EXHIBITIONS, PUBLIC BUILDINGS, THEATRES, AND OTHER PLACES AND OBJECTS OF INTEREST IN THE METROPOLIS AND SUBURBS.

The following List comprises most of the Objects of Interest to persons visiting the Metropolis, also some of the Suburban Resorts frequented by Londoners, with the times of opening, prices of admission, and railway fares. But as many of these frequently vary, absolute accuracy is impossible. The daily papers, however, will generally, in their advertisement columns, supply the necessary particulars. Except where otherwise stated, "Open Daily" means every Week-day, and *not* on Sundays.

EXHIBITIONS, &c.

ACADEMY, ROYAL, Burlington House, Piccadilly.—Exhibition of works by living artists, open from 1st Monday in May to 1st Monday in August, from 8 to 7; Admission, 1s.; Catalogue, 1s. LIBRARY U. OF I.

In revising the following List of Fairs the Editor has received much help from numerous correspondents, for whose aid he feels grateful; many errors have been corrected, but he fears that some still remain undetected.

ANGLESEY—

* 1865—Gladateur, first French bred horse that won; 1867—snow fell during the day; 1869—second received 300 sovs. and the third 100 sovs. out of the stakes; 1872—start altered to New Level Post; 1876—Kisber, the first Hungarian bred horse that won. The race has been run in June in the following years—1791, 1794, 1797, 1802, 1808, 1810, 1813, 1821, 1824, 1829, 1832, 1835, 1840, 1862, 1870, 1874, 1878.

† This race was established in 1776, but did not receive the name until 1778, when it was named out of compliment to Colonel St. Leger, and run for the first time on Doncaster town moor.

‡ Walked over and divided after a dead heat with Formosa.

¶ A dead heat—stakes divided.

1887	Putney to Mort.	Camb.	20 52	3/4 lengths.

In 1831 not rowed owing to prevalence of cholera. In 1838 challenge of 1834 still unaccepted.
 * First race rowed in outriggers.
 † First race in the present style of boats without keels.
 ‡ Sliding seats used for first time.
 § The Oxford bow-man caught a crab and sprang his oar when leading.
 ¶ Rowed on a Thursday.
 * Rowed on a Monday.

CRICKET.

OXFORD & CAMBRIDGE.

Yr.	Winner.
1868	Camb. won by 168 runs.
1869	Camb. won by 58 runs.
1870	Camb. won by 2 runs.
1871	Oxford won by 8 wickets.
1872	Camb. won by 1 ins. & 166 r.
1873	Oxford won by 3 wickets.
1874	Oxford won by 1 ins. & 92 r.
1875	Oxford won by 6 runs.
1876	Camb. won by 9 wickets.
1877	Oxford won by 10 wickets.
1878	Camb. won by 238 runs.
1879	Camb. won by 9 wickets.
1880	Camb. won by 135 runs.
1881	Oxford won by 135 runs.
1882	Camb. won by 7 wickets.
1883	Camb. won by 7 wickets.
1884	Oxford won by 7 wickets.
1885	Camb. won by 7 wickets.
1886	Oxford won by 133 runs.
1887	Oxford won by 7 wickets.

ETON AND HARROW.

Yr.	Winner.
1876	Eton won by 1 ins. & 24 rns.
1877	Dwn. match; rain 2nd day.
1878	Harrow won by 21 runs.
1879	Dwn. match; rain 2nd day.
1880	Harrow won by 96 runs.
1881	Harrow won by 112 runs.
1882	Drawn.
1883	Drawn; rain 2nd day.
1884	Drawn; rain 2nd day.
1885	Harrow won by 3 wickets.
1886	Eton won by 6 wickets.
1887	Eton won by 5 wickets.

DOGGETTS COAT AND BADGE.

Yr.	Winner.
1876	C. T. Bulman, Shadwell.
1877	J. Tarryer, Rotherhithe.
1878	J. E. Taylor, Hermitage.
1879	Henry Cordery, Putney.
1880	Wm. Jas. Cobb, Putney.
1881	G. Claridge, Richmond.
1882	H. Audsley, Lambeth.
1883	James Lloyd, Chelsea.
1884	C. Phelps, Putney.
1885	G. Mackinney, Richmond.
1886	H. Cole, Deptford.
1887	W. G. East, Isleworth.

BILLIARD CHAMPIONSHIP.

Yr.	Winner.
1870	J. Bennett & B. Roberts, jr.
1871	Roberts, jr. & J. Bennett.
1872	W. Cook & J. Roberts, jr.
1873	W. Cook & J. Bennett.
1874	W. Cook & J. Roberts, jr.
1875	J. Roberts, jr. & b. Cook.
1876	J. Roberts, jr. & b. Cook.
1877	J. Roberts, jr. & b. Cook.
1880	J. Bennett & W. Cook.
1881*	J. Bennett & T. Taylor.
1885	J. Roberts, jr. & b. Cook.
1885†	Roberts, jr. & J. Bennett.

* Bennett resigned.
 † Roberts made the largest break of these matches—155. This and the previous match were 3,000 up; the others, with the exception of the first, 1000 up.

AQUATIC CHAMPIONSHIP.

Yr.	Winner.
1870	J. Bennett & B. Roberts, jr.
1871	Roberts, jr. & J. Bennett.
1872	W. Cook & J. Roberts, jr.
1873	W. Cook & J. Bennett.
1874	W. Cook & J. Roberts, jr.
1875	J. Roberts, jr. & b. Cook.
1876	J. Roberts, jr. & b. Cook.
1877	J. Roberts, jr. & b. Cook.
1880	J. Bennett & W. Cook.
1881*	J. Bennett & T. Taylor.
1885	J. Roberts, jr. & b. Cook.
1885†	Roberts, jr. & J. Bennett.

After Trickett had carried off the Championship to Australia in 1878, a Championship of England Cup was instituted, which, after being held in turn by R. W. Boyd, J. Higgins, and W. Elliott, was finally won by Hanlan, when he defeated the latter in 1879. G. Dubcar is at present the holder of a new England Championship Cup.

		ft.	in.
W. P. Phillips	23	2	1883
H. M. Johnson	10	5	1871
W. P. Phillips	6	4	1887
W. P. Phillips	4	10	1871
W. P. Phillips			

JUMPING (PROFESSIONALS).			
Event.	Name.	Distance.	Year
		ft.	in.
Running Long Jump	E. A. Johnson	21	6 $\frac{1}{2}$ 1879
Standing Long Jump	E. A. Johnson	11	1 1881
Running High Jump	E. A. Johnson	6	0 $\frac{1}{2}$ 1881
Standing High Jump	E. A. Johnson	5	3 1878

¹ The only one generally known is tolerably certain to be the same runner, when at their distance quite as quickly, is quicker. H. M. Johnson, while Geo. Seward's record is supported by any authority on the subject.

⁵ Six seconds less than the celebrated performance of Deerfoot (L. Bennett), the Canadian half-breed, in 1868.

² This performance is sometimes called in question; it is, however, certain that C. G. Wood ran 440 yds. in 49 $\frac{1}{2}$ secs. on July 3, 1886, and that he was not "pushed" at the finish.

⁶ The definition of an amateur in America appears to be altogether different from what it is in England; hence, so far as American amateurs are concerned, records made in England only are admitted here.

³ The same day, and in the same race, A. G. Le Maître also beat the previous record, his own, of 1 min. 14 secs., by at least three-fifths of a second.

⁷ The first mile in a three miles match in which Perkins was backed to walk the whole distance under 21 minutes.

⁸ J. W. Raby, of Elland, Yorkshire, came out first as an amateur, carrying off the seven miles race at the Amateur Championship Sports in 1882.

⁹ Before this extraordinary jump was executed, Brooks (of Oxford University) had already cleared 6 ft. 2 $\frac{1}{2}$ in., and P. Davin (at Carrick-on-Suir, Ireland) had equalled this with a jump of 6 ft. 2 $\frac{1}{2}$ in.

⁴ W. G. George's mile record, made after he had left the amateur ranks, in his famous match with Cummings, in Aug., 1886, beat the previous record by nearly 4 secs.

¹⁰ In pole-jumping the amateur representatives have altogether excelled professionals: T. Ray, of Ulverstone, having cleared the enormous height of 11 ft. 5 in.

¹ Mr. A. W. Rowe, once an amateur pure and simple, is now known as a pro-amateur, whatever that may mean; we regret that we are unable to explain this term, which is peculiar to America, and long may it remain there.

² The following records, which could not easily be tabulated, may also be of interest:—(1) tandem tricycle (Major Knox Holmes and F. S. Buckingham), 30 miles, 24. 1m. 20s. (1887); (2) tandem tricycle (Mr. and Mrs. J. S. Smith), 25 miles, 1h. 20m. 6s. (1887); (3) cycles of all kinds, E. Hale, 100 miles on the road, 6h. 46m. 7s. (1887).

³ It is scarcely possible as yet to distinguish skaters as amateurs and professionals; hence, here all are classed together.

FARES BY DISTANCE: If hired and discharged *within* the Four Mile Radius, for any distance not exceeding two miles. 1 0
 For every additional mile or part of a mile 0 6
 If hired *outside* the Four Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile. 1 0
 If hired *within*, but discharged *outside*, the Four Mile Circle, whole distance not exceeding one mile, *is*; exceeding one mile, then for each mile *ended* within the circle, *is*; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four Mile Circle. Four-wheeled Cabs, for one hour or less, *is*; two-wheeled Cabs 2 6
 For every additional quarter of an hour or part of a quarter, four-wheeled Cab, *is*; of a two-wheeled Cab 0 8
 If hired *outside* the Circle, wherever discharged, for one hour or less 2 6
 If above one hour, then for every quarter of an hour or less 0 8
 If hired *within*, but discharged *outside*, the Four Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should be particular in noticing these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by distance or by time:
LUGGAGE.—For each package carried outside the carriage 0 2

EXTRA PRISONS: For each above two (two children under 10 years of age count as one person) 0 6
 For each child under 10 years old when carried together with two or more persons 0 3

WAITING:—By distance: for every 15 minutes completed—if hired within the Four Mile Circle, four wheels, *is*; two wheels. 0 8
 If hired without Circle, 2 or 4 wheels 0 8

GENERAL REGULATIONS.—Fares are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles. If hired by time, he driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agreed beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s.

The driver of every hackney carriage shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any hackney carriage shall, when hired, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit, from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

In case of any dispute between the hirer and driver, the hirer may require the driver to drive to the nearest Metropolitan Police Court or Justice Room, when the complaint may be determined by the sitting magistrate without summons; or if no Police Court or Justice Room be open at the time, then to the nearest Police Station, where the complaint shall be entered, and heard by the Magistrate at his next sitting.

All property left in any hackney carriage shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor, at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner, such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries in respect of property left in a hackney or stage carriage should be made at the Lost Property Office, Great Scotland Yard.

On the 31st December, 1835, there were licensed in respect of public carriages 13,151 proprietors (6,877 hansoms, 3,873 clarences, and 2,401 stage carriages), 14,252 hackney drivers, 4,528 stage drivers, and 6,337 conductors.

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have three Days of grace allowed: thus, a bill dated 1 Jan. at two months' date is not due till March 4; but by a recent Act no Days of Grace are allowed on Bills drawn at sight or on demand; such must, therefore, be paid on presentation. Bills falling due upon "Bank Holidays" are payable the day after; those falling due on Sundays, on Good Friday, or Christmas Day, must be paid the day before.

THE FIRST DAY OF THE YEAR.

Readers of Parish Registers and other ancient documents are sometimes puzzled by the dates,

and especially by the apparent discrepancies in the time when the year commenced. It began:—

- 7th to 14th Centuries, at Christmas.
- 12th Century, by the Church, on March 25.
- 14th Century, by Civilians, same time.

In 1752 the New Style was introduced, and 1753 commenced on the 1st of January. Previous to this two dates were used, one for the civil year, and the other for the historical; the former commenced March 25, and the latter Jan. 1; thus we find the same event with two dates, e.g., Feb. 20, 1681–2. Another change was made in the calendar by the same Act, 24 Geo. II. c. 23; the day after September 2nd was accounted the *fourteenth*, hence the difference between Old and New Michaelmas and other days.

BIRTHS.—When a birth takes place, personal information of it must be given to the registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration thereof rests firstly on the parents. One of them must, within 42 days of the birth, give to the registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free of charge when it takes place within 42 days, unless either of the persons above named sends to the registrar a written request to come and register at his or her residence, or at the house where the child was born, when the registrar on so attending to register may claim a fee of one shilling. *After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees to him and the registrar.* After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees. It is important to persons of all classes to be able to prove their age and the place of their birth. The only legal proof of these is afforded by the civil registers, which the law now requires to be made as above described. Registration of birth in no respect lessens the importance and sanctity of the rite of baptism, or absolves churchmen from the duty of having their children baptized. The child's baptismal name may be inserted in the birth register within twelve months after the registration of the birth.

DEATHS.—When a death takes place, personal information of it must be given to the registrar, and the register signed in his presence, by one of the following persons:—1. The nearest relatives of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased in the same (registrar's) sub-district. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above named fail, 4. An inmate of the house, or the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased. The written notice will

be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is advisable that every death should be registered and a certificate of registry be obtained from the registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days, one of the persons above mentioned has not attended to the registration, the registrar may by written application require any one of them to come to him and do so, at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the registrar. Any person receiving such a certificate from the practitioner and not so delivering it, will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

CORONERS' INQUESTS are held in all cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are not understood where persons die of fevers, apoplexy, or some other visitation of God, and Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur, to make immediate communication, whilst the body is fresh, and, if possible, whilst it remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a juror is bound to attend, or, failing to attend, is liable to be fined in any sum not exceeding forty shillings. The exemptions of persons from serving on juries contained in Jury Acts do not apply to Coroners' inquests.

VACCINATION.

The parent of every child born in England must, within 3 months after the birth, or the per-

son having the custody of any child must within 3 months after receiving the custody of the child, have it vaccinated by some medical practitioner, or take it to the Public Vaccinator of the vaccination district in which the child shall be then resident, to be vaccinated. When the child is not vaccinated by the Public Vaccinator, the parent or custodian must also transmit a certificate of successful vaccination, signed by the medical practitioner, to the Vaccination Officer appointed by the Guardians of the district, within 7 days after the performance of the operation. For neglecting to procure vaccination, or to transmit the certificate as required, a penalty of 20s. is incurred.

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

NOTICE AND DECLARATION.—In case of a marriage intended to be procured at a Registrar's Office, it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A) to the Superintendent Registrar of the district within which the parties shall have dwelt for not less than seven days then next preceding, or if the parties dwell in the districts of different superintendent registrars, to give the like notice to the superintendent registrar of each district. Every such notice has to be accompanied by a solemn declaration by one of the parties that there is no lawful hindrance to such marriage. If the marriage is intended to be had by licence, it is necessary only for one of the parties to give notice to the superintendent registrar in whose district he or she has resided for the space of fifteen days immediately preceding; and if the other party reside in a different superintendent registrar's district, it is not requisite that notice of the intended marriage shall be given to the superintendent registrar in whose district the other party resides.

CERTIFICATE.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

LICENCE.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one whole day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the licence.

MARRIAGE CEREMONY.—After the expiration of twenty-one days after the entry of the notice if the marriage is intended to be had without licence, or of one whole day if by licence, the marriage may be contracted and solemnized at the office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties is required to declare as follows:—"I do

solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.;" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." A wedding-ring is usually required. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in all places where the Welsh tongue is commonly used.

FEEES FOR MARRIAGE AT REGISTRY OFFICE.

For entering notice of a marriage without licence into the marriage notice-book	£ s. d.
For entering notice of a marriage by licence into the marriage notice-book, 1s.; stamp duty, 2s. 6d.	0 1 0
For every certificate of notice of a marriage without licence	0 3 6
For every certificate of notice of a marriage by licence	0 1 0
For every licence for marriage	0 1 0
Stamp duty on licence for marriage ..	1 10 0
For every marriage solemnized in the presence of the Registrar without licence	0 10 0
Ditto, by licence	0 2 6
For every certificate of marriage	0 0 1
Stamp duty on ditto	0 0 1

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the bastard child becomes chargeable to the Union or parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum of money not exceeding 5s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of such child unless at the joint request of the mother and of the person acknowledging himself to be the father of such child. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the master liable to an action. A man who is adjudged the father of a bastard child may be peremptorily discharged by his master. In case any living newborn child is found exposed, it is the duty of any person finding such child, and of any person in whose charge such child may be placed, to give information to the Registrar of Births.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875, it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer; or, (3) Gives, lends, sells, trans-

mits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty not exceeding £5. A person suffering from such disorder who enters a public conveyance without previously notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance is required to immediately provide for the disinfection of such conveyance after it has to his knowledge conveyed any person suffering from a dangerous infectious disorder; but no such owner or driver can be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. Any person who knowingly lets for hire any house, room, or part of a house in which any person has been suffering from any dangerous infectious disorder without having such house, room, or part of a house, and all articles therein liable to retain infection, disinfected to the satisfaction of a legally qualified medical practitioner, as testified by a certificate signed by him, is liable to a penalty not exceeding £20. Any person letting for hire, or showing for the purpose of letting for hire, any house or part of a house, who, on being questioned by any person negotiating for the hire of such house as to the fact of there being, or within six weeks previously having been therein any person suffering from any dangerous infectious disorder, knowingly makes a false answer to such question, is liable to a penalty not exceeding £20, or to imprisonment with or without hard labour for a period not exceeding one month. Where, on the certificate of the Medical Officer of Health, or of any two medical practitioners, it appears to any urban or rural sanitary authority that any house, or part thereof, is in such a filthy or unwholesome condition that the health of any person is affected or endangered thereby, or that the whitewashing, cleansing, or purifying of any house, or part thereof, would tend to prevent or check infectious disease, the local authority may give notice in writing to the owner or occupier of such house, or part thereof, to whitewash, cleanse, or purify the same as the case may require, and such person is liable to a penalty not exceeding 10s. for every day during which he fails to comply with the notice, and the sanitary authority may cause the required work to be done, and may recover the expenses from the person in default. A sanitary authority may direct the destruction of any bedding, clothing, or other articles which have been exposed to infection from any dangerous infectious disorder, and may give compensation for the same. Where any suitable hospital or place for the reception of the sick is provided within the district of a sanitary authority, or within a convenient distance of such district, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, may, on a certificate signed by a legally qualified medical practitioner, and with the consent of the superintending body of such hospital or place, be removed by order of any justice to such hospital or place, at the cost of the sanitary authority. The foregoing provisions do not apply to the Metropolis, but the requirements of the

law there in force are in most respects the same. At present the law does not require that the occurrence of cases of infectious disease should be notified to the authorities, but the recent published report of the Royal Commissioners on Small-pox and Fever Hospitals recommends that "every person suffering from infectious disease or those in charge of him, or, if these neglect their duty, the occupier of the house in which the sick person is residing, or if he is a pauper, his medical attendant, should be required by law to notify the nature of the disease to the Medical Officer of Health so soon as they or any of them are aware of it." The perfect isolation of every case of dangerous infectious disease is the only effectual mode of preventing its spread, and this is best attained by the voluntary co-operation of patients and those in charge of them with the medical attendant or Medical Officer of Health when the disease first makes its appearance.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authority of each district, but under certain circumstances the cleansing of footways and pavements adjoining premises, and the removal of filth and ashpit refuse, may be imposed upon occupiers. It is, however, unlawful in any Urban Sanitary District to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

EXPLANATORY NOTES.—France, Belgium, Italy, Greece, and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness, occasionally differing, however, in name. The same system has been in part adopted by Spain, Servia, Bulgaria, Russia, Finland, and Roumania, but they have not joined the Union. France and centimes of France, Belgium, and Switzerland are respectively designated lire and centesimi in Italy; drachmas and lepta in Greece; dinars and paras in Servia; peseta and centinos in Spain; francs and banis in Roumania; levans and stotins in Bulgaria. Similarly the Scandinavian currencies, Norway, Sweden, and Denmark, employ coins of the same weight and fineness, their names being also alike. The Venezuelan (of 10 decimos) of Venezuela and the sol (of 10 dineros) of Peru are alike inter-changeable, as also are the peso of Chili, Colombia, and Uruguay.

In all British colonies, English money of every denomination is current. The exchange value of the money of these countries indicated by a * is determined by the rate of exchange for the day and may be taken as approximately that given in the 1st column. The rate given in the daily papers generally represents the number of the standard coins (those printed in italics) that are equivalent to one sovereign. The *Son's* rate is given in terms of the old dollar (= 2 escudos). The value of other silver coins is approximately determined by the market value of silver, and must therefore be sought in one of the columns headed "Intrinsic Value with Silver at per Ounce." The exchange value of the rupees depends on the rate for "India Council Bills." In all "bimetallic" countries pure gold is taken as being worth 154 times its weight of pure silver. This proportion corresponds to giving standard silver a constant value of gold, as in the last column of the table.

Foreign Moneys.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Oz.	Market Price of Silver in Pence per Troy Ounce.													
	48	49	50	50½	51	51½	52	52½	53	54	55	56	57	58

8	384	399	400	404 0	408	412 0	416	420 0	424	432	440	448	456	464
9	432	441	450	454 5	459	463 5	468	472 0	477	486	495	504	513	522

By means of the above table, taken in conjunction with the column of the opposite table headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several other prices than those previously given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in the first column, find the numbers opposite to them in the column giving the price of silver, and add these together, taking care to move the decimal point successively one, two, and three places to the left; the result will be the coin's intrinsic value in pence.

INVESTMENTS.

TRUST INVESTMENTS (permitted by the Court of Chancery).

Approximate Yield at Present Market Price.	
3% "Consols," "Reduced," and "New Annuities".....	barely 3
Bank of England, Metropolitan Board of Works 3½%, and Indian Government 4% Stocks.....	3½ to 3½
Canadian 4% "Guaranteed" Loan.....	3½
Turkish 4% "Guaranteed" Loan.....	3½
Bank of Ireland Stock.....	3½

THREE AND A HALF TO FIVE PER CENT. INVESTMENTS.

(Quite secure.)
GOVERNMENTS.—Colonial Government Securities; Dutch, Belgian, French, and United States.

RAILWAYS.—British Railway Debenture Stocks; Indian Ry. Deb. Stks.; Brit. Ry. Pref. Stks.; Ind. Ry. Ord. Stks. (guaranteed by the Indian Govt.); Brit. Ry. "Preferred" Ordinary Stks.; British Railway Ordinary Stocks.

FIVE TO SIX PER CENT. INVESTMENTS.

GOVERNMENTS.—Austrian, Brazilian, Chilian, Italian, Japanese, Portuguese, and Russian.
RAILWAYS.—United States Railroad Bonds (on lines paying dividends on the ordinary capital); Canadian Railroad Bonds.
GAS COMPANIES; TRAMWAYS.
BANKS.—Joint-Stock Banks, *limited*.

ABOVE SIX PER CENT. INVESTMENTS.

(None can be safely recommended.)

RATES OF BROKERAGE.

There is no scale fixed or recognized by the Committee of the Stock Exchange, but the following are the charges usually made for commission by stockbrokers:—

		s.	d.
British and foreign funds .. per £100 stock	2	6	
Exchequer bills	1	0	
Colonial Govt. and railw. bonds per cent.	5	0	
Shares under £5	1	0	
" £5 to £10	1	6	
" £10 to £25	2	0	
" £25 to £50	5	0	
" £50 and above .. per cent.	10	0	

In cases in which stock is under £50 the commission charged is ¼ per cent.

ADMIRALTY KNOTS & STATUTE MILES.

The circumference of the earth is divided into 360 degrees, each degree containing 60 knots or nautical miles, consequently the circumference of the earth—viz. 131,385,456 feet—divided by (360 × 60 =) 21,600 gives the length of a knot, viz. 6,082.66 feet, which is generally considered the standard, except by the Admiralty. The Admiralty knot is = 6,080 feet; the statute mile being = 5,280 feet.—*Molesworth Pocket-Book.*

Knots.	Miles.	Knots.	Miles.	Knots.	Miles.
1	1'1515	10	11'5151	18	20'7272

8	9'2121	17	19'5757	25	28'7878
9	10'3636				

TO ASCERTAIN THE WEIGHT OF CATTLE.

Measure the girth close behind the shoulder, and the length from the fore part of the shoulder-blade along the back to the bone at the tail which is in a vertical line with the buttock, both in feet. Multiply the square of the girth, expressed in feet, by five times the length, and divide the product by 21; the quotient is the weight, nearly, of the four quarters, in imperial stones of 14 lbs. avoirdupois. For example, if the girth be 6 feet, and the length 5½ feet, we shall have 6 × 6 = 36, and 5½ × 5 = 26½; then 36 × 26½ = 945, and this, divided by 21, gives 45 stones exactly. It is to be observed, however, that in very fat cattle the four quarters will be about one-twentieth more, while in those in a very lean state they will be one-twentieth less than the weight obtained by the rule.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury (after application at the Faculty Office, Doctors' Commons, through a Proctor), under special circumstances to marry in a particular church, without previous residence in the district; but the reasons assigned must be such as to meet with his Grace's approval. Fees for Licence stamp, &c., average £29 8s.

PRESENT VALUE OF A LEASE, FREEHOLD ESTATE, OR ANNUITY,
 Per £100 clear Annual Rental or Value, without any deduction whatever.
 In the following Table, compound interest at the rates of 3, 4, 5, 6, and 7 per cent. is reckoned.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? **ANSWER.**—19 14 years' purchase, or £1,814.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? **ANSWER.**—Looking at the Table of Expectation of Life on pp. 345-6, it will be seen that the expectation for age 54 is 17 06=17 years; and from

the above table an annuity certain for 17 years, interest at 5 per cent., is worth 11 27 years' purchase. The present payment required would therefore be £1,127 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

STATISTICS OF LIFE INSURANCE.—During the year 1885 the number of new Insurances effected in sixty-seven offices was 74,541; the amount insured was £28,536,265, the average of each being about £383, and the amount of new premiums paid £1,023,236. The total amount insured in all the offices was about £510,000,000; the annual charge to policy-holders for premiums about £16,275,658; and the total income of the offices from premiums, interest on investments, and other sources, £23,190,202. The amount paid for claims in 1885 was £12,484,390. The total life and annuity assets of all the offices is about £150,000,000, and the expense of management varies from 5 per cent. to about 25 per cent. in conducting what is termed ordinary Life Insurance, the average being 13¼ per cent. The expense of conducting Industrial Insurance varies from 38 to 60 per cent.—the average being 42½ per cent.

Tithe Commutation.

The following table gives the average prices of Wheat, Barley, and Oats per imperial quarter every year since the passing of the Tithe Commutation Act, 6 & 7 Will. IV. c. 71. The prices upon which the Act was based being: wheat, 7s. 0^d. per bushel; barley, 3s. 11^d.; and oats, 2s. 9^d. By a mode of computation provided for in the Act the normal price per quarter is reckoned—wheat at 56s. 2d.; barley, 34s. 8d.; and oats, 22s. The average for the past seven years is taken up to the Thursday next before Christmas Day; it is taken every year, and the result published in January.

The average Tithe Rent Charge for the first fifty years is £102 9s. 9^d., and for the past twelve years, £102 18s. 2^d..

French Metrical System of Weights and Measures. 393

The Metrical System is based upon the length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Mètre*. The cube of the tenth part of the mètre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo*, and *myria*, from the Greek, and the subdivisions by *deci*, *centi*, and *milli*, from the Latin:—

MEASURES OF LENGTH (UNIT MÈTRE).

Acre.....	6,272,640	43,560	4,840	160	10	4
A square mile contains	640 acres = 2,560 roods, 6,400 chains, 102,400 rods, poles, or perches, or 3,097,600 square yards.					

APOTHECARIES' WEIGHTS AND MEASURES, BY WHICH MEDICINES ARE COMPOUNDED.

20 Grains..... = 1 Scruple ʒ = 20 grs.
 3 Scruples... = 1 Drachm ʒ = 60 ,,
 8 Drachms... = 1 Ounce ʒ = 480 ,,
 12 Ounces.... = 1 Pound lb = 5760 ,,

* The Avoirdupois oz. of 437 1/4 grains and the lb. of 7,000 grains are the weights named in the London Pharmacopoeia, and the drugs are purchased by Avoirdupois weight.

FLUID MEASURE. Marked

60 Minims m..... = 1 Fluid Drachm..... f 3
 8 Drachms..... = 1 Ounce..... f 3
 20 Ounces..... = 1 Pint..... O
 8 Pints..... = 1 Gallon..... gal.

AVOIRDUPOIS.

27 1/4 Grains.. = 1 Drachm = 27'34375 } Grs.
 16 Drachms = 1 Ounce (oz.) = 437'5 }
 16 Ounces.. = 1 Pound (lb.) = 7000 }
 28 Pounds = 1 Quarter (qr.) }
 4 Quarters = 1 Hundredweight (cwt.), 112 lb.
 20 Cwt..... = 1 Ton, 2,240 lb.

Avoirdupois weight is used in almost all commercial transactions and common dealings, but in addition to the above there are special weights for various articles, the chief of which are:—

A Stone of Butcher's Meat = 8 lbs.
 A Stone, Horseman's weight = 14 ,,
 A Firkin of Butter = 56 ,,
 A Firkin of Soft Soap..... = 64 ,,
 A Box of Fish, about = 90 ,,
 A Quintal or Cental..... = 100 ,,
 A Barrel of Gunpowder..... = 100 ,,
 A Barrel of Raisins..... = 112 ,,
 A Seam of Glass, 24 stones = 120 ,,
 A Barrel of Butter—4 firkins = 224 ,,
 A Barrel (or pack) of Soft Soap.. = 256 ,,
 A Fodder of Lead, London & Hull = 19½ cwt.
 " " Derby = 22½ ,,
 " " Newcastle = 21½ ,,
 A Sack—Potatoes, 168 lbs.; Flour, 280 lbs.; Coals, 224 lbs.; a ton of Coals 10 sacks.
 A Ream of Paper, 20 quires.
 A Printer's Beam, 516 sheets.

TROY WEIGHT.

3'17 Grains..... = 1 Carat.
 24 Grains..... = 1 Pennyweight (dwt.).
 20 Pennyweights = 1 Ounce 480 grs.
 12 Ounces = 1 Pound 5,760 ,,

Troy is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries, and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries; but the carat varies: in France it is 3'18 grs., in Holland 3'0 grs., and in the U. S. A. 3'2. The jewellery ounce is divided into 151 1/2 carats and 600 pearl grains.

The oz. Troy and Apothecaries = 1'0971 oz. avoirdupois; but the lb. Troy and Apothecaries = only 0'8228 lb. avoirdupois, and 175 lb. Troy and Apothecaries = 144 lb. avoirdupois.

STANDARD gold consists of 22 parts pure gold alloyed with 2 parts of copper or other metal, and according to the quantity of alloy is called 9, 12, 15, or 18 carat, i.e., that quantity of pure gold out of the twenty-four. Standard silver is invariably of one fineness, viz., 11 oz. 2 dwt. fine to 13 dwt. alloy. One lb. of silver is coined into 66 shillings.

CUBIC OR SOLID MEASURE.

1728 Cubic Inches = 1 Cubic Foot.
 27 Cubic Feet = 1 Cubic Yard.
 40 Do. of Rough, or... } = 1 Ton or Load.
 50 Do. of Hewn Timber }
 42 Cubic Feet of Timber = 1 Shipping Ton.
 108 Cubic Feet = 1 Stack of Wood.
 128 Cubic Feet = 1 Cord of Wood.
 40 Cubic Ft. merchandise = 1 Ton Shipping.

CARPENTERS' BRICKLAYERS' AND BUILDERS' MEASUREMENTS.

Stock bricks 8 1/4 inches x 4 1/4 x 2 1/4
 Welsh fire-bricks..... 9 " " x 4 1/4 x 2 1/4
 Dutch clinkers..... 9 1/2 " " x 3 x 1 1/2
 A rod of brickwork = 306 cubic feet or 11 1/2 cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

SIZES OF SLATES.

	in. in.		in. in.
Princesses	24 x 14	Ladies	16 x 8
Duchesses	24 x 12	Ditto	15 x 8
Marchionesses..	22 x 12	Ditto	14 x 12
Countesses	20 x 10	Ditto	14 x 8
Viscountesses..	18 x 10	Plantations	13 x 11
Ditto	18 x 9	Doubles.....	13 x 18
Ladies	18 x 10	Ditto	12 x 20

**A TON WEIGHT OF THE FOLLOWING WILL
AVERAGE IN CUBIC FEET**

Earth	21	Pit Sand	22
Clay	18	River ditto	19
Chalk	14	Marl	18
Thames ballast	20	Shingle	23
Coarse gravel	19	Night soil	18

WATER.

1 cubic inch	=	0.0361 lb.
1 gallon	=	10'0000 "
1 cubic foot	=	62'3210 "
1 ditto	=	6'2321 gallons.
35'943 cubic feet	=	1 ton.

Cistern, 1 cubic foot, is equal to about 6¼ gallons, or 62'321 lb. A cistern 4 feet by 2½ and 3 deep will hold about 187 gallons, and weigh nearly 16 cwt. in addition to its own weight. A cubic foot of pure gold weighs 1,210 lb., pure silver 655 lb., cast iron 450 lb., copper 550 lb., lead 710 lb., pure platinum 1,220 lb., tin 456 lb.

The gallon is = 277¼ cubic inches, = 0.16 cubic feet, = 10 lb. distilled water.

LIQUID MEASURE. Gals. Qts. Pts.

Four Gills, one Pint	1
Two Pints 1 Quart	2
Four Quarts 1 Gallon	4
Firkin or Quarter Barrel	9 36 72
Kilderkin or Half Barrel	18 72 144
Barrel	36 144 288
Hogshead of Ale (1½ barrel)	54 216 432
Puncheon	72 288 576
Butt of Ale (3 barrels)	108 432 864

Practically, the only measures in use are gallons and quarts, the others are merely nominal; e.g., the hogshead of 54 gallons, *old measure*, contains but 52 gallons 1 quart, 1 pint, and 3'55 gills imperial measure, and of wine six nominal quart bottles go to the gallon. Of imported wines the following are the usual measurements:

Pipe of Port or Masdeu	= 115 Gallons.
" Tenerife	= 100 "
" Marsala	= 93 "
" Madeira and Cape	= 92 "
Butt of Lisbon and Bucellas	= 117 "
" Sherry and Tent	= 108 "
Ann of Hock and Rhenish	= 30 "
Hogshead of Claret	= 46 "

DRY OR CORN MEASURE.

4 Quarts	= 1 Gallon.
2 Gallons	= 1 Peck.
4 Pecks	= 1 Bushel.
4 Bushels, 1 Sack, or	= 1 Coomb.
8 Bushels, or two coombs	= 1 Quarter.
5 Quarters	= 1 Load.
10 Quarters	= 1 Last.

Boll of Meal = 140 lb.; 2 Bolls = 1 Sack. Coals were formerly sold by measure, 3 bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by the sack of three bushels.

MEASURES OF TIME.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Hour.
24 Hours	= 1 Day.
7 Days	= 1 Week.
28 Days	= 1 Lunar Month.
28, 29, 30, or 31 Days	= 1 Calendar Month.
12 Calendar Months	= 1 Year.
365 Days	= 1 Common Year.
366 Days	= 1 Leap Year.

ANGULAR MEASURE.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Degree.
30 Degrees	= 1 Sign.
90 Degrees	= 1 Quadrant.
4 Quadrants, or 360°	= 1 Circumference, or Great Circle.

THERMOMETER.

Comparison between the Scales of Fahrenheit, Réaumur, and the Centigrade.

II. By transmission of dividend-warrants by post, at the risk of the stockholder, under the following regulations:—

1. Any stockholder residing within the United Kingdom who desires to have his dividend-warrant sent to his address by post, must fill up a form of application, to be obtained at the Bank, or at any of its branches, and for English Government Stocks at any Money Order Office.

2. In the case of joint accounts, the application must be signed by all the members of the account, directing the warrant to be sent to one of them at a given address.

TRANSFER DAYS, any day but Saturday, from 11 to 3; for buying and selling, 11 to 1; for accepting, 9.30 to 4. Dividends are payable from 9 to 4; on Saturdays, 9 to 2. Transfers made on Saturdays are charged a fee of 2s. 6d. For Broker's charges, see p. 375. Bank Stock Transfer books are closed for about Three weeks before payment of dividend.

Dividends are paid in one of the following modes:—

I. To the Stockholders personally, or to their attorneys, at the Bank of England. [Stockholders may arrange for the receipt of their dividends, free of charge, at any of the country branches, on application to the agent.]

GENERAL BANK HOLIDAYS.—England and Ireland: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and following day, or if that be Sunday, then the Bank is closed on Monday. In Scotland: New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

COMPANIES' ACT, 1862.

FEEs TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; £3,000, £3; £4,000, £4; £5,000, £5.
Five shillings extra per £1,000 above £5,000; 1s. extra per £1,000 above £100,000; but no fee higher than £50.
Deed stamp 10s. to be put both upon Memorandum and Articles.

INTEREST TABLE.

The following is a simple method of calculating interest on any given sum for any number of days, at five per cent.—

Multiply POUNDS by the number of days for which it is required to ascertain the interest; this sum, divided by 365, will give the interest in shillings at five per cent.

Example.—Wanted to ascertain the interest on £479 for 71 days:— $479 \times 71 \div 365 = 93'17 =$ £4 13s. 2d. Or the interest on £250 for 73 days at the same rate:—

$$\begin{array}{r} 250 \\ \quad 73 \\ \hline 750 \\ \quad 1750 \\ \hline 365 \overline{)18250} \left(50s. = \text{£} 2 \text{ 10.} \end{array}$$

If any other rate is required, it is easily calculated by adding to or deducting from the 5 per cent. product:—

- 2½ per cent. is one-half.
- 3 per cent. is six-tenths.
- 3½ per cent. is seven-tenths.
- 4 per cent. is four-fifths.
- 6 per cent. is six-fifths.
- 7½ per cent. is one-half more.

Thus, 5 per cent. upon £60 for 10 months would be £2 10s.; 2½ per cent., £1 5s.; at 3 per cent., 30s.; at 3½ per cent., £1 15s.; at 4 per cent., £2. If the rate of interest be more than 5 per cent., then the addition must be added. Thus, to reckon 6¼ per cent., add one fourth; for 7½ per cent., one-half. Bankers and money-dealers calculate the Interest for every day, and have volumes of tables constructed specially for the purpose, the 5 per cent. tables alone extending to nearly 400 pages.

LEGACY AND SUCCESSION DUTIES:— Also see "Probate Duty."

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. cap. 12, sec. 42.

(Except where the whole personal estate does not exceed £300, and a stamp duty of 30s. has been paid on the affidavit. In such cases no legacy duty whatever is payable: 44 Vict. c. 12, sec. 36. No succession duty is payable where the principal value of the whole succession does not amount to £100, or where the value of the individual succession as calculated by the Act is less than £20: 16 & 17 Vict. c. 51, sec. 18.)

Rates of duties payable on legacies, annuities, residues, and successions:—

- To Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see below) £1 per cent.
- To Brothers and Sisters of the Deceased, or their Descendants £3 per cent.
- To brothers and Sisters of the Father or Mother of the Deceased, or their Descendants £5 per cent.
- To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants £6 per cent.
- To any Person in any other Degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased £10 per cent.
- The Husband or Wife is not chargeable with Duty; and the Husband or Wife of a relation is chargeable with duty at the lower rate.

(In cases where the grant of probate or administration has been obtained on or after the 1st June, 1881, the duty at the rate of 1 per cent. is not payable upon legacies or residue or successions satisfied out of, or consisting of, estate and effects according

to the value whereof stamp duty shall have been paid on the affidavit or inventory or account in conformity with the 44 Vict. c. 12. Legacies, residues, and successions satisfied out of, or consisting of, estate and effects on which stamp duty is not payable, as, for example, foreign property and real estate, are still liable to the duty at the rate of 1 per cent.)

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same, are subject to a Penalty of £10 per cent. on the amount or value of such Legacy, Residue, or Share of Residue.

Persons not giving notice of a succession, or not delivering an account, are subject to a Penalty of £10 per cent. upon duty calculated at £1 per cent. for every month of delay.

PROBATE AND ACCOUNT DUTY. Also see "Legacy
 and Succession Duty."—On affidavit of value
 for probate or letters of administration and
 inventory (unless a former inventory exhib-
 ited before 1st June, 1881) of estate in respect
 of which probate or letters of administration
 granted or inventory exhibited on and after 1st
 June, 1881, except as hereafter mentioned, and
 on an account to be delivered to Commissioners
 of Inland Revenue under 44 Vict. c. 12, s. 38,
 on death of person dying on or after 1st June,
 1881, of (1) donations mortis causa, (2) benefi-
 cial interest in property accruing by sur-
 vivorship, (3) property passing under volun-
 tary settlement, interest for life or absolute
 power of revocation reserved to settlor:

Where value exceeds £100 and not £500, £1 for
 each £50 or fraction of £50.

Where value exceeds £500 and not £1,000, £1 5s.
 for each £50 or fraction of £50.

Where value exceeds £1,000, £3 for each £100 or
 fraction of £100.

The value of estate of person dying domiciled
 in United Kingdom may be ascertained by
 deduction of debts due to persons resident in
 United Kingdom, and funeral expenses.

The legacy and succession duties at one per

cent. are not payable on assets covered by the
 stamp on the affidavit inventory or account.

On affidavit of value or inventory where gross
 value of personal estate in United Kingdom or
 abroad of person dying on or after 1st June,
 1881, does not exceed £300:

A fixed duty of 30s., which satisfies legacy and
 succession duties on property to which the
 affidavit or inventory relates.

The stamp duty of 5s. per cent. paid on deed
 of voluntary settlement of property included
 in an account will be returned, on production
 of deed, to person delivering the account.

Heavy penalties are imposed for not paying
 probate and account duties within prescribed
 time.

Exemptions.—Affidavit or inventory of estate
 under £100 of person dying after 25 July, 1864,
 and of estate of any common seaman, marine,
 or soldier slain or dying in Her Majesty's
 service.

For probate and inventory duty payable on
 grants of probate and letters of administration,
 and on inventories before 1st June, 1881, see
 55 Geo. III. c. 184, schedule part 3, and 43 Vict.
 c. 14, schedule.

Hotels and Theatres of the value of £50 and
 upwards pay no higher amount of licence duty
 than £20, and

Restaurant Keepers pay no higher amount than
 £30 under certain conditions.

Publicans keeping their premises closed the whole
 of Sunday, or closing one hour sooner than
 otherwise required on weekdays, pay only six-
 sevenths of the above amounts; and keeping
 closed on Sunday, and also closing one hour
 earlier each day through the week, only five-
 sevenths of the above amounts. All retailers
 of intoxicating liquors selling for consumption
 on the premises are similarly entitled. (See
 also Beer Dealers.)

SPOILED STAMPS.

THE hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3 on Monday, Tuesday, Wednesday, Thursday, and Friday, and from 10 to 1 on Saturday. The hours of attendance at Nos. 1 & 2, Great Winchester Street, London Wall, for the allowance of sea policy and general spoiled stamps, are from 11 to 3 on Monday, Wednesday, and Friday.

DEEDS STAMPED AFTER EXECUTION.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution.

WITHOUT PENALTY, ON PAYMENT OF THE DUTY ONLY:—

Agreements under hand only, liable to the duty of 6d. — Appraisements. — Attested copies, within 14 days of first execution.

Life policies, within one month of first execution.

Foreign Sea policies, within 10 days.

Deeds and instruments not otherwise excepted, within two months of first execution.

NOTE.—Where the deed or instrument has been wholly executed *abroad*, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY IN ADDITION TO PAYMENT OF THE DUTY:—

Articles of clerkship.

Bills of exchange upon stamps of sufficient amount but of improper denomination.

Charter-parties. Receipts. Within certain limits of time.—*Vide* Table of Penalties.

Contract notes. Delivery orders.

Letters of allotment. Scrip certificates.

Share warrants. Warrants for goods.

INSTRUMENTS WHICH CANNOT BE LEGALLY STAMPED AFTER EXECUTION:—

Bills of exchange (except as before mentioned).—Bills of lading.

Marine policies executed in the United Kingdom. Proxies.—Voting papers.

TABLE OF PENALTIES USUALLY ENFORCED:—

	At	£	s.	d.
Agreements under hand only. Attested copies or extracts: after the expiration of 14 days from their first execution	10	0	0	
Charter-parties, within 7 days from their first execution	0	4	6	
Charter-parties, after the expiration of 7 days, but within one month ..	10	0	0	
Receipts, within 14 days after they have been given	5	0	0	
Receipts, after 14 days, but within one month (beyond this period receipts cannot be stamped under any conditions)	10	0	0	
Other instruments not enumerated, excepting those which cannot be legally stamped after execution ..	10	0	0	
All applications for the remission, mitigation, or return of penalties, must be made by memorial, addressed to the Commissioners of Inland Revenue, Somerset House, and supported by statutory declaration, such declaration being exempt from stamp duty.				

RATES OF INLAND POSTAGE.

INLAND LETTERS sent prepaid to any part of the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, &c., are charged as in the following table:—

LETTERS, BOOKS, AND PARCELS—

Letters and Books				Parcel Post.	
Weight not exceeding	Letter Post.	Book Post.		Weight.	Charge.
lb. oz.	d.	d.		lbs.	s. d.
0 1	1	1	½	Not ex. 1	0 3
0 2	1½	1	½	2	0 4½
0 4	2	1	1	3	0 6
0 6	2½	1½	1½	4	0 7½
0 8	3	2	2	5	0 9
0 10	3½	2½	2½	6	0 10½
0 12	4	3	3	7	1 0
				8	1 1½
				9	1 3
				10	1 4½
				11	1 6

One halfpenny for every additional two ounces.

No letter may be more than 18 inches in length, 9 in width, or 6 in depth, unless sent to or from a Government office. The weight is unlimited.

If the postage of letters, books, or patterns be not paid in advance, *double postage* will be demanded on delivery; and if the postage be insufficient, *double the deficiency* will be charged.

LONDON POSTAL ARRANGEMENTS.

DISTRICTS.—For the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	South Eastern (S.E.)
Eastern (E.)	South Western (S.W.)
Northern (N.)	Western (W.)
North Western (N.W.)	West Central (W.C.)

Of these the E.C., comprising the whole of the City, the W.C., the district between Temple Bar and Charing Cross, and the S.W., containing nearly all the Government Offices, are the most important. In the E.C., or City district, there are twelve deliveries daily. By appending the initials the sorting of letters is facilitated, and frequently two or more hours saved in the delivery. In the other districts there are from six to eleven collections and deliveries. At all Branch offices and Receiving houses a special box is provided in which London letters should be posted. Letters properly directed, and properly posted, should be delivered within from two to four hours, and those posted at night delivered early next morning.

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at Chief District offices, Branch offices, Receiving houses, and Pillar boxes before 6. In suburban places the collections are made from half an hour to an hour earlier.

Letters for the early provincial day mails are collected at the General Post Office at 4.15, 5.45, 6.15, 7.0, and 7.45 a.m.; for Scotland and Ireland at 6.15; and for the Continent at 7.15 and 8.45.

LATE LETTERS.—Inland letters bearing an extra ½d. stamp, if posted before 7 p.m. at the town Branch offices and Receiving houses, are forwarded by the night mails. At certain District offices the hour for posting with this late fee is extended when the letters are to go from

the railways in their immediate neighbourhoods. Letters having an extra ½d. stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to the time of departure of the train bearing the mails, varying from 8.30 to 9.45.

LATE FOREIGN LETTERS, with an extra 1d. stamp, may be posted till 7 o'clock at Lombard Street, Gracechurch Street, Mark Lane, Eastcheap, Leadenhall Street, Throgmorton Street, Fleet Street, Ludgate Circus, Queen Victoria Street, Charing Cross, and St. Martin's-le-Grand; with an extra 2d. at the latter office till 7.15, or till 7.30 with an extra 3d. At the railway termini the late-letter fee is 4d. for the Continent, and 2d. for the United States, Canada, and the Cape.

LATE POSTING.—Letters for the country posted in London or the London districts too late for the ordinary evening mails, but in time for the last evening collections, are delivered next morning if for places within the range of the midnight despatches. These places, which number over 250, receive on Sundays the letters posted in London as late as 9 o'clock the previous night.

RETURNED AND MISSING LETTERS.—Returned inland letters are disposed of on the day they reach the office. Every letter containing the address of the writer is returned to such writer; but, when there is no address, and the letter does not contain anything of value, it is destroyed, record being kept of only such as contain something of value. Undelivered foreign letters are returned, unopened, at stated periods to the countries whence received. The Returned Letter office is in Telegraph Street, Moorgate Street, and inquiries for missing letters should be made at the Secretary's office, in the new building, St. Martin's-le-Grand.

COMPLAINTS of irregularities and non-delivery should be addressed to the Secretary, General Post Office, E.C.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 2s. 6d.) are sold of the respective values of ½d., 1d., 1½d., 2d., 2½d., 3d., 4d., 5d., 6d., 9d., 1s., 2s. 6d., 5s., 10s., and 20s. These may be purchased at any office during the hours that attendance is given for telegraph business.

EMBOSSSED PENNY ENVELOPES of the following sizes are kept in stock:—A, 4¼ × 3½, in packets of 24 for 2s. 4d.; B, 5¼ × 3, 24 for 2s. 2d.; and a cheaper quality (Commercial), 5¾ + 3¾, 20 for 1s. 9d.; but all may be had in smaller numbers or singly.

Embossed stamps cut from envelopes are not available for postage.

REGISTRATION.—The fee for registering a letter, newspaper, or book packet is 2d. in addition to the postage. These must be handed to an agent of the Post Office, and a receipt taken. The payment of the registration fee effects an insurance on the packet against loss or damage up to £2; a further 1d. up to £5, or 2d. extra up to £10.

Registered letter envelopes, for foreign and inland letters, bearing a twopenny stamp embossed on the flap for the payment of the registration fee, are of five sizes, and are sold: F, 5¼ ins. × 3½ ins., G, 6 ins. × 3¾ ins., 2½d. each, or 12 for 2s. 2½d.; H, 8 ins. × 5 ins., H½, 9 ins. × 4 ins., 2½d. each, or 12 for 2s. 7d.; I, 10 ins. ×

7½ ins., K, 11½ ins. × 6 ins., 3d. each, or 12 for 2s. 10d.

POST CARDS impressed with a halfpenny stamp, for transmission between places in the United Kingdom, are sold at the rate of 6 for 3½d., or 11s. 8d. per parcel of 240; a thicker quality being 6 for 4d., or 6s. 8d. per parcel of 120. Nothing whatever, not even one line of a newspaper cutting, may be attached. Reply Post Cards may be had at double these rates.

FOREIGN POST CARDS, for transmission to the Colonies and to all countries in the Postal Union, are sold at the rate of 1d., 1½d., and 2d. each. Reply Cards are also issued at double these rates.

NEWSPAPERS.—A prepaid postage of one halfpenny is charged for the inland transmission of each daily or weekly registered newspaper, the weight being disregarded. Packets of newspapers, registered or not, can be transmitted at the book-post rate of one halfpenny for every 2 oz. Newspapers posted unpaid are charged double the book-rate. No packet must exceed two feet in length, one foot in width or depth, or 14 lbs. in weight. The newspaper must contain no writing of the nature of a letter. Newspapers for abroad must be posted within eight days of publication. If posted after eight days, book postage rates must be paid.

Wrappers bearing a halfpenny stamp may be had singly at ¾d., 2 for 1½d., 3 for 1¾d., 4 for 2½d., 5 for 3d., 6 for 3½d., then 7 for every 4d.; 22s. 10d. per parcel of 480; or with a penny stamp, singly 1¼d., 2 for 2½d., 3 for 3¼d., 4 for 4¼d., 5 for 5½d., 6 for 6½d., 7 for 7½d., then 8 for every 8½d.; 21s. 3d. per parcel of 240.

BOOK POST.—The prepaid postage for a book or packet of books, paper, printed matter, manuscript, circulars, or photographs (when not on glass, or in cases containing glass, or any like substance), including binding and mounting, is one halfpenny for every 2 oz., or fraction of that weight. Under this head are included circulars produced in identical terms by any mechanical process. No packet must exceed 5 lbs. in weight, 18 inches in length, 6 in depth, or 9 in width, except to or from a Government office.

INLAND PATTERN AND SAMPLE POST.—This is restricted to bonâ fide trade patterns and samples of merchandise, no article sent for sale, in execution of an order, or between private individuals being admissible. If the regulations are infringed, the packet will be charged double the deficient postage, at letter rate, and a fine of 6d. added. The rates are 1d. for 4 ozs.; 1½d. for 6 ozs.; and 2d. for 8 ozs.—the limit of weight. The dimensions are 12 × 8 × 4 inches. No writing is allowed inside, except the number, price, and private business marks; and the name, address, and trade of the sender must be printed on the wrapper, above the address. A private recipient of patterns therefore cannot return them to the tradesman at the same rate.

INLAND PARCEL POST.—Subject to certain regulations prepaid parcels up to 11 lbs. may be sent between places in the United Kingdom at the rates shown in opposite page. Compensation to the amount of £1 can be claimed for loss or damage, or of £5 and £10 by the respective payments of 1d. or 2d. as an insurance fee. No parcel may exceed 3 ft. 6 in. in length, or with length and girth combined, more than 6 ft.

The parcel should be distinctly marked in the left-hand top corner "Parcel Post," and handed across the counter of the receiving houses or given to a rural postman. It must not be posted

in a letter-box, and the postage must be prepaid by stamps, affixed by the sender. Money is received at the principal London offices, and at the head offices at Edinburgh and Dublin, when the postage of a number of parcels amounts to 20s., and in certain large provincial towns when it amounts to £5.

No Parcel Post business is transacted on Sundays or holidays.

FOREIGN AND COLONIAL PARCEL POST.—The rules and regulations to be observed are similar to those relating to inland parcels, with the addition that every parcel must have a Customs declaration respecting the contents. This must be on a form obtainable at any Post Office: no duties are to be paid; they will be collected on delivery. Arms may not be sent to Gibraltar, nor letters to Australia or the Cape; nor opium to India, Hong Kong, or the Straits Settlements. The charges to British possessions are:—

Parcels for Austria, Belgium, Denmark, France, Germany, Holland, Italy, Jamaica, Norway, Sweden, and Switzerland must not contain any letters.

To the British possessions generally and Egypt the dimensions are limited to 3 feet 6 inches in length, or length and girth combined, 6 feet; to Jamaica, length 2 feet, girth 4 feet; Canada, length 2 feet, depth or width 1 foot; to Italy, length 2 feet, length and girth combined 4 feet; other places in Europe, 2 feet in any direction.

MONEY ORDERS, INLAND.—The highest amount granted in one order is limited to £10. The commission charged is:—

* The limit of weight here is 7 lbs.; to other British possessions it is 11 lbs.

For sums not above 20s. 2d.

Not above £2 3d. | Not above £7 5d.
 " " £4 4d. | " " £10 6d.

The rules and regulations respecting lost or lapsed orders will be found on the forms issued.

MONEY ORDERS, FOREIGN.—These are now granted between the United Kingdom and the following places. For sums not exceeding £2, 6d.; £5, 1s.; £7, 1s. 6d.; £10, 2s.

Aden	France	North Borneo
*Adrianople	Gambia	*Norway
Amoy	*German Emp.	Nova Scotia
*Austria	Gibraltar	Panama
Bagdad	Gold Coast	*Philippopolis
Bassorah	Guadur	*Portugal
Belgium	Hankow	Prince Edward

*Egypt	New Brunswick	India
Falkland Islds.	New S. Wales	New Zealand
Foochow	Newfoundland	Switzerland
	Ningpo	Zanzibar

Orders issued for the places marked thus * are retained by the remitter.

POSTAL ORDERS.—Unlike money orders, they are issued for fixed sums; those of 1s. and 1s. 6d. at a charge of $\frac{1}{2}$ d.; of 2s., 2s. 6d., 3s., 3s. 6d., 4s., 4s. 6d., 5s., 7s. 6d., 10s., and 10s. 6d., 1d.; those of 15s., and 20s., $\frac{1}{2}$ d. These orders must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Stamps to the amount of 5d. may be affixed on the face of an order, so that practically any odd sum can be transmitted by means of Postal Orders. They are not only payable at any office in the United Kingdom, but may also be cashed at Malta, Gibraltar, and Constantinople. Most money-changers on the Continent will also cash them.

FOREIGN MAILS.—Mails are despatched from London to the following countries twice or three times daily except Sunday:—

Austria-Hungary	Holland	Poland
Belgium (3)	Ibraela	Russia
Bulgaria	Italy (3)	Spain
Denmark	Luxemburg (3)	Sweden
France (3)	Montenegro	Switzerland (3)
Galatz	Norway	Tangier
Germany (3)	Persia	Varna
Gibraltar		

To Canada letters are despatched every Wednesday, Thursday, and Saturday evening; and to the United States every Wednesday and Saturday evening.

To the West Indies, alternate Thursday morning, and various other days.

To Australia, every Friday evening, and various other days.

To India, every Friday evening.
 To China, Japan, and Ceylon, Wednesday and Friday evening, and various other days.

To Portugal and Servia, every morning.
 To Egypt, Tuesday morning and Friday evening; to Cyprus, Friday evening, and various other days; to Greece, Thursday and Sunday evening; to Constantinople, Thursday morning and Saturday evening; to Malta, Wednesday morning and Saturday evening.

To Cape Colony, every Thursday evening; to Mexico, Wednesday and Saturday evening, and various other days.

To other parts of the world, the list of places and the rates are too numerous for insertion; particulars may be obtained at every Receiving house.

FOREIGN POSTAGE.—The countries comprised within the **POSTAL UNION** are:—

LIST A.—(Letters, $2\frac{1}{2}$ d. per half-oz.; Cards, 1d.; Newspapers, $\frac{1}{2}$ d. per 2 oz.; Packet of printed paper $\frac{1}{2}$ d. per 2 oz.; Commercial papers same as printed papers, except that the lowest charge for a packet is $2\frac{1}{2}$ d.; Patterns, same as printed papers, the lowest charge being 1d. Limit of weight 4 lbs.)

Austria-Hungary	Greece	Persia, viâ Russia
Azores	Heligoland	Portugal
Belgium	Iceland	Roumania
Bulgaria	Italy	Russia
Canada	Luxemburg	St. Pierre-et-Miquelon
Canary Islands	Madeira	Servia
Cyprus	Malta	Spain
Denmark	Marquesas Islands	Sweden
Egypt	Montenegro	Switzerland
Faroe Islands	Netherlands	Tahiti
France	Newfoundland	Turkey
Germany	Norway	United States
Gibraltar		

LIST B.—(Letters for those places not printed in italics, and for Hong Kong, Japan, and New Caledonia, viâ San Francisco, the charge is 4d. per half-oz.; Post Cards, $\frac{1}{2}$ d.; Newspapers, 1d. per 4 oz.; Packet of Printed paper, 1d. per 2 oz.; Commercial papers same as printed papers, the lowest charge for a packet being $2\frac{1}{2}$ d.; Patterns same as printed papers, 1d. per 2 oz. To the Countries printed in italics, viâ Brindisi, the charge is—Letters, 5d. per half-oz.; Post Cards, 2d.; Newspapers, $\frac{1}{2}$ d. per 4 oz.; Printed papers, $\frac{1}{2}$ d. per 2 oz.)

AUSTRALASIA, INCLUDING NEW ZEALAND AND FIJI, CHINA, THE CAPE, &c.—For Letters ($\frac{1}{2}$ oz.) and Newspapers (4 oz.) to the following places, not in the Postal Union—Ascension, Australasia, Cape Colony, Fiji, Natal, and St. Helena, the charge is 6d. and 1d. respectively; books and patterns, 1d. per oz. to Abyssinia, Aden, China, Sarawak, and Zanzibar, letters 5d. and newspapers 1½d.; to Cape Coast Castle and West Coast of Africa, 4d. and 1d.; to Bechuanaland and the Transvaal, 8d. and 1½d. Post Cards may be sent to Aden, China, and Zanzibar, the charge for which is 2d.

TELEGRAMS.—Telegrams may be sent to all parts of the United Kingdom at the rate of 6d. for the first twelve words, and one half penny for each additional word, stamps in payment to be affixed to the form by the sender. The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. Five figures are counted as one word. The charge includes delivery within one mile of the office—beyond that limit the charge is 6d. per mile for the first three miles; if three or more miles, at the rate of 1s. per mile from the office door.

SUNDAY TELEGRAMS.—In most provincial towns the Telegraph Offices are open from 7 or 8 to 10 a.m., and again from 5 to 6 p.m.; in Scotland from 8 to 10 a.m., and 4 to 5 p.m.; and in Ireland from 9 to 10 a.m., and from 5 to 6 p.m. In London the following offices are always open:—Central Telegraph Station; Great Northern Station, King's Cross; Paddington, St. Pancras, and Victoria (L. C. & D.) Stations; also at Moorgate Street Buildings and the office in West Strand; the offices at Birmingham, Bradford, Brighton (except between midnight Saturday and 7 a.m. Sunday), Bristol, Cardiff Docks, Derby, Exeter, Hull, Hurst Castle, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Norwich, Nottingham, Plymouth, Portsmouth, Sheffield, and Southampton; as also are those of Aberdeen, Dundee, Edinburgh, Glasgow, and Inverness, in Scotland; and Belfast, Cork, Dublin, and Queenstown in Ireland.

FOREIGN TELEGRAMS are subject to a code of 24 rules, too lengthy to be transcribed. The charges vary from 2d. a word to Belgium, 2½d. to France, 3d. to Germany and Holland, 4d. to Algeria, Denmark, and Norway, 4½d. to Austria, Italy, and Spain, 5½d. to Gibraltar and Portugal,

to 10s. 6d. to New Zealand, and 14s. to British Guiana; our own Colonies and possessions being charged generally at about the highest rates.

SUNDAYS AND HOLIDAYS.—At all offices open on Sunday postage stamps are sold, and letters may be registered during the time such offices are open (viz., from 9 to 10 a.m., and one other hour at least, beginning with the commencement of the delivery. If these hours coincide either wholly or in part, additional time is taken so as to complete two hours). The same regulation applies to CHRISTMAS DAY and GOOD FRIDAY. The hours at which telegraph business is attended to are, as a rule, from 8 to 10 a.m.; but no Money Order, Savings Bank, Insurance or Annuity Business is transacted on these days, nor in Scotland on Sacramental Fast Days.

BANK HOLIDAYS AND FAST DAYS.—Where Bank Holidays are observed as public holidays, the public counters of the offices will be closed at 12 at noon except for telegraph business, the reception of parcels, the sale of postage stamps, and the registration of letters. At no provincial towns in England or Ireland is there more than one delivery of letters on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery so far as relates to himself.

In London, the holiday arrangements are of an exceptional character, and due notice of them is given by means of bills at the various offices.

SMALL INVESTMENTS IN GOVERNMENT STOCKS.—Any depositor in the Post Office Savings Bank may invest, at any Post Office in the United Kingdom at which there is a savings bank, small sums in one of the Government 3 per cent. stocks, or in 2½ and 2½ per cent. stock. The sums so invested must not be less than £10, and must not exceed £100 in any one year ending Dec. 31st, and the aggregate amount held by any one investor must not exceed £300. The following charges are made for the purchase of stock, and these sums include all expenses connected with the subsequent collection of dividends:—

On stock not exceeding £25	9d.
Exceeding £25, but not exceeding £50	1s. 3d.
" £50 " " "	1s. 18. 3d.
" £75 " " "	£75..... 2s. 3d.
" £100	2s. 3d.

The charges on the sale of stock are at the same rates up to £100; for £200 it is 2s. 9d., and for £300, 3s. 3d. The investment is at the current price of the day on which it is made, and a certificate thereof is sent to the investor by post. Similar arrangements are made for sales of stock. Dividends are collected by the Post Office and placed to the credit of the investor.

Any person having invested £50 or more may, on application to the Post Office, obtain a stock certificate for £50 or any multiple of £50. These certificates have coupons for dividends payable to bearer at the Bank of England.

Facilities similar to those just described for investments of small sums in Government stocks will be granted by the Trustee Savings Banks.

The depositor's book must in every case be sent with an application for investment or sale of stock, or for a stock certificate. A cover for the purpose may be obtained at any Post Office Savings Bank.

Any further information can be obtained on application to the Controller, Savings Bank Department, 144A, Queen Victoria Street, London, E.C., and at almost all receiving houses.

THE BRITISH EMPIRE IN INDIA extends over a territory larger than the Continent of Europe without Russia. Reckoning the area not yet surveyed or perfectly defined, of the recently annexed province of Upper Burmah, with its dependent Shan States, at 200,000 square miles, and its population at 3,500,000, the Indian Empire extends over an area of 1,585,540 square miles, and has a population of 257 millions. From Peshawar, the northern frontier station, to Cape Comorin the distance is 1,900 miles, and the same distance separates Kurrachee, the port of Sind, from Sudiya, the frontier post on the eastern border of Assam. The Province of Burmah, including the country hitherto called Independent Burmah, which was annexed to our Asiatic dominion early in 1886, lies to the east of the Bay of Bengal, and forms no part of the Indian Peninsula. Excluding this province, then, we may broadly divide the country, for geographical purposes, into three sections, viz. :—the Himalayan region, the northern river-plains, and the southern table-land. The first of these includes the mountain-range of the Himalayas and their offshoots to the southward. This region, considered as the natural northern boundary of India, may be described as consisting of two giant mountain-ranges running from north-west to south-east, with a series of great valleys beyond. The southern range, which rises precipitously from the belt of swampy land lying to the north of the Ganges and parallel to its course, springs up to a height of 20,000 feet above the plain, and culminates in the three loftiest peaks yet measured on the globe—Mount Everest, 29,002 feet; Kunchin-Junga, 28,176 feet; and Dwhalagiri, over 27,000 feet. The Himalayas, however, are not only a rampart of defence, but also serve to collect and store up a supply of water for the tropical plains below them. The sides of the Himalayas afford an admirable simultaneous representation of the various natural belts of the earth's surface, being divided into the tropical, the temperate, and the arctic zones as the upward journey is taken from the plains below. The vegetation of the Himalayan region includes such varied species as the tree-fern, the deodar or native cedar, numerous rhododendrons, the ilex, orchids, barley, oats, millet, and many common vegetables of domestic use. In the way of trade this region produces large quantities of timber, charcoal, barley, millet, and honey. The fauna are no less varied than the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear and ounce, eagles, partridges, and a large number of pheasants. The native tribes afford examples of both the Aryan and the Turanian races, together with an intermingling of the two. The northern river-plains, lying at the foot of the Himalayas, and stretching from sea to sea, comprehend the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmapootra, and their tributaries. At no great distance from each other, four rivers take their rise in the Himalayas. Of these, two are on the north side of the mountains—the Indus, which flows westward, and the Brahmapootra, which flows eastward; the other two, on the southern slope, are the Sutlej, which, after flowing west and south-west for 900 miles and collecting to itself various other waters, joins the Indus; and the Ganges, which, during a south-east and easterly journey of nearly 1,600 miles, drains almost the whole of the Bengal plain. Meanwhile the Brahmapootra, which runs close along by the mountains on their northern side, having reached the eastern extremity of the Himalayas, turns sharply to the south, then to the west, and finally joins the Ganges, the two rivers discharging themselves together into the Bay of Bengal. The Indus is 1,800 miles long; the Brahmapootra nearly 1,500 miles long. It will be seen from this that the Himalayas send to India the water gathered on both their northern and southern slopes: this result is due to the peculiar *lie* of the land, and this it is which has not only given great abundance and wealth to the country, but has also made it the prey of the spoiler and invader for many centuries. The richest, the most populous, and the most prosperous part of India is to be found in the basins of these three great river-systems, which include in the aggregate an area of 1,125,000 square miles. Each of these rivers is of inestimable value to the country it drains, but particularly is this so with the Ganges. The Ganges is not only the great highway of Bengal, it is also the water-carrier and the fertilizer; without it, traffic, where not impossible, would be enormously dear, and the province almost a desert. There are three harvests in Lower Bengal each year: pease, pulse, and various oil-seeds are reaped in April and May, the early rice crop in September, and the great rice crop two or three months later. The chief vegetable products of N. W. Bengal are the mango, the banyan, the wild cotton-tree, and the tamarind: while the delta region gives rice, the bamboo, and a large variety of palms (cocoa-nut, date, areca, &c.). In the north, again, we also find wheat, Indian corn, millet, and barley; while to the south, indigo, cotton, sugar-cane, tobacco, and many different dyes, drugs, and spices are also produced. These include the aloe, castor-oil tree, resins, and gums; but there are also grown the melon, pumpkin, tea-plant, yams, the opium poppy, the mulberry, and jute. Just as the Himalayas on the north and the Suleiman

Mountains on the north-west form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due east and west from the head of the Gulf of Cambay, form a firm southern boundary to the river-plains of the north. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhya Mountains, north of the Nerbudda river. The Eastern and Western Ghauts all but complete the triangle of mountain ranges with which this region is surrounded. As the W. Ghauts lie so close to the coast, and afford no exit for rivers, we find no streams on the Malabar coast; all the rivers—and they are both numerous and of great size—flow eastwards, and passing through gaps or defiles in the E. Ghauts, discharge their waters into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.) at intervals, further to the south; in the extreme N.W., too, south of the Vindhya, and parallel to them, but north of the W. Ghauts, we find the Nerbudda and the Tapti. The division line of the basins of these last two rivers is sharply defined by the Sautpoora Mountains, which lie exactly between them. The physical geography of S. India has given it much of its history: the S.W. coast, shut in by the mountains, is very primitive and moves slowly; the S.E., open and easy of access both from within and without, has advanced with rapid strides in commerce and all other civilizing influences. The mountain slopes of this region, those of the W. Ghauts in particular, are still covered with the splendid vegetation of primeval forests of the tropics: teak, ebony, iron-wood, and Indian mahogany abound, so also do the jackwood, blackwood, sandalwood, and the ubiquitous bamboo. Coffee is now largely cultivated there, and tea and cinchona are also grown. The elephant, tiger, bison, leopard, deer, sheep, and various smaller game afford limitless sport to the hunter. In the valleys and on the higher plains many crops are raised in profusion, chiefly the same as those grown in the lower basin of the Ganges. The southern table-land has in past times furnished considerable supplies of different minerals, including gold: those found and worked now are mainly lime, coal, and iron. Three-fifths of this great Empire are under the direct rule of the British Government, and are divided for administrative purposes into eight Provinces—viz., Bengal, the North-Western Provinces and Oudh, the Punjab, the Central Provinces, Burmah, Assam, Madras, and Bombay. The remaining two-fifths are made up of a large number of Native States, whose chiefs, excepting those of Nepal and Bhotan in the north, acknowledge the suzerainty of Her Imperial Majesty, KAISAR-I-HIND. Her Majesty's representative is styled the Viceroy and Governor-General, his relations with the Home Government being regulated by Act 21 & 22 Vict. c. 106, which substituted the authority of a Secretary of State for India, aided by a Council of fifteen members, for that of the East India Company and the Board of Control.

For the knowledge we possess of the period that preceded the commencement of connected history in India we are chiefly indebted to the sacred books of the Hindoos, the accounts of Greek and Chinese writers, the records of inscriptions and coins, and the evidences of race and language. The existence of various races in India speaking languages not cognate, proves that the country has been subject to successive invasions in remote ages. The first of which we possess direct evidence is that of the ARYANS, whose Hindoo descendants still number three-fourths of the inhabitants of the country. The *Vedas*, which are the most ancient and venerated of their sacred writings, and are written in Sanskrit of the earliest type, are supposed to date from 1400 B.C. In the early *Vedas* all classification and ranking of the gods is absolutely wanting; something of the kind, however, is done in the *Upanishads*, which form a kind of commentary on the *Vedas*, and make some attempt to solve the problems of creation, the nature of the Deity, and the human soul. The *Upanishads*, in fact, founded admittedly on the *Vedas*, contain the germs of those great systems of Hindoo philosophy which, in their later development, brought about the separation of the creed of the vulgar from that of the educated. The *Mahabharata* and *Ramayana* are epic poems of later

date, abounding in extravagant myths, from which, however, the learned have succeeded in gaining a general knowledge of the habits and condition of the people and of the course of events during the dark period of Aryan conquest. It is supposed that about 3000 B.C. a branch of the Indo-European race, by whom Europe had already been colonized, descended from those plains of Central Asia which lie to the N.W. of India and settled in the Punjab. They were a pastoral and agricultural people; their form of government was patriarchal, and the offices of prince and priest were united in the same person. Their conquest seems to have been confined to the Punjab for some centuries before they again advanced southwards to the Valley of the Ganges. The condition of the people, as well as the progress of their wars with the older inhabitants of the country, can be clearly traced in the sacred poems. It appears that when Oudh and Bengal had been subdued, the deified hero Rama effected the conquest of Southern India, and afterwards that of Ceylon. By this time a great change had come over the Aryan invaders. Their primitive simplicity had disappeared. Patriarchs had become luxurious princes, whose priestly duties were deputed to the sect of Brahmins; and at the time the *Laws of Manu*, a digest of the customary laws current probably about the 5th cen-

tury B.C., were compiled, this caste had succeeded in establishing its superiority over the Kshetriyas, or military caste, to whom it had been at first subordinate. The *Laws of Manu* give a good idea of Indian society from about 800 B.C. down to the time, probably early in the Christian era, when they were put together in their present form, and in them we first find mention made of the existence of caste and village communities. In the seventh century B.C. a new religion arose, called Buddhism. Its founder was Sákya Muni, or Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died at a great age in 543 B.C. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood; and, within three centuries from the death of its founder, it had been accepted as the national religion. For more than a thousand years it existed in India side by side with Brahmanism, which it never succeeded in ousting. But either from internal dissensions of its own, or from persecution without, Buddhism became practically extinct in India before the twelfth century, though it still flourishes not only in China and Japan, but also in Nepal and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. One branch of it, however, survived in the distinct sect of the Jains, whose religion was a combination of Buddhism and Brahmanism. The followers of this creed, of which the antiquity and relations with Buddhism are much disputed, are still very numerous in Guzerat, and may be found in many parts of India.

With Alexander's invasion (327 B.C.) we reach the first landmark in the political history of India. Herodotus tells us that the twentieth satrapy of Persia had previously included part of the north-west of India. Alexander himself did not penetrate beyond the tributaries of the Indus, though he sailed down the river; his Indian possessions fell to Seleucus, whose ambassador, Megasthenes, has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Asoka (B.C. 260-220), the grandson of that monarch, whose edicts throw light upon this period, was the great patron of Buddhism, which became for a time the State religion throughout the greater part of India. Our last contributors to a knowledge of India before the period of authentic history are the Buddhist pilgrims from China, who visited the country between the fifth and tenth centuries. The accounts of Greek and Chinese writers corroborate the evidence contained in the *Laws of Manu*, and testify to the prosperous condition of the country, to the absence of slavery, and to the people being brave, sober, truthful, and averse to litigation.

The next invaders of India were Scythians, who, after conquering the Greek settlements of Bactria, poured in many waves, between 126 B.C. and 54 A.D., over Northern India. These inroads, as well as the existence of ancient aboriginal tribes in India, left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus.

So early as A.D. 664, Arabs began to make predatory expeditions against Guzerat and Sind. The conquest of Persia, towards the middle of

the seventh century, at length brought the successors of Mahomet to the Indus, and in the N.W. regions they made some temporary acquisitions during the ensuing hundred years. It was, however, more than two centuries later before the foundations of a durable Mohammedan empire were laid. It was in the year 999 that Mahmud declared the independence of the kingdom of Ghaznee in Afghanistan—a proceeding which he followed up by at least twelve expeditions into India, one of which carried him beyond the Jumna, and another ended in the occupation of Guzerat. Later, in 1024, he conquered and annexed to his kingdom the provinces of Lahore and Mooltan, and the succeeding dynasties of Afghan kings held power in India for 500 years. The Mohammedan advance, however, was gradual, for it was not till 1206 that Delhi was taken, and the greater part of Hindustan annexed by Kutb-ud-din, with whose memory is connected the Kutb Minar, near Delhi; and the first Mohammedan invasion of the Deccan took place in 1294.

From this time onward the history of India is the history of invasion, dynasty following dynasty, while the Mongol hordes again and again swept into the country. At length, during the reign of the last monarch of the Toghlaq line, the famous Tamerlane burst into India at the head of a mighty host, and captured and sacked Delhi in 1398; he left behind him Khizr Khan, who thenceforward held the reins of power. A period of misrule, tyranny, and anarchy ensued, and fittingly paved the way for the total conquest of the country by the Mogul emperors.

THE MOGUL EMPIRE.—The Mongols, or Moguls, a Mohammedan Power, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, and, as has been stated, again and again invaded that country. In 1398, during the invasion of Tamerlane, or Teimur, a great part of Hindustan was laid waste. In 1526 *Sultan Baber*, a descendant of both these Tartar chiefs, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE. *Humayoon* (1530-56) lost the whole of the territory conquered by Baber, but recovered a portion of it shortly before his death. *Akbar*, his son (1556-1605), being a minor, the Government was for five years under a regency, but it was a much longer time before his numerous opponents were subdued and an Empire firmly established, embracing Cabul, Candahar, all Hindustan, and a portion of the Deccan. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men whom he drew around him were Raja Toda Mal, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet; nor should we overlook Bairam Khan, Akbar's faithful guardian in his youth. *Jehangir* (1605-28) received in 1615 an embassy despatched by James I., under the conduct of Sir Thomas Roe. His empress was the famous Nur Mehal. Under *Shah Jehan* (1628-58) the Mogul Empire reached its zenith. Many public works and grand buildings testify to his magnificence and taste, amongst others the Taj Mahal at Agra, which is said to have been the work of a French architect—Austin of Bordeaux. The close of *Shah Jehan's* reign was embittered by the rivalries of his four sons. *Aurangeeb* (1658-1707) defeated his brothers and

at them to death; his father he kept a prisoner or the rest of his life. *Aurangzeb* had great ability and courage, and was a master of dissimulation; but bigotry and distrust were the basis of his policy, and the decline of the Mogul empire dates from his reign. Four sons disputed the right of succession: at last Bahadur Shah gained the coveted crown, but only for five years. Dying in 1712, he was succeeded by his son, *Jehundar Shah*, who was cruelly murdered by one *Farokhsir* (a great-grandson of the famous *Aurangzeb*), who seized on the crown. He in turn was himself put to death six years later, and *Muhammad Shah*, grandson of Bahadur, came to the throne. The viceroys of his own appointment grew uneasy and rebellious, and all unconsciously aided in the growth of the *Mahratta* power. One of them refused aid to his sovereign, and the *Mahrattas* in consequence subdued the *Deccan*. In 1738, to avenge an alleged insult, *Nadir Shah* of *Persia* invaded India, captured *Delhi*, and gave the city over to the mercy of his terrible followers, who are said to have slain more than 100,000 of the inhabitants, and to have levied as contribution and carried off as plunder, treasure equal to more than £50,000,000 sterling. In spite of this enormous sacrifice, peace was only obtained by giving up to the conqueror all the country west of the *Indus*. On the death of *Muhammad*, in 1748, the country was fast going to decay—it was, in fact, only waiting for a fresh conqueror. The *Mahrattas* were there ready for the work to be done. About 1724 the *Deccan*, *Oudh*, and *Bengal* became practically independent under *Nizam-ul-Mulk* (ancestor of the present *Nizam*), *Sadat Khan*, and *Aliverdi Khan* respectively.

THE MAHRATTAS.—Simultaneously with the decline of the *Moguls* rose the power of the *Mahrattas*. They were *Hindoos*, and the country from which they came may be roughly described by drawing two lines from *Nagpur* to *Surat* and *Goa* on the west coast. The founder of their power was *Sivaji* (1627–1680), a chieftain of the family of *Bhonslah*. *Balaji Vishvanath* (1712–1720), *Peishwa*, or *Prime Minister*, succeeded in making that office of paramount importance and hereditary in his family; *Sivaji*'s descendants thenceforth holding a merely nominal position as *Rajas* of *Satara*. Under the *Peishwas*, aided by *Scindia*, *Holkar*, and the *Gaekwar*, who formed independent States about this time, the *Mahrattas* rapidly extended their territory and influence. In 1760 *Delhi* was in their hands, and though they suffered a disastrous defeat at *Panipat* in 1761, at the hands of *Ahmed Shah*, the *Afghan* invader, they remained for some time the first Power in *India*, and were the most dangerous opponents of the *English*. Like the *Pindaris*, a horde of freebooters who followed in their train, they were a scourge to the country, and it was fortunate for *India* that the empire at which they had but too successfully aimed was nothing more than a shadow of its former self. The various native states within its bounds were fated very soon to bend before the superior sway of *European* adventurers, who, either from love of adventure or thoughts of gain, were journeying towards its shores. It was not until both *Pindaris* and *Mahrattas* were overthrown, in 1818, that *India* enjoyed the blessings of internal peace.

EUROPEAN ADVENTURE.—The discovery by *Vasco di Gama* of the route to *India* by the *Cape of Good Hope*, in 1498, gave the *Portuguese*, while

they retained their naval supremacy, the monopoly of the *Indian* trade. Almost immediately they were the most favoured of all the merchants: they founded settlements all along the seaboard; they made commercial treaties in the name of the *King of Portugal*. The first *Portuguese* viceroy, *Francis of Almeida* (1505–1509), established numerous factories and fortresses, and took possession of *Ceylon* and the *Maldive Islands*; while his successor, *Alfonso de Albuquerque*, captured *Goa*, and extended in various places the *Portuguese* dominion, but notably on the *Malabar* and *Malacca* coasts. This dominion had, in 1542, practically amounted to an entire regulation of the *Asiatic* coast trade with *Europe* from the *Persian Gulf* to *Japan*, and for nearly sixty years afterwards the *King of Portugal* was the virtual suzerain of the southern coast of *Asia*. When the *Portuguese* crown fell into weak hands its power in the *Eastern* seas began to decline, and it was almost annulled in 1580, when the crowns of *Spain* and *Portugal* were united under *Philip II*. The *Spaniards* neglected the eastern colonies and settlements. When the *Portuguese* had brought the exports of *India* to *Lisbon* they were well content with the result; the *Dutch* might carry them thence to the other ports of *Europe*. But when *Philip II*, on account of the revolt of the *United Provinces*, shut the harbour of *Lisbon* against the *Dutch*, they were driven either to forego the trade or seek it in its origin themselves. The enterprise of the nation decided the question. *Java* was the first successful settlement of the *Dutch* in the *East*. Then societies were formed at home to prosecute the *Indian* trade; and finally, in 1602, the great *East India Company* was constituted with the plenary powers of a *State*, and the *Dutch* and *Portuguese* at length traded on equal terms. A keen rivalry ensued between the nations. The nature of the *Dutch* and the magnificent state of their navy at the time virtually decided the struggle in their favour. Between the years 1600 and 1663 one by one many of the *Portuguese* possessions fell into the hands of the *Dutch*. Later, in 1810, the *Dutch*, together with the empire they had established in the *Malayan Peninsula*, of which *Batavia* was the capital, passed under *French* dominion. Their eastern empire was then attacked and conquered by the *English* in 1812, but it was surrendered again to the *Dutch* in 1816, since which date it has remained in *Dutch* hands.

ENGLISH DOMINION.—The first *English East India Company* was incorporated by *Queen Elizabeth* in 1600, and owed its origin to a difference with the *Dutch* about the price of pepper. It seems that the *Dutch* traders in 1599 raised the cost per pound—which had previously been about 3s.—to 6s. This measure having been adopted against *English* traders only, so annoyed them that, having convened a meeting of their number, they decided to form an association for the maintenance of a direct trade with *India*. On the 31st of *December*, 1600, the *English East India Company* was incorporated by royal charter: there were 125 shareholders, the capital was £70,000, and the official title was "The *Governor and Company of Merchants of London* trading to the *East Indies*." When voyages to *India*—and almost profitless voyages they proved to be—were first undertaken on the joint-stock account, the company's capital was raised to £400,000. Quarrels

with the Portuguese ensued; and no footing of any kind was obtained until the year 1615, when Captain Best, with four English ships, won a great victory over the Portuguese squadron off Surat, and managed to conclude a treaty with the Emperor Jehangir. Under the terms of this treaty, King James I. sent out as ambassador Sir Thomas Roe, who was not only granted various trading concessions, but was also permitted to reside at the Court of the Great Mogul. When Charles I. was in need of money he granted a second charter to a new company. Confusion was the result; and piratical and other acts dishonourable to Europeans followed. The Protector, Cromwell, however, was equal to the crisis; the rival companies were merged into one, the famous Navigation Act was passed, a reign of order was established, and the English traders gained a reputation for general honesty which—in spite of individuals and solitary cases—they have ever since maintained. In 1639 the English acquired a narrow strip of land, six miles in length and one mile inland, on the coast just below Masulipatam. Having built a factory there, and surrounded it with a wall, they mounted it with guns and named it Fort St. George; fourteen years later (1653) this settlement of Madras became an independent Presidency. When, in 1662, Charles II. was married to Katharine of Braganza, a part of his dowry from Portugal was the Island of Bombay: four years afterwards, it was formally made over to the English monarch, who in his turn sold all his rights over it in 1668 to the East India Company for an annual payment of £10. In 1687 the factory at Surat was given up by the company, and Bombay was made the seat of the Western Presidency. Although in 1634 the company had obtained certain treaty rights concerning Bengal from the Mogul, and six years afterwards a factory had been established at the mouth of the Ganges, yet in that part of the country they held no territorial possessions as in Bombay and Madras; and the Nabob of Bengal in 1696—presumably to mark his sense of the company's position and privileges—ordered all the English factories to be confiscated. The merchants retreated before the tyrant's advance, and lower down the river, amid swamp and jungle, they laid the foundations of Fort William, afterwards destined to develop into the modern city of Calcutta. The incorporation of another rival company took place about this time—the "Scotch East India Company," with a capital of two millions sterling. The competition resulted in over-trading; the home markets were glutted with all kinds of Indian produce, and the English manufacturers were loud in their complaints. The prudence and tact of Lord Godolphin effected a compromise in 1708, and the whole of the English companies were at last amalgamated under the charter granted by Queen Anne to "The United Company of Merchants trading to the East Indies." The rival companies of England and France came into collision in 1746, and had Dupleix received proper support from home, he might have succeeded in founding a French Empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the capture of Pondicherry in 1761, which completed the ruin of the French. The tragedy of the Black Hole of Calcutta (1756) summoned Clive

from Madras, and the victory of Plassey in the following year laid at his feet the provinces of Bengal, Behar, and Orissa. He finally left India in 1767, his last act being to reform the services in which great abuses existed. After three years of misrule, *Warren Hastings* was appointed President of Calcutta in 1772, and became Governor-General in 1774, on the creation of the office. He greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council, of which Sir Philip Francis, the reputed author of *Junius* was a member. Hastings repelled Hyder Ali's memorable invasion of the Carnatic (1780), and defeated the triple alliance of the Nizam, the Mahrattas, and Hyder Ali. In so doing he probably saved British India. The first reign of *Lord Cornwallis* (1786-93) was marked by the complete reform he effected in the Company's Civil Service, and by the introduction of the Permanent Settlement of the Land Revenue in Bengal. The events of the administration of the *Marquis Wellesley* (1798-1805) were numerous and important. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy to the English. He was succeeded by his son, Tipoo Sultan, who resembled him in courage. *Lord Wellesley* saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tipoo, and the restoration of Mysore to the rightful Hindoo sovereign. The Treaty of Bassein (1802) broke up the Mahratta Confederacy. The campaigns of Lord Lake and Sir Arthur Wellesley, in the Second and Third Mahratta Wars, curtailed the power of Scindia and Holkar, and added to the strength and extent of the Company's dominions. Lastly, *Lord Wellesley* developed, if he did not establish, a system of subsidiary alliances with Native States, which promised to give greater security than the balance of power attempted by *Lord Wellesley's* predecessors. *Lord Minto* (1807-13) established peaceful relations with the Sikhs, Cabul, and Persia, through the mediation of Metcalfe, Mountstuart Elphinstone, and Malcolm respectively, and extended British influence in the Eastern Seas. Under the *Marquis of Hastings* (1814-23) the Bombay Presidency, hitherto the smallest of the three, attained its present dimensions on the annexation, in 1818, of the territory of the Peishwa, whose power had lasted a little over 100 years. In 1823 *Lord Amherst* succeeded the Marquis of Hastings, and marked his period of office by a conquest in another direction. The King of Ava had been not only guilty of great insolence to the Governor-General but was ever making encroachments on the British territory. The result was the First Burmese War, which cost us 20,000 lives and nearly £14,000,000, but gave us the fertile provinces of Aracan and Tenasserim, and, practically, Assam. While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, Suttee (or widow-burning) was abolished, and various measures were passed affecting education, economy, and justice. The Charter of the East India Company was in 1833 renewed for twenty years, on condition that the Company should altogether abandon its trading, and allow of the settlement of Europeans in the country. *Lord Auckland's* resolution to support Shah Shuja against Dost Mohammed brought on the First

Afghan Expedition (1839-42), and the serious disaster attendant on the fatal Retreat from Cabul. This was atoned for in the administration of *Lord Ellenborough* (1842-44), which also saw the Conquest of Sind by Sir Charles Napier. *Lord Hardinge* (1844-48) conducted in person the First Sikh War, and fought a series of severely-contested battles, ending with Sohraon (1846). *Lord Dalhousie's* administration (1848-56) was fruitful in events. The Second Sikh War resulted in the submission of the Sikhs, who at Chillianwallah and Goojerat gave further proof of their bravery. The annexation of their country was followed by that of Tanjore; and the Second Burmese War deprived the King of Burmah of his seaboard provinces. Lord Dalhousie promoted the introduction of Railways and the Telegraph. His annexation policy was much criticised at home: it proceeded on the principle that either misrule or a break in the natural succession should justify the transfer of the state to the British government, considering that the welfare of those governed should be the first consideration. In 1849 Satara, and in 1853 Jhansi, became British territory; and after the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after long and painful hesitation on the part of the directorate, and after repeated warnings to the Government of Oudh—a Government marked by tyranny and oppression—that kingdom was also added to the list of annexations. The proclamation was made on February 13, 1856, and the transfer took place without the shedding of blood or the striking of a single blow. *Earl Canning* (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace. It was, however, his fate to meet the greatest crisis that has threatened the British Empire in India. A Mutiny of the native troops broke out on the 10th of May, 1857, at the station of Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of 40,000 of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign of Sir Hugh Rose, and all the heroism displayed during that momentous time, will never be forgotten.

THE BRITISH INDIAN EMPIRE.—The Great Mutiny was the death-blow to the East India Company, whose glorious annals were brought to a close by a Proclamation to the Princes, Chiefs, and People of India, dated the 1st of November, 1858, announcing the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died November 20th, 1863. The attention of *Sir John (Lord) Lawrence* (1864-69) and of *Lord Mayo* (1869-72) was directed to the necessity for financial retrenchment, which arose chiefly from increased military expenditure. Lord Mayo was assassinated on the 8th of Feb., 1872, while on a visit to the convict settlement at Port Blair, in the Andamans. During the time of *Lord Northbrook* (1872-76), H.R.H. the Prince of Wales visited India, and received a loyal welcome from all classes. *Lord Lytton's* Viceroyalty (1876-80) was made eventful by the terrible Famine in Southern India and by the Second Afghan War. He was succeeded by the *Marquis of Ripon*

(1880-84), whose peaceful rule was marked by the extension of local self-government. He, in his turn, gave place, at the end of 1884, to the present Governor-General, the *Earl of Dufferin*, whose régime has been remarkable for the Third Burmese War (1885), which has added to British India the province of Upper Burmah; for the policy of strengthening the north-west frontier against Russia, by increasing the army, improving the military communications, and delimitating the northern frontier of Afghanistan to the Oxus; and for the celebration in India of the Jubilee of Her Majesty's reign (1887), during which the native chiefs and all classes in India have joined in showing their enthusiasm and their loyalty. Another significant instance of loyalty has been the spontaneous offer in 1887 by the Nizam of Hyderabad of 20 lacs a year for three years, as contribution towards the cost of military defence of the north-west frontier. Lord Dufferin's viceroyalty has also been characterised by its efforts to secure financial retrenchment, and by its internal reforms connected with land and excise administration.

There have been those who have questioned the advantages India has derived from contact with Europeans and Western civilization. The general good and welfare of a community are not necessarily counterbalanced by individual cases of hardship and of oppression, and there can be little doubt that the old East India Companies, with all their petty jealousies and tyrannies, not only laid the foundations of our modern Empire in the East, but benefited largely both the countries with which they traded and those from which they came. It is, however, altogether beyond dispute, that English Imperial rule in India is exciting an untold influence for good upon the natives. It is admitted generally that the prosperity of a country may be measured directly by considering the true expansion of its trade. *Sir W. W. Hunter*, in his *Imperial Gazetteer of India*, speaking of the exports from 1700 to 1880, says:—"At the beginning of the last century, before the English became the ruling power in India, the country did not produce £1,000,000 a year of staples for exportation. During the first three-quarters of a century of our rule, the exports slowly rose to about £10,000,000 in 1834. During the half-century since that date, the old inland duties and other remaining restrictions on Indian trade have been abolished. Exports have multiplied by sixfold. In 1880, India sold to foreign nations £66,000,000 worth, and in 1884-85 upwards of £80,000,000 worth, of strictly Indian produce which the Indian husbandman has raised, and for which he was paid. In 1888 the total trade of India, including export and imports, exceeded £122,000,000. In 1884-8 the total foreign import and export trade of India, excluding treasure and Government stores, was over £136,000,000, or including treasure and Government stores, nearly £155,000,000. India has more to sell to the world than she requires to buy from it."

IMPERIAL LEGISLATION.—*The Regulating Act* (1773), which created the first Governor-General created also his Council, and was the first that recognized the East India Company as a ruling body. It was followed, in 1784, by *Pitt's India Bill*, which while leaving the Government of India nominally to the Court of Directors, in reality transferred it to a *Board of Control*, whose President represented Indian affairs in the House of Com-

mons; and in 1788 by the *Declaratory Act*, which expressly affirmed this important fact. In 1793 the Company's Charter was renewed for 20 years, and its exclusive privileges were continued. In 1813 an Ecclesiastical Establishment was formed, and the trade to India was thrown open; in 1833 the China monopoly was likewise abandoned, and the North-West Provinces were made a separate Administration. In 1853 the Company's Charter was renewed for the last time, Bengal was put under a Lieutenant-Governor, and the Indian Civil Service was thrown open to com-

petition, *Act 21 & 22 Vict. cap. 106*, "An Act for the Better Government of India," received the Royal Assent on the 2nd of August, 1858. By it all the territories heretofore under the Government of the East India Company were transferred to Her Majesty the Queen; and all the power hitherto exercised by the East India Company or by the Board of Control, were vested in the Secretary of State for India. It was not till 1877 however, that Her Majesty formally assumed the title of EMPRESS OF INDIA.

The Government of India.

THE Viceroy and Governor-General is supreme, but he is assisted by an Executive Council of six members, including the Commander-in-Chief. This body forms the SUPREME GOVERNMENT IN INDIA, which passes in review the entire administration in six separate departments—Finance and Commerce, Foreign, Military, Public Works, Home, and the Department of Revenue and Agriculture. Each department is under the charge of a Secretary, and is also the special care of a member of the Supreme Council, who has authority to deal with affairs of routine and minor importance, and to select what is worthy of the consideration of the Governor-General and his collective Council. The Governor-General specially superintends the political business of the Foreign Office. The *Department of Finance and Commerce* looks to questions of Finance, to Stamps, Excise, the Post Office, and anything involving a permanent charge on the State; also to questions bearing on the commerce of the country. The most important subjects coming under the attention of the *Department of Revenue and Agriculture* are the Land Revenue, Opium, Salt, Forests, Abkari or Excise, and the agricultural development of the country. The *Home Department* deals with the Educational, Medical, Eccle-

siastical, Judicial, Police, and other matters, and has charge of the penal settlements of Port Blair and Nicobar. The *Foreign Department* conducts our relations with Afghanistan, Nepal, and other contemurinous countries, and corresponds with the Political Agents of the numerous semi-independent Native States of Rajputana and Central India, with the Commissioner of Mysore and the Resident of Hyderabad. The Marine Service, as well as the Army, is under the *Military Department*. The Legal Member takes charge of Government Bills in the *Legislative Council* which consists of twelve members (besides the seven members of the Executive Council), of whom one half must be unconnected with the public service. As only Bengal, Madras, Bombay, and the North-West Provinces possess Councils of their own, the Legislative Council of India legislates for those Provinces which are unprovided with local Councils, or on matters of exceptional importance affecting the Empire.

The Government of India is debited with the cost of the Army for all India, excepting Madras and Bombay, with the interest on debt, and generally, with all *Imperial* as distinguished from *Provincial* expenditure. The excess of expenditure over receipts is balanced by the aggregate surplus of all the Provinces.

THE SUPREME GOVERNMENT, CALCUTTA.

Viceroy and Governor-General (Rs. 20,833 per mensem), His Excellency the Right Honourable the Earl of Dufferin, K.P., G.C.B., G.M.S.I., G.M.I.E., G.C.M.G.

Private Sec., Sir Donald Mackenzie Wallace, K.C.I.E., LL.D. *Assis. Private Sec.*, D. Pamoty, C.I. *Military Secretary*, Lieut.-Col. Lord William L. de la Poer Beresford, C.I.E., V.C., 9th Lancer *Aides-de-Camp*, Major Harry Cooper, Loyal North Lancashire Regt.; Major F. T. R. Hamilton, Norfolk Regt.; Lieut. Lord Herbrand A. Russell, Grenadier Guards; Capt. Charles J. Burn, 1st Dragoons; Lieut. Arthur John Gore, Devon Regt. (*extra*); Capt. John W. Currie, Madras S.C. (*extra*).

Native Aides-de-Camp, Bessaidar Mahomed Afzul Khan, C.S.I., Khan Bahadur, 11th Beng Cavalry; and Bessaidar-Major Gopal Singh Bahadur, 2nd Central Indian Horse.

Medical Attendant, Surgeon John Findlay, M.B. *Hon. Surgeon*, Prof. D. D. Cunningham.

COUNCIL OF THE GOVERNOR-GENERAL.

Extraordinary Member, H.E. General Sir Frederick Sleigh Roberts, Bart., G.C.B., R.A., V.C., Commander-in-Chief.

Ordinary Members (5), Lieut.-General George Tomkyns Chesney, R.E., C.B.; Andrew Richard Scoble, Q.C., C.I.E.; Sir Chas. Umpherston Aitchison, K.C.S.I., LL.D.; David Miller Barbour, C.S.I.; Sir Charles Alfred Elliott, K.C.S.I.

Extraordinary Members, the Governors of the other Presidencies when the Council shall assemble within their territory.

Additional Members for Making Laws and Regulations, Herbert John Reynolds, B.A.; Henry S. Aubyn Goodrich; Henry Sullivan Thoma G. H. P. Evans; Maharajah Luchmess Singh; James Wallace Quinton, C.I.E.; T. T. Gibbon, C.I.E.; Syad Ameer Hossein; Sir Raj Shankar Baksh Sing Bahadur, K.C.I.E.; Lieut. Col. Edward George Wace; and Sir Dinshi Manekjee Petit.

Sec. to Council, John Molesworth Macpherson

SECRETARIES TO THE GOVERNMENT OF INDIA
HOME.—Anthony Patrick MacDonnell, M.A.
REVENUE AND AGRICULTURE.—Sir Edwd. C. Bu

FINANCE AND COMMERCE.—James Westland.
FOREIGN.—Henry Mortimer Durand, c.s.i.
MILITARY.—Lieut.-Col. E. H. H. Collan.
PUBLIC WORKS.—Col. R. C. B. Pemberton, B.E.
LEGISLATIVE.—Stephen Harvey James (J. M. Macpherson, c.s.i., acting).
Agents to Gov.-Gen. (Rs. 4,000): *Central India*, Sir Lepel H. Griffin, k.c.s.i.; *Rajputana*, Col. C. H. M. Waller, B.S.C.; *Baroda*, Col. James Cavan Berkeley; *Baluchistan*, Col. Sir Robert G. Sandeman, k.c.s.i. (Rs. 2,500).
Residents: *Hyderabad* (Rs. 4,000), John Graham Cordery, c.s.i.; *Mysore* (Rs. 4,000), Sir Charles E. Bernard, k.c.s.i.; *Cashmere*, Col. Sir O. B. C. St. John, k.c.s.i., B.E.; *Nepaul*, Chas. E. R. Girdlestone; *Gwalior*, Col. Patrick W. Banerman.
Polit. Residents: *Persian Gulf*, Col. E. C. Ross, c.s.i.; *Aden*, Brigadier-Gen. A. G. F. Hogg, c.B.
Political Agent and Consul-General, Bagdad, Colonel William Tweedie, c.s.i.

MILITARY ESTABLISHMENT.
COMMANDER-IN-CHIEF IN INDIA (Rs. 8,333), H.E. Gen. Sir Frederick Sleigh Roberts, Bt., G.C.B., B.A., V.C.; appointed 28th Nov., 1885.
Military Secretary, Col. Reginald Pole-Carew, c.B.
Adjutant-General, Major-General William Kidston Elles, c.B., A.D.C.
Quarter-Master-General, Major-Gen. Edward Francis Chapman, c.B., B.A., A.D.C.

Bp. of Lahore, Rt. Rev. Henry J. Mathew, D.D.
Bp. of Rangoon, Rt. Rev. John M. Strachan, D.D.
Abp. of Bombay (Rom. Cath.), Most Rev. George Porter, D.D. (1887).

PROVINCES OF BRITISH INDIA.

The term "Presidency," which is applied to the Provinces or Governments of Bengal, Madras, and Bombay, is no longer correct, and in the case of Bengal is misleading. The expression is a relic of the time when the three settlements of Fort William, Fort St. George, and Bombay were each under the authority of a President, and comprised nearly the whole of the British possessions in India. Its use now frequently leads to the mistaken notion that British India is still divided into three Presidencies; whereas it comprises nine separate Provinces, each under its own civil government, but subordinate to the Supreme Government.

(1) **BENGAL** (Pop. 66,691,456)* was placed under a Lieutenant-Governor in 1854, having previously been part of the charge of the Governor-General. It occupies the Valley of the Ganges eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur, to the west and south-west, are ill watered and liable to drought. The chief products, besides rice, are opium, indigo, and

jute. *Chief City*, CALCUTTA (pop. 423,219, and Suburbs 333,079).
Lieutenant-Governor (Rs. 8,333), Hon. Sir Stuart Colvin Bayley, k.c.s.i. (2 April, 1887).
Private Secretary, Elliot G. Colvin (Rs. 1,116).
Aide-de-Camp,

COUNCIL OF THE LIEUT.-GOVERNOR FOR MAKING LAWS AND REGULATIONS.
The Lieut.-Governor (*President*), The Hon'bles G. C. Paul, C.I.E.; H. J. Reynolds, c.B.I.; Colman P. L. Macaulay, C.I.E.; Sir Henry Leland Harrison, Knt.; Thomas Taylor Allen, Sir Alfred Croft, K.C.I.E.; Abdul Jubbar, G. Irving, D. Cruickshank, Ananda Mohun Bose, Kali Nath Mitter, Dr. Mohendro Lall Sircar, C.I.E.

SECRETARIES TO GOVERNMENT.
Chief Secretary, Frederick Barnes Peacock (J. Ware Edgar, c.s.i., acting).
General, Revenue, and Statistical, Philip Nolan.
Financial and Municipal, Colman Patrick Louis Macaulay, C.I.E.
Public Works, Col. Salisbury T. Trevor, B.E. (Col. C. M. Brown, acting).

HIGH COURT OF JUDICATURE.
Chief Justice, Hon. Sir Wm. C. Petheram, Kt., Q.C.
 Puisne Judges, The Hons. Romesh Chander Mitter, H. S. Cunningham, H. T. Prinsep,

* The populations of the separate provinces are taken from the census returns of 1881.

Arthur Wilson, L. R. Tottenham, John Freeman Norris, q.c.; Jones Quain Pigot, James O'Kinealy, Wm. Macpherson, Ernest John Trevelyan, Chunder Madhub Ghose, Henry Beverley.

Advocate-General, Gregory Chas. Paul, C.L.E., B.A.

(2) **THE NORTH-WEST PROVINCES** and **ODDH** (pop. 44,107,866), about equal in area to Great Britain, form the upper part of the great plain of the Ganges to the west of Bengal, lying between the Himalayan Mountains and the hilly border of the central plateau. The North-West Provinces were separated from Bengal in 1835. **ODDH**, equal in size to Holland and Belgium, was annexed in 1856 and placed under a Chief Commissioner, but since 1877 the offices of Lieutenant-Governor of the North-West Provinces and Chief Commissioner of Ouddh have been combined in the same person. In 1887 a Council was established for making Laws and Regulations for the combined Provinces. The *chief City* of the North-West Provinces is **ALLAHABAD** (pop. 148,547); that of Ouddh is **LUCKNOW** (pop. 261,303).

Lieut.-Gov. (Rs. 8,333), Hon. Sir Auckland Colvin, K.C.M.G. (20 Nov., 1887).

Priv. Sec., Lieut. Colvin, 9th Beng. Lancers.

Aide-de-Camp, Capt. Leonard Gordon.

Chief Sec. to Govt., Jas. Robert Reid (Rs. 3,000).

COUNCIL OF THE LIEUT.-GOVERNOR AND CHIEF COMMISSIONER FOR MAKING LAWS AND REGULATIONS.

The *Lieut.-Governor (President)*. The Hons. James Wallace Quinton, c.s.i.; Maulvi Saiyid Ahmad, Khan Bahadur, c.s.i.; Thomas Conlan; John Woodburn; Maharaja Parlab Narayan Singh of Mahdauna; Mathew Allen MacConaghey; Rae Durga Prasad Bahadur of Gorakhpur; Pandit Ajudhya Nath, and George Edward Knox.

HIGH COURT OF JUDICATURE.

Chief Justice (Rs. 5,000), Sir John Edge, Kt., q.c. *Puisne Judges* (Rs. 3,750 each), The Hons. Douglas Straight, Maynard Brodhurst, William Tyrrell, Saiyid Mahmud.

(3) **THE PUNJAB** occupies the north-western angle of the great northern plain of India, and receives its name from the "Five Rivers" which, descending from the Himalayas, cross the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was administered by a Board of Administration. This Board was then superseded by a Chief Commissioner, who in 1859 was raised to the rank of Lieutenant-Governor. The division of Delhi was at the same time transferred to the Province from the North-West Provinces. Besides the territory under British administration, which is about as large as the Kingdom of Italy, there is an area of one-third that size belonging to 34 Feudatory Native States, with a population of nearly 4 millions, a revenue of £1,600,000, and an armed force of 50,000 men. Finally, there are the frontier tribes, split up into numerous clans with divergent interests, whose military force is estimated at 130,000 men. The *chief City* is **LAKHORE** (pop. 149,369).

Lieut.-Governor (Rs. 8,333), Hon. James Broadwood Lyall (3 April, 1887).

Private Sec. & A.-de-C., Lt. H. S. P. Davies.

A.-de-C., Capt. John Forster Manifold, B.A.

Secretary to Govt., Walter Roper Lawrence.

Judge of Chief Ct., Sir Henry Meredith Plowden.

(4) **THE CENTRAL PROVINCES**, with a popu-

lation of 9,838,791, were formed in 1861, out of territory taken from the North-West Provinces and Madras. A large proportion of the aboriginal races of India are to be found in these Provinces, which have been opened up lately. The traffic that passes through Jubbulpur is larger than that of any city in India except Bombay. *Chief City*, **NAGPOOR** (pop. 98,299).

Chief Comm. (Rs. 4,166), Alex. Mackenzie, c.s.i. *Secy. to Chief Com.* (Rs. 2,000), Lindsay Neill.

(5) **THE PROVINCE OF BURMAH**, divided into Lower and Upper Burma, is situated wholly to the east of the Bay of Bengal. **LOWER BURMAH**, consisting of the old province of British Burma (pop. 3,736,771), occupies a long narrow strip of territory on the eastern shore of the Bay. Tenasserim and Arakan were annexed after the First Burmese War in 1826, and Pegu after the Second Burmese War in 1852. The valley and delta of the Irrawaddy are extremely fertile, but owing to the want of roads in past times the province is thinly peopled. This want is now being remedied, as during the ten years from 1874 to 1884 the road mileage has increased from 850 to 2,530, in addition to which 327 miles of railway have been opened. The *chief City* of the old province is **RANGOON** (pop. 134,176).

UPPER BURMAH was annexed to the Indian Empire on the 26th February, 1886. King Theebaw, the reigning monarch, was deposed and pensioned, and the country placed under the Chief Commissioner of Burma and his assistants. Its area is about 100,000 square miles, exclusive of the subordinate Shan States, which also occupy an area of about 100,000 square miles; its population has not yet been determined, but is estimated at 3,500,000. The chief town is **MANDALAY**, situated near the banks of the Irrawaddy, and about 28 miles north-west from Amarapoora. The River Irrawaddy is navigable as far as the frontier town of Bhamo, 900 miles from its mouth, for steamers of five feet draught. The country is mountainous, and mainly forest-clad; the river valleys are narrow, but fertile. The chief natural productions of the country are gold, silver, precious stones, iron, lead, tin; teak-wood, rice, sugar-cane, tobacco, cotton, and a variety of tropical fruits. The exports of manufactured goods consist mainly of cotton and silk stuffs, saltpetre, glass, powder, porcelain, and marble images. The inhabitants—of the common Indo-Chinese stock—belong to numerous different tribes, who are distinguished by a variety of manners, languages, and religions. The most general religion is some form of Buddhism, of which the deity is known by the people as Gautama.

The average number of troops employed in Upper Burma in 1886 was 14,000; at the end of the year the number in the country was 25,000. A force of military police, consisting of 16,000, has lately been organised for the province. The revenue of Upper Burma is quite uncertain. The estimate of last year was by no means attained.

Chief Commr. (Rs. 4,166), C. H. T. Crosthwaite, c.s.i. *Secy. to Chief Com.* (Rs. 2,000), Thirkell White.

(6) **ASSAM** (pop. 14,881,426), ceded by Burma in 1825, formed part of Bengal until 1874. A range of mountains divides the province into the Surma and Brahmapootra Valleys. The *chief City* of the Brahmapootra Valley is **GAWEATI** (pop. 11,695), and of the Surma Valley **SYLHET** (pop. 14,400). The revenue is comparatively small. **Cacha**,

Sylhet, Sibsagar, and Zakhimpur are the most important tea-producing districts in India.

Chief Comm. (Rs. 4,166), Dennis Fitzpatrick, C.S.I. *Sec. to Cf. Comm.* (Rs. 1,776), Chas. J. Lyall, C.I.E.

The preceding six Administrations are in closer connection with the Governor-General in Council than the two older Governments of Madras and Bombay, which retain to a certain degree the independence they acquired when communication with the Governor-General was difficult. On important questions the Governors of Madras and Bombay address the Secretary of State through the Government of India, but on minor matters they communicate with him direct.

(7) **MADRAS** (pop. 30,688,504) was the scene of our struggle with the French, whose principal settlement, Pondicherry, is 90 miles south of the city of Madras. Though the most important of the three Presidencies until Clive's conquest of Bengal, it was small in extent till 1801, when the annexation of the Carnatic raised it to nearly its present dimensions. It is larger than Great Britain and Ireland together. With a coast-line of 1,730 miles the province has not one good natural harbour. The Governor of Madras is assisted by a Council of three members, and by a Legislative Council. The *chief City* is **MADRAS** (pop. 405,848).

Governor (Rs. 10,000), The Right Hon. Lord Connemara, G.C.I.E. (8th December, 1886).

Priv. Secs., John David Rees (Rs. 1,500), and Viscount Marsham (unpaid).

Mil. Sec., Maj. J. A. Stewart-Mackenzie (Rs. 1,000).

Aides-de-Camp, Captain W. H. Wyndham-Quin, 16th Lancers; Lieut. Granville Foulis Wingfield, 7th Hussars; Subadar-Major Usman Khan, Sirdar Bahadur.

COUNCIL OF THE GOVERNOR.

