable dealers, and Wholesale from the Patentee—

SAM'L. CLARKE,

GREATLY REDUCED PRICES

OF

WHISKY,

SCOTCH AND IRISH.

In consequence of our determination to sell for Cash only, we are able to offer the FINEST qualities of Whisky at prices far below any that have ever before been quoted to the public.

SCOTCH AND IRISH WHISKY.

		Per Gallon.	Per Dozen, Bottles included.
No. 1 QUALITY.	THE FINEST THE WORLD PRODUCES, 7 YEARS OLD.....	19/-	40/-
No. 2 DO.	A REALLY FINE WHISKY, 5 YEARS OLD	16/2	34/3

We strongly recommend our Customers to keep their Whisky in Wood, and to put the tap in the Cask only half-way down, and never draw the Cask more than half empty. When it begins to run slowly so many more gallons as are required to fill it up should be added, as in this manner only can a really perfect and uniform Whisky be obtained.

For this purpose we supply our Whiskies in the following small casks —

SCOTCH AND IRISH.

"No. 1" QUALITY, in small casks, made from the finest Sherry Wood	3 1/2 Gallons. £ 6 6	Holding 7 Gallons. £ 6 13 0
"No. 2" QUALITY, ditto	2 16 6	5 13 0

The Casks are charged for at the rate of 4/- for the 3 1/2 gallons and 6/6 for the 7 gallons. Our Whiskies are also supplied in Octaves holding 14 gallons, which are charged for at the rate of 10/-, and quarter Casks holding 27 gallons 12/-. Taps for above: Silver Plated Taps 5/6, ditto Lock Taps 6/6, Earthenware 2/-, Pewter 1/-.

NET CASH WITH ORDER ONLY.

As Sample, a single bottle will be sent free by Parcel Post on receipt of 3/4 for No. 1 Quality, or 2/10 for No. 2 Quality; or the Whiskies may be tasted at our Offices between the hours of 9 and 6, Saturdays 9 and 2 o'clock.

All orders, assorted or otherwise, amounting to £10 and upwards (if accompanied by remittance) are sent, Carriage Paid, to any Railway Station in the United Kingdom.

AN

Almanack

THE LIBRARY OF THE
For the Year of Our Lord

APR 26 1926
1888

UNIVERSITY OF ILLINOIS

JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE

Astronomical and other Phenomena

A LARGE AMOUNT OF

INFORMATION RESPECTING THE GOVERNMENT
FINANCES POPULATION COMMERCE AND
GENERAL STATISTICS OF THE BRITISH
EMPIRE THROUGHOUT THE WORLD

WITH SOME NOTICE OF
OTHER COUNTRIES
&C. &C.

LONDON

OFFICE: 12, WARWICK LANE,

PATERNOSTER ROW

ADVERTISEMENT.

THE principal changes effected in the earlier pages of this year's ALMANACK, are those arising through the amplification and extension of its sections. The official and clerical staff of the several departments of the Civil Service has been given in fuller detail than hitherto. Many recent additions and promotions in the various Orders of Knighthood have considerably extended the different lists. The Sections relating to the Army, the Navy, and Education, have been enlarged, and additional space has been assigned to the Metropolitan Hospitals, Life Insurance, and other subjects.

The diminished extent of our Foreign Trade has directed attention to its causes, and to the best available means for its restoration and extension. The Consular Service is naturally looked to for help and guidance in this direction. A complete list of H.B.M.'s Consuls has accordingly been given, with a short paper giving an outline of their important functions. Shipping interests have not been overlooked. An interesting paper on the Rifle of the future and the list of War Medals are also amongst the articles now given for the first time.

Twenty years ago, when this work was first announced, the Editor stated that it was his intention to produce an Almanack which should be "the Best and most Complete" of its kind; that intention he honestly endeavoured to carry out, and spared no pains to effect his purpose, with the result that his words have been re-echoed far and wide with one general expression of opinion. The Almanack has become, what he proposed to make it, a household book—and "You'll find it in Whitaker" a household proverb—whenever information is required.

Only a portion of the praise thus liberally accorded is due to the Editor; he has been most ably assisted by gentlemen as anxious as himself that the book should be equal to its pretensions, and he has much pleasure in thus acknowledging the obligation.

Correspondents have again been most obliging, both in pointing out mistakes which had crept into the work, and in making suggestions for its improvement. The Editor trusts that the Almanack may continue to merit their attention, and that they will not fail to point out such errors or omissions as may attract their notice. Whilst acknowledging most cordially the assistance he has received from his readers, the Editor has been gratified by the testimony their letters afforded, of the interest taken in WHITAKER'S ALMANACK by every class and condition of men and women throughout the English-speaking World.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks at 5h. 1m. morn., and Twilight ends at 6h. 6m. aft., the length of the Day being 7h. 51m.

Jan. 4. Mercury at greatest distance from the Sun, 1h. morn.

Jan. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 10' 7s.

Jan. 6. Mars in conjunction with the Moon, 9h. morn. δ 2° 46' S.

Jan. 9. Jupiter in conjunction with the Moon, 11h. morn. ♃ 4° 12' S.

Jan. 10. Venus in conjunction with the Moon, oh. morn. ♀ 2° 16' S.

Jan. 13. Mercury in conjunction with the Moon, 3h. morn. ☿ 3° 41' S.

Jan. 18. Mercury in superior conjunction with the Sun, 8h. aft.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 9' 4s.

Jan. 23. Near approach of ♄ Tauri to the Moon's limb: magnitude 4. The nearest approach takes place at 1h. 19m. morn., 51' from the vertex.

Jan. 23. Saturn in opposition to the Sun, 2h. aft.

Jan. 28. Saturn in conjunction with the Moon, 2 aft. ♄ 1° 10' N.

Jan. 28-9. Total Eclipse of the Moon, visible at Greenwich, see p. 70.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

D.	♃ MERCURY.			♀ VENUS.			♁ MARS.			♃ JUPITER.			♄ SATURN.

1	1	18	5 1	88	42	54
10	1	17	56 5	88	42	55
19	1	17	47 2	88	42	55
28	1	17	38 9	88	42	55

ANGULAR DISTANCE of the MOON FROM SATURN.

D.	Position of Star.	6 P.M.			9 P.M.			Midnight.		
		°	'	"	°	'	"	°	'	"
1	East	98	2	8	96	32	52	95	3	37
10	East	86	7	52	84	38	26	83	8	55
19	East	74	9	55	72	39	40	71	9	16
28	East	62	3	16	60	31	35	58	59	41

In the early part of the month the constellations Camelopardus, Lynx, Gemini, Monoceros, and Canis Major will be on the meridian about midnight. In Gemini there is a fine compressed cluster of stars, in the right leg of Pollux; one third of the distance from Pollux to Rigel, on a

line from the former star between the second and third stars of Orion's Belt to the latter; the stars composing it are, however, small, and excepting on the nights about the 13th, in the absence of the Moon, cannot be well observed.

* The Meteorological Observations throughout the Almanac are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest range of Thermometer, with the average for 50 years; the mean of Barometer at a height of 159 feet above the mean level of the sea; the daily Rainfall, the daily Sunshine; the general direction and maximum force of the Wind also daily.

Configurations of Jupiter's Satellites at 5h. A.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

Feb. 1. Day breaks at 5h. 42m *morn.*, and Twilight ends at 6h. 46m. *aft.*, the length of the Day being 9h. 4m.

Feb. 3. Mars in conjunction with the Moon, 8h. *morn.* δ 2° 50' S.

Feb. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 7⁶⁸.

Feb. 6. Jupiter in conjunction with the Moon, 1h. *morn.* ♃ 4° 2' S.

Feb. 8. Venus in conjunction with the Moon, 9h. *aft.* ♀ 1° 24' S.

Feb. 11. A Partial Eclipse of the Sun, invisible at Greenwich, see p. 70.

Feb. 13. Mercury in conjunction with the Moon, 9h. *morn.* ☿ 3° 8' N.

Feb. 16. Mercury at greatest elongation (18°) East, *oh. morn.*

Feb. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 6⁰⁸.

Feb. 20. A near approach of Aldebaran to the Moon's limb occurs at 3h. 56m. *aft.*, 346° from the vertex.

Feb. 24. Saturn in conjunction with the Moon, 8h. *aft.* ♄ 1° 22' N.

In this month the Mornings increase 54m., and the Afternoons, 51m.

MORNING AND EVENING STARS.

♿ MERCURY is an evening star throughout the month: may be observed due West, near the horizon, about an hour after sunset.

♀ VENUS is a morning star throughout the month.

♂ MARS may be observed in the constellation Virgo.

♃ JUPITER may be observed in the early morning in Scorpio, not far from Antares.

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a rich loose cluster of stars situated in the Crab's southern claw, in R.A. 8h. 45m. 3s., and Decl. 12° 13' N., consisting of stars from the 9th to 10th magnitudes. The fine group of stars in Cancer, called "Præsepe," can be well observed about the 11th. It does not consist of a very great number of stars, but the components are, as

compared with those of other clusters, of considerable magnitude. It can be easily found by drawing an imaginary line from Castor through Pollux, and continuing it about three times the distance between these two stars; at this point it will reach the cluster.

The triple star ζ in Cancer may be examined in this month: it will be found situated in R.A. 8h. 5m. 47s., and Decl. 18° 1' N. It souths on the 22nd at 10h. 41m., aft.

RAINFALL IN MARCH, 1887.

In this month rain fell on 10 days. The total fall for the month was 1'36 inches; above the average of ten years, 1871-80, by 0'12 inch.

MONTHLY NOTES.

- March 1. Auditors of Boroughs to be elected.
6. Last day for sending in claims and objections relating to Local Board Elections.
15. Last day for publishing notice of election of Guardians, and first day for sending in nominations to Returning Officer.
25. Quarter Day.—Various parochial, union, and other local accounts to be made up to this day.
26. Last day for sending in nominations for Guardians to Returning Officer.
27. List of persons nominated in election of Guardians to be published.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 53m. morn., and Twilight ends at 7h. 31m. aft., the length of the Day being 10h. 53m.

Mar. 1. Mars in conjunction with the Moon, 11h. aft. δ 2° 37' S.

Mar. 3. Mercury in inferior conjunction with the Sun, 7h. aft.

Mar. 4. Mars stationary, 2h. aft.

Mar. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 49s.

Mar. 9. Venus in conjunction with the Moon, 10h. aft. ♀ 0° 17' N.

Mar. 20. Sun enters Aries: Spring commences, 4h. morn.

Mar. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 43s.

Mar. 23. Saturn in conjunction with the Moon, 4h. morn. ♃ 1° 21' N.

Mar. 28. Mercury and Venus in conjunction, 2h. morn. ♀ 0° 2' N.

Mar. 29. Mars in conjunction with the Moon, 2h. morn. δ 2° 35' S.

Mar. 31. Mercury at greatest elongation (28°) West, 1h. morn.

Mar. 31. Jupiter in conjunction with the Moon, 7h. aft. ♃ 3° 32' S.

In this month the Mornings increase 1h. 8m., and the Afternoons, 51m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Configurations of Jupiter's Satellites at 2h. A.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3h. 36m. morn., and Twilight ends at 8h. 31m. aft., the length of the Day being 12h. 55m.

Apr. 2. Venus at greatest distance from the Sun, 9h. aft.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 4'48.

Apr. 8. Mercury in conjunction with the Moon, 11h. aft. ♀ 1° 16' N.

Apr. 9. Venus in conjunction with the Moon, 1h. morn. ♀ 2° 24' N.

Apr. 11. Mars in opposition to the Sun, 6h. morn.

Apr. 14. Mercury and Venus in conjunction, 4h. morn. ♀ 1° 10' S.

Apr. 19. Saturn in conjunction with the Moon, 1h. aft. ♀ 1° 5' N.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 5'18.

Apr. 24. Mars in conjunction with the Moon, 10h. aft. ♂ 3° 16' S.

Apr. 28. Jupiter in conjunction with the Moon, 1h. morn. ♀ 3° 26' S.

In this month the Mornings increase 1h. 1m., the Afternoons, 48m.

MORNING AND EVENING STARS.

♁ MERCURY is a morning star: situated in Pisces.

♀ VENUS is a morning star: near to Mercury.

♂ MARS is in Virgo, and may be seen rising in the early evening.

APPARENT DECLINATION OF THE ABOVE PLANETS.

At the latter part of April the constellations Draco, Boötes, and Libra will be on the meridian about midnight, and will be most favourable for observation on the evenings between the 8th and 12th. An irresolvable double Nebula in Canes Venatici can be observed about the 10th of the month: it is situated in R.A. 13h. 25m. 8s., and in Decl. 47° 46' N. The Southern Nebula is surrounded by a faint ring of nebulous light, and was

called by Herschel, in his Catalogue, "the Halo Nebula." In Libra, R.A. 15h. 12m. 51s., Decl. 2° 31' N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel counted 200 stars in this group in the field of his 40-foot reflector, and found the middle portion so condensed that the individual stars could not be distinguished. The evenings about the 10th are the best for observing these objects.

Configurations of Jupiter's Satellites at Midnight.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2h. 3m. morn., and Twilight ends at 9h. 51m. aft., the length of the Day being 14h. 48m.

May 5. Mean time of Sun's semidiameter passing the meridian, 1m. 6ths.

May 9. Venus in conjunction with the Moon, 9h. morn. ♀ 3° 50' N.

May 10. Mercury in conjunction with the Moon, 10h. aft. ☿ 5° 6' N.

May 11. Mercury in superior conjunction with the Sun, oh. morn.

May 15. Mercury at least distance from the Sun, oh. morn.

May 16. Saturn in conjunction with the Moon, 10h. aft. ♄ 0° 42' N.

May 20. Mean time of Sun's semidiameter passing the meridian, 1m. 7ths.

May 21. Mars in conjunction with the Moon, 11h. aft. ♂ 4° 32' S.

May 22. Jupiter in opposition to the Sun, 5h. morn.

May 25. Occultation of θ Librae: magnitude 4½. The disappearance takes place at 3h. 45m. morn., 85° from the vertex. At the reappearance the star will be below the horizon at Greenwich.

May 25. Jupiter in conjunction with the Moon, 7h. morn. ♃ 3° 34' S.

In this month the Mornings increase 42m., the Afternoons, 43m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Towards the end of May we shall find the constellations Draco, Hercules, Ophiuchus, and Scorpio on the meridian about midnight. Hercules contains a very splendid cluster of stars situated in R.A. 16h. 37m. 41s. and Decl. 36° 40' N. This, like most of the star-clusters, is condensed in the centre, and may be easily seen with very moderate telescopic aid; and a few days before and after the 10th of this month, when the Moon is absent, it may, if the opportunity is taken of a very clear night, be seen with the naked eye, plainly, between the stars ζ and η Herculis. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens.

Configurations of Jupiter's Satellites at 11 A. P. M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

June 1. In this month there is no real night, but either daylight or twilight; the length of the Day being 16h. 15m.

June 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 8' 5s.

June 8. Venus in conjunction with the Moon, 8h. aft. ♀ 3° 39' N.

June 11. Mercury in conjunction with the Moon, 9h. aft. ♀ 2° 29' N.

June 12. Mercury at greatest elongation (24°) East, 2h. morn.

June 13. Saturn in conjunction with the Moon, 8h. morn. ♀ 0° 20' N.

June 18. Mars in conjunction with the Moon, 1h. aft. ♂ 5° 48' S.

June 20. Mean time of Sun's semidiameter passing the meridian, 1m. 8' 8s.

June 21. Sun enters Cancer; Summer commences, oh. morn.

June 21. Jupiter in conjunction with the Moon, oh. aft. ♀ 3° 51' S.

June 25. Mercury stationary, 9h. morn.

June 27. Mercury at greatest distance from the Sun, 11h. aft.

In this month the Mornings increase 6m. to the 20th; from the 20th to the 30th they decrease 5m. The Afternoons increase 13m.

MORNING AND EVENING STARS.

♃ MERCURY is an evening star, and can be well observed in this month.

♀ VENUS is a morning star throughout the month; in Taurus till near the end of the month, when it enters Gemini.

♂ MARS in Virgo.

♃ JUPITER nearly stationary in Libra, rising early in the evening.

♄ SATURN is an evening star, in Cancer.

APPARENT DECLINATION OF THE ABOVE PLANETS.

D.	♃ MERCURY.			♀ VENUS.			♂ MARS.			♃ JUPITER.			♄ SATURN.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Scutum Sobieski is situated a remarkable and very extensive Nebula, known as the "Horse-shoe," from its peculiar shape: from μ Sagittarii it lies N. by E. about 5° distant, in R.A. 18h. 14m. 10s., Decl. 16° 15' S.

In Sagittarius is a globular cluster of very small

stars, lying halfway between β Capricorni and Antares, and can be seen only with difficulty in small telescopes; it is situated in R.A. 18h. 17m. 38s. and Decl. 24° 56' S. Owing to its great southern declination there is but little chance of seeing this Nebula except when southing. On the evenings about the 9th, when there is no Moon, it can be best observed. It souths at 1h. 4m. morn. on June 10.

RAINFALL IN JULY, 1887.

In this month rain fell on 10 days. The total fall for the month was 1.29 inches; below the average of ten years, 1871-80, by 1.34 inches.

MONTHLY NOTES.

- July 1. Special Sessions for Licences to deal in Game to be held this month.
 2. Quarter Sessions commence this week.
 6. Dividends payable.
 9. Last day for paying Fire Insurances.
 9. Glasgow Fair Week.
 20. Rates and Taxes due January 5th must be paid on or before this day. Last day for Electors to send in their claims.
 21. Overseers in Cities and Boroughs to make out a list on or before this day of the persons whose January Poor Rates remained unpaid on the 20th.

THE MOON.

Configurations of Jupiter's Satellites at 10h. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

July 1. There is no real night till after the 20th of this month.

July 3. Earth at greatest distance from the Sun, 5h. aft.

July 5. Mean time of Sun's semidiameter passing the meridian 1m. 8' 4s.

July 9. Mercury in inferior conjunction with the Sun, 5h. morn.

July 9. A partial eclipse of the Sun, invisible at Greenwich: see p. 70.

July 11. Venus in superior conjunction with the Sun, 7h. aft.

July 18. Occultation of θ Libra: magnitude $4\frac{1}{2}$. The disappearance takes place at 9h. 2m. aft., 8° from the vertex; the reappearance at 9h. 23m. aft., 339° from the vertex.

July 20. Mean time of Sun's semidiameter passing the meridian, 1m. 7' 4s.

July 22. Occultation of σ Sagittarii: magnitude 4. The disappearance takes place at oh. 42m. morn., 173° from the vertex; the reappearance at 1h. 15m. morn., 235° from the vertex.

July 23. A total eclipse of the Moon, partially visible at Greenwich: see p. 71.

July 31. Occultation of f Tauri: magnitude 4. The disappearance takes place at 11h. 44m. aft., 25° from the vertex; the reappearance on August 1, at oh. 22m. morn., 297° from the vertex.

In this month the Mornings decrease 36m., the Afternoons 30m.

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ, is the chief of the Annular Nebulae; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it at all well: it is in R.A. 18h. 49m. 24s., and Decl. 32° 53' N.

There is also a globular cluster in Lyra, between the eastern yoke of Lyra's frame and the Swan's Head: it was formerly considered a Nebula, until resolved by Sir William Herschel, with his more perfect telescopic means. It is in R.A. 19h. 12m. 11s., Decl. 29° 59' N. The best nights in this month for observation of these objects are those about the 8th.

RAINFALL IN AUGUST, 1887.

In this month rain fell on 9 days. The total fall for the month was 2'34 inches; below the average of ten years, 1871-80, by 0'35 inch.

MONTHLY NOTES.

August 1. Borough and County Lists to be affixed to church doors for 2 Sundays.—Claims of Lodgers to be sent in between this day and 20th.

4. Oyster Season commences.

12. Grouse and ptarmigan shooting commences.

20. Last day for service on Overseers of objections to Electors in Counties.

20. On or before this day, persons entitled to vote as ratepayers, but whose names have been omitted from the lists, must send in their claims.

Last day for service of objections on Electors in Boroughs.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1h 30m. morn.; Twilight ends at 10h 40m. aft., the length of the Day being 15h. 20m.

Aug. 2. Saturn in conjunction with the Sun, 1h. morn.

Aug. 4. Occultation of χ^1 Orionis magnitude 5. The disappearance takes place at 1h. 58m. morn., 109° from the vertex; the reappearance at 2h. 36m. morn., 195° from the vertex.

Aug. 5. Mean time of Sun's semidiameter passing the meridian 1m. 6^{os}.

Aug. 7. A partial eclipse of the Sun, visible at Greenwich: see p. 71.

Aug. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 4^{os}.

Aug. 21. Occultation of γ Capricorni: magnitude 3½. The disappearance takes place at 0h. 58m. morn., 126° from the vertex; the reappearance at 2h. 10m. morn., 314° from the vertex.

Aug. 22. Occultation of ψ^3 Aquarii: magnitude 5. The disappearance takes place at 9h. 46m. aft., 29° from the vertex; the reappearance at 10h. 30m. aft., 320° from the vertex.

Aug. 26. Occultation of ξ^2 Ceti: magnitude 4. The disappearance takes place at 11h. 20m. aft., 98° from the vertex; the reappearance on August 27th at 0h. 22m. morn., 238° from the vertex.

In this month the Mornings decrease 47m., the Afternoons 59m.

MORNING AND EVENING STARS.

♿ MERCURY is a morning star till about the 20th: in conjunction with the Moon on the 6th at 9h. morn.

♀ VENUS is an evening star: in conjunction with the Moon on the 8th, at 9h. morn.

♂ MARS is an evening star: in conjunction with the Moon on the 13th, at 9h. aft.

♃ JUPITER nearly stationary in Libra.

♄ SATURN is a morning star: in Cancer.

At the beginning of August, Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula is the famous "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed to be some trace of resolvability shown. It is situated in R.A. 19h. 54m. 43s., and Decl. 22° 25' N. The sky in the vicinity of this Nebula is very rich in stars, and will well repay a complete examination. The best evenings in

this month for observation are those about the 7th.

There is a small bright globular cluster below the Dolphin's tail, consisting of a mass of very small stars, not very easy for small telescopes; it is situated in R.A. 20h. 28m. 43s., and Decl. 7° 2' N. This cluster is a good one, according to Sir John Herschel, for testing the space-penetrating power of telescopes. This though a small is yet a bright cluster, and may be observed easily in the evenings immediately before and after the 7th.

PHASES OF THE MOON.

- New Moon 6d. 4h. 56m. Morning.
 - ☾ First Quarter 12 10 0 Afternoon.
 - Full Moon* 20 5 24 Morning.
 - ☾ Last Quarter 28 8 30 Morning.
- In Perigee 9d. 11h. m. | In Apogee 25d. 8h. m.
* Harvest Moon.

RAINFALL IN SEPTEMBER, 1887.

In this month rain fell on 16 days. The total fall for the month was 2'22 inches; below the average of ten years, 1871-80, by 0'21 inch.

MONTHLY NOTES.

September 1. On or before this day the lists of Lodgers and persons omitted from the list of Voters claiming to vote, with the particulars of the claims, to be published.—Overseers to make out Burgess Lists to be delivered to the Town Clerk, and lists of claims and objections for Counties to the Clerk of the Peace.—The lists of objections to County Electors, and claims and objections in Boroughs, to be affixed to church doors till the 15th.

2. Lists of Jurors to be affixed to church doors for the first three Sundays.

3. Various parochial, union, and other local accounts made up to end of week nearest this day.

Configurations of Jupiter's Satellites at 7h. 30m. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 9m. morn., and Twilight ends at 8h. 51m. aft., the length of the Day being 13h. 29m.

Sept. 4. Saturn in conjunction with the Moon, 1h. morn. $\frac{1}{2}$ $0^{\circ} 34' S$.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 4' 08".

Sept. 7. Mercury in conjunction with the Moon, 0h. morn. $\frac{1}{2}$ $3^{\circ} 46' S$.

Sept. 7. Venus in conjunction with the Moon, 7h. morn. $\frac{1}{2}$ $3^{\circ} 32' S$.

Sept. 11. Mars in conjunction with the Moon, 10h. morn. $\frac{1}{2}$ $6^{\circ} 7' S$.

Sept. 11. Mars and Jupiter in conjunction, 2h. aft. $\frac{1}{2}$ $2^{\circ} 12' S$.

Sept. 19. Mercury and Venus in conjunction, 4h. morn. $\frac{1}{2}$ $1^{\circ} 40' S$.

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 3' 9".

Sept. 22. Sun enters Libra: Autumn commences, 3h. aft.

Sept. 23. Mercury at greatest distance from the Sun, 10h. aft.

Sept. 28. Occultation of ζ^2 Gemorum: magnitude 4. At the time of disappearance the star will be below the horizon at Greenwich. The reappearance takes place at 11h. 11m. aft., 245° from the vertex.

In this month the Mornings decrease 46m., the Afternoons, 1h. 6m.

MORNING AND EVENING STARS.

♃ MERCURY is an evening star in the latter half of the month.

♀ VENUS is an evening star throughout the month: situated in Virgo, near to Spica, on the 22nd.

♂ MARS is an evening star: cannot be well observed owing to its great southern declination.

♃ JUPITER is an evening star: near to MARS on the 12th.

♄ SATURN between Cancer and Leo.

APPARENT DECLINATION OF THE ABOVE PLANETS.

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus, R.A. 21h. 24m. 32s., and Decl. 11° 40' N., is a very fine cluster of stars, between the mouths of Pegasus and Equuleus, much condensed towards the centre: there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true

globular form, consisting of very small stars very much compressed. It is situated in R.A. 21h. 27m. 38s., and Decl. 1° 20' S.

In the early evening, at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21h. 34m. 0s., and Decl. 23° 40' S., can be observed: it is rather bright, with a central condensation, and does not require great telescopic power to see it well. The best evenings for observation are those about the 5th.

Configurations of Jupiter's Satellites at 6h. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 8m. morn., and Twilight ends at 7h. 31m. aft., the length of the Day being 11h. 35m.

Oct. 1. Occultation of Saturn. The disappearance takes place at 3h. 59m. aft., 110° from the vertex; at the time of the reappearance the moon is below the horizon.

Oct. 3. Occultation of l Leonis: magnitude 5. The disappearance takes place at 3h. om. morn., 55° from the vertex; the reappearance at 3h. 52m. morn., 199° from the vertex.

Oct. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 4' 48".

Oct. 8. Mercury at greatest elongation (25°) West, 6h. morn.

Oct. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 5' 6s.

Oct. 20. Occultation of μ Ceti: magnitude 4. The disappearance takes place at 11h. 39m. aft., 63° from the vertex; the reappearance on Oct. 21st at oh. 41m. morn., 338° from the vertex.

Oct. 24. Occultation of χ¹ Orionis: magnitude 4½. The disappearance takes place at 9h. 2m. aft., 39° from the vertex; the reappearance at 9h. 56m. aft., 264° from the vertex.

In this month the Mornings decrease 52m., the Afternoons, 1h. 3m.

On the 1st of October, Cassiopeia, Andromeda, Pisces, and Cetus are on the meridian at midnight; while Cancer and Orion are rising, and Hercules and Capricornus setting.

In Andromeda, just below the girdle, is a large and irresolvable Nebula. It is situated in R.A. *oh.* 36m. 41s., and Decl. 40° 39' N. In Sept., 1885, a decided stellar nucleus was observed in this Nebula in R.A. *oh.* 36m. 31s., Decl. 40° 38' N.

A splendid group of stars may be observed in this month, situated in the sword-handle of Persens: it is a magnificent collection of stars, and on a fine night, without moonlight, such as the nights just before and after the 5th, affords one of the most brilliant telescopic objects in the heavens. One of the stars near the middle of the group is of a fine ruby colour; it is situated in R.A. 2h. 11m. 12s., and Decl. 50° 38' N.

RAINFALL IN NOVEMBER, 1886.

In this month rain fell on 15 days. The total fall for the month was 3'0 inches; above the average of ten years, 1871-80, by 0'62 inch.
An "Inch of Rain" means a gallon of water spread over a surface of nearly two square feet, or 3,630 cubic feet = 100 tons upon an acre.

MONTHLY NOTES.

November 1. Latest day for receiving corrections for Whitaker's Almanack.

1. Salmon-fishing with rod and line ends. Borough Councillors to be elected, to take the place of those who retire on this day. Holiday at Bank Transfer Office and Stock Exchange.

9. Mayors to be elected.

11. Martinmas; Scotch Quarter Day.

12. Sheriffs for next year nominated.

14. Solicitors', notaries', proctors', and sworn clerks' certificates expire. See Note, Dec. 15.

30. Tweed rod-fishing closes.

Configurations of Jupiter's Satellites at 5h. P.M.

Satellites not visible owing to Jupiter's proximity to the Sun.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 1m. morn., and Twilight ends at 6h. 27m. aft., the length of the Day being 9h. 35m.

Nov. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 7³⁸.

Nov. 6. Mercury at least distance from the Sun, 10h. aft.

Nov. 12. Occultation of ψ^3 Aquarii: magnitude 5. The disappearance takes place at 5h. 9m. aft., 103' from the vertex; the reappearance at 6h. 24m. aft., 267' from the vertex.

Nov. 13. Venus at greatest distance from the Sun, 1h. aft.

Nov. 16. A near approach of ξ^2 Ceti to the Moon: magnitude 4. The nearest approach of the Moon to the star occurs at 9h. 11m. aft., 10' from the vertex.

Nov. 19. Occultation of i Tauri: magnitude 5 $\frac{1}{2}$. The disappearance takes place at 9h. 57m. aft., 153' from the vertex; the reappearance at 10h. 9m. aft., 174' from the vertex.

Nov. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 9¹⁸.

Nov. 25. Saturn in conjunction with the Moon, 1h. aft. h 1° 31' S.

In this month the Mornings decrease 49m., the Afternoons, 38m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

MORNING AND EVENING STARS.

♁ MERCURY is a morning star: situated in Libra.

♀ VENUS is an evening star: near to Jupiter on the 1st.

♂ MARS is an evening star: in conjunction with the Moon at midnight on the 7th.

♃ JUPITER too near to the Sun for observation in this month.

♄ SATURN nearly stationary in Leo throughout the month.

APPARENT DECLINATION OF THE ABOVE PLANETS.

On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula on the right foot of Andromeda may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope only twenty-seven inches in focal length. It is a very elongated Nebula, dark

in the centre, and suggests the idea of a flat ring seen very obliquely. It is in R.A. 2h. 15m. 34s., and Decl. 41° 49' N. The best evenings are those about the 3rd.

Neptune can be well observed in this month: on the 20th it passes the meridian, or south, at 11h. 55m. aft., in R.A. 3h. 56m. 46s., and Decl. 18° 40' N.

Configurations of Jupiter's Satellites.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 41m. morn., and Twilight ends at 5h. 57m. aft., the length of the Day being 8h. 5m.

Dec. 3. Mars at least distance from the Sun, 6h. aft.

Dec. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 10' 5s.

Dec. 6. Mars in conjunction with the Moon, 10h. aft. δ $0^{\circ} 15' S$.

Dec. 8. Jupiter in conjunction with the Sun, 11h. aft.

Dec. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 11' 1s.

Dec. 20. Mercury at greatest distance from the Sun, 10h. aft.

Dec. 21. Sun enters Capricornus: Winter commences, 9h. morn.

Dec. 22. Saturn in conjunction with the Moon, 6h. aft. η $1^{\circ} 32' S$.

Dec. 28. Mercury in superior conjunction with the Sun, 7h. aft.

Dec. 31. Jupiter in conjunction with the Moon, 2h. aft. λ $2^{\circ} 11' S$.

Dec. 31. The Earth at least distance from the Sun, 4h. aft.

In this month the Mornings decrease 22m., the Afternoons increase 6m.

Satellites not visible owing to Jupiter's proximity to the Sun.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

MORNING AND EVENING STARS.

♃ MERCURY is a morning star in the first half of the month.

♀ VENUS is an evening star throughout the month: in conjunction with the Moon on the 6th at 2h. morn.

♂ MARS is an evening star throughout the month.

♃ JUPITER near the Sun: a morning star towards the end of the month.

♄ SATURN in Leo.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine Nebula of a pearly white colour on the tip of the Bull's southern horn, in R.A. 5h. 27m. 44s., and Decl. 21° 56' N. This Nebula is the one known as the "Crab."

midnight, and can be best observed in this month, although favourably situated in both November and January. This magnificent constellation contains the grandest of all the Nebulae, situate in the Sword-Scabbard. A line drawn from α Orionis through γ, the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye. Evenings about the 2nd are the best.

Tidal Constants,

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.

EXAMPLE 1.—Required the time of high water at Aberdeen on January 15th:—

Time of high water at London Bridge 3A. 7m. Morn.
Subtract tide interval..... 0 58

Time of high water at Aberdeen..... 2 9 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on January 15th:—

Time of high water at London Bridge 3A. 7m. Morn.
Add tide interval..... 2 18

Time of high water at Scarborough .. 5 20 Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken,

in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 12 hours; in that case, the excess will be the time of high water after the noon or midnight following, according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, January 11th, aft:—

Time of high water at London Bridge
on January 12th + 12 hours..... 12A. 43m. Morn.
Subtract tide interval..... 0 58

Time of high water at Aberdeen, Jan. 11th 11 45 After.

To use this Table, take the Sun's declination in the left-hand column, and under the required latitude on the horizontal line will be found the apparent time of Sunset. Subtract the quantity found as above from 12h., and the remainder will be the apparent time of Sunrise.

This Table is arranged for Northern latitudes, but will serve equally well for Southern latitudes by changing the declination from North to South, and vice versâ.

DECLINATION.	LATITUDE.

The local mean time of the observed altitude, when reduced to the corresponding Greenwich mean time, may be converted into sidereal time by means of the table on next page. It will be observed that the sign on the left-hand side of the correction in Table I. is to be used when the argument is on the left, and *vice versa*; + means that the correction is to be added to the reduced altitude, and - that it is to be subtracted. The corrections derived from the double-entry Tables II. and III. are always added. In order to make the quantities taken out from Table III. additive they have been increased by 1; this quantity must therefore be taken away from the final result.

TABLE III. (1888.)

			30 4'93	60	60 9'86		30'08	60	60'16

The Sidereal Time required is equal to the Sidereal Time at the preceding Noon, added to the Equivalent to the given Mean Time.

Let it be required to find the sidereal time corresponding to the mean time 21h. 15m. 30s. on November 2:—

Sidereal Time at Noon on November 2.....	H. M. S.	14 48 45
Mean Time intervals and equivalents from table above	21h. =	21 3 26'99
	15m. =	15 2'46
	30s. =	30'08
	0'5 =	0'50

Corresponding Sidereal time = 12 7 45'03

This table may also be used to show the acceleration of sidereal on mean solar intervals, by subtracting the mean time arguments from their sidereal equivalents.

* Peculiar to Russia.

The Days of the Roman Month.

In the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year — which, with the Romans, began with March — were called Quintilis and Sextilis; afterwards they were named in honour of the emperors, Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days before the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*die tertio ante Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*die undevicesimo ante Kal. Jan.*), Dec. 13th being *Idibus Decembris*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

Previous to 1752 the above dates are computed from the Old Style. Those printed in heavier type are leap-years. 1752 had E D up to September 2, but A from September 14 to December 31, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. Until then also the years were considered to begin on March 25; but that, as it did

not affect the date of Easter, is not noticed in this Table. The Table of Movable Feasts in the Prayer-Book gives all the others after finding Easter in this. The Sunday Letters in the Calendar then enable any one to count the days of the week from Sunday. The tables in modern Prayer Books are calculated for the New Style.

The French Republican Calendar.

This, although reckoned from the 22nd September, 1792, was not introduced until the 22nd November, 1793. It remained in use only till the 31st December, 1805. The Gregorian Calendar was restored January 1st, 1806 (Nivôse 10, Year XIV.). The months varied in different years, thus Nivôse r commenced December 21st in 1793, December 22nd in 1795, December 21st in 1796, December 22nd in 1799, December 23rd in 1803, and December 22nd in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire (<i>Vintage</i>), 23 Sept. to Oct. 22 Brumaire (<i>Foggy</i>), 23 Oct. to Nov. 22 Frimaire (<i>Sleety</i>), 22 Nov. to Dec. 21 Nivôse (<i>Snowy</i>), 22 Dec. to Jan. 21 Pluviôse (<i>Rainy</i>), 21 Jan. to Feb. 20 Ventôse (<i>Windy</i>), 20 Feb. to Mar. 19	Germinal (<i>Budding</i>), 22 Mar. to Apr. 21 Floréal (<i>Flowery</i>), 21 April to May 20 Prairial (<i>Pasture</i>), 21 May to June 20 Messidor (<i>Harvest</i>), 20 June to July 19 Thermidor (<i>Hot</i>), 20 July to Aug. 19 Fructidor (<i>Fruit</i>), 19 Aug. to Sept. 18
--	---

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Primidi*), dedicated to Virtue; (*Duodi*) to Genius; (*Tridi*), to Labour; (*Quartidi*), to Opinion; and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, a sixth day, the 22nd or 23rd September (*Sexidi*), "Jour de la Révolution," was added. This variation of dates has led to considerable confusion, but those who may wish to trace the fourteen years will find some very elaborate tables in the English ed. of Bourienne's "Life of Napoleon": Bentley.

The time given throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between this and apparent time, or the time as shown by the Sun.

In all cases where Noon is used, mean Noon is to be understood.

SIGNIS OF THE ZODIAC.

♈	Aries.....	The Ram.
♉	Taurus.....	The Bull.
♊	Gemini.....	The Twins.
♋	Cancer.....	The Crab.
♌	Leo.....	The Lion.
♍	Virgo.....	The Virgin.
♎	Libra.....	The Balance.
♏	Scorpio.....	The Scorpion.
♐	Sagittarius.....	The Archer.
♑	Capricornus.....	The Goat.
♒	Aquarius.....	The Water-Bearer.
♓	Pisces.....	The Fishes.

SIGNIS OF THE PLANETS.

♁	Ascending N. de.	♁	Descending Node.
CONJUNCTION ♂.		OPPOSITION ♀.	
h. Hours.	°	Deg. of Arc, or Ther.	
m. Minutes of time.	'	Minutes of Arc.	
s. Seconds of time.	"	Seconds of Arc.	

Conjunction.—A Planet is in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. This state may happen to all the Planets; those whose orbits lie between the Sun and Earth, as well as those whose orbits are exterior to that of the Earth—the former class being called *inferior*, and the latter *superior* Planets. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds: the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both positions.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the earth. This can only be said of Planets whose orbits are exterior to that of the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to

superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from a spectator on the Earth, some of the Fixed Stars, and occasionally one or other of the Planets; these occurrences are called *Occultations*. Among the "Celestial Phenomena" are given the times at which certain of these Occultations take place, as well as the exact point on the Moon's limb where the observer is to look for the phenomenon; this point is reckoned from the vertex, or highest upper portion of the Moon's image, towards the right hand, as seen in an inverting telescope, counting continuously from 0° up to 360°. The disappearance always takes place on the right-hand side of the moon, and the reappearance on the left, when viewed through an inverting or astronomical telescope. Stars to the fifth magnitude only have been included in this work. Should the instrument used be of the non-inverting kind, the vertex may still be used as the point to count from, and in the same direction, only adding 180° to the distance given from vertex for the inverting telescope if the number be less than 180°, and subtracting 180° if greater; bearing in mind, in this case, that the disappearances will take place on the left-hand side of the Moon's image, and the reappearances on the right.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

ECLIPSES.

In the year 1888 there will be three Eclipses of the Sun and two of the Moon.

I. A total Eclipse of the Moon, January 28—29, visible at Greenwich. First contact with the shadow takes place at 9h. 30m. aft., mean time at Greenwich, 93° from the most northern point of the Moon's limb counting towards the East; the middle of the Eclipse at 11h. 20m. aft.; the last contact on January 29 at 1h. 10m. morn., 74° from the most northern point of the limb counting towards the West; in both cases for the *direct* image, that is, as seen with the naked eye.

II. A partial Eclipse of the Sun, February 11—12, invisible at Greenwich. Begins on the Earth generally on February 11, 9h. 55m. aft., mean time at Greenwich, in longitude 04° East of Greenwich, and latitude 64° South. Greatest Eclipse on February 11, 11h. 38m. aft., in longitude 36° West of Greenwich, and latitude 71° South. Ends on the earth generally on Feb. 12, 1h. 22m. morn., in longitude 95° West of Greenwich, and latitude 40° South. At the time of greatest Eclipse nearly one half of the Sun will be hidden by the Moon.

III. A partial Eclipse of the Sun, July 9, invisible at Greenwich. Begins on the Earth generally at 4h. 50m. morn., mean time at Greenwich, in longitude 46° East of Greenwich, and latitude 48° South. Greatest Eclipse at 6h. 31m. morn., in longitude 79° East of Greenwich, and latitude 68° South. Ends on Earth generally at 8h. 12m. morn., in longitude 118° East of Greenwich, and latitude 51° South.

IV. A total Eclipse of the Moon, July 23, partly visible at Greenwich. The first contact with the shadow takes place at 3h. 55m. morn., 95° from the most northern point of the Moon's limb counting towards the East; beginning of the total phase at 4h. 54m. morn.; middle of the Eclipse at 5h. 45m. morn.; end of total phase at 6h. 36m. morn.; last contact with the shadow at 7h. 35m. morn., 82° from the most northern point of the limb counting towards the West, in both cases for the direct image. Only the early portion of this Eclipse can be observed at Greenwich, as, on reference to the table of Moon risings and settings, it will be seen that the Moon sets at 4h. 10m. on the morning of July 23.

V. A partial Eclipse of the Sun, August 7, visible at Greenwich. Begins on the Earth generally at 5h. 2m. aft., in longitude 139° East of Greenwich, and latitude 71° North. Greatest Eclipse at 6h. 6m. aft., in longitude 53° East of Greenwich, and latitude 70° North. Ends on the Earth generally at 7h. 10m. aft., in longitude 7° East of Greenwich, and latitude 53° North. A very small portion of the Sun is eclipsed. The magnitude of the Eclipse is represented by 0.20, where the Sun's diameter = 1.

MAGNETIC ELEMENTS.

Instead of predicting the values of the magnetic elements for the current year of the *Almanack*, it appears that it would be a more useful arrangement to give, as in the following table, the actually observed values of these elements for the last six years, leaving our readers to draw from them their own inferences as to the values for the current year.

Year.	Mean Magnetic Declination at Greenwich West.	Annual Variation.	Mean Inclination or Dip of Needle at Greenwich.	Annual Variation.
1881	0 27'1	1	67 34'6	1'0
1882	18 22'3	4'8	67 34'1	0'5
1883	18 15'0	7'3	67 31'6	2'5
1884	18 8'0	7'0	67 30'0	1'6
1885	18 1'7	6'3	67 27'8	2'2
1886	17 54'5	7'2	67 27'0	0'8

As regards the amount of accuracy which may be expected in assuming a value for the magnetic declination at any place and time, we cannot do better than quote the opinion of Mr. Ellis, the Superintendent of the Magnetical and Meteorological Department at Greenwich, as expressed in a letter to the Editor of the *Colliery Guardian* of June 2, 1882. After speaking of the disturbance of the needle by magnetic storms, he goes on to say, that "at any particular hour of the day the value of the magnetic declination at that hour, through a month, may vary at times as much as from 5' to 10'. Besides which, the mean value of magnetic declination for any particular place in England at which no magnetic observations are made can in general only be inferred from the map prepared by the late Sir F. Evans, B.N., Hydrographer to the Admiralty, and given in vol. 162 of the *Philosophical Transactions*, making allowance for the change which has since occurred (the map is for the year 1872), according to the best available data. Values found in this way are therefore approximations only."

The diurnal variation of magnetic declination at Greenwich is about 12' in summer and 7' in winter. The needle occupies its mean position about 10h. A.M., and again about 6h. P.M., throughout the year. It reaches its most westerly position at about 2h. P.M., and its most easterly position during the night or early morning, according to the season of the year.

THE TIDES.

In order to understand the action of the Moon on our Earth as a Tide-producing body, we will suppose that the Earth consists of a smooth sphere, covered all over with water of a uniform depth, and that both bodies are at rest with respect to each other; then, the attraction of the Moon on the water nearest to her will be greater than her attraction on the solid Earth, and will cause a heaping-up of the water towards her. This appears natural enough; but, at first sight, it does seem somewhat paradoxical that the water should also be heaped-up in a direction opposite to the Moon. This is explained by the fact that the water, on the side away from the Moon, is attracted less than the solid ball of the Earth; and the latter is, as it were, drawn away from the water; thus causing the liquid to be swelled up, although not quite to the same extent as on the other side; because, its distance being greater than in the first case, the moon-attraction is less.

Although the Sun is at a much greater distance from the Earth than the Moon, yet, from its very much greater mass, it exerts a considerable influence in producing the Tides of the Ocean, and acts on the water in precisely the same manner as does the Moon, producing another spheroid of equilibrium, with its major axis in a line joining the Earth and Sun. The heaping-up of the waters, due to the Sun, is two-fifths of that due to the Moon; and if the Sun and Moon, as seen from the Earth, were separated by an angle of 90°, the axes of the wave spheroids would be separated by that quantity, and (if the three bodies were at rest with respect to each other) so they would remain. But since these conditions do not obtain in Nature, and the Earth, Moon, and Sun, instead of being at rest with regard to each other, are constantly changing their relative positions and distances (the Earth at the same time revolving on her axis), these motions never give the water time to assume the spheroidal shape. Instead of this, an imperfect form of it travels round the globe in a lunar day, which being on an average about 50 minutes more than the solar day, causes the Tides to come later, each successive day, by about that quantity. It will be seen, from what has been already said, that when the Sun, Moon, and Earth are in the same straight line, the solar and lunar waves are coincident—that is, the Sun and Moon are acting in concert; and the consequence will be, that the Tides about this time will rise higher, and fall lower, than they do when the Sun and Moon are at right angles to each other. When this latter condition obtains, their action is antagonistic, and we have a Tide that never rises so high, nor falls so low, as in the former case: that is to say, the highest, or *spring* Tides, happen at the full and new moons; the lowest, or *neap*, at the first and last quarters.

The rise of water which takes place in tidal rivers is not due to the direct action of the Moon on their waters, but is, in consequence of the change of level in the surface of the Ocean,

caused by the tidal wave passing the mouth of the river.

It remains to be noticed that the direction of strong winds, as well as the varying pressure of the atmosphere, considerably affects both the times and the heights of high water. Thus, in the North Sea a strong N.N.W. gale and a low barometer raise the surface 2 or 3 feet, and cause the tide to flow all along the coast from the Pentland Firth to London half an hour longer than the time set forth in the Tables. Easterly, S.E. and S.W. winds produce opposite effects, which will be felt as far down the Channel as Dungeness. On the contrary, at the entrance of the Channel, at Plymouth, and as far up as Portland, south-westerly winds, with a low barometer, raise the surface of the water; and north-easterly winds and a high barometer always lower it.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of the year; and this would give rise to no other phenomenon if the plane of this apparent path had been parallel to the Earth's Equator: the Sun would simply appear to occupy different positions among the Stars from day to day; the Days and Nights would be equal all over the Globe and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at $23\frac{1}{2}^{\circ}$; consequently, the Sun is alternately seen above and below the Equator by this amount, causing varying Seasons on the Globe, and Days and Nights of very unequal duration; long days and Summer to the Northern hemisphere when the Sun is North of the Equator, and *vice versa* when South of it.

This inclination of the two planes will cause the Sun to cross the Equator twice in the year, viz., once in the Spring, and again in the Autumn, at which times the Days and Nights are equal all over the world; and we experience for a day or two what would be the constant state of our climate if the Sun moved in a plane coincident with the Equator.

From Spring, through Summer to Autumn, the Sun traverses exactly one half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit, and the Law of Areas, as it is called by Astronomers—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. To do this, the Earth when nearer to the Sun, as at the Winter Solstice, must move more quickly than when farther away, at the Summer Solstice; because then the line joining the two bodies is shorter than in the latter case; the effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's atmosphere is generally supposed to extend some forty miles in height, probably very much farther, but becoming, at only a few

miles from the surface, of too great a tenuity to support human life. The condition and motions of this vast aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and when laden with clouds, hindering the Earth from radiating its acquired heat into space. The amount of heat absorbed in its passage through the atmosphere will depend upon the thickness of the stratum which the rays have to penetrate, and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, and consisted entirely of land or water, the mean temperature of our Seasons would depend solely on our geographical latitude, and we should then find that all places on the same parallel would enjoy the same temperatures; but being, as it is, made up of water and land, very unequally distributed, the former occupying two-thirds of the entire surface of the Globe, we have the temperature of the Seasons of places on the same parallel of latitude greatly modified by the surrounding masses of land and water. The great capacity of water for heat, and its low power of radiation, make the great Ocean, extending from Pole to Pole, the reservoir which stores up for us the heat it has received from the Sun; while the land, radiating again its heat very quickly, would soon grow cold. The principal medium by which this heat is conveyed to the land is that of the Winds, which, receiving their warmth and moisture from the water, pass over the land, and compensate for the loss of heat which the latter suffers from radiation. From this cause it is that islands enjoy more equable Seasons than inland countries, being neither so cold in Winter nor so hot in Summer; since the same clouded skies that retard the cooling of the land by radiation, also shield it from the rays of the Sun in Summer. But in the interior of continents where the winds have been robbed of their moisture on their passage from the coast, the fiercest extremes are known to prevail between the Summer and Winter temperatures. Moscow has a difference between its Summer heat and Winter cold of 82° , London of 57° , while in the Shetland Islands, and at Penzance, in Cornwall, the differences are only 46° and 48° respectively. Beyond the fact of the presence of water, we must not forget that the oceans and seas are traversed by currents of warm water from the Equatorial regions, which greatly promote the distribution of heat. The chief of these prevail in the North Atlantic Ocean, and it is to one of them—the Gulf Stream—that we in a great measure owe the mildness of the western coasts of Europe. This remarkable current, issuing from the Gulf of Mexico, flows in a north-easterly direction along the shores of America, and on encountering the Banks of Newfoundland, splits into two branches, one of which proceeds to the Azores, and the other to the British Isles.

THE ASTEROIDS, OR SMALL PLANETS.

Besides the Planets whose Risings and Settings, &c., are given in this Almanack, there are a vast number of small bodies revolving round the Sun, whose orbits lie between those of Mars and Jupiter.

The mean distances of the Planets from the Sun all increase, outwards, in a certain progression; excepting that between the orbits of Mars and Jupiter there exists a greater gap

than, according to this law, there should be. Kepler suggested that there was, perhaps, another Planet between Mars and Jupiter, not at that time discovered. This idea, at the beginning of the present century, was warmly taken up by the German astronomers, and they formed themselves into a society for the purpose of searching for the suspected Planet. The Planet was found very soon after, although not by one of the newly-formed Society, but by the Italian astronomer Piazzi, who gave it the name of Ceres.

As far as its orbit and position in space were concerned, this addition to the planetary family agreed very well with the predicted Planet; but it was extremely small, having a linear diameter of little more than 150 miles! About a year after this another was discovered by Olbers, who gave to it the name of Pallas. This was a still smaller body, its linear diameter being some 50 miles less than that of Ceres. Two years later, while constructing Star Charts, Harding, of Lillenthal, discovered the third of the series, on which he conferred the name of Juno, a Planet still smaller than Pallas. After some three years spent in searching the heavens, Olbers discovered his second member of the now immense family, and Gauss gave it the name of Vesta. No more were found until Hencke, at the end of 1845, discovered Astræa; then, with but little intermission up to the present time, each year has seen several new members added to the system, making at this time, November 1, 1887, a total of 271. For a complete list of these bodies see p. 79.

VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known and the most remarkable amongst this class of Stars is one situated in the constellation Cetus, and known by the name of α Ceti, or Mira Ceti. It has a period of nearly 331 days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months, until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. It is recorded, in Lalande's "Astronomy," that between the years 1672 and 1676 this Star was not visible at all. The month of October is the best time for observing it. It passes the meridian at midnight about the 24th, and will be found in R. A. $2^h. 13^m. 42^s.$ and South Declination $3^\circ 29'$.

Another remarkable variable Star is Algol, β Persei. This has a very short period, not quite three days—and ranges from the second to the fourth magnitude. It continues at its maximum for two days and a half, then begins to decrease very suddenly, and in rather more than three hours is reduced to a star of the fourth magnitude; after remaining at this magnitude for a quarter of an hour, it again attains to its maximum, in the same time that it took in passing from it to the minimum. This Star will be found in Right Ascension $3^h. om. 53^s.$ and North Declination $40^\circ 32'$. It can be well

observed in October and November. It souths about midnight on November 5.

The variable Star β Lyrae is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R. A. $18^h. 45^m. 57^s.$ and North Declination $33^\circ 14'$. The best time for observing it is in the months of June and July.

The Star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of $5\frac{1}{2}$ days. In passing from the minimum to the maximum, it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R. A. $22^h. 25^m. 15^s.$ and North Declination $57^\circ 38'$. August and September are the best months in which to observe it.

There are two hypotheses suggested to explain the phenomena exhibited by the variable or periodical Stars; one of which endeavours to account for the variations in magnitude by supposing that opaque bodies are revolving around these particular Stars, and that at certain times they are interposed between the Earth and the Star, and so cut off from us a portion of the luminous rays of the latter. The other hypothesis suggests that the Stars themselves may have portions of their surface of unequal reflecting power, and that in their revolutions they present to us in turns these more or less bright parts, and so cause the variations that we observe. This theory fails to explain the changes observed in the stars of the Algol type, and is only applicable to such as are quite regular in their fluctuations. Professor Pickering has shown that none of the theories put forward to account for the variability of the light of such stars as Algol will satisfy the observed changes, except that of an opaque satellite. Adopting this theory in his paper on Algol, he finds theoretically such a satellite whose position and movements would agree with the observed facts.

The above-mentioned "variables" are but a very small portion of the Stars which are known to experience fluctuations of magnitude, but they are the most celebrated examples of their class. In this department of Astronomy much valuable work has been done by amateurs, and it is one which yet offers a field for farther exertions.

TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by certain bars of steel, called Magnets, of attracting pieces of iron and also other magnets; beyond this idea very little, if any, meaning is popularly attached to the term Magnetism.

Every magnet has two poles, each pole having, as the term implies, exactly opposite properties, such that if we suspend one magnet by a thread free to move in any direction, it will be found that on bringing another magnet, held in the hand, near to one end of the suspended magnet, if the poles of each are of like properties, they will repel each other, but if of unlike, they will be attracted towards each other. By placing the magnet held in the hand in the proper

position, the movable magnet may be made to take up any required direction, as long as the magnetism in the magnets and their relative positions remain the same. In the Mariner's Compass we have a case of this kind, where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic North Pole of the Earth, differing from the true or Astronomical North by a quantity called the "Variation." It is this property of magnets which renders the compass so valuable an instrument in navigation. The Variation of the compass is not only different for different places on the Earth, but is moreover liable to slow variation from year to year, causing it in the course of centuries to oscillate from East to West of the Astronomical meridian. In 1580, at London, the needle had an Eastern declination of about $11\frac{1}{2}^{\circ}$; between 1657 and 1662, its direction coincided with the plane of the Astronomical meridian; that is to say, the declination was zero; since then it travelled westwards, and reached the maximum Western declination in 1815, and is at the present time (1883) approaching the zero, previously to again becoming Easterly.

The compass-needle being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis placed in the magnetic meridian, and being left free to move in a vertical plane, it would have been found to *Dip*, as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this *inclination* or *dip* varies also in different places on the globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situate in 97° West longitude and 70° North latitude. The South Magnetic Pole is situated about 168° East longitude and 76° South latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which Observatories have been established all over the world, and elaborate series of observations made on the motions of variously suspended magnets (their movements in many Observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

FORECASTING THE WEATHER.

The great bearing which the weather has on human pursuits very early led mankind to study it with a view, if possible, of predicting its nature, and obtaining warning of those violent atmospheric disturbances which not only strew our narrow seas with wrecks, but also render nugatory, in a greater or less degree, the labours of the farmer.

The bases on which the earlier meteorologists

founded their predictions were various, the phases of the Moon being generally supposed to have much to do with it. An examination of the Greenwich Observations for more than half a century proved the complete fallacy of this theory. Such weather prophets as Moore and Zadkiel, in their almanacks, claimed to be able to predict the weather, day by day, for a whole year; but meteorological science, as far as it goes at the present time, has shown that, in the British Isles, the weather cannot with any certainty be forecast for more than three or four days at farthest.

Depressions on the surface of the great aerial ocean surrounding the globe are marked by the barometer, and observation shows that the winds always blow towards the place of the lowest barometer reading; now, if an observer could see at one glance all the barometer readings over a large area of country, he would be enabled to trace the march of the storm, and, by means of the telegraph, give warnings to those places where the storm may be expected. This was the method adopted some years ago by the late Admiral Fitzroy, and is found to be the most trustworthy method on which weather predictions can be based. Our nearness to the Atlantic Ocean greatly interfered, for want of more westerly barometer readings, with the power of forecasting for more than two or three days, and generally for a much shorter time than this, as most of the storms that visit the western coasts of Europe travel from the southwest towards the north-east, with a greater or less velocity, varying from 20 to 40 miles an hour.

As might have been expected, the connection of the Old and New Worlds by means of electric cables has given much greater facilities for storm-warnings. Many of the great storms which burst upon our coasts appear to have had their origin in the American continent. The great area from which the United States' Signal Service can collect their data enables the American meteorologists to predict with very considerable certainty the time when such storms may be expected here; and not only that one may be looked for, but also the particular character of the visitation.

It may sometimes happen that they do not exhibit quite such features as we were led to expect; may not, in fact, be the *identical* storms; but the wonder rather is, that they should traverse 3,000 miles and not differ greatly from what they were some four or five days earlier, when leaving the coasts of America.

In some cases the predicted storms do not present themselves to us at all: they seem to have spent their force in the course of their journey over the Atlantic Ocean; while, on the other hand, we have the testimony of the captains of some of the Transatlantic steamers, that they have experienced heavy gales on the American coast, which have travelled with them all the way to Europe with unabated force. Great as has been the progress made in late years by meteorologists concerning the science of storms, very much yet remains to be done before we can call meteorology an exact science.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is its angular distance measured along the Equator from the point of intersection of the Equator and Ecliptic. In the time of the ancient astro-

nomers, this point was situated in the constellation of Aries, and called by them the "First Point of Aries," but it has since then retrograded considerably behind that constellation. Modern astronomers, however, still speak of this zero point, whence Right Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longitudes, while the astronomer reckons his from the meridian of the first Point of Aries.