The Commander-in-Chief, Gen. Sir Charles Geo. Arbutnot, K.C.B., B.A.; The Hons. Charles Gilbert Master, C.S.I., and Philip Percival Hutchins.

Additional Members for Making Laws and Regulations, The Hons. Henry Edward Stokes, James Henry Spring-Branson (*Adv.-Gen.*); Colonel John Ord Hasted, B.E.; Mir Humayun Jah Bahadur, C.I.E.; Pasupati Ananda Gajapati Raz, Maharaja of Vizianagram, K.C.I.E.; S. Subrahmanya Aiyar, Stewart Robertson Turnbull, and P. Chentsal Rao Pantulu, C.I.E.

SECRETARIES TO GOVERNMENT.

Chief Secretary, Edmund Forster Webster.

Revenue Dept., Henry Edward Stokes, B.A.

Military Dept., Brig.-Gen. A. R. Kenney-Herbert.

Public Works Dept., Col. John O. Hasted, B.E.

HIGH COURT OF JUDICATURE.

Chief Justice, Hon. Sir A. J. H. Collins, Kt., Q.C.

Judges, Hons. James Kernan, Q.C.; T. Muttuswami Aiyar, C.I.E.; Francis Brandt; Geo.

Arthur Parker; Francis Henry Wilkinson.

(8) **BOMBAY**.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1661), and was made over by Charles II. to the East India Company in 1668. The Province (pop. 16,489,274) is 1,050 miles in length, and has many fine natural harbours, Bombay and Kurrachee being by far the most important. It is about equal in size to Germany: Native States occupying one-third; Sind, conquered in 1843, a non-regulation province, one-fourth; and Bombay proper, once the territory of the Peishwa, the remaining

82,000 square miles. The greater portion of the people (76 per cent.) are Hindoos, and 17 per cent. are Mohammedans. The Governor, as in Madras, is assisted by a Council of three members, and by a Legislative Council. The *chief City*, BOMBAY (pop. 773,196), is yearly rising in importance as the chief commercial port of India. It is, after London, the most populous city in the British Empire.

Governor (Rs. 10,000), Lord Reay, G.C.I.E.

Private Sec. (Rs. 1,500), James Montearth, M.A.

Mil. Sec., Col. Hon. N. G. Lyttelton, Rifle Brig.

Aides-de-Camp, Lieut. Arthur Phayre, Bombay S.C.; Capt. Arthur W. B. Gordon, B.A.; Lieut. Hon. Henry Yarde Bulter, Rifle Brigade (*extra*); Ressaldar Roop Sing, 2nd Bombay Lancers.

COUNCIL OF THE GOVERNOR.

The Commander-in-Chief, Lt.-Gen. H. R. H. The Duke of Connaught, K.G. (Rs. 5,833); James Bellet Richey, C.S.I.; Raymond West, LL.D. (Rs. 5,120).

Additional Members for making Laws and Regulations, The Hons. John Macpherson, B.A., LL.B. (*Advocate-Gen.*); Kashinath T. Telang, C.I.E.; F. Forbes Adam, Jas. Richd. Naylor, Dadabhai Naoroji, Khan Bahadur Kazi Shahbudin, C.I.E.; Rao Bahadur Mahadev Vassudev Barve, C.I.E.; Phirozshah Mervanji Mehta.

Secretary to Council, Joseph John Heaton.

SECRETARIES TO GOVERNMENT.

Chief Secretary, Political, Secret, Judicial, and Educational, Thos. Duncan Mackenzie (*acting*).

Revenue, Financial, and General, J. Nugent.

Military, Marine, & Eccles., Brig.-Gen. Brabazon Henry Pottinger, B.A.

Public Works, J. H. E. Hart, M.I.C.E. (W. S. Howard, *acting*).

HIGH COURT OF JUDICATURE.

Chief Justice (Rs. 5,000), The Hon. Sir Charles Sargent, Knt.

Judges (Rs. 3,750 each). Hons. Lyttelton Holyoake Bayley; John Scott; Nanabhai Haridas; Herbert Mills Birdwood; C. F. Farran; John Jardine; Henry James Parsons.

Berar (pop. 2,672,673), which lies to the north of Hyderabad, was placed in our hands by the Nizam in 1853, in payment of arrears due to the British Government. The province is fertile, and yields the finest cotton grown in India. It forms part of the charge of the British Resident at Hyderabad. The surplus revenues, after defraying the cost of administration, go to the Nizam's Government. The surplus in 1885-86 payable to the Nizam, was Rs. 19,61,740, the highest on record. *Chief City*, ELLICHPOO (pop. 26,728). The administration is under the Resident at Hyderabad—J. G. Cordery, C.S.I.

The city of *Goa*, capital of the territory of the same name, and indeed of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast about 265 miles S.S.E. of Bombay. Old Goa five or six miles inland, is fast falling to decay and New Goa, or Panjim, at the head of the harbour, a walled and strongly-fortified city, is now the centre of trade and government. The principal imports are piece-goods, ivory, raw silk, sugar, woollens, &c.; the principal export are hemp, cowries, betelnut, toys, &c. The whole territory, 60 miles long by 30 miles broad contains an area of 1,080 square miles, and a population of 420,868. The other Portuguese possessions in Western India are *Daman* (pop

of town, 6,000; pop. of territory, 47,798, area 384 square miles), to the north of Bombay; and *Diu*, a town and fort on an island off the Guzerat coast (pop. 12,636, area 52 square miles).

Pondicherry, the capital of the French possessions in Hindustan, is on the Coromandel Coast, 85 miles S. by W. from Madras. The fortifications were once strong, but in the war with England they were destroyed, and a clause in the Treaty of Paris forbids their rebuilding and the garrisoning of the place by a native French force. Rice, indigo, tobacco, betelnut, and cotton are raised in the district (113 square miles) belonging to the city, but there is no harbour to the place, and trade is declining rapidly. The imports consist of lace, fancy goods, furniture, and jewellery. Population of the town, about 30,000. The population of the whole district in 1886 was 156,094. *Chandernagore*, on the banks of the Hooghly, 17 miles north of Calcutta (pop. in 1877, 22,539); *Karikal*, in the Cauvery delta (area 52 square miles, pop. 92,516); *Yanaon*, in the Godavery delta (area 5 square miles, pop. 5,460); and *Mahee*, a small town (pop. 8,422) on the opposite coast of India, are also French possessions.

The *Andamans* (area 2,508 sq. miles), a chain of islands in the eastern part of the Bay of Bengal, are of volcanic origin, covered with a luxuriant vegetation, and inhabited by a tribe of Nigriles, who are fast dying out, except on the single island of Little Andaman, where till quite recently all attempts at intercourse have been resisted with showers of arrows. Since 1858 these islands have been used as a penal settlement by the British Government of India, Port Blair, on S. Andaman, constituting the civilized portion. Much valuable timber is obtained from the jungles, and an almost unlimited supply is available for export. Coffee, rice, and nutmegs have been cultivated with much success; the jungle has been cleared away for about 25 sq. miles, and pasturage for numerous cattle has thus been obtained. Of the entire population (about 15,000) nearly four-fifths comprise the convict element. *Chief Commissioner*, Col. Thomas Cadell, &c.

The *Nicobar Islands* (635 sq. miles) lie almost due south of the Andamans and to the north-west of Sumatra. They formerly belonged to Denmark, but were first occupied by the British in 1869, since when they have been affiliated to the Chief Commissionership of the Andamans. They consist of twelve inhabited and seven uninhabited islands, of which the most important is the northernmost (Car Nicobar), containing half the entire population of the group, and supplying more than half the export trade; while the southernmost island (Great Nicobar) contains more than half the entire area, and presents a rich field for colonial enterprise. The principal products are coconuts, of which there is an annual yield of about 15,000,000; one third of this quantity is exported. Many of the islands are malarious, which led to the failure of the attempts at colonization by the Danes 50 and 100 years ago. Population of Government station about 450; Aborigines (who are of Malayo-Burmese origin), 7,000. *Superintendent in charge*, E. H. Man.

NATIVE STATES OF INDIA.

The Native States of India cover an area of about 500,000 square miles. They contain a population of about 55 millions, and their united

military forces are estimated at more than 300,000 men, mostly ill armed and ill disciplined. The gross revenues of the chiefs come to about 16 millions sterling, and an annual tribute of £700,000 is paid to the British Government. The States vary greatly in size and importance. Hyderabad, for instance, is as large as the kingdom of Italy, and the Nizam enjoys a gross revenue of more than £3,000,000. On the other hand, in Kattywar and elsewhere where family custom has led to minute subdivision, there are many chiefs of a single village and between these two extremes there are States of every grade. Although, therefore, the number of Native States, large and small, amounts to as many as 800, only about 200 are of any importance. They may be classed under fourteen heads: 1. The Indo-Chinese group of States, and the numerous Hill Tribes of the North-East Frontier. 2. The aboriginal Gond and Kole tribes in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur Agency. 3. The Himalayan Hill States, west of Nepal (including Cashmere). 4. The numerous Afghan and Belooch tribes of the North-West Frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. 5. The Sikh States, in the Sirhind plain, south of the Sutlej. 6. The three Northern Mohammedan States of Khair in Sind, Bhawalpur to the north-east of it, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 7. The ancient sovereignties of Rajputana, lying to the south of the Punjab, and between Sind and the North-West Provinces. 8. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 9. Guzerat, and the numerous petty chiefships of Kutch and Kattywar. 10. The Southern Mahratta States. 11. Baroda. 12. Hyderabad. 13. Mysore. 14. The Malayalam States of Travancore and Cochin, lying together in the far south.

The Nizam of Hyderabad, on the attainment of his majority, was installed in the presence of the Viceroy, on February 5th, 1884. *Cashmere* was granted to Gholab Sing by Lord Hardinge, after the First Punjab War. His son and successor, Runbir Sing, died on Sept. 12, 1885, and was succeeded by the present Maharaja, Pertab Sing, when also a British Resident was appointed and stronger pressure was brought to bear in favour of much-needed reforms in the government. *Cashmere* commands important trade routes to Central Asia, and is renowned for the beauty of its scenery and the excellence of its climate. Of the Sikh States the most important is *Patiala*. *Rajputana* measures some 460 miles from north to south, and 530 miles in breadth; it has a population of about 10¼ millions. The largest of the eighteen principalities is *Jodhpur*, but the most important are *Oudipur* and *Jaipur*. The Rajput dynasties are very ancient. They offered the most obstinate resistance to the Mohammedan invaders, but were finally conquered by Sultan Baber, at the Battle of Sikri, near Agra, in 1527. The Governor-General's Agent, whose headquarters are at Ajmir, has under him a staff of twenty officers, who are distributed among the States to overlook the administration, and give advice when it is needed or asked for. The military forces of these States are set down at 70,000 men. The *Central India States*, which are one-third less in extent than Rajputana, are split up into nearly

four times as many States. The two most important are *Gwalior* and *Indore*, which include between them one half of the whole area. Scindia has an admirably-equipped army of more than 20,000 men. The historic fortress of Gwalior, which had been held by the British since the Mutiny, was given back to Scindia in 1886. The opium grown in Malwa is a valuable source of revenue to the Maharaja of Indore and to the British Government. *Bhopal*, the principal Mohammedan State in India, has for three generations prospered under female rule. In 1875 the reigning Gaekwar of *Baroda* was deposed, but the native administration was continued under an adopted heir. In 1881 the province of *Mysore*, which had been administered by the British Government since 1834, was restored to the Maharaja Chamrajendra Wadiar Bahadur on his attaining his majority. The revenue slightly exceeds £1,000,000, and the tribute to the British Government is £250,000.

NATIVE PRINCES.

The most important of the Native Princes are:—

PRINCES.	Sq. M.	Pop. 1881.	Revenue.
			£
Nizam of Hyderabad	81,807	9,845,594	3,000,000
Maharaja of Gwalior	29,067	3,115,857	1,200,000
" of Mysore	24,723	4,186,188	1,000,000
Gaekwar of Baroda	8,570	2,185,005	1,100,000

Begum of Bhopal	6,874	954,901	268,000

INDIAN APPOINTMENTS.

The civil administration of British India is recruited from four sources—1. Competitive examination in England; 2. The Indian Staff Corps; 3. The patronage of the Secretary of State; 4. The patronage of the local Governments. The examination of candidates for appointments in the Covenanted Civil Service of India is held annually in London, in June, the number of appointments varying with the requirements of the local Governments. The average number is from 30 to 40. After the competitive examination, and before proceeding to India, selected candidates undergo two years' probation, and are required to pass periodical examinations in special subjects of study. The limit of age for candidates is from 17 to 19 on the 1st of January of the year in which the examination is held; application for admission to the examination must be made before the 31st of March. To encourage candidates to receive a University training, an allowance of £300 is given to all who pass their two years' probation in residence at some University approved by the Secretary of State, and an additional bonus of £150 is granted to any student who, after residing a third year at the University, obtains a degree in honours at Oxford or Cambridge, or passes with credit

an honour examination of the London University. Within a certain time of the candidate's arrival in India he must elect to serve in the executive or the judicial branch of the administration, the summit of the profession in one branch being the Lieutenant-Governorship of a Province, in the other a Judgeship of the High Court. The salary of a covenanted civil servant commences at Rs. 4,800 a year. The number of covenanted civilians in all India is rather under 960. The Native Army absorbs the larger proportion of the Indian Staff Corps; but out of a total of about 3,000 officers some 380 are attached to the Police or the Public Works Department, or are in Civil or Political departments, the political branch being the most sought after. The rule for entrance into the Staff Corps is that applicants must have completed one year's regimental duty and be under 25 years of age, and must have less than four years' service. Temporarily, however, owing to the large demand for officers for the new native regiments, these restrictions, excepting that of age, have been suspended. There is a term of probation of eighteen months, which must be passed with native troops. A Lieutenant's Staff Corps pay commences at Rs. 2,700 a year. The patronage of the Secretary of State is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Ecclesiastical, Judicial, or Educational Departments. The Local Governments have many appointments in their gift, but no one who is not a native, a covenanted civilian, or an officer of the Staff Corps can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: *Opium, Salt, Customs, Survey, Mint, Public Works Department, Police*. The *Public Works Department* is recruited from the Royal Indian Engineering College at Cooper's Hill, from the corps of Royal Engineers, and, in respect to natives, from the Civil Engineering colleges in India. About 50 candidates, between the ages of 17 and 21 on the 1st July of the year of admission, are admitted each year to the college at Cooper's Hill, candidates receiving preference according to dates of application for admission. After a three years' course of study, during which the annual charge is £183, the students undergo a competition, and the highest obtain appointments in India (commencing at Rs. 4,200 a year), the number of these being about fifteen. Candidates for the *Telegraph Department* enter the college in the same manner but their competitive examination is at the end of two years, and the usual number of appointments is two annually. The commencing salary is Rs. 3,000 a year. The *Forest Department* of India, in which the pay also begins at Rs. 3,000 a year, is recruited from this country; there will be an examination in June, 1888, for the selection of twelve probationers, the limits of age being 17 and 21 on the 1st of June, 1888 applications to be made to the Revenue Department of the India Office before 1st May, 1888. Successful candidates, who will be on probation, will undergo a two-years and two-months special course, during which an annual charge of £183 will be made for each student, and of which the first twenty-two months will be at Cooper's Hill, and four months with some English or Continental Forest Establishment. Examinations for the *Medical Service* take

place in February and August. Fourteen appointments being offered for competition in February next. Candidates must be between the ages of 21 and 28 at the date of examination, and must possess a diploma in, or licence to practise, surgery, as well as a degree in, or licence to practise, medicine. Successful candidates will be required to attend a four months' course at the Army Medical School at Netley, during which period they will receive an allowance to cover cost of maintenance.

The Ecclesiastical Establishment in India consists of the Bishops of Calcutta, Madras, Bombay, Lahore, and Rangoon (whose names will be found at page 416), and 160 Chaplains. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when ministering to British regiments.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31st MARCH, 1885 and 1886.

The figures are conventional sterling, £1 = 10 Rupees.

The following is a Table of Revenue and Expenditure, up to 1885, in each decade since 1839-40, and for the year 1885-86, together with the totals of all the years between those dates, the values being stated approximately at the conventional rate of £1=Rs. 10. It should be borne in mind that the area of British territory in India has risen since 1840 from 616,000 to 868,000 square miles:—

REVENUE.

The INDIAN DEBT on the 31st March, 1886, stood at £166,931,000, as compared with £162,454,748 in the previous year. Of the latter sum, £93,183,660 was held in India, and £69,271,038 in England. The total charge for interest on debt in 1885-86 was £7,485,293. In the preceding statement of expenditure £3,857,161 of this total is charged under Interest on Debt (excl. Railways and Irrigation Works), £2,663,285 is charged under Railway Revenue Account, and £964,847 under Irrigation.

THE OPIUM REVENUE.—The growth of the poppy in British India is strictly confined to the districts of Behar and Benares in Bengal, and its manufacture has been a Government monopoly for more than a hundred years. The cultivators undertake to deliver the whole of the produce at the contract price of Rs. 4'8 and Rs. 5 per seer (2 lbs.), and when the crop is ripe the juice is collected and sent to the Government Agencies at Ghasipur and Patna. Here it is dried to a certain consistency, and packed in chests containing about 130 lbs. each. It is then sent down to Calcutta, disposed of by auction at monthly sales, and exported. In the year ending 31st March, 1886, 50,994 chests were thus sold for £6,490,619, at a rate slightly below Rs. 1,235 per chest. Deducting £3,048,746 for cost of cultivation and manufacture, the net profit from this Bengal "export" or "provision" opium was £3,441,873. In addition to this, 5,552 chests of Bengal opium were issued to the Excise Department to meet the consumption in India itself. The number of chests of Bengal opium in reserve for export on 31st March, 1886, was 64,052; 1,977 chests were also in store for the Excise Department.

A large quantity of opium, amounting in 1885-86 to 37,677 chests, is also exported from Bombay, the whole of which is grown in the Native States of Central India, and goes by the name of Malwa Opium, because that district supplies the greater part of it. A duty of Rs. 650, Rs. 675, or Rs. 700 per chest, according as the opium comes from Malwa, Ajmere, or Ahmedabad, is levied upon it when it enters British territory, and the receipts from this source in 1885-86 amounted to £2,451,896, which was almost entirely clear gain to the Government, the cost of collecting the duty being insignificant. The total net revenue from the two sources—Bengal and the Native States—was £5,884,847.

Nearly the whole of this opium is exported to China, and according to a calculation of the British Inspector-General of Customs, is consumed by one million persons, or at the most 0'33 per cent. of the population. This quantity of opium pays the Chinese Government about

£1,920,000, and is sold to the consumer for £15,400,000, which is equal, according to the calculation above referred to, to the expenditure of £42,192 daily by 1,023,000 persons, or about 9'9 annas by each individual.

TRADE OF INDIA IN 1886-87.

The foreign trade recovered from its depression, and showed a larger aggregate value than in any previous year, amounting to Rs.1,59,86,83,937. This is 5 per cent. above the figure for 1885-86, viz., Rs.1,52,20,50,150. In seven years the increase has been 32'6 per cent. The proportion per head of the population is, however, less than 6 rupees against £17 10s. in the United Kingdom.

The average annual excess of exports over imports in the last seven years has been 18,30 lacs. The import trade however is increasing, as it should, somewhat faster than the exports. In 1886-87 the increase in imports of merchandise was especially great, exceeding 1885-86 by 13'2 per cent. The actual figures for 1886-87 are: imports of merchandise, 58,70 lacs; of treasure, 11,05 lacs; total 69,83 lacs: exports of merchandise, 88,44 lacs; of treasure, 1,72 lacs; total 90,12 lacs; making a grand total of 159,87 lacs. This is exclusive of Government stores and treasure, of which the imports were 312 lacs, and the exports 8 lacs.

All imports are now free, excepting arms and ammunition, opium, liquors, and salt. It was thought that the entire removal of the duty on cotton manufactures might be detrimental to Indian manufactures, but it has not been so. On the contrary, the value of Indian cotton yarn and piece goods exported has increased from 74 lacs in 1876 to 428 lacs in 1886-87. The business was never so extensive. Having wrested the markets of China and Japan to a large extent from England, the Bombay mill-owners are now competing for the markets of Central and Eastern Africa.

The total value in lacs of the imports and exports respectively of merchandise for the several provinces of British India were as follows for the year ending March 31st, 1887:—Bombay, 23,48 and 34,22; Bengal, 23,34 and 35,60; Madras, 532 and 913; Burmah, 371 and 659; and Sindh, 281 and 289. The value of the treasure imported and exported was 12,77 lacs, of which Bombay contributed 10,72, and Calcutta 121 lacs.

Imports of gold declined in 1886-87 from Rs. 2,76,29,347 to Rs. 2,17,20,682; the net result for the last five years has been an import of 20,00 lacs worth of this metal, which not being used for coinage, must have been mainly converted into ornament, in accordance with the Eastern method of investing savings.

The net imports of silver in the last five years has been 39,90 lacs, of which seven-eighths came from England, Italy, and China.

The bills and telegraphic transfers sold by the Secretary of State on India during the year amounted to Rs.16,70,13,000, realizing £12,136,278 (true sterling), the average rate being 18. 5'44d. per rupee. This sum represents a portion of the excess of exports from India over imports, as well as the cost of the home charges. To obviate the necessity for a double remittance of specie, an exchange is effected; the merchants purchase the Bills of the Council of India in London in sterling money, and receive the equivalent in rupees in India from the Government Treasuries at Calcutta, Madras, and Bombay.

The total number of vessels which entered and cleared at Indian ports from and to foreign countries in 1886-87 was 10,581, with a tonnage of 7,171,863, as compared with 10,562 vessels with a tonnage of 7,294,589 in 1885-86. The size of vessels trading to India is constantly increasing. The percentage of steam tonnage passing the Suez Canal further declined in 1886-87 from 64 to 62; 78.55 per cent. of the total tonnage of the year was British.

The following statement exhibits the principal articles of the foreign trade of India, the figures being those of 1886-87:—

IMPORTS.		EXPORTS, (excluding re-exports).	
	Lacs Rs.		Lacs Rs.
Cotton manfs.	24,47'6	Cotton	13,46'8
Metals	4,68'9	Opium	11,07'8
Cotton twist ..	3,31'8	Seeds	9,20'6
Sugar (refined)	2,05'5	Rice	8,83'6
Woolen Goods	1,52'9	Wheat	8,62'6
Liquors	1,46'0	Jute (raw & man.)	6,01'9
Railway plant	1,43'5	Hides	5,15'0
Chemicals, Drugs, &c.	1,40'8	Tea	4,72'8
Silk (man.) ..	1,38'3	Indigo	3,69'2
Machinery ..	1,37'1	Cotton twist ..	3,33'7
Coal, &c. ..	1,34'7	Coffee	1,50'2
Provisions ..	1,17'9	Wool (raw & man.)	95'1
Apparel	98'2	Cotton goods ..	88'2
Hardware & Cutlery	86'5	Silk (raw & man.)	80'2
Oils	86'5	Spices	61'3
Salt	80'5	Lao	51'6
Silk (raw) ..	79'3	Sugar	50'4
Spices	64'4		
Glass	50'1		

The foreign sea-going trade of India in 1885-86 was distributed in the following order:—

COUNTRIES.	MERCHANDISE AND TREASURE.	
	Imports and Exports.	Percentage on Total Trade of India.
	Lacs Rs.	
United Kingdom ..	87,70'8	54'88
China (Hong Kong)	14,16'2	8'86
France	8,59'5	5'38
Italy	5,86'7	3'67
Straits Settlements	5,84'0	3'65
United States	5,13'5	3'21
Belgium	3,90'4	2'44
China (Treaty Ports)	3,54'6	2'22
Austria	3,44'5	2'16
Ceylon	3,09'6	1'94
Egypt	3,02'6	1'89
Mauritius	2,62'5	1'64
Persia	2,15'5	1'35
Arabia	1,97'7	1'24
Australia (including New Zealand, &c.) } ..	1,15'5	0'70
Zanzibar	1,03'9	0'65
Aden	97'2	0'61
Germany	94'5	0'59
Turkey in Asia ..	83'6	0'52
Holland	49'1	0'31
Japan	43'2	0'27
Malta	40'0	0'25
Russia	38'1	0'24
South America ..	35'6	0'22

Frontier Land Trade.—The registration of the trade which crosses the land frontier of British India is defective, but constant efforts are made to render it more complete and accurate. The

registered figures for 1886-87 were (including treasure)—imported 3,78'33 lacs, and exported 5,65'90 lacs—as follows:—

PRINCIPAL COUNTRIES.	Imports.	Exports.
	Lacs.	Lacs.
Baluchistan and Southern Afghanistan (including Trans-Frontier by rail)	28,38	3,14,66
Cabul, Tirah, Bajaur, and Sewestan		
Cashmere	53,86	42,68
Ladakh	2,23	2,25
Nepaul	1,83,67	87,48
Sikkim and Thibet	11,61	7,26
Total of all countries, ex- cluding Upper Burmah }	3,78,33	5,65,90
Excess of exports		

The trade between Lower and Upper Burmah has been excluded from these figures. The trade between Upper Burmah and China is also excluded, as no information is available. The goods carried by steamers between Mandalay and Bhamo were valued at about 37 lacs. The trade between Upper and Lower Burmah, consisted in 1886-87 of 136 lacs worth of imports and 210 lacs of imports from the Lower province.

The following is a list of the frontier provinces of British India and the foreign countries adjoining them with which they have trade relations:—
Stnd.—Lus Bela, Khelat, Khorasan, Kandahar, Pishin, Girishk, Ghuzni, and Cabul to a small extent.

Punjab.—Sewestan, Tirah, Bajaur, Cashmere, Ladakh, Cabul, portion of Thibet.

North-West Provinces & Oudh.—Thibet, Nepaul, Bengal.—Nepaul, Bhutan, and Sikkim.

Assam.—Towang, Bhutan, Duffia and Aka Hills, Naga and Mishmi Hills, Manipur, Lushai Hills, and Hill Tipperah.

Burmah.—China, Karennie, Shan States, Zimmay, and Siam.

Excluding the Burmah trade, imports and exports alike increased to a small extent in 1886-87.

The export trade through Afghanistan is much checked by the restrictive policy adopted by the Russian Government towards British Indian trade.

In India, including the Native States, there were (1881) nearly 254 millions of inhabitants, 188 millions being Hindoos, and 50 millions Mohammedans. Of 130 million males, 51 millions are dependent on agricultural pursuits, 13½ millions on various industries; 7¼ millions are labourers, and 2 millions are in domestic service. There are 714,759 villages, townships, &c. (544,856 being in British Territory, and 169,903 in the Native States), nearly half of these being villages with less than 200 inhabitants. The average number of inhabitants is 229 per square mile (varying between more than 442 in Bengal to less than 43 in British Burmah). There are 53 towns with a population of more than 50,000, the seven largest being—Bombay, 773,196; Calcutta, 766,298; Madras, 405,248; Lucknow, 261,303; Benares, 199,700; Delhi, 173,393; Patna, 170,654. The largest town among the Native States is Hajdarabad, in the Dekkhan, with a population of 354,962. The total number of British-born subjects in 1881 was 89,798 (76,188 males, 13,610 females).

AREA AND POPULATION OF BRITISH INDIA ACCORDING TO CENSUS OF 1881.

PROVINCES, ETC., UNDER THE ADMINISTRATION OF:	Area in Square Miles.	Number of Towns and Villages.	Population.	Number per Square Mile.
The Governor-General of India—

Notes.—Difference in totals of Males and Females in this Table, as compared with grand total in Tables above, arises from the population of Aden and Andaman Islands not being included in these columns.

RAILWAYS, &c.—The number of miles open for traffic on 31st March, 1887, was 13,390; in addition there were 3,206 miles of line then under construction, or already sanctioned for construction. The total amount of capital expended on Railways (including steamboat services and ferries) up to 31st December, 1886, was (at the conventional rate of Rs. 10 = £1) £170,498,911 (£60,763,058 by Guaranteed Companies, £90,488,941 on State lines, including the purchased lines; £10,291,593 on lines belonging to the Provincial Governments, £3,423,367 on assisted companies' lines, and £5,531,952 on Native State lines). The year's net receipts up to 31st

December, 1886, were £9,773,553, or a return of £5·9 per cent. on the capital sunk, against £9,126,331, or a return of £5·64 per cent., in 1885; the number of passengers increased from less than 81 to 88 millions, while the goods traffic increased from less than 19 to over 19½ million tons. On *Irrigation* works the Government have laid out a capital of £28,000,000, which, apart from the advantages to cultivators and protection against famine, gave a return to the State in 1885-86 of about 3½ per cent. The *net* expenditure of the Government of India in 1885-86 on public works, old and new, was close on 12 millions sterling, of which nearly 6¼ millions were taken from the revenues of the year, and the remaining 5¼ millions were borrowed. The length of *telegraph* lines in India on 31st March, 1886, was 27,510 miles.

The **ARMY** in India numbered in 1885-86 207,873 officers and men (European 73,582, Native 134,291). A considerable addition to the Army was made during the year, consisting of 10,000 additional Europeans, and 8,000 more native soldiers. The sanctioned addition to the Native Army is, Cavalry, 5,000; Goorkha regiments, 5,000; and general Native Infantry, 10,000 to 12,000. For police duties and frontier service this force is supplemented by about 160,000 Native Police, officered mainly by Europeans.

The only military operations of importance during the year 1885-86 were those in Burma, where the pacification of the country and the dispersal of the large number of insurgent and predatory bands have been a work of great difficulty.

The area of **FORESTS**, either belonging to the state or to some extent protected by it, and contributing towards its revenue, amounted, in 1885-86, to over 82,000 square miles, or about 10 per cent. of the area of British India.

EDUCATION has made steady progress of late years. The number of educational institutions in 1885-86 was 122,516, and the number of students was 3,332,851, as compared with 60,827 schools and 1,816,124 students in 1877-78. Of the institutions, 16,048 were maintained by the State, and 61,183 aided by grants. The remainder were private and unaided. The policy of the Government aims principally at im-

proving and extending elementary education. There are four Universities in India, founded on the model of the University of London, viz., those of Calcutta, Madras, and Bombay, and the Punjab University.

The **INDIAN MUNICIPALITIES** began for the most part in 1884-85 to enjoy the more popular system of representation granted to them by Lord Ripon's measures of Local Self Government. The result appears to have been successful. The number of Municipalities in India is now 749; Bombay and the Punjab claiming the largest shares. Their taxation, spread over a population within municipal limits of 14,400,571, gives an average of R. 1 rrs. 4p. a head. In several provinces local self-government by means of representative District Boards has also been largely introduced for rural districts.

LEGISLATION IN INDIA IN 1887.

Among the Acts passed by the Government of India during the year ended September, 1887, were one determining the annexation of the town, fort, and adjacent villages of Jhansi, which had been surrendered by Scindia in return for the fortress of Gwalior and the cantonment of Morar; another extending to the new province of Upper Burma most of the laws in force in the rest of British India, and combining its administration with that of Lower Burma under the Chief Commissioner; and a third largely modifying the land-tenure of Oudh, in giving to the tenants occupying rights, and securing them from frequent or exorbitant enhancements of rent. This law was well received by the landowners, except that in as many as 57,000 cases they secured, by serving ejectment notices or otherwise, enhancements of rent before the new law came into operation. Apart from the laws actually passed, the Government of India showed considerable activity in investigating important administrative questions by means of Committees and Commissions. The most important questions investigated were the Reduction of Expenditure, the recruitment of the public service and the possibility of opening it still further to native applicants, and the grievances of the people as to the administration of the Forest and Excise Laws.

LARGE CITIES IN BRITISH INDIA.

RELIGIONS OF THE INHABITANTS AND DENSITY OF POPULATION PER SQUARE ACRE.

THE following accounts of the different British Colonies and Possessions have been revised by the Local Governments, to whom the Editor begs to return his warmest thanks. They will frequently be found to differ from statistics prepared and published by authority in this country, especially the Values of Imports and Exports, the mode of valuation in the Colonies being in many cases different from that adopted by the British Custom-house authorities.

Appended to most of the Colonies, and to many Foreign Countries, will be found the following particulars:—Distance from London; time of Transit by quickest route, i.e., with the mails; the rates of Postage for letters, books, and parcels (the letter rate being for the half-ounce, newspapers not exceeding four ounces, and book-post with the lowest unit and the rates of increase); the rates charged by Parcel post, the limit of weight to nearly all places being eleven pounds; and the charges per word for telegrams from London.

ADEN.

Aden consists of a peninsula and town on the south coast of the province of Yemen, in Arabia Felix, situate in lat. 12° 47' N. and long. 45° 10' E. The British possessions include the main peninsula and the opposite peninsula of Little Aden, together with a strip of territory recently purchased, extending for about 3 miles inland—the total area being about 70 square miles. The peninsula, which is fortified, was captured by the British in 1839: it is of volcanic origin, and the hills attain an altitude of 1,775 feet. The town is on the north-east side of the peninsula, in a deep hollow formed by the crater of an extinct volcano, and surrounded on all sides by high naked rocks. Large numbers of wells are found in various parts of the neighbourhood, but the water is of very limited quantity, and has a brackish, unpleasant taste. The climate is dependent to a large extent upon the monsoons, and is not considered unhealthy in spite of its extreme heat. The harbour on the west side of the isthmus is regarded as the best in Arabia: there is a second harbour on the east side of the isthmus.

The Island of PERIM, at the entrance of the Red Sea (lat. 12° 40' N., long. 43° 23' E.), which is garrisoned by fifty native infantry, is a dependency of Aden, and was first occupied by the British for the purpose of building a lighthouse upon it.

The population of Aden in 1881, including troops and followers, was 35,165. It forms one of the links in the chain of British fortified coaling positions on the Eastern highway. The city itself is ancient, and was formerly very celebrated. The enormous trade which it maintained with China and India during the eleventh, twelfth, and thirteenth centuries helped greatly to make it the *entrepôt* of the riches of the East. The discovery of the passage round the Cape put an end to its importance and ruined its trade. In 1839 it came into the hands of the British; it was then a wretched place, with a population of 600; now it is not only of special military value as commanding the Red Sea, but also commercially as a centre of trade with the surrounding countries. The harbour is visited annually by upwards of 1,500 vessels. The value of the sea imports in 1886-87 (including treasure, but not Government stores and treasure) was Rs. 24,571,420, and the exports Rs. 20,599,288. The value of the land trade in 1886-87 was imports Rs. 1,534,113, exports Rs. 638,640. The principal articles of import from the West are coals, cotton piece-goods, &c., and sil. The exports, which are all

received from the neighbouring countries, consist of Arabian and African coffee, African dyes, feathers, gums, and hides; Red Sea mother-of-pearl, Zanzibar spices, Mauritius sugar, and Indian tobacco. Nothing is manufactured in Aden except water and salt. About 56° E. long., east-north-east from Aden, is the well-known group called the Kooria Moorria Islands, which were ceded to the English government in 1854 by the Sultan of Muscat. They are famous by reason of the abundance of guano found upon them.

Aden is subject to the Government of Bombay, and a small amount of revenue is obtained from stamps, excise, opium, salt, and arms. Local taxes are raised for municipal purposes.

The Settlement is presided over by a political Resident, who combines the duties of military commandant and civil governor.

SOCOTRA is also an island in the Arabian Sea, 150 miles E.N.E. of Cape Guardafui, the eastern extremity of Africa, in the direct line of communication with India. Its length east and west is about 138 miles, with an extreme breadth of about 40 miles; the area is computed at 3,000 square miles. After various attempts, since 1500, by various European nations to obtain possession of the island, a treaty was signed in January, 1876, by which, for a small subsidy, the Sultan engaged never to cede Socotra to any foreign Power; but this arrangement was not satisfactory, and on 8th October, 1886, it was formally taken possession of by Brig.-Gen. Hogg, and now like Perim is occupied by a small force from Aden. The shores are mostly bold and rocky, but on the north there are several bays that afford fairly good shelter to vessels. The only fertile parts of the island are in the east and north; the leading natural production being aloes, said to be the finest in the world. The inhabitants number about 4,000, and are a mongrel race of aborigines and Bedouin Arabs: in their habits they are almost entirely nomadic.

Imports from United Kingdom, 1885 .. £210,732

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 53'—9° 51' N. lat. and 79° 42'—81° 55' E. long.; its area is about 24,702 square miles, or one-sixth less than that of Ireland. Its greatest length is, from north to south, 266 miles; and greatest width 140 miles from east to west. In 1505 the Portuguese formed settlements on the island, but 150 years later were dispossessed by the Dutch. In 1795 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1801, Ceylon was erected into a separate Crown colony. At the end of 1885 it contained a population of 2,825,000, of whom the most numerous are the Singhalese, descendants of colonists from the Valley of the Ganges, who first settled in the island B.C. 543. The proportion of Europeans to natives is less than two per thousand, the distribution being as follows:—Singhalese, 1,920,000; Tamils, 687,000; Moormen, 182,000; other native races, 13,000; burghers (natives of European descent), 18,000; Europeans, 5,000. The climate, although purely tropical, is healthy; there are no extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature at Colombo being nearly 81° F. The coolest months are December and January; the hottest are March, April, and May. In June, 1886, there were 177 miles of railway open, and 40 more projected; post-offices numbered 122, and there were 1,151 miles of telegraph wires. The chief articles of export are coffee, tea, cinchona, cardamoms, cinnamon, cacao, coir-stuff, copperah, cocoanut-oil, plumbago, and tobacco. Ceylon is still a land of pearls and precious stones, and the pearl fishery alone is sometimes a really valuable source of revenue, the Government share in 1881 being £59,900. The manufacture of salt remains a government monopoly, yielding a profit of from £80,000 to £90,000 per annum. The staple production of the island is coffee, of which in 1875 (the year of maximum prosperity) nearly 1,000,000 cwts.—valued at £5,000,000—were exported. Since 1877 more than 100,000 acres have been planted with tea, and the export has risen already from 2,105 lbs. to 9,000,000 lbs. Cacao is fast becoming an important item; so, too, are india-rubber, tapioca, and vanilla. The export of cinnamon was for long a government monopoly, but all restrictions, both as to growth and export, having been removed, the amount exported in 1883 exceeded 2,335,000 lbs. About one-fifth of the island is under cultivation, and the leading areas were (1884) as follows:—Rice, 600,000 acres; coffee, nearly 300,000 acres; cocoa-nuts, 560,000 acres; cinchona, 33,000 acres; cinnamon, 35,000 acres; and various palms, 60,000 acres. The returns of live stock for the same year run thus:—Horned cattle, 963,896; horses, 3,683; goats, 82,347; sheep, 53,757. Among the more important native industries are gold, silver, ivory

and tortoise-shell work, pottery, mats, fans, and wood-carving.

Public revenue, 1885	£1,182,301
Public expenditure, 1885	1,261,121

The Government is administered by a Governor, aided by an Executive Council of five members and a Legislative Council of fifteen, including the Executive Council.

The COCOS or KEELING ISLANDS, situated in the Bay of Bengal, between 11° 50' and 12° 45' N. lat., 96° 50' E. long., are included within the colony. The MALDIVÉ ARCHIPELAGO also, to the S.W. of Ceylon, a few degrees north of the equator, is tributary to the government of that island, to which the Sultan sends an annual embassy.

STRAITS SETTLEMENTS.

These Settlements (so called from their situation in the Straits of Malacca), comprising Singapore, Penang (known officially as Prince of Wales Island), with Province Wellesley and the Dindings, and Malacca, have an entire area of

* These amounts of money are reckoned on the nominal value of a rupee, viz., 2s., but as the rupee varies in value from 1s. 5d. to 1s. 11d., the sterling equivalent of any payment made in rupees must fluctuate with the rate of exchange. The various amounts in Ceylon and in other parts paid in rupees may therefore be regarded as being generally one-sixth less than the amounts given in this list.

about 1,385 square miles, with a population in 1881 of 423,384. The great bulk of the population consists of Chinese and Malays in almost equal numbers, the former amounting to 174,327, and the latter to 174,326. There were in addition 40,332 natives of India, 3,499 Europeans, the remainder being composed mostly of Arabs, Javanese, Bugis, and other Eastern races.

SINGAPORE is an island situated off the southern extremity of the Malay peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises an area of 206 square miles, and a population of 155,000. It was purchased by Sir Stamford Raffles in 1819. The seat of government, for all the settlements, is the town of Singapore, situated in lat. 1° 16' N. and long. 103° 53' E., with 139,208 inhabitants in 1881. It is a great commercial and shipping emporium. For its defence several batteries to carry heavy guns have been constructed, at a cost of nearly £100,000, paid by the colony, for which the Imperial Government has engaged to furnish guns. The number of ships entering in 1886, exclusive of native craft, was 3,139, with a tonnage of 2,566,853, and crews numbering 128,871. The total for the whole colony was 6,548, with a tonnage of 4,209,034; cleared 6,487, tonnage, 3,970,199. The total native craft entered at all three ports during the same year was 9,744 (tonnage, 265,914), with crews numbering 68,870. The climate is well suited for Europeans. There are excellent docks. It is a free port; no duties are levied upon anything; the opium and spirit trades are farmed out to Chinese. There are many wealthy and intelligent Chinese merchants in the Colony.

Public revenue in 1886	\$3,747,501
Public expenditure in 1886	\$3,495,639
Total value of imports, 1886	\$121,544,218
Total value of exports, 1886	\$104,122,274
Imports from United Kingdom, 1886	£2,259,581
Exports to United Kingdom, 1886	£4,372,628

The Government consists of a Governor, assisted by an Executive Council of 9 members, and a Legislative Council of 11 official and 7 unofficial members, nominated by the Crown, the Resident Councillor of Penang and Malacca having seats in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867, and since then by local ordinance. The Supreme Court consists of the Chief Justice and three puisne judges, and constitutes also a court of appeal from which there is yet another appeal in certain cases, viz., to the Privy Council. There is also in Singapore and Penang a Vice-Admiralty Court, and in each settlement there are ordinary magistrates' courts, together with a Court of Requests, the last named being presided over by commissioners.

Governor, Sir Cecil Clementi Smith, K.C.M.G.	\$24,000
Colonial Sec., Hon. J. F. Dickson, C.M.E.	9,600
Attorney-Gen., Hon. J. Winfield Bonser	7,800
Treasurer, Hon. E. E. Iremonger	6,480

Puisne Judge, Hon. Etienne Pellereau	8,400
Puisne Judge, Hon. J. T. Goldney	8,400
Assistant Colonial Secretary and Clerk of Councils, Arthur Philip Talbot	4,800
Principal Medical Officer, T. L. Rowell, M.D.	4,800

Insp.-Gen. of Police, Col. S. Dunlop, C.M.G., R.A.	\$5,400
First Magistrate, R. S. O'Connor	4,800
Protector of Chinese, W. A. Pickering, C.M.E.	4,800

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula between Singapore and Penang, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the English, and finally became a British possession, in pursuance of the treaty with Holland, 17th March, 1824. The population in 1881 was 93,579.

Resident Councillor, Hon. D. F. A. Hervey	\$6,800
Magistrate, H. Arthur O'Brien	3,600

PENANG, or PRINCE OF WALES ISLAND, about 15 miles long and 9 broad, is situated off the west coast of the Malay peninsula, in lat. 5° 18' N., long. 100° 4' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 107 square miles; population, including Wellesley, in 1881, 190,597.

Resident Councillor, Hon. A. M. Skinner	\$8,400
First Magistrate, C. W. S. Kynnersley	4,800
Dep. Col. Eng., Capt. M. A. Cameron, R.E.	4,200

PROVINCE WELLESLEY, on the mainland, opposite Penang, is a strip of coast about 45 miles in length with an area of 270 square miles, ceded by the Raja of Kédah in 1800, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory.

Resident Councillor, Hon. C. J. Irving, C.M.E.

The exports comprise—gutta-percha, gambier pepper, india-rubber, horns, hides, canes, sugar, rice, sago, tapioca, spices, dye-stuffs, tea, coffee, tobacco, gums, tin, &c. The climate of the colony is almost uniform throughout the year, and foliage is perennial. The maximum and minimum morning temperatures during 1886 were:—Singapore, 84° 7', 79° 8'; Penang, 84° 8', 79° 4'. The year's rainfall amounted in Singapore to 95·19 inches, and in Penang to 83·76 inches on the plain, and to 146·17 inches on the hills. The barometrical readings show the greatest variation in the year to be no more than 15 inch.

Closely connected with the Straits Settlements are the native protected States of:—

PERAK.—Brit. Res., Sir Hugh Low, K.C.M.G.	\$12,000
Assistant do., C. V. Creagh	5,400
Estimated Revenue, 1887	\$1,686,774.

SELANGOR.—Brit. Res., Frank Athelstane Swettenham, C.M.E.	\$6,480
Revenue, 1885	\$566,411.

SUNGEI UJONG.—Brit. Res., W. B. F. Paul	\$5,400
Revenue, 1885	\$120,214.

These three States extend from the border of Province Wellesley to that of Malacca, and are governed by their native rulers with the assistance of the British Resident in each case, who is directly subject to the Governor of the Straits Settlements. Perak has an area of 7,949 square miles, and a population of 118,000; the chief industry is mining, but tapioca, pepper, rice, sugar, coffee, and tea have been cultivated with success. Selangor, with an area of 3,000 square miles, and a population of 46,568, lies immediately south of Perak, and, like that State, depends largely for its prosperity upon its tin-mining. The revenue in 1883 had increased to

575,110, and a railway, 22 miles long, was opened in July, 1886. Sungei Ujong (660 sq. m.) is to the south of Selangor and north-west of Malacca. The population is about 14,000, and the revenue for 1884 was £20,196.

Singapore is distant _____ miles; transit, _____ days. Penang, 26 days. Malacca, about the same; postage, 5d.; news, 1½d.; books, 2 oz. 1½d.; parcels, per lb., 9d.; telegrams, cheapest, Penang, 5s. 7d.; Malacca, 6s. 1d.; Singapore, 6s. 3d. per word.

HONG KONG ("FRAGRANT STREAMS"),

An island situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10'—22° 17' N. lat. and 114° 6'—114° 18' E. long. It is about eleven miles long and from two to five miles wide, and comprises, with Kowloon, an area of 32 square miles, and a population in 1886 of 180,000, of whom 8,465 were whites, 1,632 Indians, and 168,958 Chinese (including about 45,000 British-born Chinese). It is separated from the mainland of China by a narrow strait (Ly-ee-moon Pass). The opposite peninsula, Kowloon, was ceded to Great Britain in October, 1860, and now forms part of the colony. The colony—which is described as exceedingly beautiful, possessing one of the finest harbours in the world, surrounded by picturesque hills rising between 1,000 and 4,000 feet high—was first taken possession of by Great Britain in January, 1841, and was formally ceded by the treaty of Nankin in 1842. It is a military and naval station for the protection of our commerce, and it is the centre of trade in many kinds of produce—chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandal-wood, rice, tea, woollens, silks, salt, &c. It is a free port, and possesses excellent docks, capable of holding the largest vessels, and is fortified. It is calculated that, exclusive of the trade that merely passes through the harbour without breaking bulk, the actual trade of the colony amounts to over £20,000,000 sterling per annum. "In the year 1884 shipping to the extent of about 5,167,231 tons entered the port: this tonnage is greater than that which entered the port of London in the year that Hong Kong was acquired." During the winter months, that is from October to February, the climate is bracing and invigorating, and the thermometer ranges from a minimum of 37° in January to a maximum of 85° in October. By the end of May the south-west monsoon has set in, and brings with it heavy rains, the average annual fall being 85 in., of which not less than 70 in. are received between May and September. The capital city is Victoria, with a population of more than 40,000: it is in the north of the island, on the south side of a splendid harbour with an area of ten square miles, and enjoys considerable trade.

Public revenue in 1886 *\$1,274,973
Public expenditure in 1886 1,152,382
Imports from United Kingdom, 1886 £2,259,966
Exports to United Kingdom, 1886 1,556,062

The colony is a Crown colony, and its Government is administered by a Governor, aided by an Executive Council of seven members, together with a Legislative Council of twelve members. Much encouragement is given by the Govern-

* Reckoning the dollar at the local rate of 4s. 2d., the Revenue for 1886 amounts to £265,619, and the expenditure to £246,062.

ment to education in the colony, and the Chinese are fully alive to the advantages arising therefrom. In 1884 there were 90 schools subject to Government supervision, attended by 5,835 pupils—returns which show an increase of 51 schools and 3,222 scholars during the preceding decade. There were also 100 private schools attended by 2,000 pupils. The public schools may be denominational in themselves, but the Government inspection recognizes secular subjects only. The total outlay on education by Government in 1884 was 33,650 dollars (£7,000) for 5,882 children, giving an average capitulation of 571 dollars, exclusive of buildings, repairs, and the inspectorial staff.

Governor, &c., Sir George William Des Vœux, C.M.G. \$28,800

CYPRUS,

an island of the Levant, situated at the eastern end of the Mediterranean Sea, between N. lat. 34° 30' and 35° 41', E. long. 32° 15' and 34° 35'; about 60 miles distant from the nearest point of Asia Minor, and 41 miles from its N.E. extremity to the port of Latakia on the Syrian coast, with which it is connected by a submarine telegraph cable: the distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles in length, with an average breadth of 50 miles, extended N.E. by a narrow hornlike projection 40 miles long. The area is calculated to be about 3,584 square miles, with a population in 1881 of 186,173 persons, of whom about one-fourth are Mohammedans, the remainder mostly members of the Orthodox Greek Church. Roman Catholics, the Church of England, Presbyterians, Wesleyans, and Maronites are also represented; and the whole population is spread over the six districts of the island as follows:—Nicosia, 56,312; Famagusta, 38,207; Larnaka, 20,766; Limassol, 29,248; Papho, 28,424; Kyrenia, 13,216. In ancient times Cyprus is said to have had not less than 3,000,000 inhabitants; but during the reigns of Cæsar Augustus and Vespasian the island suffered very greatly from earthquakes, and from that time it has gradually declined in prosperity. The principal productions are cotton of fine quality, rough strong wine, the best of which is produced near Limassol, grain of various kinds, carobs (or locust-beans), and several kinds of fruits. The fertility of the soil has for centuries been proverbial; and in the rich plain of the Messoria a good year will give an average yield of 40 bushels of barley or 25 bushels of wheat, whilst the best wheats and barleys (those of Lefca) weigh 62 lbs. and 47 lbs. to the bushel respectively. In 1885-87 the wine ex-

ported amounted to 5,752,590 oke (1 oke = 2⁸ Eng. lbs.), and more than two-thirds of this quantity went to Egypt and Turkey. Further returns of goods exported from Cyprus are for the same year:—Carobs, nearly 100,000 tons; cotton, 550,000 oke. Among the best of the fruits produced may be mentioned grapes, pomegranates, figs, oranges, lemons, apricots, melons, cherries, and almonds. The climate varies in different localities. In the plains the summer heat is very great, but is tempered by cool sea-breezes; the hottest months are July, August, and September. The winter is short and cold; snow, however, being of rare occurrence, except on the highest peaks. On the hottest day of 1886, the maximum reading of the thermometer varied from 96° to 103° in different parts of the island; on the coldest day of the same year, the corresponding minimum readings were 28° and 43°. The rainfall is in general extremely low, ranging in a good year from 16 to 21 inches during the winter months. Fevers are prevalent during the warm months after a rainy season, but are seldom fatal; the cause of unhealthiness is in many places quite local, and may be easily removed. Cyprus was in olden time famous for its mineral wealth, its copper being superior to any other: the mines were for many years abandoned, but are again being worked by an English firm. Its ancient silver mines, too, were famous, and their sites are distinctly marked by mounds of scorise; and the first-known mention of asbestos is in connection with this island. Sandstone, marble, granite, limestone, lead, terra umbra, and salt (a government monopoly) are also worked at the present day. Large quantities of salt are obtained from salt lakes near Larnaka and Limassol. The chief exports are cotton, wine, salt, locust-beans (or carobs), wheat, barley, wool, silk, spirits, sponges, and raisins. It is estimated that only one-third of the cultivable land is brought under agriculture in any one year. Corn and cotton mills, quarries, tanneries, and distilleries give employment to a considerable portion of the inhabitants; in 1886-87 there were at work about 33 steam-mills, 324 water-mills, 70 quarries and pits. In the same period the total number of vessels entered was:—Foreign trade 1,241 (tonnage, 208,633), and coasting trade 1,835 (tonnage, 101,435). There are moreover on the island a number of schools, and the government grant in 1886-7, inclusive of building grants, was £3,000.

Cyprus still forms part of the Ottoman Empire, but by virtue of a treaty made between England and the Porte, dated 4th June, 1878, the Government is administered by England for so long a time as Batoum and Kars may be kept by Russia. In many respects this occupation will prove useful to the surrounding countries. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The island is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of eighteen members. The island is divided into three electoral districts, each returning three Christian and one Mohammedan members. The house of Legislature is made up by the addition of six official members. In 1883 the Courts of Law were re-organized: the island was divided for administrative and legal purposes into the six districts mentioned above, in each of which the government is represented by a commissioner; and

six district courts were formed, each presided over by an English barrister, and having one Christian and one Mohammedan judge.

The subsidy paid to the Sublime Porte yearly is £87,868 for revenue, £5,000 in compensation for State lands, and 4,166,220 oke of salt (an oke = 2⁸ lbs.). This tribute is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855, of £5,000,000. That loan requires £160,000 annually for interest, without providing for any sinking fund; of this amount £70,000 is obtained from Egypt, and the remaining £90,000 has to be paid by England and France, for which purpose the tribute from Cyprus comes in. The improved state of trade since the time of the British occupation can be seen by the following:—

	Imports.	Exports.
1878	£177,651	£157,328
1879	208,407	222,218
1880	272,663	209,905
1881	296,868	266,610
1882	333,512	276,129
1883-84	344,183	290,210
1884-85	304,375	287,521
1885-86	312,917	294,815
1886-87	355,795	312,797

Imports from the United Kingdom, 1886-87, £101,070; exports to ditto, £59,917.

The capital is Nikosia (Lefkosia), near the centre of the island, with a population of 11,536; the other towns are Larnaka, population 7,833, Limassol, 6,131, Famagusta, Kyrenia, and Papho.

Public revenue, 1886-87..... £187,544
Public expenditure, 1886-87..... 110,679
Public debt, 1887..... None.

BRITISH NORTH BORNEO.

British North Borneo includes the northern part of that island, from Sipitong on the west coast, to Siboko River on the east coast, including all the islands within three leagues of the coast, embracing an area (including recent cessions) of 31,000 square miles, with an estimated population of 150,000. This country was ceded to a company on December 29th, 1877, and January 28th, 1878, by the Sultans of Brunei and Sulu, together with full sovereign rights, the whole being subsequently transferred to the British North Borneo Company, to whom a royal charter was granted 1st November, 1881. The territory ceded has a coast-line of some 600 miles, with many excellent harbours. Among the wild animals are the rhinoceros, the elephant, the crocodile, the orang-outang and other monkeys, the buffalo, deer, and pig. Soil upon which rice, sago, sugar-cane, coffee, cocoa, gam-

ier pepper, tea, tobacco, hemp, cinchona, and other tropical products may be cultivated bounds, and already many thousand acres of and have been taken up by agricultural companies in various parts of the territory. There is a promising pearl-fishery off the coast, and old and traces of tin have been found in some of the rivers. Diamonds, iron, copper, antimony, quicksilver, and cinnabar are also obtained in the colony. The inhabitants are Mohammedan Malays, with an infusion of Chinese and Arab blood on the coast, and various aboriginal tribes resembling Dyaks in the interior. Slavery exists, but in a mild type, and is gradually being eradicated by the Company's government. The country produces tobacco, sago, gutta-percha, indiarubber, beeswax, edible birds' nests, camphor, gums, timber, coal, and gold. The revenue is derived from an opium and other farms, sales of land, royalties on exports, and duties. The principal places are Memphis and Gaya on the west coast, Kudat in the north, and Elopura, or Sandakan and Silam on the east. A newspaper, the "British North Borneo Herald," is published at Sandakam.

The Government is administered by a Governor, assisted by a Council and by residents of districts: the mode of government adopted is similar to that of a British colony, with modifications to meet native customs.

Revenue, 1887 (estimated)..... \$148,970
Expenditure (estimated)..... 193,120
Imports, 1886, \$849,115. Exports, \$524,724.

Governor (acting), William M. Crocker.
Colonial Secretary, L. B. Van Dorp.
Treasurer, A. Cook.

LABUAN,
an island of the Malayan Archipelago, situated about six miles off the north-west coast of Borneo, in 5° 16' N. lat. and 115° 15' E. long., comprising an area of 31 square miles, and possessing a population of nearly 6,000 inhabitants, made up of Kandyans, Malays, Borneans, Klings, Bengalese, and (in 1884) 19 Europeans. It was ceded to Great Britain by the Sultan of Borneo in 1847, being at that time uninhabited; and a British settlement was established in 1848, the first Governor being the late Sir James Brooke. The island has a fine harbour, and possesses extensive coal-measures, but the mines have not yet been developed, although the coal is said to be superior to that of Australia.

The trade of Labuan consists in the exchange of cloth, rice, crockery, ironware, &c., for the produce of Borneo and the neighbouring islands (gutta-percha, india-rubber, birds' nests, canes, beche-de-mer, wax, &c.), and in the manufacture of sago flour from raw sago imported from the coast of Borneo. The sago flour and jungle produce are exported chiefly to Singapore for the European and Chinese markets. There are only about 1,000 acres under crop, but cattle are reared with considerable success, and it is estimated that in 1884 the colony possessed 2,500 cattle, 400 goats, 140 buffaloes, 20 ponies, and 10 sheep. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage.

Imports, 1884 £84,869
Exports, 1884 85,741
Revenue, 1885 4,491
Expenditure, 1885 4,589
Imports from U. K. 1886, nil.; exports, £44.

The Government is administered by a Governor, who is assisted by a nominated Council.

Governor, (vacant) £800
" Acting, Peter Leys (receives £300 and allowances as Her Majesty's Consul-General at Brunei).

THE British possessions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:— (1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to is divided into two divisions, equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second division, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 9,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. In the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder than in other parts of the country. The soil is generally fertile, and all the products of the temperate zone are cultivated.

The Dominion of Canada.

THE Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the extensive regions long under the quasi-government of the Hudson Bay Company, now styled Manitoba and the North-West Territories: in fact, the whole of British North America except Newfoundland and Labrador. This territory, about as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,470,257 square miles, exclusive of the great lakes and rivers. The total population of the Dominion approximates to 5,000,000, a number which is rapidly increasing, and, notwithstanding its diversity of origin, is fast being welded into one harmonious and homogeneous whole. The descendants of the French Colonists reside chiefly in the Province of Quebec, where out of a total population of 1,400,000 above 1,000,000 are Roman Catholics. A Religious Census of Canada was taken in 1881, and the numbers were:— Roman Catholics 1,791,982, Methodists 1,042,981, Presbyterians 676,163, and Church of England 574,810. Canada possesses an Active Militia numbering 38,000 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000.

No possession of Great Britain has made greater strides during the last twenty years than the Dominion of Canada, whether in trade, wealth, population, or aught that tends to the material prosperity of a new country. In 1871 there were in Canada 20 cities and towns of 5,000 inhabitants and upwards, having a total population of 430,043; whereas in 1881 the number was 37, and their total population 660,040. The greatest strides during that decade were made at Winnipeg, in Manitoba, where the population increased from 241 (1871) to 7,985 in 1881, and to 20,238 in 1886. The general rate of increase throughout the Dominion in the last decade was 18·97 per cent.

Canada is said to have been discovered by Sebastian Cabot in 1497. The French took possession of the country in 1534, and founded the first settlement (Quebec) in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole

territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, now called the North-West Territory, admitted into the Dominion. British Columbia followed in 1871, and Prince Edward Island in 1873, Newfoundland alone remaining a separate colony.

CIVIL ESTABLISHMENT.

<i>Governor-General</i> , Most Hon. the Marquis of Lansdowne, G.C.M.G. (with residence).....	£10,000
<i>Military Secretary</i> , Capt. Henry Streatfeild, Grenadier Guards.....	750
<i>Aide-de-Camp</i> , Lieut. Hon. Henry James Anson, Highland Light Infantry.....	200
Lieut. Hercules Arthur Pakenham, Grenadier Guards.....	200
<i>Commanding the Forces (Halifax)</i> , Lieut.-Gen. Lord Alexander George Russell, C.B.....	1,380
<i>Commanding the Militia</i> ,.....	820

The Executive Government and authority is vested in the Queen, and exercised in her name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of an Upper House, styled the Senate, and a House of Commons. The Senate must not number more than 78 until Newfoundland be admitted to the confederacy, when it may reach 82. There are at present (1887) 78 senators, distributed between the various provinces thus:— 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, and 4 for Prince Edward Island; 3 for British Columbia, and 3 for Manitoba. The members of the Senate are appointed for life by the Crown on the nomination of the ministry for the time being; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalized subject of the Queen, and the owner of a property qualification amounting to \$4,000. The House of Commons is chosen every five years at longest, and consists at present of 215 members; 92 being elected for Ontario, 65 for Quebec, 21 for Nova Scotia, 16 for New Brunswick, 5 for Manitoba, 6 for British Columbia, 6 for Prince Edward Island, and 4 for the North West Territories. The House of Commons is also composed of natural-born or naturalized subjects of the Queen, no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, each of which returns a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also a separate Legislature and Administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered as in England by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief

Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by the same judges, but its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of Queen's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure; and trial by jury prevails everywhere throughout the Dominion.

The Queen's Privy Council is composed of 11 Ministers and one Member without portfolio. The following are the members of the Cabinet with their respective deputies:—

<i>Premier and President of the Council</i> , Rt. Hon. Sir John Alexander Macdonald, G.C.B.....	£1,640
<i>Min. Public Works</i> , Hon. Sir Hector L. Langevin, K.C.M.G.....	1,440
<i>Dep. Min. do.</i> , George F. Baillairgé, C.E.....	65
<i>Min. Finance</i> , Hon. Sir C. Tupper, G.C.M.G.....	1,440
<i>Dep. Min. do.</i> , John M. Courtney.....	86
<i>Min. Railways and Canals</i> , Hon. J. H. Pope.....	1,440
<i>Dep. Min. do.</i> , Toussaint Trudeau, C.E.....	84
<i>Min. Customs</i> , Hon. Mackenzie Bowell.....	1,440
<i>Commissioner do.</i> , James Johnson.....	82
<i>Min. Militia</i> , Hon. Sir A. P. Caron, K.C.M.G.....	1,440

ONTARIO AND QUEBEC.

The area of these provinces is 370,488 (Ontario, 181,800, Quebec, 188,688) square miles (excluding the portions of the great lakes within the boundary), comprising all the basin of the St. Lawrence on the north side of that river and the great lakes, and on the south side N. of the parallel of 45°, and extends from 42° to 53° N. lat. and 57° to 90° W. long. The Province of Ontario, formerly called Upper Canada, and the Province of Quebec, formerly Lower Canada, are separated from each other by the River Ottawa. Quebec also comprises the Isle of Anticosti and the Magdalen Islands, in the Gulf of St. Lawrence. The inhabitants of Quebec are mostly of French descent, preserving their original language, religion, and customs; those of Ontario are chiefly British.

The timber trade, the original occupation of the people, is still of great commercial value, although fast yielding to those of agriculture, dairy-farming, and cattle-raising. The fisheries are deserving of notice as an extensive branch of industry. The mineral resources of the country are scarcely yet developed; a great part, however, especially the shores of Lake Superior, is valuable for its mineral products, such as iron, zinc, lead, copper (a large supply of this mineral being also found on the banks of Lake Huron), silver, gold, cobalt, &c.; phosphate of lime and asbestos are abundant, and sandstone, limestone, slate, and marbles of nearly every imaginable colour are also found. The mineral oil, petroleum, is produced in large quantities. During the last thirty years agriculture has made vast progress, mostly in Ontario. The land is generally very fertile, and produces all the varieties of cereals, fruits, roots, &c. Cattle-raising and dairy-farming are also very important industries, and at present large exports are principally from these provinces—Montreal, Toronto, and Quebec being the great centres of distribution. These provinces contain the chief manufacturing centres of the Dominion, which are becoming very important, employing considerable capital and labour. Montreal and Toronto command a vast overland system of communication, by canal and railway, both with Canada and the Eastern and Western parts of the United States. The educational system in force in these provinces, and in fact throughout the Dominion, provides practically free instruction, and gives successful pupils the chance of acquiring the highest education at a moderate cost.

The returns collected by the Bureau of Industries in Ontario, show that in that province in 1886 the total area of cleared land was 10,938,471 acres, of which 7,403,281 acres were under crop. The total value of this land was \$649,009,828 (£133,152,704); of the buildings, \$183,748,212; of the implements, \$50,530,936; and of the live stock, \$107,208,935: making a total value of \$989,497,911 (£203,321,488). The total area under pasture was 3,026,321 acres, and that used for orchards and gardens 186,616 acres. The average prices of farm produce per bushel

during the second half of 1886 were as follows:—Fall wheat, 3s.; spring wheat, 2s. 11½d.; barley, 2s. 1¼d.; oats, 1s. 3¾d.; rye, 2s. 1¾d.; peas, 2s. 2d.; Indian corn, 1s. 1¼d.; buckwheat, 1s. 4½d.; beans, 3s. 5d.; potatoes, 1s. 10s. 9d.; wool per lb., 9¼d.; hay per ton, £1 10s. 0d.

The following are particulars of the principal crops in Ontario in 1886:—Fall wheat, 886,404 acres, 18,071,142 bushels; spring wheat, 577,464 acres, 9,518,553 bushels; barley, 735,778 acres, 19,512,278 bushels; oats, 1,621,901 acres, 58,665,000 bushels; rye, 67,779 acres, 1,106,462 bushels; peas, 703,936 acres, 16,043,734 bushels; Indian corn, 156,494 acres, 10,805,399 bushels; buckwheat, 70,792 acres, 1,678,708 bushels; beans, 21,072 acres, 482,072 bushels; hay and clover, 2,295,151 acres, 2,994,446 tons; potatoes, 140,144 acres, 15,012,358 bushels; mangolds, 18,170 acres, 8,787,743 bushels; carrots, 9,267 acres, 3,478,751 bushels; turnips, 98,931 acres, 47,061,051 bushels. The total wool clip amounted to 5,547,867 lbs., the average weight of the fleece being 5½ lbs. for coarse wool and 5¼ lbs. for fine wool. There were 770 cheese factories in operation in 1886, and in 626 from which returns were received, there were made 51,804,850 lbs. of cheese valued at \$4,791,598 (£984,575), the quantity of milk used being 532,265,234 lbs. There were 47 creameries in operation, from 20 of which returns were received, showing the manufacture of 823,853 lbs. of butter valued at \$160,797 (£3,304), the quantity made being more than double that in any previous year. The returns of live stock show that there were 569,649 horses, 2,018,173 cattle, 1,610,949 sheep, 860,125 pigs, and 6,968,915 poultry in the province in 1886. Fruit growing is here engaged in on a very extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. Not less than 84 varieties of apples are cultivated, and the value of the export of green apples from this province in 1886 amounted to £40,000. The Ontario Agricultural College at Guelph is the only place of its kind in Canada, and supplies a general education together with a technical training in agriculture. The public cost of the College was £3,334 in 1886, and the students meet part of their expenses by the labour they perform on the Experimental Farm attached to the College, the annual balance of cost for board, washing, and tuition (payable by the students' guardians) being from £10 to £15. A central experimental farm has been established by the Dominion Government at Ottawa, and branch farms in connection with it, are being established in the several provinces, and in the North West Territories. Free grants of land are obtainable in this province, and improved farms can also be bought at advantageous rates.

In the Province of Quebec the lumber industry is still by far the most important, but the country has been too much denuded of wood, and the provincial government has therefore found it necessary to take active steps for the preservation and replanting of forests, and for the planting of trees along highways and farms. The agricultural statistics for this province are supplied by the 1881 census returns as follows:—Field products in bushels: spring wheat, 1,999,815 (nearly nine bushels per acre); winter wheat, 19,819; barley, 1,751,539; oats, 19,990,205; rye, 430,242; peas and beans, 4,170,456; buckwheat, 2,041,670; Indian corn

888,619; potatoes, 14,873,287; turnips, 1,572,476; other roots, 2,050,904; grass and clover seed, 119,306. The hay produce of 1,495,494 acres was 1,614,906 tons, or an average of 1'08 tons per acre. The returns of live stock were:—Horses, 225,006; colts and fillies, 48,846; working oxen, 49,237; milch cows, 490,977; other horned cattle, 490,119; sheep, 889,833; swine, 329,199; and of animals killed or sold: cattle, 160,207; sheep, 436,336; swine, 333,159. There were also 2,730,546 lbs. of wool produced. Hemp, flax, and tobacco are grown, and yield abundantly; some parts are favourable for apples and plums, and Indian corn; tomatoes, grapes, and other delicate fruits are ripened in the open air. Improved farms may often be obtained in the Eastern Townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. More than 84,000 acres on eight of the great colonization roads are set apart for free grants in lots of 100 acres each. In some parts of the province, again, farm lots are offered at 30 cents per acre.

ONTARIO. Population (1881), 1,923,228. The Government is vested in a Lieut.-Governor and Legislative Assembly composed of 90 members elected for four years (no property qualification being necessary), representing 90 electoral districts into which the province is divided, but which differ from those sending members to the Dominion Legislature. The Executive Council consists of six members, acting as the ministry of the province; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 126,129); Hamilton, the Birmingham of Canada (41,300); Ottawa, the Federal Capital, with a large lumber trade and woodware manufactories (34,800); London (26,047); Kingston (14,093); Belleville (9,516); Stratford (8,239); Guelph (10,216); St. Catherine's (9,779); Brantford (12,600); St. Thomas (10,127).

QUEBEC. Population (1881), 1,359,027. The Government of this province is vested in a Lieut.-Governor and a Legislative Council, consisting of 24 members appointed for life, and a Legislative Assembly of 65 members elected for five years to represent the same number of electoral districts in the province. The principal cities are Quebec, with a large export timber trade (population, 65,000), the capital of the province, and the great seaport town of Canada; and Montreal (population in 1886, 186,257); the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence rivers. Other important towns are Three Rivers (8,670); Levis (7,597); Hull (10,000); Sherbrooke (8,328). Ocean-going steamers ascend the St. Lawrence as far as Montreal. The tonnage of sea-going vessels that arrived at and departed from the ports of Montreal and Quebec in 1886 was 1,089,563 tons and 1,166,563 tons respectively.

Quebec is 2,634 nautical miles from London; letters are 13 days in transit.

NOVA SCOTIA, the most easterly province of the Dominion, is a peninsula between 43° 30'—46° N. lat. and 61°—66° 15' W. long., and is connected with New Brunswick by a low fertile isthmus about sixteen miles wide. It comprises an area (with Cape Breton Island) of 20,907 square miles, one-fifth part of which consists of lakes, rivers, and inlets of the sea; of the whole, about 5,000,000 acres are fit for tillage, that is, nearly half the entire area, and the soil in the western half of the province, particularly in the Annapolis Valley and around the Basin of Minas, is unsurpassed for fertility, owing to the rich marine deposits left on the shore-land by the tides of the Bay of Fundy. According to the returns included in the 1881 census, the occupied land amounted to 5,396,382 acres, of which 1,880,644 acres were improved—1,859,020 acres

being under crop and pasture, and 21,624 acres devoted to orchards and gardens. The live stock returns at the same date were as follows:—Horses, 46,044; colts, 11,123; working oxen, 33,275; milch cows, 137,639; other horned cattle, 154,689; sheep, 337,801; swine, 47,256. The wool sold in the year amounted to 1,148,440 lbs. The following figures represent, in bushels per acre, the average yield of crops in the western counties:—Wheat, 18; barley, 35; oats, 34; rye, 21; maize, 42; buckwheat, 33; beans, 22; turnips, 420; potatoes, 250; mangolds, 500. The average yield of hay was two tons per acre; but as much as 4 tons (1 Canadian ton = 2,000 lbs.) of Timothy grass and clover were obtained in some parts, followed by a fairly good aftermath. Fruit cultivation too is making wonderful progress; apples, which were imported into the province thirty years ago, now send to Europe a shipment of nearly 500,000 barrels of three bushels each, worth in the English market about 22s. per barrel. Population of the whole province (1881), 440,572. Halifax, the capital of the province, has a magnificent harbour covering 10 square miles. It is the principal winter port of Canada, and is the *entrepôt* of a large trade with the West Indies and South America. It is the principal naval station of North America, and the British Government have an extensive dockyard there. The coal deposits are extensive and of good quality, 1,300,000 tons being the output in 1886; iron-ores are plentiful, and gold mines have also been worked with profit. The principal fisheries are upon the eastern coast. In 1886 the total value of their produce was 8,415,361 dollars, a satisfactory increase over the preceding year. The fish of which the largest catches in value are made are cod, mackerel, herring, salmon, and lobsters. The manufacturing interest is also a growing one. In order to give an impetus to farming, efforts are being used to induce the Government to establish an agricultural college and experimental farm. Improved farms of 100 to 150 acres, with house and buildings, may be obtained at from £100 to £500, whilst the government offer uncleared Crown lands at £8 16s. per 100 acres, and 1s. 10d. per acre for any additional quantity. Hunting, shooting, and fishing abound; among wild animals there are bears, foxes, moose, deer, otter, mink, sable, musquash, hares, racoons, and squirrels, and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, curlew.

CAPE BRTON ISLAND, formerly a distinct colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 34,262 inhabitants. The chief town is Sydney, on the eastern coast, having valuable collieries in the neighbourhood.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of twenty-one members, and a Legislative Assembly of thirty-eight members.

CAPITAL, Halifax. Population, 40,000. Principal towns, Dartmouth, Truro, Windsor, Sydney, Annapolis, and Yarmouth.

Halifax is 2,463 miles from Liverpool. Letters are from 8 to 10 days in transit. Telegrams, *6d.* per word.

NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47'—69° W. long., and comprises an area of 27,174 square miles, with a population in 1881 of 321,233. It was first colonized by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests, the fisheries, and the ship-building trade. Coal is found; also antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. With reference to the agriculture of the province, in 1881 there were 1,253,299 acres under cultivation, though the acreage of improved land was not one-tenth part of the area suitable for agriculture. The total yield for the same year was as follows:—Wheat, 521,956 bushels; barley, 84,283 bushels; oats, 3,297,534 bushels; buckwheat, 1,587,223 bushels; potatoes, 6,961,016 bushels; and hay, 414,046 tons. The total acreage of wheat was 40,381, with an average yield of 13 bushels to the acre; of potatoes, 51,362 acres, with an average yield of 135½ bush.; and of hay, 389,721 acres—average yield per acre 1'06 tons. The live stock returns were as follow:—Horses, 52,975; working oxen, 8,812; milch cows, 103,965; other horned cattle, 99,783; sheep, 221,163; and swine, 53,087. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1886 of the value of 4,180,227 dollars, ranking second in importance to those of Nova Scotia. St. John is also a winter port of Canada; and new railway connections are in progress which will add to its importance and increase its trade.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, a Legislative Council of eighteen members, and a Legislative Assembly of forty-one members elected by the people.

Fredericton is 2,748 miles from Liverpool *via* Cape Race, or 2,535 miles *via* Belleisle and hatham, N.B.

MANITOBA, formerly the Red River Settlement, as formed into a distinct province in 1870, and admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49°—53° N. lat. and 97°—101° W. long. (these parallels and meridians forming its boundaries), and the Canadian Pacific Railway connecting the Atlantic and Pacific coasts, entirely through British territory, is sure to give an important impetus to the rapid development of this province. Its area is 73,720 square miles, and its population, according to a census taken in July, 1886, was 208,640, being an increase of 74.49 per cent. in the five years since the census of 1881. The Red River intersects the province, which appears destined to become a great agricultural country. The soil is fertile and productive, emigration is invited and encouraged, and liberal grants of land are made to settlers. According to the census returns of 1886, there were 4,171,224 acres of land occupied, of which 752,571 were cultivated; 182,440 acres of prairie land were broken in the 12 months preceding the taking of the census, and 593,991 acres were seeded in the spring of 1886. The number of tons of prairie hay cut was 447,064, and of cultivated hay from 8,482 acres, 9,685 tons. The number of acres sown with wheat was 363,734, the total yield from which was 6,711,186 bushels, being an average yield of 18.4 bushels. Full particulars of the wheat crop for the present year—1887—have not yet been received; but the yield has been remarkably large, authenticated returns of over 50 bushels to the acre having been received from more than one place, and it is calculated that from 8,000,000 to 10,000,000 bushels will be available for export. According to the latest returns made by the Manitoba Department of Agriculture, the total wheat yield in 1887 was 12,351,000 bushels, being an average of 27.7 bushels per acre. Oats averaged 46 bushels per acre, barley 36 bushels, peas 20 bushels, and potatoes, 238 bushels. The acreage of barley in 1886 was 46,776, producing 1,054,234 bushels; of oats, 146,278, yield 4,740,947 bushels, an average of 32.4 bushels per acre; potatoes, 8,565 acres, yield 1,203,575 bushels, an average of 138.9 per acre. The total yield of other crops was—rye, 2,574 bushels; peas and beans, 13,030 bushels; flax seed, 62,203 bushels; turnips, 158,374 bushels; and of other roots, 72,737 bushels. The total number of horses in the province was 38,003, an increase of 21,067 since 1881; of cattle, 144,685, an increase of 84,563 in the same period; of sheep, 16,053, an increase of 9,982; and of pigs, 101,490, an increase of 84,208. The main line of the Canadian Pacific Railway traverses Manitoba, and there are other lines in operation. The Red and Assiniboine rivers are also navigable throughout their entire course in the province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an

Executive Council of 5 members and a Legislative Assembly of 35 members.

NORTH-WEST TERRITORIES.—This Province comprises nearly the whole of British North America from the boundary of the United States (lat. 49° N.) to the most northerly part of the continent, and from the western shores of Hudson Bay to the Rocky Mountains. The area is calculated at 2,585,050 square miles, but it is at present very sparsely inhabited. Out of this vast territory, in 1882, the Dominion Government formed, for the convenience of settlers and for postal purposes, four provisional districts named severally Assiniboia (95,000 square miles); Saskatchewan (114,000 square miles), Alberta (100,000 square miles), and Athabasca (122,000 square miles). Three of these districts are now represented in the Dominion Parliament: Assiniboia sending two representatives, and Alberta and Saskatchewan one each. The whole of this territory is stated to possess varied and great resources, over 150,000 square miles being reported favourable for stock-raising and agriculture, the former being largely followed in Alberta, where the climate is milder, owing to the influence of the Chinook winds from the Pacific. Both Assiniboia and Alberta are traversed by the Canadian Pacific Railway, and settlement is rapidly taking place along its route, and generally throughout the territory, where many other railways have been projected. It has large mineral deposits, iron, coal, and gold having been found. Coal is abundant in all districts, especially in Alberta, where mines are now being worked, and are connected by a branch line with the Canadian Pacific Railway. It is watered by some of the finest rivers on the American continent, and it is estimated that there are about 10,000 miles of navigable waters within its boundaries. The fur trade was till recently almost the sole commercial occupation of the inhabitants. In 1870 it was included in the Dominion. Free grants of 160 acres of land are given to settlers free of cost, and they can pre-empt a similar quantity in addition at from 8s. to 10s. per acre.

A census of the three Provisional districts of Assiniboia, Alberta, and Saskatchewan was taken in August, 1885, when the population was found to be 48,362, of whom 20,170 were Indians. The population of the other portions of the Territories, not included in the above census, is estimated at 30,931, making a total population of 79,293. According to the census returns there were in the three districts 3,861,818 acres occupied, and 195,985 acres cultivated

acres of prairie land were broken in the 12 months preceding the taking of the census, and 123,794 acres were seeded in the spring of 1885. The number of tons of prairie hay cut was 115,666, and 428 acres of cultivated hay produced 766 tons, being an average of 1'79 tons per acre. The number of acres sown with wheat was 67,256, yielding 1,147,134 bushels; barley, 11,605 acres, 257,479 bushels; oats, 35,343 acres, 1,045,950 bushels; potatoes, 3,576 acres, 479,702 bushels; rye, 645 bushels; peas and beans, 11,775 bushels; turnips, 171,549 bushels; and other roots, 47,978 bushels. The number of horses was 24,456; of cattle, 86,536; of sheep, 19,398; and of pigs, 22,542. Of the above numbers, 13,646 horses, 61,284 cattle and 16,741 sheep were in the district of Alberta, which has been mentioned as specially adapted for stock-raising of all kinds, animals being able to graze at large during the winter; and it is estimated that there are now (1887) upwards of 90,000 head of cattle in this district alone. A large tract of land, enclosing hot mineral springs of remarkable curative powers, has been reserved by the Dominion Government at Banff, in the Rocky Mountains, as a national park; the grounds are being laid out under Government superintendence, and the place is expected to become the most popular and beneficial health-resort on the Continent.

The Government consists of a Lieut.-Governor and a Council of 20, partly elective and partly appointed by the Privy Council of the Dominion. As soon as districts of 1,000 square miles contain a population of 1,000, exclusive of aliens and Indians, they are to be constituted electoral districts, and return a member.

CAPITAL, Regina. Population (1886), 1,000.

Sheriffs, J. H. Benson, C. Marshallsay, D. J. B. Campbell, P. King, O. E. Hughes. ... 400

Regina is 4,750 miles from London *via* Liverpool, Montreal, and Canadian Pacific Railway.

PRINCE EDWARD ISLAND, the last admitted province, lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,133 square miles (about equal to that of the English county of Norfolk), and its population (1881) 108,891. The history of the island is somewhat strange: it was discovered simultaneously with the neighbouring countries, and was first settled by the French, who held it for many years, but only as a fishing station. The English took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-

1763), and compelled the greater part of its French inhabitants to leave. From that time it has remained, without intermission, in the hands of the English. By an Act passed in 1798, which came into operation 1st February, 1799, the island received its present name from Prince Edward, Duke of Kent, having been previously known as St. John's Island. The island is divided into three counties (King's, Queen's, and Prince), each of which elects 10 representatives and 4 councillors. The freehold of the island was originally held by a number of absentee landlords, who were finally bought out under the Land Purchase Act of 1875. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. The rivers, too, contain extensive deposits of what is known as mussel mud, which is raised in the winter by a dredging machine worked on the ice, and afterwards used on the land as a fertiliser, where it helps largely in producing excellent crops of hay. The conditions obtaining on the island are favourable for the rearing of live stock, of which a large number are exported to other parts of the Dominion and the New England States of America. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieut.-Governor and an Executive Council, a Legislative Council of 13 members, and a Legislative Assembly of 30 members, both Houses being elected by the people.

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour. Population, 11,485.

Georgetown, on the east coast, is also a port of considerable size, and the centre of a good ship-building trade.

Asst. Judge & V.-C., Hn. Joseph Hensley 657

BRITISH COLUMBIA is situated on the north-west coast of North America, in 48° 20' to 57° N. lat., and between it and the Rocky Mountains, and extends from 114° to 143° W. long., including Vancouver Island and Queen Charlotte Islands, incorporated with British Columbia by Act of Parliament in 1860. VANCOUVER ISLAND lies between N. lat. 48° 20'-50° 55' and W. long. 123° 10'-128° 20'. It is about 290 miles in length, with an average breadth of 50 miles; its area is estimated at 14,000 square miles, the greater part of which is at present unexplored. The country is fertile, well watered,

and rich in mineral products; and the coasts have numerous good harbours. In 1859 it became a British colony, and in 1866 was united to British Columbia. QUEEN CHARLOTTE ISLANDS are a group of islands in the North Pacific Ocean, off the coast of British Columbia and North of Vancouver Island; they consist of two larger and several smaller islands, the greatest length of the two larger being about 160 miles, and the greatest breadth about 70 miles. The climate is good, and the whole group is covered with splendid forests. Minerals abound, gold-bearing quartz of a rich quality having been found, also copper and iron ores, and an excellent vein of anthracite coal. The islands were taken possession of, in the name of the British Crown, by Dixon in 1787. The total area of the province is calculated at 341,305 square miles, and contains a population estimated at 60,000. Until 1858 British Columbia formed part of the Hudson Bay Territory; but in that year large discoveries of gold were made, which, attracting a vast immigration of gold-diggers, rendered it necessary for the British Government to take measures for the maintenance of order, and the country was erected into a colony. Besides gold, the country produces magnificent timber, and good coal is present in inexhaustible quantities on the eastern coasts of Vancouver island. This coal is considered superior to any other found on the Pacific coast, and large quantities of it are exported to the United States, the total exports from this Province in 1886 being 258,671 tons. The fishing industry is also becoming very important. Salmon of excellent quality are found in the rivers. Many thousand tons of salmon are tinned and exported to England every year. The fur trade, also, is a noticeable feature, the skins exported being chiefly those of the mink, marten, sable, silver-fox, bear, beaver, sea and land otter, seal, deer, elk, and others of minor importance. Tracts of not less than 160 acres of unsurveyed or unreserved Crown lands may be purchased for one dollar per acre; and surveyed lands other than town sites and Indian settlements may be obtained at the same rate after they have been offered for sale by public auction. The Northern Pacific naval station of the Imperial Government is at Esquimalt, an extensive and commodious harbour close to Victoria, where also a large graving dock has been completed.

RAILWAYS.—Canada has been quick to grasp the undoubted fact that in the development of colonies an extensive railway system is a most important auxiliary, so much so indeed that during the decade 1877-86 the mileage opened for traffic was more than doubled, the increase being from 5,574 miles in 1877 to 11,523 miles in 1886. By far the most important line is the great Canadian Pacific Railway, stretching across the entire continent, from Montreal to Vancouver on the coast of British Columbia, a total distance of 2,906 miles. The town of Vancouver, the western terminus of the road, has been built up within the last three years, and already contains a population of 5,000. The main line, starting from Quebec, runs to Montreal, then through Ottawa, Carleton Junction, Renfrew, North Bay, Sudbury Junction, Port Arthur, Ignace, Winnipeg, Carberry, Brandon, Moosomin, Qu'Appelle, Regina, Moose Jaw, Swift Current, Maple Creek, Medicine Hat, Crowfoot, Calgary, and

Stephen—the last-named on the summit of the Rocky Mountains, besides a large number of other places.* The last spike was driven on the 7th November, 1885, and the road was opened for general traffic on 28th June, 1886, since which time there has been a daily mail service between the Atlantic and Pacific coasts. The time occupied in building the road was four years six months, an average of 2.6 miles per day. Fortunately, the constructors of this gigantic work found themselves largely aided by the natural features of the land crossed; the level character of the prairie, for example, rendered cuttings and embankments unnecessary, and, with the exception of the stations, the track is single, without boundary fences, and slightly raised above the ground on either side. In the Rocky Mountains, however, and along the north shore of Lake Superior, the engineering difficulties were enormous, and more than 300 miles of line were cut through the solid rock; while no fewer than 25,000 men were engaged on the work as it drew near to completion. The various advantages which this line possesses over the Central Pacific Railway may easily be gathered from the following statement of facts:—(1) The highest pass reached by the former is 3,372 feet above sea-level, while the Central Pacific has to attain an elevation of 7,534 feet. (2) From Vancouver to Montreal the distance by rail is 2,906 miles; from San Francisco to New York the distance is 3,271 miles. (3) The distance from China, Japan, and the Pacific coast generally to Liverpool is from 1,000 to 1,200 miles less by the Canadian Pacific Railway than by the Central Pacific Railway. The Victoria, Esquimalt, and Nanaimo Railway, usually called the "Island Railway," connects the capital of the Province with the valuable coalfields at Nanaimo; at Esquimalt, the North Pacific Naval Station, a large graving dock has been completed. The Canadian Pacific Railway Company having put on a line of steamers between Vancouver and Hong Kong and Japan, and the Imperial and Dominion Governments having granted annual subsidies of £45,000 and £15,000 respectively, a mail service will shortly be established between England and China over this line, the distance being shortened by five or six days, and the over-

* In addition to this great line, the following railway lines within the Dominion are all of great importance both from commercial and strategical points of view:—(1) Branch lines, reaching, in the aggregate, upwards of 1,400 miles, and radiating from Montreal, Ottawa (to Toronto and other towns), Winnipeg, Port Arthur, and the various junctions mentioned above. (2) The various branches of the Grand Trunk Railway, extending over 2,600 miles, and forming a complete network of lines between the great lakes, reaching Quebec, Montreal, Lake Champlain, and other places. (3) The Inter-colonial Railway, 866 miles long, skirting the right bank of the St. Lawrence and traversing the provinces of New Brunswick and Nova Scotia. (4) The Midland, the New Brunswick, the Northern, the North Shore, the South-Eastern, and other systems, extend over many hundreds of miles. The survey of a route has also been completed for a line which it is proposed to make, 600 miles long, between the city of Winnipeg and Hudson's Bay. Some idea of the extent and value of the Canadian railway system may be gleaned from the following statistics for the year ended June 30, 1886:—

Paid-up capital	dol. 658,876,144
Mileage in operation	10,697
" completed	11,523
Passengers carried	9,961,024
Tons of freight carried	16,670,490
Earnings	dol. 36,389,362
Expenses	24,127,582

land journey being entirely through British Territory.

The Government of the Province consists of a Lieut.-Governor and an Executive Council, together with a Legislative Assembly of 25 members, 4 of them being the Executive Council.

NEWFOUNDLAND.

This Island is situated between 46° 37'—51° 39' N. lat. and 52° 35'—59° 25' W. long., on the northeast side of the Gulf of St. Lawrence. Its area is 40,200 square miles, and in 1884, according to the census taken at the end of that year, it had a population of 193,124. The principal exports, with their respective values, for the year 1886 were: codfish (£686,397); cod and seal oils (£104,102); sealskins (£21,250); pickled herrings (£11,257); pickled salmon (£13,250); preserved lobsters (£12,616); and copper ore. The total value of the exports for the same year, which, owing to unsuccessful fishery, were much below the average, amounted to £972,590, excluding those of Labrador. The industries of the island, fishing, agricultural, and mining, are altogether confined to the sea coast and the numerous deep bays indenting the island on three of its sides, but a railroad is in course of construction by an American company, which has obtained a charter and large concessions of lands from the local parliament; this, when carried out, will greatly develop the resources of the country. About 100 miles of line are already finished and open for traffic. A further development of the resources of the colony is anticipated as the result of an Agricultural Bill enacted during the recent session of the legislature. This Bill provides government aid for those of the poorer class who desire to commence farming operations. Newfoundland abounds in game of various descriptions, its numerous lakes and rivers teem with fish; the climate is healthy, the conception of the place as a land of perennial fog being altogether erroneous.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon in the Straits of Belleisle on the south to Cape Chukleigh at the entrance of Hudson's Straits on the north; it possesses valuable cod, herring, trout, and

salmon fisheries. There are a few Moravian missionary settlements on the coast, such as Hopedale, Nain, Okak, and Hebron, and also some posts of the Hudson Bay Company. The coast is mainly frequented for the sake of the cod, and when those fisheries are in progress the population of the country (normally under 4,000) becomes raised to upwards of 25,000.

The Government of Newfoundland is at present administered by a responsible Executive Council, also by a Legislative Council not exceeding 15 members, nominated by the Crown, and a House of Assembly of 36 members, elected by the people every four years. Justice is administered by the Supreme Court of Judicature, which, originally established in 1792, was reconstituted in 1824, with a Chief Justice and two other judges, having civil and criminal jurisdiction over the whole island. The Church of England, according to the last census, numbered 69,000; the Roman Catholics, 75,000; while the Wesleyans, by far the most numerous of the Nonconforming bodies, are reckoned at 49,000.

BRITISH GUIANA,

including the settlements of Lemerara, Esse- quibo, and Berbice, is situate on the north coast of South America, and comprising an area estimated at about 76,000 sq. miles, with a seaboard of 280 miles, lying between 8° 40' and 0° 40' N. lat., and between the meridians of 56° 15'—61° 15' W. The Essequibo River intersects the country in its entire length; the Corentyne separates it from Dutch Guiana. This territory was first partially settled by the Dutch West India Company in 1580, and was from time to time held by Holland, France, and England. In 1781 all the possessions of Holland in S. America were captured by the British, who, within a few months, surrendered Demerara, Essequibo, and Berbice to the French. The Dutch, however, regained them, and yielded them up in 1796 to Great Britain, and the Colony of British Guiana was finally surrendered to this country

at the Peace of 1814. There are but two towns, properly so called, Georgetown and New Amsterdam (population, 8,124). The climate is hot, but not unhealthy, and the cultivated portion of the country, amounting to 83,000 acres, is confined to the seacoast and to a short distance from the rivers. The seasons are divided into the dry and the wet, the former lasting from the middle of February to the end of April, and from the middle of August to the end of November. The rainfall, upon which the inhabitants depend largely for drinking purposes, has varied during the last five years from a maximum of 78.63 inches in 1882, to a minimum of 55.29 inches in 1885; and the temperature ranges between 75° and 90° F. The chief product is sugar, which forms 92 per cent. of the export trade of the colony. For the growth of this the soil is exceptionally well suited, and the finest sugar in the world, known as Demerara crystal, is in its pure state the best sugar manufactured. Coffee is also good, and cotton of a fine quality is grown in very small quantities; also rum, molasses, coconuts, and timber. The returns of the leading exports for the year 1886 were as follow:—Sugar, 124,283 hhd.s.; rum, 24,773 puncheons; molasses, 20,000 casks; timber, 272,968 cubic feet; shingles, 1,687,650; charcoal, 65,781 barrels; coconuts, 283,775; gold, 6,518 oz. The population of the colony was estimated, December 31, 1886, to amount to 274,311; 7,538 aborigines are included. The population is composed, for the most part, of West Indians, Barbadians, Portuguese, Chinese, and East Indians. The aboriginal Indians, computed at from 7,000 to 3,000, and belonging chiefly to Arawak, Acaway, Carib, and Warau tribes, are occupied largely in fishing, hunting, and raising crops of cassava. The principal school in British Guiana is Queen's College, a government institution; and in 1886 there were 160 elementary schools, of various religious denominations, in receipt of grants of public money. There is also an extensive postal service, and the number of letters, &c., posted within the colony reached 1,227,038 in 1886. At the end of the same year the deposits in the four savings' banks amounted to £197,414. There are 260 miles of telegraph lines and seven cables, and the number of messages despatched in 1886 was 58,490; moreover, the colony has 51 post-offices, of which 36 are telegraph offices and 19 are money-order offices.

The Government, which is essentially that of the old Dutch rule; consists of a Governor and a Court of Policy of 9 members, 4 official and 5 elected, in which the Governor has two votes; also a Combined Court, composed of the Court of Policy and of 6 Financial Representatives, for the purpose of levying taxes. An elective member of the Court of Policy must be the owner of 10 acres of land in the colony; of which 40 at least must be under cultivation; while a member of the College of Electors or a Financial Representative must have a similar qualification, or possess either a house or land worth £250 annually, or an annual income of £300.

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 29' 5" to 15° 53' 55" N. latitude, and from 89° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west and south by Guatemala, and on the east by the Caribbean Sea. The climate is damp and hot, but by no means unhealthy, and the temperature ranges from 56° to 96°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level along the coast-line, and swampy, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The soil is exceedingly rich, and sugar canes have thrived for twenty years without much deterioration. The manufacture of sugar is carried on in many different places; there are twenty steam-mills, and forty-one worked by cattle, and 30 stills in connection with the estates. The latest satisfactory returns of the area under cultivation are those for 1883, viz., Indian corn, 8,586 acres; sugar cane, 2,884 acres; yams, fruits, &c., 2,321 acres; rice, 139 acres; coffee, 108 acres. The best description of cocoa-trees grows wild in the bush. The Census (1881) gives the population at 27,452—males, 14,106; females, 13,346.

The staple products are the natural woods of the colony, viz., mahogany and logwood, but there are many other excellent furniture woods. Wood-cutting, in fact, forms the chief industry of the colony. The average annual export of mahogany, of which the cost, ready for ship-

ment, is 40 to 50 dols. per 1,000 ft., amounts to 3,000,000 ft.; while that of logwood, costing 10 to 15 dols. per ton, reaches 17,000 tons. There are some sugar estates thriving well, and a large coffee plantation has been started, on which 30,000 trees, now bearing fruit, were planted out during 1881. Fruits, including bananas, plantains, cocoa-nuts, pineapples, oranges, and mangoes, are being rapidly and extensively grown, while inland there are extensive regions of good pasturage, and there is reason to believe that gold and other minerals will be found. In 1886 the export of mahogany was 7,527,879 cubic ft., and of logwood 20,134 tons. The other leading exports for the same year were as follow:—Sugar, 1,622,380 lbs.; rum, 23,441 gals.; cedar, 132,498 ft.; rosewood, 72½ cwt.; fustic, india-rubber, 134,909 lbs.; sarsaparilla, 21,609 lbs.; and 304 turtles. The value of fruit shipped is expected to reach £15,000 to £20,000. Crown lands can be purchased at 8s. per acre, or leased at an annual rental of 10s. per acre. The transit trade with neighbouring Republics is considerable. India-rubber, sarsaparilla, coffee, and other tropical products also pass through the ports of the colony.

British Honduras is governed as a Crown colony, in which the Crown has the absolute control of legislation, while the administration is carried on by public officers under the direction of the home government. The Executive Council consists of the senior officer for the time being in command of the regular troops in the colony, the Colonial Secretary, the Treasurer, the Attorney-General, and other persons appointed by the Sovereign. The Legislative Council includes the following members:—the Chief Justice, the Colonial Secretary, the Senior Officer of the regular troops (not being below the rank of major), the Treasurer, the Attorney-General, and not less than four unofficial members appointed by the Sovereign. There are twenty-five schools in the colony, the great majority of which are denominational, and, together with the teachers, in receipt of government aid.

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the West of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., comprising an area of about 41 square miles, and containing (in 1884) an estimated population of 14,888, exclusive of army and navy. These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonized by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly fortified dockyard, where the North American squadron refits.

The climate is renowned for its mildness and salubrity; there is practically no winter, the thermometer never falling below 50° F., and the heat in summer, pleasantly tempered by the sea breezes, is rarely higher than 85°. The soils, on the whole, poor. Of the 12,000 acres in the whole group, not more than 2,000 acres can be called good or even fair; another 1,000 acres may, in favourable years, barely give a profit on the outlay; the remaining 9,000 are practically useless for purposes of cultivation.

The products of the island chiefly consist of onions and potatoes, a few melons and pumpkins, and arrowroot of a very fine quality. The sea abounds with fish: a few turtles are taken.

Amount of public revenue in 1886..... £30,150
 Amount of public expenditure in 1886.. 29,577
 Public debt in 1886..... 7,700
 Imports from United Kingdom, 1886... 81,562
 Exports to United Kingdom, 1886..... 5,574

The Government is vested in a Governor and Executive Council of 9 members, appointed by the Crown, who also act as a Legislative Council, and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 980 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton, on the coast of Long Island, is the chief town and the seat of government.

Governor and Commander-in-Chief, Lieut.-Gen. Thomas Lionel J. Galloway, *R.E.*..... £2,946

Hamilton, 2,970 miles; transit, fourteen days. Postage, 4d.; newspapers, 1d.; books, 2 oz. 1d.

These Islands have become a favourite winter resort for visitors from the neighbouring States of America and the Dominion of Canada. Numbers repair thither from November until April to escape the cold of the North American Continent: large hotels have been erected for their accommodation. The climate during this period is most salubrious, the range of thermometer being 60° to 90°, and invalids derive great benefit from the mildness of the winter.

AUSTRALASIA, that is Austral or Southern Asia, comprises the great Island-Continent of Australia, the adjacent Islands of New Zealand and Tasmania, and a vast number of smaller islands, chiefly in the Southern Hemisphere, between the Pacific and Indian Oceans, together with a portion of the Island of Papua or New Guinea.

The whole of the British Empire in this area, including Fiji and a portion of New Guinea, is estimated to contain 3,169,389 square miles, and a population of 3,223,041.

AUSTRALIA forms the main portion of Australasia, and is the largest island on the face of the globe, extending from $10^{\circ} 40'$ to $39^{\circ} 10'$ S. lat., and from $113^{\circ} 15'$ to $153^{\circ} 35'$ E. long. Its boundaries on the N. are Torres Strait, the Sea of Timor, and the islands of New Guinea (Papua), Timor, Flores, &c.; on the E., the South Pacific Ocean; on the S., Bass's Strait, Tasmania, and the South Pacific Ocean; and on the W., the Indian Ocean. Its nearest point to Asia is situate at a distance of 1,600 miles S.E. of Singapore, the extremity of the continent in this direction; the intervening space being occupied by the East Indian Archipelago, chiefly in the possession of Holland. The area of this vast Island-Continent is estimated at 3,030,771 square miles. The greatest dimensions are in length from E. to W. 2,400 miles, and in breadth from N. to S. 1,900 miles; it has a rapidly-increasing population, which in December, 1884, was estimated at 2,538,196. It is divided into the five colonies, New South Wales, Victoria, Queensland, South Australia, and Western Australia. There are many excellent and spacious harbours in various parts of the coast, but very few remarkable indentations; at an average distance of sixty miles a range of steep mountains runs along the E. coast, but the greater part of the shore on the N., the W., and S. is low and sandy. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S., and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray rivers. Nearly all round the coast, however, and in the eastern portion of the island, is a rich grazing country, admirably adapted to the rearing of sheep, of which there were over 64½ millions in 1887, or, including Tasmania and New Zealand, the total number of sheep was 82,934,341. Sheep-farming is the pre-eminent branch of industry, and it is as a wool-producing country that Australia is rising into importance. Years of drought occasionally occur, constituting the greatest impediment to the progress of the colonies, often followed by years of flood. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which falls into the sea on the south coast; on the east coast, the Hunter, Clarence, Brisbane, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, the Fortescue, De Grey, and Fitzroy; and the Victoria, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria, on the north; but they are of little service in facilitating internal traffic. The most extensive mountain system on the Australian continent takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland. The highest point is Mount Kosciusko (7,308 ft.), in New South Wales, which commands the view of no less an area than 7,000 square miles.

Speaking generally, it may be said that one of the most marked characteristics of the whole continent is the scarcity of rivers and fresh-water lakes. There are few rivers of any considerable size along the whole coast-line (8,000 miles); indeed, for 1,500 miles along the S. coast there is not a single watercourse. Lakes are numerous, but nearly all are salt, and even those barely merit the name, being dependent for their supplies of water upon the rivers and floods. They are more like marshes than lakes: at one time they are immense reedy swamps; at another time they are areas of submerged levels, with broad mud banks for shores that render the water absolutely unapproachable. Minerals comprise gold, copper, iron, and coal in large quantities, silver, mercury, tin, zinc, &c. The settled portions are intersected by railways, already extending to 7,540 miles (including those in New Zealand and Tasmania), and with about 59,956 miles of telegraphic wire, connecting together all the principal towns in the island. Direct steam communication is established with England by means of the Peninsular and Oriental, the Orient, and other lines of steamers. "The Great South Land" is believed to have been first seen by Le Testu, a French navigator, about 1542, though the honour has been claimed by the Portuguese; and portions of the coast on the north-west and

south were sighted by the Dutch and English. Practically speaking the island continent was made known to the world by Captain Cook in 1770, when he saw the land to the west of Cape Horn, and explored the whole eastern coast to Torres Strait. Subsequently Flinders sailed round it, in 1802, and gave it the name of "Australia." Following the favourable report of Cook, the first British settlement was formed at Port Jackson (Sydney) in 1788. The aborigines are rapidly becoming extinct; their number now in the settled districts of Australia is but 31,700. No proper survey has yet been made of the newly-annexed portion of New Guinea, or Papua.

STATISTICS OF AUSTRALASIA.
ALL THE COLONIES.

Gross amount of public revenue, 1886	£23,729,830
Gross amount of expenditure, 1886	31,844,902
Public debt, December 31, 1886	157,323,259
Value of total imports, 1886	59,945,247
Imports from United Kingdom, 1886	25,005,428
Value of total exports, 1886	46,257,010
Exports to United Kingdom, 1886	20,954,440
Total tonnage of vessels, exclusive of coasting trade (13,218,282 British, 1,336,184 foreign), entered and cleared	14,548,466 Tons.

NEW SOUTH WALES.

The whole of the eastern part of Australia, including the several colonies of New South Wales, Victoria, and Queensland, received the name of **NEW SOUTH WALES** from its first explorer, Captain James Cook, in 1770. The present colony of New South Wales originated in a penal settlement formed by the British Government, when Captain Arthur Phillip, R.N., its first Governor, arrived at Botany Bay, in H.M.S. *Sirius*, in January, 1788, with six transports and three store-ships, where they anchored, but subsequently proceeded to Port Jackson, which was found to be more suitable than Botany Bay for the new settlement: he there landed the 750 "persons" under his charge, and the British ensign was for the first time hoisted on the shores of Sydney Cove, now the capital and seat of government.

The Colony is situated between 28° 10'—37° 28' S. lat. and 141°—153° 37' E. long., and comprises an area of 310,700 square miles—i.e., more than six times the area of England, and nearly three times the size of Great Britain and Ireland—with a population 31st December, 1886, of 1,001,966. The early history of the colony was not free from trouble. The first Governor, Capt. Phillip, remained from Jan. 26, 1788, to Dec. 10, 1792, and was succeeded by Capt. Grose, Dec. 11, 1792, to Dec. 12, 1794; Capt. Paterson, Dec. 13, 1794, to Sept. 1, 1795, when a duly appointed Governor, Capt. Hunter, R.N., arrived, and remained from 7 Sept., 1795, to 27 Sept., 1800. Capt. P. G. King followed, 28 Sept., 1800, to 12 August, 1806, when he was followed by the unfortunate Capt. Bligh, whose rule came to an abrupt termination by a general revolt; and after an interregnum of nearly two years, Major-General L. Macquarie arrived, and 1 Jan., 1810, assumed the governorship, which he retained for nearly eleven years, since which time there has been a regular succession. "Botany Bay" was for many years almost synonymous with Australia, and had a most unsavoury reputation; but with the cessation of the long European war after Waterloo, and the great distress in this country consequent upon the return of so many men discharged from the Army and Navy, attention was attracted to Australia as a centre of emigra-

tion. In 1813 the interior of the country was explored, and the great plains being found admirably adapted for sheep farming, several breeds of sheep, including the celebrated merino, were introduced, and a foundation laid for the future prosperity of the country. The agricultural progress of the colony has been truly marvellous. In the year 1792 there were but 23 head of cattle, 11 horses, 105 sheep, and 43 pigs. On the 31st December, 1886, there were 361,663 horses, 1,367,844 cattle, 39,169,304 sheep, and 209,576 pigs. In 1886 no fewer than 203,013,090 lbs. of wool, valued at £7,028,596, were exported.

Minerals at first attracted but little attention, but in these the country is also rich: the gold fields were discovered in 1851, and up to the end of 1886 these had produced £36,083,539; coals, during the same period, about £18,352,669. Copper, silver, tin, iron, antimony, asbestos, cinnabar, and kerosene shale are also found; and in small quantities, diamonds, rubies, opals, and other precious stones. The total annual value of the minerals is about £3,000,000.

Agriculture is, of course, the great industry of the Colony. About 972,496 acres are under cultivation, producing (1887) 10,450,364 bushels of wheat and other kinds of grain, with 45,803 tons of potatoes, and 682 tons of tobacco. Sugarcane to the extent of 167,359 tons is produced, also 601,897 gallons of wine, 763 gallons of brandy, and 6,876,868 dozens of oranges. So rich is the soil and so genial the climate, that almost every kind of fruit and vegetable may be grown. The total extent of land leased for pastoral purposes in 1886 was 223,324 square miles. At Sydney, the range of thermometers averages 61° 7', about the same as at Madrid; at Bathurst, the mean temperature is 56° 8', and on the inland plains about 70°. The country is well watered, the chief rivers being the Darling and the Lachlan, both tributaries of the Murray, which divides the Colony from Victoria. In 1851 the south of the country was formed into the separate colony of Victoria, and in 1859 the northern portion into that of Queensland.

All religions are free, there is no establishment, and all payments are voluntary, with the exception of such as remain due under former arrangements. About two-thirds of the people are Protestants, the greater part members of the Church of England: there are 276,800 Roman Catholics. The See of Sydney, 10th Metropolitan, was erected in 1836, when it comprised the whole of Australia, but in 1847 took its present designation; the other Sees in N. S. Wales are those of Newcastle, 1847; Goulburn, 1863; Bathurst, 1869; Grafton and Armidale, 1869; and Riverina, 1885; the clergy number about 278. The head of the Roman Catholic Church is His Eminence the Cardinal Archbishop of Sydney, with bishops of Maitland, Bathurst,

Armidale, and Goulburn. Presbyterians and Methodists come next, but almost every sect is represented. Education is compulsory, more than one-fifth of the entire population (226,860) attended school in 1886; the gross expenses of the Public Instruction Act and other educational payments amounted to £654,726, including £22,780 expended upon buildings for the University in the year 1886. The University of Sydney, incorporated in 1851, enjoys a deservedly high reputation; degrees granted there rank with those of Oxford and Cambridge. Of churches and chapels the total number belonging to all denominations was 1,717; but, as Defoe said of England nearly two centuries ago—

“Wherever God erects a house of prayer,
The Devil always builds a chapel there;”

the number of public-houses being 3,231, or as nearly as possible two to every church.

“Assisted” emigration from the mother country is for the present suspended. Under the scheme formerly in operation, emigrants were selected by the Agent-General in London, Sir Saul Samuel, and his assistants, but the selection was limited to those who could afford to pay part of their passage-money—£6 for married couples, £4 single men, and £2 for single women; children under three were free, and those under fourteen paid £1. Married people must not be over 40, and unmarried persons not over 35; if above that age, £1 more was charged. The ordinary passage-money by first-class steamers being: cabin, £52 10s.; intermediate, £36 15s.; or steerage from £16. Female servants, especially such as could take part in farming and dairy operations, were much in demand. The estimated population on June 30, 1887, was 1,022,767, made up of males, 562,913, and females, 459,854, showing a preponderance of males of no less than 103,059.

The estimated number of aborigines in the colony is, full-blood, 5,689; half-castes, 2,402; total, 8,091.

“Responsible government” was established by the Constitution Act, 18 & 19 Vict. c. 54, and is vested in a Governor appointed by the Crown, and a Legislative Council consisting of 52 members. The Legislative Assembly consists of 122 members, representing 72 electoral districts: with few exceptions all natural-born or naturalized males, 21 years of age, who have resided six months in the district are entitled to the franchise. The voting is by ballot.

Railways, roads, and bridges have their several departments. There are now open (1886) 1,889½ miles of railway, and 249 miles in course of construction; and in December, 1886, there were 20,797 miles of telegraph wire with 425 stations. The Post Offices numbered 1,157, the number of letters conveyed was 42,849,900; of newspapers, 29,532,400; and of packets, 4,848,800. Tramways, 36½ miles, and 10 miles more in course of construction.

The trade of the country is very large: in 1886 the number of vessels which entered and cleared was 5,439, with a total tonnage of 4,258,604; the value of exports being £15,556,213, and of imports £20,973,548, together £36,529,761. The colony possesses 14 banks, with a paid-up capital of £11,503,917, and total assets £39,805,307. Of savings banks there were 304, with deposits amounting to £3,504,804. The Public Debt is heavy; on 31 Dec. 1886, it amounted to £41,034,249, but it was mostly incurred for the

construction of railways, telegraphs, and other reproductive public works.

While fully trusting to the ability and willingness of the mother country, the colony has not been altogether unmindful of defence. On 31 Dec. 1886, there were enrolled in the naval and military service of the colony 7,129 men: 1,202 artillery-men, 101 engineers, 165 members of torpedo corps; 7 regiments of infantry of an aggregate actual strength of 4,506, and cavalry, 396. The naval brigade and naval artillery volunteers comprise about 750 officers and men. The officers and men who formed the well-known “Soudan contingent” were selected from these forces.

Sydney, the chief city and Capital (12,043 miles from London via the Suez Canal), stands on the shore of Port Jackson, surrounded by scenery of surpassing beauty. It extends four miles North and South by three miles East and West; and contains 130 miles of streets with about 50,000 houses, or, including suburbs, a population of about 332,709. About 800 acres have wisely been set apart for parks and open spaces: here are situated the Government buildings, Royal Mint, the University, Free Public Library, Observatory, two cathedrals, and numerous churches and chapels. The other large towns, with their populations (census 1881), are Newcastle, 15,600; Bathurst, 7,250; Goulburn, 6,900; Paramatta, 8,440; Maitland, E. and W., 7,300; and Grafton, 3,905.

Total revenue in 1886	£7,594,300
Total expenditure in 1886 £9,078,869	12,845,225
From loans	3,766,356
Public debt (31st Dec.), 1886	41,034,249

[NORFOLK ISLAND, the residence of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn Island, is governmentally attached to New South Wales.]

Sydney, *via* Suez Canal, is 12,043 miles from London; transit from 33 to 41 days. Postage, ½ oz. 6d.; news, 1d.; books, 1 oz. 1d., 2 oz. ad., 4 oz. 4d., ex. 4 oz. 4d. parcels, 2 lbs. 2s., ex. lb. 1s.; telegrams, 9s. 6d. a word.

VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), from which it was severed, and erected into a separate colony, in 1851; and although one of the youngest, and, in point of area, the smallest colony on the Australian continent, is probably the wealthiest. It comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes: it lies between the 34th and 39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 490 miles, its greatest breadth is about 300 miles, and its extent of coast line nearly 700 miles. The entire area comprises 87,884 square miles, or 56,245,760 acres, of which 2,417,582 were under cultivation in 1886-87. Its population on the 30th June, 1887, was 1,019,106, including about 12,000 Chinese and aborigines. At the census of 1881 the native Victorians numbered about 500,000; natives of other Australian colonies about 40,000; English, 147,000; Irish, 87,000; Scotch, 48,000; Chinese, 12,000; and natives of other countries about 28,000. Nearly two-thirds of the population are Protestants, while the Roman Catholics number rather more than 200,000. The Victorian aborigines at the time of the first colonization of the district, were, according to the most trustworthy estimates, about 15,000 in number; in 1851 the official return gave 2,693, while the census of 1881 showed them to be as few as 780 (460 males and 320 females). The birth-rate of Victoria for 1886 was 31·23 per 1,000; the death-rate; which is remarkably low, was 15·15 per 1,000. Victoria is the principal gold-producing colony of Australia, to which it owes its extraordinarily rapid progression: from the discovery of gold in 1851 to the end of the year 1886, the quantity

raised—54,393,000 oz., estimated at £4 per oz.—amounted in value to £217,572,000. During the year 1886 the gold produced in the colony amounted to 665,196 oz. The value of other minerals raised, consisting principally of tin and antimony, is estimated at about £850,000. From its geographical position it enjoys a climate far more genial to Europeans than any other colony within the continent of Australia. There were 1,75 miles of railway completed at the end of 1886 all of which belonged to the Government, while 316 miles more were in course of construction. The capital cost of the railways open up to the 30th June, 1886, amounted to £23,903,890, or an average of about £13,700 per mile. Of this amount £21,350,000 was raised by debentures, and the rest was paid from the general revenue. The net income, after paying all working expenses, was £1,018,588, equivalent to a return of nearly 5 (4) per cent. on the mean debenture capital. Stage-coaches run to all parts of the colony, except those for which railway communication is available. There were 420 stations for electric telegraphs, extending over 4,094 miles (poles), which produced a revenue of £93,490 in 1886, the total mileage of wire being 10,111, and the telegrams transmitted numbering nearly 2,000,000. The chief sources of income until 1862 were the customs duties and sales of public lands; but fresh sources of revenue, derivable from the railway system, from public works, a land tax, and stamp duties, have since been added. Wool, gold (including specie), and wheat, flour, and biscuit are the staple productions of the colony. In 1886 the chief exports were of the following respective values:—Wool, £4,999,662; gold, £1,947,703; wheat, flour, and biscuit, £559,437; and live stock, £393,516—all of which were considerably below the average. The principal imports of the colony in 1886 were wool (from across the border), £2,331,600; sugar and molasses, £853,400; cottons, £1,027,674; woollens, £892,868; live stock, £928,505; gold (including specie), £602,035; and iron and steel (excluding railway rails, &c.), £748,602. The estimated number of sheep in 1886-87 was 10,700,403. Agriculture, although formerly neglected, has of late years much improved, wheat and oats being the two cereals chiefly cultivated. Of the 2,417,582 acres under cultivation in 1886-87, 1,052,685 were wheat crops and 185,765 oats. In 1886-87, 986,041 gallons of wine were produced, exceeding the production of the previous year by over 250,000 gallons. Manufacturing industry has made much progress in Victoria. In 1887 the manufactories of all descriptions numbered 2,785, half of which employed steam or gas engines, with an aggregate horsepower of over 20,000; the number of hands employed amounted to 45,773; and the capital invested, so far as it is represented by the value of lands, buildings, machinery, and plant, to £11,028,158. The shipping statistics of the colony furnish additional evidence of the magnitude and value of its trade. In 1886, 4,631 vessels, of an aggregate tonnage of 3,735,367, and carrying 147,857 men, entered and cleared at Victorian ports.

Actual revenue, 1886-87 ..	£6,733,867
Actual expenditure, 1886-87 ..	6,665,863
Public debt, 30th June, 1887 ..	33,119,164
Total imports, 1886 ..	18,530,575
Imports from United Kingdom, 1886 ..	8,851,801
Total exports, 1886 ..	11,795,321
Exports to United Kingdom, 1886 ..	6,566,118

Melbourne, the chief city and the seat of government, also an episcopal see, is distinguished for its University, Museum, Mint, Public Gardens, Observatory, Public Library, Hospital, its churches and other institutions: with its suburbs it contained, in 1887, 380,000 inhabitants, being the most populous city in the southern hemisphere. The other important towns are Ballarat, pop. 41,110; Sandhurst, pop. 36,570; and Geelong, pop. 20,890.

The Government is vested in a Governor appointed by the Crown, aided by an Executive Ministry consisting of 12 members, and a Parliament, consisting of a Legislative Council of 42 members elected for 14 provinces, and a Legislative Assembly of 86 members for 55 districts.

Melbourne, distant 11,267 miles; transit, 33 to 37 days. Postage, 6d.; news, 1d.; books, 1 oz. 1d., 2 oz. 2d., 4 oz. 4d., ex. 4d. over 4 oz.; parcels, 2 lbs. 2s., 3 lbs. 3s., ex. 1s. per lb.; telegrams, 2s. 4d. a word.

SOUTH AUSTRALIA.

A Legislative Act, by Royal Letters Patent, dated 6th July, 1863, rendered this name a misnomer by extending the boundaries of the colony so as to include the entire centre of the Australian continent from north to south. Thus it extends from 11° to 38° S. lat., and from 129° to 141° E. long., comprising an area of 903,690 square miles, with an estimated population, on 30th June 1887, of 313,355, exclusive of aborigines. The dryness customary to the whole of the island-continent marks the character of the climate of South Australia, the average annual rainfall, calculated on a period of forty-eight consecutive years, amounting to no more than 20.9 inches. It was first colonized in 1836. The Constitution of the colony was remodelled in 1856, and the present form of government substituted. The settled portion is essentially an agricultural and pastoral province, its bread-stuffs and wool constituting three-fourths of its exports. The lands purchased from the Crown, up to June, 1887, amounted to 9,439,757 acres, and those held upon lease for pastoral purposes numbered 123,488,430 acres in addition. The extent of land under cultivation in 1885 was 2,785,490 acres, of which wheat alone occupied 1,942,453 acres, giving a yield of 14,621,755 bushels. Oats are not, as a rule, successful; potato growing is carried on to a considerable extent, while the culture of flax and hops is also receiving attention. In 1886-87 the weight of native-grown wool exported was 43,105,999 lbs., of bread-stuffs, 103,642 tons, and the value of minerals £308,651. Apples and pears grow everywhere, strawberries and raspberries do well in the hills, and oranges in many parts; the olive-oil is considered equal to any in the world, and the grape vine thrives splendidly. Vine-culture is becoming a fast-increasing branch of industry, 473,535 gallons of wine having been made in 1884. The live-stock in 1884 numbered—horses 162,420, cattle 389,726, sheep 6,696,406. The shipping returns, too, show well, and speak of prosperity. In 1884 the arrivals amounted to—British, 647,993 tons; foreign, 122,929 tons; total, 770,922 tons. The number of vessels belonging to Port Adelaide were:—steamers, 92 (in Dec. 1886), of a tonnage of 11,716; sailing vessels, 220 of a tonnage of 36,767. The places of worship provided in 1885 numbered 951, which gave 109,617 seats; while there were 760 Sunday schools, including 7,000 teachers and 59,000 scholars. The South Australian system of education is liberal, compulsory, state-aided, and secular, and its main features are similar to those which mark the present system of England. In 1885 there were 472 government schools, and 363 private schools, with 1,021 and 767 teachers respectively. There are also 114 country institutes, providing libraries amounting altogether to 107,303 volumes. Bank assets, 1886, £11,446,883; funds in Savings Banks, £1,581,100. Mining operations are pursued on a very extensive scale in the colony, the mineral wealth hitherto discovered consisting chiefly of copper; the Moonta, Wallaroo, and Burra Mines being the largest. So far as it is yet known, South Australia is not rich in the precious metals, but it has immense deposits of copper and iron, and some good silver-lead mines. Gold, silver, and tin have been met with in various places, but nowhere in great abundance. The story of the copper mines may be told in a line or two. The Kapunda copper mine was discovered in 1842, and is still being worked; the

next year the Montacute mine was found, and in about eighteen years was worked out; in 1845 the famous Burra mines were discovered and gave employment to a large population; but the new era in the colony's history was marked by the finding of the celebrated Wallaroo mines, during 1860, in Yorke's Peninsula, which yielded enormous quantities of productive ore, and brought about the usual mania. A year or two later, the famous Moonta mine was opened; and both this and the Wallaroo, after being largely worked for more than twenty years, show no signs of exhaustion. South Australia (1886) possesses a large extent of telegraphic lines, 5,459 miles having already been made. One through the centre of Australia, 2,200 miles, joins the sub-marine cable to England, bringing Australia into telegraphic communication with all parts of the world. There were 1,421 miles of railway open on 30th June, and 353 more in progress. The military defence of the colony is intrusted to a volunteer force and militia, the latter, which embraces cavalry, artillery, and infantry, being under 1,500 all told. Two land batteries, one at Glanville and the other (having some heavy armaments) at Largs Bay, have been constructed to resist attacks by sea; and there is one ironclad—the *Protector*—belonging to the colony to aid the land defences.

Public revenue, 1886-87	£1,869,943
Public expenditure, 1886-87	2,165,246
Public debt, 1886-87	19,168,500
Total imports, 1886-87	4,639,782
Total exports, 1886-87	5,011,438
Imports from U. Kingdom, 1886	1,973,647
Exports to U. Kingdom, 1886	2,553,583

The Government is administered by a Governor and an Executive Council of 6 members, who constitute a responsible Ministry, and are required to be members of Parliament. The Parliament consists of two houses, the Legislative Council or Upper House, and the House of Assembly. Both houses have equal powers, but money bills must originate in the lower chamber. The members of the Upper House are elected for nine years (one-third retiring every three years), and must be natural-born subjects of the Queen (resident in South Australia for three years) or naturalized subjects (resident in the colony for five years). A property qualification gives the right of voting for the Council, but the Assembly is elected upon a basis of manhood suffrage. The law is administered by a Chief Justice, two puisne judges, a Judge for the Northern Territory only, a Commissioner of Bankruptcy, Local Courts (presided over by fifteen stipendiary magistrates), and various benches of magistrates in different parts of the country.

QUEENSLAND.

This, the most recently organized Australian colony, situated in lat. 10° 40'—29° S. and long. 138°—153° 30' E., comprises the whole northerly portion of the Australian continent. It was formerly a part of New South Wales, but was separated therefrom, and erected into a distinct colony, in December, 1859.

Its eastern seaboard was discovered by Captain Cook in 1770; some years afterwards its coast was visited by Capt. Flinders; but the first attempt to explore and settle any portion of the interior was made by Oxley, the Surveyor-General of New South Wales, who, in 1823, entered the River Brisbane, and selected the site of its future capital city of that name on a spot about 20 miles from its mouth, in Moreton Bay. The subsequent settlement of the country has followed the discoveries of a series of explorers.

Queensland proper, exclusive of New Guinea, possesses an area of 668,224 square miles (i.e., equal to more than 5½ times the area of the United Kingdom), of which the Government have parted with the fee simple of 8,455,033 acres; under a system of deferred payment 2,540,341 more are in process of alienation out of the total of 427,663,360 acres, but an additional area of 316,000,000 acres has been leased out for sheep and cattle runs, large tracts of recently explored country on the borders of the eastern boundary of South Australia having been taken up and stocked during the last few years. Most of the productions of both temperate and tropical countries can be cultivated with success in Queensland. Wheat, oats, and barley flourish on the downs, and are used both for grain and also for hay and green food for cattle; while a still larger area is devoted to maize, which yields an average crop of about 25 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, and various English fruits. In the year 1886, 53,545 tons of sugar were produced. The chief articles of export, the produce of the Colony, in 1886 were:—Wool, £1,413,908; gold, £1,232,330; galena, silver, and lead, £62,807; tin, £192,564; arrowroot (211,536 lbs.), £5,955; pearl and tortoise-shell, £68,596; meat, £15,132; fruit, £13,056; fish, £8,533; and eggs, £49,427; bette-de-mer, £3,652; rum, £7,503; raw sugar, £855,564; timber, £11,711. The climate generally may be considered sub-tropical; the summer is the rainy season, and is naturally hot, but even in winter the vegetation of Queensland is not wholly arrested. At Brisbane the average temperature is 70°; the maximum reading for 1886 was 101° and the minimum 40°, whereas the

corresponding figures were 105° and 30° for Melbourne, and 110° and 35° for Adelaide. These figures go to show that the colony is also well fitted for the growth of jute and other fibre-producing plants, wine, maize, wheat, arrow-root, and tobacco—also the growth of wool, which is as yet the staple production; rich gold, copper, tin, lead, quicksilver, antimony, and coal mines are found in several districts; timber also of fine quality for cabinet manufacture, the Moreton Bay pine and the *Dammara robusta*, together with the Cedar of Queensland, forming valuable products for export. The hard woods (*Eucalyptica*) are especially well adapted for bridge building and for railway purposes. Some of the indigenous plants possess remarkable medicinal properties, such as the *durosia*, used as a substitute for belladonna; the *alstonia*, the bark of which produces a valuable tonic; the *Euphorbia Drummondii*, used in cases of dysentery and low fever; and the *Euphorbia pilulifera*, or asthma herb. The broad plains afford the richest pasturage. At the end of 1886, the horses numbered 278,694, and the cattle, 4,071,563. The official returns give 9,690,445 sheep, and 61,861 pigs. The population in 1886 for this vast territory was only 342,614. The males numbered 201,024, and the females 141,590.

At the end of 1886 there were 1,555 miles of railway open, with 637 more in course of construction or authorized; the length of telegraph wires is 14,443 miles, and the number of post offices 662. In 1886 there were 479 State schools in operation, with 1,382 teachers and an average daily attendance of 32,250 children; and 108 private schools, with an average attendance of 6,670; also 7 grammar schools with 565 pupils; 47 hospitals afforded relief to 11,278 patients, and six orphan asylums maintained 1,108 children.

Among statistics of a miscellaneous character that testify to the vigour and prosperity of the young colony are the returns of banking deposits which, on the 31st December, 1886, were £7,170,781, apart from the £1,311,701 in the hands of the Government Savings' Bank at the end of the year.

The shipping trade of Queensland is considerable, the number of vessels entered inwards during 1886 being 2,170 (tonnage, 1,671,015), and the number outwards 2,200 (tonnage, 1,604,422). The defence of Queensland was provided for by an Act of Parliament passed in 1884 under which a force of from 3,000 to 4,000 men are at present enrolled. These comprise 3 classes, "Permanent Defence," numbering about 70; "Defence" (paid for each day's drill) some 2,000 strong, the rest being "Volunteers." Besides these, however, every male above 18 and under 60 helps to form one of four lines of "Reserves" according to his age and social condition, and is liable for military service if required. The marine defences include a battery at Lytton, commanding the entrance to the Brisbane River, and some torpedo works, were carried out under the supervision of Sir W. Jervoise. The colony possesses in addition a torpedo boat and two gunboats; also four Naval Reserve corps.

Amount of public revenue in 1886	£2,810,147
Amount of public expenditure, 1886	3,202,030
Public debt, 31st December, 1886	20,820,850
Total imports, 1886	6,103,227
Imports from United Kingdom, 1886	2,692,296
Total exports, 1886	4,933,970
Exports to United Kingdom, 1886	1,288,851

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralization similar to that at Melbourne, Sydney, and Adelaide; hence we find numerous ports of considerable size extending along the coast, the chief of them being Brisbane (pop. above 50,000), Rockhampton (about 12,000), Maryborough (11,000), Townsville (10,000), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Among other places of importance are Ipswich (8,000) and Toowoomba (6,000).

The Constitution was slightly altered by an Act of 1869, but is now very similar to that of the other Australian colonies, and comprises a Governor, Legislative Council, and Assembly—the former consisting of 26 members, nominated for life by the Crown, and the latter of 50 members elected by the colonists. The administration of the law is in the hands of the Supreme Court, attached to which there is a chief justice, together with three puisne judges, and in those of the inferior courts, which are constituted as in New South Wales.

WESTERN AUSTRALIA,

formerly called the "Swan River Settlement" (from the locality of the first colony on this coast), includes all that portion of the island west of 120° E. long., the most westerly point being in 113° 15' E. long., and from 13° 45' to 35° 5' S. lat. Its extreme length, therefore, is,

from north to south, 1,280 miles, and 800 from east to west. It embraces an area of 1,060,000 square miles. A very large proportion of this is heavy timber country. The jarrah, sometimes erroneously called mahogany, a tree of the Eucalyptus tribe, covers immense tracts of land in the S.W. portion of the colony: its timber is extraordinarily durable, and as it resists the white ant and the "Teredo navalis," it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandalwood already affords an article of export; the tuart and karri, Eucalypti of enormous size, are valuable timber trees. The "karri," which sometimes attains the height of 300 feet, is considered to be almost equal to the "jarrah." The occupied portion of the colony extends along the western coast for about 1,200 miles, by perhaps 150 in average breadth, and on Dec. 31, 1886, had an estimated population of 39,584. The average temperature at Perth (lat. 32° S.), the capital, for the past ten years was 65°, and rainfall for the same period 33 inches, while the mean for the barometer was 30·39 inches. The climate is, in fact, one of the healthiest and most enjoyable in the world; from the northern extremity to the southern it varies considerably, in the south being like that of England, but of a higher temperature; while in the north it is hot, but tempered by cool sea-breezes, and the atmosphere is free from the moistness characteristic of tropical climates generally. There are two seasons, the wet and the dry, the former lasting from April to September. The total rainfall at Perth during 1886 was 29·00 inches, and the average of the year for 16 meteorological stations in various parts was 28·8 inches. The colony was first settled in 1829, and for many years made but little progress, notwithstanding the salubrity of the climate, which is equal to that of any part of the Australian continent. It is, however, now gaining ground. The chief products are wool, timber, pearls and pearl-shells, lead, copper, horses, and cattle. The cultivation of the land has been much retarded by want of sufficient labour; bands of fertile soil, where sandalwood and other trees grow abundantly, and which are suitable for the culture of the vine, olive, and fig, occur in the middle districts. The climate and soil are admirably adapted for silk growing and for vintage, and there are at present 649 acres of vineyards in the colony. Good wheat-growing soils also exist over large areas in the northern division, and the produce is of good quality and yield. At present there are altogether 36,248 acres under cultivation, the average yield per acre for 1886 being:—Wheat, 12 bushels; barley, 16 bushels; oats, 17 bushels; maize, 23 bushels; potatoes, 3 tons; and hay 1 ton. Magnetic iron, lead, copper, and zinc ores are found in large quantities, and gold has been recently discovered in the Kimberley district in the extreme north. There are 151 miles of railway open, and large schemes for the construction of several hundred miles more on the land-grant system have been initiated and are in progress. The imports chiefly consist of sugar, tea, tobacco, spirits, beer, soap, ironmongery, clothing of various kinds, &c. The exports are of wool, jarrah and karri timber, lead, copper ore—which is exceedingly rich—whale oil, guano, sandal-wood, pearls, and pearl-shells. The estimated value of the exports for 1886 was:—Wool, £332,519; timber, £50,092; sandalwood, £27,450; pearls and pearl-shells,

£119,964; lead ore, £4,277; copper ore, £3,725; horses, £10,475. The stock returns of the colony gave as follows:—Horses, 38,360; cattle, 88,254; sheep, 1,809,071; goats, 5,301; and pigs, 24,053. The shipping of W. Australia is not extensive: in 1886 the vessels entered inwards numbered 261 (tonnage, 239,461); and those outwards 239 (tonnage, 262,158). During the last decade the revenue has increased from £162,189 to £388,564, and the expenditure from £179,484 to £394,675, while the value of the imports has grown in the same period from £386,037 to £758,013, and that of the exports from £397,293 to £630,393.

Amount of public revenue, 1886	£388,564
Amount of expenditure, 1886	394,675
Public debt, 1886	1,286,000
Total imports, 1886, £758,013; exports, 630,393	
Imports from United Kingdom, 1886 ..	347,915
Exports to United Kingdom, 1886	505,331

The Government is administered by a Governor appointed by the Crown, assisted by an Executive Council of six members, five official, and one unofficial, also a Legislative Council of 26, of whom 4 are official, 5 are nominated by the Crown, and the rest elected for 5 years. The whole colony forms a Bishop's See, that of Perth and the Church being under the government of Convocation, a body established in 1872, and consisting of the bishop as president, all licensed clergymen, and lay communicants elected by the various parishes. The number of clergymen is 22, four of them being missionaries from the Society for the Propagation of the Gospel, and one having a special mission to the Aborigines at Gascoyne, who number about 2,000. There is also a Roman Catholic bishopric in Western Australia. About one-half of the population belong to the Church of England and one-fourth to the various Non-conforming sects, the remaining fourth to the Roman Catholic church. The educational system is compulsory and secular; and the elementary schools, which exist all over the colony, are under the management of a central board and local district boards. There are also schools assisted by different denominations and having grants-in-aid from colonial funds, as well as a school in Perth for the higher education of boys. The total expenditure on education for 1886 was £10,962.

The principal towns in the colony are:—Perth (pop. about 10,000), on the right bank of the Swan River estuary, 12 m. from Fremantle; Fremantle (5,000); Albany and Geraldton (about 1,000 each); York, Bunbury, and Guildford (from 600 to 800 each). About one-third of the whole population is to be found in Perth and Fremantle; there are, however, smaller townships scattered throughout the colony, e.g., Northampton, Busselton, Bridgetown, Pinjarra, etc.

NEW ZEALAND,

a colony in the South Pacific Ocean, consisting of three islands, generally known as the Northern, Middle, and Stewart's Islands, situate about 1,200 miles E. of New South Wales, between 34° 20'—47° 20' S. lat. and 166° 25'—178° 35' E. long. Portions of them were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1841, but no colonization took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area is stated at 104,403 square miles, or 66,818,160 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 45,687 sq. miles; Middle Island, 57,313; Stewart's Island, 760, with only 209 inhabitants; and an adjacent group, named the Chatham Islands, containing 377 square miles.

The population of New Zealand, as ascertained by census, March, 1886, was reckoned to be 578,482. The native population (Maoris) in 1886 was estimated at 41,969 in addition, chiefly in the Northern Island. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., so long as they desired to retain them; the right of pre-emption was, however, reserved to the Crown if they wished to alienate any portion. This right has since been abolished by legislation in the colony, and large areas have been sold to private individuals by the natives. Thus New Zealand became a regular colony, and the seat of government was fixed at Auckland, but was removed to Wellington in 1865.

New Zealand in many parts is very mountainous; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The geographical position and physical features of these islands tend naturally to render the climate greatly varied; yet it is remarkable for its salubrity, and resembles in many respects that of Great Britain, though its atmosphere is drier and more elastic. The extremes of daily temperature vary throughout the year only by an average of 20°: London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole colony for the different seasons is:—Spring, 55°; Summer, 63°; Autumn, 57°; and Winter, 48°. The climate, in short, is admirably adapted for raising every fruit, flower, and

edible that flourishes in Great Britain. Amongst the productions most peculiar to New Zealand are the Kauri pine (found only at the northern extremity of the islands), much valued for ship-building, from its lightness and elasticity, the resin of this tree forming also one of its most valuable exports, Kauri gum; and the native flax, considerable quantities of which are transmitted to the United Kingdom for the manufacture of ropes. Wool is largely produced, and tallow and timber are also among the principal exports of the colony. Gold has been discovered in many districts, and a rich iron ore, in the form of iron sand, has been found in Taranaki. Coal is widely distributed, and copper is met with in several localities.

The total extent of land under all kinds of crop, and of land broken up but not under crop, is 4,092,299 acres, while there are 2,752,878 acres of land in sown grass not previously ploughed. The value of the principal articles of export for the year 1886 is as follows:—Wool, £3,072,971; frozen meat, £427,193; produce, £1,050,941; gold, £939,648; Kauri gum, £257,653; tallow, £119,619; and timber, £143,618. In the same year, the live stock was estimated at:—Sheep, 16,564,595; horned cattle, 853,358; pigs, 277,901; horses, 187,382; goats, 10,220; and fowls, geese, turkeys, and ducks, 1,079,000. The average yield of crops per acre throughout the colony shows, the fertility of its soil, viz.:—Wheat, 25'43 bushels; oats, 34'84 b.; barley, 30'37 b.; hay, 1'41 tons; and potatoes, 5'79 tons. In March, 1887, there were 1,721 miles of government railway lines in working order, and 117 miles more under construction; and the colony possesses in addition 88 miles of private lines, together with an excellent coaching system. The shipping trade is also considerable, and regular lines of steamers run between the numerous ports. During 1886 the vessels entered inwards numbered 725 (tonnage, nearly 503,000); and those entered outwards 707 (tonnage, 489,000).

Amount of public revenue, 1886	£3,688,016
Public expenditure (ordinary), 1886 ..	4,310,875
[The total expenditure in 1886, out of Loans for Public Works, was £1,583,723.]	
Gross amount of public debt, 1886	£37,587,776
Accrued Sinking Fund	3,469,264
Total imports, 1886	6,759,013
Imports from United Kingdom, 1886 ..	4,481,101
Total exports, 1886	6,672,791
Exports to United Kingdom, 1886 ..	4,587,434

The General Government consists of a Governor, aided by a Ministry, a Legislative Council appointed by the Crown for life, at present consisting of 54 members, and a House of Representatives, consisting of 95 members, elected for three years. Four members are Maories elected by the natives.

The State system of education is free and secular. There are 1,054 district schools, with 2,721 teachers and 105,234 scholars; there are also 288 private schools, with 12,473 scholars, and, in addition, 71 village schools for the Maories. The higher education of boys and girls in the cities and large towns is carried on in 25 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation of the colony amounts to 38,000,000 letters, 14,000,000 newspapers, 1,000,000 post-cards, and above 3,000,000 book-packets, and the work is effected by a total of 1,089 post-offices. The telegraph wires in operation extend to 13,294 miles.

The administration of the law is carried out by a Supreme Court, having a chief justice and four puisne judges, also by district judges, resident or stipendiary magistrates, and justices of the peace.

CAPITAL, Wellington, in the North Island.

The estimated population of the chief cities and towns in March, 1886, was as follows:—Wellington (and suburbs), 27,833; Auckland (and suburbs), 57,048; Dunedin (and suburbs), 45,518; Christchurch (and suburbs), 44,688; Invercargill, 6,974; Nelson, 6,764; Oamaru, 5,791; and Napier, 5,756.

TASMANIA

is an Island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass's Straits, in which are situated the Furneaux Group and King Island, included within the colony. It lies between 39° 35'–43° 41' S. lat. and 143° 48'–148° 30' E. long., and contains an area of 26,215 square miles, or 16,778,000 acres of land, of which, on 31st March, 1886, 446,391 were under cultivation: wheat 35,322, barley 2,949, oats 21,607, potatoes 16,084, hay 47,269. The statistics for 1885 show that 793,130 acres were leased from the Crown principally for pastoral purposes, besides numerous islands. Agricultural land in a state of nature can be selected for purchase at £1 an acre, to

be paid off in yearly instalments extending over fourteen years. The estimated population, 31st December, 1886, was 137,211, and contains representatives of all the principal religious bodies; half of them are believed to belong to the Church of England, and are under a bishop and 58 clergymen. The Roman Catholic church, to which 22 per cent. of the population belong, has also a bishop in the island; and the various Nonconforming bodies have their synods, presbyteries, and conferences as in Great Britain. The aboriginals have become quite extinct, the last, a female, "Truganini," having died in 1876. This island was first discovered by Tasman, in December, 1642, and named by him "Van Diemen's Land," in honour of his patron, the then governor of the Dutch possessions in India. It was subsequently partially explored by Captain Cook. In 1803 Lieut. Bowen was despatched from Sydney with a few soldiers and convicts to form a penal settlement, and finally fixed upon the spot where Hobart now stands. In 1825 it was severed from New South Wales and formed into a distinct colony. Transportation of criminals was abolished in 1853, and the name officially changed from Van Diemen's Land to Tasmania. The climate is fine and salubrious, and well suited to European constitutions; it is, in fact, the healthiest of the whole Australasian group. The hot winds of Australia rarely reach the island, and are never of long duration. At Hobart the mean annual temperature is 54° 4', the mean summer temperature being 61° 6', and that of winter 45° 4'. The thermometer rarely rises as high as 100° or falls below 29°. The average rainfall for 1886 was 21' 39 inches. The surface of the island is mountainous and covered with forests. The chief products of the colony are wool, gold, tin, and fruit; the wool is much esteemed, and commands a high price in the English markets. Tasmanian stud sheep are in great request in the other colonies, and bring high prices. The live stock of the colony is celebrated for its general superiority, and great attention is paid to its improvement; the estimated totals on March 31, 1887, were as follows:—Sheep (and lambs), 1,608,946; cattle, 148,665; horses, 29,684; and pigs, 73,118. The wheat ranks high for its quality; the yield per acre is large, and the sample heavy. The woods of Tasmania are scarcely yet fully appreciated; the sources of supply are practically inexhaustible, abounding in the most beautiful cabinet woods and the largest-size timbers, adapted for every variety of purpose. The fauna of the colony are of special interest, and include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. The mineral kingdom is also well represented, and of late great attention has been directed to its development. Mines of both lode and stream tin, of great richness, are being worked in the north-western and north-eastern portions of the colony. The value of tin exported in 1886 was £363,364. Iron-ore exists in nearly every district. Gold has been found in many places; the amount raised in 1886 was £117,250. Coal, of a good quality, and in easily accessible positions, is very generally distributed over the island. Jams and green fruit to the value of £148,596 were exported in 1886. There are in all 303 miles of railway open, including the main line running from Hobart to Launceston, through the

sland, and 138 miles are in course of construction. There are 144 telegraph stations, with 2,353 miles of wire; a submarine cable communicating with the Universal Telegraph System; 251 post stations, and 2,692 miles of post roads. The shipping of Tasmania is considerable, in spite of the falling off in the whaling trade. On Dec. 31, 1886, the total registered shipping for the year was 28 steamers and 172 sailing vessels, with a total tonnage of 17,424. The inward entries during 1886 were 690 (tonnage, 343,656); and the outward entries 690 (tonnage, 348,773). The present military defence is mainly composed of volunteers, who number 715 of all ranks. On the Derwent and the Tamar batteries have been constructed, and the colony possesses one or more torpedo-boats.

Education.—Primary education is administered by a Department, under which are 204 state schools. There are 17 Exhibitions from the Primary Schools and Council of Education, tenable at superior schools; four minor scholarships of £40 a year, tenable by the senior associates of arts of the year; and eight scholarships of £200 a year each, tenable by associates of arts at some British University. Several other scholarships are at the disposal of the Council, who also conduct matriculation examinations for the Universities of London, Sydney, and Melbourne.

Amount of public revenue, 1886-87 £568,924
Amount of public expenditure, 1886-87 584,756
Public debt, 31st December, 1886 4,026,720
Total imports, 1886, £1,756,567; exports 1,331,540
Imports from United K., 1886 (*direct*) 641,568
Exports to United Kingdom, 1886 (*direct*) 247,442

The Constitution of Tasmania was settled by Local Act (18 Vict., No. 17). By this Act the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 18 members, elected for six years; and the latter of 36 members, elected for five years. The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. For local purposes the island is divided into municipal, police, and road districts, which elect their own councillors and trustees.

FIJI ISLANDS,

a group of 225 islands in the South Pacific Ocean, 1,100 miles north of New Zealand, situated in 15° 45'—21° 10' S. lat. and 176° E.—178° W. long., extending 300 miles from east to west, and 300 north to south, 80 of which are said to be inhabited. The gross area is calculated at 4,751,360 acres. They are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji), and Vanua Levu (Great Land), Viti Levu about 300 miles of outline, and Vanua Levu about 400. The island of Rotumah was annexed in 1881. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plaintain, cocconut, sugar-cane, and arrowroot. Cotton, sugar, pearl-shells, maize, béche-de-mer, and copra and cocconut oil are the chief exports. Fiji was ceded by its chiefs to the British crown, and the islands were formally annexed by Sir Hercules Robinson, on Oct. 10, 1874. Sir Arthur Gordon, the first Governor, landed in the colony in June, 1875. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of the Colonial Secretary, Attorney-General, and Receiver-General. Laws are passed by a Legislative Council, of which the Governor is president, and which contains six official and six unofficial members, all nominated by the Crown. Native administration is carried on through the chiefs under the Governor's supervision. The European population at the end of 1884 amounted to 3,513; natives, 114,891; half-castes, 791; Rotumans 2,409; East Indian and Polynesian labourers, 5,840.

Public income, 1885 £76,669
Public expenditure, 1885 92,209
Debt, Grant in aid from United Kingdom 115,000

Commissioner for Lands, J. Berry 500
Commissioner for Natives Affairs, J. Blyth 450
Agent-General for Immigration, H. Anson 400

THE West Indies are an immense number of Islands and islets, some of them mere rocks, extending from 10° to 27° North, and from $59^{\circ} 30'$ to 85° West. They belong chiefly to this country, Spain, France, Holland, Denmark, Sweden, and Venezuela, the main possessions of each country being as follow:—*British*: Jamaica, Turks and Caicos Is., Trinidad, Antigua, Montserrat, Nevis, St. Christopher, Dominica, and the Virgin Isles (in the Leeward Islands), Grenada, St. Vincent, Tobago, St. Lucia (in the Windward Islands), Barbados, Bermuda; all the Bahamas, and the islands off the coast of Central America. *Spanish*: Cuba, Isle de Pinos, Porto Rico, Bicque, and Culebra. *French*: Martinique, Guadaloupe, Desceada, Marie Galanta, Les Saintes, St. Bartholomew and St. Martin (the last partly Dutch). *Dutch*: St. Eustatius, Saba, Bonaire, Curaçao, Aruba. *Danish*: Santa Cruz, St. Thomas, St. John. *Venezuelan*: Coche, Cuagua, Tortuga, and Margarita. The whole of the West Indies are divided by geographers into (1) the Bahamas, (2) the Greater Antilles, and (3) the Lesser Antilles, of which the last named is subdivided into (1) the Windward Islands, (2) the Leeward Islands, and (3) the Virgin Islands. The islands lying off the coasts of South America and Central America respectively form two separate groups in addition to those already mentioned. The total area of the West Indies is probably about 95,000 square miles, of which the Greater Antilles occupy not less than 83,000 square miles. Some of the Lesser Antilles are flat, but the prevalent character of the islands is bold and mountainous. In Cuba and Hayti the highest points are more than 8,000 feet above the sea-level, and in Jamaica there are hills almost as high. Others, too, among the smaller islands rise to between 4,000 and 5,000 feet in height, and several of them contain active volcanoes, while nearly all of them show signs of volcanic action. The climate is strictly tropical, but the surrounding seas tend to counteract the otherwise intense heats of the torrid zone. The mean yearly temperature of the larger islands is about 78° , and that of the smaller islands a little higher. Slight frosts occasionally occur in the higher regions of Cuba, but snow is never known to fall. The seasons alternate from drought to moisture, and in most parts of the archipelago there are two wet and two dry seasons. On the whole it may be said that the climate is generally healthy between the months of November and June; during the great rains, however, many diseases, in particular various fevers, are of frequent prevalence. The vegetable productions of the West Indies are both varied and abundant, the principal articles of commerce including sugar, coffee, cotton, pimento, indigo, cocoa, medicinal drugs, tobacco, maize, and guava, ginger, arnotto, aloes, sassafras, and the castor-oil tree. Of the more common fruits there are the pineapple, pomegranate, cocoa-nut, cabbage-tree, oranges, lemons, limes, citrons, the mango, shaddock, papaw, banana, and plantain. Yams, potatoes, and manioc also grow freely. The mountains in the greater islands furnish a varied abundance of timber adapted for cabinet-work, shipbuilding, and other arts, such as mahogany, cedar, lignum-vitæ, iron-wood, Indian fig, calabash, &c. The grains of England are not grown, as a rule, in the West Indies. Indian corn yields abundant crops almost everywhere, while rice, as a profitable investment, is all but confined to the Island of Trinidad. The total population of the West Indies is nearly 4,000,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The southern islands of the archipelago, at the time of their discovery, were inhabited by the Caribs, a fierce and warlike race; the northern islands, by a less savage race known as the Arrowauks. Both these native Indian races, however, have been exterminated, with the exception of a few scattered families. By far the most important of the West Indies is Cuba, in the possession of Spain, and Hayti, or San Domingo. Cuba is known as the "Queen of the Antilles:" it is 750 miles from east to west, from 60 to 70 miles in average breadth, and has an area of 45,870 square miles, of which about one-seventh is under cultivation or in pasture. The population is reckoned at about 1,520,000. Hayti or San Domingo is about 400 miles long from east to west, and has an extreme breadth of 150 miles. The total area of the island is about 28,250 square miles, and the official estimate of the population—probably too high—is 800,000. The republic of San Domingo occupies the eastern part of the island, and the population of Hayti the western part. Those of the West Indies belonging to Great Britain have an area of about 13,750 square miles, and a population of nearly 1,250,000. In the early part of this century slavery existed in all the islands. Fostered by highly protective duties, they reached a very flourishing condition, and large fortunes were made. This condition was completely artificial; and when slavery was abolished, and the protective duties repealed, an entire collapse took place, and many hitherto wealthy persons were ruined. Up to that time they had been regarded as the choicest possessions of the British Crown, and a grand outlet for commerce. Even so recently as 1845 when

the total value of British and Irish produce exported to India and all the other colonies amounted to but £16,857,394, the West Indies took £2,789,211, or nearly one-fifth of the whole. In 1884 the corresponding amounts were £3,394,736 and £95,812,911, or little more than one-twenty-eighth. Since their decline they have received less attention in every way than they deserve, but are now again resuming their proper position, and it may be hoped that they will once more become prosperous. Much attention is being paid to improvements in machinery, to education, and in each of the islands to the development of its natural resources.

JAMAICA,

aboriginally Xaymaka, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 32' North lat. and 76° 11'—78° 21' W. long. It is the largest and the most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,193 square miles, and a population, in April, 1881, of 580,804, showing an increase during the previous decade of 73,650, and including whites, 14,432; coloured, 109,946; blacks, 444,186, and a number of Coolies and Chinese. The climate is healthy, in spite of the unenviable reputation it enjoys: there are two rainy seasons and two dry, and, in the plateau, which resemble generally the South of Europe, the thermometrical readings are confined between 60° and 90°. It was discovered in May, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid. From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, from which they radiate, dividing the large rivers, and attaining, in the culminating Western Peak of the Blue Mountains, an elevation of 7,360 feet. From these mountains at least 70 streams descend to the north and south shores, but with the exception of one (the Black River, and that only for small craft) they are not navigable. There are several excellent harbours, and the island is intersected by good roads. There are 67 miles of railway open. Telegraph stations and post-offices are established in every town and village. The number of accounts open in the savings' banks is about 16,500. Most of the staple products of tropical climates are raised, and in this direction great improvement has taken place during the last few years. Maize and Indian corn grow luxuriantly. The Guinea grass, from five to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members and a Legislative Council consisting of 9 elected members, 2 nominated by the Government, and 4 *ex-officio*. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal cities are Kingston, the seat of government and the largest port and town, pop. about 40,000; Spanish Town, pop. about 8,000; and Port Royal, pop. about 1,200.

Public Revenue, 1885-86	£564,375
Expenditure from Income, 1885-86 ..	532,735
Expenditure from Loans	42,000
Public debt in 1886	1,478,790

Imports from United Kingdom, 1885	£761,157
Exports to United Kingdom, 1885	532,971
Total imports, 1886, £1,325,603; exports 1,280,119	

The chief articles of export in order of importance are:—Sugar, £202,791; rum, £184,545; tropical fruits, £232,960; coffee, £119,944; dye-woods, £194,850; pimento, £46,704. The produce of Jamaica, shipped in 1886, was as follows:—United Kingdom, 39·7 per cent.; United States, 44·0; Dominion of Canada, 3·5; other countries, 12·8.

Gov., &c., Gen. Sir Henry Wylie Norman, G.C.B.	£6,000

TURKS AND CAICOS (CAYOS or KEYS).

These islands form part of the Bahama group, from which Government they were separated in 1848, and in 1874 were annexed to that of Jamaica; from the north-west of which they are distant about 430 miles. They have an area of about 223 square miles. The population in 1881 was 4,778, of which the principal island, Grand Turk, contains 2,500.

A Commissioner administers the affairs of the Settlement, assisted by a Legislative Board. Commissioner, Capt. Henry Moore Jackson £500 Judge Sup. Court, His Hon. Chas. H. Roberts 500

TRINIDAD,

the most southerly and most considerable of the smaller West India Islands, lying off the north coast of the continent of S. America, between 10° 3'—10° 50' N. lat. and 61° 30'—62° W. long., is about 55 miles in length by 40 in breadth. It comprises an area of 1,754

square miles, with a population (1881) of 153,128. The climate is healthy, and well suited to Europeans, the mean temperature during the cool season, being 76° F., and during the hot season, 79°. The island was discovered by Columbus in 1498, and was first colonized in 1588 by the Spaniards: it capitulated to the British under Abercromby in 1797. The chief town and port of entry, "Port of Spain," is one of the finest towns in the West Indies, and contains 31,858 inhabitants, the harbour being the finest in the West Indies. Other towns of importance are San Fernando (pop. 6,335), about 30 miles south of the capital, and Macaripe on the north coast. A remarkable phenomenon is the asphaltic lake near the village of La Brea, 90 acres in extent, containing an almost inexhaustible supply. In 1885, 35,236 tons, valued at £41,961, were exported. The soil of the island is rich and productive, its most important products being sugar, cocoa, molasses, rum, coffee, cocoa-nuts, and pitch, in addition to various kinds of timber, and also the choicest of West Indian fruits. The chief exports during the year 1886 were as follows:—Sugar, 63,679 tons; rum, 48,448 gals.; asphaltic, 35,671 tons; molasses, 2,220,288 gals.; bitters, 35,355 gals.; and cocoa, 67,913,087 lbs. The total extent of land under cultivation is nearly 100,000 acres, or one-eleventh of the whole island, this area being distributed thus according to the assessment of 1884:—Sugar-cane, 52,150 acres; cocoa and coffee, 21,279; ground provisions, 16,986; cocoa-nuts, 2,885; and pasture-land, 6,103. Coal is found in Manzanilla, and geologists have favourably noticed the coal supplies of the island, yet no great attempts have hitherto been made to raise this mineral in any quantities. There are 5¼ miles of railway open. The island is intersected by the telegraph wires of the West India and Panama Company. Twenty steamers from Europe arrive every month, and four from the United States and Canada.

Amount of public revenue in 1886	£453,407
Amount of expenditure in 1886	443,503
Public debt, 1886	571,880
Imports from United Kingdom, 1886	666,499
Exports to United Kingdom, 1886	949,622
Total imports, 1886	2,503,514
Total exports, 1886	2,509,140

The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

Governor, Sir William Robinson, K.C.M.G.	£4,000

THE LEEWARD ISLANDS.

The Leeward Islands under British authority consist of Antigua, Montserrat, St. Christopher, Nevis, Dominica, Anguilla, and the Virgin Islands, forming part of the group of the Lesser Antilles. By Act 34 Vict. (1871), c. 107, these six previously separate colonies were formed into one. The federal colony contains 119,546 inhabitants, with a revenue of £115,664.

Governor, Viscount Gormanston, K.C.M.G.	£3,000
Private Sec., J. F. A. Rawlinson	300

ANTIGUA (AND BARBUDA).

The former is the most important of the Confederation, and the residence of the Governor-in-Chief. It lies in 17° 6' N. lat. and 61° 45' W. long., and is about 70 miles in circumference; its area being nearly 108 square miles, equal to 63,980 acres, of which nearly 20,000 are under cultivation. The population (with Barbuda) in 1881 was 34,964, including 16,147 males and 18,817 females. Chief exports, molasses, rum, sugar, tamarinds, arrowroot, and cotton.

Amount of public revenue in 1885	£41,957
Expenditure in 1885	39,603
Amount of public debt, 1885	15,671
Imports, 1885; £144,444; exports, 1885	158,980

Principal town, St. John's. Pop. (1881), 9,636. Pres. & Island Sec., Charles Monroe Eldridge, £350. Treasurer, F. Wilde (J. Bunn, acting) 500

BARBUDA is situated 30 miles N. of Antigua, n lat. 17° 35' N., long. 61° 45' W. Area, 75 square miles. Population, 813. The island is flat and fertile, producing corn, cotton, pepper, and tobacco. It is a dependency of Antigua. Magistrate, J. B. Wilkinson.

MONTSERRAT,

situated in 16° 42' N. lat. and 62° 13' W. long., 26 miles S.W. of Antigua. It is about 12 miles in length and 8 in breadth, comprising an area of 47 square miles, and at the Census in 1881 a population of 10,087. It is justly considered one of the most healthy and beautiful of the Antilles: it contains an active Soufrière and several hot springs. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown; one company alone has a plantation of 600 acres, and annually exports about 100,000 gallons of lime-juice.

Revenue, 1886, £5,022; expenditure, 1886	£5,669
Imports, 1886, £21,087; exports, 1886	20,944

The total imports of the island for 1886 were divided as follows:—United Kingdom, £7,415; British Colonies, £10,878; foreign, £2,793; and the exports thus:—United Kingdom, £8,305; British Colonies, £750; and foreign, £11,808. The chief town is Plymouth.

President and Treasurer, J. Spencer	
Churchill	£500

ST. CHRISTOPHER'S, NEVIS (AND ANGIILLA).

The former, popularly called St. Kitts, is situated in lat. 17° 18' N. and long. 62° 48' W., about 46 miles to the west of Antigua; it comprises an area of 68 square miles, its total length being 28 miles, and greatest breadth about five and a half miles. Population (1881), 41,001. Nevis, which is but a single mountain rising 3,200 feet above the sea, has an area of 50 square miles. Sugar, rum, and molasses are the only productions. Sulphur is found in the mountains of St. Kitts, which rise

to 4,100 feet above the sea. Basseterre, on the south coast of St. Kitts, is the chief town and the seat of government, and has a population of 7,500.

Amount of public revenue in 1886	£46,344
Amount of expenditure in 1886	43,729
Public debt, 1886	700
Imports, 1886, £170,735; exports, 1886..	159,971
<i>President</i> , Charles Monroe Eldridge	£800
<i>Treasurer</i> , W. D. Auchinleck	500

ANGUILLA, OR LITTLE SNAKE.—It is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 3 to 1½ miles, containing an area of 35 square miles. Population, about 2,500, of whom 100 only are white. Salt, obtained from a small lake in the centre of the island, and phosphate of lime are the principal productions, besides cattle and garden stock. It forms part of the Government of St. Kitts.

Presiding Magistrate, James Louis Lake .. £220

DOMINICA, OR DOMINIQUE, the largest island of the Confederation, and the loftiest of the Lesser Antilles, is situate between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, about 29 miles long and 16 broad, comprising an area of 275 sq. miles, or 186,436 acres, of which about 55,000 acres are cultivated, the major part being incapable of reclamation. It is very mountainous and picturesque, and abounds in rivulets well stocked with fish. It is of volcanic origin. There was a slight volcanic eruption in 1883, destroying 6 square miles of forest. Sulphur, thrown out of the souffrières, is very plentiful, and good game is abundant. Land may be purchased at about 10s. an acre. Population (1881), males, 12,867; females, 15,344. The principal productions are sugar, coffee, maize, cocoa, cotton, tobacco, molasses, rum, lime juice, fruit, and cabinet woods. The soil is good; the climate varies greatly according to the altitude: on the high lands it is excellent, but in the lowlands and the coast districts the mass of vegetable matter of various kinds keeps it unduly moist. The principal towns are Roseau (capital) on the south-west coast, and St. Joseph, on the west coast.

Amount of public revenue in 1886	£15,238
Amount of public expenditure in 1886 ..	15,642
Imports, 1886, £49,734; exports, 1886....	51,530
<i>President and Treas.</i> , G. Ruthven Le Hunte	£700
<i>Surveyor-General</i> , Geo. Birrell Blanc, c.z.	

THE VIRGIN ISLANDS, a group of islands belonging to Denmark, Spain, and Great Britain, forming a connecting link between the Greater and Lesser Antilles. They form a thickly studded archipelago of islands and rocks, the majority of which are mountainous. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 64 square miles, and the population in 1881 was 5,500. There is good pasturage for cows, sheep, and goats. Sugar and cotton are raised in small quantities, and fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda in past years, and it is not improbable that gold will ultimately be found in the neighbourhood. The capital of the group is Roadtown, a small place on the south side of Tortola.

Amount of public revenue in 1886	£1,447
Amount of expenditure in 1886	1,675
Imports, 1886, £7,667; exports, 1886	4,104
<i>President</i> , Edward John Cameron	£300

THE WINDWARD ISLANDS.

The Windward Islands of the Lesser Antilles belonging to Great Britain consist of Grenada, St. Vincent, Tobago, St. Lucia, and their dependencies, including an area of 622 square miles, with a population of about 114,000.

<i>Gov.-in-Chief</i> , Hn. Walter J. Sendall, c.m.g.	£2,500
<i>Private Sec.</i> , Dr. J. P. Beresford	200
<i>A.-de-C.</i> , Capt. R. J. Hughes	
<i>Chief Clerk</i> , E. D. Laborde	300

Transit, about 14 days. Postage, 4d.; news, 1d.; books, 2 oz. 1d.; parcels, 1; telegrams, Grenada, per word, 11s. 10d.; St. Lucia, 11s. 2d.; St. Vincent, 11s. 5d.

GRENADE (AND THE GRENADINES).

GRENADE is an island of volcanic origin, abounding in streams, mineral and other springs, situated between the parallels of 12° 30'—11° 58' North latitude and 61° 20'—61° 35' West longitude, and is about 21 miles in length and 12 miles in breadth; it has an area of 125 square miles, and is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. It contains about 85,120 acres, of which about 22,000 are cultivated, and had, at the end of 1885, an estimated population (inclusive of the Grenadines) of 46,425. The country is mountainous and very picturesque. The Grand Etang, a lake on the summit of a mountain ridge about 1,740 feet above the level of the sea, and Lake Antoine, are the most remarkable natural curiosities. The climate is healthy; the death-rate, as shown in the Registrar-General's returns for 1884, was only 2'46 per cent. Grenada was discovered by Columbus in 1498, and named Ascension; he found it inhabited by Caribs. In 1650 it was purchased by Du Parquet, the Governor of Martinique, and after changing owners several times, during which period it was the scene of numerous encounters between the English and French, in 1783 it was ceded by the Treaty of Versailles to Great Britain, in whose possession it has since remained. The soil is very fertile; amongst the principal products are cocoa, cotton, spices, sugar, rum, and coffee; large quantities of fruit are also grown. The chief production of the island is, however, cocoa (or cacao), of which no less than 5,500,000 lbs. were exported during the year 1885. Nutmeg cultivation now occupies a prominent position, and is being largely developed. The value of land has greatly increased within the last few years. The forests are rich in many valuable timbers, particularly bullet wood, locust, mahogany, white cedar, and galba; and vanilla and several varieties of gum-yielding trees have been found to be indigenous. Large numbers of turtle are also caught and exported, and whales abound, especially among the Grenadines. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c.

St. George, on the south-west coast, is the chief town, and possesses a good harbour.	
Amount of public revenue in 1886	£55,862
Expenditure in 1886	54,152
Total imports, 1886, £120,337; exports ..	180,691
<i>Colonial Secretary</i> , Hon. Capt. I. Maiting ..	£550
<i>Chief Justice</i> , Hon. John Foster Gresham ..	800

<i>Attorney-General</i> , Hon. H. R. Pipon Schooles	£400
<i>Treasurer</i> , Hon. F. M. Chadwick	500
<i>Registrar</i> , Edward Drayton	450

Grenada, 3,735 miles; transit, 14 days. Telegrams, 11s. 10d. per word; parcel post, 7d. per lb.

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The chief produce is roots and live stock: the largest island is Carriacou.

TOBAGO,

the most southerly of the Windward group of islands, situate 11° 9' N. lat. and 60° 43' W. long., about 75 miles south-east of Grenada, 20 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados, is 26 miles long and from 6 to 7½ broad, and has an area of 114 square miles, with a population (in 1881) of 18,051. Two-thirds of the island are still covered with primitive forests, comprising many varieties of hardwood and ornamental trees, and out of the 73,313 acres of total area, it is estimated that not more than 10,000 acres (including provision grounds) are under cultivation. Sugar, rum, and molasses are the chief productions; but cocoa-nuts to the value of £2,500 were shipped in 1883, and attention is now being turned to the cultivation of cocoa and coffee, for which the soil and climate are admirably adapted. This island is one of the most healthy of the West Indies. It lies almost exactly on the circle of maximum heat, and the temperature varies from 81° in February to 88° in September.

There are only two towns in the island, viz., Scarborough, the capital, and Plymouth.

Amount of public revenue in 1885	£10,826
Amount of expenditure in 1885	12,031
Total imports, 1885, £30,758; exports	38,437
<i>Administ. & Col. Sec.</i> , R. Baxter Llewellyn	£600
<i>Chief Justice</i> , Hon. J. W. Carrington (& exps.)	350
<i>Acting do.</i> , C. J. Choppin	250
<i>Acting Attorney-General</i> , S. James Fraser	250
<i>Auditor & Registrar</i> , Hon. G. Wm. Gordon	250
<i>Treasurer</i> , L. G. Hay	350
<i>Marshall</i> , S. F. Titzck	270

ST. LUCIA,

the largest of the Windward group, situated in 13° 42'—14° 8' N. lat. and 60° 52'—61° 7' W. long., at a distance of about 90 miles W.N.W. of Barbados, 75 miles N. of St. Vincent, and 24 miles S.E. of Martinique, is 42 miles in length and 21 at its greatest breadth; it comprises an area of 243 square miles, with an estimated population (in 1886) of over 41,000. The principal exports, together with the returns for 1886, were as follows:—Sugar, 9,560,018 lbs.; molasses, 215,804 gallons; cocoa, 546,768 lbs.; logwood, 98 tons. The chief places are Castries, the capital (pop. about 5,000); and Soufrière (pop. 2,000).

Port Castries is one of the finest in the W. I., is the second naval station of the empire in these parts, and a coaling station. Extensive harbour improvements are being carried out at a cost of £100,000, and the port is also about to be heavily fortified by the imperial government.

Amount of public revenue in 1886	£39,823
Amount of expenditure in 1886	44,103
Amount of public debt, 1886	33,600
Total imports, 1886, £122,283; exports (produce of the colony) 1886	84,638
<i>Administrator & Colonial Secretary</i> , Hon. Edward Laborde, C.M.G.	£800

<i>Treasurer</i> , D. G. Garraway	£400
<i>Chief Justice</i> , St. Lucia (& Tobago), Hon. J. W. Carrington, D.C.L.	700
<i>Attorney-General</i> , P. J. K. Ferguson	400

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 square miles, and a population (in 1881) of 40,548. The island has been subjected to many changes in regard to ownership. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. In 1861 Coolie immigration from India commenced.

The chief products are sugar, molasses, rum, arrowroot, cocoa, coffee, and cotton. Its chief imports are linen, cotton, and woollen manufactures, American flour, fish, &c. The upset price of Crown lands, of which an area of 40,000 acres is still for disposal, is £1 per acre. The capital is Kingstown, on the south-west coast. (Pop. over 5,000.)

Amount of public revenue in 1886	£27,467
Amount of expenditure in 1886	31,316
Total imports, 1886, £91,185; exports	70,476
<i>Lieut.-Gov. and Colonial Sec.</i> (vacant)	£1,000
<i>Treas. & Collee. of Customs</i> , F. B. Griffith	500
<i>Chief Justice & Vice-Chan.</i> , Hn. G. Trafford	800
<i>Attorney-General</i> , J. C. Choppin	400
<i>Police Magistrates</i> , G. Van Meyningen (Kingstown), £400; J. J. A. Hughes (Second District), £300; H. E. Lynch (Windward), £350.	
<i>Colonial Surgeon</i> , W. F. Newsam, M.D.	£300

BAHAMAS,

a chain of islands lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long. The group consists of about twenty inhabited, and an immense number of islets and rocks, comprising an area of about 5,794 square miles, and a population (in 1881) of 45,000, including 14,000 whites, the rest being the descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Mayaguana, Harbour Island, Great Inagua, and Andros Islands. San Salvador was the first land discovered by Columbus on his voyage in 1492. In 1781 the Bahamas were surrendered to the Spanish, but at the Peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau is frequented by many Americans. Large quantities of sponges, pineapples, tomatoes, and oranges are exported to England and the United States. The principal woods are mahogany, lignum-vitæ, mastic, iron, ebony, logwood, and satinwood; tobacco, cotton, and fibrous plants flourish. The castor-oil plant grows wild, and there is a varied abundance of fish and birds. The value of the sponge exports for 1885 is estimated at £60,000. The imports are chiefly wines, spirits, cotton, silk and worsted fabrics, hardware, and provisions.

Amount of public revenue in 1886	£46,940
Amount of public expenditure in 1886	48,407
Public debt, 1886	83,126
Total imports, 1886, £189,410; exports	150,390
Capital, Nassau; pop. 12,000; distant 4,000 miles.	

The Government is vested in a Governor, aided by an Executive Council of 9 members, a Legislative Council of 9 members, and a Representative Assembly of 29 members.

Governor, Sir Ambrose Shea, K.C.M.G.	£2,200
Colonial Secretary, Edward B. A. Taylor, C.M.G.	700
Chief Justice, Hon. Henry Austin	700
Judge of Court of Common Pleas, Hon. G. C. Camplejohn	
Attorney-General, Hon. Ormond Drimmaie Malcolm, Q.C.	400

BARBADOS,

the most windward of the West India Islands, is situated in $13^{\circ} 4' N.$, and longitude $59^{\circ} 37' W.$ It is nearly 21 English miles long by 15 broad at the widest part, and comprises an area of 106,470 acres, or about 166 square miles. About 100,000 acres are highly cultivated. The population by census of 1881 is returned at 171,860, being about 1,035 to the square mile. The principal exports are sugar, molasses, and rum; the imports are rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Barbados is the headquarters of H.M. forces in the West Indies, under a major-general, who resides in the island; is a station of the West India and Panama Telegraph Company, has a railway across the island, a tramway through town and suburbs, and telephonic communication throughout the island. The deposits in the savings bank to Dec. 31, 1886, were £43,938. Besides various fire and life offices, the island has its own mutual life and fire insurance office. In 1861 a project for supplying the town with water was completed. Liberal provision is made for education, and, in addition to certain proceeds from landed property, £15,000 is annually voted, as also £6,630 to the general hospital. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain. In 1885 Barbados was constituted a distinct government.

Amount of public revenue in 1886	£136,286
Amount of public expenditure in 1886 ..	136,628
Public debt, 1886	19,000
Total imports, 1886, £863,491; exports..	739,912

The chief town and port is Bridgetown (pop. about 21,000), on the shores of an open roadstead known as Carlisle Bay; Speightstown, on the west coast, is further to the north. The government consists of a governor, aided by an executive council, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members, elected yearly on the basis of a low franchise.

Governor, Sir Charles Cameron Lees, K.C.M.G.	£3,000
Private Secretary, E. Hutson	300
Commander of the Forces, Maj.-Gen. Sir Charles Knight Pearson, K.C.M.G.	692

The British Empire in Africa.

THE British Empire in Africa is, for the most part, limited to the southern extremity of the continent, and consists of Cape Colony, Natal, and the British Transkei, besides various protected territories. Excluding the last named, the total area is more than 250,000 square miles, or greater than either the French or the German Empire, and almost as large as Austro-Hungary; and the aggregate population is estimated to have been (at the end of 1885) about 1,663,000. On the west, the Atlantic Ocean forms the boundary, on the east and south the Indian Ocean, while on the north it is bounded, in an easterly direction as far as $22^{\circ} E.$ long., by the Orange or Gariop River, and thence to the coast by the Orange Free State, the Transvaal, and Zululand. The extreme limits of the whole territory may be taken as:— $27^{\circ} 15'$ to $34^{\circ} 50'$ S. lat. by $16^{\circ} 25'$ to $31^{\circ} 30'$ E. long.

CAPE COLONY.—The country directly south of the Orange River is formed by a series of terraces divided by three main mountain ranges, varying in height from 4,000 to 8,000 feet, and rising in stages from S. to N. as far as the parallel of $32^{\circ} S.$, whence it gradually declines in a series of open, sterile plains to the river itself, the culminating point being the Spitzkop or Compass Berg, 8,500 feet above the sea-level; the passages from one terrace to another are by well-made passes through the *Kloofs*, narrow and difficult mountain gorges. One of the terraces, an inland and elevated tract, is known as the Great Karroo, and extends from east to west for 300 miles, with a breadth of 70 miles: on its surface lie shallow beds of the richest soil, which only require a regular supply of water to render them among the most productive in the world. Where streams exist

the wondrous fertility of the Karroo is apparent, as also it is immediately after thunderstorms, when the whole area is covered with a most profuse and varied vegetation. The rivers of South Africa are numerous, but practically useless either for purposes of irrigation or of navigation; most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are mere shallow torrents, and even the largest either have not sufficient depth of water save for the smallest craft, or have bars at their mouths which render entrance to them both difficult and dangerous. The climate is healthy, and the uniformity of the temperature causes it to be much favoured by Europeans suffering from pulmonary complaints. The mean thermometrical returns at the Royal Observatory, Capetown, showing a maximum of $72^{\circ}4'$ and a minimum of $52^{\circ}8'$. The vegetation of South Africa has a peculiar and distinctive character; trees are scarce, while flowers of great variety abound everywhere. The principal native flora are heaths, proteæ, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which the most common plants are several species of aloe. The fauna is much more diversified in type and no less rich, though some at least of the native animals are either disappearing altogether, or retreating northward owing to the rapid spread of civilization. The chief are the following:—Elephant, leopard, panther, hyena, jackal, wolf, buffalo, antelope, ant-eater, several varieties of reptiles, many of which are very venomous, and a number of peculiar birds such as the secretary-bird, the honey-guide, the weaver bird, and the ostrich.

In 1486, Bartholomew de Diaz, a Portuguese commander, discovered the Cape of Good Hope, and eleven years afterwards Vasco de Gama doubled it. De Gama commanded the expedition sent out by King John of Portugal to verify if possible the allegations of an ocean route to India raised in the minds of some by the voyage of Diaz. The Portuguese, however, did not make any permanent settlement at the Cape, although for the succeeding century and a half it was used by their vessels, and also by those of England and Holland, as a place of call in going to and from the East Indies. In 1620, two English East India commanders landed and took possession of the peninsula in the name of James I., but nothing came of the attempt: thirty-two years later the Dutch East India Company seized the shores of Table Bay, established a defensive fort, and occupied the lands in Table Valley, chiefly in order to be always ready with supplies for their own passing ships. Until 1795 it remained in the hands of the Dutch, after which the English held it for nine years: in 1803 it was again restored to the Batavian Government; and in 1806 it was, for the second time, occupied by the British, whose final claim to it was admitted and ratified by the Vienna Congress in 1815. From that year onwards the principal events in the history of the colony have been the following:—Kaffir wars (1819, 1835–36, 1846–47, 1851–52); introduction of British settlers, 1820; emigration of the Dutch Boers, 1837–39; extension of the boundary to the Orange and the Keiskamma rivers, 1848; grant of a regular constitution, 1853; introduction of railways, 1859; incorporation of British Kaffraria, 1865; diamonds discovered, 1867; annexation of Basutoland, 1871; West Griqualand proclaimed a colony, 1871; annexation of West Griqualand, 1880.

CAPE COLONY.

THE CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S.W. extremity of the continent of Africa; but the extensive colony of that name is washed by the Atlantic and Indian Oceans on the west and south, and is bounded on the north and north-east (excluding the Transkei) by the Orange, the Indwa, and the Great Kei Rivers. Including the adjoining territories in the "Transkei," it reaches in S. lat. from 28° to $34^{\circ}50'$, and in E. long. from $16^{\circ}25'$ to 26° . The extreme length of the colony is nearly 600 miles, the breadth 450, the coast-line nearly 1,200, and the area, including Transkei and Griqualand West, 213,636 square miles. The population of Cape Colony is estimated at the end of 1885 to have been about 1,250,000.

THE TRANSKEIAN territories stretch from the Kei to Natal, and are bounded on the north by the lofty Quathlamba Mountains. Under Act of Parliament, No. 38, of 1877, and Proclamations, No. 110 of the 15th, and No. 112 of the 17th September, 1879, the following territories were annexed to the Cape Colony, viz.:—*a.* *Griqualand East*, comprising nine magisterial districts; *b.* *Fingoland* and the *Idutwa Reserve*, forming

three magisterial districts, and *Galekaland* Under Act 3, of 1885, and Proclamation No. 140, of Aug. 26, 1885, *Tembuland* (seven magisterial districts), comprising Tembuland proper Emigrant Tembuland, and *Bonvana Land*, was annexed to the Colony. The Territory of the *Port of St. John's*, which was purchased in 187 from the Pondo Chief Nquiliso, was annexed 1 September, 1884. On the West Coast, the Territory of *Walfish Bay* was annexed to the Colony by Proclamation dated 7th August, 1884. On January 6, 1885, the High Commissioner announced that H. M. Govt. would exercise a Protectorate over the whole coast of Pondoland.

BASUTOLAND (estimated area, 10,229 square miles), a strip of territory lying between Cape Colony on the south and the Orange Free State and Natal on the north and east, has recently been taken directly under British rule by request of the native tribes; and is now governed by a Resident Commissioner, acting under the direction of Her Majesty's High Commissioner for South Africa.

Generally speaking the eastern and southern portions of Cape Colony receive an abundant water supply, are well wooded, and extreme

productive. The colonists at the Cape are chiefly employed in the production of wool and wine, in the rearing of horses, sheep, cattle, and ostriches, and the culture of wheat, barley, oats, &c. Ostrich-breeding is now carried on with good results. In 1886, 47,454,153 lb. (total value, £1,590,432) of wool were exported, against 37,283,291 lb. in 1870, and 23,172,785 in 1860; 288,568 lb. of ostrich feathers (total value, £546,230), compared with 28,768 lb. in 1870, and 2,287 in 1860; 5,421,006 lb. of Angora hair, against 403,153 in 1870, and 385 lb. in 1860. The colony is rich in minerals, principally coal, copper, diamonds, and manganese, the last named being found chiefly in the Paari Division, and the copper in Namaqualand. Gold mining is carried on in the Kuyssna division. The copper ores are of the richest kind, and yield a percentage from 32 to 35: the exports in 1886 amounted to 28,429 tons, value £405,475, against 7,300 tons in 1870. The copper mines are connected with Port Nolloth by a private railway 93 miles long. Coal is also raised of considerable value, the present annual produce being about 25,000 tons. The most valuable articles of export are diamonds, which are chiefly found in the district of Kimberley, of which the declared value of exports in 1883 was £2,742,470, £8,807,329 in 1884, £2,492,755 in 1885, and £3,504,756 in 1886.

The railways of the colony are the property of the Government. The lines now open for traffic represent an aggregate length of 1,599 miles. To the 31st Dec., 1886, the capital invested was £14,130,616, in which amount is included the money expended upon the Kimberley line. The returns for 1886 show a profit of £2 16s. 11d. per cent. per annum on the capital expended; and the number of passengers carried in 1886 was 2,237,464, while the goods carried in the same year amounted to 312,644 tons. In addition to the mileage already mentioned, a line 43 miles in length, connecting Port Alfred and Grahamstown, has been constructed by a private company, and one of 42 miles between Worcester and Montagu by the Cape Central Railways Co. The rails throughout are laid on the 3 feet 6 in. gauge. There are 4,329 miles of telegraph open, carrying 8,981 miles of telegraph wire. In 1886 the number of messages was 770,500; the revenue showed a profit of £29,695. The Colonial Forces in December, 1886, consisted of Cape Mounted Riflemen (835 officers and men); and horse and foot volunteers (4,345 officers and men). The external trade of the colony is very considerable, and is carried on chiefly in British and Colonial vessels, as is shown by the following figures of total tonnage for the year 1886:—*Inwards*, British and Colonial, 2,636,852; foreign, 85,983. *Outwards*, British and Colonial, 2,641,967; foreign, 82,415. The colony unfortunately is destitute of natural harbours, with the exception of Saldanha Bay, and to supply this deficiency large sums of money, amounting in the aggregate to more than £2,145,000, have been spent in executing protective works on a massive scale. The leading seaports are Capetown, Port Elizabeth, East London, Port Alfred, Mossel Bay, Port Nolloth, Simon's Town, Knysna, Plettenbergs Bay, and Port St. John's.

Total imports, 1886 (including specie)	£3,799,261
Total exports, 1886	7,125,356
Imports from United Kingdom, 1886	3,089,737
Exports to ditto, 1886	6,694,735
Actual revenue, 1885-86	3,039,280
Total revenue, 1885-86	3,229,042

Ordinary expenditure, 1885-86 (votes) £3,384,207
 Total expenditure, 1885-86 3,788,691
 Public debt, Dec. 31, 1886—General government, £21,171,854; Corporate bodies, £1,289,439.

The Revenue for the financial year 1886-87 is £3,158,831 (unaudited figures), and the estimate of Revenue for year ending June 30, 1888, is £3,186,000. The sum total of the estimates of expenditure for 1887-88 stands at £3,194,766.

The Government is Parliamentary or "Responsible." There is a Governor (who is also Commander-in-chief), a Legislative Council of 22 elected members, and a House of Assembly of 74 elected members; and the Executive consists of the Colonial Secretary, the Secretary for Native Affairs, the Commissioner of Public Works, the Treasurer-General (who is also premier), and the Attorney-General. On the 15th of October, 1880, by the annexation of the province of Griqualand West (extreme limits, 27° 40'—29° 35' S. lat. and 22° 35'—25° 30' E. long.) four fiscal divisions were added to Cape Colony proper, which is now subdivided into 67 fiscal divisions, or 72 magisterial districts.

CAPITAL, Capetown. Pop., 1875, 33,239; suburbs, 12,001; Grahamstown, (about) 7,000; Port Elizabeth, 13,049; Kimberley, (about) 14,000.

NATAL.

The colony of Natal derives its name from the fact of its discovery by the celebrated Portuguese navigator, Vasco de Gama, on Christmas Day, 1497. Towards the close of the year 1837 a large body of Dutch Boers from the Cape Colony, taking offence at the restrictions placed on them by the British Government, migrated to Natal; but the Governor of the Cape took military possession of the district, and in 1843 the district of Natal was proclaimed a British colony. In 1856 it was erected into a distinct and separate colony, free from the control of the Governor of the Cape. It lies on the south-east coast of Africa, about 800 miles from the Cape of Good Hope, between $27^{\circ} 15' - 31^{\circ} 5' S.$ lat. and $29^{\circ} - 31^{\circ} 30' E.$ long., the Drakensberg Mountains forming its western boundary, separating it from the territory of the Cape Colony and the Orange River Free State. It comprises an area of about 19,000 square miles, with a seaboard of 180 miles. The population at the end of 1884 was estimated at 424,495, consisting of Europeans, 35,453; natives (Zulu-Kafirs), 361,766; Indian Coolies, 27,276. The scenery in Natal is in parts picturesque in the extreme; it is well watered, no less than 23 distinct rivers running through into the Indian Ocean, but not one of them is navigable. It has only one harbour on its coast, Durban, or Port Natal, which is completely landlocked, but a bar prevents vessels above a certain tonnage from entering. In spite of this drawback the shipping reaches a moderate amount, the returns for 1885 showing that 154 steam vessels (tonnage, 164,697), 152 sailing vessels (tonnage, 45,024), and 6 men-of-war (tonnage, 12,703) entered the harbour during the year. The coast region, extending about 15 miles inland, is highly fertile, and has a climate almost tropical, though perfectly healthy. Sugar, coffee, indigo, arrowroot, ginger, tobacco, rice, pepper, and cotton thrive amazingly, and the pineapple ripens in the open air. The midland district is more adapted for cereals and other European crops, while the upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The live stock of Natal now (1886) includes 575,678 oxen, 43,431 horses, and 522,233 merino sheep. The chief mineral products are coal and lime. Large forests of valuable timber abound in the kloofs of all the mountain ranges, and many tracts along the coast are also well wooded. The chief exports are wool, sugar, ivory, hides, maize, angora hair, and ostrich feathers, and the several values of the quantities exported for the year 1885 were as follows:—£472,142, £144,463, £4,100, £90,571, £14,736 (including various grains), £13,542, £7,620.

The Government consists of a Governor, aided by an Executive Council and a Legislative Council of thirty members, twenty-three of them being elected by the colonists, five are ex-officio members, and two are nominated by the Government.

PIETERMARITZBURG, the capital and seat of government, is situated about 50 miles inland from Port Natal. Population, 14,489.

WEST AFRICAN SETTLEMENTS.

These now consist of Sierra Leone and the settlements on the Gambia.

SIERRA LEONE.—This settlement comprises the peninsula of Sierra Leone (Lion Mountain), ceded to Great Britain in 1787 by the native chiefs; Sherbro Island, acquired in 1862, with some contiguous tracts, and a further accession of territory on the sea-coast acquired in 1882-83, extending to and including Mannah, which adjoins the negro Republic of Liberia and the Isles de Los; the whole situated between $7^{\circ} 20' - 8^{\circ} 40' N.$ lat. and $12^{\circ} 20' - 13^{\circ} 20' W.$ long., with a population, in 1881, of 60,546, of whom but 163 were resident whites, while liberated Africans and their descendants are computed to number 35,400. The inland boundaries of the colony have never been surveyed, hence it is difficult to form any accurate idea of the area, but it is estimated that no less than 3,000 sq. miles are now under British jurisdiction. The climate is humid and enervating to Europeans, and is the cause of periodical epidemics, the season from May to November being the most sickly. Tropical fruits and plants grow luxuriantly; coffee and cocoa have been introduced by the British. The exports consist chiefly of benni-seed, cocoa-nuts, ginger, ground-nuts, india-rubber, gum-copal, hides, palm-oil, palm-kernels, beeswax, and colanuts. The imports are chiefly ale and porter; apparel, including boots, shoes, and hats; beads, flour, and biscuits; cotton and woollen goods; cutlery, earthenware, and glassware; gunpowder and guns; haberdashery, hardware, lumber, provisions; spirits, chiefly rum and gin; tobacco and wine. The taxation consists of specific duties on wine, spirits, ale, and porter; tobacco, gunpowder, guns, and kerosine oil, and an export duty on ground-nuts, palm-oil, hides, and gum. At the date of last advices from the Colony great changes were in contemplation, viz., the entire abolition of export duties, and the imposition of an *ad valorem* duty of 5 per cent. on imports other than specific. The revenue of Sierra Leone may be said to average £65,000 annually, and is obtained principally from customs' duties; the shipping too is considerable, the total tonnage entered and cleared in 1886 being 435,070.

Amount of public revenue, 1886	£62,935
Amount of public expenditure, 1886	63,484
Public debt, 31st Dec., 1886	58,000
Total imports (settlements), 1886.....	264,859
Total exports, 1886.....	325,352

Freetown, the capital of Sierra Leone, is the seat of government, and had, in 1881, a population of 22,000. The Governor is aided by Executive and Legislative Councils, the latter consisting of 4 official and 4 non-official members.

Governor, Sir Samuel Rowe, K.C.M.G.	£3,500
(Including personal allowance of £1,000)	
Col. Sec. & Treas., Hon. T. Risely Griffith, (and residence).....	800
First Assistant ditto, Major A. M. Festing	400
Second ditto, Capt. A. North Daniel ..	
Third ditto, C. Burney Mitford.....	
Chief Justice, Hon. W. H. Quayle Jones ..	1,200
Queen's Advocate, Legal Adviser, & Registrar-Gen., Hon. J. Kennedy Donaldson	750

Police Magistrate, Edwin Adolphus	500
Collector of Customs, M. V. D. Stuart	500
Com. Royal Engineers, Capt. H. B. Mackay	

Freetown, 3,078 miles from Liverpool; transit, 15 days. Postage, 4d.; news, 1d.; books, 2 oz. 1d.

GAMBIA.—The settlement on the River Gambia, founded in 1588, now consists of the Island of St. Mary, British Combo, Albrede, The Ceded Mile, and McCarthy's Island. It contains an area of 69 sq. miles, and a population, in 1881, of 14,150 (including 7,215 males and 6,935 females), of whom only 40 were white. The climate is unhealthy during five months of the year, viz., from July to November, the principal diseases being malarial fevers, chiefly intermittent fever. The chief exports are beeswax, rubber, hides, and ground-nuts, the latter forming more than nine-tenths of the total exports. Rice, cotton, maize, and a kind of millet called *koua*, are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The chief imports are spirits, wines, sugar, guns, gunpowder, and cotton goods. Rice is also imported very largely. There is an armed police force in the settlement (numbering about 100 men), which performs both civil and military duties. The principal station, Bathurst, is on the Island of St. Mary, at the mouth of the river. The Gambia River falls into the Atlantic Ocean by a large estuary, measuring, in some parts, nearly 27 miles across, but contracting to little more than two miles between Barrapoint and Bathurst Town. The annual value of the exports is reckoned at £200,000, of which nearly three-fourths is obtained for the ground-nuts, which are used for food in the colony, and sent abroad for the sake of the oil they contain.

The Government is vested in an Administrator (subordinate to the Governor of the West African Settlements), assisted by a Legislative Council. [In consequence of the continued decline of the revenue, considerable deductions in the official expenditure are contemplated.]

Amount of public revenue in 1886	£14,233
Amount of public expenditure, 1886.....	23,353
Total imports, 1886, £79,516; exports, £69,509.	
Administrator, Hon. Jas. Shaw Hay, C.M.G.	£1,300
Treasurer and Postmaster, G. T. Carter ..	700
Chief Magistrate, J. R. Maxwell, B.L.	600
Government Sec., Capt. W. R. Higginson ..	400
Collector of Customs, Colin G. Blackburn..	400
Colonial Surveyor, T. H. Spilsbury	400

GOLD COAST COLONY.

This colony comprises the coast of the Gulf of Guinea from 2° 40' W. to 1° 10' E. of Greenwich, extending inland to an average distance of 50 miles, calculated to include an area of 16,620 sq. miles, and a population of over 520,000. It was formerly possessed by the Dutch as well as the British; but on 6 April, 1872, all the forts and settlements belonging to the Netherlands Government were transferred to Great Britain. In 1672 the Royal African Company, which built forts at Dixcove, Secondee, Commendah, Anamaboe, Winnebah, and Accra, was formed, succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlement was in 1821 transferred to the Crown, and placed under the Government of Sierra Leone, from which it was separated on 24 July, 1874, under the title of Gold Coast Colony (including Lagos). The produce of the Gold Coast is chiefly sent to Great Britain. Gold, one of the chief exports, is found in small grains, mixed with red loam, gravel, and sometimes in quartz. Ivory, gum copal, monkey-skins, palm kernels, cotton, camwood, Guinea grains, and oil, are exported to England. This coast is of all others the region of the oil-palm, where it grows in great profusion. A very promising trade has been recently developed in rubber, the quantity shipped in 1882 being 64 cwt., in 1883, 414 cwt.; and in 1884 1,552 cwt. (value, £13,139). The chief forts and settlements are Cape Coast Castle, Elmina, the former capital of the Dutch possessions, Accra, Secondee, Winnebah, Addah, Quittah, Axim, and Dixcove.

LAGOS,

an Island and port on the Slave Coast, embracing also the north coast of the Gulf of Guinea, between 2° 50' and 4° 30' E. long. The permanent occupation of this territory being deemed absolutely necessary for the complete suppression of the slave-trade in the Bight of Benin, and for the protection and development of its important trade (of which the town of Lagos was the seat), the treaty ceding the island to Her Majesty was, on the 6th August, 1861, signed by Docemo, the native reigning king, whereby Lagos and its dependencies, Badagry, &c., became British territory. The chief native industries are cloths, embroidered robes, grass cloths and mats, basket-work, bamboo and other kinds of furniture; while the natural products of the colony are pepper, seeds, lentils, nuts, oil, cotton, and silk. Palm-kernels, £221,634 in 1881,

and palm-oil, £147,422, are the chief exports. Lagos has, within the present year, been separated from the Gold Coast, and received a constitution of its own, the new colony including Lagos Island in the centre, Badagry in the west, and Palma and Leckie to the east. The Government is vested in an Administrator (subordinate to the Governor of the Gold Coast Colony), aided by a Legislative Council. Population in 1821, 75,270, of whom 94 only were whites.

Amount of public revenue, 1883 £50,558
 Amount of expenditure, 1883 37,879
 Imports, 1885, £542,564; exports 614,181
Lt.-Gov., Cornelius A. Moloney, C.M.G. . . . £1,700
Colonial Secretary, Frederick Evans, C.M.G. 700

Postage, same as Gold Coast.

MAURITIUS,

an island lying in the Indian Ocean, east of Madagascar, between 57° 17'—57° 46' E. long. and S. lat. 19° 58'—20° 32', comprising an area of 708 square miles, without the Seychelles group, Rodrigues, Diego Garcia, and a number of other small dependencies, about 70 in number, having a superficies of 350 square miles. The resident population on 31st December, 1884, was 370,766, of whom 253,730 were Indians (the majority originally Coolies imported for working the sugar estates), and about 16,000 in dependent islands.

Mauritius was discovered in 1507 by the Portuguese, who held possession during the whole of that century. The Dutch, who were the first that made any settlement there, in 1598 named the island Mauritius, in honour of their prince, Maurice. In 1710 it was abandoned by them, but in 1715 was taken possession of by the French; it was captured in 1810, and has since remained a British possession. Port Louis, the capital, has a spacious harbour. The island produces sugar, rum, vanilla, and aloë fibre. The imports consist mainly of rice, grain, iron, wine, lead, and cotton manufactures for the Coolies, with general articles for the remainder of the population, including oxen from Madagascar, and sheep from South Africa and Australia. In 1884 there were 50 post-offices in the island, with 92 miles of railway and 92 miles of telegraph. The annual trade of the island passes almost entirely through Port Louis, and is estimated at about £6,000,000 sterling.

CAPITAL, Port Louis. Population, 64,344.
 Public revenue in 1885 £730,923
 Public expenditure in 1885 839,105
 The total public debt, Government, Poor Law, and Municipal, in 1884 906,278
 Paper money in circulation, 1884 .. Rs. 3,375,111
 Imports from United Kingdom, 1885 .. £293,781
 Exports to United Kingdom, 1885 .. 307,364

The Government is administered by a Governor, aided by an Executive Council of five officials, and a Legislative Council of twenty-seven members, eight ex-officio, nine nominated by the governor, and ten elected for the various districts into which the island is divided.

Gov. and Com.-in-Chief, Sir John Pope HENNESSY, K.C.M.G. Rs. 60,000
Colonial Sec., Francis FLEMING, C.M.G. 13,500
Com. of the Forces, Col. T. E. A. HALL .. 12,000
Receiver-General, H. N. D. BEYTS, C.M.G. 12,000
Auditor-General, Thomas ELLIOTT 9,000

Protector of Emigrants, J. TROTTER 10,000
Chief Judge, Hon. Sir Eug. P. J. LÉCLÉZIO 17,500
Puisne Judges, Hons. A. MURE, F. C. WILLIAMS, and John ROUILLARD .. each 12,000
Procureur and Advocate-General, Louis ROMILLARD 13,500

The SEYCHELLES ISLANDS, 940 miles due north from Mauritius, and RODRIGUES, 300 miles almost due east, are administered by Commissioners under the control of the Governor of Mauritius. They are extremely fertile, and abound in natural beauty. Originally discovered by the Portuguese, they afterwards fell into the hands of the French, and finally, in 1814, were ceded to Great Britain. The principal exports from these islands are cocoa-nut oil, cocoa-nuts, Indian corn, cacao, and vacoa bags. The chief town of the Seychelles is Victoria, with a good harbour, situated in the north-east of Mahé, the largest island of the group. The population in 1831 was 14,081.

Chief Civil Comm., A. C. S. BARKLY .. Rs. 8,000
Collector of Dues and Taxes, G. A. BANBURY 3,000
District Judge, R. M. BROWN 5,000
 (And 1,000 Rs. house allowance.)

British Possessions in the Southern Atlantic.

ASCENSION,

an isolated island in the South Atlantic (3,417 m. from Plymouth, 760 from St. Helena, and 900 m. from Cape Palmas on the African coast), is of volcanic origin, one peak rising to the height of 2,870 feet, situated 7° 55' 55" S. lat. and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named Gallego, on Ascension Day, 1501—hence its name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with a circumference of 22 m., and an area of about 38 square miles, and being within the immediate influence of the S.E. trade winds, its climate is dry and salubrious. It remained uninhabited till 1815, when the English took possession of it. It now possesses a steam factory, naval and victualling yards, and a coaling dépôt. There are also

excellent hospitals. Rabbits and goats abound, and a few pheasants, guinea-fowls, and partridges afford some sport. The island is visited by the sea-turtle from January to May to lay their eggs in the sand; as many as fifty or even sixty are then often "turned" in one night, and taken to ponds in the town. They weigh about 700 lbs. each, and are sold at an average price of £2 15s. In 1884 there were about 5 acres of ground under cultivation, which produced 14,000 lbs. of vegetables. It is in the charge of the Board of Admiralty, by whom a naval officer is appointed as Capt. in charge, whose rule is as absolute as if on board a man-of-war. In October, 1887, the inhabitants consisted of officers, seamen, marines, and Kroomen. There are now only 140 people on the island. The

chief exports are turtles and birds' eggs. The imports from the United Kingdom in 1885 were £2,232, and the exports to the United Kingdom £3,000. Georgetown is the only station, and is situated in a small bay on the N.W. coast, with a fort to protect the stores and tanks.

Officer in Charge, Capt. Richd. H. Napier, R.N. £600
Fleet Paymaster, J. Burney, R.N.

Transit, 24 days. Postage, 6d.; newspapers, 1d.; parcels, per lb. 10d.

TRISTAN D'ACUNHA

is the chief of a group of islands lying in lat. 37° 6' S. and long. 12° 2' W. These islands are of volcanic origin, and were discovered in 1506 by a Portuguese admiral, after whom they are named. The climate is mild and moist, but remarkably healthy, the mean temperature of the coast ranging from 43° to 82°. The population of the group in 1883 numbered 93; and they were well supplied, having a large number of sheep and cattle, and an abundance of potatoes. Mackerel, salmon, and mullet are caught off the rocky shores, and the ocean round is frequented by whales.

INACCESSIBLE ISLAND is a lofty mass of rock with a square table-land for a summit, and with sides 2 m. in length. The highest point, in the west of the island, is 1,840 feet high, and the island generally is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long, and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. These islands are visited by large numbers of seals and sea-elephants.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'—53° S. lat. and 57° 40'—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1886 of 1,800. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they have since 1771 formed part of the British Empire. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonized, and from that time to the present have so continued, being, as a whole, the most southerly organized colonies of the British Empire. The climate, though somewhat bleak, is usually considered healthy; and the temperature is on the whole equable, the thermometer ranging in winter from 30° to 50°, and in summer from 40° to 65°. The islands are chiefly pasture-land, and kitchen-gardens occupy the only cultivated part, the population being mainly of the sheep farming and seafaring industries. In 1884 the live-stock was estimated at 2,770 horses, 11,569 horned cattle, 473,227 sheep, and 1,002 goats. The exports consist chiefly of wool, tallow, and frozen mutton. In 1886, wool £72,998; tallow £3,640;

and frozen mutton £15,670. The total tonnage of vessels entered for the same period was 33,086, and of those cleared 31,421. There are three elementary schools, attended by 155 scholars, and three places of worship (one Church of England, one Roman Catholic, and one Presbyterian). The only important settlement is Port Stanley, a free port at the head of Port William, on the coast of East Falkland.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, and several other small uninhabited islands are comprised within this colony.

Amount of public revenue, 1886	£9,295

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 760 miles from the nearest land—Isle of Ascension—and 1,200 from the nearest point of the African Continent, in 15° 55' S. lat. and 5° 42' W. long.; it is 10½ miles long and 6½ broad, and encloses an area of 47 square miles, with a population in 1881 of 5,059, including 2,617 males and 2,442 females. It is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with numerous ravines, the scenery being most picturesque. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable; and varieties of climate may be obtained from a minimum of 74° at Longwood, 1,780 feet above the sea, to 82° on the sea-coast. The lowest temperature in winter is 57°. The lowest annual rainfall between 1841 and 1848 was 19½ inches (1845); the greatest was 90¼ inches (1842). St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21st May, 1501 (St. Helena's Day), and remained unknown to other European nations until 1588, when it was sighted by Capt. Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch became possessors of it; in 1673 it was taken from the Dutch by Capt. Munden, of the English Navy, and soon afterwards the East India Company obtained a charter for its possession from Charles II., which they held until 1833 (with the exception of the period 1815 to 1821, the British Government requiring it as a residence for Napoleon Bonaparte, who died there 5th May, 1821), when it was ceded by them

to the British Government. The prosperity of the island received a fatal blow by the cutting of the Suez Canal, and is now frequented only by ships on their homeward voyage from the East Indies for fresh provisions and water, which constitute, in fact, the chief trade of the island. Its strategical importance for the protection of British commerce is now recognized, and its geographical formation makes it a natural stronghold. There is one good inlet only, on the north-west of the island—St. James's Bay—possessing a good harbour, where the chief town and seat of government (Jamestown, pop. 2,500) is built. Oats, barley, root-crops, and flax are grown; and the live-stock returns for 1884 showed that the island possessed 1,444 horned cattle, 4,165 sheep, 202 horses, and 1,500 goats. Of export trade in the ordinary sense there is none; but a recent report to the Colonial Office expresses the opinion that the fisheries might be better worked with great advantage, and that productive industries might be obtained by the introduction of the English aloe, New Zealand flax, Barbados aloe, tobacco, vanilla, and Guinea grass, besides various fruits, such as the Spanish olive and the pineapple.

Amount of public revenue, 1886	£10,186
Amount of expenditure, 1886	11,209

British Possessions in Europe.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily, and about 180 miles from Africa, about 17 miles in length and 9 in breadth, comprising, with Gozo and Comino, adjoining islands, an area of 122 square miles. It possesses one of the finest harbours in the world, with such an even depth that the largest vessels may anchor alongside the very shore, forming an admirable station for a fleet. Malta was taken possession of by Great Britain in 1800, and finally annexed by the Treaty of Paris, 1814. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet. The climate is hot in the daytime, but well tempered by the cool sea-breezes of night. During the three coldest months (Dec., Jan., Feb.) of the year the minimum temperature is 53°, and the maximum temperature is 61° F., while the hottest season (June—September) shows a minimum of 73° and a maximum of 82° 5'. The island is highly cultivated; its principal products are cotton, corn, oranges, melons, and potatoes. The vine is grown largely for the table only, and figs and honey of good quality are plentiful. It was estimated that in 1884 the acreage in the three islands under crops was 49,376, distributed as follows:—Gardens, 11,174 acres; wheat, 9,793; barley, 2,910; beans and other pulse, 2,748; cotton, 3,847; sesamum, 446; cumina-seeds, 1,642; pasture-land, 3,255; forage, 8,341. In 1884 the port of Valetta was entered by 5,381 vessels (tonnage, 4,517,498), while the vessels clearing from the same port numbered 5,388 (tonnage, 4,518,819). A large quantity of live-stock, about 30,000 head, including 5,329 horses, mules and asses, 8,110 horned cattle, 11,150 sheep, and 6,007 goats, are also maintained on the island. Medina, the former capital of the island, now known as Citta Vecchia, is a handsome old town, and contains

the ancient palace of the courts of justice, the Cathedral, and the Seminary; its rival and successor is Valetta, an important naval station, strongly fortified. The population of Malta, 31 Dec., 1885, was 157,134, exclusive of the British troops and their families, numbering 5,507 in November, 1885. There is a native order of Nobility consisting of 31 families, but the members enjoy no special privileges beyond that of precedence and certain nominal rights amongst their own body.

Amount of public revenue, 1885	£213,371
Amount of expenditure, 1885	226,345
Imports from United Kingdom, 1885 ..	117,333
Exports to United Kingdom, 1885	8,295

The Government is administered by a Governor, who is assisted by an Executive Council consisting of 6 members, and by a Council of Government—9 official and 8 elected members. The Governor is President in both. Malta is well provided with an educational system; in addition to the university and lyceum at Valetta, it has four infant schools, forty primary schools, and two secondary schools, to all of which the government grants, amounting in 1884 to £15,895, are given. The total number of scholars for the same year amounted to 9,294. There are also 112 private schools, attended by 2,913 scholars.

Malta is 2,280 miles by sea, and *via* Naples about 1,995; transit, 4 days. Postage, $2\frac{1}{2}d.$; newspapers and books, 2 oz. $\frac{1}{2}d.$; parcels, 1 lb. $8d.$, extra, $6d.$; telegrams per word, $7d.$

GIBRALTAR,

a rocky promontory, 3 miles in length and $\frac{3}{4}$ of a mile in extreme breadth, and greatest elevation 1,439 feet, near the southern extremity of Spain, at the entrance to the Mediterranean Sea, opposite to the Coast of Africa, the nearest point of which is 14 miles distant. It is everywhere fortified by works of great strength and extent, connected on the north by a low isthmus with Andalusia, in $36^{\circ} 8' N.$ lat. and $5^{\circ} 21' W.$ long. Five and a half miles distant across the sea is the Spanish town of Algeiras, between which and Gibraltar lies the Bay of Gibraltar, called also the Bay of Algeiras, which is about 8 miles long by 5 broad, with a depth in the centre of upwards of 100 fathoms. Gibraltar was captured in 1704 by a combined Dutch and English force, under Sir George Rooke, after a vigorous bombardment, and ceded by the Treaty of Utrecht, 1713, and since that time it has remained continuously in possession of the British, notwithstanding desperate efforts on the part of France and Spain to dislodge them. Gibraltar is a free port, and stands at the foot of the promontory on the N.W. side: it enjoys the advantages of an extensive shipping trade. During the year 1886 no less than 5,581 vessels entered, with a tonnage of 4,309,583, while the number of those which cleared was 5,533 (tonnage 4,300,147). The chief sources of revenue are the port dues, the rent of the crown estate in the town, and duties on wine, spirits, and beer.

Total population in 1886 (including 5,758 military), 24,139.

Amount of public revenue, 1886.....	£52,123

HELIGOLAND (HOLY LAND),

a small island in the North Sea, captured from Denmark in 1807, situate opposite to; and about 25 miles from the mouths of the Elbe, the Eider, the Wesser, and the Jahde, in $7^{\circ} 51' E.$ long. and $54^{\circ} 11' N.$ lat. Including Sandy Island it is

about two and two-thirds of a mile in circumference, and has an area of about three-fourths of a square mile, with a population in 1881 of 2,001. In consequence of its salubrious climate and unrivalled sea bathing it is much resorted to as a bathing-place by German and other visitors, sometimes to the number of 15,000 in the season. It is a coast-guard and rocket station. The inhabitants, who live by fishing and letting lodgings, have an unwritten language of their own, which linguists say is undoubtedly Anglo-Saxon. Lobsters to the number of nearly 30,000 are gathered annually on the rocks between June 15 and September 15: they are stored in boxes for local use, or are sent to the continent, where the average price per lb. varies from $7\frac{1}{2}d.$ to $1s. 6d.$ The average annual yield of the fisheries is about £7,000; there is also a trade in the skins of wild birds shot around the island. The vital statistics of Heligoland are marvellous, the average life of the inhabitants is stated to be over 63 years.

THE CHANNEL ISLANDS,

comprising the bailiwicks of Jersey and Guernsey (in the latter of which are comprehended the small islands of Alderney, Sark, and Herm, situated off the north-west coast of France, at distances of from ten to thirty miles), though not colonial possessions, are nevertheless dependencies of the British Crown. They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles; and the population in 1881 was 88,806. The land under cultivation in Jersey amounts to 20,000 acres, under about 2,500 proprietors, and more than 700 varieties of flowering plants and ferns, including many species not to be found among British flora, may be obtained there. Though belonging to the British Crown, the islands have a certain independent status. The principal officer is the Lieut.-Governor, who represents Her Majesty. French is the official language of the local legislature, called the *States*, and of the Royal Court, but the old Norman dialect is still spoken by the people. The chief civil officer is the Bailiff, who presides over the *States* and over the Royal Court: he is appointed by the Crown. The royal court is the judicial body, and is composed of twelve jurats elected by the people. It is divided into two tribunals, known as Le Nombre Inférieur, and Le Nombre Supérieur or the Court of Appeal. The *States* consist of fifty members (excluding the president), viz., the twelve jurats, twelve rectors, twelve constables, and fourteen deputies, three for St. Helier's, and one for each of the eleven country parishes. The climate of these islands is mild, and the soil exceptionally productive. An abundance of apples are grown for making cider, and the famous Alderney breed of cows has earned a well-deserved celebrity. The fisheries of Jersey are of considerable value, and include lobster, cod, and oysters.

The islands being all but exempt from taxation, they possess a very large trade. The chief town of Jersey is St. Helier's, on the south side; the principal town of Guernsey is St. Pierre, on the east coast.

Imports from United Kingdom, 1886 .. £677,025
Exports to United Kingdom, 1886. 911,570

JERSEY.—*Lieut.-Gov.*, Lieut.-General C. Brisbane Ewart, C.B., R.E. £1,700
Government Secretary, Lt.-Col. J. F. Murray.

Dean, Very Rev. Carey Brock, M.A.
Attorney-General, Thomas G. Carey.
Solicitor-General, Edward C. Ozanne.
Receiver-General, Julius A. Carey.

ISLE OF MAN (MONA),

an island of Great Britain, in the Irish Sea, in lat. 54° 3'—54° 25' N. and long. 5° 18'—4° 47' W., nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 180,000 acres, with a population of 54,089. Curiously enough, the history of the island is intimately linked with that of the Hebrides and the kingdoms of Scotland and Norway. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition, conquered the Orkneys and the Shetlands, the Western Isles, and Man, and added them to the kingdom

already beneath his sway. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the Battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family, by whom and by their successors, the Dukes of Athole, it was held until 1765, when parliament purchased the sovereign rights of the duke for £70,000. Additional arrangements were made some sixty years afterwards, since which year Great Britain has enjoyed all sovereign rights and privileges on the island. In 1827 the Crown purchased from the then duke his landed estates and other rights in the island, including ecclesiastical patronage, for the sum of £417,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx: it is still spoken on the island, and all laws are promulgated in that tongue. It has a printed grammar, a translation of the Bible, and a few other books; but its literature is very meagre.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. CAPITAL, Castletown, pop. 2,243; but the chief town is Douglas, pop. 15,719; the other towns are Peel and Ramsey.

Public revenue, 1886-87 £53,482
Public expenditure, 1886-87 49,747
Island debt, 1887 220,100
Lieut.-Gov., Spencer Walpole (with house) £1,800
Attorney-General, Sir James Gell, Knt. 1,000
Clerk of the Rolls, A. Dumbell 1,000
First Deemster, Sir W. L. Drinkwater, Kt. 1,000
Second Deemster, John Fred. Gill 1,000

Regulations respecting Passports.

APPLICATIONS for Foreign Office Passports must be made in writing, and enclosed in a cover addressed to "The Chief Clerk, Foreign Office, London," with the word "PASSPORT" conspicuously written on the cover. The rules are numerous and stringent, too long for insertion in the Almanack. The easiest mode of obtaining a passport is through a banker to whom the applicant is known; he can obtain it without much trouble or inconvenience. The following particulars may be of service to British born subjects:—

The charge is 2s., whatever number of persons may be included.

Passports are issued at the Foreign Office between the hours of 11 and 4 on the day following that on which the application for the passport has been received at the Foreign Office.

The bearer of every passport granted by the Foreign Office should sign his passport as soon as he receives it; without such signature either the *visa* may be refused, or the validity of the passport questioned abroad. Travellers who may have an intention of visiting the Russian Empire at any time in the course of their travels, are particularly and earnestly advised

not to quit England without having had their passports *visés* at the Russian Consulate in London, 17, Great Winchester Street, E.C. Persons proceeding to Cuba, Portugal, or Turkey, should also have their passports *visés* at the Spanish Consulate, 21, Billiter Street, E.C.; at the Portuguese Consulate, 8, St. Mary Axe; and at the Consulate-General of the Sublime Porte, 42, Old Broad Street, E.C., respectively. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country resident in the United Kingdom.

Although British subjects are now free to enter Belgium, France, Germany, Holland, Italy, Denmark, Sweden, and Norway without passports, and the rules about passports have been virtually relaxed in other countries, nevertheless, British subjects about to visit the Continent are recommended not to omit to provide themselves with passports, for even in those countries where they are no longer obligatory, they are found to be convenient, as offering a ready means of identification, and more particularly when letters have to be claimed at a *poste restante*.

Foreign Countries, chiefly those with which this Nation holds intercourse by means of Ambassadors or Consuls; giving the Name of the Sovereign or Ruler of each, with Statistics of the Area, Population, Products, and Commerce; distinguishing the Amount of Trade with this Country, Names of English Ambassadors, Ministers, and Consuls, with their Salaries, also of Foreign Ambassadors and Consuls resident in London.*

To many countries their distance from England is given, and to nearly all the time occupied in transit, the rates of Postage, and cost of Telegrams.

Many of the following Statistics have been revised specially for this Almanack by direction of the various Governments. The Editor is also indebted to some English Residents at Foreign Courts, but more especially to the British Consuls; he has also to thank several of the Foreign Ministers and Consuls in London for many particulars. Considerable use also has been made of that excellent mine of information, "The Foreign Office List," edited by Sir Edward Hertelet, c.b., published by Messrs. Harrison, of Pall Mall.

ABYSSINIA.

Ruler, Johannes II. (Kassa), crowned 1872.

A country of N. Africa, situated on the highlands S.W. of the Red Sea, between $8^{\circ} 20'$ — $16^{\circ} 20'$ N. latitude and $25^{\circ} 30'$ — $40^{\circ} 30'$ E. longitude, containing the sources and upper portions of the Blue Nile and Atbara rivers. Area, 120,000 square miles. It consists of a series of plateaux, with an average elevation of 5,000 to 8,000 feet, from the surface of which rise mountain groups and ranges, the loftiest point attaining an altitude of 15,200 feet. The exports consist of ivory, gold-dust, musk, and coffee. After the death of King Theodore, 13th April, 1868, the country broke up into various petty States, the chief of which are Tigre, Amhara, and Shoa, but the present Emperor has again brought them under his rule. The population numbers about 3,000,000. Harar, after its evacuation by England in 1836, was occupied by King Menelik, of Shoa.

British Agent (special), Gerald H. Portal.

Postage, 5d.; newspapers and books, 2 oz. $1\frac{1}{2}$ d.

AFGHANISTAN.

Amir, Abdur Rahman Khan, G.C.S.I., 1880.

A country on the north-west frontier of India, between the parallels of 61° — 71° E. longitude and 27° — 35° N. latitude, bounded on the west and south by Persia and Baluchistan, and extending northwards beyond the Hindu Kush mountains to the Oxus, and to a boundary extending thence to the Heri Rud, which was laid down by an Anglo-Russian Commission in 1886. The country is generally rugged and mountainous, the elevation being, with few exceptions, more than 4,000 feet above the sea. Among its mountains are the great passes, notably the Khiber, by which India has from time to time been invaded; and to this fact is due the chief importance of Afghanistan. In the 11th and 13th centuries the Afghan empires of the Sultans of Ghazni and Ghor, and in the last century that of Ahmed Shah, extended over the Punjab. In 1838 the country was occupied by British troops, but three years later a national revolt broke out at Cabul, which resulted in the destruction of an English army, and the abandonment of the country to its native

* In this year's Almanack one uniform plan has been adopted with regard to the salaries and payments to members of the consular service; the amount named is the total sum paid, and includes the allowance for salary, office rent, clerks, and expenses of every description; in some instances the officers possess an amount to nearly one-third of the whole payment.

rulers. A second invasion by the English in 1879 led to the temporary occupation of Cabul and Candahar, and to the annexation to the Indian Empire of the chief passes between Afghanistan and India. In the cultivable parts of the country there are generally two crops in the year, one of wheat, barley, or lentils, the other of rice, millet, &c.; wheat, however, being the staple food. There being no roads suitable for wheeled traffic, goods are conveyed by beasts of burden, especially camels. The mineral wealth of the country is reputed great, but few mines are worked. In 1885 the exports to India amounted to £241,385, and the imports £469,103. The revenue of the present Amir is reckoned at about £400,000, besides a subsidy from the Indian Government of £120,000. The area is estimated at 279,000 square miles, with a population of 4,000,000.

CAPITAL, Cabul.

Agent to British Government, Lt.-Col. Attaoolia Khan, 10th Bengal Lancers.

Postage, 5d.; newspapers and books, 2 oz. $1\frac{1}{2}$ d.

ALGERIA.

Governor-General, M. Tirman, 26 Nov. 1881.

Algeria, the most important French Colonial possession, was formerly inhabited by a nest of pirates who infested the Mediterranean, and made themselves a terror to merchants. As a punishment, the city of Algiers was bombarded in 1816 by Lord Exmouth, and piracy for a time repressed; but the lesson was soon forgotten, and piracy was as rampant as ever. In 1830 the French determined to put it down in the only practical manner: they besieged and took the city, deposed the Dey, and after much fighting conquered and annexed the country, which is now considered and treated as a French province. It is in North Africa, between Morocco and Tunis, bordering for about 630 miles upon the Mediterranean, and stretching southward into the Sahara. There are three distinct zones, viz., the fertile Tell, or maritime region; a steppe region, with shotts (salt swamps), and sebkhas, (salt-pans); and the Sahara, with its oases, portions of which lie below the level of the sea. The area is 122,910 sq. miles, the population (1886), 3,817,465, including 219,627 Frenchmen, 120,000 Spaniards, and 86,210 other Europeans. The country exports wheat and other cereals, esparto grass, olive oil, fruits and vegetables, tobacco, and raw silk. The mineral wealth is considerable, and iron, copper, quicksilver and lead mines are being worked. The live-stock (1884) included 1,104,822 head of cattle, 6,056,683 sheep, 3,163,352 goats.

with about 216,000 camels, and 480,000 horses, mules, and asses: Algiers is much frequented as a health resort in winter by consumptive persons. There were (November, 1887) 1,240 miles of railway. The Revenue is not equal to the cost of administration, including an army corps of about 50,000 men.

Imports from the U. Kingdom, 1886. . . . £275,632

Exports to the United Kingdom, 1886 . . . 701,398

Total imports, 1885, £898,250; total exports, £7,821,836.

CAPITAL, Algiers. Pop. (:1881), 70,247.

British Consul-General at Algiers and Tunis.

Algiers city is 1,390 miles from London; transit, 4 days. Postage, 2½d.; newspapers and books, 2 oz. ½d.; parcels not exceeding 3 lbs. 1s. 9d.; ex. 3 lbs. and not ex. 7 lbs. 2s. 2d.; telegrams, per word.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 6,000: it is under the joint suzerainty of France and Spain. There are a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two vicars (priests) appointed in turns by France and the Bishop of Urgel.

ANNAM.

Emperor, Metriou Prince Chanh-Mong, also named Donc Khan, born 1862; succeeded Kienphuc, 1 August, 1884.

French Resident, M. Bihourd, app. Nov., 1886.

An Empire in Eastern Asia, under French protection. It extends from 10° 30' to 20° 30' N. lat., and borders for about 800 miles upon the China Sea. Its inland boundaries are ill defined: Tongking bounds it on the north, and French Cochin China on the south. The area is estimated at 106,300 square miles, with about 6,000,000 inhabitants. The inhabitants are Indo-Chinese, largely mingled with Chinese in the coast districts, and speaking a monosyllabic language. The religion consists of a worship of protecting spirits, but the educated classes hold the doctrines of Confucius, and there are said to be about 400,000 native Christians. The government is carried on by native officials under a French Resident-General (at Hue), three Residents (at Binh-tuan, Kwin-hon, and Than-hoa), and six Assistant Residents. The country is said to be rich in metals and coal; the forests abound in useful timber: the chief agricultural products are rice, cotton, spices, and sugar. The trade is almost exclusively in the hands of the Chinese. Annam was conquered by the Chinese in 214 B.C., but after a long struggle regained its independence in 1428. The French first interfered in its affairs in the 18th century, when they helped their protégé Ghialong to the throne (1799). Massacres of native Christians repeatedly brought the French into the field since 1847. By treaties concluded in 1862 and 1867 Annam was compelled to cede to the French the southern and most productive portion of Cochin China, and by the treaty of August 31st, 1874, Tongking was

virtually handed over to them, notwithstanding the protests of China. Finally, by a treaty of June, 1884, Annam was declared a French Protectorate; Tongking was ceded to France, and Hue, the capital, is now occupied by a French garrison. Military operations in Tongking have been carried on since 1882, but they have not yet led to a complete establishment of French authority. By a decree of Oct., 1887, the French possessions in "Indo-China" are placed under a governor-general, under whom are two Residents-general for Tongking and Cambodia, a Resident for Annam, at Hue, and a lieutenant-governor for Cochin China.

The Revenue of Annam and Tongking was estimated at £560,000 in 1886, the expenditure at £1,760,000. The French army of occupation numbers 12,000 men.

ARABIA,

a huge peninsula of S.W. Asia, bounded by the Persian Gulf, the Indian Ocean, and the Red Sea, and having an area of 1,219,000 square miles, with a population roughly estimated at five million souls. The littoral region (Tehama) is a barren, sandy plain, but mountains with fertile valleys rise at some distance inland; and although the greater part of the interior plateau consists of sandy wastes, there are also met with large tracts which afford fine pasturage during the rainy season. The climate is healthy. The population is wholly Semitic, but whilst the north is occupied by Arabs and Ismaelites, the south is still held by Joctanides (the Himyarites of the Ancients), who speak a language of their own. The inhabitants are either Bedouins (Bedawi) or "wanderers," or "Hadesi," settled in towns and villages. With the exception of a few Jews, they are Mohammedans. The country is famous for its horses, camels, asses, and mules. Cattle, goats, and sheep are kept by the pastoral tribes. Millet is the principal grain cultivated, but coffee is the product for which Arabia is most famous. Arabia has at no time formed a political unit, and in the present day it is divided among several Powers. Turkey claims possession of the maritime district El Hasa, on the Gulf of Persia, and of the vilayets of Hejaz and Yemen, on the Red Sea. Mecca and Medina, the sacred cities of the Mohammedans, and the seaport of Jeddah, are in Hejaz; whilst Sana and the ports of Hodeida and Mokha are the principal places in Yemen. Egypt holds the Sinai Peninsula and the old Land of Midian, stretching southward from the Gulf of Akaba. England, besides occupying the stronghold of Aden and the island of Perim, at the mouth of the Red Sea, owns the Kuria Muria Islands on the south coast, and Kamaran Island in the Red Sea. The only independent native States of importance are Oman, with Muscat for its capital, in the south-east; and Jebel Shammer (capital Hail) and Nejd, the country of the Wahabis, in the interior. Hadhranaut, on the south coast, is split up into numerous little states or principalities.

ARGENTINE REPUBLIC.