Since a well-regulated astronomical clock should show *oh. om. os.* when the first Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon. The rule may be thus stated:—*From the given Right Ascension subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of 10 secs. an hour.* If the Right Ascension should be smaller than the Sidereal time to be subtracted, then 24 hours must be added to it. As an example:—At what time will Regulus South on March 15?

R. A. of Regulus + 24h. 34h. 2m. 24s.
 Sidereal Time at Mean Noon (sub.) 23h. 34m. 5s.

Diminish by the Acceleration for 10h. 31m. 15s. at 10s. per hour 10h. 28m. 19s.
1m. 45s.

Approximate mean time of Southing, March 15 10h. 26m. 34s.

In a similar manner the Sidereal time corresponding to any mean time may be found. Suppose, for instance, that we wish to know approximately what the Sidereal time would be at 9:30 P.M. on November 5, we have merely to add Greenwich time to the time given in the column headed Sidereal Time at Mean Noon of that date:—

Sidereal time at mean noon 15h. om. 35s.
 Greenwich time (add) 9h. 30m. —
oh. 30m. 35s.

Add for acceleration for 9h. 30m. at 10s. per hour 1m. 35s.

Sidereal time November 5 at 9h. 30m. P.M. oh. 32m. 10s.

To observers who are not furnished with a Sidereal Clock the Sidereal times at Mean Noon will be found very useful for easily finding the approximate mean times of Southing of the Stars, and also for ascertaining with equal readiness the Sidereal time corresponding to any required moment of mean time. If greater accuracy is desired, use the table on page 65.

ECLIPSES OF JUPITER'S SATELLITES.

The accompanying Table contains all the Eclipses of the first Satellite, and those only which are visible at Greenwich of the second, third, and fourth Satellites. The Roman numerals indicate the Satellite eclipsed; the letters D

and R signifying respectively, Disappearance and Reappearance. Those Eclipses of the Satellites which are visible at Greenwich have an asterisk after the D or R in the second column.

From January until May 22 the Disappearances and Reappearances will take place on the Western side of the Planet, and from May 22 to November 16 on the Eastern side. But if an inverting telescope be used to observe them, these positions will be reversed in the field of view—the phenomena taking place on the Western side of the planet appearing on the left hand, and those on the Eastern side on the right hand.

The mean time of Eclipse for any other place than Greenwich may be easily found, by simply applying to the times given in the table the difference of longitude between Greenwich and the place for which the time is required, adding the difference if the longitude of the place is East of Greenwich, and subtracting if West.

Eclipses of Jupiter's Satellites in 1888.

EXPLANATION OF THE ASTRONOMICAL TABLES.

THE Mean Right Ascension and Declination for any other year, either before or after 1888, may be found from this table by multiplying the annual variation by the number of years from 1888, and applying it to the quantities above given; remarking, that if the required date be earlier than 1888, the signs of the annual variations must be changed. In applying the corrections, to reduce to any other date, to the Declinations, it must be borne in mind that N. Declination means +, and S. Declination —, and that the corrections must be added algebraically.

Configuration of Jupiter's Satellites.

This column exhibits, at the particular hour mentioned, the respective position of Jupiter and his Satellites, as seen in an inverting telescope. The white circles represent the Planet, and the numerals 1, 2, 3, and 4 the respective Satellites: a black circle is intended to show, either that the Satellite whose numeral it stands in the place of is in the shadow of the Planet (eclipsed), or else is behind the disc of Jupiter (occulted); the sign ♃ indicates that the Satellite in question is on the disc of the Planet.

Sidereal Time at Mean Noon.

This column indicates the Sidereal Time at Mean Noon on each day of the year, and is the time which the Observatory or Astronomical clock should show when the Mean Time clock points to Noon.

At the bottom of the pages containing the Tide Tables for each month, and immediately underneath the Right Ascension and Declination of the Pole-Star, &c., are given the places of a few of the more conspicuous Nebulae

and Star Clusters, derived chiefly from the Bedford Catalogue. Most of these may be seen pretty well with a telescope of from three to four inches aperture.

The other astronomical portions of the Almanack will require no more explanation than will be found at the head of the respective columns.

Under the head "Eclipses, Occultations, and other Celestial Phenomena," in each month, will be found the "Mean Time of the Sun's Semidiameter passing the Meridian," for the 5th and 20th days. This will be useful in determining time by the Dipleidoscope or similar instrument, when, from the interference of clouds, &c., only one limb of the Sun is observed. From the values on the 5th and 20th, that for any other day can with sufficient accuracy be easily ascertained by interpolation.

MEAN RIGHT ASCENSION AND DECLINATION OF FOURTEEN OF THE PRINCIPAL FUNDAMENTAL STARS VISIBLE IN THE SOUTHERN HEMISPHERE, FOR JANUARY 1, 1888.

It is supposed that α² Centauri, one of the brightest stars in the Southern Hemisphere, is the nearest of the fixed stars to the Earth. The researches on its parallax by Henderson and Maclear gave for its distance from the Earth, in round numbers, twenty billions of miles. At the inconceivably rapid rate at which light is propagated through space, it would require three years and three months to reach the Earth from this star.

This Table of Mean Refractions is derived from that by the late Professor Bessel. With the argument 'apparent altitude' it gives the correction to be applied to observed altitudes in order to free them from the effect of atmospheric refraction. As refraction causes all bodies to appear more elevated above the horizon than they really are, the quantities in the table must be *subtracted* from the observed altitudes.

For an altitude not in the Table, the value of the mean refraction may easily be obtained by interpolation. For example, let the mean refraction be required for 6° 35'; here opposite to 6° 30' we have 7' 50", and opposite to the next argument, 7° 0', 7' 20" for the mean refraction, and we see that for an increase of 30' in the altitude, the refraction has decreased 30"; therefore a simple proportion shows us that we must decrease the value corresponding to 6° 30' by 5", which will give 7' 45" as the mean refraction corresponding to 6° 35' of apparent altitude.

TIDAL CURRENTS.

The tidal wave in the deep sea is merely an undulation; but, when shallow seas or bays are reached, the movement of the water is discernible. The general principle is, that in the deep sea there is a quick movement of the wave and a slow movement of the water; in the shallow sea there is a slow movement of the wave and a quick movement of the water, which is called the Tidal Current. These currents are frequently spoken of as the flood and ebb tides; but the terms (although sanctioned by usage) are not correct, because flood and ebb are applied to the rising and falling of the water, which is quite a different thing. The flood current in a channel supplies water for the wave, but the wave requires water after its summit has passed any particular point, so that at that point flood current continues although ebb tide may have commenced. Similarly the current may continue after flood tide has commenced. Tidal currents have also much to do with the formation of bars at the mouths of rivers. Therefore, unless the harbour engineer have a full knowledge of their set and force, and whether they act in conjunction with or in opposition to the Ocean Currents, his plans for improvement may be rendered nugatory.

ASTEROIDS.

The following is a complete list of all Asteroids discovered up to the present time, with the names they have received:—

1 Ceres	91 Egina	181 Eucharis
2 Pallas	92 Undina	182 Elsa
3 Juno	93 Minerva	183 Ietria
4 Vesta	94 Aurora	184 Deiopeia

The English Octarchy.

During the Heptarchy, or during the greater part of the time the Heptarchy existed, the provincial Kings or Heptarchs acknowledged a leader, or Octarch, entitled <i>Rex Gentis Anglorum</i> , of whom Hengist, King of Kent (455), was the first, and Egbert (820) the last.		Edwin, 4th King of Northumbria	A.D.	630
		Oswald, 5th King of Northumbria		635
		Osweo, 8th King of Bernicia		644
		Wulfhere, 6th King of Mercia		670
		Ethelred, 7th King of Mercia		675
		Cenred, 8th King of Mercia		704
		Celred, 9th King of Mercia		709
		Ethelbald, 10th King of Mercia		716
		Offa, 11th King of Mercia		758
		Egferth, 12th King of Mercia		795
		Kenulph, 13th King of Mercia		796
		Egbert, 17th King of Wessex, made Bretwalda or leader, and the King of all England		827
Hengist, 1st King of Kent	A.D.	457		
Ella, 1st King of the South Saxons		490		
Cerdic, 1st King of Wessex		519		
Kenric, 2nd King of Wessex		534		
Ceawlin, 3rd King of Wessex		560		
Ethelbert, 5th King of Kent		593		
Redwald, 3rd King of East Anglia		616		

THE line (or rather lines) of native sovereigns is a very long one; some Irish historians have traced the succession to about the period of the Flood, "before which time there were many princes," but, unfortunately, the records have not been preserved. According to Keating, the first sovereigns after the Milesian Conquest, of whom there is any "absolute certainty," were Heber and Heremon, Milesian princes from Galicia, in Spain, who conquered Ireland, and gave to its throne a race of 171 kings. These two princes reigned jointly from the year 1300 B.C. till 1291, when Heremon alone ruled. Of their successors, who reigned from the year 1285 B.C. to the Christian era, about 169 in number, only fifteen died comfortably in their beds; four died of the plague or some malignant distemper, the rest being assassinated, killed in battle, or dying other violent deaths. Home Rule was in existence from the earliest times till after the Conquest of Ireland by Henry II. in 1172; the Rulers, however, appear to have had anything but a peaceable quiet time. The following is an "authentic list" of—

IRISH SOVEREIGNS AFTER THE BIRTH OF CHRIST.

Fearaidhach-Fionfachtna — "a most just A.D. and good prince"—slain by his successor	4
Fiachadh-Fion—slain by his successor	24
Fiachadh-Fionohudh—the Prince with the White Cows; "murdered by the Irish plebeians of Connaught"	27
Cairbre-Cinncait—murdered in a conspiracy	54
Elim—slain in battle	59
Tuathal-Teachtmar—slain by his successor	79
Mal, or Mail—slain by his successor	109
Feidhlimh— "an excellent justiciar;" died a natural death	113
Cathore Mor, or the Great—had thirty sons	122
Conn Ceadchadhach, called the Hero of the Hundred Battles—slain	125
Conaire—killed	145
Art-Aonfhir, the Melancholy—slain in battle	152
Lughaidh, surnamed Mac Conn—thrust through the eye with a spear in a conspiracy	182
Feargus, surnamed Black-teeth—murdered at the instigation of his successor	212
Cormac-Ulfhada—"a prince of most excellent wisdom, and kept the most splendid court that ever was in Ireland;" choked by the bone of a fish at supper	213
Eochaidh-Gunait—killed	253
Cairbre-Liffeachair—slain in battle	254
Fiachadh—succeeded his father; slain in battle by his three nephews	282
Cairioll or Colla-Uais—dethroned	315
Muirredhach-Tireach—slain by successor	319
Caolbhach—slain by his successor	352
Eochaidh-Moidhmeadhain—natural death	353
Criomathan—poisoned by his sister to obtain the crown for her son	360
Niall—surnamed of the nine hostages; killed in France, on the banks of the Loire	375
Dathy—killed by a thunderbolt at the foot of the Alps	398
Laoghaire—killed by a thunderbolt	421
Oilioll-Molt—slain in battle	453
Lughaidh—also killed by a thunderbolt	473
Murtough—died naturally	493
Tuathal-Maolgarbh—assassinated	515
Diarmaid—fell by the sword of Hugh Dubh	528
Feargus, in conjunction with his brother Daniel; manner of their deaths unknown	550
Eochaidh, jointly with his uncle Baodan; both slain	551

Ainmereach—deprived of his crown and life	554
Baodan—slain by the two Cuimins	557
Aodh or Hugh—killed in battle	558
Hugh Slaine—assassinated	587
Aodh-Uaireodhna—killed in battle	591
Maolcolha—defeated in a dreadful battle, in which he was slain	618
Suibhne-Meain—killed	622
Daniel—died a natural death	635
Conall Claon, jointly with his brother Ceallach—the first was murdered, the other drowned in a bog	648
Diarmaid and Blathmac—both died of the plague	661
Seachnasach—assassinated	668
Cionfaola—succeeded his brother; murdered	674
Fionachta-Fleadhna—murdered	678
Loingseach—killed in battle	685
Congal Cionmaghair—"a cruel persecutor of the Irish Church, without mercy or distinction;" sudden death	693
Feargal—routed and slain in battle	702
Fogartach—slain in battle	719
Cionaoth—defeated and found dead on the battle field	720
Flaithbheartagh—became a monk	724
Aodh, or Hugh Alain—killed in battle	731
Daniel—died on a pilgrimage at Joppa	740
Niall-Freasach—became a monk	782
Donagh, or Conchad—"died in his bed"	786
Aodh, or Hugh—slain in battle	815
Connor, or Conchabhar—"died of grief, being unable to redress the misfortunes of his country"	837

Zanzibar	Seyyid Barghas-bin-Said, <i>Sultan</i>	..	7 Oct., 1870

THE first King of England of the race of Stuart was James the First, who had reigned in Scotland as James VI.: he was the only son of the unfortunate Queen Mary, by her cousin Lord Darnley, grandson of the Princess Margaret, daughter of Henry VII. After the death of Queen Elizabeth, in 1603, James was not only legal heir to the throne, but was expressly designated as her successor by the deceased queen. James succeeded to the throne 24th March, 1603, and after an inglorious reign of 22 years, died in 1625, and was succeeded by his son, Charles I., whose unhappy reign was closed by his execution in 1649. Cromwell and the Commonwealth followed, but the country tired of them, and the eldest son of Charles I. was restored in 1660.

CHARLES II., who died 6 Feb., 1685, left no issue by his queen, Katharine of Braganza. But that "most religious Sovereign" had had, by his various mistresses, no fewer than twelve children, among whom were Henry Fitzroy, Duke of Grafton (son of Barbara Villiers, or Palmer, Duchess of Cleveland), Charles Lennox, Duke of Richmond (son of Louise Renée de Perren-court, of Querouaille, in France, created Duchess of Portsmouth), and Charles Beaulieu, Duke of St. Albans (son of Nell Gwynn). On each of these three sons were conferred enormous pensions, mostly derived from pleasant sinecure offices.

Charles, who was himself, on his deathbed, reconciled to the Roman Church, was succeeded by his brother, JAMES II., whose attacks on English liberties, and more especially on the English Church, only served to deepen the feeling of aversion with which the House of Stuart had come to be regarded by a Protestant nation. The birth, 20 June, 1688, of a "Prince of Wales"—afterwards the "Old Pretender"—hastened the collapse of James's rule, for a widespread belief arose that, in Burnet's words, a base imposture had been put upon the people. The expulsion of James having been effected with little difficulty, 11 Dec., 1688, the usual course of descent was necessarily set aside, and the Crown was offered by a National Convention sitting in form of Parliament, to William, Prince of Orange, and his wife Mary, eldest daughter of James by his first wife, Anne Hyde, daughter of the Earl of Clarendon, who accordingly ascended the throne as WILLIAM III. and MARY II., 13 Feb., 1689. It was agreed that the administration of government should be placed in the hands of the King only (1 W. & M., sess. 2, c. 2). By the same statute it was further enacted that, in the event of Queen Mary dying without issue, the issue of her sister Anne, Princess of Denmark, were to be preferred to such issue as King William might have by any other wife. Mary died childless in 1694, and heirs failing to Anne, although she was seventeen times a mother, the hereditary right to the Crown would have reverted to the attained son of James II., next to whom and his issue stood Anne Mary, Queen of Sardinia, the only surviving child and heiress of Henrietta Maria, Duchess of Orleans, youngest daughter of Charles I. To provide, therefore, against such contingency, and to secure the Protestant Succession, the Act of Settlement (12 & 13 Will. III. c. 2) was passed, by which the Crown, after the death of Queen ANNE, was settled upon the Princess Sophia, Electress and Duchess Dowager of Hanover, the

youngest daughter of Elizabeth, daughter of James I. of England, and the heirs of her body, being Protestants. Sophia dying about seven weeks before Queen Anne, her eldest son, George Louis, Elector of Hanover, ascended the British throne, 20 Oct., 1714, as GEORGE I.

THE HOUSE OF HANOVER, which since 1714 has occupied the English throne, is lineally descended from the famous Guelphs, or Welfs, of Bavaria. In 1235 their territory, comprising the districts of Brunswick and Lüneburg, was erected into a duchy. The whole of the Duchy of Brunswick fell, in 1527, into the hands of Duke Ernest, a zealous adherent of Luther. His two sons effected a partition of the duchy, which has continued until the present day. The elder son of Ernest became the Duke of Brunswick-Wolfenbüttel. William, the younger son of Ernest, became Duke of Brunswick-Lüneburg and is the ancestor of the House of Hanover. His grandson, Ernest Augustus, became Duke of Calenberg or Hanover in 1679, and Elector of Hanover. Ernest Augustus' eldest son, George Louis, succeeded him in the electorate, 23 Jan., 1698, and in 1714 became, in right of his mother, the first British monarch of the House of Guelph.

The advent of a new and foreign dynasty, although necessary to maintain the Protestant Succession, was regarded by the people with little favour. Nor was this feeling confined to one class alone. Horace Walpole sneered at the whole Royal House as, "Messieurs les Allemands;" and even the courtly Chesterfield, with Gay's assistance, parodied one of Laureate Cibber's New Year's Odes, turning the nauseous praise into ridicule, much to the delight of all classes.

GEORGE I. came amongst us with little knowledge of English politics and little interest in English legislation. He was so ignorant even of the language of his new subjects, that his English minister, who understood neither French nor German, was forced to communicate with him in a jargon of dog-Latin. For literature and art he had the utmost contempt. But he was an excellent man of business, and while accepting our loyalty for what it was worth, filled his own pockets, the pockets of his German attendants and of his German mistresses, got away from England as often as possible, and used the strength of this country for the advantage of his beloved Hanover.

On his death at Osnabrück, 11 June, 1727, his son and successor, GEORGE II., was forty-five years of age. As Prince of Wales he had been remarkable for little, save for his quarrels with his father, which form one of the scandals of history; a scandal, by the way, repeated in the next two reigns. His death occurred 31 March, 1751, at the age of forty-four. By his wife, Augusta, youngest daughter of Frederick II., Duke of Saxe-Gotha, he had left a son, then thirteen years old, who nine years later, in 1760, succeeded his grandfather as GEORGE III.

Until 1837 the Electorate of Hanover and the English monarchy were united. In 1815 Hanover was made into a kingdom, with extended territory. But on the accession of Queen Victoria, in 1837, the crown of Hanover passed to her uncle, Ernest Augustus, Duke of Cumberland, as males only were entitled to it. After the war of 1866 Hanover was absorbed into the Prussian State.

GEORGE WILLIAM FREDERICK, eldest son of Frederick Lewis, Prince of Wales (eldest son of George II., born 20th January, 1707; died 20th March, 1751), by Augusta, youngest daughter of Frederick, Duke of Saxe-Gotha (born 30th Nov., 1719; died 8th Feb., 1772), was born at Norfolk House, St. James's Square, 4th June, 1738. He succeeded to the throne as George III. on the death of his grandfather, 25th Oct., 1760. On 8th Sept., 1761, he married Sophia Charlotte, daughter of Charles, Duke of Mecklenburg-Strelitz (born 19th May, 1744; died 17th Nov., 1813), and was crowned with her on 22nd September following: he had by her a family of nine sons and six daughters. Early in his reign he showed symptoms of insanity, and after recovering from two serious attacks (1783, 1804) his mind entirely gave way; many of his latter years were consequently passed in seclusion, and the government was carried on, from 5th Feb., 1811, until his death, by his eldest son George, under the title of "Prince Regent." George III. died at Windsor, 29th Jan., 1820. His family were as follows:—

I. GEORGE AUGUSTUS FREDERICK, Prince of Wales, born 12th August, 1762. On 8th April, 1795, he married his cousin Caroline, daughter of Charles, Duke of Brunswick-Wolfenbüttel (born 17th May, 1768; died 7th Aug., 1821), by whom he had a daughter, the Princess Charlotte of Wales (born 7th Jan., 1796; died in childbirth, 6th Nov., 1817, having married, 2nd May, 1816, Prince Leopold of Saxe-Coburg, afterwards King of the Belgians). The prince succeeded to the throne as George IV., 29th Jan., 1820. He died at Windsor, 26th June, 1830.

II. FREDERICK, born 16th Aug., 1763, was at the age of six months declared Prince-Bishop of Osnaburgh. On 27th Nov., 1784, he was created Duke of York and Albany, and Earl of Ulster. On 29th Sept., 1791, he married Frederica, daughter of Frederick William II. of Prussia (born 7th May, 1767; died, without issue, 9th Aug., 1820). The Duke, who was for many years Commander-in-Chief of the Army, died 5th Jan., 1827.

III. WILLIAM HENRY, born 21st Aug., 1765, was, on 20th May, 1789, created Duke of Clarence and St. Andrews, and Earl of Munster. He for many years lived with Mrs. Jordan, an actress, and had by her a numerous family, who took the name of FitzClarence. On 11th July, 1818, he married Adelaide, daughter of George, Duke of Saxe-Meiningen (born 13th Aug., 1792; died 2nd Dec., 1849), by whom he had two daughters—Charlotte Augusta Louisa (born and died 27th March, 1819), and Elizabeth Georgina Adelaide (born 20th December, 1820; died 4th March, 1821). The Duke, who had entered the Royal Navy in 1779, held the office of Lord High Admiral in 1827–28, and succeeded to the throne as William IV., 26th June, 1830. He died at Windsor, 26th June, 1837.

IV. CHARLOTTE AUGUSTA, Princess Royal, born 29th September, 1766; married, 18th May, 1797, Frederick, Prince (afterwards King) of Wurtemberg (born 6th Nov., 1754; died 30th Oct., 1816). She died, without issue, 6th Oct., 1828.

V. EDWARD AUGUSTUS, born 2nd Nov., 1767, was on 23rd April, 1799, created Duke of Kent and Strathearn, and Earl of Dublin. He married at Coburg, 29th May, 1818 (and again at Kew Palace, 11th July), Victoria, daughter of Francis, Duke of Saxe-Coburg, sister of Prince Leopold,

and widow of Charles, Prince of Leiningen (born 17th Aug., 1736; died 16th March, 1861), by whom he had an only child, Her Majesty Queen Victoria. The duke died 23rd Jan., 1820.

VI. AUGUSTA SOPHIA, born 8th Nov., 1768. She died unmarried, 22nd Sept., 1840.

VII. ELIZABETH, born 22nd May, 1770. She married, 7th April, 1818, Frederick, Landgrave of Hesse-Homburg (born 30th July, 1769; died 2nd April, 1829); died, without issue, 10th Jan., 1840.

VIII. ERNEST AUGUSTUS, born 5th June, 1771, was, on 24th April, 1799, created Duke of Cumberland and Earl of Armagh. He married, 29th May, 1815, Frederica, third daughter of Frederick V., Grand-Duke of Mecklenburg-Strelitz, widow, 1st, of Prince Frederick Louis-Charles of Prussia, and 2nd, of Frederick William, Prince of Salms-Braunfels (born 2nd March, 1778; died 21st June, 1841), by whom he had issue George, ex-King of Hanover, born 27th May, 1819; mar. 18th Feb., 1843, Alexandrina Mary, eldest daughter of the Duke of Saxe-Altenberg, by whom he had issue one son and two daughters; he died 12th June, 1878. The duke became King of Hanover on the decease of his brother William IV., and died 18th Nov., 1851.

IX. AUGUSTUS FREDERICK, born 27th Jan., 1773, created Duke of Sussex 27th Nov., 1801. He married at Rome, 4th April, 1793, and at St. George's, Hanover Square, 5th Dec. following, Lady Augusta Murray, daughter of John, Earl of Dunmore; but this being contrary to the provisions of the Royal Marriage Act (12 Geo. III. c. 11), the union was pronounced invalid in Aug., 1794. By Lady Augusta—who afterwards took by royal licence the name of D'Ameland—he had a son and a daughter: Augustus Frederick, known afterwards as Sir Augustus Frederick D'Este (born 13th Jan., 1794; died, unmarried, 20th Dec., 1848), and Augusta (born 11th Aug., 1801; married 13th Aug., 1845, Lord Truro; died 21st May, 1866). Lady Augusta D'Ameland died 5th March, 1830, and the duke shortly after contracted a morganatic marriage with Lady Cecilia Underwood, created Duchess of Inverness, who died 1st August, 1873. He died 21st April, 1843, and was buried in Kensal Green Cemetery.

X. ADOLPHUS FREDERICK, born 24th Feb., 1774, was, on 27th Nov., 1801, created Duke of Cambridge, Earl of Tipperary, and Baron Culloden. He married at Hesse-Cassel, 1st May, 1818 (and again at the Queen's Palace, 1st June), Augusta, daughter of Frederick, Landgrave of Hesse (born 25th July, 1797), by whom he had issue, George, Duke of Cambridge; Augusta, Duchess of Mecklenburg-Strelitz; and Mary, Duchess of Teck. The Duke, who acted as Viceroy of Hanover until the death of William IV., died at Kew, 8th July, 1850.

XI. MARY, born 25th April, 1776. She married, 22nd July, 1816, her cousin William Frederick, Duke of Gloucester (born 15th May, 1776; died 30th Nov., 1834), and died without issue, 30th April, 1857.

XII. SOPHIA, born 3rd Nov., 1777; died unmarried, 27th May, 1848.

XIII. OCTAVIUS, born 23rd Feb., 1779; died 3rd May, 1783.

XIV. ALFRED, born 22nd Sept., 1780; died 26th August, 1782.

XV. AMELIA, born 7th August, 1783; died unmarried, 2nd Nov., 1810.

Her Majesty VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, Empress of India (in India, Kaisar-i-Hind), born 24th May, 1819; succeeded to the Throne 20th June, 1837, on the death of her uncle, King William IV.; crowned 28th June, 1838; and married, 10th February, 1840, to his late Royal Highness Francis ALBERT Augustus Charles Emmanuel, PRINCE CONSORT, Duke of Saxony, Prince of Coburg and Gotha, who was born 26th August, 1819, and died 14th December, 1861. Clerk of the Council, Sir William Kaye, C.B., LL.D., Q.O.

Members of the Privy Council of Ireland, like those of England, are addressed as Right Honourable.

Table of Precedency.

The Sovereign.

The Prince of Wales.

The Queen's younger Sons.

Grandsons of the Sovereign.

The Archbishop of Canterbury.

The Lord High Chancellor.

The Archbishop of York.

The Lord President of the Council.

The Lord Privy Seal.

The Lord Great Chamberlain.

The Earl Marshal.

The Lord Steward of Her Majesty's Household.

The Lord Chamberlain.

The last four rank above all Peers of their own degree.

Dukes, according to their Patents of Creation.

1. Of England; 2. Of Scotland; 3. Of Great Britain; 4. Of Ireland.

5. Those created since the Union.

Marquises according to their Patents, in the same order as Dukes.

Dukes' eldest Sons.

Earls, according to their Patents, in the same order as Dukes.

Marquises' eldest Sons.

Dukes' younger Sons.

Viscounts, according to their Patents, in the same order as Dukes.

Earls' eldest Sons.

Marquises' younger Sons.

Bishops of London, Durham, and Winchester.

All other English Bishops, according to their seniority of Consecration.

Bishops of the Irish Church, created before 1869, according to seniority.

Secretaries of State, if of the degree of a Baron.

Barons, according to their Patents, in the same order as Dukes.

Speaker of the House of Commons.

Treasurer of H.M.'s Household.

Comptroller of H.M.'s Household.

Master of the Horse.

Vice-Chamberlain of Household.

Secretaries of State under the degree of Barons.

Viscounts' eldest Sons.

Earls' younger Sons.

Barons' eldest Sons.

Knights of the Garter.

Privy Councillors.

Chancellor of the Exchequer.

Chancellor of the Duchy of Lancaster.

Lord Chief Justice Queen's Bench.

Master of the Rolls.

The Lords Justices of Appeal.

Lords of Appeal.

Judges according to seniority.

Viscounts' younger Sons.

Barons' younger Sons.

Baronets of England, Scotland, Ireland, and United Kingdom, according to date of Patents.

Knights of the Thistle.

Knights of St. Patrick.

Knights Grand Cross of the Bath.

Knights Grand Commanders of the Star of India.

Knights Grand Cross of St. Michael and St. George.

Knights Grand Commanders of the Indian Empire.

Knights Commanders of the Bath.

Knights Commanders of the Star of India.

Knights Commanders of St. Michael and St. George.

Knights Commanders of the Indian Empire.

Knights Bachelors.

Judges of County Courts.

Companions of the Bath.

Companions of the Star of India.

Companions of St. Michael and St. George.

Companions of the Indian Empire.

Companions of the Distinguished Service Order.

Eldest Sons of the younger Sons of Peers

Baronets' eldest Sons.

Eldest Sons of Knights:—1. Garter;

2. Thistle; 3. St. Patrick;

4. The Bath; 5. Star of India;

6. St. Michael and St. George;

7. Knights Bachelors.

Younger Sons of the younger Sons of Peers.

Baronets' younger Sons.

Younger Sons of Knights in the same order as eldest Sons.

Gentlemen entitled to bear arms.

Women take the same rank as their husbands or as their brothers; but the daughter of a peer marrying a Commoner retains her Title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.

There are two Orders confined to Ladies: the Order of Victoria and Albert, and the Order of the Crown of India. But members are entitled to no special precedence.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord-Lieutenant stands first, and secondly the Sheriffs. In London and other Corporations, the Mayor stands first, after him the Sheriffs, Aldermen, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

KNIGHTS OF THE MOST NOBLE ORDER OF THE GARTER (1349)—K.G.

Georgiana, Viscountess Cross.
H.H. Maharanee Sunity Devee, of Kuch Behar.

Registrar, Sir Albert W. Woods,
C.B., F.S.A.

Dates of Dignities.

THE SAXONS in the fifth and sixth centuries founded the Heptarchy, meaning the seven States, though there were really nine: these were all subdued by Egbert, King of Wessex, who was descended from Cerdic. He, in 827, took the title of King of England. The Norman kings, beginning with William I., in 1066, were also Dukes of Normandy. Henry II., in 1172, styled himself Lord of Ireland, which title Henry VIII., in 1541, changed into King. Edward III., in 1337, assumed the title of King of France. Anne, on the Union of England with Scotland, became Queen of Great Britain; and George III., on the Union with Ireland, dropped the empty style of King of France, and took the title of King of Great Britain and Ireland. Her present Majesty, in 1857, altered her official designation to Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, Empress of India, Sovereign of the Order of the Garter, &c., which title, after much discussion in Parliament, was affirmed, and came into general use 1st January, 1877. The first English DUKE was Edward the Black Prince: he was created Duke of Cornwall by his father, Edward III., in 1337. The title of MARQUIS was first bestowed by Richard II. on his favourite, Robert de Vere, Earl of Oxford, created Marquis of Dublin in 1335. The Saxon titles of ALDERMAN, or EORL, and THAN, were changed into EARL and BARON by William I. The title of VISCOUNT was long in use in France before it was bestowed on any person in England: the first person who held it was John Beaumont, created Viscount Beaumont and Count of Boulogne, in France, in 1440. The order of BARONETS was established by James I. in 1611, and exists only in the British Dominions.

The Victoria Cross.

Clonbrock, Lord	80	Goold, Sir Henry Valentine.	84
Devon, Earl of	80		
Perth and Melfort, Earl of	80		

Consists of the whole Peerage of England and of certain representatives of the Peerages of Scotland and Ireland, but many members of these latter have also English titles, which give them seats in the House. For instance, the Duke of Buccleuch sits as Earl of Doncaster, and the Duke of Leinster as Viscount Leinster. It is under these inferior titles that they will be found in this list, but for convenience of reference such Peers are separately enumerated. Exclusive of 15 minors, and one baron whose claim is not established, the assembly consists of 4 Princes of the Blood, 2 Archbishops, 22 Dukes, 19 Marquises, 114 Earls, 28 Viscounts, 24 Bishops, 256 Barons, 16 Scottish Representative Peers elected for each Parliament, and 28 Irish Representative Peers elected for life (1 Scotch and 2 Irish Representative Peers are also included as Peers of England)—in all, 540. There are also 8 Ladies who are Peeresses in their own right, whose titles and names are given at page 125.

b. signifies born; s., succeeded; m., married; w., widower or widow; div., divorced; M., Minor.

SPEAKER.—Hardinge Stanley Lord Halsbury, Lord High Chancellor of England .. £4,000

Chairman of Committees.—The Duke of Buckingham and Chandos £2,500

Deputy Speakers.—The Earl of Cork and Orrery, the Earl of Lathom, Earl de Montalt, Viscount Oxenbridge, Earl Selborne, and Lord Herschell.

Deputy Do., Samuel Hand..... £250
Shorthand Writer, Wm. Henry Gurney-Salter

Historic Peerage,

SHOWING THE DATES OF EXISTING DIGNITIES, AND THE ORDER IN WHICH THEY WERE CONFERRED.
 * Irish Peerages. † Scotch Peerages. x Merged in other titles.

The Peerage of the United Kingdom consists of:—1. Those Peers of England whose titles date from before the Legislative Union with Scotland (1st May, 1707), and who therefore take precedence of all others: all these are Peers of Parliament. 2. Peers of Scotland created previous to the Union: of these, sixteen are elected to sit in the House of Lords. 3. Peers of Great Britain created previous to the Legislative Union with Ireland (1st January, 1801): these all sit in the House of Lords. 4. Peers of Ireland created previous to the Union: of these, twenty-eight are elected to sit in the House of Lords. 5. Peers of the United Kingdom created since the Legislative Union between Great Britain and Ireland. 6. Peers of Ireland of recent creation. By the Articles of Union the Sovereign is empowered to create one Irish Peer whenever four of the old Peerages become extinct. The most recent creation is that of the late Duke of *Abercorn* (1868), who sat in the House of Lords by virtue of his British Marquisate. 7. Life Peers. Of these there are three, Lords Blackburn, Watson, and FitzGerald: they sit in Parliament, but the titles are not hereditary.

The Representative Scottish Peers are elected for every fresh Parliament, but those for Ireland are elected for life. Many of the others for both countries having had English or later titles granted to them, sit in the House of Lords by virtue of such titles: thus the senior Scottish Marquis, *Huntly* (1599), sits as Baron *Meldrum* (1815), and the senior Irish Duke, *Leinster* (1766), sits as Viscount *Leinster* (1747).

All Irish Peers not Peers of Parliament are eligible for seats in the House of Commons, and may represent any Borough, County, or University in England or Scotland, but not in Ireland. Peers of Scotland cannot be elected as Members of Parliament in any of the three countries.

THE ELEVENTH PARLIAMENT OF QUEEN VICTORIA.

THE First Reform Bill, England and Wales, received the Royal Assent 7th June, 1832; that for Scotland, 17th July; for Ireland, 7th August: Parliament was dissolved 3rd December, 1832. The New Reformed Parliament was elected the same month, and first assembled January 29, 1833. No alteration was made in the total number of members, but they were differently distributed: Cornwall, which for many years had returned forty members, was allowed fourteen; it now returns seven; and Durham, which had formerly sent but four, was permitted to return ten; it now returns sixteen. Great care was taken not to disturb family interests: Tavistock, with a constituency of 336, Chippenham with 314, Cirencester 467, Devizes 358, Knaresborough 230, Totnes 362, and Honiton with a constituency of 287, being each authorized to send two members, the same number as was allotted to the new Boroughs of Birmingham with 7,317, Lambeth 16,284, Finsbury 17,735, Marylebone 18,079, and the Tower Hamlets with a constituency of no fewer than 21,131. Naturally these discrepancies were constant sources of dissatisfaction, and many attempts were made to "reform" the Reform Bill of 1832. These efforts were eventually successful, and in 1867-68, Mr. Disraeli succeeded in passing a new Reform Bill, which, while it remedied many of the most glaring abuses, still left much to be desired.

The Bill of 1885, giving a vote to almost everybody that cared to possess it, and entirely altering and remodelling the places represented, was passed without the usual amount of open discussion in the House of Commons, the leaders on both sides having met and arranged all the details. Had more care been taken there would have been less confusion in the designation of places represented. As it is there are, nominally, two members for Shoreditch, but practically there is not one, the two members being the Hon. Member for Hoxton and the Hon. Member for Haggerston. One of the representatives for Liverpool is the Hon. Member for Scotland! So difficult has it been found to arrange the places represented to correspond with the names of representatives, that, avoiding all attempts to put places in order, they have been arranged alphabetically in the following list. The Members for Liverpool will therefore have to be sought for under the names of Abercromby, Everton, Scotland, &c.

The present House consists of 670 members—465 for England, 30 for Wales, 72 for Scotland, and 103 for Ireland. The figures placed after the names of places give the number of the constituency; the numbers polled are those after the names of candidates; the names of the successful candidates, now members, are printed in italics.

In consequence of the disruption of the Liberal party it is necessary to adopt a fresh classification; the letters after the names are—*C.* Conservative, *L.* Liberal, *G.L.* Gladstone-Liberal, and *N.* Nationalist. The numbers are given as—Conservatives, 312, Gladstone-Liberals, 190, Nationalists, 86, and Liberals, or Unionists, 81. There are (Nov. 29) four pending resignations, and a vacancy for the Dulwich Division of Camberwell.

Speaker, The Right Hon. Arthur Wellesley Peel, M.P. for Warwick and Leamington £5,000
Chairman of Committees, Leonard Henry Courtney, M.P. for Bodmin £2,500

England.

465 MEMBERS.

--	--	---

* On the formation of Lord Salisbury's present Cabinet, Lord Randolph Churchill was appointed *Chancellor of the Exchequer*, and the Earl of Iddesleigh *Foreign Secretary*; but after Lord Randolph's secession and Mr. Göschen's appointment, several other changes became necessary. The Earl of Iddesleigh retired from the *Foreign Office*, and Lord Salisbury took the seals, he himself resigning those of *First Lord of the Treasury* to Mr. Smith, who vacated the *War Office* in favour of Mr. Stanhope, and he in turn was succeeded at the *Colonial Office* by Sir Henry Holland.

Prime Minister.

Inspectors of Weights and Measures, James Strugnell, and James Webb; *Offices*, entrance to late County Gaol; William Cook, Kingston;

A. J. Lane, Croydon; and Superintendents of Constabulary in the County Districts.

Quarter Sessions, 3rd January, 3rd April, 3rd July, and 16th October.

QUARTER SESSIONS IN COUNTIES.

These are to be held in the first whole weeks respectively after March 31, June 24, Oct. 11, and Dec. 28; the magistrates determining the day of the week on which the sessions shall commence at each place. But the Easter sessions may be altered to any time between March 7 and April 23, so as to prevent interference with the Spring assizes. Any of the above days falling on Sunday, the sessions will be held on the Monday week following.

Taxes are not popular, and the tax collector is even less popular than the tax he collects. Both tax, and tax collector, have given great offence. John Hampden objected to the tax, of course on principle, and Wat Tyler objected to the mode of collection; both protested, and in both cases their protests led to grave results. Sixty years ago taxation was a burden felt by every one, and the subject was one nearly as frequently spoken of then as the weather is now. Matters have changed, and the collector's visits are fewer. The change is a wise one. The modern system is so to cover up the tax that the payer shall not notice the payment. Ask the British workman to contribute a silver sixpence to the commonwealth, and his reply would savour much of the reply given by Canning's knife-grinder. The same man willingly contributes twopence with every glass of gin he drinks, and a penny with every half-ounce of tobacco, but will give nothing direct. When Mr. Lowe proposed a halfpenny tax on the match-box, female East London turned out its thousands, invaded the sacred precincts of St. Stephens, and so frightened the Chancellor that he repented and withdrew the obnoxious tax. The only persons who willingly contribute directly to the State purse are the middle and upper classes. Indirectly they contribute their full share of taxation, directly they contribute nearly the whole. The Income Tax is entirely paid by them; the House and Land Tax nearly the whole. They pay the greater part of the School Board taxation, but derive no benefit from the Board schools. This is unfair—the "masses" will perhaps see no unfairness in the division of taxation, but the "classes" feel it and writhe under the infliction. No Chancellor of the Exchequer who wishes to retain his popularity will venture to equalize the taxation; and while he has so powerful a weapon at hand as the Income Tax, is it worth his while to go further? Is there a deficiency? What is easier than to stop paying into the Sinking Fund, and to add a penny or twopence to this elastic tax? If the "classes" grumble, why, that is a matter of course; the "masses" rather like to hear the grumble, it gratifies them. But there is a natural restlessness under taxation—there always has been, and there probably will be till taxes are no longer needed.

As a whole, the taxation of the United Kingdom is fair and equitable, and the greater part so covered up that the infliction is but little felt. Every one admits that money must be raised, and the only general outcry is that much of the money thus carefully collected is not so economically expended as it should be, and that some of the expenditure is wholly unnecessary. This opinion is daily gaining ground, but it will be many years before the Opposition, whether Conservative or Liberal, will be satisfied that the occupants of the Treasury Bench are quite so economical as they could or should be.

The gross amount of revenue collected in the year ending 31st March, 1887, was £93,554,573; but only £91,052,948 reached the national till,* £2,501,624 being stopped on its way for repay-

* This statement is from the published finance accounts for the year, in which even the odd shillings and pence are included, the exact amount of net receipts being stated as £91,052,948 3s. 5d., while in the "Statistical Abstract," and in other papers issued by authority, the amounts, with two exceptions, are rounded off into thousands, and the whole Net Receipts reduced to £90,772,767. It is difficult to reconcile the two statements.

ments, allowances, discounts, bounties, etc. This compares favourably with the income of the year preceding, which was £92,135,096, or £1,419,477 less; the following are the items:—

PUBLIC NET REVENUE THE LAST TWO YEARS.

	1885-86.	1886-87.
Excise	£25,441,922	£25,212,883
Customs	19,722,302	20,135,855
Income Tax	15,247,312	16,111,171
Stamps	11,600,614	11,780,333
Post-Office	8,162,651	8,462,567
House Tax	1,867,377	1,954,011
Telegraphs	1,745,056	1,841,161
Land Tax	1,023,196	1,065,359
Crown Lands	477,820	472,450
Interest on Advances } & Suez Canal Shares }	1,376,080	1,176,192
Miscellaneous	3,019,453	2,840,963
Totals	£89,683,783	£91,052,948

The Excise portion of Inland Revenue heads the list, the chief items of which are intoxicants and their licences, which altogether produced no less than £23,234,000, or one-fourth of the entire revenue of the country. If to this be added £5,347,000, the Customs duties on the same, and the Tobacco Tax of £9,367,000, altogether amounting to about £37,950,000, it will be seen that teetotallers and non-smokers contribute more than one-third less than their equal share of the national income. But the taxes thus levied are entirely voluntary, and it is to be feared that those who pay these voluntary taxes contribute their full share to the criminal expenditure of the country, a very large proportion of crime being attributable to drunkenness. The items making up the amount are:—

Spirits	£12,852,766	Male Servts.	£135,407
Beer	8,495,653	Game	174,695
Railways	316,969	Plate Dealers	48,059
Chicory	2,061	Gun	82,035
Coffee Labels	3,212	Hawkers	26,687
Tobacco, home } grown	} 14	Med. Vendors.	5,225
Warehouse } Rent, &c.	} 911	Pawnbrokers	35,580
LICENCES :		Refreshmt. }	} 6,879
Auctioneers..	79,547	House .. }	
Beer and } Cider }	} 186,263	Distillers & } Rectifiers. }	} 4,781
Brewers	21,621	Spirit dealers	119,892
Dog	346,932	Publicans & } Grocers .. }	} 1,487,014
Armorial ...	74,953	Tobacco	84,819
Carriages ..	545,123	Wines	67,356
		Other	9,624

Customs form the next largest item. This is now confined to but few articles—spirits and wine, tobacco and tea alone producing no less than £19,230,000 out of the whole amount. Formerly the articles charged with duty were absurdly numerous, but the craze for Free Trade set in, and following the popular demand successive chancellors removed all that was removable. The only articles now charged with duty are:—

Beer, &c.	£9,972	Spirits :	
Chicory	66,162	Rum	£1,958,478
Cocoa	73,559	Brandy ...	1,351,852
Coffee	190,034	Geneva ...	124,318
Currants ...	311,478	Other Sorts	784,622
Figs	37,081	Tea	4,514,874
Plate	9,038	Tobacco, &c.	9,367,185
Plums	5,220	Wine	1,128,073
Prunes	7,070	All other ...	1,991
Raisins	165,842	Deliveries ..	33,098

The Income and Property Tax must now be regarded as permanent. In principle the tax is fair, but there are many evasions. On incomes under £400 a deduction of £120 is allowed, and in the year 1885-86 the number of persons relieved to this amount was 470,368, while the number relieved in respect of Life Assurance was 93,774. The rate of duty charged in 1887 was eightpence in the pound, each penny of tax producing more than a million and a half. The total amount accounted for by the Board of Inland Revenue as net receipts, and also in the finance accounts—£16,111,174—is in the Annual Abstract reduced to £15,900,000.

	1885-86.	1886-87.
A (Lands, Tenements, &c.)	£5,101,442	£5,510,840
B (Occupation of Land, &c.)	399,137	414,359
C (Annuities, Dividends, &c.)	1,322,274	1,396,654
D (Trades, Professions, &c.)	7,502,109	7,799,980
E (Public Offices, &c.)	922,350	989,341

Totals £15,247,312 £16,111,174

Stamps come next in order. They produce the very respectable sum of £11,780,333, in reality rather more, for some portion of the "miscellaneous" is raised by means of stamps; the largest portion comes from the Death—Probate, Legacy, and Succession Duties, £7,409,957. Much was expected of the Corporation Duty, but it only produced £34,000. The simple Penny Receipt Stamp does wonders, the produce being £978,571, while the high-priced stamps for Bills of Exchange produced only £641,399. Of playing cards there were manufactured 1,220,823 packs. The duty upon gold and silver plate produced but £52,863, and for the privilege of selling this, dealers were charged no less than £48,079 for their licences; the duty on silver is 1s. 6d. an ounce, while the value of the metal is but about 3s. 8d.

The duty upon quack medicines is slightly upon the increase. The Professors and their complaints about this; but to a large extent members have themselves to blame. A man or woman suffering from some malady will send for a bottle of the nostrum and try a dose or two, being certain that the payment is limited to the immediate outlay, while there is a fear that if the doctor be called in, his visits may be too frequently repeated to be agreeable, and the expense uncertain.

The list contains the following items:—

Death duties:		Bankers' Notes	£ 120
Probate	£4,026,469	Composition	123,540
Legacy	2,560,725	Cards.....	15,673
Succession	814,764	Gold Plate.	22,107
		Silver Plate	30,756
Corporation ..	34,063	Licences, &c.	156,394
Deeds.....	2,006,566	Medicines ..	179,507
Bills of Ex- change ..	641,399	INSURANCES:	
Receipts & d. Stmps. }	978,571	Life.....	39,654
		Marine	179,508

The Post Office, which comes next on the list, is the most satisfactory of all the items; everybody contributes to it cheerfully. It is punctual in its operation, moderate in its charges, and shows every desire to meet the wishes of the public; the only blot upon its present management being the high rates of Colonial postage. But there is reason to think that the present Postmaster-General, who has already done

much to help the public, will be able to get these rates reduced. The result of the year's work is marvellous—a gross profit of no less than £8,462,567. The number of letters delivered in the United Kingdom being 1,459,900,000, in addition to 151,200,000 newspapers, 368,000,000 book packets, and 180,100,000 post-cards. Necessarily the expenses of the department are heavy: they amounted to £5,436,892. Telegraphs do not turn out so well. They produce £1,841,000, and cost £1,935,000, in addition to interest on the original outlay. No information is given respecting the Parcel Post.

On the Land Tax and House Duty there is a slight advance in the income for the year.

The most unsatisfactory item is that of Woods, Forests, and Land Revenues of the Crown: the produce for the year, including a balance of £24,000 brought forward, was £494,435, but of this only £370,000 was paid into the Exchequer.

The receipts for interest on advances for Local Works, &c., and on purchase money for Suez Canal shares, present no novel features. Lastly, we come to Miscellaneous, which contains the following items:—

Small branches of the Hereditary Revenue	£136,514
Bank of England (Profits of Issue) ..	158,895
Naval Prize Fund	400
Contributions from Indian Revenues	28,027
Receipts by Civil Departments	1,162,999
Receipts by Revenue Departments ..	520,983
Post Office Savings Banks	64,609
Savings on Grants of Parliament, &c.	13,714
Isle of Man	6,814
Bank Loan	7,880
Treasury Chest	15,542
Conscience Money	2,288
Casual Receipts	3,862
	2,117,527
Woods, &c., Stamps.....	714,038

Total Miscellaneous Revenue .. £2,831,565

Conscience money does not compare well with the year preceding; there was a falling off of nearly £4,000. We are not quite certain whether this is a sign of less sin or of less conscience—it reads both ways. The receipts are truly miscellaneous—several hundred in number. Some of them are curious: the sale of soot from the British Museum, for instance, figures for 12s. clearly every farthing is accounted for in that underpaid establishment. County Court fees and fines produced £380,000; profit on the Mint, £112,000; candidates' fees, London University, £11,000; fees, Houses of Parliament, £45,000; fees, Courts of Justice, £61,000. Parents of naughty children in Reformatories paid £20,000. Science and Art Museums, unfortunately, are not self-supporting; the whole amount received in the three countries for admissions, sale of catalogues, and rent of refreshment rooms being but £5,512, and this was further reduced by loss on light gold, £2 10s. 9d.; so anxious are the janitors to obtain money, that they refuse nothing offered. At the Bethnal Green Museum the total receipts for refreshment room and sale of catalogues was but £11 4s. 5d.; the refreshments could not have been very attractive to the East-enders, more money being taken at the adjacent pub.

EXPENDITURE.

name does not appear in "Crockford" for 1885. Of the names formerly on the Pension List of King George IV. there still remain thirty-one, of whom twenty-eight are ladies. The pensions are for sums ranging from £17 to £300, the average being £82.

The National Debt.

There is a very healthy feeling with respect to the National Debt, namely, that it is too large, and should be reduced. Formerly there were those who maintained that the National Debt was a national blessing: none hold such views at the present time, and whatever Ministry may be in power there is a disposition to pay some portion of it off. Mr. Disraeli's Sinking Fund project has for some time been in abeyance; but every year the terminable annuities—a very efficient sinking fund under another name—is making a sensible diminution in the amount.

In January, 1816, when stock was taken after the great Continental wars, it was found that the total amount of our indebtedness was over nine hundred millions sterling. Within a few years this was reduced by two hundred millions, and after that by a comparatively small sum every year, till now it has been reduced to £736,000,000, and in a short time another million will have been knocked off. In 1816 the debt amounted to £45 a head of the population; its present amount is about £20.

In January, 1816, the nominal amount of debt was £885,186,323; but by adopting the present method of capitalizing the Annuities then outstanding as three per cent. stock, the following figures will represent the state of the Debt on the 5th of January, 1816. Reckoned in this manner it stood as follows:—

Funded Debt.....	£816,312,000
Unfunded Debt.....	44,727,000
Terminable Annuities capitalized	39,397,000

£900,436,000

This large amount of Debt was the growth of many years, and nearly all had been raised for foreign wars. There was a trifling amount (£664,263) due when the "glorious revolution" of 1688 brought over the Dutch King William to save the country from Popery and other evils, but in carrying out this project he succeeded in adding to the Debt nearly sixteen millions during the twelve years of his reign. Under Queen Anne, Marlborough added to the glories of the country, and helped to swell the Debt, which at the time of the Queen's death had increased by nearly thirty-eight millions. Under the first George the Debt decreased slightly; but George the Second came to its rescue, and left the country nearly eighty-seven millions worse off than he found it. During the first twelve years of George III. the Debt was again reduced by about ten millions, and at the time of the revolt of the American Colonies it was under one hundred and thirty millions, an amount which frightened all the political economists of that day. Undismayed at this, the obstinate king and his weak ministers pressed on the war, "entirely regardless of expense." The bill was a heavy one, and added one hundred and twenty-one millions more to the permanent Debt. On the conclusion of the disastrous war, which had all along been unpopular, there was a considerable outcry at the waste: some efforts were made to reduce the amount, and in the nine years from 1784 to 1793, ten and a half millions were paid off, no less than £2,421,681 being paid off in 1792.

The French revolutionary war began in 1793.

and with a short interval of exhaustion, called "Peace," lasted till 1815, when Bonaparte was sent to St. Helena, and the forty years' real peace commenced. During these twenty-three years of war, money was borrowed in the most extravagant manner. From 1793 to 1801 the average cost of £100 three per cent. Stock was £57 17s. 6d., and from 1803 to the conclusion of the War, £60 17s. 6d. Had the government adopted an opposite plan, and for every hundred pounds borrowed received the whole amount, paying five or six, or even seven, per cent., the gross indebtedness of the country on the termination of the War would have been several hundred millions less, and the high rate of interest could have been gradually reduced. Such, however, was the imbecility of ministers, that in 1798 they raised a loan of £3,000,000, at the rate of £200 three per cent. Stock and 5s. long annuity for every hundred pounds borrowed. Another instance may be mentioned. In 1815, a loan of £36,000,000 was negotiated, every subscriber receiving £174 three per cent. Stock, and £10 four per cent. With loans negotiated on such terms it is easy to understand how rapidly the Debt accumulated. The following loans were raised from 1793 to 1816:

Year.	£	Year.	£	Year.	£
1793	4,877,956	1801	27,305,271	1809	12,298,375
1794	6,998,389	1802	14,638,254	1810	7,792,444
1795	30,464,831	1803	8,752,761	1811	19,143,953
1796	22,244,082	1804	14,570,763	1812	24,790,697
1797	30,350,873	1805	16,649,801	1813	39,649,282
1798	16,858,503	1806	13,635,344	1814	34,503,633
1799	21,714,863	1807	10,432,934	1815	20,241,807
1800	23,030,529	1808	12,095,044	1816	514,059

With the return of peace efforts were made to reduce the Debt; but this was no easy matter. In 1813, the National expenditure had reached the unprecedented amount of £108,397,645, of which £68,748,363 was raised by taxation, and £39,640,282 by loans. In 1815, the Waterloo year, the amount raised by taxation had increased to £72,210,512; but in 1817, the War being finished, taxation was reduced to £52,055,913, and out of this the sum of £1,826,814 was applied to the reduction of Debt. The following amounts were paid off from 1817 to 1838, when for a time the payments ceased:—

Year.	£	Year.	£	Year.	£
1817	1,826,814	1824	7,456,559	1832	5,696
1818	1,624,666	1825	9,900,725	1833	1,023,784
1819	3,163,130	1826	1,195,531	1834	1,776,378
1820	1,918,019	1827	2,023,028	1835	1,270,050
1821	4,104,457	1828	4,667,965	1836	1,590,727
1822	2,952,564	1829	2,760,003	1837	1,985,885
1823	5,261,725	1830	1,935,465	1838	7,496
..	..	1831	2,073,858

Large amounts have since been paid off or provided for, and on the 5th of April, 1887, the outstanding funded debt was reduced to £637,637,640, and the total of all descriptions to £736,278,688.

The Debt is of three descriptions:—I. Funded; II. Terminable Annuities; III. Unfunded.

I.—THE FUNDED, OR PERMANENT, DEBT.

That is, Debt which the government is not under obligation to pay off at any fixed time. It is represented at present by Consols, reduced three per cents., new three per cents., two and a

The following Table exhibits the variation in amounts of the Funded and Unfunded Debts, with the capitalized value of Annuities computed as Three per Cent. Stock from 1861, when the Annuities were for the first time thus valued, to the present time.

Year.	Funded.	Unfunded.	Annuities.
			£

II.—TERMINABLE ANNUITIES.

These are sums paid for a certain number of years, and then terminating altogether. As these Annuities are the chief instrument by means of which the debt is reduced, it may be shortly explained that under various Acts of Parliament, and under varying conditions, the Treasury is empowered to give an Annuity for a certain number of years in exchange for permanent stock. Thus A transfers to the Treasury £1,000 of 3 per cent. stock on which he has been receiving £30 a year; the Treasury in return undertakes to pay A £60 a year for twenty years or thereabouts. The Treasury cancels the £1,000 stock, and thus reduces, say, Consols by that amount; but during twenty years it pays a much larger sum than it would have paid if it had left matters alone. At the end of the twenty years the payment of this sum ceases, and the result of the transaction is that the debt has been then *bona fide* reduced by £1,000. The plain meaning of the transaction

is, of course, that the Treasury binds itself to pay off a certain portion of principal every year for a given number of years. At the end of the time the principal is paid off, and the Debt is correspondingly reduced.

When the capital of the Debt is computed it is necessary to ascertain the capital value of these terminable Annuities. For this purpose the Government actuary calculates the amount of three per cent. stock equivalent in value to the terminable Annuities. In making this calculation a price has to be assumed for 3 per cent. stock, and it has been a matter of discussion among experts what that price should be, and thence the returns laid before Parliament do not always exactly correspond. The variation, however, is not so great as seriously to affect the comparisons of the immense sums involved in a statement of the Debt.

The total amount of the Terminable Annuity Debt, 31st March, 1886, at its capitalized value, was £85,829,917; in 1887 this had been reduced to £81,123,148.

III.—UNFUNDED DEBT.

The Unfunded Debt consists of loans which the Government is bound to pay off at certain dates, and is represented by Exchequer bills, Exchequer bonds, and Treasury bills. These loans have currency for periods varying from a few months to five or more years. The amount outstanding 31st March, 1887, was £17,517,900.

The Consolidated Fund is also liable for claims on account of unclaimed dividends, balances in the Court of Chancery, &c., amounting to between four and five million pounds.