President, Dr. Miguel Juarez Celman, installed 12th October, 1886, for six years.

Vice-President, Dr. Carlos Pellegrini, installed 12th October, 1886, for six years.

Minister of Foreign Affairs, Dr. Norberto Quirno Costa.

Minister of Finance, Dr. Pacheco.
 Minister in London, Don Luis L. Dominguez, 16, Kensington Palace Gardens, W.
 1st Sec. of Legation, Don Florencio L. Dominguez.
 2nd Secretary, Don Luis H. Dominguez.
 Consul-Gen., Alexr. Paz, 19, Gloucester Place, W.
 Consul, A. Lumb, 16, Bishopsgate St. Without, E. C.
 Vice-Consul at Liverpool, Samuel Loader.

The Republic is composed of 14 provinces and 8 territories, with a large seaboard on the east coast of South America. It is estimated to contain 1,095,013 square miles, with a population, in 1882, of 3,026,000. By the treaty of 23rd July, 1881, with Chili, Terra del Fuego has been divided between these two republics. The country was discovered in 1517, and settled by the Spaniards in 1535. The principal productions are wool, hides, flax, sugar, maize, wheat, and tobacco. The other products are cotton, cochineal, Paraguay tea, and excellent European and indigenous fruits. The mineral products are copper, silver, coal, salt, alum, sulphur, and gold. The export of frozen sheep to Europe is becoming of great importance; there are at present 3 factories in working operation. The chief articles of export are wool, £7,190,020; hides, £2,600,000; sheepskins, £1,598,037; tallow, £1,000,000; live animals, £513,942; maize, £791,438; wheat, £627,947; flax, £691,261; salted meat, £840,815. The principal imports from the United Kingdom are machinery, hardware, and cotton, woollen, and linen goods. France is the largest purchaser: the exports in 1885 were, to France £4,833,000; Belgium £2,976,000; and to the United Kingdom £2,563,000. Unfortunately for the country, its statesmen have tried to go ahead faster than was wise, with the result that the finances are in a miserable condition. Specie payment is suspended, and the paper currency compared with gold is at a discount of from 10 to 45 per cent., so that traders can hardly calculate their prices. This naturally leads to much speculation. According to the *B. A. Standard*, 7 Oct., 1887, the entire debt of the Republic, external, internal, uncovered paper money, and railway guarantees, is close upon £100,000,000.

In 1886 there were 4,150 miles of railways in working order, which connect the principal cities of the Republic with the capital. Telegraphs, government lines, about 7,000 miles. Immigration is encouraged, the arrivals in 1885-86 reaching 436,624. Of the arrivals, 62 per cent. were Italian, 7 per cent. French, British 3 per cent. Of these only 29 per cent. are females.

The Argentine Republic is connected by cable with all the cities in the world. The Army consists of about 7,400 men, in addition to the National Guard of about 350,000. The military school has 150 cadets, and the school for non-commissioned officers, 120. Navy: 39 vessels, including 3 ironclads and 6 torpedo launches. The naval school has 60 cadets, and the school of gunners, 80. Public instruction is much developed: there are 2 universities, 2 schools of engineering, 2 colleges of agriculture, 27 training colleges, and 2,415 public schools, with 180,768 pupils in 1868. The climate of the Argentine Republic is temperate and very healthy.

Public revenue in 1886 £9,234,528
 Public expenditure, 1886 9,230,700
 Public debt (inc. internal £10,651,944,
 and floating £2,318,667; see above) 31,761,295

Imports, 1886 £23,424,624
 Exports, 1886 15,483,734
 Imports from United Kingdom, 1886 5,322,280
 Exports to United Kingdom in 1886 1,646,336

CAPITAL, Buenos Aires, 1886, 398,496.

AUSTRO-HUNGARIAN EMPIRE.

Reigning Sovereign, Francis Joseph I., Emperor of Austria, King of Hungary and Bohemia, born 18 August, 1830; suc. 2 Dec., 1848; married April 24, 1854, Elisabeth, daughter of Maximilian Joseph, Duke in Bavaria, b. 24 Dec. 1837.
Heir Apparent, Archduke Rudolph, Prince Imperial, born 21 Aug., 1858; mar. 10 May, 1881, Princess Stéphanie, daughter of Leopold II., King of Belgium, born 21 May, 1864.
 [There are three Ministries for the whole Empire, those of Foreign Affairs, Finance, and War.]

Minister of Foreign Affairs, Count G. Kálnoky.
Minister of Finance, Von Kallay.
Minister of War, Count A. Bylandt-Rheydt.
Ambassador in London, Count Károlyi, 18, Belgrave Square, S.W.
Councillor, Baron von Biegeleben.
Secretary, Count Henry Lützow.
Hon. Secretary, Count Fr. Lützow.
Attachés, Count Bolesta-Koziebrodski, Count Paul Esterházy, Count Ch. Kinsky.
Hon. Attaché, Chev. de Krapf-Liverhoff.
Naval Attaché, Capt. Rousseau d'Happonville.
Military Attaché, Col. Prince Esterházy.
Chancellor, Baron Vesque von Püttingen.
Consul-General and Director of the Commercial Department, Chevalier Ferd. Krapf-Liverhoff.
Deputy Consul-General,
Vice-Consul, Baron A. Pereira.
 Office, 11, Queen Victoria Street.

The largest State, next to Russia, on the continent of Europe, situated between 42°-51° N. lat. and 9° 30'-26° 20' E. long. It embraces an area of 261,649 English square miles, and a population (1885) of about 41,056,206, viz.:—Austria proper, 115,914 sq. miles, population, 22,050,000; Hungary, 125,557 sq. miles, pop. 16,670,115; Bosnia and Herzegovina, 20,177 sq. miles, pop. 1,336,091. Among this population there were in 1880 about 18,126,000 Slavs, 9,951,000 Germans, 6,422,000 Magyars, and 2,592,000 Roumanians. According to Religion, there are nearly 30,000,000 Roman Catholics, 3,616,000 Protestants, 3,500,000 Greeks and Armenians, 1,648,000 Jews, and 493,000 Mohammedans. The Empire—the official denomination of which is now Oesterreichisch-ungarische Monarchie (the Austro-Hungarian Monarchy)—is divided into the Austrian State and the Hungarian State, each having its own Parliament, Ministry, and Administration.

The lands of the Austrian Crown are—Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Carniola, Coast-Districts (Görg, Gradisca—

Trieste, and Istria), the Tyrol and Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina, and Dalmatia. The lands of the Hungarian Crown embrace Hungary, Transylvania, Fiume, Croatia, and Slavonia. The soil produces grain of all kinds, potatoes, beetroot, and wine. Austria ranks next to France, Italy, and Spain as a wine-growing country (1884: 173,480,912 gallons, of which 97,050,602 in Hungary); but from its inland position and other causes the wines are little known in this country: 525,000 tons of beet-sugar were manufactured in 1886-87. Industry is almost wholly confined to the western half of the monarchy, and more especially to Vienna, Bohemia, Moravia, and Silesia. Styria is the great centre of the iron trade; Brünn is famed for its woollens, Reichenberg for woollens and cottons, Trautenau for linen, Bohemia for glass, and Vienna and Pilsen for lager beer. The mineral riches are very great, comprising gold, silver, copper, iron, quick-silver, lead, tin, zinc, coal (1884: 19,000,000 tons). The Empire possesses a powerful army, amounting, on the peace footing, to 268,419 men, with 18,008 officers; and the war establishment, including a Landwehr of 250,902 men, &c., consists of 1,035,955 men and 32,673 officers, with 1,592 field guns. Military service is compulsory on all. The navy consists of 98 vessels, of which 13 are ironclads, 6 torpedo vessels, and 26 torpedo boats.

Pola is the great naval arsenal.

The imports amounted (1885) to £55,297,158, the exports to £66,412,606.

The imports included vegetable fibres and manufactures, £6,762,910; silk and silk goods, £5,327,347; vegetables, fruits, &c., £4,808,087; fats and oils, £3,586,941; grain and pulse, £3,266,291; colonial wares, £2,736,770; clothing, haberdashery, &c., £2,723,442; animals, £2,675,990; machinery and carriages, £2,242,875; wool and woollen goods, £2,178,316; furs and skins, wooden ware, &c.

About one-half of the exports consists of agricultural produce. Some of the principal articles were grain, pulse, and flour, £9,568,215; fuel, £7,840,366; sugar, £5,025,661; instruments, watches, &c., £4,657,098; wool and woollens, £3,968,748; animals, £3,538,354; animal products, £3,105,241; beverages, £2,830,242; leather and leather goods, £2,127,490; glass, £1,971,918; cottons, £1,647,267; silks, paper, hardware, tobacco, &c. Commerce is carried on principally with Germany, Italy, Roumania, and Russia, and through the free ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1886, 14,301 miles of railway were open for traffic. The commercial marine, including fishing smacks, consisted (1886) of 9,368 vessels with a burthen of 311,987 tons.

Duality extends to the annual budgets. Towards the common expenses Austria contributes to the extent of 68.6 per cent.; Hungary, to that of 31.4 per cent. These common expenses are estimated for 1887 at £11,833,102.

Each of the two countries has a separate Parliament and a separate Ministry. The Austrian Ministry is:

President and Interior, Count Edward Taaffe.

Finance, Dr. J. Duñajewski.

Defence, Count S. von Welsersheimb.

Public Instruction, Dr. P. G. von Frankenthurn.

Agriculture, Count Jidits Falkenhayn.

Commerce, Marquis von Bequehem.

Justice, A. Frazak.

Ministry for Hungary:

President and Finance, C. Tisza.

Interior, Baron Orczy.

Defence, Baron Fejervary.

Agriculture and Commerce, Count Paul Szechenyi.

Education, Dr. August Trefort.

Justice, Dr. Leopold Fabiny.

For Croatia, Coloman de Bedekovitch.

Communications, M. Gabriel Baross.

BALUCHISTAN.

Khan, Mir Khodádal Khán, 1856.

Bounded by Afghanistan, Persia, the Arabian Sea, and the Sind frontier of India, Baluchistan has an area of about 106,000 sq. miles. The country is poor, but the trade is not unimportant. The population is about 500,000, and the Khan's revenue is not more than £30,000; in addition to which he receives, under the treaty of 1876, a subsidy of 100,000 Rs. from the British Government. Besides affording protection to merchants in his territories, the Khan is bound to oppose to his utmost all the enemies of the British Government, and to have no relations with other foreign States. Another clause of the treaty permits British troops to occupy such positions in his territory as may be thought

divisible by the British authorities. Under this lause Quettah, which commands the Bolan pass, was occupied in 1876, and British troops are still quartered there.

CAPITAL, Khelát (Kalat).

Agent to the Governor-General of India, Col. Sir Oliver B. C. St. John, K.C.S.I., R.E.

BELGIUM.

Vice-Consul, Henri de Grelle Rogier, 130, London Wall, E.C.

Consul at Dover, W. H. Crundall.

Vice-Consul at Harwich, William Groom.

A kingdom of Central Europe, anciently inhabited by the Belgæ (a Celtic-speaking German tribe), and part of the *Gallia Belgica* of the Romans. It enjoyed a period of high prosperity under the Emperor Charles V. In 1815, the country was joined to the kingdom of the Netherlands, an arrangement which was upset by the Revolution of 1830. On Oct. 4, 1830, a National Congress proclaimed Belgium independent, and on June 4, 1831, Prince Leopold of Saxe-Coburg was chosen hereditary king.

Belgium extends from the North Sea and the mouth of the Scheldt to the German frontier, and is bounded on the north by the Netherlands, and on the south by France. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the tableland of the Ardennes, in the east, has for the most part a poor soil.

Belgium has an area of 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Scheldt. The other harbours are at Nieupoort and at Blankenberg. On the south the French frontier extends 184 miles; on the north, the Dutch, 168 miles; on the east, Germany, 59 miles; Luxembourg, Grand Duchy, 80 miles; and a sea coast of 41 miles.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 103 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, and the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 5,409,975 (December, 1886).

It is consequently one of the most densely peopled countries of the world. It is divided into nine provinces, namely, Antwerp, Brabant, East and West Flanders, Hainaut, Liège, Limburg, Luxembourg, and Namur. BRUSSELS (448,088) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (207,000 exclusive of suburbs), Ghent (143,281), and Liège (135,371).

The population increases annually at the rate of 1·6 per cent. (1880-86). Immigration and emigration nearly balance each other (1841-84 423,277 emigrants, 407,782 immigrants), and since 1870 there has been an excess of immigrants. There are 1,002 females to every 1,000 males; and annually 30 births and 25 deaths to every 1,000 inhabitants.

French is the official language and that of the upper classes, although Flemish is spoken by the majority, and preponderates in Flanders and Brabant, including Antwerp. In 1880 45 per cent. spoke Flemish, 40 per cent. French, 8 per cent. both Flemish and French. Nearly all the inhabitants are at least nominally Roman Catholics, and in 1880 there existed 1,259 convents, inhabited by 4,027 monks and 20,645 nuns. Education can hardly be said to be in a satisfactory condition, for in 1880 32 out of every hundred inhabitants of 15 years of age and upwards were unable to read; and of the recruits levied in 1887, 14 per cent. were in a similar condition. There are four universities—Ghent, Liège, Brussels, and Louvain—with (1885) 5,658 students, besides a famous Academy of Art at Antwerp, a Conservatoire of Music at Brussels, Ghent, and Louvain, and numerous technical schools.

Belgium is essentially a manufacturing country, for although agriculture is carried on with much industry it is largely dependent upon foreign supplies for its food. The soil is divided (1883) among 1,164,874 proprietors. Of the total area 58 per cent. are under cultivation, 13 per cent. consists of meadows and pastures, 17 per cent. of forest. Rye, wheat, oats, potatoes, turnips, green crops, flax, and beetroot are the principal crops cultivated. In 1880, there were 271,974 horses, 1,382,815 cattle, 365,450 sheep, and 646,375 pigs. The mineral kingdom yields coal (1884, 18,051,499 tons), iron, zinc, lead, and copper. The leading manufactures are firearms (Liège), machinery (Seraing), iron and steel, glass (Charleroi), woollens (Verviers), cottons and linen (Ghent), lace (Brussels, Mechlin, and Bruges), hosiery (Tournai), beet-sugar (Hainaut), paper, beer. The exports, in addition to these manufactures, include also corn, butter, eggs, vegetables, coal, building-stones, hides, tallow, and rabbits. The imports of merchandize were valued in 1884 at £110,020,640, the exports at £106,257,220. This includes the transit trade, the imports for home consumption only amounting to £56,577,180, the exports of home produce to £53,086,400. France, Germany, and England take the lead in this foreign commerce. The exports to the United Kingdom in 1886 were valued at £14,248,151, the chief articles being—

Cotton manufactures	£325,177	Iron manufactures	£666,182
Articles 236,083,320	657,756	Lace	97,091
Articles of food	986,942	Linen yarn & mfs.	353,231
Clocks & watches	221,021	Metals and ores	285,046
Flax	484,174	Silk and manufs.	1,549,502
Glass	791,167	Sugar	546,873
Gloves	386,481	Wool	272,798
Hides & leather	376,700	Woollen manufs.	1,976,778
Hops	155,003		

The imports of British produce and manufacture amounted to £7,126,635, and included—

Apparel of all kinds £208,281	Machinery £526,534
Coals, &c. 172,642	Leather & manufs. 184,991
Cotton yarn & mfs. 1,951,541	Metals & hardware 388,197
Linen yarn & mfs. 149,554	Woolen yarn & mf. 1,361,881

The value of foreign and colonial goods exported to Belgium included raw cotton, £1,077,003; wool, £2,937,524; coffee, £224,350. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1885) of 64 vessels (51 steamers), 80,592 tons, in addition to which there were 324 fishing boats. In 1886 there were 2,740 miles of railway (1,968 miles being the property of the state); the telegraphs had a length of 3,393 miles, and the post-office carried 267 millions of letters, post-cards, &c. The navigable rivers have a length of 684 miles, the canals of 560 miles.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 69 senators and 138 representatives are elected by the people, the former for 8, the latter for 4 years; the franchise is limited to persons paying annually 42 frcs. (33s.) in direct taxes, and the united constituencies only numbered 126,419 voters in 1885. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

The army, on a peace footing, consists of 58 battalions, 8 regiments of cavalry, 82 batteries, &c., and numbers 47,734 men; on a war footing it is raised to 114,407. It is recruited by conscription, the term of service being ten years, of which three are passed with the colours. Exemption can no longer be purchased. There is also a *Garde civique* of 35,000 men. Antwerp is the principal fortress. Belgium has neither a navy nor colonies; but the King of the Belgians is at the same time "Sovereign" of the Congo Free State in Africa.

BOKHARA.

Amir, Seid Abdul Ahad, succeeded 12 Nov. 1885.

Once the most famous State in all Central Asia, but since the capture of Samarkand by the Russians, in May, 1868, scarcely more than a vassal State of Russia. Bokhara, inclusive of its tributary territories of Shignan, Roshan, and Karategin, has an area of 92,300 square miles, with a population of 2,130,000. The Uzbegs, of Turkish extraction, are the dominant race, but

the Aryan Tajiks are the aboriginal inhabitants of the country. Slavery has been abolished through the influence of Russia. The country produces corn and fruit, cotton, silk, wine, tobacco, and hemp. Sheep, horses, goats, and camels are numerous; gold, salt, alum, sulphur, and coal are among the mineral productions. The Amu-Darya, which runs along the southern frontier of the country, is now navigated by Russian steamers, and a railway from Merv to the Oxus has been completed, and is to be extended through Bokhara to Samarkand. The capital, Bokhara, has 70,000 inhabitants.

BOLIVIA, REPUBLIC OF.

President, Don Gregorio Pacheco, *proc.* 1 Aug., 1884.

Minister for Foreign Affairs, Don Jorge Oblitas. *Consul-General in London*, Don J. M. Artoia, 14, Austin Friars.

This and Paraguay are the only States of South America without a seaboard, Antofagasta, its former port, having been ceded to Chile in 1884. It was formerly comprised in the Spanish Viceroyalty of Columbia under the name of "Peru," and derives its present name from its great liberator, Simon Bolivar. It extends between lat. 8° to 23° S. and long. 57° 30' to 73° W., and occupies an area of 472,000 square miles. Its population is estimated at about 2,300,000. In the war against Chile, 1879, it equipped an army of about 6,000 men. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible, while gold, partly dug and partly washed, is obtained on the eastern Cordillera of the Andes: copper, lead, tin, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, cocoa, indigo, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which are also its principal exports; its chief imports being iron, hardware, and silks. A railway connects La Paz (26,000) with Ayacucho, on the Lake of Titicaca.

Public revenue, 1887-88.....	£753,265
Public expenditure, 1887-88.....	895,423
Public debt, 1881 (inc. railway debt) ..	4,385,000
Imports from the United Kingdom, 1886 ..	56,909
Exports to the United Kingdom, 1886 ..	190,619

BORNEO.

Sultan, His Highness Hasim Jalil Alam Akmalidin, of Borneo, *suc.* May, 1885.

Next to Australia and New Guinea, this is supposed to be the largest island in the world. It was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S., and from long. 103° 50' to 119° 20' E. It is about 350 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyuns, Papus or Negritos, Chinese, and Bugis (the aboriginal Celebes). Rather more than two-thirds of the island is included within the Dutch possessions in the East Indies, the remainder belonging to the Sultan of Brunei, the Rajah of Sarawak, and

the British North Borneo Company. The British Colony of Labuan, which formerly belonged to Borneo, is situate in close proximity to the N.W. coast. The mineral kingdom includes gold, silver, diamonds, antimony, quicksilver, iron, tin, and coal, the latter abundant. The principal imports are opium, tea, cottons, cloths, hardware, brass, iron, &c.; exports, sago, beeswax, edible birds' nests, camphor, hides, rattans, tortoiseshell, trepang, cinnabar, antimony, coal, diamonds, and gold. At present there is but little direct trading with the U. K., the chief business being done with the colonies of Singapore, Hong Kong, and Labuan. Imports from United Kingdom, 1884..... £235 Exports to United Kingdom, Official Report *nil*.
Consul-General at Brunei, Peter Leys..... £300

BRAZIL, EMPIRE OF.

Emperor, Dom Pedro II., born 2 Dec., 1825; suc. 7 April, 1831; mar. 4 Sept., 1843, Theresa, daughter of Francis I., late King of Naples.
Heiress Presumptive, Dona Isabel, b. 29 July, 1846; mar. 15 Oct., 1864, to Louis d'Orléans, Comte d'Eu, and has issue three sons.
Prime Minister and Minister of Foreign Affairs, Baron de Cotegipe.
Finance, Francisco Belisario Soares de Sousa.
Minister in London, Baron de Penedo, 32, Grosvenor Gardens, S.W.
Secretary, Pedro de Araujo Beltrao.
Attachés, H. de Miranda, Eduardo Lisbon, G. de Sá Valla, and Eduardo Prado.
Consul-General in London, Baron d'Ibira Mirim, 6, Great Winchester Street Buildings.
Do. in Liverpool, Councillor da Silva Paranhos.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, a Portuguese navigator, is bounded north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4° 22' N, to 33° 45' S. and long. 34° 40' to 73° 15' W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,219,000 square miles, and contains a population of 13,000,000, of whom, in 1886, 1,050,000 were slaves [whose emancipation has since been steadily proceeding], 1,000,000 "wild" Indians, and the greater part of the remainder of mixed blood. It has a Constitution dated 25th March, 1826. Service in the army is compulsory, but substitutes are permitted. In 1885 the army consisted of 15,048 men on the peace footing, and the navy of 59 vessels, inclusive of 9 ironclads, 17 gunboats, and 9 torpedo boats. Brazil contains 20 provinces, 16 of which lie along the coast, and 4 in the interior. It is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries; and the Tocantins, San Francisco, and others. Its forests are immense, abounding in the greatest variety of useful and beautiful woods, some possessing a peculiar fragrance, well adapted for dyeing, cabinet-work, or ship-building; among these are mahogany, log-wood, rosewood, brazilwood, &c. Towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the

level of the sea, and in those regions European fruits and grain are reared in abundance, while the intermediate valleys are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, india-rubber, tobacco, and tropical products. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cotton also is being largely cultivated for export. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The exports consist solely of the raw produce of the soil, and owing to the vast extent of the Empire, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially Pará; and coffee, though also grown in the north, comes chiefly from the central portions of the empire, Rio de Janeiro and Sao Paulo. Tobacco is grown largely, especially in Bahia. The imports consist of every description of manufactured articles, as the country possesses hardly any manufactories; all articles of clothing may be said to be imported. The customs duties, both on imports and exports, are enormous. In 1886 there were 4,379 miles of railway open, and 1,410 miles in course of construction. Length of telegraph wires in 1886 about 6,593 miles: number of Post Offices, 1,816. Public revenue, 1887-88 (estimated).. £20,738,248 Expenditure, 1887-88 (estimated) .. 23,246,520 Debt consolidated and reduced to gold 31st Dec., 1886, foreign, £27,439,857; internal, £85,568,000, including loan of £639,000 in 1887.

BULGARIA.

Prince, Ferdinand of Saxe-Coburg, elected 1887.
Premier and Minister of Interior, M. Stambuloff.

Minister of Finance, M. Natchevitch.
Minister of Foreign Affairs, Dr. Stransky.
Minister of War, Col. Montkowskoff.
Minister of Justice, M. Stoiaff.

The Principality of Bulgaria is under the suzerainty of Turkey. It was created by the Treaty of Berlin, 13th of July, 1878, and was to have been governed by a Prince elected by the National Assembly or Sobranje, with a popular legislature and constitutional government. Prince Alexander of Battenberg was duly elected 29th April 1879, but having been removed at the instigation of Russia by a *coup d'état*, 21st August, 1886, he resigned the crown. On Nov. 10, 1886, the Sobranje elected Prince Waldemar of Denmark; but that choice being objected to by the Emperor of Russia, the Prince declined the offer, and on 7th July, 1887, Prince Ferdinand was nominated. Bulgaria is bounded on the north by Roumania, on the west by Servia, east by the Black Sea, and south by Eastern Roumelia, the Balkan Mountains here forming a physical frontier. The union of Eastern Roumelia with Bulgaria was proclaimed on the 18th September, 1885. The area within these limits is 24,700 square miles, with (1881) 2,007,919 inhabitants, of whom 70 per cent. are members of the Greek Church. Bulgaria contains the five famous Turkish fortresses of Widdin, Rustchuk, Silistria, Schumla, and Varna. Including E. Roumelia, it has a regular army of 29,473 men on a peace footing, and of 55,459, and a militia of 40,000 more men, with 96 guns, in time of war. There is a flotilla of 14 steamers on the Danube. The exports consist principally of grain, wool, skins, and timber; the imports of iron, coals, and manufactured goods. A railway, 139 miles in length, connects Rustchuk with Varna, and another connects Sofia with Constantinople; there are 1,520 miles of telegraphs.

Public revenue, 1887.....	£1,888,730
Expenditure, 1887, about	1,888,730
Total imports, 1886	1,793,246
Total exports, 1886	2,112,350
Imports from the U. Kingdom, 1886. . .	86,844
Exports to the U. Kingdom, 1886	76,064

CAPITALS, Sofia, pop., 24,000; and Tirnova, pop. 11,247.

British Agent and Consul-General, Nicholas Roderick O'Connor, C.B. £1,500
2nd Secretary, Hon. Charles Hardinge.... 330
Vice-Consul, Robert Wyndham Graves.... 500
Rustchuk—Vice-Consul, William H. Dalziel 400
Varna—Vice-Consul, Alfred G. Brophy.... 400
 Sofia is 1,416 miles from London; transit, & postage, &c., same as E. Roumelia.

EASTERN ROUMELIA, or South Bulgaria, a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, with 976,100 inhabitants in 1885, viz., Bulgarians, 682,757; Mussulmans, 200,499; Greeks, 53,045; Gypsies, 27,201; Jews, 6,993; Armenians, 1,867. The eastern boundary is the Black Sea; the south and west, a line from Cape Seityn, on the Black Sea, to the Rhodope Mountains, and then northward to the Rilo mountain. Among the products of the country are wheat, wine, tobacco, silk, and attar of roses. The live-stock is very considerable.

Eastern Roumelia was designed to be an autonomous province, under a Christian Governor-General appointed by the Porte, but effected its junction with Bulgaria by a bloodless revolution, in September, 1885. The European Powers

met at Constantinople in order to decide upon the future destinies of this Province, but the earnest desire of England to legalize the revolution by an international agreement was frustrated by the hostile attitude assumed by Russia. The Province has nevertheless continued since that event to form, under the name of South Bulgaria, an integral portion of the Principality, with the same rulers, laws, and mode of administration. Its representatives (92) take their places in the general assembly at Sofia along with those from the Northern Province.

Bulgaria and Roumelia jointly have an area of 38,562 square miles, with 2,984,019 inhabitants. The estimated revenue of the current year, 1887, for all Bulgaria—there is no separate budget for the Southern Province—is given at £1,888,730, and the expenditure at about the same amount.

The national debt is the arrear of tribute due to the Porte, stated by the latter to amount to (Dec., 1887) £925,688, but which the Province maintains does not exceed £669,188, beside £124,882 due to the Ottoman Bank.

The armed force of Eastern Roumelia (South Bulgaria) is a militia, of which the active force amounts to 26,000 all arms.

CAMBODIA.

King, Norondon.

French Resident,

An ancient Kingdom in Further India, adjoining French Cochinchina, and consisting for the greater part of a fertile alluvial plain, traversed by the Mekong, and exceedingly productive of rice. The inhabitants are kin to the Siamese. The magnificent ruins of Angkor bear witness to the bygone glories of this kingdom, which accepted, in 1867, the "Protectorate" of France. By a convention of August, 1886, the kingdom enjoys home rule, but the French hold the customs, and have the monopoly of the opium trade. The area is 32,380 square miles. Pop., 1,500,000. *See Annam*, p. 471.

CAPITAL, Udong.

CENTRAL AMERICA,

originally comprising one State, known, while in the possession of the Spanish Crown, as the Kingdom of Guatemala, but now divided into five independent Republics, viz., Guatemala, Salvador, Honduras, Nicaragua (including, since the treaty of 28th January, 1860, the Mosquito territory), and Costa Rica, besides the territory of Belize, or British Honduras, situate upon the east side of the Peninsula of Yucatan. It comprises the southern part of the continent of North America; and the total area is calculated in round numbers at 175,867 square miles (inclusive of British Honduras, 7,562 square miles; pop. 27,452), with a population of 2,853,000, about a quarter of whom are whites, Creoles of European parentage, the remainder Indians and Mestizoes of mixed descent. From the year 1525, when the country was conquered by Don Pedro de Alvarado, one of the companions of Cortes, to 1821, it remained subject to Spain, but in September of that year it effected its independence. A federal government was es-

ablished, which, after some years of civil war, was upset in 1839, and the five confederated States above named proclaimed their absolute independence of each other. It possesses mines of gold, silver, copper, zinc, as well as other valuable mineral produce, with various marbles and other stone; but the real wealth of the country consists in the vegetable productions—woods, cotton, coffee, sugar, cochineal, indigo, yocoa, sarsaparilla, tobacco, &c.

Imports from the United Kingdom, 1836 £702,652
Exports to the United Kingdom, 1836 .. 1,117,042

In the Board of Trade returns the amount of trade with each of the separate Republics of Central America is not now distinguished.

British Minister to the several Republics of Central America, James P. Harriss-Gastrell £2,000

GUATEMALA, REPUBLIC OF.

President, General Don M. L. Barillas, 1885.
Minister of Foreign Affairs, Lorenzo de Montúfa.
Minister to London, Señor Don Crisanto Medina (resides at Paris).
Consul-Gen., Benj. Isaac, 22, Gt. Winchester St.

Guatemala, the most northerly of the Republican States of Central America, is situate in N. lat. from 13° 40' to 17° 40', and in W. long. from 88° 15' to 92° 30', and comprises an area of 46,774 square miles, and a population in 1885 of 1,284,604. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. There are 132 miles of railway open, and one of about 225 miles, connecting Guatemala with St. Thomas in the Gulf of Honduras, is in course of construction. Nearly 3,000 miles of telegraph are in working order. The chief ports are San José de Guatemala, and Champerico on the Pacific. The principal exports are coffee, hides, indigo, sugar, india-rubber, mahogany, sarsaparilla, tobacco, and fruits. The crop of coffee, 1834, exceeded 42,000,000 lbs., but that of cochineal was almost a failure.

Revenue, 1886 £1,256,500
Expenditure, 1886 1,582,050
Public debt, consolidated Aug. 29, 1887 908,290
Total exports, 1885, £1,122,560; imports 713,575

CAPITAL, New Guatemala. Pop., 59,039.
British Consul, Arthur Chapman £500
Livingston—Vice-Consul, H. S. Wardlaw .. unip.

COSTA RICA, REPUBLIC OF.

President, General Don Bernardo Soto, elected March 12, 1885.
Minister of Foreign Affairs, Ascension Esquivel.
Minister in England, Belgium, and France, Señor M. M. Peralta (Liège).
Consul-Gen. in London, John A. Le Lacheur, 19, St. Swithin's Lane, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus, between 8° 17' to 11° 10' N. lat. and from 82° 20' to 85° 45' W. long., contains an area of 19,985 English square miles, and a population (1885) of 213,785. The chief exports are coffee, sugar, caoutchouc, metals, sarsaparilla, dye-woods, hides, cedar-wood, tortoise-shell, and fruits. The country is rich in minerals, but for

want of capital and skilled labour the mines are almost unworked. The imports are dry goods, hardware, and provisions from the United States, Germany, and England. A railway from Limon, on the Atlantic, to Punta Arenas, on the Pacific, is being constructed, but only 170 miles have been completed. There is an armed force of 500 men, and a militia of 3,500.

Public income (Budget), 1887 £623,573
Public expenditure (Budget), 1887 623,573
Public debt, foreign (consolidated 1887) 2,000,000
" internal (1886) 172,692
Imports, 1885 762,710
Exports, 1885 686,900

CAPITAL, San José. Population, 13,484.
British Consul, Cecil Sharpe £200
Port Limon—Vice-Consul, Thos. H. Taylor 20
San José is 5,687 miles from London; transit, days; postage, 4d.; news, 1d.; books, 2 oz. 1d.; telegrams, per word, 4s. 4d.

HONDURAS, REPUBLIC OF.

President, General Luiz Bogran, Nov. 27, 1883.
Minister of Foreign Affairs, Don Jeronimo Zeiaya.
Consul-Gen. London, G. Kattengell, 5, Lothbury.

The Middle State of Central America, stretching in N. lat. between 13° 10' and 16°, and W. long. between 83° 10' and 88° 40'; containing 42,558 English square miles, including a small portion of the Mosquito territory, and the Bay Islands in the Gulf of Honduras. The population, in 1885, was 323,274, mostly of aboriginal blood. It has a coast line of nearly 400 miles on the Caribbean Sea, but only about 40 miles on the Gulf of Fonseca, on the Pacific side: the country is mountainous, being traversed by the Cordilleras. The products are mahogany, fruit, cattle, cotton, sugar, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, fustic, rose and Lima wood. Its mineral wealth is great. The only railway (42-inch gauge) runs from Puerto Cortez to San Pedro Sula, 69 miles. A proposal to develop this into a ship-railway, connecting the Atlantic with the Pacific, has come to nought.

Revenue, 1886-87 (estimated) £285,500
Expenditure, 1886-87 (estimated) 256,500
Debt (internal), 1885 156,000
Debt (exterior) (no interest paid) 5,990,108

NICARAGUA, REPUBLIC OF.

President, Don Evaristo Cavaza, 1887.
Minister of Foreign Affairs, Don Franc. Castellon.
Minister in London, Señor Don José Pasos, Bristol Hotel, W.
Sec. of Legation, Fernando Guzman.
Consul-General, Frederick Isaac, 22, Great Winchester Street, E.C.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 10° 45'—15° N. lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles, including a large portion of the Mosquito Territory, and a population, probably, of 400,000, of whom about 40,000 are whites, 20,000 negroes, the rest Indians and

mixed blood. In 1886 there were 99 miles of railway open, with 830 miles of telegraph, connected with the Pacific cable from Mexico to Peru. A Ship Canal connecting the Pacific with the Atlantic, a practical work which will be of the utmost importance to this at present undeveloped country, is to be immediately commenced. Unlike most of the other South American Republics, Nicaragua has not rushed into debt, and at the present time has but one foreign loan.

Public revenue, 1887 (estimated)	£678,659
Public expenditure, 1887 (estimated) ..	656,000

SALVADOR, REPUBLIC OF.

President, General Francisco Menendez, elected
19 June, 1885.

Minister for Foreign Affairs, M. Delgado.

Minister for England, José Maria Torres Calcedo.
Cons.-Gen., Luis A. Campbell, 7, Jeffrey's Sq., E.C.

San Salvador, the smallest, though in point of population the second, of the Central American Republics, extends along the Pacific coast for 170 miles, with a general breadth of 43 miles. It contains an area of about 7,228 English square miles, and a population in 1885 of 634,120. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. Its mineral resources are not great, but rich veins of silver are found in Tabanco, also iron mines near Santa Ana. A railway 54 miles in length connects Acajutla with La Libertad. The only river of importance is the Lempa. Earthquakes are frequent; the capital (now rebuilt) was entirely destroyed by one in 1873.

Revenue for 1887 (estimated)	£863,090
Expenditure, 1887 (estimated)	858,375
Public debt, 1887 (internal)	950,000
Imports (total), 1884	551,381
Exports (total), 1884	1,263,708

CHILE, REPUBLIC OF.

President, Don José Manuel Balmaceda, pro-
claimed 18 September, 1886.

Premier,

Min. of Foreign Affairs, Don Miguel Ammiatégui.

Minister for England, Señor Don Ambrosio
Montt, 88, Harley Street, W.

Secretary, Don Ambrosio Montt y Montt.

Attaché, Don Rafael Orrego.

Honorary Attachés, Dons Luis G. Ossa and Val-
entin Marcoleta.

Consul-General, Juan de la Cruz Cerda.

Consul, Arthur Kendall, 50, Old Broad St., E.C.

A State of South America, of Spanish origin lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Zama to Cape Horn south, between lat $18^{\circ}28'$ and $56^{\circ}35'$ S., and long. $66^{\circ}30'$ and $75^{\circ}30'$ W. Extreme length of coast line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41° , of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; by numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and but few of them are of much service as navigable high-roads. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 256,850 square miles, with a population (1885) of 2,524,476 souls. This is inclusive of Antofagasta, ceded by Bolivia, April 4th, 1885; of Tarapaca, surrendered by Peru, Oct. 20th, 1883; and of the Peruvian territory of Tacna, which will remain with Chile until 1893, when a popular vote will determine whether it is to revert to Peru. The boundary with Argentina has been determined by a treaty concluded at Buenos Aires on July 23rd, 1881. The population increases but slowly, and immigration, although to some extent encouraged, is inconsiderable. The number of tribal Indians is small. The Araucanians on the mainland voluntarily submitted to government in 1834; but several tribes on the islands and in the densely-wooded territory of Magellan are still virtually independent. More has been done for education than in any other state of South-America. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, and lentils; tobacco, flax, hemp, hops, Chile-pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The mineral wealth is considerable. The rainless north yields more especially nitre, iodine, borate of soda, and guano; the centre, copper and silver; and the south, iron and coal. There are smelting-works, tanneries, corn and saw mills, starch, soap, and candle factories, breweries and distilleries, and the domestic industry furnishes carpets, linens, embroideries, baskets, and pottery. The many ports favour commerce, and three lines of steamers connect the country with Panama and through Magellan Strait direct with Europe, a passage to Liverpool occupying from 35 to 40 days. There are 1,421 miles of railway open, 7,625 miles of telegraph, and 411 post offices; the commercial marine numbers 166 vessels (35 steamers) of 72,614 tons. The staple articles of export are nitre, copper bars and ores, silver ores, corn, flour, leather, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 60 per cent. of the foreign trade is carried on with England. The army in 1885 consisted of 7,100 men and 1,039 officers, with a national guard of 53,741 more; the navy in 1887 consisted of 32 vessels, three of them ironclads, manned by 2,385 men.

CHINA.

Reigning Emperor, Kuang Hsü (Tsai t'ien was the name of the Emperor before he succeeded to the throne; the Emperor of China on his accession always selects a new name or *Kwo Hao*, and Tsai t'ien was exchanged for Kuang Hsü), born 15 August, 1871; suc. 12 January, 1875.

Regent, The Empress Dowager.
Minister of Foreign Affairs (President of the Tsung-li-Yamen), Marquis Tseng, Dec., 1886.
Envoy Extr. & Min. Plen. in London, H. E. Lew Tu-jen, 49, Portland Place, W.
English Sec., Sir Huldrid Macartney, K.C.M.G., 3, Harley Place, Regent's Park, W.
Secretaries of Legation, Vicomte Li, Tzuchun Pan, Fung Yee.
Attachés, S. Tingfan Chang, Yu Szu-yi, and Yang Wen-Hwei; Col. Ho: Foo Wang (Milit.).
Standing Counsel, William Henry Brereton.

China Proper (or the Eighteen Provinces) contains an area of 1,554,000 square miles, its length from north to south being 1,860 miles by 1,520 in breadth. It is bounded on the north by Mongolia and Manchuria; on the west by Turkestan, Tibet, and Burmah; on the south by Burmah, Tongking and the China Sea; and on the east by the Pacific Ocean, the Yellow Sea, and Corea. The northernmost part of this area is in lat. 44° 50' N., and the southernmost point, Yulin Bay, in the Island of Hainan, in 18° 10' N. On the east it extends to long. 126° 10' E., on the west to 97° 30' E. But the possessions of China extend far beyond these limits, and include Manchuria, Mongolia, and Dzungaria in the north, and Eastern Turkestan and Tibet in the west. The area of China Proper and her territories contains about 4,468,750 square miles, or rather more than one-twelfth part of the entire land surface of the globe. Within these limits are four great mountain ranges, whence proceed some of the largest rivers in the world, and these, with their tributaries, furnish an unrivalled internal water-communication. The Amur, 2,400 miles in length; the Brahmaputra, which runs more than 1,000 miles within the Empire; the Hoangho, or Yellow River,

which in its course of about 2,800 miles drains nearly 715,000 square miles of territory; and the great River Yangtze, which drains an area of 950,000 square miles, is said to flow nearly 3,200 miles. The most extravagant estimates of the population of this empire have been made at various times, and it is generally thought that the so-called census returns of Chinese officials are untrustworthy; the most recent official census (1877) gives it as 319,383,500, in addition to 63,046,072 in some outlying provinces, a total of over 382,000,000. The density of population is given as 822 to the sq. mile in the province of Hunan; 557 in Shan-tung; 482 in Fu-kien; and an average of over 300 in many of the other large provinces.

To this should perhaps be added Corea (see page 482), which acknowledges the suzerainty of China.

No trustworthy statements as to revenue and expenditure exist. In 1875 the revenue was supposed to have amounted to £25,837,500. The debt is inconsiderable. Of five foreign loans to the amount of £6,231,950, made since 1875, there was outstanding, Jan., 1887, £4,275,000, whilst the internal debt is stated not to exceed £8,750,000. During the Franco-Chinese hostilities of 1884-85 China had over 600,000 men under arms, and these were sufficiently well armed not only to keep the French at bay, but to drive them off at Tamsui and Langson. The navy consists of 5 ironclads, 6 cruisers, and 15 gunboats built in England and Germany, and of about 100 other vessels, some of which were built in the arsenals of Shanghai and Foochow. The discipline and drill on board these is most defective. The army at its full strength would number about 1,200,000 men. The external commerce of the empire is comparatively small. The staple articles imported are opium, cotton stuffs, and rice, whilst tea, silk, and silk manufactures and sugar constitute the bulk of the exports. Twenty-two "Treaty" ports are thrown open to foreign commerce, and the customs are managed by European officials. Three-fourths of the trade carried on there is with England and her Colonies. China is at length waking up to the necessity of railway communication, and although but 47 miles are open, a line to Peking is authorised; but there are about 3,000 miles of telegraph.

COCHIN CHINA,

an old province of the Empire of Annam (see p. 471), the southern and more fruitful portion of which was ceded in 1862 and 1867 to France. French Cochin China embraces an area of 22,958 square miles, with 1,642,182 inhabitants, and consists almost wholly of the alluvial delta of the Mekong. The soil is fertile, producing rice in abundance, but the climate is not at all favourable to Europeans, whose number does not however exceed 2,000. Saigon is the capital.

COLOMBIA, REPUBLIC OF.

President, Rafael Nuñez, 7 August, 1886.
 Minister of Foreign Affairs, Carlos Holquin.
 Minister in London, Gen. Antonio B. Cuervo, 55, Cornwall Road, S.W.
 Secretary of Legation, Aristides Gutierrez.
 Vice-Consul, L. Schloss, Ethelburga House, Bishopsgate Street.
 Consul in Liverpool, José I. Barberi.
 Consul at Southampton, Ramon Goenaga.

Formerly New Grenada—a Republic with Constitution, 5 August, 1886—consisting of 9 Departments—Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander, and Tolima—in the most N.W. part of South America, and includes the isthmus connecting the two continents, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 83° W. long., comprising an area of 331,420 square miles, and possessing a population of about 4,000,000, of whom more than one-half are whites and half-castes. It has been subjected to several revolutionary changes and civil wars. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the latter is by far the largest, consisting of a series of vast tablelands, cool and healthy. This temperate region is the most densely-peopled portion of the Confederation. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold, silver, platinum, copper, iron, lead, coal, and precious stones. Its agricultural products consist of tobacco, coffee, cocoa, plantains, bananas, vegetable ivory, and indigo; also wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The plains yield large quantities of hides, and jerked beef is obtained from the cattle feeding there. The chief exports are cinchona bark, coffee, tobacco, the precious metals, balsam, hides, caout-

chouc, straw hats, and dye-woods. All religions are tolerated, and considerable attention is paid to education. The standing army consists of about 3,000 men: there is no navy. Railroads are in their infancy, there being but 144 miles open in 1887, including the Panama line (47 miles).

Revenue, 1886 (Budget)	£1,020,800
Expenditure, 1886, do.	792,000
Debt, foreign (excl. arr. of interest) ..	1,893,762
Debt, interior, Jan. 1, 1885	2,079,193
Total imports, 1886	2,500,000
Total exports, 1886	2,375,000

cost, in 1879, was estimated at £4,000,000. M. de Lesseps asserts that the actual cost will not exceed £49,000,000. Twenty thousand men are employed upon this great work.

Panama—Consul, Geo. F. N. B. Annesley £1,600

CONGO INDEPENDENT STATE.

Sovereign, Leopold II., King of the Belgians.
 Administrator-Gen., M. Ledeganck, appointed 188

The Congo Free State has sprung out of the discoveries of Mr. Stanley, and the explorations carried on subsequently by an International Association founded at Brussels under the presidency of the King of the Belgians in 1876. The new State has in the course of 1884 and 1885 been recognized by the leading Powers of Europe, and by the United States, conditional upon its maintaining the principles of Free Trade, and of only levying such dues upon shipping, or otherwise, for which there shall be returned an equivalent in facilitating the operations of commerce.

cotton, rice, millet, and hemp. Rice of an inferior quality, pea-cotton, and tobacco are also cultivated; and the medicinal ginseng root is an important commercial item. Gold, lead, iron, and coal are worked in various parts of the mountain cordillera that forms the physical backbone of the country. Stags, foxes, wolves, and sables abound; and the royal tiger and panther are so numerous that their skins form a leading article of foreign commerce. The manufactures of Corea include hemp, cotton and grass tissues, silks of moderate fineness, pottery and porcelain, arms (sabres, poignards, and matchlocks), and paper. The country is governed by a king, whose governmental constitution is similar to that of China; and the prevailing religion is Buddhism. Confucius also has many followers, though Christianity, which was originally introduced by way of Japan, is now extinct. Fusan, Gen-san, and Nin-sen are the ports open to foreign commerce. Being desirous of opening up the country to more foreign trade, the king in 1887 proposed to send out envoys to England, France, and Germany. Imports (Treaty ports), 1886 £508,046 Exports, 1886 (exclusive of bullion) 103,537

CAPITAL, Seoul. Population, 220,000.

Brit. Minister, Sir John Walsham, Bt. (Pekin).
Consul-General, Thomas Watters (*acting*).

Consul-Gen. in London, Ernest Adolf Delcomyn,

5, Muscovy Court, Tower Hill, E.C.

Ditto—Hull, Clements Frederick Good.

A Kingdom of Northern Europe, and the smallest of the Scandinavian States, with a Constitution dated 28 July, 1866, consisting of the islands of Zealand, Fünen, Laaland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,789 square miles, with a population in 1885 of 2,033,959, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are manufactured goods (woolens, silks, cottons), iron, hardware, wine, fruit, tea, and colonial produce. Its chief exports are

COREA.

Sovereign.

Corea is an Asiatic kingdom consisting mainly of a peninsula lying to the north-east of China; it is confined between 33° and 43° N. lat. and 124° and 130° E. long., and measures 600 m. from north to south, and 135 m. from east to west. The Chinese, to whom the territory is nominally tributary, call it Kas-li: the population is vaguely reckoned at something more than 10,000,000, and the area at 85,000 square miles. The capital is Kingki-tao, or Seoul. In the north the only grain grown is barley; but the southern part is of great fertility, and produces wheat,

those of agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle, the latter principally to Great Britain. Denmark possesses an army of 50,522 men on the war footing; a navy consisting of 37 steam-vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men; and a mercantile marine of 3,324 vessels, with a tonnage of 272,500. There are 1,208 miles of railway. Revenue, 1887 £3,042,300 Expenditure, 1887 3,227,294 Public debt, 31st March, 1887 10,873,865 Imports, 1886 11,756,316 Exports, 1886 9,263,708 Imports from U.K., 1886 (includg. Colon.) 2,206,526 Exports to U.K., 1886 (includg. Colonies) 4,959,043 CAPITAL, Copenhagen. Pop., (1886), 329,460 (including suburbs).

DOMINICAN REPUBLIC.

President, General Ulises Heureaux, elected 1886.
Minister for Foreign Affairs, Manuel M. Gautier.
Cons.-Gen., Miguel Ventura, 18, Coleman Street.
 San Domingo, formerly the Spanish portion of the Island of Hayti, is the oldest settlement of European origin in America, having been founded in 1494 by Bartolomeo Columbus. The capital city contains the Cathedral and Columbus's residence. It comprises an area of about 20,596 square miles, with an estimated population of 350,000. The imports in 1885 were £438,410, and the exports, £530,084. The chief products are tobacco, coffee, sugar, cocoa, mahogany, and a great variety of other furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, and divi-divi. Sugar, the most recent industry, is now the most important. The minerals are gold, copper, and iron. The Revenue in 1887 was estimated at £320,000. The internal debt, 1886,

is stated to be £312,500, but there is in addition an unacknowledged debt of £714,300 contracted in London.

ECUADOR, REPUBLIC OF.

President, José Maria Plácido Caamaño, elected 23 Oct., 1883.
Foreign Minister, J. Modesto Espinoza.
Minister in London, Señor Don Antonio Flores.
Consul-General in London, Pedro A. Merino, 1, Leadenhall Street, E.C.
Consul, Charles A. Yarmouth.

A State of South America, on its western side, being that portion of the Colombia States which lies on each side of the Equator, extending from lat. 1° 50' N. to 4° 50' S., and between 70° and 81° W. long., comprising an area of 248,380 English sq. miles. It has a population of about 1,100,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 20,700 feet, the Cotopaxi, 19,490 feet, the Antisana, 18,847 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Charapoto, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, nuts, cotton, coffee, india-rubber, orchilla weed, straw hats, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quick-silver, lead, iron, copper, and emeralds. Sulphur abounds near the Chimborazo. The chief exports are—cocoa, caoutchouc, cascarilla bark, silver and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 3 departments—Quito, Guayaquil, Azuay—and 17 provinces, including that of "Orienté." In 1886 there were 76 miles of railway open; and an English contractor has engaged to prolong the line from the base of the Cordilleras to the high central table-land, a distance of 50 miles. Guayaquil is the chief port; population about 40,000.

The Galapagos Islands (2,951 square miles), belong to Ecuador; Floreana and Chatham are private property. The other islands were leased in 1884 to a Scandnavo-Swiss Company.

EGYPT.

Khedive, or Reigning Sovereign, Mohammed Tewfik Pasha, b. 19 Nov., 1852; *suc.* 25 June, 1870; *mar.* Jan. 19, 1873, Emina, dau. of Prince El Hami Pasha.

Heir Apparent, Abbas Bey, born July 14, 1874.
President of the Council, Minister for Foreign Affairs, & Min. of Justice, Nubar Pasha, G.C.M.G.
Minister of Interior & of War, Mustapha Fehmy Pasha, K.C.M.G.
Minister of Finance, Zeky Pasha.
Minister of Public Works, Public Instruction, Abd-el-Rahman Pasha Rouchdy.
Financial Adviser to the Khedive, Sir Edgar Vincent, K.C.M.G.
Sirdar of the Egyptian Army, Major-Gen. Sir F. Grenfell, K.C.B.

The position and condition of Egypt are unparalleled. Nominally a province of the Ottoman Empire, it is also independent and under the rule of the Khedive by Firmans of the Sultan in 1841, 1866, 1867, and 1879, subject to the annual payment of a tribute of £695,792. It is at the same time entirely dependent for its existence as a Sovereign State upon the will of stronger Powers, England at the present moment being dominant. The title of Khedive was given by Firman of 14 May, 1867, and is hereditary. In consequence of a military revolt, headed by Arabi Pasha, which the Khedive was powerless to subdue, England was most unwillingly compelled to intervene, and is now in possession of Egypt, and for many years to come must continue to exercise a very powerful influence over the fortunes of the country. Whilst British troops were re-establishing the authority of the Khedive in Egypt, a revolution, headed by Mohammed Ahmed, who proclaimed himself a Mahdi, broke out in the Egyptian territories in the Soudan. The Egyptian troops having been beaten in the field, General Gordon volunteered to proceed to Khartoum to withdraw the garrisons. He fell dying nobly at his post before an English expedition, sent somewhat tardily to his relief, could reach him. Since then the whole of the upper valley of the Nile and the vast territories which had been brought under Egyptian rule, almost as far as the Equator, have been abandoned. The Khedive's possessions are consequently limited to the valley of the Nile, as high up as Akashe, above Wadi Halfa, in lat. 22° N., to the Oases, the Sinai peninsula, and the Land of Midian in Arabia, having a total area of 494,000 square miles, of which 10,328 square miles consist of arable land, and 13,363 square miles are covered with water, towns, roads, &c., the rest being a desert affording at most pasturage in a few favoured localities. The population in 1882 was 6,806,381, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,716 French, 8,022 Austrians, 6,118 English, &c.). Besides this, Suakin on the Red Sea, and Zeila and Berbera on the Gulf of Aden, are occupied by British troops, whilst the Italians have been permitted to establish themselves at Massowa, Nubia, Senaar, Kordofan, Darfur, and other districts acknowledge the sway of Khalifa Abdullah el Taashi, whom the Mahdi appointed his successor when he died. In the Equatorial Province the Egyptian Governor, Dr. Emin-Pasha, still maintained himself in June 1887. An expedition for his relief, under the command of Mr. H. M. Stanley, proceeded by the Congo route in the spring of 1887. The whole of these former dependencies of Egypt have an estimated area of 760,000 square miles with 11,000,000 inhabitants.

The cultivated portion of Egypt is confined to the country annually inundated by the Nile, or capable of being irrigated by canals. Its agri-

cultural products consist of millet, maize, wheat, rice, melons, gourds, sugar, tobacco, hemp, cotton, &c. It has no metals; but salt, petroleum, nitre, marble, red granite, Oriental alabaster, and limestone are found. The chief imports are cotton stuffs, coals, provisions, wools, coffee, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cotton-seed (78 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, ivory, and ostrich-feathers. Of the entire trade over 50 per cent. is carried on with the United Kingdom, 12 per cent. with Turkey, 10 per cent. with France, and 8 per cent. with Austria. There are 1,276 miles of railway.

The British army of occupation, November, 1887, numbers about 3,500 men, and there is a local military and police force of about 16,000 men under various names.

The Suez Canal, opened in 1869, and in which the English Government acquired by purchase, 25 Nov., 1875, shares to the amount of £4,000,000, is attracting a large portion of the traffic between this country and the East. By a convention, signed on Oct. 24, 1887, the canal has been neutralized. It is exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. In 1886, 3,100 vessels of 8,183,313 tons burthen (76 per cent. English, 8½ per cent. French, 4 per cent. German) passed through it. They carried 167,622 passengers, including 68,940 soldiers. Egypt being now the high road to India, England is compelled to take an active part in supporting the Khedive. In consequence of gross mismanagement and extravagance the finances of the country had got into a thoroughly disorganized condition, almost hopeless. Strenuous efforts, however, have been and are still being made to bring the Revenue and Expenditure into a state of stable equilibrium, and thus avoid the necessity of an international commission.

Public revenue, Budget for 1887	£9,875,400
Public expenditure	9,828,500
Consolidated debt, 1886	103,737,880

FINLAND.

Grand Duke, The Emperor of Russia.
Minister of State,

A Grand Duchy on the gulfs of Finland and Bothnia, which was successively conquered by Russia from Sweden in 1721, 1743, and 1808, but was, nevertheless, permitted to retain its ancient native institutions. The Finns call their country "Suomenmaa," that is, "Land of Lakes," and very appropriately so, for Finland is a granite plateau, abounding in depressions filled with water. The hills nowhere attain a greater height than 2,000 feet: the coast is much indented, and fringed with islands and reefs. Of the total area, 11½ per cent. is covered with lakes, 54 per cent. is woodland, 4½ per cent. meadow-land, 1 per cent. arable land, and the rest consists of waste land and coarse pastures. The area is 144,254 square miles with a population of 2,176,421 (December 31st, 1884), of whom 1,828,300 are Finns, 306,500 Swedes, and 4,400 Russians; a few Laps lead a nomadic life in the north. Nearly all the inhabitants are Lutherans. Education is well cared for, and there is a flourishing university at Helsingfors. Formerly a granary of Sweden, the country at present draws much of its food from foreign sources, and occasionally it is visited by famines. The leading crops are rye, barley, oats, potatoes, beans and peas, flax and hemp, with a little tobacco. Berries largely supply the place of fruit. The live stock, in addition to horses, cattle, sheep, pigs, and goats, includes also the reindeer. Iron, copper, lead, and graphite are found, but no salt. The iron industry is of importance, and spinning and weaving of cotton, flax, and wool, distilling, the making of matches, sugar-refining, ship-building, and other branches of industry are carried on with success. The forests are a great source of wealth. By means of improved machinery immense quantities of timber are prepared for export, and in consequence of the facilities offered by improved means of communication the wood which formerly took two or three years to reach the ships, is now felled, prepared, and exported in one year. The exports include timber, butter, textile fabrics, iron, and steel. There are 820 miles of railway; and (1886) a marine of 1,624 vessels, of 256,473 tons.

Finland is a constitutional monarchy of a somewhat antiquated type. The Diet consists of four estates—nobles, parsons, citizens, and peasants. The Grand Duke alone can introduce bills, which become law after they have been carried by two successive Diets. There are 9 battalions of Finnish Rifles, mustering 4,899 men.

Vice-Consul, M. D'Anglade.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 204,090 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 86 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests, Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent, as the wines of Bordeaux, Burgundy, Champagne, &c., evidence (1885, 628,000,000 gal.). The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot for the manufacture of sugar, hops, &c. Its mineral re

* As a general rule modern French Ministries enjoy but a short term of office. In the eighteen years since the fall of the Empire there will have been twenty-three Ministries:—

1857 M. Jules Favre.	1880 M. Jules Ferry.
1871 M. Dufaure.	1881 M. Leon Gambetta.
1873 Duc de Broglie.	1882 M. C. de Freycinet (2).
1874 General de Cissey.	1882 M. Duclerc.
1875 M. Buffet.	1883 M. Fallières.
1876 M. Dufaure (2).	1883 M. Jules Ferry (2).
1876 M. Simon.	1885 M. Brisson.
1877 Duc de Broglie (2).	1886 M. C. de Freycinet (3).
1877 Gen. de Rochebouet.	1886 M. Goblet.
1877 M. Dufaure (3).	1887 M. Rouvier.
1879 M. Waddington.	1887
1879 M. Chas. de Freycinet.	

sources are comparatively small. They include, however, coal (1886, 19,500,000 tons), pig iron (1,5-7,850), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. Its oyster fisheries are an important industrial feature. The increase of population is very slow: in 1700 it numbered 19,660,320; in 1801 it had increased to 27,349,003; in 1821 to 30,461,873; in 1856 to 38,039,364; at the next census in 1861 it receded to 37,386,161; but in 1866 it again increased to 33,067,074. This was inclusive of the provinces ceded to Germany in 1871, which, in 1866, had 1,597,228 inhabitants. Thus, the present territory of France had, in 1866, a population of 36,469,836; in 1886 the entire population was 37,885,905, an increase of only 1,783,184 in 14 years. The disastrous war of 1870 reduced this to 36,102,221 in 1872. Even this comparatively small increase of the population was (as it, in fact, still is) chiefly due to immigration from other countries, and not to the natural increase by an annually increasing number of births. The annual number of births has, indeed, been steadily decreasing in France during late years, whilst, at the same time, that of deaths has been increasing. The excess of births over deaths in 1886 was only 52,560 against 85,464 in 1885; 79,000 in 1884; 97,000 in 1883; and 108,000 in 1881. It is interesting to compare these statistics with those of the United Kingdom. In 1881 the population of France amounted to 37,672,048, 692,800 of whom were Protestants and 53,436 Jews. The effective strength of the army under the colours is 523,833 men. On a war footing the army consists of 1,392,200 men (field force, 754,600, with 2,622 guns; dépôts, 180,000; garrison troops, 453,600). The navy consisted in 1886 of 507 steam vessels, of which 63 were ironclads (22 still building), 59 large cruisers, and 140 torpedo vessels and boats. The educational system is governmental, and presided over by a Minister of Instruction, part of the expense being defrayed by the State. In addition to the faculties of Theology, Law, and Medicine, the Lycées, the Colleges, the Naval and Military Schools, and the Ecole Polytechnique, the State supports numerous establishments for instruction in special branches of knowledge. The system of railways in France is very extensive; they are entirely *concedés*, i.e. they will become State property after the expiration of the concession. The entire length open for traffic in 1886 was 29,189 miles. The length of telegraphs is 60,930 miles. There is a mercantile marine of 15,266 vessels, of 1,000,215 tons.

The imports consist largely of food and raw materials; the exports of manufactured goods, the most important among the former are cereals and flour, wine (the imports of which exceed the exports), wool, raw silk, timber, hides and skins, cotton, coal, live animals, cotton yarns and manufactures. The exports rank thus:—woollens, wine, silks, hides and skins, raw silk, leather wares, haberdashery, &c., cheese and butter. Of the total trade 20 per cent. is with the United Kingdom, 12 per cent. with Belgium, 9 per cent. with Germany, 7½ per cent. with the United States, and 7 per cent. with Italy.

The chief articles exported to the United Kingdom in 1886 were:—

Cotton Manufacts.	£396,965
Eggs, 381,969,990	1,215,317
Butter	2,261,023
Articles of Food	1,202,287
Clocks and Watches	656,229
Corn, all kinds	484,795
Artificial Flowers	567,968
and Feathers	599,010
Fruit	599,010
Gloves	£727,461
Lace	548,864
Leather & Hides	1,112,652
Silk, all kinds	6,744,728
Skins and Fur	337,676
Sugar	839,715
Wines and Spirits	3,918,099
Wool	1,241,514
Woollen Manfrs.	5,514,998

The chief articles imported from the United Kingdom in 1886 were:—

Apparel of all kinds £325,422	Machinery	£732,898	
Corns, &c.	1,814,420	Metals and Hard-ware	1,031,912
Cotton Yarn	844,652	Silk and Manfrs.	591,140
Cotton Manfrs.	880,806	Articles of Food	553,737
Linen Manfrs.	270,134	Woollen Manfr. &c.	3,149,538
Hides and Leather	383,433		

Revenue, 1887	£151,106,868
Expenditure, 1887 (estimated)	151,122,660
Public debt, funded, 1886	830,209,324
Public debt, floating, annuities, &c. capitalized	728,372,372
Total value of imports, 1886	169,374,520
Total value of exports, 1886	132,009,200
Imports from U. K. (incl. Col.), 1886	20,901,202
Exports to U. K. (incl. Col.), 1886	37,334,880

CAPITAL, Paris. Population (1887), 2,344,550.

DEPENDENCIES. — Within recent years the French Colonial Empire has been increased by extensive acquisitions in Africa and Asia, but these can scarcely be looked upon as compensating for the loss of Canada in the 18th, and of that of Louisiana in the beginning of the present century. Algeria in North Africa (see p. 470) is in several respects looked upon as an integral part of France, whilst Tunis (see p. 513) is a French "protectorate." On the Senegal great efforts are now being made to found an African Empire. The road to the Niger has been secured by forts, a treaty of commerce and amity has been concluded with the Sultan of Segou, and a steamer has actually been launched upon the Niger. A railway, connecting the Senegal with that river, is being constructed. Official reports estimate the area of the districts in Senegambia acknowledging the sovereignty of France at 97,000 square miles, which implies a population of about one to one and a half million of inhabitants. On the Ivory Coast France maintains the trading posts of Assini and Grand Bassam; and further east, on the Slave Coast, she has secured a protectorate over Kutanu, or Porto Novo. The territory of the Gaboon, Ogowe, and Congo, as defined at the Berlin Congress, embraces 174,340 square miles, with about 1,700,000 inhabitants. In Eastern Africa France possesses the wealthy Island of Réunion (764 sq. miles, pop. 170,518), the Comoro Islands (760 sq. miles, pop. 64,000), and a few insignificant islands on the coast of Madagascar (see p. 497), upon which large island she has forced a French protectorate. Further in the north France has occupied Obok, and the whole Gulf of Tajura opposite Aden. Altogether the African possessions and Protectorates of France extend over 672,100 square miles, with about 12,000,000 inhabitants.

In Asia there remain to her Pondicherry, Chandernagore, and a few others of her once-important possessions in India, having together an area of 196 square miles, and a population of 273,283. In Further India France has firmly established her rule in Cochin China (see p. 481), has forced her protectorate upon Cambodia (32,380 sq. miles, pop. 1,500,000) in 1867 (see p. 477), and upon the old Empire of Annam in 1884, the northern portion of which is known

as Tongking, and has been absolutely surrendered (see p. 512). These recent acquisitions give French Asia 196,830 square miles, with 18,425,000 inhabitants.

In America France possesses in the small islets of St. Pierre and Miquelon (90 sq. miles, pop. 5,565) an excellent basis for her Newfoundland fisheries; in Martinique and Guadaloupe (1,103 sq. miles, pop. 366,761)—two of the most fertile West India islands—also the small island of St. Bartholomew, and in Cayenne or French Guiana (46,880 sq. miles, pop. 36,000) a wide territory in South America.

In the Pacific Ocean the French colonies consist of two groups—New Caledonia, with the Loyalty Islands, in the west (7,654 sq. miles, pop. 60,703); and Tahiti, or the Society Islands, with the Marquesas, the Low Archipelago or Tuamotu, and the Austral Isles or Tubuai (1,412 sq. miles, pop. 25,050), in the east. Uver, or Wallis (37 square miles, pop. 3,500), to the N. E. of Fiji, was annexed in 1836. Clipperton, in the Northern Pacific, is merely an uninhabited islet of 2 square miles. The New Hebrides (5,106 sq. miles, pop. 70,000) have recently been occupied as if for a permanency, but are to be abandoned.

The total area of French colonies, dependencies, and protectorates amounts thus to about 932,500 square miles, with a population of nearly 31,000,000; and it is worthy of note that within all these territories the number of Frenchmen does not probably exceed half a million.

Paris is distant from London, 267 miles; transit, 10 to 12 hours; postage, 2½d.; news or books, 2 oz. ½d.; parcels, 3 lbs. 1s. 4d., 7 lbs. 1s. 9d.; telegrams, per word, 2½d.

See ALGERIA, p. 470.

THE GERMAN EMPIRE.

Emperor, William (King of Prussia), proclaimed German Emperor at Versailles, 18 Jan., 1871.
Chancellor, Prince von Bismarck.
Sec. of State For. Affairs, Count H. von Bismarck.
Sec. of State, Interior, Von Boetticher.
Ambassador in London, Count Hatzfeldt-Wildenberg, 9, Carlton House Terrace, S.W.
Councillor of Embassy, Baron L. von Plessen.
Secretary, Count Paul Wolff-Metternich.
Attaché, Prince Pless.
Military and Naval Attaché, Captain William Schroeder, German Navy.
Attaché (Architecture and Engineering), Inspector Thür.

Consul-Gen., P. L. W. Jordan, 27, Finsbury Circus.
Councillor and Director of the Chancery of the Embassy, W. A. Schmettau.

The Empire, according to the Constitution of 16th April, 1871, is confederate, under the presidency of the King of Prussia, who bears the hereditary title of German Emperor. He has the right and the duty of representing the Empire for all purposes of international law, of declaring war, making peace and treaties, &c. He is the commander-in-chief of the whole army and navy in peace as well as in war, except the military forces of Bavaria and Wurtemberg, which form—but in peace time only—separate corps under the command of their respective kings. He names and dismisses the officers and functionaries of the Empire. His edicts, made in the name of the Empire, must be countersigned by the Chancellor, who, as the First Minister of the Empire, is by his signature responsible for them. The third factor of Govern-

ment is the *Reichstag*, or legislative parliament, consisting of one deputy to about every hundred thousand inhabitants of the Empire, and the *Bundesrath*, formed of delegates of the confederated governments.

The departments especially belonging to the legislation, administration, or control of the Empire and its government are—all matters connected with the army, navy, post, and telegraphy, passports, emigration, colonization, political laws of the citizens, the whole civil law, coinage, banking, commerce, navigation, the railways, &c. The bills promulgated by the *Bundesrath* and the *Reichstag* in accordance, and sanctioned by the Emperor, are compulsory on all Governments of the Empire, and annul *eo ipso* all possible regulations contradictory to them in the different States.

This large Empire of Central Europe, situate in lat. 47° 18'—55° 52' N. and long. 5° 50'—22° 50' E., comprises the following 25 States, and a Reichsland (see p. 493):—

	English sq. miles.	Pop. 1885.	Inc. 1880-5 per cent.
1. Prussia.....	134,467	28,313,833	3·7
2. Bavaria.....	29,291	5,416,180	2·4
3. Saxony.....	5,789	3,129,168	6·7
4. Wurtemberg....	7,531	1,994,849	1·2
5. Baden.....	5,803	1,600,839	1·9
6. Hesse.....	2,965	956,170	2·1
7. Mecklenburg-Schwerin.....	5,137	575,140	dec. 0·3
8. Saxo-Weimar....	1,387	313,668	1·3
9. Mecklenburg-Streititz.....	1,131	98,371	1·9
10. Oldenburg.....	2,479	341,250	1·1
11. Brunswick.....	1,425	372,580	6·4
12. Saxo-Meiningen	953	214,697	3·6
13. Saxo-Altenburg..	511	161,129	3·8
14. Saxo-Coburg and Gotha.....	760	198,717	2·0
15. Anhalt.....	906	247,603	6·2
16. Schwarzburg-Rudolstadt.....	363	83,939	4·4
17. Schwarzburg-Sondershausen....	333	73,623	3·5
18. Waldeck.....	433	56,565	0·1
19. Reuss (elder line)	122	53,787	5·7
20. Reuss (younger line)	319	112,118	10·1
21. Schaumburg Lippe	131	37,204	5·0
22. Lippe.....	472	123,250	2·9
23. Lubek.....	115	67,658	6·2
24. Bremen.....	99	166,392	6·0
25. Hamburg.....	158	518,712	13·3
26. Alsace-Lorraine..	5,602	1,563,145	dec. 0·2
Total German Empire	208,683	46,840,587	3·5

According to religious confessions there were (1880) 28,731,152 Protestants (62·6 per cent.), 16,232,651 Roman Catholics (35·9 per cent.), 561,612 Jews (1·2 per cent.).

German is spoken by the bulk of the inhabitants, but there reside within the limits of the Empire over 3,000,000 persons of other nationalities, viz. 2,500,000 Poles and 150,000 Lithuanians in the eastern parts of Prussia; 140,000 Wends in Lusatia, 50,000 Chechians on the Bohemian frontier, 140,000 Danes in Schleswig, and 220,000 Wallones and French to the west of the Rhine. On the other hand, about 13,000,000 Germans live in Austria-Hungary, Switzerland, and Russia.

There are in Germany 21 towns of over 100,000 inhabitants—viz., Berlin (1,315,412), Ham-

burg-Altona (406,759), Breslau (208,893), Munich (260,000), Dresden (245,515), Elberfeld-Barmen (209,557), Leipzig (170,076), Cologne (161,260), Frankfurt-on-the-Main (154,504), Königsberg (151,157), Hanover (139,330), Stuttgart (125,906), Bremen (118,615), Nürnberg (115,981), Düsseldorf (115,183), Danzig (114,822), Magdeburg (114,052), Strassburg (112,019), Chemnitz (110,808).

EMIGRATION.—Between 1871-85 1,419,300 Germans emigrated, of whom 1,355,600 went to the United States. In 1881 the number of emigrants reached the exceptional figure of 210,547; in 1883 it had sunk down to 166,119; in 1885 it was only 110,028.

Education.—There are 21 universities in the Empire, with 2,192 professors and teachers, attended by about 27,784 matriculated students. Education is general and compulsory.

Germany is becoming more and more a manufacturing country. In 1883, 43 per cent. of the population were supported by agriculture, 36 per cent. by mining and industries, 10 per cent. by commerce and transportation. Of the total area 48·5 per cent. are cultivated, 11 per cent. consist of meadows and pastures, 26 per cent. are covered with forest. The agricultural produce no longer suffices to support the population. The produce of the mines was valued in 1885 at £28,600,000, and included 58,293,873 tons of coal, 15,267,477 tons of lignite, 9,061,988 tons of iron ore, 2,030,256 tons of salt, besides copper, lead, zinc, silver, &c. The Lower Rhine (Crefeld, Elberfeld-Barmen), Alsace (Mülhausen), Saxony (Chemnitz), Westphalia, and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1886 were the following. One of the items is most objectionable—sugar; the export of this is encouraged by a system of bounties, with the result that the sugar-refining trade of this country has been ruined:—

Animals, living.....	£820,806	Hides & leather.....	£404,243
Articles of food.....	735,906	Musical instruments.....	335,278
Bacon & hams.....	1,036,658	Paper, prints, &c.....	370,099
Corn of all kinds.....	1,652,176	Seeds of all kinds.....	349,962
Cotton manufactures..	527,873	Sugar.....	5,183,163
Eggs, 309,739,800.....	744,067	Wine, spirits, and beer.....	221,686
Farinaceous substances.....	364,625	Wood & timber.....	753,946
Flax & hemp.....	329,353	Wool & manufactures.	1,140,008
Glass.....	440,527	Zinc.....	511,932

During the same period the chief articles of import from the United Kingdom were:—

Apparel.....	£101,098	Linen yarn, &c.....	£951,035
Chemical products.....	208,261	Machinery.....	1,184,683
Coal, &c.....	1,081,814	Manure.....	438,496
Cotton yarn.....	1,724,061	Silk, seeds, &c.....	585,115
Cotton manufactures..	1,378,908	Silk, skins, &c.....	207,523
Herrings.....	528,424	Wool.....	641,118
Metals & hardware.....	1,104,574	Woolen yarn and manufactures.....	2,783,728
Jute, &c.....	145,358	Yarn, Alpaca, &c.....	653,267
Leather & hides.....	354,438		

The mercantile marine in 1886 consisted of 4,135 vessels, with a tonnage of 1,282,449, manned by 38,931 men; of these 664 were steamers, with a tonnage of 420,605.

The total length of the railways in the Empire on 2nd April, 1886, extended to 23,535 miles, of which above three-fourths belong to the State. At the end of 1885 the length of telegraph lines was 51,537 miles. In 1885 there were 17,452 post-offices, with 93,845 employés, and 2,003,000,000 letters, &c., were conveyed.

ZOLLVEREIN.—The Empire forms a Customs League, named "Zollverein," to which also the Grand Duchy of Luxemburg belongs, but from which are excepted the free ports of Hamburg and Bremen. The leading imports (classified according to value) are grain and flour (£21,000,000), wool, cotton, silk, coffee, animals, hides, woollen yarn, petroleum, horses, and tobacco. The chief exports are woollen manufactures (£9,250,000), sugar, silk manufactures, iron, animals, leather wares, cotton stuffs, grain and flour, coal and machinery. Of the total trade 20 per cent. is with the Hanse Towns, 16 per cent. with the United Kingdom, 14 per cent. with Holland and Belgium. A large portion of the trade with England does not appear in the German returns, as it is carried on through the Hanse Towns, Holland and Belgium.

BUDGET.—The revenues for 1887-88 consist of the following items:—Customs and excise, £19,219,265; from post, telegraph, and railways, £2,262,224; contributions of the Confederate States, £8,253,244; total, £36,608,240. The expenditure amounts to the same. £21,122,937 is the cost of the army; £2,336,077 the cost of the navy. The National Debt, 1887, is £28,818,630. The funds created from the French war indemnity for fortifications, invalids, and war purposes amounted in April, 1885, to £34,229,428.

The GERMAN ARMY on the peace footing consists of 21,238 officers and 468,409 men, with 81,598 horses and 1,486 guns. On the war footing the total strength amounts to 35,427 officers and 1,456,677 men, with 312,731 horses and 2,808 guns. The field army has 744,031 men and 19,391 officers, 242,415 horses and 2,040 guns; the dépôt troops, "Ersatztruppen," number 296,614 men, 4,796 officers, with 31,373 horses and 444 guns; the garrison troops, "Besatzungstruppen," with 416,032 men, 11,240 officers, 38,943 horses, and 324 guns. The "Landsturm," a last reserve, is not included in the above, but it is not organized in time of peace. Service in the army is compulsory. In 1887, 41,135 men, forming 31 battalions, 24 field batteries, 9 companies of pioneers, and 14 of train, were added to the peace establishment.

The imperial navy in 1886 consisted of 134 steam-vessels, with 554 guns, including 27 iron-clads, mounting 160 guns, 24 cruisers, and 66 torpedo-boats, with 18,000 men. Thirty vessels were building.

PRUSSIA.

King, William, German Emperor, born 22 Mar., 1797; suc. 2 Jan., 1861; married 11 June, 1829, Augusta (born 30 Sept., 1811), daughter of Charles Fredk., Grand Duke of Saxe-Weimar.
Heir Apparent, Prince Royal, Frederick William (German Crown Prince), born 18 Oct., 1831; married 25 Jan., 1858, Victoria, Princess Royal of Great Britain, born 21 Nov. 1840.
Minister of Foreign Affairs, of Commerce, and Premier, Prince von Bismarck.
Vice-President and Interior, Von Puttkamer.
War, General Bronsart von Schellendorff.
Public Works, Maybach.
Finances, Dr. von Scholz.
Agriculture, Woods, and Forests, Dr. Lucius.
Justice, Dr. Friedberg.
Instruction and Worship, Von Gossler.
Minister of State, Secretary of State, and Interior, Herr von Boetticher.

Prussia is an extensive Kingdom of Central Europe, comprising the larger portion of Germany, situate in lat. 49° 7'—55° 52' N. and long. 5° 50'—22° 50' E. On the 1st of December, 1885, the population was as follows:—

Provinces.	Sq. miles, English.	Population.
1. East Prussia	14,278	1,958,838
2. West Prussia	9,447	1,497,950
3. Brandenburg	15,406	3,657,822
4. Pomerania	11,622	1,505,735
5. Posen	11,180	1,715,024
6. Silesia	15,558	4,111,399
7. Saxony	9,748	2,427,979
8. Schleswig-Holstein	7,275	1,150,233
9. Hanover	14,836	2,172,224
10. Westphalia	7,800	2,202,760
11. Hesse-Nassau	6,058	1,592,152
12. Rhenish Provinces	10,418	4,344,802
13. Hohenzollern	441	66,795
Total	134,467	28,313,333

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. Its principal mountains are the Harz and the Riesen-gebirge, to

latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 10,000,000 acres, chiefly consisting of fir. Its minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones, and amber belong to the Crown. Agriculture and the rearing of cattle constitute the principal sources of employment and wealth of the rural population of the entire monarchy. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated and largely exported. The western division is noted for its excellent fruits and vegetables, and the Rhenish provinces stand pre-eminent for their wines. Prussia has upwards of 100 mineral springs, possessing various properties and qualities. Its manufactures consist chiefly of linens, for which Silesia, Saxony, and Westphalia have long been noted. The cotton works are extensive. Besides these there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c.; woollens are made in almost every town and large village. Next in importance are leather, earthenware, glass, paper, and tobacco manufactures, and working in metals. Brewing is a business of great importance. The principal imports comprise coffee, tea, sugar, cotton, and other produce of the colonies; wines, silk, fruit, manufactured goods, tin, furs, dye-stuffs. The principal exports comprise linens, woollens, hardware, corn, wool, timber, pitch, linseed, tobacco, mineral waters; to which may be added horses, horned cattle, hams, salt meat, &c.; and from the Rhenish provinces, wine.

For the work of education there are about 34,000 elementary schools, attended by about 4,500,000 scholars. There are also 520 high schools, in addition to numerous technical schools.

There are ten celebrated universities in Prussia, attended by about 15,000 matriculated students in 1886; and the whole of the educational establishments are under the immediate control of the "Minister of Public Instruction and Ecclesiastical Affairs." The Royal Family belong to the Evangelical Church ('Evangelical' is a sort of compromise between Lutheran and Calvinist); and the majority of the population consists of Evangelicals (Protestants, who numbered 17,633,279 in 1880; of Roman Catholics there were 9,206,283, and of Jews 363,790.

Estimated public revenue, 1886-87 .. £64,378,025
Expenditure, the same.

SAXONY.

King, Albert, born 23 April, 1828; *suc.* 29 Oct., 1873; *mar.* 18 June, 1853, Caroline, dau. of the late Prince Gustave de Wasa, b. 5 Aug., 1833.
Heir Presumptive, his brother, Prince George, b. 8 Aug., 1832; *m.* 11 May, 1859, Marie Anne, Infanta of Portugal, who died 5 Feb., 1884.
Minister of State, Count von Fabricé.

A Kingdom of Germany, the third in import-

ance and population of the German Empire, comprising an area of 5,789 English square miles, with a population of 3,182,003, among whom are 86,952 Roman Catholics, and 7,755 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation; its agricultural products consist of the usual cereals and leguminous plants, with rape, buckwheat, hops, flax, and fruits of all kinds suited to the climate. The forests supply timber of excellent quality, and in such abundance as to render them a great source of industry and wealth. The minerals are another great source of wealth, the ores being both rich and abundant. The mines consist of silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides coal, marble, porcelain-earth, and various gems—as topazes, chrysolites, amethysts, cornelians, garnets, &c. The smelting is centralized in large establishments belonging to the State. Manufacturing industry has been greatly developed, and in some branches carried to a high degree of perfection, employing about three-fifths of the population. The special manufactures of Saxony are: Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, real and imitation laces, embroideries, curtains, paper, wood and straw pulp, and bottle glass. The government factory at Meissen continues to produce imitations of the famous Dresden china formerly made there. The great fairs of Leipzig, although well attended, have lost much of their former importance. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden, Leipzig, the great book-market, with, next to that of Berlin, the most frequented University of Germany (having 3,069 matriculated students in 1886); Freiberg, in the mining district; Zwickau and Chemnitz, the Manchester of Saxony.

Revenue and expenditure, Budget, 1886 £3,743,277
Amount of public debt (chiefly for railways), 1886..... 32,511,530

ANHALT, Duchy of.

Duke, Frederick, born 29 April, 1831; *suc.* 22 May, 1871; *married*, 22 April, 1854, Princess Antoinette of Saxe-Altenburg, born 17 April, 1838.

Heir Apparent, Prince Friedrich, born 19 August, 1856.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 906 square miles and a population of 247,603. Budget, 1886, £946,346; Debt, £254,231.

CAPITAL, Dessau. Population, 27,584.

BRUNSWICK, Duchy of.

Regent, Prince Albrecht of Prussia, born 8 May, 1837; *elected* 21 Oct., 1885.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,425 English square miles, and a population of 372,580, nearly all of whom are Pro-

testants; 9,500 only being Roman Catholics, and 1,400 Jews. Budget in 1866, £486,700; Debt, £3,790,380.

CAPITAL, Brunswick. Population, 85,385.

MECKLENBURG-SCHWERIN, Grand Duchy of. *Grand Duke*, Frederick Francis III., b. 19 March, 1851; *suc.* 15 April, 1883; *married* 24 Jan., 1879, to Princess Anastasia, dau. of the Grand Duke Michael of Russia.

Heir Apparent, Hereditary Duke Fredk. Francis Michael, born 9 April, 1882.

Min. of State, Count H. F. C. von Bassowitz.

A maritime State of Northern Germany, on the Baltic, comprising an area of 5,137 square miles, with a population of 575,140. The Legislative power is vested in 632 proprietors of the Knights' estates and 40 representatives of the towns. Revenue, £700,000; debt, £1,122,400.

CAPITAL, Schwerin. Population, 31,532.

MECKLENBURG-STRELITZ, Grand Duchy of. *Grand Duke*, Frederick William I., born 17 Oct., 1819; *suc.* 6 Sept., 1860; *mar.* 28 June, 1843, Princess Augusta of Cambridge.

Heir Apparent, Adolphus Fred., b. 22 July, 1843; *married* 17 April, 1877, the Princess Elizabeth of Anhalt, born 7 Sept. 1857.

A State of Northern Germany, consisting of two detached pieces, separated by Mecklenburg-Schwerin. Area, 1,131 square miles; population, 98,371. No proper budget. Finances in good condition.

CAPITAL, Neu-Strelitz. Population, 9,407.

OLDENBURG, Grand Duchy of.

Grand Duke, Peter, born 8 July, 1827; *suc.* 27 February, 1853; *married* 10 Feb., 1852, Elizabeth, daughter of Prince Joseph of Saxe-Altenburg, born 26 March, 1826.

Heir Apparent, Frederic Augustus, b. 16 Nov., 1852; *married* Feb. 18, 1878, to Princess Elizabeth, second daughter of Prince Frederick Charles of Prussia.

A maritime State of North Germany, situate on the North Sea and the Weser, with an area of 2,479 square miles and a population of 341,250. Budget, 1887: revenue, £335,759; expenditure, £360,323; debt, 1885, £1,857,298.

CAPITAL, Oldenburg. Population, 20,575.

SAXE-COBURG AND GOTHA, Duchies of.

Duke, Ernest II., born 21 June, 1818; *suc.* 29 Jan., 1844; *married* 3 May, 1842, Alexandrine, dau. of the late Grand Duke Leopold of Baden, born 6 Dec. 1820.

Heir Presumptive, his Nephew, H.R.H. Prince Alfred, Duke of Edinburgh; b. 6 August, 1844; *mar.* Jan. 23, 1874, to the Grand Duchess Marie, only daughter of the late Emperor of Russia.

A State consisting of two principal and several smaller detached portions, with an area of 760 English sq. miles, and a population of 193,829, the majority of whom are Protestants. The country is distinguished by beautiful forests and castles of the Duke (Reinhardtsbrunn and Rosenau, favourite retreat of Queen Victoria). The capital, Gotha (population 27,802), is the seat of the oldest life assurance company in Germany; also of the famous Geographical Institute of Justus Perthes. Coburg (the other capital) has 16,210 inhabitants. The Crown revenue is (every year in the period 1885-89) £30,152, and that of the State £166,958.

British Chargé d'Affaires, Ralph Milbanke .. £500

WALDECK.

Prince, George Victor, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hoheneck and Geroldseck, Wasziengen, &c., born 14 Jan., 1831; *suc.* 15 May, 1845; *m.* 6 Sept., 1853, Princess Helena of Nassau, b. 22 August, 1831, and has issue—Pauline, b. 15 October, 1855; *Marie*, b. 23 May, 1857, *m.* 15 Feb., 1877, Prince William, heir to the Crown of Wurtemberg, d. 30 April, 1882; *Emma*, b. 1 Aug., 1858, *m.* 7 Jan., 1879, to the King of Holland; *Helena Frederica Augusta*, b. 17 Feb., 1861, *married* 27 April, 1882, the late Duke of Albany (who died 28 March, 1884); *Frederick* (Prince-hereditary), born 20 Jan., 1865; *Elizabeth*, born 6 Sept., 1873.

A Principality in the north-west of Germany, with an area of 433 square miles, and 56,565 inhabitants. The Budget for 1886 gives an income of £51,504, and an expenditure of £47,726. There is also a Debt of £116,471.

CAPITAL, Arolsen. Population, 2,442.

British Chargé d'Affaires, Ralph Milbanke (resident at Coburg).

THE HANSE TOWNS.

The Hanse Towns comprise the three Republics of Hamburg, Bremen, and Lübeck, and are situated in the north of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 70 miles from the sea. Bremen is much smaller, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremenhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situate near the Baltic; its commerce is principally with Norway, Sweden, and Russia.

The commerce between the Hanse Towns and Great Britain is very large; the imports from United Kingdom to Hamburg alone in 1886 (excluding bullion) amounted to £19,409,455.

HAMBURG possesses an area of 158 square miles, and a total population of 529,090.

BAVARIA.

King, Otto, born 27 April, 1848; succeeded his late brother, Louis II., 13 June, 1886.
Regent, Prince Luitpold, born 12 March, 1821, uncle of the late and present Kings; appointed Regent, 14 June, 1886.
Ministers of State—*President*, Dr. Baron von Lutz, Dr. von Fœustle, Dr. von Riedel, Baron von Crailsheim, Baron von Feilitzsch, von Heinleth.

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 33' N. lat. and 9°—13° 43' E. long.; the western part, forming the Palatinate, is on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,375 square miles, and a population (in 1885) of 5,420,199. In 1880, 3,839,168 were Roman Catholics, 521,114 Protestants, and 53,697 Jews. Bavaria contributes two *corps d'armée* to the forces of the German Empire; their strength is about 9,224 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in Lower Franconia and in the Palatinate. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. There are three Universities, viz., Munich, Würzburg, and Erlangen.

Budget, 1887..... £12,074,582
 Public debt, 1885 (including railway debt, £48,375,831)..... 67,635,620

CAPITAL, Munich. Population (1885), 261,981.

Brit. Chargé d'Aff., Victor A. W. Drummond £1,450
2nd Secretary, Henry G. G. Cadogan .. 330
Consul, John S. Smith.

WURTEMBERG.

King, Charles, born 6 March, 1823; *suc.* 25 June, 1864; *mar.* 13 July, 1846, the Grand Duchess Olga, dau. of the Emperor Nicholas of Russia.
Heir Presumptive, Prince William, born 25 Feb., 1848; *mar.* 15 Feb., 1877, Princess Marie of Waldeck, who died 30 April, 1882, *remar.* 8 April, 1886, Princess Charlotte of Schaumburg-Lippe.
President of Ministry, Baron von Mittnacht.

A Kingdom of South Germany, with an area of 7,531 English square miles, and a population (in 1885) of 1,994,849, of whom thirty per cent. are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Wheat, oats, barley, hemp, hops, rye, potatoes, beans, maize, and turnips are the principal agricultural products. The

minerals, consisting chiefly of iron, granite, limestone, ironstone, fireclay, &c., abound in the Black Forest; mineral springs are numerous throughout the kingdom. The principal rivers are the Danube and the Neckar. The manufactures generally are linen, woollen and cotton fabrics, carpets, porcelain, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, cabinet-work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton, and linen fabrics, stags, beer, wine, &c.

Budget, 1886..... £2,699,773
 Total amount of public debt, Nov. 1886 (including £18,698,355 for railways) 20,656,857

BADEN, Grand Duchy of.

Grand Duke, Frederick, born 9 Sep., 1826; *Regent*, 24 April, 1852; *suc.* 5 Sept. 1856; *mar.* 20 Sept., 1856, Louise, born 3 Dec. 1838, daughter of Emperor William I. of Germany.
Heir Apparent, Frederick, born 9 July, 1857; *m.* Oct., 1885, Princess Hilda of Nassau.
President of Ministry, L. Turban.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Alsace and Switzerland. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It is divided into four districts, viz., Constance, Freiburg, Mannheim, and Carlsruhe, and comprises an area of 5,843 square miles, 3,200 of which are under cultivation—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce. Its population in 1885 was 1,600,839, two-thirds of whom were Catholics, and one-third Protestants (Jews 27,300). Nearly one-half the people are engaged in agriculture. Timber is extensively grown, and much attention is given to the breeding of horses, cattle, sheep, &c. Tobacco is cultivated to a large extent. The chief manufactures are cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, and machinery. There are 1,885 schools and colleges, and two universities. There are 830 miles of railway, mostly belonging to the State, constructed at a cost of £20,709,000.

Public revenue, 1887-88..... £2,839,311

HESSE, Grand Duchy of.

Grand Duke, Louis IV., born 12 Sept., 1837; *suc.* 13 June, 1877; *mar.* 1 July, 1862, Alice (b. April 25, 1843; d. 14 Dec., 1878), 2nd daughter of Queen Victoria.
Heir Apparent, Ernest Louis, born 25 Nov., 1868.
President of Ministry, J. J. Finger.

A central State in the west of Germany, comprising two disconnected territories, nearly equal in size, containing an area of 2,965 square

miles, and a population (in 1885) of 956,272, of whom two-thirds were Protestants. The southern portion is traversed by the Rhine, and the Main forms part of its boundary. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Giessen has a university.

Budget, 1885-88..... each year £1,215,923
Public debt, 1886 (mostly for railways) 1,026,250

CAPITAL, Darmstadt. Population, 52,008.

Brit. Chargé d'Affaires, Hon. William Nassau Jocelyn, C.B. £1,250
Consul-Gen., Charles Oppenheimer (at Frankfort).

ALSACE-LORRAINE.

Statthalter, Prince Clovis von Hohenlohe-Schillingfürst.

Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, and restored to Germany, after a sanguinary war with France, by the Treaty of Versailles in 1871. It embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco and hops, iron, and coal are among its leading productions, and the cotton industry is most flourishing.

The new province is called a "Reichsland," or imperial territory, and is governed by a "Statthalter," appointed by the Emperor. There is an elective Provincial Committee of 58 members. The area is 5,602 square miles. The population in 1885 was 1,563,145. French was spoken by about 200,000 persons.

The principal towns are Strassburg (112,019), Mülhausen (69,676), and Metz (53,928).

Revenue (1886-87)..... £2,157,321
Debt (1886) 1,682,754

DEPENDENCIES.—Although Germany sends forth a larger number of emigrants than any other country in Europe, excepting the British Islands, it was not till the year 1884 that she made an effort to acquire so-called colonial possessions. These annexations have been confined hitherto to Africa and the Pacific. The annexations which Dr. Nachtigal effected in 1884 along the west coast, between the British Gold Coast and the Orange River, include—Togo Land, adjoining the Gold Coast on the east; the territory extending from the Rio del Rey southwards, past the Cameroons, to the French border; and the whole of the Dama and Nama coast, from Cape Frio to the Orange River, excepting, however, Walvisch Bay, which remains with Great Britain. By a convention with France, concluded in 1886, the Rio Campos is to form the boundary between the Protectorates of France and Germany. The Baptist missionary settlement of Victoria, at the foot of the Cameroons, was acquired by Germany in 1886 by purchase. The Dama and Nama lands have an area of 200,000 square miles, with about 236,000 inhabitants, whose chiefs cheerfully signed a treaty in 1876 which placed them under the rule of Queen Victoria. This treaty, however, was not ratified. Hence Germany was able to step in; but though several of the Nama chiefs in the so-called Lüderitz Land in the south have accepted her overtures, the Dama chiefs, notwithstanding the presence of German missionaries, have hitherto for the most part remained

obdurate. On the east coast of Africa a German trading company claims to have "bought" vast territories at the behest of the Sultan of Zanzibar's dominions, stretching from Cape Guardafui to Cape Delgado, and extending inland to Lake Nyassa and beyond the Kilimanjaro. The boundaries between the Sultan of Zanzibar's dominions and the territories claimed by Germany have recently been defined by an International Commission. In the mean time, the Germans have established stations at the Durnford river, south of the Juba, in Chaga, in Usagara, and elsewhere.

In the Pacific, by virtue of an amicable arrangement with England, Germany has taken up a portion of the north coast of New Guinea and of the neighbouring islands, now called the Bismarck Archipelago, which comprise 88,330 square miles, with a population of 297,000. In addition to this the German flag was hoisted in 1885 in the Marshall and Gilbert Islands (320 square miles, population 46,600).

All in all these German "colonies" cover an area of at least 450,000 square miles, and they have a population of 355,000. There is not, however, believed to be a single square mile upon which Germans could settle as "colonists." An experimental "settlement" is, however, to be formed upon the slopes of the Kilimanjaro. The trade of these countries is as yet far too insignificant to cover the cost of even the most simple system of administration and supervision.

GREECE.

King, George, second son of the present King of Denmark, born 24 Dec., 1845; *elected King* of the Hellenes, 30 (18) March, 1863; *married*, 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, born 3 Sept. 1851.

Heir Apparent, Prince Constantinos, Duke of Sparta, born 2 August, 1868.

Prime Minister, Finance, & War, C. Tricoupis.

Foreign Affairs, Stephen Dragoumis.

James's Street, S.W.

Consul-Gen., Alex. A. Ionides, 19, Gt. Winchester

Street, E.C.

Consul at Glasgow, J. Inches Robertson.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40'—40° 30' N. and long. 18° 20'—25° 50' E., comprising an area of 24,977 square miles, with a population (in 1879) of 1,979,453. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into sixteen provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. Vegetation is varied, but agriculture is generally in a very backward state. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, hides, sugar, &c. Its exports consist of currants, olive oil, lead from the mines of Laurium, figs, and other fruit, hides, tobacco, valonia, wine, honey, wax, gun silk, and sponges. The army in 1887 consisted of 32,000 men. The navy consists of 52 vessels

of them small ironclads, with 2,200 men and officers. There are 115 miles of railway open for traffic. Telegraphs, 3,234 miles. The mercantile marine consists of 3,238 vessels of 272,679 tons.

HAWAIIAN ISLANDS.

King, David Kalakana, born 16 Nov., 1836; elected 12 Feb., 1874.

Minister of Foreign Affairs, Hon. Godfrey Brown.
Chargé d'Affaires in Eng., Abraham Hoffnung, 3, Hyde Park Gate, S. W.
Secretary of Legation, Sidney B. Fras. Hoffnung.
Consul-Gen. in London, Henry R. Armstrong, 4, Great Winchester Street Buildings, E. C.

A rich, beautiful, and most interesting chain of islands, situate in the North Pacific Ocean, forming the Kingdom of Hawaii, extending from south-east to north-west, in lat. 19°—22° 15' N. and long. 154° 48'—160° 20' W., discovered by Captain Cook in 1778. They consist of 13 islands, 8 of which are inhabited. All are very mountainous, and appear to be chiefly of volcanic origin: they occupy a united area of 6,587 square miles, with a population, in 1884, of 80,578, of whom 17,900 are Chinese, and 17,300 whites of European descent, mostly Portuguese. Hawaii, the largest of the group, contains two stupendous volcanic mountains, Mauna Loa, which is still in activity, and Mauna Kea, each rising to nearly 14,000 feet. In 1881 there was a vast eruption and a river of lava that threatened to destroy the town of Hilo. The imports are chiefly manufactured goods, while the exports consist mainly of sugar, coffee, rice, pulu, hides, &c. The islands are well situated for trade, being in the route between America and China. There is a commercial marine of 57 vessels of 9,820 tons; railways, 32 miles.

Public revenue, 1887-88 (estimated) £592,407
 Public expenditure 1887-88 (estimated) 587,423
 Public debt, 1887 192,456
 Total value of imports, 1885 810,671
 Total value of exports, 1885 1,844,969

CAPITAL, Honolulu. Population, 20,487.

 Honolulu, transit, 23 days; postage, 4d.; news, 1d.; books, 2 oz. 1d.

HAYTI, REPUBLIC OF.

President, General Salomon, elected 22 Oct., 1879.
Minister of Foreign Affairs, Brutus St. Victor.
Minister in France & England, Gen. Lafrestrie.
Chargé d'Affaires in London, Felix Dejean.
Consul, Maurice Erdmann, 101, Leadenhall St.

The Republic of Hayti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. It contains 29,830 square miles, of which 9,242 square miles belong to Hayti. It lies in N. lat. between 17° 37'—20°, and in W. longitude between 68° 20'—74° 28'; and belongs to the group of the Greater Antilles. The portion belonging to Hayti contains a population of 550,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits: it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with Great Britain, France, and the United States.

Revenue, customs only, 1886-87. £1,286,578
 Expenditure, 1886-87 1,284,631
 Debt (admitted, 1887) 2,500,000
 Imports, 1886-87 953,128
 Exports, 1886-87 1,456,371

Attaché, Sig. Giulio Desmè, Count Sarristori and Nobile Carlo Baroli.
Naval Attaché, Capt. Candiani d'Olivola.
Consul-Gen., H^r. Burnley Heath, 31, Old Jewry.
Vice-Consul, Cavaliere J. Buzzegoli.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. 36° 38' 30"—46° 40' 30" N. and long. 6° 30'—18° 30' E., and comprises a total area of 110,655 square miles (91,277 mainland, 19,378 islands), with a population, in 1885, of 29,699,781. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, the Duchies of Parma and Modena, and the Republic of San Marino. In 1870 the complete unity of the country under one crown was finally effected, and Rome became again the capital of Italy. The small community of San Marino, enclosed within the Italian Dominions, alone retains its independent form of government. The Kingdom is divided for administrative purposes into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389 miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines: the Alps form its Northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Arno, and the Tiber. Its wines are numerous and celebrated. The finest olives and olive-oil are furnished by Tuscany, Liguria, and the Province of Bari. The cultivation of silk forms an important agricultural industry. Fruits abound, and are of exquisite flavour, such as grapes, oranges, lemons, almonds, figs, dates, melons, pistachio-nuts, all of which are largely exported. The supply of sea and fresh-water fish is considerable. Sardines, tunny, and anchovies are exported. Among the principal minerals are iron, lead, zinc, copper, manganese and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a government monopoly. The total annual mineral produce is valued at £3,000,000, of which sulphur alone absorbed £1,700,000. The railway system is making rapid progress throughout the kingdom: in 1885 there were 6,167 miles open for traffic, and 18,135 miles of telegraph wire. The commercial marine (1884) consists of 7,287 vessels (215 steamers), of 971,001 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienne earths, pastes, coral, rags, boracic acid, raw and thrown

silk, hemp, cattle, straw hats, rice, iron, zinc, and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The manufactures are woollen, cotton, silk, hemp; and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats artistic works (such as mosaics, pottery Venetian glass, alabaster ornaments), &c. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. The army in 1887, including the local and active militia, had a total nominal strength of 2,597,172 men on the war footing. The Force is divided into Regular Army in peace, 265,839, in war, 636,582; movable militia, 379,908; local militia, 1,313,793. The navy in 1887, including ships building, consisted of 176 vessels, with 414 guns, and manned by about 8,000 men; 22 of the ships are ironclads, several of the most powerful construction. There are also 12 torpedo vessels and 95 torpedo-boats. Naples, with a population of more than 500,000 is the chief naval and military port of the kingdom, and will shortly take the precedence of Genoa.

ROME—Sovereign Pontiff, Leo XIII., born 2 March, 1810; elected 20 February, 1878.

Secretary of State to His Holiness, The Cardinal Rampolla del Tindaro, appointed 1887.

COLONIES.—Italy has long been ambitious to come into possession of colonies, and since the annexation of Tunis by France she looks upon Tripoli and Barka as her possible share should the Turkish Empire ultimately break to pieces. For the present, however, her colonial possessions are confined to the inhospitable coast of the Afer or Danakil country on the Red Sea, where Asab Bay and other places to the north of the Strait of Bab el Mandeb have been occupied. Massowa, further north, one of the chief ports of Abyssinia, by an arrangement with England, has an Italian garrison since February, 1885. It need hardly be said that the hope that these places might become important stations for a lucrative trade with Abyssinia has not hitherto been realized.

Mutsu Hito, the present Emperor, born 3rd Nov. 1852; *mar.* Haruko, 1862; succeeded to the throne 13 Feb., 1867; was crowned 13 Oct., 1868. *Heir.* Prince Yoshi Hito, born 31st Aug., 1879. *Prime Minister and Minister for Foreign Affairs.* Count Ito Hirobumi.

Minister of Commerce. Count Kuroda.
Minister of War. General Oyama Jwas.
Minister in London. Count Kawasé Masataka, 9, Cavendish Square, W.
Councillor of Legation. Viscount Okabé Nagamoto.

English Secretary. R. Stuart Lane.
Attachés. Nakata Takanori, Sasaki Takayoshi, and Nabeshima Keijiro.
Naval Attaché. Captain Hatchida.
Consul. Sonoda Kokichi, 84, Bishopsgate Street.

An ancient and extensive Empire, consisting of several large and many small islands, said to comprise in all above 3,800, the principal of which are Nippon, or Nihon (which in Japan gives name to the whole empire), Sikoku, Kiusiu, and Yezo, situate to the north of the main island, Nippon, from which it is separated by the Tsugaru Straits. The Kurile Islands belong to

Japan, and she has recently incorporated the Luchu (Riu-kiu) islands under the name of "Prefecture of Okinawa." The empire comprises an area estimated at 147,669 square miles, with a population in 1885 of 37,868,997. Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C., the present Emperor being the 123rd of his race; but the authentic history begins about 400 A.D. Within the last few years Japan has made unparalleled progress in civilization and the adoption of Western manners and customs. The feudal system under which the country was governed by numerous Lords has been abolished, and the Mikado is now absolutely the Sovereign of the State. An aristocracy after the European pattern has been introduced: instead of the old title of Daimio, those of Prince, Count, and Viscount have been conferred. The islands are eminently volcanic, and several of the summits are still eruptive; the chief of these, Fuji san, or Fuji yama, one of the most sacred mountains of Japan, about sixty miles from Tôkiô, is 12,365 ft. high. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses five or six fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound; agate, cornelian, and rock crystal are also found. Gold and silver mining is prosecuted on a small scale. It possesses a fair supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, which also furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria Japonica, Pinus Massoniana, and Zelkova Keaki; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat, and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied. The fruits are abundant, but for the most part of inferior quality. The chief manufactures are those of silk and cotton, japanned ware, porcelain, and bronze. The chief imports from Europe are cotton yarn, shirtings, mousseline, velvets, chintzes, and other piece-goods; metals, drugs, and medicines are also among the imports. Sugar is largely imported from China. The chief exports are silk, tea, rice, coal, fish-oil, lacquer-ware, copper, camphor, and dried fish. Railways are in process of construction; there were 370 miles open in 1887. The army consists of 38,425 men on a peace footing, and is increased to 131,475 in time of war; the navy of 37 vessels, of which six are armour-plated. Under treaties with Great Britain, the United States, and several other powers, the ports of Yedo (Tôkiô), Kanagawa (Yokohama), Hiogo, and Osaka (on the inland sea), Hakodate (in Yezo), Niigata, Nagasaki, and Nafa (Luchu), are open to trade. Of the total trade about 26 per cent. is with the United Kingdom, 24 per cent. with the United States, 20 per cent. with China.

CAPITAL, Tôkiô, formerly called Yedo, the residence of the Emperor; population, 914,000. Other cities are—Nagoya, 130,000, Osaka, 359,000; and Kiôto, the ancient capital, 263,000.

KHIVA.

Khan, Seid Mehemed Rehim Khan, suc. 1868.
A Russian vassal State in Western Turkistan, on the western side of the lower Amu Darya, or Oxus, which here flows into Lake Aral. The area is 22,320 square miles, with about 700,000 inhabitants, dominant among whom are the Uzbegs. The fields and gardens are irrigated by canals, derived from the Oxus; all the surrounding country being a barren wilderness, affording but little pasturage. Wheat, melons, and other fruits, cotton and wool are among the productions. The Russians captured Khiva on May 20th, 1873, abolished slavery, and compelled the Khan to acknowledge himself a vassal of the Czar, and to promise payment of a war indemnity of £348,333.

CAPITAL, Khiva. Population, 6,000.

LIBERIA.

President, His Excel. J. Hilary W. R. Johnson.
Secretary of State, Hon. E. J. Barclay.
Postmaster-General, Hon. T. J. Wiles.
Attorney-General, Hon. W. Davis.
Consul-Gen. in London, Hon. Edward B. Gudgeon,
15, Abchurch Lane, E.C.
Consul, Henry Hayman.
Vice-Consul, John Neely.
Secretary of Legation, Reginald C. Saunders,
Offices, 15, Abchurch Lane, E.C.

An independent Negro Republic of Western Africa, occupies that part of the coast of North Guinea which is between the river San Pedro, on the south-east, in long. 6° 51' W. from Greenwich, and the River Manna, a distance of 400 miles, with an area of about 14,000 square miles, with a seaboard of nearly 500 miles. It claims authority interior-wards for about 100 miles. The population consists of 18,000 emigrants from America and their descendants, and aborigines, numbering in all nearly 1,050,000. The principal exports are coffee, cocoa, sugar, wax, ginger, palm-kernels, palm-oil, indigo, hides, ivory, gold-dust, &c. Liberia possesses

excellent schools, and has a bishop educated and ordained in England. Liberia was founded by the American Colonization Society in 1823, and has been recognized by the United States and the European Powers since 1847 as an independent State.

Revenue, 1885. £34,000. Expenditure. £32,000

CHIEF TOWN, Monrovia. Population, 6,000.
British Consul, Sir Samuel Rowe, K.C.M.G. (Sierra Leone).

LIECHTENSTEIN.

Prince, Johann II., born 5 Oct., 1840; suc. 12 Nov., 1858.

A Principality, on the Upper Rhine, between the Tyrol and Switzerland, has an area of 61 square miles, with (1880) 9,124 inhabitants. Revenue, 1885, £12,754; debt, £7,721.

LUXEMBURG.

Grand Duke, The King of the Netherlands (see p. 500).

A Grand Duchy in Central Europe, bounded by Belgium and Germany, formed part of the German Confederation, 1815-66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands. The area is 999 square miles; the population (1885) 213,283, nearly all Roman and German Catholics. The principality is rich in iron-ore. The revenue (1887) is £375,216 and there is a debt of £645,800. There are 224 miles of railway. The army numbers 320 men. The capital, Luxembourg (pop. 17,964), is a dismantled fortress.

MADAGASCAR.

Queen, Ranavalona III., suc. 13 July, 1883.

Prime Minister, Rainilarivony.
French Resident, M. Le Myre de Villers.
Consul, Samuel Procter, 5, East India Avenue.

The largest of the African islands, situated to the east of the continent, from which it is separated by the Mozambique Channel, and surrounded by the waters of the Indian Ocean, in lat. 11° 57'—25° 38' S. and long. 43° 15'—50° 30' E., extending over an area nearly twice as large as the British Isles, containing a population of between 3,000,000 and 5,000,000. It is 1,010 miles in length, and 370 at its greatest breadth, containing an area estimated at 228,540 square miles. The island was known to the early Arabs as Jezira el Komr, and became known under its present name through Marco Polo. Its actual discovery is due to the Portuguese (1506). It has since the time of Henri IV. been an object of French desire, and Louis XIII., in 1642, declared it to be a possession of France. Attempts at settlement and conquest proved, however, a failure, and until recently the French possessions were limited to a few adjacent islets. In the year 1816 diplomatic and commercial relations were entered into between Great Britain and Radama, King of the Hovas, whose authority over the island was acknowledged. By a treaty signed at Tamatave, Dec. 12, 1885, Madagascar is declared a French Protectorate, a port on Diego Suarez Bay has been ceded to France, to be converted into a naval station, and

a war indemnity of £400,000 has been paid. The soil is in general fertile, with rich pasturage, and magnificent forests abounding in valuable trees and medicinal plants; the other products are rice, sugar, silk, cotton, coconuts, bananas, sweet potatoes, indigo, pepper, india-rubber, &c. The mineral products are few: iron ore is found in several places, and coal is also said to exist; gold, silver, copper, and lead are also found in small quantities. The principal manufactures are jewellery, chains, necklaces, straw hats, and dresses, termed *lumbas*. An active import and export trade with this country was formerly carried on, but the chief trade was with the islands of Mauritius and Réunion.

Imp. from U. K. 1886, £57,283; exports, £6,777

CAPITAL, Antananarivo. Population, 80,000.

MALACCA.

Malacca, or the Malay Peninsula, has a southerly extension of about 900 miles, an area of 81,800 square miles, and about 1,250,000 inhabitants, including large numbers of Chinese. The country is hilly, densely wooded, abounding in game, and famous for its tin mines. The Isthmus of Kra, in about 11° N. lat., has been examined with a view to the construction of a ship-canal, which would much shorten the passage between India and China, but competent authorities have declared the scheme to be impracticable. The greater portion of the peninsula owns allegiance to Siam. Along its western coast are the British "Straits Settlements," viz., Pulo Penang with the province of Wellesley, Dinding, and Malacca (ceded by the Dutch in 1825), whilst at its southern extremity lies an island with the great British emporium Singapore. The independent portion of the Malay Peninsula (31,470 square miles, with 300,000 inhabitants) is occupied by a number of Mohammedan Malay States.

MEXICO, CONFEDERATE REPUBLIC OF.

President of the Republic, General Porfirio Diaz, acceded 1 Dec., 1884.

Minister of Foreign Affairs, Don Ignacio Mariscal.

Minister in England, Gen. Don Francisco Y. Mena, 25, Harrington Gardens, S.W.

Secs. of Legation, Don Pablo M. del Campo, Don Manuel Pacheco, Don M. J. de Lizardi.

Attaché, Don Daniel Garcia.

Financial Agent, Don B. Gomez Farias, Blomfield House, London Wall, E.C.

Consul-General at Liverpool, J. Carlos Mexia.

Private Commercial Agent, Don R. de Olano, 57, New Broad Street, E.C.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, situated between 15°–32' N. lat. and 87°–117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 1 territory

(Lower California, almost separated from the main portion by the Gulf of California), and 1 federal district, that of Mexico, making in all 29 political divisions, comprehending an area of 751,177 square miles, with a population of (1882) 10,447,974, of whom about two-thirds are Indians. The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Istacihuath and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Vera Cruz, Progreso, and Tampico are the chief seaports on the Gulf of Mexico, Mazatlan and Guaymas on the Pacific. About 3,703 miles of railway were open in 1885, and 19,317 miles of telegraph. The railways have in a large measure been built by American companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can now travel from New York without change of carriage. Heavy railway subsidies largely account for the embarrassment of Mexican Chancellors of the Exchequer, but it cannot be doubted that an efficient railway system will powerfully assist in developing the vast resources of this rich country, which produces all the fruits, cereals, and vegetables of Central and Southern Europe. The principal crops are maize, wheat, barley, pulse, Chile-pepper, sugar, potatoes, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of fruit. The *maguay*, or Mexican aloe, yields a favourite beverage; other species of the same plant supply pita-flax and sisal-hemp or henequen. The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 70 per cent. consist of silver and gold; flax and hemp, coffee, hides and skins, timber, logwood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance. The army is (1887) composed of about 21,000 men. The navy is limited to 7 small vessels, of about 200 tons, used for the prevention of smuggling.

Estimated revenue for 1886 87. £6,125,000.

Estimated expenditure, 1886 87. 5,346,500.

Total exports, 1885–86. 10,396,458

Total imports, 1885 86 8,257,105

Public debt, converted, £22,854,530.

Unconverted, £9,693,000.

Imports from United Kingdom, 1886. 1,003,396

Exports to United Kingdom, 1886. 597,287

MONACO.

Prince, Charles III., b. 8 Dec., 1818; *suc.* 20 June, 1856.

Heir, Albert, born 13 Nov., 1848; *mar.* 1866. *Lady* Mary Douglas-Hamilton, dau. of 11th Duke of Hamilton (Pope declared the marriage a nullity, 1880).

Minister of State,

A miniature Principality on the Mediterranean, between France and Italy, including the town of Monaco with its gambling establishment and the surrounding country, and having an area of 8 square miles with (1886) 12,548 inhabitants. Olive oil, lemons, oranges, perfumes, liqueurs, and pottery, are exported. There is an army of 126 men.

MONTENEGRO.

Prince, Nicholas (or Nikita), born 7 October, 1841; *proclaimed* 14 Aug., 1860; *married*, 1860. Milena, daughter of Voyevod Peter Yukotich or Vucotic.

Heir, Danilo Alexander, born 29 June, 1871.

A small Principality, which has always claimed to be independent, which claim has recently been admitted by Turkey, has an area of 3,456 square miles, and a population of about 220,000, of whom 10,000 are Mohammedans, 4,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, *sumac*, *scoranzas* (sardines), *castradina* (smoked mutton), and hides. The only manufactures are coarse woollens. Agriculture is the principal occupation.

The total revenue of the State is about £60,000, and there is a debt of £170,000. There is no standing army, but in war every male above the age of 14 years is forced to serve in the army, which musters about 29,000 men. The two ports, Antivari and Dulcigno, have about 150 coasting vessels.

CAPITAL, Cetigne. Population, 1,500. *British Chargé d'Affaires*, Walter Baring. £1,160

MOROCCO, EMPIRE OF.

Sultan, Muley Hassan, b. 1831, *suc.* 20 Sept. 1873.

Minister of Foreign Affairs, Sid Haj Mohammed Torres, *app.* November, 1886.

Acting Commissioner for Foreign Affairs at Tangier, Sid Emfadel Gharnect.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°—36° N. lat. and 1° E.—11° 40' W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sûs, Drâ, Wadi Tafilet, Tunt, and others to the south, which are again subdivided into 33 districts, each under the superintendence of a "Kaid;" but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 314,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contains 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population variously estimated at from 5,000,000 to 8,000,000. The Jews number about 200,000, and reside chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, pease, oil, esparto, and hemp;

among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. It is a country of great natural resources which only need developing. The chief ports are Tetuan, Tangier (where the Representatives of fourteen nations reside), El Araish (Laraiche), Rabat, Casablanca (or Dar-al-baida), Mazagan, Safi, and Mogador. There are no railways, and telegraphic communication from Gibraltar to Tangier only. The exports are maize, beans, pease, oil, wool, dates, fowls, eggs, carpets, slippers, goat-skins, leather, grain, cattle, ostrich-feathers, gums, esparto; and the imports, cotton, linen, muslin, and woollen goods, tea, coffee, sugar, candles, cloth, silk, iron, brass, hardware, &c. The army consists of between 15,000 and 20,000, one-half of whom are negroes, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *The Times of Morocco*, is published at Tangier.

There are three capitals, of which Fez, with a population of 80,000, is the principal; Morocco, 50,000; and Mequinez, 56,000.

MUSCAT. See OMAN.

NAVIGATORS' ISLANDS. See SAMOA.

NEPAUL.

Sovereign, Maharaja Dhiraj Surandar Bikram Sah Bahadur Shumshir Jung, born 1875, *suc.* 1884.

Prime Minister, Dir Shumsheer, *proclaimed* 22 November, 1885, after the murder of the Regent, General Sir Runnodeep Sing, Rana Bahadur, K.C.S.I.

The Kingdom of Nepal lies between British India on the south and Thibet on the north, and occupies the southern ranges of the Himalayas for a distance of about 500 miles, extending about 20 miles beyond the base of the mountains into the plains. It has an area of 56,800 square miles, a population of two millions, and for administrative purposes it is divided into nine districts. The mountains descend into the plains separated by narrow valleys, 3,000 to 6,000 feet above the sea-level. The lower ranges are covered with forests of sal, pine, spruce, mimosa, oak, &c. The soil of the valleys and

plains is extremely fertile, and wild animals abound. The chief minerals are copper, iron, sulphur, jasper, marble, and rock crystal. Nepaul has commercial relations with Thibet and British India, and the value of its exports to the latter in 1835 was £1,405,579: the imports amounting to £957,365. The revenue, amounting to £1,000,000, is realized chiefly from land rent, and from export duties levied at the frontier. The trade routes are numerous, the most important being that connecting Khatmandu, the capital, with Patna, in Bengal. Nepaul exports rice and other grains, oil-seeds, *ghi*, ponies and cattle, falcons for hawking, opium, musk, madder, borax, jute, hides and furs, ginger, cardamoms, and yaks' tails. It receives in exchange raw and manufactured cotton and twist, woollen cloth, shawls, rugs, flannel, silk brocade, embroidery, sugar, spices, indigo, tobacco, &c. The manufactures are coarse woollen cloth, iron, copper and brass vessels, and bell-metal. The aborigines are of the Mongolian type, and the religion is a form of Buddhism. The Hindus invaded and occupied the country in the 14th century, and these in their turn were conquered by the Goorkhas in 1767. The frequent aggressions of these people brought on a war in 1814, which was concluded by the Treaty of Segowli in 1816, but it is only within the last thirty years that our relations with the country have become friendly. The sovereign, a minor, is the nominal chief; but the real power rests with the Prime Minister.

Khatmandu—British Resident, Charles Edward Ridgway Girdlestone.

Postage, *5d.*; news, $1\frac{1}{2}d.$; books, 2 oz. $1\frac{1}{2}d.$

NETHERLANDS (OR HOLLAND), KINGDOM OF.

King, William III. (born 19 February, 1817; *suc.* 17 March, 1849; *m.* (1) 18 June, 1839, Pruss. Sophia Frederica of Wurtemberg (*died* 3 June, 1877); (2) 7 Jan., 1879, Princess Emma of Waldeck and Pyrmont. *born* 2 August, 1858.

Heiress Presumptive, Wilhelmina, Princess of the Netherlands, *born* 31 August, 1880.

Premier & Minister of Interior, J. Heemskerck, 22 April, 1883.

Foreign Affairs, Jonkheer A. P. C. van Karnebeek.

Finance, J. C. Bloem.

Colonies, J. P. Sprenger van Eyk.

War, General Weitzel.

Marine, F. C. Tromp.

Minister in London, Count Charles M. E. G. de Bylandt, 40, Grosvenor Gardens, S. W.

1st Secretary of Legation, the Baron Gevers, 40, Grosvenor Gardens, S. W.

Chancellor, J. Van den Berg.

Consul-Gen., Jonkheer John William May, 40, Finsbury Circus.

Consul, H. S. J. Maas.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. $50^{\circ}46' - 53^{\circ}34'$ N. and long. $3^{\circ}22' - 7^{\circ}14'$ E., consisting of 11 provinces, including part of the Duchy of Limburg, and containing a total area of 12,680 square miles, with a population, on Dec. 31, 1886, of 4,390,273. The king is also sovereign of the Grand-Duchy of Luxemburg, with an area of 999 square miles, and 213,283 inhabitants in December, 1886. The majority belong to the Dutch Reformed Church; and the remainder are Roman Catholics, Lutherans, Jews, &c. The land is generally flat and low, intersected

by numerous canals and connecting rivers—in fact, a network of watercourses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. Railways to the extent of 1,520 miles have been constructed; also 3,002 miles of telegraph. The chief native products are potatoes, rye, barley, oats, wheat, buckwheat, chickory, madder, clover, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, butterine, linen, rich damasks, cotton, woollen, silk, and “geneva.” Diamond-cutting employs numerous hands in Amsterdam. The chief exports consist of refined sugar, flax, butter and butterine, cheese, cattle, sheep, madder, geneva. The royal navy consisted, on Jan. 1, 1887, of 120 men-of-war (24 of them ironclads); and the army, on the war footing, of 2,338 officers and 62,734 men, with a militia (Schutterij) numbering about 114,000 more. The mercantile marine, on the 31st Dec., 1886, consisted of 746 ships, with 316,896 tonnage, employing 14,578 men.

Holland figures largely in the trade returns of this country, but much of the merchandize sent to Holland was for distribution in Germany and other parts. The following are the chief articles imported from the United Kingdom in the year 1886:—

Apparel	£65,255	Leather	£178,143
Articles of food	72,075	Linen	181,587
Chemical products	27,955	Machinery	782,405
Coal, &c.	225,789	Oil, seal, &c.	121,187
Cotton yarn	1,868,252	Sugar	81,642
Cotton manufas.	692,853	Wool and woollen	
Grease, &c.	217,248	manufas.	1,724,311
Metals, hardware	782,405	Yarn, alpaca, &c.	338,499

The chief exports to the U. K. for 1886 were:—

Animals, living	£1,213,294	Gloves	£386,959
Butter	1,775,509	Hides and leather	595,470
Butterine	2,771,488	Iron and steel, &c.	853,348
Cheese	764,871	Other metals	207,150
Chemical manufas.	372,766	Painters' colours, &c.	310,451
Articles of food	908,469	Paper, prints, &c.	461,949
Corn, all kinds	156,808	Sugar	1,183,778
Cotton manufas., &c.	837,226	Silk manufas., &c.	2,571,838
Dye stuffs, &c.	505,246	Wool manufas., &c.	1,865,982
Farinaceous sub., &c.	215,789	Wine and spirits	
Fish	306,073	(Geneva)	335,169
Flax	334,724	Zinc manufas., &c.	397,571

DEPENDENCIES.—The Dutch possessions in the East Indies are very considerable, comprising the whole of the Sunda islands, with the exception of the northern half of Borneo and Eastern Timor, together with Western New Guinea, with an area of 718,000 square miles, and a population of 28,500,000, of whom as many as 20,259,450 live in the islands of Java and Madura, and 405,727 in the Moluccas. Included in this estimate are many districts in the interior of Sumatra, Borneo, Celebes, and other islands, in which Dutch sovereignty is merely nominal. In Java and Madura the so-called "culture system" has been introduced with much success, for it has secured a sufficient supply of food for a dense population, besides furnishing coffee and other products for exportation to Europe. The recent distress among the sugar-planters is due, not to this system, but to the great fall in prices, and heavy taxation. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Dutch Resident. There is a colonial army of 30,600 men, one half of whom are Europeans. The colonial revenue amounted in 1886 to £11,198,670, and is largely derived from the sale of coffee, opium, salt, and tin, whilst the expenditure reached £11,566,200. The exports, in addition to the above, include also sugar, tobacco, indigo, gums, and spices, and amounted to £7,426,000 in 1884.

In South America the colony of Surinam, or Dutch Guiana, embraces 46,072 square miles and about 71,800 inhabitants; and in the West Indies, Curaçao and 5 other small islands belong to Holland, having an area of 436 square miles, with a population of 44,153.

NICARAGUA, REPUBLIC OF. See under "Central America," page 478.

OMĀN.

Sultan, or Sovereign, Seyyid Turki bin Said, *suc.* January, 1871.

Omān is a Mohammedan State in S.E. Arabia, with a coast line of about 1,500 miles along the Gulf of Persia, the Gulf of Omān, and the Arabian Sea, an area of 81,000 square miles, and a population of 1,600,000. There also belong to it two small territories on the Mekran coast of Persia and Baluchistan. Zanzibar, on the African coast, was a dependency of Omān until 1856. The country rises from a bare and burning coast until in Jebel Akhdar it attains an elevation of 7,000 feet. In the interior, however, among the Bedouins, the authority of the Sultan is hardly even nominal.

The population of Omān is chiefly Arab, but

there is besides a considerable foreign element, consisting of Banians and Khojas from Western India, Persians, Abyssinians, Somalis, and Nubians. The chief productions are dates, grain, fruit, and sugar; and the fisheries are very productive. The revenue is about 180,000 dollars. The exports consist of dates, cloth, salt, fruits, pearls, dried fish, and matting, and amount to about 1,484,220 dollars. The imports are—sugar, rice, piece-goods, coffee, wheat, raw silk, cotton, &c., and may be estimated at 1,662,867 dollars. Omān has no independent coinage: the East India rupee and (Austrian) Maria Theresa dollar are the current coins, the latter being the most used. The rainfall is very scanty, averaging about 6 inches annually.

Muscat, the capital, with 60,000 inhabitants, trades with India, the Persian Gulf, Batavia, Zanzibar, and Yemen, but has little direct intercourse with Europe.

Total exports, 1882-83	\$1,278,254

ORANGE FREE STATE.

President, Sir John Henry Brand, *LL.D.*, *G.C.M.G.*, born 6 Dec., 1823.

Government Secretary, P. J. Blignaut.
Chief Justice Supreme Court, F. W. Weitz.
Consul-General in London, P. G. van der Byl.
Consul, Philip Thos. Blyth, *D.L.*, *F.S.A.*, 2, Sinclair Gardens, Kensington, W.

A South African Republic, situated to the N. of the Cape Colony, and bounded, E. by British Basutoland and Natal, N. by the Transvaal, and W. by Griqualand West. It was founded by Dutch emigrants from the Cape Colony. The country was proclaimed British territory by Sir Harry Smith in 1843, but, by the convention entered into on the 23rd of February, 1854, between Sir George Clerk, Her Majesty's special commissioner, and the representatives of the people, the inhabitants were declared "to all intents and purposes a free and independent people, and their Government to be treated thenceforth as a free and independent Government."

The Orange Free State is essentially a pastoral country, but the eastern part especially is admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal mines exist in the territory. The chief exports are wool, ostrich feathers, hides, diamonds, &c. Area, 41,484 square miles, with a population of 133,518, of whom 72,496 are whites. It possesses State property valued at £530,000.

The legislative power is vested in the Volksraad, comprising 55 members, elected by the various constituencies into which the State is divided.

Public revenue, 1886-87	£185,370
Public expenditure, 1886-87	186,528
Public debt, 1887	172,500
Imports, 1884, £1,965,826; exports	2,033,431

CAPITAL, Bloemfontein. Pop. (1885), 3,270.

A fund of £200,000 has been established, the interest of which, amounting to £12,000 yearly, is devoted solely to educational purposes, whilst the Government is also a shareholder to the amount of £70,000 in the National Bank, a flourishing institution with a paid-up capital of £100,000.

PARAGUAY, REPUBLIC OF.

President, Gen. Escobar, *elected* 25 Sept., 1886.
Consul-Gen. in England, Christopher James, 8,
 Great Winchester Street,
Consul, Manchester, Ja. Parlane.
Vice-Consul, Manchester, Albert Young.
Consul, Gibraltar, John Garese.

One of the smallest States of South America, and, except Bolivia, the only one without any sea-board, situate between 22° 4'—27° 30' S. lat. and 54° 32'—61° 20' W. long. Its area is computed at 92,000 square miles, enclosed within the rivers Parana and Paraguay; and contains a population of 476,000. The chief crops are maize, rice, coffee, cocoa, indigo, manioc, tobacco, sugar-cane, and cotton. Among its principal trees are several species of dye-wood, and many yielding juices, as the caoutchouc or india-rubber, and the valuable shrub called "Maté," or Paraguay tea-plant—one of its principal articles of commerce; medicinal plants also are very numerous. Sugar, rum, cotton, woollen cloths, and leather are almost its only industrial productions. The army, 60,000 men strong in the war of 1865-72, has been reduced to 500 men, and there is a "navy" of three river steamers. A railway, 44 miles in length, connects the capital with Paraguari.

Revenue, 1886, about	£240,000
Public debt, 1886, consolidated	915,350
Imports, 1884	301,666
Exports, 1884	327,542

CAPITAL, Asuncion. Population about 22,000.

British Consul, Dr. William Stewart *unp.*

PERSIA.

Sovereign, Shah Nasir-ed-Din, *k.g.*, *b.* 24 April, 1829; *succeeded* 10 September, 1848.

Heir-Apparent, Muzaffer-ed-Din Mirza, *b.* 1853.

Minister for Foreign Affairs, Mirza Abbas Khan Ghevaram ud Douleh.

Envoiy in London, Prince Malcom Khan Nazim-ed-Dowleh, 80, Holland Park, Kensington, S.W.

Councillor, General Mikay Khan.

Secretaries, Iskander Khan & Mounschi Baschi.
Attaché, Baron Henry de Barreto.

Called by the natives Iran, is the most extensive, opulent, and powerful native Kingdom of Western Asia, situate between 25° 10'—39° 50' N. lat. and 44° 15'—63° E. long., extending about 900 miles from north to south, and the same from east to west, and comprising an area of 636,000 square miles. The population, which decreased considerably during the great famine of 1870, is estimated at 7,653,600, including nomads. The western and northern part of the country is traversed by mountain ranges, rising to 12,000 feet above the sea, and the peak of Demavend to 18,469 feet; but nearly all the central and eastern portion is a vast salt desert. With the exception of the Karun it has scarcely a river that can be termed navigable, though some of them extend several hundred miles in length, and possess great volume of water. Some of its immense valleys abound with the rarest and most valuable vegetable productions; those chiefly cultivated are wheat of the very finest quality, barley, and other cereals, cotton in profusion, sugar, rice, tobacco, and opium. The vine flourishes, and the wines of Shiraz are celebrated. The mulberry tree is largely cultivated, silk being one of the most important products of the kingdom. Its minerals are salt, iron, and coal; copper, lead, antimony,

sulphur, &c., also turquoises and some other precious stones, are found. The most important manufacture is that of silks, of the richest and most gorgeous kind. The Persians excel in their dyes, also in brocade and embroidery. Arms, carpets, shawls, felts, cotton and woollen fabrics are among the manufactures. The Persian Government has no debt, as the revenue of the year always exceeds the expenditure, and its royal treasury is reputed to contain immense wealth in gold and other valuables. The commerce of Persia with Russia is chiefly by way of the Caspian Sea, and with British India by way of the Persian Gulf. The imports are estimated at £3,850,000; the exports, consisting of silk, tobacco, wool, carpets, opium, gums, hides, dates, &c., at £2,260,000. The exports from British India to Persia alone amount to £1,500,000 annually. Protection to British trade is secured by the Treaty of 1841. The regular army numbers about 80,500 (of whom 24,000 with the colours), with 200 field guns; the militia 70,000 men. There are 3,775 miles of telegraph. Railways have been begun, but no line has hitherto been opened.

Revenue (in cash), about	£2,100,000
Expenditure, about the same	2,100,000

In addition to the above, there is also a revenue in kind amounting to £330,000.

Direct imports from U. Kingdom, 1886 ..	£142,222
Direct exports to ditto, 1886	85,027

Vice-Consul, Liverpool, R. Atwood Beaver.

Peru is an important maritime Republic of South America, on the Pacific Ocean, about 1,400 miles in length, situate in lat. 2° 20'—18° S., and in long. 67° 30'—81° 20' W. It is divided into 19 provinces, and its area is estimated at 405,040 English square miles, with a population of 2,970,000, including about 350,000 uncivilized Indians. The settled population consists of Indians 57 per cent., Mestizos 22 per cent., Blancos 18 per cent., and Negros and Mulattos 3 per cent. The country is traversed throughout its length by the magnificent chain of the Andes, running parallel to and about 60 miles distant from the coast, the region between being sandy desert, except where watered by transverse mountain streams. The valleys among the mountains are

very fertile; and the Cordilleras are rich in minerals, among which silver, quicksilver, and copper are the most conspicuous, constituting the chief source of the wealth of Peru. It is intersected by numerous fine rivers, forming the head streams of the Amazon, by which it has complete communication with the Atlantic. Its medicinal productions are of great value, comprising cinchona, or Peruvian bark, sarsaparilla, copaiba, &c. The Lobos and other islands are famous as the sources whence Europe has been supplied with Peruvian guano. Peru possessed, on a peace footing, an army of about 6,000, but although the army and navy had been well-nigh annihilated in the war with Chile, yet enough men were left for some sanguinary domestic brawls for the Presidentship. The principal imports are cotton manufactures, ironware and cutlery, woollen goods, and machinery. The chief exports are guano, nitrate of soda, sheep and alpaca wool, sugar, silver, and cinchona. In 1884 there were 1,600 miles of railway open, and 390 more unfinished, with 1,374 miles of telegraph wire. Everything has been disorganized by the disastrous war with Chile, which cost Peru the departments of Tacna and Tarapaca, and annihilated her navy.

The most westerly Kingdom of Europe, and a

part of the great Iberian Peninsula, lies in 37°—42° 8' N. lat. and 6° 15'—9° 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 34,606 square miles, with a population in 1881 of 4,306,554, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 401,624) form part of the kingdom, which thus has a population of 4,708,173. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnuts, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry: the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important, copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last from its hardness and purity is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country, cork, cattle, copper-ore, fruits, oil, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. There is a commercial marine of 398 vessels, of 97,002 tons. Railways, 1,000 miles in extent, are open for traffic. For many years the national income has been considerably less than the expenditure, so that the national debt is rapidly on the increase.

The army in 1887 consisted of 32,120 men, on a peace footing, and of 125,057 men with 264 guns, on a war footing; and the navy of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 3,400 sailors.

Estimated revenue, 1886	£7,156,932
Estimated expenditure, 1886	8,485,270
National debt, 1884	132,670,286
Interest on do., 1885-6	3,261,575
Total imports, 1884	7,532,206
Total exports, 1884	4,773,582
Imports from U. K. (includ. cols.), 1886	2,778,647
Exports to U. K. (inc. colonies), 1886	2,826,853

The Island of Madeira, on the N. W. coast of Africa, is much frequented by invalids from England, and is especially recommended for consumptives: there are excellent hotels, communications with this country frequent, with every convenience in the way of English doctors, chaplains, and other English necessities. The amount of trade between the Portuguese dependencies and the United Kingdom is included in the above amounts.

Lisbon, 1,110 miles; transit, 3 days; postage, 1/2d.; news and books, 2 oz. 1/2d.; telegrams, per word, 5/2d.

DEPENDENCIES.—These, in proportion to the mother-country, are of very great extent. They include the Cape Verd Islands, off the West Coast of Africa (1,847 sq. miles, population 107,026), Zighinchor on the Casamanza, Bissao, and a few other territories to the south of the Gambia, which are officially known as "Portuguese Guinea" (350 sq. miles, pop. 10,000); the Fort of San Joao Baptista de Ajuda, at Whidah, the principal part of the Kingdom of Dahome, where the Portuguese are allowed to remain on sufferance, but exercise no sort of jurisdiction; the fertile islands of St. Thomas and Principe, in the Gulf of Guinea (417 sq. miles, pop. 22,000); the Kingdom of Angola, on the west coast of South Africa, which includes the territory of Landana and Kabinda to the north of the Congo, and the whole of the coast to the south of that river as far as Cape Frio, and has Loanda for its capital (115,000 sq. miles, pop. 1,000,000); the Province of Mozambique, with the Lower Zambezi river, Sofala, and Delagoa Bay, on the East Coast of Africa (80,000 sq. miles, pop. 500,000); Goa, Daman, and Diu in India (1,295 sq. miles, pop. 481,467); part of the island of Timor, in the East Indian Archipelago (6,294 sq. miles, pop. 300,000), and Macao, in China, at the mouth of the Canton river (5 sq. miles, pop. 68,086). The possessions enumerated have an area of 204,848 square miles, with 2,548,872 inhabitants. In this estimate account is taken only of territories within which Portugal actually exercises some jurisdiction. Thus, whilst official statements give an extension of 59,000 square miles to Angola and Mozambique, the area is here reduced to 195,200 square miles.

ROUMANIA.

King, Charles, second son of Prince Charles Antoin of Hohenzollern-Sigmaringen, born 20 April, 1839; elected Hereditary Prince 26 March, 1866; confirmed 24 Oct. 1866; proclaimed King by vote of both Chambers, 26 March; crowned 22 May, 1881; mar. 1869, Elizabeth, dau. of the late Hermann von Wied, born 29 Dec., 1843.

Heir Presumptive (Nephew), Prince Ferdinand von Hohenzollern, born 24 August, 1865. *Pres. Council and Interior*, John C. Bratiano. *Foreign Minister*, M. Pherekyde. *Envoy Ext. and Min. Plenip. in London*, Prince Ion Ghica, 50, Grosvenor Gardens, S.W. *1st Secretary*, M. Nedeyano. *Consul-General in London*, Walter Cutbill, 37, Old Jewry, E.C.

The Kingdom of Roumania consists of the Moldo-Wallachian provinces formerly belonging to Turkey, but by the Treaty of Berlin, 13 July, 1878, was recognized as an independent State, and the territory of the Dobruja added to them. On the 26th March, 1881, Roumania was raised to a Kingdom. The entire area is 46,314 square miles, with a population of about 5,376,000. The dominating religion is that of the Greek Church (4,529,000); Roman Catholics, 114,200; Protestants, 13,800; Jews, 400,000. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle, sheep, and horses, of which immense numbers are reared on its far-stretching pastures. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, rock-salt, spirits, hides, wood, and cattle. In this large, but ill-developed country there are but 1,229 miles of railway open. The telegraphs are reported to be 3,576 miles in length.

An International Commission, created by the Treaty of Paris, 1856, and whose powers were enlarged by the Treaty of Berlin, 1878, has its seat at Galatz, and exercises sovereign powers over the navigation of the Danube: the British representative is Mr. Percy Sanderson, C.M.G., Consul-General. Its income, principally derived from shipping dues, amounts to about £60,000 per annum.

The field army consists, on the peace footing, of 18,532 men, but in time of war this can be raised to 158,000, and there is a militia in addition. There is also a small navy of 12 steamers.

War, General Vannovski.

Ambas. in London, Actual Privy-Councillor de Staal, Chesham House, Chesham Place, S.W. Councillor, M. Bouteneff.

1st Secretary, Count N. Adlerberg.

2nd Secretaries, A. Kroupensky and N. Boulatzell.

Attaché, M. A. de Stoeckl.

Military Attaché, General Boutourline.

Naval Attaché, Captain Mordovine.

Consul-General, Alexander de Volborth, 17, Great Winchester Street, E.C.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28'—76° 33' N. and 17° 40'—64° 30' E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until lately included also a large section of North America. The empire comprises:

	English Square Miles.	Population in 1882-3.
Russia Proper (50 govts.)	1,887,610 ..	77,379,521
Poland	49,158 ..	7,416,958
Finland	144,254 ..	2,142,093
Asiatic Russia:—		
Caucasus	180,504 ..	6,534,853
Trans-Caspian	206,000 ..	710,000
Central Asia	1,165,200 ..	5,305,066
Siberia	4,824,563 ..	4,013,365
	8,457,289	104,001,860

In the European parts of Russia alone the population increases annually at the rate of over a million. The largest towns are St. Petersburg (929,100), Moscow (751,812), Warsaw (406,261), and Odessa (217,000). The various nationalities in 1882 were represented about as follows:—Russ, 69,770,000; Poles, 6,010,000; Lithuanians, 2,910,000; Germans, 1,120,000; Swedes, 270,000; Tajiks (Persians), &c., 1,125,000; Armenians, 800,000; Jews, 2,954,000; Caucasians, 2,850,000; Finns, 4,560,000, Tartarized Finns, 1,500,000; Turks and Tartars, 7,700,000; Mongols, 530,000; various, 584,000. The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there are:—Greek Catholics (including Dissenters), 72,990,000; Roman Catholics, 8,910,000; Protestants, 4,766,000; Jews, 2,954,000; Mohammedans, 11,814,000; and Pagans, 450,000. European Russia consists of an immense plain; throughout its vast extent it does not contain a single mountain. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna,

and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries; and the surface along the southern borders is mountainous, rising in many places far above the limit of perpetual snow.

A great portion of Russian territory is totally unfit for cultivation; in the north the barren tundras are almost constantly frozen, producing only moss; Finland is covered with lakes interspersed with rocks and sandhills; and in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst all the interior provinces and nearly the whole of Siberia are clothed with forests. The country between the Baltic and Black Seas, however, is eminently fertile, producing abundance of grain. The chief cereals raised are wheat, barley, oats, buckwheat, millet, and especially rye, the staple food of the inhabitants. Hemp and flax are extensively cultivated, and of late years potatoes and tobacco. The forests and woodlands of European Russia are extensive, occupying an area of 460,000,000 acres. Oak, lime, maple, and ash trees predominate. The Ural mountains (forming the boundary between Europe and Asia), which contain nearly all the mineral riches of the country, are the principal seat of mining and metallic industry; producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. The naphtha springs on the Caspian are annually increasing in importance, and already flood certain European markets with petroleum. An immense bed of coal, both steam and anthracite, apparently inexhaustible, has been discovered in the basin of the Donetz (between the River Donetz and Dnieper), Marinpol, Rostoff, and Tagaurang being the outlets. At the first-named place a fine port is under construction, and on its completion the facilities for shipping coal to the Black Sea ports will considerably restrict the importation of English coal. About 100,000,000 pounds, or 1,600,000 tons, are raised there annually.

England is an excellent customer; nearly all her purchases were of native produce. The chief exports to the U. K. in the year 1886 were:—

Corn, wheat.....	£1,396,833	Hides and leather.....	£128,880
" barley.....	1,249,387	Oil-seed cake.....	234,856
" oats.....	1,834,113	Petroleum, pitch,	
" other kinds	1,053,879	and tar.....	134,546
Bristles.....	138,865	Seeds, all kinds.....	577,490
Flax.....	1,429,423	Wood and timber.....	2,496,700
Hemp.....	279,348	Wool, &c.....	1,975,860
Ore, all kinds....	169,518		

On the other hand, Russia purchases but a small amount of goods produced in the United Kingdom, the total amount for the year 1886 being but £4,424,317; the total value of the goods imported being £6,408,535. The chief articles were:—

Alkali.....	£128,135	Herrings.....	£148,613
Bags & sacks, empty	110,245	Implements & tools	75,148
Coals, &c.....	891,045	Machinery, all sorts	807,015
Chemical products	69,267	Metals, all kinds.....	1,101,367
Cotton yarn and		Wool and woollen	
Manufactures ..	535,549	manufactures ..	293,175

With metallurgical and engineering factories, Russia possesses many extensive manufacturing

establishments for weaving, tanning, fur-dressing, &c. Linen is largely manufactured by hand-looms, the chief operations consisting in spinning and weaving flax and hemp. Woollen and worsted stuffs, fine cloths, and mixed fabrics are also produced. The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow, and bristles.

The Russian Army has been reorganized since the Turkish War. On a peace footing nearly 800,000 men, with 1,734 guns, are supposed to be under arms; in European Russia, 17,700 combatants, with 3,380 guns; in the Caucasus, 250,342 combatants and 300 guns; and in Asia, 131,116 combatants, with 196 guns. On a war footing it includes altogether 2,151,000 men, with 3,786 guns. The navy consists of the Baltic fleet, that of the Black Sea, and of flotillas on the Aral and Caspian Seas, and in Siberia, comprising 268 armed steam-vessels (of which 32 are ironclads of all classes, and 139 torpedo-boats), with an armament of 1,348 guns.

Of railways, there were open, November, 1887, 18,130 miles. There are 4,823 post-offices, carrying, in 1883, 270,000,000 letters, etc. Of telegraphs there are 3,572 offices, with 82,846 miles of line.

The commercial marine (including Finland) consisted in 1886 of 2,289 vessels, of 653,446 tons.

SAMOA (NAVIGATORS ISLANDS).

King, Tamasese, 1887.

[The late King, Malietoa Laupepa, is now a prisoner in the hands of the Germans.]

A group of islands in the Southern Pacific, including Upolu, Savaii, and Tutuila, with an area of 1,076 square miles and 36,240 inhabitants. Apia is the centre of trade, which is mainly in the hands of German firms. The imports (1887) were valued at £87,500, the exports at £71,345. Copra and cotton are the principal productions. In September, 1886, the two kings were fighting. British Consul, Wilfred Powell.....£450

SAN MARINO.

A small "Republic" in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60 (20 nobles, 20 townsmen, and 20 peasants), of whom two act jointly as Regents. The area is 33 square miles, the population 8,006. There is an "army" commanded by several "generals," and titles and decorations, it is said, are bestowed freely for a consideration. The village of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has a castle, fortified by King Berengar of Lombardy, a fine church, and a theatre. Agriculture and viticulture flourish. By a treaty concluded in 1872 the Republic has placed itself under the protection of Italy.

SARAWAK.

Raja, H.H. Charles Johnson Brooke, born 3 June, 1829; *suc.* 1868; *m.* 1869.

Heir, Charles Vyner Brooke, b. 26 Sept., 1874.

The Sarawak territory lies on the north-west coast of Borneo, with a seaboard of 380 miles, an area of about 30,000 square miles, and a population of about 240,000, composed of various races. The Government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made since 1842. The country produces sago, gutta-percha, india-rubber, beeswax, birds' nests, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, opium, coal, and gambier pepper.

SERVIA.

King, Milan (Obrenovitch), b. (10) 22 August, 1854; proclaimed Hereditary Prince, 30 June, 1868, and King, 6 March, 1882; *mar.*, 17 Oct., 1875, Natalie de Keezko, born 14 May, 1859.
Heir Apparent, Prince Alexander, b. 14 Aug., 1876.
Prime Minister and Minister of Foreign Affairs, Yovan Ristich.

War, Colonel Sava Grouitch.
Minister in London, M. Ephrem Grouich, 7, Gloucester Place, Hyde Park, W.
Secretary of Legation, M. Alex. Z. Yovitchich.
Consul-Gen., H. W. Christmas, 76, Cannon St., E.C.

A Kingdom of Eastern Europe, governed by an hereditary sovereign; and by the constitution of 1869 a "Skupshchina," an elected parliament, represents the people. It is separated from Hungary by the Danube and Save. By the Berlin Treaty, 1878, it received a large accession of territory, and now has an area estimated at 18,757 square miles, with a population in 1884 of 1,901,118. The surface of the country is mountainous, containing extensive forests and uncultivated heaths. Agriculture is carried on in a primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, the silk-culture is carried on to a limited extent, and the production of wine is increasing in importance. Very extensive is the cultivation of prunes. The live stock (1882) included 122,500 horses, 826,550 cattle, 3,620,750 sheep, and 1,067,940 pigs. Lead, zinc, quicksilver, copper, iron, and coal are found. Carpet-weaving and embroidery, and the making of jewellery and filigree work, are of some importance. The imports consist in the main of cottons, sugar, and colonial goods, hardware, woollens, &c.; the exports of dried prunes (38 per cent.), pigs, and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. In 1886, goods valued at £164,118 were declared to be of British origin. There are (1886) 150 miles of railway (104 building), and 1,634 miles of telegraph. The army, on a peace footing, numbers 13,000 men, with 132 guns. On a war footing it includes a field force (70,000 men, 264 guns), dépôts (25,000 men, 36 guns), a reserve (58,000 men, 120 guns), and a levy-en-masse. Every man between 20 and 50 years of age can be called to arms.

Revenue, 1887.....£1,764,286
 Expenditure, 1887.....2,093,651
 Public debt, 1886, about.....8,000,000
 (One-half of which was contracted for the construction of railways.)

Total imports, 1886.....£2,043,777
 Total exports, 1886.....1,625,163

SIAM.

King, Phrabadly Somdetch Phra Paramindr Maha Chulalong-Korn Phra Chula Chom Klaochow Yuhua, b. 27 Sept., 1853; succeeded to the throne, 1 Oct., 1868.
Heir Apparent, Prince Somdech Chowfwa Maha Vajirunhis, b. 1878.
Minister in London, Phya Montri Suriyawongsee, 23, Ashburn Place, South Kensington, S.W.

1st Secretaries, Phya Damrong (Raja Bhola-khand), and Frederick Verney.
Attaché, Luong Visetsali.
Private Secretary, Richard Edgecombe.
Hon. Consul-General in London, David King Mason, 6, Great Winchester Street Buildings.
Vice-Consul, James Riches.

An extensive Kingdom of South-eastern Asia, consisting of 41 provinces, each governed by a Phya, or great functionary, situated in the heart of the peninsula between India and China, in lat. 4°—21° 30' N. and long. 97° 30'—107° E. Its area is estimated at 280,550 square miles, and its population at about 5,700,000. There are several ports along its coast-line in the Gulf of Siam, but foreign commerce is entirely carried on at Bangkok, a few miles up the River Menam, Pakoam being the customs station at its mouth. The chief products are rice, gums, teak, sandalwood, rosewood, aloeswood, and fruits and garden products. The chief exports are rice, teak, pepper, sesame, skins, sajan-wood, sugar, cardamoms, also fish, silk, soap-water, cotton, horns, birds' nests, &c. The chief imports are shirtings, linen, glass, cutlery, and hardware. The Government is an absolute monarchy, each sovereign appointing his own successor. There is a Council of State consisting of the five ministers, the Royal Princes, and nine members appointed by the King. There is an army of 2,000 men, and a small navy of 16 steamers, commanded by Englishmen. A telegraph connects Bangkok with Saigon (Cochin China), and with Burma.

Revenue and expenditure, each about £1,200,000

SOCIETY ISLANDS.

British Consul at Tahiti, Charles Talbot...£600

SOKOTO,

the most powerful among the Fulah or Fellalal States in Central Africa, adjoins the Sahara on the south, Bornu on the west, and extends southward across the Benue into Adamawa. Its area is 178,000 square miles, the population being estimated at 12,600,000. Its most important province is that of Haussa, inhabited by one of the most industrious and enterprising negro tribes of Africa. Within it are the towns of Sokoto, Wurno, Kano, and Katsena. The empire attained its greatest power in the time of Sultan Bello, 1819-32. In 1885 the Sultan, concluded a treaty with the Royal Niger Company of London, to whom, in consideration of an annual payment of £1,200, he grants the monopoly of trading within his extensive dominions, ready access to which is insured by the Niger and its tributary the Benue.

SPAIN.

King, Alfonso XIII., son of Alfonso XII. and of Queen Maria Christina, born 17 May, 1886 [after the death of his father, 25 Nov. 1885].

Regent, Queen Maria Christina, Archduchess of Austria, widow of King Alfonso XII., and mother of the King; born 21 July, 1853; sworn in as Regent, 26 Nov., 1885.

Heiress Presumptive, The Infanta Dona Maria de las Mercedes (Princess of Asturias), born 11 September, 1880.

Premier, Mates Sagasta.

Justice, Alonzo Martinez.

Foreign Affairs, Moret.

Interior, Albareda.

Finance, Puigcerver.

Public Works, Navarro Rodrigo.

Colonies, Señor Balaguer.

War, General Castsola.

Navy, Admiral Rodriguez Arias.

Minister in London, Señor Cipriano del Mazo y Gherardi, 46, Portland Place, W.

1st Secretary of Legation, Don Pedro Juan de Zulueta, 54, Cadogan Place, S.W.

2nd Sec., Don Francisco de Reynoso.

3rd Secretary, Don Carlos Gassend.

Attachés, Don José Soriano, Count de Pradine.

Naval Attaché, Lt.-Cl. Don Antonio Garcia, R.S.N.A.

Consul-Gen., Don Urbano Montejo, 21, Billiter St.

A Kingdom situate in the south-west of Europe, between 36° — 43° 45' N. lat. and 43° 25' E.— 0° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees, and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the Ancient Provinces, still best understood, are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary and Balearic Isles, comprising an area of 196,173 English square miles, and a population in 1884 of 17,268,600. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated table-land, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain is rich in minerals, especially iron, copper, and lead, and as capital is attracted its resources will be developed. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry, and tent wines are made; in the south-east, the Malaga and Alicante; these are the best known, but there are many others which only require to be brought before the English public in order to secure a market. Now that the country is in a more settled condition, there is little doubt that it will attract travellers, and

then become better known. Most of the principal towns now possess very fair hotel accommodation. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c.; trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home trade is rigidly protected by high customs duties.

The principal exports to the United Kingdom in 1886 were:—

Animals, living.....	£146,798	Other fruits.....	£1,085,739
Chemicals, &c.....	66,586	Pyrites of iron.....	978,965
Copper.....	873,906	Quicksilver.....	382,966
Cork.....	56,749	Rags, esparto, &c.....	313,847
Iron.....	1,676,982	Silver ore.....	279,759
Lead.....	839,316	Wine.....	973,971
Oranges & lemons.....	1,108,410		

And the chief imports from the United Kingdom:—

Alkali.....	£101,503	Linens, &c.....	325,022
Coal, &c.....	668,357	Machinery, all sorts.....	325,713
Cotton manufacts., &c.....	250,623	Manure.....	113,248
Jute.....	85,989	Metals, all kinds.....	421,676
		Wool, &c.....	138,911

The army on the peace footing consists of 100,000 men. On a war footing it is raised to 452,000 men, with 510 guns. The colonial forces, including militia, number 236,000. Service is compulsory on all for 8 years in Spain, or 4 years in the colonies. The navy consists of 126 steam-vessels, including 7 iron-clads, and about 22,000 men.

Nearly all the 49 Provinces are now connected by railways, of which about 5,523 miles have been completed, and there are 10,670 miles of telegraph.

After the accession of the late King Alfonso great efforts were made to rectify past mistakes, and place the finances of Spain on a more satisfactory basis. The national debt has been in a large measure consolidated, and consisted in October, 1887, of a nominal capital of £228,340,750, on which interest is paid mostly at the rate of 4 per cent., and of other liabilities, including the Church Fund and arrears of salary due to functionaries, to the amount of £14,302,000. The debt, in 1887, involved a charge of £10,750,000.

Public revenue, 1887.....	£35,287,582

DEPENDENCIES.—The Spanish Colonial Empire is but a shadow of what it was in former times; still it is of considerable importance to the mother-country, and in Cuba and Porto Rico (49,479 sq. miles, pop. 2,275,997) she possesses two islands, the capabilities of which are very considerable. In Africa, Spain possesses but a small territory, for the "protectorate" quite recently (1884) declared over the coast of the barren Sahara, between Capes Bojador and Blanco, may prove of service to her Canarian fishermen, and lead to some trade at one or two factories, but is not otherwise of much importance. In Morocco, Spain holds Ceuta and a few other places, included under the name of "Presidios," as well as the small town of Ifni on the west coast; in the Gulf of Guinea, the islands of Fernando Po and Annobom, with the coast around Corisco Bay (in all, 1,500 sq. miles, with a population of 50,000). Far more important are the Philippine Islands in Asia (114,360 sq. miles, pop. 5,636,000). In the Pacific, Spain is the acknowledged owner of the Mariana Islands (404 sq. miles, pop. 8,665), and her claim to the Pelews (Palao) and to the Carolinas (1,450 sq. miles, pop. 36,000) has recently been conceded by Germany. These islands were discovered by Spanish navigators in the 16th century, and have always been included in Spanish documents as a portion of the Colonial Empire, but they were never effectively occupied. The conflicting claims of Spain and Germany were referred to the arbitration of the Pope, and an amicable arrangement effected. Including these islands, the colonial dependencies of Spain have an area of 167,230 square miles, with a population of 3,007,000.

SWEDEN AND NORWAY.

King, Oscar II., born 21 January, 1829; *suc.* 18 September, 1872; *married* 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, born 9 July, 1836.
Heir Apparent, Oscar Gustaf Adolf, Duke of Wermland, Crown Prince, b. 16 June, 1858; m. 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, born 7 August, 1862.
Minister of Foreign Affairs, Count Ehrensward.
Envoy Ext. and *Minister Plenipotentiary in London*, Count Charles Edward Piper, 47, Charles Street, Berkeley Square, W.
Secretary of Legation, F. d'Adelborg.
Consul-General, Carl Jullin-Dannfelt, 24, Great Winchester Street, E.C.
Vice-Consul, J. W. Tornöe.

The Kingdoms of Sweden and Norway, now united under one sovereign, embrace between

them the entire north-western peninsula of Europe, usually called Scandinavia, situate between lat. 55° 20'—70° 12' N. and long. 4° 37'—31° E., bounded by the Baltic Sea and Gulf of Bothnia on the east, and the Atlantic on the west.

Sweden comprises the eastern half of the peninsula, and, except the capital, is divided into 24 governments, "Län," with an area of 173,974 square miles, and a population, Dec., 1886, of 4,717,189, nearly all of whom are Protestants, and for the most part well educated. About 2,340,000 of the population are devoted to agriculture, about 230,000 being owners of the land they cultivate. The coast-line is about 1,550 miles in extent. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kiölen Mountains, which separate Sweden from Norway, and may be divided into three separate districts: the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-eleventh of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, wheat, barley, rye—and potatoes; a large quantity of oats are annually exported. The forests are very extensive, covering nearly one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, as supplying not only pitch and tar, but also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. A railroad is now in course of construction for the purpose of opening up the rich iron-ore districts of Lapland. Considerable mines of coal are being worked in Scania. The chief articles of import are coffee, sugar, rice, tobacco, and other ordinary colonial produce; coals, cloth, yarn, wool, cotton, hides, salt, spirits, oils, rye, pork, and machinery. The chief articles of export are timber, oats, cattle, butter, iron, copper, steel, paper, matches, zinc ores, pitch, tar, &c.

Railways 4,131 miles in length (of which 1,432 are the property of the state) are open, and 5,400 miles of telegraph.

The field army of Sweden numbers about 40,000 men, with 234 guns; the militia (Bevärings), including volunteers, 138,000 more. The navy consists of 54 steamers and 170 guns, 15 being ironclads, with 13 sailing vessels, mounting 105 guns. The navy when fully manned comprises about 6,000 officers and men, with a reserve of 35,000 men.

NORWAY.

MINISTRY (26th June, 1884).

President of the Council of Ministers, *Minister of State and of War*, Johan Sverdrup.
Minister of Public Instruction, Dr. E. Blix.
Minister and Auditor General, Jacob Sverdrup.
Minister of Justice & Police, J. Stang.
Minister for the Interior, S. Azctander.
Minister of Finance & Customs, B. M. Haugland.
Minister of Public Works, B. Kildal.
State Secretary, H. Lehmann.
Sec. to President of the Council, William Collett.
Ministry Resident at Stockholm: *Minister of State*, O. Richter; *Ministers without Portfolio*, H. R. Astrup, A. Sörensen.
General Secretary, H. Schlytter.

Norway, an independent kingdom, since 1814 united with Sweden under the same King of the House of Bernadotte (the fundamental law of the 17th of May (4th of November), 1814, the Act of Union with Sweden of the 6th of August, 1815). The Parliament is called the "Storting" which is divided into two sections, chosen by itself, to discuss projected Bills, called "Odelthing" and "Lagthing." The western and northern portion of the peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 121,740 square miles, with a population of 1,925,000. The coast-line is extensively indented with numerous fiords, and fringed with an immense number of rock islands. The surface is mountainous, consisting of elevated and barren table-lands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of naked, uninhabitable mountain-land.

Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and butter. The fisheries give employment to a large part of the population throughout the year. The most important fisheries are cod and herring. The mineral products are similar to, but less considerable than, those of Sweden. Shipbuilding and timber-dressing are the industrial arts most extensively prosecuted. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, cod and its oil, herrings, salmon, lobsters, minerals, furs, and ice. The navy consists of 44 steamers, with 154 guns, 4 being monitors. The mercantile marine in 1886 consisted of 6,322 vessels, of 1,546,000 tons. The army consists of 18,000 men of the line, 18,000 men of the "landværn," who can only be called upon for the defence of the country; 18,000 men of the "landstorm," liable only for local defence. Military service is obligatory and personal after the completion of the twenty-third year. The period of service is five years in the line, four years in the "landværn," and four years in the "landstorm." The administration of Norway is entirely distinct from that of Sweden, and it retains its own laws. The debt was incurred chiefly in the construction of railways (970 miles open). The length of telegraphs at work in 1887 was 4,810 miles.

Revenue, 1887-88	Estimated	£2,433,000

SWITZERLAND, REPUBLIC OF.

Presid. Swiss Confederation, J. Zumb, Lucerne, elected 6 June, 1887.
Vice-Pres. Fed. Council, and Chief of the Political Department, Herr Kurz, Argovur.
Pres. of National Council, N. Dröz, Berne.
Pres. of Coun. of States, Juvard, Geneva.
Federal Chan., G. Ringier, of Zofingen. Argovur.
Agent and Consul-Gen., London, Henri Vernet, 25, Old Broad Street, E.C.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'—47° 34' N. lat. and 5° 58'—10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1848, and comprises a total area of 15,981 square miles, with a population of 2,906,750 in 1884, who are divided between Roman Catholics, 41 per cent., and Protestants, 58 per cent., Jews numbering 7,400, and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romanshe (in the Grisons), 1½ per cent. The most considerable cities are Zurich, 75,956, Geneva, pop. 68,320, and Basel, 61,399. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along the whole of its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c.; clocks and watches have long been the staple products of Geneva and Neuchâtel, while leather, gloves, porcelain, pottery, tobacco and snuff, cheese, sugar, &c., are made. Being an inland country, the direct trade with the U. K. is comparatively small, but the amount of business between the two countries, including British colonies, exports and imports, is said to average £6,000,000 annually. In 1884 there were 1,882 miles of railway in working order, and 4,465 miles of telegraph.

The military establishment on a war footing, including Landwehr, consists of 200,774 men—staff 799, infantry 159,962, cavalry 5,615, artillery 24,925, engineers 5,807, others, 3,666.

The legislative power is vested in a Parliament, consisting of two Chambers, a Council of States of 44 members, and a National Council of 145 members; both Chambers united are called the Federal Assembly, and the members of the Second Chamber (National Council) are elected for three years. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of £600; the Vice-President and other members of the Federal Council £480 each. The President and Vice-President are elected for one year, the five other members for three years.

THIBET.

Thibet, or Bodyl (the former name being unknown in the country itself), extends east and west from Cashmere and the Karakorum range to the province of Szechuen in China. It is divided into four provinces, Ari, Tsang, U, and Kam. Ari, a mountainous region, borders on Cashmere and Nepal; Kam adjoins Szechuen. Between the two lies Central or Great Thibet, comprising the provinces of Tsang and U. The Tsanpu or Upper Brahmputra, rising near Lake Mansarowah, traverses the entire length of the two provinces. The capital is Lhasa, in the province of U, situated on one of the tributaries of the Tsanpu, 11,700 feet above the sea. The form of government is a hierarchy: the religion is Buddhism, which was introduced in the seventh century, long after its adoption in China. The extraordinary geographical features of Thibet, the height of its mountain ranges, the great rivers which here take their rise, the numerous salt and fresh-water lakes, situated from 13,800 to 15,400 feet above the sea-level, the amiable character of the people, and the nature of their religion, all combine to create an interest in this country which is enhanced by the mystery in which it is still shrouded and the difficulty of adding to our knowledge. In 1885 the imports from Thibet into India only amounted to £24,097, the imports from India to £30,806.

TONGA ISLANDS (FRIENDLY ISLANDS).

King, George I. Tubou.

A group of islands in the Southern Pacific, to the east of Fiji, with an area of 385 square miles and 23,000 inhabitants. Vavau and Tongotaba, the largest among them, have much fertile soil. The principal products are copra, coffee, cotton, arrowroot, and fruits. The imports (1885) had a value of £72,000, the exports of £74,000. Most of the imports (£32,500) come from England, while the bulk of the exports (£48,000) goes to Germany, which has a coaling station on Vavau.

Vice-Consul, J. Leefe.

TONGKING.

French Resident,

A French possession in Eastern Asia, which was ceded by Annam in 1884 (see p. 471). Its principal river is the Song-ka, which rises in the Chinese province of Yun-nan, and forms an extensive delta at its mouth. Tongking has an area of 35,000 square miles, with a population of 9,000,000 (see also Annam).

TRANSVAAL, OR S. AFRICAN REPUBLIC.

President of the “Uitvoerend Raad” (Executive),

S. J. Paul Krüger, elected April, 1883.

Vice-President, N. J. Smit.

Pres. of Legis. Council (Volksraad), J. J. Hoffman.

Secretary of State, J. V. Eduard Bok.

A South African Republic, bounded on the north by the Limpopo or Crocodile River, on the east by the Portuguese possessions, Swaziland and Zululand, on the south by the Vaal River, and on the west by the countries of the Bechuana, Bangwaketsi, and other tribes. Its limits lie between latitude 22° 15'—28° 40' S. and longitude 26°—32° 10' E. Area 112 700 square miles, containing about 800,000 inhabitants, of whom 50,000 or 60,000 are whites. The chief riches of the country, apart from its cattle and agricultural produce of all kinds, is gold. Copper, lead, cobalt, iron, and coal are also found. The history of the Republic is interesting. In 1840 a number of Boers, dissatisfied with the Government at the Cape, chiefly in connection with slavery and the treatment of the natives, left that colony and established themselves in Natal, where their treatment of the Zulus compelled the British Government to interfere and annex that settlement. Many of the inhabitants rather than submit left Natal, and crossing the Vaal River established a Commonwealth in which they could act with more freedom in their intercourse with the natives. In 1854 the commonwealth was recognized, but in 1877 the Cape Government, fearing an outbreak which might lead to a general rising of the natives, took possession of and annexed the Territory. This proceeding was violently resented by a large number of the Boers, who took up arms and were successful in their encounters with small bodies of British troops; more were poured into the colony, and the rising would have been speedily quelled, but after a truce, the Government, by Convention, 3rd August, 1881, agreed to give up the country to the Boers, subject to certain regulations, the suzerainty of the British Crown being recognized. The chief towns are Potchefstroom and Pretoria.

TRIPOLI.

Governor-General, Ahmed Rassim Pasha, appointed November, 1881.

A Vilayet, or Province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the States of Barbary, including Fezzan and the Sanjak of Barka. It has an area of 399,000 square miles, and a population of 1,010,000, but this is uncertain. There are no rivers in the country, and rain seldom falls. The military force of the country, usually of about 3,000 Turkish soldiers, had in October, 1885, been increased to 17,000 men. The revenue is chiefly raised by tax or tribute. Principal articles of import: metals, British and other European manufactures, wines, and spirits. European articles of export: bullocks, ivory,

wheat, oil, barley, ostrich feathers, madder, pepper, wool, and (lately) esparto grass. Bengazi, the second town in the vilayet and capital of a Sanjak, has a population of 22,000, consisting of Arabs, Greeks, and Levantines. The commerce in cereals, wool, and other agricultural produce is considerable. The discrepancy between the amounts given by the Foreign Custom House, and by the English, is so great that both are printed; of course, both cannot be correct. The same remarks apply to the trade with Tunis.

TUNIS.

Bey, H. H. Sidi Ali Pasha Bey; born 1817; suc. 28 October, 1882.
French Governing Resident, M. Massicault, appointed November, 1886.

The Regency of Tunis, formerly a tributary province of the Ottoman Empire, may now be considered an informally annexed dependency of France, nominally under the dominion of the Bey, but in reality under the control of a French Resident, the Bey's functions being now almost entirely confined to the distribution amongst French officials of a chivalric Order known as the "Nishan Ifthar." By a convention signed 10 July, 1882, France administers the country and collects the taxes in the name of the Bey, who is granted a civil list of £37,500, and the princes a sum of £30,000. It is in the north of Africa, situated on the Mediterranean, east of Algeria, between lat. 32° 20'—37° 25' N. and long. 7° 40'—11° 15' E. It comprises an area of 44,920 square miles, and has about 1,500,000 inhabitants.

The chief town, Tunis, is the largest and most commercial city of Barbary, with a population of 145,000, of whom 30,000 are Jews and 23,000 Christians (8,000 Maltese). It possesses considerable manufactures of silk and woollen stuffs, shawls, carpets, mantles, fez caps, berouses, also otto of roses and jessamin. The chief exports are grain, oil, wool, and esparto grass. N.E. of Tunis is the site of the ancient city of Carthage. There are 258 miles of railway and 1,245 of telegraph.

TURKEY (THE OTTOMAN EMPIRE).

Sultan, Abdul Hamid II., b. 22 September, 1842. proclaimed 31 August, 1876.
Heir Presumptive, his brother, Mchhemmed Reshad Effendi.
Prime Minister, Kiamil Pasha.
Minister of Foreign Affairs (Kharidjic-Naziri), H.E. Suif Pasha.
Interior, Munir Pasha.
Public Instruction, Munif Pasha.
Ambassador in London, H.E. Rustem Pasha, 1, Bryanston Square, W.
Councillor of Embassy, Morel Bey.
1st Secretary, Abdul-Hak Hamid Bey.
2nd Secretary, Mustapha Chakib Bey.
Naval Attaché, Lieutenant Khalil Effendi.
Consul-General, Emin Effendi Féredjullah, 5, Union Court, Old Broad Street, E.C.

TURKEY IN EUROPE, formerly very extensive, is now reduced to 66,500 square miles, with a population of 4,663,000. (This, however, does not include Bulgaria, Eastern Roumelia, and Bosnia, which jointly have an area of 58,739 sq. miles, and a population of 4,320,110.) The total population includes about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,000,000 are Mohammedans. A great part of the surface is covered with mountains of moderate elevation. Since the Balkans no longer lie within the limits of the empire (although Turkey is entitled to occupy their passes in case of war), the loftiest mountains are those of the Rhodope or Despoto Dagh (7,464 ft.) in the east, and the mountain-ranges of Albania in the west. To the latter belongs the Skhar Dagh (10,007 ft.), the culminating point of the whole Balkan peninsula. Rivers are numerous, the principal of which are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, cotton, barley, millet, sesame and other oil-seeds, and tobacco; the natural products are the pine, beech, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing works.

TURKEY IN ASIA, the larger of the two divisions, comprises Asia Minor, Syria, including Palestine, the greater part of Armenia, and Kurdistan, Mesopotamia (the valley of the Euphrates and Tigris), and the western portion of Arabia, bordering the Red Sea, with the district of El Hasa on the eastern side of the

Persian Gulf; having a total area of 680,000 square miles, and an estimated population of 16,333,000 inhabitants. To this number must be added the populous island of Samos (180 sq. miles, pop. 40,513), and Cyprus, which pays an annual tribute. Of the total population about 6,800,000 are Turks, 5,300,000 Syrians and Arabs, and 1,000,000 Greeks. The number of Mohammedans is 12,000,000.

In AFRICA, Turkey rules Tripoli and Barka (399,000 sq. miles, pop. 1,010,000), and levies a heavy tribute upon Egypt.

Nominally, therefore, the Turkish Empire has an area of 1,710,000 square miles, with 32,500,000 inhabitants, but of the vast territories only 1,145,500 square miles, with 22,011,000 inhabitants, are under the direct rule of the Turks, the rest paying a tribute or merely acknowledging the suzerainty of the Porte.

The exports of the Turkish Empire for the year 1886, including tobacco (£1,000,000), amounted to £10,879,000, the imports at £18,021,000. The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. There are 920 miles of railway (of which 390 in Asia). The Commercial Marine consists (1887) of 388 vessels (16 steamers) of 75,368 tons.

The finances of Turkey are in anything but a satisfactory condition. In 1876 the Empire declared itself bankrupt, but the creditors came to an arrangement, and certain revenues (duties, stamps, duties on salt, spirits, silk, fish, and a portion of the duty on tobacco) were assigned to them in payment of interest on a very much reduced scale, and towards a sinking fund. At present the debt includes priority bonds held by Galata bankers (£8,170,000); consolidated stock (£90,500,000); debt guaranteed by France and England, or secured upon the Egyptian tribute (£15,000,000); railway bonds (£14,212,000), an internal debt (£21,200,000), and the balance of £32,000,000, which Russia claims as a war indemnity. It was arranged by the Berlin treaty that Bulgaria, Eastern Roumelia, Servia, Montenegro, and Greece should take upon themselves a portion of the Turkish debt, but little appears to have been received from these emancipated or aggrandized States.

The army is recruited by conscription, from which Christians are still exempt on payment of a tax. The term of service is 14 years, of which 6 are passed in the Nizam or its reserves, and the remainder in the Redif or Landwehr. There is in addition a Muhstafiz or levy-en-masse. In 1886 about 475,000 men are stated to have been under arms. On a war footing the army is supposed to muster 18 army corps (Nizam and Redif) of 612,000 men, with 1,512 field guns; dépôt troops, 200,000 men; garrison troops, 70,000 men; and a Muhstafiz of 300,000 men. The navy consists of 64 steamers, including 15 ironclads.

A Federal Republic, consisting of 38 partially independent States, 1 Federal District, and 8 organized Territories, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25°—49° N. and long. 67°—124° 30' W. The area is estimated at 3,008,400 square miles, of which rivers and lakes cover 38,400 square miles. This area, however, is exclusive of the vast district of Alaska, in the extreme north-west of the continent, purchased from Russia, 30th March, 1867, comprising 577,390 square miles. Only one-fourth of the country is to any great extent in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1880, was

50,152,866; inclusive of coloured people, 6,580,793; settled Indians, 143,302; unsettled Indians, 179,332; Chinese, 105,468; and Alaska, 35,426; Germans, 1,966,742; Irish, 1,854,571; Canadians, 717,157; English, 662,676; Scandinavians, 440,262; Scotch, 170,136; Welsh, 83,302, and 519,254 of other nationalities, in addition to which no fewer than 12,978,394 natives were of foreign parentage, every country under Heaven being represented. The total present estimated population is 61,000,000. The increase in the ten years, 1870—1880, was 11,504,405.

Its coast-line on both oceans is reckoned to have a length of about 13,200 miles, excluding the numerous bays and sounds, besides 3,620 miles on the great Canadian lakes. The principal river is the mighty Mississippi-Missouri, formed by the confluence of these two noble streams, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward, the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic interrupted only by the Alleghany Mountains. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt, and lead, which in Missouri appear inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. In California, besides silver, iron, copper, and lead, gold is found in great abundance; quicksilver is found in Kentucky, also coal, the supply of which is said to equal that of any country in the world. A

* There are no titles legally in use in the U. S., but it is customary to apply the courtesy title of "Honourable" to persons holding elective offices and the higher appointive offices of the Government, such as members of the cabinet: and in the same way the U. S. Minister in England would naturally be addressed as "His Excellency."

correspondent writes to say that in California the increase in the produce of wine is so great that the value will probably equal that of the minerals. Nitre is found in Kentucky, Tennessee, and Virginia. The salt-springs are numerous and copious, and appear almost inexhaustible.

The financial condition of the United States of America exerts a great influence on that of other nations. The extensive trade transacted by the Union with all parts of the world necessarily reacts on the exchanges of the countries with which business is engaged in. Before the unfortunate internecine struggle that has happily become a matter of history, the debt of the States as a whole was, comparatively speaking, nominal. The following is a statement of the debt on the 1st November, 1887:—

Four and a half per cent. bonds	\$230,544,600
Four per cent. bonds and certificates	732,602,630
Three per cent. bonds	14,000,000
Pacific Railway Bonds, at 6 per cent.	64,623,512
Miscellaneous liabilities (incl. intrst.)	12,010,206
Greenbacks and other currency	621,295,767
Total debt	1,675,076,715
Less cash and reserve in Treasury	436,384,014

Actual indebtedness \$1,238,692,702

During the fiscal year ending June 30, 1886, the debt was reduced by \$44,531,530.

On Dec. 1, 1887, the actual indebtedness was \$1,240,183,052.

The total decrease in the debt since August 31, 1865, when, after deducting the cash in the treasury, it amounted to \$2,756,431,571, to Nov. 1, 1887, has been \$1,517,738,862.

Balance Sheet for Year ending June 30, 1887.

RECEIPTS.

Customs	\$192,905,023
Internal revenue	116,805,936
Land Sales	} 26,728,768

Indians	} 69,504,022
Pensions	
Interest on public debt	50,580,147
	\$242,483,138

The total income for the previous year was \$336,439,727, and the expenditure \$242,483,138.

Total imports (merchandise) 1885-86 \$635,435,136

Total exports " " 679,524,830

The navy of the United States on the 1st July, 1887, was:—

Number of war-vessels (12 sailing)	90
Armament Guns	542
Enlisted men (active list)	8,250
Commissioned officers (active list)	1,582
Non-commissioned officers (active list)	187
Marine Corps:— Commissioned officers	81
Privates and non-comm. officers	2,014

The army (Nov. 1887) consisted of 2,200 officers and 24,236 enlisted men.

The Government of the United States is, by the Constitution, intrusted to three separate authorities—the Executive, the Legislative, and the

Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:— Each state chooses, by popular vote, "Electors" equal in number to the Senators and representatives sent by that State to Congress. The Electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President. There is also a Vice-President, who is *ex-officio* President of the Senate; and, as in a late instance, on the death of the President, succeeds to the office for the remainder of the term. In case of the disability of both President and Vice-President, the Senator who may be president *pro tem.* of the Senate, and after him, the Speaker of the House of Representatives, succeeds to the Presidency until Congress orders a new election.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *вето* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population, 1 for 154,325. The Senate consists of 76 members, and the House of Representatives of 325.

The Supreme Judicial Authority is vested in a Chief Justice and eight Justices, who are appointed for life by the President, by and with the consent of the Senate.

The following is a list of the 38 States included in the Union:—

Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin.

Our trade with the United States is of the most satisfactory kind, nearly all the goods received from that country being of native growth or manufacture. England is her best customer. It is much to be regretted that the high protectionist duties imposed upon goods from the U. K. limits their import. The chief articles received from the U. S. in the year 1886 were:—

Animals, living	£2,293,508	Fruit	£484,289
Bacon and hams	6,314,321	Iron and steel manufactures	177,120
Beef, fresh & salted	2,073,751	Lard	1,330,467
Cheese	1,837,487	Leather	1,419,477

POSTAL.—The number of Post Offices in the United States, June 30, 1887, was 55,157. The value of postage stamps sold was \$45,670,983. The number of money orders granted was 9,232,177, and the amount \$117,462,660.

RAILWAYS.—The number of miles open upon which mails are carried and in actual use on the 31st October, 1887, was 135,488, of which 9,422 miles were constructed during the year. The Telegraph wires belong to private corporations.

MERCANTILE MARINE.—In June, 1886, it consisted of 23,534 vessels, of 4,131,136 tons, inclusive of 5,467 steamers, of 7,522,984 tons.

COMMERCE OF THE UNITED STATES.

The following table, prepared at the Bureau of Statistics, Washington, exhibits the steady increase of the trade of the United States during the past 25 years. Nearly the whole amount of merchandise exported is of home growth or manufacture. It is noticeable that for the first 12 years, the imports exceeded the exports, but that during the past 14 years the balance of trade has been largely in favour of the country. These figures represent the specie values of merchandise only, and are made up to June 30 every year.

YEAR	EXPORTS.	IMPORTS.	TOTAL.
	Dollars.	Dollars.	Dollars.
1862	190,670,501	189,356,677	380,027,178

URUGUAY.

President, Maximo Tagés, elected 19 November, 1886.

Minister of Foreign Affairs, Ildefonso Garcia Lagos Blanco.

Minister Plen. in London,
Sec. of Legation, M. A. Portillo.

Consul-General, Dr. Alberto Nin, 35, New Broad Street, E.C.

A Republic in South America, on the east coast,

of the Rio de la Plata, situate in lat. 30° – 35° S. and long. $53^{\circ} 25'$ – $57^{\circ} 42'$ W., containing an area of 72,112 square miles, and a population of 559,668 in 1884; was formerly a dependency of Spain. United to the Argentine Confederation early in the present century, it was afterwards annexed by Portugal, and became later a province of Brazil; but through the bravery of the patriotic "thirty-three" it succeeded in throwing off the Brazilian yoke, declared its independence on the 25th of August, 1825, and rejoined the Platine States. A war in consequence ensuing between Brazil and the Argentine Confederation, both the Powers agreed, through the mediation of Great Britain, to recognize Uruguay as a sovereign and independent State, the Constitution of the Republic being sworn on the 18th of July, 1830. The language of the country is Spanish, the inhabitants being chiefly descendants of the original Spanish settlers and Italian and other European emigrants. Much attention has lately been given to elementary education, which is entirely free. The country is extremely well watered, and the climate healthy, resembling that of the south of France. There are no Indians, but there is a sprinkling of Negroes, engaged chiefly as servants and in the army. Judged proportionately in regard to population, and of goods imported from Great Britain, Uruguay stands at the head of the list as our best foreign customer. The imports from Great Britain are very numerous, the principal being woollen and cotton goods, hardware, and coals. The chief exports are wool, hides, horn, hair, tallow, and, during recent years, fresh meat. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (6,009,791 in 1883), horses, and sheep (14,595,495 in 1883), the wool of which is of excellent quality. Gold mines exist at Cufiapirú. The principal river is the Uruguay, which forms the western boundary, and its affluents, of which the Rio Negro is the chief. There is a regular army of 3,100 men with 30 guns, in addition to a militia of 20,000 men. The navy consists of 5 small steamers. There are 261 miles of railway and 660 miles of telegraph.

Public revenue, 1886–87	£1,636,204
Public expenditure, 1886–87	1,482,963
Public debt, Jan. 1, 1886	12,466,000
Total imports, 1885	5,245,378
Total exports, 1885	5,327,072
Imports from United Kingdom, 1886	1,325,892
Exports to United Kingdom, 1886	414,203

VENEZUELA, REPUBLIC OF.

President, General Guzman Blanco, elected 14th September, 1886. Absent on Diplomatic business.
Vice-President, Hermogene Lopez, 9 Aug., 1887.

Minister of Foreign Affairs, R. Seijar.
Finance, A. Alamo Herrera.
Minister to England (vacant).
Secretary of Legation, Rafael Seijas.
Attaché, G. F. Valens.
Consul in London, Nathaniel G. Burch, 4, Tokenhouse Buildings, E.C.

The most northerly Confederation of South America, situated between $1^{\circ} 30'$ – $12^{\circ} 12'$ N. lat. and $59^{\circ} 52'$ – $73^{\circ} 15'$ W. long. It consists of 21 States, comprising an area of 566,159 English square miles, and a population, in 1883, of 2,121,988. The goldfields on the Orinoco are among the richest in the world, and yielded in 1884 £543,530. The chief imports are manufactured goods, provisions, and wine. The chief exports are coffee, cocoa, hides, cotton, sugar, tobacco, indigo, bark, tallow, dye-woods, timber, and copper ores. The railways opened and under construction have a length of 370 miles.

Public revenue, 1885	£1,220,576

ZANZIBAR.

Sultan, Seyyid Barghan-bin-Said, G.C.M.G., suc. 7 October, 1870.

A territory situated on the east coast of Africa, extending from about 3° N. to $1^{\circ} 30'$ S. Zanzibar was conquered in 1784 by a Sultan of Omán in Arabia, and became an independent dominion under a brother of the Sultan in 1856. The islands of Zanzibar and Pemba are by far the richest and most important of the Sultan's dominions, distant from the coast about 25 miles. Zanzibar has an area of 614 square miles, with a soil of more than ordinary fertility, covered with woods and plantations of perpetual verdure. The principal products are cloves, rice, sugarcane, manioc, millet, coconuts, and fruits, especially oranges, of the finest quality. The population of the island is estimated at 200,000. The chief people are Arab landed proprietors, possessing large plantations and numerous slaves; besides these are the free blacks and slaves, and about 6,000 natives of India, who are all engaged in commerce, and through whose hands nearly all the foreign trade passes. Zanzibar, the chief town, is extensive, with a population of 80,000; but there are several important towns on the coast where native merchants reside, and whence caravans are sent into the interior to collect ivory and other products. The more important of these towns are Brava, Melinda, Mombasa, Pangani, Bagamoye,

and Kilwa. The Sultan's authority, however, does not extend along the whole of the coast, and this has enabled Germany to step in and establish claims upon a considerable portion of it. The limits between the Sultan's possessions and the German Protectorate were defined, in 1885, by an International Boundary Commission. The Universities Mission and other missionary societies have established themselves at various points of the Sultan's dominions. Bagamoyo is the centre of a French Roman Catholic Mission. The imports of the Island of Zanzibar consist of cotton goods, beads, arms, brass wire, &c., and amount to about £800,000; and the exports, consisting of gum-copal, cloves, ivory, india-rubber, cocoanut-oil, seeds, &c., amount to about £1,200,000. Since 1871 the trade has greatly increased; and the Sultan's revenue amounts to about £245,000. The export of slaves has never totally disappeared. There is a small army of about 1,200 men.

ZULU REPUBLIC.

President, L. J. Meyer.
Secretary of State, Esselm.
 When Cetewayo, the Zulu King, was defeated on July 21st, 1883, by his rival Usibebu, he fled into the Zulu Reserve, and died there February 9th, 1884. His son and heir Dinizulu appealed for help to the Boers, with whose assistance he defeated Usibebu on June 10th, 1884, and they claimed and received in acknowledgment of their services a large slice of his kingdom, which they proclaimed on August 16th, 1884, as a "Nieuwe Republiek." Subsequently the Boers managed to obtain additional concessions, until the new State extended down to Santa Lucia Bay, which brought them into conflict with the British authorities. According to an agreement concluded on October 22nd, 1886, between delegates of the "New Republic" and the Governor of Natal, the Boers have, however, surrendered their claim to the coast, and the new State is therefore confined to the western part of independent Zululand, adjoining Transvaal and the Zulu Reserve. Its area is about 1,800 square miles. The "Capital" is called Vryheid ("Freedom").

Good and Bad Seasons and Harvests,

THE WEATHER IN THE BRITISH ISLANDS DURING THE YEAR ENDING
31ST OCTOBER, 1887.

This summary of the weather experienced in the British Islands during the year commencing November 1st, 1886, and ending October 31st, 1887, has been mainly compiled from the data contained in the Daily and Weekly Weather Reports issued by the Meteorological Office. It is

hoped that the remarks on each month will be useful for purposes of reference and comparison, especially when considered in relation to the daily results of the Greenwich observations as given for each month in the Almanack.

November, 1886.—The weather was very mild and quiet, though seldom clear. The sky was clearest in the north of Scotland. Fog was prevalent in England, mist in Ireland. Between the 23rd and the 26th a very obnoxious fog hovered over London. The highest temperature, 50°, was recorded at London on the 3rd; the lowest, 25°, at Markree on the 19th. At 8 a.m. on the 19th, the temperature at Scilly was 54°, while at London it was only 31°; on 20th at Wick 54°, Belfast 31°; on 22nd at Valencia, 54°, Loughborough 31°; on 23rd, Valencia 52°, Oxford 29°; on 26th at Scilly 52°, Parsonstown 35°. The rainfall was very frequent, though the amount was below the average, especially in the south of England. On the 5th, 1'64 inches fell at Liverpool, 1'53 at Holyhead, 1'28 at Shields; on 7th, 1'01 at Shields. Aurora was seen in the north of Scotland on the 2nd, 3rd, 4th, and 24th. A thunderstorm occurred in Ireland on the 3rd, and one in Scotland on the 16th. The greatest atmospherical pressure, 30'8, occurred on the 24th; the least, 28'9, on the 5th; so that the range was very large, 1'9 inches. Bright sunshine, estimated in percentage of its possible duration, varied between 31 in east Scotland and 17 in central England.

December, 1886.—The weather was cold, stormy, variable and wet, with heavy falls of snow. The highest temperature, 56°, was recorded at Hereford on the 6th; the lowest, 6°, at Brookeborough on the 20th. At 8 a.m., on 5th, the temperature at Valencia was 52°, at the same instant at Loughborough it was only 29°; on 17th Scilly 47°, Parsonstown 22°; on 21st Valencia 47°, Loughborough 17°; on 31st Valencia 47°, Loughborough 20°. Rainfall, including snow melted, was in all parts above the average, both in amount and frequency. At Belmullet 1'01 inches of rain fell on 7th; at Crawle Point 1'04 on 13th; at Spurn Head 1'00 on 14th; at Scilly 1'22, at S. W. 1'46, at London 1'34 on 26th. At Plymouth 1'8 fell between noon and 6 p.m.; at Southampton 2'83 in nineteen hours, while most of the south-east of England received from 8 to 12 inches of

snow. The snow and wind caused immense breakage of telegraph wires in London. Atmospherical pressure was greatest, 30'55, on 31st; least, 27'38, at Belfast on 8th; hence the absolute range was no less than 3'17 inches. Only one instance of a lower pressure has been recorded in these islands, and that was 27'33 at Ochertyre, January 26th, 1884. At 8 a.m., 8th, the barometer at Belmullet was 27'58, having fallen 1'76 in 14 hours, at the rate of 0'13 per hour.

A series of cyclonic storms occurred; and, on the 8th, a thunderstorm with squalls of hail in London. Aurora was seen in north Scotland on 27th and 29th. Bright sunshine varied between 33 in north-east England and 14 in north Scotland.

January, 1887.—The weather was cold and frosty during the first part of the month, mild and humid during the latter. The mean temperature was 3° above the average in the north of Scotland, and 3° below in east England. The highest temperature, 55°, was recorded at Landale on the 19th; the lowest, 8°, at Rathmupstead on the 1st. At 8 a.m., 1st, while the temperature at Valencia was 48°, it was only 14° at Cambridge; 2nd, Roche's Point 45°, Cambridge 14°; 6th, Scilly 45°, Loughborough 22°; 7th, Scilly 45°, York 24°; 10th, Roche's Point 48°, Donaghadee 26°; 13th, Valencia 48°, York 23°; 17th, Valencia 49°, Loughborough 15°. Rainfall was above the average only in north Scotland. At Roche's Point 1'05 inches of rain fell on the 10th. Snow fell on several of the early days, and fog was frequent. On the 16th and 17th snow fell heavily over the northern and midland counties of England and in Wales. The greatest atmospherical pressure, 30'7, occurred on the 21st; the least, 28'7, on the 3rd; so that the absolute range was 2 inches. Bright sunshine varied between 22 in south Ireland and 8 in north Scotland.

February, 1887.—The weather in England was cold, clear, with hoarfrosts, mists, and fogs; in Scotland very mild, wet, and overcast; in Ireland mild and dry. The temperature of north Scotland was 4° above the average, and 1° warmer than the south of England; the west of

Ireland was 7° warmer than the east of England. The highest temperature, 61°, was reported at Llandoverly on the 3rd; the lowest, 16°, at Cambridge, on the 16th. At 8 a.m., 7th, while the temperature at Valencia was 50°, at Loughborough it was only 29°; 8th, Valencia 45°, York 24°; 9th, Scilly 43°, Leith 22°; 10th, Stornoway 43°, Aberdeen 24°; 17th, Valencia 50°, London 22°; 26th, Valencia 50°, Oxford 28°; 27th, Nairn 49°, Oxford 29°; 28th, Sumburgh Head 49°, Oxford 24°. Rainfall in north Scotland was above the average; in England and Ireland much below. There were only six rainy days in east England. Atmospheric pressure was much above the average; the greatest, 30·8 inches, occurred on several days; the least, 29·9, on the 3rd. Bright sunshine varied between 43 per cent. in east England, and 24 in north Scotland.

March, 1887.—The weather was keenly cold and frosty, bright sunshine tempering the dry N.E. winds; the last week was mild and stormy. Temperature was 4° below the average in south England; the highest, 61°, was reported at Aberdeen on the 3rd; the lowest, 10°, at Lairg on the 16th. At 8 a.m., 1st, while the temperature at Belmullet was 48°, it was only 28° at Loughborough; 4th, Sumburgh Head 46°, Loughborough 24°; 11th, Valencia 45°, Nairn 28°. The first eleven days were almost rainless. There was a black fog in London on the 15th, and snow fell to the depth of eight inches by next morning, extending over south England. Atmospheric pressure was greatest, 30·6 inches, on the 2nd; least, 28·9, on the 23rd. Aurora was seen in north Scotland on the 15th, 18th, 19th, and 23rd. Bright sunshine varied between 44 per cent. in south-west England and 27 in central England.

April, 1887.—The weather was fine, cold and dry. Temperature was 5° below the average in south England; the highest, 70°, was recorded at Strathfield Turgiss on the 19th; the lowest, 20°, at Cirencester on the 12th. About a third of the average quantity of rain fell in south England, and about a half in Ireland. Snow fell in London on the 1st; in north Scotland on the 5th and 6th; and in various parts on the 24th and 25th. From the 6th to the 20th scarcely any rain fell on these islands. Atmospheric pressure was greatest, 30·7 inches, on the 17th; least, 29, on the 23rd. Bright sunshine varied between 56 per cent. in south Ireland and 24 in north Scotland.

May, 1887.—The weather was exceedingly variable both as regards time and place, cold northerly wind predominating. Sunshine was greatly deficient. Temperature was 4° below the average in South England; the highest, 78°, was reported at Hereford on the 8th; the lowest, 28°, at Braemar on the 20th. At Yarmouth 1·13 inches of rain fell on the 6th. Intense darkness came over London before noon on the 17th. On the 20th and 21st thunderstorms with violent squalls of large hail, sleet, and rain were general. The 19th to 21st was a period of great atmospheric disturbance. Atmospheric pressure was highest, 30·5 inches, on several days; lowest, 29, on the 20th. Bright sunshine varied between 38 per cent. in south Ireland and 17 in north-east England.

June, 1887.—The cloudy, rainy weather of the early days suddenly gave way to cloudless sky, brilliant sunshine, and a summer drought. In no other month hitherto have so large per-

centages of sunshine been registered in these islands. The highest temperature, 92°, was reported at Kilkenny on the 23rd; the lowest, 31°, at Penrith on the 21st. In Ireland the air was remarkably warm, 5° above the average. In Great Britain the mean temperature was only reasonable, notwithstanding the prevalence of sunshine. A thunderstorm prevailed in Scotland on the 18th. Rainfall was generally deficient. Rain only occurred on four or five days in east and south England, where the total amount was about a quarter of an inch, only one-tenth of the average quantity. The west of Ireland had about one-third, and north Scotland about three-fourths of their average amounts. At Oxford, during a local thunderstorm on the 2nd, one inch of rain fell. The prevalent northerly winds seem to have counteracted the heating effect of sunshine upon the atmosphere. The atmospheric pressure was greatest, 30·5 inches, on the 30th; least, 29·5, on the 8th; giving the small range of one inch. Bright sunshine varied between 60 per cent. in south England and 32 in north Scotland; about 14 per cent. above that of last year.

July, 1887.—The weather was generally brilliant. Thunderstorms seldom occurred. On the 15th and 16th, however, local thunderstorms were experienced in south-east England, accompanied by heavy rainfalls. The highest temperature, 89°, was reported at Cambridge on the 3rd; the lowest, 33°, at Lairg on the 16th. The central zone of these islands extending from west to east had a mean temperature about 3° above the average, while the extreme north and south had a nearly reasonable warmth. Rain was frequent and exceeded the average amount in the north of Scotland; in all other parts it was below the average. The drought was severely felt in England, the eastern parts having the least frequency and most deficiency of rain. The greatest atmospheric pressure, 30·45 inches, occurred on the 17th; the least, 29·1, on the 27th. Bright sunshine varied between 58 per cent. in east England and 26 in north Scotland.

August, 1887.—The weather was very fine till towards the end of the month, when it became rainy and windy. It was reasonable in north Scotland, fine in Ireland, and very fine in England. Thunderstorms prevailed along the east coast on the 16th; about London on the 17th; in Great Britain generally on the 28th and in the east and south-east of England on the 29th. That over London between 6 and 9 p.m., 17th, was remarkable for the length of the lightning flashes, their frequency, the loudness of the thunder, and the large quantity of rain, from one to two inches, the distribution not having been uniform. The highest temperature, 89°, was reported at Cambridge on the 6th; the lowest, 33°, at Markree on the 14th. At Valencia 1·55 inches of rainfall on the 25th; at Hurst Castle 1·03 on the 30th. The greatest atmospheric pressure, 30·4 inches, occurred on the 3rd; the least, 29·2 on the 30th. Bright sunshine varied between 62 per cent. in south-west England and 23 in north Scotland; generally it was 10 per cent. more than in 1885.

September, 1887.—The weather was rather cold and windy, with frequent, though as regards quantity not excessive, rainfall. The highest temperature, 74°, was reported at Kilkenny on the 6th; the lowest, 32°, at Loughborough on the 29th. The deficiency of rain was relatively most apparent in England and Ireland. Rain

was generally prevalent during the first week, and in the north and east of Scotland in quantities sufficient to damage crops, roads, and bridges. At Aberdeen 1'2 inches of rain fell on the 1st, 1'33 at Mullaghmore, 1'02 at Belmullet, 1'25 at Donaghadee; at Nairn 1'03 on the 4th; at Shields 1'62 on the 6th. The greatest atmospheric pressure, 30'6 inches, occurred on the 6th; the least, 28'9, on the 1st and 2nd at the centre of a cyclonic disturbance which travelled from the south-west of Ireland to the north-east of Scotland. The pressure was nearly uniformly low on the 27th and 28th, and there was very little wind and the weather was fine on those days. Bright sunshine varied between 39 per cent. in south-west England and 21 in north Scotland.

October, 1887.—The weather was severely cold at intervals, attended with thick hoar frosts, some snow and hail, fine bright days and clear nights, mild at times, especially towards the end of the month, when it was also stormy and wet. The prevalence of north-westerly winds was remarkable. The mean temperature in England was about 3° below the average. The highest temperature, 65°, was reported at Ochertyre on the 7th; the lowest, 22°, at Strathfield Turgiss on the 13th. At 8 a.m., on the 9th, while the temperature at Dungeness was 56°, at Parsonstown it was only 33°; 16th, Scilly 51°, Loughboro' 28°; 21st, Scilly 53°, Loughboro' 32°; 22nd, Valencia 51°, London 28°; 25th, Scilly 45°, Parsonstown 25°; 26th, Valencia 53°, Oxford 27°. The first snow in London fell on the 11th. Thunderstorms, attended with snow, hail, and rain, occurred on the 11th, 12th, and 14th. The rainfall was much below the average in Ireland, but on the 26th 2'32 inches fell at Valencia, and 1'15 at Parsonstown; and on the 29th, 1'59 at Scilly. The greatest atmospheric pressure, 30'7 inches, occurred on the 25th: the least, 28'8, on the 30th, and on this day a sharp squally storm did considerable damage in south England. About the time of minimum pressure at Kew, 5 a.m., the wind was blowing at the rate of 9 miles an hour, but as the direction shifted from S.E. to N.W. it very abruptly rose, so that the next hour it had increased to 40 miles. Bright sunshine varied between 35 per cent. in south England and 17 in north Scotland.

The Summer Drought of 1887.—From the commencement of 1887 to the end of September the rainfall of the British Islands was above 27 per cent. below the average. The drought was at times and in many localities seriously felt. The dry periods may be specified as from Jan. 10th to March 21st, March 28th to May 16th, May 23rd

to August 20th, September 5th to October 24th. The drought was most trying to farmers, and most affected the scarcity of water supplied to towns during the summer comprising June, July, and August; when, although the weather was bright and pleasant, the air was not remarkably hot, owing to the extraordinary prevalence of north-westerly winds, the cool air from the Arctic region continually replacing that which was warmed. The drought which characterized the summer resembled that which occurred in the summer of 1885; and both years had a fairly good harvest. Sir John Lawes, F.R.S., in "The Times" of October 17th, gives his annual report upon the harvest, and states that in the eastern, southern, and midland counties of England the mean temperature was below, and frequently much below, the average in 22 out of 27 weeks ending June 6th, and it was especially low during April and May, critical months as regards the growth of wheat. In October, November, and December, 1886, there was an excess of rain, but subsequently there was a deficiency to May inclusive, and a very great deficiency afterwards. This great deficiency is well exhibited for subdivisions of these islands by the subjoined results, taken from the Weekly Weather Reports. The period embraced is from May 23rd to August 20th, 98 days. The rainy days are compared with the average number of rainy days for the eight years 1878-85. The amount of rain is compared with the average rainfall for the twenty years, 1866-85.

DISTRICTS.	Rainy Days.	Diff. from average, 1878-85.	Amnt. of Rain.	Difference from average, 1866-85.
			inches.	inches.
Scotland, N.	57	3 more	8'5	0'2 more
" E.	41	10 less	5'0	3'9 less
England, N.E. ...	30	18 "	2'9	5'1 "
" E.	29	19 "	3'3	4'1 "
Midland Counties	27	23 "	4'0	4'3 "
England, S.	23	24 "	3'6	3'1 "
Scotland, W.	41	13 "	7'0	3'9 "
England, N.W. ...	29	22 "	4'0	5'0 "

Ireland, N.	44	18 "	6'9	2'7 "
" S.	35	21 "	5'7	3'8 "
Channel Isles ..	30	26 "	3'9	3'1 "

Scotland north was the only district which had a seasonable rainfall; in all other districts rain was less frequent and much less in quantity than usual, though the statistics clearly show that the drought was most severe in England.

METEOROLOGICAL OBSERVATIONS, EDINBURGH.

Months.	Number of Days on which Rain fell.	Rainfall in inches.	Above +, below - the average of 20 years.	Average Temperature of the Month.	Average Mean Temperature 24 years.

THE ASTEROIDS AND PLANETS.

DURING the year ended on November 1, 1887, eleven new members have been added to the known planetary bodies, raising the total to 271.

The following are the dates of discovery:—

261, Pymmo ..	by Peters	on Oct. 31,	1886
262, Valda ..	Palisa	Nov. 3,	1886
263, Dresda ..	"	" 3,	1886
264, Libussa ..	Peters	Dec. 22,	1886
265, Anna ..	Palisa	Feb. 25,	1887
266, Aline ..	"	May 17,	1887
267, Tirza ..	Charlois	" 27,	1887
268, — ..	Borrelly	June 9,	1887
269, — ..	Palisa	Sept. 22,	1887
270, — ..			
271, — ..	Knorre	Oct. 13,	1887

The following have been named in the past year:—

255, Oppavia.	257, Silesia.
256, Walpurga	260, Huberta.

It is somewhat doubtful if No. 268 is a new discovery. There is some probability that it is a re-discovery of the asteroid Medusa, No. 149, discovered by Perrotin in 1875.

Professor C. H. F. Peters, speaking at the meeting of the Astronomische Gesellschaft, in August last, of his photometrical researches on the asteroids, finds, as one of his results, that the combined volumes of the first seventy asteroids is to that of the Earth as 1 to 7,862.

Professor Asaph Hall, who for some years past has been investigating the motions of the satellites of the outer planets, has recently published, in an Appendix to the Washington Observations for 1883, an account of his researches on the motions of the six inner satellites of Saturn. The object of the investigation was to determine their peri-saturnia, and thence the mass of the ring. Bessel obtained, in a similar manner, a determination from Titan, only neglecting in his computations to take account of the figure of Saturn. Professor Hall's discussion shows that for Rhea, Dione, and Tethys, the eccentricity is so small that circular orbits will satisfy the observations within the limits of probable error. This is also the case with Mimas and Enceladus. The mass of Saturn, deduced from the four outer of the six satellites observed, agrees closely with that of Dr. Meyer. Practically the five inner satellites move in the plane of the ring, and Professor Hall, in his paper, supplies tables of their motions and elements of the ring.

At the meeting of the Royal Astronomical Society on May 13, Mr. Green read a paper on the appearance of the planet Jupiter. This memoir is the result of a twenty years' study of the planet, the drawings which accompany it having been kept up for twenty-six years, during which period many and marked changes were recorded in the appearance of the planet's disc. This long series of drawings gives a history of those appearances in the aspect of the planet which are comparatively permanent, as well as those of a more ephemeral character. In the interval between 1860 and 1868 the equator was marked by a white band edged with dark belts in both hemispheres. From 1869 to 1872 this band was of a distinctly coppery colour, and the dark belts in the northern and southern hemispheres moved towards their respective

poles. From 1873 to 1878 a great number of most delicate markings appeared in the southern hemisphere. From 1879 to the present time the planet showed many perplexing changes of colour and form. The general conclusion arrived at was that Jupiter was surrounded by an atmosphere with a large amount of suspended moisture, condensing, under varying circumstances, into forms somewhat similar to those on our own planet. Generally speaking this atmosphere appears to change continually, but ever and anon shows considerable permanence. Mr. Green thought that Jupiter probably contained a large amount of original heat, but was to no great extent in a state of incandescence. It was suggested that the varying colours observed may be due to portions of the planet seen through openings in the clouds, and the delicate gradations of these colours to varying conditions of transparency.

The famous red spot was still visible in 1887, but had lost much of its characteristic redness. A determination of its period of rotation, made by Professor Young in 1886, gives *9h. 55m. 40.7s.*, showing a still continuing retardation of the period. The rotation period of a white spot in a yet higher latitude was found to be *9h. 55m. 11.1s.*, showing that the red spot moves more slowly than the spots north or south of it. The rotation period of the red spot, determined by Professor Hough in 1882-83, gave *9h. 55m. 33.4s.* Mr. Denning, observing the red spot in May, 1887, says that his observations appear to show that instead of slackening its motion as in previous years, it now had commenced an increase of speed, but that before attempting to determine the extent of acceleration it would be advisable to await more extended observations.

In the Monthly Notices of the Royal Astronomical Society of June last there appears an interesting notice, by Captain W. Noble, on a drawing of Jupiter by John Seller in 1680, wherein is figured "a movable spot inherent in Jupiter," which spot appears to be identical with that by which Cassini, in 1666, determined the rotation of the planet to be *9h. 56m.*, and which is situated in the same place on the planet's disc as the great red spot of the present time. A dark spot also appeared in the same place on the disc in 1858. Captain Noble goes on to suggest that very probably a permanent source of disturbance exists in this region to the south of Jupiter's equator, and observers are perhaps now watching the marking used more than two hundred years ago to determine Jupiter's period of rotation.

COMETS.—The first comet of 1887 was discovered by Dr. Thome at Cordoba, in the Argentine Republic. It was first seen in the constellation Grus, on January 18, and on the following night the tail was seen at Melbourne. On January 20 it was seen at Adelaide. Though readily visible to the naked eye in twilight it was not a brilliant object. The tail extended from 25° to 30°, and like that of the southern comet of 1880, was narrow and straight. The nucleus was not observed till January 23, when it was in R. A. *21h. 20m. 30s.* and Decl. *44° 17'* south.

Another comet, 1887 (b), was discovered by Mr. W. R. Brooks, on January 22, at the Red House Observatory, Phelps, New York. This was a faint telescopic comet in R. A. *18h. 0m.* and Decl. *71° N.*

Two days later, Mr. E. E. Barnard discovered another comet, 1887 (c), at Nashville, in R. A. $19^h. 10^m. 15^s.$ and decl. $0^\circ. 35' S.$, also a faint object.

On February 15, Mr. Barnard discovered comet 1887 (d), a faint telescopic comet, which at the time of its discovery was rapidly becoming fainter.

A third telescopic comet was discovered by Mr. Barnard on May 12, 1887 (e).

On August 24 a small comet was discovered by Mr. W. R. Brooks, in R. A. $8^h. 33^m.$ and decl. $29^\circ N.$ There was a suspicion at the time of discovery that this was Olber's comet, discovered by him in March, 1815, a suspicion soon confirmed by subsequent observations. A faint broad tail was observed to extend for about a quarter of a degree.

THE SUN.—The total solar eclipse, August 19, visible in Russia, Northern Asia, and Japan, added little or nothing to our knowledge of the Sun. Complete and extensive preparations were made to observe it, but the bad weather which prevailed over those places on the line of totality which had been chosen, prevented any but the most meagre results being obtained. Besides the programme usually carried out on such occasions, it was intended to make observations on the north and south boundary of the shadow, to determine the ratio of the apparent diameters of the Sun and Moon. Drawings and photographs of the corona were made at Petrovsk.

The partial phase, visible in England, was seen by several observers, some of whom noticed a thin black line across the Sun's disc as soon as it had risen. One observer near Malvern saw also a curved black line, "like a crescent following the line of the Sun's edge on the left hand;" it appeared some minutes later than the straight line.

Professor C. A. Young, giving an account of the Princeton Expedition to observe this eclipse, at the British Association, stated that the origin of the expedition was to fortify the observation that he made in 1870, and which led to the theory of the "reversing layer," the existence of which has since been questioned. The unfortunate weather prevented the necessary observations. At the close of totality the return of the light was quite sudden, so that three observers were agreed within a second as to the time of ending of the total phase.

Those astronomers who went to Siberia were much more successful. The weather being fine and the sky clear throughout, they were able to observe and photograph the corona.

The report of the Transit of Venus Committee (1882) has been issued. The expedition, it will be remembered, was very successful—all the stations, excepting Brisbane, having secured observations. The results which Mr. Stone arrives at, from the discussion of the contact observations, are for external contact at ingress $8^m.760$, internal contact at ingress $8^m.823$; external contact at egress $8^m.953$, internal contact at egress $8^m.855$. Taking the value $8^m.832$ to represent the internal contacts, we have a value for the solar parallax corresponding to a distance from the Earth of 92,560,000 miles.

STARS AND NEBULÆ.—Bailey, in his "Account of Flamsteed," gives a list of twenty-two stars, which appear from the observations themselves to have been accurately observed, but which could not, at the time Bailey wrote, be identified

with modern observations. It was generally supposed that they had disappeared from the heavens since the time of Flamsteed; but this theory appeared so improbable to Dr. C. H. F. Peters, that he undertook a re-examination of these unidentified stars. His method is explained in Vol. III. of the "American Academy of Sciences," and although in some cases there may be reasonable doubt, it is likely that they have all been identified. The star No. 1,647 in Bailey's Flamsteed has certainly been identified as the planet Uranus; a suggestion formerly made by Dr. Argelander but rejected by Bailey. A suggestion of Bailey's, that Flamsteed's Catalogue should be re-reduced, not having yet been acted upon, Dr. Peters recommends that it should not be any longer delayed, as, however carefully manuscripts may be preserved, age will inevitably produce deterioration. Another memoir on a cognate subject, in the same volume, by Dr. Peters, gives a long list of corrigenda discovered in various star catalogues, the value of which will be felt and appreciated by the practical astronomer, who, not being furnished with a transit instrument, is obliged to trust to catalogue places of stars when reducing observations of comets or small planets.

Till within a few years ago the stars in the Southern hemisphere had been very imperfectly observed in comparison with those in the Northern hemisphere. Mr. Stone, at the Cape, and Mr. Ellery, at Melbourne, had done much to restore the balance, and now the recent publication of Dr. Gould's Argentine general catalogue of 32,448 stars leaves the balance in favour of the Southern hemisphere. Most of these stars have been observed three times. The observations were only commenced in the middle of the year 1872, and when we consider the resources of the Cordoba Observatory, and that such a catalogue, with the annual precessions and secular variations also given, was in the hands of astronomers very early in 1887, we wonder at the great amount of energy and perseverance displayed in this stupendous task.

Several new variable stars have been discovered in the past year, among which the following interesting specimens of this class may be mentioned:—1. In Sagittarius, by Sawyer (U.S.A.); in R. A. $18^h. 14^m. 2^s.$, decl. $18^\circ 55' S.$ (1875), varying from 5.6 to 6.6 magnitude in a period of about 5.75 days. 2. In Aquila, by Sawyer; R. A. $19^h. 22^m. 38^s.$, decl. $7^\circ 18' S.$ (1875), varying from 6.4 to 7.3 magnitude in a period of about seven days. 3. In Cygnus, by Chandler (U.S.A.); R. A. $20^h. 38^m. 30^s.$, decl. $35^\circ 8' 4'' N.$ (1875), varying from 6.3 to 7.6 magnitude in a period of about fourteen days. 4. In Cygnus, by Chandler; R. A. $20^h. 47^m. 32^s.$, decl. $35^\circ 14' N.$ (1887)—a variable of the rare type of Algol, discovered while observing the preceding star; it varies from 7.1 to 7.9 magnitude in a period of 2d. 23h. 56m. 5. In Canis Major, by Sawyer; R. A. $7^h. 13^m. 49^s.$, decl. $16^\circ 9' 7'' S.$, also of the type of Algol, varying from 6.3 to 6.8 magnitude in a period of about 1d. 3h. 6. A new star of the 7th magnitude was discovered by Espin, on March 23, closely south, following 26 Cygni. This star is not in the Durchmusterung or any other catalogue. On May 9 it had faded to the 9th magnitude. It is a red star, and will probably prove to be a variable of long period.

Herr Spitaler, in the *Astronomische Nachrichten*, calls attention to the apparent variability of the

small star near the centre of the ring nebula in Lyra. This star had been shown on a photograph taken by Herr E. von Gothard; but Herr Spitaler, on examination of the nebula in the autumn of 1886, failed to find it. In July, 1887, however, he examined the nebula again in company with Professor C. A. Young, and both observers easily found the missing object.

A revised catalogue of variable stars, by Mr. Gore, will shortly appear in the "Proceedings of the Irish Academy."

The following double-star orbits have been computed by Mr. Gore, and the following periods assigned to them:—

14 (i) Orionis, having a period of 190^o 48 yrs.

O. Struve 400 " " 170^o 37 "

12 Lyncis " " 485^o 8 "

STELLAR PHOTOGRAPHY.—The proposed Congress of Astronomers to arrange the details for carrying out a photographic survey of the stars, and making a chart of the northern and southern hemispheres, was held at Paris in April, 1837. The Congress was opened on the 16th, under the presidency of the Minister for Foreign Affairs, in the unavoidable absence of the Minister of Public Instruction. At the first general meeting, Admiral Mouchez, Director of the Paris Observatory, was elected "Président d'honneur"; Professor O. Struve, President; Messrs. Auwers, Christie (Astronomer Royal), and Faye, as Vice-Presidents.

The commission consisted of fifty-five delegates, representing not only the science purely of astronomy, but such branches of physical sciences as could be supposed to aid the astronomers in the application of photography to their special pursuit. England, with the Colonies, was represented by eight delegates. A number of provisional resolutions were submitted to the general committee at their first meeting. After more or less discussion the following among other resolutions were passed:—

That the progress recently made in astronomical photography requires that astronomers should, if possible, agree upon one method of procedure, in order to make the proposed chart of the heavens in as short a time as possible, by sharing the work amongst them. That the stations, which are to be chosen later, should be equipped with essentially identical instruments, which instruments are to be exclusively refractors. Stars are to be photographed to the fourteenth magnitude. The aperture of the object-glasses to be thirteen inches, and the focal distance about eleven feet. That the applanatism and achromatism should be computed for the rays in the neighbourhood of the line G, and the photographic plates prepared by the same formula. The object-glasses to be made so as to utilize a field of 1° from the centre. To eliminate the risk of defects in the film being taken for stars, two series of plates of the whole sky to be taken. Besides the two plates, which should give all the stars to the fourteenth magnitude, a series of plates of much shorter exposure will be taken, to insure a greater precision in the micrometric measure of the stars of reference for the construction of a catalogue. It is intended that these supplementary plates shall contain all stars to the eleventh magnitude. The tubes of the photographic instruments are to be constructed of such material as shall render the focal distance least likely to change.

Two executive committees were formed: one

concerning itself with the application of photography to astronomy, and the other with the matters relating to the construction of the chart.

It was resolved that the permanent committee should consist of all the Directors of Observatories taking part in the work, besides others whose assistance would be of value. Soon after the Conference terminated, the governments of France, Brazil, and the Argentine Republic decided to take a share in the work.

At the meeting of the Royal Astronomical Society in November, 1886, Mr. Isaac Roberts exhibited some fine negatives of stars in Cygnus, taken in the focus of a 20-inch reflector. One of these is the same field as that photographed by the Brothers Henry at Paris with their 13-inch refractor, thus giving a means of comparing the relative merits of the refractor and reflector for this kind of work. Excepting that the films in the two cases may have been of different degrees of sensitiveness, and possibly a difference in the method of development, the plates may be considered as fairly comparable. On reducing the plates to the same scale, and counting the stars in the corresponding areas, Mr. Roberts found that on the photograph taken with the reflector he obtained an average of ninety-one stars to the square inch, while those taken with the refractor showed fifty-five only. In this respect the reflector would seem to possess the advantage. An interesting fact was discovered by the Brothers Henry in the course of their experiments to ascertain the lengths of exposure required to photograph stars of different magnitudes, viz., that the light ratio 2.5 held good for the sensitive plate as for the eye.

Not only for mapping the stars has photography been made useful, but Professor Pritchard, at Oxford, has shown what may be done in the determination of stellar parallax. This—one of the most difficult branches of research in observational astronomy—by the aid of photography may be prosecuted with comparative ease. The star used for the experiment was the well-known 61 Cygni. Three hundred and thirty photographs were taken of this star on eighty-nine nights, the reduction of which involved the bisection, with the microscope micrometer, of no less than thirty thousand star images. A provisional value of the parallax of 61 Cygni was obtained amounting to $0''.438$, and of 61 and 62 Cygni $0''.441$. Bessel, by means of the heliometer, obtained $0''.348$; Auwers, $0''.564$, and Professor Asaph Hall, the small value of $0''.270$. Professor Hall remarks that his results for stellar parallax generally come out smaller than those of other observers. In the above photographic determination of the parallax, about two hundred plates were used. This successful experiment has led Professor Pritchard to begin work on η Cassiopeiæ and Polaris.

OBSERVATORIES.—M. Flammarion has recently erected a new observatory at Juvisy, between Paris and Fontainebleau, furnished with an equatorial rise and a half inches in aperture, and twelve and a half feet focal length, besides two smaller telescopes. M. Flammarion possesses a fine astronomical library, and is also forming a museum.

The Bamberg observatory, also a new one, is in course of erection. It was founded and endowed by Dr. Carl Reimis, an amateur astronomer who died in 1883. It is intended that it shall be fully equipped with the necessary in-

struments; among which, the principal is a heliometer of seven inches aperture, similar to that recently erected at the Cape.

At the Paris Observatory, the meridian work consisted chiefly of the observation of Lalande's stars, a work now nearing its completion. Astronomical photography has been vigorously carried on. Measures of some of the photographs of well-known double stars have been made with the macro-micrometer designed by the Messrs. Henry. Speaking of the accuracy with which these plates can be measured, Admiral Mouchez says that in the case of ζ Ursæ Majoris the mean error of a single measure of distance is $0''.077$, and of position angle $0''.55$.

The observatory at Rio de Janeiro is to be removed to a new site, nearly on the same parallel of latitude, and two minutes farther west. The photographic-équatorial with which it is to be furnished will probably play a part in the survey of the heavens which has been proposed by Admiral Mouchez.

At the Royal Observatory, Greenwich, on the conclusion of the observations for the ten-year catalogue, a new working list was formed, consisting of some three thousand stars, to include all the stars in Groombridge's catalogue, and the Harvard photometry, not observed at Greenwich since 1867. The new Greenwich Catalogue will contain about four thousand stars, the total number of observations being about forty thousand in each element. Spectroscopic observations of Algol have been made as frequently as possible to ascertain if any evidence is shown of rapid orbital motion, such as would result from the theory of Algol's variability being caused by the transits of a large satellite.

The first report of the Kalocsa Observatory, founded by Cardinal Haynald in 1878, has been issued by Dr. C. Braun, its Director from 1879 to 1885. The observatory is thoroughly furnished with the instruments required for the astronomy of to-day. The principal classes of observations made have been for the purpose of determining the position of the observatory, observations of Sun spots, and observation of the places of comets. The astronomical latitude was found to be $46^{\circ} 31' 42''$, and longitude $\lambda. 15m. 54' 38''$ East of Greenwich.

The crown and flint lenses for the great equatorial of the Lick Observatory arrived there safely on December 27, 1886. To prevent any possible mischief to the lenses in travelling from the optician's workshop to Mount Hamilton, extraordinary precautions were taken. The separate lenses were first packed in several thicknesses of soft cotton cloth, then a thick layer of cotton, and over that one of paper. These packages were put into wooden boxes lined with felt, and enclosed in two others of steel, packed tightly with curled hair. Each of these was enclosed in another steel box, the insides of which were covered with spiral springs. The steel boxes were air-tight and waterproof, and the outer chests were packed with asbestos as a protection against fire. Each chest was then mounted on pivots so that they could be turned one quarter round each day during the journey to California, in order to prevent any chance of molecular disarrangement in the glasses, and avoid the danger of polarization, as it was thought possible that the jarring of the train might disturb the present arrangement of the molecules unless the position of the glass could be changed, and all lines of disturbance thus broken up.

It was stated in *Science* that this great telescope would, at certain hours in the twenty-four, be available for any distinguished specialist who may wish to take advantage of it for help in the solution of the many unsolved problems in astronomy.

At the Melbourne Observatory the great reflector has been employed in the revision of Herschel's nebulae. Seven out of the number revised were searched for but not found, and thirty found which were not identified in the catalogues, and which are probably new. The number of solar photographs obtained in the year ending June, 1886, was only 92, owing to difficulties connected with change of scale in the pictures from 4 to 8 inches in diameter.

At the Oxford University Observatory portions of both equatorials have been in the hands of the opticians, to fit them for use in astronomical photography. Experimental investigations as to the extent of field that may be employed with mirrors of different focal lengths are being carried on with two mirrors of 15 inches aperture and different focal lengths, supplied by Dr. De La Rue.

The Washburn Observatory has issued the fifth volume of its "Publications," which contains a record of the work done during the year ending April, 1887. A considerable portion of the volume is taken up with an index (prepared by Miss Lamb, one of the assistants in the observatory) of those stars in Airy's six Greenwich Catalogues which are not found in Flamsteed. This index will prove very useful, saving much labour to the computer in searching these catalogues for a star likely to be in one or other of them.

M. Loewy, to whose method of directly measuring the amount of astronomical refraction allusion was made last year, proposes to apply a similar principle to the determination of the aberration constant. As the method will produce a result that is independent of instrumental errors, M. Loewy hopes to obtain a better value than can be found by any other method.

OBITUARY.—Professor Theodor von Oppolzer died at the age of 45, on Dec. 26, 1886, at his residence in Vienna. Oppolzer early exhibited a taste for the exact sciences, especially astronomy and mathematics. By his calculations of the orbits of comets and small planets he was first known to the astronomical world. His theoretical researches in this branch of astronomy are all collected in the "Lehrbuch zur Bahnbestimmung der Kometen und Planeten." The printing of his last and greatest work, the "Canon der Finsternisse," which contains the elements of eclipses of the Sun and Moon from 1207 B.C. to 2162 A.D., and gives the calculations of eight thousand solar and five thousand two hundred lunar eclipses, was finished while he lay on his death-bed.

Alvan Clark, the famous American optician, died on the 19th of August, 1887, in the 84th year of his age. Left without educational advantages in early life, he taught himself engraving and portrait-painting. Taking up astronomy as a recreation, he learnt to make his own lenses, the fine quality of which attracted the notice of the Rev. W. R. Dawes, who brought them under the notice of the scientific world. He lived to complete, but not to see mounted, his masterpiece, the object-glass of the great Lick telescope, thirty-six inches in diameter. The twenty-six inch object-glass at Washington

and that of thirty inches, at Palkowa, were also made by him.

Professor G. R. Kirchhoff died on the 17th October last in his 64th year. His great work on the solar spectrum first drew the attention of the scientific world to the possibilities of the method of spectrum analysis in astronomical discovery. Professor Kirchhoff was extraordinary professor in Breslau from 1850 to 1854; Professor of Physics at the University of Heidelberg from 1854 to 1874, in which last year he became Physical Professor at the University of Berlin.