The National Debt at various periods:—

	Principal.	Annual Charge.
Debt at the Revolution in 1688	£ 664,263	.. £ 39,835
Additions made in Reign of King William III.	15,739,439	.. 1,271,017
Debt at Accession of Queen Anne, 1702	16,394,702	.. 1,310,852
Additions during her Reign	37,750,661	.. 2,040,416
Debt at Accession of George I., 1714	54,145,363	.. 3,351,268
Decrease during his Reign	2,053,125	.. 1,133,807
Debt at Accession of George II., 1727	52,092,238	.. 2,217,461
Increase till Peace of Paris, 1763	86,773,192	.. 2,634,567
Debt in 1762 (George III., 1760)	138,865,430	.. 4,851,960
Decrease during Peace, 1763 to 1775	10,281,795	.. 380,480
Debt at commencement of American War	128,583,635	.. 4,471,481
Additions during American War	121,267,993	.. 5,088,336
Debt at conclusion of American War, 1784	249,851,628	.. 9,559,817
Decrease during Peace, 1784 to 1793	10,501,380	.. 249,277
Debt at commencement of French War, 1793	239,350,248	.. 9,310,540
Additions made during the War	601,500,343	.. 22,704,311
Total Funded Debt, 1st February, 1817.....	840,850,591	.. 32,014,851
Reduced between 1817 and death of George III.....	45,870,150	.. 2,225,193
Debt at the Accession of George IV., 1820	794,980,481	.. 29,789,658
Decrease during his Reign	23,728,509	.. 1,503,758
Debt at the Accession of King William IV., 1830.....	771,251,932	.. 28,285,900
Decrease during his Reign	9,829,362	.. 247,292 inc.
Debt at the Accession of Queen Victoria, 1837	761,422,570	.. 28,533,192
Decrease during her 50 years' Reign	*25,143,882	.. *833,175
Debt 5th April, 1887	£736,278,688	.. £27,366,367

* These sums do not accurately represent the actual decrease of debt, as by means of the "Annuities" an increased rate of Interest is paid for a certain number of years, as already explained, at the termination of

which time the "Annuities" cease, and a large amount of debt is extinguished: in this manner Debt to the amount of £23,423,638 will be extinguished in 1889; £1,333,566 in 1894; and £46,378,394 in 1904.

CIVIL SERVICE, GROSS, £17,986,083; REVENUE DEPARTMENTS, £10,786,086; TOTAL, £28,772,169.

THE Gross Total of the original Estimates for Civil Services, as submitted to Parliament in 1887, was £17,931,508 for the year ending March 31st, 1888. From this amount is deducted the sum of £678,434, estimated to be produced by the sale of fee and other stamps, and £1,177,817 "Extra Cash Receipts," which together bring the total of the seven classes down to £16,075,257. A further Estimate of £17,000 was subsequently added, to defray expenses in connection with the celebration of the jubilee of Her Majesty's reign, and another of £37,575, for salaries and expenses of the office of the Irish Land Commission, in carrying into effect the Irish Land Act of 1887. These together make the estimated net expenditure £16,129,832, or £26,702 less than the net amount of the previous year after the several deductions. In the following details, in which the supplementary additions are taken into account, the miscellaneous character of the estimates will be seen, together with the principal variations between this and the preceding year:—

CLASS I.—Public Works and Buildings.—The sum total required is £1,708,524, a decrease upon the amount voted in the preceding year of £125,577. The heads are: Royal Palaces £35,982—*increase* £4,039 (the palaces in the personal occupation of Her Majesty costing £347 less than in the previous year); Marlborough House £2,020—*increase* £395; Royal Parks £103,430—*decrease* £9,243; Houses of Parliament £55,635 (£18,000 being on account for the restoration of Westminster Hall)—*increase* £7,770; Gordon Monument £2,200—*increase* £1,700; Public Buildings £142,255—*decrease* £49,966; Furniture of Public Offices £16,970—*decrease* £2,090; Revenue Department Buildings £208,627—*decr.* £18,837; County Courts £29,440—*increase* £290; Metropolitan Police Courts £6,737—*increase* £367; Sheriff Court Houses, Scotland £9,070—*decrease* £560; Surveys £230,000—*decr.* £27,827; Science and Art Department £18,206—*decrease* £1,536; British Museum £10,090—*decrease* £1,387; Harbours under Board of Trade £21,708—*increase* £4,110; Peterhead Harbour £30,150—*increase* £30; Rates on Government property (Great Britain and Ireland) £226,105—*increase* £4,620; Metropolitan Fire Brigade £10,000; Disturnpiked Roads (England and Wales) £245,500—*increase* £3,500; ditto (Scotland) £35,000. *Ireland:* Public Buildings £199,662—*decrease* £12,672; Dublin Science and Art Buildings £30,000—*increase* £5,000. *Abroad:* Lighthouses £10,866—*decrease* £2,342; Diplomatic and Consular Buildings £28,871—*decrease* £12,806.

CLASS II.—Salaries and Expenses of Civil Departments.—Total £2,468,558, a decrease of £8,793. The following are the items of expenditure: House of Lords Offices £43,020—*decrease* £958; House of Commons £49,969—*decrease* £2,524; Treasury £59,045—*decrease* £461; Home Office £93,947—*decrease* £457. Foreign Office £73,063—*increase* £1,392; Colonial Office £41,524—*increase* £508; Privy Council £46,321—*decrease* £495; Board of Trade £108,107—*increase* £62; ditto, Bankruptcy Department £272—*increase* £30; Charity Commission £36,525—*decrease* £1,940; Civil Service Commission £40,531—*increase* £6,977; Exchequer and Audit Department £53,934—*decrease* £21; Friendly Societies Registry £8,227

—*increase* £20; Land Commission for England £24,797—*increase* £2,686; Local Government Board £444,241—*decrease* £1,415; Lunacy Commission £15,227—*decrease* £12; Mint (including coinage) £68,789—*decrease* £292; National Debt Office £14,966—*increase* £170; Patent Office £55,204—*increase* £1,901; Paymaster-General's Office £26,190; Public Works Loan Commission £9,577—*decrease* £37; Record Office £21,393—*increase* £67; Registrar-General's Office £47,693—*decrease* £1,518; Stationery Office and Printing £556,260—*decrease* £5,337; Woods and Forests £23,761—*increase* £718; Works and Public Buildings £48,967—*decrease* £92; Mercantile Marine Fund £40,000; Secret Service £50,000. *Scotland:* Secretary for Scotland £9,143—*increase* £250; Exchequer and other offices £6,567—*increase* £112; Fishery Board £21,925—*decrease* £4,855; Lunacy Commission £5,932; Registrar-General's Office £5,895—*decrease* £194; Board of Supervision £29,317—*decrease* £23. *Ireland:* Lord-Lieutenant's Household £7,478—*decrease* £38; Chief Secretary's Office £40,967—*decrease* £119; Charitable Donations Office £2,045—*increase* £26; Local Government Board £144,809—*increase* £1,121; Public Works Office £47,751—*decrease* £2,808; Record Office £5,956—*decrease* £458; Registrar-General's Office £16,126; Valuation and Boundary Survey £23,047—*decrease* £779.

CLASS III.—Law and Justice.—Total £6,304,160, a decrease of £13,027. The items are:—Law Charges £83,681—*decrease* £1,293; Criminal Prosecutions £159,354—*increase* £77; Supreme Court of Judicature £410,738—*decrease* £11,481; Wreck Commission £12,630—*decrease* £750; County Courts £410,789—*decrease* £18,015; Land Registry £2,942; Revising Barristers (England) £20,370; London and Sheerness Police Courts £15,689—*increase* £124; Metropolitan Police £575,620—*increase* £15,890; Special Police £37,000—*increase* £1,000; County and Borough Police (Great Britain) £860,286—*increase* £6,975; Prisons (England and Colonies) £758,018—*decrease* £54,661; Reformatory and Industrial Schools £281,261—*increase* £409; Broadmoor Criminal Lunatic Asylum £36,549—*increase* £7,267. *Scotland:* Lord Advocate and Criminal Proceedings £62,955—*decrease* £1,401; Courts of Law and Justice £63,465—*decrease* £456; Register House £37,269—*increase* £407; Crofters' Commission £6,000—*increase* £2,070; County and Burgh Police £149,537—*increase* £1,500; Prisons £108,494—*decrease* £382. *Ireland:* LAW Charges and Criminal Prosecutions £73,508—*decrease* £533; Supreme Court of Judicature £87,387—*decrease* £1,474; Court of Bankruptcy £10,140—*increase* £81; Admiralty Registry £1,285; Registry of Deeds £16,266—*decrease* £569; Registry of Judgments £2,388—*increase* £25; Land Commission £100,028—*increase* £45,415; County Court Officers £100,854—*decrease* £4,595; Dublin Police £150,000—*decrease* £632; Constabulary £1,412,315—*increase* £15,382; Prisons £143,050—*decrease* £12,835; Reformatory Schools £107,612—*decrease* £445; Criminal Lunatics (Dumrum) £6,630—*decrease* £125.

CLASS IV.—Education, Science, and Art.—Total £5,573,866, an increase of £125,884. The details of some of the following heads will be

found in other portions of the Almanack:—Public Education £3,458,807—increase £55,318; Science and Art Department £438,558—increase £18,515; British Museum £1,47,385—decrease £14,900; National Gallery £8,908—increase £301; National Portrait Gallery £1,916—decrease £445; Learned Societies £23,900—decrease £500; London University £13,321—increase £169; Welsh University Colleges £12,000; Deep Sea Exploring Expedition Report £2,987—decrease £1,350. *Scotland*: Public Education £553,392—increase £29,129; Universities £19,018—decrease £490; National Gallery £2,100. *Ireland*: Public Education £874,051—increase £45,978; Teachers' Pension Office £2,015—decrease £130; Endowed Schools Commission £720—increase £50; National Gallery £2,501; Queen's Colleges £10,028—decrease £1,000; Royal Irish Academy £2,259—decrease £261.

CLASS V.—Foreign and Colonial Services.—Total £617,350, a decrease of £27,514. The items are:—Diplomatic Services £234,524—increase £914; Consular Services £184,125—decrease £761; Suppression of Slave Trade £16,400—increase £2,240; British Directors of Suez Canal £2,405; Grants in Aid to Colonies £25,416—decrease £3,700; South Africa and St. Helena £86,180 (£78,000 of which is a grant in aid to British Bechuanaland)—decrease £23,457; Subsidies to Telegraph Companies £49,300—decrease £750; Grant in Aid to Cyprus £18,000—decrease £2,000.

CLASS VI.—Non-effective and Charitable Services.—Total £1,248,116, an increase of £7,852. The following are the items:—Superannuation and Retired Allowances £476,082—increase £12,154; Merchant Seamen's Fund Pension £17,800—decrease £1,400; Pauper Lunatics, England, £490,000—decrease £5,000; Scotland, £89,500—increase £2,500; Ireland, £101,800—increase £2,000; Hospitals and Infirmarys in Ireland £16,658; Savings Banks and Friendly Societies' Deficiency £51,259—decrease £1,105; Miscellaneous Allowances, Great Britain, £2,482—decrease £129; Ireland, £2,535—decrease £168. The chief items for superannuation allowances to 3,164 pensioners are:—Court of Bankruptcy £3,136; British Museum £5,418; Colonial Office £11,087; Consular Services £38,527; Convict Establishments £41,990; Diplomatic Services £26,488; Education Department £11,307; Exchequer and Audit Office £15,108; Foreign Office £10,946; Grants in aid of expenditure in certain Colonies £15,521; Home Office £5,560; House of Commons £6,924; Public Offices in Ireland £63,250; Local Government Board £12,582; Metropolitan Police £2,878; Mint £5,099; National Debt Office £4,545; Patent Office £2,304; Paymaster General's Office £6,157; Police Courts £4,282; Prisons (England) £4,155; Record Office £2,162; Registrar - General's Office £4,600; Royal Parks £2,983; Science and Art Department £7,936; Public Offices in Scotland £16,763; Slave Trade Commissions £2,202; Supreme Court of Judicature £61,323; Surveys £7,851; Board of Trade £18,070; Treasury £10,779; Woods and Forests £4,186; Office of Works £8,541. Besides these and other smaller amounts the sum of £1,412,622 is provided for superannuation in the estimates of the several departments.

CLASS VII.—Miscellaneous.—The total in this class is £65,509, an increase of £10,500. The heads are—Temporary Commissions £37,055—

increase £4,724; Miscellaneous Expenses £8,804—increase £1,002; Adelaide Exhibition £2,650; Celebration of the Jubilee of Her Majesty's reign £17,000. The Commissions chargeable in 1887-88 are those on Historical MSS., Railways, Educational Endowments (Scotland, and Ireland), Loss of Life at Sea, Gold and Silver, Blind, Irish Public Works, Elementary Education Acts, Civil Establishments, and others not specifically provided for, but for which £7,000 is charged. Among the miscellaneous expenses are items of £4,770 for robes and insignia for the several orders of knighthood and for the officers of Heralds' College; £210 for repairing the insignia of the same; £20 for Albert Medals; and £500 for insignia of the Distinguished Service Order.

REVENUE DEPARTMENTS.

CUSTOMS, INLAND REVENUE, POST OFFICE, PACKET SERVICE, AND TELEGRAPHS.—The total under this head is £10,786,086, against £10,553,691, the estimate for last year; an increase of £232,395. The following table shows the cost of each department, with the net variations from the previous year:—

SERVICE.	1887-83.	Incr.	Deer.
	£	£	£
Customs	951,348	—	4,229
Inland Revenue..	1,763,879	—	33,627
Post Office	5,420,770	201,815	—
Packet Service ..	699,341	—	36,322
Telegraphs	1,950,248	104,738	—
Total	10,786,086	306,553	74,158

In the Customs the cost of the Superintending Establishment is £63,150—decrease £4,415; the establishment of the Port of London £263,520—decrease £6,400; the Port of Liverpool £97,940—decrease £1,665; other establishments £320,170—decrease £4,890; Law Charges, &c. £9,840—decrease £20; Superannuations £195,657—increase £12,960; Commutation Annuities £1,571—increase £221.

Inland Revenue.—In this department the salaries amount to £1,116,677—decrease £7,627; travelling allowances £48,600—decrease £3,700; salaries and poundage to distributors of stamps £21,955; poundage and allowances to clerks to local Commissioners of Taxes £101,050—decrease £550; poundage and allowances to collectors and assessors of taxes £193,500—decrease £19,900; commission on remittances £6,350; police £3,470—increase £80; gauging and other instruments £1,750—increase £370; new machinery £2,750; postage £6,900—decrease £100; laboratory expenses £1,200—increase £160; paper for stamps and licences £5,160; copies of poor rates £1,500—decrease £1,950; solicitors' offices £22,692—decrease £206; expenses of prosecutions £9,000; rewards for detections £6,500; losses by fraud £200; incidental expenses £450; superannuations £206,030—increase £432; and for annuity for commutation of pensions £8,145—decrease £536.

Post Office.—The total expenses of the chief offices in London, Dublin, and Edinburgh are £1,394,476—increase £78,746. In the Surveyors' Department the total is £64,193—decrease £1,095; for Provincial Establishments £1,986,604—incr. £136,604; establishments in the Colonies £5,611;

190 Duchies of Cornwall and Lancaster—Annuities to Royal Family.

for Savings Banks £283,128—decrease £63,067; Government Annuities £2,504—increase £139. The cost for conveyance of mails in England, Scotland, Ireland, and abroad is £1,244,848—increase £41,289; purchase of sites for buildings £124,000—increase £2,000; Superannuations £150,856—decrease £2,351; and manufacture of postage stamps £164,550—increase £9,550. The cost of railway conveyance in England and Wales is £565,569, in Ireland £146,473, and in Scotland £172,197. The road carriage in England is £255,000, in Ireland £33,476, and in Scotland £16,800.

Post Office Packet Service.—The chief items are: Contracts in the United Kingdom £124,253—increase £1,941; Europe £18,200; America £192,500—decrease £23,125; Africa £12,224—increase £500; Asia £344,230—decrease £15,570; Foreign and Colonial parcels, £5,000. The mail contract between Holyhead and Kingston costs £84,000; while the mails to India and the East involve a charge of £344,230, a part of which is repaid by the Governments of India, Ceylon, Straits Settlements, and Hong Kong.

Post Office Telegraphs.—The disbursements under this head are:—Secretary's Office £39,085—decrease £1,929; Accounts £67,243—increase £6,141; Maintenance of Telegraphs £395,611—increase £5,826; Railway Companies, for work £34,000—increase £2,450; Central Station, London £243,082—increase £5,019; other London Offices £151,385—increase £20,671; Provincial £806,780—increase £72,591; Manufacture of Stamps £1,150—decrease £50; Clothing £29,800—increase £9,800; Stores £7,000—decrease £1,700; Superannuations £24,607—decrease £81; Purchase of sites and buildings £51,000—decrease £9,000; Telegraph Works £99,500—decrease £5,000.

In this department a number of female clerks and supervisors are employed, one receiving £322, five £120 to £170, twenty £85 to £110, and 147 £65 to £80, while of the general body of telegraphists in the Central Station, 228 receive from 28s. to 34s. per week, and 491 from 10s. to 27s. per week.

DUCHY OF CORNWALL.

The accounts of this Duchy, brought up to 31st December, 1886, give the following results for the year:—Balance from last year, £7,801; rents and profits of courts accruing to the Prince of Wales, £73,724; royalties of coal-mines in Somerset, £1,172; ditto, on mines and quarries in Cornwall, £4,053; annuity from the Consolidated Fund in lieu of tin coinage dues, £16,217; dividends on stock, £4,308; giving the total receipts as £96,608; the arrears have decreased to £11,055. The payments were—£60,563 to the Prince; outlay for the benefit of the estate, £6,833; deductions under various Acts of Parliament, £8,908; superannuations, &c., £3,272; expenses of management, £7,924; leaving a balance in favour of 1886 of £9,160. The capital account stood in December, 1886, at £22,167 in cash, £21,937 in Three per Cent. Consols, £59,217 in Reduced Three per Cents., and £62,467 in New Three per Cents.

DUCHY OF LANCASTER.

The accounts of this Duchy are brought up to 21st December, 1886. The balance in hand at the commencement of the year was £21,525. The net rents and profits accruing to Her Majesty were £50,839; royalties, rents, &c., £20,165; dividends of stocks, £1,781, producing, with various items of minor importance, a total gross income of

£102,182, but of this only £91,202 was paid: the arrears on the 21st December amounted to £10,980. On the disbursement side £50,000 was paid to Her Majesty; in various payments, £21,649, including a payment of £2,000 to the Chancellor, leaving a balance of £19,550. The revenues of the Duchy have increased from £29,000 in 1847, to £80,658 in 1886, the net payment to Her Majesty at these two periods being respectively, £12,000, and £50,000.

WOODS, FORESTS, AND LAND REVENUES.

The accounts of this department for the year, ending March 31st, 1886, are divided under the heads of "Capital" and "Income." Under the head "Capital" a total sum of £241,776, including a balance of £247,739, was received from sales of estates, and of detached and outlying properties, from enfranchisements of copyholds, and from one moiety of the net proceeds from mines, &c. A total sum of £61,414 was expended in the purchase of estates; £19,867 in permanent improvements; redemption of land tax £4,808; leaving a cash balance of £111,866. There was also a balance of £241,776 in stock. The expenditure included Salaries, &c., £53,888; Windsor Park, £25,873; Royal Forests, £23,622; Consolidated Fund, £380,000.—Balances, 1st April, 1886, £21,984 and £2,256.

1886	None.	417,384	51,669	469,053

It will surprise a good many people of average intelligence, and fairly well read generally, to learn that the British army consists of a grand total of considerably more than six hundred thousand men; this number including, of course, the regular army, with its first and second class reserves, the militia, the yeomanry, and the volunteers, but not the native troops of India, nor the colonial militia and volunteers. Let us see how this total is made up, so as to enable us to form a fairly accurate notion of the trained and disciplined body upon which, at any moment, we might have to place our chief reliance for the defence of our country. The regular army consists of 208,357* men, of whom 70,790 are on service in India and Burmah; the first-class army reserve of 46,838 men, and the second-class army reserve of 5,695 men; while of the militia there are 122,453; of the yeomanry, 11,499; and of the volunteers, 226,752. The 137,000 of the regulars elsewhere than in India may be roughly distributed as follows:—England, 72,000; Ireland, 25,000; the Colonies, 25,000; Egypt (at the date of the return), 9,000; and Scotland and the Channel Islands, 5,000.

So far as the grand totals are concerned there is good ground for satisfaction; but still more satisfactory are the figures dealing with the success attending the efforts of the recruiting officers, since it is highly desirable in a country such as England, where conscription is unknown, and the enlisting is a purely voluntary proceeding on the part of each individual, that military service should be, before all things, popular. For the enormous increase in the number of recruits during the last fifteen years the short-service system is mainly responsible, though abnormal causes, such as periods of great depression in the labour market, have no doubt tended in the same direction. In 1872 the total enlistments did not quite reach 17,800, in 1877 the number was 28,700, while in 1886 it had grown to above 39,400. Again, if we examine the periods for which enlistment was made, we find that fifteen years ago the percentage of short-service recruits was barely 59; five years afterwards it had swelled to nearly 86 per cent., while in 1886 the percentage was very nearly 96. If figures are worth anything these go to show that our army is growing exceedingly popular, and that a keen impetus to its popularity has been given by the short-service system. But numbers alone, and apart from other important considerations affecting their meaning, are not worth a great deal; and it is in the further details afforded respecting last year's recruits that much good ground for encouragement may be found. In the first place the great majority of our recruits (25,000) are under twenty years of age when they enlist, and of these twenty-five thousand considerably more than half are between eighteen and nineteen years of age. Then the records of height, chest measurement, and weight go to prove that the great majority of them are of average stature, and healthy and of fine build. In fact, there can be little doubt that the British Army, in point of physique, would bear favourable comparison with any other army in the world. Although the total desertions exceed 5,000 annually, it is gratifying to observe that this number bears so small a

ratio to the total number of recruits; and still more gratifying to notice that the annual percentage of net loss of recruits is now little more than one-third of what it was in 1872 and 1873. The apparently unaccountable increase in the loss from desertion during the last seven years may be explained in the different method of dealing with fraudulent enlistment. Formerly men guilty of this offence were tried for desertion from their first corps; now they are tried for the fraudulent enlistment in the second corps.

The statistics bearing upon the courts-martial held, the crimes committed, and the punishments awarded and administered in the army during 1886 are not all that could be wished. The crime of drunkenness (to take an unfortunately common case), if decreasing at all, is decreasing so slowly that it will vanish at about the Greek kalends. It is painful, indeed, to reflect that during a single twelvemonth there were nearly 47,000 fines inflicted for drunkenness alone. In spite, too, of the recent order recommending a more lenient exercise of discipline, the number of courts-martial held shows no sign of diminution, being greater in 1886 than in either 1870, '72, '73, '74, '75, '76, 1882, '83, '84, '85; and the total number of offences, though certainly considerably less than it was twenty years ago, is much higher than the average of the preceding four years, 1882-5, and extends to more than 21,000. It is pleasant to turn from one extreme to the other in this connection. There are now more than two thousand men in the possession of good-conduct medals, and nearly 77,000 in addition in the possession of from one to six good-conduct badges each. Equally pleasing is it to notice that nearly fourteen thousand non-commissioned officers and men have seen more than fifteen years' service in the army.

Important as it is to follow with care what kind of young men, both physically and mentally, are being obtained as recruits, it is still more important, for various reasons, to mark the development of the raw recruit into the trained and skilled soldier. Looking therefore at the men now in the army, it will be found that 211 out of every thousand are between twenty-five and twenty-nine years of age; that 330 out of every thousand are above 5 ft. 8 in. in height; and that no fewer than 349 out of every thousand have a chest-measurement of more than 37 in. Into the nationalities and religious denominations of the men we need not inquire; but in matters educational we observe that 81·5 per cent. of our army are included among those who are better educated, and that 18·2 per cent. are holders of first or second-class certificates.

Excellent as in many respects the returns of the "regulars" are, it must always be a source of intense pleasure to every Englishman, and of pardonable envy to every foreigner, to contemplate the magnificent citizen army of which Great Britain alone, of all countries of the world, is possessed. On Nov. 1, 1885, the total volunteer force numbered 224,012, whereas a year later it amounted to 226,752, no fewer than 42,000 recruits having joined during that year. It is true that 38,000 voluntarily quitted the service in the same period. But these men are not lost to us; they are trained and well drilled, and, should occasion ever arise, will form a splendid reserve of volunteers, instead of the raw recruits they would otherwise have been.

* Except where otherwise stated the figures given in this introduction refer to the "effectives," not to the establishment, of all arms, on January 1st, 1887.

The Army and Navy List.

RELATIVE RANK IN ARMY AND NAVY.

Field Marshals Generals Lieut.-Generals Major-Generals Brigadier-Gens.	According to date of Commission.	Rank with	Majors, according to date of Commission or Order.	Rank with
		Admirals of the Fleet. Admirals. Vice-Admirals. Rear-Admirals. Commodores, 1st and 2nd Class. Captains of 3 years. Captains under 3 years and Staff Captains.		Lieutenants, and Navi- gating Lieutenants of 8 years' standing.
Colonels Lieut.-Colonels	but Senior to	Commanders & Staff Commanders.	Captains, according to date of Commission or Order.	Lieutenants, and Navi- gating Lieutenants under 8 yrs. standing.
Lieut.-Colonels			Lieutenants, accord- ing to date of Com- mission or Order.	Sub-Lieutenants.

ARMY AGENTS.

- Cox & Co., 1 & 2, Craig's Court, Charing Cross.

GROSS ESTIMATE, £21,485,018; NET, £18,393,900.

THE following table gives at one view the estimated cost of this branch of the public service for three years. Comparing the average, £21,047,917, with the Civil Service Estimates, it

appears that for military purposes alone our expenditure is £3,071,834 in excess of that estimated to be required for the whole of the seven non-productive classes of that service in 1887-88.

Year.	Gross Estimate.	Appropriations in aid.	Net Vote.	Supplementary.	Expended.	No. of Men.
	£	£	£	£	£	
1885-86	20,485,799	2,735,099	17,750,700	100	23,480,085	177,194
1886-87	21,172,936	2,939,736	18,233,200	459,834	—	151,867
1887-88	21,485,018	3,091,118	18,393,900	—	—	149,391

The number of Regular Forces at home and in the Colonies is 133,765; army reserve, 57,300; militia, 141,438; yeomanry, 14,405; volunteers, 255,923. The total of all branches, including the Regular Forces on the Indian establishment (71,691), is 679,522, of whom 623,960 are classed as "effectives" in the latest returns.

In the following six divisions, an arrangement not now adopted in the Estimates, the gross total of each vote is given, and in the subsequent details will be found a comparison with the principal items of the previous year, and the net amount of each vote after deducting "Appropriations in Aid":—

I.—REGULAR FORCES.

1. Regimental Pay and Allowances..	£5,622,000
2. Divine Service	59,887
3. Administration of Military Law..	36,443
4. Medical Establishments	326,000
Total	£6,044,330

II.—AUXILIARY AND RESERVE FORCES.

5. Militia Pay and Allowances	£581,500
6. Yeomanry Cavalry ditto	76,000
7. Volunteer Corps ditto	655,200
8. Army Reserve Force ditto	448,100
Total	£1,760,800

III.—COMMISSARIAT AND ORDNANCE STORE ESTABLISHMENTS.

9. Commissariat, Transport, Wages, &c.	£543,649
10. Provisions, Forage, Transport, &c.	3,061,000

21. Pensions for Wounds	16,879
22. Chelsea & Kilmainham In-Pensions	31,920
23. Out-Pensions	1,789,600
24. Superannuation Allowances	183,322
25. Militia, Yeomanry, and Volunteers	47,100
Total Non-Effective Services	£3,789,282
Add Total Effective Services	17,695,736
	£21,485,018

In this sum is included the amount for warlike stores estimated to be produced for the Royal Navy during the year, viz., £1,000,000.

The particulars of the 25 heads under which these Estimates are voted are as follow:—

1. *Staff and Regimental Pay, Allowances, &c.*—Pay, &c., of the general staff £169,000—decrease £15,059; contingencies £6,600—decrease £2,400; regimental pay £4,697,700—increase £36,700; regimental extra pay £198,000—decrease £4,000; regimental allowances £109,500—decrease £1,500; regimental extra-duty pay £38,300—increase £300; agency £21,000; department of army accountants £150,400—increase £3,300; pay of recruiting parties £18,000—decrease £1,000; recruiting rewards and expenses £21,000—decrease £2,000; veterinary department, pay £24,300—increase £1,222; medicines, &c. £1,000—increase £150; purchase of horses £86,500; school of gunnery £11,852—decrease £43; school of engineering £24,130—increase £739; miscellaneous duties of Royal Engineers £25,000—increase £3,000; school of musketry £6,418—increase £36; gymnastic instruction £6,013—increase £13; instruction for auxiliary cavalry £477—increase £240; instruction in cookery £320—increase £74; miscellaneous working pay £4,000—increase £2,000; funeral expenses £1,500, and for miscellaneous and unforeseen charges £1,690—increase £928. £58,000 for the maintenance of a native force at Suakin disappears from the vote. After deducting appropriations in aid, amounting to £1,100,000, the net amount of the vote is £4,522,000, against £4,457,300 in 1886-87—a decrease of £64,700.

2. *Divine Service.*—Chaplains' department £28,823, with contingencies £294—decrease £885; pay and allowances to officiating clergymen £30,235—decrease £6; and payments for buildings £530—decrease £66. The total is reduced by appropriations in aid to £59,800—a net decrease of £1,000. There are 91 chaplains, in four classes, besides chapel clerks, orderlies, &c.

3. *Administration of Military Law.*—Total, after deducting appropriations in aid, £36,000, a decrease of £1,600. The items are:—Pay, &c. of the establishment of the Judge Advocate-General £4,800—decrease £310; expenses of courts-martial £250; pay of military prisons £18,553—decrease £661; contingencies £140; provost staff and military police £10,200; rewards, &c., for apprehension of deserters £2,500. The Judge Advocate-General receives a salary of £2,000; a Deputy Judge Advocate-General, £1,000, and a Deputy Judge Advocate, £700.

4. *Medical Establishment and Services.*—Total of the vote after deducting £2,000 as appropriations in aid £324,000, a decrease of £9,000. The pay, &c. of the medical department amounts to £246,900—decrease £5,980; contingencies £1,500; pay of militia surgeons and practitioners £12,400

—increase £1,280; extra pay of Medical Staff Corps, &c. £40,200—decrease £3,300; and cost of medicines £25,000—decrease £1,000. The staff of the medical department consists of 7 surgeons-general, 17 deputy ditto, and 651 executive medical officers—total 675, exclusive of the Indian Establishment, which numbers 335.

5. Militia Pay and Allowances.—Appropriations in aid are £10,000, leaving £571,500 as the amount of the vote, an increase of £16,500. The items of expenditure are:—Regimental pay £317,000—increase £10,400; extra pay of officers and men £3,300; regimental allowances and extra-duty pay £39,600—decrease £100; bounty and expenses of enrolment £217,000—increase £2,000; prison staff £600; contingencies £4,000—decrease £600. The total charge for Militia, including the staff, provisions, transport, clothing, and stores, is £1,410,650, against £1,387,850 in 1886-87. The Militia, officers and men, number 106,280; and the Reserve 30,000. The permanent Militia staff, consisting of 5,159 officers, warrant officers, trumpeters, buglers, and drummers, is charged under Vote 1.

6. Yeomanry Cavalry.—Total £75,000. The items are:—Pay of the Yeomanry Cavalry £51,100; extra pay and allowances £23,700; and miscellaneous charges £1,200, the amounts being the same as in the preceding year. The permanent staff consists of 280 officers and sergeants, while the yeomen number 14,125, giving a total of 14,405; the number present at training in 1886-87 being 9,585.

7. Volunteer Corps.—The total, less a deduction of £200, is £655,000—increase £30,500. The pay of adjutants is £71,000—increase £1,000; of sergeant instructors £84,500—increase £900; capitation grants to corps £429,000—increase £24,200; miscellaneous charges £70,700—increase £4,400. The establishment of the force is:—Light horse, 425; artillery, 45,721; engineers, 12,776; mounted rifles, 61; rifle volunteers, 196,729; and medical staff, 811. The number of efficient volunteers, including staff, is stated as 220,829, the capitation grant for whom is 30s. per head (since increased to 35s.), and a special capitation allowance of 50s. is made for 18,693 proficient officers and sergeants, one of 10s. for 789 officers passing in tactics, and one of 70s. for 280 engineer volunteers efficient in submarine mining. The total charge for the volunteer force is £839,000.

8. Army Reserve (including Enrolled Pensioners).—The total, less a deduction of £100, is £448,000—increase £25,000. The items are:—Extra pay of staff officers, sergeants, and staff expenses £600—decrease £500; pay, &c., of Class I. £440,500—increase £26,500; pay, &c., of Class II. £7,000—decrease £1,000. The number of men in Class I. is 52,000, and in Class II. 5,300, giving a total of 57,300 men as the strength of the Army Reserve Force.

9. Commissariat, Transport, and Ordnance Store Establishments, Wages, &c.—The net vote, after deducting appropriations in aid, is £542,700—increase £22,500. The items are:—Pay, &c., of Commissariat and Transport staff £93,000—increase £3,148; contingencies £2,200—decrease £200; pay of subordinate establishment £139,800—decrease £21,948; Pay of Ordnance Store Department £60,260—increase £270; contingencies £1,067; pay of subordinate establishment £214,997—increase £39,730; police £32,325—increase £1,538. The Commissariat establishment consists of 2 commissaries-general, 10

deputy, 62 assistant commissaries-general, 111 deputy assistant commissaries-general, and 141 other officers. The Ordnance Store establishment has 1 commissary-general, 8 deputy, 36 assistant commissaries-general, 57 deputy assistant commissaries-general, besides 109 other officers, and 11 inspectors of warlike stores. The chief item of Police expenditure is £10,843 for the Royal Arsenal and Dockyard at Woolwich.

10. Provisions, Forage, Fuel and Light, Transport, &c.—The appropriations in aid amount to £63,000, leaving the net vote £2,998,000, a decrease of £284,000. The items consist of:—Cost of provisions, and allowances in lieu thereof, £1,417,000—decrease £138,900; forage, and allowances in lieu, and of paillass straw £504,500—decrease £26,000; fuel and light, and allowances in lieu £327,000—decrease £12,000; field allowance £15,500—decrease £8,300; rents, water supply, &c. £125,000—increase £3,000; lodging allowances £207,000—increase £2,400; colonial allowances, &c. £40,400—decrease £4,600; transport at home £301,000—increase £11,000; transport abroad £82,900—decrease £102,000; newspaper advertisements £5,800; barrack services £32,400—increase £700; sea freight of supplies contracted for £2,500. Of the amount given as the cost of provisions the sum of £1,261,900 is for the regular forces at home, £148,000 for auxiliary forces, and £8,000 allowance to the wives and families of soldiers when separated. Under the head of "Transport at Home" the railway and other expenses for troops are given as £128,000, which includes travelling allowance to officers, billet-money and marching allowance to men, and compensation for damage done by troops on the march; and a charge is made of £70,000 for the carriage of stores and clothing. The travelling expenses of officers absorb £47,000, being for the general staff £8,000; for regimental officers £13,500; for commissariat, ordnance store, army pay, medical, and chaplains' department £11,000; for acting judge-advocates and witnesses £1,500; for manufacturing departments and clothing dépôt £2,100; for military prisons £150; for engineer officers on duties connected with works and buildings £6,250; for schools of gunnery, musketry, and military engineering and educational departments £4,000; and miscellaneous expenses £500. Railway and other expenses for the movement of auxiliary forces are estimated at £56,000. "Transport Abroad," exclusive of forage for transport animals and establishment wages, is £5,000 for travelling expenses, and £77,900 for hired land and inland water transport, which latter sum includes the purchase of transport horses and miscellaneous expenditure.

11. Clothing Establishments, Services, and Supplies.—The Government maintains at Pimlico an extensive clothing establishment for the Army. All clothing supplied by contract for the use of the Metropolitan Police, the General Post Office, the Custom House, the Irish Constabulary, and the Convict and Prison Department is sent here to be inspected and passed as fit for service. The gross total of the vote is reduced by appropriations in aid to £830,000, a decrease of £36,500. The most important items are as follow:—68 officers on the establishment receive £14,000; while the wages in the several departments amount to £154,000; the materials and manufactured supplies costing £1,063,000. It appears that the approximate cost per annum of clothing per man for rank and file varies

from £7 16s. 3d. in the Life Guards to £2 13s. 2d. in the West India Regiments.

12. Supply, Manufacture, and Repair of Warlike and other Stores.—The appropriations in aid, amounting to £593,912, leave the net vote £2,943,500—an increase of £374,500. For 11 establishments the pay, contingencies, rents, &c. amount to £34,024—increase £607; and wages to £1,087,054—increase £156,818. The expenditure for materials is:—For timber £52,055; fuel £68,317; metals £185,528; saltpetre, sulphur, &c. £15,000; total £320,900—decrease £34,653. The "Stores obtained by Contract" consist of:—Small-arms £160,000—increase £35,000; gun stocks £20,000—decrease £15,000; steel ordnance £330,000—decrease £38,000; projectiles £163,000—increase £75,000; gunpowder and gun-cotton £140,000—decrease £36,000; submarine mining stores £17,250—decrease £11,250; cartridges and fuzes £425,000—increase £383,000; gun-carriages £42,000—decr. £18,000; camp equipage £25,000—decrease £5,000; accoutrements £66,000—increase £6,000; saddlery £33,000—increase £2,000; packing materials £5,000—decrease £500; boats, sails, &c. £2,500—decrease £500; war department vessels £30,000—decrease £5,000; miscellaneous stores £569,851—increase £56,763. There are also charges for horse-hire £1,300—increase £50; machinery £62,533—decrease £22,059; salvage £3,000—increase £1,000.

13. Works, Buildings, and Repairs, at Home and Abroad.—Deducting appropriations in aid, the net vote is £862,300, a decrease of £63,500. The sub-heads are as follow:—Royal Engineer Department £94,181—increase £11; contingent expenses £1,964—increase £275; survey of defensive positions £700—decrease £50; incidentals, war department £3,000; photographic services £350; telegraphs and signal stations £2,200—increase £200; miscellaneous engineer services £16,107; engineering experiments £3,000—decrease £2,000; artillery experiments £3,000; making up mantlets £1,000; machinery for engineer parks £300; new works, additions, &c. to fortifications and ordnance buildings above £1,000 each £176,464—decrease £8,649; barracks, &c. £140,949—decrease £4,745; manufacturing establishments £54,770—decrease £7,635; fortifications and ordnance buildings of less than £1,000 each £40,404—increase £1,704; barracks, ditto £61,399—increase £1,449; factories £15,186—decrease £2,304. The ordinary and current repairs of fortifications and ordnance store buildings are estimated at £63,786—decrease £749; of barracks £261,905—increase £4,830; of manufacturing establishments £27,499—increase £747. The subordinate officers of the Royal Engineer Department whose salaries are provided for under this vote are 617 in number, absorbing £77,869. Among the items of special expenditure for 1887-88 are £15,000 for accommodation for two battalions of infantry, and £3,400 for barrack rooms at Aldershot. At Chatham £5,000 for Fort Borstal; £3,000 for the erection of right redoubt at Fort Twydall. At Pimlico, £2,000 for additional accommodation at the Clothing Factory. At Cork, £2,000 for drainage &c. at Fort Westmoreland; at Dublin, £15,000 for new barracks; and £5,000 to rebuild officers' quarters at Island Bridge barracks. £5,000 for barracks at the Curragh; and £3,000 to renew the hospital at the same place. At Fort George, £2,400 for increased accommodation, and £4,500 for Stirling. £2,000 for a powder magazine at Selby;

£5,500 for new ordnance store at York; and £4,000 for prison accommodation in lieu of Chester. £3,000 to improve the water supply at Shoeburyness; £6,500 for general extension of ranges in the South-Eastern district; £7,000 to complete the cavalry lines at Shorncliffe; and £2,000 for drainage at Dover Citadel. In the Southern District, £4,300 to improve the shell-filling establishment at Priddy's Hard; £2,000 for Portsdown Hill; £3,000 for Clarence Barracks; and £3,500 for quarters for Commanding Royal Engineer at Portsmouth. £2,080 for a railway from Fort Scraesdon to Fort Tregantle; £4,000 to adapt works to modern requirements at various stations; £2,500 for practice platforms; £2,500 for expenses connected with railway and water supply stores; £4,876 for installation of the Breman torpedo; £9,000 for submarine mining buildings; and £3,500 for temporary huts. At Woolwich Arsenal, £6,000 is required for means for lifting and landing heavy guns; £3,500 for extension of erecting-shop; £7,000 to rebuild mounting-shed; £7,200 for proof establishments; and £4,700 for saw-mills at Frog Island. At Enfield, £15,000 for extension of Royal Small Arms Factory; and at Waltham, £5,000 for proof range, and £4,000 for new gun-cotton factory. At Bermuda, £3,000 for dockyard defences; at the Cape, £13,500 to provide accommodation for troops; at Malta, £6,700 for defences of new dockyard; at Mauritius, £7,200 to complete the sanatorium; £8,500 for the acquisition of land and conversion of buildings at Hong Kong; £77,200 for the defence of various coaling stations; besides a number of items of smaller amount for similar purposes.

14. Military Education.—The net vote after deducting the sum of £50,683, appropriations in aid, is £130,600, a decrease of £3,000. The heads of expenditure are:—Office of the Director-General £7,856—decrease £5; Woolwich Military Academy £35,865—increase £3,608; Sandhurst College £42,894—decrease £590; Sandhurst Staff College £8,394—decrease £28; garrison instructors £7,734—decrease £314; regimental and garrison schools and libraries £41,780—decrease £667; Royal Military Asylum and Normal School £9,444—decrease £902; Royal Hibernian School £9,293—increase £183; instruction of artillery officers £4,277—decrease £1,061; Army Medical School £7,641—decrease £218; School of Music £2,100—increase £9; rewards for proficiency in languages £4,000. The Director-General receives a salary of £1,500, two Assistant Directors £800 each; a Deputy £650, and the pay of clerks and examiners is £4,106. The chief expenses at the Woolwich Academy are, the Governor's salary £2,000, the salaries of other officers being £3,076. The professors and teachers receive £12,054; and the expenses of students figure at £12,920. At Sandhurst College the aggregate salaries of the military officers amount to £5,055, of which the Governor receives £2,000; the professorial salaries are £11,250, and those at the Staff College £4,060, that of the commandant being £1,000. The total for garrison instructors is £7,734; and that for regimental and garrison schools and libraries £37,080; to which is added the sum of £4,700, being 50s. per annum to each troop, battery, or company on the establishment, with pay of 15 librarians, and extra-duty pay to certain others.

15. Miscellaneous Services.—The net amount, after deducting £2,750, appropriations in aid, is £48,200, a decrease of £11,100. The sub-heads

are:—Ordnance Committee £9,682—increase £547; experimental services £500—increase £66; rewards to inventors £24,000—increase £16,500; Army Sanitary Committee £1,150; Royal Artillery Institution and Royal Engineer Institute £781; Tower Armouries £3,004—decrease £62; grants in aid of certain institutions £3,362—increase £600; military attachés abroad £4,020; commission to bankers £200; compensation for losses £2,000; medals £500; miscellaneous £216—increase £48; and salaries of the Army Purchase Commission £1,535—increase £15. The commission granted to local banks for the supply of specie is £200.

16. War Office.—Appropriations in aid, amounting to £48, reduce the vote to £258,100, an increase of £2,600. The salaries of the Central Department amount to £11,550; that of the Officer Commanding-in-Chief £43,113; of the Surveyor-General of Ordnance £8,910; of the Financial Secretary £5,350; of the Medical Staff £5,650; of the Works Division £12,992. The details are:—Secretary of State £5,000; Parliamentary Under-Secretary £1,500; Permanent Under-Secretary £2,000; assistant ditto £1,500; Chaplain-General £800. The total emoluments received by the Head Quarter staff now being shown in this Vote, the Officer Commanding-in-Chief is seen to receive £6,632; the Adjutant-General £2,700; the Quarter-Master-General £2,100; and the Military Secretary £2,100. The Director-General, Medical Department, receives £1,500; the Surgeon-General £1,300; the Surveyor-General of Ordnance £1,500; the Director of Transport and Supplies £1,200; the Director of Artillery and Stores £1,500; the Director of Contracts £1,380; the Inspector-General of Fortifications £2,100; two Deputy Directors of Works each £1,200; the Financial Secretary £1,500; the Accountant-General £1,500; his deputy £1,200; the assistant £1,000. The staff numbers 78, their united salaries amounting to £88,565. The number of civil clerks is 406, their salaries amounting to £119,310. The surveyors and clerks of works number 62, receiving £17,813; while the military clerks number 89, their salaries amounting to £9,456. There is an item of £3,000 for contingencies, and the expense of preparing maps, &c.

The Votes for non-effective services are the following:—

17. Rewards for Distinguished Services, &c.—After deducting £3,780, the net vote is £16,800, a decrease of £2,600. Rewards to officers are £12,700—decrease £600; to non-commissioned officers £5,070; Victoria Cross pensions £810—decrease £50; gratuities for long service, &c. £2,000. The rewards paid to officers are, with a few exceptions, £100 each, while that to non-commissioned officers varies from £10 to £20. The Victoria Cross pension to non-commissioned officers and privates is £10 per man.

18. Half-Pay of Field Marshals, and of General, Regimental, and Departmental Officers.—The total of the votes is £76,000, a decrease of £3,700. Sixty-nine field marshals and general officers eligible for employment receive half-pay amounting to £40,000, and 149 regimental officers receive half-pay amounting to £30,000, while the departmental officers number 17, and receive £6,000 as half-pay.

19. Retired Pay and Gratuities for Reduced and Retired Officers, &c.—Deducting £230,800 on account of the forces in India, £4,350 refund of over-regulation money, and £78 miscel-

laneous receipts, the balance is £1,232,500—increase £45,100. The retired and unattached pay of 311 general officers amounts to £268,000; 1,661 regimental officers receive £460,000 as retired pay, and 320 receive £121,875 as retired full pay and allowances. From the total of the last two amounts a saving of £5,375 may be effected during the year. Departmental officers, numbering 899, receive £322,800 as retired pay and allowances. Gratuities in lieu of pensions amount to £70,000—decrease £20,000; the cost of maintenance of lunatic officers is £400; retired pay to officers of disbanded foreign corps is £209, and to widows and children of deceased foreign officers, £555; and annuity paid to the National Debt Commissioners for advances made in commutation of pay £121,427. Compensation to be awarded by the Army Purchase Commissioners to officers on retiring amounts to £100,000; and to Royal (late Indian) Artillery and Engineers £8,000.

20. Widows' Pensions, &c.—From the gross estimate £28,552 is deducted for the forces in India and miscellaneous receipts, leaving the balance £127,600, a decrease of £2,100. Pensions to 1,896 widows and relatives amount to £130,000; compassionate allowances to 1,666 children £23,000; gratuities and relief fund £3,152.

21. Pensions for Wounds.—Wounded officers and others number 147, their pensions amounting to £16,451, with a probable deduction of £451; repayments to National Debt Office, for commutation advances, £879. Appropriations in aid amount to £1,679.

22. Chelsea and Kilmainham Hospitals.—Appropriations in aid, amounting to £520, reduce the gross estimate to £31,400, a decrease of £800. Chelsea Hospital requires £27,217—decrease £628; and Kilmainham £4,703. At Chelsea a Governor receives £500 additional pay, and other officials cost £3,134; subordinates £1,217; 32 nurses £999; pay of 527 in-pensioners £1,399; provisions, clothing, &c. £14,983; clerks, &c. £4,099. At Kilmainham the cost of provisions (except bread and meat, provided for in Vote 10) is £1,670.

23. Out-Pensions.—The expenditure consists of £1,771,700, paid to 240 warrant officers and to 84,801 Chelsea pensioners, at from 1½d. to 4s. 6d. a day; the maintenance of lunatics £11,500; and pensions to 116 army schoolmistresses and 7 nurses £3,400. From the gross estimate £430,900 is to be deducted for the forces in India, and £400 for miscellaneous receipts, leaving the net vote £1,358,300, a decrease of £13,800.

24. Superannuation, &c. Allowances.—The total, less £23, appropriations in aid, amounts to £183,300; superannuations being £90,000, compensations £64,000, and compassionate allowances and gratuities £1,300, to which is added £28,023 to be paid to the National Debt Commissioners for commutations. The amount voted in 1886-87 for allowances was £159,000, of which £6,992 has since lapsed. In 1886-87 139 new pensions were granted, amounting to £7,590. The proportion of superannuation for Metropolitan Police is £2,736.

25. Militia, Yeomanry, and Volunteers.—The total of £47,100 shows a decrease of £3,800. Of this sum £19,000 will be paid to 167 retired Militia officers; £1,897 to 16 retired Yeomanry Cavalry adjutants, £18,000 to 130 retired Volunteer adjutants, and £8,202 to the National Debt Commissioners for advances.

THE twelve months which have elapsed since the issue of the Almanack for 1887 have been unusually full of important naval events. There has been an exceptionally large number of additions to the fighting fleet of the country; these additions including several of the most powerful war-ships in the world; the Queen has held a very imposing review at Spithead in celebration of her Jubilee; and some naval manoeuvres of a novel and particularly instructive kind have been carried out in home waters. The ironclads which have been launched are the sister turret-ships *Victoria* and *Sans Pareil*, each of which is designed to carry two 110-ton breechloading guns; the turret-ship *Trafalgar*, which is a still larger vessel, and will carry four 67-ton breechloaders; and the four swift, belted cruisers *Aurora*, *Narcissus*, *Gulatea*, and *Immortalité*, each of which will steam at a rate of over 18 knots an hour, and will be armed with two 18 or 22-ton breechloaders. The unarmoured additions to the Navy include the small composite cruiser *Buzzard*, the gun-vessel *Bramble*, the torpedo-cruiser *Serpent*, and the torpedo gun-boats *Grasshopper*, *Sandfly*, and *Spider*. In the mean time the great barquette ship *Benbow* has been supplied with her 110-ton breechloaders; her sister ironclads, the *Camperdown* and *Anson*, have made satisfactory steam trials, and the armoured ships *Colossus*, *Hero*, and *Orlando* have been completed, or nearly completed, for sea.

The review which, on July 23rd, was held by the Queen at Spithead, was chiefly remarkable as a spectacular event; for, although 26 ironclads and over 100 other vessels were present that day, a great many of the ships were of types which, for fighting purposes, are now obsolete. The exhibition was, however, very interesting as an epitome of the progress of naval architecture during the past half-century, seeing that it embraced almost every variety of government vessel that has been launched since the *Sprightly*, which has since been condemned, took the water for the first time in 1823. After the review the immense fleet was divided into several evolutionary squadrons, which were directed to manoeuvre in the narrow seas with the object of demonstrating to what extent the coasts would, in war time, be assailable by a daring enemy. The most instructive lessons were learnt in the Channel, where Rear-Admiral the Hon. E. R. Fremantle, C.B., succeeded in evading Vice-Admiral Sir W. N. W. Hewett, F.C., who had a squadron of equal force, and who was assisted by a flotilla of gun and torpedo boats. Admiral Fremantle not only captured Falmouth, but forced the Strait of Dover, seized Sheerness, and ran up the Thames as far as Thames Haven before he was obliged to surrender. Operations of scarcely inferior importance were carried out off the Welsh coast and to the north of Ireland. These manoeuvres very plainly demonstrated the extraordinary value, for war purposes, of swift ships. They went far to prove that heavy guns are comparatively useless unless the vessel which carries them possesses speed; and they especially suggested that a fleet at sea cannot learn much of the movements of an active enemy unless it be provided with fast cruisers, which can do the work of scouts. A not less valuable lesson which was taught by the operations is that in

war time the country must not expect its fleet to protect its estuaries and harbours. The fleet must do its best work at sea, and not in shallow waters. The defence of the coast is a matter which can only be properly carried out by local corps of engineers, artillery, and submarine miners, assisted by coast-defence vessels, torpedo-boats, and controllable torpedoes. These evolutions will probably be continued annually.

Among the minor naval events of the year is the purchase by Government of Mr. Brennan's interest in his controllable torpedo, a weapon which can be guided under water by means of wires worked by an engine on shore or on board ship. The invention, all details of which have been kept profoundly secret, is said to be of a most formidable nature, and to work to perfection. In 1886 some torpedo experiments, which did not altogether result in favour of the torpedo, were carried out at Portsmouth against the hull of the old ironclad *Resistance*. The explosive charges which were then used represented those which are ordinarily carried in the nose of the Whitehead automobile torpedo. In June last the experiments were continued. On June 10th a charged Whitehead torpedo was fired against steel protective nets, which were hung 32 feet from the ship. No damage to the hull resulted. On June 14th, however, when a 95 lb. charge of gun-cotton was exploded in actual contact with the ship's starboard bilge, the vessel slowly sank. The issue seems to prove that an ironclad protected by nets is comparatively safe from torpedo attack; but that if her sides are exposed, and she can be hit, she will be seriously damaged.

Late in the year the Admiralty determined to commission some of the new ironclads as flag-ships in place of obsolete vessels. The *Anson* and the *Impérieuse* are accordingly being got ready. Last, but not least among the minor naval events of the year, is the decision of the Admiralty to adopt the new Armstrong 30-pounder rapid-fire gun. Its advantages lie chiefly in the facts that it can be fired by a crew of only three men at the rate of from eight to ten rounds a minute, and that, in spite of its size and penetrative power, it can be aimed from a man's shoulder, the recoil being taken by an hydraulic cylinder placed beneath the gun. The weapon will pierce 6.9 inches of iron at the muzzle, and will be useful, not only against torpedo-boats, but as the chief armament of light gun-boats. Six of these guns are to be fitted to the *Trafalgar*, and others will in all likelihood be supplied to most of the newest ironclads.

It remains only to notice the vessels which have been laid down or ordered during the year. The list includes no heavy ironclads; but is made up of two steel 20-knot protected cruisers, the *Medea* and *Medusa*; three other cruisers, the *Melpomene*; the *Marathon*, and the *Magicienne*; two smaller cruisers, the *Nymphé* and the *Daphné*; a torpedo gunboat, to be called the *Sharpshooter*; and six cruising gun-vessels, to be named respectively, *Pigmy*, *Pleasant*, *Part-ridge*, *Ploner*, *Pigeon*, and *Peacock*. The *Nile*, a sister ship to the *Trafalgar*, will be launched in the spring at Pembroke. It is not probable that any further gunboats will be built of the type of the unfortunate *Wasp*, which left Singapore for Shanghai on Sept. 10th last, and has not since been heard of. She was only launched in 1886.

Amount Estimated for 1887-88 (*gross*), £13,162,249. (Expended in 1885-86, £16,193,701, voted in 1886-87, £13,270,100.)

ADMIRALTY OFFICE (£211,300). Naval Department.—Whitehall. Hours, 11 to 5.

LORDS COMMISSIONERS (£14,350) :— <i>First Lord</i> , Rt. Hon. Lord G. F. Hamilton, M.P. (<i>with house</i>)	£4,500
<i>Private Secretary</i> , Captain Lord Walter Talbot Kerr, R.N.	£500
<i>Assistant Private Secretaries to First Lord</i> , Alpin MacGregor, £100; and W. G. Greene.	
<i>Senior Naval Lord</i> , Admiral Sir Arthur William Acland Hood, K.C.B. (<i>with house</i>)	£1,500
<i>Private Secretary</i> , H. N. Stuart	£50
<i>Second Naval Lord</i> , Vice-Admiral Sir Anthony Hiley Hoskins, K.C.B.	£1,200
<i>Private Secretary</i> , G. H. Hoste	£50
<i>Third Naval Lord and Controller</i> , Vice-Admiral Sir William Graham, K.C.B.	£2,293
<i>Private Secretary</i> , Arthur Spratt	
<i>Junior Naval Lord</i> , Captain Lord Charles Wm. Delapoeer Beresford, C.B., M.P.	£1,200
<i>Private Secretary</i> , J. H. Brooks	£50
<i>Civil Lord</i> , Ellis Ashmead Bartlett, M.P.	£1,000
<i>Private Sec.</i> , W. P. Feiling	£50
<i>First Secretary</i> , Arthur Bower Forwood, M.P.	£2,000
<i>Private Sec.</i> , Gordon B. Voules	£150
<i>Permanent Secretary</i> , Evan MacGregor, C.B.	£2,000
<i>Private Sec.</i> , W. J. Evans	£150
<i>Counsel, and Judge Advocate of the Fleet</i> , Alexander Staveley Hill, Q.C., M.P. (<i>besides fees</i>)	£100

* Half-pay in addition.

I. SECRETARY'S DEPARTMENT.—£20,455.

<i>Assistant Secretary and Principal Clerk</i> , Richard Davis Awdry	£1,200
<i>Principal Clerks</i> , H. J. Van Sittart Neale, E. M. Primrose, O. I. Thomas	£900 to £1,000
<i>Assistant Principals</i> , C. C. Birch, M. P. F. Caulfeild, A. M. De Vismes, Hon. Hubert F. Dormer, M. D. Jeffreys, Alpin MacGregor	£700 to £800
<i>Clerks</i> , O. J. Adams, J. H. Brooks, A. J. Clayton, S. L. Dacres, W. P. Feiling, J. H. Giffard, G. W. Godfrey, W. G. Greene, G. H. Hoste, Sir Jas. Kirkpatrick, Bt., J. A. Peil, R. W. Simpson, H. N. Stuart, W. T. G. Thurlow, Gordon B. Voules	£150 to £600

II. CONTROLLER'S DEPARTMENT.—£50,444.

<i>Controller of Navy</i> , Vice-Admiral Sir William Graham, K.C.B.	£2,293
<i>Director of Naval Ordnance</i> , Captain John Arbuthnot Fisher, C.B., A.D.C.	£1,301
<i>Assistant</i> , Commander James Brown	£730
<i>Assistant Director of Torpedoes</i> , Capt. Arthur Knyvet Wilson, C.B., R.N.	£912
<i>Director of Stores</i> , C. McL. McHardy	£1,000
<i>Examiners of Store Accounts</i> , Samuel Willcocks, Thos. C. White, & E. P. Bechervaise	each £350
<i>Principal Clerks</i> , J. J. Brown, and P. H. S. Desprez	£700 to £900

Constructive and Engineering Staff.