Dr. L. Thollon, one of the greatest spectroscopists of our times, died in the past year. His work with the great spectroscope designed by himself was of a very high order. Unfortunately his map of the Solar Spectrum, to which the last years of his life were devoted, is, by his premature death, left unfinished.

The gold medal of the Royal Astronomical Society has been awarded to Mr. G. W. Hill for

his researches on the Lunar Theory, published at Cambridge, Mass., U.S.

At the March meeting of the Royal Astronomical Society, a motion proposing to give medals to foreigners only was brought forward. This, after some discussion, was followed by an amendment, to the effect that no member of the council, so long as he held office, should be eligible. The amended motion was put from the chair and lost by a large majority, as also was the original motion.

The Académie des Sciences have awarded the Lalande medal to Professor M. O. Backlund for his researches on the motion of Encke's comet, the Valz prize to M. Bigourdan for his investigations on the effect of personality in the measurements of double stars; M. Souillart received the Damoiseau prize for his revision of the theory of Jupiter's satellites.

Mr. Howard Grubb, the well-known Dublin optician, received the honour of knighthood on August 22, 1887.

The Variable Star Algol (*Beta Persei*).

THIS is one of the most noteworthy variable stars in the heavens. Its curious fluctuations of light were first observed by Montanari in 1669. The magnitude oscillates between 2.3 and 4.5, and its period is *zd. 20h. 48m. 54.7s*. The star is commonly a little fainter than 2nd mag., and remains so for *zd. 13.5h.*, when it rapidly declines in lustre, and within some 3½ hours

becomes less than 4th mag. It continues at this minimum about 15 minutes, then it suddenly acquires greater brilliancy, and in 3½ hours assumes its ordinary magnitude. The following are the calculated times of minima in 1888. From the end of March to the beginning of August the star is not favourably visible, being immersed in the twilight low on the northern horizon:—

Summary of Celestial Objects and Phenomena for Observation, 1888.

THE following is a summary of the planetary positions and leading astronomical occurrences that may be observed during 1888. In addition to the events and circumstances here described, there will certainly be some occasional phenomena not capable of being definitely predicted, such as comets, new stars, displays of Auroræ Boreales, large meteors or fireballs, &c., which may become visible at any time, and are always promptly announced through the medium of the scientific journals. Such notices are usually accompanied with information which will enable the observer either to observe the object itself, or, if of very temporary character, to glean the chief facts of its appearance. The more durable phenomena, such as comets and new stars, may generally be found by a careful observer a few days after their discovery, but transitory objects, such as meteors, come upon us suddenly, and are usually seen by those only

who happen to be fortunately placed for such observations.

Eclipses.—During the year 1888 there will be five eclipses, of which two only will be visible in this country. The times of occurrence are given in another part of this Almanack. The total eclipse of the moon on Jan. 28 will be one of the most interesting events of the year, and with favourable weather will sure to be widely observed, as there is no other total eclipse of the moon visible in England until 1895. In the lunar eclipse of Oct. 4, 1824, the moon became so dark as to be scarcely visible to the naked eye, while during the pair of eclipses in 1877 (Feb. 27 and Aug. 23) our satellite remained conspicuously visible as a dull red ball. The varying degree of the moon's brightness during successive eclipses has never been explained on any adequate theory, though it is generally supposed that differences in the humidity of the

earth's atmosphere occasion it. During the ensuing eclipse of Jan. 28 it is most desirable to compare the apparent brightness of the moon with that exhibited during former eclipses. The moon may either disappear altogether, as during the eclipse of June 10, 1816, or appear unusually bright, as at the eclipse of March 19, 1848, when our satellite, at the total phase, seemed involved in such a brilliant display of red colouring that many people discredited the announcement that an eclipse was really taking place. There will be five other total eclipses of the moon, well visible at Greenwich, within the next 22 years, as follows:—March 11, 1895, Dec. 27, 1898, Oct. 17, 1902, June 3, 1909, and Nov. 16, 1910. In addition to these a few others will occur, but the moon will be either near setting or rising, so that they are not likely to be satisfactorily observed.

The second visible eclipse of 1888 will happen on the morning of July 23, but will be scarcely visible, as the moon sets about 15 minutes after her first contact with the earth's shadow. An observer having command of a very clear view of the western horizon may possibly, with a very clear sky, witness the beginning of the eclipse, but that is all. In the west parts of England and in Ireland this phenomenon may be observed to better advantage than at Greenwich and the eastern counties.

Occultations.—In 1888 there will be no visible occultations of brilliant stars, though on Feb. 20, at 3h. 56m. p.m., the first magnitude star α Tauri (Aldebaran) makes a very near approach to the moon. The brightest star occulted during the year will be γ Capricorni, on Aug. 20, and the times of this and of similar events are contained in another part of the Almanack. By far the most interesting phenomenon of this kind is, however, an occultation of Saturn, on the afternoon of Oct. 1. The planet will be obscured during the 50 minutes from 3h. 59m. to 4h. 45m. p.m., but unfortunately the moon will set at 4h. 8m. p.m., so that this occurrence can only be observed in part, and that under unfavourable conditions. At places far west of Greenwich the circumstances will be more auspicious, but the proximity of the moon and planet to the horizon, and the presence of the sun not very far to the east, will practically obliterate the phenomenon to observers in this country.

Jupiter's Satellites.—The transits of Jupiter's satellites and their shadows come well within the range of moderately powerful telescopes, and present features of great interest, especially to amateur observers. On Jan. 22, between about 4h. and 6h. 30m. a.m., Satellites I. and II., with their shadows, may be observed projected on the disc of Jupiter. During subsequent months the transits of these inner moons and their shadows will frequently occur. It is, however, in connection with Satellites III. and IV. that the chief interest is centred, from the curious circumstance that when in transit they appear as very dark spots, almost, indeed, as black as their shadows. Satellite III. being so much larger than any of the others, becomes a very conspicuous object during its transits, which may be observed before sunrise on the mornings of Jan. 24, Feb. 29, March 7, April 12 and 19, and June 1; and on the evenings of May 24, July 13, and Aug. 25. There will be no transits of Satellite IV. during the year, because this satellite, at its inferior conjunctions with Jupiter, passes slightly N. of the limb, and thus escapes projec-

tion on the disc. It also avoids eclipse and occultation by its primary by passing S. of the limb at its superior conjunctions.

Planets.—Mercury will be placed in an excellent position for evening observation at the middle of February, when he sets nearly two hours after the sun. Whenever the western horizon is very clear at about this period, the planet may be readily detected about an hour after sunset. Mercury will again become visible as an evening star during the first half of June, when his position will be in Gemini. When perceived under the most favouring aspects this planet looks brighter than a first magnitude star, and shines with a sparkling lustre, in great contrast to the steady brilliancy of Jupiter and Saturn. The scintillations are mainly induced by the heated horizontal vapours in which the planet is much involved whenever visible to the naked eye, and his small diameter is a great encouragement to this effect. As a morning star the planet must be looked for in the eastern sky at the end of July and middle of November. On the morning of March 28, Mercury will be in conjunction with Venus, and at 2h. a.m. the two bodies will be only two minutes of arc distant from each other. They do not rise, however, above our horizon until 5h. 5m. a.m., but if an observer will (at about the time of sunrise, 5h. 50m. a.m.) direct a telescope to a point 7 degrees above the horizon in the E.S.E., the pair of planets may be seen close together, and in the same field of view. Mercury will be only 2° 8' N. of Neptune on the morning of May 15, but this conjunction will not be observable, as the sun is very near. On the morning of Aug. 6, at 9h., the planet will be only 18 min. of arc N. of the moon. The phases of Mercury constitute the most interesting feature in a telescope, but the surface markings have never been sufficiently studied, owing to the difficulties of obtaining good views of a body so near to the sun.

Venus will be a brilliant morning star during January and February. On Jan. 1 she rises at 4h. 19m. a.m., or 3h. 49m. before the sun, and will be situated about three degrees N.W. of Jupiter, and not far N.W. of the stars β and δ of Scorpio. The planet will be in a gibbous form, and her apparent diameter is 18' 2 sec. of arc at this time. On Feb. 1 she rises at 5h. 25m. a.m., or 2h. 16m. before the sun, and during the month continues to approach the sun and to become less conveniently situated for observation. On the morning of July 9 the planet arrives at her inferior solar conjunction, and thereafter is rendered invisible until about the beginning of November, when she sets more than an hour after the sun, and will be situated three or four degrees N. of the red star Antares in Scorpio. Venus rapidly improves her position during November, so that by Dec. 1 she sets at 6h. 11m. p.m., or 2h. 18m. after the sun, and will be very conspicuously visible in the evening twilight at a low altitude in the S.W. At the close of the year the planet will set at 7h. 38m. p.m., and her position then will be about one degree N. of the star δ Aquarii. She will be in conjunction with Jupiter on two occasions in 1888, viz. on Jan. 2 (when, at 4h. p.m., the distance separating these planets is only 1° 51') and Nov. 1.

Mars will be in opposition to the sun on April 11, and will be splendidly visible during the spring months of the year. Telescopic observations of the well-defined and very persistent

markings on this planet may be secured under very advantageous conditions between about the middle of March and the middle of May. The maximum apparent diameter of Mars will be 18".4" on about April 18, and he passes about 4° N. of the bright star Spica Virginis on Jan. 17 and April 16, and on July 2 is only 1° N. of that star. During the first half of the year the planet pursues a curious oscillatory movement in Virgo, between about R. A. 191°—200° and Dec. 4° S—9° S. After the middle of April the planet quickly recedes from the earth, and his apparent dimensions decline to 16".5" by May 15, to 13" by June 15, and to 10".6" by July 15, after which telescopic scrutiny of the markings will be of little service. The planet will, however, remain visible as an evening star until the end of 1888, when he sets nearly four hours after the sun. On Jan. 9 Mars will be in conjunction with Uranus, and 1° 40' N. of that planet. On Sept. 11 he will be only 2° 12' S. of Jupiter. On Dec. 6, before setting, he may be observed very near the crescent of the new moon. To those who study areographic features, the spring of 1888 will be an important one, as enabling them to reinvestigate the various markings, and especially the singular lines of shading (called "canals") which the Milan astronomer Schiaparelli has so abundantly depicted in his charts.

Minor Planets.—These bodies are so faint and so uninteresting in their visible characters that it is unnecessary to refer to them here with any detail. Ceres will be well visible in October, a few degrees N. of *theta* Ceti. Pallas may be best seen in August and September, and will be in opposition to the sun on Aug. 30, when very close to *theta* Pegasi. Juno will be favourably situated in October, and may be found in Cetus, a few degrees E. of Ceres. Vesta will be just visible to the naked eye at the middle of April, and may be picked up closely N. of the equator, between Virgo and Libra.

Jupiter will not be well placed for observations in high N. latitudes during the year, because his path lies in Scorpio, and his declination is more than 18° below the equator. But in April, May, and June the planet will become a very conspicuous object in the southern sky, and on May 22 will arrive at opposition to the sun. The great red spot, which has enlisted such widespread notice and discussion since the summer of 1878, will doubtless continue visible, and will be made the subject of further attentive study. No planetary marking has ever created more interest than this large, oval, red spot on Jupiter. Though it has lost a good deal of the prominent aspect it displayed during the years 1878-82, it is still visible under the same outlines and in the same position on the S. border of the great S. belt, as at first. A good telescope will readily show this singular marking if the disc is examined just when the spot is nearly centrally visible, as at the following times:—

1888	H. M.	1888	H. M.
May 5 ..	12 13 p.m.	May 22 ..	11 12 p.m.
" 10 ..	11 20 "	" 27 ..	10 19 "
" 15 ..	10 27 "	June 1 ..	9 26 "
" 20 ..	9 34 "	" 3 ..	11 4 "

The effects of rotation bring the spot to the same position on the disc at intervals of 9h. 55m. 41s., so that the times of its visibility may be readily computed. After periods of 12 days (which include 29 rotations) the spot returns to

the planet's central meridian nearly at the same times as before. Jupiter will be near Venus on Jan. 2, and on the morning of Jan. 25 will be very close to β Scorpii. Again, on May 21, the planet passes near this star; at 2 a.m. the latter will be only 2' of arc from the limb of Jupiter. The latter will be near Mars on about Sept. 11, and the two planets may be distinguished at a point low in the S.W., about an hour after sunset. During the concluding quarter of the year Jupiter will be invisible; on Dec. 8 he reaches conjunction with the sun. This planet, with his four satellites, his numerous belts and curious spots, forms an attractive object, and the changes which are continually affecting his appearance are to be readily traced with small telescopes.

Saturn is very well placed for observation during the first five months of the year. He will be in opposition to the sun on Jan. 23, when his apparent diameter will be 18".4", and precisely equal to that of Mars when at his best at the middle of April. At the beginning of the year the planet is close to the cluster of stars Præsep in Cancer, and his position will be slightly W. of this during ensuing months. Saturn will be near the moon on the following dates:—Jan. 28, Feb. 24, March 22, April 10, and May 16, and on July 8 the planet approaches so near to our satellite that an occultation is narrowly avoided. In the summer months Saturn will be too near the sun to be perceived; but in September he reappears in the E. as a morning star. In November and December his position is 7° or 8° W. of *a Leonis* (Regulus). We have already referred to the occultation of Oct. 1. The luminous rings of this planet furnish one of the most beautiful objects in the heavens, and their appearances and character have been observed and discussed with intense interest ever since the telescope first revealed them. During the past few years the rings have been presented to us under their most attractive aspect, and we shall continue to view them under favourable conditions in 1888. But the circumstances which prevail in following years are less suitable; hence observers should utilize the present opportunity to the utmost degree. The elevation of the earth above the plane of the rings is 19".4" at the beginning of the year, and only 14" at the end. The satellites of Saturn, though less conspicuous generally than those of Jupiter, are visible in powerful glasses; five of them may be glimpsed in comparatively small instruments.

Uranus will be best observable in March, April, and May. In February the planet may be found about 1° S. of the 4½ magnitude star *theta* Virginis. He comes to opposition with the sun on April 4, and on May 5 will be only 35' S. of Mars. This occasion will afford a ready means of identifying the planet from amongst contiguous stars. On Sept. 19 he is very close to Mercury and Venus; but these planets are too near the sun to be seen at that period. The great distance of Uranus is such that, though really a large planet, his apparent brightness does not exceed that of a small star, and he is only to be distinguished by the unassisted eye on a clear, moonless night. Of late years some interest has been attached to the discovery of faint dark belts on the planet, similar to those which cross Jupiter and Saturn.

Neptune is purely a telescopic object, and so very minute that absolutely nothing is known as to the physical markings on his surface. The planet will be in opposition to the sun on

Nov. 22, and during the last two months of the year will be favourably visible during the whole night. His position at this period will be about midway between those well-known star groups, the Pleiades and Hyades in Taurus.

Meteors are visible in varying frequency on every night of the year, and are occasionally presented in such numbers as to form imposing showers. Whenever these phenomena are noticed more plentifully than usual, the observer should carefully record their directions amongst the stars, and determine their radiant points or centres of divergence. In the case of large meteors and fireballs it is most desirable that the apparent paths they traverse should be determined as accurately as circumstances permit, or when the flight of a meteor has been noted at two stations, the resulting data enables the heights, distances, and radiant point to be readily computed. The majority of meteoric streams are probably annual in their manifestations, though affected by periodical variations. During the period from November, 1886, to October, 1887, the following were the radiant points of the principal meteor systems observed by Mr. Denning at Bristol, and it is certain that many of these will recur during the ensuing year:—

1886.	No. of Radiant Meteors seen.	Name of Shower.
Nov. 2-3.....	55+9	17 ϵ Taurids.
Nov. 17-18....	53+71	8 m Camelids.
Nov. 18-Dec. 5	190+58	8 δ Ursids.
Nov. 30-Dec. 6	162+58	6 β Ursids.
Dec. 18-28....	194+67	17 χ Draconids.
Dec. 22-28....	218+36	8 γ Bootids.
Dec. 22-28....	115+32	7 α Geminids.
1887.		
Jan. 25.....	180+28	5 ζ Coma Berenicids.
March 13-14..	161+58	7 β Ursids.
Mar. 21-Apr. 25	190+20	12 ζ Coma Berenicids.
March 28.....	263+62	5 ζ Draconids.
April 17-19..	213+53	7 χ Bootids.
April 17-25..	231+17	10 β Serpentids.
April 18-20..	269+32	16 ν Lyrids.
April 18-26..	272+21	10 κ Cerberids.
April-May....	244+8	11 λ Ophiuchids.
June 10-28....	335+57	10 δ Cepheids.
June 12-21....	285+23	11 β Cygnids.
June 13-20....	302+24	11 ν Vulpeculids.
June 17-23....	280+43	10 α Lyrids.
July 14-21....	269+49	13 γ Draconids.
July 16-31....	335+49	16 ν Lacertids.
July 22-Aug. 1	16+31	8 β Andromedes.
July 25-Aug. 1	337-12	37 δ Aquarids.
July 28-Aug. 1	46+28	8 μ Muscids.
Aug.-Sept....	335+58	22 δ Cepheids.
August 7-22..	73+41	10 α Aurigids.
Aug. 10-11....	44+57	38 ν Perseids.
Aug. 14-23....	264+62	7 ζ Draconids.
Aug. 20-24....	54+71	10 m Camelids.
Aug.-October.	42+39	22 β Perseids.
Aug.-October.	28+72	21 ψ Cestodids.
Sept. 7-24....	5+10	15 γ Pegasids.
Sept. 7-24....	64+22	8 ϵ Taurids.
Sept. 7-24....	358+60	10 β Cassiopeids.
October 11-14.	192+83	10 ν Polarids.
Oct. 11-15....	40+29	12 μ Muscids.
Oct. 11-24....	40+20	45 ϵ Arietids.
Oct. 12-24....	91+17	90 ν Orionids.
Oct. 14-15....	25+44	10 γ Andromedes.
Oct. 14-21....	105+22	12 δ Geminids.

Large meteors should be looked for on the following nights:—

January 2, 21, 31; February 3, 7, 10; March 1, 2, 4; April 11-12, 19-20; May 2, 4, 15, 31; June 6-7, 12, 29-30; July 11, 20-21, 25-30; August 3, 5, 7-13, 15, 19-22; September 1-2, 6-7, 11-13, 25; October 13, 15, 17-18, 22, 24, 29; November 1-2, 4, 6, 9, 11-15, 19, 27; December 8-9, 11-12, 21. The most notable dates are in heavy type.

Encke's comet will return to perihelion in June, 1888, and may probably be observed in a telescope at about that period. Its position may be found from the ephemerides that will be published in the scientific journals.

HARVEST MOON.

The term Harvest Moon is a popular name given to the full moon which happens about the time of the autumnal equinox. If the full moon should occur exactly at the time of the equinox it will rise nearly full about the time of sunset for several evenings together. In proportion as the time of full moon is distant from the date of the equinox, so it will be a less favourable one for lighting the late harvester.

There is nothing in the least scientific in the name "Harvest Moon," as it defines nothing, and all that is meant by reference to it in the Almanack is, that the particular full moon is the one which best answers to the peculiarity of rising nearly full for several evenings about the time of sunset.

Sir John Herschel, in his "Outlines of Astronomy," defined the harvest moon as "the full moon which happens on or nearest to the 21st of September, because it rises from night to night, after the full, more nearly after sunset than any other full moon in the year, and is therefore favourable for evening work in carrying in the late crops."

Similarly, the full moon of the vernal equinox is called the Hunter's moon.

B.C.

2446. Mars, Jupiter, Saturn, and Mercury near together in Pisces.
2234. Astronomical observations begun by the Chaldeans from the towers of Babylon.
2193. The Egyptians brought a knowledge of astronomy from Babylon.
- 2169, 2158, or 2157. Earliest historical record of an eclipse of the sun.
2116. Noah or Folie of the Chinese well skilled in astronomy.
2012. Feb. 26. Five planets, situated within the space of 14° in one constellation, called X E by the Chinese, viz., Mercury, Venus, Jupiter, Saturn, and the Moon.
1923. Abraham said by Josephus to have read lectures on astronomy in Egypt.
- 1830 (about). The Babylonians famous for their knowledge of astronomy.
1636. The epoch of Job's troubles. Moses, the supposed author of the Book of Job, refers to the constellations of the Pleiades and Orion, also to Arcturus.
1454. In the reign of Yao, the 7th Chinese Emperor, the sun is recorded to have stood still.
- 1500—1400. The Greeks subdivide the heavens into constellations.
1405. Several new stars (? comets) seen this year, one of them like a half-moon, and several clouds spotted with unusual colours.
- 1319 or 1315. Eclipse of the sun, which had not been foretold by the Presidents of Astronomy in China, who were punished with death in consequence.
1253. The astronomical tables of the Chaldeans formed.
1201. Astronomy brought to Europe by the Moors of Barbary and Spain.
1100. Teheon Kong at Loyang, China, determines the obliquity of the ecliptic as $23^{\circ} 54' 2''$.
- 975 (about). Large comet seen by the Egyptians and Ethiopians.
944. Hesiod counsels the husbandmen to regulate their sowing and reaping by the rising and setting of the Pleiades.
776. Eclipse of the sun mentioned in Chinese records.
775. The first year of the first Olympiad.
763. Eclipse of the sun at Nineveh in the reign of Uzziah, King of Judah.
720. March 19, and 719, March 8. Eclipses of the moon observed at Babylon, and mentioned by Ptolemy.
640. Thales born. Died 546 B.C. He founded geometry and astronomy in Greece, and taught the theory of eclipses.
616. Jan. 14. Aërolite fell, which destroyed several chariots and killed ten men. (Chinese records.)
594. Solon introduces Attic months of twenty-nine and thirty days each.
585. May 28. Total eclipse of the sun foretold by Thales.
- 568 (about). Anaximander, an astronomical theorist, flourished. He erected the first sun-dial at Sparta.
- 569—470 (about). Epoch of Pythagoras, founder of the true theory of the solar system, revived in 1543 A.D. by Copernicus.
557. May 19. Eclipse of the sun at Larissa recorded by Xenophon.

B.C.

478. Feb 17. Eclipse of the sun mentioned by Herodotus as occurring when Xerxes's expedition set out against Greece.
432. July 16. The metonic cycle of nineteen years introduced.
431. March. Total eclipse of the sun: the stars seen (Thucydides).
429. Plato born at Athens. Died 348 B.C.
412. Sep. 17. Total eclipse of the sun observed at Syracuse.
- 406 (about). Epoch of Eudoxus, the mathematician of Cnidus.
384. Aristotle, astronomical writer, born. Died 322 B.C.
- 383 and 382. Eclipses of the moon recorded by Ptolemy.
364. July 13. Eclipse of the sun mentioned by Pintarch.
357. April 4. Mars occulted by the moon; observed by Aristotle.
330. Pytheas points out the connection between the moon and tides, and measures the latitude of Marseilles.
- 323—283. Euclid writes his elements of geometry, also on astronomical subjects.
- 287—212. Epoch of Archimedes, the natural philosopher of Syracuse.
- 276—176. Eratosthenes of Syene fixes the obliquity of the ecliptic, and makes other valuable observations.
272. Jan. 17. Most ancient observation of Mars near β Scorpii (*Almagest*).
270. Aristarchus of Samos fixes the diameter of the sun as $30'$.
265. Nov. 15. Most ancient observation of Mercury.
- 250 (about). Conon, a celebrated mathematician and astronomer of Samos, flourished.
240. Sept. 3. Most ancient observation of Jupiter. The planet was seen to eclipse δ Cancri.
- 192—120. Era of Hipparchus, author of the first star catalogue, which included 1025 stars. He fixed the mean motion of the sun and moon with great precision; computed a table of eclipses, and otherwise distinguished himself. Of the Grecian astronomers he was the most famous.
134. New star observed in the constellation Scorpio.
51. March 7. Large solar eclipse occurred as Julius Cesar passed the Rubicon.
44. Jan. 1. Introduction of the Julian Calendar.
1. Jan. 9. Total eclipse of the moon during Herod's illness.
1. Manilius, astronomical poet, lived in the reign of Augustus. He regarded the stars as suns, and described the Milky Way as the lustre of a great many small stars.

A.D.

50. Seneca writes on natural philosophy, and makes references to comets, which he regards as planets.
- 138 (about). Ptolemy divides the heavens into 48 constellations.
141. Halley's periodical comet observed.
170. Ptolemy died. He was famed as an astronomical observer and writer, and compiled thirteen works descriptive of the heavenly bodies and their phenomena.

- A. D.
- mena. This extensive production was termed the *Almagest* by the Arabians. He is also celebrated as the author of a system in which the immobility of the earth is assumed.
- 380 (about). Theon, philosopher and mathematician of Alexandria, flourished. He wrote a commentary on Ptolemy's works.
389. A new star burst forth near a *Aquila* (Caspianus).
415. Hypatia, the daughter of Theon, murdered in this year. She was famed for her genius in science.
418. Aug. 19. Large comet seen during a total solar eclipse.
538. Feb. 15. First eclipse of the sun recorded in England.
640. The Alexandrian school of astronomy destroyed by the Saracens.
762. Astronomy cultivated by the Eastern Saracens on the building of Bagdad.
807. April 17. Adelmus, a Benedictine monk, observes a black spot on the sun.
878. Oct. 29. Total eclipse of the sun visible at London.
880. Albategni, a Syrian prince and famous astronomer. He made important observations of the sun, moon, and stars in Chalden, and determined the obliquity of the ecliptic.
885. June 16. Total eclipse of the sun in the British Isles.
902. October. Great meteoric shower. The stars fell like rain in all directions.
950. Alfraganus writes on astronomy.
975. A great comet visible in the autumn.
- 1000 (about). Ebn Yunis, a celebrated Egyptian astronomer, flourished. He left some important observations and tables.
1007. Oct. 31. Conjunction of Jupiter and Saturn observed at Cairo by Ebn Yunis.
1023. Jan. 24. Total eclipse of the sun visible in the British Isles.
1066. April 2. Splendid comet (Halley's) seen in England, and considered to presage the success of the Norman invasion.
1097. October. Large comet visible in China, with tail 50° long.
1106. Feb. 4. Brilliant comet observed near the sun.
1133. Aug. 2. Great eclipse of the sun visible in England.
1140. March 20. Total eclipse of the sun in England.
1170. Sept. 13. Mars and Jupiter so near as to appear like one star.
1185. May 1. Total eclipse of the sun visible in Scotland.
1186. Sept. 15. Mercury, Venus, Mars, and Jupiter in conjunction between *Virgo* and *Libra*.
1202. October. Great meteoric shower. "The stars flew hither and thither like a scattering swarm of locusts."
- 1214—1294. Era of Roger Bacon. He wrote on astronomy and optics.
- 1230 (about). Ptolemy's *Almagest* translated into Latin from the Arabic.
1241. Oct. 6. Great eclipse of the sun mentioned by Tycho Brahé.
1264. July 14. Brilliant comet discovered. Its tail was 100° long.
1330. July 16. Total eclipse of the sun visible in England.
- A. D.
1366. Oct. 22. Great meteoric shower observed in Portugal.
1394. Ulugh Beigh born. Died 1449.
1406. June 16. Great eclipse of the sun visible in England.
1424. June 26. Total eclipse of the sun visible in the British Isles.
1433. June 17. Total eclipse of the sun visible in Scotland.
1437. Ulugh Beigh forms a catalogue of 1018 stars.
1456. Brilliant apparition of Halley's comet observed this year.
1472. Jan. 21. Splendid comet seen in daylight by Regiomontanus.
1473. Jan. 19. Copernicus born. Died 1543, May 23.
1476. July 6. John Muller, called Regiomontanus, died, aged 41 years. He was the author of the first almanack, and wrote an abridgment of the *Almagest* and some mathematical tables.
1504. March 1. An eclipse of the moon proves of great service to Columbus. (Some writers give the eclipse of 1493, April 2, as the one referred to.)
1509. The Zodiacal light discovered by the Mexicans, according to Humboldt.
1524. Nov. 11. Venus, Mars, Jupiter, and Saturn very near together.
1543. Publication of Copernicus's great work on "The Revolutions of the Celestial Orbs."
1546. Dec. 14. Tycho Brahé born. Died 1601, October 13.
1556. A very fine comet visible in the spring.
1564. Feb. 18. Galileo Galilei born. Died 1642, January 8.
1571. Dec. 21. Kepler born. Died 1630.
1572. Nov. 11. Brilliant temporary star in Cassiopeia observed by Tycho Brahé.
1576. Aug. 13. First stone of Tycho Brahé's observatory "Uraniberg" laid.
1577. Large comet appeared in the autumn. Tycho Brahé sought to determine its parallax and failed; hence he inferred its great distance.
1582. The reformed Gregorian calendar published to the world.
1591. Jan. 9. Kepler observed Mars to occult Jupiter.
1596. March 31. Des Cartes born. Died 1650, February 11.
1598. March 7. Total eclipse of the sun visible in Scotland.
1599. June 8. Mercury partially occulted Venus, observed by Moestlin.
1600. Jordanus Brunus burnt to death in Rome for holding certain views on the solar system.
1602. Epoch of Tycho Brahé's catalogue of 1005 stars.
1603. Bayer publishes his *Uranometria*, and applies Greek letters to the stars.
1604. Oct. 10. Bright temporary star in Ophiuchus seen by Brunowski.
1608. The refracting telescope invented by Hans Lippersheim, at Middelburg.
1609. Kepler publishes his first and second laws, and his discovery of the elliptical orbit of Mars. Galileo effects improvements in the telescope, and adopts a concave object-glass in place of the convex lens employed by Lippersheim.
1610. January. Galileo discovers Jupiter's four

- A.D. satellites. Also later the same year, the phases of Venus and remarkable triferm appearance of Saturn. July 6, an eclipse of the moon first observed in a telescope.
1611. Harriott, Galileo, and Fabricius observe sun-spots. John Hevelius born; died 1687. His *Selenographia* was published in 1647, *Cometographia* in 1668, the *Machina Cœlestis* in 1673, and a catalogue of 1553 stars in 1690.
1614. John Neper or Napier Baron of Murchiston, invents logarithms.
1618. May 15. Kepler discovers his third law of planetary motion. Nov. 30. Splendid comet visible, with tail 104° long.
1620. Dec. 9. Total eclipse of the moon, of which it is recorded that our satellite completely disappeared.
1625. June 8. J. D. Cassini born. Died 1712, September 14.
1629. April 14. Christian Huygens born. Died 1695, June 8.
1630. May 17. Belts of Jupiter discovered by Zucchi, at Rome.
1631. Nov. 7. Transit of Mercury predicted by Kepler, and observed by Gassendi.
1633. June 22. Abjuration of Galileo before the Inquisition at Rome.
1635. July 18. Robert Hooke born. Died 1703, March 3.
1639. Nov. 24. Transit of Venus first observed by Horrox and Crabtree.
1640. Gascoigne applies the telescope to the quadrant, and the micrometer to the telescope.
1642. Dec. 25. Sir Isaac Newton born. Died 1726, March 20.
1652. April 8. Last total eclipse of the sun visible in Scotland.
1654. Huygens discovers the true form of Saturn's ring.
1655. Titan, Saturn's largest satellite, discovered by Huygens.
1656. Edmund Halley born. Died 1742, Jan. 14.
1659. Rotation of Mars discovered by Huygens.
1660. Nov. 28. Date of earliest official document of the Royal Society.
1662. July 15. Royal Society incorporated by Royal charter.
1663. James Gregory invents the reflecting telescope (Gregorian).
1665. March 6. First number of the Philosophical Transactions published. Cassini discovers the rotation period (9h. 56m.) of Jupiter.
1666. Cassini determines the rotation period (24h. 40m.) of Mars. Dec. 22. First meeting of the Royal Academy of Sciences, Paris.
1667. April 21. Spot on Venus seen and rotation of the planet discovered by Cassini.
1668. A large comet passed its perihelion at the end of February.
1669. Algol discovered to be a variable star by Montanari. Sir Isaac Newton invents the reflecting telescope (Newtonian).
1670. June 20. Temporary star seen near β Cygni by Antheleme.
1671. Picard and La Hire measure a degree of the meridian between Paris and Amiens. Oct. 25. Iapetus, Saturn's eighth satellite, discovered by Cassini.
1672. Dec. 23. Rhea, Saturn's fifth satellite, discovered by Cassini.
1675. Aug. 10. Foundation of Royal Observa-
- A.D. tory, Greenwich, laid. Römer discovers the velocity of light from observations of the eclipses of Jupiter's satellites. Cassini discovers the division in Saturn ring.
1676. Flamsteed becomes first Astronomer Royal. In 1672 Flamsteed gave the first approximately correct value ($10''$) for the sun's parallax.
1680. Nov. 14. Great comet first seen by Kircher at Cobourg, in Saxony. It passed close to the sun, and led Sir Isaac Newton to enunciate the view that cometary orbits were represented by conic sections.
1682. Brilliant comet discovered by Flamsteed and observed by Halley, who afterward determined its period (76 years).
1684. March 21. Tethys and Dione, Saturn's third and fourth satellites, discovered by Cassini.
1687. Sir Isaac Newton's *Principia* published.
1690. Dec. 13. Flamsteed observed Uranus as a fixed star.
1698. Feb. 6. Peter the Great of Russia visits Greenwich Observatory.
1705. Halley announced that the comet of 1682 would reappear in 1759.
1706. May 12. Great eclipse of the sun. Red flames first seen.
1711. The Royal Observatory at Berlin founded.
1715. May 3. Last total eclipse of the sun visible at London.
1716. March 6. Brilliant display of Aurora Borealis observed by Halley. Nov. 22. Castor occulted by Jupiter, and seen by Pound.
1718. Halley discovers the proper motions of the stars.
1724. May 22. Last total eclipse of the sun visible in England.
1725. Epoch of Flamsteed's catalogue of 3,310 stars (*Historia Cœlestis*). The St. Petersburg Observatory founded.
1727. The aberration of light discovered by Bradley from observations of γ Draconis.
1728. The Copenhagen Observatory and its records destroyed by fire.
1729. Chester More Hall invents the achromatic telescope.
1730. Messier born. Died 1817. Discoverer of comets and nebulae.
1731. The sextant is invented by Hadley.
1737. March 1. Annular eclipse of the sun visible at Edinburgh. May 17. Occultation of Mercury by Venus.
1738. Nov. 15. Sir William Herschel born. Died 1822, August 25.
1740. Cassini II. publishes a valuable treatise on Astronomy.
1743. Dec. 9. Largest comet of 18th century discovered by Klinkenberg. Visible at noonday in Feb. 1744. It is said to have had 6 tails.
1744. Euler publishes an important analytical work on the motions of the planets.
1745. J. H. Schröter born. Died 1816.
1748. July 14. Large eclipse of the sun, annular in Scotland.
1749. March 28. Laplace born. Died 1827, March 5. Author of the nebular theory.
1750. Caroline Herschel born. Died 1848, Jan. 9, aged 98. Wright propounds his *Theory of the Universe*, subsequently adopted by Sir W. Herschel and others.

752. Sept. 3. Gregorian calendar adopted in England. Sept. 3 is called Sept. 14.
757. Achromatic object-glasses made by Dollond.
758. Dec. 25. Palitzch discovers Halley's comet at its first predicted return.
761. Pons born; died 1831. He discovered thirty-seven comets. June 26. A transit of Venus across the sun.
764. April 1. Great eclipse of the sun in England.
765. Harrison, after much delay, is rewarded by Parliament for his invention of the chronometer.
767. The Nautical Almanac first published.
769. June 3. A transit of Venus across the sun is well observed. Nov. 23, Wilson discovers that the solar spots in the planet are cavities.
770. June 14. A large comet discovered by Messier: called Lexell's Comet.
772. Bode publishes the law of planetary distances by Titius.
781. March 13. The planet Uranus discovered by Sir W. Herschel.
783. Sir W. Herschel discovers the motion of the solar system towards the constellation Hercules. Aug. 18, great meteor traversed Europe from N. Sea to Rome.
784. Catalogue of 100 nebulae published by Messier in *Conn. des Temps*.
786. First catalogue of 1,000 nebulae published by Herschel in *Phil. Trans.* Second catalogue of 1,000 nebulae published in 1789.
787. Jan. 11. Titania and Oberon, the 3rd and 4th satellites of Uranus, discovered by Sir W. Herschel.
789. July 18. Mimas, Saturn's first satellite, discovered by Sir W. Herschel, and Enceladus, the second satellite, discovered on Aug. 29. His great forty-foot telescope completed on Sept. 28.
792. March 7. Sir J. F. W. Herschel born. Died 1871, May 11.
793. Sept. 5. Great eclipse of the sun, annular in the N. of Scotland.
794. January. Sir W. Herschel determines the rotation period of Saturn.
795. May 10. Neptune observed as a fixed star by Lalande.
799. Nov. 12. Great meteoric shower observed by Humboldt and Bonpland.
800. Jan. 17. Earl of Rosse born. Died 1867, Oct. 31.
801. Jan. 1. Minor planet Ceres discovered by Piazzi at Palermo. Schröter determines the rotation period of Mercury. Lalande publishes a catalogue of 47,390 stars.
802. Systems of binary stars are detected by Sir W. Herschel. March 28. Minor planet Pallas discovered by Olbers.
803. April 26. 3,000 meteoric stones fell near L'Aigle in Normandy.
804. Sept. 2. Minor planet Juno discovered by Harding.
807. March 29. Minor planet Vesta discovered by Olbers.
811. March 11. Le Verrier, the great French mathematician, born. Died 1877, Sept. 23. April 26, the great comet of this year discovered by Flaugergues.
812. July 20. Discovery of a periodical comet by Pons of Marseilles.
- A. D.
1814. The sun's rotation fixed as 25d. 0h. 16m. 36m. by Delambre.
1816. June 10. Total eclipse of the moon: our satellite completely invisible.
1818. Nov. 26. Encke's comet discovered by Pons at Marseilles.
1819. July 1. Large comet observed in various parts of Europe.
1820. Jan. 12. First meeting of the Royal Astronomical Society. The *Astronomische Nachrichten* established.
- 1820 (about). Fraunhofer observes the spectrum of a star through a prism.
1821. The Observatory at the Cape of Good Hope founded.
1822. Harding publishes his *Atlas Cælestis*.
1826. Feb. 26. Biela's periodical comet discovered. Nov. 18. A large comet seen near the sun by Gambart and Flaugergues.
1827. The *Monthly Notices* of the Royal Astronomical Society first published.
1831. Sept. 27. First meeting of the British Association.
1833. Nov. 13. Great meteoric display observed in America.
1834. Beer and Mädler publish a large map of the moon.
1835. Nov. 16. Perihelion passage of Halley's comet. Encke redetermines the solar parallax.
1836. May 15. Annular eclipse of the sun in the north of England. Baily's beads observed. Damoiseau's tables of Jupiter's satellites published.
1838. The parallax of a Centauri and 61 Cygni determined by Henderson and Bessel respectively. La Caille's catalogue of 9,766 southern stars published by the British Association.
1839. Aug. 19. Observatory at Pulkowa finished (cost £100,000).
1840. Daguerre essays to obtain a photograph of the moon. The Cambridge (U.S.) Observatory founded.
1842. The Naval Observatory, Washington, U.S.A., founded.
1843. July 2. Great comet visible, with tail 100 degrees long.
1844. Hofrath Schwabe discovers the periodicity of the sun's spots.
1845. February. Completion of Lord Rosse's monster six-foot telescope. The British Association publish a catalogue of 8,377 stars. Dec. 8, Hencke discovers the minor planet Astræa. This was initiatory to a large number of similar discoveries by different observers in succeeding years.
1846. Jan. Biela's comet divided into two. Le Verrier and Adams theoretically discover Neptune. Sept. 23. The new planet is telescopically discovered by Galle. Oct. 10. Its satellite discovered by William Lassell.
1848. April 28. Temporary star discovered by Hind in Ophiuchus. Sept. 16-18. Hyperion, the 7th satellite of Saturn, discovered by Lassell and Bond.
1850. Nov. 11. Saturn's dusky, inner ring discovered by Bond. Lord Rosse publishes observations on nebulae.
1851. Oct. 24. Ariel and Umbriel, the 1st and 2nd satellites of Uranus, discovered by Lassell.

- A. D.
1857. De la Rue, Secchi, Bond, and others obtain celestial photographs.
1858. March 15. Great eclipse of the sun in England. June 2, Donati discovers a large comet which on Oct. 5 passed over Arcturus.
1859. March 26. Suspected planet Vulcan seen on the sun by Lescaubault. Sept. 1. Sudden outburst of solar faculae seen by Carrington and Hodgson. Kirchhoff and Bunsen begin investigations in spectroscopy.
1861. June 29. Great comet suddenly became visible in England. It had a tail 105° long.
1862. Epoch of Argelander's catalogue of 324,188 stars.
1863. Several mathematicians point out that the accepted value of the solar parallax is too small, and the sun's distance less than supposed.
1864. Sir J. Herschel published a general catalogue of 5,079 nebulae.
1866. May 12. Temporary star discovered by Birmingham. Nov. 13. Brilliant meteoric shower observed. Schiaparelli announces the identity of comets and meteors.
1868. Dr. Huggins detects motion in the line of sight amongst stars by the spectroscope.
1872. Nov. 27. Great meteoric shower from Biela's comet. It recurred on same date in 1885, and was widely observed.
1874. The Royal Astronomical Society publish Sir J. Herschel's catalogue of 10,317 double and multiple stars. Dec. 8. Transit of Venus invisible in England.
- A. D.
1876. Nov. 24. Temporary star discovered in Cygnus by Schmidt at Athens.
1877. Aug. 11—17. Two satellites of Mars discovered by Professor Asaph Hall at Washington, U.S.A. Mr. Gill observes Mars from Ascension Island, and finds the solar parallax $3''78$.
1878. July. Conspicuous appearance of the great red spot on Jupiter. Schmidt's great lunar map published by the Russian Government.
1880. February. Large comet seen in the southern hemisphere.
1881. Two bright comets observed in the summer.
1882. March 14. Dr. Draper of New York photographs the great nebula in Orion. Sept. 17. Large comet passed very close to the sun. Dec. 6. Transit of Venus visible in England.
1884. Publication of Gould's catalogue of 73,160 southern stars. Sept. 1. Brooks re-discovers Pons's comet of 1812.
1885. Aug. 31. Temporary star observed by Hartwig in the nebulae of Andromeda. Nov. 16. MM. Henry at Paris photograph 1,421 stars and a new nebula in the Pleiades.
1886. Splendid photographs of Jupiter and Saturn obtained by MM. Henry at Paris.
1887. The great 36-inch refractor completed for the Lick Observatory. April 16. International conference of astronomers at Paris re stellar photography. Aug. 25. Brooks re-discovers Olbers's comet of 1815.

Telescopic Powers Necessary for Celestial Objects.

COMETS and large nebulae, such as those in Orion and Andromeda, require very low powers and an exclusive field of view, so that the object may be presented in its entirety, and its light sufficiently condensed to display the fainter portions. If it is desired to critically examine the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be employed. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers 90 and 120, reveals the spots in great variety of form and grouping. The craters, mountains, and plains of the Moon are satisfactorily seen with 150, though for very minute features powers of 300 and 400 are necessary on a 12-in. glass. Solar and lunar eclipses are visible under powers of 50 and 75.

The phases of Mercury may be discerned with 75; those of Venus are plain with far less power. To see these planets well, observe them near the times of sunrise or sunset.

The chief spots on Mars, such as the Kaiser Sea, may be distinguished with 90 on a 2-in. refractor, but powers of 300 and 350 and an 8-in. refractor are desirable to exhibit the outlines of the fainter markings.

Jupiter's belts are visible in a $1\frac{1}{2}$ -in. telescope power 40, but for studying their variable ap-

pearances and the different motions of the bright and dark spots 250 and 300 are requisite. The four satellites are visible in an opera-glass. Transits of the satellites III. and IV. may be capitably observed with a 3-in. refractor and power of 150.

The division in Saturn's ring and his principal dark belt are to be readily glimpsed with a 2-in. glass, power 120. But magnifiers of 300 and 350 are essential in any endeavours to reach the more delicate features of the planet. A good $4\frac{1}{2}$ -in. refractor will show Encke's division in the ring, also the anterior crape ring and five of the satellites, but the night must be good. Titan, the largest of the Saturnian moons, is visible in any small telescope; and Iapetus is also an easy object, though sometimes unduly faint; but Tetley's Rhea and Dione are much more difficult, requiring care and attention.

Occultations of stars by the Moon may be satisfactorily watched with a three-inch glass, power 75.

It should always be remembered that on nights of good seeing, when the air is tranquil and planetary features very sharply defined, telescopes will bear much higher powers than on less favourable occasions. When the atmosphere is very pellucid and stars shining brilliantly, telescopic performance is often very faulty. A thin mist or fog veiling the lustre of celestial objects frequently enables the most perfect views to be obtained of their appearances.

ATOMIC WEIGHT OF SILICON.—The researches of Messrs. Thorpe and Young tend to show that the atomic weight generally accepted hitherto for this important element is below the truth. Their results give 28.332 as its value.

SILICON IN IRON AND STEEL.—Mr. Thomas Turner has continued his series of experiments on the influence of silicon on the properties of iron and steel. The presence of this element tends to harden the metal somewhat. Mr. Turner's determinations of hardness were made by means of an ingenious apparatus, in which a weighted diamond produced a scratch on the surface to be tested. If the hardness of lead be assumed to be 1, then zinc comes out 6, copper 8, the softest iron 15, mild steel 21, bar iron 24, hard cast-iron scrap 36, and very hard white iron 72.

ARTIFICIAL SUGAR.—Drs. E. Fischer and J. Tafel of Würzburg have at last succeeded in preparing artificially a true sugar. It is made from acrolein, which is first converted into the dibromide and then treated with baryta-water. The new sugar, called "acrose," occurs as a syrup, and has the composition common to the sugars of honey and of most fruits, but, unlike these sugars, it has no action on polarized light.

SACCHARINE.—This substitute for sugar, although discovered so long ago as 1879 by Dr. C. Fahlberg, became an article of commerce only in 1887. It is prepared from one of the constituents of coal-tar: its scientific name is "parasulphaminebenzoic acid." Its sweetening power has been variously estimated as equal to that of 180 to 300 times its weight of cane-sugar. It is entirely destitute of any nutrient property, and passes unchanged through the body. Being very slightly soluble in water, it is best to associate with it a small quantity of an alkaline substance, such as carbonate of soda, which causes it to dissolve readily. It is of great use for sweetening all kinds of liquid and solid food for diabetic patients. It is perfectly harmless, and when employed in reasonable proportions has a pure sweet taste. A very strong solution of it possesses a slight bitter after-taste and a faint aroma like that of bitter almonds.

LANOLIN.—Under this name cholesterin, a substance long known as the chief constituent of gall-stones, and more recently found to form a large part of the suint or yolk of wool, has been introduced into commerce. This substance partakes of the characters of a fatty acid and an alcohol, and possesses the remarkable property of forming an emulsion with water and of penetrating the skin when applied to it. It is an excellent base for medicated ointments.

IRON AND STEEL.—The iron and steel industries embrace three leading departments or branches—pig-iron, manufactured iron, and steel. Great improvements have been made in the first and third of these, and their production has been enormously increased. Manufactured iron, on the contrary, has been almost stationary as regards its processes of manufacture, while its use has so far been superseded by that of steel that its ultimate extinction is regarded as a question of time. The principal changes that have occurred in the pig-iron manufacture have been the increase of the height and capacity of the blast furnace, the use of higher pressures of blast, the utilization of the waste gases

of the furnace for raising heat and steam, and of the residues, or by-products of the processes, and otherwise the introduction of more perfect types of stoves, engines, &c. The "Rapid" open-hearth steel plant, invented by Mr. B. H. Thwaite of Liverpool, and Mr. A. Stewart of Bradford, is a notable advance. It is designed to effect the manufacture of steel by a combined pneumatic and open-hearth process, so as to obtain an approach to the rapidity of the former with the advantages of control possessed by the latter, and at a low cost for plant. The enormous increase of production, fostered by the development of new processes, can hardly be estimated in figures, but it is within the mark to say that the maximum production of furnaces has been raised from 400 or 500 tons to upwards of 1,600 tons per week; and this has been concurrent with an enormous economy of production as regards fuel and labour.

CIVIL ENGINEERING.—Embodied perhaps by the success of the Suez Canal, and hopeful of the ultimate success of the Panama cutting, the French have projected a new maritime canal between Bordeaux and Narbonne. The canal will measure about 300 miles from sea to sea, and will start from the western side of Bordeaux and follow the left bank of the Garonne for a distance of 50 miles, crossing that river at Castel-Sarrasin by an aqueduct, then following the right bank of the river as far as Toulouse, where a large port will be created. This "canal of two seas" will be quite independent of the railway from Bordeaux to Cete, but it will twice cross the Canal du Midi. The curves of the canal will be of the same radius as those in the Suez Canal, viz., not less than 6,600 feet, and there are to be 38 locks with a fall of from 20 to 30 feet. The depth will depend upon the decision of the Minister of Marine to use the canal for first-class ironclads of the French navy, but will probably be from 25 to 30 feet.

The foundations of the monster Eiffel Tower, which is to be 950 feet high, and from the summit of which Paris and its environs may be overlooked, are already laid.

MOTIVE POWER.—The economical application of electricity as a motive power is still an unsolved problem. Tramscars have been run on experimental lines and machinery driven by electricity, but there still appears to be a reluctance on the part of engineering experts to accept the new power as one answering every requirement. The petroleum engine brought out a year or so back by Messrs. Priestman Bros. of Hull is a very useful application of a novel force, specially useful for small work. In gas-engines Messrs. Crossley Bros. of Halifax "Otto" engines are deservedly recognized as the leading type, and if we except the "Differential" gas-engine introduced by the Atkinson Gas Engine Co., no great or striking improvement has been effected during the past year or so in these useful motors. The vexed question of adapting the gas-engine to small powers has been solved by the Britannia Company of Colchester, who have introduced a useful type of gas-engine for lathes, fret-saws, sewing-machines, and small work.

ENGINES AND BOILERS.—A decided departure in steam-boiler practice has been made by Mr. Thomas Lishman, who has devised a method of

raising steam by the aid of forced draught, without producing smoke, and with a marked economy in fuel. The system consists of a long U-shaped tube, placed horizontally in the furnace instead of the fire-bars. This tube is intersected at intervals by cross tubes, and the space between the two straight limbs of the tube is covered in, forming on the top the hearth of the furnace. Air under pressure is blown into the space between the tubes, and, passing through the small cross-tubes, finds its way up at the outer sides of the main tubes into the fire. A combustion-chamber is formed by the arrangement of the tubes, and the products of combustion, after passing through highly-heated air, are led into the main flue without smoke being formed. The U-tube has another function: it has also to heat the feed-water for the boiler, which it does thoroughly, delivering it at a temperature closely approaching that of the water in the boiler. The coal used is small duff, or household screenings, costing in London 9s. 6d. per ton, against ordinary hard Yorkshire steam coal at 17s. 6d. per ton. One ton of common duff coal at 9s. 6d., moreover, will generate as much steam as two tons of the coal at 17s. 6d. per ton. It will also turn into steam $9\frac{1}{2}$ lbs. of water as against $5\frac{1}{2}$ lbs. under the old system.

PETROLEUM AS FUEL.—The use of petroleum as a fuel has been rendered possible by the invention of Mr. Thomas Urquhart, a Scotchman long resident in Russia. The history of the devices for getting heat by burning oil is a curious one. Not a few have attempted to convert the oil into gas and burn the gas, others simply vaporising the oil and burning the oil vapour. In the appliances placed in the fire-box, of which there were many, a difficulty was found by reason of the heat being so great that the decomposition of the oil deposited carbon, which clogged up the burners. The essential features of Mr. Urquhart's scheme of burning petroleum consist in converting the oil itself into a finely divided state or spray by means of compressed air or a jet of steam, and then burning this spray in a fire-brick furnace constructed inside the fire-box. The burner or spray-producer, if it may be so called, is essentially two tubes, one inside the other, the inner tube carrying the jet of steam or compressed air, and the outer tube carrying the oil. The oil tube is prolonged some distance beyond the steam tube to allow the steam and oil to combine, and then the two together are projected from the end of the oil tube by the force of the steam. The system can be adapted to locomotives, and a single burner, weighing about 40 lbs., is sufficient for a locomotive of the largest size. The fire-brick furnace is in shape like a bonnet, with the open end towards the spray-producer. The object of the fire-brick is to receive the small particles of oil that escape combustion before they reach the bonnet, and to break them up so that they may be consumed. The oil and air are thoroughly burnt, and the fire-brick becomes intensely hot, radiating heat to all parts of the fire-box, and it also serves to re-ignite the oil after it has been shut off for a short period.

THE LUCIGEN.—For lighting large areas a device on a somewhat similar principle has been introduced as the Lucigen. This marks the latest advance in the history of the production of light from carbonaceous substances, as not only does it raise the carbon particles to

the most intense white heat, but the form the flame is such as to retain them in that condition for the longest period. The Lucigen will produce a flame of 3,000 actual candle-power, equal to six large arc lamps, while its radiating surface is about 350 square inches, as against one square inch for the arc lamp. It gives light of a quality highly effective for working purposes, and has been adopted by a large number of works throughout the country. Regenerative burners for gas-lighting have passed into general use, the Wenham, the Siemens, and the Welsbach incandescent being all well known.

FIRE-PREVENTING APPLIANCES.—Automatic sprinklers, the action of which is to showe water in a fine stream, are advocated, and in new theatres fire-proof curtains have been introduced. A fire-proof curtain which possesses undoubted advantages over similar inventions, has been demonstrated by Captain Heath, its originator, to be of special service. It is made of canvas, backed with asbestos, and is run up from below the stage by means of leverage gear on either side. On reaching the top it releases a lever which communicates with a water-supply pipe, the result being that a copious and continuous shower of water plays upon the asbestos face of the curtain. Prevention being better than cure, attention has been given to fire-proof paints or solutions. The paint which has found most favour is "Pyrodene," the invention of Mr. Thos. Griffiths. This material can be applied as ordinary paint, which it supersedes, and it is said to render woodwork, scenery, stage dresses, and textile fabrics perfectly non-inflammable. Many theatres have adopted it—Terry's, Drury Lane; at Glasgow, and Brussels—and it was also largely used at the Manchester Exhibition. An outer fire-proof coating is given to wood or any material on which it is used, which causes it to withstand the action of the flame, and when once a charred surface is obtained it is not easy to induce inflammation or complete combustion.

THE TELEPHONE.—The extension of the telephone has greatly advanced during the past year, and long-distance telephony has become quite common, especially in the North and Midlands. A concession has been granted for allowing a telephonic cable to be laid from London to Paris. If this step proves successful it is certain to be largely resorted to by business men desiring the most prompt means of communication. The rage for automatic machines has not spared the telephone, at all events on the Continent, where customers place the equivalent of a penny in the slit of the machine, and are forthwith able to talk for three minutes with their friends or customers. The greatest advance in telegraphy is railway-train telegraphy, now proved to be possible by American experiments. Messages were sent from and received on the moving train without difficulty, one even being sent to London and received accurately worded.

TELEGRAPHIC EXTENSION.—The extension of the telegraph system in England promises to be more than doubled before the year 1888 closes, as important changes are at hand, the British Government taking into its own hands the working of telegraphic communication with Belgium, Holland, Germany, and France. The German Government will purchase and use the

cable and plant of the German Union Telegraph Company, and negotiations for the powers of working the French lines have been resumed after a long break, and happily concluded. It is believed that the action of the Post Office will not end here, but that they will take into their own hands the telegraphing and the receipt and delivery of all messages sent through telegraph companies having cables landing on British shores. In order to effect these improvements the Post Office are to have direct telegraphic communication with the Continent, and contemplate the establishment of a central foreign telegraphic section in Threadneedle Street, close to the London Stock Exchange.

THE PHONOGRAPH.—Edison's latest developments of the phonograph promise to be of great value in commercial communication. The receiver of a "phonogram," as the little sheets of foil are to be named, has only to put it into his own apparatus, and the message of the sender may be read distinctly in his own natural tone of voice. It is said that it will last indefinitely, and may be repeated a thousand times if necessary. The cost of making the phonogram will be scarcely more than that of letter-paper, and if it realizes all the hopes of its inventor the phonograph will be the electric marvel of the year.

PHOTOGRAPHY.—The immense strides which photography has made are mainly due to the introduction of the dry-plate processes, which have in the past year been greatly extended. Instantaneous exposure only being necessary, several ingenious methods of providing detective cameras have followed. One is never certain whether or not his facial expression is being caught and recorded, for the opening of a watch, the pointing of opera-glasses, or even the click of a sham revolver may mean that a portrait has been surreptitiously taken. The watch camera is the invention of Mr. W. J. Lancaster, of Birmingham. The Americans have, however, succeeded in distancing all competitors in this field with their ingenious "pill-box" camera. Although this is but a toy it will, in moderately skilful hands, take a perfect picture, so that it may be justly regarded as a scientific instrument, although a rough and ready one. An ordinary pill-box with lid is procured; at the back of the box discs of highly-sensitized paper are placed; three or four discs with blanks between each may be carried at one time. In the lid of the box a small hole is made, and at the back of the top of the lid a lens with short focus is placed, or the hole itself will be sufficient to give a fair picture. It is only necessary to hold the box steadily in position, uncovering the hole in the lid for an instant, and return to darkness, so that the plate may be taken out and developed by any of the processes used with the plates of larger and more expensive cameras. The number of plates now required being so much larger, the ideas of inventors turned naturally to magazine cameras, in which a large number of plates may be conveniently carried. Many of these are made so that the glass negatives unfold themselves successively, like the leaves of the panoramic prints, which are doubled over one against the other. With these, however, the difficulty is to ensure a thoroughly darkened interior and uniform steadiness during exposure. The best form as that invented by Mr. Wyndham Payne.

Gallevey, the eminent hydraulic engineer, for his own use. A drum carrying 18 or 24 plates is attached to the camera; by a very ingenious arrangement of drop shutters and mechanism for passing the plates rapidly from the drum to the camera, a series of all but instantaneous photographs may be taken. Instantaneous photography has given us a new field in which to exercise the art for the purposes of scientific comparison. The flight of birds, the movements of horses, and other swiftly moving objects are now popular subjects of illustration. The camera has also been enlisted in the service of physiognomy, the experiments of Mr. Francis Galton in photographing separate portraits of families, one overlying the other, being of great interest. They discover a new and striking similarity between faces apparently unlike, and are of great utility in formulating characteristics of race, type, &c.

SCIENTIFIC NOVELTIES AND REQUIREMENTS.—A scientific novelty in the form of a new lens, which magnifies and is yet perfectly flat on both sides, has been made at Jena. It consists of a single disc, the density of which varies so that its refractory power decreases regularly from the surface inward.

A new form of thermometer is likely to become popular. A dial is provided, upon which the figures are read as easily as a clock. In this instrument strips of metal, which are unequally acted upon by heat or cold, are soldered together in the form of spirals. The action of the temperature is multiplied by delicate wheels and pinions.

NEW PROCESS FOR ALUMINIUM.—A new method of obtaining aluminium, of French invention, is thus described:—Ten parts by weight of powdered alumina are mixed with four of lamp-black, a sufficient quantity of tar being added to make a thick paste. This is placed in a suitable receptacle and calcined at a red heat till the oil or tar is completely decomposed, leaving a brittle solid. When broken into small lumps this is placed in a closed vessel, and subjected to the action of an atmosphere of carbon bisulphide, a current of which is kept constantly flowing through the vessel. On raising the temperature this agent decomposes the carboniferous mixture, with the production of carbonic acid gas and a sulphide of aluminium, from which the pure metal is afterwards obtained with the aid of hydrogen. Amongst the new purposes to which this metal has been recently applied is the manufacture of plates for dental uses, for which, being tasteless, light and strong, it is well adapted. The new process will, it is said, greatly reduce the cost of production, and enable the metal to be used for purposes hitherto prohibited by its price.

In spite of the notable advance of science there are many wants which still remain unfulfilled: A miner's real safety-lamp, a safe method of blasting without risk of explosion, electric lighting economically produced from primary batteries, improved methods of arresting decomposition in animal substances, are some few of the many scientific problems of the day. But, when the mind bridges over the past fifty years, and contemplates the enormous advance which has been made in the practical application of science to everyday wants, it is evident that we shall not have to wait long for these and many more startling, if less necessary, scientific inventions.

The existing route between Edinburgh and Perth, by which the North British, Great Northern, Midland, and North Eastern Railway Companies exchange traffic with the Northern Scotch Companies converging at the latter city, has many disadvantages, for not only is it very circuitous, involving a detour to the west of twenty miles, but more than half of it is the property of a rival company, for the use of which a heavy toll is paid. Further, the sea ferry of five miles from Granton to Burntisland, being both inconvenient and costly to maintain, is a great impediment in the route of the North British Railway from Edinburgh to Dundee.

To mitigate these evils, and to secure a position of greater independence, the four companies before mentioned have associated themselves in an undertaking which comprises the bridging of the Firth of Forth by a structure which, when completed, will take rank as the greatest work ever carried out by human agency.

The site chosen for the work is at Queensferry, about eight miles west of Leith, where a rocky promontory on the north side narrows the distance across the Firth to about a mile, a rocky island called InchGarvie dividing the deep-water space into two channels of nearly equal width, and of the great depth of about 200 feet.

The peculiar features of the case required an exceptional method of treatment, and it was only after much consideration that the construction of the present bridge, designed on the "cantilever and central girder system," by Sir John Fowler and Mr. B. Baker, was commenced in 1883. The novel and scientific adoption of an ancient type of construction has met with the strong approval of distinguished engineers of all countries, and already several important bridges in India and America are being carried out on the "cantilever" principle of this bridge.

The Forth Bridge lies nearly due north and south, is 8,296 feet or nearly $1\frac{5}{8}$ miles in length, and comprises fifteen girder spans of 168 feet, resting on masonry piers; these form the approaches to the main structure, which crosses the intervening space of more than a mile by two spans of 1,710 feet, and two of 680 feet, and is composed of cantilevers, and two central girders of ordinary type, each 350 feet in length, which complete the connections between the cantilevers.

The railway, straight and level throughout, is carried on the upper surface of the girders of the approach viaducts, and on the lower members of the central girders and cantilevers.

Each cantilever is carried out from a vast steel, braced tower, which rests upon a group of four massive masonry piers of solid Arbroath rubble faced with Aberdeen granite; circular in form, 49 feet in diameter at the top, and 36 feet high above low water. Below that level they have been founded on cement concrete carried down to the solid rock or boulder clay by means of wrought-iron caissons, 70 feet in diameter, sunk by the pneumatic process to a maximum depth of 91 feet below high water. The pressure upon the foundation will not exceed six tons per square foot.

Each group of piers is in the form of a rectangle, the north and south sides of which are 120 feet long, and those on the east and west

155 feet in the shore cantilevers and 270 feet in that on the island.

The central towers are composed of four tubes, one on each pier, 12 feet in diameter, and carried up to 361 feet above high water. These are inclined inwards, transversely to the axis of the bridge, their bases being 120 feet and their tops 33 feet apart; but parallel thereto they are, throughout their length, 145 feet apart in the shore cantilevers, and 260 feet in that on the island. They are strongly braced and connected on all sides, either by tubes varying in diameter from 12 to 7 feet, or by massive girders of quadrangular form.

The principal parts of each cantilever are the top and bottom members, and the vertical and horizontal bracing. The top members are two in number, 33 feet apart centre to centre; each is a quadrangular girder, strongly braced vertically and horizontally, about 700 feet long, tapering from 12 to 5 feet in depth by 7 to 2 feet 6 inches in width. They extend from the tops of the central towers to points about 190 feet above high water, where vertical end-posts connect them with the bottom members and central girders. The latter are also two in number, and about 700 feet long, and are formed of tubes tapering in diameter from 12 feet to 3 feet. They are curved upwards from the bases of the central columns to their connection with the end-posts before mentioned, where their under-sides are 154 feet above high water.

The vertical bracing consists of six pairs of tubes of elliptical form as struts, and six pairs of quadrangular girder-ties, varying in length from 330 feet to 70 feet, and in diameter or depth from 8 to 3 feet. The struts and bottom members are strongly braced against horizontal stresses by girders of quadrangular form.

The magnitude of the structure, and the impossibility of obtaining support from below when over the water, invite special reference to the method of erection. The central towers were built by means of platforms raised at intervals by hydraulic rams placed inside the main tubes. The top and bottom members of the cantilevers are erected by cranes of special construction supported on them, and advanced as the work is executed, temporary ties and columns being used when required to support and adjust them in their true positions.

The foundations and piers contain about 130,000 cubic yards of granite, concrete, and rubble masonry, and the superstructure about 53,000 tons of Siemens-Marten steel, which is obtained from works at Glasgow and Landore. The ultimate tensile strength is from 30 to 37 tons to the square inch, while the greatest strain the structure will have to sustain from dead and live load and wind will not exceed one-fifth of that amount. With the exception of the rolling of the plates and bars the whole of the manufacture and fitting is carried on at the site of the bridge, where fifty acres of land are occupied by shops and yards, and the number of men employed is about 4,000. In the shops and elsewhere, when advisable, work is carried on both night and day. The resident engineer is Mr. Frederick E. Cooper. The total cost will be about two millions and a half sterling; and up to November, 1887, the masonry and approach viaducts had practically been completed, 40,000 tons of steel have been manufactured and 32,000 tons erected.

THE attention of the public at large is at present more especially directed to the progress of the Expedition which has been fitted out by a committee, at the head of which stands Mr. Mackinnon of the British and Indian Steam Navigation Co., in order to bring relief to Emin Pasha, the zealous governor of what was not long ago the Equatorial Province of Egypt. Mr. Stanley, the leader of this relief force, arrived at the Congo mouth on March 18 last with over 700 men—most of whom had been recruited at Zanzibar—eight Europeans, and Tipu Tip, the well-known Arab trader, who, though a slave hunter, has invariably shown kindness to those Europeans who crossed his path in the wilds of Africa, and who has by this time taken command of Stanley Falls Station, on the Upper Congo, as one of the officers of the Congo State. Mr. Stanley reached the Yambuga Falls on the Aruwimi, whence he proposed to proceed by land, on June 20, and by the time this Almanack reaches the hands of its readers, news of his having happily joined Emin Pasha on the Albert Nyanza will probably have arrived in this country. Emin, who heard in April last that a Relief Expedition was on the way, declares that it is not his intention to abandon the post intrusted him by General Gordon, and with it the results of twelve years' beneficent work among the natives of Africa. All he calls for is that a road should be kept open for him, either to the East Coast or to the Congo, which would enable him to communicate with the outer world, and render him independent of the whims of the rulers of Unyoro or Uganda. Mwanga, Mtesa's successor in the last-named country, is reported to have at length given permission to Mr. Mackay to take his departure, after having detained that missionary for several years.

Within the Congo basin many agents of the Congo State have been at work, but no discovery of moment has been made. Lieutenant Van Gèle, who was deputed to finally determine the connection between the Welle and the Mobangi, first explored by Mr. Grenfell, contented himself with ascending the Itimbiri to the Lübl Falls (July, 1887), and then turned back disheartened without having made the least attempt to cross the forest-region which separated him from the river so recently explored by Dr. Junker. Neither did his navigation of the Mobangi, in December, 1886, add substantially to the information supplied by his predecessor. Minor explorations were carried on by Lieutenant Baert, who ascended the Mungale, and by Baron Schwerin, who enlarged our knowledge of the river Congo, and "discovered" the remains of the pillar which Diogo Cão set up at the mouth of that river three centuries ago, remains which had already been described by Sir R. Burton. More substantial additions to our knowledge are looked for from "the Sandford Exploring Expedition," conducted by Lieutenant Taunt, an American, who will more especially direct his attention to the southern tributaries of the great African river, and from the railway-survey carried out by Captain Thys, which ought at all events to furnish a trustworthy map of the lower reaches of the river as high up as Stanley Pool. Prof. Lenz, who crossed Africa from the Congo mouth to the east coast (he arrived at Zanzibar on January 14, 1887), followed for the most part

routes previously explored, but Lieutenant Wissmann, who, starting from Luluaburg on the Upper Kasai, reached the Zambezi mouth in August, appears to have traversed some new territories. This is the tenth time that Southern Africa has been crossed between the Indian and Atlantic Oceans: since the establishment of the stations by the Congo State and by our Scotch and English Missionary Societies, a journey like this has become comparatively easy—health, time, and money being the only requisites.

Within the territories recently annexed and partly occupied by Germany many explorers have been at work on a small scale. Dr. Hans Meyer has at length succeeded in reaching the very top of snow-clad Kilimanjaro, an achievement vainly attempted by von der Decken, Thornton, New, Johnston, and others. This mountain appears now to be attracting sportsmen from various parts of the world. Herr Denhardt has further explored the Tana river, which separates the English and German "spheres of interest," and promises to become of use as a practicable high road into the interior. Further south, quite a congeries of agents of the German East African Company, among whom, Dr. Schmidt, a geologist, holds a prominent rank, have been "prospecting" the country, and the German company is deserving of praise for allowing its officials to publish accounts of the expeditions in which they have been engaged. This example is worthy of imitation by our own "Royal Niger Company," whose agents are quite as busy as their German rivals, and whose chances of making interesting discoveries are far more considerable.

In the Cameroons Colony a Scientific Expedition, headed by Lieutenant Kund, is at present at work, whilst the navigable creeks and rivers are being explored by German gunboats and steam-launches.

The region lying between the Senegal, the Gambia, and the Niger is being carefully mapped by topographers attached to Colonel Gallieni's military forces. On the Niger itself a gunboat has been launched, and in the course of last summer Lieutenant Caron descended in her as far as Kabara, the port of Timbuktu. That famous old emporium was also the goal of the German explorer, G. A. Krause, who left Salaga on the Volta on July 7, 1886, visited Wogodogu, the capital of Mosi, but was turned back in Hombori, a district only 150 miles distant from his goal. On August 26 last Herr Krause arrived at Great Popo, on the Gold Coast. Apart from important geographical discoveries he claims to have found a vegetable febrifuge far superior to quinine in its healing qualities.

Turning to Southern Africa we find that Dr. Holub, who had crossed the Zambezi on his road to Lake Bangweolo and the head-waters of the Congo, has been driven back by the Mashukulumbwe, and robbed by them of his collections. He reached Shoshong, in Bechuana-land, on February 22, 1887, and has since arrived at Vienna. In Northern Africa excellent surveying work is being carried on without ostentation by the French. M. C. Douls, who ventured among the lawless tribes in Wadi Draa to the South of Morocco, notwithstanding the rough treatment to which he was subjected, proposes soon to return to the scene of his

labours, and looks forward to better success in the future.

In Asia the honours of the explorer fall mainly to the share of Russian and British travellers, although other nations are not altogether unrepresented, and occasionally do very excellent work. Among recent French explorers of that vast continent the palm will undoubtedly be given to MM. Bonvalot, Pépin, and Capus, who, notwithstanding the difficulties, physical and otherwise, which obstructed their progress, succeeded in crossing the whole of the Pamir and the Hindu Kush between Samarkand and Chitral, and were received, in September last, by the Viceroy of India at Simla.

The Caucasus, which is now within the reach of ordinary tourists, is more and more attracting the attention of the members of Alpine Clubs. In the course of last summer excellent glacier-work was done there by Mr. Douglas Freshfield, partly in the company of the Hungarian geologist, Déchy, whilst the eminent botanist, Dr. G. Radde, continued his researches in the Ossetian Alps. Asia Minor has been traversed by A. Elisseyef, a Russian, whilst Dr. E. Glaser and General Haig have notably increased our knowledge of South-western Arabia.

Samarkand has for many years past been the centre of considerable geographical activity, and in the course of last spring Grum Grshimalo started from it on his third exploring trip through the forbidding Pamir. Further east an expedition headed by Colonel Bohyr and M. Makerof took Irkutsk for its base of operations, and explored the Sayan mountains and the Lake Kosugul. In the extreme north Dr. A. Bunge and Baron Toll have succeeded in exploring New Siberia, a group of islands lying out in the Arctic Ocean. They returned to the mainland in October, 1886.

The vast region which lies between the Himalayas and Southern Siberia is likely to furnish useful employment to geographical explorers for many years to come. M. Potanin, who left Peking in 1884, and devoted several years to an exploration of the Gobi, returned to St. Petersburg in March, but his companion, Beresovskii, remains behind another year in the hope of being able to add to his already important natural history collection. These Russian achievements, however, have been equalled, if not surpassed, by Messrs. A. D. Carey and A. Dagleish, who, in the course of this summer, returned to India after an absence of nearly two years. These explorers reached Lob Nor in April, 1886, and thence crossed the Altyn Tag and Tibet to Yarkand, where they spent the winter. During this arduous journey through a region unrivalled for its inhospitability, they spent eighty-two consecutive days on the march without meeting a single human being. Several recent journeys undertaken by native explorers with a view to solving the Sanpo and other problems failed; but the results obtained appear to justify General J. T. Walker in his assertion that the Lutsekiang is the upper Irawadi, and not the upper Salween, and that the Sanpo joins the Brahmaputra.

In Burmah surveys have been carried on since January by Colonel Woodthorpe; in Siam extensive explorations have been conducted by Mr. MacCarthy; and in Manjuria the source of the Sungari was visited by Mr. H. E. M. James. In Borneo one of the officials of the Borneo Com-

pany, Mr. R. M. Little, ascended the Kimbalu, a huge volcanic mass, and determined its height to be 11,565 feet.

The interior of Australia is gradually losing its terrors, and herds of sheep almost follow the footsteps of the explorers and surveyors, whose labours have recently been carried on very successfully in the auriferous district of Kimberley.

New Guinea, being in a large measure still virgin soil, is naturally attracting the attention of Australian geographers. Mr. Th. Bevan, who left Thursday Island on March 18, has successfully explored the Aird, Douglas, and Jubilee rivers, as far as the foot of the mountains. Mr. C. Hartmann and George Hunter, who attempted to cross the island in the latitude of Port Moresby, only reached the summit of the water-parting, when excessive rains compelled their return. Mr. O. Forbes's explorations having failed in consequence of insufficient means, a fresh expedition, better found, has been started by the Geographical Society of Melbourne, with Mr. Cuthbertson as leader and Mr. N. Sayer as naturalist. The exploration of the Owen Stanley Range will be the main object of this expedition. In German New Guinea a scientific expedition, headed by Dr. Schrader, has been at work ever since April, 1886, its principal result thus far being the discovery of the Empress Augusta River, which was ascended as far as long. $141^{\circ} 48' E$.

Turning to America we begin our survey with Alaska and the British dominions, the boundaries between which, as determined by the treaty of 1825, have never been surveyed. Two expeditions were despatched for that purpose in spring last, the one by the United States, the other by Canada. The leader of the latter is Mr. G. M. Dawson, who left Dease Lake on June 3, descended the Dease River to its junction with the Liard, ascended the latter to its source in Lake Francis, and then crossed a difficult portage to the Pelly, which is tributary to the Yukon, the mouth of which he hoped to reach before the close of the season.

A considerable amount of geographical activity has been exhibited in South America. In Venezuela geographical work is being done by Vincenzo Marcano and by M. Chaffanjon, who returned, March 25, to Ciudad Bolivar, after having traced the Orinoco to its source. The watershed between the rivers of Guiana and the Amazons is at present being explored by M. H. Coudreau, who left Cayenne in July. Within the basin of the Amazons itself several explorers are at work, or have been until recently. R. Payer, who has devoted three years to an examination of the head streams of that river, is on the point of returning to Europe with important ethnological collections. He will have something to say about cannibal tribes who still survive in the more remote parts of the country. K. von der Steinen, after an examination of the interesting Indian remains on the island Desterro, has gone up the Paraguay to Cuyaba, whence, in July last, he was about to start on an exploration of the Xingu. Several of the smaller rivers of Brazil have been explored by Dr. P. de Fronten, F. Paranagua, and Steains. Useful work, too, has been done in the basin of the La Plata. An international commission, of which Dr. Seelstrang is a member, is engaged in a survey of the boundary between the Argentina and Brazil, whilst the Araguay-Guazu, supposed to be the

main stream of the Pilcomayo, has been surveyed by Captain F. W. Fernandez.

Still more interesting is the work carried on in the Andes of Patagonia. Captain R. Serrano, early in 1887, ascended the Rio Palena (which falls into the Corcovado Gulf) to long. 72° E., thus proving that the watershed is not found by the Andes, but lies to the east of them, on the Patagonian plateau. Similar results have been obtained by Colonel Fontana, who is at present exploring Eastern Patagonia with a view to its colonization. These unlooked-for discoveries are almost certain to lead to fresh boundary disputes. Further south still, Tierra del Fuego has been explored by Julius Poppen and Ramon Lista, who maintain that this country does not deserve its evil reputation, as it is quite fit for breeding sheep, besides abounding in gold.

In the Arctic regions very little has been done in the course of last year. Lieutenants Rydier and Block have brought to a close their survey of Western Greenland as far as lat. 70° 30' N.

Mr. McArthur, an old official of the Hudson's Bay Company, left Winnipeg on February 13, 1887, with a view of going north, by land, as far as King William Land, where he proposed to spend this winter, in order to resume his discoveries in 1888. His chances of success are however, small, and the same may be said of Colonel Gilder's somewhat wild scheme, who has once more set out for the North Pole.

The Antarctic regions, which have been so shamefully neglected for many years past, are at length attracting the attention of the Australian colonies, and it is understood that funds sufficient to fit out at least one expedition will be forthcoming, £5,000 being contributed by the Imperial Government.

In conclusion, it is our agreeable duty to be able to report that the University of Oxford has appointed Mr. Mackinder "Reader in Geography," and that Cambridge, aided by the funds of the Royal Geographical Society, is about to follow this laudable example.

Dramatic Summary, 1886-87.

WITH the exception of a large increase in the number of afternoon performances of pieces which call for little or no comment, the past year, so far as the theatrical world is concerned, was uneventful. The most notable feature perhaps was the performance of BYRON'S WERNER, given at the Lyceum for the benefit of Dr. Westland Marston, in which both Mr. Irving and Miss Terry scored successes. At the same theatre FAUST continued its successful career, and was only withdrawn towards the end of June to allow Mr. Irving to appear in short revivals of his favourite rôles before leaving London for his provincial and American tours. Miss Mary Anderson again appeared before an English audience at the Lyceum in September, in the dual parts of Hermione and Perdita in THE WINTER'S TALE. The visit of Mrs. James Brown Potter, another American lady, was not altogether a success. Among the plays produced during the year which were successful may be chronicled THE RED LAMP, by O. Tristram, first brought out at the Comedy and afterwards transferred to the Haymarket; DANDY DICK, at the Court; the BELLS of HASLEMERE, at the Adelphi; PLEASURE, at Drury Lane; HEART OF HEARTS, by H. A. Jones, at the Vaudeville; and THE POINTSMAN, at the Olympic. LADY CLANCARTY, by the late Tom Taylor, was revived at the St. James's Theatre, with Mr. and Mrs. Kendal in the principal parts. RUDDYGORE, afterwards re-christened RUDDIGORE, by W. S. Gilbert and Arthur Sullivan, was produced at the Savoy in January, but proved less successful than the previous works of its talented authors, and was withdrawn in November, and H.M.S. PINAFORE substituted.

Dec. 2, 1886.—MY BONNY BOY, by J. G. Warren, produced at a *matinée* at the Criterion.

Dec. 3.—A BRAVE COWARD given at an afternoon performance at the Strand.

Dec. 6.—THE BUTLER produced at Toole's Theatre. The leading parts played by Messrs. J. L. Toole, J. Billington, E. D. Ward, and Mesdames E. Thorne, Marie Linden, Violet Vanburgh, and Kate Phillips.]

Dec. 15.—BACHELORS' WIVES produced at an afternoon performance at the Strand.

Dec. 16.—THE CHURCHWARDEN produced by Mr. Terry at the Olympic.

Dec. 18.—THE COMING CLOWN brought out at the Royalty by Mr. Edouin and Miss Atherton.

Dec. 21.—STRAFFORD given by the Browning Society at an afternoon performance at the Strand Theatre.

Dec. 22.—THE NOBLE VAGABOND produced at the Princess's Theatre. The principal characters were played by Messrs. Charles Warner, Beauchamp, Cartwright, and G. Barrett; the Misses D. Dene, A. Hughes, and B. Titherage.

Dec. 23.—ALICE IN WONDERLAND performed by children, produced at an afternoon performance at the Prince of Wales's.

MONTE CRISTO brought out at the Gaiety, with Messrs. Fred. Leslie and E. J. Lonnien; Miss Nelly Farren, Miss Fay Templeton, and Miss Agnes Delaporte, in the principal parts.

ROBINSON CRUSOE, burlesque pantomime, produced at the Avenue.

Dec. 27.—A NIGHT OFF revived at the Opera Comique.

THE FORTY THIEVES, Christmas pantomime, put on at Drury Lane. The characters were taken by Messrs. H. Nicholls, H. Campbell, C. Lauri, R. Pateman, and P. Martinetti; Mesdames Blande, Gilchrist, Mario, E. Bruce, and M. Williams.

Jan. 17, 1887.—HARD HIT, a play by Mr. H. A. Jones, produced at the Haymarket. Principal characters were played by Messrs. Frank Archer, E. S. Willard, Beerbohm Tree, Arthur Dacre, Kemble, and Ben Greet; Miss M. Terry, Miss M. Burke, and Miss Lydia Cowell.

Jan. 18.—A farce from the French, by Brandon Thomas and Mde. Verney, entitled THE LODGERS, brought out at the Globe. The characters were played by Messrs. Charles Glenny, C. H. Hawtrey, W. S. Penley, and W. J. Hill; Miss F. Brough, and Miss Vane Featherstone.

Jan. 20.—MODERN WIVES, an adaptation by Ernest Warren, put on at the Royalty. The leading parts were played by Messrs. W.

Edouin, Lytton Southern, and M. Selton; Mesdames Alice Atherton, E. Bruton, Eva Wilson, and Marie Hudspeth.

Jan. 22.—Gilbert and Sullivan's *RUDDY GORE*, OR THE WITCH'S CURSE, produced at the Savoy. The caste included Messrs. George Grossmith, D. Lely, R. Barrington, R. Lewis, and R. Temple; Miss Leonora Braham, Miss Jessie Bond, and Miss R. Brandham.

Jan. 26.—Corder's opera *NORDISA* produced by Carl Rosa at the Court Theatre, Liverpool.

Jan. 27.—*DANDY DICK*, an original farce by A. W. Pinero, produced at the Court. The principal parts were enacted by Messrs. John Clayton, Arthur Cecil, E. Maurice, H. Eversfield, and W. H. Denny; Mrs. John Wood, Miss Norreys, Miss L. Linden, and Miss M. Lewis.

Jan. 31.—*PRINCE CARLO'S PLOT*, an adaptation of Ouida's "Afternoon," given at a private performance at the Novelty.

Feb. 1.—Mr. and Mrs. Kendal, by command of the Queen, appeared at Osborne House.

Feb. 2.—*AFTER LONG YEARS* produced at a *matinée* at the Criterion. The principal characters were played by Messrs. J. G. Grahame, Yorke Stephens, W. M. Brodie; Miss Vane Featherston, and Miss Marie de Grey.

Feb. 3.—*Matinée* at the Olympic on behalf of the Actors' Benevolent Fund.

Feb. 5.—Miss Kate Vaughan's company commenced their London season at the Opera Comique with *THE RIVALS*.

Feb. 7.—A variety drama by G. R. Sims and Clement Scott, entitled *JACK-IN-THE-BOX*, brought out at the Strand. The leading parts were played by Messrs. Beauchamp, Yorke Stephens, J. A. Arnold, Lewis Waller; Miss Fannie Leslie, Miss Amy McNeill, and Miss F. West.

MYNHEER JAN, comic opera, produced at Birmingham Grand Theatre, the principal parts being played by Messrs. Marius, Wyatt, and Paulton; Miss Kate Munroe, Miss Camille D'Arville, Miss V. Melnotte, and Miss Amadi. The opera was subsequently put on at the Comedy Theatre a week later.

Feb. 15.—*THE PROFESSOR'S WOOING*, a "comical pastoral," brought out at a *matinée* at the Royalty, with indifferent success.

Feb. 19.—*DIMITY'S DILEMMA*, by M. C. Salaman, put on at the Gaiety.

March 2.—An original play, *HER TRUSTEE*, by James Blood, produced at an afternoon performance at the Vaudeville. The principal characters were taken by Messrs. Fernandez, Beauchamp, Grahame, Glenny, and Wilkinson; Miss Helen Barry, Miss Fanny Brough, Miss Measor, and Miss V. Featherstone.

March 3.—*LADY CLANCARTY*, by the late Tom Taylor, revived at the St. James's Theatre. The caste included Mr. and Mrs. Kendal, Messrs. Macintosh, Webster, H. Bedford, Waring, and Cathcart; Mrs. Beerbohm Tree, Mrs. Gaston Murray, and Miss B. Huntley.

March 8.—The dramatic students gave a representation of Heywood's tragedy, *A WOMAN KILLED WITH KINDNESS*, at the Olympic.

March 10.—*THE MORMON*, by Mr. Calthorpe, given at an afternoon performance at the Vaudeville. The principal parts were taken by Messrs. Chas. Glenny, Fred. Thorne, F. Mellish; Mesdames Emily Thorne, Gilmore, and Lavis.

March 14.—*THE SNOWBALL* revived at the Globe.

March 19.—*RUDDY GEORGE; OR, ROBIN RED-BREAST*, a parody on Ruddy Gore, produced at Toole's Theatre.

March 24.—*THE GREAT FELICIDAD* produced at a *matinée* at the Gaiety. The caste included Messrs. F. H. Maclin, A. Dacre, B. Thomas, Stewart Dawson, Eric Lewis; Miss Amy Roselle, and Miss Cissy Grahame.

March 28.—*THE MORMON* put on at the Comedy.

March 29.—Wilkie Collins's play, *MAN AND WIFE*, revived at the Haymarket, with Mrs. Brown Potter as Anne Silvester; the other parts were acted by Messrs. E. S. Willard, H. Kemble, W. Herbert, Ben. Greet; C. Collette, and Miss Agnes Hewett.

March 30.—*FROU FROU* played at a *matinée* at the Olympic, by Miss Grace Hawthorne.

April 2.—*HELD BY THE ENEMY* produced at the Princess's. The principal parts played by Messrs. C. Warner, Overton, Calhsem, Yorke Stephens, W. Rignold; Miss Alma Murray, Miss Anne Hughes, and Mrs. Canninge.

April 9.—*A DARK NIGHT'S BRIDAL*, by R. Buchanan, produced at the Vaudeville.

IVY produced at the Royalty, with Mr. W. Edouin and Miss Atherton in the principal parts.

April 23.—*THE RED LAMP*, by Outram Tristram, brought out at the Comedy. The leading parts by Messrs. Beerbohm Tree, Brookfield, Sugden, Pateman, and Cantley; Lady Monckton, Miss M. Terry, and Miss E. Filippi.

April 22.—*CHRISTINA* produced at an afternoon performance at the Prince of Wales's Theatre.

April 25.—The Comic Opera *MADAME FAVART* revived at the Avenue.

MAY AND DECEMBER, by Sydney Grundy and J. Mackay, given at an afternoon performance at the Criterion Theatre.

TWICE MARRIED, a new comedy drama, produced at a *matinée* at the Gaiety Theatre.

April 28.—*A TRAGEDY*, a farcical comedy, by Charles S. Fawcett, performed at the Royalty.

April 29.—Afternoon performance of *THE ALDERMAN* at the Criterion Theatre.

May 4.—*TEA*, a farce by Maurice Noel, given at a *matinée* at the Criterion Theatre.

May 11.—*Matinées* of *VITTORIA CONTARINI* at the Princess's and *BLUE RIBBONS* at the Gaiety.

May 12.—Miss Clifford gave an afternoon performance of *ROMEO AND JULIET* at the Prince of Wales's, playing the title rôle herself.

May 14.—*JUBILATION*, a short musical piece, by Ivan Caryll, put on at the Prince of Wales's.

May 16.—Mr. Irving revived *THE MERCHANT OF VENICE* at the Lyceum.

Mrs. Bernard Beere produced *AS IN A LOOKING-GLASS* at the Opera Comique. The leading parts were acted by herself, Miss Eva Southern, Messrs. Standing, Marius, and Denison.

May 17.—Miss Rosa Kenny appeared in an afternoon performance of an adaptation of Ouida's *MORNS* at the Vaudeville.

May 24.—*PEACEFUL WAR* given at a *matinée* at the Prince of Wales's.

May 27.—*THE SKELETON* produced at an afternoon performance at the Vaudeville.

June 1.—Lord Byron's *WERNER* performed at the Lyceum Theatre for the benefit of Dr. Westland Marston. The caste included Mr. Irving, Miss E. Terry, Messrs. Alexander, Glenny, and Howe.

June 4.—*THE STEP-SISTER*, a one-act comedy by W. Sapte, Jun., put on at the Comedy.

June 7.—*THE AMBER HEART*, by A. C. Calmour, produced at an afternoon performance at the Lyceum. The leading characters were

played by Messrs. Beerbohm Tree, F. Tyars Willard, and H. Kemble; Mesdames E. Terry, Cissy Grahame, and Helen Forsyth.

June 14.—THE GOLDEN BAND produced by Miss Agnes Hewitt at the Olympic.

June 27.—CIVIL WAR, by Herman C. Merivale, produced at the Gaiety, with Mrs. Brown Potter, Miss Amy Roselle, and Messrs. Fernandez, A. Daeré, Kyle Bellew, Shine, and Maclean in the principal parts.

Afternoon performance of CONSTANCE FREE at the Vaudeville.

June 28.—MARION DE LORME, translated and adapted by Richard Davey, played at the Princess's, with Miss Houlston in the title rôle.

June 29.—OLIVIA revived at the Lyceum, with Mr. Irving and Miss E. Terry in the principal parts.

Afternoon performance of LONDON ASSURANCE, for the benefit of Miss Grace Huntley, who played the part of Lady Gay Spanker.

June 30.—DAWN produced at an afternoon performance at the Vaudeville.

July 4.—A WOMAN'S TRUTH, by W. Reynolds, produced at the Standard.

July 9.—THE DOCTOR, adapted by F. C. Burnand from the French, brought out at the Globe, principal characters played by Miss Enson, Mr. Penley, and W. J. Hill.

July 11.—OBED SNOW'S PHILANTHROPY given at an afternoon performance at the Prince of Wales's Theatre.

July 12.—DEVIL CARESFOOT brought out at a *matinée* at the Vaudeville.

July 13.—Mrs. Kennion gave an afternoon performance of NINA; OR THE STORY OF A HEART.

July 14.—THE SHADOWS OF A GREAT CITY brought out at the Princess's. The cast included Messrs. J. H. Barnes, H. Nicholls, H. Parker, and Bassett Rose; Mesdames Mary Rorke, Catherine Lewis, and Lizzie Fletcher.

July 16.—Farewell performance of Mr. Irving and Miss E. Terry at the Lyceum, prior to their leaving for the provinces *en route* for America.

July 18.—Madame Sarah Bernhardt commenced a series of French plays at the Lyceum.

July 19.—FREDA, by B. F. Bussy and W. T. Blackmore, given at a *matinée* at the Strand.

July 25.—THE COLONEL revived at the Comedy Theatre.

July 28.—THE BELLS OF HASLEMERE, by Henry Pettit and Sydney Grundy, produced at the Adelphi Theatre. The principal parts were played by Messrs. W. Terriss, J. D. Beveridge, C. Cartwright, H. Russell, and Sidney Hayes; Mesdames A. Millward, Annie Irish, H. Forsyth, and C. Jecks.

Aug. 1.—PASSION'S SLAVE, by J. A. Stevens, brought out at the Standard.

Aug. 6.—DEVIL CARESFOOT put on at the Strand.

Aug. 11.—THE QUACK played for one night at the Royalty.

Aug. 13.—LOYAL LOVE produced at the Gaiety. The principal characters were played by Mrs. Brown Potter, Mr. Kyle Bellew, and Mr. E. S. Willard.

OUR BOYS revived at the Criterion, with Mr. David James in his original character.

Aug. 27.—A SECRET FOX produced at the Opera Comique.

Aug. 29.—THE POINTSMAN brought out at the Olympic. The principal characters were acted by Messrs. Willard, Grahame, Burnett, Darby-

shire, Caffrey, and Gould; Misses M. Millet, A. Hewitt, and H. Ferrers.

Sept. 3.—PLEASURE, by P. Meritt and Augustus Harris, produced at Drury Lane. The leading parts were played by Messrs. E. Gardiner, H. Nicholls, E. Suss, P. Lyndal, and L. Rignold; Miss Alma Murray, and Miss F. Brough.

Sept. 5.—FUN ON THE BRISTOL revived by John F. Sheridan at the Gaiety Theatre.

Sept. 6.—THE BARRISTER produced at the Comedy. The principal characters played by Messrs. J. A. Dwinley, F. Mervin, W. Everard, and S. Caffrey; Miss S. Vaughan, Miss M. Hunt, and Miss H. Leyton.

Sept. 10.—Miss M. Anderson revived THE WINTER'S TALE at the Lyceum, doubling the parts of Hermione and Perdita.

Sept. 12.—THE BLUE BELLS OF SCOTLAND, by R. Buchanan, produced at the Novelty.

Sept. 15.—THE RED LAMP revived at the Haymarket. The BALLAD MONGER, produced, with Messrs. Beerbohm Tree, C. H. Brookfield, and Miss Marion Terry in the principal parts.

Sept. 19.—SOPHIA revived at the Vaudeville.

Sept. 21.—THE SULTAN OF MOCHA revived at the Strand. The cast included Miss Violet Cameron, Miss M. Shirley, Miss Florence Melville; Messrs. E. Birch, H. Bracey, Charles Danby, and C. H. Kenny.

Sept. 28.—FETTERED FREEDOM produced at an afternoon performance at the Vaudeville.

Oct. 6.—FASCINATION, by Harriet Jay and R. Buchanan, given at an afternoon performance at the Novelty Theatre.

Oct. 8.—MISS ESMERALDA produced at the Gaiety. Principal parts played by Mesdames M. Hood, Fannie Leslie, A. Blance, and E. Miller; Messrs. Lonnin, Thornton, and Stone.

Oct. 10.—'TWIXT KITH AND KIN produced at the Grand.

Oct. 17.—Terry's Theatre opened with MEDDLE AND MIDDLE AND THE CHURCHWARDEN.

AS IN A GLASS produced at the Opera Comique.

Oct. 22.—Miss Grace Hawthorne gave a *matinée* of THE STROLLER at the Princess's.

Oct. 24.—M. Mayer commenced a season of French plays at the Royalty.

Oct. 26.—THE OLD GUARD, music by R. Planquette, and written by H. B. Farnie, produced at the Avenue Theatre.

Nov. 1.—Afternoon performance of IN DANGER at the Vaudeville.

Nov. 2.—NITOCRIS given at a *matinée* at Drury Lane.

Nov. 3.—HEART OF HEARTS, by H. A. Jones, produced at an afternoon performance at the Vaudeville. The principal parts were played by Messrs. L. Boyne, G. Farquhar, F. Thorne, R. Carleton, and Thomas Thorne; Miss R. Leclercq, Miss S. Larkin, and Miss Kate Rorke.

Nov. 5.—THE ARABIAN NIGHTS, by Sydney Grundy, brought out at the Globe. The leading characters were played by Messrs. Hawtrey, Lestock, and Penley, and Miss Lottie Venne.

THE WITCH put on at the St. James's.

Nov. 12.—H.M.S. PINAFORE revived at the Savoy.

Nov. 15.—The Dramatic Students gave an afternoon performance at Terry's Theatre of Dr. Westland Marston's comedy THE FAVOURITE OF FORTUNE.

Nov. 19.—THE CIRCASSIAN produced at the Criterion. The principal parts by Messrs. D. James, Giddens, Blakeley, and S. Brough; Miss A. Hughes, Miss F. Paget, and Mrs. E. Phelps.

ROWING.—The amateur rowing of the past year has, with one or two brilliant exceptions, not been productive of any very noticeable performances or remarkable races. The year 1887 will, however, long be remembered as the one in which Cambridge University oarsmen carried all before them at Henley, winning every single event at the premier regatta, and establishing several records over the new course. As soon as the two university eights commenced practice after the Christmas vacation, Oxford were established as favourites for the Inter-Varsity race, the Cantabs being very unsettled as regards their crew, with their best men apparently *hors de combat*. Subsequently, however, the light blue eight rapidly improved, and having secured the services of some of the best of their previous year's oarsmen, they started with good odds laid on their chance, and on March 26th won the race from Putney to Mortlake all the way and rather easily. No. 7 in the Oxford boat broke his oar short off at the rowlock at Barnes Bridge, but this did not in any way alter the actual result. Trinity Hall retained their position as head of the river at Cambridge in the June eights, the racing being for the first time reduced to four days. New College occupied a similar position at Oxford in the May races, displacing the Magdalen eight. Henley Regatta was again held over the new course, finishing at Poplar Point, the racing occupying three days as in 1886, and producing some magnificent finishes. The Prince and Princess of Wales were present on the concluding day of the meeting. The weather all through the regatta week was simply perfection, and the attendances larger than ever. The Cambridge University boat clubs were represented in every race, and achieved the unprecedented success of winning every event on the programme. The Trinity Hall men won no less than five challenge cups; viz., the Grand, the Ladies', the Thames, the Stewards', and the Visitors'. Pembroke College won the Wyfold, Third Trinity the Goblets, and Gardner of Emanuel the Diamonds. Guy Nickalls, of Magdalen College, Oxford, who had won the O.U.B.C. sculls but was defeated in the final heat of the Diamonds at Henley by Gardner, turned the tables on the Cantab in the annual contest for the Wingfield Sculls or Amateur Championship of the Thames, on July 13, from Putney to Mortlake, after a splendid neck-and-neck struggle to Hammersmith Bridge. The minor regattas of the season were chiefly noticeable for the uniform success of the Thames Rowing Club over their old rivals the London R.C., in all the senior races, for which the competition was very limited, Kingston and Twickenham being rarely represented, and the university crews invariably retiring after Henley. The victory of the Thames R.C. first eight over Twickenham at Moulsey Regatta on July 16, the stroke of the winners breaking his oar-blade short off directly after the start, was a most conclusive proof of the immense superiority of the Thames over the other Metropolitan clubs. In junior events the London R.C. scored a number of victories, but in these also the competition was very weak owing to so many of the smaller clubs having ceased to exist. The Metropolitan Regatta, at one time next in importance after Henley, virtually lapsed in 1887, although the four challenge cups were offered

for competition on different days in July and September. Here also the racing was very indifferent, except for the London Cup (scullers), won by W. H. Cumming of the Anglian B.C., after an exciting contest with two Thames and one London oarsman. On October 2nd, Rumbure of Valenciennes won the thirty-fifth contest for the Amateur Sculling Championship of France on the Seine. No English sculler competed.

Professional rowing in England has been at almost a complete dead-lock during 1887, in marked contrast to the stirring times on the Thames in 1886. Only one professional sculling match took place on that river during the whole season, and that was between two fourth-rate men for a small stake; but on the Tyne, Feb. 7th, G. Bubeat of Hammersmith defeated G. Perkins of Putney, for the Championship of England Challenge Cup and £400. After this Bubeat went to America, where he took part in several matches during the summer with tolerable success. Perkins after his defeat sailed for Australia. The ex-champion of the world, Edward Hanlan, in America sculled two matches with J. Gaudaur for the Championship of the United States, losing the first and winning the second. J. Teemer then challenged Hanlan for the title, and beat him easily on Toronto Bay, August 13th. On October 28th, Teemer and Gaudaur met on Lake Maranacook, when Teemer won easily. Directly after his defeat by Teemer, Hanlan sailed for Australia, where he for the third time sculled W. Beach for the Championship of the World, on the Nepean river, New South Wales, on Nov. 26, Beach once more winning.

LAWN-TENNIS.—Although the game of lawn-tennis was quite as popular during 1887 as in any previous year, the enforced retirement of W. Renshaw, the champion, owing to an accident to his right arm, robbed the Wimbledon Championships and several other events of their chief interest. In his absence H. F. Lawford and E. Renshaw once again proved themselves second only to the champion as our best exponents of the game. Lawford at last achieved the highest honours of the year by winning the championship, defeating in the final tie E. Renshaw (1-6, 6-3, 3-6, 6-4, 6-4), in the presence of an immense crowd of spectators. Earlier in the year, Lawford was rather easily beaten when defending his Irish Championship in Dublin, by E. Renshaw, on May 28th (7-5, 6-2, 9-7). These were Lawford's only two appearances during the season. In the absence of the brothers Renshaw the holders, the Double Championship was won by P. B. Lyon and H. W. Wilberforce. E. L. Williams lost the Covered Court Championship to F. W. Lewis in April, and subsequently the winner had a most successful career, taking the London Championship, the Kent (Blackheath) Open Singles, the Middlesex Championship, the South of England Championship, and the Bourne-mouth Challenge Cup. H. Grove won the Exmouth Challenge Cup, the West of England, the Northern, and the Scottish Championships. The Cheltenham one hundred guinea Challenge Cup went permanently into the possession of the holder, E. De S. H. Browne, who also won the Welsh Championship. J. R. Deykin won the Midland Counties Challenge Cup. The Scottish Doubles Championship, and the Northumberland County Challenge Cup both fell

to P. B. Lyon, his brother, H. B. Lyon, being his partner in the former event. Miss Maud Watson, the champion of 1886, and Mrs. Hillyard (*nie* Bingley), were both compelled to yield place to Miss L. Dod, who during the year carried off the championship as well as the Irish, Northern, and West of England Ladies' Championships, and also the Doubles Championship with Miss May Langrishe. Altogether Miss L. Dod won ten first and one second prize, a wonderful record. Mrs. Hillyard won the London Championship and the Exmouth Challenge Cup. The Welsh Ladies' Championship fell to Miss Maud Watson. The other most noteworthy lady players were Miss Brucewell, Miss D. Patterson, and Miss Butler, the last mentioned taking the Scottish and Northumberland Championships. In America the game is rapidly increasing the number of its votaries, and for the seventh successive season, R. D. Sears won the United States' Championship, and with J. Dwight took the Doubles Championship for the fifth year. In India, Australia, and Ceylon, lawn-tennis tournaments are extremely popular.

ATHLETICS AND PEDESTRIANISM.—The amateur athletic records of the year give one or two remarkable performances at short distances, but in the longer races the standards of former seasons have not been altered, and no successor has as yet been found for the ex-champion amateur W. G. George, now a professional. Athletic meetings were more numerous than ever, nearly every small village and town in the Kingdom holding athletic sports in connection with the Queen's Jubilee on June 21st or 22nd. Notwithstanding the undoubted popularity of athletics and running, and the vigilance and capacity of the various Amateur Athletic Associations ruling and controlling the sport, it cannot be said that there is any improvement in the morality or tone of the pastime; indeed, roping, and shady practices of all sorts, were never more prevalent than during 1887, and unless vigorous steps are taken to punish the offenders the future of amateur running is not very hopeful. The definition of an amateur is perhaps too broad and comprehensive. Between the amateur pure and simple who competes simply for his amusement, and the professional who makes his living at the game, there must always be a large and ever-increasing body of athletes who cannot afford to race for amusement alone, and therefore in some way are compelled to make it pay without being at all scrupulous as to the means employed. This last-mentioned class should not be allowed to rank as they do now with the *bona fide* amateurs. In the early spring the Oxford and Cambridge athletic meetings which preceded the Inter-Varsity sports produced several fast performances well worthy of notice. At Cambridge, J. C. Waters, the President of the C.U.A.C., ran through in a one-mile handicap from scratch in 4 min. 24½ secs., and also did 2 min. 20 secs. in 1,000 yards handicap. Another Cantab, H. M. Fletcher, ran 300 yards in 32½ secs.; 200 yards in 20½ secs., and a quarter-mile in 50½ secs. F. G. Tuck, also a Cantab, cleared 21 ft. 9 in. in the long jump. At Oxford, F. J. K. Cross, now president O.U.A.C., ran half a mile in 1 min. 57 secs., then the best time ever done by an Englishman, and second only to L. E. Myers' A.A.A. amateur record in England of 1 min. 56 secs. H. W. Savigny, an Oxonian, at th.

O.U.A.C. sports, cleared over 21 feet in less than four times in the broad jump. The Inter-Varsity sports as usual were decided at Lillie Bridge (probably for the last time, as the new Queen's Grounds, West Brompton, will in future be the scene of all Inter-Varsity competitions in the Metropolis), Cambridge winning six out of the nine competitions. Owing to a hurricane of wind and rain the times were not up to the average, but Cross won the one-mile for Oxford in the absence of J. C. Waters—the Cantab *hors de combat*—in 4 min. 25½ secs., a record for these sports, and fully equal to 4 min. 20 secs. on a favourable day. In February and March the various Cross Country Championships were decided. The Finchley Harriers won the Southern Counties' at Sandown Park, February 26th (W. H. Coad, S.L. Harriers, first man home). The Salford Harriers won the Northern Counties' at Manchester on the same day, and the Burton Harriers the Midland Championship on March 12th, at Burton-on-Trent, by one point from the Birchfield H. The National Cross Country Championship, March 5th, at Birmingham (Four Oaks), was won by the holders, the Birchfield Harriers, Birmingham, J. E. Hickman of Coventry finishing first. The Amateur Championships were held at Stourbridge, near Birmingham, on July 2nd. The cinder track was new and loose, and only a very small number of spectators were present. A. Wharton, a black, retained the one hundred yards championship, beating C. G. Wood, Blackheath Harriers, in 10½ secs. Wood won the quarter mile in 51 secs. F. J. K. Cross, the Oxonian, won the half-mile in 1 min. 59 secs., and the one-mile in 4 min. 25½ secs. E. C. Carter, of the New York Athletic Club, and formerly of Bristol, England, won the four miles in 21 min. 10 secs., and the ten miles in 55 min. 9 secs. C. W. V. Clarke of Reading won the seven miles walking in 56 min. 59½ secs., after a very close race all the way with C. D. Lange, an Oxonian. W. B. Page, of the Manhattan A.C., New York, tied with the holder, G. W. Rowdon of Teignmouth, at 6 feet for the high jump. F. B. Roberts, an old Cantab, won the broad jump with 22 ft. 4 in.; and Tom Ray of Ulverston the pole jump with 11 ft. J. S. Mitchell of Limerick won putting the 16 lbs. weight with 39 ft. 1½ in., and also throwing the 16 lbs. hammer with 124 ft. ¼ in., a best on record, from a 9 ft. circle, now used for the first time. J. Le Fleming, C.U.A.C., won the 120 yards Hurdles Championship in 16½ secs. But for the bad state of the path all the times would undoubtedly have been much faster. During the year C. G. Wood, Blackheath Harriers, made the following records at Stamford Bridge Grounds:—150 yards in 15 secs., and subsequently in 14½ secs.; 220 yards in 21½ secs., and then 21½ secs.; 250 yards in 25½ secs., and 300 yards in 31½ secs. E. H. Pelling, of the Civil Service, ran 200 yards at Stamford Bridge in 20½ secs., and at the same venue A. G. Le Maître, the Oxonian, made a record for 600 yards of 1 min. 14 secs. W. B. Page, the American, cleared over 6 ft. high jumping, at some half-dozen meetings during the summer, and on August 15th, at Stourbridge, C.C. sports, accomplished a record in this class of athletics with 6 ft. 3½ in., exactly 8½ inches above his own height. This, however, he subsequently improved upon on his return to America, as at Philadelphia, Oct. 7th, he cleared 6 ft. 4 in., the greatest height ever.

jumped by either amateur or professional, and a marvellous performance. Both these jumps were fairly accomplished and thoroughly authenticated. E. C. Carter defeated W. H. Coad in a four-mile match at Stamford Bridge, in 20 min. 25½ secs.; on August 9th, but was himself defeated in a similar match in Dublin by T. Conneff, an Irishman, in 19 min. 49½ secs. Conneff also beat Carter in a two-mile race at Manchester, in 9 min. 44½ secs. During the year C. W. V. Clarke of Reading was credited with the following walking records:—3 miles, 21 min. 25½ secs.; 8 miles, 63 min. 41 secs.; 9 miles, 71 min. 44 secs.; and 10 miles, 79 min. 50 secs. His style of walking, however, was always open to question. T. Ray established a record pole-jump, clearing 11 ft. 6½ in. at Whitehaven, August 10th. On February 4th, at Newmarket, Mr. C. W. L. Bulpett, an old Rugby and Oxonian, undertook for a wager to run a mile, walk a mile, and ride a mile on horseback under 18 min. He accomplished the task in 16 min. 57½ secs. A party of English amateurs, C. G. Wood, C. W. V. Clarke, and T. Ray, visited America in the autumn, but Wood sprained his foot on his arrival. He could not take part in the American and Canadian amateur championships. Ray won the pole-jump at both these meetings, but Clarke was disqualified for running in most of the events for which he started. There were very few professional pedestrian races of any importance decided in England in 1887. H. Gent, of Darlington, won two Sheffield sprint handicaps in succession, and then challenged H. Hutchens, of Putney, to run a match for the sprint championship, the distance to be 120 yards, and the stakes £200. The match was fixed for September 19th at Lillie Bridge Grounds, West Brompton. The race attracted an immense crowd of some 5,000 spectators. At the last moment Hutchens became a very hot favourite, although known to be out of form, and the supporters of Gent (whose trial proved to him to be a marvel of speed) fearing some questionable proceedings, invaded the dressing-room and stopped both men from running. The two pedestrians secretly left the ground, and the crowd finding there would be no race and no gate-money returned, commenced a disgraceful riot, and burnt down nearly the whole of the stands before a strong body of police cleared the enclosure. This will probably prove a death-blow to all professional pedestrians in the Metropolis. Gent and Hutchens eventually ran off the match at Gateshead, on October 31st, when Gent won rather easily in 11½ secs. Hutchens, L. E. Myers, and W. G. George were in Australia in the spring, and ran several races, but the trip could not have proved a very profitable speculation. Hutchens defeated T. Malone, running 250 yards in 25½ secs., in the second of a series of matches; but the English champion was twice defeated by a black named Samuels, over sprint courses and in slow times. George and Myers also ran a series of matches at three distances short of a mile, the latter winning all, George being quite out of form. In November, at Oxford, F. J. K. Cross ran 600 yards in 1 min. 12½ secs. (record), and half a mile in 1 min. 56½ secs.

CRICKET.—Although an Australian team did not visit England during the past year, the extraordinary long period of uninterrupted fine weather and the keen contest for the county championship caused the cricketing season of

1887 to be exceptionally good and successful. A natural and legitimate outcome of the fine weather was the high scoring. It is many years since batsmen have had such a favourable summer, and although perhaps to this cause must be attributed the large number of drawn games, it is very difficult to devise means to prevent these unsatisfactory conclusions to some of the most important matches of the season. Still, if greater punctuality were observed in starting a match, less time cut to waste between the innings, some extension of the rule of deciding on the first innings from one-day matches to all matches that are not played out, or some plan formulated to enable a captain to forego a portion of an inning if he thought he could win a match, the present evil of drawn games might be considerably reduced. In first-class cricket the performances of the leading batsmen, amateurs and professionals, give a majority to the former in the matter of heavy run-getting. In 1886, two gentlemen and seven players each made over 1,000 runs. Last season, although only seven cricketers gained that distinction, four were amateurs and only three professionals. Messrs. W. G. Grace and W. W. Read, who each reached the 1,000 in 1886, are now joined by Messrs. A. J. Webbe and R. J. Key; whilst Shrewsbury, Hall, and Ulyett have once more gained that honour, Bates only missed his 1,000 by 4 runs, but Maurice Read, Abel, and G. Hearne have not been so successful. Amongst the amateur batsmen, Mr. W. G. Grace, after twenty-three years' hard work, not only heads the averages, but he alone of those players who have taken part in the great contests of the year, has made over 2,000 runs. This is an achievement which no other cricketer has ever obtained, and it is eleven years ago since Mr. Grace made that number of runs in one season. Altogether he obtained 2,062 runs in 46 innings, an average of 54·10. Six times during the season he made over 100. His highest innings was 183 not out. Playing for Gloucester v. Kent in August, he made 101 and 103 not out, a brace of centuries by one player in a match having only twice before been recorded, once by himself in 1868, and once by W. Lambert in 1817. Mr. A. J. Webbe takes second place with an average of 47·22, from a total of 31 innings and 1,244 runs. Mr. Walter Read stands third, with an average of 47·17 from an aggregate of 1,684 runs in 36 innings. The Oxonian, R. J. Key, who is fourth, has made a remarkable advance. His average is 43·7, with a total of 44 innings and 1,618 runs, including the highest score of the year, viz., 281 for Oxford University v. Middlesex. The other noticeable averages are W. E. Roller 40·10, W. C. Bridgeman 34·7, J. Thomas 34·10. The amateur bowling of the past season did not show any improvement; indeed, in 1886 there were four averages lower than last year, W. G. Grace, with 1,273·2 overs 97 wickets, average 21·41, did twice as much bowling as any other amateur. The following are the leading averages of the year:—E. Peake, 157·1 overs, 293 runs, 17 wickets, average 17·4; E. A. Napan, 476·2 overs, 1,091 runs, 60 wickets, average 18·11; J. Robertson, 579·3 overs, 924 runs, 46 wickets, average 20·4; C. A. Smith, 542·3 overs, 849 runs, 42 wickets, average 20·9; E. H. Buckland, 400 overs, 597 runs, 20 wickets, average 20·17; F. G. J. Ford and H. W. Forster each took over 30 wickets, with an average of 22·18 and 27·1 re-

spectively. Amongst the professionals, for the third year in succession Arthur Shrewsbury heads the batting list. His average is over 20 runs, better than any other cricketer, and is more than twice as much as that of any other professional. He completely distanced all his former season's brilliant performances with 23 innings, 1,653 runs (best score 267), and the phenomenal average of 78'15. 2 Eight times during the season he played an innings of over a hundred, and only once in the last six seasons has he omitted to score an innings of over 200. Mr. W. G. Grace's 78 in 1871 is the only approach to Shrewsbury's 1887 season's average. The two Yorkshire professionals, Hall and Ulyett, come next; Hall with 36 innings, 1,240 runs, average 38'24, times not out 4; Ulyett 41 innings, 1,487 runs, average 38'5. The other noticeable averages are Robinson, 21 innings, 604 runs, average 35'9; Gunn, 30 innings, 958 runs, average 35'13; Barnes, 30 innings, 957 runs, average 33; Quaife, 30 innings, 926 runs, average 31'27; F. Sugg, 15 innings, 417 runs, average 29'11; Barnes, Lohmann (843 runs), Briggs (819 runs), and Peel (835 runs), who did a great deal of bowling, deserve especial praise for their batting. George Hearne, who through an injury was kept out of cricket after the middle of July, came out well with 31 innings, 714 runs, average 25'14. Amongst the professional bowling averages, the name of the once-prominent Edmund Peate does not appear. Lohmann, the Surreyite, decidedly carries off the honours of the season with 1,634'2 overs, 154 wickets, average 15'94; and considering how much harder the wickets have been, his performance is worthy of all praise. Briggs, with 1,592'1 overs, has taken 114 wickets for an average of 17'80. Watson, 1,532'2 overs, took 100 wickets, average 14'82; and Wootton, from 1,373'1 overs captured 100 wickets for an average of 18'92. Jones actually heads the list with 233 overs, 24 wickets, average 11'18; and Richardson, the new Notts' recruit, comes second with 570'2 overs, 45 wickets, average 13'28. Atwell's is also a good performance, and ranks third, 1,330'1 overs, 89 wickets, average 13'81. Barnes, who so largely contributed to the victories of the Players over the Gentlemen, from 1,103'3 overs took 90 wickets, average 19'2. Barlow and Emmett did not maintain their average of 1886, and the names of Alfred Shaw and Walter Wright do not appear in the list. Rawlin and Pougher both appear to be rapidly coming to the front.

A. Shaw's English team of cricketers returned from Australia early in May. Financially, the trip was not a success; indeed, the interest in cricket seems on the wane in Australia. But from a cricket standpoint, the result was eminently satisfactory. The Englishmen played 29 matches, and only lost two, both against New South Wales. Of the others, twelve were won and no less than 15 were drawn, but in almost every instance, had time permitted, the latter would have been won by Shaw's eleven. Shrewsbury and J. Briggs chiefly distinguished themselves in batting and bowling respectively. Up to almost the very end of the season it was impossible to place the nine first-class counties in order of merit, and possibly never before has so much interest been taken in the struggle for the position of champion county. Indeed, when on the first three days of August Surrey met Notts at the Oval, both

having at that time only suffered one defeat, the attendances were the largest ever recorded in the history of cricket, nearly 55,000 spectators being present during the match. Finally the order was as follows:—1st, Surrey, 12 wins, 2 lost; 2nd, Lancashire, 10 wins, 3 lost; 3rd, Notts, 3 wins, 3 lost; 4th, Middlesex, 4 wins, 2 lost; 5th, Yorkshire, 6 wins, 3 lost; 6th, Sussex, 2 wins, 8 lost; 7th, Kent, 1 win, 8 lost; 8th, Gloucestershire, 1 win, 9 lost; 9th Derbyshire 0 wins, 6 lost. The latter county after such a disastrous season will probably be relegated to the second class. Surrey thoroughly deserved the championship, as from accidents, illness, and hard work both their batting and bowling strength was considerably weakened towards the end of the season. Lancashire came suddenly to the front, at the finish defeating both Surrey and Notts within a week. Mr. A. J. Webbe was the mainstay of the Middlesex team, and at Canterbury and Huddersfield carried his bat through the innings for 192 and 243 respectively. Yorkshire got into splendid form about July, and remained so to the finish of the season. Kent and Gloucestershire were singularly unfortunate, the former's earlier fixtures being spoilt by the absence of its best amateurs. The highest total of the season was 596 by Notts v. Middlesex, and the lowest 42 by Derbyshire v. Surrey. In seven instances a county obtained more than 500 runs. July 14th to August 27th a team of Canadians played 18 matches, chiefly against amateurs, winning 4 and losing 5 matches. The Players won both their matches against the Gentlemen in one innings, and England beat the M.C.C. & Ground (Centenary Festival) by an innings and 117 runs.

BILLIARDS.—Compared with the busy and important seasons of 1885 and 1886, that of 1887 has been rather tame and uneventful. John Roberts, Jnr., remained as before *facile princeps* at all-round billiards, and again and again proved his ability to concede 4,000 in 12,000 spot-barred to any other player, W. Cook included, although he perhaps wisely refused to meet W. J. Peall on an ordinary table with the spot-stroke allowed. Chiefly owing to this firm stand on the part of the champion, the spot-barred game has almost superseded in public exhibitions so-called English billiards with the spot-stroke allowed, and it must be admitted that the change has proved beneficial in rendering the play more scientific and interesting. It is rather difficult to determine who is the best all-round professional after Roberts, as there is very little to choose between Peall, North, Mitchell, and Cook, although the latter very rarely last season played up to his proper form, owing to ill health. It is to be regretted that the Billiard Association did not carry out one of their proposed schemes and promote a second-class championship, with John Roberts barred. The Association, however, owing to the jealousies of the professionals, and the numerous conflicting trade interests at work, was considerably hampered, and indeed paralyzed in all its efforts to introduce any novelties or innovations. The Billiard Hall, Argyle Street, London, and the Westminster Aquarium, continue to be the favourite localities for the more important exhibitions and matches, but at the Albert Palace, Battersea, and at Olympia, West Kensington, several tournaments were decided.

There were fewer tournaments than usual

during last season, weekly exhibition games between the best players proving more attractive. W. Mitchell (scratch) in January won a 2,500 up "all-in" handicap tournament at the Albert Palace; and at the end of the same month, also at the Albert Palace, J. Bennett (25 points) won the Billiard Association's 500 up spot-barred tournament, which proved a financial failure. In March, D. Richards (200 points) won a 1,800 up spot-barred handicap of four at the Westminster Aquarium. From April 4th to 16th a £300 spot-barred handicap tournament, with twelve players engaged, John Roberts, Jr., at scratch, was decided at the Billiard Hall, heats 500 up. J. Lloyd (240 points) won with nine victories and two defeats. On April 27th, J. Dowland (106 points) won a spot-barred tournament at Olympia, eight players, heats 500 up. A big Jubilee spot-barred tournament, with £100 in prizes and 64 entries for markers and amateurs, concluded April 30th at the Aquarium. H. McNeill, of Glasgow, playing under the name of "Harrington," won easily. McNeill, who is only twenty-two years old, is the best addition to the front rank of players since the advent of Peall and North. In December, 1886, J. North beat J. Roberts, Jr., by 116 when receiving 4,000 in 12,000 spot-barred. The match was said to be for £1,000. Subsequently the champion three times defeated North at the Hall when conceding the same odds in exhibition matches; and under similar conditions Roberts also defeated Peall, Mitchell, and Cook on several occasions. The champion tried several novelties at his weekly exhibitions during the season. On January 10th he was beaten by J. Dowland by 617, Dowland receiving 1,000 in 12,000, and playing spot-in against Roberts's spot-barred. Roberts also beat both D. Richards and W. Mitchell, the champion only using five pockets to his opponents' six, each game being spot-barred. Roberts made a break of 288 under these conditions, and subsequently conceded Peall and North 2,000 in 10,000 on a so-called championship table (3-inch pockets) spot allowed. Peall won his match by 431, making the extraordinary break for a small-pocket table of 445 (128 spots). Roberts won the match against North under these conditions by 1,526, and established a record of consecutive nursery cannons, viz., 85. It is generally believed that in these two matches the table in some way must have been made to favour the players, as hitherto 165 had been the best break on a championship-table. Afterwards, May 21st, Roberts beat Peall by 119 on a similar table, at the same points. Probably the only genuine money-match of 1887 was between Peall and Mitchell, 15,000 up even, "all-in," for £1,000 a-side, at the Billiard Hall, in the Derby week, May 23 to 28, when, after a close and interesting game, Peall won by 762 points. Best breaks, Peall 984 (324 spots), record in a money-match, Mitchell 836 (277 spots). In February, F. White, playing G. Collins at the Aquarium, 12,000 up "all-in," scored a record of 105 consecutive screw-back spot-strokes. On October 18th, at the Aquarium, W. Cook made a spot-barred break of 462, which has never been beaten except by the champion. During the year John Roberts, playing spot-barred, has made breaks of 552 and 580; but his own record of 604 has not been equalled. With the spot-stroke allowed, W. J. Peall has made several breaks of over 1,000, and still holds the record break of 2,413 under these conditions.

YACHTING.—In common with other branches of sport yacht-racing in 1887 was made memorable by special events organized to commemorate the Jubilee of Queen Victoria's reign. Foremost amongst them was the Royal Thames Yacht Club race round the United Kingdom for a prize of 1,000 guineas, and which was won by the *Genesta*. The Royal Yacht Squadron gave £800 for a channel match, and the Royal Victoria and Royal London Yacht Clubs also offered exceptionally rich prizes for competition. Amongst other prominent features of the year was a reform of the long-standing rule of measurement, for a system penalizing load-water length and sail area alone, and which bids fair to produce a better type of vessel than the deep narrow craft which were the outcome of the exploded length-and-breadth formula. The A class may be said to have collapsed in the course of the season; and the year will also be remembered for the advent of the *Thistle* and the ocean match across the Atlantic won by the *Coronet*. There was but little alteration in the usual fixtures, but the International Regatta at Ostend was missed from the list, and the Royal Mersey Club would have fallen through had not a match been got up for the *Thistle* and *Irex*. It was an exceptionally fine summer, with light winds prevailing, although the valedictory races in Torbay were sailed in tempestuous weather. Racing commenced on the 28th of May with the Channel match of the New Thames Yacht Club from Southend to Harwich; and on that occasion the *Thistle* made her *début* and scored a remarkable light-weather victory. She sailed six other races before leaving the English Channel, and then one on the Mersey and seven on the Clyde, and won eleven first prizes and two second prizes, value £646, out of fifteen starts. The *Thistle* was built by a syndicate of Scotch yachtsmen for the express purpose of winning back the America Cup, but how she failed in her object is now a matter of history. To the *Foxhound* belongs the honour of standing at the head of the roll of winning yachts, her record being 18 first prizes and nine others out of 41 starts, the gross value of her winnings being £960. She is owned by Mr. C. E. Nottage, and was admirably sailed by L. Cranfield. At the early part of the season the *Foxhound* was in yawl rig, but after sailing about ten matches she was converted into a cutter. The *Irex* won by far the largest amount in prizes, her spoils in the season being 17 first prizes and six seconds out of 34 starts, the gross value of her winnings being £1,789. She sailed twenty matches with A class sail spread, and after the Irish regattas was cut down to come under B classification. The *Irex* is owned by Mr. J. Jameson, and was sailed by W. O'Neill. The *Genesta* won the prize in the Jubilee race round the British Isles, and with 12 other prizes amassed the substantial sum of £1,355, her record being four first and nine second prizes. She is owned by Sir R. Sutton, and was sailed by John Carter. The *Neptune* was raced as hard as any vessel in the fleet, and, although she was unlucky in carrying away spars, she won 15 first prizes and nine others, value £1,109. Her owner is Mr. W. G. D. Goff, and R. Gomes of Gosport was sailing-master. The *Sybil*, a new cutter of the cruising type, got a good average of prizes, winning no fewer than nine firsts and 11 seconds in 34 starts, the value being

£334. She is owned by Mr. C. J. Still, and was sailed by S. Randall. The remaining winners were:—*Wendur* (Mr. H. R. Laing), eight prizes, value £340; *Vol-au-Vent* (Mr. I. Clark), seven prizes, value £290; *Erycina* (Mr. A. Penn), five prizes, value £245; *Queen Mab* (Mr. West), 15 prizes, value £212; *Melissa* (Mr. M'Gildowney), 15 prizes, value £200; *Aemone* (Mr. M. Liddell), one prize, value £200; *Hyacinth* (Mr. T. D. Garth), six prizes, value £150; *Vanduaara* (Mr. T. Clark), four prizes, value £145; *Nixie* (Mr. H. Crawford), three prizes, value £135; *Wraith* (Mr. J. H. Gubbins), seven prizes, value £168; *Doris* (Mr. B. Allan), 16 prizes, value £124; *Dauntless* (Mr. H. L. Popham), one prize, value £100; *Constance* (Mr. Prescott Westcar), five prizes, value £105; *Moina* (Capt. Bainbridge, R.N.), one prize, value £105; *Forgoice* (Mr. W. B. Paget), three prizes, value £77; *Coryphe* (Mr. R. Scott), three prizes, value £65; *Slouthound* (Lord F. Cecil), three prizes, value £55; *Nadejda* (Mr. A. L. Ochs), five prizes, value £50; *Daphne* (Lieut.-Col. Bagot), two prizes, value £20.

INTERNATIONAL YACHT-RACING.—It may be said that international yacht-racing dates from the year of the Great Exhibition, when the famous schooner *America* visited this country. She was designed by Mr. George Steers for Mr. John C. Stevens, who at that time was commodore of the New York Yacht Club, and she set sail from New York on the 22nd of June, 1851, for Havre, where she received her racing outfit. It was on the morning of a fine day at the end of July, 1851, that the *America* was made out from Ryde Pier, beating in the east end of the Isle of Wight, and it was not long ere her weatherly qualities were put to test. The *Lavrock* cutter, which was out cruising, sighted the stranger, and at once trimmed her sails for a trial of speed. The Yankee accepted the challenge, and raced away so astoundingly fast that she was at once voted a very Flying Dutchman. As the *America* came across the western ocean with the avowed object of throwing down the gauntlet to all British yachts, it was thought by many rather questionable policy in showing her form as she did with the *Lavrock*; still the *Lavrock* was not a representative vessel, but the *America* had given her such a hollow beating that a fair scare set in, and Commodore Stevens did not find match-making an easy matter. The Royal Yacht Squadron, however, offered a cup, value 100 guineas, to be sailed for from Cowes round the Isle of Wight, by yachts of all nations, and the contest came off on the 22nd of August. It was not a satisfactory racing day, but the *America* raced away from her fourteen rivals and was leading the English clipper-cutters *Arrow* and *Alarm* by a short distance, when the latter got ashore at the back of the island and the *Arrow* went to her assistance. The *America* afterwards sailed a private race with the *Titania* schooner, and in a trial of twenty miles to windward and twenty miles to leeward won by about an hour. The *America* was afterwards sold to Lord de Blaquiere, and in the following year she was beaten by the *Arrow* and the *Moquito*. The *Arrow*, however, had been lengthened and made 18 tons larger, and no doubt improved in speed. It is not too much to say that the advent of the *America* brought about a revolution in yacht-designing in this country, the *Gloriana* schooner, built in 1852, being the first notable production on American

lines. Commodore Stevens died in 1856, but the cup he won in the *America* he left in trust to the New York Yacht Club as "an international challenge trophy for ever." The *America* was laid up after 1852, and was found so rotten a year or two later that she was virtually rebuilt by Pitcher of Northfleet, and subsequently she was bought by an American yachtsman, and at the present time is the property of General Butler. In 1852 the centre-board sloop *Sylvie* came across from America to Cowes. Her visit, however, attracted but little notice, and she was overmatched by such vessels as the *Arrow*, *Julia*, and *Alarm*. The *Gipsy*, a fine schooner, was the next arrival from America, but her racing pretensions were next to nil, and the first revival of international rivalry after the *America's* advent was consequent on the famous ocean race in the winter of 1866, when the *Henrietta*, *Fleetwing*, and *Vesta* made the passage between New York and the Needles in a little over fourteen days. The trio went back to the States without testing the speed of the reigning English cracks; but in 1868 the *Sappho* put in appearance at Cowes, and her owner at once issued a bold challenge. With such vessels as the *Aline*, *Cambria*, *Egeria*, *Pantomime*, *Condor*, and *Oimara* available British interests were well protected, and the *Sappho* got a hollow beating in a race round the Isle of Wight. The year 1870 was a memorable one in regard to international yachting, as the *Sappho* reappeared on the scene a very much altered vessel from what she was in 1868. A series of matches were arranged between her and the *Cambria*, but the latter was altogether outmatched, as in each trial the *Sappho* came out an easy winner. Mr. Ashbury was in no way, however, disheartened by these defeats, and offered to sail his vessel against Mr. James Gordon Bennett's *Dauntless* from the Old Head of Kinsale to Sandy Hook, and after a flood of correspondence, conditions were agreed upon for a contest for the America Cup, which had been nineteen years in the keeping of the New York Yacht Club. The *Cambria* won the Atlantic match by a trifle under two hours, but in the race for the Cup she was eighth in a fleet of twenty-five, the *Magic*, a centreboard schooner, owned by Mr. Lyster Wallack, being winner, and the old *America* finished in front of the *Cambria*. Nothing daunted, Mr. Ashbury determined to make another attempt to take the trophy out of American keeping, and Ratsey of Cowes was intrusted with the work of building a vessel for the task. The *Lionia* was the new challenger, and it is doubtful if she was a faster craft all round than the *Cambria*; however, she left England a beaten vessel, and in a series of races on the other side for the America Cup was defeated by the *Columbia*, a centreboard schooner, and the *Sappho*. It may be said that the conditions were not favourable to the challenger, as the Americans were free to choose their champion on the morning of each match. The *Lionia* won one race, but she made a poor show, as she was beaten by the *Dauntless* in a private match sailed after the Cup contests. The effort to bring the trophy back cost Mr. Ashbury about £22,000 on the second occasion, and five years passed ere another attempt was made, and this time the Canadian centreboard schooner *Countess of Dufferin* was the challenger; she was easily beaten by the *Madeline* schooner, and in 1881

another Canadian vessel, the *Atalanta*, a centre-board sloop, owned by the Bay of Quinte Yacht Club, challenged and was decisively defeated by the New York sloop *Mischief*. In the same year Mr. J. Coats of Paisley, sent across the 10-ton cutter *Madge* to try conclusions with the Americans, and her success went to prove that the English cutter was faster than the centre-board, and there is no doubt that her visit led to the Americans copying, in a modified way, many English ideas. When Sir Richard Sutton challenged with the *Genesta* in 1885, it was agreed that it would be imperative to build a sloop to protect the interests of the cup holders, and of two new sloops, the *Puritan* and the *Priscilla*, the former proved the faster in the trial races, and she was chosen to meet the challenger. The first race over the inside course was unsatisfactory, and ended in an easy win for the *Puritan*; but in the second attempt it was nothing but a freeing of the wind which gave the American representative victory, the *Genesta* coming in a trifle under two minutes after her. The next challenger was Lieut. Henn, but his vessel, the *Galatea*, had not succeeded in winning a first prize at home, and she was nothing like equal in speed to the *Irex* and *Marjorie*. The Americans, however, with praiseworthy caution built the *Musflower* to meet her, and the new boat proving better than the *Puritan*, the hollow defeat of the *Galatea* was not unexpected. The last effort made is fresh in memory, and like the *Livonia*, the *Thistle* was built expressly for the task. General Payne, who owned the *Musflower*, was patriotic enough to build again, and the *Volunteer* turned out a success. The *Thistle's* matches were not altogether satisfactory, but the second trial went to prove the efficacy of the centreboard in holding a yacht to windward; still it is questionable if the relative speed of the vessels was really arrived at in the two races sailed. The result was, however, that the *Volunteer* was an easy winner of both contests, and the cup remains in America.

FOOTBALL.—Although owing to an unusually long continuance of frost early in the year a large number of important matches were abandoned or postponed, the popularity of the game in all parts of the country showed no diminution, and the list of clubs, both Rugby Union and Association, was considerably increased. In the North and Midlands the various cup ties and chief matches attracted enormous "gates," and the leading clubs are financially in an exceedingly prosperous condition. The recognition of professionalism by the Association has not been followed by the Rugby Union authorities, indeed the latter body very wisely has laid down a hard and fast rule that professionalism is illegal, and will under no circumstances allow a player to receive any money consideration for his services over and above hotel and travelling expenses. Professionalism cannot be said to have improved the tone of association football, and the well-paid, carefully-trained professional country teams are gradually driving the University and public school elevens away from the cup ties and open competitions. In fact, with several prominent clubs Association football is a very important and profitable business, conducted on strictly commercial principles. The Rugby Union International matches resulted as follows:—On January 8th, at Llanelli, England could only manage an even

draw with Wales, and a month later, on February 5th, at Dublin, England for the first time was defeated by Ireland by 2 goals to nil. After this Scotland beat Ireland by 2 goals and 2 tries to nil, and also Wales by no less than 4 goals and 8 tries to nil. These results seemed to point to a very easy victory for Scotland over England, the match of the Rugby season. The two teams met at Manchester on March 5th in dull and foggy weather, when after a splendid game the verdict was a draw, 1 try each. Wales beat Ireland on March 12th by 1 goal and 1 try to 3 tries. Owing to certain disagreements as to an International board to control these matches and amend the laws of the game, it is doubtful whether England will play any international matches in 1888. South, for the fifth year in succession, beat the North at Blackheath, and Cambridge defeated Oxford by 3 tries to nothing. Amongst the metropolitan clubs Richmond was decidedly the best, not meeting with a single defeat; London Scottish stood next, and then Blackheath. The match between the great Northern Unions, Lancashire and Yorkshire, ended in a draw; and Wakefield Trinity carried off the Yorkshire Cup, Bradford being disqualified by the County Committee. Swansea won the South Wales Cup, but the cup will lapse in future. Sandhurst beat Woolwich in their annual match. The Prince of Wales again attended the Charity Football matches at the Oval on March 12th. In the Association International matches England defeated Wales 4 goals to nil, and Ireland 7 goals to nil, but lost against Scotland at Blackburn by 3 goals to 2. England has only beaten Scotland twice in sixteen years. Scotland beat Wales and Ireland, but Ireland for the first time managed to win from Wales by 4 goals to 1. Cambridge defeated Oxford, and Hibernians (Edinburgh) beat Dumbarton for the finale of the Scottish Association Cup. North won by 4 to 2 against the South, and the Players defeated the Gentlemen 3-2 at Stoke-on-Trent on a very bad ground. The annual competition for the Association Challenge Cup produced if anything more interest than usual. The final tie was left to Aston Villa and West Bromwich Albion, "the Villa" winning by 2 goals to nil. Preston North End, the crack professional team, were generally expected to win the trophy, but they were put out by West Bromwich Albion. No Southern club remained in after the sixth round. Preston North End played no less than 52 matches during the season, only losing 7. The Bolton Wanderers played 59 losing 13.

CYCLING.—The past season has decidedly added to the popularity of cycling in all its branches. Not only has racing on the path been well supported, but the number of machines employed for business purposes and pleasure trips has enormously increased, and even the War Office is seriously considering the formation of a cycling corps to assist cavalry in scouting and other military duties. The chief cycle manufacturing companies find it impossible to execute the innumerable orders for machines of the latest and best patterns, and such profitable speculations have these companies become that the shares of one at least have a quotation on the Stock Exchange. The National Cyclists' Union have been doing their best during the past year to purify and improve cycling as a racing sport, but owing to the numerous riders who allow themselves to be paid and employed

by the different makers, and yet claim to compete as amateurs, the Union has the greatest difficulty in detecting and suspending these professionals in disguise. The Union, however, has suspended a large number of these sham amateurs, and yet more stringent measures are promised in the present year. The Cyclist Touring Club has now a membership of 22,000, and has assisted largely in the spread of cycling as a healthy method of exercise and recreation. The results of the N. C. U. championships, both bicycle and tricycle, will be found elsewhere. The whole of the events were decided at Birmingham on different days between Whit Monday and the August bank holiday. The championships were virtually leased out by the N. C. U. to the Aston Lower Grounds proprietor, but the result was a profit to the Union of £237 *os.* 6*d.* The Oxford and Cambridge bicycle contest, June 11th, at 1, 4, and 15 miles, was won by Oxford by points, although Gatehouse (Cantab) won the two prime events. W. A. Illston of Birmingham was a long way in front of every other amateur bicyclist from 1 to 25 miles, until on September 17th at Lillie Bridge, F. J. Osmond beat him after a waiting race in a five miles scratch race. The victory of a Hollander, E. Kiderlen, in the one-mile tricycle championship, and also in an International two-miles tricycle race on June 25th, at Alexandra Park, beating Gatehouse and F. Moore, were noticeable events of the season. The following new path bicycle records were made during the season:—two miles, five min. 2½ secs.; five miles, 13 min. 55 secs.; 10 miles, 28 min. 4½ secs. by F. J. Osmond; 15 miles, 43 min. 59½ secs.; 20 miles, 58 min. 50½ secs.; and 25 miles, 73 min. 49½ secs. by P. Furnival; 30 miles, one hour 34 min. 18½ secs.; 35 miles, one hour 50 min. 37½ secs.; 40 miles, two hours, 7 min. 16½ secs.; 45 miles, two hours 24 min. one sec.; 50 miles, 2 hours, 40 min. 33½ secs. by C. Potter. On September 10th, at the Oval, P. Furnival beat the gross record for 10 miles by defeating Osmond and Ball in 32 min. 36½ secs. J. E. Fenlon late in the season won an International 10,000 metres race at Christiania. Some wonderful path records on the tricycle were also made during the year:—G. Gatehouse (Cambridge) rode one mile on a three wheel machine in the extraordinary time of two min. 41½ secs.; at Long Eaton, July 8th. A. L. Bower (Ripley Road Club), in September, on a tricycle, covered 25 miles in one hour 22 min. 24½ secs.; 50 miles, two hours 50 min. 9½ secs.; 100 miles, six hours nine min. 26 secs.; 150 miles, 10 hours 18 min. 29½ secs., all far in advance of previous performances. As an instance of the speed of the Tandem tricycle on the path, it may be mentioned that E. Kiderlen and Dr. E. B. Turner, at Long Eaton, July 8th, rode one mile in two min. 38½ secs. Road racing has chiefly been confined to the "Safety Rover" type class of machine with two wheels of almost equal size well geared up, the rider sitting right over his pedals between the two wheels. On June 14th, however, C. W. Burne (Finchley T. C.) rode 100 miles from Twyford to Norman Cross on a tricycle in seven hours 54 min. 10 secs., record. Road racing, however, has become so prevalent that the Union will impose certain restrictions on this practice this year. Amongst the professionals, F. Wood being in Australia during the whole of the year, B. Howell had all the bicycle championships to himself, until at the end of the season the American champion, Woodside,

defeated him in a ten miles "lap" race. Woodside and Howell at the Agricultural Hall, Islington, Nov. 7-12, rode their machines for six days, eight hours a day, against two cowboys using an unlimited supply of horses. The cowboys just won, with a score of 940 miles. The Hon. Ion Keith Falconer (Cambridge), once a celebrated bicycle amateur champion, and holder of many records, died in Arabia early in the year.

THE TURF.—Although never before have there been so many valuable prizes presented at the various race meetings throughout the kingdom in commemoration of the Queen's Jubilee, it cannot be said that the past year has produced many notable performances. The three-year olds were decidedly below the average, and no horse of that age could compare with Ormonde, the champion of 1886. Ormonde, Minting, and Bendigo stand out as decidedly the best horses in training, and the meeting of these three magnificent thoroughbreds in the Hardwicke Stakes, distance 1½ miles, value £2,395, at Ascot, where Ormonde won by a neck from Minting, both four years old, carrying 9st. 10lbs., with Bendigo, 9st. 12lbs., third, was quite the event of the season. Bendigo, at seven years old, proved himself a marvel of soundness, stamina, and pace. His first appearance for the year was at the Kempton Park May meeting, where, carrying 9st. 7lb., he won the Jubilee Stakes, value £2,850, distance one mile. He was then beaten by Minting, at level weight, for the Ascot Jubilee Cup, value £1,495, distance one mile, and also for the Hardwicke Stakes, as above, and finally wound up the season, and probably his career on the turf, by running second for both the Cesarewitch and Cambridgeshire under the weights of 9st. 7lb. and 9st. 13lb. respectively, being the third time he has finished second for the latter race since he won it as a three-year old in 1883. Between these two brilliant performances he won the Champion Stakes, value £1,134, at the Newmarket Second October meeting. Ormonde, who became slightly touched in his wind during the winter, won the three events for which he started, viz., the Ascot Rous Memorial, the Hardwicke Stakes, and the Imperial Gold Cup, value £590, at the Newmarket July meeting, and if he now retires to the stud will never have been beaten. As regards the classic events of the season, Enterprize, the favourite, won the Two Thousand Guineas, and at once became an equal favourite for the Derby with Baron, but meeting with an accident just before the latter event, was not seen again on a race-course. Judging by the subsequent form of the Baron, who started favourite at 5 to 4 on and finished second, Merry Hampton beat a very indifferent field for the Derby. His starting price was 100-9. The Derby winner remained a very strong favourite for the St. Leger, although beaten in the Grand Prix, up to within a week or so before the race, when he also met with an accident, and even then starting at 6-1, was only beaten half a length by Kilwarlin, the favourite. The three-year old fillies of the year were of no better quality than the colts. Rêve d'Or won both the One Thousand Guineas and the Oaks, starting favourite for each event, and also several other races, including the York Queen's Plate, beating Merry Duchess, the winner of the City and Suburban. The two big handicaps of the year, the Cesarewitch and the Cambridgeshire, were more than usually interesting, and were both very heavy betting races.

The favourite, Humewood, won the longer race from 23 opponents, starting at $4\frac{1}{2}$ to 1 against; but although he left off first favourite for the Cambridgeshire at 5-1, failed to carry his 14 lbs. penalty anywhere near the front; a thoroughly exposed three-year old, Gloriation, 7st. 6lb., against whose chance 40 to 1 was laid, won easily from 20 starters. After Bendigo and Bird of Freedom (who won the Ascot Gold Cup), Eurasian, five years, winner of the Alexandra Plate, and Carlton, four years, must be considered the pick of the older horses for speed, stamina, and weight-carrying power combined. The two-year old racing of 1887 seems to leave the Derby merely a question of health for Friar's Balsam, a chestnut colt by Hermit-Flower of Dorset, who during the winter was quoted at the extraordinary short price of 3-1 for that race. Commencing with the New Stakes at Ascot, Friar's Balsam won every event, seven, for which he started, finishing with the Middle Park and Dewhurst Plates at the Newmarket closing meetings. Amongst the best two-year olds may be mentioned Orbit, by Bend Or; Ayrshire, by Hampton; Hazlehat, by Hermit; Ossory, (own brother to Ormonde), by Bend Or. All these have won valuable stakes, and are prominent in the Derby betting. Sir F. Johnstone is the owner of Friar's Balsam, who has won this season in stakes alone £8,666. The horse is trained by Porter. The £10,000 Eclipse Stakes, at Sandown Park, did not fill for 1887, and the race fell through. The entries have closed for what were intended to be the two biggest stakes on record at Leicester in April 1888, which were advertised as £20,000 (three-year olds), and £12,000 (two-year olds). The values have, however, been cut down to £12,000 and £7,000, owing to lack of support. The grant for the Queen's Plates has now been withdrawn from the turf, and the money will in future be devoted to the improvement of horse breeding in some other way. The last great handicap of the year, the Manchester November Cup, value £1,394, was won by Carlton, 4 yrs., 9 st. 12 lbs. He was giving more than a stone to every horse in the race, and the performance must rank as one of the best of the year; it conclusively proves the excellence of Bendigo, Ormonde, and Minting. The champion jockey of the year was J. Wood, who after filling second place for seven years to the late F. Archer, at length secured premier honours with 151 wins out of 510 mounts. Strange to say he could only secure second position during each of the last five years with a larger number of wins. J. Watts comes next, with 110 wins from 451 mounts; and J. Barrett is third, with 106 wins from 581 mounts. The other leading jockeys rank as follows:—S. Loates 81 wins, F. Barrett 72 wins, V. Robinson 63 wins, T. Cannon 57 wins, J. Fordham, once the "demon" jockey of the day, died on October 12th, aged 51 years.

The principal winning owners of the season were Mr. Abington, £20,124; Mr. D. Baird, £16,619; "Mr. Manton," £16,116; Duke of Beaufort, £15,573; Mr. R. C. Vyner, £15,358; Lord Althorpe, £13,327; General Owen Williams, 11,734; Sir F. Johnstone, £11,173; Duke of Portland, £9,554. The Duke of Westminster, who last year headed the list, only won £8,988.

Hampton and Hermit are the two champion sires of the year; Hampton's stock having won 31,779, and Hermit's £25,536.

The following are the values of the most

important events of the season:—The Derby, £4,525; Oaks, £3,275; St. Leger, £4,050; Two Thousand Guineas, £3,550; One Thousand Guineas, £3,000; Grand Prix, £5,931; Kempton Jubilee Stakes, £2,850; Manchester Summer Cup, £2,381; Manchester Whitsuntide Plate, two-year olds, £4,727; Ascot Gold Cup, £1,350; Ascot Jubilee Cup, £1,495; Epsom Grand Prize, £2,377; Leicester Jubilee Cup, £1,875; Sandown Jubilee Handicap, £1,500; Middle Park Plate, £2,235; Dewhurst Plate, £1,447; Cesarewitch, £1,125; Cambridgeshire, £1,505.

ANGLING.—The rod-fishing season of 1887 was probably quite up to the average in respect to salmon, but decidedly below it as regards trout. Among the former no very heavy fish were taken, the record of an 8 $\frac{1}{2}$ lb. salmon, extensively circulated by the provincial newspapers, having since proved to be entirely imaginary. River trout-fishing suffered from the weather: a singularly dry spring, broken only towards the end of May by a copious rainfall of short duration, was followed by a prolonged drought, which brought the rivers, and particularly those of the north, down to a level at which successful angling was impossible, and trouting was practically at a standstill from May to September, the season having been the worst recorded since 1844. The establishment of the Fly-fishers' Club in London, and the Yorkshire Anglers' Association in the north of England, has done much to promote the interests of anglers and to develop what may be called the two schools of fly-fishers as represented by the advocates of the two systems of dry and wet fly-fishing. In the former the artificial fly is made to resemble the natural insect as closely as possible, and is intended to float upon the surface of the water like a living fly, being thus excellently suited for the slow-running chalk-streams in the south of England. On the shallower and more rapid rivers of the north, however, the wet-fly is universally fished, an accurate imitation of the shape of the natural insect not being considered of much moment so long as size and colour are adhered to. The roughness of the northern streams prevents the floating-fly serving its first purpose, and the sunk fly is therefore not likely to be discarded in favour of the new system. Both are very killing methods on those particular waters which are best suited for their purpose. The wet-fly system is represented in "North-Country Flies," by Mr. T. E. Pritt, angling editor of the *Yorkshire Post*, while the dry-fly system is expounded by Mr. Frederic M. Halford, in "Floating Flies, and how to Dress them." Both works are of recent date, and are accepted as standard authorities on the different systems of north and south. Very extensive trout-breeding operations continue to be carried on by the different angling clubs of the country, and in many parts of the manufacturing districts a distinct movement is apparent in favour of the prevention of the continued pollution of water courses. There was no legislation in regard to inland fisheries in 1887; but the Yorkshire Association have recently undertaken to attempt an alteration from 2nd February to 15th March in the rod-season for trout in all rivers north of an imaginary line drawn across the country from the mouth of the Ribble to the Humber, a desirable alteration of dates which it is hoped may be effected in the next session of parliament.

Our last year's record of volcanic eruptions and earthquakes brought us down to the end of Nov., 1886. Before taking up the thread of the narrative from that date we must note some occurrences which took place but had not been reported prior to that period. It has already been noted that at the very time of the serious earthquakes in the United States, which occasioned so much damage in September, 1886, similar manifestations of seismic force were experienced in the Levant; and two other instances have now to be recorded: one on the West Coast of Africa, where, at Sennahou, in the Bompoh district of Sierra Leone—almost in the same latitude as Charleston—heavy shocks were felt in the middle of September, accompanied by continuous loud subterranean noises, and the throwing down of a number of native dwellings; the other, at Ninafu in the Tonga Islands, where, on the 31st August, after twenty-four hours of continuous earthquakes, a vast column of flame, 2,000 feet in height, visible at Keppel Island, 100 miles distant, burst forth, accompanied by volumes of volcanic dust, which were carried all over the island. The eruption lasted for ten days, during which the earthquakes scarcely subsided for an hour at a time. Many of the natives died from fright and exhaustion. These occurrences were earlier in date than those in the same locality already recorded in last year's summary. On Nov. 1st, 1886, a heavy shock, accompanied by loud noises, was felt at Nordheimsund, on the West Coast of Norway; and slight shocks were felt at Cairo on November 17; at Pontresina and Bernina in Switzerland, on the 25th; at various places in South Carolina on the 1st and 8th December; and, on the latter date, in Missouri also. On the 11th December several houses were destroyed at Smyrna, this shock being the climax of a series that had been felt for a fortnight previously; on the same day Chios was visited by a smart earthquake, and, five days later, a ship at sea, in latitude $19^{\circ} 21'$ N., and longitude $64^{\circ} 22'$ W., reports having felt the effects of an earthquake—Sarnen, in the Unterwalden, experiencing the same sensation on the same day. On the 22nd Pontresina was again visited. On the 4th, and again on the 10th, January, 1887, Charleston and other places in South Carolina had a renewal, on a small scale, of their experiences of the previous autumn, and about the same time there commenced a series of earthquakes in the town and neighbourhood of Baku, the Russian petroleum district. One day the town of Baku itself was threatened with destruction by the sudden outburst of a natural naphtha fountain, which swamped a number of buildings. This was followed by the breaking out of a volcano of earth and hot mud, about ten miles from the town on the Lok Batan, close to the Ponta railway station; and, on the night of the 15th of January the inhabitants of Baku were alarmed by a shock like that of an explosion, which made all their windows tremble violently. This was found to be due to an eruption of the new volcano of Lok Batan, which ejected vast volumes of solid and liquid matter for thirty-six hours, the muddy liquid spreading itself over more than a square mile of country to a depth of from seven to fourteen feet. At the same time an earthquake was felt at Montpellier and other towns in the south of France. These phenomena were simultaneous with an extra-

ordinary increase of activity in the celebrated volcano of Mauna Loa, in the Sandwich Islands. From the middle of December a steady increase was noticed in the force and frequency of the earthquake shocks which are chronic in the islands. By the 12th of January they had increased to an average of about three a day, and they became heavier and heavier until the 16th. In the forty-eight hours that followed, the earth kept up a constant trembling, the shocks following one another at intervals of from three to five minutes, with occasionally three in succession, strongly marked. On the 15th of January lava began to flow from the crater of the volcano, and had reached the sea, twenty miles distant, by the end of the month, when the disturbance subsided. On the 25th several shocks were felt in different parts of Mexico, and twelve days later throughout Indiana, Missouri, and Illinois.

The most disastrous earthquakes of the year were those experienced in the Riviera and other parts of Italy, commencing on Ash Wednesday (February 23). The first shocks were felt at Monte Carlo, where, however, less damage was done than elsewhere, nearly every town from Albissola to Nice, a distance of 100 miles, being more or less injured. At Bussana nearly every house was thrown down, and half of the 800 inhabitants were buried beneath the ruins. At Bajardo the church was destroyed, killing and injuring about 250 people. At Sestriponente the church and municipal palace were injured, and at Genoa the bells were set ringing by the rocking of the steeple, and the ducal palace was injured; at Nice and Mentone several public and many large private buildings were thrown into ruins. Diano Marina was completely wrecked, and 150 people killed. At Oneglia the convict prison was rent asunder, and the prisoners had to be removed to ships in the harbour; while at Final Marina the military barracks fell in. In the various villages about San Remo over 300 people were buried alive. Altogether it is estimated that 2,000 people were killed, and damage done to the value of over two millions sterling. These manifestations of seismic force were also severely felt all over Switzerland, in Corsica and Sicily, as far east as Vienna, and as far west as Lyons. The seismometer at Washington Observatory was also affected by them—a strong shock being also felt at Long Island on March 2nd. They were renewed, with less intensity, from time to time for more than a month, the most severe of the later shocks being at Nice on March 5th and 11th, and at Cannes on March 11th and 22nd. On March 15th a strong shock was experienced at Mandalay; on the 17th at Quemados in Cuba, and also at Charleston; on the 22nd and 31st at Travnik in Bosnia; on the 23rd in the Grisons; on the 25th at Stuttgart and at Savona; on the 27th in Carniola; and on the 27th again at Savona. On April 1st another "earthquake at sea" was reported by a vessel in latitude $17^{\circ} 38'$ N., and longitude $46^{\circ} 34'$ W.; Forli, in Italy, being visited by a severe shock on the same day, while Aden suffered similarly on that and three following days. On April 13th shocks were experienced at Lisbon, and also in Sicily and Malta, and, eight days later, a smart shock, accompanied by violent noises, resembling the firing of heavy artillery, was felt in both Jersey and Guernsey. By the 3rd May, the scene of activity had shifted to North and

Central America; violent earthquakes on that day at El Paso in Texas and at San Marcial and Albuquerque in New Mexico, and other places in the south-western States, being succeeded by daily shocks at Tucson, where a hitherto sterile district was suddenly rendered cultivable by the bursting forth of streams of water; and at several towns in the north-eastern districts of Sonora, where many buildings were destroyed and many lives lost. Among other remarkable results of these earthquakes the shape of nearly every high mountain in Arizona was changed, many hills being split asunder, while in the Santa Catalina mountains rich veins of gold were revealed by the transformations that were effected. The climax of these earthquakes appears to have been reached at the end of the month, a series of very severe shocks, accompanied by low roaring noises, being felt at the city of Mexico and generally throughout the states of Hidalgo, Mexico, Puebla, Vera Cruz, and Oaxaca, on May 30th, when walls were rent and bells set ringing, and one of the aqueducts supplying Mexico damaged. These disturbances continued to be repeated from time to time till the beginning of July, and they were also felt as far north as Arizona, and also in the islands of St. Lucia, St. Vincent, and Grenada, while, on the 31st May, a distinct shock was felt at Jamestown in New York State. It should be noted that in the mean time, on May 19th and 20th, shocks were felt at Monte Carlo and at various places in the Alpes Vandoises, while on May 31st Etna showed signs of increasing activity. On June 3rd shocks were experienced throughout California and Nevada, including the celebrated Yosemite Valley; but, in a few days the centre of violent disturbance was again changed, this time to Turkestan. At Vernoe, on June 9th-10th, 120 people were killed and many public buildings destroyed; at Semipalatinsk, 125 people were killed or seriously hurt; at Tsharkent most of the stone houses were thrown down, and at various places within a radius of 600 miles of Vernoe great damage was done, several landslips occurring and chasms appearing in the mountains. On June 14th-15th several earthquake shocks were felt at Smyrna, and on June 21st fresh disturbances were experienced in Turkestan, a lake near Karakoul being observed to sink three feet. On June 29 considerable damage was done at Guayaquil and at other towns in Ecuador, the shocks being more violent than any experienced since 1858; and, in rapid succession, earthquakes were felt at places so far apart as Brittany, the States of New Hampshire and Vermont (July 1st), South Carolina and Tennessee, and other places in Hungary (July 11th), Vera, Lesaca, Elizondo, in Spain (July 16), Alexandria, Malta, Sicily, various parts of Calabria, Rhodes, Canea, Crete, and Chio (July 17th). At Rhodes the fortress-wall was destroyed. In evident connection with these earthquakes a violent eruption of the island of Galita was observed towards the end of July, much lava being ejected from the crater, the glare from which was visible at sea at a distance of 40 miles. On August 2nd slight earthquakes were felt at various places in Indiana, this being simultaneous with a very severe shock in Ecuador, where many towns were seriously damaged, Cuenca being almost totally destroyed. On September 4th Bonn was visited by a mild

troublement, and on the 23rd considerable damage was done at Santiago de Cuba by an earthquake, which was also felt in Jamaica, Hayti, Navassa, and in other West Indian islands. These shocks were also noticed by a vessel at sea in latitude $19^{\circ} 44' N.$, and longitude $74^{\circ} 24' W.$; on the 28th the small island of Sagua was similarly affected. Smyrna was again visited by an earthquake on September 30th and October 1st, this being immediately followed, on the 4th, by strong disturbances on both shores of the Gulf of Corinth, while on the 5th and 6th a renewal of the earthquakes at Santiago de Cuba did further damage. About the same time the unusual visitation of some earth tremors occurred at Ixopo on the Natal border. On the 11th a slight renewal of the phenomena was observed in various parts of Mexico, and on the 14th, Jamaica was again visited. An earthquake occurred in Iceland on the 28th of October. The shock, though pretty severe, seems to have been confined to the southern part of the island. The rock at Cape Reikianas, on which the lighthouse stands, was rent asunder and the lighthouse considerably damaged. No lives are reported to have been lost. On the night of the 10th of November serious shocks of earthquake were felt at various places in the northern provinces of Italy, including Ravenna, Bologna, and Venice. The rivers Po, Reno, and Vararo threatened serious inundations. On the 14th Florence and the Valley of the Arno were similarly disturbed. Only three instances of earthquake phenomena are recorded as having been observed in England during the year, the first occurring at Merthyr Tydfil and generally in the Rhondda Valley, South Wales, on October 13th. The second was at Merthley, a mining village near Leeds, on November 4th. In the latter case the night workmen at Allerton Collieries felt the shock, and thought that an explosion had occurred. Other persons in the district who were awake at the time state that their houses were slightly shaken, and that glasses, pots, pans, and other domestic articles rattled for a few seconds. The third instance occurred on November 20th, when a distinct shock of earthquake was felt at various places in Cambridgeshire, Herts, and Essex. The effect is variously described as being like a distant explosion, and like the rumbling of a heavy vehicle passing. Doors, windows, and in some cases slates on buildings were made to rattle. The phenomenon happening at the time of the anticipated riots in London, caused some strange interpretations to be put upon it, the most general one being that a terrific dynamite explosion had occurred in London.

The study of earthquake phenomena, with respect to both their causes and their effects, is being taken up in several countries, and it is probable that some light may be thrown on the connection between the outbreaks of volcanic and seismic activity in different parts of the world, with the likelihood that their occurrence may be foretold. Among other contributions to the solution of the problem, Herr Rudolph Fabl, of Vienna, claims to have predicted the earthquakes which occurred in Italy and France in February, and which he attributed to the coincident influence of the sun and moon on the earth at the time of the annular eclipse of the sun which took place at that time.

THERE is perhaps no subject of more truly great and national importance at the present time than education. The essentially conservative character of the older universities, the strides made during the last twenty-five years in the direction of progress on all sides, and the state of England's labour market (with a consideration of the causes to which it is owing), these are the main motive powers that have made our educational system of prime interest to all thoughtful minds. It is well, therefore, that not only should there be a definite and careful stock-taking of our educational progress, but that the results should be condensed and put forward in such a way that the subject, having been freed from its technicalities, should be fairly within the grasp of every mind of ordinary intelligence. It is proposed in the present article to furnish in an abbreviated yet clear form a summary of the progress that has recently been made in education in the British Isles.

The educational machinery of all civilized nations is divided, broadly speaking, between the universities, the middle class schools, and the elementary schools. The first of these are dealt with elsewhere, while of the second it is difficult to get any trustworthy statistics, scarcely any public reports unfortunately being issued, and the examinations being conducted mainly by private officials. The fullest information, however, is available with regard to the elementary schools; and these, it should be observed, constitute, after all is said and done, the matter of the greatest possible moment. Our artisans, our mechanics, and our labourers, who form the backbone of the country, are educated in them, and the national trade and prosperity depend largely upon the material with which they are equipping the various markets of labour.

The subject, as it has now narrowed down, easily lends itself to orderly treatment; and, for the sake of convenience, will be here divided under the following heads:—(1) The public elementary schools of England and Wales, Scotland and Ireland, and the Reformatory and industrial schools of Great Britain; (2) Intermediate education in England and Wales and Ireland, and Science and Art education in the British Isles; and (3) Progress at the public schools and universities.

Of the Elementary Schools themselves it is happily possible to get the fullest statistics, and these all go to show that we have good reason to rejoice at the great strides taken during the last few years. On August 31, 1886, there were in England and Wales 19,173 day-schools on the list for government inspection by the Education Department, and claiming annual grants of public money. These schools contained accommodation for 5,200,685 scholars, while the actual number, on the books was 4,553,751, and the average attendance 3,470,509. A comparison of these figures with those of the preceding twelve-months shows an increase of (1) accommodation of 2'93 per cent., (2) number on the books of 2'12 per cent., and (3) number in average attendance of 1'99 per cent. The work during the last decade everywhere shows great progress; for in that period the voluntary schools rose from 12,677 to 14,620, and the board schools from 1,596 to 4,402; while the grant per head in the former advanced from 13s. 3¼d. to 16s. 10¼d., and in the latter from 13s. 0¼d. to 17s. 10d.

In attempting anything like a comparison between these two classes of schools it should be remembered that the funds at the disposal of school boards are practically unlimited, while the voluntary schools are to a large extent dependent upon the bounty of private individuals, so that whereas in the former case the teaching staff and the school apparatus are the best possible, in the latter case it is often a question of "cutting the coat according to the cloth." Speaking generally, it may be said that the school boards spend more money upon their scholars and earn more money from them than do the voluntary schools.

The demand for additional schools in various parts of the country is of course due mainly to two causes, previous insufficiency of accommodation, and the increase in the number of children of school age. Since 1870 the additional accommodation provided in all ways is equivalent to an increase of 83'8 per cent., while the average attendance has risen 80'8 per cent. The work of supply has been carried on simultaneously both by school boards and by the denominationalists of various sects. Thus, during the year 1885-86 the voluntary schools provided 54,787 additional school places, and the school boards 91,787 places. But the real cost of this provision to the country is not apparent from the returns already quoted. The Education Acts of 1870 and 1873 gave to school boards the power of borrowing sums of money on the security of the rates to be levied, and of this power they have freely availed themselves. Up to April 1, 1887, the Education Department had sanctioned loans to 1,773 school boards, amounting to £19,177,921 14s. 8d. (the estimated cost per child, including the original cost of the school site, being about £12 9s. 9d.); and, were the educational machinery to stop working to-day the present liabilities of school boards in England and Wales in respect of outstanding loans amount to the respectable total of more than £16,700,000, on which the annual interest alone at 2½ per cent., exclusive of any provision for a sinking fund, would be £417,500. Now let us examine very briefly this question of the supply of schools. Statistics of age go to show that school seats ought to be found for a number equal to one-sixth of the total population; and consequently that, according to the estimated population in 1886 (27,370,586), the total number of seats should be for 4,645,097 children. Now the actual accommodation is in excess of this, yet additional schools will still need to be built in order to make due allowance for the constant increase of population. For example, it has been stated that were such increase regular instead of being, as is the fact, an ever-growing quantity, in London alone a new school for one thousand children ought to be opened each month for ten months of each year to meet the yearly growth of the population. In order to estimate rightly the progress that is being made, another important factor must be taken into account, and that is the ages of the children actually attending the schools. From this point of view, were the numbers of the children in the higher standards decreasing, or even at a standstill, it could scarcely be said that any real substantial improvement was taking place. But, as a matter of fact, not only is the number in attendance increasing, but the average age at which they

leave school is gradually but surely rising. We find also another healthy sign, viz., that the percentage of scholars over ten years of age in the lowest three standards is getting less and less. Coming now to the general standard of attainment, more than half the schools (51·29 per cent.) are now classed as *good*, more than one-sixth (18·71 per cent.) as *excellent*, and more than one-fourth (26·3 per cent.) as *fair*, while the remainder (3·7 per cent.) are not considered worthy of even the lowest of these three grades of merit. Next let us look at the branches of instruction carried on in these schools. Reading, writing, and arithmetic are, of course, compulsory; grammar, geography, and needle-work (in infants' and girls' schools) are practically so; while history, cookery (girls), drawing, and drill (boys) may fairly be called optional. Other subjects which, to a very limited extent, may be taken up are Latin, French, German, mathematics, and natural science: but these are only adopted in schools of a high class, where the scholars stay to an advanced school age, and the funds at disposal are sufficient to provide the necessary staff and material. The last point demanding our careful consideration is the gross teaching power available for carrying on the work already summarized. At the present time (Michaelmas, 1887) there are no fewer than 27,804 pupil-teachers, 17,439 assistant teachers, and 42,212 certificated teachers employed in the schools under inspection, these figures showing a gross increase during the last seventeen years of about 232 per cent. At the different training colleges throughout the country there are 3,272 students in residence, and, as the period spent in those institutions is now almost invariably two years, it follows that from them alone the staff of teachers is increased by more than 1,500 per annum. Now this supply would suffice to counteract the waste (reckoned at 6 per cent.) in a staff of 25,000 teachers, and as a large number of qualified persons enter the profession through other duly recognized channels, there seems to be every reason to anticipate in the future the maintenance of the required roll of teachers. The demand for entry into the profession is doubtless due to the fact that its salaries have risen very considerably of late years, and that they have now reached a fairly high standard. In 1870 the average salary of a certificated master was £94 2s. 1d., now it is £120 17s. 6d.; while the average salary of certificated mistresses has risen in the same period from £57 11s. 1d. to £74 4s. 11d. When the Education Act of 1870 was before Parliament and the country, it was confidently expected by its promoters (and need so stated in public) that, according to calculations made, the rate levied by school boards in no case exceed 3d. in the £; the following returns, therefore, for the year 1886, will be of some interest now. In England 7·9 per cent. of the boroughs and 87·9 per cent. of the parishes, and in Wales 82·4 per cent. of the boroughs and 92·6 per cent. of the parishes, pay a rate of not less than 3d. in the £. As in many places the school board rate exceeds 1s. in the £, and is sometimes more than double that amount, the difference between forecast and result is at once apparent.

The past year will stand on record as one of unusual educational activity. It seems to be felt and generally admitted at last that we have been

left behind in this branch of progress, and that much leeway has to be made up. Of parliamentary committees and royal commissions, therefore, there has been a great abundance. Among others may be mentioned the Committee of Inquiry into Scottish Education, the Royal Commission on the Blind, the Deaf and Dumb, the Select Committee of the House of Commons on the Endowed Schools Acts, and the Royal Commission on the Working of the Education Acts. The last named is by far the most important; it has examined an enormous number of witnesses representing all shades of opinion, and has already issued three bulky verbatim reports of the evidence given before it. At the present time it is engaged in deliberating upon its final report and recommendations, and if the issue is nearly equal to the anticipations, we may expect shortly to hear of radical changes in our system of elementary education. In immediate relation to the foregoing a word is necessary on the Free Education movement, the promoters of which are anxious to abolish altogether the payment of fees. Our leading statesmen are much divided on the point: some have declared strongly in its favour, and others as strongly against it, while of the rest, part have given no sign and others have not yet made up their minds—possibly "waiting to see which way the cat jumps."

Elementary education in Scotland is only of less importance than that of England in proportion as it concerns a smaller population, and necessarily therefore a smaller number of children. The general method of conducting it and watching its progress is much the same in both countries, although it is true that a special Act of Parliament was passed (1872) for Scotland, and that it has a special code of examination and instruction of its own. We proceed therefore to consider the work of recent years, and it will be convenient to notice the matter under these four heads:—(1) The provision of a sufficient number of suitable schools; (2) the attendance at these schools of those children for whom they are provided; (3) the efficiency of the instruction given to the children; and (4) the teaching staff employed in conducting the schools.

In 1872, Scotland possessed schools aided by public grants for 281,688 scholars, or for 8·3 per cent. of the population; whereas in 1886 the schools of the same class were sufficient for 701,598 scholars, or 17·81 per cent. of the population. More than 90,000 out of the total increase of 419,910 seats have been necessitated by the growth of the population during the interval mentioned; so that after making a fair allowance for those cases in which seats have been provided for the future rather than for the present, it is probable that more than 274,000 seats that were really wanted in 1872 have been furnished during the last fourteen years. Under this head the question is how far the present accommodation is adequate to the needs of the country. After calculating the fraction of the whole population that should be at school, and duly considering the special circumstances which in Scotland tend to modify this calculation, it is found that in 1886 the total number of school places should have been 656,464. Thus the gross supply is in excess of the demand, but upon further examination of the distribution of this supply over the whole area of the country, the result shows that the

elementary school requirements of Scotland are practically complete. When we come to the question of attendance, however, the returns are not so satisfactory, pointing apparently to the inefficient exercise by the proper authorities of the powers conferred upon them by the Education Acts. Thus for every 100 children of school age, 89 seats have been provided, but only 79 children are on the registers, and only 61 in daily attendance. It is certainly a redeeming feature that since 1872 the average daily attendance has increased from 6'29 to 12'29 per cent. of the population. The next point of moment in this connection is the standard of efficiency attained by these scholars. Now the registers of those schools which were inspected in 1886 contained the names of 615,498 children, and out of 478,152 of those children who were duly qualified by age and attendance, the number of those presented to the inspectors for individual examination was 373,938. It is unsatisfactory to find that one-fourth of those who were over ten years of age were offered for examination in work suited to children of seven, eight, or nine years of age. Despite this, however, there has been a decided though gradual improvement in this respect, for the proportion of scholars examined in the three higher standards has risen from 18'77 per cent. in 1875 to 39'28 per cent. in 1886, and the percentage of scholars in those standards above ten years of age has risen by more than 41 in the same period. The teaching power available in Scotland is as yet scarcely abreast of the requirements, though great progress has been made in recruiting the ranks of teachers. In 1886 there were 6,704 certificated teachers employed, or a proportion of one certificated teacher to every 71 children. The total amount spent by the school boards of Scotland from 1872 to March 31, 1887, in providing school accommodation for children was £3,800,902 8s. 3½d.

The scheme for the conduct of elementary education in Ireland is entirely distinct in character from those of Great Britain, but we purpose giving as far as possible similar returns to those above, since it is more convenient for the drawing of just inferences, and also renders the state of affairs more intelligible to the ordinary reader. The primary schools of Ireland are under the direction of a board known as the Commissioners of National Education, who, like the English and Scotch Education Departments, examine and report upon them annually. On December 31, 1886, the total number of schools on the operation list was 8,024, the average daily attendance of scholars for that year was 490,484 (showing a decrease of 11,970 as compared with the preceding year), and the percentage of those whose names were on the registers in average attendance throughout the year was 69'5. This proportion shows a falling off from 1885, when the percentage was 70'5, and falls lamentably short of the corresponding returns for Great Britain, which were:—England and Wales, 76'3 per cent.; Scotland, 77'2 per cent. When we come to the classification and ages of the scholars included in these percentages the result is not quite so unsatisfactory. Of the 705,585 children on the registers, 25'1 per cent. were infants, 48'1 per cent. were in the lowest three classes (*standards* are not adopted in Ireland), and 26'8 per cent. were in the highest four classes; while a comparatively large part of the children were

upwards of sixteen years of age. This is a distinctly healthy sign; it points to a high appreciation on the part of some parents and guardians of the advantages to be derived from sound elementary instruction, and more, it seems to indicate an uplifting of the educational tone of the country in the course of the next decade. In the attendances made by the pupils, however, there is small cause for congratulation; gross irregularity is widely prevalent, and at present shows no signs of altering; indeed it cannot be fairly expected that Ireland will give much better results so long as the status and the salaries of competent trained teachers remain in their present low condition. On December 31, 1886 (excluding 220 convent and monastery schools paid by capitation), there were in the service of the Commissioners 7,865 principal teachers and 3,131 assistant teachers; and the average salaries of all the principal teachers were as follows for the year 1885:—Males, £79 17s. 6¾d.; females, £66 12s. 5d. The Parliamentary grants for the National Schools of Ireland for the year 1886-87 amounted to £718,369.

Ireland possesses in the Intermediate Education Board a body which has no counterpart in Great Britain; and it is greatly to be regretted that in spite of many advantages accruing from its work, retrogression rather than advance has generally marked its recent course. This board examines both boys and girls, most of whom are between eight and sixteen years of age, in the following subjects of a somewhat higher grade character:—Greek, Latin, English, French, Italian, German, Celtic, Mathematics, Arithmetic and Book-keeping, Natural Philosophy, Chemistry, Botany, Drawing, Theory of Music, and Domestic Economy. Both passes and honours are awarded, and books, prizes, and exhibitions are also given, while fees are paid on the results of the examinations. It is matter for rejoicing that the number of candidates presenting themselves for these examinations—which had been decreasing for several years past—has at length begun to move again in the right direction, the downward movement in this branch of Irish education having been so much the more deplorable as the reports of the examiners in almost all the subjects speak well of the candidates' papers, especially as indicating an improvement in the methods and quality of the teaching.

Of a lower type altogether is the work carried on in the reformatory and industrial schools of Great Britain. The industrial schools are chiefly the outcome of the desire to preserve our elementary schools from the evil effects of depraved and coarse children being in their midst; while the reformatory schools represent a philanthropic attempt to redeem juvenile criminals from the bad ways into which they have been led. Under an Act of Parliament of William IV. an inspector is appointed to visit all the certified schools of these two classes in Great Britain, and his report upon them for the calendar year 1886 is full of interest and instruction. The total number of juveniles detained in these schools at the end of 1886 was 25,940, viz., 21,971 boys and 4,969 girls. In order to judge correctly of the value of such schools, we must consider not only the technical manual training given in them, but also more particularly the results of the teaching upon the moral conduct of the

mates in after life. It is, fortunately, possible to trace the great majority after they have left the schools, and from the information so obtained returns are easily deduced. Thus, of those who were discharged from reformatory schools during the years 1883-85, 78 per cent. of the boys, and 75 per cent. of the girls were afterwards "doing well;" while the corresponding figures for the industrial schools were:—boys, 83 per cent.; girls, 84 per cent. The total number of these schools under inspection in 1886 was 226, made up thus:—Reformatory schools, 58; Industrial schools, 142; Truant schools, 10; and Day Industrial schools, 16. The average annual cost of maintenance in the reformatory schools was England (boys) £19 19s. 1d.; Scotland (boys) £20 16s. 5d.; England (girls) £19 14s. 4d.; and Scotland (girls) £19 19s. 9d.

The greatest advances towards the realization of a sound scheme of intermediate education—that is, an education just above that of the elementary schools—have been made during the past year or two. Since the Royal Commission on Technical Education completed its labours there has been a general cry for Manual Training, Commercial Education, and Technical Education, and bodies and associations have been formed on all sides for their promotion. Our clerks are fast being cut out of business houses here by the competition of foreigners, chiefly Germans, who, by their acquaintance with two or three modern languages, are better qualified for the posts than our own people; while our artisans are being superseded and their work driven from the various markets of the world owing to their lack of that technical education which is given to workmen abroad. That there is some ground for these contentions it would be idle to deny, though it seems very doubtful whether the promised schemes of special education will prove the universal panacea so confidently anticipated by their supporters. Deputations here, there, and everywhere there have been in plenty; men of light and leading have carefully weighed the question, and given the result of their reflections to the public on the platform or in the newspaper and the pamphlet; a Recreative Evening Schools Association, a National Association for the promotion of Technical Education (with Lord Hartington as chairman) have been formed and are doing useful preliminary work; several of the City Companies have taken active steps, by holding examinations and granting certificates of proficiency to successful candidates, to promote in our workmen an intelligent knowledge of their craft; Chambers of Commerce all over the country have had reports presented to them on the subject, and school boards and other educational bodies have debated and discussed the subject *ad nauseam*.

At length, when the expediency of legislation was no longer doubtful, the Government last spring announced their intention of bringing in as early as possible a bill to enable technical schools to be established wherever they might be needed. As (although the bill was sacrificed along with many others at the end of an unusually protracted session) it is to be re-introduced in much the same form next session, we proceed to sketch its main provisions. They are as follows:—Local authorities (by which is meant the school board in each particular case, or the council in a borough where there is no school board) may

pass resolutions that it is expedient to supplement the elementary education supplied in its district by technical instruction; whereupon any fifty persons entitled to vote at the election of members of such local authority, or one-third of the total number of those persons, may require a poll to be taken as to carrying the resolution into effect. This poll, having been taken by ballot, as in the case of a contested municipal election, should the resolution have been negatived it may not be proposed again until after the expiration of a year. If the resolution has not been negatived the local authority will be empowered (1) to provide technical schools for its district; or (2) to combine with any other local authority for the purpose of providing technical schools common to the districts of both authorities; or (3) to contribute towards the maintenance, or to the provision and maintenance, of any technical school; or (4) to make such arrangements as may seem expedient to it for supplementing by technical instruction the instruction given in any public elementary school in its district. The definition of "technical instruction" and the working out of the scheme are left almost wholly to the Science and Art Department. The expenses incurred by a local authority in these matters are to be defrayed out of the local rate—that is, out of the school fund where there is a school board, and where there is none, out of the borough fund or borough rate. But no payment may be made out of the rate in respect of a scholar until he has passed Standard VI., or an examination equivalent to it.

One more point of special importance remains to be noticed in this connection. The gap in Wales between the elementary schools and the university colleges is so plainly marked that some system of intermediate education is absolutely necessary for the Principality. Grammar schools, high schools, and middle-class schools, are very few in number; and it is commonly complained by the college lecturers that their pupils on their first arrival are by no means properly prepared for the reception of a university education. To remedy this grave defect, Welsh Intermediate Education Bills have already been prepared by more than one member of parliament, and it is pretty certain that before long the legislature will be engaged in debating the subject with a view to the passing of some satisfactory measure.

No account, however brief, of the state of education in the British Isles, could be considered complete which did not give some notice of the work carried on by the Science and Art Department. This department is empowered to organize classes in twenty-five different branches of science, both theoretical and practical, and in art, elementary and advanced. On the results of the examination of such classes grants of public money are made, and various other direct aids and incentives to further study are also obtainable. In May, 1886, there were 1,682 schools, giving instruction in elementary science, including no fewer than 5,862 classes and 94,838 pupils under instruction. Of these pupils, 58,476 were examined in one or more subjects, and the total amount paid on the results of the examinations was £73,142 5s. 8d., being at the rate of 15s. 5d. for each student under instruction. The teachers engaged in these schools numbered 2,476, and the average payment per teacher was £28 16s. 7d. More

advanced scientific instruction is given at the Normal School of Science and Royal School of Mines at South Kensington, and at the Royal College of Science in Dublin. From the report on the Art division of the Department it appears that during the year ending Aug. 31, 1886, the total number of children and pupil teachers who were under instruction in drawing was 870,491, and of them 579,486 and 8,779, respectively, were examined. In fifty training colleges 3,620 students and 856 teachers were examined, and the resulting payments amounted to £2,161 10s. In the schools of art, where advanced art instruction is given, during 1886 40,134 students were taught, of whom 27,600 submitted 322,040 drawings, paintings, and models to examination; while payments were made on the works of industrial students to the number of 24,664. Other encouragements and aids to the study of art may be found in our National Art Training School, in the National Scholarships, and in the Science and Art Scholarships and Exhibitions.

In the higher branches of education there is not much to record. An important change (owing to, or at least coincident with, the success of Miss Ramsay at Cambridge) has been made at several of the public schools, by which the learning of Greek may either be optional or postponed to a later age than formerly. The university extension movement is widening and rapidly spreading to all our chief towns, and is one of those many and important parts of the educational bridge spanning over the space intervening between the elementary school and the university. Emboldened no doubt by their many successes, a memorial has been presented to the Vice-Chancellor of Cambridge University praying for the granting of degrees to women who pass the university honour examinations. This contest between the lady graduates and the authorities, it is scarcely necessary to add, can have but one end if the fair ones only persevere in their purpose. An important addition has recently been made to the staff both at Oxford and Cambridge. The Royal Geographical Society, in order to improve the study of geography and the methods of teaching it, offered to pay to each of the two universities part of the cost of the maintenance of a readership in geography upon certain equitable conditions, which were freely accepted by both Oxford and Cambridge, and clearly showed that the society had no other object in view in making the offer than the promotion of the truest and most scientific kind of education.

This review may be concluded with a brief chronicle of some leading incidents in the educational world during the year. In October, 1886, Dr. Jex Blake, head master of Rugby school, was presented to the living of Alvechurch, Worcestershire, though he did not enter upon his new duties until last Easter. Dr. Percival, president of Trinity College, Oxford, was appointed to succeed him at Rugby. About the same time another well-known former head-master of Harrow School, Dr. Montague Butler, received the Mastership of Trinity College, Cambridge. On December 10, 1886, Mr. Barwick Lloyd Baker, one of the chief founders of reformatory schools, died at Hardwicke Court, near Gloucester. Just before Christmas the Royal Colleges of Surgeons and Physicians of England were busily engaged in furthering their scheme for the creation by royal charter

of a new University of Westminster, of which the main object is the conferring of medical degrees on licentiates in medicine and surgery educated in the metropolitan schools. The new year was befittingly opened by the announcement that (as the result of a gift of £20,000 by Sir David Baxter) it had been decided to erect the Baxter Technical Institute, near University College, Dundee. In the third week of January, 1887, in consequence of changes in the distribution of Cabinet offices, Sir William Hart Dyke was appointed Vice-President of the Committee of Council on Education, in the place of Sir Henry Holland, who had become Colonial Secretary. On January 22, died Sir Joseph Whitworth, the famous engineer and iron and steel worker, and founder of the Whitworth Scholarships. Early in February Sir Lyon Playfair announced that he would withdraw his Technical Education Bill in favour of a measure drawn up with similar objects and on much the same lines by Sir Henry Roscoe; and almost simultaneously the Parliamentary Committee on the Endowed Schools Acts was re-appointed, electing Sir Lyon Playfair as chairman, and holding its first meeting on February 10. In the beginning of March preliminary steps were taken at Birmingham for the incorporation of Mason's College, Queen's College, and the Midland Institute as a separate University for the Midland counties; while a fortnight later it was announced that Professor Tyndall had resigned the Professorship of Natural Philosophy at the Royal Institution—a post which he had held since 1853. The month of May was marked by two important educational events: the introduction by Mr. Kenyon of an Intermediate Education Bill for Wales, and the statement that the Government would refer to a Royal Commission the whole question of a "teaching university for London." Early in June, Sir Henry Roscoe brought in an Evening Schools Bill and a Bill for the Promotion of Technical and Commercial Education; on the 10th and 11th of the same month a conference of the head-mistresses of public high schools was held at Uppingham, and a week later it was announced that the Senior Classic at Cambridge was, for the first time, a lady student—Miss Ramsay, of Girton College. On July 2, a banquet (at which were present representatives of all grades of education from the elementary schools to the universities) was given by the chairman of the London School Board to Prince Albert Victor and a large number of gentlemen, to celebrate the development and progress of education during the last fifty years. Two days afterwards was opened the central establishment of the City and Guilds of London Institute for the Advancement of Technical Education. On July 19 Sir William Hart Dyke introduced into the House of Commons his now famous Technical Instruction Bill,* which after a good deal of debate, was unfortunately included among the (Parliamentary) innocents massacred later on, though the Government are pledged to its re-introduction during the next session. In the first week of September a committee was appointed, under the chairmanship of Sir Richard Paget, to inquire into and report upon those agricultural and dairy schools that are fairly entitled to Government grants. On October 1 the Asso-

* See above for a summary of the main provisions of this measure.

iated Chambers of Commerce (Sir Bernhard Samuelson, president) took up and discussed the question of technical instruction, at the same time receiving a detailed report on the subject of commercial education, both on the Continent and in America. The same month was marked by the announcement of two munificent bequests, that of Mr. Richard Quain, F.R.S. died Sept. 15, 1887) of nearly £75,000 to University College, London; and that of Mr. Richard Ferridge of £200,000, to be "applied for the advancement and propagation of education in economic and sanitary science in Great Britain." On October 22 died the Rev. E. Thring, in his sixty-sixth year, the famous head-master of Eppingham School, equally successful as a practical teacher and a writer on the science and

art of education, and leaving behind him a name and reputation as high, perhaps, and as well known as that of the celebrated "Arnold of Rugby." In the first week of November a preliminary meeting was held and steps were taken for the establishment of a branch of the Working Men's College in South London. On November 3, the Yorkshire College, Leeds, was formally admitted to the Victoria University; and on November 5 an important conference on technical instruction, opened with an address by Professor Silvanus Thompson, and largely attended by trained artisans and working men, was held at the City Guilds Technical College. On November 10, for the first time in the history of the Victoria University, some lady graduates were presented with "cap and gown."

English Paupers—Number and Cost.

In official language the word "pauper" is limited to those persons who, at the time being, are in receipt of relief at the expense of the rates. The relief may be considerable, as in the case of the indoor poor, who are wholly lodged, fed, and clothed from that source; or, inconsiderable, as in the case of the outdoor poor (not in asylums), who may be pauperized by the Union doctor's visits and medicines, covered by the outlay of a few shillings. These outdoor paupers have but a small pittance individually considered; this has led the Local Government Board to the conclusion that "the old abuse of relief in aid of wages" still extensively prevails.* The pauper census is taken every year on the 1st January and 1st July. These days approximately represent the *maximum* and the *minimum* pauperism. It can, however, be shown from special tables that pauperism is usually heaviest in February and lightest in September. The cost of relief practically comes under two sections: (1) Personal relief, varying with the number of recipients; (2) General relief, not individually apportioned or apportionable.

The expenditure for the parochial year 1884-85 was £8,491,600. The three first items are "personal." In maintenance, chiefly the cost of food, clothing, &c., of the inmates of workhouses, £1,921,587; outdoor relief, doles in money and kind at the paupers' abode, £2,469,846; maintenance of lunatics in asylums and licensed houses, £1,188,012. In the returns of the number of paupers, the asylum inmates are classed with the outdoor. The total of the "personal" relief was £5,579,445. The remainder falls within the second section. Workhouse and other loans paid, and interest, £501,932; salaries and rations of officers, and superannuations, £1,356,943; and other expenses connected with relief, £1,053,280; the "general" relief amounted to £2,912,155: the one to the other about 2 to 1.

Comparing 1884-85 with 1875-76, the paupers increased by 19,192 only, while the expense of their relief had risen by £1,155,742. This is to some extent explained by the more costly recipients on the rates latterly; namely, the indoor poor and the outdoor asylum paupers.

Indoor paupers in 1875-76 were 143,084; in 1884-85, 183,820. Outdoor paupers, less those in asylums in 1875-76, 572,912; in 1884-85, 538,596; and in asylums, 1875-76, 33,480; in 1884-85, 46,522.

The subjoined table shows the number of paupers and the expenditure in relief for ten years:—

Parochial Year.	Total of Mean No. of Paupers.	Cost of Relief.	Cost per Pauper
1875-76	749,476	£7,335,858	£9 15 9
1876-77	719,949	7,400,034	10 5 7
1877-78	729,089	7,688,650	10 10 10
1878-79	765,455	7,829,819	10 4 7
1879-80	808,030	8,015,010	9 18 5
1880-81	790,937	8,102,136	10 4 10
1881-82	788,289	8,232,472	10 8 10
1882-83	782,422	8,353,292	10 13 6
1883-84	765,914	8,402,553	10 19 5
1884-85	768,938	8,491,600	11 0 10½

Here the ordinary outdoor paupers show a decrease of 34,316, while the outdoor who were in asylums increased by 13,042; and the workhouse paupers were greater in amount by no less than 49,736. The cost per head of the ordinary outdoor poor was £4 11s. 8½d. for the year, or only 3d. per head a day. Clearly the Local Government Board would be still justified in calling this pittance so much "in aid of wages." The cost of outdoor poor in asylums is as near as may be 10s. a week each; the Government refund the local authorities 4s. a week, or 40 per cent. of it.

There are some incidental numbers and rates worthy of note. The estimated population of 1884-85 was 27,132,000; on this the total mean number of paupers was 28½ per 1,000; the mean number of adult able-bodied included in that total was 95,843, or 3½ per 1,000 of population. The ratable value, i.e., the amount on which the poor rate was incident, amounted to £143,222,000; that portion of the rate assigned to relief was 1s. 2d. in the pound; the cost as measured on the population was 6s. 3d. per head; that is to say, a poll-tax of that sum would have defrayed the whole of the relief otherwise charged to the poor rate. There are some additions to be made to the amount officially termed "relief to the poor." We have in the return more than £679,588 unclassified, half of which may be safely apportioned to relief, say, £340,000. Then there are upwards of 1,700 lunatics in counties and boroughs chargeable to other than the poor rate, whose maintenance would be quite £41,000. Add these sums and the relief to the poor in 1884-85 cost £8,876,000, all told.

* 11th Annual Report.

THESE returns for the year 1884-5 (ending Sept. 30th, 1885) showed a general decrease of crime, the number of indictable offences reported by the police being over 6 per cent. less than in the previous year; the number of persons sent for trial at Assizes and Sessions being 5½ per cent. less; the number of persons proceeded against summarily before Justices being also 5½ per cent. less; the number of commitments to prison being 7½ per cent. less; the number of the criminal classes at large and known to the police being 1½ per cent. less; and the number of houses of bad character being 2 per cent. less. This decrease has been maintained generally in the year 1885-6, except in so far as a still larger reduction (6½ per cent.) in the number of persons proceeded against summarily is partly counterbalanced by an increase of 2 per cent. in the number of indictable offences reported. This increase, as well as a corresponding increase in the number of persons committed for trial and of commitments to prison, is probably due to increased efficiency on the part of the police, and is a matter for congratulation rather than otherwise.

POLICE.—The increase in the number of police and constabulary, the actual number of whom was 36,447, was 842, following an increase of 609 in the previous year. The actual number of men "in the ranks" (constables) was 29,685, and of sergeants, 3,632. The gross total gives one constable for every 765 of the population. Of the total, 13,855 were Metropolitan Police, and 902 City Police. The gross cost of the force was £3,571,453, or £722,380 more than ten years previously. Salaries and pay absorbed £2,779,043; clothing and accoutrements, £181,634; buildings, &c., £270,771; and superannuations, £141,656. From the total cost must be deducted £180,422 paid by private individuals, Government Departments, &c., for "special services." The average cost of each man was £97 19s. 9d., or £1 9s. 3d. less than in 1883-84. Out of the total cost £1,444,792 was chargeable to the Metropolitan Police, and £96,907 to the City Force.

THE CRIMINAL CLASSES.—Under this head are included all known thieves, depredators, offenders, and suspected persons, those, however, known to have been living honestly for one year at least subsequently to their discharge after any conviction being excluded. The gross total was 34,098, a decrease of 1,657 since 1883-4. London is in the enviable position of showing a decrease larger than any other district, viz., of 213, or 8 per cent., from the previous year. Next to the atmosphere of London, that of Manchester, Blackburn, Bolton, and other centres of the cotton and linen manufactures seems least suited to the constitution of the classes referred to, those centres showing a decrease of 124, or 7½ per cent. The seats of the small textile fabrics, such as Coventry, Congleton, Macclesfield, and Nottingham, come next with an increase of 62, or nearly 10 per cent., and the cotton centres show a decrease of 124, or 7 per cent. On the other hand, the largest increase was 274, or 11 per cent., in the Eastern counties, and 9, or 4½ per cent., in the "pleasure towns," such as Bath, Brighton, Ramsgate, &c. In proportion to population the seats of the hardware trade (Birmingham, Stafford; &c.) are the worst off, the criminal classes there numbering 1 for every 414 of the inhabitants, whereas in London the proportion is only 1 in 2,019, and in the pleasure towns 1 in 1,438. No other district or group of places has a smaller proportion than 1 in 992.

HOUSES OF BAD CHARACTER.—Under this head are included the resorts of thieves, depredators, and "suspects," brothels as such not necessarily appearing unless frequented by the criminal classes for criminal purposes. The total number was 3,424, of which 238 were in London.

INDICTABLE OFFENCES.—In the number of offences under this head reported as having been committed, all larcenies when the value exceeds 5s. are at first included, but when offenders are brought before the magistrates and dealt with summarily the case is omitted from the record and included in the return of "Summary Proceedings." Larcenies under 5s. in value are not noticed unless the offender is brought to justice. The number of "indictable offences" reported under this system as having been committed in the year 1884-85 was 44,962, or 2,127 less than in 1883-4. "Malicious offences against property" were 566, or 62 less than in the previous year. The only class of cases in which the returns show a steady growth of crime as compared with 1883-84, are forgery and offences against the currency, of which 948 were reported, or an increase of 93. The crimes classed as "offences against the person" numbered 3,626, or 461 more; "offences against property with violence," 6,630, or 552 more; but there was a decrease in 1884-85; "offences against property without violence," 31,249, or 3,073 less; and other offences, 1,988, or 54 less. It is noticeable that offences against women and children show a considerable increase, the more serious cases of this class numbering 943 (exclusive of over 400 cases under the Criminal Law Amendment Act), against 780. Whether this increase is to be attributed to the flood of obscene literature with which this country was deluged in connection with a well-remembered "agitation" in the summer of 1885, will be more apparent when next year's returns are published; but it is a striking fact that within three months of the publication of the literature referred to, the very result which was foretold as its certain consequence should have been conspicuous. For the total number of indictable offences reported, 19,285 persons were apprehended, against 20,366 in the year 1883-84, the proportion of apprehensions to offences being 42·9 per cent. in the later year and 43·2 per cent. in the earlier year. Of the 19,285 persons apprehended, 4,843 were discharged, and 14,442 committed for trial or bailed.

SUMMARY PROCEEDINGS.—The total number of persons proceeded against summarily in the year was 639,776, a decrease of 44,305, or 6·4 per cent. as compared with the previous year. Of these, 509,095 were convicted, a decrease of 39,341, or 7 per cent. The convictions thus stood in the proportion of 75·5 per cent. of the number proceeded against, as compared with 80·1 per cent. in the previous year. In the detailed figures can be seen, among other points

e effects of the recent movement in favour of abstention from intoxicating liquors, the number of cases of drunkenness having fallen from 183,221 to 165,139, and there is a decrease from 76,173 to 67,093 in the number of offences against the Elementary Education Acts. The principal offences were as follows:—stealing and attempts to steal, 45,759 against property; 1,924; malicious offences against property, 1,068 against 22,668; assaults, 77,317 against 1,842; offences against the game laws, 11,082 against 11,841; vagrancy, &c., 51,633 against 3,412. The punishments inflicted ranged from money fine in 373,530 cases to imprisonment from 1 to 14 days in 34,591 cases, up to one month in 21,793 cases, and up to 6 months in 14,455 cases, with over 6 months in 52 cases; 5,474 offenders were sent to reformatory and industrial schools, 3,157 were whipped, and the rest either liberated on recognizances or otherwise dealt with.

APPEALS AGAINST JUSTICES' CONVICTIONS.—The appeals against "Justices' justice" numbered 171 in 1886 against 184 in 1885. In 97 cases, or over half, the convictions were affirmed; in 8 the sentence modified, and in 56, or rather less than one-third, the convictions were quashed. As the total number of convictions was 509,095, the appeals were only one in about 4,500, and the actual reversals only 1 in 15,000.

CORONERS' INQUESTS.—The total number of verdicts given by coroners' juries was 28,940, 9,611 of which the body was that of a female. 177 verdicts of murder were recorded, 147 of manslaughter, 4 of justifiable homicide, 2,222 of suicide (559 being females), 11,003 of accidental death; 2,674 of "found dead;" 397 deaths were attributed to excessive drinking, 282 to "want, cold, or exposure," 142 to disease aggravated by neglect; 8,828 inquests, or 30.4 per cent., were on bodies of infants under 7 years of age (of whom 1,095 were illegitimate).

CRIMINAL PROCEEDINGS.—It is stated above that the total number of persons committed for trial during the year was 14,442; the actual number tried was 13,974, the difference being due to the fact that all the actual committals of one year do not necessarily come on for trial in the same year. There was a decrease in 1885 of 1,190, or 8 per cent. as compared with 1884. In 1886 there was an increase of 388, or 2.8 per cent. upon the figures for 1885. Of the prisoners, 2,997 (338 being females) were tried for offences against the person, including 72 charges of murder, 109 of manslaughter, 924 serious offences against women and children (an increase of 228, or 21 per cent. over the year 1884). Of offences against property there were 1,881 cases with violence, and 7,365 without violence, mostly larceny and frauds. Of offences against the currency and forgery there were 555 cases (a noticeable fact being that there was no case of counterfeiting Bank of England notes in 1885, and only one in 1886). Of arson and other malicious offences against property there were 279 cases, and of miscellaneous offences, such as riot, disorderly behaviour, &c., there were 897 cases. Altogether 10,686 persons were convicted, or 77.8 per cent. of the total tried, being almost exactly the proportion in the two previous years. Thirty-five sentences of death were pronounced in 1886, being 10 more than in 1885, but they were carried into execution in only 19 cases, 14 being commuted to penal servitude for life, while 2 were respited as lunatics; 910 prisoners

(69 being women) were sentenced to penal servitude (8 for life).

CROWN CASES RESERVED.—Fourteen cases were submitted to the consideration of the Court of Criminal Appeal in 1886, and in all but two of these the conviction was affirmed.

PRISONS AND PRISONERS.—There are now 61 local prisons, formerly known as the County and Borough Prisons, but now called Her Majesty's Local Prisons, as distinguished from the convict prisons. Into these local prisons 179,324 persons were received during the year, 45,677 being females. Of these 10,587 were persons under remand and ultimately discharged; 11,924 were prisoners fully "committed for trial;" 138,015 persons convicted summarily; 2,079 committed for want of bail; and the rest debtors committed on civil process, military and naval offenders, &c. These figures do not tally with the returns of prisoners dealt with in the foregoing paragraphs for two reasons: first, they are for a different period; and secondly, because many prisoners here entered as "convicted summarily" are persons who had been fined but were ultimately committed in default of payment. Besides those actually received into prison during the year there were 14,379 in prison at the commencement of the year. At the end of the year there remained 15,451 prisoners in custody, the removals being accounted for as follows: on termination of sentence or commitment, 175,949; on pardon or commutation, 261; to reformatories, &c., 1,215; to lunatic asylums, 160; on bail, 1,561; at the hands of the hangman, 16; by suicide, 12; by death otherwise, 125; while 3 escaped. In addition 1,200 (176 being women) were removed to convict prisons, whither we will (in the spirit) follow them. These ladies and gentlemen went to join 7,973 comrades already undergoing penal servitude; and at the end of the year 7,186 remained in servitude. Only 331 of the removals were due to expiration of sentence, 1,486 convicts being liberated on licence, 60 on remission or commutation, and 9 on medical grounds, while 5 were transferred to lunatic asylums; 87 of the removals were due to death, and 1 to suicide.

ANTECEDENTS OF PRISONERS.—Of the total number of persons proceeded against summarily and apprehended for indictable offences, 114,873 of the former and 3,540 of the latter, or 118,413 altogether, were females. Of these 20,525 were prostitutes, 8,984 vagrants and suspicious characters, 9,585 habitual drunkards; 35,785 of "good character," and 40,049 of "character unknown." Of the men, 268,357 were of good character, 171,701 of character unknown, 59,165 vagrants and suspects, and 26,416 habitual drunkards—figures which suggest that the general character of the female offenders is much worse than that of the men. This view is borne out by the experience of the prison officials in the case of prisoners committed to their charge. Of the total number of persons committed to gaol during the year no less than 79,997 had been previously committed; 24,216 once before, 12,107 twice, and 15,450 more than ten times; of the last-named 9,764 were females. Of the women, 16,027 could neither read nor write, 28,231 could read or write imperfectly, 941 read and write well, and 35 were of superior instruction. Of the men, 30,887 were unable to read or write, 91,336 could do so imperfectly, 3,037 well, and 143 were of superior instruction.

The classes from which the prisoners were drawn were chiefly labourers (77,632): charwomen and needlewomen 11,329, mechanics and skilled workers 24,020. 82 per cent. of the total number of prisoners were of English birth, 3 per cent. Welsh, 2 per cent. Scotch, and 10 per cent. Irish.

REFORMATORY AND INDUSTRIAL SCHOOLS.—Youthful offenders before being sent to a Reformatory school must have been sentenced to a previous term of imprisonment for 10 days or more; they must be under 16 years of age, and must not be detained less than 2 years or more than 5. The number of these schools, including the "Cornwall" ship, off Purfleet, and the "Akbar" and "Clarence," at Liverpool, is 48. To these schools 1,082 boys and 187 girls were committed in the year 1885-86, or 81 more than in the preceding year; 87 boys and 32 girls could read and write well on admission; 79·6 per cent. of the whole were committed for larcenies or attempted larceny, 4·9 per cent. for burglary, &c., and 5·6 per cent. for vagrancy. There were 4,380 offenders under detention at the beginning of the year, and 4,341 remained at the end.

Besides the Middlesex Industrial school at Feltham, there are 141 Industrial schools certified by the Secretary of State for the reception of children under 12 charged with offences short of felony, and children under 14 begging or wandering at large or refractory, without the necessity for a previous commitment to prison. Altogether 4,564 boys and 898 girls were committed to these schools in the year, in addition to 11,051 boys and 3,015 girls already under detention.

CRIMINAL LUNATICS.—The number of criminal lunatics under detention during 1886 was 938 (of whom 589 were at Broadmoor). 291 had been guilty of murder, 4 of infanticide, and 173 of attempted murder; 30 of the inmates died during the year, and 218 others were liberated or removed, the number still detained at the end of the year being 642.

CIVIL PROCEEDINGS: CHANCERY DIVISION.—With 798 causes brought forward from the preceding year the total number of proceedings set down for disposal in the Chancery Division in 1885-86 was 2,733, of which all but 744 were cleared off by the end of the year in the 1,232 days on which the judges sat between them (including 10 days' sittings of the Vacation judges). Besides the above, 14,812 "orders" were made in the Chancery Registrars' Office, on which fees to the value of £10,976 were paid; and 24,024 summonses were issued on proceedings in chambers, on which fees to the value of £17,591 were paid. 117 orders were made for the winding-up of public companies, the amount of calls made under such orders being £127,500; while £1,002,391 was ordered to be paid to creditors, and £9,590 to shareholders. In other estates 1,289 receivers' accounts were passed, showing receipts £7,566,179 and expenditure £6,867,000, and 568 sales of estates were ordered realizing £1,075,837; 1,834 accounts other than those of receivers were passed, representing nearly £19,000,000 in receipts and expenditure. In lunatics' estates the receipts were £673,448, and disbursements £567,841. Altogether the business of the Pay Office of the Chancery Division included the receipt of £11,233,492 in cash and of £5,846,117 in securities, and the payment of £11,731,523 in cash and £7,830,837

in securities. The balance in the hands of the Court on 39,944 accounts open was £71,946,527 in probate and £3,931,054 in cash.

PROBATE COURT.—In the Principal Registry in London 13,970 probates and 6,624 letters of administration were granted, the stamps on which amounted to £2,325,870, the gross value of effects being £80,070,826. In the District Registries 20,310 probates and 10,201 letters of administration were granted, the value of the property passed being £47,988,260, and of duty £1,200,306, bringing up the total value of property concerned to £123,059,086, and of duty to £3,526,176.

DIVORCE COURT.—575 petitions for dissolution of marriage were filed during the year, being 141 more than in 1884-85, and on these 419 decrees *nisi* were issued. In 15 petitions for nullity 11 decrees were issued. In 133 petitions for judicial separation 47 decrees were granted; in 22 for restitution of conjugal rights 6 decrees were issued, and one petition for declaration of legitimacy was granted. Including cases in which decrees *nisi* had been issued in the previous year, 325 decrees absolute were issued. The total fees received amounted to £6,161, 19 petitions being in *forma pauperis*.

BANKRUPTCY.—The returns of bankruptcy are of interest as an indication of the commercial condition of the country. Last year receiving orders were made in 4,566 bankruptcies, 61 liquidations, and 189 compositions, the respective figures for 1884 being 2,998, 485, and 687, or a total increase of 646 cases. The total amount of liabilities was, however, only £7,913,871 as compared with £13,989,995, while the assets were £2,855,160 compared with £4,015,998, or 36·2 per cent. as against 28·7 per cent., thus showing that the new procedure facilitates proceedings and increases the creditors' chances of recovering from their debtors.

COUNTY COURTS.—980,388 complaints were entered in County Courts, and 25,952 in the City of London Court; the total amount claimed being in County Courts £3,009,838, and in the City of London Court £117,738. Out of the total cases there were only 4,317 non-suits and 9,915 judgments for defendant, the total amount of debts recovered being £1,571,263, carrying £129,475 costs. Judgment summonses were issued against 166,568 defendants, of whom 45,000 were committed, and 5,510 actually imprisoned; while warrants were issued against 42 who absconded. Besides matters of debt, the County Courts have jurisdiction in proceedings under the Charitable Trusts Act, and under the Act of 1857 for the protection of wives deserted by their husbands, and also in actions under the Employers' Liability Act. In addition, certain courts—132 in all—have jurisdiction in bankruptcy, while 24, including the City of London Court, have been appointed to have Admiralty jurisdiction, while others have authority to grant decrees for the probate or administration of wills. There are altogether 56 County Court Circuits, the number of places at which Courts are held being 501. In circuit No. 6, in which Liverpool is comprised, there are 2 judges; and each of the others, one judge. Besides the above there were various proceedings in the Lord Mayor's Court, and in special local courts, of which there are 25. In 12 of these courts, however, there were no proceedings last year; indeed, in six of them there have been no proceedings for ten years past.

In common with the returns for England, the criminal returns for Scotland show a general decline in the number of offences reported and of persons convicted in 1886. The offences made known during the year show a decrease of over 9 per cent. as compared with 1885; the number of persons proceeded against summarily a decrease of over 10 per cent.; the number of persons committed for trial a decrease of over 5 per cent.; and the number of commitments to prison nearly 12 per cent.

POLICE.—The available police force in Scotland at the end of 1886 numbered 4,055 of all ranks, an increase of 47 over the previous year, of whom 3,260 were constables. 148 of the men are returned as "not authorized," *i.e.*, they were employed and paid for by private persons and bodies, and their cost does not come into the above total.

OFFENCES COMMITTED AND PROSECUTED.—For 115,865 offences reported during the year (against 126,643 in 1884), 125,589 persons were proceeded against summarily. The principal offences with which they were charged were murder, 13; burglary and housebreaking, 922; other thefts, 11,763; drunkenness, 15,963. 90,128 defendants were convicted at the instance of the police, and 7,531 acquitted; 872 cases were left standing at the end of the year. Altogether, including the cases standing over from the previous year, 2,619 persons were committed for trial, or 113 less than in 1884; of these 2,056 were tried, 1,838 being convicted, 20 outlawed for not answering to their bail, 55 found insane, 53 acquitted on a verdict of "not guilty," and 141 on a verdict of "not proven." Seven of the prisoners had been committed for trial for murder, but they were all acquitted except one. The other principal offences were assaults on women, 74; other assaults, 525; burglary, &c., 629; forgery, 8; arson, 34. The sentences ranged from penal servitude (including one for life) in 168 cases, to imprisonment in 1,552, to fines and whipping in 73.

PRISONS AND PRISONERS.—The total number of prisoners received into the 20 Scottish prisons, and including those received under the Prisons Act in "Police-cells" licensed by the Secretary of State in 15 towns, in the year, was 47,994 as compared with 55,995 in 1884. Of these 936 were under 16 years of age, 6,837 were between 16 and 21, and 5,073 over 50; 8,416 had been previously convicted once, 10,116 between two and five times, and 946 over fifty times.

CIVIL PROCEEDINGS.—In the Inner House of the Court of Session, 1,057 causes were initiated during the year, and final judgment was given in 628, leaving 196 in dependence at the end of the year. The result of the judgments pronounced was favourable to the "pursuer" in 395 cases, and to the respondent in 207, 26 being "mixed" judgments. Only 8 judgments were on jury verdicts. 182 cases were appeals from the Outer House, only 41 of whose decisions were totally and 19 partially reversed. In the Outer House of the Court of Session there were 2,180 causes during the year, in 1,238 of which final judgment was given, only 19 of which were on jury verdicts; 632 were in dependence at the end of the year, the rest being removed before final judgment; 985 judgments were for the pursuer, and 8 mixed judgments, partly for pursuer and partly for respondent.

SHERIFFS' COURTS.—Besides 16,390 miscellaneous applications and petitions there were 10,554 causes before these courts in 1886, or 796 more than in 1885; yet the number remaining over at the close of the year, *viz.*, 1,798, was only 151 in excess of the number in dependence at the close of the previous year. Judgment was given in 7,353 causes. There are altogether 55 Districts in which Sheriffs' Ordinary Courts are held, at all of which cases were heard in the year, the greatest number being at Glasgow, 1,991, and at Edinburgh, 1,152. In one instance, in Kirkcudbright, a case had been in dependence ever since 1876.

DEBT-RECOVERY COURTS.—The legal business transacted in these courts is the only class which shows any increase in recent years, the number of causes (5,828) in 1886 being higher than in the four previous years, and 312 more than in 1885. In the Sheriffs' "Small Debt Courts," also, there was an increase in the number of cases, which rose from 54,885 in 1884 to 57,445 in 1886; though the debts claimed in the 41,934 cases in which decrees were issued only rose from £177,038 to £177,219. In the "Justice of Peace Small Debt Courts" again there was an increase, the cases numbering 18,845 against 18,024. There are 86 Districts with "Debt Recovery Courts," in four of which, however, no business was done in the year. There are 113 Districts with "Sheriffs' Small Debts Courts," in all but five of which cases were heard; and 101 with "Justice of Peace Small Debts Courts," the services of only 38 of which were called into requisition in the year.

BANKRUPTCY.—The Scotch bankruptcy returns only go as far as the year 1885, when the cases actually before the court numbered 3,883, or 25 more than in 1883, of which only 362 were new cases (against 342 in 1883), no less than 3,519 cases having been brought forward from previous years; 57 out of 241 closed during the year by final division and discharge, having been over 5 years in progress. These 241 cases represented a gross estimated estate of £933,859, with liabilities £1,136,653; but of the estimated assets only £523,064 was actually realized; of this amount £169,820 was expended in "expenses," and £353,152 went to creditors; 24 of the estates were under £100, and 104 between £100 and £500; only 2 exceeding £50,000. The rate of dividend paid varied from 20s. in the pound in 6 cases to 1s. in 49, while in 27 no dividend was paid at all.

JUDICIAL FACTORIES.—There were 1,186 "judicial factories," of which 173 were new bonds, and the rest remnants from former years. These cases are analogous to the cases of wards of the Court of Chancery in England. The expenditure on behalf of wards was £121,356, of which nearly one-fifth went in commission and accountants' charges; and the receipts, £226,086, the court having in hand a total of £2,628,631 in cash and securities.

IRELAND, in common with the rest of the United Kingdom, shows a gratifying diminution of crime in the year 1886 as compared with previous years. The population it is true has also decreased, but the falling off in the number of offences has been larger in proportion than the decrease in the number of inhabitants. The total number of criminal offences during the year was 223,202, or 456·7 per 10,000 of the population, as compared with 240,297, or 481·2 per 10,000, of the population in 1884, showing a decrease of 17,095 in number, and of 28·5 in the rate per 10,000 persons. The decrease is mainly in the less serious offences disposed of summarily, there being a slight increase in those tried on indictment. Donegal heads the list of counties and districts in which there was least crime, Antrim coming next; while Dublin City heads the list of districts and counties showing the most crime, being followed by Cork City, Waterford City, Galway Town, and Limerick City.

POLICE.—The total effective strength of the Royal Irish Constabulary in 1885 was 12,812, a decrease of 489 as compared with 1885; and of the Dublin Metropolitan Police 1,217, or 12 less than in the previous year. The respective costs of the two establishments were £1,327,223 and £146,004, or £21,650 less altogether than in 1885. The proportion of constables to population was greatest in County Westmeath, where it averaged 44 for every 10,000 of the inhabitants; the counties ranking next being the South Riding of Tipperary, Meath, Kerry, and Limerick. The smallest force was 11 per 10,000 of the population in Antrim, Down, and Londonderry. In Dublin the city police averaged 32 per every 10,000 inhabitants. In Belfast the local force was 26 per 10,000.

THE CRIMINAL CLASSES.—Of 220,181 persons actually proceeded against, both summarily and on indictment, in the year, 161,182 were of previous good character; of 27,000 the character was not ascertained; 8,428 were suspicious characters, 4,232 prostitutes, 4,329 vagrants and tramps, 1,772 known thieves, and 2,450 habitual drunkards not included in the above heads. A special table showing the number of persons convicted three times and upwards of being drunk and disorderly, throws some light on the connection between drink and crime: the total number for all Ireland was 2,052, of whom 101 had been convicted over 10 times, 445 between 5 and 10 times, and the rest between 3 and 5 times. The habitual drunkards in the 7 principal towns of Ireland were in the proportion of 15·7 per every 10,000 of the population, whereas in the rest of Ireland they were only 4·0 in the 10,000. These proportions are in close accordance with the general returns of crime, for, taking all Ireland, the number of offences of all kinds committed was 431 per 10,000 of the population, whereas in the 7 principal towns it was no less than 923 per 10,000.

INDICTABLE OFFENCES.—The actual number of these was 7,315, or 206 more than in 1884. For these 4,294 persons were apprehended, being 59 per cent. of the number of offences, or 7 per cent. more than the proportion in 1884. The Dublin Metropolitan Police District stands at the head of the list of districts and counties in which the greatest number of indictable offences were committed, with 95·7 per 10,000 of the population; Kerry coming next with 23·6. Carrickfergus town stands at the head of the list of places with the least number of indictable offences, viz., 2 per 10,000; while Co. Down comes next with 4·6. Taking the provinces, Leinster shows 31·1 per 10,000, Munster 17·7, Connaught 6·7, and Ulster comes

last with only 6·8 per 10,000 of population. Offences against the person numbered 1,452 (against 1,392 in 1884), including infanticide 19, murder 35, attempt to murder, shootings, &c., 158, serious assaults 720; violent offences against property totalled 535, including burglaries and house-breaking, 305; offences against property without violence numbered 3,135; of arson there were 297 cases; of killing and maiming cattle 156, and other malicious offences 439. Not included in the above were 740 cases of intimidation, 9 of "offences against the Queen's authority," and 18 of having arms in a proclaimed district. The number of cases of intimidation shows an increase of 215 over 1884, but a decrease of 2,353 from 1881.

SUMMARY PROCEEDINGS.—These amounted to 215,887. The total shows a decrease of 17,501 compared with 1884; which, in common with the two previous years, had shown a large increase since 1878. Drunkenness constitutes over one-third of the cases dealt with summarily, and the relation between drunkenness and other crimes, and the preponderance of urban over rural crime which have been referred to above are illustrated in the details of these offences. In Dublin alone there were 12,699 cases of drunkenness out of 56,318 offences in that city; on the other hand the record of urban crime is swelled by a large number of offences against local bye-laws and against the Public Health Acts; no less than 12,112 of the former and 4,275 of the latter being recorded in Dublin, out of a total for all Ireland under these heads of 21,603. Of the total offenders, 35,913 were discharged; of those convicted the majority, viz., 135,838, were fined.

CRIMINAL PROCEEDINGS.—As above stated, 4,294 persons were apprehended for indictable offences in the year; of these 1,694 were discharged and 2,600 bailed or committed for trial, making with prisoners from the previous year a total of 3,028 persons for trial at Assizes, Commission, and Quarter Sessions in the year; of these 2,314 were tried by jury, 679 being acquitted, besides 16 found insane, and 1,619, or 70 per cent., being convicted; of the latter, 3 were sentenced to death, 94 to penal servitude, 1,169 imprisoned for various terms, and 13 sent to reformatory schools.

PRISONS AND PRISONERS.—There are 5 convict prisons in Ireland, 23 district prisons, and 24 smaller short-sentence prisons. Into all these 45,666 prisoners were admitted in 1886, of whom 17,096 (7,436 being women) were under detention at the end of the year. Three-fourths of the total were not actual criminals but persons detained as a pre-

ventive measure, 6,030 being lunatics, and 7,095 children in industrial schools. 22,103 prisoners had been previously committed, 7,048 of them more than 10 times, and of these last 4,994 were women. A remarkable fact—though one in harmony with that already referred to in the case of England—is that while the proportion of recommitments in the case of male prisoners is 50 per cent., the proportion in the case of females is 73 per cent. of the total prisoners of that sex, showing a greater proportion of habitual criminals among females than among male prisoners.

PROCLAIMED DISTRICTS.—A special feature of the administration of the criminal law in Ireland is the proclamation of districts under special Acts. Clare, Cork, Galway, Kerry, Leitrim, Limerick, Mayo, Roscommon, Tipperary, Westmeath, and parts of Longford, Sligo, and Waterford were proclaimed under the Act 6 Will. IV. c. 13. Under the Peace Preservation Acts, 1881-86, the whole of the provinces of Munster and Connaught, all Leinster except the counties of Louth and Wicklow and the city of Kilkenny, and part of Ulster, were "proclaimed," the

carrying of arms without a licence being made illegal.

PROCEEDINGS IN REGARD TO LAND.—The process-servers under the County Courts served 21,064 Civil Bill ejectments in 1886, as compared with 22,528 in 1884. The ejectments executed were 5,106, or 792 less than in 1884. The warrants issued to special bailiffs for summary recovery of possession of tenements were 886, against 767 in 1884. Under the Landlord and Tenant Act, 1870, there were 22 cases, compared with 26 in 1884, and only 4 per cent. of the number in 1878. At Land Sessions 8 decrees were issued, the gross amount claimed being £3,912, and the gross amount decreed being £709, or 18 per cent. This compares with 9 decrees in 1884, awarding £1,703, or 36 per cent. of the amount claimed. Under the Land Law Act, 1881, there were 7,240 new applications to have fair rents fixed, besides 3,455 standing over from the previous year. Rents were fixed in 2,698 cases, the former rents, amounting to £55,381, being reduced to £38,998, or by 29.6 per cent.; 8,030 agreements were made out of court, in which the former rents were reduced by 13.7 per cent.

COST OF CRIME AND THE ADMINISTRATION OF JUSTICE IN THE UNITED KINGDOM.

The following table shows the cost of the repression of crime in the three kingdoms respectively in the year 1886:—

	ENGLAND AND WALES.	SCOTLAND.	IRELAND.	TOTAL.
Cost of Police *	£3,571,453	£368,104	£1,533,166	£5,472,723
„ Criminal Prosecutions.....	159,490	Not given	55,473	214,963
„ Convict Prisons †	271,651	} 112,869§	136,666	857,764
„ Prisons ‡	336,578			
„ Reformatories and Industrial Schools ..	333,993	—	185,912	519,905
„ Criminal Lunatic Asylums	30,119	Not given	127,800	157,919
„ Coroners' Inquests	96,083	Not given	Not given	96,083
Total.....	£4,799,367	£480,973	£2,039,017	£7,319,357

The following is the *approximate* amount paid in Court Fees and allowed as taxed costs in proceedings before the Civil Courts:—

Court Fees	1,217,750	51,009	98,979	1,367,738
Taxed Costs (as far as shown)	1,952,495	39,914	182,311	2,174,720
Total.....	£3,170,245	£90,923	£281,290	£3,542,458

* Exclusive of superannuations, £208,525.

† Deduct value of prisoners' labour, £158,759.

‡ Deduct value of prisoners' labour, £116,126.

§ Deduct value of prisoners' labour, £5,120.

|| Towards which parents contributed £15,269.

The Glorious Revolution of 1688.

Two hundred years ago there landed at Torbay, in Devonshire, William, Prince of Orange, for the purpose, as his followers and supporters alleged, of restoring to the English people those political and religious rights that had been infringed during the sway of the Stuarts, and especially by the tyrannical Popish King James II. But men have mixed motives. William may have had strong religious sympathies, and may have felt hurt by the unconstitutional Acts of King James, but it is not impossible that he was influenced no less by desires of personal advancement and aggrandizement. The English as a nation are so strongly opposed to anything in the nature of sudden and radical changes, that it is not to a short period of time or a few trifling incidents must be attributed the successful issue of Wil-

liam's project, bringing about, as it did, the most momentous revolution in the history of this country. Great questions of principle had been at stake for years, and the struggle was undoubtedly brought to a definite decision far sooner than would otherwise have been the case by the imprudent conduct of King James. The whole story is long to tell; and to understand it aright, we must go back to the last days of Charles II.

On February 1, 1685, after a winter during which his health had been unusually good, King Charles was seized with what appeared to be an apoplectic fit, for which the physicians bled him, a method of treatment affording a temporary relief. Another attack, however, was feared, from which the attendants apprehended the worst; and, in consequence, Bishop

Sancroft—then Bishop of London—one of the most active opponents of popery, waited upon the King, and endeavoured to lead his mind away from earthly matters. To all his entreaties and prayers, as well as to those of Bishop Ken, who was also present, Charles turned a deaf ear, and it was a disputed point whether this arose from a total insensibility to the consolations of religion, or whether it was brought about by a genuine attachment to another faith than theirs. The question did not long remain in doubt. Four days later the King was taken in a second fit, and the physicians declared that he was unlikely to last twenty-four hours longer. At that the Duke of York ordered a Roman Catholic priest, Hudleston, to be fetched, and the King having instructed everybody excepting the Earls of Bath and Feversham to withdraw from the bedchamber, absolution was given him, and the holy sacraments were administered, including, finally, that of extreme unction. The doors were then opened again, and those without admitted. No public confession of his creed was made by the King, in all probability because the nation being in so suspicious a frame of mind the consequences were feared. Bishop Ken, who had returned to the bedside, endeavoured to stir in the dying monarch's mind some sense of remorse for the shameful life he had led, and would even have administered the Lord's Supper to him, but Charles declined to partake of it, pleading in excuse his physical weakness. The solitary phrase of a religious turn that he was heard to utter, was the expression of a hope that he might "climb up to heaven's gates;" after which he spoke a few final farewell words to his brother, commending to his care the Duchess of Portsmouth (Louise de Querouailles) and the sometime favourite, Nell Gwynne—though he breathed not a syllable of his neglected and faithful wife, nor of his people, nor of his servants, nor of the debts he owed on all sides. The next day, Feb. 6, he died, in the fifty-fourth year of his age, and the twenty-fifth of his actual reign; and thus ended a life in which it is difficult to find a praiseworthy action other than those induced by a prudential consideration of his own public position.