<i>Director of Naval Const.</i> , W. H. White	£2,000
<i>Director of Dockyards</i> , Fras. Elgar, LL.D.	£1,500
<i>Engineer Assistant</i> , J. T. Bannister	£850
<i>Constructor Assistant</i> , J. G. Wildish	£800
<i>Constructor's Assistant</i> , J. B. Marshall	£800
<i>Chief Engineer do.</i> , R. H. Trubshaw	£800
<i>Chief Constructors</i> , Henry Morgan and James Dann	each £850 and allowance
<i>Constructors</i> , J. H. Morrison and W. E. Smith	£400 to £550 and allowance
<i>Engineer-in-Chief</i> , Richard Sennett	£1,016
<i>Inspector of Machinery</i> , William Castle	£650
<i>Examiners of Dockyard Work</i> , John Farquharson, C. P. Lemon, and F. Logan	£350 to £450

III. VICTUALLING DEPARTMENT.—£7,719.

<i>Director</i> , Henry F. R. Yorke	£800
<i>Senior Clerks</i> , Geo. Grant Wilson (<i>in charge</i>)	£750
F. J. Michod, and W. G. Randall	£400 to £650

IV. CONTRACT & PURCHASE DEPARTMENT.—£9,277.

<i>Director of Navy Contracts</i> , John Collett	£1,200
<i>Assistant Director</i> , W. Hale White	£900
<i>Senior Clerks</i> , Tatham Gwyn, Wm. C. B. Hall, C. M. Heath, & Perceval A. Smith	£400 to £650

V. MEDICAL DEPARTMENT,

Avenue House, W.C.—£7,481.

<i>Dirac. Gen.</i> , Sir John W. Reid, K.C.B., M.D.	£1,300
<i>Senior Clerks</i> , J. W. Garnell (<i>in charge</i>), and G. G. Tunks	£700, £650

VI. ACCOUNTANT-GENERAL'S DEPARTMENT,

Spring Gardens, S.W.—£63,557.

<i>Accountant-General</i> , Sir Gerald Fitzgerald, K.C.M.G.	£1,500
<i>Private Secretary</i> , Alfred Eyles	£800
<i>Deputy Acct.-Gen.</i> , Follett Pennell	£1,200
<i>Assistants</i> , John Scott, Robert Main, and A. H. Bather (<i>acting</i>)	each £1,000
<i>Greenwich Hospital Br.</i> —G. T. Lambert	£1,000

VII. TRANSPORT DEPT., Whitehall.—£8,720.

<i>Director of Transports</i> , Vice-Admiral Sir Francis William Sullivan, K.C.B.	£1,593
<i>Assistant ditto</i> , Wm. F. Baughan, C.B.	£881
<i>Naval Assistant</i> , Capt. William Arthur de Vesci Brownlow, C.B.	£800
<i>Senior Clerks</i> , Stephen J. Graff, J. A. Strong, and F. L. Vaux	£400 to £650
<i>Consulting Officer, Indian Troop Services</i> , Captain Arthur Whatley Chitty, I.N.	£1,000
<i>Inspectors of Shipping</i> , Edward G. Farrell, and William Hayman	£560

VIII. DEPARTMENT OF DIRECTOR OF WORKS,

21, Craven Street, Strand.—£9,312.

<i>Director</i> , Col. Percy G. L. Smith, R.E.	£1,300
<i>Assistant</i> , E. I. Woodhead	£800
<i>Surveyor</i> , George Higgs	£800
<i>Surveyor of Coastguard Buildings</i> , (vacant)	
<i>Senior Clerk</i> , Charles F. Wootton	£650

IX. HYDROGRAPHIC DEPT., Whitehall.—10,846.

<i>Hydrographer</i> , Capt. W. J. L. Wharton, F.R.S.	£1,264
<i>Chief Naval Assist.</i> , Capt. Daniel Pender	£800
<i>Chief Civil Assistant</i> , Fleet-Paymaster G. W. Underhill	£650
<i>Naval Assist.</i> , Staff Commander J. C. Richards, Staff Captain Henry R. Harris, Staff Commanders George A. Browning, Charles H. C. Langdon, W. H. Petley, and Walter N. Goalen	£400 to £550
<i>Civil Assistant (Pilotage)</i> , D. G. Dimsey	£600
<i>Superint. of Compasses</i> , Capt. Wm. Mayes	£803
<i>Surveying Officer, Chart Branch</i> , Staff Captain George Stanley	£700

OFFICE OF SUPERINTENDENT OF NAVAL RESERVES, 37, Spring Gardens, S.W.—£4,715.

Superintendent, Vice-Admiral John Kennedy
Erskine Baird £1,965
Secretary, Wm. Wykeham Perry, R.N. £79

NAVAL INTELLIGENCE DEPARTMENT.—£5,483.
Director, Capt. William Henry Hall. £

Assistant Directors, Captains R. N. Custance and S. M. Eardley-Wilmot. £

Naval Staff, Comms. R. O. B. C. Brenton, C. W. Dickinson, Lewis E. Wintz, and Lt. J. B. Hay.

Marine Staff, Majors W. H. Poë, C.B., and R. A. Marriott, D.S.O., and Lieut. G. G. Aston.

Civil Staff, R. Wynne Simpson and clerks.

FLAG OFFICERS IN COMMISSION, AND THEIR SECRETARIES.

Nore	{ Vice-Admiral Charles Ludovic Darley } Duncan. Sec., Wm. B. Risk.
Portsmouth	{ Waddilove
Devonport	Adm. Sir G. Ommanney Willes, K.C.B. Duke of Wellington Sec., Chas. E. Gifford
Queenstown, Ireland	Admiral Lord John Hay, G.C.B. Royal Adelaide Sec., G. E. Marcon.
Channel Squadron	Rear-Adm. Hon. Walter C. Carpenter .. Revenge
Mediterranean	{ V. Adm. Sir W. N. W. Hewett, K.C.B., VC Sultan (temp.) Sec., H.C.W. Gibson
North America and West Indies	{ Rear-Adm. Charles John Rowley (2nd) .. Agincourt Sec., R. Donaldson.
Pacific	{ Adm. H.R.H. Duke of Edinburgh, K.G. .. Alexandra Sec., H. H. Rickard.

FLAG OFFICERS ON THE ACTIVE LIST.

ADMIRALS OF THE FLEET.

H. R. H. Prince of Wales (hon.)
Wallis, Sir Provo W. Parry, G.C.B.
Keppel, Hon. Sir Henry, G.C.B.
Symonds, Sir Thos. M. O., G.C.B.
Milne, Sir Alexander, Bart., G.C.B.
Elliot, Hon. Sir C. G. J. B., K.C.B.
Ryder, Sir Alfred Phillipps, K.C.B.

ADMIRALS.

Robinson, Sir Robt. Spencer, K.C.B.
King, Sir Geo. St. Vincent, K.C.B.
Loring, Sir William, K.C.B.
Hornby, Sir G. T. Phipps, G.C.B.
Hay, Lord John, G.C.B.
Willes, Sir G. Ommanney, K.C.B.
DeHorsey, Algernon Frdk. Rous.
Dowell, Sir Wm. Montagu, K.C.B.
Hood, Sir Arthur Wm. A., K.C.B.
Commerell, Sir Jno. E., G.C.B. VC
Clanwilliam, Earl of, K.C.B.
H.S.H. Pr. of Leiningen, G.C.B.
H.R.H. Duke of Edinburgh, K.G.
Hamilton, Sir R. Vesey, K.C.B.

VICE-ADMIRALS.

Waddilove, Charles Ludovic D.
Somerset, Leveson Eliot Henry.
Hewett, Sir W. N. W., K.C.B. VC
Lyons, Algernon McLennan.
Brandreth, Sir Thomas, K.C.B.
Lethbridge, Thos. Bridgeman.
Sullivan, Sir Francis W., K.C.B.
Hardinge, Edward, C.B.

Graham, Sir William, K.C.B.
Hoskins, Sir Anthony H., K.C.B.
Salmon, Sir Nowell, K.C.B., VC
Howard, Edward Henry.
Baird, John Kennedy Erskine.
Curme, Charles Thomas.
Watson, George Willes.
Hickley, Henry Dennis.
Phillimore, Henry Bouchier, C.B.
Ward, Hon. William John.
Wratislaw, Henry Rushworth.
Whyte, William Henry.

REAR-ADMIRALS.

Grant, Henry Duncan, C.B.
Moresby, John.
Douglas, Sholto, C.B.
Edye, William Henry.
Culme-Seymour, Sir Michael, Bt.
Richards, Sir Fred. Wm., K.C.B.
Carpenter, Hon. Walter Cecil.
Douglas, Robert Gordon.
Greive, William Samuel.
Tryon, Sir George, K.C.B.
Heneage, Algernon C. Fieschi.
Hunt-Grubbe, Sir W. J., K.C.B.
Rowley, Charles John.
Wells, Richard.
Ward, Thomas Le Hunte, C.B.
Fremantle, Hon. Edm. Robt., C.B.
Hopkins, John Ommanney.
D'Arcy-Irvine, St. Geo. Caulfield,
Fairfax, Henry, C.B. [C.B.]
Gordon, William Erlington.
Chatfield, Alfred John, C.B.

Barnardiston, Thomas.
Brine, Lindesay.
Erskine, James Elphinstone.
Sulivan, George Lydiard.
Codrington, William, C.B.
Nicholson, Henry Frederick, C.B.
Buller, Alexander, C.B.
Jones, Loftus Francis.
Bosanquet, George Stanley.
Prattent, Francis Mowbray.
Kelly, Edward.
Robinson, Frederick C. Bryan.

NAVAL A.S.D.C. TO THE QUEEN.

Adm. H.R.H. Duke of Edinburgh, K.G. (personal).
Lieut. H.R.H. Prince George of Wales, K.G. (personal).
Hornby, Adm. Sir Geoffrey Thos. Phipps, G.C.B. (first)
Captains, Molyneux, Sir Robt. Henry Moore, K.C.B.
Tracey, Richard Edward.
Hotham, Charles Fredk., C.B.
FitzRoy, Robt. O'Brien, C.B.
Scott, Lord Chas. T. M. D., C.B.
Maxwell, William Henry.
Kerr, Lord Walter Talbot.

Fisher, John Arbuthnot, C.B.
St. John, Henry Craven.
Fullerton, John R. T. (no Marine—
Tuson, Col. Hen. Brasnell, C.B.
Scott, Col. James Woodward.

IRONCLAD VESSELS, WITH THEIR CAPTAINS AND PRINCIPAL OFFICERS, THEIR GUNS, TONNAGE, AND (within brackets). HORSE-POWER. [November, 1887.]

Those in Commission have their names printed in heavier type.

- ACHILLES**, 16, 9820 (5720), Devonport. *Chief Eng.* Richard G. Callaway.
- AGAMEMNON**, 6, 8510 (6360), Mediterranean. *Capt.* Charles S. Cardale; *Comm.* Chas. Henry S. Pretymann; *1st Lieut.* Sir Henry A. Ogle, Bt.; *Chaplain*, Rev. Francis J. Odell; *Fleet Surg.* Edward J. Sharood; *Fleet Paym.* Charles T. Dawson; *Fleet Eng.* John E. Turner.
- AGINCOURT**, 17, 10,690 (6870), flag-ship, 2nd in command, Channel Squadron. *Rear-Admiral* Charles John Rowley; *Capt.* Swinton Colthurst Holland; *Comm.* Robert L. Groome; *1st Lieut.* Herbert A. W. Onslow; *Chaplain*, Rev. Thos. Austin; *Staff Surg.* John C. B. Maclean; *Fleet Paym.* Cornelius W. M'Dermott; *Fleet Eng.* Wm. Bryan.
- AJAX**, 6, 8510 (6440), Greenock. *Capt.* Francis Durrant, c.m.g.; *Comm.* Henry D. Barry; *1st Lieut.* Charles G. Gardiner; *Chaplain*, Rev. Charles R. Gamson; *Staff Surg.* William Fredk. Spencer; *Fleet Paym.* Edmund Hickson; *Fleet Eng.* Alexander F. McIntyre.
- ALEXANDRA**, 18, 9490 (8610), flag-ship, Mediterranean. *Adm.* H.R.H. the Duke of Edinburgh, k.g.; *Capt.* John Fellowes, c.b.; *Comm.* Thos. MacGill; *1st Lieut.* Frederick S. Inglefield; *Chaplain*, Rev. Charles J. Corfe; *Fleet Surg.* George Maclean; *Fleet Paym.* Alfred T. D. Nettleton; *Fleet Eng.* Joseph Turner.
- ANSON**, 10, 10,000 (11,500), Portsmouth. *Lieut.* Robert L. G. Noel; *Fleet Eng.* Alex. Purvis.
- AUDACIOUS**, 18, 6010 (4830), flag-ship, China. *Adm.* Sir Richard V. Hamilton, k.c.b.; *Capt.* Robt. H. Harris; *Comm.* Francis Powell; *1st Lieut.* Henry Leah; *Chaplain*, Rev. Robert O'D. Ross-Lewin; *Fleet Surg.* James William Fisher; *Fleet Paym.* Thomas O. Joynson; *Fleet Eng.* Leopold M. Green.
- AURORA**, 12, 5000 (8500), steel armoured cruiser, building at Pembroke. *Staff Eng.* J. F. Babb.
- AUSTRALIA**, 12, 5000 (8500), steel armoured cruiser, Chatham. *Staff Comm.* Edmond E. Greaves; *Staff Eng.* William T. H. Bills.
- BELLEFAIR**, 4, 4870 (3200), Coastguard, Kingstown. *Capt.* Guy O. Twiss; *Comm.* Geo. N. A. Pollard; *1st Lieut.* William H. M. Daniell; *Chaplain*, Rev. William V. Rainier; *Staff Surg.* John A. Robertson; *Fleet Paym.* Cuthbert R. Rodham; *Fleet Eng.* William Gilbert.
- BELLEROPHON**, 20, 7550 (6520), flag-ship, N. America and West Indies. *Vice-Adm.* Algernon McLennan Lyons; *Capt.* Bouverie F. Clark; *Comm.* George A. Primrose; *1st Lieut.* Spencer H. M. Logan; *Chaplain*, Rev. Chas. J. Todd; *Fleet Surg.* Richard J. Sweetnam; *Fleet Paym.* Thos. H. L. Bowling; *Staff Eng.* David Grant.
- BENBOW**, 12, 10,000 (11,500), Chatham. *Lieut.* Henry C. B. Hulbert; *Fleet Eng.* Henry Watkins White.
- BLACK PRINCE**, 28, 9210 (5770), Devonport. *Staff Comm.* Charles Brent; *Staff Eng.* James John Warren.
- CAMPERDOWN**, 10, 10,000 (11,500), Portsmouth. *Lieut.* Andrew Leslie Murray; *Fleet Eng.* James Wootton.
- COLLINGWOOD**, 10, 9150 (9570), Portsmouth. *Staff Comm.* John Stocker; *Fleet Eng.* William Philip Davis.
- COLOSSUS**, 9, 9150 (7500), Mediterranean. *Capt.* Cyprian A. G. Bridge; *Comm.* Edward H. Gamble; *1st Lieut.* Blanchard R. T. Coward; *Chaplain*, Rev. Benjamin C. Pidcock; *Fleet Surg.* Alfred W. Whitley; *Fleet Paym.* Henry J. Harvey; *Fleet Eng.* John Rice.
- CONQUEROR**, 6, 6200 (6000), Devonport. *Staff Comm.* Albert R. Wonham; *Staff Eng.* Henry Laughrin.
- CYCLOPS**, 4, 3480 (1660), Devonport. *Navig. Lieut.* William H. Turner; *Staff Eng.* Sam. J. Rock.
- DEVASTATION**, 4, 9330 (6650), Coastguard, Queensferry. *Capt.* Frederick S. VanderMeulen; *Comm.* Frank Finnis; *1st Lieut.* Edward J. Bawtree; *Chaplain*, Rev. Frederick G. H. H. E. White; *Staff Surg.* Stewart F. Hamilton; *Fleet Paym.* Alfred De Denne; *Staff Eng.* John Swanson.
- DREADNOUGHT**, 4, 10,820 (8210), Mediterranean. *Capt.* Noel Stephen Fox Digby; *Comm.* H.S.H. Prince Louis of Battenberg, g.c.b.; *1st Lieut.* George T. Wingfield; *Lieut.* H.R.H. Prince George of Wales, k.g.; *Chaplain*, Rev. Hugh S. Wood; *Staff Surg.* Frederick McClement; *Fleet Paym.* Henry H. P. Shanks; *Fleet Eng.* William Barclay.
- EDINBURGH**, 9, 9150 (7500), Mediterranean. *Capt.* Henry St. L. B. Palliser; *Comm.* Percy Moreton Scott; *1st Lieut.* Henry Peter Routh; *Chaplain*, Rev. Henry C. F. Hunter; *Fleet Paym.* Henry de Ridder; *Staff Surg.* Robert W. Biddulph; *Fleet Eng.* George James Weeks.
- GALATEA**, 12, 5000 (8500), steel armoured cruiser, Glasgow. *Staff Eng.* Charles E. Stewart.
- GLATTON**, 2, 4910 (2870), Portsmouth. *Fleet Eng.* William Molland Taylor.
- GORGON**, 4, 3480 (1670), Devonport. *Lieut.* John Charles Roughton; *Fleet Eng.* Wm. M. Feak.
- HECATE**, 4, 3480 (1750), Devonport. *Staff Eng.* Stephen Brett Williams.
- HECTOR**, 18, 6710 (3260), Portsmouth. *Fleet Eng.* Charles Wm. G. Chambers.
- HERCULES**, 20, 8680 (6750), Coastguard, Portland. *Vice-Adm.* John Kennedy Erskine Baird; *Capt.* Claude E. Buckle; *Comm.* Lionel Fanshawe; *1st Lieut.* Charles H. Coke; *Chaplain*, Rev. Geo. H. Trehearne; *Staff Surg.* Alexander R. Joyce; *Fleet Paym.* William H. Haswell; *Fleet Eng.* Peter Eckford.
- HERO**, 6200 (6000), Chatham. *Staff Comm.* Wm. John Symons; *Fleet Eng.* Peter Colquhoun.
- HOTSPUR**, 4, 4010 (3060), Coastguard, Harwich. *Capt.* James G. Mead; *Comm.* Percy Hockin; *1st Lieut.* George L. W. Adair; *Fleet Surg.* Edward W. Doyle; *Staff Paym.* Gervase F. Mathew; *Fleet Eng.* John Miller.
- HOWE**, 10, 9700 (11,500), Portsmouth. *Staff Comm.* George J. Hirtzel; *Staff Eng.* Frdk. S. Turner.
- HYDRA**, 4, 3480 (1470), Chatham. *Staff Comm.* Richard G. Roe; *Fleet Eng.* Wm. R. McAvoy.
- IMMORTALITY**, 12, 5000 (8500), steel armoured cruiser, Chatham. *Chief Eng.* Caleb J. North.
- IMPETUEUSE**, 10, 8500 (10,000), Portsmouth. *Staff Comm.* Geo. Kains Moore; *Fleet Eng.* J. Jefferies.
- INFELEXIBLE**, 10, 11,880 (8010), Portsmouth. *Staff Comm.* James B. Walker; *Fleet Eng.* H. Hull.

GROSS ESTIMATE, £13,162,247; NET, £12,476,800.

The following tabular statement gives at one view the cost of this branch of the public service for three years, and shows the net total of the present year to be a decrease as compared with 1886-87 of £793,300. The principal points of difference between this year and its predecessor are increases of £37,800 in vote 1, of £27,600 in vote 2, of £23,000, £24,100, and £13,000

in vote 10, and of £50,000 in vote 14. Decreases of £35,000, £43,000, £143,700, £440,100, £6,900, and £23,400 occur in vote 10, of £70,400 in vote 11, of £163,400 in vote 17, and of £32,900 in the non-effective and miscellaneous services. The average annual expense for the three years now stands at £12,813,933.

Year.	Gross Estimate.	Appropriations in Aid.	Net Vote.	Supplementary (net).	Expended.	No. of Officers and Men.	
	£	£	£	£	£	Seamen.	Marines.
1885-86	13,146,928	760,428	12,386,500	308,400	16,193,701	48,600	12,900
1886-87	13,650,626	657,526	12,993,100	277,000	—	48,500	12,900
1887-88	13,162,247	685,449	12,476,800	—	—	49,600	12,900

The gross cost of the several votes is shown in the following abstract, and in the succeeding details will be found the net total of each, after deducting "Appropriations in Aid":—

1. Wages to Seamen and Marines	£3,063,739
2. Victuals and Clothing	1,277,850
3. Admiralty Office	215,820
4. Coast-guard and Naval Reserve	204,967
5. Scientific Branch	135,946
6. Dockyards and Naval Yards	1,733,417
7. Victualling Yards	71,900
8. Medical Establishments	65,930
9. Marine Divisions	21,734
10. { 1. Naval Stores	1,377,000
{ 2. Machinery and Ships Built by Contract	1,911,000
11. New Works, Machinery, Repairs, &c.	550,325
12. Medicines and Medical Stores	75,400
13. Martial Law and Law Charges	11,500
14. Miscellaneous Services	191,128
Total, Effective Services	£10,917,656
15. Half Pay and Retired Pay	801,412
16. { 1. Military Pensions and Allowances	906,844
{ 2. Civil ditto	389,337
Total, Naval Service	£12,955,249
17. Conveyance of Troops	207,000
Grand Total	£13,162,249

1. *Wages, &c. to Seamen and Marines*.—Net total £2,940,700, an increase of £37,800, chiefly caused by provision for a larger number of seamen. The sub-heads are: Wages, &c. to seamen, boys, and coastguard, £2,620,277—increase £41,227; to marines £408,942—increase £3,095. The expense of raising men and boys is £4,000. For prizes for good shooting, seamen are to receive £1,220, and marines £1,330, a total of £2,550—increase £575. Recruiting expenses of royal marines are £5,670—decrease £1,243; contingencies £22,000—increase £500; and special gratuity to seamen and marines for service in Egypt £300—decrease £50. The Appropriations in Aid, in reduction of the gross amount of the vote, are £123,039. The details of those receiving pay, &c., under the vote are as follows:—13 flag officers, 2,697 commissioned officers, 527 subordinate officers, 877 warrant officers, and 34,652 petty officers, seamen, &c., making a total of 38,766, or 1,315 more than in the previous year. Of 6,174 boys, 4,224 are for service in the fleet, and 1,950 under instruction

in training-ships. In the coast-guard service there are 94 commissioned officers, 1 warrant officer, 226 chief officers, and 3,679 petty officers, seamen, &c., making a total of 48,940 hands in these branches of the service—an increase of 1,015. In the marines the headquarters staff consists of 5 commissioned officers, 2 warrant officers, and 4 staff sergeants and sergeants; for the service afloat, 81 commissioned officers, 240 staff sergeants and sergeants, 121 buglers and musicians, and 6,391 rank and file; and for the service ashore, 254 commissioned officers, 36 warrant officers, 575 staff sergeants and sergeants, 242 buglers and musicians, and 4,758 rank and file, a total of 12,709 for this branch of the service.

2. *Victuals and Clothing*.—Net total £992,000, an increase of £27,600, principally caused by additional numbers. The sub-heads are: Provisions and allowances in lieu £704,450—increase £26,500; payments for provisions net taken up £179,100—increase £14,000; lights and allowances in lieu £51,750—decrease £4,150; mess-traps £10,150—increase £350; seamen's clothing, soap, and tobacco £2,250—decrease £4,000; marine clothing, &c. £58,600—decrease £1,100; allowances in lieu of ditto £3,050—decrease £150; beer-money, and excess cost of rations £11,850—decrease £4,650; marine barrack stores £15,750—increase £1,450; victualling stores £29,400—increase £2,800; freight, lighterage, &c. £13,500. There is an estimated rebate for charges against seamen for issues, repayments by other departments, a contribution of £18,000 from the Indian Government, and the proceeds of sale of unserviceable stores, the whole amounting to £285,850, to be taken as appropriations in aid in reduction of the gross amount of the vote.

3. *Admiralty Office*.—Net total £211,300, an increase of £4,400, accounted for by the extension of the Intelligence Department. The sub-heads are: Salaries, wages, &c. £208,269—increase £4,675; travelling expenses £5,000—decrease £300; contingencies £2,551—increase £25. The cost of the several departments, and details of the principal salaries, will be found at p. 219.

4. *Coast-guard and Royal Naval Reserves*.—The net total is £204,900, an apparent decrease of £2,700, but actually an increase of £3,300, owing to £6,000 being transferred to vote 11. The sub-heads are: Salaries, wages, &c. of Royal Naval Reserves Office £4,715—increase £3; rent and insurance of coast-guard buildings £28,220—decrease £602; travelling expenses,

removals, &c. £15,826—increase £658; fuel and light £4,413—decrease £22; contingencies of coast-guard on shore £2,653—increase £93; wages, &c. of naval reserve £141,170—decrease £4,520; seamen and marine pensioners reserve £2,050; naval artillery volunteers £5,920—increase £1,690. The Admiral Superintendent of the Reserve receives £1,965, his secretary £480; a senior captain £1,000; an assistant paymaster £287; while the clerical staff pay and other charges amount to £983. The expenses of the Coast-guard Service provided for in this vote amount to £51,112, but charges under other votes and the official salaries of £4,715 bring up the total to £457,040. In the *Royal Naval Reserve*, 20,300, £84,500 is charged as the annual retainer to seaman, and £46,180 for drill pay and lodging allowance, £4,794 to deputy registrars for enrolling men, besides smaller amounts for medical fees, and other charges connected with the force, making a total of £141,170. With other votes, in addition to this sum, the total charge for the Reserve is £225,592. The actual strength of the Reserve is 22,001.

5. *Scientific Branch*.—Net total £108,800, a decrease of £4,400, owing to a saving at the Cape and larger estimated contributions towards the training of naval cadets. The salaries, &c., of the *Royal Observatory* cost £5,390, some details of which will be found in p. 168. The expenses for repairs, apparatus, &c. are £3,061. The *Cape Observatory* includes an astronomer at £800, a first assistant at £550, and other salaries and apparatus make a total of £3,393—decrease £1,413. The expense of the *Nautical Almanac* is £3,353, including salary of the Superintendent £600, a chief assistant £400, besides ten other assistants. The average annual sale of the Almanack for the last five years has been 14,524, the number sold in 1882 (15,071) dropping to 13,665 in 1886. *Chronometers* are estimated to cost £1,932, and the expenses of the *Compass Department* are £1,743. There is an item of £250 devoted to rewards, experiments, &c., which is added to the funds of the Institution of Naval Architects. The Inspector of Naval Schools receives £700, and the Sub-Inspector £344, making, with travelling expenses, a total of £1,269. An annual contribution of £300 is paid to the Royal United Service Institution. For the drawing and engraving of charts £6,840 is charged, and £6,700 for printing and mounting them. In 1886 there were 128,942 charts sold, producing £7,613; the annual average for five years was 138,356 sold, producing £8,030. The total for salaries is £10,846, and the cost of the department £44,846. Of this £19,000 is for coast and other surveys carried on in various parts of the world, in hire of vessels, wages, &c., to which may be added £68,910 provided in other votes, making the total charge for the surveying service £87,910. The cost of education at the *Royal Naval College*, Greenwich, with incidental expenses, is £32,043; and the conduct of examinations there £2,118. The cost of the *Naval Museum* at Greenwich is set down at £639; the training of naval cadets £21,358, of which £15,000 will be met by parents and guardians, leaving the cost at £6,358, to which may be added £15,750 provided under other votes, making the total charge £22,108. The training of engineer students at Portsmouth and Devonport is £13,836, a further sum of £3,509 being charged under other votes, making a total of £17,345, of which £3,952 is to be contributed by the

students; and the expenses for the examination of candidates for the naval medical service are £415. The receipts applied in reduction of the gross estimate amount to £21,446.

6. *Dockyards and Naval Yards*.—Net total £1,732,600, an increase of £3,100, caused principally by 53 weekly payments falling within the year. The most important sub-heads are—*Home*: salaries £172,471—increase £1,499; wages to artificers, &c. £1,310,820—decrease £10,375; police £35,210—increase £421. *Abroad*, the chief items are: salaries, &c. £48,964—increase £168; wages to artificers £120,146—increase £11,410; yard service afloat £8,826—decrease £665; police £11,619—increase £65. The remaining minor sub-heads will be incidentally noticed further on. The following details are of chief interest:—

(a) *Dockyards at Home*.—*Portsmouth*: the salaries paid to 306 officials amount to £52,380. *Devonport*: salaries to 241 officials, £42,985. *Chatham*: salaries to 198 officials £34,804. *Sheerness*: salaries to 120 officials £21,896. *Pembroke*: salaries to 86 officials £16,771. *Deptford Storeyard*: salaries to 15 officials £2,955. *Portland Coaling Dépôt*: salaries to 2 officials £680. The total officials for the above dockyards number 968, against 965 in 1886-87, and their salaries amount to £172,471, against £170,972 in the previous year. The total number of artificers to be employed in the dockyards at home is less than last year, being 19,554, against 19,873: viz., for ships building and completing 10,312 men; for repairs 4,787; for yard manufactures, storekeeping, and other incidental purposes 4,455. The police number 395, their wages being £35,210.

(b) *Naval Yards Abroad*.—*Malta*: salaries to 60 officials £13,186. *Bermuda*: salaries to 40 officials £8,085. *Hong Kong*: salaries to 30 officials £9,808. *Cape of Good Hope*: salaries to 13 officials £4,012. *Gibraltar*: salaries to 7 officials £2,319. *Jamaica*: salaries to 10 officials £2,094. *Halifax*: salaries to 9 officials £2,070. *Trincomalee*: salaries to 6 officials £1,624. *Esquimaux* (Vanconver): salaries to 9 officials £3,414. *Sydney*: salaries to 6 officials £1,851. *Yokohama*: salary to 1 official £341. *Antigua*: salary, £10. *Fernando Po*: salary to 1 official £150. The total number of officials for naval yards abroad is 192, their salaries amounting to £48,964; while the number of artizans is 2,388, their wages being £128,972. The police number 159, and their wages amount to £11,619.

7. *Victualling Yards*.—Net total £71,800, an increase of £1,100. The chief heads of expenditure are—*At Home*: salaries £15,756; wages £33,538; and *Abroad* similar items are respectively £2,162 and £6,170. The most important details are as follow: *At Home*—*Deptford*: total £33,400, against £32,664; salaries £7,800; artificers' wages £19,948; men 377; police 24. *Gosport*: total £13,864, against £13,595; salaries £3,202; wages £6,614; men 116; police 18. *Plymouth*: total £12,209, against £12,004; salaries £2,720; wages £5,968; men 105; police 15. *Royal Alexandra* (Haulbowline): total £3,552, against £3,644; salaries £2,034; wages £1,008; men 18. *Abroad*—*Gibraltar*: total £312, wages for 5 men. *Malta*: total £3,561, against £3,472; salaries £1,082; wages £2,369; men 69. *Halifax*: total £740; salary £450; wages £104. *Bermuda*: total wages £743, against £735; men 11. *Jamaica*: total £682, against £746; salary £230; wages £437; men 8. *Sierra Leone*: total £195; salary £100; wages £90; men 5. *Cape of Good Hope*: total £456, wages for 6 men.

Bombay, £300. *Barbados*, £100. *Trincomalee*, £176; wages for 7 men. *Hong Kong*: wages £167, men 24. *Esquimalt* (Vancouver): total £762, £622 being wages for 5 men.

6. Medical Establishments.—Net total £65,900, a decrease of £1,100. The chief heads at Home are—salaries £19,880; wages £15,344; and similar items *Abroad* are £11,057 and £6,109; salaries at marine infirmaries are £4,639, and wages £923. The details are:—*At Home*—*Melville*: total £5,790, against £5,925; salaries £3,068; wages £2,437. *Haslar*: total £16,319, against £16,766; salaries £7,826; wages £7,453. *Plymouth*: total, £11,677, against £12,160; salaries £5,906; wages £5,081. *Hunbolton*: total £1,883, against £1,935; salaries £1,040; wages £818. *Yarmouth Lunatic Asylum*: total £4,438, against £4,483; salaries £1,548; wages £2,165. *Portland*: total £704, against £702. *Abroad*—*Malta*: total £3,797, against £3,910; salaries £1,928; wages £1,577. *Lisbon*: total £697; salary, £392; wages £222. *Halifax*: £275. *Bermuda*: total £3,000; salaries £2,085; wages £907. *Jamaica*: total £2,723; salaries £1,911; wages £799. *Cape of Good Hope*: total £2,124; salaries £1,474; wages £634. *Trincomalee*, £172. *Hong Kong*: total £3,786, against £3,753; salaries £2,125; wages £1,341. *Esquimalt*: £1,064. *Yokohama*: total £1,239; salary £551; wages £470. The Marine Infirmaries present the following details:—*Portsmouth* (Forton): total £1,316; salaries £1,249; wages £57. *Portsmouth* (Eastney): total £1,733; salaries £1,303; wages £301. *Plymouth*: total £1,273. *Walmer*: total £1,554; salaries £926; wages £508. In the vote the sum of £300 is estimated as extra pay to officers and others whose services are lent from the Navy.

9. Marine Divisions.—Net total £21,700. The disbursements are—salaries £7,683; rents, water, &c. £7,462; gas £3,400; contributions and grants in aid £797; contingencies £2,393. The details are—*Chatham*: total £3,971, against £3,879. *Portsmouth* (Forton): £4,966, against £5,054. *Portsmouth* (Eastney and Fort Cumberland): £4,939, against £4,909. *Plymouth*: £3,837, against £3,840. *Walmer Recruit Dépôt*, £4,021, against £4,052.

10. Naval Stores for Building and Repairing.—This vote is divided into two sections, the first dealing with *Naval Stores*, and the second with *Machinery and Ships built by contract*. The net total of the first section is £1,207,000, a decrease of £78,000. The second section is £1,911,000, a decrease of £565,300. The details are:—

Sect. I.—Timber, masts, deals, &c. £70,000, against £162,200; metals and metal articles £594,500, against £581,000; coals and other fuel £285,000, against £255,000; hemp, canvas, &c. £128,000, against £122,000; paint, oils, pitch, glass, and similar articles £173,700, against £180,000; electrical, torpedo, and other apparatus £92,800, against £87,800; and freight and other charges on naval stores £33,000. The appropriations in aid amount to £170,000.

Sect. II.—The total required for steam propelling machinery is £586,800, a decrease of £143,700. The sum required for ships building by contract is £590,600—decrease £440,100; for steam launches, &c., £10,000. The remaining items are: £25,400 for machinery connected with steering, &c.; £30,000 for repairs and alterations by contract; £14,000 for superintendence of contract work; £46,500 for experimental services; £1,000 for breaking up ships,

&c.; £44,600 for torpedoes purchased; £513,000 for gun mountings and torpedo carriages; £36,100 for armour-piercing projectiles; and £13,000 for reserve of merchant cruisers.

The total estimated expenditure during 1887-88 on ship building, repairs, and miscellaneous services attending thereto is £4,837,220. The items come under votes 6 and 10, and amount to £1,310,320 for labour in dockyards at home, and to £131,773 in dockyards abroad; £712,131 being the charge for new construction, £394,313 for refitting and repairs, and £336,149 for miscellaneous services. For materials the amounts are for new construction £761,421, for refitting and repairs £236,472, and for miscellaneous services £76,934, with the addition of £600,000 for coal and stores. The total for contract work is £1,769,800, £1,584,793 being for new construction, £40,146 for repairs, and £144,951 for miscellaneous services.

The cost of the effective armoured ships at present in the navy is shown below, where the date of completion of each vessel is followed by its first cost and the amount further expended to March 31, 1886:—*Black Prince* (1863) £377,954—274,354; *Prince Albert* (1866) £208,345—45,087; *Scorpion* (1866) £111,614—40,953; *Wivern* (1866) £118,769—81,297; *Bellerophon* (1867) £356,493—241,699; *Vixen* (1867) £56,550—7,930; *Minotaur* (1868) £478,360—231,340; *Viper* (1868) £53,457—11,143; *Agincourt* (1869) £483,003—202,119; *Hercules* (1866) £377,008—184,077; *Northumberland* (1869) £490,680—201,773; *Penelope* (1869) £196,789—94,291; *Monarch* (1870) £371,415—203,614; *Audacious* (1871) £256,291—182,996; *Invincible* (1871) £249,203—134,014; *Iron Duke* (1871) £208,763—183,564; *Sultan* (1872) £374,777—178,623; *Hotspur* (1872) £175,995—151,025; *Glutton* (1872) £223,101—41,018; *Swiftsure* (1873) £267,718—102,264; *Decastation* (1874) £361,438—105,346; *Gorgon* (1874) £141,254—25,941; *Triumph* (1874) £268,561—147,669; *Rupert* (1875) £239,197—53,897; *Alexandra* (1877) £538,293—63,591; *Hydra* (1877) £144,333—15,647; *Cyclops* (1878) £156,782—15,962; *Hecate* (1878) £143,310—32,387; *Shannon* (1878) £302,727—53,156; *Téméraire* (1878) £489,822—52,246; *Thunderer* (1878) £368,428—57,391; *Belleisle* (1879) £267,179—20,098; *Dreadnought* (1879) £619,739—42,925; *Northampton* (1880) £414,434—23,557; *Superb* (1881) £531,846—28,316; *Inflexible* (1882) £812,485—43,382; *Nelson* (1882) £411,308—12,651; *Neptune* (1882) £689,171—12,588; *Orion* (1883) £296,761—14,377; *Agamemnon* (1885) £530,015—10,465; *Arar* (1886) £548,393—3,547; *Colossus* (1886) £662,190—4,987; *Edinburgh* (1886) £662,773—152; *Conqueror* (1886) £399,919—884; *Collingwood* (1886) £627,375—974; *Impérieuse* (1886) £537,595—3,120. The estimated cost of the armoured vessels now being constructed ranges from £290,300 (*Gulutea*) to £889,421 (*Nile*).

11. New Works, Machinery, and Repairs.—Net total £553,300, a decrease of £70,400, principally in consequence of the completion of works and docks. For new works and buildings £9,300 is required for *Chatham*; for *Portsmouth* £6,000 for extension of the yard, on which £2,197,291 has been expended, £11,000 for torpedo range and stores, and £500 for other purposes; for *Keyham* £4,500; for *Haulbolton* £13,000; for *Gibraltar* £3,500; for *Malta* £46,300; for *Bermuda* £2,000; and for *Hong Kong* £14,000. For minor works and buildings at home the sum of £152,015 is required, £32,800 being for *Chatham*; for *Sheer-*

ness £8,400; Portsmouth £54,575; Devonport and Keyham £27,270; and other places £28,970. For minor dockyards abroad the sum required is £41,635. For victualling yards at home the total is £6,910; and abroad £1,385; hospitals and prisons at home £12,615; abroad £5,385; marine barracks and infirmaries £16,200; Coastguard £28,000; naval colleges £7,055; breakwaters £13,200; and temporary superintendence at home £10,000; abroad £4,000. For yard machinery and repairs at dockyards at home the amount required is £41,311; £16,500 being for Chatham; £2,200 for Sheerness; £16,321 for Portsmouth; £3,720 for Devonport and Keyham; £1,500 for Pembroke; and £1,170 for Portland. For naval yards abroad £10,219; and for victualling yards at home £2,550. Appropriations in aid amount to £8,140.

12. *Medicines and Medical Stores, &c.*—Net total £56,100, a decrease of £12,000. The disbursements are—Hospital and Infirmary provisions, medicines, instruments, &c. £62,600—decrease £4,150; subsistence, &c., of seamen at sick quarters, &c. £11,000—decrease £1,000; and miscellaneous disbursements £1,800. Appropriations in aid amount to £19,300.

13. *Martial Law, &c.*—The total is £11,500, an increase of £2,100. The heads of expenditure are—Courts-martial £2,000; Naval Prison, Lewes £4,063; at Bodmin £2,000; ditto at Hong Kong, Bermuda, the Cape, Ascension, and Coquimbo £1,327; conveyance of prisoners £1,260; and subsistence abroad £850.

14. *Miscellaneous Services.*—Net total £186,100, an increase of £42,900. The amounts of chief importance are—piloting and towing ships of the navy £9,000; passage-money and conveyance of officers, seamen, and marines £61,500. The Commanders-in-Chief absorb for office-furniture, postage, &c. £3,500; telegrams £9,000; compensation to officers for losses by shipwreck £700; contributions to sailors' homes £650; to religious and charitable institutions £1,500; allowances to ministers of religion £3,400; percentage to banks £2,000; medals £100; advertisements and stamps on contracts £2,400; compensation for damages done by navy vessels £2,500; expenses of committees £2,000; stationery £3,800; loss by exchange £3,500; lodging allowance to naval officers £4,500; water police £4,400; naval attachés £1,000; construction of docks at Hong Kong £5,000; construction of dry docks at Esquimaux £50,000; contributions in aid of lock hospitals £2,100; expenses of boys in training-ships £2,700; and miscellaneous payments and allowances (including the conveyance by sea of the Royal Household, and the entertainment of royal personages) £8,355.

15. *Half-pay, Reserved, and Retired Pay to Naval and Marine Officers.*—Net total £801,400, a decrease of £11,500. The gross estimate is divided into four items, £77,698 for half-pay—decrease £3,359; £661,763 for reserved and retired pay—decrease £4,110; £56,151 for commutation of retired pay—decrease £4,869; and £5,800 as gratuities to officers on retirement. On the active list there were 342 officers, requiring £77,698; 56 on the reserved list £13,191; 2,025 on the retired list £571,255; and 249 retired marine officers £82,317; making a total of £744,461. For commutation of retired pay the sum of £56,151 is paid to the Commissioners for the Reduction of the National Debt for advances.

16. *Military and Civil Pensions and Allowances.*

—This Vote is divided into two sections: the net Military estimate is £906,800, an increase of £1,000. The Civil section amounts to £328,800, a decrease of £4,500.

Section I. *Military.*—The chief heads are: Pensions for meritorious services £6,400, distributed in amounts of £300 annually to flag officers, £150 to captains, and in amounts of £100 to £200 to marine and medical officers. The pensions for conspicuous bravery amount to £280, being £150 to 15 recipients of the Victoria Cross, £100 to 9 men who have received a medal for conspicuous gallantry, and £30 to 3 sergeants of Royal Marines "for distinguished conduct in the field." Pensions for wounds amount to £5,500 among 84 officers. Pensions to engineers, warrant officers, &c., 927 in number, amount to £88,500; to 184 widows and relatives of officers, seamen, and marines slain, &c., £13,000; to 2,300 widows of naval officers £126,000; to 121 widows of marine officers £6,400; compassionate allowances for 1,495 children £22,500; pensions to 88 retired naval officers £5,025; to 24,085 seamen and marines £625,657; with compassionate allowances to officers £451; commutation of pensions £5,197; special pensions to three admirals £1,934.

Section II. *Civil.*—Of the total £328,800 there is distributed £110,000 to civil officers, and £150,000 to artificers, &c. Pensions to 916 persons connected with the Coastguard, including 69 widows and 22 children, amount to £40,000; gratuities to other persons £300; contribution to Metropolitan Police Pension Fund £5,434; £230 towards pensions to Registrars; gratuities to clerks on retirement £13,249; and commutation of pensions £10,124.

17. *Non-Naval Services and Freight.*—Net total £165,100, a decrease of £163,400, due to the smaller provision required for transport service in connection with Egypt and Suakin. The heads are—special allowances to officers and men of troopships £4,700—decrease £50; coals £20,300—decrease £4,100; medicines, &c. £150; pilotage, &c. £2,550—decrease £2,150; conveyance of troops and horses abroad, homeward, and intercolonially £101,800—decrease £49,100; conveyance of stores £61,000—decrease £6,700; conveyance of troops coastwise £10,700—decrease £800; hire of transports £2,100—decrease £91,900; transport officers £2,700—increase £1,200; and telegraphic expenses £1,000. Repayments taken in reduction of the vote amount to £41,900.

The numbers of officers and men in the naval service, according to the returns at the end of 1886, were:—Fleet service—officers and seamen 37,467, boys 6,877; Coast guard 3,914; Royal Marines 12,697; Naval establishments on shore—officers, seamen, &c., 575; Royal Marines 193; Royal Naval Reserve—officers 264, men 18,007; Seamen and Marine Pensioners Reserve 2,197; Royal Naval Artillery Volunteers—officers 65, men 1,477; a total of 83,733. In addition to this number all pensioners whose age does not exceed 55 years are liable to be called up for active service in case of war or any emergency.

In November, 1886, the steam ships in commission numbered 193, comprising 29 armoured-plated ships, 1 frigate, 31 corvettes, one torpedo ram, 18 sloops, 17 gun vessels, 46 gunboats, 26 miscellaneous, 2 despatch vessels, 7 troop and store ships, 4 Indian troop-ships, 4 royal yachts, and 7 surveying vessels. Sailing vessels numbered 30, and stationary ships 37; total 260.

Navy Pay.

YORK.—*In command*, Maj.-Gen. C. F. T. Daniell, c.b.; Col. Charles E. S. Scott (Roy. Art.); Col. George W. Stockley (Roy. Eng.). *Assist. Adjts. & Q.-M.-Gen.*, Lt.-Col. George W. Smith, Col. Thomas Kelly-Kenny. *Com.-Gen.*, Alex. Clerk; (Ordnance) Col. Thomas Sparkes. *Dist. Paym.*, Lt.-Col. Robert B. Farwell. *Dep. Surg.-Gen.*, William M. Webb. *Chaplain*, Rev. Albert S. Norfolk.

In this country all religions are tolerated and free, but there are two State Churches:—I. Episcopal, in England and Wales: II. Presbyterian, in Scotland.

The ESTABLISHED CHURCH IN ENGLAND is an episcopal institution, governed by 2 Archbishops and 31 Bishops. The Archbishops and 24 of the Bishops have seats in the House of Peers. Four new Bishops have recently been created, and two more, Bristol and Wakefield, will be formed as soon as the necessary funds are subscribed. A large proportion of the episcopal property is managed by Commissioners, who pay fixed incomes to the prelates, ranging from £15,000 to the Archbishop of Canterbury, to £2,000, which last is the income of the Bishop of Sodor and Man, who, however, is not a peer of Parliament. The inferior dignitaries of the Church are the Deans, of whom there are 30, with incomes varying from £3,000 at Durham to £700 at Bangor, the average of the whole being £1,450. As assistants to the Bishops there are 85 Archdeacons, who commonly hold other preferments, their archidiaconal incomes being but small. Under the Archdeacons there are 613 Rural Deans, who exercise an unpaid supervision over the parochial clergy. The number of Benefices is about 13,500; and the clergy of every class, from the Archbishops to the stipendiary Curates and Clergy unattached, number about 23,000. The revenues of the Church are not accurately known. Some estimates have valued the Church property and settled income alone at £10,000,000, but this is a gross exaggeration. The total income from all sources—endowments, tithe, glebe, rent value of residences, pew rents, and surplice fees—may be stated at nearly £7,250,000. A very competent authority pronounces this valuation as being nearly double the net amount received by the clergy. No religious census has been officially taken in England, but the Church population is estimated on trustworthy data at over 13,500,000, and about 6,200,000 church sittings are available for them. In addition to the Bishops holding sees, there are 24 retired Colonial Bishops, whose services are available upon emergencies.

In IRELAND the Protestant Episcopal Church is now separated from the State. Its revenues were taken away, due provision being made for all interests existing on the 1st of January, 1871, the time when the Act came into force.

In the COLONIES, &c., the Church numbers 65 bishops and about 3,400 clergy. The first colonial see established was that of Nova Scotia, in 1787. The first East Indian see was Calcutta, founded in 1813; West Indian sees, in 1824. The episcopate of Australia dates from the establishment of the see now called Sydney, in 1836; and that of South Africa from 1847. Connected with the Church are a number of missionary bishops in countries not subject to the British Crown.

The ESTABLISHED CHURCH OF SCOTLAND is Presbyterian in principle, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay deputies from each of the Presbyteries, and representatives from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), and the Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 for his

services. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are about 1,660 ministers and licentiates engaged in ministerial work. The Church population equals that of all the other Presbyterian bodies united, and is estimated at about half the whole population of Scotland; the number of Communicants in 1886 was 571,000. By it the sum of £407,212 was raised in 1886 for home and missionary purposes. Within the last 32 years 352 chapels, at a cost of £1,222,000, have been endowed and erected into parishes *quoad sacra*. The original parishes were 924, in addition to which there were in 1886 52 new and 40 Parliamentary parishes, also 154 unendowed churches and 143 preaching and mission stations; a total of 1,671, being an increase of 375 over the strength of the Church at the time of the secession of 1843. The Presbyterian form of Church government was first set up in Scotland in 1560, but was superseded in 1662 by the Episcopal Church under the Stuarts. At the Revolution in 1688, Presbyterianism regained the legal establishment which it still preserves. In consequence of the decision of the House of Lords on the subject of patronage in 1843, about 270 Parish ministers resigned their preferments and founded the *Free Church*. In 1874 the obnoxious Patronage Act of 1711 was repealed, and each Church now elects its own minister. The Rt. Rev. Geo. Hutchison, D.D., of Banchoory, is Moderator.

Presbyterianism has several subdivisions. The chief of these are:—

(1) The **FREE CHURCH OF SCOTLAND**, founded in 1843, is based on two great principles:—(1) The independence of the Church in its spiritual action, and (2) the non-intrusion of ministers, each congregation having the right to elect its own minister, and the power of rejecting any one of whom it disapproves. The circumstances that led to the formation of this Church have been already mentioned. The sum of £367,000 was raised in the first year of the disruption, which was divided between a sustentation and a church and school building fund, and by 1853 no less than 850 congregations had been formed. At the present day the Free Church is a fully organized body, consisting of a General Assembly, 16 synods, and 73 presbyteries. There are 1,141 ministers, with 1,024 congregations, meeting in well-appointed churches built for them. There are also about 50 preaching stations. The General Assembly meets every year at the same time as that of the Established Church. Having no endowments, the clergy are mainly supported by the Sustentation Fund, which gives on an average £222 to each minister, three-fourths of whom are also provided with manses. The sum of £564,422 was raised in 1886-87 for the various purposes of the Church, including Missions. MODERATOR for the year 1887-88, the Rev. Principal Rainy.

(2) The *United Presbyterian Church*, which has 32 presbyteries, 560 churches, 598 ministers, and about 181,146 members in Scotland and Ireland, who raised £367,915 in 1885 for its purposes. It has many missionaries in the East and West Indies, in Africa, China, and Japan.

(3) The *Presbyterian Church in Ireland*. According to the Census of 1881 the members of the various Presbyterian churches in Ireland were 485,503. The largest of these, under the super-

intendence of the General Assembly, consists of 36 home presbyteries, 620 ministers, 555 congregations, with 102,057 communicants, 78,937 families, 8,939 Sabbath-school teachers, and 101,230 scholars. During the year 1886-87 this branch contributed £159,550 for religious, charitable, and missionary purposes. It possesses two Colleges, with a staff of 14 professors, and has 19 ordained missionaries in foreign parts. MODERATOR for the year, Rev. John H. Orr, D.D., Antrim. Clerk, Rev. John H. Orr, D.D., Antrim.

(4) *The Presbyterian Church in England* has 10 presbyteries, 287 congregations, 9 preaching stations, and 61,781 communicants. It has a theological College in London, and supports 34 missionaries abroad, including 11 females. In 1886-87 the amount raised for various purposes was £206,534. The Rev. William S. Swanson, of London, is MODERATOR of the Synod. Secretary, Rev. John Black, 7, East India Avenue.

(5) The less numerous divisions are: the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The ROMAN CATHOLIC CHURCH is, next to the Church of England, the most numerous of all the religious communions in the United Kingdom. The members in various parts of Great Britain may be computed at about 2,000,000. In Ireland (in 1881) they numbered 3,951,818 (see page 246).

WESLEYAN-METHODISTS. (See page 247.)

THE INDEPENDENTS, or CONGREGATIONALISTS, come next to the Methodists; they are the most ancient community of Dissenters. They maintain that each Church is its own ruler, and thus dispense with both bishops and presbyteries. They first appeared in the time of Elizabeth, under whom they were very harshly treated; in consequence, great numbers repaired to North America; but their principles triumphed under the Commonwealth. In 1831 the majority of their churches were formed into the Congregational Union. There are 51 county and other Associations at home and in the Colonies, with 2,803 churches, and 1,378 preaching stations; ministers and missionaries, about 3,500. There are also 102 Congregational Churches in Scotland, and 29 in Ireland. The number of members in the United Kingdom is supposed to be about 360,000, and the whole number of persons connected with the body may probably be about 1,250,000.

The *Countess of Huntingdon's Connexion* have 34 chapels. The tenets are very similar to those of the Independents, but in many chapels the prayers of the Church of England are read.

The BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in Associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1832. In Great Britain and Ireland there were, in 1886, 3,737 chapels and 1,868 pastors. The members numbered 302,615, and Sunday scholars 456,694. In addition to the members in this country, the Baptists have numerous chapels and several hundred ministers in the Colonies. In the United States they form one of the most numerous religious bodies there, the "members" alone numbering 2,500,000. The sums raised for missionary and benevolent purposes by the Bap-

tists are estimated at over £200,000; their missionaries are mostly employed in India, but there are also missions in Ceylon, China, Japan, West Indies, Africa, Italy, and Norway.

THE WELSH CALVINISTIC METHODIST ASSOCIATION embraces the majority of the Welsh-speaking population of the Principality. The form of Church government is Presbyterian. The body dates from the year 1735, one of the founders being Howell Harries, of Trevecca; but the members could not actually be called Dissenters till 1810, when ministers were for the first time ordained within the body; previous to this the members were in the habit of receiving the Holy Communion at various parish churches. At the present time the body numbers—chapels and places of worship, 1,383; ministers and preachers, 989; deacons, 4,483; communicants, 129,401; on probation, 5,112; Sunday-school teachers, 23,639; scholars and teachers, 185,392; number belonging to the congregations (including Communicants), 277,290. A sum amounting to £173,845 was collected for various religious purposes in 1884. One of the features of the Welsh churches is the Sunday school, which is attended by adults as well as children: the vernacular is the language generally used in these schools. There are 171 English congregations with 9,621 communicants; all the rest are Welsh.

[It is remarkable that the Welsh Calvinists are the only body of Dissenters that have retained a definite Creed or Formulary of Faith. It is very simple—the Doctrinal Articles of the Church of England and the Apostles' Creed, together with the Assembly's Shorter Catechism. There is also a very noteworthy addendum that "No alteration in these tenets of Doctrines shall be at any time allowed or even discussed."—*Constitutional Deed*, 10th August, 1826.]

MINOR RELIGIOUS SECTS.—A complete list of these will be found at p. 248. The chief of these are the Unitarians (or as they prefer it, English Presbyterians), with about 340 ministers, 345 chapels, and 18 domestic mission stations. Although avowed Unitarianism does not show any apparent increase, its principles have spread, and many ministers now teach doctrines very similar to those held by the "orthodox" Unitarians at the commencement of the century. The Society of Friends, which consists of about 15,380 members, has 327 recorded ministers, and about 400 unrecorded; their places of worship in England and Wales are 317. The Moravians have 38 congregations and preaching stations, 5,727 members, and 3,363 scholars. The Catholic and Apostolic Church have above 80 churches; the New Jerusalem Church (Swedenborgians), 64 societies, with 5,622 registered members; the Latter-Day Saints (Mormons) have 82 churches. Among the inhabitants of the United Kingdom are above 60,000 Jews, mainly in London and other large towns, who possess 80 synagogues, with about 100 ministers and readers. The Jews support their own poor, and raise nearly £150,000 annually for religious and benevolent purposes. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. The Free Church of England has about 40 churches or preaching stations. The Greeks have churches in London, Manchester, Liverpool, Cardiff, Reading, and Wolverhampton. The Armenians have churches in London and Manchester; and the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury.

Canterbury. £15,000.

Archbishop and Primate of All England, Right Honourable and Most Reverend Edward White Benson, D.D...... 1883
(ambeth Palace, S.E.; Addington Pk., Croydon.)

PROVINCE OF CANTERBURY.

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.—*Dean and Ordinary*, Very Rev. John West, D.D., V.G.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representatives
 (viz., 208 clerical and 416 lay).

Honorary Secretaries, Rev. Canon M. W. Jellett, LL.D.; Ven. W. E. Meade, D.D.

H. A. Hamilton, J.P.; C. F. Fergusson, B.A., J.P.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870),

Thomas Greene, M.A., 52, St. Stephen's Green East, Dublin.

THE CHURCH OF IRELAND.—The following particulars respecting the condition of the Irish Church at the present time will be interesting to those persons who desire to prevent Disestablishment in England and Wales, equally with those who desire to promote that measure.

The Church of Ireland, which by the Act of Union became united with the Church of England on the 1st of January, 1801, was separated from the Church of England, disestablished, and to a large extent disendowed, on the 1st of January, 1871, by the Irish Church Act of 1869.

Of the former property of the Church of Ireland, £5,376,362 has been appropriated by various Acts of Parliament as follows:—To intermediate education, £1,000,000; pension fund for National School teachers, £1,300,000; distress works, £1,266,000; Royal University of Ireland, £600,000; arrears of rent, £950,000; sea fisheries, £250,000; distressed poor-law unions, £10,362.

The supreme governing body of the Church of Ireland is the *General Synod*, which meets annually, and is composed of the Archbishops

and Bishops, and 208 clerical and 416 lay representatives.

Subject to the General Synod are 21 Diocesan Synods, which are assisted in the management of the affairs of their respective dioceses by smaller elected bodies called Diocesan Councils.

Every male member of the Church of Ireland, over 21 years of age, may become a registered vestryman. The registered vestrymen of each parish elect a Select Vestry, who manage the secular affairs of the parish. They also elect lay representatives for the Diocesan Synod.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and three parochial nominators (lay) appointed by the registered vestrymen of the parish.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the bench of Bishops from amongst their own number.

The financial trustees of the Church are the Representative Body, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synods, with 13 co-opted members (clerical or lay). This body holds the property

of the Church, and administers its funds, subject to the General Synod.

Shortly after Disestablishment the Church Commissioners, in whom the entire Church property was vested by the Act of 1869, paid over to the Representative Body about seven and a half millions of "commutation money," charged with annuities, to the then existing clergy amounting to about £600,000 a year. A further sum of half a million capital was similarly paid as compensation for private endowments. The invested capital now held by the Representative Body is over seven millions, the income from which is £290,000 per annum. The annual contributions for five years past have averaged £165,000. The amount contributed since Disestablishment is three millions and a quarter. The Commutation Fund is now reduced to two millions, and the annuities to £120,000. The Stipends under the new system, which have been gradually replacing the Annuities, now amount to nearly £250,000 per annum.

The number of members of the Church of Ireland in 1881 was 639,574.

The Book of Common Prayer, in use by the United Church of England and Ireland before Disestablishment, has been revised and slightly altered by the General Synod, for the use of the Church of Ireland, the 39 Articles of Religion remaining unchanged.

House of Laymen for the Province of Canterbury.

Names marked with an asterisk (*) were Members of the last House of Laymen.

Chairman, Right Hon. the Earl of Selborne.—Vice-Chairman, George A. Spottiswoode.

Treasurer, H. H. Gibbs.—Secretary, R. Holland, National Society's Office, Sanctuary, Westminster, S.W.

Canterbury.—Earl Stanhope,* Viscount Cranbrook,* Lord Northbourne.*

Winchester.—Earl of Selborne,* Lord Mount-Temple,* Lord Montagu,* Right Hon. Lord Basing,* Melville Portal,* James White.

Bangor.—Hon. W. C. Sackville-West, Lord Penrhyn, T. Prichard, T. R. Williams.

Bath and Wells.—Sir R. H. Paget, Bart., m.p., F. H. Dickinson,* C. I. Elton, q.c., m.p.,* E. J. Stanley, m.p.*

Chichester.—Sir W. Barttelot, Bart., c.b., m.p.,* Hon. Mr. Justice Grantham,* F. Barchard,* W. E. Hubbard.*

Ely.—C. P. Allix, O. C. Pell,* A. Sperling,* Professor Stokes.*

Exeter.—Earl of Devon,* Sir J. H. Kennaway, Bart., m.p.,* J. Shelly,* Lt.-Col. White Thomson.*

Gloucester and Bristol.—Sir J. E. Dorington, Bart., m.p.,* J. Harvey, T. Gambier Parry,* W. K. Wait.*

Hereford.—Sir O. Wakeman, Bart.,* Sir J. R. Bailey, Bt., m.p.,* C. Purton,* J. Rankin, m.p.,* Lichfield.—Earl of Harrowby,* C. E. Boothby,* C. J. Blagg,* S. Leighton, m.p.,* T. Salt, m.p.*

Lincoln.—Right Hon. E. Stanhope, m.p.,* Sir W. E. Welby-Gregory, Bart.,* Sir C. H. J. Anderson, Bart.,* A. G. Leslie-Melville.*

Llandaff.—O. H. Jones,* J. A. Rolls,* J. E. Ollivant,* J. Watson.*

Norwich.—Lord Henniker, H. Rodwell,* S. Hoare, m.p.,* Clare Sewell Read.

Oxford.—Earl of Jersey,* Right Hon. Sir J. R. Mowbray, m.p.,* A. W. Hall, m.p.,* J. H. Wilson.*

Peterborough.—Right Hon. Lord John Manners, m.p.,* W. U. Heygate,* E. P. Monckton,* S. G. Stopford-Sackville.*

Rochester.—Sir C. D. Fox, Kt., D. Christopherson, Col. H. de G. Geary, Sydney Gedge, m.p.,* E. H. L. Penrhyn,* G. B. Richardson.*

St. Albans.—Rt. Hon. Sir H. J. Selwin-Ibbetson, Bart., m.p.,* Jas. Round,* U. Unwin Heathcote,* H. Hucks Gibbs.*

St. Asaph.—Earl of Powis,* P. P. Pennant,* W. Trevor Parkins,* Sir W. Williams-Wynn, Bt.*

St. David's.—Viscount Emlyn,* H. Davies-Edwards,* W. S. de Winton.*

Salisbury.—Earl Nelson,* Hon. Sidney Herbert, m.p.,* H. B. Middleton.*

Southwell.—H. H. Bemrose,* J. Borough,* F. Wright,* H. E. Thornton.*

Truro.—Earl of Mount-Edgcumbe,* E. Carlyon, R. Foster, C. C. Ross.*

Nominated Members.—C. T. Dyke Acland, m.p.,* Rt. Hon. G. Cubitt, m.p.,* Rt. Hon. Viscount Hardinge,* F. Dixon-Hartland, m.p.,* Rt. Hon. Lord Norton,* Sir R. Temple, Bt., m.p.*

The members of the House of Laymen are elected by the various Diocesan Conferences, who were themselves elected by the Laity of their respective Parishes or Rural Deaneries. London, the most populous Diocese, returns ten members, three other Dioceses six each, and the remainder four each. Besides the elected members, the Archbishop of Canterbury has the power of nominating ten other members. Like Convocation, the House of Laymen is elected with every fresh Parliament.

The Episcopal Church in the United States, is a vigorous flourishing branch of the Anglican Church; the first bishop, Dr. Seabury, was consecrated in 1784; there are now 70 bishops, 3,760 clergy, and about two million members.

ESTIMATED NUMBERS OF RELIGIOUS DENOMINATIONS AMONGST ENGLISH-SPEAKING COMMUNITIES THROUGHOUT THE WORLD.

Episcopalians	22,000,000
Methodists of all descriptions	16,250,000
Roman Catholics	14,850,000
Presbyterians of all descriptions	10,800,000
Baptists of all descriptions	8,250,000
Congregationalists	5,650,000
Free Thought	1,600,000
Unitarians, under several names	1,250,000
Minor religious sects	3,000,000
German, or Dutch, Lutheran, &c.	1,500,000
Of no particular religion	11,000,000
English-speaking population	96,150,000

A very large number of Hindus and others in the East also speak and read English.

IN theory the Church of England is governed by means of its Convocation of Bishops and Clergy. There is a House of Convocation for each province, Canterbury and York. That of Canterbury consists of two Houses: the upper is confined to the bishops; the lower is composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese. In York there are two Houses, but the bishops, deans, archdeacons and proctors sit together. A fresh election of proctors is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop. The Right Rev. the Lords Bishops of London, Winchester, Bangor, Bath and Wells, Chichester, Ely, Exeter, Gloucester and Bristol, Hereford, Lichfield, Lincoln, Llandaff, Norwich, Oxford, Peterborough, Rochester, Salisbury, Southwell, St. Albans, St. Asaph, St. David's, Truro, and Worcester.

Lower House.

Prolocutor, The Ven. Archdeacon Sumner, D.D. The Very Rev. the Deans. The Venerable the Archdeacons.

Also the following Proctors elected by the Chapters and Clergy of the several Dioceses:—

- BANGOR.**—Chapter, John Pryce.
Clergy, P. C. Ellis and D. Walter Thomas.

Clergy, A. C. Ainslie and Edwin A. Salmon.
- CANTERBURY.**—Chapter, Canon Rawlinson.
Clergy, John Puckle and Canon H. A. Jeffreys.
- CHICHESTER.**—Chapter, T. F. Crosse, D.O.L.
Clergy, C. H. Campion and H. Bailey.
- ELY.**—Chapter, E. C. Lowe, D.D.
Clergy, W. B. Hopkins and J. H. Macaulay.
- EXETER.**—Chapter, James Cory Kempe.
Clergy, M. F. Sadler and George R. Prynne.
- GLOUCESTER & BRISTOL.**—Chapters, Canon Tinning (Gloucester), Canon Nugent Wade (Bristol).
Clergy, P. G. Medd and F. V. Mather.
- HEREFORD.**—Chapter, Sir Fred. A. G. Ouseley, Bt.
Clergy, H. W. Phillott and E. F. Clayton.
- LICHFIELD.**—Chapter, Canon John G. Lonsdale.
Clergy, E. Lane and J. T. Jeffercock.
- LINCOLN.**—Chapter, Prebendary Clements.
Clergy, G. G. Perry and Albert Sydney Wilde.
- LLANDAFF.**—Chapter, Prebendary W. Evans.
Clergy, C. R. Knight and John T. Harding.
- LONDON.**—Chapter, Canon Gregory, Prebendary, George Prothero (Westminster). Clergy, Arthur Broke and Canon William Cadman.
- NORWICH.**—Chapter, Canon John M. Nisbet.
Clergy, H. Howell and Constantine Frere.
- OXFORD.**—Chapter, Canon W. Bright.
Clergy, Edmund Savory and G. N. Freeling.
- PETERBOROUGH.**—Chapter, Canon Argles.
Clergy, Thomas Yard and Henry Twells.
- ROCHESTER.**—Chapter, Canon Burrows.
Clergy, Hon. Aug. Legge and J. Erskine Clarke.
- SALISBURY.**—Chapter, Canon R. G. Swayne.
Clergy, A. Dayman and R. S. Hutchings.
- ST. ALBANS.**—Chapter (None).
Clergy, E. T. Vaughan and Thomas Scott.
- ST. ASAPH.**—Chapter, William Howell Evans.
Clergy, William Richardson and J. E. Hill.
- ST. DAVID'S.**—Chapter, Prebendary Phillips.
Clergy, W. L. Bevan and Thos. Walters, D.D.
- SOUTHWELL.**—Chapter (None).
Clergy, S. B. Hole and Thomas Henry Freer.
- TRURO.**—Chapter
Clergy, Frederick Hockin and A. C. Thynne.

- WINCHESTER.**—Chapter, Canon W. P. Warburton.
Clergy, Robt. Francis Wilson and J. H. Sapse.
- WINDSOR.**—Chapter, Canon Edward Capel Cure.
- WORCESTER.**—Chapter, Canon David Melville, D.D.
Clergy, W. W. Douglas and Hy. Bond Bowly.
Vicar-Gen., Sir James Parker Deane, D.C.L., Q.C.
Registrar, John Hassard.
Actuary, Francis Cobb.
Apparitor-General, Sir J. A. Hanham, Bart.

PROVINCE OF YORK.

Upper House.

President.—The Most Rev. the Lord Archbishop. The Right Reverend the Lords Bishops of Durham, Ripon, Chester, Carlisle, Manchester, Liverpool, Newcastle, and Sodor and Man.

Lower House.

Prolocutor.—Dean of York. The Very Reverend the Deans of York, Durham, Carlisle, Chester, Manchester, and Ripon. The Venerable the Archdeacons of the twenty-one Archdeaconries within the Province.

Proctors.

- YORK.**—Chapter, Canons Randolph and Fleming.
Clergy, Canon Raine and F. W. Peel. Clergy of Cleveland, Rev. C. N. Gray; (1 vacant). Clergy of E. Riding, Canon Machell, and Canon Trevor. Clergy of Sheffeld, H. A. Favell and (1 vacant).
 - CARLISLE.**—Chapter, Canon A. B. Chalker. Clergy, Canons Phillips and Mathews. Clergy of Westmoreland, Canons H. Ware and E. H. Knowles. Clergy of Furness, Canon Bardsley and Dr. Haymar.
 - CHESTER.**—Chapter, Canon Hillyard. Clergy, Canons Cooper and Dodd. Clergy of Macclesfield, W. H. Lowder and Canon E. C. Turner.
 - DURHAM.**—Chapter, Canon Evans. Clergy, Hon. J. Grey and J. Bailly. Clergy of Auckland, Canon D. R. Falconer & Chancellor T. E. Espin.
 - LIVERPOOL.**—Chapter (None). Clergy, Canons Jones and Clergy of Warrington, Canons G. W. Watt and
 - MANCHESTER.**—Chapter, Canon Crane. Clergy, Canons Birley and Hornby. Clergy of Lancaster, H. B. Hawkins and S. Hastings. Clergy of Blackburn, W. Champneys & W. E. Rawstorne.
 - NEWCASTLE.**—Clergy of Northumberland, Canons Lloyd and Mason. Clergy of Lindisfarne, Canons Hon. F. R. Grey and J. Waite.
 - RIPON.**—Chapter, Canon Holmes. Clergy of Richmond, Canons R. D. Owen & H. Ellison. Clergy of Craven, Canons E. Jackson and J. I. Brooke.
 - SODOR AND MAN.**—Clergy, William Kermode.
 - Archbishop's Commissioners.**—The Dean, Canons Residentiary of York, and Canon Raine.
 - Synodal Sec.**—Rev. Canon Wright, Rectory, Stokesley, Yorkshire.
 - Registrar.**—Hen. A. Hudson, Minster Yard, York.
- BRITISH MISSIONARY CONTRIBUTIONS.**
The following summary of British contributions to Foreign Missions, compiled by the Rev. Canon Scott Robertson, of Throwley, Kent, exhibits the amount collected in the United Kingdom by Missionary Societies. These amounts do not include balances brought forward, sales of publications, contributions from abroad, or sums derived from invested capital:—
- | | |
|---|--------------------|
| 24 Church of England Societies. | £486,082 |
| 12 Unsectarian Societies, Bible, Tract, &c. | 193,617 |
| 16 Nonconformist Societies in England. | 330,128 |
| 23 Scottish & Irish Presbyterian Societies | 177,184 |
| 2 Societies of the Roman Catholic Church | 8,703 |
| Total for Foreign Missions in 1886. | £1,195,714 |
| Total in 1885. | £1,228,951. |

The Roman Catholic Church.

Pope Leo XIII., the 258th Pontiff; born March 2, 1810; elected Feb. 20, crowned March 3, 1878. The full number of the SACRED COLLEGE is 70: viz., Cardinal Bishops, 6; Cardinal Priests, 50; Cardinal Deacons, 14. At present there are 64 Cardinals. First Cardinal Bishop, Charles Sacconi, Dean of the Sacred College; first Cardinal Priest, Gustavus Adolphus von Hohenlohe; first Cardinal Deacon, Theodolpus Mertel. Secretary of State to His Holiness, Cardinal Rampolla.

The ROMAN CATHOLIC HIERARCHY throughout the world, according to official returns published at Rome in 1887, consisted of 12 Patriarchs and 1,199 Archbishops and Bishops. Including 16 coadjutor or auxiliary Bishops, the number of Roman Catholic Archbishops and Bishops now holding office in the British Empire is 150. The numbers of the Clergy are given approximately.

ENGLAND AND WALES.

Hierarchy restored 29th September, 1850.
Henry Edward, Cardinal Manning, Abp. of Westminster; cons. 1865; Cardinal, 1875. Auxiliary Bishop, William Weathers, cons. 1872. Clergy, 350.
John Henry Newman created Cardinal, May 12, 1879.

The Methodist Churches.

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are,—

Wesleyan Methodists, the original body founded in 1739 by these two brothers. While students at Oxford, in 1729, they gathered a number of young men together for purposes of study and devotion, who were nicknamed, first, "The Holy Club," and afterwards "The Methodists." In 1739 John Wesley founded the "Religious Societies," in which the first beginnings of Methodism are to be found. The number of members rapidly increased, until a more definite and extensive organization than Wesley at first gave them was imperatively demanded. The first Conference, consisting of six persons, all clergymen, was held in 1744. The Conference is now composed of 240 ministers and 240 laymen, with a ministerial president and secretary at its head, elected year by year; by semi-annual meetings of the ministers in each district, over which a chairman is appointed by the conference; and by quarterly meeting of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. When Wesley died the number of members was 76,968, and since then the increase has been so great that above 15,000,000 people are said to be now receiving Methodist instruction in various parts of the world. *President*, Rev. J. Walton, M.A.; *Sec.*, Rev. D. J. Waller.

Various distinct bodies of Methodists have been formed, the most important being these:—

1. **The Methodist New Connexion**, which was formed in 1797, by the Rev. Alexander Kilham; the original difference between it and the parent

body being the different degrees of power allowed to the laity.—*President*, Rev. J. K. Jackson.

2. **The Primitive Methodists**, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne. Next to the Wesleyans they are the most numerous of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. Thomas Whitehead.

3. **The Bible Christians**, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.—*President*, Rev. J. H. Batt.

4. **The United Methodist Free Churches**, which are an amalgamation of three different secessions—the Protestant Methodist, formed in 1828; the Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers; and the Wesleyan Reform Association, founded in 1849, during a great agitation in the Wesleyan societies. The union was effected in 1857. *President*, Rev. J. S. Bulmer.

The following table does not include the Methodists of America, Canada, Australia, the West Indies, and other British colonies.

FINANCES.—The amount raised for sustentation by the Methodist bodies can only be approximately estimated. The *Wesleyans* raised in 1886-87 £135,259 to sustain their very extensive missionary operations. At the same time their Home missionary income was £34,465; £21,832 were expended on the education of ministers' children at the Connexional schools; £247,409 were contributed in Great Britain for chapel-building; and £11,321 for the training of candidates for the ministry, of whom there are 180 in the four theological colleges. By the *Methodist New Connexion* the following sums were raised: For chapel fund, £588; for missions, £6,177; for Home Missions, £928. **The Primitive Methodists** raised £24,402 for new chapels, and the *United Methodist Free Churches* £21,876 for their missions.

The number of Members is for the United Kingdom; of Chapels and Scholars, Great Britain only.	Ministers	Lay Preachers	Members	On Pro-bation.	Chapels.	Sunday Scholars.

Disciples of Jesus Christ	King's Own Army		
Dunbar, Archdeacon, Congregation of	Latter Day Saints		

The number of places of meeting for Religious Worship, certified, recorded, and on the register on the 2nd November, 1887, was 25,227, an increase of 630 in the year. Those marked (*) appear in the list this year for the first time. These descriptions are taken from the original certificates sent to the Registrar-General for procuring the registration of the room or building; and it will be observed that the same sect is in some instances variously described.

In the Middle Ages the term "University" could originally be applied to any organized body of men. There could thus be a "university" of persons engaged in any particular occupation. The term came, however, to be appropriated exclusively to bodies of persons engaged in the occupation of teaching and study. Such universities or guilds of teachers and students, when they had attained some definite organization, naturally secured the right of granting licences to teach. As time went on it became the custom to grant these licences not only to persons who actually wished to teach, but to all who demanded them after fulfilling certain requirements, and thus they became what we now understand by the term "degrees."

The earlier universities grew so imperceptibly from such small beginnings, that it is impossible to say that they were founded by such and such a person in some particular year. Bologna (the earliest) and Paris (the most important) first rose into notice in the twelfth century, Oxford and Cambridge in the thirteenth. The system of degrees and the names of the chief officers of the university were introduced into England, as well as into other countries, from Paris. The distinguishing characteristic of the universities of Oxford and Cambridge undoubtedly is the existence of a number of separate corporations of members of the university, which are so strong as to make the university itself appear almost insignificant beside them. These corporations are the Colleges, of which we give the names below.

There have been colleges at many universities, but nowhere have they ever reached anything like the same influence and importance as at Oxford and Cambridge. The origin of the Colleges was due to benevolent persons who desired to relieve a certain number of poor scholars from some of the hardships of their life at the mediæval universities, and in order to do this provided a building in which such scholars could live a common life, and also an endowment for their maintenance. University and Balliol Colleges at Oxford were established in a somewhat rudimentary form in the middle of the thirteenth century; but the establishment of Merton College at Oxford, in 1274, by Walter de Merton, was the real beginning of the English college system. In the foundation of Peterhouse, the first Cambridge college, ten years later, "the rule of Merton" was closely followed.

The early college consisted of a Head and scholars, endowed with board and lodging by means of the buildings and revenues provided by the founder. The scholars were divided into senior scholars engaged in giving instruction, and junior scholars engaged in receiving it; the senior scholars were each other's "fellows;" and gradually the term "Fellow" became appropriated to the senior or governing members of the college, while the term "Scholar" was restricted to the junior members. It was not till long after the establishment of colleges that it became the custom for them to take in paying boarders—"commoners" at Oxford, "pensioners" at Cambridge. At first the class which corresponds to the commoners and pensioners of the present time continued to live (as the whole university did before the establishment of colleges) in lodgings kept by townsmen or graduates. Two of the old lodging-houses, or "halls," kept by graduates still re-

main at Oxford; but under the regulations of the commission of 1882, they will disappear on the next vacancy in the office of Principal. Twenty years ago the pre-college era was to some small extent restored by the admission of "non-collegiate students" to Oxford and Cambridge. The body of non-collegiate students shows, however, a great tendency to become assimilated in most important respects to college.

THE UNIVERSITY OF OXFORD at present numbers upwards of 11,000 members. Of these about 3,000 are in residence in Oxford; the remainder, with a few exceptions, have finished their academical course, taken a degree, and are scattered over the country in various trades and professions. The resident members of the university consist of undergraduates going through a course of instruction and study, and of graduates giving instruction or engaged in research. The resident graduates are 400 or 500 in number, and the undergraduates in residence, according to a census recently taken by the *Oxford Magazine*, are about 2,500.

The government of the University is in the hands of three bodies:—1. Convocation, which consists of all Masters of Arts and Doctors of Civil Law, Medicine, or Divinity, who remain members of the University, whether resident or non-resident. 2. Congregation of the University, which consists of resident members of Convocation. 3. The Hebdomadal Council, which consists of certain officers and 18 members elected by Congregation. The Hebdomadal Council alone has the power of initiation; Congregation can amend, confirm, or reject its proposals; Convocation can only confirm or reject them. The election of the University representatives in Parliament is vested in the members of Convocation. The ancient House of Congregation, which must not be confused with the Congregation of the University, has now nothing to do with legislation in any form, but confines itself almost exclusively to the business of granting degrees. In order to "matriculate," or become a member of the university, it is necessary to be admitted into one of the Colleges or Halls, or into the body called Non-Collegiate students. A candidate may be admitted into a college as a scholar, or as an exhibitor, or as a commoner. Scholarships and exhibitions are nearly all awarded according to the results of competitive examinations, which are held by the respective colleges. Most of the scholarships are now open to competition for boys under 19, and are chiefly of the value of £80 per annum for (practically) four years. Some of the exhibitions are scarcely distinguishable in any important respect from open scholarships. Besides the open scholarships and exhibitions there are a number of "close" ones confined to inhabitants of particular localities, to persons educated at particular schools, and so on. To be admitted into a college as a commoner, or to become a member of a Hall, or a non-collegiate student, it is necessary to pass an examination held by the College or Hall, or by the delegates of non-collegiate students, or to have passed some examination accepted in lieu of this examination. When once a member of the University, a man must pass certain other University examinations before obtaining a degree. There are two different sets of examinations: a difficult one for those who seek

'honours,' and an easy one for those who are content with an ordinary "pass." In the final examination, honours may be obtained in any of the following subjects:—1. Classics, Ancient History, and Philosophy. 2. Mathematics. 3. Natural Science. 4. Jurisprudence. 5. Modern History. 6. Theology. 7. Oriental studies. The degree of Bachelor of Arts cannot be obtained in less than 2 years and 8 months from matriculation, nor without residing in Oxford for 12 terms. Passmen may complete their academic course in three years; full honours men take four years. For the higher degrees of Civil Law, Medicine, and Divinity, no more residence is necessary, but further requirements have to be satisfied. For the M.A. degree the only requirement is that the candidate should have had his name on the books for 26 terms since his matriculation. The great bulk of the instruction at Oxford is given by the college tutors and lecturers under a system which allows members of one college to attend lectures given in other colleges. The remainder of the instruction is given by the University Professors and Readers. Private tuition is comparatively unimportant. The greatest of the University institutions are the Bodleian Library, the second library of the United Kingdom, and the Museum, which is furnished with all that is necessary for teaching natural science and medicine.

In 1880 a statute was passed by which "any college or institution within the United Kingdom, or in any part of the British dominions, being a place of education in which the majority of the students are of the age of 17 at least, may, under certain conditions, be admitted to the privilege of affiliated colleges." St. David's College, Lampeter, in 1880, University College, Nottingham, in 1882, and Firth College, Sheffield, in 1886, have availed themselves of this privilege.

In 1884 a statute was passed allowing the delegates of local examinations to "use the several honour schools of the university for the purpose of the examination of women." Three halls, Somerville, Lady Margaret, and St. Hugh's, are now established in Oxford for the higher education of women, and some of the members avail themselves of this statute, and are also admitted to the lectures of the university professors, and to some of the college lectures.

Mansfield College (Principal, Rev. A. M. Fairbairn, D.D.) is not a college in the ordinary sense, but an endowed institution for providing members of the University with instruction in Nonconformist theology.

The semi-official guide to the University is the "Student's Handbook to the University of Oxford," of which a new edition is in the press.

THE UNIVERSITY OF CAMBRIDGE is an incorporation of students in all and every of the liberal arts and sciences. In it are seventeen colleges and two public hostels, founded "for the study of learning and knowledge, and for the better service of Church and State." The whole of these are maintained by the endowments of their several founders and benefactors; each of them is a corporate body, and is bound by its own statutes, but is likewise controlled by the paramount laws of the university. A new Code of Statutes for the University was approved by Queen Victoria in Council in 1882. In each of the colleges there are eight separate orders: these are (1) Head; (2) Fellows; (3) Noblemen

graduates, doctors in the several faculties, bachelors of divinity, masters of arts and masters of law, who are not upon the foundation; (4) Bachelors of Arts, Physic, and Law; (5) Fellow-commoners; (6) Scholars; (7) Pensioners, forming the great bulk of the students; and (8) Sizars, students of narrow means, and in receipt of various emoluments. The head of each college has supreme disciplinary authority in educational matters; and he, together with the foundation fellows, form the governing body. The great legislative assembly of the university is called the Senate; it is composed of all those who have obtained the degree of Doctor or Master, and whose names are still on the register, and the high executive officers of the university. There is a council of the senate (consisting of the vice-chancellor and sixteen members of the Senate, of whom eight vacate their office every year, the office being held for two years), by whom every university "grace" or decree must be approved before it is offered to the Senate. A residence of nine terms is required from each student before taking the B.A. degree, and "honours" may be obtained in any of the following:—Mathematics, classics, moral sciences, natural sciences, law, history, theology, Semitic, Indian, and modern languages. The university possesses a library of more than 200,000 printed volumes besides MSS., the Fitzwilliam Museum, the Observatory, the Botanical Garden, and the Anatomical School. James I. granted to the university the privilege of sending two members to Parliament, which it has ever since enjoyed. In 1886-7, the number of students who matriculated was 1,012, while the members on the boards amounted in 1886 to 12,546.

DUBLIN UNIVERSITY, which is identical with Trinity College, Dublin, was incorporated by Royal Charter in 1591. Oxford and Cambridge recognize each other's degrees, and those granted by Dublin University, but no others. There are in Dublin University four professional schools, Divinity, Law, Medicine and Surgery, and Engineering. It is represented in Parliament by two members.

Scotland possesses four universities, namely, those of St. Andrews, Aberdeen, Edinburgh, and Glasgow, and the general regulations as to graduation are common to all. THE UNIVERSITY OF EDINBURGH was founded in 1582 by a charter granted by James VI. of Scotland, and in 1621 the Scottish Parliament granted to it all the privileges enjoyed by other universities in the kingdom. This grant was confirmed in the Treaty of Union between England and Scotland, and again in the Act of Security. The constitution was, however, modified by the Act (1858) relating to the Scottish Universities, and the University of Edinburgh is at the present time a corporation consisting of a chancellor, rector, principal, professors, registered graduates, alumni, and matriculated students. The students matriculating each year now amount to more than 2,000. The essential qualification to graduation at this, as at other Scottish universities, is attendance at certain series of lectures or classes. The course for the Arts degree extends over four winter sessions, each lasting from the beginning of November till about the middle of April; and the degree of M.A. is conferred on all who have completed their course and passed the ordinary examinations in Latin and Greek, mathematics and natural philosophy, logic and metaphysics,

moral philosophy, rhetoric, and English literature. The faculties of this university are arts, laws, medicine, divinity, and science. The buildings were until recently very deficient in the necessary accommodation, but much has been done of late years, and is still being done, in the way of improvement. The library contains nearly 140,000 volumes and 700 MSS., and there is also a theological library of 10,000 volumes. In connection with the various faculties there are different bursaries, scholarships, and fellowships, tenable from one to four years, and ranging in value from £2 10s. to £160.

THE UNIVERSITY OF ST. ANDREWS was founded by Henry Wardlaw, Bishop of the diocese, in 1411, and was confirmed by a Papal bull of Benedict XIII. in 1413. During the 15th and 16th centuries three colleges were established in connection with it, viz., St. Salvator (1455), St. Leonard (1512), and St. Mary (1537). All the colleges had originally teachers both in philosophy (or arts) and in theology, but in 1579 the two older of them were confined to philosophy, and that of St. Mary to theology. In the year 1747, St. Leonard and St. Salvator were united by Act of Parliament. The Universities of Edinburgh and St. Andrews unite in sending a representative to Parliament.

THE UNIVERSITY OF GLASGOW was founded by a bull of Pope Nicholas V. (1450-51), with the power of creating doctors and masters, and enrolling readers and students, the whole of whom were to enjoy the same rights and privileges as the University of Bologna. At first it had neither property nor endowment, but in 1460, James, Lord Hamilton, bequeathed to the then Regent and his successors a tenement in the High Street, with four acres of land adjoining for the "use of the College of Arts." Between 1577—when a new charter was issued—and the Restoration, the university flourished in every way, but the re-establishment of episcopacy detached from it a large part of its revenues, and many of its professorships were abandoned. In 1864 the old buildings were sold for £100,000, and a government grant of £120,000 was obtained; these amounts, together with public subscriptions and college funds, were laid out in the new buildings new to be seen at the west end of the city. The University of Glasgow includes four faculties, viz., arts, theology, law, medicine: it was re-constituted by the Act of 1858, and, conjointly with the University of Aberdeen, sends one member to Parliament.

The present UNIVERSITY OF ABERDEEN derives its origin from two distinct foundations, viz., University and King's College of Aberdeen, founded in 1494 by William Elphinstone, Bishop of Aberdeen, under the authority of a Papal bull; and Marischal College and University of Aberdeen, founded (1593) by George Keith, Earl

Marischal, by a charter afterwards ratified by Act of Parliament. In 1860, by another Act of Parliament, the two foundations were united and incorporated into one university and college, under the title of the University of Aberdeen. The four faculties are arts, divinity, law, and medicine; and at the end of the arts curriculum scholarships and prizes are given of the annual value of about £1,000. The university library contains more than 80,000 volumes.

Of the modern Universities of the United Kingdom the most important is the UNIVERSITY OF LONDON, which was first incorporated by Royal Letters Patent dated December 5, 1837, the royal charter being issued in 1863, and a supplemental charter in 1878. So far as the functions of a university are concerned, this is simply an examining body which, by reason of its unquestionable integrity and its severely high standard, has gained an excellent reputation. The fees are moderate, ranging from £2 to £10. The various faculties are arts, science, medicine, law, and music; and the matriculation and the pass examinations in arts and in science are held at a large number of provincial colleges, while the bi-annual matriculation examinations are also held at several colonial centres. The corporate body of the university includes the Chancellor, Vice-Chancellor, fellows, and graduates. In 1887 the number taking the B.A. degree was 192, and the M.A. degree, 10.

The remaining modern Universities are Durham, established by the Dean and Chapter of Durham under the authority of an Act of Parliament passed in 1832; the Victoria University, which received a Royal Charter in 1880, and combines Owens College, Manchester, University College, Liverpool, and the Yorkshire College, Leeds; the Royal University of Ireland; and the Catholic University of Ireland.

Of late years much has been done in the way of extending university teaching and advantages. Both Oxford and Cambridge now hold what are called "Local" Examinations, senior and junior, in many parts of the country, and the certificates granted to the successful candidates are accepted in different branches of business and the professions as equivalent to a guarantee of competency from an educational point of view.

They have also organized "University Extension Lectures," which are given in all parts of the kingdom by arrangement with local committees, who apply for a course of lectures and guarantee the small expenses.

The University of London, too, has arranged a definite scheme, which is now in full working, for the inspection and examination of schools other than primary, to be conducted under the direction of the Senate.

University of Oxford.

Chancellor, Most Hon. the Marquis of Salisbury, K.G., D.C.L.,* All Souls	Elect.	1869
High Steward, Rt. Hon. the Earl of Carnarvon, D.C.L., Ch. Ch.		1859

NOTE.—The "income from endowments" given above is the net income from the college estates, investments, &c., after deducting the expenses of managing the property, interest on, and repayment of loans, &c.

NONCONFORMIST COLLEGE.—In 1886 a college for the education of Nonconformists was commenced in Oxford, with the title of *Mansfield College*, and several professors and lecturers of the University have offered to open their lectures to the students. *Prin.*, Rev. A. M. Fairbairn, D.D., Hon. M.A.

UNIVERSITY INCOME AND EXPENDITURE.—According to the published accounts of the University to December 31, 1886, the receipts and payments were as follows:—

RECEIPTS.	
Net receipts from endowments	£21,242
Ditto from the Clarendon Press	5,000
College contributions	4,349
Payments by members of the university	29,953
Balance at beginning of account	333
	£60,877

PAYMENTS.	
To professors, officers, &c.	£24,776
Bodleian Library	7,926
The Museum	4,659
Interest and sinking fund	5,982
Miscellaneous	14,665
Balance	2,869
	£60,877

AFFILIATED COLLEGES.

* Including Honorary Degrees.

UNIVERSITY EXTENSION LECTURES.—The delegates of local examinations are empowered to receive proposals for the establishment of lectures and teaching in the large towns of England and Wales, and are authorized to appoint lecturers and examiners for carrying out such proposals. More than one hundred of these courses are now organized annually, the classes being attended by more than 10,000 students in towns in every part of the country. A feature of this educational work is that, for each course, the delegates issue a loan travelling library containing copies of the principal books recommended by the lecturer.

University of Cambridge.

Chancellor, His Grace the Duke of Devonshire, K.G., LL.D.	1860
High Steward, The Earl of Powis, LL.D., St. John's	1864
Vice-Chancellor, C. Taylor, D.D., St. John's	1887
Representatives in Parliament, Right Hon. Henry Cecil Raikes, M.A., Trinity	1882
Geo. Gabriel Stokes, M.A., M.P., Pembroke Commissary, William Forsyth, M.A., Q.C.	1887
Deputy High Steward, Right Hon. S. H. Walpole, LL.D., Trinity	1887
Public Orator, J. E. Sandys, Litt.D., St. John's	1876
Registrar, H. R. Luard, D.D., Trinity	1862
Librarian, William R. Smith, M.A., Christ's	1886
Counsel, G. W. Hemming, M.A., Q.C., St. John's	1875
Arthur Cohen, M.A., Q.C., M.P., Magd.	1879
Equire Bedells, A. P. Humphry, M.A., Trin.	1877
Frederick C. Wace, M.A., St. John's	1877

COUNCIL OF THE SENATE.

The Chancellor; the Vice-Chancellor; the Master of Clare Hall; the Master of Caius; the Master of Pembroke; the Master of Peterhouse; Prof. Stokes, *Pemb.*; Prof. Cayley, *Trin.*; Professor Liveing, *St. John's*; Professor Foster, *Trin.*; J. Peile, *Christ's*; G. F. Browne, *Cath. Hall*; E. Hill, *St. John's*; F. Whitting, *King's*; O. Trotter, *Trin.*; A. A. Leigh, *King's*; R. A. Neil, *Pembroke*; D. Macalister, *St. John's*.

See Viri, Dr. Ferrers, Sir H. J. S. Maine, Dr. Peile, A. Austen Leigh, Prof. Cayley, Prof. Liveing.

Auditors of the Chest, E. J. Gross, *Caius*; A. Rose, *Emm.*; T. F. C. Huddleston, *King's*.

Watch Committee, F. H. Neville, *Sidney*; R. F. Scott, *St. John's*; Dr. Porter, Dr. Parkinson, Dr. Perowne.

Proctors, F. H. Neville, *Sidney*; R. F. Scott, *St. John's*.

Pro-proctors, G. W. Prothero, *King's*; W. N. Shaw, *Emmanuel*.

Additional Pro-Proctors, E. A. Beck, *Tr. H.*; E. J. H. Smith, *Pembroke*.

Moderators, W. H. Macaulay, *King's*; W. B. Allcock, *Emmanuel*.

EXAMINERS.

Mathematical Tripos, Part I, The Moderators, J. Larmor, *John's*; W. Welsh, *Jessu*.

Mathematical Tripos, Part II, J. W. L. Glaisher, *Trinity*; Dr. Routh, A. R. Forsyth, *Trinity*; Professor Thomson.

Classical Tripos, Part I, G. M. Edwards, *Sidney*; J. A. Robinson, *Christ's*; E. S. Roberts, *Caius*; J. D. Duff, *Trinity*; H. R. Tottenham, *John's*; H. C. Goodhart, *Trinity*. Part II, A. C. W. Moule, *Corp.*; A. W. Verrall, *Trinity*. B. R. D. Hicks, *Trinity*; R. D. A. Hind, *Trinity*. O. E. S. Thompson, *Christ's*; Dr. Reid, D. Post. Middleton, A. A. Tilley, *King's*; E. Dr. Postgate, R. A. Neil (*Pemb.*).

Law Tripos, J. A. Foote, *St. John's*; H. Bond, *Trinity Hall*; F. Pollock, *Trin.*; Dr. Clark.

Historical Tripos, J. R. Tanner, *St. John's*; R. Lodge, Prof. Creighton, F. W. Maitland, *Trin.*

Moral Sciences Tripos, J. N. Keynes, *Pemb.*; W. E. Johnson, *King's*; W. R. Sorley, *Trinity*; F. W. Maitland, *Trinity*.

Natural Sciences Tripos, Prof. Thomson, W. G. Adams, *John's*; H. J. H. Fenton, *Chr.*; H. E. Armstrong, W. T. Danby, *Down*; H. A. Miers, I. B. Balfour, Dr. Vines, Dr. Gaskell, H. Gadwo, *King's*; W. F. R. Weldon, *John's*; C. Lapworth, A. Harker, *John's*; Dr. Hill, J. Cleland, G. F. Yeo.

Theological Tripos, J. O. F. Murray, *Emm.*; E. R. Bernard, H. C. G. Moule, *Trinity*; G. A. S. Schneider, *Caius*; W. E. Barnes, *Peterhouse*; H. J. C. Knight, *Cath. Hall*.

PROFESSORS.

Elected.

Anatomy, A. Macalister, M.D., *John's*

Anglo-Saxon, W. W. Skeat, Litt.D., *Christ's*

Arabic, William Wright, M.A., *Queen's*

(*Ld. Alm.*), R. L. Bently, M.A., *Cat* is

Arch. (Disney), G. F. Browne, B.D., *Cath. Hall*

 A. Visetti; G. E. Bambridge; C. E. Willing;
 Prof. James Higgs, M.S.B.; W. Pinney, M.S.B.;
 J. C. Beuthin; Wallace Wells; H. Lazarus; J.
 T. Carronius; F. Corder; G. Mount; W. H.
 Stone, M.A.; C. E. Armand Semple, B.A., M.B.
Examiners, Sir H. S. Oakeley, M.A., M.S.D.; F.
 H. Cowen; C. H. Parry, M.A., M.S.D.; A. E.
 Dyer, M.S.D.; A. H. Mann, M.S.D.; E. T.
 Chipp, M.S.D.; E. J. Hopkins, M.S.D.; Jacob
 Bradford, M.S.D.; J. Francis Barnett; A. E.
 Drinkwater, M.A.; W. H. Walshe, M.D.; C.
 Warwick Jordan, M.S.D.

DEPARTMENT OF LITERATURE AND SCIENCE.

Lecturers, Peregrine Lewes, LL.D.; Prof. A. Farinelli;
 Rev. W. A. Hales, M.A.; D. Hovel-
 acquie, B.L.; F. Ludwig.
Registrar, G. W. Bloxam, M.A.; *Bursar*, J. Stedman,
 F.R.G.S. *Hon. Sec.*, Rev. R. Gwynne, B.A.
Secretary, Shelley Fisher, F.R.A.S.

University of Durham, 1831.

TERMS.—*Epiphany*, Jan. 17 to March 20. *Easter*,
 April 21 to June 20. *Michaelmas*, Oct. 9 to
 Dec. 12.

Governors, The Dean and Chapter of Durham.
Warden, Very Rev. the Dean of Durham.
Sub-Warden, Rev. R. J. Pearce, D.C.L.

PROFESSORS.

Divinity & Eccles. Hist., Rev. A. S. Farrar, D.D.
Greek and Classical Lit., Rev. T. S. Evans, M.A.
Mathematics, Rev. R. J. Pearce, D.C.L.
Hebrew, Ven. Henry W. Watkins, D.D.
Medicine, G. H. Philipson, M.A., M.D., F.R.C.P.
Proctors, Rev. A. Plummer, D.D.; and Rev. A.
 Robertson, M.A.
Tutors, Rev. A. Plummer, D.D.; Rev. A. Robertson,
 M.A.; F. B. Jevons, M.A.; Rev. H. Rashdall,
 M.A.
Lecturer in Hebrew, Rev. J. T. Fowler, M.A.
Classical Lecturer, Rev. J. R. Shortt, M.A.
Mathematical Lecturer, P. J. Heawood, M.A.
Lecturer in Mod. Languages, W. C. Robinson, F.R.D.
Registrar, W. K. Hilton, M.A.
Librarian, Rev. J. T. Fowler, M.A.
Observer, H. J. Carpenter.
Treasurer and Secretary, A. Beanlands, M.A.

UNIVERSITY COLLEGE.

Master, Rev. Alfred Plummer, D.D.

BISHOP HATFIELD'S HALL.
Principal, Rev. A. Robertson, M.A.
COLLEGE OF MEDICINE, Newcastle.

Anatomy, W. P. Mears, M.D.
Physiology, G. E. Williamson, F.R.C.S.; T. Oliver, M.D.
Practice of Medicine, G. H. Phillipson, M.A., M.D.
Practice of Surgery, G. Y. Heath, M.D.; W. C. Arnison, M.D.
Chemistry, P. Phillips Bedson, D.Sc.
Anatomical Demonstrations, W. P. Mears, M.D.
Public Health, Henry E. Armstrong, M.B.C.S.
Diseases of Women and Children, C. Gibson, M.D.
Midwifery, T. C. Nesham, M.D.
Medical Jurisprudence, F. Page, M.D.
Botany, J. Murphy, M.A., M.D.
Mat. Med. & Therapeutics, S. McBean, L.R.C.P.
Pathology, D. Drummond, M.A., M.D.
Operative Surgery, Luke Armstrong, M.D.
Practical Physiology, T. Oliver, M.D.
Psychological Medicine, R. H. B. Wickham, M.D.
Tutor in Arts, Rev. J. Bulmer, B.D.

DURHAM COLLEGE OF SCIENCE, Newcastle.

Principal, W. Garnett, D.C.L.
Mathematics, W. Garnett, D.C.L.
Chemistry, P. Phillips Bedson, D.Sc.
Experimental Philosophy, Hon. Prof. A. S. Herschel, D.C.L., F.R.S.; and Prof. H. Stroud, D.Sc.
Geology, G. A. Lebour, M.A.
Natural History, G. Stewardson Brady, M.D., F.R.S.
Mining, J. H. Merivale, M.A.
Lecturer in French, C. S. Catoni, B.ÈS L.
Lecturer in German, W. C. Robinson, Ph.D.
Lecturer in Mechanical Drawing, J. A. G. Ross.
Secretary, Theophilus Wood Bunning, C.E.

Victoria University: Manchester.

Chancellor, The Duke of Devonshire, K.G., LL.D.
Vice-Chancellor, A. W. Ward, Litt.D., LL.D.
Pro Vice-Chancellors, J. G. Greenwood, LL.D., and G. H. Rendall, M.A.
Treasurer, Alfred Neild.
Registrar, Alfred T. Bentley, M.A.
Chairm. of Bd. of Studies, R. Adamson, LL.D., F.R.S.
Secret. of Bd. of Studies, Horace Lamb, M.A., F.R.S.
Chairman of Convocation, Alfred Hopkinson, M.A.
Clerk of Convocation, Rev. C. T. Poynting, B.A.

COLLEGES OF THE UNIVERSITY—Owens College, Manchester, and University College, Liverpool.

OWENS COLLEGE, Manchester.

President, The Duke of Devonshire, K.G., LL.D.
Principal, Prof. J. G. Greenwood, LL.D.
Registrar, Henry William Holder, M.A.
Librarian, J. Taylor Kay.

I.—ARTS, SCIENCE, AND LAW DEPARTMENT.

Greek, Prof. J. Strachan, M.A.
Latin and Comp. Phil., Prof. A. S. Wilkins, LL.D.
Greek Test. Criticism, Prof. J. G. Greenwood, LL.D.
Hist. and English Lit., Prof. A. W. Ward, Litt.D.
English Language, Prof. T. N. Toller, M.A.
Mathematics, Prof. Horace Lamb, M.A., F.R.S.
Applied Math., Prof. A. Schuster, Ph.D., F.R.S.
Physics, Prof. Balfour Stewart, LL.D., F.R.S., and Prof. T. H. Core, M.A.
Engineering, Prof. O. Reynolds, M.A., F.R.S.
Logic & Mor. Philos., Prof. Robt. Adamson, LL.D.
Political Economy, Prof. J. E. C. Munro, LL.D.
Jurisprudence and Law, Prof. Alfred Hopkinson, M.A.; Prof. J. E. Crawford Munro, LL.M.

Chemistry, Prof. Harold B. Dixon, M.A., F.R.S.
Organic Chemistry, Prof. C. Schorlemmer, F.R.S.
Technological Chemistry, Watson Smith.
Metallurgy, W. H. Gardner.
Zoology, Prof. A. M. Marshall, M.A., D.Sc., F.R.S.
Botany, Prof. W. C. Williamson, LL.D., F.R.S.
Physiology, Prof. W. Stirling, M.D., D.Sc.
Geology, Prof. W. B. Dawkins, M.A., F.R.S.
Mineralogy, C. A. Burghardt, Ph.D.
Hebrew, I. M. Simmons, B.A.
French, Victor Kastner, B.ÈS L.
German, H. Hager, Ph.D. Drawing,
Harmony and Musical Comp., Henry Hiles, Mus.D.
(With Assistant Lecturers in all the principal Departments.)

II.—MEDICAL DEPARTMENT.

Anatomy, A. H. Young, M.D., F.R.C.S. (Dean).
Physiology, Prof. W. Stirling, M.D., D.Sc.
Comp. Anatomy, Prof. A. M. Marshall, M.D., F.R.S.
Chemistry, Prof. C. Schorlemmer, F.R.S.
Medicine, Prof. J. E. Morgan, M.D.; Prof. James Ross, M.D.
Surgery, Prof. E. Lund, F.R.C.S.; Assist. Lecturers, F. A. Southam, F.R.C.S.
Practical Surgery, Thomas Jones, M.B., F.R.C.S.
Pathology, Prof. Julius Dreschfeld, M.D., F.R.C.P.
Surgical Pathology, Prof. A. H. Young, F.R.C.S.
Obstetrics, Prof. Charles J. Cullingworth, M.D.
Diseases of Children, Henry Ashby, M.D.
Mental Diseases, G. W. Mould, M.R.C.S.
Materia Medica, Prof. D. J. Leech, M.D.; Assist. Lect. in Pharmacy, W. Elborne.
Medical Jurisp., J. Dixon Mann, M.D., M.R.C.P.
Hygiene, Arthur Ransome, M.A., M.D., F.R.S.
Ophthalmology, David Little, M.D.
Botany, Prof. W. C. Williamson, LL.D., F.R.S.
Comparative Osteology, C. H. Hurst.
Dental Surgery,
Dental Anat. and Physiog., A. M. Paterson, M.D.
Dental Mechanics, T. Tanner, L.D.S.
Dental Metallurgy, C. A. Burghardt, Ph.D. (With Assistant Lecturers in all the principal Departments.)

III.—DEPARTMENT FOR WOMEN.

(223, Brunswick Street.)

Asst. Secretary and Tutor, Miss Edith C. Wilson.
Greek Testament Criticism, Prof. J. G. Greenwood, LL.D.
Classics, Prof. J. Strachan; Prof. A. S. Wilkins, LL.D.; E. B. England, M.A.; S. G. Owen, B.A.
English Literature, Prof. Ward, Litt.D.
English Language, Prof. T. N. Toller, M.A.
French, Victor Kastner, B.ÈS L.
German, H. Hager, Ph.D.
History, Prof. A. W. Ward, Litt.D.
Logic and Philosophy, Prof. R. Adamson, LL.D.
Mathematics, Prof. Lamb, M.A., F.R.S.; R. F. Gwyther, M.A.; F. T. Swanwick, M.A.

IV.—DEPARTMENT OF EVENING CLASSES.

The Professors and Lecturers of the College, and the following additional Lecturers:—
Law, F. Byrne, W. J. Napier, and A. E. Steinthal.
Spanish, Senor W. T. Alvares.
Italian, Signor A. Valgimigli.

UNIVERSITY COLLEGE, LIVERPOOL.

Principal, Gerald Henry Rendall, M.A.
Registrar, Eugenio Londini, D.C.L.
Dean of the Medical Faculty, Richard Caton, M.D., M.R.C.P.

I.—ARTS AND SCIENCE DEPARTMENT.

Greek, Prof. G. H. Rendall, M.A.
Latin, Prof. Herbert A. Strong, M.A., LL.D.
French, M. Victor Oger.
German, Kuno Meyer, Ph.D.
Italian, Eugenio Londini, D.C.L.
Modern Literature, Prof. A. Cecil Bradley, M.A.
History, Prof. J. M. Mackay, M.A.
Philosophy and Political Economy, Prof. John MacCunn, M.A.
Art, Prof. W. M. Conway, M.A.
Mathematics, Prof. F. S. Carey, M.A.
Physics, Prof. O. J. Lodge, D.Sc.
Engineering, Prof. H. S. Hele Shaw.
Chemistry, Prof. James Campbell Brown, D.Sc.
Nat. History, Prof. William A. Herdman, D.Sc.

II.—MEDICAL DEPARTMENT.

Medicine, Prof. T. R. Glynn, M.D., F.R.C.P.
Surgery, Prof. Rushton Parker, B.S., F.R.C.S.
Anatomy, Prof. W. Mitchell Banks, F.R.C.S.
Physiology, Prof. Richard Caton, M.D., M.R.C.P. (Dean).
Pathology, Prof. A. Davidson, M.A., M.D., F.R.C.P.
Ophthalmology, Edgar A. Browne, M.R.C.S.
Midwifery and Gynaecology, Prof. J. Wallace, M.D.
Clinical Medicine, Richard Caton, M.D., M.R.C.P.; Prof. T. R. Glynn, M.D., F.R.C.P.; Prof. A. Davidson, M.A., M.D., F.R.C.P.
Clinical Surgery, E. R. Bickersteth, F.R.C.S.; Reginald Harrison, F.R.C.S.; Prof. W. Mitchell Banks, F.R.C.S.
Diseases of Children, Robert Gee, M.D., M.R.C.P.
Materia Medica, Prof. W. Carter, LL.B., M.D., B.Sc.
Medical Jurisprudence, F. T. Paul, F.R.C.S. (Vice Dean).
Hygiene, E. W. Hope, M.D., D.Sc.
Botany, E. J. Harvey Gibson, M.A., F.R.S.E.

Provincial Colleges.

BIRMINGHAM, QUEEN'S COLLEGE.

Warden and Prof. of Pastoral Divinity, Rev. Wm. H. Poulton, M.A. (and *Mathematics pro tem.*).
Asst. Tutor & Heb. Lect., J. W. Davis, M.A.
Classics, (vacant).
French, J. O'Flanagan.
German, Dr. K. Dammann.
Drawing, Charles Docker.
Anatomy, B. O. A. Windle, M.D.
Demonstrators, J. Lloyd, M.B.; W. F. Haslam, M.R.C.S.; and F. Marsh.
Botany, W. Hillhouse, B.A., F.L.S.
Chemistry & Pract. Chem., W. A. Tilden, D.Sc.
Forensic Medicine, A. St. J. Wilders, M.R.C.S.
Toxicology, A. Bostock Hill, M.D.
Materia Medica, E. Rickards, M.D., and C. W. Suckling, M.D.
Medicine, Sir Balthazar W. Foster, M.D., and Sir James Sawyer, M.D. (Lond.)
Midwifery, Professor John Clay, M.R.C.S.
Pathology, H. G. Barling, M.B.
Physiology, F. J. Allen, M.A.; and Bennett May, M.B.
Surgery, Professor O. Pemberton, M.R.C.S.
Dental Anat. & Physiology, J. Humphreys, L.D.S.I.
Dental Surg. & Pathology, C. Sims, L.D.S. (Eng.).
Dental Mech., W. Elliott, L.D.S. (Edin.&Dub.), F.C.S.
Dental Metallurgy, W. A. Tilden, D.Sc.
Medical Tutor, E. Hogben, M.D.

BIRMINGHAM—THE MASON SCIENCE COLLEGE.

Chairman of Council, J. T. Bunce, F.S.S.
Mathematics, Robert S. Heath, M.A.
Physics, J. H. Poynting, M.A.

Chemistry & Metallurgy, W. A. Tilden, D.Sc., F.R.S.
Zoology, T. W. Bridge, M.A.
Botany, W. Hillhouse, M.A.
Physiology, J. B. Haycraft, M.B.
Geology and Mineralogy, C. Lapworth, LL.D.
Coal Mining, W. E. Benton, F.S.M.
Civil and Mech. Engineering, R. H. Smith, C.E.
Greek and Latin, E. A. Sonnenschein, M.A.
English Language and Lit., Edward Arber, F.S.A.
French, E. Loreille, B.ès L.
German, K. Dammann, Ph.D.
Librarian, S. Allport, F.G.S.
Secretary, G. H. Morley.

BRADFORD TECHNICAL COLLEGE.

Principal, James Spencer, B.Sc.
Art Department, C. I. Durham.
Textile Department, Thomas R. Ashenburt.
Chemistry and Dyeing, Edmund Knecht, Ph.D.
Mechanical and Engineering, J. H. Dales.

BRISTOL UNIVERSITY COLLEGE.

Chemistry, S. Young, D.Sc., & A. Richardson, Ph.D.
Mathematics, D. Codrington Selman.
Experimental Physics, J. Ryan, M.A., D.Sc., and E. Tyack.
Engineering, J. Ryan, M.A.; D. Codrington Selman; Alfred E. Mackett.
Geology and Zoology, C. Lloyd Morgan.
Botany, A. Leipner.
Political Economy, E. C. K. Gonner, M.A.
Philosophy and Logic, R. Fanshawe, M.A.
Mod. Hist. and Eng. Lit., James Rowley, M.A., and E. C. K. Gonner, M.A.
Greek and Latin, R. Fanshawe, M.A.
Hebrew, Bernhard Heymann.
French, E. Pellissier, M.A., and A. D'Oursy, B.A.
German, A. Leipner.
Registrar and Secretary, Spencer F. A. Smith.

MEDICAL SCHOOL.

Medicine, W. H. Spencer, M.D., & E. M. Skerritt, M.D.
Surgery, N. C. Dobson, F.R.C.S.
Anat., W. H. Harsant, F.R.C.S., and W. J. Penny.
Physiology, G. Munro Smith, M.R.C.S., and J. Mitchell Clark, M.B.
Chemistry, T. Coomber, F.C.S.
Hygiene, D. Davies, M.B.
Midwifery, J. G. Swayne, M.D., and A. E. Lawrence, M.D.
Med. Jurisp., R. Eager, M.D., & A. J. Harrison, M.B.
Pathology and Morbid Anatomy, R. Shingleton Smith, M.D.; and B. J. Baron, M.B.
Operative Surgery & Path., W. P. Keall, M.R.C.S.
Practical Surgery, A. W. Pritchard, M.R.C.S.
Materia Medica & Therapeutics, J. E. Shaw, M.B.
Pract. Physiology & Histology, G. F. Atchley, M.B.; and B. G. M. Baskett, B.A.
Botany, A. Leipner.
Comparative Anatomy, C. Lloyd Morgan.
Medical Tutor, F. Calder.

LEEDS—THE YORKSHIRE COLLEGE.

President, Most Hon. the Marquis of Ripon, K.G.
Principal, N. Bodington, M.A.
Registrar and Secretary, W. F. Husband, LL.B.
Mathematics, A. H. Green, M.A., F.R.S.
Physics, W. Stroud, D.Sc.
Chemistry, Arthur Smithells, B.Sc.
Biology, L. C. Miall.
Geology, A. H. Green, M.A., F.R.S.
Engineering, Archibald Barr, B.Sc.
Classics and Mental Science, N. Bodington, M.A.
Modern Literature, Cyril Ransome, M.A.
French, P. H. M. du Gillon.

German & Oriental Lang., Joseph Strauss, Ph.D.
Coal Mining, Arnold Lupton.
Textile Industries, John Beaumont.
Dyeing, J. J. Hummel.
Physiology, De Burgh Birch, M.D.
Italian and Spanish, W. T. Alvarey.
Shorthand, J. Singleton.

MEDICAL DEPARTMENT.

Medicine, J. E. Edison, M.D. Edinb.; and Thos. Churton, M.D. Aberd.
Surgery, A. F. McGill, F.R.C.S.
Practical Surgery, A. W. Mayo Robson, F.R.C.S.
Descript. & Surg. Anat., T. Wardrop Griffith, M.B.
Osteology, Edmund Robinson, M.R.C.S.
Pract. Anat., Demonstrator, M. J. Oliver, M.B.
Physiology & Histology, Prof. De Burgh Buch, M.D.
Pathology, Ernest H. Jacob, M.A.
Midwifery, Charles J. Wright, M.R.C.S.
Diseases Women and Children, J. Braithwaite, M.D.
Forensic Medicine, Thomas Scattergood, M.R.C.S.
Materia Medica, J. Hellier, M.D.
Mental Diseases, W. Bevan Lewis.
Hygiene, R. N. Hartley, M.B.

LINCOLN SCHOOL OF SCIENCE.

Principal, A. B. Griffiths, Ph.D., F.R.S.E.
Mathematics, Rev. Chancellor Leeke, M.A.; H. Barker, B.A.
Geology, W. D. Carr.
Mechanics, &c., F. Armstrong, I. W. Towler.
Geometry, W. Gilbert.
Engineering, J. Coates, M.I.M.E.
Physiology and Hygiene, Henry Harris.
Agricultural Chemistry, F. Wallis and H. Harris.
Sec., W. J. Cant, M.R.C.S.

MANCHESTER TECHNICAL SCHOOL.

President, Oliver Heywood.
Chairman of Council, Harry Rawson.
Mathematics, J. McCullagh.
Preparatory Mathematics, T. W. Lawrenson.
Descriptive Geometry, Machine Construction, Theoretical Mechanics, Applied Mechanics, Steam, Tools, Mechanical Engineering, T. Cryer, M.I.M.E., H. G. Jordan, A.R.C.S.
Practical Mechanical Engineering, W. H. Davies, and J. Hardman.
Carriage Building, W. Chaddock, J. E. Roberts, and R. Morton.
Descriptive Geometry, Building Construction, Carpentry and Joinery, and Staircase Making, J. Wilson and J. Mattinson.
Masonry, W. Deakin.
Bricklaying, W. Dennell.
Land Surveying and Levelling, T. H. Gardner.
Metal Plate Work, A. Aird.
Plumbing, J. Radcliffe.
Practical Joinery & Pattern Making, R. Trainor.
Quantities Surveying, H. Johnson.
Sound, Light and Heat, Magnetism and Electricity, Practical Physics, Inorganic and Organic Chemistry, Metallurgy, Alkali, Bread-Making, Brewing, Iron and Steel, H. Lloyd Snape, D.Sc., and E. L. Rhead.
Bleaching, Dyeing, and Printing, Manufacture of Coal-Tar Colours, Wool and Silk Dyeing, Ernest Bentz.
Oils, Colours, & Varnishes, Lubricating & Illuminating Oils, G. H. Hurst, F.C.S.
Telegraphy, W. S. Harrison.
Electrical Engineering, T. Bryan.
Cotton Manufacture, J. Morris.
Weaving and Designing, T. Fox.
Printing, C. H. Harrap and J. E. Johnson.

Dressmaking, Art Needlework, Millinery, Miss J. E. Davis and Miss A. E. Davis.
Botany and Physiology, H. Hyde.
Geology & Physiography, S. C. Barlow.
 (And thirteen other Teachers in Languages, Drawing, and Commercial Subjects.)
Secretary, J. H. Reynolds.

NOTTINGHAM—UNIVERSITY COLLEGE.

Principal, Frank Clowes, D.Sc.
Language and Literature, Prof. J. E. Symes, M.A.
English, J. W. Thompson, LL.M.
Latin, Greek, and Logic, J. Solomon, M.A.
French, Madame Lionnet.
German and Italian, Herr Freund.
Chemistry and Metallurgy, Prof. F. Clowes, D.Sc.
Chemical Demonstrator, J. B. Coleman, F.C.S.
Materia Medica, C. Haydon White, M.R.C.S.
Mathematics & Physics, Prof. W. H. Heaton, M.A.
Physics and Mathematics, Prof. W. H. Heaton, M.A.
Spanish and Commercial Sciences, Dr. C. U. Yates.
Demonstrator, A. H. Simpson, F.R.M.S.
Theory of Music, H. Houseley, F.C.O.
Natural Sciences, Prof. J. F. Blake, M.A.
Dyeing & Bleaching, E. L. Whiteley, F.C.S.
Sec., P. H. Stevenson, F.S.A.

SHEFFIELD—FIRTH COLLEGE.

Principal, Prof. W. M. Hicks, LL.D., F.R.S.
Mathematics and Physics, The Principal.
Chemistry, Prof. W. Carleton Williams, B.Sc.
Classics, Prof. Percy A. Barnet, M.A.
History, A. J. Grant, M.A.
Biology, A. Denny.
French, Leopold Courtial.
German, F. Schöllhammer.
Hebrew, W. H. Bennett, M.A.
Italian and Spanish, F. T. Bianchi.
Chemical Demonstrator, L. T. O'Shea, B.Sc.
Physical Demonstrator, W. T. Robb, M.A.
Registrar, Ensor Drury.

SHEFFIELD TECHNICAL SCHOOL.

Metallurgy, Prof. Greenwood, M.I.O.E.
Mechanical Engineering, Prof. Greenwood and Assistant-Prof. W. Ripper, M.I.M.E.
Demonstrator and Assist. Lecturer, A. McWilliams, A.R.S.M.
Secretary, Ensor Drury.

HARTLEY INSTITUTION, SOUTHAMPTON.

Geology, &c., T. W. Shore, F.G.S., Executive Officer.
Chemistry, &c., J. Brierley, Borough Analyst.
Mathematics, I. Jeffares, M.A.
Engineering, A. W. F. Langman.
Classics, Rev. G. F. Steven, M.A.
French, H. Le Coq du Domaine.

The Principality.

ABERYSTWYTH—UNIVERSITY COLLEGE OF WALES.

Principal, Rev. Thomas Chas. Edwards, M.A., D.D.
Greek, The Principal.
Latin & Comparative Philology, J. M. Angus, M.A.
Oriental and Modern Languages, H. Ethé, Ph.D.
English Lang. and Lit., H. C. Herford, M.A.
Mathematics, Natural Philosophy, and Astronomy, R. W. Genese, M.A.
Logic and Philosophy, J. Brough, LL.M.
Chemistry, T. S. Humpidge, Ph.D.
Physics, D. E. Jones, B.Sc.
Welsh and History, J. E. Lloyd, B.A.
Classics, J. W. Marshall, M.A.
Modern Languages, W. Scholle, Ph.D.
Biology, Geology, &c., J. R. A. Davis, B.A.
Registrar and Librarian, E. P. Jones, M.A.

BANGOR—UNIVERSITY COLLEGE OF NORTH WALES.

Principal, Henry R. Reichel, M.A.
Greek, W. Rhys Roberts, M.A.
Latin, Edward V. Arnold, M.A.
Modern Languages, Emil J. Trechmann, B.A.
English Language, Literat., & Hist., The Principal.
Logic and Philosophy, Henry Jones, M.A.
Mathematics, George B. Mathews, M.A.
Physics, Andrew Gray, M.A., F.R.S.E.
Chemistry and Geology, James J. Dobbie, M.A.
Biology, B. W. Phillips, B.A.
Demonstrator in Physics, D. M. Lewis, M.A.
Demonstrator in Chemistry, Geo. Macgowan, Ph.D.
Secretary and Registrar, W. Cadwaladr Davies.

CARDIFF—UNIVERSITY COLLEGE OF SOUTH WALES AND MONMOUTHSHIRE.

Principal, J. Viriamu Jones, M.A., B.Sc.
Registrar & Secretary, Ivor James.
Greek, T. F. Roberts, B.A.
Latin, J. R. Wardale, M.A.
Logic and Philosophy, Andrew Seth, M.A.
English Language and Literature, W. P. Ker, M.A.
Mathematics & Astron., H. W. Lloyd Tanner, M.A.
Physics, The Principal.
Chemistry, C. M. Thompson, M.A.
Biology, W. N. Parker, F.Z.S.
Celtic, Thomas Powel, M.A.
French Language and Literature, Paul Barbier.
German Language & Lit., Franck Arnold, B.A.
Hebrew, Rev. J. Lloyd Williams, B.A.
Music, (vacant).
Demonstrator in Physics, W. S. Hensley, B.A.
Demonst. in Chemistry, J. Tudor Cundall.
Assist. Lect. in Math., W. F. Pelton, B.A.

ABEDARE HALL.—*Principal*, Miss Don.

LAMPETER—ST. DAVID'S COLLEGE.

Principal, and Prof. of Greek and Theology, Rev. Herbert E. Ryle, M.A.
Vice-Principal, Prof. of Hebrew and Theology, Rev. W. H. Davey, M.A.
Prof. Latin, Rev. C. L. Felton, M.A.
Prof. of History, T. F. Tout, M.A.
Prof. of Welsh, Rev. Owen Evans, M.A.
Prof. Mathemat. & Physical Science, A. W. Scott, M.A.
Prof. Pure Mathematics, E. H. Culley, M.A.
Prof. English, H. Walker, M.A.

[Lampeter possesses the exceptional privilege of conferring degrees, B.A. and B.D., and has been affiliated to the University of Oxford].

SCOTLAND.

University of St. Andrews, 1411 (£2205)

Chancellor, Duke of Argyll, K.G., LL.D.
Vice-Chancellor, Principal Donaldson, LL.D.
Rector, Rt. Hon. Arth. Jas. Balfour, M.P. (1886).
Senior Principal, Principal Donaldson, LL.D.
Dean of Faculty of Arts, P. R. Scott Lang, M.A.
Representative in Parliament, Right Hon. John Hay Athol Macdonald, Q.C., LL.D.
Librarian, Regis., Quastor, & Sec., J. M. Anderson.

UNITED COLLEGE OF ST. SALVATOR AND ST. LEONARD.

Principal, James Donaldson, LL.D. £240

PROFESSORS.

Humanity, Rev. Alexander Roberts, D.D. £120
Logic, Rhetoric, & Metaphysics, A. Seth, M.A. 150
Greek, Rev. Lewis Campbell, LL.D. 100
Mathematics, P. R. Scott Lang, M.A. 109

Moral Philosophy, Wm. Angus Knight, LL.D. £150
Nat. Philosophy, Arthur Stanley Butler, M.A. 150
Nat. & Civ. History, W. C. McIntosh, M.D., LL.D. 100
Medicine, J. Bell Pettigrew, M.D. 100
Chemistry, Thos. Purdie, B.Sc., Ph.D. 100
Education, John M. D. Meiklejohn, M.A.
Clerk and Factor, Stuart Grace.

COLLEGE OF ST. MARY.

Principal, Rev. John Cunningham, D.D., LL.D.

PROFESSORS.

Primarius Prof. of Divinity, Rev. John Cunningham, D.D., LL.D.
Biblical Criticism, Rev. F. Crombie, D.D. £87
Ecclesiastical History, Rev. A. F. Mitchell, D.D. 86
Oriental Languages, Rev. John Birrell, D.D. 186
Secretary and Factor, Stuart Grace.
 Term commences 1st week of November, and ends 3rd week of April.

University of Glasgow, 1450 (£3465).*

Chancellor, The Earl of Stair, K.T. 1884
Vice-Chancellor, The Principal. 1873
Rector, Earl of Lytton, G.C.B.
Dean of the Faculties, Alexander Crum. 1885
Principal, John Caird, D.D., LL.D., £550 ... 1873
Represent. in Parl., James A. Campbell, LL.D. 1880
Senatus Academicus, The Principal and Professors.
Clerk of Senatus, Prof. W. Stewart, D.D.

PROFESSORS.

Humanity, George G. Ramsay, LL.D. £125
Greek, Richard Claverhouse Jebb, LL.D. 120
Civil Engineering and Mechanics, James Thomson, LL.D., D.Sc. 275
Logic and Rhetoric, John Veitch, LL.D. 11
Moral Philosophy, Edward Caird, LL.D. 11
Natural Philosophy, Sir Wm. Thomson, LL.D. 121
Mathematics, William Jack, LL.D. 162
English Lang. and Literature, J. Nichol, LL.D. 200
Astronomy, Robert Grant, LL.D. 50
Naval Architecture, Philip Jenkins.
Divinity, William P. Dickson, D.D.
Church History, Robert H. Story, D.D.
Biblical Criticism, William Stewart, D.D.
Oriental Languages, James Robertson, D.D. ... 20
Law of Scotland, Alexander Moody Stuart.
Conveyancing, James Robertson, LL.D.
Materia Medica, Matthew Charteris, M.D. ... 125
Chemistry, John Ferguson, M.A. 400
Surgery, Sir Geo. H. B. Macleod, M.D. 100
Practice of Medicine, W. T. Gairdner, M.D. ... 10
Midwifery, William Leishman, M.D. 100
Anatomy, John Cleland, M.D., LL.D. 30
Natural History, John Young, M.D. 200
Botany, Frederick O. Bower, M.A., F.L.S. 100
Institutes of Med., J. G. McKendrick, M.D. ... 150
Forensic Medicine, Pierce A. Simpson, M.D. ... 125
Clinical Surgery, George Buchanan, M.D.
Clinical Medicine, T. McCall Anderson, M.D.
Honyman Gillespie Lecturer, John Young, M.D.
Waltounian Lecturer, Thomas Reid, M.D.
Lecturer on Public Law, W. G. Miller, LL.B.
Lecturer on Const. Law, Alexander Ure, LL.B.
Lecturer on Insanity, David Yellowlees, M.D.
Lect. on German Literature, Ernest Elsters, Ph.D.
Keeper of Hunterian Museum, Prof. Young, M.D.
Curator of the Library, Prof. Dickson, D.D.
Librarian, James Lyburn.
Secretary to General Council, David Hannay.
Registrar of General Council, Jas. Coutts, M.A.

* These sums do not represent the actual incomes of the Universities, the Colleges, or of the Professors, but merely the amounts annually granted by Parliament to the Colleges and the respective Chairs.

University of Aberdeen, 1494 (£3811).

Chancellor, Duke of Richmond and Gordon, K.G.
Vice-Chanc., Rt. Hon. G. J. Göschen, M.A., M.P.
Rector, Principal W. D. Geddes, LL.D.
Principal, W. D. Geddes, LL.D. £260
Assessors, John Ramsay, M.A.; J. Webster, LL.D.;
 J. F. White, M.A.; W. Milligan, D.D.
Representative in Parliament, J. A. Campbell, LL.D.
Secretary to the Senatus, Prof. W. Milligan, B.D.
Librarian & Registrar, R. Walker, M.A., F.R.S.E.

PROFESSORS.

Greek, John Harrower, M.A. £100
Humanity, Wm. M. Ramsay, M.A. 100
Logic, William Minto, M.A. 190
Mathematics, Rev. G. Pirie, M.A. 100
Moral Philosophy, Rev. John Fyfe, A.M. 100
Natural Philosophy, Charles Niven, M.A. 100
Natural History, H. A. Nicholson, M.A., M.D.
Systematic Theology, Rev. Alex. Stewart 82
Church History, John Christie, D.D. 123
Biblical Criticism, William Milligan, D.D. 20
Oriental Languages, Rev. A. R. S. Kennedy, B.D. 103
Scots Law, George Grub, LL.D. 130
Institutes of Medicine, J. A. McWilliam, M.A. 200
Pract. of Medicine, J. W. F. Smith-Shand, M.D. 150
Chemistry, James Smith Brazier, F.C.S. 40
Anatomy, John Struthers, M.D. 150
Surgery, Alexander Ogston, M.D.
Materia Medica, Theod. Cash, M.D.
Midwifery, William Stephenson, M.D. 75
Medical Jurisprudence, Matthew Hay, M.D. 300
Botany, James W. H. Traill, M.D. 300
Pathological Anatomy, D. H. Hamilton, M.B.

University of Edinburgh, 1582 (£6604).

Chancellor, The Right Hon. John Inglis, Lord
 Justice-General, D.C.L., LL.D. 1871
Rector, Marquis of Lothian, K.T., LL.D.
Vice-Chancellor and Principal, Sir William Muir,
 K.C.S.I., D.C.L., LL.D. 1885
Representative in Parliament, Rt. Hon. John Hay
 Athole Macdonald, C.B., Q.C., LL.D.
Secretary of Senatus, Prof. Kirkpatrick, LL.B.
Clerk to the Senatus and Secretary and Registrar
of the General Council, Thomas Gilbert.
Librarian, Hugh A. Webster.

PROFESSORS.**Faculty of Arts.**

Humanity, William Young Sellar, LL.D. £230
Greek, Samuel Henry Butcher, LL.D. 130
Mathematics, George Chrystal, M.A. 180
Logic, Rev. A. Campbell Fraser, D.C.L., LL.D. 180
Moral Philos., Henry Calderwood, M.A., LL.D. 100
Natural Philos., Peter Guthrie Tait, M.A. 280
Rhetoric & Eng. Lit., David Masson, LL.D. 200
History, John Kirkpatrick, M.A., LL.B. 150
Astronomy, Charles Piazzi Smyth 300
Agriculture & Rural Economy, Robert Wallace.
Music, Sir Herbert S. Oakeley, M.A., MUS.D.
Sanskrit, Julius Eggeling, PH.D. 200
Engineering, G. F. Armstrong, M.A. 200
Geology & Mineralogy, James Geikie, LL.D. 200
Commercial and Political Economy and Mercantile
Law, Joseph S. Nicholson, M.A.
Education, Simon S. Laurie, M.A.
Fine Art (Watson-Gordon), G. Bald. Brown, M.A.
Celtic Language & Literature, D. Mackinnon, M.A.

Faculty of Divinity.

Divinity, Robert Flint, D.D.
Church History, C. Malcolm Taylor, D.D. £100
Hebrew, David Laird Adams, M.A., B.D. 215
Biblical Criticism, A. Hamilton Charteris, D.D.

Faculty of Law.

Public Law, James Lorimer, M.A. £250
Civil Law, James Muirhead LL.D. 150
Scotch Law, (vacant).
Conveyancing, James Stuart Tytler, LL.D.
Const. Law & History, J. Kirkpatrick, M.A., LL.B.

Faculty of Medicine.

Materia Medica, Thomas R. Fraser, M.D. £100
Med. Juris., Sir Douglas Maclagan, M.D. 100
Chemistry, Alexander Crum Brown, M.D. 200
Surgery, John Chiene, M.D. 100
Practice of Physic, Thomas G. Stewart, M.D. 100
Anatomy, Sir William Turner, M.B.
Pathology, William Smith Greenfield, M.D. 100
Midwifery, Alexander R. Simpson, M.D. 100
Clinical Medicine, Drs. Grainger Stewart,
 Thomas R. Fraser, W. S. Greenfield, and
 Simpson on Diseases of Women.
Clinical Surgery, Thomas Annandale, M.D. 100
Botany, Alexander Dickson, M.D. 160
Institutes of Medicine, Wm. Rutherford, M.D. 150
Natural History, James Cossar Ewart, M.D. 160

UNIVERSITY LECTURERS.

Mental Diseases, T. S. Clouston, M.D.
Diseases of the Eye, D. Argyll Robertson, M.D.
Clinical Instruction on Diseases of Children, Jas.
 Carmichael, M.D.; C. E. Underhill, M.B.
Comparative Embryology, George Brook.
Balfour Lecturer in Mental Philosophy, Andrew
 Seth, M.A.
Civil Procedure in the Law Courts of Scotland,
 John P. Coldstream, W.S.
Philosophy of Nat. Hist., G. J. Romanes, M.A., LL.D.
 Terms are from about middle of October to
 end of 1st week in April, and from beginning of
 May to end of July.

**GLASGOW AND WEST OF SCOTLAND
TECHNICAL COLLEGE.**

Andersonian Buildings—204, George Street.
 Science and Arts Buildings—38, Bath Street.
 Young Laboratory Buildings—60, John Street.
 Allan Glen's School—72, Cathedral Street.

PROFESSORS AND LECTURERS.

Chemistry, William Dittmar, LL.D., F.R.S.
Technical Chemistry, Edmd. J. Mills, D.Sc., F.R.S.
Applied Mechanics, William T. Rowden, B.Sc.
Engineering, Andrew Jamieson, M.I.C.E.
Natural Philosophy, James Blyth, M.A.
Mechanical Engineering, Alex. MacLay, B.Sc.
Mathematics, William Raitt, M.A., B.Sc.
Metallurgy & Mineralogy, A. H. Sexton, F.C.S.
Theory of Music, Colin Brown.
Naval Architecture, George Brown.
Mathematics, John Brown.
Geology, J. C. Christie, F.G.S.
Agricultural Chemistry, Charles J. Ellis, F.C.S.
Botany, Thomas King.
Phonography, Robert Kirkpatrick.
Mining, David M. Mowat.
Vocal Music, William H. Murray.
Chemistry, D. S. Macnair, F.C.S.
Civil Engineering, Arthur W. Thomson, B.Sc.
Navigation & Nautical Astron., J. M. Whimster.
Agriculture, R. P. Wright.
Secretary, John Young, M.A.

Rector, Very Rev. Gerald Molloy, D.D.

In accordance with the new organization of 1882, the Catholic University of Ireland now consists of the following colleges:

ST. PATRICK'S COLLEGE (Maynooth).—*President*, Rev. Robert Browne, D.D.

UNIVERSITY COLLEGE (St. Stephen's Green, Dublin).—*President*, Rev. Wm. Delany, S.J.

ST. PATRICK'S COLLEGE (Carlow).—*President*, Rev. Edward Burke.

FRENCH COLLEGE (Blackrock).—*Superior*, Rev. Peter Huvetys.

HOLYCROSS COLLEGE (Clonliffe).—*President*, Rev. Canon Fitzpatrick.

ST. KIERNAN'S COLLEGE (Kilkenny).—*President*, Rev. M. Barry.

MOUNT CARMEL COLLEGE (Terenure).—*Prior*, Rev. Thomas Bartley.

MEDICAL SCHOOL (Cecilia Street, Dublin).—*Dean of the Faculty*, Stephen M. MacSwiney, M.D.

BELFAST—QUEEN'S COLLEGE.

President, Rev. Josias Leslie Porter, D.D.

Greek Language, Hastings Crossley, M.A.

Latin Language, Thomas Wilson Dougan, M.A.

Mathematics, John Purser, LL.D.

Natural Philosophy, Joseph David Everet, M.A.

Hist. & English Lit., Charles Duke Yonge, M.A.

Logic and Metaphysics, John Park, M.A.

Chemistry, Edmund A. Letts, Ph. D.

Nat. Hist. & Geology, Rt. O. Cunningham, M.D.

Modern Languages, Albert L. Meissner, Ph.D.

Jurisp. and Polit. Econ., William Graham, M.A.

English Law, James A. Strahan, LL.B.

Anatomy and Physiology, Peter Redfern, M.D.

Medicine, James Cumming, M.A., M.D.

Surgery, Thomas Sinclair, M.D.

Materia Medica, James Seaton Reid, M.D.

Midwifery, Robert F. Dill, M.D.

Civil Engineering, Maurice F. Fitzgerald, B.A.

Agriculture, John F. Hodges, M.D.

Medical Jurisprudence, John F. Hodges, M.D.

CORK—QUEEN'S COLLEGE.

President, William K. Sullivan, Ph.D., D.Sc., M.R.I.A.

Greek Language, William Ridgeway, M.A.

Latin Language, Bunnell Lewis, M.A., F.S.A.

Mathematics, Arthur H. Anglin, M.A.

Natural Philosophy, John England, M.A.

History and English Literature, George F. Armstrong, M.A.

Mental and Social Science, Geo. J. Stokes, M.A.

Chemistry, Maxwell Simpson, LL.D., F.R.S.

Natural History, Marcus M. Hartog, M.A., F.L.S.

Modern Languages, Owen O'Ryan, D.Lit.

Jurisprudence & Political Economy, Richard Horner Mills, M.A.

English Law, Ralph W. B. Barry, B.A.

Anatomy and Physiology, J. J. Charles, M.A.

Medicine, Denis C. O'Connor, LL.D.

Surgery, Stephen O'Sullivan, M.D.

Materia Medica, C. Yelverton Pearson, M.D.

Midwifery, Henry Corby, B.A., M.D.

Engineering, Alexander Jack, M.A.

Registrar, Alexander Jack, M.A.

Bursar, (vacant).

Librarian, (vacant).

GALWAY—QUEEN'S COLLEGE.

President, Thomas W. Moffett, LL.D.

Greek Language, D'Arcy W. Thompson, M.A.

Latin Language, John Fletcher Davies, M.A.

Mathematics, George Johnston Allman, LL.D., F.R.S., Senator R.V.I.

Natural Philosophy, Alexander Anderson, M.A.

History & English Literature & Mental Science, Thomas W. Moffett, LL.D., Senator R.V.I.

Chemistry, Thomas H. Rowney, Ph.D.

Natural History, &c., R. J. Anderson, M.A., M.D.

Modern Languages, Valentine Steinberger, M.A.

Jurisprud. & Polit. Econ., Chas. Frs. Bastable, M.A.

English Law, William B. Campion, B.A.

Anatomy and Physiology, Joseph P. Pye, M.D.

Medicine, John Isaac Lynham, M.D.

Surgery, James V. Browne, M.D.

Materia Medica, Nicholas W. Colahan, M.D.

Midwifery, Richard John Kinkaid, B.A., M.D.

Civil Engineering, Edward Townsend, M.A.

Registrar, Edward Townsend, M.A.

Bursar, George J. Allman, LL.D., F.R.S.

Act. Librarian, D'Arcy W. Thompson, M.A.

Professional Education.

NAVAL, MILITARY, AND ENGINEERING.

ROYAL NAVAL COLLEGE, GREENWICH.

President, Sir Thomas Brandreth, K.C.B.

Director of Studies, W. D. Niven, M.A., F.R.S.

Assistant to do. for Examination Duties, H. B. Goodwin, M.A., R.N.

Professors: Mathematics, C. J. Lambert, M.A., & Wm. Burnside, M.A.; *Applied Mechanics*, J. H. Cotterill, M.A., F.R.S.; *Physics*, A. W. Reinold, M.A., and J. W. W. Waghorn, D.Sc. (*Assistant*);

Chemistry, Dr. Henry Debus, F.R.S.; *Vivian B. Lewes (Assist.)*; *Fortification*, Maj. J. B. Leefe, R.M.A.; Lt. L. Conway-Gordon, R.M.A. (*Assist.*).

Instructors: Nautical Astronomy and Navigation, T. S. Oborn, R.N.; James R. Clark, M.A., R.N.;

Mathematics, Rev. J. L. Robinson, M.A., R.N.; George Williams, R.N., Wm. Glead, M.A.;

N. Fletcher, B.A.; *Physics and Mathematics*, T. H. Blakesley, M.A., C.E.; French, M. H. Testard, and A. Huguenet; *German*, Eug. Oswald, M.A., Ph.D.;

Nautical Surveying, Staff-Com. William R. Martin; (*Assist.*) Navigating-Lieut. T. B. Moody; *Steam*, John Yeo, Staff Engineer, R.N.;

(*Assistant*) W. H. Riley, Chief Engineer, R.N.; *Applied Mechanics*, John H. Slade, Engineer, R.N.; *Naval Architecture*, W. H. Whiting and J. J. Welch;

Marine Engineering, H. J. Oram, R.N.; *Freehand Drawing*, A. Ackland Hunt; *Physics*, A. Haddon;

Chemistry, W. P. Bloxam.—*Sec.*, F. E. Raven; *Storeskeeper, Cashier, & Librar.*, Frs. Huskisson.

ROYAL NAVAL SCHOOL, NEW CROSS, S.E.

President, Vice-Admiral the Duke of Edinburgh.

Head Master and Chaplain, Rev. J. White, M.A.

Bursar, G. F. Jossop.

Secretary, Lieut. H. Chamberlain, R.N.

Secretary's Office, 32, Sackville Street, W.

ROYAL MILITARY ACADEMY, WOOLWICH.

Governor, Major-Gen. R. J. Hay, C.B.

Commandant and Sec., Col. A. Harness, C.B., R.A.

Adj. and Q.-M., Capt. W. E. Hardy, R.A.; G. G. Simpson, R.A.

Surgeon, Surg.-Major J. W. Maxham, M.D.

Chapl. and Classical Instr., Rev. J. Bond, M.A.

Mathematics and Mechanics, H. Hart, M.A.

Fortification, Major W. G. Ross, R.E.

Artillery, Lieut.-Col. E. Kensington, R.A.

Military Topography, Major F. Mascall, R.E.

Tactics & Milit. History, Maj. Sisson C. Pratt, R.A.

French, Albert Barrère. *German*, F. Lange, Ph.D.

Landscape Drawing, W. Paris.
Chemistry and Physics, Dr. W. R. E. Hodgkinson.

ROYAL MILITARY COLLEGE, SANDHURST.

Governor, Lieut.-Gen. D. Anderson.
Commandant, Col. Aylmer S. Cameron, C.B., F.C.
Adjt., Major E. R. S. Richardson; *Quarterm.*,
T. K. Bunting; *Surgeon*, Brig.-Surg. A. F. S.
Clarke, M.D.; *Assist.-Surgeon*, Surgeon E. L.
Maunsell; *Riding Master*, Capt. J. Hodgins;
Chaplain, Rev. W. Sykes, M.A.

Military Professors and Instructors:—

Fortification, Lt.-Col. L. K. Scott, R.E.; Maj. H.
T. W. Allatt; Capt. A. Bogle, R.E.; Capt. E.
J. T. Ross, R.E.; Capt. W. C. Godsal, R.E.;
Capt. R. Wynyard, R.A.; Capt. F. G. Stone,
R.A.; Capt. A. J. Kelly, R.E.; & Capt. Adair, R.M.L.I.

Military Topography, Col. E. A. Anderson,
Capt. J. R. Young, Maj. C. W. Vulliamy,
Col. B. M. Dawes, Capt. F. W. Bromfield,
Lieut. H. A. Stock, Capt. B. St. J. Barter,
Capt. W. Gregg, Major G. A. Lewes, and
Capt. J. S. Talbot.

Tactics, Administration, &c., Lt.-Col. A. R. Savile,
Maj. G. L. Le M. Taylor, Capt. H. B. Mortimer,
Lt.-Col. H. C. Reynolds, Capt. C. St. L. Barter,
Major A. E. Ball, Major Luttmens Johnson,
Major J. Spens, Capt. C. N. Simpson.

STAFF COLLEGE, SANDHURST.

Commandant, Maj.-Gen. Edward Henry Clive.
Military History, Col. J. F. Maurice, R.A.
Fortification, &c., Major Emilins Clayton, R.A.
Drawing & Surveying, Lt.-Col. W. Everett, C.M.G.
Staff Duties & Law, Lt.-Col. J. S. Rothwell, R.A.
French, Monsieur Lucien E. Henry, B.A.
German, Herr O. Jeep. *Russian*, H. Riola.
Applied Sciences, Edmund Atkinson, Ph.D., F.C.S.

OXFORD MILITARY COLLEGE, COWLEY.

Head Master, J. P. Kirkman, M.A.
Drill Director, Lieut.-Col. A. S. Macartney, R.A.
Second Master, P. R. Head, M.A.
Chaplain & Head of Junior Department, Rev. J.
P. Moffatt, B.A.
Assistant Masters, E. J. Brooksmith, B.A., Rev. R.
Powley, M.A., C. R. Kyrke, B.A., W. J. Forman,
B.A., C. Kemshead, LL.B., W. C. Davy, C. F.
Baronowski, B.ès L., W. J. Locke, B.A., J. H.
Chepman, B.A.
Mathematics, C. N. Adams, B.A., A. Gafforelli,
A. Tansley, and B. H. Price.
Secretary, Henry Naidley.

**ROYAL INDIAN ENGINEERING COLLEGE,
COOPER'S HILL, STAINES.**

President, Gen. Sir Alex. Taylor, K.C.B., R.E.
Prof. of Construction, Calcott Reilly, M.I.C.E.
Hydraulic Engineering, T. A. Hearson, R.N.
Assist. do., A. H. Heath, A.I.C.E.
Mathematics, Rev. J. Wolstenholme, D.Sc.
Applied Mathematics, G. M. Minchin, M.A.
Assist. Prof. of Mathematics, A. Lodge, M.A.
Prof. of Surveying, Colonel E. H. Courtney, R.E.
Instructor in do., Lieut. J. Stewart, R.E.
Lecturer in Accounts, J. C. Hurst.
Demonst. in Mech. Laborat. C. A. Carus-Wilson, B.A.
Prof. of Chemistry, Herbert M'Leod, F.R.S.
Demonstrator in do., F. E. Matthews, Ph.D.
Professor of Physics, W. N. Stocker, M.A.
Demonstrator in do., W. G. Gregory, M.A.
Professor of Geology, P. M. Duncan, M.B., F.R.S.
Professor of Forestry, W. Schlich, Ph.D.
Professor of Botany, H. Marshall Ward, M.A.

Drawing, Geometrical, T. H. Eagles, M.A.
Do., Freehand, Russell Dowson.
Instructor in French, F. W. Mariassy.
Instructor in German, T. H. Dittel.
Lecturer on Entomology, A. Shipley, M.A.
Secretary, J. G. Whiffin, R.N.; *Chaplain*, Rev. C.
Crossleigh, D.D.; *Bursar*, J. P. Pasco, R.N.
**CRYSTAL PALACE COMPANY'S SCHOOL OF PRACTICAL
ENGINEERING.**—*Principal*, I. W. Wilson,
M.I.C.E., M.I.M.E.; *Superintendent of Department*,
F. K. J. Shenton, F.R.HIST.S.

THAMES NAUTICAL TRAINING COLLEGE.—H.M.S.
"Worcester," off Greenwich. *Comm.*, Capt.
J. Henderson Smith, R.N.R.

MERCANTILE MARINE.—School Ship "Conway,"
Rock Ferry, Birkenhead. *Comm.* Lieut. Arch.
T. Miller, R.N. *Chief Officer*, Hy. Baynham, R.N.

AGRICULTURE.

ASPATRIA AGRIC. COLL., NEAR CARLISLE.
President, Sir Wilfrid Lawson, Bart., M.P.
Principal, Dr. Henry G. Webb, B.Sc.

CIRENCESTER ROYAL AGRICULT. COLL.
President, Duke of Richmond and Gordon, K.G.
Principal, Rev. John B. McClellan, M.A.
Agriculture, H. J. Little and W. McCracken.
Dairy Farming, James Long.
Estate Management & Forestry, T. J. Elliot, M.B.A.C.
Chemistry, E. Kinch, F.C.S., F.I.C.
Geology, Botany, & Nat. Hist., Allen Parker, F.L.S.
Mathematics and Physics, H. Ohm, M.A.
Land Surc. & Prac. Engineering, G. Paton, C.E.
Veterinary Science, &c., N. Almond, F.R.C.V.S.
Building, F. W. Waller, F.R.I.B.A.

COLLEGE OF AGRICULTURE, DOWNTON.

President, John Wrightson, F.C.S.
Agriculture, John Wrightson, F.C.S.
Dairy Farming, W. J. Malden, J. P. Sheldon.
Chemistry, J. M. H. Munro, D.Sc. Lond.
Natural History, W. Fream, B.Sc.
Veterinary Medicine, W. A. Edgar, F.R.C.V.S.
Estate Management and Surveying, C. E. Curtis.
Building Construction, J. Harris.

TAMWORTH AGRICULTURAL COLLEGE.

Principal, F. S. Cook, M.B.A.S.

EDINBURGH—MINTO HOUSE.

President, R. Wallace, F.C.S., Prof. Agriculture.
Agricultural Chemistry, J. Falconer King, F.C.S.
Agricultural Botany, A. N. McAlpine, B.Sc.
Veterinary Science, Wm. Williams, F.R.C.V.S.
Farm Accounts & Bookkeeping, A. T. Niven, C.A.

EDUCATION.

COLLEGE OF PRECEPTORS, Bloomsbury Sq., W.C.
President, Rev. Thomas Wm. Jex-Blake, D.D.
Dean, H. Weston Eve, M.A.
Treasurer, Edward Pinches, B.A.
Secretary, C. R. Hodgson, B.A.

GILCHRIST EDUCATIONAL TRUST,
4, Sanctuary, Westminster.

Founded by the late Dr. Gilchrist (died 1841),
for the Benefit, Advancement, and Propagation
of Education and Learning in every part of the
World. The income is applied to the maintenance
of Scholarships; to the assistance of
approved Educational objects; and to the
delivery of Courses of Popular Science Lectures
in the towns of Great Britain.

Trustees, R. L. Holland, *Chairman*; Rt. Hon. Sir Lyon Playfair, M.P., Rt. Hon. Sir U. J. Kay-Shuttleworth, Bart., M.P., Hon. Alfred Lyttelton, and Prof. James Stuart, M.P.
Secretary, Henry A. Papps.

LEGAL.**INNS OF COURT.**

[Joint Board of Examiners appointed by the Four Inns of Court for conducting the Examination of Students previous to Admission at an Inn of Court.]

Middle Temple.—Peter Henry Edlin, q.c.; Edmd. Macrory; Chas. Grey Wotherspoon; and Edm. Russell Roberts.

Inner Temple.—Wm. Edw. Murray Tomlinson, M.P.; Robt. Gray C. Mowbray, M.P.; Arthur Beilby Pearson-Gee; and Robert Henville Simonds.

Lincoln's Inn.—Almaric Rumsey; Samuel Lee; Basil E. Lawrence.

Gray's Inn.—James Mulligan; Charles A. Russell; Stuart Maccaskie; and Chas. Montague Lush.

Secretary to the Board, Thomas Purdue, Oak of Honor, Forest Hill.

LINCOLN'S INN HALL.

Chairman, Rt. Hon. Spencer H. Walpole, q.c.
Vice-Chairman, Rt. Hon. Lord Justice Cotton.

Jurisprudence, &c., Professors, Frederic Harrison, and James Bryce, D.C.L., M.P.

Equity Professor, Henry Alexander Giffard, q.c.
Real and Personal Property Professor, T. C. Wright.

Common Law Professor, Frederick Pollock, LL.D.
Clerk of the Council, Thomas Corn.

INCORPORATED LAW SOCIETY,
Chancery Lane.

President, Henry Markby.
Vice-President, B. G. Lake.
Secretary, Edward Walter Williamson.
Assist. do., S. P. B. Bucknill.
Clerk to Committee, T. Lane.
Librarian, Frederic Boase.

MEDICAL.

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE.—The clinical practice of this hospital comprises a service of 675 beds, besides 75 beds for convalescent patients at Swanley in Kent. The resident appointments as well as the majority of the other appointments, as clinical clerks, dressers, &c., are chosen from the most diligent students, without fee; a few ward dresserships, however, may be obtained by payment. A college is attached, where students may reside. Entrance fee, for lectures and hospital practice, 125 guineas, perpetual.—*Warden of the College*, Dr. Norman Moore.

ST. THOMAS'S HOSPITAL.—In this hospital the prizes and scholarships are numerous. Perpetual fee, 125 gs.—*Medical Secretary*, G. Rendle, M.B. & C.S.

GUY'S HOSPITAL.—The various appointments and offices are filled by students, selected according to merit. Some of the scholarships are of the value of £130. Entrance fee, 125 guineas perpetual. *Dean*, Dr. F. Taylor.

ST. GEORGE'S HOSPITAL.—Perpetual pupils paying £125 on entrance, or three instalments of £45, £45, and £40, are entitled to admission to the medical and surgical practice, and to compete for all prizes and offices.

MIDDLESEX HOSPITAL.—Entrance fee, £90.
LONDON HOSPITAL MEDICAL COLLEGE.—Entrance fee, £105.

WESTMINSTER HOSPITAL.—Entrance fee, in one sum, £100; or by instalments, £105 to £115.

UNIVERSITY COLLEGE HOSPITAL.—Entrance fee, £126, or three annual payments of £57 15s., £52 10s., and £21.

CHARING CROSS HOSPITAL MEDICAL COLLEGE.—Entrance fee, £99 15s.; dental fee, £42 2s.

KING'S COLLEGE HOSPITAL.—Entrance fee, £100.

ST. MARY'S HOSPITAL.—Perpetual fee, £124 5s. or by instalments, £131 5s.—*Dean*, George P. Field.

All the above Hospitals have Schools of Medicine attached to them.

Application in every instance to be made to the medical secretary of the hospital. (See p. 283.)

SCHOOL OF MEDICINE FOR WOMEN, 30, Henrietta Street, Brunswick Square.—*Dean*, Mrs. Garrett Anderson, M.D.; *Hon. Sec.*, Mrs. Thorne.

PROVINCIAL MEDICAL SCHOOLS.

Birmingham, Queen's College.
Birmingham, General and Queen's Hospitals.
Bristol, Gen. Hospital and School of Medicine.
Cambridge, Addenbrooke's Hospital.
Durham University School at Newcastle.
Leeds School of Medicine.
Liverpool Royal Infirmary.
Liverpool Royal Southern Hospital.
Manchester Royal Infirmary and Owens College School of Medicine.
Northampton School of Medicine.
Norfolk and Norwich Hospital, Norwich.
Sheffield School of Medicine and Public Hospital.
North Staffordshire Infirmary, Hartshill.
Wolverhampton and Staff. General Hospital.

MUSIC.—ROYAL COLLEGE OF MUSIC,
Kensington Gore.

Principal, H.R.H. The Prince of Wales, K.G.
Director, Sir George Grove, D.C.L.
Hon. Sec., Charles Morley.
Registrar, George Watson.

GUILDHALL SCHOOL OF MUSIC (£16,246).

Principal, H. Weist Hill..... £800
Secretary, C. P. Smith..... 300
Professors, 88 in number..... 14,832

TECHNICAL.**FINSBURY TECHNICAL COLLEGE.**

Leonard Street, Finsbury, E.C.
(founded by City and Guilds of London Institute for Technical Education).

Principal, Silvanus Thompson, D.Sc.
Applied Mathematics and Mechanical Engineering, Prof. J. Perry, F.R.S.; R. G. Blaine, M.E.

B.A. (*Mathematics*); R. Tanner, M.A.
Bursar, J. Tyson, B.A.

St. PAUL'S, King's Road, Hammersmith.

High Master, Frederick W. Walker, M.A.
Sur-Master, Rev. Joseph H. Lupton, M.A.
Third Master, Rev. James W. Shepard, M.A.
Fourth Master, Rev. R. Barlow Gardiner, M.A.
Assistant Classical Masters, F. Carter, B.A.; R. F.
Cholmeley, B.A.; A. M. Cook, M.A.; C. Cookson,
B.A.; C. J. Cornish, B.A.; G. S. Farnell, M.A.;
Rev. H. D. Elam, M.A.; E. C. Marchant, B.A.;
T. R. E. Holmes, B.A.; D. la Motte, B.A.; J. E.
Melhuish, M.A.; W. E. Pantin, B.A.; J. H.
Peile, B.A.; R. C. Seaton, M.A.
Mathematical, C. Pendlebury, M.A.; F. S.
Macaulay, B.A.; R. W. Batho, M.A.; G. H.
Ward, B.A. *Science*, F. W. Watkin, M.A. *French*
Master, D. Devaux, B.ès L.; A. Symond, B.ès L.
Art Master, R. Harris. *Bursar*, S. Bewsher.

CHARTERHOUSE SCHOOL, Godalming.

Head Master, Rev. William Haig Brown, LL.D.
Assistants, A. G. Becker (*Music*); A. R. Biard,
B.A.; J. E. Bode, M.A.; Rev. G. S. Davies,
M.A.; Rev. H. J. Evans, M.A.; F. K. W.
Girdlestone, M.A.; E. Haenni; L. Huxley,
B.A.; J. E. Judson, B.A.; S. W. Lock, M.A.;
F. Dames Longworth, B.A.; J. W. Marshall,
M.A.; I. Marshall, M.A.; J. H. Merryweather,
M.A.; W. Moss, M.A.; J. Noon, M.A.; T. E.
Page, M.A.; C. H. Parry, M.A.; G. Pettilleau,
B.A.; W. H. W. Poole, M.A.; Rev. F. S. Rams-
botham, M.A.; S. Robertson (*Drawing*); G.
H. Robinson (*Music*); Rev. W. F. J. Romanis,

M.A.; J. W. Sharpe, M.A.; L. M. Stewart
(*Writing and Arith.*); Rev. J. A. Tait, B.A.;
Rev. S. D. Titmas, B.A.; A. H. Tod, M.A.;
G. Voigt; Rev. T. G. Vyvyan, M.A.; Rev. C.
H. Weekes, M.A.

CHRIST'S HOSPITAL, Newgate Street, E.C.

Head Master, Rev. Richard Lee, M.A.
Assistant to Head Master, F. H. Merk, B.A.
Assistant Grammar Masters, Rev. E. B. Penny,
M.A.; Rev. J. F. Cornish, M.A.; John Wing-
field, M.A.; Malcolm Laing, B.A.; Rev. W. H.
Branfoot, M.A.; Rev. A. E. Woodward, M.A.;
Rev. F. D. Heywood, M.A.; C. C. Henn, B.A.;
J. Morton, B.A.
Head Mathematical Master, James Barnard, M.A.;
Rev. R. A. Meaden, M.A.; C. N. Murton, M.A.;
R. W. Hogg, M.A.; *Head French*, Rev. Dr. E.
Brette.
Upper Masters, Commercial Department.—Francis
Sykes. *Drawing*, H. W. Mason. *German*, Dr.
Wehe. *Music*, Arthur Fox.
Chief Clerk, M. S. S. Dipnall.
Warden, Colonel Hay.
Resident Medical Officer, Dr. Alder Smith.
HERTFORD.—*Head Master*, Rev. J. T. Bell, M.A.
Girls' Mistress, Miss A. E. King.

DULWICH COLLEGE, S.E.

Head Master, A. H. Gilkes, M.A.
Classical, Rev. G. Voigt, M.A.; E. M. Everett,
M.A.; Rev. F. W. Hawes, M.A.; T. M. Roberts,
M.A.; Rev. E. H. S. Scott, M.A.; G. B.
Doughty, M.A.; F. W. Mellor, R. E. Montagne,
B.A.; Rev. G. C. Allen, M.A.; Rev. F. G.
Knott, M.A.; J. R. Coq, B.A.; C. Bryans,
M.A.; W. T. Lendrum, B.A.
Modern, A. H. Gosset, M.A.; G. Baylis, B.A.;
Rev. E. G. Ashwin, M.A.; G. B. Stretton, M.A.;
Mathematics, J. B. Parish, M.A.; J. Robinson,
M.A.; F. G. Treadgold, M.A.
Modern Languages, J. Boielle, B.ès L.; H. Crump.
Science, F. W. Sanderson, M.A.; H. B. Baker, M.A.;
J. Gibbons, M.A.; C. H. Wells, WH.Sc.
Music, E. D. Rendall, M.A.
Drawing, H. J. Dennis, L. C. Nightingale.

MERCHANT TAYLORS' Charterhouse Square, E.C.

Head Master, Rev. Wm. Baker, D.D.
Chief Math. Master, Rev. S. T. H. Saunders, M.A.
Chief Master of Modern Subjects, F. Storr, B.A.
Assistant Masters, F. G. Bampfylde, M.A.; C. H.
Gibson, M.A.; Rev. C. E. Prior, M.A.; A. Rey-
nolds, M.A.; R. Hargreaves, M.A.; Rev. R. F.
Hosken, M.A.; F. J. Vialls; Rev. G. Gates,

Bue, B.ès L.; Rev. W. Haines, M.A.; Rev. J. I.
Ball, M.A.; Rev. E. J. Perry, M.A.; G. H.
Wells, M.A.; Rev. H. W. Dennis, M.A.; Rev.
H. Morris, M.A.; W. Brown, B.Sc.; M. Goldstein.
Secretary, C. Waters, M.A.

UNIVERSITY COLLEGE SCHOOL, Gower Street.

Head Master, H. Weston Eve, M.A.
Classics & English, G. J. Hawkes, M.A.; S. Walker,
J. Cameron, Rev. J. R. Walters, B.A.; C. R.
Potter, M.A.; C. R. Cockman, B.A.; R. S. Car-
penter, M.A.; J. S. Masterman, M.A.; F. W.
Levander, C. Simmons, M.A.
Math. and Arith., R. Tucker, M.A.; R. P. Wright;
C. F. King, B.A.; W. Paice, M.A.; G. Thompson,
M.A.; W. W. Magee, R. Savory, Rev. H. T. J.
Coggin, M.A.; W. H. Widgery, M.A.
Physics and Chemistry, J. J. Walker, M.A.; T.
Orme, F.C.S.

French and German, R. Tapson, V. Cerexhe, L. Goldschild, A. Dardelle, F. de Baudiss, G. A. Schrumph, B.ès L.
English, W. Stainton Moses, M.A.; W. H. Griffin, B.A.
Spanish, Don V. Carrias. *Italian*, Prof. Farinelli.
Drawing, F. G. Stephens, R. S. James, L. Walter, T. Ballard, H. H. Canty, H. Collins, T. E. Harrison, F. L. Pither, H. B. Walters.
Singing, F. E. W. Hulton, MUS.B.
Shorthand, Rev. J. L. Meares, M.A.
Fencing and Gymnastics, R. Castellotte.
School Registrar, A. Davis.

KING'S COLLEGE SCHOOL, Strand, W.C.

Head Master, Rev. T. H. Stokoe, D.D.
Vice-Master, Rev. John Twentyman, M.A.
Masters, Rev. B. Jackson, M.A.; Rev. C. W. Kett, M.A.; W. G. F. Larcher, B.A.; C. D. Webb, B.A.; Reginald Geare, B.A.; W. F. R. Ellis, M.A.; F. B. Speed, B.A.; Rev. W. B. Robinson, M.A.; W. H. Taylor, W. A. Burgess, B.A.; G. Wotherspoon, M.A.; Rev. W. J. Clarke, M.A.; Rev. H. Biddell, M.A.
Mathematical Masters, E. Brooksmith, M.A.; W. H. Madden, M.A.
English Literature, Professor J. W. Hales, M.A.
Commercial Master, A. Hall. *Writing*, T. Green.
French, M. Dupuis, B.A.; M. Gaborit, B.A.;
German, G. A. Reinicke, J. Niederberger.
Geometrical Freehand and Model Drawing, F. J. Jones. *Phys. Geog. and Geology*, C. Macted.
Science, H. Tomlinson, B.A. *Chemistry*, J. M. Thomson, F.R.S. *Gymnastics*, R. Castellotte.
Chaplain, Rev. Blomfield Jackson, M.A.

CITY OF LONDON SCHOOL, Victoria Embankmt.

Head Master, Rev. Edwin A. Abbott, D.D.
Second Master, Francis Cuthbertson, LL.D.
Assistant Masters, Rev. J. Harris, M.A.; W. G. Rushbrooke, LL.M.; T. H. Haddon, M.A.; J. T. Ablett, Thomas Todd, G. E. Dodson, Rev. T. W. Chambers, M.A.; Jas. Pirie, M.A.; R. F. Charles, M.A.; Rev. W. Wooding, B.A.; Fredk. W. Payne, B.A.; Rev. Thos. Mitcheson, B.A.; Rev. E. T. Davies, M.A.; Archibald Grant Munro, B.A.; Rev. H. L. Harding, B.A.; A. H. Watt, M.A.; Thos. H. Bertenshaw, B.A.; Thos. Read, B.A.; J. F. Charles, B.A., and 18 others.
Secretary, George R. Renwick.

BEDFORD GRAMMAR SCHOOL,

Head Master, J. Surtees Phillpotts, M.A., B.C.L.
Assistant Masters: *Classical*, H. M. Dymock, M.A.; Rev. S. Buller Phillpotts, M.A.; F. S. Arnold, M.A.; W. H. Kelaart, B.A.; S. L. Rogers, M.A.; T. P. Gordon Robinson, M.A.; Rev. F. W. Mozley, M.A.; E. H. Dasent, B.A.; J. A. B. Collins, M.A.; C. Gore Chambers, M.A.; J. E. Morris, M.A.; E. Newall, M.A.; Horace Barnes, B.A.; W. H. D. Rouse, B.A.; H. S. Morris.
Modern Languages, H. Steinmetz, PH.D.; G. Glunicke, B.A.; Rev. H. L. Pocock, M.A.; A. F. Laloë, B.ès L.; A. Charlin.
Superintendent Civil and Military Department, W. Seys Phillips, M.A.
Mathematical, W. C. Fletcher, B.A.; Edward Buck, M.A.; J. Fitzgerald Lee, B.A.; D. S. G. McDonald, B.A.; Rev. Walter C. Massey, B.A.; N. P. Symonds, B.A.
Arithmetic, J. H. Hall, B.A.
Chemistry, A. Talbot.
PREPARATORY DEPARTMENT, C. T. Sutton, B.A.; W. Sanders, P. Watts, V. Baseley.

Writing, H. Aldred, P. Watts.
Drawing, F. Hawkins Piercy.
Music, P. H. Diemer, B.A.M.
Gymnastics & Drill, J. H. Campbell, J. Collins.

CHELTENHAM COLLEGE.

Principal, Rev. Herbert Kynaston, D.D.
Head Master of Military and Civil Department, E. A. A. Spencer, M.A.
Junior Depart., Rev. C. E. Lefroy Austin, M.A.

Classical Department.

First Assistant Master, Rev. James A. Owen, M.A.
Masters, C. W. Bell, M.A.; Francis J. Cade, M.A.; J. M. Dyer, M.A.; A. J. Luckham, M.A.; Rev. J. Mugliston, M.A.; G. G. Pruce, M.A.; T. W. Gould, M.A.; J. C. Salter, M.A.; Charles Tillard, M.A.

Mathematics and Chemistry, A. S. Davis, M.A.
Mathematics & Natural Science, W. Larden, M.A.
French, M. E. Clare.
German, Franz Droege, PH.D.

Junior Department.

Second Master, Rev. T. Wolsey Lewis, M.A.
Masters, Rev. W. D. Challice, M.A.; W. Griffin, M.A.; W. B. Haworth, B.A.

Military and Civil Department.

Vice-Master, J. Brook Smith, M.A.
Masters, Rev. J. H. Churchill Baxter, M.A.; E. A. Bennett, M.A.; Theodore Falle, M.A.; C. Newton, M.A.; W. B. Porcher, M.A.; Rev. Percy Hattersley Smith, M.A.; E. Prowde Smith, M.A.; R. I. Porter, B.A.; A. C. Sanders, B.A.
German, P. Dusar, Herbert G. Spearing, M.A.
French, M. P. Desages, W. Dewar, M.A.
Science, J. Taylor, B.A.
Drawing, S. Nesbitt.
Plan-drawing, J. A. Porterfield.
Gymnastics, Capt. Hodgson, late 44th Regiment.

CLIFTON COLLEGE, Clifton, Bristol.

Head Master, Rev. J. M. Wilson, M.A.
Assistant Masters, *Classical Side*, H. G. Dakyns, M.A.; Rev. H. J. Wiseman, M.A.; F. M. Bartholomew, M.A.; W. O. Moberly, M.A.; E. N. P. Moor, M.A.; S. T. Irwin, M.A.; W. W. Asquith, M.A.; E. H. C. Smith, M.A.; C. Vaughan, M.A.; G. C. Harrison, M.A.
Engineering Side, H. S. Hall, M.A.; F. H. Stevens, M.A., F.R.A.S.; C. H. Spence, M.A.
Modern Side, Rev. T. E. Brown, M.A.; J. G. Grenfell, B.A., F.G.S.; C. W. A. Tait, M.A.; T. D. Davies, M.A.; H. B. Jupp, M.A.
Mathematics, Science, &c., Rev. H. C. Watson, M.A., F.R.A.S.; E. Miller, B.A.; G. H. Wollaston, M.A., F.G.S.; W. A. Shenstone, F.I.C., F.C.S.; J. E. Pearson, M.A.; T. Hands, M.A., F.R.A.S.; D. Rintoul, B.A.
French & German, &c., R. T. Carter, M.A.; E. Pellissier, M.A.; C. M. C. Bevenot; B. B. Heymann; E. J. Barff, B.A.
Drawing, E. C. Plant, and two others.
Music, W. F. Trimmell, and six others.
JUNIOR SCHOOL, Rev. B. Hartnell, M.A.; W. H. S. Laxton, M.A.; R. J. Mackenzie, M.A.; H. C. Tillard, B.A.; C. P. Wilson, B.A.; J. G. Bradshaw, B.A.; H. P. Luckman.
PREPARATORY SCHOOL, A. T. Martin, M.A.; H. R. Harper, M.A.; Rev. R. Marks, B.A.
Medical Officer, Dr. Fyfe.

ETON COLLEGE.

Provost, Rev. Jas. J. Hornby, D.D.
Vice-Provost, Rev. J. Wilder, M.A.; *Conductors*,
 Rev. C. C. Scholefield, Rev. F. Guy.
Head Master, Rev. Edmond Warre, D.D.
Lower Master, Edward Compton Austen Leigh.
Assistant Masters, *Upper School*, F. W. Cornish,
 M.A.; A. C. Ainger, M.A.; Rev. Ed. Hale, M.A.;
 Ed. P. Rouse, M.A.; Rev. T. Dalton, M.A.; H.
 W. Mozley, M.A. (*Math.*); A. C. James, M.A.;
 H. E. Luxmoore, M.A.; F. Tarver, M.A.
 (*French*); G. E. Marindin, M.A.; R. A. H.
 Mitchell, M.A.; J. P. Carter, M.A.; Arthur
 Cockshott, M.A.; H. S. Madan, M.A. (*Science*);
 W. Durnford, M.A.; Rev. H. Daman, M.A.; C.
 H. Everard, M.A.; J. Cole, M.A.; Rev. J. H.
 Merriott, M.A.; F. H. Rawlins, M.A.; Rev. R.
 C. Radcliffe, M.A. (*Math.*); F. Drew, F.G.S.
 (*Science*); H. G. Wintle, M.A.; Hy. Broadbent,
 M.A.; E. L. Vaughan, B.A.; J. D. Bourchier,
 B.A.; P. H. Carpenter, D.Sc. (*Science*); Rev. S.
 A. Donaldson, M.A.; P. Williams, M.A. (*Math.*);
 Rev. S. R. James; Hon. and Rev. E. Lyttelton;
 C. Lowry, B.A.; E. Impey, B.A.; C. All-
 cock, M.A.; W. R. Inge, M.A.; A. C. Benson,
 B.A.; A. A. Somerville, B.A. (*French*); J. H.
 M. Hare, M.A.; Rev. T. C. Porter, M.A. (*Math.*);

- CHURCH ASSOCIATION,** 14, Buckingham Street.—*Organising Sec.*, R. Stewart Clough. *Sec.*, Henry Miller.

* This list is not by any means complete, but it contains all the most important, and as many of the minor institutions as the space at the Editor's disposal permitted. Fellows and Members of Societies incorporated by Royal Charter are entitled to add certain letters after their names, but there is no law on the subject; members of any Society or Association, or even private individuals, are permitted to adopt any letters they please. A cat's-meat man at one of the Universities printed a card with the letters P.F.D.A. (Purveyor of Food for Domestic Animals). This conduct, however, was less reprehensible than that of many persons of higher social position who append the initials of purchased bogus degrees.

- CHURCH DEFENCE INSTITUTION**, 9, Bridge St., Westminster.—*Secs.*, Rev. H. G. Dickson, and G. H. F. Nye.
- CHURCH EMIGRATION SOCIETY**, 9, Victoria Chambers, Westminster.—*Treasurer*, Thomas Salt, M.P. *Hon. Sec.*, Rev. E. M. Tomlinson. *Sec.*, Major C. A. Cooper.

TRAINING SHIP:—

The *Ermouth*, off Grays, Essex. *Capt.-Superin.*, W. S. Bouchier, M.N.; *Steward & Storekeeper*, A. Thompson; *Master of Tender*, J. Hall.

Metropolitan Hospitals.

THE following tabular statement shows the status of the Metropolitan Hospitals, arranged alphabetically as they stand on the books of the Hospital Sunday Fund. With the exception of the three endowed hospitals, the management is usually vested in the Governors, who meet once a quarter, but the executive are a House Committee, elected annually, and meeting every week. As a rule, in the larger hospitals an annual subscription of three guineas or a donation of thirty constitutes a Governor; in the smaller hospitals the qualification is about a third of these sums. A Governor may attend and vote at the quarterly courts, and has a limited number of tickets for out-patients, but, generally, the admission into the wards rests with the out-

patient staff, subject, of course, to the accommodation available.

It will be noted that the total available number of beds is rarely utilized; but this is no proof that the wards are not often practically full, because, apart from the division into male, female, and children's wards, there are generally special wards, e.g., for ophthalmic, erysipelas, obstetric, or isolation cases, which are not interchangeable for general cases; besides, a margin must be kept for any sudden influx of accidents.

In the last column the assured income alone is shown with the Hospital Sunday allotment; the difference between this and the previous column shows how far each hospital is dependent upon voluntary public support.

The Bank of England was the first Joint-Stock Bank established in England, and having exclusive privileges in the Metropolis, granted by Royal Charter, it continued the only Joint-Stock Bank in London until 1834. At this date the London and Westminster Bank was founded, and proceeded so successfully that it was quickly followed by the formation of the London Joint Stock, the Union Joint Stock, London and County, &c. At the present time the total capital paid up and reserves of the various Joint Stock Banks amount to more than £150,000,000.

* The Banks with Limited Liability have their names printed in heavier type.

The Chartered Banks are also Limited.

NOTE.—The preceding list gives the name of at least one bank or banker in almost every place with which English people have business relations. A complete list of Bankers with their names in full and of their branches all over the world would require a volume.

Metropolitan Fire Brigade.

THE head-quarters of the Metropolitan Fire Brigade are in Southwark Bridge Road, S.E., and its chief officer, Captain Eyre M. Shaw, presents each year to the Metropolitan Board of Works a report on the London fires, their numbers, their causes, and the accidents and losses of life attending them. The total staff of the brigade on January 1, 1887, numbered 671, including, among others, 63 engineers, 507 firemen, and 16 licensed workmen for the engines, tug-boats, &c., on the river.

So quickly do events move, and so rapidly do we make history nowadays, that it seems almost incredible that it is not yet twenty-two years since the Metropolitan Fire Brigade Act, imposing upon the Board of Works the duty of extinguishing fires and guarding life and property in the metropolis, came into operation. Before that time, under an Act passed in 1774, the churchwardens and overseers of each parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organized and worked a fire-engine establishment of their own. In 1865, however, the importance of the question of fires was pressed upon public attention with so much success that the Home Secretary (on behalf of the Government), the Fire Insurance Companies, and the Board, entered into negotiations on the subject, the result being that the Act was passed under which the Board of Works, taking the already existing forces as a nucleus, commenced operations on January 1, 1866. For eighteen months the work of extinguishing fires alone was thus carried on; at the end of that time the Board, being prepared to undertake the additional duty of saving life from fire, took over and became the owners of all the life-saving machinery belonging to the Royal Society for Protection of Life from Fire.

The total expenditure on account of the brigade for the year ended Dec. 31, 1886, was £115,361. Of this amount the Treasury contributed £10,000, and the various insurance companies rather more than £26,000, while the rate

precepts furnished above £77,000. The comparative smallness of the brigade, and the enormous area over which its operations extend, has seriously raised the question of its adequacy for the work to be done, and during 1886 the Board renewed its application to the Legislature for power to raise larger sums of money, asking (1) that it might raise for the purposes of the brigade an amount equal to a rate of one penny in the £ on the net (or ratable) annual value of property, instead of a rate equal to a halfpenny in the £ on the gross annual value, and (2) that the fire insurance companies should for the future contribute £40 (instead of £35 as fixed by the Act of 1865) per million of the gross amount insured on property in the metropolis. The Bill, however, did not reach a second reading.

During 1886 there were 2,149 fires in the metropolis, 151 of which were classed as "serious," and 1,998 as "slight." At 136 fires life was seriously endangered, and at 41 of them lives were lost. The total number of lives actually lost in these cases was 49; of these unfortunate people 20 were either suffocated or burned to death, and 29 were taken out alive but died afterwards from the injuries received. Forty-six fires occurred at boot and shoe makers, 26 at builders, 26 at coffee-houses, 27 at confectioners and pastry-cooks, 37 at drapers, 49 at grocers, 297 in lodgings, 44 at oil and colour-shops, 26 at printers, 33 at tailors and clothiers, 26 at tobacconists, 32 in unoccupied houses, 51 at victuallers, and no fewer than 535 in private houses. The curious in such matters may like to know that fires are of far more frequent occurrence in December than in any other month of the year. A summary of the principal matériel, &c., may fittingly close this brief account of the Metropolitan Fire Brigade. At the present time the list includes 55 fire-engine stations, 26 street stations, 127 fire-escape stations, and 4 river stations; 146 fire-escapes, 45 land steam fire-engines, 77 6-inch manual fire-engines, 37 smaller manual fire-engines, and 28 miles of hose, besides steam fire-floats, steam-tugs, barges, steam fire-engines on barges, hose-carts, vans, waggons, &c.

The Bankers' Clearing House.

The BANKERS' CLEARING HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. Instead of presenting their cheques at each Banking House, and receiving cash and notes in payment, Clearing Bankers settle the whole amount delivered during the day at this establishment by receiving or paying the difference in their amount by a single cheque on the Bank of England. As every Bank in London and the Country is represented by Clearing Bankers, who, as agents, send through the Clearing House all drafts payable in the City and in the Country, the amount passing through this channel is enormous. The total for the year ending December 31st, 1886, was £5,901,925,000, an increase of £390,854,000 over the year 1885. On Stock Exchange days the payments were £1,198,557,000, an increase upon 1885 of £263,497,000; and on the 4ths of the months the payments amounted to £215,519,000, a decrease of £6,354,000 as compared with 1885. The largest total for any one of the last nineteen years was £6,070,948,000 in 1873, and the smallest, £3,425,185,000, in 1868. The establishment is managed by a Committee, of which Mr. R. C. L. Bevan is *Chairman*, Sir John Lubbock *Hon. Sec.*; the acting managers being Mr. George Derbyshire, *Chief Inspector*, and Mr. John C. Pocock, *Deputy Inspector*.

For the fluctuations in the rate in 1887, see pages 357 to 361.

THE following brief table gives an abstract of the Area, Population, Revenue, and Commerce of the British Empire throughout the World. Brief as it is, it deserves careful study. The material greatness of the Country is amazing—it exceeds that of any other Empire Ancient or Modern. But the moral greatness is still grander. The Empire is governed by settled Law, every man's property is protected; his person, like his property, cannot be touched except by legal process. Religion is free. And although susceptible of many improvements, the British Empire under its present Sovereign presents the nearest approach to a true Commonwealth that has yet been seen.

Name of Country.	Area in Sq. Miles.	Population.	Revenue.	Public Debt.	Imports and Exports.
Great Britain and Ireland	121,115	37,350,000	£ 90,000,000	£ 739,000,000	£ 618,500,000

The figures are approximate only.

The British Isles consist of Great Britain (England, Scotland, and Wales) and Ireland, and lie between the 49th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 121,115 square miles, with a population in 1881 of 34,884,848, which by the time of the next census in 1891 will probably increase to 40,000,000.

England, which may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the Rivers Tweed and Solway, and from Wales by the Severn and Dee, has an area of nearly 51,000 square miles, and an estimated population of 26,370,586. Wales has an area of 4,712,281 acres, and a population (1881) of 1,360,513. Except in the west and the north, England is for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, including iron, tin, lead, copper, and coal, which make abundant amends for the poverty of their surface. Wales is generally mountainous, and also possesses great mineral wealth.

Many learned men have taken pains to ascertain the various human races that have in succession occupied parts of the British Islands. The most approved conclusions seem to be, that the southern and eastern parts of England have a population mainly derived from Belgic Gaul, whilst the western districts and Wales have been peopled from the West of France and the North of Spain. Ireland and Scotland are believed to have been peopled by a race originally Belgic, but which country received its population from the other is a point that has been acrimoniously discussed, and probably admits of no positive solution. This alone is certain, that when the Romans first came to our shores the inhabitants might have been roughly divided into two sections: those who lived inland, and who may with some reason be

called Celtic colonists, were a race of hunters and shepherds, dressed in the skins of beasts and inhabiting huts made of rude wicker-work and covered with rushes; whereas the coast-dwellers were, probably, of Gallic origin, with some approach towards civilization, and holding intercourse, for purposes of trade, with foreign merchants visiting the island. These conclusions, however, only apply to very early times, and we know from history how very mixed the populations of our islands have now become. Neglecting the Romans, who were no more than mere military garrisons, and mingled little with the natives—much like Europeans in the East at the present day—we have the Saxons and Jutes established from Kent to Devonshire, and the Angles (and subsequently the Norsemen) from the Thames to the Tweed. The Norman Conquest brought in a mixed multitude from the Continent; the wars of Stephen introduced a numerous body of Flemings, who were by Henry II. settled in Wales; and the commercial views of Edward III. led to the establishment of a still larger body of the same people as cloth-workers in Kent. Political and religious dissensions have had a great share in bringing in new races, for Dutch, French, and other refugees and their descendants exist among us in such numbers as perceptibly to modify the national character. Germany is still sending an annual contingent of industrial citizens. France, Italy, Poland, Greece, and other countries also contribute, but, unlike the Germans, they can hardly be considered as permanent settlers. Defoe, alluding to our mixed origin in his "True-born Englishman," says ironically:—

"With easy pains you may distinguish
Your Roman-Saxon-Danish-Norman English."
The western part of England was known to the Phœnicians, and was resorted to by them for its tin, four centuries or more B.C.; hence the whole

country received the name of the Cassiterides, or Tin Islands. When invaded by Cæsar (B.C. 55) it was called Britain (perhaps derived from Prydain, the name of an early chief of great power), or sometimes Albion, that is, the *White Land*, from the white cliffs on many parts of the coast. The Romans subdued all England, and parts of Scotland and Wales, but did not reach Ireland, though its existence was known to them. In the third century of the Christian era, when the power of Rome was on the decline, small bodies of adventurers from the opposite coasts settled in various parts, and made such devastations that an officer called "the Count of the Saxon Shore" was appointed to withstand them. This proved impracticable. The immigrants daily increased in number, the Britons themselves revolted, and at last, about A.D. 410, the Romans abandoned the island after a rule of about 400 years, traces of which still remain in every quarter. These may best be observed in the names of many of our most ancient towns, in the great roads that reach from end to end of the country, and in the remains of Roman buildings and architecture from time to time unearthed in different places. For example, every town whose name consists wholly or in part of *caester*, *cauter*, or *chester* (derived from Latin *castra*, a camp) marks the site of one of those wonderful entrenched camps for which the Roman armies were famous. Thus, we have Lancaster, Chester, Manchester, Cirencester, Gloucester, Tadcaster, Worcester, Doncaster, Porchester, Dorchester. Then the military roads, straight, broad, and splendidly made, are still to be traced. There were four of these, viz., Watling Street, running from the coast of Kent by way of London, to Carnarvon; the Foss—or Fosdyke—from Cornwall to Lincoln; Ikenild Street, from Tyne-mouth, through York and Derby, to St. Davids; and Irmin Street, from the last-named spot to Southampton. The remains of Roman buildings are too numerous to be specified, but it may be worth while to note that in many parts, in London for instance, examples have been found of the beautiful tessellated pavements and luxurious baths of the Romans; while at Brading, in the Isle of Wight, an excellent specimen of a Roman villa has been brought to light. The Britons being divided into as many hostile States as they had cities, were unable to resist the fresh hordes (now called Saxons and Angles) that poured into the island, and about A.D. 457 the kingdom of Kent was founded. The Britons still fought stubbornly, but were gradually driven westward, and by the year 584 the kingdom of Mercia (meaning the march-land, or frontier State) was established, being the last of the seven kingdoms founded by the invaders—whence the whole is usually styled the Heptarchy. The kings of the Heptarchy made war on each other, but at last, in 827, Egbert of Wessex obtained the supremacy of the whole, and styled himself King of England. His descendants, of whom Alfred the Great was the most illustrious, held the throne for more than 200 years, but the country suffered greatly during the time from the ravages of the Danes, who, under Canute and his sons, became its rulers for 25 years (1017-1042). The Saxon line was restored in the person of Edward the Confessor, to whom Harold succeeded; but his death in the Battle of Hastings, on the 14th October, 1066, gave England into the hands of the Norman

kings, who reigned from 1066 to 1154. Then came the Plantagenets (1154-1485), the Tudors (1485-1603), and the Stuarts (1603-1714), to whom the House of Brunswick succeeded on the death of Queen Anne. Her present Majesty is the sixth sovereign of that line.

The conquest of Ireland was begun in the year 1170, but can hardly be regarded as completed until the surrender of Limerick in 1691. Wales was conquered by Edward I. in 1282, and formally annexed to England by Henry VIII. in 1536. Scotland successfully resisted the efforts of Edward I. to subjugate it, maintained for ages a close alliance with France, and in 1603 gave a ruler to England in the person of James VI., who became James I. of Great Britain, a title then first assumed. This was but a personal union, but the union of the kingdoms was effected under Queen Anne in 1707. Ireland, which had been hitherto only styled a lordship, was declared a kingdom in 1542; and this kingdom was united to that of Great Britain by the Act of Union, on Jan. 1st, 1801, the empty title of "King of France," which the English kings had borne since the time of Edward III., being then wisely abandoned.

The form of government is a limited monarchy, consisting of the Sovereign and the Houses of Lords and Commons, without whose joint approval no legislative measure is complete, though a large discretion is left to the Executive. For the proper exercise of this discretion the Ministers of the Crown are responsible, as it is a legal maxim that "the Sovereign can do no wrong." For administrative purposes England is divided into 40 counties, Wales into 12, Scotland 33, and Ireland 32. To each of those counties there are, with some few exceptions, a lord-lieutenant and a sheriff, and a number of justices of the peace, besides stipendiary magistrates in London and other large cities. The religious organization of the country, its universities, its government, departments, judges, &c., will be found described under their respective heads.

The Colonial Possessions of Great Britain will be found described in subsequent pages. Here it will be sufficient to remark that Newfoundland was the earliest English colony founded, and Virginia the second. The secession of the United States of America caused a great diminution of the extent of these possessions, but the loss has since been more than made up by the acquisition of Guiana, Cape Colony, Malta, and vast possessions in India, the West Indies, the formation of settlements in Australia, New Zealand, &c., which now number more inhabitants than the thirteen united colonies contained when they shook off their dependence on the mother country.

It may be well, however, to note here that the possessions of Great Britain have been obtained in four distinct ways. Some were *conquered* and seized in war, as Gibraltar and the Cape of Good Hope; some were *ceded* by treaty, as Newfoundland; others were *purchased*, while yet others, as New Zealand and the various Australian Colonies, are real *settlements*.

The Army of the British Empire (including the reserves, and exclusive of the forces in India) was on Feb. 1, 1887, estimated at 607,831.

The Navy at the end of 1886 was 57,041 men, boys, and marines; or, including coast-guard, reserves, and volunteers, a total of 83,733, with 260 ships in commission.

THE entire Population of England and Wales is here given for 1881 (25,974,439), with the gross estimated rental as settled by the Assessment Committees in the Valuation Lists, the amount collected for the Poor Rate for the year ending Lady-Day, 1886, and the number of paupers who were actually in receipt of relief on Jan. 1st, 1887. The total number of persons in England receiving relief on the 1st of January, 1887, was 767,933, as against 759,360 on the 1st of January, 1886, an increase of 8,573. The total cost was £8,296,230, as against £8,491,600 in 1885.

The sum raised by Poor Rates during the year ended Lady-Day, 1886, was £14,711,580; the receipts in aid, inclusive of Treasury subventions, amounted to £1,070,693, forming a total receipt of £15,782,273. £7,394,484 of this amount was expended for other purposes than the relief of the Poor: the payments towards the County, Borough, or Police Rate, for instance, amounted to £4,409,522; to Highway Boards, to £824,198, while the School Boards received £755,198. Other payments are made out of the Poor Rate. The actual relief to the poor for the year ended Lady-Day, 1886, amounted to 6s. 0½d. per head of the estimated population, while the sum levied as Poor Rate during the same period was equal to a rate of 10s. 8½d. per head.

POPULATION OF COUNTIES.—The county population is that of the census of 1881, but the pauper population is only approximate, being that of the unions which frequently overlap the counties. In 1853 the amount levied for poor rates was at the rate of 7s. 2d. per head; in 1886 the amount was 10s. 8½d.; while the sums expended in actual relief were about the same. In 1857 the officials employed received but £637,629; in 1886 this had increased to £1,332,017, the increased pauperage being not of the relieved, but of the relievers, who form an army of 20,636 persons, an increase of 101 in 1886.

INCREASE OF POPULATION.—The annual increase is at the rate of about 1·36 per cent. In 1885 the number of births registered in England and Wales was 894,270, and of deaths 522,750—an increase of 371,520. The number of persons married was 197,745, which was below the usual average. Of the marriages, 139,913, or 70·8 per cent., were celebrated according to the form of the Established Church. The number of bachelors married was 172,681, of spinsters 180,332, of widowers 25,064, and of widows 17,423. Of divorced persons who married, 92 were men and 78 women.

THE Principality of Wales, with an extreme length of 135 miles, and a breadth varying from 35 miles to 95 miles, lies in the S.W. of Great Britain, and has an area of 7,378 square miles, or nearly 4,720,000 acres. It is composed of an irregularly shaped peninsula, together with the Isle of Anglesey at its north-west extremity, and a few small islands off the south-west coast; and is bounded on the north and west by the Irish Sea, on the south by the Bristol Channel, and on the east by the English counties of Monmouth, Hereford, Shropshire, and Cheshire. The principal rivers are the Severn (240 miles); and the Dee, in the north; the Dovey and the Teify in the west; the Towy, the Taff, the Romney, and the upper courses of the Usk and the Wye in the south. Lakes are small, and few in number. The whole area, generally speaking, is rugged and mountainous, its highest points being Snowdon (3,571 feet), Cader Idris (2,960 feet), Brecknock Beacon (2,864 feet), and Plynlimmon (2,483 feet). The Principality is rich in minerals; copper, coal, and iron being among the more important; while, of its manufactures, flannel, cloth, and hosiery alone are worthy of mention. The native inhabitants are almost wholly of the Cymric stock of the Celtic race, and a large number of them belong to the religious body known as the Calvinistic Methodists.

The early history of the Principality is not easy to trace in detail and with any approach to certainty, so largely has it been subjected to the modifying influences of tradition and superstition. Before the time of the Roman conquest of Britain the country appears to have been chiefly inhabited by three British tribes, known as the Silures (South Wales), the Ordovices (North Wales), and the Dimetæ. The first and second of these held out against the conquering eagles of Rome for many years; but about A.D. 51, Cæsar Caradoc, the British leader's residence, was captured, and Caradoc himself soon after was basely betrayed to his enemies, by whom he was conveyed to Rome. During the reign of the emperor Diocletian, Wales formed one of the four provinces into which the whole country was divided, and was called *Britannia Secunda*.

At what time Christianity was introduced it is impossible to tell, but certainly not later than A.D. 400. When the British Christians were driven from their homes, such of them as did not seek refuge beyond the seas found in the rocky fastnesses of the Welsh mountains a secure retreat from their enemies. There they immediately set about dividing the country into ecclesiastical divisions for administrative purposes, and the present sees of Wales represent those leading centres of religious thought that became famous in the sixth century. It is probable that the first occupants of the sees of St. David's and Llandaff were respectively, *Dubbritius*—afterwards Archbishop of Caerleon—and *Dubritius*, though their identity (which seems likely) and the dates of their appointments are still matters of dispute. Daniel, the first recorded Bishop of Bangor, was elevated to the prelacy in A.D. 516, and Gilbert, of St. Asaph, in A.D. 1143; and we know that one Pater was Bishop of Llandaff in A.D. 950, and Bernard Bishop of St. David's in A.D. 1115. There is also fair ground for supposing, notwithstanding the absence of other details, that the see of Llandaff was founded A.D. 612, that of St. Asaph as early as A.D. 520, and that of St. David's A.D. 601. One momentous event

alone stands out in strong contrast to the dimness in which much of early Welsh history is wrapped, this is the resistance of the British bishops to the aggressive demands of Rome as made through St. Augustine. Various points of church doctrine had long been in dispute between the British Church and the mother Church of Rome, and soon after the year 600 a conference was arranged in order to settle the matters in question; but the Pope's representative assumed so arrogant and haughty a demeanour as to incur the resentment of the British bishops and the learned men of the monastery of Bangor. The result, as might be expected, was that no satisfactory decision was arrived at, each party maintaining its original position; though it must be added, to the credit of the bishops, that their missions thenceforward were much more successful than St. Augustine's in the furthering of Christianity in Britain. From that time it is true to say, generally speaking, that the Church in Wales has suffered from a good deal of supineness on the part of its great dignitaries. In recent years, however, much has been done to remedy the omission; keen activity has been displayed on all sides, and new benefices have been established in many parts that most needed them. The latest news from the Principality in things ecclesiastical is the announcement of Mr. Gladstone that the time is ripe for the disestablishment and disendowment of the Church in Wales, and there can be little doubt that the question will become an important one in the near future. The four bishoprics, however, still remain as of old, and the numbers of beneficed clergy now to be found in them are as follows:—St. David's, 403; Llandaff, 240; St. Asaph, 207; and Bangor, 138. The sees of St. David's and Llandaff were united with the Southern province in the year 1107, and those of Bangor and St. Asaph in the years 1092 and 1143 respectively. The populations of the Welsh dioceses, according to the census of 1881, were—Bangor, 226,040; Llandaff, 603,020; St. Asaph, 257,098; St. David's, 482,245.

Returning now to the more general history of the country, it was not until the Saxon pirates began to visit and ravage the eastern shores of Britain, that the Celtic inhabitants were gradually pressed westward by the invading hordes, and finally found secure shelter in the wilds of Wales, Devon, and Cornwall. Thenceforward the Principality had a distinct nationality of its own, and for more than eight centuries its history is a history of petty wars between its rival chiefs and kings. Cadwallan, one of its earliest and most famous heroes, being defeated by the Northumbrian monarch Edwin, was forced to take refuge in Ireland; whence he returned, and vanquished the Saxons in many encounters, though only to be eventually defeated and slain by Oswald, A.D. 635. More than a century later, Offa, the warlike king of Mercia, turned his arms against the Welsh, and, having settled the level land between the Wye and the Severn with Anglo-Saxons, constructed for their protection the dyke, or rampart, celebrated as Offa's Dyke, traces of which may still be seen. The borderlands, or marches between England and Wales, were mostly in a state of at least guerilla warfare; and it was not until about 850 A.D. that one Roderick (Rhodi Mawr), contrived to unite the whole country into one principality, dividing it afterwards among his sons into three

smaller ones, named, severally, Gwynedd, Dyved and Ceredigion, and Powys. This was followed by the incursions of the Danes, after which Howel, once more (in the 10th century) succeeded in re-uniting the country. Later, when England was tending in the same direction of unity, Athelstane received a tribute from the Welsh in recognition of his nominal sovereignty over them. This was rather an appearance of homage than real submission, and, considering the age and the people, is not easily understood; for the Welsh most stubbornly resisted the arrogant claims of William the Conqueror, and not only defied all his attempts to subdue them, but even assumed an attitude of aggression by allying themselves with the rebellious subjects of successive Norman monarchs. The line of action thus deliberately adopted became ultimately their ruin, for the attention of the kings of England was ever drawn towards the Principality, and the policy to be pursued towards it was almost constantly a matter of prime moment. William I., and his son Rufus, both tried the plan of granting fiefs to their more adventurous Norman knights, on condition of their conquering the land, while Henry I. introduced into the principality a colony of Flemish wool-workers. Henry II., too, and John, endeavoured, with doubtful success, to effect a final subjugation of the troublesome province; and it was destined to Henry III. to receive indisputable homage from two successive Welsh princes, Llewellyn the Great, and David. A combination of fortuitous circumstances led to the real and lasting conquest of Wales. Llewellyn, who succeeded David, had been implicated in the Montfort rebellion, but, on the accession of Edward I., managed to get included in the general amnesty granted to those who had joined the Leicester faction. In 1276, however, Edward, having been repeatedly refused the homage due to him from Llewellyn, raised an army to enforce his commands. Internal dissensions among the Welsh greatly aided the English, and Llewellyn, at length cooped up and almost starved to death amongst the Snowdon mountains, was forced to submit at discretion, and accept the terms offered by the victor (1277). By the grace of Edward the Welsh prince was allowed to return to the Principality; but trouble arising again, in which both Llewellyn and his brother David were concerned, a war arose, and the independence of Wales was forever shattered. Llewellyn was slain in battle in 1282, with two thousand of his followers; and in the following year David, being betrayed to

the English, was sent in chains to Shrewsbury, and at last put to a painful and ignominious death as a traitor. The Welsh nobility then submitted in a body, and King Edward invested his son Edward (who had been born at Carnarvon) with the Principality, which very soon afterwards was fully annexed to the crown. From that time forward the Principality has given a title to the eldest son of the English sovereign. In later days the history of Wales has been almost identical with the history of England, the Principality and the country marching side by side in sure and steady progress. In trade and commerce, the most remarkable points to be observed in the former are the wonderful development of its mineral resources (the copper and iron-works of Swansea being famous all over the world), the construction of Telford's suspension bridge (1825) and of the Britannia tubular bridge across the Menai Straits, the opening of Pembroke Dockyard, and, quite recently, the completion and opening of the magnificent docks at Cardiff. A single incident in purely Welsh history alone remains. In 1839, an association, calling themselves Rebeccaites, was formed in South Wales for the destruction of toll-houses and turnpike-gates. Urged on by their unusual successes, the rebels widened their aims, but thereby brought about their own overthrow and the capture of their leaders, which were effected by a troop of dragoons from Cardiff, in June, 1843.

In education, the Principality has made great strides of late years, and it not only possesses two university colleges of its own, viz., at Aberystwith and Bangor, but is even urging their claims to amalgamate and be incorporated as an independent university. Wales also possesses, in Cardiganshire, an educational institution enjoying peculiar privileges. This is St. David's College, Lampeter, which was founded by Bishop Burgess in 1822 and opened five years later; by Royal Charter it has power to confer the degrees of B.A. and B.D. only.

The following table of statistics contains some interesting information with reference to the various individual counties of Wales, but those who are curious in such matters will do well to remember, in examining them, that those natural causes which have kept the Welsh a distinct nationality, with a language and literature of their own, have also tended to check the growth of the population, but at the same time to make them healthy, frugal, and industrious:—

Total....	1,360,513	4,712,281	7,268,020	759,918	53,854	

THE most northerly part of the island, divided from the south by the River Tweed, the Cheviot Hills, and the Solway Firth, is the ancient Caledonia or modern Scotland, a land naturally poor, and to a great extent bleak and barren, but inhabited by a race of men who have made the country productive, wealthy, and prosperous. It contains nearly 30,000 square miles, or 19,084,659 acres, of which not quite 4,500,000 are in a state of cultivation, with a population in 1871 of 3,360,018, increased to 3,735,573 in 1881.

After the Union with England in the year 1707, and the suppression of the Rebellion of 1745, the Scotch people generally awoke to the fact that the loss of their separate nationality was a gain; and being united to a wealthy neighbour, they with one accord determined to derive all possible benefit from the change. By means of an admirable banking system, capital

was utilized. With wonderful ingenuity and perseverance a great commercial port, Glasgow, was opened in the west, Scottish citizens flocked south and into the British colonies, everywhere carrying with them their habits of industry and thrift. India especially became the scene of their operations, and notwithstanding any narrow feelings of national jealousy, it was seen that they were creators of commerce and producers of wealth. Education was widely diffused throughout the masses, while the Calvinistic religion, even if it did not in all instances produce piety, helped to promote thought and mental activity. At the Union the Scottish Church and Judiciary were left intact, and so, with slight modifications, have remained to the present day; both England and Scotland borrowing something from each other and gradually assimilating.

POPULATION, AREA, VALUATION OF COUNTIES, AND POOR, SCOTLAND.

* * The valuation of lands and heritages is only approximate: it is that furnished by the Inspectors of the Poor to the Board of Supervision. The number of paupers is that on the Roll May 14, 1887.

COUNTY	Population, 1881.	Acres.	Acres Cultivated.	Valuation, 1887.	Registrd Paupers and Dependents	LORDS LIEUTENANTS.
Aberdeen	267,990	1,251,451	573,189	£1,411,051	6,804	Earl of Aberdeen.

TERM DAYS IN SCOTLAND.

Candlemas, Feb. 2nd | Whitsunday, May 15th | Lammas, Aug. 1st | Martinmas, Nov. 11th
Removal Terms, May 28, November 28.

When a Scottish Term falls on a Sunday, the day after is held as Term Day.

LAW TERMS.—Sittings, 15th October to 20th March; 12th May to 20th July.

BANK HOLIDAYS (Fixed by 34 Vict., Cap. 17).

New Year's Day, Jan. 1st. Christmas Day. Good Friday.
If either of the preceding fall on a Sunday, First Monday of May.
the Monday following shall be the Bank Holiday. First Monday of August.

The above, with the addition of Her Majesty's Birthday, are also the holidays observed in Customs and Inland Revenue Offices in Scotland.

SCOTCH DRY MEASURE.

4 lippies = 1 peck. 4 firlots = 1 boll.
4 pecks = 1 firlot. 2 bolls = 1 quarter, qr.
Lippies = Pecks. Scotch. Imp.
4 = 1 Firlot. 1 lip. = ½ gal.
16 = 4 = 1 Boll. 1 peck = 1 peck.
64 = 16 = 4 = 1 1 firlot = 1 bush.
128 = 32 = 8 = 2 = 1 Qr. 1 boll = ½ quart.
On the Borders, the boll is equal to 6 firlots.

SCOTCH MONEY.

2 pennies = 1 bodle = ¼d. Stg.
4 pennies = 1 plack, or groat = ½d. "
6 pennies = 1 bawbee, or halfpenny stg. = ¾d. "
12 pennies = 1 shilling = 1d. "
20 shillings = 1 pound = 20d. "
13 shillings and 4 pennies = 1 mark = 13¾d. "
To reduce Scotch money to Sterling, multiply by 12.

SCOTCH LINEAL AND LAND MEASURE.

The Scotch ell was divided into 37 inches; and, though it has been found by accurate measurement to be equal to 37'0598 Imp. inches, yet it seems generally understood that it was meant to be equal to 37 Eng. or Imp. inches; 6 ells made a fall, and 4 falls, or 24 ells, made a chain. And in Land Measure, 36 sq. ells = 1 sq. fall, 40 falls = 1 rood, 4 roods = 1 acre. As the Scotch chain has long been made equal to 74 Imp. feet—

To convert Scotch into Imp. acres, multiply by 1'257116.
To convert Imp. into Scotch acres, multiply by '795476.
Assuming the ell to be 37'0598 in., multiply by 1'26118, and by '7929.
The Scotch mile = 80 chains = 80 × 74, or 74'1196 = 1973 ½ yards.

IRELAND is an island lying between $51^{\circ} 26'$ and $55^{\circ} 23'$ N. lat. and $5^{\circ} 20'$ and $10^{\circ} 26'$ W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea, or St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,750 square miles, or 20,326,209 acres. The greater part of the surface is a plain, interspersed with low hills, the highest mountain being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world. The climate is temperate, and many plants which can only be grown in hothouses in England flourish in the open air in Ireland; while the great moisture which generally prevails is so favourable to vegetation that the country early received the name of the Green or Emerald Isle.

The population of Ireland on April 3, 1881, was 5,174,836. Unlike any other portion of the British dominions, it is on the decrease. In 1767 it was estimated at 2,544,276, in 1777 at 2,690,556, and in 1801 at 5,216,329. It was not till 1821 that the first complete census was taken, and the numbers were then found to be 6,801,827; in 1831 they had increased to 7,767,401, and in 1841 to 8,175,124. The highest point was reached in 1845, when the entire population was estimated at 8,295,061. The potato crop, upon which all the agricultural and many of the manufacturing poor depended for their subsistence, having failed for two successive years, produced famine and disease, which carried off large numbers, and gave a great impulse to emigration, so that from 1845 the population rapidly decreased. In 1851 there were 6,552,385 persons in the country; in 1861, 5,798,564; in 1871, 5,412,377; and in 1881 but 5,174,836. Since 1845 the decrease has been 3,120,225; equal to 37.6 per cent. From May, 1851, to the end of December, 1885, no fewer than 3,051,361 persons of both sexes and of all ages went abroad—as many as 105,743 left in 1883; the annual average for the past ten years has been about 62,000, of whom the greater part found their way to the United States, where they were warmly welcomed by the Americans. At first they readily found employment, and became absorbed in the general population, but at the present time their presence is not regarded with the same favour.

In many respects Ireland is far behind Great Britain, not only in manufactures, commerce, and agriculture, but also in those other sources by which a nation is enriched and her population made prosperous and happy. The coasts abound with fish, but this source of wealth is much neglected. The mineral riches of the country, such as coal, iron, &c., are undeveloped; and there can be little doubt that one-fourth more corn, cattle, and other agricultural produce might be raised and exported. The Irish people, unlike the Scotch, are too much in the habit of expecting assistance from this country in those matters in which they should help themselves. Had they the same persistent industry and self-reliance as the Scotch, the country would present a very different appearance from what it does.

The Government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, exercises almost regal sway. He has a salary of £20,000, but being usually a nobleman of large private fortune, his expenditure is frequently much more than the amount received. The peerage consists of 177 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The prevailing religion is Roman Catholic, 78 per cent. of the population professing that form of faith. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 11 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Ireland is well supplied with educational establishments, having two universities, a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of Primary Schools.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

Although Ireland was annexed in 1170, it was not properly brought under English rule till the time of William III., and even then was permitted to retain a certain amount of apparent independence, one of the most cherished forms of which was the Native Parliament which existed for more than 300 years, and was extinguished at the time of the Union in 1801. For many years it met at irregular intervals, but in 1781 it received an increase of privilege, and during the last eighteen years of its existence made itself heard, although few of its acts appear to have been beneficial to the country. Still its very existence flattered the national sentiment, and its extinction was bitterly resented; the cry for Home Rule and for the Repeal of the Union was persistent, although it is only of late years that the demand has been made with sufficient vigour to be listened to by leading statesmen.

It is on all sides admitted that for many years the Irish people were badly governed and had much to complain of; and in point of fact they have never been without a grievance, real or imaginary. For centuries the Roman Catholics, who form the chief part of the inhabitants, were subject to many disabilities; these were greatly alleviated by the passing of the Roman Catholic Relief Bill of 1829, and entirely relieved by the reestablishment of the Irish Church in 1870. British statesmen, both Liberal and Conservative, have for the past fifty years done their best to remove all real causes of complaint. It is possible as years roll on the past will be forgotten, and that the Irish people, as the Scotch have already done, will find that their connection with a rich country like England is of incalculable benefit to themselves.

At the time of the Union, Ireland was a very important national factor, much more important than at the present time. The population of England and Wales was then but 9,060,993, while the population of Ireland was 5,216,329, considerably more than half that of this country; while the population of Scotland was only 1,625,000, and of the entire Island, 10,680,933. And as the entire population of the United Kingdom was but 15,808,322, that of Ireland formed a proportion of no less than 33 per cent. of the whole.

In 1886 the relative proportions had completely changed, for of the 36,707,418 inhabitants of the United Kingdom there were but 4,887,439 in Ireland, so that instead of 33 per cent. the proportion was but 13'317. Scotland, which in 1801 was but 1,625,000, had in the meantime sprung up to 3,949,393, and apparently its population will soon be larger than that of Ireland.

Tried by another test it will be seen that Ireland's place in the national economy is not high: its contribution to the Imperial exchequer being much below those of England and Scotland, and

but for its manufacture of whiskey, would be very low indeed. This is largely accounted for by the poverty of the great mass of the people, of whom no fewer than 442,289 were last year in a state of actual pauperism. There must be something radically wrong in this, for if the country could, as it did in 1845, support more than eight millions of people, there should not be any great difficulty in providing for the five millions remaining in 1887. The following table will show the amounts contributed to the Imperial Revenue by the three countries:—

AMOUNT OF REVENUE CONTRIBUTED BY IRELAND, SCOTLAND, ENGLAND AND WALES TO THE INCOME OF THE UNITED KINGDOM IN 1886-87, THE ASSUMED POPULATIONS, AND THE AMOUNT CONTRIBUTED PER HEAD.

	IRELAND.	SCOTLAND.	ENGLAND AND WALES.	UNITED KINGDOM.
Customs (1884-85)....	£2,038,303	£1,782,619	£16,847,743	£20,668,665

Lambton, Northumberland Fusiliers;		son, D.D. (Dean of Chapel Royal).....	335
Lieut. the Hon. Henry F. White, Grena-		<i>Sub-Dean</i> , Rev. Robert P. Graves, M.A.	

SUPREME COURT OF JUDICATURE.

HER MAJESTY'S COURT OF APPEAL.

Ex-Officio Judges.—The Lord Chancellor, the Lord Chief Justice, the Master of the Rolls, the Chief Baron of the Exchequer.
Lords Justices of Appeal.—Right Hon. Gerald FitzGibbon, Right Hon. Charles B. Barry, each £4,000.
Additional Lord Justice of Appeal, Right Hon. John Naish, £4,000. (*Pension as ex-Lord Chancellor*.)

HIGH COURT OF JUSTICE.

CHANCERY DIVISION.

Lord Chancellor, Rt. Hon. Lord Ashbourne £8,000
Master of the Rolls, Rt. Hon. A. M. Porter £4,000
Vice-Chancellor, Rt. Hon. H. E. Chatterton £4,000
Land Judge, Right Hon. John Monroe.... £3,500

QUEEN'S BENCH DIVISION.

Lord Chief Justice, Sir Michael Morris, Bt. £5,000
Judges, Rt. Hon. James Anthony Lawson; Rt. Hon. William Moore Johnson; Hon. William O'Brien; Hon. Michael Harrison; Hon. Jas. Murphy; Rt. Hon. Hugh Holmes each £3,800

EXCHEQUER DIVISION.

Chief Baron, Rt. Hon. Christopher Palles £4,600

Baron, Rt. Hon. Richard Dowse £3,800

Judge, Hon. William Drennan Andrews. £3,800

PROBATE AND MATRIMONIAL DIVISION.

Judge, Rt. Hon. Robert Richard Warren. £3,500

LAW OFFICERS.

Att.-Gen., Rt. Hon. J. G. Gibson, q.c., M.P. £5,000 | Solicitor-Gen., Peter O'Brien, q.c.

HIGH COURT OF ADMIRALTY.

Judge, Hon. John F. Townsend, LL.D. £1,200

Queen's Advocate, R. Seeds.

Registrar and Examiner, O. C. Macnamara £500

Queen's Proctor, John Taylor Hamerton. .

COURT OF BANKRUPTCY.

Judges, Stearne Ball Miller and Walter Boyd, LL.D. each £2,000

Chief Registrar, William Perrin £962

Registrars., A. F. Loyd & Hugh Doyle. each £600

Chief Clerk, W. H. S. Monck, A.M. £720

Official Assignees, J. Arthur Maconchy, and A. K. d'Entire.

LAND COMMISSIONER COURT.

Chief Judge, Hon. Justice O'Hagan £3,800

Sec and Commissioner, E. Falconer Litton, q.c. £3,000

Third Commissioner, Frederick S. Wrench. £2,000

Commissioners under Purchase of Land Act (Ireland) 1885, Stanislaus J. Lynch; John George MacCarthy each £2,000

STATISTICS OF IRISH COUNTIES, WITH NAMES OF LIEUTENANTS.

The following table, which gives the emigration from each county in Ireland in 1886, shows the number of Emigrants to have been 63,135, being 1,101 more than in 1885. The total number of Emigrants who left Ireland from 1st May, 1851, to 31st December, 1886, was 3,114,456.

LONDON was a place of importance under the Romans, and was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1189, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John, in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1307, 1398, 1406, 1409); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1861, 1862; and Alderman Sir R. N. Fowler, 1883, 1885. The title of Lord Mayor was first bestowed in 1354 on Sir Thomas Legge by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually until 1394, when a charter of Richard II. directed them to be chosen for life. The Common Council was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 14 members, and none less than 4. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but it is commonly placed in A.D. 1189. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but Edward IV., whose cause was favoured by the citizens of London, gave them, in the first year of his reign, permission to choose their own Sheriffs, as is now done. The Sheriffs are chosen on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected, who is sworn into office on November 8, and is on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, Westminster, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is mentioned as a royal officer in 1195; when he became a civic official is not known; but the Town Clerk (called Common Clerk) and Common Sergeant are mentioned as "ancient" officers in the Charter of Edward II. (A.D. 1319).

The Lord Mayor, Aldermen, and Principal Officers of the City of London.

Lord Mayor. £10,000. *Ald. Shff. Mayor.*
 The Rt. Hon. Polydore De Keyser, *Farringdon Without*, The Mansion House.. 1882 1882 1887

* These Companies have no Halls.

† Companies resuscitated within the last few years.

The ratable value of the halls of the London Companies is about £55,000; that of their schools and almshouses about £18,000 a year. The value of their plate and furniture is about £320,000, and the annual income of the livings in their gift—several of the “great” Companies are patrons of livings—about £12,300. In 1880

the Companies were indebted to the extent of about £270,000.

The above information is mainly derived from the report, in 5 vols., published in 1884, of the City Livery Companies’ Commission appointed in 1880, of which the Earl of Derby was chairman.

From this it will be seen that on Jan. 1st, 1887, out of every 100 persons in England and Wales, 3,171 were in receipt of workhouse relief (assumed population of the 647 Parishes or Unions, both years, 25,972,119), an increase of '039 per cent. on the year preceding.

NOTE.—These figures are approximate only; fuller particulars of the Area, Population, Income, Expenditure, Productions, and Trade of each of the Possessions abroad will be found in the Appendix.

THE Metropolitan Board of Works was constituted by the Metropolis Management Act of 1855. Under this and subsequent Acts it has carried out special works, such as the Main Drainage of London, the construction of the Victoria, Albert, and Chelsea Embankments on the Thames, the freeing of the Thames bridges in the Metropolitan area, and the clearance of many sites for Artizans' Dwellings. It has formed, opened up, or widened, many leading thoroughfares, such as Queen Victoria Street, Northumberland Avenue, Garrick Street, Southwark Street, Burdett Road, Holborn (Middle Row), Park Lane, Shoreditch, Great Eastern Street, Harrow Road, Coventry Street, Tooley Street, Tower Hill (Postern Row), Charing Cross Road, and Shaftesbury Avenue, which last, by way of Hart Street, and the improvement of Theobald's Road, and formation of Clerkenwell Road, provides a new means of communication between Piccadilly and Shoreditch. The Board built the present Putney and Hammersmith bridges; formed Finsbury and Southwark parks; and preserved open spaces, such as Hampstead Heath, Blackheath, Shepherd's Bush Common, Hackney Downs, Clapham Common, Wormwood Scrubs, Tooting Commons, Peckham Rye, Streatham Common, and Highbury Fields. Among the works now proceeding are, the widening of Upper Street, Islington, Waiworth Road, Gray's Inn Road (Elm Street), and Coldharbour Lane; the formation of Victory Place, Newington; and of a new street from Clerkenwell Road to Islington, further clearance of sites for artizans' dwellings, a new bridge at Battersea, the establishment of a new free ferry at Woolwich, and the laying out of a new park at Dulwich. It contributes, and has for many years, £30,000 a year towards City improvements.

Its principal general duties comprise the control over the formation of streets and the line of buildings therein, the testing of gas and gas-meters, the maintenance of the Fire Brigade (a force of 671 officers and men), the maintenance of the Main Drainage system, the Victoria, Albert, and Chelsea Embankments, the bridges over the Thames above Blackfriars, and various parks and commons. It is the "Metropolitan Authority" under the Water, Tramways, Petroleum, Artizans' Dwellings, Contagious Diseases (Animals), Slaughter-houses, Explosive Substances, and other Acts, and regulates the construction of theatres and music-halls for the protection of persons from fire. The Board borrows money and levies an annual rate. It borrows by the issue of "Metropolitan Consolidated Stock" for its own capital purposes, and also to provide loans to the School Board for London, the Police, and other metropolitan bodies within the limits laid down by Parliament in the Board's Annual Money Act. The rate of interest on stock created up to the end of 1880 is 3½ per cent. per annum; on stock raised since, 3 per cent. per annum; dividends are payable quarterly. The fund for paying the dividends and redeeming the principal is under the control of Her Majesty's Treasury. The total money borrowed up to the 1st of January, 1887, was £36,516,666, of which £6,674,751 was advanced to other bodies. The balance of debt owing at the same date was £26,907,926, and the assets in loans owing to the Board and in surplus

land were £10,274,543, less liability in redeeming stock at par £587,066, leaving the net debt £17,220,449. A portion amounting to not less than 1-6th is redeemed annually. The annual rate levied by the Board covers current expenses. It is relieved by the Coal and Wine duties which Parliament has allocated to its use up to July, 1888. The entire coal duty charged within the metropolitan police district and upon the river from Staines to Gravesend is 13d. per ton, of which 9d. is received by the Board and 4d. by the City.

Members of the Board are elected by the respective Vestries and District Boards in the Metropolis. The Corporation of the City of London elects three members. Parliament increased the number of Representatives in 1885 from 45 to 59.

During 1886, an Act was obtained by an association of gentlemen for purchasing 261 acres of land, and adding them to Hampstead Heath. Under its powers, the Board has agreed to contribute £152,500 towards the cost. In 1887 an Act was passed, imposing upon the Board the maintenance of Victoria, Battersea, and Kennington parks, Bethnal Green Museum Gardens, Westminster Bridge, and Old Chelsea Embankment. In the same year the Board obtained power from Parliament to form a tunnel beneath the Thames at Blackwall, thereby providing another means of communication between north and south London; also to acquire Ravenscroft Park, at Hammersmith, to undertake the maintenance of Wandsworth Common, and to contribute towards the purchase of Penge Recreation Ground. The Board has also agreed to make a grant of £25,000 towards the cost of Clissold Park, Stoke Newington, under the powers of the Clissold Park Act, 1887.

An important subject which occupies the attention of the Board is the treatment of the Metropolitan sewage at the outfalls into the River Thames, with a view to its purification. Extensive works are in progress for precipitating the sewage. One contract, on the north side, at Barking, is to cost £406,000. The deposit, after precipitation, is estimated to amount to 3,000 tons daily. When pressed, it will be reduced to 850 tons daily. The disposal of this enormous quantity is not easy. The sludge will probably have to be carried away and cast into the sea, unless it can be applied for agricultural purposes. A vessel has been built, and is ready for use, but, beyond an experimental trip, no sludge has been carried to sea. Agriculturists are now trying the pressed cake somewhat extensively on the south side, and with success. In 1886, they took 2,562 tons. In 1887, up to November 3rd, 6,649 tons; and orders for 1,000 tons were waiting execution. Deodorization is successfully performed, and will be continued until the establishment of the permanent treatment by precipitation.

The Board has continued to require wharf walls and banks of the River Thames, in the Metropolis, to be raised to prevent overflow. The height required is 5 ft. 6 in. above Trinity high-water mark. The preparation of plans necessitated the survey and taking levels of 41 miles of river frontage. Owners of 983 riverside properties have been served with notices: 934 have complied with the requirements, and works are in progress in other places.

The total length of new streets sanctioned

throughout the Metropolis during the year 1886-87 is about 12 miles.

No new Theatre or Music Hall containing an area exceeding 500 square feet, can be opened without a certificate from the Board. Thirteen certificates were issued last year. There is a limited jurisdiction over the older theatres and music-halls. The whole of the theatres existing in 1878 have now been put in what is considered a satisfactory structural condition.

The question of the continuance of the Coal and Wine Duties, which produce an income to the

Board of about £325,000, is still before the public. They cease in 1889, and the Board will derive no benefit from the proceeds of the last year, which have been appropriated to the freeing from toll of Thames bridges outside London. If the duties are not renewed the Board's rate must increase by at least 2½d. in the pound. The duties are easily collected, have continued many years, and produce no irritation.

The rates levied by the Board during the last 5 years were:—1833, 6'23d.; 1884, 6'50d.; 1885, 7'34d.; 1886, 6'88d.; 1887, 7'55d.

(Office, Spring Gardens.—Hours 9 to 4; Saturdays 9 to 2.)

Chairman, Lord Magheramorne, K.C.B. [1870].

Deputy-Chairman, George Edwards. St. Marylebone. 119, Maida Vale, W. [1873.]

Legal Expenses and Miscellaneous Exp.	20,284	
Scholarships and Prizes	2,774	
Insurance Fund	233	
Repayment of Loans	110,716	
Balance in hand 25th March, 1887	207,437	
Total	£2,160,585	

From the establishment of the Board in November, 1870, up to the 20th October, 1887, accommodation in permanent schools had been provided for 390,321 children. In addition to this, schools with accommodation for 10,415 are in process of erection, or will be provided in the course of the next two years. At Lady-Day last there were upon the rolls of the Board Schools (including certain schools transferred, and temporary schools), 406,543 children. The staff of teachers comprised 6,473 adult teachers, and 1,629 pupil-teachers and candidates. The fees charged by the Board range from 1d. to 6d., and in two schools 9d.; the number of school-places provided at 1d. being, according to a recent return, 85,911; 182,793 at 2d.; 97,840 at 3d.; 22,743 at 4d.; 6,685 at 6d.; and 1,745 at 9d. The charges are determined solely by what is believed to be the ability of the parents, and to avoid needless class distinctions they are made uniform in each school. When the census of all the schools in London was taken in 1871, whether efficient or non-efficient, the total number of children on the roll was 320,143. The number of children now upon the roll of efficient schools alone is 617,343; in other words, the roll of efficient schools alone is greater by 297,200 than the total roll of all schools whatever in the beginning of 1871. The number of children sent to industrial schools at the instance of the Board, up to Midsummer, 1887, was 11,869. In addition, 11,293 other cases had been inquired into by the Industrial Schools Committee, and referred to various voluntary agencies, &c., to be dealt with. The precepts for the year 1887-88 amount to £1,070,325 10s. 0d., which is at the rate of 8½d. in the pound.

The following list of Insurance Offices, with two or three unimportant exceptions, contains the names of all the British offices; and of four other companies doing business in this country—three Life Offices founded in New York and one in Australia—with the premiums charged at various ages to secure the payment of £100 at death, with right to participate in profits. Those offices having an asterisk prefixed transact Annuity as well as Life business. After the names are the figures (1) (2) (3) or (4). Those offices marked No. 1 are Proprietary or Joint Stock Life Companies; No. 2 are Proprietary Life and Fire Companies, and in three instances—those of the *Commercial Union*, the *London Assurance Corporation*, and the *Royal Exchange*, the business of *Marine Insurance* is included; No. 3 are Societies established on the principle of *Mutual Insurance*: that is, there is no proprietors' paid-up capital, the contributions of members being regarded as amply sufficient to meet all claims and contingencies; No. 4 are what are termed *Industrial Life Offices*, i.e., the Life Insurances transacted are wholly or for the most part for sums under £100, the premiums being usually payable by weekly or monthly instalments.

Persons wishing to insure their own lives—or, where legally or financially interested—the lives

of others, are furnished with a paper containing questions respecting their age, habits, state of health, and other matters, all which questions must be answered truthfully; for if any wilful misstatement be made the policy may be vitiated, and the office can refuse to pay when a claim is made; thus all the sums contributed will have been thrown away. If the application for insurance be rejected on account of ill-health, or a tendency to hereditary disease, offices are to be found which will insure unsound lives, of course at a charge proportioned to the nature of the risk. Some tradesmen, e.g., publicans and butchers, are usually charged a higher rate than most others; a man in such business, aged say 35, may have to pay as though he were 40 or 45.

It should be impressed upon intending insurers that they cannot be too careful in the selection of an office. *Safety should be the first consideration*, economy second—although really first, for there is no economy in insuring in an unsound office, however low its premium may be. The rates differ, but in some offices where the premium appears high corresponding advantages are offered, and they may in the end prove quite as economical as other offices where lower rates are charged, for with the high rates of premium there are commonly some continuing advantages.

ANNUAL PREMIUMS FOR LIFE ASSURANCES,

In the following Offices, at the ages of 25, 30, 35, 40, 45, 50, and 55, to secure the payment of ONE HUNDRED POUNDS at death; the assured *participating in the profits* in all named, except the Post Office and certain of the Industrial Life Offices. The first column of figures gives the amounts returned as Life "Assets" by the various Offices, in accordance with the provisions of the Act 33 & 34 Vict. c. 58; and the last column shows the number of years the Office has been established for the transaction of Life Insurance.

† Including paid-up capital.

The information now conveyed through the medium of the "Life Assurance Companies Act, 1870," which renders it imperative that every Life Office must furnish yearly to the Board of

Trade a true state of its financial position, places within the power of every one of ordinary mental ability the means of ascertaining whether a Life Office is or is not financially if not actu-

rially sound. Without going into further detail, and to meet ordinary popular requirements, a test as to solvency may be ascertained in answer to three questions:—1. Is the management and other expenditure within the sum set apart for that purpose? 2. Are the funds safely invested, and does the interest receivable thereon realise the percentage on which the premium tables are framed? 3. Are the death claims which arise within, in amount, the "Expectancy" table of mortality adopted by the Company? Where the experience of the Company shows that these three questions can be truthfully answered in the affirmative, then the business may fairly be regarded as conducted on a perfectly secure basis. And just in proportion as by a careful selection the death-rate is reduced below the expectancy, the rate of interest realized is beyond the assumed percentage, and the expenditure is less than the sum allotted—in the same ratio will the office be

able to show profits fairly and legitimately realized.

The aggregate amount of Life and Annuity assets pertaining to the 36 Proprietary Life Offices named as above, exclusive of capital paid up, is £52,137,980, the capital amounting to £4,815,678, and the Life Insurances in force amounting, approximately, to £177,875,000. In the 25 Proprietary Life, Fire, &c. Companies, the aggregate amount of assets exclusive of capital is £35,003,055; capital £6,194,451; insurances in force approximated £101,251,500. The Life and Annuity assets of the 22 Mutual Societies amount to £5,532,301; approximate amount of Insurances in force, £146,889,000. Of the 20 Industrial Life Companies (wholly or in part) the assets, exclusive of capital, are £5,469,442; capital £225,898; approximate amount of Insurances in force, £98,619,500.

The following is a summary of the foregoing figures:—

CLASS OF OFFICE.	No.	Premium Income.	Life & Annuity Funds.*	Capital Paid-up.	Amount of Policies in Force (approximate).
(1) Proprietary Life	33	£5,336,292	£52,137,900	£4,815,678	£177,875,000
(2) Proprietary Life, Fire, &c.	25	3,037,547	35,003,055	6,194,451	101,251,500
(3) Mutual Life		4,406,693	57,532,301	Nil	146,889,000
(4) Industrial Life (wholly or in part)....	10	3,944,776	5,469,442	225,898	98,619,500
Total.....	90	16,725,308	150,142,778	11,236,027	524,635,000

With a view to exhibit the satisfactory progress made in Life Assurance during the past year, a summary of the figures relating to the

preceding year is subjoined. It will be observed that the Life and Annuity Funds present an increase during the year of more than £5,000,000.

CLASS OF OFFICE.	No.	Premium Income.	Life & Annuity Funds.*	Capital Paid-up.	Amount of Policies in Force (approximate).
(1) Proprietary Life	32	£3,999,394	£49,692,645	£4,749,808	£166,650,000
(2) Proprietary Life, Fire, &c.	25	3,027,556	34,177,456	6,154,450	100,920,000
(3) Mutual Life	22	4,300,438	56,024,329	Nil	143,350,000
(4) Industrial Life (wholly or in part)....	10	3,702,242	4,608,842	206,375	92,500,000
Total.....	89	16,029,630	144,503,272	11,110,633	503,420,000

* Exclusive of capital.

Fire Insurance.

RATES.—For merchandise at the principal ports, and for mills and manufactories and other leading industries throughout the United Kingdom all the offices charge the same, whilst for minor risks each office makes its own estimate, and charges the premium in its judgment applicable. The following is a digest of the scale put forward by some of the oldest companies, and the rates and classification are those which are generally adopted.

Common Insurances.—At 1s. 6d. to 2s. per cent. per annum, with certain exceptions.

1. Buildings covered with slates, tiles, or metals, and built on all sides with brick or stone, or separated by party-walls of brick or stone which are carried through the roof, and used for residence, or non-hazardous purposes.

2. Goods in buildings as above, such as household goods, plate, wearing apparel, and printed books, liquors in private use, and personal effects not comprised in the following categories:—

Hazardous Insurances.—At 2s. 6d. to 3s. 6d. per cent. per annum, with certain exceptions.

1. Buildings of timber and plaster, or not separated by partition walls of brick or stone, or not covered with slates, tiles, or metals, and thatched barns and outhouses, having no

chimney, nor adjoining to any building having a chimney; and buildings falling under the description of common insurances, but in which hazardous goods are deposited, or hazardous trades are carried on.

2. Goods.—The stock and goods of bread-bakers, tallowchandlers (not melters), inn-holders, drapers, stationers, also chemists and grocers not dealing in mineral oils.

Doubly Hazardous Insurances.—At 4s. 6d. to 5s. per cent. per annum, with certain exceptions.

1. Buildings.—All thatched buildings having chimneys, or communicating with or adjoining to buildings having one, although no hazardous trade shall be carried on, nor hazardous goods deposited therein, and all hazardous buildings in which hazardous goods are deposited, or hazardous trades carried on.

2. Goods.—All hazardous goods deposited in hazardous buildings, and in thatched buildings having no chimney; also china, glass, mathematical and musical instruments, pictures, and jewels in private use.

Much depends upon the surroundings of the building insured; for a printer's or bookbinder's workshop, in a narrow lane, with old wooden houses near it, the premium would possibly be from 10s. to 15s.

CHIEF FIRE INSURANCE COMPANIES.

Immediate Annuities.

The following Table shows the amount of Annuity granted by the undermentioned Companies or every £100 paid. The age last birthday is that upon which the payment is based, and as women are longer lived than men the Annuity is naturally smaller. By way of comparison, the annuities paid through the Savings' Banks are given; in this case the amount paid is based upon the assumption of a profit of Three and a quarter per cent.

The Annuity premium is calculated as payable half-yearly, except in the case of those offices having an asterisk prefixed, when the annual payment is stated.

Companies marked thus † publish rates for age advancing by six months.

† M—Mutual. P—Proprietary.

As Insurance Companies have the means of safely investing at a higher rate of interest than can be obtained from Government, they are able proportionately to offer more advantageous terms to annuitants: to those about to purchase, a study of the Comparative Table of Rates will consequently be found useful. The Ages quoted range from *fifty* to *seventy* years, Annuities being usually purchased within that range of age. The completed Age—the age *last* birthday—is that to which the Annuity in every case applies.

Foreign Food Imported.

THIS country is largely dependent upon foreign countries for its food supplies, the sum paid away per head of the population having risen from 45s. 1d. in 1886 to 88s. 6d. in 1883, which year was followed by a decline to 61s. 6d. in 1886. The following table, prepared from returns issued by the Commercial Department of the Board of Trade, shows the value of live animals—cattle, sheep, and pigs—imported; also the value of fresh, salted, and preserved meat, including ham, bacon, butter, cheese, and eggs; of wheat and flour; of grain, as oats, Indian corn, barley, rye, and meal, hops, rice, sago, and sugar; and of fruits (raw), nuts, and vegetables (raw) for the years 1866–1886, with the totals for every year and the amount per head of the population. The number of live cattle imported rose from 136,688 in 1868 to 474,750 in 1883, since which it has declined to 319,622 in 1886; sheep rose from 341,155 in 1868 to 1,124,391 in 1882, declining to 750,886 in 1885, and rising to 1,038,965 in 1886. The number of pigs has varied during the past twelve years between 15,670 and 72,107, the figures for 1886 being 21,352.

Years	Estimated Population to middle of year.	Live Animals.	Meat, Butter, Cheese, and Eggs.	Wheat and Flour.	Grain, Hops, and Sugar.	Fruits, Nuts, and Vegetables.	TOTAL.	Per Head

INTESTATES' ESTATES—Rules by which the Personal Estates of Persons Dying Intestate are Distributed.

If the Intestate die, leaving

His representatives take in the proportion following:—

<p>Wife and child, or children</p> <p>Wife only, no blood relations</p> <p>Wife, no near relations</p> <p>No wife or child</p> <p>No wife, but child, children, or representatives of them, whether such child or children by one or more wives</p> <p>Children by two wives</p> <p>If no child, children, or representatives of them</p> <p>Child and grandchild by deceased child</p> <p>Husband</p> <p>Father, and brother or sister</p> <p>Mother, and brother or sister</p> <p>Wife, mother, brothers, sisters, and nieces</p> <p>Wife and father</p> <p>Wife, mother, nephews, and nieces</p> <p>Wife, brothers or sisters, and mother</p> <p>Mother, but no wife, child, father, brother, sister, nephew, or niece</p> <p>Wife, and mother</p> <p>Brother or sister of whole blood, and brother or sister of half blood</p> <p>Posthumous brother or sister, and mother</p> <p>Posthumous brother or sister, and brother or sister born in lifetime of father</p> <p>Father's father, and mother's mother</p> <p>Uncle's or aunt's children, and brother's or sister's grandchildren</p> <p>Grandmother, uncle, or aunt</p> <p>Two aunts, nephew, and niece</p> <p>Uncle, and deceased uncle's child</p> <p>Uncle by mother's side, and deceased uncle or aunt's child</p> <p>Nephew by brother, and nephew by half-sister</p> <p>Nephew by deceased brother, and nephews and nieces by deceased sister</p> <p>Brother and grandfather</p> <p>Brother's grandson, and brother or sister's daughter</p> <p>Brother and two aunts</p> <p>Brother and wife</p> <p>Mother and brother</p> <p>Wife, mother, and children of a deceased brother (or sister)</p> <p>Wife, brother, or sister and children of a deceased brother or sister</p> <p>Brother or sister, and children of a deceased brother or sister</p> <p>Grandfather, no nearer relation</p>	<p>One-third to wife, rest to child or children; and if children are dead, then to the representatives (that is, their lineal descendants), except such child or children, not heirs-at-law, who had estate by settlement of intestate, or were advanced by him in his lifetime, equal to other shares.</p> <p>Half to wife, other half to the Crown.</p> <p>Half to wife, rest to next-of-kin in equal degree to intestate, or their legal representatives.</p> <p>All to next-of-kin and their legal representatives.</p> <p>All to him, her, or them.</p> <p>Equally to all.</p> <p>All to next-of-kin in equal degree to intestate.</p> <p>Half to child, half to grandchild, who takes by representation.</p> <p>Whole to him.</p> <p>Whole to father.</p> <p>Whole to them equally.</p> <p>Half to wife, residue to mother, brothers, sisters, and nieces.</p> <p>Half to wife, and half to father.</p> <p>Half to wife, one-fourth to mother, and other fourth to nephews and nieces.</p> <p>Half to wife, half to brothers or sisters, and mother</p> <p>The whole to mother.</p> <p>Half to wife, and half to mother.</p> <p>Equally to both.</p> <p>Equally to both.</p> <p>Equally to both.</p> <p>Equally to both.</p> <p>Equally to all.</p> <p>All to grandmother.</p> <p>Equally to all.</p> <p>All to uncle.</p> <p>All to uncle.</p> <p>Equally to <i>per capita</i>.*</p> <p>Each in equal shares <i>per capita</i>, and not <i>per stirpes</i>.</p> <p>Whole to brother.</p> <p>All to daughter.</p> <p>All to brother.</p> <p>Half to brother, half to wife.</p> <p>Equally.</p> <p>Half to wife, a fourth to mother, and a fourth <i>per stirpes</i> to deceased brother's or sister's children.</p> <p>Half to wife, one-fourth to brother or sister <i>per capita</i>, one-fourth to deceased brother's or sister's children <i>per stirpes</i>.</p> <p>Half to brother or sister <i>per capita</i>, half to children of deceased brother or sister <i>per stirpes</i>.</p> <p>All to grandfather.</p>
---	---

* That is, taking individually, and not by representation. Thus, if A. die, leaving three brothers or sisters, they each take an equal part of his effects in his or her own right. But if either of them die, leaving children, his children would take his share *per stirpes*, that is *through him*, and not in their own rights.

By the Act 19 & 20 Vict. all special *local* customs relating to the estates of intestates are abolished.

In Almanacks previous to 1886 tables were given showing the **EXPECTATION OF LIFE**, and the numbers of survivors out of a given number of births at each successive year of life. Those tables were constructed by the late Dr. Farr, of the General Register Office, and were calculated on the death-rates of 1838-54; but since that time very important changes have occurred in the death-rates at different ages, and consequently new tables have been constructed by Dr. W. Ogle, who succeeded Dr. Farr, on the basis of the death-rates of 1871-80. The following table gives the results: both of the older and the later calculations; the first two columns in the male and female parts respectively, giving the survivors at each year of life out of a million born of the corresponding sex, by the older and the newer calculation; and the two other columns giving similarly the expectation of life at each year:—

AGE.	MALES.				FEMALES.				AGE.
	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).		OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).

THE second session of the Twelfth Parliament of Queen Victoria will be remembered as one of the longest and most tedious known for years. It met on January 27, and sat through, with the exception of about a fortnight's holiday, until Sept. 15. The sittings of the House were also much longer than had been the case in previous sessions. The political situation in Ireland was the main question which called upon the time and energies of members; and during the protracted sittings many stormy scenes were witnessed. The debate on the Address was more than usually prolonged, owing to the discussion of amendments, the principal one being moved by Mr. Parnell, dealing with the Irish policy of the Government. This was supported by the leaders of the Opposition, and, after six nights' debate, was rejected by 352 votes to 246. It was not until Feb. 17 that the Address to the Throne was voted, and even then it was thought necessary by the Government to invoke the aid of the *clôture*.

The first business taken up by the Government was the new Rules of Procedure, the discussion of which commenced on Feb. 21, when Mr. W. H. Smith moved to alter the existing rule with regard to closure. The Government proposal was to remove the initiative from the Chair and vest it in the majority. The motion for closure was to be made by any member, at any time, and might be carried by a bare majority, provided at least 200 were in favour of it; but, as a security against obstructive motions, it was stipulated that the consent of the Chair should be previously obtained. Of course numerous amendments were proposed and discussed, but eventually the Government carried their proposal without material alteration, on March 18, by 262 votes to 41, and it immediately became a Standing Order of the House. On March 22 Mr. W. H. Smith asked for precedence to bring in the Crimes Bill for Ireland. To this Mr. John Morley, on behalf of the Opposition, moved an amendment, declining to set aside the business of the country for the purpose of strengthening the criminal law in Ireland while the rent question was left untouched. Mr. A. J. Balfour, who had become Chief Secretary for Ireland a few days previously, owing to Sir M. Hicks-Beach's temporary withdrawal from Parliament in consequence of a serious affection of the eyes, stated that it was the intention of the Government, when they had passed a Crimes Bill, to bring in two Bills dealing with that part of the Irish difficulty. The first measure would deal with the immediate relief of the embarrassed tenant, while the second would embrace a comprehensive scheme of Land Purchase. Mr. Morley's amendment, after being debated for four nights, was rejected by 349 votes to 260. Mr. Balfour then moved for leave to bring in the Bill, and the debate was further continued for five nights, on the last of which Mr. Parnell brought forward an amendment proposing that the House should form itself into a Committee to consider the state of Ireland. After several motions for adjournment had been moved by the Opposition, Mr. W. H. Smith moved the application of the new Closure Rule, which was carried by 361 votes. On the announcement of these figures a remarkable scene occurred; the Opposition, including the Gladstonian Liberals

and the Nationalist members, headed by Mr. Gladstone, walked out of the House in a body, amid considerable excitement, and refused to vote on the main question. The Bill was then brought up, and read a first time without a division. The debate on the second reading was commenced on the 5th of April, and concluded on the 18th of the month. The Chancellor of the Exchequer (Mr. Goschen) made his Budget statement on the 21st of April. It was severely criticised by Lord R. Churchill, who, just previous to the commencement of the session, had retired from the Chancellorship on the grounds that the Government would not accept his views on financial reform. On the same evening Lord Cadogan, in the House of Lords, moved the second reading of the Irish Land Law Bill, the first of the two remedial measures proposed by the Government, which was carried on the following evening. After a preliminary debate of three nights the House went into Committee on the Crimes Bill on May 2, and, notwithstanding the frequent application of the closure and abnormally late sittings, a most acrimonious discussion was continued till June 17. A week previously Mr. W. H. Smith had given notice that, in the event of the Bill not being reported by 10 o'clock on that evening, he should move that the Chairman should proceed to put the remaining clauses without debate. When the time arrived the Committee were still discussing the sixth clause of the Bill, and Sir Charles Russell was speaking against it; the Chairman (Mr. Courtney), however, rose and stopped Sir Charles, and proceeded to put the question. The Nationalist members immediately left the House, and the motion was carried by 332 votes to 165. The Gladstonian Liberals after this division, headed by their chief, followed the example of the Irish members, and withdrew; the remaining clauses were agreed to without a division, and the Bill was then reported to the House.

The Irish Land Law Bill reached the House of Commons on July 4, and did not pass its final stages till a few days before the prorogation. The Proclamation of the Irish National League, which was announced in both Houses on the 19th of August, did not come as a surprise. After giving due notice Mr. Gladstone, on the 25th of August, moved a resolution condemning the action of the Government. The division on this was much more favourable to the Government than was expected, as, owing to the lateness of the session, many of their followers had left town for the autumn holidays. Nevertheless the whip was well responded to, and a victory for the Government was secured by 272 votes to 195.

The regrettable feature of the session was the many indecorous scenes which were enacted in the House of Commons, and the constant warnings and penalties inflicted by the Speaker. Party feeling during the whole of the session ran unusually high, and it would be invidious here to again call attention to the many ebullitions of temper displayed by members.

Among the noticeable incidents of the session was the awkward position the Government found themselves placed in by the obtrusive zeal of Sir Charles Lewis in bringing before the House, as a breach of privilege, the publication in the *Times* of an article attributing falsehood

Mr. Dillon in a speech made in the House. Another event was the scandal brought to light in connection with the bogus signatures to petitions promoted by the City Corporation in favour of the Coal and Wine Dues, for which a young man named Bidmead was called to the Bar of the House, and severely reprimanded by the Speaker.

In addition to the two Irish Acts above mentioned, the following Government measures were added to the Statute Book:—The Allotments Act, the Mines Regulation Act, the Truck Act, the Merchandise Marks Act, and a number of smaller and less important Acts. On the other hand, what is known as the "massacre of the innocents" was unusually heavy.

January 27.—**LOARDS.** The Earl of Erne moved, and Viscount Torrington seconded, the Address to the Queen's Speech. Among those who carried on the debate were Earl Granville, the Marquis of Salisbury, the Earl of Selborne, Lord Ashbourne, and Lord Herschell. The Address was agreed to. The Marquis of Salisbury, Earl Granville, and Earl Fortescue paid tributes to the memory of Lord Idlesleigh.

COMMONS. Lord R. Churchill explained the circumstances under which he retired from the Government. Mr. W. H. Smith followed, and subsequently alluded, in feeling terms, in which Mr. Gladstone joined, to the death of Lord Idlesleigh. The Address was moved by Lord Weymouth, and seconded by Mr. G. W. Balfour. Mr. Gladstone made a speech, in which he challenged the programme of the Government, and was replied to by Mr. W. H. Smith.

January 28.—Questions asked with regard to the Glenbeigh evictions. The debate on the Address was resumed by Colonel Saunderson. Among the subsequent speakers were Mr. Fulton, Mr. T. Fry, and Sir M. Hicks-Beach. The Supreme Court of Judicature (Ireland) Amendment Bill was introduced.

LOARDS. Short debate on Armaments and on Coaling Stations.

January 31.—Discussion respecting the case of "The Queen v. Graves."

COMMONS. Mr. Bradlaugh continued the debate on the Address. Lord R. Churchill followed, and during his speech referred to the Liberal Unionists as a kind of crutch, to be thrown aside when the Government was strong enough. Mr. Shaw-Lefevre, Mr. G. Curzon, Mr. Labouchere, and Lord Wolmer also spoke. The last-named said that Lord R. Churchill's reference to the Liberal Unionists was a wanton insult.

February 1.—Debate on the Address continued by Lord G. Hamilton, Mr. Chaplin, Mr. Conybeare, and Sir Wilfrid Lawson.

February 2.—Debate on the Address continued.

February 4.—Mr. Cremer moved his amendment to the Address in favour of the withdrawal of the British troops from Egypt. After a long discussion it was rejected by 263 votes to 97.

February 7.—Mr. Parnell moved an amendment to the Address in favour of such reform in the law and system of government in Ireland as would satisfy the Irish people. Mr. Holmes and Mr. Dillon spoke to the amendment.

LOARDS. The Lunacy Bill and the Appellate Jurisdiction Bill were read a second time. Lord Harris made a statement with regard to the defective swords and bayonets.

February 8.—**COMMONS.** Mr. John Morley resumed the debate on Mr. Parnell's amendment. The subsequent speakers included Mr. Howorth, Sir E. Grey, Colonel Waring, Mr. Gibson, and Mr. T. P. O'Connor.

February 9.—Mr. Parnell's amendment further discussed. Speeches by Mr. Long, Mr. B. Cole-ridge, and Sir E. Clarke.

February 10.—The debate on Mr. Parnell's amendment continued by Lord Hartington, Lord Kilcoursie, Mr. Storey, Mr. H. H. Fowler, and Colonel Saunderson.

LOARDS. The Appellate Jurisdiction Bill passed through Committee.

February 11.—**COMMONS.** After speeches from Mr. Sexton, Mr. Matthews, Sir W. Harcourt, and Sir M. Hicks-Beach, the House divided on Mr. Parnell's amendment, which was rejected by 352 votes to 246.

February 14.—Committee appointed to make inquiry respecting defective cutlasses supplied to the Navy. Mr. Esslemont's amendment to the Address, referring to the land question in Scotland, defeated by 198 votes to 96. After some discussion Sir G. Campbell withdrew his amendment in favour of Local Government for Scotland.

LOARDS. Discussion on continuous railway brakes, and lawlessness in Ireland.

February 15.—The Glebe Lands Bill read a second time.

COMMONS. Dr. Cameron moved an amendment to the Address on the Crofter question, and called for an inquiry as to the administration of justice in the Highlands.

February 16.—Crofter question amendment rejected by 253 votes to 136.

February 17.—Mr. Dillwyn moved the adjournment of the House, in order to call attention to the alleged jury-packing in the conspiracy trials in Ireland. The Speaker declined to put the motion, on the ground that Mr. Sexton had a notice on the paper referring to the same subject. Mr. W. H. Smith moved for precedence for the New Rules of Procedure, and after several divisions the motion was carried. Mr. Dillon resumed the debate on the Address, and, attempting to impeach the Government as to the Dublin Conspiracy trials, was ruled out of order by the Speaker. Several amendments were moved, but the Address was eventually carried after the *clôture* had been twice applied and several divisions taken.

LOARDS. Lord Dunraven explained his reasons for resigning the Under-Secretaryship for the Colonies.

February 18.—The Appellate Jurisdiction Bill read a third time.

COMMONS. Report on the Address agreed to; after amendments referring to the abdication of Prince Alexander of Bulgaria, Zululand, and the Barbavilla murder had been negatived.

February 21.—Mr. W. H. Smith moved the first of the new Procedure Rules, that relating to Closure; Mr. Gladstone, Mr. Parnell, Mr. Whitbread, Mr. Goschen, and Sir W. Harcourt, were amongst those who took part in the debate.

LOARDS. The Lunacy Acts Amendment Bill passed through Committee.

February 22.—Lord Harris made a statement with regard to the defective cutlass bayonets. Discussion on the discharge of 25,000 prisoners in India in honour of the Queen's Jubilee.

COMMONS. The debate on the Procedure Rules

was continued by Sir Lyon Playfair, Sir J. Mowbray, Lord Hartington, Mr. Broadhurst, Mr. Courtney, Sir M. Hicks-Beach, Mr. Bryce, and others.

February 23.—Resumed debate on Procedure Rules.

February 24.—Several amendments to the Closure Rule negatived.

LOARDS. Law of Evidence Amendment Bill and the Justices Jurisdiction Bill read a second time.

February 25.—The Solicitors (Ireland) Bill passed through Committee.

COMMONS. Resumed debate on the Closure Rule. Further amendments were rejected, including Mr. Parnell's proposal to exclude proceedings in Committee of Supply from the operation of the rule.

February 28.—Committee of Supply on Supplementary Estimates.

LOARDS. Dover Corporation Bill read a second time. Debate on the Church Patronage Bill. Lord Stanley of Preston introduced the Railway Rates Bill, which was read a first time without discussion.

March 1.—Electric Lighting Act Amendment Bill and Copyhold Enfranchisement Bill read a second time, the last-named being referred to a Select Committee.

COMMONS. Mr. Howell called attention to the alleged corrupt expenditure of the funds of the Corporation of London with regard to the London Government Bill in 1884. Sir R. Fowler on behalf of the Corporation, and Lord G. Hamilton on the part of the Government, expressed their willingness that a committee of inquiry should be appointed. Discussion on the Procedure Rules.

March 2.—Debate on the Procedure Rules continued.

March 3.—Supply: On the Irish Constabulary vote a lively discussion arose, which was kept up by the Irish and Radical members till two o'clock in the morning. In the course of the debate Sir M. Hicks-Beach declared that Ministers were determined to ask Parliament for further powers to secure the efficient administration of justice in Ireland. Later on the right hon. gentleman, replying to Mr. John O'Connor, warned the Nationalist members that if something worse than bâtons resulted in Ireland they were the people who would be held responsible. This remark was taken exception to by the occupants of the Parnellite benches, and a lively scene ensued. Eventually the vote was finally obtained by 246 votes to 121.

LOARDS. The Law of Evidence Bill passed through Committee, and the Church Patronage Bill was read a second time.

March 4.—Discussion on the Irish Jury Laws, the Law of Evidence Bill, and the Solicitors (Ireland) Bill read a third time and passed.

COMMONS. Mr. Whitbread's amendment, to expunge the intervention of the Speaker from the Closure Rule rejected by 177 votes to 130. A further proposal by Mr. Parnell, for defining the rights of the minority in respect to debate, was negatived by 275 votes to 107.

March 7.—Supply: Motion to reduce the diplomatic vote by the cost of Sir H. D. Wolff's mission rejected by 234 votes to 146.

March 8.—The proposed Closure Rule further discussed.

March 10.—Supply: Army Supplementary Estimates considered.

LOARDS. Glebe Lands Bill passed through Committee.

March 11.—**COMMONS.** Committee appointed to inquire into charge brought by Mr. Howell against the Corporation of London.

March 14.—Supply: Army Estimates. **LOARDS.** Railway and Canal Traffic Bill read a second time.

March 15.—The Church Patronage Bill passed through Committee.

COMMONS. Rules of Procedure. *March 17.*—Discussion on going into supply on designs for ships of war.

March 18.—Discussion initiated by Irish members on the arrest of Father Keller, parish priest at Youghal. The Closure Rule carried by 262 votes to 41, and made a Standing Order of the House.

March 21.—Mr. A. J. Balfour gave notice of the introduction of a Bill to make better provision for the prevention and punishment of Crime in Ireland. Mr. W. H. Smith intimated that he would ask for urgency for the measure. Mr. John Morley gave notice of an amendment. Supply: Navy Estimates. Owing to obstruction the House sat till 1.20 on Tuesday afternoon, the sitting having lasted over 21 hours.

LOARDS. The Electric Lighting Act Amendment Bill passed through Committee.

March 22.—**COMMONS.** Mr. W. H. Smith moved for precedence for the Criminal Law Amendment (Ireland) Bill. Mr. John Morley moved his amendment, declaring that the House declined to set aside the business of the nation in favour of a measure for increasing the stringency of the criminal law in Ireland, whilst no effectual security had been taken against the abuse of the law by the exaction of excessive rents. Speeches were made by Mr. A. J. Balfour, Mr. Finlay, Mr. H. Fowler, and others.

March 23.—Debate on Mr. Morley's amendment continued.

March 24.—Debate resumed on Mr. Morley's amendment by Mr. Gladstone, who argued that the proposals of the Government were, as far as they could be gauged, totally inadequate, and that the demand for urgency was not warranted by any precedent. Colonel Saunderson supported, and Mr. Asquith condemned, the proposals of the Government. Mr. J. Chamberlain said that a double duty rested on Parliament—to provide for a temporary suppression of disorder, and to attempt once more the solution of the agrarian problem, which was the source of all Irish discontent, by a comprehensive measure of land reform.

LOARDS. Discussion on South African affairs.

March 25.—Lord Salisbury introduced the Tithes Bill.

COMMONS. Mr. Shaw-Lefevre continued the debate on Mr. Morley's amendment, which he supported. Among the subsequent speakers were Mr. T. W. Russell, Mr. T. D. Sullivan, Mr. G. Curzon, Mr. Howorth, and Mr. Jacob Bright. Sir H. James strongly urged the rejection of the amendment as being National League advocacy. Sir W. Harcourt spoke at great length in favour of the amendment; and Mr. Goschen, on behalf of the Government, in a powerful speech denounced the tactics of the Opposition, urging that it was the duty of the Government to break down the power of self-constituted dictators, who were ruining the prosperity of Ireland. The amendment was rejected by 349 votes to 260.

March 28.—Mr. A. J. Balfour moved for leave to introduce the Criminal Law (Ireland) Amendment Bill. Mr. Dillon, in a long speech, opposed the measure. Mr. Haldane and Lord Lynton spoke.

March 29.—Debate continued by Mr. Gladstone, who condemned the action of the Government. Mr. Goschen, on behalf of the Government, replied. Among subsequent speakers were Sir E. Esmond, Mr. Winterbotham, Mr. Neville, and Mr. Illingworth.

March 30.—The Criminal Law (Ireland) Amendment Bill further discussed by Viscount Alcock, Mr. Broadhurst, Mr. B. Coleridge, Mr. de Lisle, and Lord G. Hamilton.

March 31.—The debate resumed by Mr. Labouchere, who was followed by Mr. G. W. Balfour, Mr. H. W. Lawson, Mr. Campbell-Bannerman, and Sir R. Webster.

LOBDS. Earl Cadogan introduced the Irish Land Bill, which, after some remarks from Earl Granville, Earl Cowper, and Lord Dunraven, was read a first time. The Lord Chancellor's Bill for the better registration and transfer of land also read a first time.

April 1.—**COMMONS.** Mr. Parnell moved an amendment to Mr. Balfour's motion. A discussion ensued. Mr. T. P. O'Connor, at half-past 12, moved the adjournment of the debate, which was defeated by a majority of 107 votes. After a motion for the adjournment of the House had been defeated, the Closure was carried by 361 to 253, and the Criminal Law (Ireland) Amendment Bill was read a first time without a division; the Gladstonian Liberals and Nationalist members, having left the House after the division on the Closure, refusing to vote on the first reading of the measure.

LOBDS. The Railway and Canal Traffic Bill passed through Committee, and the House adjourned for the Easter recess to April 18.

April 4.—**COMMONS.** Mr. Chaplin called attention to words used by Mr. Conybeare in reference to the Speaker's action on Friday (April 1) night, when the Closure was moved. Mr. Conybeare expressed regret, and explained the position he desired to take up. On the motion for going into Committee of Supply, questions affecting harbour loans and the emigration of pauper children were discussed.

April 5.—On the order for second reading of the Crimes Bill, Sir B. Samuelson moved an amendment that the Bill should not be further proceeded with. A debate ensued.

April 6.—Debate on Crimes Bill continued by Mr. T. Lea, Mr. Lees, Mr. A. Elliot, Mr. A. Acland, and Mr. Bryce.

April 7.—House adjourned for Easter recess.

April 12.—**COMMONS.** House reassembled after Easter. Colonel King-Harman appointed Parliamentary Under Secretary for Ireland. Mr. Holmes resumed debate on second reading of the Crimes Bill. Mr. Childers, Mr. J. Redmond, the Home Secretary, and Mr. Stansfeld also spoke.

April 13.—Lord H. Bruce, Sir H. Holland, and the Solicitor-General for Scotland spoke in favour of the Crimes Bill, which was opposed by Sir W. Foster, Mr. Gully, Mr. W. H. James, and Sir U. Kay-Shuttleworth.

April 14.—Chancellor of the Exchequer made a statement with regard to foreign bronze coins. Debate on the Crimes Bill continued by Mr. Baginbally, Sir L. Playfair, Mr. Ritchie, Sir J. Goldsmid, Mr. Whitbread, and Mr. F. Fulton.

April 15.—Sir W. Harcourt resumed debate on the Crimes Bill, and was followed by Mr. Plunket and Mr. E. Russell. Colonel Saunderson, in the course of his speech, accused the Nationalist members of associating with men whom they knew to be murderers. Mr. Healy hereupon called Col. Saunderson a liar, and, refusing to withdraw, was suspended. A stormy scene ensued, in which Col. Saunderson and Mr. Sexton were the prominent personages.

April 18.—Mr. Sexton resumed debate on the Crimes Bill. Lord Hartington, Mr. Gladstone, Mr. A. J. Balfour, and Mr. Parnell also spoke. The last-named member characterised a letter in the *Times*, purporting to have been written by him, as a forgery. On a division, Sir B. Samuelson's amendment was rejected by 370 votes to 269. The Bill was then read a second time.

LOBDS. The House reassembled after the Easter recess.

April 19.—**COMMONS.** Discussion on harbours of refuge, Sunday delivery of letters, and agricultural education. The House counted out.

April 20.—The Police Enfranchisement Bill read a second time.

April 21.—The Chancellor of the Exchequer made his Budget statement. He stated that there was a surplus for the past year of £776,000. He estimated the revenue for the ensuing year at £91,155,000, and the expenditure at £90,180,000. He proposed to reduce the income-tax by a penny, also the duty on tobacco by fourpence per lb. The tax on marine policies would also be reduced, and the sum of £50,000 would be granted in aid of arterial drainage in Ireland. Sir W. Harcourt and Lord R. Churchill criticised the Budget, and protested against the artificial enlargement of a surplus by a suspension of a debt payment.

LOBDS. Earl Cadogan moved the second reading of the Irish Land Law Bill. Lord Denman moved that it be read a second time that day six months. Among those who took part in the debate were Lord Spencer, the Earl of Carnarvon, Lord Fitzgerald, Lord Ashbourne, and the Marquis of Ripon.

April 22.—The Duke of Argyll resumed the debate on the Irish Land Law Bill. Among the subsequent speakers were the Duke of Abercorn, Lord Cowper, Lord Granville, and the Marquis of Salisbury, who said that the Government intended to stand or fall by the measure. The Bill was read a second time.

COMMONS. Lord Hartington explained that his recent statements with reference to Mr. Dillon were based on the charges in the *Times*. In referring to those charges he was not bound to substantiate them. Mr. Dillon replied to the charges in detail. In going into Committee of Supply several subjects were discussed, among them being the prevalence of boycotting and intimidation in the rural districts of England by the Primrose League.

April 25.—Debate on the Budget. Mr. Gladstone severely criticised the proposals, especially those for reducing the annual payment for the redemption of the National Debt. The proposals ultimately agreed to.

LOBDS. The Land Transfer Bill read a second time.

April 26.—**COMMONS.** On the motion to go into Committee on the Crimes Bill, Mr. R. T. Reid moved an amendment, declaring that the House declined to proceed further with the

measure until it had before it the full scheme for the relief of tenants against excessive rents in the shape in which it might pass the House of Lords. Mr. Shaw-Lefevre seconded it, and Mr. A. J. Balfour replied to the objection urged against the Bill. The debate was continued by Viscount Wolmer, Mr. Mundella, Mr. Dillon, and others.

April 27.—Debate on Mr. Reid's amendment continued.

April 28.—Lord J. Manners and Mr. J. Morley concluded debate on the amendment, which was rejected by 341 votes to 240.

LOARDS. The Tithe Rent Charge Bill read a second time.

April 29.—Discussion on mail route to China and Japan *via* Canadian Pacific Railway. The Railway and Canal Traffic Bill passed through Committee.

COMMONS. House went into Committee on the Crimes Bill.

May 2.—Crimes Bill in Committee; several amendments disposed of after the Closure had been applied.

LOARDS. Discussion on the New Hebrides.

May 3.—**COMMONS.** Sir Charles Lewis called attention to an article published by the *Times* on the previous day, charging Mr. Dillon with having, in his speech in the House on the 22nd of April, when excusing his connection with P. J. Sheridan, "invincible, dynamitar, and assassin," committed wilful and deliberate falsehood, and moved that it was a breach of privilege. After some discussion Mr. W. H. Smith moved the adjournment of the debate, which was eventually carried by 213 votes to 174, and the House went into Committee on the Crimes Bill.

May 4.—Mr. W. H. Smith stated that the Government did not regard the impugned article in the *Times*, relating to Mr. Dillon, as a breach of privilege; but, acknowledging the gravity of the circumstance, and the claims of Irish members to have a full investigation into the charges against them, they suggested to the aggrieved parties that the Attorney-General, coupled with any Queen's Counsel they might select, should be instructed to prosecute the *Times*. A discussion ensued, in which the Irish members refused this offer. The Solicitor-General moved an amendment, declining to treat the *Times'* article as a breach of privilege. Mr. Gladstone gave notice he would move that a Select Committee be appointed to inquire into the charges.

May 5.—Sir C. Lewis's motion defeated by 297 votes to 218, whereupon the amendment of the Solicitor-General became a substantive motion. Mr. Gladstone then moved his amendment for a Select Committee to inquire into the charge, and a debate ensued.

LOARDS. Railway and Canal Traffic Bill read a third time.

May 6.—Mr. Gladstone's amendment for a Select Committee on the *Times'* charges rejected by 317 votes to 233.

May 9 to 11.—Committee on the Crimes Bill.

May 12.—A Bill to enable the Duke of Connaught to leave India for the purpose of attending the celebration of the Queen's Jubilee in London, without forfeiting his Indian command, was read a second time by 318 votes to 45.

May 13.—Committee on the Crimes Bill.

LOARDS. Lord Denman introduced a Bill on the subject of limiting the duration of speeches in Parliament, and it was read a first time.

May 16.—The Police Enfranchisement Bill read a second time. The Irish Land Law Bill considered in Committee.

COMMONS. Supply.

May 17 to 20.—Committee on the Crimes Bill. On last-named day the Duke of Connaught's Leave Bill passed.

May 21.—**LOARDS** sat to pass Duke of Connaught's Leave Bill. The East India Stock Conversion passed through all its stages.

May 23.—The Tithe Rent Charge Bill passed through Committee. House adjourned for Whitsun recess to June 9th.

COMMONS. Committee on Crimes Bill. The sitting lasted till 5.30 A.M., and Clause 2 was passed.

May 24.—House adjourned for Whitsun holiday till June 6th.

June 6.—Supply: Civil Service Estimates, The Customs and Inland Revenue Bill and the National Debt Bill read a second time.

June 7.—Committee on Crimes Bill. Sir W. Harcourt and Mr. Parnell advised their respective followers only to divide the Committee on vital points.

June 8.—Manchester Ship Canal Bill read a first time.

June 9.—Committee on Crimes Bill. Mr. W. H. Smith intimated the intention of the Government that the Bill be reported to the House on the 17th inst. The sub-section relating to the change of venue was withdrawn on the motion of Mr. Balfour.

June 10.—Motion for urgency for the Crimes Bill carried by 245 votes to 93, after several previous divisions on amendments.

LOARDS. The Marquis of Salisbury made a statement as to the Egyptian Convention.

June 13.—Irish Land Bill passed through Committee.

COMMONS. Manchester Ship Canal Bill read a second time. Committee on the Crimes Bill.

June 14—15.—Committee on the Crimes Bill.

June 16.—Motion by Mr. Dillon for the adjournment of the House to call attention to the Boddyke evictions, after occupying the whole of the night, rejected by 246 votes to 165.

LOARDS. Allotments for Cottagers Bill read a second time.

June 17.—Committee on Crimes Bill. At 10 P.M., in accordance with Mr. Smith's previous announcement, it was moved that Clause 6, then under discussion, stand part of the Bill. The Irish members then left the House, and the motion was carried by 332 votes to 165. The remaining clauses were agreed to without division. The Bill was then reported to the House.

June 20.—Committee of Supply.

LOARDS. Land Transfer Bill passed through Committee.

June 21. Parliament did not sit owing to Jubilee Thanksgiving Service at Westminster Abbey.

June 22.—**COMMONS.** Coal Mines Regulation Bill considered in Committee.

June 23.—Reginald Bidmead appeared at the Bar, and the Speaker pronounced the censure of the House upon him for having forged upwards of a thousand signatures to petitions in favour of the Coal and Wine Dues.

LOARDS. The Pluralities Acts Amendment Bill read a third time.

June 24.—**COMMONS.** Coal Mines Regulation Bill in Committee.

June 27.—Report stage of the Crimes Bill. Mr.

F. Morley proposed clause limiting the duration of the Act to three years, which, on a division, was negatived by 160 votes to 119.

LOARDS. Land Transfer Bill passed through Committee.

June 28.—Metropolitan Open Spaces Acts Extension Bill read a second time.

COMMONS. Crimes Bill continued.

June 30.—Discussion on the Egyptian Convention. Motion by Mr. W. H. Smith that the deport stage of the Crimes Bill should be closed on Monday (July 4th), carried by 220 to 120.

LOARDS. Irish Land Bill passed through Committee.

July 1.—Irish Land Bill passed through the Report stage.

COMMONS. Motion by Mr. Bradlaugh for the compulsory acquirement of waste lands by Corporations, rejected by 173 votes to 97.

July 4.—Motion that Government business have precedence during remainder of the session carried by 146 to 85. East India and China Mail Contract agreed to.

LOARDS. Irish Land Bill passed.

July 5.—First Offenders Bill read second time.

COMMONS. Motion for the adjournment of the House in connection with the arrest of Miss Cass in Regent Street, carried against the Government by 153 votes to 148.

July 6.—Supply.

July 7.—On the motion for the third reading of the Crimes Bill, Mr. Gladstone moved its rejection.

LOARDS. Report of Amendment to the Land Transfer Bill disposed of.

July 8.—**COMMONS.** Crimes Bill read a third time, and passed by 349 votes to 262.

July 11.—Motion by Sir W. Lawson that the lending of carriages by Peers at election times for the conveyance of voters is a breach of privilege, rejected by 196 votes to 167. Mr. Balfour moved the second reading of the Land Law (Ireland) Bill.

LOARDS. Crimes Bill read a first time.

July 12.—The Royal Assent given to the Manchester Ship Canal Bill.

COMMONS. Debate on the second reading of the Irish Land Bill.

July 14.—Irish Land Bill read a second time without a division.

LOARDS. Crimes Bill read a second time.

July 15.—Crimes Bill passed through Committee.

COMMONS. Supply: Civ Service votes; during the discussion the closure was applied.

July 18.—A question of privilege raised by Mr. W. Long on account of some objectionable language used by Dr. Tanner in the lobby of the House. Motion to suspend Dr. Tanner. Committee of Supply on Navy Estimates.

LOARDS. Crimes Bill read a third time.

July 19 and 20.—**COMMONS.** Supply on Civil Service Estimates.

July 21.—Dr. Tanner apologized to the House for the improper language used by him to Mr. Long. Irish Land Bill in Committee.

July 22.—Supply: Discussion on vaccination.

July 25 to 30.—**COMMONS.** Irish Land Bill in Committee. On the 28th a "scene" occurred; Mr. T. Healy was suspended for using threatening language to Mr. de Lisle.

July 28.—**LOARDS.** Allotments and Cottage Garden Compensation Bill read a second time.

August 1.—Discussion on the New Hebrides.

COMMONS. Committee on Irish Land Bill.

August 2.—**LOARDS.** Allotments Bill and Merchandise Marks Bill passed.

COMMONS. Irish Land Bill in Committee.

August 3.—Channel Tunnel Bill rejected by 253 votes to 107. Irish Land Bill passed through Committee.

August 4.—Supply: Army Estimates.

August 5.—Irish Land Bill recommitted.

August 8.—Supply: Civil Service Estimates.

LOARDS. Discussion on the removal of the National Rifle Association Meeting from Wimbledon Common.

August 9.—The Margarine (Fraudulent Sale) Bill read a third time.

COMMONS. The Technical Instruction Bill discussed on second reading.

August 10.—Several Scotch measures read a second time, including the Lunacy Districts Bill, the Secretary for Scotland Bill, and the Technical Instruction Bill.

August 12.—Debate on the motion to consider the Lords' amendments to the Commons' amendments on the Irish Land Law Bill.

August 13.—Committee of Supply on the Education Estimates.

August 15, 16, 17.—Coal Mines Regulation Bill considered in Committee.

August 18.—Ministerial statement by Mr. W. H. Smith as to the remaining business for the session. Debate on the Lords' Amendments to the Irish Land Law Bill.

August 19.—The proclamation of the Irish National League, under Section 6 of the Crimes Act, announced in both Houses.

August 22 and 23.—Committee of Supply on Civil Service Estimates.

August 25.—Mr. Gladstone moved an address to the Crown for the withdrawal of the proclamation of the Irish National League.

August 26.—Mr. Gladstone's motion negatived by 272 votes to 194.

LOARDS. Savings Banks Bill and Government Annuities Bill read a second time.

August 29 to 31.—Committee of Supply on Irish votes.

September 1.—Adjournment of the House moved to discuss proclamation of a National League meeting.

Sept. 2.—Irish votes in Committee of Supply.

September 3.—Coal Mines Regulation Bill read a third time.

September 5.—Irish votes completed.

September 6.—Civil Service Estimates finished.

LOARDS. Bill for limiting speeches in Parliament rejected.

September 7.—Coal Mines Regulation Bill and Allotments Bill read a second time.

COMMONS. Navy Estimates in Committee of Supply.

September 8.—Supply finished.

LOARDS. Coal Mines Regulation Bill and Allotments Bill passed through Committee.

September 9.—**COMMONS.** Appropriation Bill introduced, and Indian Budget explained.

September 12.—On the motion to go into Committee on the Appropriation Bill, a debate was initiated by Sir W. Harcourt on the policy of the Government: Mr. Gladstone, Mr. Parnell, and others spoke. After the adjournment of the debate had been moved, the Bill passed through Committee. During the discussion of the Bill a scene occurred, and Mr. C. Graham and Mr. E. Harrington were suspended.

September 16.—Parliament prorogued by Royal Commission.

TABLE OF THE STATUTES

Passed in the Second Session of the Twenty-third Parliament of the United Kingdom of Great Britain and Ireland (50 & 51 Vict. A.D. 1887).

PUBLIC GENERAL ACTS.

1. **CONSOLIDATED FUND (No. 1).** An Act to apply certain sums to the service of the years ending 31st March, 1887 and 1888.
2. **ARMY (ANNUAL).** To provide for the Discipline and Regulation of the Army.—Continuing for one year the Army Act, 1881, removing doubts as to the meaning of certain parts of that Act, and fixing the rates to be paid to licensed victuallers for accommodation of troops billeted upon them.
3. To amend the Acts relating to County Courts so far as regards the payment of certain expenses.
4. To amend the provisions of the Merchant Shipping (Fishing Boats) Acts.—Defines "register tonnage" as "gross tonnage" for certain purposes. Extends to skippers of fishing vessels certain provisions of Merchant Shipping (Fishing Boats) Act, 1883, concerning wages and discharge, discipline, and summary settlement of disputes. Compels owners to render detailed accounts to skippers and crews in certain cases. Requires every trawler of 25 tons register and upwards to have on board a certificated second hand. Authorizes Board of Trade to make regulations, subject to approval of Parliament, as to conveyance of fish from trawlers to collecting vessels; to prescribe fees payable on engagement or discharge of fishing crews, and to inquire into casualties.
5. **ISLE OF MAN.** To amend the law respecting the Customs Duties.—Empowers Court of Tynwald, with consent of Treasury, to impose, abolish, or vary customs duties provisionally, subject to approval of Parliament. Also alters the duties on wine imported into the Isle of Man.
6. To amend the Supreme Court of Judicature Act (Ireland), 1877.
7. To amend the Customs Consolidation Act, 1876.—Makes guilty knowledge a necessary condition of forfeiture and imprisonment.
8. To amend the Incumbents of Benefices Loans Extension Act, 1886.
9. To remove the Disabilities of the Police to vote at Parliamentary Elections.
10. To enable the Duke of Connaught to return to England for a limited time.
11. For giving facilities for the conversion of India 4 per Cent. Stock into India 3½ per Cent. Stock.
12. To amend the Bishopric of Truro Act, 1876, and the Truro Chapter Act, 1878.—Contains provisions as to the government, endowment, &c., of Truro Cathedral and of the Parish Church of St. Mary, which forms part thereof.
13. To extend, in certain cases, the provisions of the Superannuation Act, 1859.
14. To apply the sum of £13,675,659 out of the Consolidated Fund to the service of the year.
15. To grant certain Duties of Customs and Inland Revenue.—Continues the duty on tea; reduces the duty on tobacco, and restricts the quantity of moisture which it may contain; reduces the duty on certain sea policies, and the period within which foreign sea policies must be stamped; increases the stamp duties on transfers of certain stock &c., and provides for commutation of such duties in certain cases; fixes the rate of income-tax for the year, and makes provision as to its assessment and collection.
16. To amend the Law respecting the National Debt and the charge thereof.—Reduces permanent annual charge for National Debt, repeals National Debt Act, 1881, so far as it provides for an annual sinking fund; and authorizes exchange of terminable annuities created under section 2 of the National Debt Act, 1883, for longer terminable annuities and application of old sinking fund to payment of Friendly Societies Debt. Authorizes advance by National Debt Commissioners of money for local loans; establishes local loans fund under control of the Commissioners; authorizes creation of 3 per cent. local loans stock; and makes provisions as to the management, &c. of such fund and stock.
17. To amend the Metropolis Management Acts.—Separates the parish of St. Mary, Battersea, excluding Penge, from the Wandsworth District, and gives it control of its own local affairs and a representative at the Metropolitan Board of Works. Also abolishes the Board of Works for the Westminster district, thus giving the United Vestry of St. Margaret and St. John direct control of the local expenditure.
18. To amend the Trusts (Scotland) Act, 1867.—Empowers trustees to reduce, temporarily or permanently, the rent of leasehold farm lands, &c.
19. To provide for the Fencing of Quarries.
20. **CRIMINAL LAW AND PROCEDURE (IRELAND).** An Act to make better provision for the prevention and punishment of Crime, and for other purposes relating thereto.—Provides that, by order of the Attorney-General, inquiries may be held by resident magistrates, and witnesses examined upon oath, although no person may be charged, whenever it appears upon sworn information that certain offences have been committed in a proclaimed district. Gives power to two magistrates to try persons accused of certain crimes under the Act, and to inflict punishment not exceeding six months' hard labour. Power is given to change the place of trial for a crime committed in a proclaimed district, against which change, however, the defendant is given a right of protest. Power is also given to either the defendant or the Attorney-General to demand a Special Jury. The Lord Lieutenant in Council is empowered to declare by proclamation that the provisions of the Act relating to proclaimed districts, or any of them, shall be in force in any district, and by special proclamation, subject to certain limitations, to declare that any association formed for the commission of crimes, or carrying on operations for or by the commission of crimes, or encouraging or aiding persons to commit crimes, or promoting or inciting to violence or intimidation, or interfering with the administration of the law, or disturbing the maintenance of law and order, is a dangerous

- association, and such association may then be suppressed; and any person calling or attending a meeting of, or in any way taking part in the proceedings of, such suppressed association is declared guilty of an offence punishable under the Act. Such special proclamation must be laid before Parliament within seven days, and may be set aside within fourteen days after being so laid before Parliament, upon Address to the Crown from either House; if issued during the recess it shall expire at the end of a week from its date of issue unless Parliament be, during such week, summoned to meet within twenty days from the date of the summons.
21. To limit the Powers of the Water Companies to cut off the Tenants' Water Supply where the rate is paid by the landlord.
22. To amend the Public Libraries Acts.—Contains provisions which, by greatly diminishing the necessary cost of public libraries, will render possible their establishment in small towns, villages, &c. Owing to the small area of metropolitan parishes, the inhabitants of neighbouring districts often derive as much benefit from a public library as those of the parish in which it is situated, who have hitherto defrayed its entire cost. This difficulty is obviated by conferring upon district boards of works in the metropolis power to establish and maintain public libraries.
23. To amend the Incumbents Resignation Act, 1871.—Enacts that pensions hereafter granted to retiring incumbents shall (with certain exceptions) vary with the tithes averages, and the income of a benefice shall not be reduced by pensions below the sums necessary for due performance of the services of the church; and makes other alterations in the existing law.
24. To amend the Crofters' Holdings (Scotland) Act, 1886.—Enables Crofters' Commission to protect effects of crofters from sale for recovery of arrears while an application to fix a fair rent awaits decision; also, to deal with arrears under 49 & 50 Vict. c. 29, s. 6, although promissory note, &c. may have been given for such arrears.
25. To permit the conditional Release of First Offenders in certain cases.—Enables court to release, upon probation, any person convicted of an offence punishable with not more than two years' imprisonment, against whom no previous conviction is proved. Provision is made for rearrest and punishment of probationers failing to observe the conditions of their release.
26. To provide Compensation to the Occupiers of Allotments and Cottage Gardens for Crops left in the ground at the end of their tenancies.—Provides that, notwithstanding any agreement to the contrary, compensation for standing crops, for labour expended and manure applied since last crop was taken, and for unexhausted improvements made with landlord's consent, shall be paid by landlords to outgoing tenants of allotments and cottage gardens.
27. To amend the Law with respect to Weighing Cattle in Markets and Fairs.—The market authority of any fair or market at which cattle are sold, unless specially exempted, is to weigh cattle on sale whenever required to do so, and is to provide suitable buildings, weighing machines, &c., for the purpose.
28. To consolidate and amend the Law relating to Fraudulent Marks on Merchandise.—Enacts that every person who forges any trade mark, or falsely applies to goods or their coverings, labels, &c., any trade mark or colourable imitation of a trade mark, or any false trade description, or who disposes of or has in his possession any instrument for forging a trade mark, or who causes any of the above things to be done, shall be guilty of an offence against the Act; and also that any person selling or having in his possession for sale any goods falsely marked shall be guilty of an offence unless he proves that he acted innocently, and gives all the information in his power to the prosecutor. Persons so offending are rendered liable to fine and imprisonment not exceeding two years, with or without hard labour, and to forfeiture of the articles concerned. The marking on a watch-case is to be considered as applying to the whole watch unless otherwise shown. Any person in the United Kingdom who is accessory to the commission abroad of any act which if committed here would be punishable under the Act is rendered liable to prosecution as if he were a principal. Very comprehensive definitions of "trade mark," "trade description," &c., are adopted.
29. For the better Prevention of the Fraudulent Sale of Margarine.—Enacts that all imitations of butter shall be sold as "Margarine," and that the wrappers or packages in which they are sold shall be so marked; that the onus of proof shall lie upon the vendor whenever the defence is set up that he believed margarine sold or kept for sale by him to be butter; and that expenses of prosecutions under the Act may be paid from penalties.
30. To amend the Settled Land Act, 1882.
31. To amend the Acts relating to the Raising of Money by the Metropolitan Board of Works; and for other purposes.
32. For extending certain Provisions of the Metropolitan Open Spaces Acts, 1877 and 1881, with Amendments, to Sanitary Districts throughout England, Wales, and Ireland; and for other purposes.
33. To amend the Land Law (Ireland) Act, 1881, and the Purchase of Land (Ireland) Act, 1885.—Extends to leaseholders, with certain exceptions, the benefits of the Land Law (Ireland) Act, 1881: provides that proceedings in ejectment may be met by an application to fix a fair rent, and that the application and ejectment may be disposed of at the same time; that six weeks after judgment in ejectment proceedings has been obtained the landlord shall serve upon the tenant a notice of ejectment instead of evicting him, and that thereupon the tenant shall become a caretaker, and the period of redemption shall run from that day. Gives power to any middleman to surrender his holding when the rent received by him has been reduced by the Court to a sum less than he pays. Limits the definition of "town parks." Makes provisions for facilitating the purchase by tenants of their holdings and for disposal of guarantee funds, &c.; reduces the rate of interest on certain outstanding loans, and extends the periods for repayment; provides for an annual readjustment in 1887, 1888, and 1889.

- of judicial rents fixed before 1886; gives power to the Court to stay eviction and to order payment by instalments when a tenant is unable, through no fault of his own, to pay a judgment debt, &c.; and gives right of appeal in certain cases.
34. For the transfer to the Metropolitan Board of Works and the maintenance of certain public parks and works in the metropolis:—Victoria Park, Battersea Park, Kennington Park, Bethnal Green Museum Garden, Chelsea Embankment, and Westminster Bridge are by this Act transferred to the Metropolitan Board of Works, and provision is made for their maintenance, management, &c.
35. To simplify and amend the Criminal Law of Scotland and its procedure, and to alter the Constitution of the Judiciary and Sheriff Courts in Scotland.
36. For amending the Allowances payable to Clerks of General Meetings of Lieutenancy.—Clerks hereafter appointed are to receive no allowances under the Volunteer and Yeomanry Acts, and the allowances of certain existing clerks are to be reduced.
37. To grant money for the purpose of certain Local Loans; and for other purposes relating to Local Loans.—Authorizes issue, by National Debt Commissioners, of money to certain public authorities for the purposes of local loans, and the writing off from the account of assets of the Local Loans Fund of certain outstanding debts; extends to additional local authorities the power of guaranteeing harbour loans; and applies the surplus of the Bases Lights Fund to the building of two additional lighthouses in Ceylon.
38. To provide for the earlier closing of premises licensed for the sale of Exciseable Liquors in Scotland.—Confers upon licensing authorities power to fix any time not earlier than ten nor later than eleven for closing public-houses, &c.
39. To make provision for altering and varying Lunacy Districts in Scotland.
40. To amend the Acts relating to Savings Banks and to the Purchase of Small Government Annuities, and to assuring Payments of Money after Death.—Empowers Postmaster-General to make Post Office savings banks regulations for payment or transfer of deposits standing in the names of minors or of persons deceased or of unsound mind—for transfer of sums from one account to another—for determining what evidence shall be accepted by Postmaster-General for purposes of payment or transfer, and what receipts shall be a good discharge for him—for applying to Post Office savings banks all or any of the provisions of the Trustee Savings Banks Act, 1863, with or without modification—and for nomination by a depositor of a person or persons to whom his deposits, not exceeding *£100*., shall be paid on his death; authorizes Treasury to extend all or any of these regulations to Trustee Savings Banks; gives power to vary the minimum sum which may be invested in stock, and provides that money invested shall not be included in computing the maximum amount allowed to be deposited in the year, and that deposits standing to account of minors or lunatics may be invested in stock; sanctions insurances on lives of third persons; and fixes price of certificates of birth, death, and marriage required for savings bank purposes.
41. To remove doubts as to the appointment of the Sheriff of Lanarkshire, and to confirm the same.
42. To amend and consolidate the Public Libraries (Scotland) Acts.
43. To amend the Stannaries Act, 1869.—Gives workmen's wages priority over other debts, and provides for their due and prompt payment; gives miners control of mine-club funds, &c.; and makes other provisions for the security of the workmen; also contains enactments as to registration, winding-up, &c., of mining companies.
44. To enable Her Majesty by Order in Council to unite the Colonies of Trinidad and Tobago into one Colony.
45. For further amending the Enactments relating to Offices, Stations, and Buildings for the Metropolitan Police Force.
46. To amend and extend the Law relating to Truck.—Extends the Truck Act, 1831, so as to include all workmen except farm servants; provides that customary and other advances of wages shall be paid without deduction; that orders for goods shall not be considered as equivalent to wages; that dealing at particular shops shall not be made a condition of employment; and that artificers shall be paid in cash and not by barter for certain classes of goods made at home. Also contains provisions as to penalties, &c.
47. To provide for examination into the affairs of Trustee Savings Banks, and to remove doubts as to the Law relating to the winding-up of such banks.
48. To facilitate the provision of Allotments for the Labouring Classes.—Authorizes any district sanitary authority, upon requisition, to purchase or hire, by agreement, suitable land for allotments, but only at such cost as the rent of the allotments will recoup. Failing such agreement the county authority may make a provisional order, subject to confirmation by Parliament, conferring compulsory powers upon the district authority. The land acquired shall be drained, fenced, &c., by the district authority, who shall make regulations for the letting, &c., of the allotments. No person shall hold allotments amounting to more than one acre, and sub-letting shall not be allowed. The rents shall be sufficient to ensure sanitary authority from loss. Not more than a quarter's rent shall be required in advance. Common pastures may in certain cases be provided. Provisions are also made as to cost, management, &c.
49. To amend the Charitable Trusts Acts, 1853 to 1869, so far as respects the officers of the Charity Commissioners for England and Wales, and the Official Trustees acting under those Commissioners.
50. To apply a sum out of the Consolidated Fund to the service of the year, and to appropriate the Supplies granted in this Session of Parliament.
51. To amend the Valuation of Lands (Scotland) Amendment Act, 1867.
52. To amend the Secretary for Scotland Act, 1885.
53. For repealing certain Enactments relating to Escheaters and the Procedure in cases of Escheat; and for regulating the Procedure in such cases. Repealing obsolete Acts, and authorizing Lord Chancellor to make rules for procedure.
54. To enable Her Majesty to provide for the

- Government of Her Possessions acquired by Settlement.
5. To consolidate the Law relating to the Office of Sheriff in England, and to repeal certain Enactments relating to Sheriffs which have ceased to be in force or have become unnecessary.
 6. To amend the Friendly Societies Act, 1875.
 7. To provide for the Registration of Deeds of Arrangement.
 8. To consolidate with amendments the Coal Mines Acts, 1872 and 1886, and the Stratified Ironstone Mines (Gunpowder) Act, 1881.—Consolidates existing law, with important amendments as to construction and use of safety-lamps, blasting, timbering, weighing, &c. Establishes two classes of certificates of competency—the first for managers, the second for under-managers—and enacts that daily supervision shall be exercised either by the manager or the under-manager; the latter having, in the manager's absence, the same responsibility as a manager. Removes, with certain exceptions, the restrictions on prosecution of owners, &c. by workmen.
 59. For further promoting the Revision of the Statute Law by Repealing Enactments which have ceased to be in force or have become unnecessary.
 60. To amend the Prison (Officers' Superannuation) Act, 1878, as to Scotland.
 61. For appointing Commissioners to inquire and report as to the Boundaries of certain Areas of Local Government in England.
 62. To amend in certain minor particulars some of the Enactments relating to Merchant Shipping and Seamen.
 63. To continue various expiring Laws.
 64. To facilitate the Establishment of Technical Schools in Scotland.—Authorizes School Boards (now existing in every parish and burgh in Scotland) to establish and maintain technical schools, and to borrow money for that purpose.
 65. To facilitate the construction of Tramways by Her Majesty's Principal Secretary of State for the War Department.
 66. To amend the Law relating to the discharge of Bankrupts and the closure of Bankruptcy Proceedings.
 67. To amend the Superannuation Acts, 1834 and 1859.—Authorizes grant of gratuities or annual allowances to persons injured in the service of the State, and of retiring allowances, not exceeding the amounts to which their length of service would entitle them under the ordinary pension scale, to persons removed from office for inefficiency; allows temporary service, if continuous with and merging into permanent service, to count for pension; authorizes the allowance, under certain circumstances, of gratuities on retirement to persons employed in public departments who are not entitled to superannuation; and makes certain provisions as to half-pay and pensions of naval and military officers, and other matters.
 68. To explain Section 26 of the Pluralities Act, 1838.
 69. To amend the Conveyancing (Scotland) Act, 1874, and the Conveyancing (Scotland) Act (1874) Amendment Act, 1879.
 70. To amend the Appellate Jurisdiction Act, 1876.
 71. To consolidate the Law relating to Coroners.
 72. To amend the Law relating to Expenses of Local Authorities.—Enacts that expenses which have been sanctioned by the Local Government Board shall not be disallowed by district auditors.
 73. To amend the Copyhold Acts, and for the Enfranchisement of Copyhold and Customary Lands.—Contains provisions for facilitating the conversion of copyhold into freehold land upon payment of compensation, either by a gross sum or an annual rentcharge, to the lord of the manor, and of the steward's fees.