As Charles had died without legitimate offspring, the crown devolved upon his brother, James, Duke of York, an avowed and aggressive papist, and a firm believer in the doctrine of divine right. This prince had first married Anne Hyde, daughter of Edward Hyde, the famous Earl of Clarendon, and by her he had two daughters: Mary, married to William Prince of Orange, and Anne, married to Prince George of Denmark. His second wife was Mary d'Este of Modena, in whom the general interest is centred in a single incident related below. James was a man of very decided views, and his previous public conduct, more particularly in connection with the popish plots and the Test Act, was not calculated to allay the suspicions of the Protestant part of the nation. Yet his first acts as monarch were free from bigotry and partiality, for he announced to the Council that he was resolved to maintain the government both of Church and State as by law established. He belied his fair words, however, by his next proceedings; since, without the necessary parliamentary authority, he ordered the excise and customs duties, which had been voted only for Charles's lifetime, to be paid as

usual, and followed this up by attending High Mass in the full dignity of state. To his prudence must be attributed the retention of all the chief offices of the crown by Protestants: Sunderland being made secretary of state, Halifax president of the council, Rochester treasurer and his brother Clarendon, chamberlain. The King and Queen were crowned in Westminster Abbey on April 23, and the next month the new parliament assembled. It was largely composed of Tories and high churchmen, and, becoming rapidly submissive and subservient in proportion as the King grew arrogant and arbitrary, not only voted to his majesty the whole revenue enjoyed by his brother at the time of his death, but by their conduct probably did much to instil into the King's mind the first ideas of those events which finally cost him his crown. The earliest organized attempt on behalf of the Protestant religion came about in this way. The Duke of Monmouth, a natural son of Charles II., who had been compelled to leave the country at the end of 1684, now began to actively champion the Protestant cause, and leagued himself with the Earl of Argyll to invade the kingdom. The result was most unfortunate for the conspirators. Landing in Argyllshire, the Earl collected and armed nearly three thousand men, who after wandering about aimlessly for a while, dwindling in numbers as they went, were at length dispersed without a battle. The Earl himself was captured and taken to Edinburgh, where he suffered death. Meanwhile, Monmouth, with a few ships and barely a hundred men, landed at Lyme in Dorsetshire, and such was the magic of his name in the cause of religious freedom, that in less than a week he had assembled three thousand horse and foot. The whole of the west country was alive for his cause, although only the lowest of the people joined him; and this in spite of, nay, perhaps by reason of the violence of his proclamations, which imputed to the King not only a hateful tyranny but all the vilest crimes of which man is capable. At Taunton, Bridgewater, Wells, and Frome, the Duke was received enthusiastically and publicly proclaimed King, but he made the fatal mistake of not scoring a striking success while success was still possible; and his followers were already growing dispirited when the royal army, under Feversham and Churchill, advanced against them. The news of Argyll's defeat and capture made Monmouth despondent, and when battle was at last joined he went into it half-hearted and hopeless. At Sedgemoor, the rebellion was broken, and the leader, who had changed clothes with a peasant and fled from the field, was found some days afterwards lying in a ditch covered with ferns. All his tearful protestations and humiliating confessions to the King failed to procure for him the royal pardon, and he was executed, amid the tears of the populace, on July 15, 1685. The sequel was ten times worse than the movement itself, yet the hangings by the orders of Feversham and the brutal Kirke were mildness compared with the wanton inhumanities practised by the notorious Jeffreys from the judicial bench, a position that ought at least to have given its occupier a sense of what was decorous and just. In the Bloody Assizes not fewer than 320 persons are said to have fallen, many of them either altogether innocent or at most guilty of unproved charges.

For James, the result was most disastrous. He, however, could not read the signs of the

times, but at once gave his whole attention to those measures upon which his heart had so long been set; and in his opening speech to the parliament (Nov. 9) declared his intention of dispensing with the tests shutting out Roman Catholics from office, and also his determination to maintain a standing army. It was an unfortunate time for such announcements; Monmouth was dead, Louis XIV. had just revoked the famous Edict of Nantes, and thereby sent 50,000 Protestant refugees into this country; and the people became watchful, alarmed, and keenly suspicious. But worse than all, the King claimed the power of dispensing with all law so far as his own conduct went, and, by carefully removing from the bench those judges of whose partisanship he was doubtful, contrived to secure a favourable verdict of the courts on the point. He then proceeded to fill all the most important posts with Roman Catholics. Four papist lords were brought into the council—Belasyse, Powys, Arundel, and Dover; Halifax and Rochester were dismissed from office, though Sunderland, by changing his creed, managed to retain the royal favour. This was in 1686, a year equally momentous in its consequences to the English people and the Stuart dynasty. To overawe the dignitaries of the Established Church, who were beginning to express their alarm in public, a new ecclesiastical court, consisting of seven commissioners with the infamous Lord Chancellor Jeffreys at their head, was created, with full and unlimited powers in church matters. Moreover, James publicly expressed his obedience to the Pope, and negotiations were opened with a view to reconciling the kingdom with the Court of Rome. Roman Catholics were inducted into benefices in different parts of the country. Roman Catholics were thrust upon both Cambridge and Oxford, either for degrees or for the headships of houses and colleges. Roman Catholics were permitted to open schools and found monasteries in the capital; and, last and most alarming of all, an army, officered almost wholly by Roman Catholics, was collected and encamped at Hounslow Heath for the purpose of keeping in check the outspoken resistance of the Protestant Londoners. At length, in 1687, a Declaration of Indulgence to Roman Catholics was issued on the sole authority of the King.

As for the other parts of the kingdom, Scotland had been submissive and yielding from the first, and papal proselytism very successful; while in Ireland, where there was little cause for dissimulation, James, to make assurance doubly sure, recalled the Duke of Ormond and handed over the whole power to the general, Talbot, who was created Earl of Tyrconnel and became virtually Lord Lieutenant at the same time. Tyrconnel was a man after the King's own heart, and keenly zealous in the cause of Rome. Protestant citizens were disarmed on divers pretexts, and Protestant soldiers were dismissed the army and left to vagabondize where best they might. The previous bias of many, and the fiery energy of Tyrconnel, combined to render Ireland as zealous for the Court cause as even James himself could wish. A public question of importance, in which great principles of freedom and authority were at stake, now brought matters to a head. Towards the end of April, 1688, the King renewed the declaration of Indulgence published in the preceding year, and ordered that it should be read on two different Sundays, immediately after Divine

service, by the clergy in all the churches. The Archbishop of Canterbury, Sancroft, on consulting the bishops of his province, found that no fewer than eighteen of them, and the main body of the clergy, were resolved not to read the declaration; he therefore decided to co-operate with six others—Lloyd, Bishop of St. Asaph, Ken of Bath and Wells, Turner of Ely, Lake of Chichester, White of Peterborough, and Trelawney of Bristol—in petitioning the King not to insist upon their reading it. James was exceedingly angry, and told them they should feel what it was to disobey him. Then he consulted for several days with his most bigoted advisers, and unfortunately the counsels of Father Petre and the more violent section of the Jesuit party, prevailed. The seven bishops were cited to appear before the council, and having there acknowledged the petition to be theirs, were eventually committed to the Tower. The crown lawyers too were instructed to prosecute them for the seditious libel which it was urged they had written and published. The trial took place in Westminster Hall, and after a lengthy hearing and a deliberation of several hours by the jury, a verdict of "Not Guilty" was returned, amidst the applause of the audience within, succeeded by the joyful shouts of those without. Bonfires were lighted in the streets, and the most tumultuous excitement was indulged in, even by the army at Hounslow, from whose shoutings the King himself first learned the end of the famous cause. A few days before the Queen had borne the King a son—afterwards James Francis Edward, the Old Pretender—and what with the general dis-appointment of the Protestant party, the universal joy of the Roman Catholics, and the not unspoken belief of some that the child was not the Queen's at all, a critical period had come, though few knew it. Ever since the marriage of James's daughter Mary, but more particularly from the death of Monmouth forward, the hopes of the Protestants were constantly turned in the direction of Holland, where William, Prince of Orange, not yet in the prime of life, had already gained for himself renown as one of the rulers of Europe. Macaulay thus speaks of the Prince, who was destined to exert so great an influence on England:—"His name at once calls up before us a slender and feeble frame, a lofty and ample forehead, a nose curved like the beak of an eagle, an eye rivaling that of an eagle in brightness and keenness, a thoughtful and somewhat sullen brow, a firm and somewhat peevish mouth, a cheek pale, thin, and deeply furrowed by sickness and by care. That pensive, severe, and solemn aspect could scarcely have belonged to a happy or a good-humoured man. But it indicated, in a manner not to be mistaken, capacity equal to the most arduous enterprises, and fortitude not to be shaken by reverses or dangers. Nature had largely endowed William with the qualities of a great ruler; and education had developed those qualities in no common degree. . . . At twenty-three he was renowned throughout Europe as a soldier and a politician. He had put domestic factions under his feet; he was the soul of a mighty coalition; and he had contended with honour in the field against some of the greatest generals of the age. His personal tastes were those rather of a warrior than of a statesman; but he, like his great grandfather, the silent Prince, who founded the Batavian

commonwealth, occupies a far higher place among statesmen than among warriors. . . . The audacity of his spirit was the more remarkable because his physical organization was unusually delicate. Cruel headaches frequently tortured him. Exertion soon fatigued him. The physicians constantly kept up the hopes of his enemies by fixing some date beyond which, if there were anything certain in medical science, it was impossible that his broken constitution could hold out. . . . He was born with violent passions and quick sensibilities; but the strength of his emotions was not suspected by the world. . . . His affection was as impetuous as his wrath. Where he loved, he loved with the whole energy of his strong mind. When death separated him from what he loved, the few who witnessed his agonies trembled for his reason and his life." Such is the character given to William, Prince of Orange, the man to whom people in England naturally looked when they felt themselves affronted and unjustly treated by the arbitrary conduct of their own King. Dykvelt was sent as secret envoy to England, with full instructions from William to sound the various sects and parties who were likely to befriend him should he assume the offensive. The birth of a son to James had driven many to despair, and Zulestein, who was specially deputed to congratulate the King upon the auspicious event, took back to Holland invitations from most of the great men in England, almost beseeching William to help them in recovering those rights of which they had been deprived. The Prince accepted the offers made, and preparations for the invasion were completed with a secrecy and a strategy that concealed William's real aims from the eyes of all save the keen and astute Louis XIV. of France. That monarch not only advised James of the impending danger, but even offered to assist him in the defence of the kingdom with whatever men and ships might be deemed necessary. James, unable to believe that his son-in-law was really meditating a descent on England, foolishly rejected the French monarch's proffered help, but his blind folly was soon rudely disturbed. The English minister at the Hague sent home direct and indisputable intelligence to the same effect. Now for the first time were James's eyes opened to the imminence of the danger, and, though momentarily staggered, he hastened to repair the evil consequences of his own illegal acts. The charters were restored to London and various other corporations; the court of ecclesiastical commission was annulled, and the bishops who had been charged with seditious libel were mollified in every possible way—but all came too late. James had "burned his boats," though he knew it not, in the fatal enterprise, and the contest now lay between himself and William. That prince sailed from Helvoetsluys on Oct. 19, and landed his army of 14,000 men at Torbay safely on Nov. 4-5—an auspicious date—having sent on before and caused to be distributed broadcast through England a declaration, in which he stated his purposes in coming were (1) to protect the liberties of the people, (2) to convene a legal and free parliament, and (3) to decide the disputed question of the legitimacy of the birth of the Prince of Wales. For a few days the chances of success were doubtful. Then Sir Edward Seymour, the Earl of Abingdon, and other gentlemen went over to the Prince. Yet

the worst misfortune was the disaffection existing in James's own army, for Lord Churchill—whom gratitude (had he known the meaning of the word) ought to have restrained from such conduct—not only deserted his royal benefactor and friend, but carried with him some troops of dragoons and their officers, besides various noblemen of distinction, including among others the Duke of Grafton, Prince George of Denmark (the King's son-in-law), and the Duke of Ormond. This behaviour on the part of his children and near relatives unnerved James; he retreated hastily to London, called a council of peers and prelates, issued writs for a new parliament, and deputed Halifax, Godolphin, and Nottingham as special envoys to treat with the Prince of Orange. The only terms to which William would listen were arrogant and severe, and nothing whatever would induce him to delay his advance the while the parleying went on. James, seized with sudden fright, sent the Queen and the young Prince to France, intending to follow as soon as possible. Attended only by Sir Edward Hales, he tried to reach a ship lying in the river (Dec. 11), but was recognized by the populace, captured, and carried back to London. At this terrible crisis the prelates and peers assembled to take what steps might be desirable for the public peace: they elected as their speaker Lord Halifax, and both cared for the safety of the city and, with an excellent prudence, ventured to congratulate the Prince of Orange on the success attending his progress. The real difficulty was what to do with the unhappy King, but the clever diplomacy of the invader solved the knotty point. James was persuaded to retire privately to Ham, and from there to Rochester, where, becoming more and more convinced that the tide was set against him, and urged also by pressing letters from his Queen, he embarked on board a frigate, and landed at Ambleteuse in Picardy on Christmas Eve. The immediate question now pressing for solution was the settlement of the government.

The bishops and peers urged William to summon a convention parliament, but he was anxious to get the support of something more nearly like the unanimous voice of the nation. The Lord Mayor, the aldermen, and fifty of the leading town councillors, and all members who had sat in the House of Commons in any parliament of Charles II. were therefore called together, and the Prince, acting in conjunction with them, proceeded to discharge the duties of the head of the state. On Jan. 23, 1689, the convention parliament assembled, and the thanks of both houses having been given to the Prince of Orange for his conduct towards England, the following vote was passed, though only after many stormy debates in the House of Lords: "That King James II., having endeavoured to subvert the constitution of the kingdom by breaking the original contract between the King and people, and, by the advice of the Jesuits and other wicked persons, having violated the fundamental laws and having withdrawn himself out of this kingdom, has abdicated the government, and that the throne is thereby vacant." A Bill of Settlement was also passed, and to it was attached a Declaration of Rights; but both these documents were afterwards practically embodied and extended in the famous Bill of Rights, of which a short abstract is given below. Three weeks after the meeting of parliament, the crown was tendered to William and

Mary by the Marquis of Halifax. The offer was accepted, and they were accordingly proclaimed on Ash Wednesday, Feb. 13, 1689, King and Queen of England, France, and Ireland. Thus was brought to an end the interregnum of more than six weeks—a period of great disorder and tumult, during which King James's soldiers had been disbanded and left to wander and ravage at their own sweet will; and terrible riots, ostensibly aimed against well-known Roman Catholics, but really in great part against all decency and order, occurred for many days and nights together. In the midst of the uproar, too, the infamous Judge Jeffreys was caught, disguised as a sailor, at Wapping, and was handed over by the people to the Lord Mayor, who sent him to the Tower, where he died shortly afterwards from the maltreatment he had received on the night of his capture.

So far the revolution was an accomplished fact, but the throne of the new monarch was as yet by no means secure. William's prudence and foresight, however, did much to make it so. Personal and political leanings were alike ignored in his choice of ministers: the Earl of Nottingham and the Earl of Shrewsbury, Danby and Halifax were among his leading state advisers. On Feb. 23, a special Act was passed converting the convention parliament into a regular parliament, though the legality of the procedure was questioned by many, including some who admitted its expediency. The Whigs granted William a revenue of only £1,200,000, and even proceeded to apportion that amount equally between the public expenses and the civil list; in fact, the extreme parsimony of those who had egged him on to aim at the sovereignty so irritated him that at one time he contemplated giving up the reins of government altogether. No sooner was he settled on the throne than difficulties and dangers beset him on all sides. A new oath of allegiance and supremacy was imposed upon all holders of offices both in Church and State, and this was absolutely rejected by the Archbishop of Canterbury, eight bishops, and many hundreds of the inferior clergy, many of whom were most learned and pious men; these were afterwards known as Non-jurors. In May, 1689, the Toleration Act was passed, exempting Dissenters from the penalties of the existing religious statutes, on condition that they subscribed to the new oath just mentioned. In Scotland a Convention of the Estates had met in March and abolished Episcopacy, re-established Presbyterianism, and proclaimed William and Mary King and Queen; but the followers of the exiled James were not disposed to submit quietly to this state of things. Under the lead of the gallant and chivalrous Dundee, the Jacobites assembled and attacked and defeated William's forces in the pass of Killiecrankie, but Dundee himself was mortally wounded in the battle, and with his death the cause of James the Second expired in Scotland. In Ireland affairs did not move quite so fortunately for the new King. There the wild and zealous Tyrconnel was lord-deputy, and he, rather awed by the news of William's success, was half doubtful what line to pursue, when he heard that James, with the aid of the French monarch, was planning a descent on Ireland. This decided Tyrconnel to remain true to the Stuart cause, and when James landed at Kin-

sale on March 12, 1689, he at once promoted the fiery soldier to the rank of Duke. The campaign of 1689 was chiefly marked by the celebrated siege and valorous defence of Londonderry, one of the centres of the Protestant party in the north of Ireland. We need not describe this at any length—the story is too well known to require repetition; let it suffice that James's efforts were frustrated, and that when William himself landed in Ireland early the next year he soon brought matters to a decision. The Battle of the Boyne, fought on July 1, 1690, virtually decided the fate of James: he was signally defeated, and though the campaign was not actually concluded by it, from that time forward hope and good fortune seem to have deserted the fallen monarch.

One thing alone remains to be mentioned. In October of the preceding year, 1689, the third great charter of English liberties—the Bill of Rights—was passed. By this it was enacted: That the Princess of Denmark was to succeed after the death of the Prince and Princess of Orange, and her posterity after those of Mary, and before those of William by any other wife: That the Sovereign has not the power to set aside the laws, nor to levy money without the consent of parliament, nor to maintain a standing army in time of peace without the consent of parliament: That jurors ought to be impartially chosen: That it is a right of the subject to petition the Sovereign: and, That freedom of speech in parliament ought not to be questioned in any place out of parliament.

Thus ends a rapid review of the Glorious Revolution of 1688, how it was brought about, and of the coming of the House of Orange to this country. A religious form of praise and thanksgiving was ordered, but great difficulty was experienced in the matter. The Prayer-book already contained a most blasphemous form for the 30th of January, the anniversary of the "Martyrdom of the blessed King, Charles I.," "to implore the Mercy of God that neither the guilt of that Sacred and innocent Blood, nor those other sins by which God was provoked to deliver up both us and our King into the hands of Cruel and unreasonable men, may at any time hereafter be visited upon us or our posterity." Also another form, not quite so strongly worded, but which most awkwardly stood in the way of the new service—that of the Restoration of King James's brother, the "Most Religious" Charles II., from the "unnatural Rebellion of traitorous, heady, and high-minded men," who had "turned Religion into rebellion, and Faith into faction." But the difficulty was not insuperable: a complete service could not be swallowed; so a happy thought occurred to some one. The Fifth of November was a popular Anti-Popish anniversary, so some addition was made, and a thanksgiving form composed, "Giving most unfeigned thanks for filling our hearts again with joy and gladness, and putting a new song into our mouth by bringing His Majesty King William upon this day for the deliverance of our Church and Nation from Popish Tyranny and Arbitrary Power." Whether James was quite so bad and tyrannical, or William quite so generous and disinterested, as historians have endeavoured to show, is open to question, but that the country was benefitted by the change of governors is a point upon which there can be but one opinion.

No proof is forthcoming of medals being conferred in England for service in the army or navy before the time of Charles I., who, in May, 1643, authorized a badge for such soldiers as might distinguish themselves in "forlorn hopes." This was of silver, and by the warrant dated 18th May, 1643, it was ordered that the "royal image and that of our dearest son, Prince Charles," should be contained thereon. On the 1st June, 1643, a gold medal was ordered for Mr. Robert Walsh, who commanded a troop of horse at the battle of Edgehill on the 23rd October, 1642. The obverse to bear the royal figure and that of his son Prince Charles. The reverse to have the royal banner, used at the above battle, to be inscribed "Per Regale Mandatum Caroli Regis Hoc Assignatur Roberto Welch Militi." This is the first recorded case of a medal being awarded for military service.

A gold medal was struck, which was oval in shape, to commemorate the battle of Naseby, 14th June, 1645, for officers. On one side was the effigy of Sir Thomas Fairfax, with the inscription "Tho: Fairfax Miles Milit: Parl: Dux: Gen:." The reverse had "Meruisti" within a circle, and the words "Post Hec Meliora 1645."

The medals given by Cromwell for naval and military services were the first given to officers and men. That for the battle of Dunbar, which is oval in shape and of two sizes in gold and silver, was the first given to the army at large. No grant of medals by the sovereign's command, to officers and men alike, was authorized until the medal for Waterloo was issued.

The medals given by Cromwell for naval services were—1. Oval in gold and silver. Obverse: an anchor, the arms of England (St. George's Cross) and Ireland (Harp), suspended from the beam with a hawser surrounding, and the word "Meruisti." Reverse: a naval engagement, with the words "Service done against six ships July ye XXXI. and August ye I. 1650." 2. Oval in gold. Obverse: an anchor, and three small shields suspended from the beam. Reverse: a sea fight, with the words "For eminent service in saving ye Triumpe in a fight w. y. Duch in July 1653." 3. Oval in silver. Obverse: an anchor and two small shields with the word "Meruisti" above. Reverse: the House of Commons sitting. Cromwell's medal for the battle of Dunbar has on the obverse the head of Cromwell, with the motto "The Lord of Hosts, Septem: ye 3. 1650;" and behind the head is a prospect of the battle. The reverse has the House of Commons sitting, as represented on the great seal of Parliament of 1648, and of the Commonwealth, 1651.

A silver medal was struck to commemorate the victory near La Hogue in 1692. On the obverse are the busts of William and Mary, and the inscription "Gul: et Mar: D.G.M.B.F. et H. Rex et Regina:," and on the reverse two ships in action, with the inscription "Nox: Nulla

Secuta Est:—"Pugn: Nav: Int: Ang: et Fr: 21 May 1692" being in the exergue.

Medals were struck to commemorate the victories of the great Duke of Marlborough, but it is certain they were not worn by either officers or men.

After the battle of Culloden, 16th April, 1746, a medal was struck. Obverse: the head of the Duke of Cumberland. Reverse: a figure of Apollo, and a dragon pierced by an arrow, with the inscription "Actum Est: Illicit Perit," and in the exergue "Prael: Colod: Ap: XVI. MDCCXLVI." There is, however, no account of these medals; having been worn. They were oval: in gold, silver and bronze.

Gold medals were bestowed by Pope Pius VI. on twelve officers of the 12th Lancers for service at Civita Vecchia in 1794.

A gold medal was presented by the Emperor of Germany to each of the officers (8 in number) of the two squadrons of the 15th Light Dragoons engaged at the action of Villiers-en-Couche on 24th April, 1794, by which action the Emperor was saved from being taken prisoner by the French. Only nine of these medals were struck, one being deposited in the Imperial Cabinet at Vienna. Obverse: laureated head of Francis II., Emperor of Germany, and the inscription "Imp: Cæs: Franciscus II. P.F. Aug:." Reverse: "Forti-Britanno-in-Exercitu: Foed: ad: Cameracum XX. Apr: MDCCXCIV." In 1798 the King (Geo. III.) permitted these medals to be worn. Crosses of the order of Maria Theresa were subsequently granted to these officers, and permitted to be worn in uniform.

The Nile, 1798, was commemorated by a medal given by a private gentleman, Alexander Davison. Obverse: Peace standing upon a rock holding an olive branch and displaying a portrait of Lord Nelson, with the words "Europe's Hope and Britain's Glory"—behind the figure an anchor, the sea in the distance, and "Rear Admiral Lord Nelson of the Nile." Reverse: the British Fleet sailing into the Bay of Aboukir at sunrise. The words "Almighty God has blessed His Majesty's Arms," and in the exergue "Victory of the Nile, August 1. 1798." The inscription on the edge was "From Alexander Davison, Esq: St. James' Square. A Tribute of Regard." This medal was of gold, silver, bronze gilt, and bronze, and is known as Davison's medal.

Mr. M. Boulton, another private individual, granted a medal for the battle of Trafalgar, 1805. Obverse: bust of Lord Nelson with the words "Horatio Viscount Nelson, K.B., Duke of Bronte, etc.:" Reverse: a representation of the battle of Trafalgar, with the words "England expects every man will do his duty." In the exergue "Trafalgar Oct: 21. 1805," and on the edge was inscribed "To the Heroes of Trafalgar from M. Boulton." A pewter medal set in a gold rim was also issued for Trafalgar, and the Naval General Service medal was granted for service in Egypt and at Trafalgar long afterwards.

PENINSULAR WAR MEDALS, 1793-1814.—Obverse: The head of the Queen wearing a diadem with the inscription "Victoria Regina." Reverse: Her Majesty, as the representative of the country, or people, is in the act of crowning with a laurel wreath the Duke of Wellington, in a kneeling position, as emblematic of the army. In the exergue is engraved "1793-1814" and by

the side of the dais is the British lion. The inscription is "To the British Army." This medal was given on the 1st June, 1847, for the following services:—Maida, 4th July, 1806; Roleia, 17th August, 1808; Vimiera, 21st August, 1808; Sahagun, Benevente, &c., December, 1808, and January, 1809; Corunna, 16th January, 1809; Martinique, February, 1809; Talavera,

27th and 28th July, 1809; Guadaloupe, January and February, 1810; Busaco, 27th September, 1810; Barrosa, 5th March, 1811; Fuentes d'Onor, 5th May, 1811; Albuhera, 16th May, 1811; Java, August and September, 1811; Ciudad Rodrigo, January, 1812; Badajoz, 17th March and 16th April, 1812; Salamanca, 22nd July, 1812; Fort Detroit, America, August 1812; Vittoria, 21st June, 1813; Pyrennees, 28th July to 2nd August, 1813; St. Sebastian, August and September, 1813; Chateauguay, America, 26th October, 1813; Nivelle, 10th November, 1813; Chrystler's Farm, America, 11th November, 1813; Nive, 9th to 13th December, 1813; Orthez, 27th February, 1814; and Toulouse, 10th April, 1814. Clasp inscribed with the names of these actions were also issued, 15 being the greatest number known to have been worn. A clasp inscribed "Egypt" was granted to those engaged in that country, and the medal to those not already in possession of it, by an order dated February 12, 1850. Ribbon: red with blue edges.

The Sultan of Turkey also granted his gold medal for service in Egypt. This medal was of three sizes. The large size for general officers, the second size for field officers, and the small size for captains and subalterns. Obverse: a crescent and star of eight points, surrounded by an ornamental border. Reverse: the Sultan's cypher, under which is the year 1801 in English. Ribbon: orange, with hook and chain.

Gold medals were struck to commemorate the battles of Corunna, Talavera, Roleia, Vimiera, the capture of Martinique and Guadaloupe, the battles of Barrosa, Busaco, Fuentes d'Onor, and Albuhera, and the capture of Java, &c. These medals were only granted to superior officers. Ribbon: red, with blue edges. A separate gold medal was also granted for Maida.

A gold cross was instituted on 7th October, 1813. This is a Maltese cross, in the centre of which is the lion statant. It having been found inconvenient to wear so many gold medals, upon a claim being admitted for a fourth it was substituted by the gold cross with the names of the four engagements engraved thereon, to be worn in place of the previously earned medals, and clasps granted for subsequent engagements to be worn over the cross. The Duke of Wellington had nine clasps over his gold cross. Clasps were also granted to be worn over the gold medal in cases where officers were engaged two or three times. The ribbon for the gold cross and medal was red, with blue edges.

NAVAL GENERAL SERVICE MEDAL, 1793-1840.—This was issued to the navy at the same time as the general war medal was issued to the army, viz., in 1847. Obverse: the head of Her Majesty wearing a diadem, with the words "Victoria Regina." Reverse: Britannia seated on a sea-horse, holding a trident in her right hand and an olive branch in her left. Ribbon: white with blue edges. Over 200 clasps were issued with this medal, but six is the greatest number known to have been worn with one medal. Amongst the principal naval engagements for which this medal was issued were:—Battle of Camperdown, battle of the Nile, defence of Acre, services in Egypt, battle of Copenhagen, battle of Trafalgar, taking of Curacoa, action off Gottenburgh, taking of Cayenne, capture of Martinique, capture of Guadaloupe, capture of Java, capture of frigate *Chesapeake*, battle of Algiers, battle of Navarino, &c., capture of Acre, &c.

These two medals, the general war medal known as the Peninsula Medal, and the Naval General Service Medal were issued so long after the events which they commemorated, that comparatively few of the heroic companions of Nelson, Abercromby, and other famous leaders survived to claim them. The issue was an act of tardy justice to the services which graced the early years of Her Majesty's reign.

SERINGAPATAM, 1799.—Medals granted by the government of India—Gold for the King, the Governor-General, the Marquis Cornwallis, the Nizam, and various Rajahs of native states, the Commander-in-chief and general officers. Silver gilt for the members of the council for the three presidencies, the Residents of Hyderabad and Poona, field officers and officers on the staff. Silver for captains and subalterns. Copper bronzed for non-commissioned officers, and pure grain tin for the privates. Allowed to be worn in addition to the Indian War Medal. Ribbon: deep yellow, about an inch in width. No clasp was issued. Obverse: representation of the storming of the breach of Seringapatam, from an actual drawing on the spot, with the meridian sun, denoting the time of the storm, and the inscription in Persian "The Fort of Seringapatam, the gift of God, the 4. May 1799." Reverse: the British Lion subduing the Tiger, and the words in Arabic on the banner above, "Assud-Otta-ul-Ghauib."

INDIAN WARS, 1799-1826.—Medal granted by the Government of India—Obverse: Queen's head with the inscription "Victoria Regina." Reverse: the figure of Victory, seated, in her left hand a laurel wreath—an olive branch in her right—a lotus flower, emblematic of India, at her side; a trophy of Oriental arms and a Palm tree form the background. The inscription is "To the Army of India." In the exergue "1799-1826." Clasps were granted for the services specified below. Ribbon: pale blue. Services for which the medal was granted were:—Storm of Allighur, 4th Sept., 1803; battle of Delhi, 11th Sept., 1803; battle of Assaye, 23rd Sept., 1803; siege of Asseer Ghur, 21st Oct., 1803; battle of Lasswarree, 1st Nov., 1803; battle of Argaum, 29th Nov., 1803; siege and storm of Gawilghur, 15th Dec., 1803; defence of Delhi, Oct., 1804; battle of Deig, 13th Nov., 1804; war in Nepal in 1816; battle of Kirkee and capture of Poona, Nov., 1817; battle of Seetabuldee and battle and capture of Nagpore, Nov. and Dec., 1817; battle of Mahaidpore, 21st Dec., 1817; defence of Corygaum, 1st Jan., 1818; war in Ava, 1824 to 1826, and siege and storm of Bhurtpore, Jan., 1826. Only four of these clasps are known to be worn with one medal. This medal was granted to the navy for service in Burmah, 1824-26.

BAGUR AND PALAMOS, 1810.—Obverse: the arms of Great Britain and Spain, within a wreath of laurel in two shields, crowned, the national flags, and the inscription "Alianza Eterna." Reverse: inscribed "Bagur 10 de Septiembre, Palamos 14 de Septiembre, 1810"—"Gratitud de Espana a la Intrepidez Britanica." Ribbon: red, with yellow edges.

WATERLOO, 1815.—Obverse: the head of the Prince Regent, with the inscription "George P. Regent." Reverse: Victory, seated on a pedestal, holding the palm in the right hand and the olive branch in the left. Above the figure of Victory

is the name "Wellington," and beneath "Waterloo, June 18, 1815." No clasp was granted. Ribbon: red, with blue edges.

[This was the first medal issued by authority of the Crown to all ranks of the service alike, although previously the Seringapatam medal, issued by the Hon. East India Company, had been conferred on the king's troops engaged in the operations which ended in the fall of Tippon.]

ARCTIC, 1818-55.—Medal—Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: A ship icebound, with icebergs on either side. In the foreground, a number of sailors drawing a sledge, with the words "For Arctic Discoveries" above, and in the exergue "1818-1855." The medal is octagonal, and surmounted by a star. Ribbon: white.

BURMAH, 1824-26 (Navy).—Medal—Obverse: White Elephant of Ava, in an attitude of submission, crouching before the British Lion, a Union Jack unfurled, and the drooping flag of Burmah behind. Reverse: Troops advancing towards a Pagoda enclosed within a Stockade; a steamer and force of boats commencing the attack from the river Irrawaddy. In the foreground, General Sir A. Campbell directing operations.—Ribbon: crimson, with blue edges.

SHAH GHUZNEE (Afghanistan) 1839.—Medal.—Granted by Shah Soojah, the restored King of Afghanistan. Obverse: A representation of the Fortress, with the word "Ghuznee" beneath. Reverse: A mural Crown within a wreath of laurel, with the date "23rd July" above, and the year "1839" below.—Ribbon: half crimson, half green. No clasp.

CHINA, 1842.—Medal—Granted by the Government of India. Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: a Palm tree, against which are placed the arms of England on a shield, with cannon, anchor, flags, &c., and the motto "Armis Exposcere Pacem." In the exergue is the word "China," with "1842," underneath. No clasp issued.—Ribbon: crimson, with yellow edges.

JELLALABAD (Afghanistan), 1842.—Medals—1st. Granted by Government of India. Obverse: A mural Crown, with "Jellalabad" inscribed above. Reverse: "VII April, MDCCCXLII." No clasp issued. 2nd. Obverse: Queen's head, with the inscription "Victoria Vindex." Reverse: a figure of Victory, with Union Jack in her left hand, and laurel wreaths in her right, flying over the Fortress; above the figure are the words "Jellalabad VII April" in a semicircle, and in the exergue "MDCCCXLII." This was substituted for the first medal issued.—No clasp issued.—Ribbon: Rainbow pattern for both medals.

KELAT-I-GHILZIE (Afghanistan), 1842-43.—Medal—Granted by Government of India. Obverse: A mural Crown and shield within a laurel wreath, with the inscription "Kelat-i-Ghilzie." Reverse: a trophy resting on a rectangular base, inscribed "Invicta MDCCCXLII" underneath.—No clasp. Ribbon: Rainbow pattern.

AFGHANISTAN, 1842.—Medals—Obverse: Queen's head, with the inscription "Victoria Vindex." Reverse: 1. Inscribed "Candahar, Ghuznee, Cabool, 1842," under each other, within a wreath of laurel, and beneath an Imperial Crown. 2. "Ghuznee, Cabool," engraved within a double wreath of laurel, with "1842," in the exergue. 3. "Candahar 1842," within

the wreath. 4. "Cabool 1842," within the wreath.—No clasp issued.—Ribbon: rainbow pattern.

SCINDE, 1843.—Medals—Granted by the Government of India. Obverse: Queen's head, with the inscription, "Victoria Regina." Reverse: 1. "Meeanee 1843," 2, "Meeanee, Hyderabad 1843" enclosed within a wreath of laurel, and surmounted by the Crown, within the wreath, &c.; and 3, "Hyderabad 1843," within the wreath.—No clasp. Ribbons: rainbow pattern.

GWALIOR, 1843.—Six-pointed bronze Stars with silver faces were issued by the Government of India to those engaged at "Maharaj-poor" and "Punnier" on "29 December 1843," the name and date of the action being engraved on each star. The stars were made from the bronze of the captured guns.—Ribbons: rainbow pattern.

SUTLEJ, 1845-46.—Medal—Granted by the Government of India. Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: the figure of Victory, standing, offering a laurel wreath with her right hand, and holding a Palm branch in her left, a trophy of Sikh Arms being at her feet. The words "Army of the Sutlej" engraved round the rim. The name of the first action at which the wearer was present was engraved on the medal, and clasps issued for subsequent actions. Clasps inscribed "Ferozeshuhur," "Aliwall," and "Solraon" were issued with this medal.—Ribbon: dark-blue, with crimson edges.

PUNJAB, 1848-49.—Medal—Granted by the Government of India. Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: the Sikhs are represented as laying down their arms before the General, a field of battle, at the termination of a victory, being depicted. In the background are the troops, together with a group of Palm trees, and other accessories, indicative of an Indian landscape. The figure of the Commander-in-chief on his Charger, the latter, a beautiful Arab, having been modelled from life. The inscription is: "To the Army of the Punjab," and in the exergue "M.D.CCCXLIX." Clasps inscribed "Mooltan," "Chillianwalla," and "Goojerat," were also issued.—Ribbon: blue, with yellow edges.

CAPE, 1834-35; 1846-47; 1850-53.—Medal—Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: a Lion crouching under a shrub, above which are the words "South Africa," and beneath the year "1853." No clasp was granted with this medal for any of the actions fought during the several campaigns between 1834 and 1853. No medal or clasp was granted for the capture of the Cape of Good Hope in 1801.—Ribbon: orange, with purple stripes.

BURMAH, 1852-53.—Medal—Granted by Government of India—now known as the India medal, being the pattern medal generally issued for service in India. Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: a representation of Victory crowning an ancient warrior, and in the exergue a lotus, emblematic of India.—Clasp inscribed "Pegu" also granted.—Ribbon: scarlet, with two dark blue stripes.

CRIMEA, 1854-56.—Medal—Obverse: The effigy of Her Majesty, with the inscription "Victoria Regina, 1854." Reverse: the figure of Fame about to place a wreath upon the brows of a stalwart Hero in classic military costume, with the word "Crimea" near the rim.—Clasps inscribed "Alma," "Balaclava," "Inkerman," "Sebastopol," and "Azoff" were issued with this medal. Ribbon: pale blue, with yellow edges.

FRENCH MILITARY WAR MEDAL.—Medal—Obverse: the head of the Emperor, with the words "Louis Napoleon" in gilt letters, on a blue enamelled circle, within a wreath of laurel in silver. Reverse: The words "Valeur-et-Discipline," on a gold ground, within a circle of blue enamel, and a wreath of silver laurel. The imperial Eagle surmounts the medal.—Ribbon: orange, with broad green edges. Two hundred and twenty-six of these medals were granted to N. C. officers and men of the British Army. The Duke of Cambridge and Sir W. Codrington also received this medal.

SARDINIAN WAR MEDAL.—Medal—Obverse: The Arms (White Cross of Savoy) and Crown of Sardinia, with a branch of laurel and of palm, with the inscription "Al Valore Militaire." Reverse: Two laurel branches, with the words "Spedizione d'Oriente."—Ribbon: a watered blue. Four hundred of these medals were granted to the British army.

TURKISH WAR MEDAL.—Medal—Obverse: the flags of France, Turkey, England, and Sardinia, beneath a map of the Crimea spread over a gun-wheel, which rests upon the Russian flag. Cannon mortars, &c., are arranged about. The word "Crimea," and the date "1855" are under all. Reverse: The Sultan's Cypher, beneath which is inscribed with the word "Crimea," in Turkish, and lower still is the year of the Hegira "1271," corresponding with the year 1855. This medal was granted to all the troops engaged in the Crimea against the Russians.—Ribbon is narrow, of a pink colour, with light green edges. The Silistria, 1854, the Danube, 1854, and the Kars, 1855, medals were also granted to several officers and men of the British army.

BALTIC, 1854-55.—Medal—Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: Britannia seated, with uplifted trident. She appears to be on the "look out;" above is the word "Baltic," and in the exergue, "1854-1855."—Ribbon: yellow, with blue edges.

PERSIA, 1856-57.—Medal—Same as Burmah, 1852-53.—Ribbon also the same pattern. Clasp inscribed "Persia," issued with the medal—clasp only issued to those already in possession of Burmah medal.

INDIAN MUTINY, 1857-58.—Medal—Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: Britannia is represented in an erect position, instead of being seated, and above is the word "India." In her right hand, outstretched, is a laurel wreath, the usual shield, with the Union, is on the left arm, and in the hand are other wreaths. The British Lion forms an appropriate background. Clasps inscribed "Delhi," "Defence of Lucknow," "Relief of Lucknow," "Lucknow," and "Central India," were issued with this medal. Ribbon: white, with red stripes.

CHINA, 1856-60.—Medal—Similar in pattern to the first China medal, with the exception that the date, "1842," on the reverse is omitted. Clasps inscribed "China 1842" (this clasp issued only to those in possession of first medal). "Fatsan 1857," "Canton 1857," "Taku Forts 1858," "Taku Forts 1860," and "Pekin 1860" were issued with the medal.—Ribbon: same as for China, 1842.

NEW ZEALAND, 1845-47, 1860-66.—Medal—Obverse: Queen's head, with the words "Victoria Regina G.D. Britt: Reg: F.D." Reverse: a wreath in the centre, within which is engraved the years during which the recipient served during the war, the words "New Zealand" being above, and "Virtutis Honor" underneath. No clasp issued.—Ribbon: blue, with a scarlet stripe in the centre. The medal for the earlier campaign of 1845-47 was only granted to survivors when it had been determined to issue a medal for the later campaign.

ABYSSINIA, 1867-68.—Medal—Surmounted by a crown, suspended from a ring. Obverse: Queen's head in the centre of a star, round the outside of which, and between the points, is the word "Abyssinia." Reverse: a wreath, within which is engraved the recipient's rank, name, corps, or ship. No clasp issued.—Ribbon: white, with broad red edges. This is the smallest medal issued during the reign of Her Majesty.

NORTH-WEST FRONTIER OF INDIA, 1849-1863.—Medal—Similar in pattern to the Burmah 1853 medal.—Ribbon: also similar. Granted to survivors only at date of order in 1869, for the following services:—

Expeditions.—To Eusufzye, 30th November, 1849. To Kohat Pass, 9th February 1850. Against the Ootman Kheyland Ranezai tribes, 17th May, 1852. To Punypor, Ishakoti, and Deerjai, 18th May, 1852. Against the Hussanzaies, December, 1852, to January, 1853; the Kusraanes and the Shearanees, March, 1853; and the Boree Afridees, 29th November, 1853. To Shah Mooseh Khey, 31st August, 1854. Against the Aka Khey and Busee Khey tribes, 27th March, 1855; and Meeranzaie, 4th April, 1855. To the Bozdar Hills, 6th March, 1857. Against the Cabool Khey Wuzzeerees, 15th December, 1859, and the Mahsood Wuzzeerees, 14th April, 1860, and to Eusufzye, 18th October, 1863. [This medal was subsequently granted for the following services:—Expedition against the Mohmunds, 1863-64; Bhootan, 1864-65-66, and Hazara (1868) campaigns. Expeditions to Looshai, 1868, and the Naga Hills, 1879-80; also Burmah, 1885-87. Clasps inscribed "North-West Frontier," "Umbeyla," "Bhootan," "Looshai," "Naga, 1879-80" were granted with the medal. Clasps only were issued to those already possessed of the medal for previous services. Total, 10 clasps.

ASHANTI, 1873-74.—Medal—Obverse: Queen's head, with the inscription, "Victoria Regina." Reverse: a British soldier standing over his wounded comrade, in the act of defending him as he lies on the ground, from an attack of the enemy. Clasp inscribed "Coomassie." To those present at Amoafal and the actions between that place and Coomassie, and who served north of the Prah during the five days of those actions.—Ribbon: yellow, with black stripes.

ARCTIC, 1875-76.—Medal—Bust of Her Majesty, crowned and veiled. Reverse: a ship in winter quarters. This medal is circular.—Ribbon: white.

PERAK, 1875-76.—Medal—India medal of 1854.—Ribbon: same. Clasp, inscribed "Perak," also granted. Clasp only to those in possession of medal.

JOWAKI, 1877-78.—Medal and ribbon. Same as for Perak. Clasp, inscribed "Jowaki," 1877-78," also granted. Clasp only to those in possession of medal.

SOUTH AFRICA, 1877-78-79.—Medal—Similar in pattern to the Cape medal, with the exception that crossed assegais and a shield are in the exergue instead of the date, 1853.—Ribbon also the same. Clasps inscribed "1877," "1877-78," "1877-78-79," "1878," "1878-79," and "1879" were also granted, but only one clasp could be worn. Those in possession of the Cape medal only received the clasp. The medal was issued to those employed against the Gaikas, Galekas, and other Kaffir tribes from 26th September, 1877, to 28th June, 1878; Pokwane, from 21st to 28th January, 1878; the Griquas from 24th April to 13th November, 1878; Sekukuni in 1878; the Zulus from 11th January to 1st Sept., 1879; Sekukuni from 11th September to 2nd December 1879; and Moirosi's stronghold.

AFGHANISTAN, 1878-79-80.—Medal—Obverse: Queen's head, with the Imperial crown and the inscription, "Victoria Regina et Imperatrix." Reverse: representation of an army proceeding through one of the passes in Afghanistan, with the word "Afghanistan" above, and the years "1878-79-80" in the exergue. Clasps inscribed "Ali Musjid," "Peiwar Kotal," "Charasia," "Kabul," "Ahmed Khel," and "Kandahar," were also granted; the greatest number worn with the medal being four.—Ribbon: green, with red edges.

BRONZE STAR.—Five-pointed, suspended from an imperial crown, with the imperial monogram in the centre, around which are the words "Kabul to Kandahar," with the date "1880" underneath. Reverse: engraved with the rank, name, and corps of recipient.—Ribbon: rainbow pattern.

EGYPT, 1882.—Medal—Obverse: Queen's head, with the inscription: "Victoria Regina et Imperatrix." Reverse: representation of a sphinx, with the word "Egypt" above, and the date "1882" underneath. Clasp, inscribed "Tel-el-Kebir," also granted to those present at the action, and those who took part in the march from Kassassin, on the morning of the 13th September, 1882. A clasp inscribed "Alexandria, 11th July," was granted to the navy. Only one army officer, Colonel A. B. Tulloch, c.b., Welsh Regiment, who was present at the bombardment as Chief of the Intelligence Department, received this clasp.—Ribbon: blue, with two white stripes.

BRONZE STAR.—Five-pointed; granted by H.H. the Khedive. Obverse: sphinx in the centre, with a representation of the Pyramids in the background, "Egypt, 1882," being above, and the year of the Hegira, with Arabic characters, below. Reverse: a crown, with the Khedive's monogram underneath.—Ribbon: blue.

SUAKIN, 1884.—Medal—Similar in pattern to that for Egypt, 1882, except that the date "1882" on the reverse is omitted. Ribbon also same. Clasps inscribed "Suakin 1884," "El-Teb," "Tamaai," and "El-Teb-Tamaai," also issued. Clasps only issued to those in possession of the Egypt medal. The last named clasp was given to those present at both actions.

BRONZE STAR.—This was also issued, and is similar in pattern to that for Egypt, 1882, and was extended to the operations of 1886.

THE NILE, 1884-86, and SUAKIN.—Medal—Similar to that granted for Suakin, 1884, and the ribbon is also the same. Clasps inscribed "The Nile, 1884-85," "Abu Klea," "Kirbekan," "Suakin, 1885," and "Tofrek" also granted. Clasps only granted to those in possession of the Egypt, 1882, or Suakin, 1884, medal. No officer or soldier possesses more than five clasps for service in Egypt and the Sudan.

This medal was also granted for services on the Upper Nile in 1885-86, under General Sir F. Stephenson, but the grant was only extended to those not already in possession of the medal for previous operations, and no clasp was issued for the brilliant and decisive victory won by General Stephenson and his command.

CANADA, 1885.—Medal—Obverse: Queen's head, with the inscription, "Victoria Regina et Imperatrix." Reverse: the year "1885," with the words "North-West" above and "Canada" below, within a wreath.—Ribbon: pale blue, with red edges.

A medal was not granted for the Canadian Rebellion of 1837-38.

BURMAH, 1885-87.—Medal—Pattern known as the India medal. To those already in possession of this medal, a clasp only was granted. Burmah added a tenth clasp to the India medal.

FOR LONG SERVICE AND GOOD CONDUCT (Army).—Medal—Instituted by King William IV. in 1830. Obverse: a Military Trophy, and the Arms of the United Kingdom. Reverse: the inscription "For Long Service and Good Conduct." Gratuities of £15 to a Sergeant, £10 to a Corporal, and £5 to a Private were granted with this medal. In 1860, medals without gratuities were first issued, but in 1875 these were abolished, £5 gratuity being granted in all cases (except schoolmasters) with the medal. The qualifying service is 18 years, and the terms of eligibility are irrevocable character; to be possessed of, or entitled to, at least four good-conduct badges, and not more than 12 entries in the Defaulters' Book. Boy service is allowed to count, but service in the Army Reserve is not.—Ribbon: crimson.

FOR LONG SERVICE AND GOOD CONDUCT (Navy).—Medal.—Instituted by King William IV. in 1831. Obverse: diademed head of the Queen. Reverse: a line-of-battle ship, with the inscription "For Long Service and Good Conduct."—Ribbon: Blue, with white edges.

FOR MERITORIOUS SERVICE, 1845.—Medal—For Sergeants only. Obverse: Queen's head. Reverse: "For Meritorious Service." Annuities not exceeding £20 are granted with this medal.

Serjeants should be recommended for this medal at the same time that they are recommended for the Good Conduct medal. Any gratuity which may have been granted with the latter medal is not now required to be relinquished on a serjeant becoming an annuitant, but the medal cannot be held with that for Meritorious Service.

FOR DISTINGUISHED CONDUCT IN THE FIELD (1854).—Medal—Obverse: a trophy, with Royal Arms in the centre. Reverse: "For Distinguished Conduct in the Field." This medal is granted with and without gratuity. —Ribbon: crimson, with a broad blue stripe in the centre. 6d. a day additional pension is awarded to Europeans, and 3d. to Blacks who are in possession of this medal. A clasp is granted for a subsequent act of distinguished conduct, inscribed with the date of the act, but only one has been issued, dated "1st September, 1880," the date of the battle of Kandahar. This medal is presented to the recipient by Her Majesty should he be serving at home.

CONSPICUOUS GALLANTRY (Navy), 1855.—Medal—Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: The words "For Conspicuous Gallantry" within a laurel wreath, and a crown above.—Ribbon: blue, with white stripe in centre.

VICTORIA CROSS, 1856.—By Royal Warrant, dated 5th February, 1856, this distinction was instituted. The value of this decoration is enhanced by the fact that the Queen confers it personally on the recipient should he be serving at home. It consists of a Maltese Cross in bronze, attached by the letter V to a bar, on which a sprig of laurel is embossed. The Royal Crest is in the centre, and beneath is an escroll

bearing the inscription "For Valour." Reverse: plain, the rank, name, corps, or ship is engraved on the bar to which the ribbon is attached, and the date of the act of bravery in the centre of the cross.—Ribbon: red for the Army, and dark-blue for the Navy. An annuity of £10 is granted with this decoration to each recipient, unless he be a commissioned officer. Additional clasps are granted for subsequent acts of bravery, which carry an additional £5 annuity, but none has yet been issued.

BEST SHOT OF THE ARMY.—Medal: worn on the right breast. Originated in 1869, and abolished in 1883. A gratuity of £20 accompanied the grant of this medal. Only 16 of these decorations were issued, two being granted for each of the years 1875-76 and 1876-77—one each to the best shot with the Martini-Henry and Snider rifles respectively. Private G. Bryant, 62nd Foot, obtained this medal and £20 gratuity two years in succession, viz., 1870-71 and 1871-72. Obverse: Queen's head, with the inscription "Victoria Regina." Reverse: a nude archer, with bow, arrows, and target pierced in the centre by three arrows, the result of his skill in shooting, his left foot resting on a dais, on which is the figure of Fame in the act of placing a laurel-wreath upon his head.—Ribbon: red, with narrow black and white stripes.

MEDALS OF DECEASED SOLDIERS.—These are issued to their next-of-kin on application being made to the Adjutant-General to the Forces, to whom they are directed to be forwarded immediately the soldier becomes non-effective by death. It must, however, be understood that such medals are memorials of the dead, and on no account are they to be worn by the relatives of a deceased soldier.

Recent Shipbuilding in the United Kingdom.

It has been thought that at the present time a brief retrospect of the shipbuilding industry during recent years will be appropriate. For the strides which have been made in naval architecture, and the phases which this industry has passed through during the last ten years or so, are very marvellous. Within that period, the use of steel for shipbuilding and boiler-making purposes has practically been introduced, and has now almost supplanted its rival, iron; with the exception of the Great Eastern, and some of the earlier ironclads, all the leviathans now afloat have been built; speeds have been attained which a few years before would have been looked upon as impracticable and visionary; and the shipping trade in general has experienced an unprecedented activity followed by a prolonged depression. There are not

wanting at the present time signs of the dawn which follows the darkest hour; and the apparent completion of a cycle—so to speak—in the shipbuilding industry forms an occasion specially suitable for such a retrospect as we propose to make.

It will be interesting to give to our readers first, for the purpose of comparison, a Table (for which we are indebted to Lloyd's Register of British and Foreign Shipping) showing the number, tonnage, and description of merchant vessels which were under construction in the United Kingdom at different dates since 1876. The year 1882 is chosen for use in the Table, partly because it is about midway between 1876 and the present time, and partly because the end of 1882 and the beginning of 1883 saw the high-water mark of English shipbuilding.

MERCHANT VESSELS UNDER CONSTRUCTION IN THE UNITED KINGDOM ON THE 30TH SEPT. IN 1876, 1882, AND 1887 RESPECTIVELY (SUPPLIED BY LLOYD'S REGISTER OF SHIPPING.)

DATE.	STEEL.				IRON.				WOOD.				TOTAL.				GRAND TOTAL.	
	STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.			
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
Sept. 30th. 1876	—	—	—	—	141	163,091	128	127,702	—	—	188	34,318	141	163,091	314	162,018	457	325,169
1882	78	146,055	11	13,400	419	634,675	46	78,868	2	836	57	4,948	505	781,665	112	96,204	617	878,769
1887	143	326,256	10	18,680	41	31,008	8	14,153	4	228	43	4,017	168	367,490	61	36,860	241	394,340

It will be observed that these figures do not represent the total shipping produced in a given year, but the total under construction on a given day in the year. For instance, the figures given for the 30th September, 1882, were never exceeded by many thousand tons, but the total tonnage of vessels completed in the British Isles during 1883 approached a million and a quarter, of which considerably over a million tons were classed by the Society from which we have obtained these figures.

The foregoing interesting Table puts into tangible form what every one knows vaguely as to the continual increase which has taken place in the average size of vessels, and as to the manner in which from one trade after another the sailing vessel has been displaced by the steamer. At the same time the Table indicates that the experience of many shipowners teaches them to hold by iron and steel sailing vessels of large tonnage for certain trades and purposes. These sailing vessels are especially favoured for long-distance voyages—such as to Australia, California, Calcutta, &c.—where the amount of coal required by a steamer becomes a serious deduction from her cargo-carrying capacity.

Doubtless, however, much more striking than any of the points to which we have yet alluded, are the facts which the figures in the foregoing Table reveal as to the use of steel for shipbuilding purposes. In 1876, it will be seen, there were no merchant vessels being built of steel in the United Kingdom. Previous to that time, indeed as far back as 1860, attempts had been made to introduce steel into the construction of vessels. From the "Annals of Lloyd's Register" we find that in 1864 a yacht of 2,400 tons built for the Viceroy of Egypt, partly of steel, was classed by that Society, a reduction of 25 per cent. being allowed in the thickness of the parts which were of steel from what would have been required had they been of iron. From that time onwards it appears that steel vessels were occasionally classed by "Lloyd's Register," the same general reduction being allowed in scantlings, and the steel being required to be subjected to tests. In such cases, however, the "Annals" say that the notation "Experimental" was made in the Register Book against the character of the vessel. Such a notation, perhaps, scarcely held out much encouragement to the enterprising shipbuilder and shipowner, for the merchant and underwriter might be excused for looking warily at the chances of an "experiment" afloat on the deceitful deep. Still, there is no doubt Lloyd's Register was right, for the quality of the steel produced in those early days, and the little experience then gained of the material, would not have warranted unqualified confidence being reposed in it. The Society is no doubt justly proud that at no time did it obstinately set its face against the material, but only insisted on proper precautions being taken in its use. After 1867, for about ten years steel practically died out. Then, in 1877, occurred what has been termed its "resurrection." Between these two years great changes had taken place. Improvements had been made in the manufacture of steel by the Bessemer process, and a new method of manufacture—viz. the Siemens-Martin, or open-hearth process—had been introduced. The production, at a cost greatly reduced from what had previously been possible, of a mild and ductile material, differing from iron only in being superior to it, was

thus rendered possible, and the present development of mild steel for the construction of ships and boilers may be dated from this time. Doubtless, a great part of the confidence which steel has attained in the public mind is due to the severity of the tests which are applied before it becomes part of the structure of a vessel or a boiler. At the present moment every steel plate and angle intended for use in ships and boilers to be classed by Lloyd's Register is required to be tested, and special stringent sample tests are also carried out under the immediate supervision of the surveyors of that Society. Considering that nine-tenths of the tonnage built in the United Kingdom is classed by Lloyd's Register, it will be seen that practically all the steel used for ships and boilers is subject to this unceasing watchfulness and care. In the last three or four years the popularity of steel has advanced by leaps and bounds. In 1882, when the shipbuilding resources of the country were insufficient to comply at once with the orders which flowed in, steel vessels to the extent of about 160,000 tons were under construction. At the present time, while the total tonnage being built is less than half what it was in 1882, the steel tonnage is nearly two and half times as great as it was then. It is, indeed, only within the last year or two that steel has come into general use in the shipbuilding ports of the north-east coast. But now the shipbuilders of the north-east coast are able to compete with those of the Clyde itself, and—especially in the case of the cargo-carrying steamers at present greatly in demand—not always with results gratifying to the Scotchmen. Iron, then, has sunk to an almost nominal place as a material for ship-construction; and as it drove out wood, it is now in its turn being driven out by steel. The importance of this revolution is not duly felt, unless it is borne in mind that, generally speaking, a twenty per cent. reduction can safely be allowed on the scantlings of a steel vessel, as compared with one built of iron, without sacrifice of strength. In an iron and a steel vessel of the same size, therefore, the latter has a very great advantage in weight-carrying capability.

Turning now from the figures of ship-construction to some of the results which have been attained, it may be well to deal first with the question of speed. An interesting paper dealing largely with this subject, was read by Mr. John, of the Barrow Shipbuilding Company—a distinguished authority—before the Institution of Naval Architects last year. The first steamers which had crossed the Atlantic about the year 1838 had occupied about 17 days in the passage. Various improvements had enabled this time to be reduced by the year 1874 to about nine days, the record of the Cunard Company's *Bothnia*. The mutual emulation of the Atlantic companies began. One vessel beat all previous records, only to have its record speedily beaten in turn. Each such case roused public interest for a brief period, but its shining light was soon eclipsed. Nearly every year has seen launched for one or other of the companies greyhounds of the ocean, until now the voyage across the Atlantic has been completed in about six days 4 hours; and we have afloat six steamers that have done the passage under seven days.

It is worth noting, too, that the German Transatlantic steamers, which are competing

so strongly for popularity with the vessels of the English companies, are at least for the most part of British construction. Last year the German Company built six vessels at Stettin, in accordance, we believe, with the terms under which it is subsidized by the government of the Fatherland. Apparently, however, they come here for their vessels still when circumstances permit. A shipbuilding firm on the Clyde has now in hand for them a steamer of 5,500 tons.

We have taken the case of the Atlantic liners as exemplifying the great increase of speed which has been attained in steamers, because it is with them chiefly that competition for a large and paying passenger trade induces the greatest efforts. It is not, however, to be thought that in other trades similar enterprise has not been shown. A mere mention of names must suffice; but the Peninsular and Oriental Co.'s *Victoria* and *Britannia*, the Orient Co.'s *Ormuz* and *Andral*, the *Ionie* and *Doric*, chartered by the New Zealand Co., and the boats running between Dover and Calais, show how full of life has been the period we have just passed through.

It will be proper to allude here in general terms to the size of the great vessels which have been constructed within the decade, especially for the Transatlantic trade. From the time of the construction of the *Great Eastern*, little was done for many years in the construction of what we look upon in these days as large vessels. Progress was to be in a more gradual way than was contemplated by the great man to whose genius that achievement was due. Shipbuilders were to go hand-in-hand with shipowners and merchants to provide the kind of vessel which the experience of the latter indicated would be a success financially. In this manner, shipbuilders have been able, with out stupendous failures, to produce such huge structures as the *Etruria* and the *Umbria*, both of 7,718 tons, and the *City of Rome* of 8,144 tons. It is interesting to note that in the last-named vessel we have attained to within 120 feet of the length of the *Great Eastern*, though not, of course, to half her tonnage. We may here state that some of our leading builders on the Clyde and elsewhere have now in hand vessels which are intended to surpass even this trio, both in speed and size. They are to be between nine and ten thousand tons each.

We come now to the question of how it has been possible to attain these speeds with such economy as to make them useful for commercial purposes. On this subject we must remark that during the last twenty-five years the various improvements which have been made in marine engineering have reduced the consumption of fuel in proportion to the power developed by nearly three quarters. In other words, that is to say, the working efficiency of the steam-engine in the last quarter of a century has been almost quadrupled. This has been brought about in the main by improved methods of using the steam rather than of generating it. In part by the introduction of steel, vastly increased steam pressures have been rendered available. And then, by the introduction of the triple and quadruple expansion types of engine, these high pressures have been more thoroughly utilized than they could otherwise have been. The introduction of the compound engine, which enabled the steam to be successively used in two cylinders, effected in its time a very great saving; and now by the power

of using the steam in three or even four cylinders, we have a still further economy variously estimated to be from 25 to 33 per cent.

A system of forced draught, and likewise of induced draught, has also been introduced in some cases—though not yet to any extent. The object of the system is to effect economy both by rendering possible the use of inferior coal and by making the action of the fire on the boiler surface more intense.

Liquid fuel has of late come somewhat before the public as a substitute for coal in steamers. But whatever may come of the idea, it is a thing of the future and not of the past—with which latter only we are now dealing.

But it may be asked what progress have we made in regard to the safety of life and property at sea. Speed may be very well; but in some respects it may increase danger. Large ships may be very well; but when calamities do occur they are intensified by the very element of size.

In reply to such a question we cannot go into much detail, where the answer would chiefly lie. The first difficulty we have mentioned is doubtless largely removed by the great care exercised by the companies which own the famous racers; and the second by the increasing practice of subdividing large vessels into watertight compartments so as to make them as far as practicable unsinkable. Among other things, too, we may remark that a notable improvement has taken place during recent years in the proportions of vessels. At one time there was a growing tendency to build vessels greatly narrower than at present. But this fault of construction has now become quite a thing of the past, and vessels are at present designed with a much more adequate breadth of beam. Another considerable advance has been made by using iron and steel for deck fittings, instead of wood as was formerly done. As we have hinted, there have been many other minor improvements, important in the aggregate, which have gradually come into vogue, but which are not suitable for mention in such an article as this. It is curious to notice, in the evidence given before the recent Royal Commission on Loss of Life at Sea, so very eminent a shipbuilder as the late Mr. William Denny, a man of great eminence in his profession as a shipbuilder, attributing much of the improvement in shipbuilding to the indirect influence of Lloyd's Register. In this connection we learn that at any given time nine-tenths of the tonnage being built in the United Kingdom, from the largest Atlantic liners to small fishing vessels, may be roughly estimated to be under the supervision of Lloyd's Register. There is therefore every reason to believe that Mr. Denny did not overrate the beneficial influence of that society in its widespread operations.

Another element in the safety of life and property at sea has been introduced by the decided action taken, as the result of the Load Line Commission, in regard to the dangerous overloading of which so many statements had been made. The fact that the administration of the Freeboard Tables has been entirely intrusted by the Government to Lloyd's Register will carry to many minds the conviction that the Freeboard question will be finally solved with the same success that has attended the other efforts which have marked the rise and progress of that remarkable institution.

NINETEEN countries only possess armour-clad vessels of war; and the total number of such ships afloat or building at the present time is 362. They are classified in the following table:—

COUNTRY.	Turret.	Barbette.	Central Battery.	Armoured Cruiser.	Broadside.	Total Seagoing.	Coast Defence.	Total Ironclads.
Great Britain.....	18	9	12	11	9	59	13	72

Portugal.....	..	1	1	1	..	1
	54	53	46	26	37	216	146	362

These vessels have an aggregate displacement of 1,650,635 tons—a displacement considerably greater than that of the whole merchant navy of any country, Great Britain and the United States only excepted—and it is estimated that not less than £60,000,000 has been spent upon the construction of their hulls and engines. Ready for sea, they are believed to represent at least £100,000,000.

Of the whole number, about two-thirds are non-obsolete. The obsolete and serviceable ironclads, together with their tonnage, are distinguished below:—

The British ironclads which in the above table are regarded as obsolete are: Achilles, Agincourt, Bellerophon, Black Prince, Hector, Minotaur, Northumberland, Repulse, Warrior, Prince Albert, Scorpion, Wivern, Viper, and Vixen. The French are: Marengo, Océan, Reine Blanche, Thétis, Héroïne, Revanche, Taureau, Onondaga, Embuscade, and the four "démontables." The Russian are: Kreml, Netronmanya, Pervenetz, Bronenonsetz, Koldoon, Latnik, Lava, Ooragan, Peroon, Roosalka, Smertsh, Streletz, Tcharodeika, Teefon, Vieschoon, Yedinorog, Nicopol, and Sistovo. The German are: Hansa, Friedrich Carl, Kronprinz, and Arminius. The Dutch obsolete ship is Prins Hendrik der Nederlanden. The Italian obsolete ironclads are: Affondatore, Ancona, Castelfidardo, Varese, Formidabile, Maria Pia, Roma, San Martino, and Terribile. The United States' are: Ajax, Comanche, Canonicus, Catskill, Jason, Lehigh, Mahopac, Manhattan, Montauk, Nahaut, Nantucket, Passaic, Saugus, and Wyandotte.

The obsolete ironclads of Norway and Sweden are: Besserk, Björn, Fernis Folke, Garmer, Gerda, Hildur, Sköld, Sölve, and Ulf. Those of Turkey are: Azizyeh, Mahmoodiyeh, Orkaniyeh, Osmaniyyeh, Hafiz-i-Rahman, Hizber, Feth-el-Islam, and Meindooyeh. Those of Austria are: Kaiser, Lissa, Erzherzog Ferdinand Max, Habsburg, Leitha, and Maros. Those of China are the wooden vessels composing the Shanghai flotilla. Those of Brazil are: Sete de Setembro, Bahia, Marize e Barros, Alagóas, Piauh, and Rio Grande. Those of Denmark are: Danmark, Lindormen, Rolfkrake, and Absalon. Those of Spain are: Numancia, Vitoria, Zaragoza, Piugcerdá, and Duque de Tetuan. Those of Japan are: Riujó and Azuma. The obsolete Greek ironclad is Olga; that of Chile is Huascar.

The speed of fighting ships is now-a-days a very important element in their value. The table on page 582 shows how fast the ironclads which are marked in the above list as serviceable and sea-going, can steam. A few of them,

The two 19-knot ships of Great Britain belong to the belted-cruiser class; the Austrian 19-knot ship is the Kronprinzessin Erzherzogin Stephanie; the Greek 19-knot ship is the Narcissus. Of the 18-knot ships the British are: Aurora, Australia, Galatea, Immortalité, Narcissus, and Undaunted; and the Italian: Italia, Lepanto, Re Umberto, Sardegna, and Sicilia.

Two other important considerations that must be kept in view in estimating the comparative force of ironclads are (1), the penetrative powers of their heaviest guns, and (2) the resisting power of the armour which they carry. We here show how many of the non-obsolete sea-going ironclads carry guns which are capable of penetrating given thicknesses of armour:—

The next table shows the thickness of the belts of non-obsolete sea-going ironclads. It is of course impossible within the limited space at our disposal to show also the thickness of turret, barbette, or battery armour, or to compare the defensive powers of those ironclads which do not possess a complete belt. The thickness which regulates our classification is the maximum thickness:—

These figures show that of the whole existing ironclads of every type, Great Britain possesses 19'88 per cent.; France, 16'02 per cent.; Russia 10'77 per cent.; Germany, 6'90 per cent.; Italy, 5'80 per cent.; Turkey, 4'97 per cent.; and Austria, 3'86 per cent. Of the whole number of non-obsolete sea-going ironclads, Great Britain possesses 29'76 per cent.; France, 18'45 per cent.; Russia, 11'30 per cent.; Germany, 5'95 per cent.; Italy, 7'14 per cent.; Turkey, 5'95 per cent.; and Austria, 4'76 per cent. Of the whole number of ironclads that can steam 16 knots and over, Great Britain has 54'05 per cent.; France, none; Russia, 10'81 per cent.; Germany, none; Italy, 21'62 per cent.; Turkey, none; and Austria, 2'70 per cent. Of the ironclads that can steam between 12 and 16 knots, Great Britain has 25'21 per cent.; France, 26'05 per cent.; Russia, 11'76 per cent.; Germany, 8'40 per cent.; Italy, 3'36 per cent.; Turkey, 5'88 per cent.; and Austria also 5'88 per cent. Of the whole number of sea-going ironclads which carry guns capable of penetrating 20 in. and upwards of iron, Great Britain has 28'84 per cent.; France, 30'76 per cent.; Russia, 7'69 per cent.; Germany, none; Italy, 19'23 per cent.; Turkey, none; and Austria, 3'84 per cent. Finally, of the whole number of non-obsolete sea-going armour-clads with 16 in. and over of complete water-line armour, Great Britain has 35'71 per cent.; while France has 33'33 per cent.; Russia, 7'14 per cent.; Germany, 9'52 per cent.; Italy, 11'90 per cent.; and Turkey and Austria none.

Magazine Rifles of Various Nations; Machine-Guns and Small Arms in the British Service.

In an article headed "The British Musket" in the Almanack for 1837, a short description was given of the various muskets which have been used in the British Army from the commencement of this century to the present time. In describing the latest pattern of rifle adopted, viz., the Enfield-Martini, it was explained that the reduction of the bore of the barrel from "45" to "40" was done with the object of increasing the velocity, and thereby lowering the trajectory of the bullet; and it was stated that the English Government would be forced to adopt a magazine rifle if such an arm were taken up by other Great European Powers. It is now proposed to bring the article on "The British Musket" up to date, and to describe very briefly the various magazine rifles adopted by other nations, and further, to complete the subject by an account of the various machine-guns and small arms in use in the British navy and army.

Since last year the question has advanced by rapid strides. Other nations, following the example of England, have for some years been carrying on experiments with various patterns of magazine rifles, and it is now certain that the whole of the armies of Europe, will in a very short time be armed with weapons of this description. There has been much controversy respecting the merits of the various weapons, but the present article is simply descriptive.

The primary object of a magazine arm is to enable the soldier at a critical moment to fire a certain number of consecutive shots without having to reload: it will be apparent that the greater the number of rounds a magazine can hold, without either greatly increasing the weight of the arm or interfering with its handiness, the more efficient the weapon will be. A light and small, and at the same time efficient cartridge, is therefore an object to be attained if possible, and this object can only be attained by a great reduction in the bore of the barrel. Up to about a year ago it was not thought desirable to reduce the bore below "40", on account of the extreme difficulty of overcoming the fouling which took place in barrels with a less calibre than that mentioned when the ordinary black powder was used; and the explosives, other than black powder, then known did not give sufficiently uniform results to justify their adoption for military rifles. But science advances rapidly in these days; and as soon as it became known that an explosive was required for a military small-bore barrel which should be at the same time safe, powerful, uniform in its results, and non-fouling, various explosive compounds were submitted for trial, which gave results sufficiently encouraging to lead to the belief that one would be found fulfilling the necessary conditions. With these facts before them, the French, and more lately, the English government, have decided on adopting a rifle barrel with a calibre of about "30", and other of the Great Powers of Europe will no doubt follow suit.

The principal systems or types of magazine arms may, for convenience, be divided under the following five heads:—

1. Those with the magazine in the fore-end of the stock under the barrel.
2. Those with the magazine in the butt of the stock.

3. Those with the magazine under the breech action.

4. Those with the magazine above and at the side of the breech action.

5. Those with the magazine in a circular form round the breech action.

Type No. 1 may be described briefly as follows:—The magazine consists of a metal tube fixed in the fore-end of the stock, and capable of containing eight or more cartridges. The tube or magazine is loaded by drawing back the bolt of the breech action and inserting the cartridges one by one into the tube at the breech end, there being a catch to retain them when once inserted; the insertion of the cartridges gradually compresses a long spiral spring contained in the tube, so that when the tube is full the spring is completely compressed, and is exerting its force on the whole column of cartridges in the direction of the breech end of the barrel, the base of one cartridge being always pressed against the bullet of the one next behind it. The action of unlocking and drawing back the bolt withdraws one cartridge at a time from the magazine, and places it in front of the bolt; and the action of closing the bolt forces the cartridge into the barrel. As each cartridge is thus withdrawn for loading the column of cartridges within the tube is pressed back, as already described, leaving another cartridge in position to be withdrawn for loading. There is generally a stop or "cut-off" which, when applied, prevents the bolt acting on the magazine so that the arm may be used as a single-loader on occasions when it may not be considered either necessary or desirable to bring the magazine into play.

No. 2 type. Various attempts have been made from time to time to utilize the butt of the stock by hollowing it out and converting it into a magazine. In this system the cartridges are brought up one by one into the loading position by a ratchet actuated by the bolt. As the bolt is drawn back the ratchet is also forced back and, hooking on to a cartridge, brings it forward as the bolt is pushed home again. As no government has adopted a magazine arm constructed on this system it is unnecessary to describe it further.

In type No. 3, the magazine can either be detachable and carried in the soldier's pouch, to be attached to the rifle when required for use, or it can be a fixture on the arm itself. In either case the magazine consists of a metal box capable of containing from six to ten cartridges, according to the size of the cartridge. The cartridges, which are inserted at the top of the box or magazine, compress a spring in the magazine, which is generally either in a zigzag form or in the form of a C. In this type of magazine the cartridges lie on the top of one another, and not bullet to base, as described in No. 1 type. They are held in the magazine by a catch or "cut-off," and when this is applied the rifle can be used as a single-loader. On withdrawing the cut-off and drawing back the bolt, the spring in the magazine forces one cartridge up in front of the bolt, which, on being pushed home, forces the cartridge into the barrel: by a mechanical contrivance only one cartridge at a time can be forced up out of the magazine.

In type No. 4, the magazine can also be either detachable or a fixture on the rifle. In magazines of this type no spring is necessary to force the cartridge out of the magazine, which is loaded by dropping the cartridge in at the top. At the bottom of the magazine on the side next the body of the rifle there is a slot, with a corresponding slot in the body or shoe of the breech action. On drawing back the bolt one cartridge passes out of the magazine through these slots into the shoe, and just in front of the bolt, by the force of gravitation alone. The cartridge is then forced into the barrel by the action of closing the bolt. There is also a cut-off with magazines of this type, to prevent cartridges passing through the slots when it is not required to use the magazine.

In type No. 5, the cartridges can be contained in a cylinder in which are compartments radiating from a revolving axis in the centre of the cylinder, one cartridge being placed in each compartment. There is a rack and pinion motion acted on by the bolt, which on being drawn back causes the axis of the cylinder to revolve through the space occupied by one compartment; by this means one cartridge at a time is deposited in front of the bolt to be forced into the barrel by the action of closing the bolt. Or they can be contained in a cylinder not divided into compartments. In this case the cartridges are held in position by a spring, and, by a mechanical arrangement within the cylinder, are brought round to an opening through which they pass into the shoe or body of the breech action, and are forced into the barrel by the action of closing the breech as in all the other cases.

The above very brief explanatory sketch of the principal types of magazine arms will enable the reader to better understand the various rifles which the different Powers of Europe have decided on adopting in the re-arming of the infantry which is now becoming universal.

To commence with our own country. As has already been stated, it has been decided to adopt a rifle having a barrel with a calibre of about '30", and as it is not considered advisable to have three calibres in use at the same time, necessitating three different kinds of ammunition, which would be the case were the Enfield-Martini rifle with an intermediate bore of '40" retained in the service, it has been decided not to issue that arm in its present form, but to bore the barrel up to '45" and to re-rifle it, thus practically converting these arms into Martini-Henrys. An entirely new description of arm will be manufactured for future issue to the navy and army. The new arm will be a magazine rifle of type No. 3, *i.e.*, with the magazine beneath the breech action, which will be on the "bolt" system, it being a mechanical impossibility to have a magazine working with the Martini action, as the falling block is in the way of a cartridge being mechanically placed in the shoe in position for being forced into the barrel. The magazine will be a fixture on the gun, but easily removable by the armourer for purposes of repair, and will probably hold either nine or ten cartridges. The length of the musket will be about the same as that of the Martini-Henry, and the weight with magazine attached somewhat under 10 lbs.; the point-blank range will be fixed at 150 yards, and with this sighting the bullet will travel nearly 400 yards before strik-

ing the ground. The highest point of the trajectory at 400 yards will be about 2 ft. 10 in., and at 500 yards 5 ft. The rifle will be sighted to 1,200 yards by the ordinary leaf back-sight, and there will be an auxiliary system of side-sights for long-range shooting up to 3,000 yards, nearly a mile and three quarters. The accuracy will be considerably superior to that of the Martini-Henry; the penetrative power will be practically the same as that of the Enfield-Martini, but greater than that of the Martini-Henry. The cartridge will only weigh about two-thirds of the present one; the case will be solid drawn; the charge of powder will depend on the nature of the explosive used, which has not yet been finally decided on; the weight of bullet will be about 220 grs., or half an ounce; and it will probably be either copper or nickel plated. The muzzle velocity will be between 1,800 and 1,900 feet. The present triangular bayonet will be discontinued, and a sword-bayonet weighing 1 lb. 8 oz., with a straight blade 18 inches long, substituted. It must be understood that the above description cannot be vouched for as absolutely correct, as the pattern of the new arm is not yet finally decided on, but it is correct in all its main features.

Passing on to other countries, the first to claim attention is Germany. The German government was the first amongst the Great Powers of Europe to come to a decision as to the pattern of their future arm. The German army has long been armed with the Mauser rifle, a description of which will be found in Tables II. and III. of our former article. It was determined to maintain this pattern of rifle and add a magazine to it, thus avoiding the necessity of making a change in the ammunition. The magazine is under the barrel, *vide* type No. 1. It has been found that when firing the gun as a single-loader, with the magazine full but cut off, the constant jar of recoil setting each cartridge up against the one in front of it, has the effect of distorting the bullets of the cartridges in the magazine, sometimes to such an extent as to interfere with the proper feeding of the cartridges from the magazine to the barrel when the cut-off is removed. To remedy this defect the bullets are now made with flat heads; with this trifling exception, the ammunition is not altered. The Mauser was always a heavy arm even as a single-loader: to counteract the extra weight caused by the addition of the magazine, the arm is now issued without a cleaning-rod, a small percentage of rods being carried with the company baggage. The sword-bayonet also has been greatly reduced in weight and length, the blade of the new pattern bayonet being only ten inches long. The manufacture of this arm has been proceeding for a very considerable time, and a large portion of the German army is already armed with it; but in view of the action taken by other Powers it is probable that Germany will also before long adopt a rifle having a barrel with a greatly reduced bore, and so keep pace with the requirements of the times.

The next country to claim attention is France. As Germany was the first of the Great Powers to adopt a magazine rifle, so was France the first to adopt a really small-bore arm. Their new arm is a magazine rifle of No. 1 type, the magazine under the barrel containing, it is believed, eight cartridges. Very great secrecy has been observed in the production of this arm, and therefore its mechanism cannot be spoken

of with any degree of certainty, but it is known that the bore of the barrel is '305; there is no spring in the magazine, a long ratchet taking its place; this ratchet supports each of the cartridges in such a manner that one does not touch the other, either while lying at rest in the magazine, or when jarred forward by the shock of the recoil. On drawing back the bolt the ratchet brings down the whole column of cartridges in the magazine, leaving one in the position for loading; on closing the bolt the ratchet is forced back into the tube, but does not carry back the cartridges with it, thus leaving them always at the end of the tube nearest the breech. The secret of the cartridge and the explosive used has been so well kept that, beyond the fact that it is a very powerful one, giving a muzzle velocity of about 2,000 ft. per second, nothing definite is known about it. The manufacture of this arm has been proceeding for some months, but no troops are as yet armed with it.

The new rifle adopted by the Austrian Government for their army is the Mannlicher magazine rifle; model, 1885; of No. 3 type. The magazine is a detachable one, holding five cartridges, the cartridges being packed in such a way as to enable them to be all placed in the magazine at once. When required for use the magazine is placed in a hollow frame underneath the breech action. There is no spring in this magazine, but the cartridges are fed up into a position for being forced into the barrel by the action of pushing home the bolt, by two rocking levers attached to the hollow frame. The barrel of this arm, as well as the ammunition, is the same as in the Werndl rifle described in the Almanack for 1887; but the Austrian War Office has been experimenting with barrels of smaller calibre, and it is believed that before long a small-bore rifle will be adopted, the Mannlicher magazine being still retained.

The Italian Government are retaining the Vetterli rifle with which the Italian Infantry has long been armed, but are adding the Vitali magazine to it. This magazine belonging to No. 4 type is at the top and side of the breech action. The same ammunition is used as formerly. This arm calls for no special remark.

In Russia also no particular remark is called for, as the old infantry arm and ammunition are retained, and an overhanging magazine of No. 4 type has been attached to the Berdan rifle.

The Turks have adopted the Mauser magazine rifle, and large orders have been placed in Germany by the Turkish Government for a supply of these arms and ammunition.

In Norway and Sweden the Jarmann magazine rifle, with an overhanging magazine, is being experimented with. This arm differs only from the Jarmann rifle we have already described by having a magazine added of No. 4 type.

The smaller States of Europe will probably adopt one or other of the magazine rifles selected by the Great Powers.

Briefly to epitomize the foregoing remarks, it may be observed that England is adopting an entirely new arm, with a bolt action, having a magazine underneath the action; a small-bore barrel with a calibre of '30", and a cartridge made up with an explosive other than loose black powder.

Germany is adopting a magazine under the

barrel, the present Mauser barrel and ammunition being retained.

France, like England, is adopting an entirely new arm with the magazine under the barrel, the calibre of which is about '305"; and the cartridge will be made up with a new explosive.

Austria is adopting the Mannlicher magazine under the breech action, but retaining the Werndl barrel and ammunition.

Italy is converting the Vetterli into a magazine rifle by the addition of the Vitali magazine.

Russia is converting the Berdan into a magazine rifle by the addition of a magazine.

Turkey is taking the same arm as Germany. Norway and Sweden are experimenting with the Jarmann magazine rifle.

Thus it will be seen that every European nation has adopted a magazine rifle; some of these, however, can only be looked upon as makeshifts pending the result of trials now being carried on.

MACHINE-GUNS. A machine-gun is one consisting of two or more barrels; it is loaded, cocked, and fired by mechanical means, a continual supply of cartridges being kept up by means of hoppers or cartridge-holders placed above the breech mechanism; the object of a machine-gun being to deliver a rapid, accurate, and continuous fire in the smoke and excitement of battle.

There are three types of machine-guns in Her Majesty's service, viz., the Gatling, the Gardner, and the Nordenfolt; and more lately experiments have been carried on with the Maxim machine-gun, although it has not yet been adopted. The Gatling gun was first introduced into the British service in January, 1874, having been recommended for adoption about two years previously by a committee which tried it in competition with the Belgian Montigny mitrailleuse, and reported it to be the better gun of the two.

The gun consists of ten barrels, whose axes lie on the surface of a cylinder, and are parallel to one another; they are screwed into a circular disc, called the rear disc, at the breech end; a main shaft passes through the cluster of barrels and through the rear disc; there is a front disc fixed to the main shaft, the muzzles of the barrels passing through this front disc: by a proper adjustment of the front and rear discs the axes of the ten barrels are brought perfectly parallel to one another. There are ten locks corresponding to the ten barrels, contained in a cylinder. The gun is worked by a crank and handle: in working the gun the barrels and locks revolve together, but irrespective of this motion the locks have a forward and backward action of their own. The forward motion places the cartridge in the barrels and closes the breech at the time of each discharge, while the backward motion extracts the empty cartridge cases. When the gun is in action there are always five cartridges going through the process of loading, and five cartridges in different stages of being extracted, and these several operations are continuous while the gun is being worked. The gun is fed by means of a metal drum, which fits on a pin in the centre of a hopper communicating with the cartridge-carrier. The drum has sixteen compartments or columns, each of which holds 15 cartridges. Thus each drum when full holds 240 cartridges; it weighs empty 22 lbs., and full 50 lbs. The gun is ele-

vated and traversed by an elevating screw and traversing worm. The barrels are of the same calibre—45"—as the Martini-Henry rifle barrel, but there is a special ammunition for machine-guns of this calibre; the cartridge case is solid drawn, and contains 85 grs. of powder; the bullet is the same as for the rifle, and weighs 480 grs. The weight of the gun with drum empty is just under 4 cwt.

The gun is mounted on a wrought-iron carriage, with trail, on two wheels 4 ft. 8 in. in diameter, and having a track of 5 ft. 2 in. The trail hooks up to a limber on wheels similar to the wheels of the gun-carriage; it has shafts for single or double draft; there are two boxes on the limber, holding together six cartridge-drums and one box of ammunition. The weight of the gun-carriage is 5 cwt. 3 qrs. 8 lbs., and of the limber, with boxes empty, 8 cwt. These guns have been issued chiefly to the navy, but some have also been issued for land service. They are still in use, though their place on board ship has been taken by Gardners and Nordenfelts.

As improvements in machine-guns were continually being made, it was determined to have another competition between guns of rifle calibre brought forward by various inventors. The committee to which the matter was referred reported early in 1881 that the two-barrel Gardner was the most suitable gun for the general purposes required for both land and sea service, but that where a more powerful gun is required the five-barrel Gardner should be provided. The Gardner system was thereupon adopted.

There are three patterns of Gardner guns: the five, the two, and the one-barrel Gardner. The five-barrel gun, as its name denotes, has five barrels whose axes are in a horizontal plane and parallel to one another; they are held in a frame, the breech end of the barrels being fixed in a centre crosspiece, and the muzzles being passed through a front crosspiece. The rear part of the frame forms a casing the top of which is closed by a cover opening from the rear to the front, in which are the locks which carry the mechanism for igniting the cartridges and extracting the empty cases. The locks are driven backwards and forwards by means of a disc crank—at the forward motion the cartridges are pushed into the barrels and held there during the time of discharge, whilst the backward motion withdraws the empty cases. The gun is fed from a cartridge-feeder, holding 100 cartridges in five grooves or columns of twenty each, which is fixed to the cover above the hopper, through openings in which the cartridges fall from the cartridge-feeder to the cartridge-carrier, which has a transverse motion for the purpose of delivering the cartridges opposite the barrels and in line with the lock-plungers. The cartridge-feeder is itself fed or supplied during firing from cartridge-holders holding fifty cartridges, in five rows of ten each, corresponding with the grooves in the feeder. There are two sights—a fore and a tangent sight—and the gun is sighted to 2,000 yards. The ammunition is the same as for the Gatling gun. The weight of the gun with cartridge-feeder is about 2½ cwt. The naval mounting for this gun consists of a cone, which carries the crosshead, elevating, and traversing gear, the crosshead being screwed to the base of the cone. The cones are secured

to ships' decks by holding-down rings, into which they fit: the rings are fixed in certain positions on the ship, and the cones with their guns can be shifted from ring to ring according to where the fire is most wanted. For service on shore the Gatling carriage has been fitted with a fixed socket, into which the stern and traversing gear can be dropped. In addition to this there is a naval landing carriage: it is two-wheeled, carrying on its frame a box divided into partitions for carrying either Gardner cartridge-holders or Nordenfelt hoppers, and also boxes of ammunition; on this box is fitted a socket arrangement which will carry any rifle calibre machine-gun now in the service, all guns being so made as to fit on to the same carriage.

The two and the one-barrel Gardners are constructed on the same principle as the five-barrel. In the case of the two-barrel gun, the barrels were formerly enclosed in a gun-metal casing; but in guns now made this casing is omitted, the axes of the barrels being kept parallel by a disc passing over the muzzles and secured to the barrels. The two-barrel gun is fed by a vertical cartridge-feeder holding thirty cartridges in one column; the cartridges fall through the cover of breech casing to the cartridge-carrier which, by a transverse motion, delivers the cartridges opposite the right and left hand barrels alternately; the cartridge-feeder is itself fed from a wooden cartridge-holder holding twenty cartridges. The two and the one-barrel guns have both two sights—a fore and a tangent sight—and are sighted to 2,000 yards. The two-barrel gun, as at present constructed, weighs between 80 and 90 lbs.; the one-barrel gun weighs between 50 and 60 lbs. The only advantage which the one-barrel has over the two-barrel gun is its greater lightness, which however is trifling; whereas the two-barrel has the great advantage over the one-barrel gun of throwing in a double shower of bullets in the same space of time; it can be fired at the rate of 240 shots a minute.

The naval mounting for the two-barrel gun is the same as for the five-barrel; and by an alteration in the compartments, to suit the different shape of cartridge-holder, the naval landing carriage can also be made available for this gun. There are but very few one-barrel guns in the navy, and these few are mounted on a tripod mounting, the tripod being held in position on the ship's deck by a holding-down bolt, which is passed through a slot in a metal deck plate and securely screwed down.

All the Gardner guns are worked by a handle having a rotary motion like the handle of an organ; the Navy however prefer the action of the Nordenfelt guns, which are worked by a hand lever having a forward and backward stroke; and as the five-barrel Nordenfelt is considerably lighter than the five-barrel Gardner, it was decided to manufacture them for the Navy. The action of this gun may be very briefly described as follows. The five barrels lie in a horizontal plane, their axes being parallel to each other; they are passed through the centre crosspiece and fore-end of the frame, and secured in position by the joint of the cover of frame. The frame in rear of the barrels contains the action-block which carries the hammers and lock-springs; the breech block, which consists of a plate and five plungers, which latter carry the firing-pins and extrac-

tors; and the cartridge-carrier; this has five recesses for receiving the cartridges from the openings in the cover for conveyance to a position opposite the barrels and in line with the plungers. After firing, the hand lever or handle is to its full extent forward. The motion of bringing the lever to the rear carries the action-block to the left, which, acting on the breech-block, brings it to the rear, the extractors drawing out the empty cartridge-cases, which fall through openings in the cartridge-carrier; there are inclined studs on the breech-block which take the carrier over to the left, placing its recesses under the openings in the cover, and allowing a fresh supply of cartridges to fall into them. On moving the lever forward again the breech-block is carried forward, the cartridge carrier at the same time being carried to the right, placing the cartridges in front of the plungers, which push them into the barrels, the plungers taking the place of the cartridges in the cartridge-carrier recesses; the action-block being brought over to the right brings the hammers in line with the fringings; the lever being pushed forward to its fullest extent, the tail of it presses on the spring holding back the hammers, which are thus released and fire the cartridges. The gun is fed by means of a distributor, holding fifty cartridges in five columns of ten each; the distributor is attached to the gun by a catch, and remains in position during firing; the distributor is replenished from hoppers fitting on to the top of the distributors, and also holding fifty cartridges each; these are shifted and replaced by others as soon as the cartridges they contain are passed into the distributor; both hoppers and distributors are fitted with a "cut-off," so that at the words "cease firing" they can be removed from the gun without the cartridge still remaining in them falling out. The gun is fitted with fore and tangent sights, and is sighted to 2,000 yards. It fires the same ammunition as the Gatlings and Gardners. The weight of the gun with distributor is only about 150 lbs.

The naval mounting for this gun is a cone, to which is attached the crosspiece, with elevating and traversing gear. Although not identical with the Gardner mounting, the principle of the two mountings is the same, and the cones for both guns are constructed so as to fit into the same holding-down rings. The landing carriage, already described, also takes the Nordenfelt five-barrel gun.

All naval rifle-calibre machine-guns are fitted with shields which are fitted to the frame and can be raised or lowered, or removed altogether, as occasion may require: they are made of $\frac{1}{4}$ " steel plate brought up to a spring temper, and are about 3 ft. wide and 2 ft. 6 in. deep, and weigh about 70 lbs. They keep out Martini-Henry rifle bullets at 200 yards, and their object is to protect the men firing and loading the guns as well as the cartridge-feeders and hoppers.

This completes the list of rifle-calibre machine-guns, with their mountings, in use in the Royal Navy.

As regards the land service it is more than probable than in any future war undertaken by this country machine-guns will accompany both the cavalry and the infantry. The gun will probably either be the two-barrel Gardner, already described, or the three-barrel Norden-

felt, which is identical in principle with the five-barrel already described. The mounting of the gun to be attached to cavalry regiments is called "The Galloper carriage." It consists of a two-wheeled carriage, with shafts for a pair of draft horses, the near horse being ridden by a cavalry soldier, the off horse being in the shafts. On the carriage are two boxes containing the ammunition, either in Nordenfelt hoppers or Gardner cartridge-holders; two men who work the gun sit on these boxes: there is also a framework on the carriage to carry the gun. The gun is worked by the two men kneeling on the footboard, which is made deep on purpose, the horses not being taken out of the carriage; thus the gun can conform with the movements of a cavalry regiment, advancing or retiring or coming into action with great rapidity. There will probably be two mountings for the guns accompanying the infantry: the one intended to accompany the army in ordinary country is merely an adaptation of the naval landing carriage to make it more suitable for infantry. There is a pair of shafts in which a mule can be harnessed; it is, however, not intended that the animal should be ridden. But as these guns might be employed in mountainous countries, such as Afghanistan, where wheeled carriages move with difficulty, an equipment has been designed for carrying on pack-saddles on mules. It consists of a very light gun-carriage on two very light small wheels, the wheels and axle being carried on one mule and the trail and gun on another, the ammunition being carried on other mules. There is one other mounting which should be mentioned, called a "Parapet mounting"; this mounting is intended for light machine-guns used in the defence of fortresses. It is in the form of a T, the cross of the T resting on the parapet, and the foot of the long arm resting on the "banquette." The gun is made to slide up and down the long arm; when at the top it can fire over the parapet. There are two small wheels at the foot of the long arm, so that the gun can be easily shifted from one part of the works to another by sliding it down to near the foot of the long arm, when two men can easily run with the carriage wherever it may be required.

It only remains now to mention the Nordenfelt machine-guns of 1-inch calibre, of which there are two patterns, the four and the two-barrel. The four-barrel 1-inch gun was first introduced into the service in 1879, since which date a large number have been supplied. The object of this gun was to pierce the armour of torpedo-boats. The principle on which this gun works is very similar to that of the five-barrel Nordenfelt gun already described, but being a much more powerful and heavier gun, the action is not quite so simple. It is fed by a hopper holding forty cartridges in four columns of ten each. The gun has two sights, and is sighted up to 3,000 yards. The ammunition consists of a solid-drawn cartridge-case containing 625 grs. of compressed black powder; the projectile is a steel bullet 1-inch in diameter, weighing $7\frac{1}{2}$ ozs.; it will penetrate a $\frac{3}{4}$ -inch steel plate at 200 yards. The gun weighs about 4 cwt.

The mounting is a cone with elevating and traversing gear, the mounting complete weighing about $3\frac{1}{2}$ cwt. The cone fits into the same holding-down rings as the cones for rifle calibre

guns already described. This was the first cone ever introduced into the service, and gave the idea for all the other cones subsequently adopted.

The two-barrel 1-inch gun was introduced for the armament of steam launches and for other purposes when a less heavy gun than the four-barrel would be desirable. Its action is identical in principle and design with that of the five-barrel Nordenfelt, but of course larger and stronger: this gun has the same sight, and takes the same ammunition as the four-barrel, and also has a cone mounting. The weight of the gun is 180 lbs., and of the mounting 170 lbs.; it is fitted with a $\frac{1}{2}$ -inch shield weighing 65 lbs.

The three-pounder and six-pounder quick-firing shell-guns will gradually take the place of the four-barrel Nordenfelts; but as shell guns do not come in the category of small arms a description of them does not fall within the scope of this article.

To summarize the foregoing: there are in the Navy the following rifle calibre machine-guns, viz:—

The 10-barrel Gatling.	
5	Gardner.
2	" Gardner.
1	" Gardner.
5	" Nordenfelt.

All with mountings suitable for the services on which they may be required. In addition to these rifle calibre guns there are also in the navy—

4-barrel 1-inch Nordenfelt.
2 " 1-inch "

Both on cone mountings.

For land service there is—

the 2-barrel Gardner,
and the 3-barrel Nordenfelt,

on various mountings for the various services on which they may be required.

SMALL ARMS IN THE SERVICE. This section must now be touched upon very briefly. Commencing with the Navy, every sailor has a cutlass; in addition to the cutlasses a certain number of rifles, pistols, boarding-axes, and boarding-pikes are served out to every ship in commission, the numbers bearing a certain proportion to the ship's complement. The cutlass with which the sailors were armed up to the year 1875 had a broad blade 27 inches in length: it was a strong, useful weapon. Similar cutlasses were issued with the Snider rifle in the form of a cutlass sword-bayonet. But on the introduction of the Martini-Henry rifle it was found that the Snider cutlass sword-bayonet was too heavy for the Martini-Henry rifle, the barrel of which was weaker than the Snider barrel. It was therefore determined to cut down the old heavy cutlass into a lighter weapon; the blades of the old cutlasses were consequently reduced in width from $1\frac{1}{4}$ inches to 1 inch, and shortened from 27 to 25 inches; and this is the weapon with which the sailors have been armed from 1875 till quite recently, without any idea being entertained of its being unserviceable until the war in the Soudan exposed its weakness. This pattern of cutlass has now been withdrawn, and the old 27-inch sword reissued in its place; and the new infantry sword-bayonet, as already described with the magazine rifle, will be issued instead of the cutlass sword-bayonet. The rifle issued

to the navy is the same in every respect as the army rifle. The pistol at present in the service is the Enfield revolver, weighing $2\frac{1}{2}$ lbs., the barrel of which is six inches long, and calibre ".45"; it is a six-chambered breech-loading revolver, firing a powerful cartridge, containing 18 grs. of powder, the bullet weighing 265 grs. It will probably be superseded before long by a lighter, handier pistol, with a barrel only 4 inches long. Nothing need be said about the boarding axes and pikes, which in these days of ironclads are hardly likely to be called into active use.

To come next to the cavalry; every cavalry soldier has a sword and a carbine, except sergeants, who have a pistol, and the Lancer regiments, which have a lance instead of a carbine. The cavalry sword now in the service is the pattern 1885 sword; its weight is 2 lbs. 5 oz., having a blade $34\frac{1}{2}$ inches long; the scabbard weighs 1 lb. $6\frac{1}{2}$ oz. The tests to which this sword are subjected are most severe, and it is now admitted to be a thoroughly efficient and serviceable weapon and quite trustworthy. There are still a few swords of old and obsolete patterns in the hands of the yeomanry, but these will be shortly withdrawn and replaced by the pattern 1885; it is therefore unnecessary to describe them. The carbine issued to the cavalry is made specially for that branch of the service; the action and stock-butt are similar to that of the Martini-Henry rifle; the barrel is 1 foot shorter than the rifle barrel, being only 1 ft. $9\frac{1}{2}$ inches long: it is rifled on Henry's system. The total weight of the carbine is 7 lb. 10 oz. The ammunition is special; the case is coiled, and contains 70 grs. of powder, the weight of bullet being 470 grs. The pistol is the same as that described for the navy.

There are two patterns of lances, one with ash-staves, the other with bamboo, both being 9 ft. in length, the former weighing rather over 4 lbs., and the latter weighing rather less.

The household cavalry have a sword of a special pattern, the blade of which is perfectly straight, and 39 inches in length. Their carbines and pistols are the same as in the rest of the cavalry.

In the Royal Horse Artillery the gunners are armed with a cavalry sword of the pattern already described, and a small number of carbines are served out to each battery for purposes of guard and escort. The carbine is similar to the cavalry carbine, with the exception of having a sword-bar on the upper band, so that a sword-bayonet can be fixed if required. In the Field Artillery the sergeants and other mounted men are armed with the cavalry sword similar to the above; and the gunners are armed with the Martini-Henry artillery carbine sword-bayonet: this weapon has a blade $25\frac{1}{2}$ inches long and 1 inch broad; it has a saw-back, and weighs 1 lb. 10 $\frac{1}{2}$ oz. There are also a small number of carbines with each battery as in the Horse Artillery. Neither in the Horse nor in the Field Artillery are the drivers armed at present; though it is in contemplation to arm them. In the Garrison Artillery every gunner has a carbine and sword-bayonet as already described; the sergeants of Garrison Artillery have a sword somewhat similar to an officer's sword.

The Royal Engineers have a rifle and sword-bayonet.

In the Guards and Infantry of the line every soldier has a rifle and long triangular bayonet. The Martini-Henry rifle has already been described; the triangular bayonet as now manufactured has a blade $2\frac{1}{2}$ inches long, and weighs $17\frac{1}{2}$ oz.; it undergoes extremely severe tests, and is a strong, trustworthy weapon. All the sergeants of the line and the whole of the men in rifle regiments have a sword-bayonet instead of a triangular bayonet; and the staff-sergeants have a sword more ornamental than useful, and a pistol.

The Royal Marines are armed like regiments of the line, and the Royal Marine Artillery like rifle regiments.

The Coast Guard and Royal Naval Reserve are armed with rifle and cutlass sword-bayonets.

The Militia and Volunteers are armed in a similar manner to the territorial regiments to which they are attached, except that the Volunteers have got the old Snider instead of the present pattern of triangular bayonet.

The Native Infantry troops in India are armed partly with the Martini-Henry and partly with the Snider rifle, but the Native Cavalry are still armed with the sword to which they are accustomed, called a "tulwar," which has a very curved blade.

Such, briefly, is an account of the arms to be met with in this service.

THE Diplomatic Service of the Crown consists of H.M. Ambassadors, Envoys or Ministers, and Chargés d'Affaires to foreign States, and of the Secretaries and Attachés appointed to Embassies or Legations abroad by the Secretary of State for Foreign Affairs, with the Queen's approval. AMBASSADORS represent Great Britain at the capitals of the other five Great Powers of Europe, viz., Paris, Berlin, Vienna, St. Petersburg, and Rome; and there is also an Ambassador at Constantinople, accredited to H.I.M. the Sultan. They directly represent the Sovereign, receiving salaries at amounts varying from £7,000 a year at Berlin and Rome, to £10,000 a year at Paris, and occupy costly houses, erected and maintained at the expense of the British Government; but although the salaries seem high in comparison with those received by the chief officers of State in this country, it must be remembered that Her Majesty's representatives abroad are obliged to live in a different style from what our high officials at home are required to do. The cost of representing his sovereign and country abroad is always heavy, it is more expensive for a public servant to live abroad than at home, and with regard to the necessity of worthily representing his country, it is an undoubted fact that the greater the influence which a Minister has abroad the greater is the extent to which he is able to protect and watch over the interests of his countrymen. The cost of living and of representation varies greatly at different capitals, and the salaries of the higher posts in the service are fixed mainly with a view to the amount which the Ambassador would be required to spend to maintain his position with due regard to dignity and efficiency; but although most of the salaries of the higher posts were fixed many years ago, the cost of living abroad has greatly increased, and it is probable that heads of missions are not infrequently compelled to supplement their official income by their own private means.

ENVOYS AND MINISTERS rank immediately after the Ambassadors, and represent the Queen at Washington and at the capitals of those European countries which have not attained the position of "Great Powers." They are mainly divided into two classes—(1) Envoys Extraordinary and Ministers Plenipotentiary, and (2) Ministers Resident. We have representatives of the former class at The Hague, Stockholm, Madrid, Athens, Brussels, Lisbon, Berne, Copenhagen, Belgrade, and Bucharest in Europe; at Washington, Mexico, Rio de Janeiro, and Buenos Aires in America; at Teheran, Peking, and Tokio, in Asia; and at Tangier, in Africa. Of these the most highly paid is the Envoy at Washington, whose salary is £6,000 a year; but there are obvious reasons for this, Washington being probably the dearest capital in the World, and it being very important that on the ground of policy and for the sake of harmonious relations with the United States, the British Minister should be able to live in a style befitting the representative of this great Country. The salaries of the Envoys at the Eastern Courts of Peking and Teheran are £5,500 and £5,000 respectively, and the salary of the Minister at Madrid £5,000. These are the most highly paid missions, the salaries of the remaining posts varying from £4,000 at Rio de Janeiro and Tokio to £1,200 at Belgrade. The Ministers Resident, nine in number, are, with the exception of those at

Stuttgart and Bangkok, all stationed at the capitals of the several Republics in South and Central America. The salaries range from £1,250 a year at Stuttgart to £2,000 at Lima, Caracas, Guatemala, Santiago, and Bogotà. With the exception of those at Caracas and Stuttgart, the Ministers Resident hold the additional rank of Consul-General, and perform Consular duties in addition to Diplomatic work at their respective posts. Three heads of missions, viz., those at Darmstadt, Munich, and Cettinje, hold the rank of Chargé d'Affaires only, and receive salaries ranging from £1,000 to £1,250 a year. The duration of the appointment of all heads of missions, whether Ambassadors, Envoys or Ministers, or Chargés d'Affaires, does not exceed, though it may be less than, five years, and at the expiration of five years the question of reappointment, or of transfer to another mission, is open for consideration. Members of the Diplomatic Service, on attaining the age of 70 years, are retired on the pension for which their services may qualify them. These pensions are regulated by an Act of Parliament (32 & 33 Vict., c. 43), and subject to qualification respecting length of service and residence abroad, are of the following amounts—£1,700 a year to Ambassadors, £1,300 a year to Ministers at 1st class missions, £900 to those at 2nd class missions, and not exceeding £700 a year for all other members of the service.

The Secretaries and Attachés are divided into the following classes:—Secretaries of Embassy, Secretaries of Legation, Commercial Attachés, Second Secretaries, Third Secretaries, and Attachés. THE SECRETARIES OF EMBASSY AND LEGATION are deemed to hold, as regards the head of the mission, the same position which an Under Secretary of State in the Foreign Office holds as regards the Secretary of State. The whole public business of the embassy or mission passes through his hands, and subject to the orders of the chief, is carried on under his immediate superintendence. The salaries of the Secretaries of Embassy range from £800 to £1000 a year; those of the Secretaries of Legation from £500 to £800. COMMERCIAL ATTACHÉS form a small class between the Secretaries of Embassy and Legation. There are only two of them, one of whom resides at Paris, and the other at St. Petersburg. SECOND SECRETARIES constitute an intermediate class between the Secretaries of Legation and Third Secretaries, and receive a minimum salary of £300 a year, increasing by £15 a year until it reaches a maximum of £450 a year. They are thirty-four in number, and with the Third Secretaries and Attachés are appointed by the Secretary of State to serve indiscriminately either at embassies or missions. To these officers, with the Third Secretaries and Attachés, are assigned the details of the work in the several Chanceries, the Senior Second Secretary at each embassy or legation being responsible for the correct performance of the work, and for the accounts of the quarterly expenditure. THIRD SECRETARIES receive a salary of £150 a year, but most of them earn an additional £100 a year by passing an examination in Public Law before the Civil Service Commissioners. THE ATTACHÉS form the junior class of the service; and here it may be useful to state the steps necessary to obtain admission. On the occurrence of a vacancy the Secretary of State nominates a few candidates to compete for the appointment before the Civil

Service Commissioners in ten subjects (see "Foreign Office List" for subjects and specimens of examination papers), and the successful competitor, on receiving a certificate of qualification, is directed to report himself at the Foreign Office, where he is required to work with the clerks for at least six months, in order that he may gain some experience in clerical work, keeping registers, the arrangement of presses, &c. After his time at the Foreign Office is completed, he is appointed to some embassy or mission abroad, where he works as one of the junior members in the Chancery, but receives no salary until the expiration of two years from the date of his Civil Service certificate, when, if he has had no leave of absence, and the head of his mission reports that his conduct has been satisfactory, that he understands and speaks French well, and also one other foreign language, he receives a commission as Third Secretary, and commences to draw the salary of £150 allowed to officers of that class.

The CONSULAR SERVICE of the Crown is subordinate to the DIPLOMATIC SERVICE, and the Diplomatic representative of Her Majesty is, subject to the authority of the Secretary of State, invested with authority over the Consular officers within the country in which he resides.

The principal object of the appointment of British Consular officers in foreign countries is the protection and promotion of the commercial interests of British subjects, although their duties are not limited to commercial matters. The service consists of the following ranks:—

(1) Agents and Consuls-General; (2) Consuls-General; (3) Consuls; (4) Vice-Consuls; (5) Consular Agents; and (6) Pro-Consuls. AGENTS AND CONSULS-GENERAL, although nominally of the highest rank in the Consular Service, are practically Diplomatic officers, and are entitled after fifteen years have elapsed since the date of their commissions as Agents and Consuls-General to pensions under the Diplomatic Pensions Act. There are only three of these officers, viz., those at Sofia (Bulgaria), Cairo (Egypt), where the Agent also holds the rank of Minister Plenipotentiary in the Diplomatic Service, and at Zanzibar. The two former countries are under the suzerainty of the Sultan of Turkey, and it would not be in accordance with diplomatic usages to send to their rulers accredited Envoys or Ministers. Zanzibar is independent, but an officer of this class resides there. The salaries of these officers vary greatly. At Cairo, where for obvious reasons the British Agent has a very heavy responsibility, besides having to incur large expense for entertaining, the salary is paid from the Diplomatic Vote, and amounts to £4,000 a year, besides £1,000 personal allowance to the present holder; but this post is altogether exceptional, and cannot be considered as a Consular one. The Agent at Sofia receives a salary of £1,500 (including office allowance), and the one at Zanzibar £2,150.

CONSULS-GENERAL are thirty-seven in number, but nine of these are also Ministers in the Diplomatic Service, who have an additional Consular rank given them to enable them to perform Consular duties when required. Of the remainder, three are honorary appointments, and two are paid by the India Office. This rank is the goal of the ambition of the members of the Consular Service. Putting aside the honorary and merely nominal appointments, it will be seen that the prizes are few, and the honour correspondingly

great. It appears from a report to the House of Commons that representations are frequently made to the Foreign Office by Consuls-General and Consuls as to the inadequacy of their salaries, and no doubt there are good grounds for such complaints, for these officers are almost of necessity put to heavy expenditure in the way of hospitality, private charity, &c. There is a practical obligation upon officers holding the position of Consul-General and Consul to entertain people, though it is not considered part of their duty to do so, and large expense is necessarily incurred on this score. The salaries are carefully regulated with a view to the importance of the post, the amount of work and responsibility, and the cost of living.

The next rank is that of CONSUL, and the above observations respecting salaries apply to them equally with the Consuls-General. Consuls are divided into those who make a career of the Service, are restricted from trading, and become entitled on retirement to a superannuation allowance under the Civil Service Pensions Acts, and those persons, merchants and others, who undertake Consular duties in addition to their own private occupations. These receive no salaries or pensions, but they are granted an allowance to cover their office expenses. There are 147 Consuls in Her Majesty's service.

The most numerous class in the Service is that of the VICE-CONSULS, which numbers 476. Of these by far the majority are trading Vice-Consuls, many of whom are foreigners. There are, however, a considerable number who receive official salaries, and in a short description of the Service some importance attaches to this office for it is the rank given to a candidate who succeeds in passing the Civil Service examination, and it is therefore the first and lowest rung of the Consular ladder for those who enter the Service as a profession. The examination for the Consular Service is not competitive, like that for the Diplomatic Service, but on the occurrence of a vacancy one aspirant is nominated, and if he succeeds in satisfying the Commissioners he receives the appointment. The subjects for examination are neither numerous nor difficult, and consist principally of French and the language of the post at which the officers are appointed to reside, and Mercantile Law.

It will be observed from the List that many Vice-Consuls receive small allowances of £5 a year and upwards. These of course are not intended to be considered as salaries, but are given as compensation in lieu of fees previously retained by them, but accounted for to the Foreign Office since the 1st of July, 1885.

The Consular Agents rank immediately below the Vice-Consuls, and are always persons resident on the spot who are willing to undertake Consular duties without remuneration, but for the honour of the rank given to them. Consular Agents are appointed to posts which are not deemed of sufficient importance to warrant the establishment of posts of higher rank.

The last grade is that of Pro-Consuls, who differ from the rest of the Service in having their duties strictly limited to the performance of notarial acts. They are appointed by Consuls-General, Consuls, and Vice-Consuls, who report their nominations to the office of Pro-Consul to the Secretary of State for his formal approval of the appointments. The rank of Pro-Consul is usually conferred upon the clerk of the Consul or Vice-Consul.

THE expansion of the German export trade has for some time past been a subject of frequent discussion, and it is therefore worth while to place before the readers of this Almanack some of the facts which bear upon the matter.

Our first table presents information on the total value of the imports and exports of the German Zollverein and of the United Kingdom since 1875. In this table we include under imports of the Zollverein, all the merchandise which passes through the custom-house into "unre-

stricted circulation" (in den freien Verkehr), and under exports not only the produce of the Zollverein, but also merchandise which is re-exported after having passed into "unrestricted circulation." "Imports for home consumption" and "exports of German produce" are consequently somewhat less than the figures given. The imports of the United Kingdom comprise imports *minus* re-exports of foreign and colonial produce; the exports include "British and Irish produce" only.

YEARS.	IMPORTS (Merchandise),				EXPORTS (Merchandise),				BALANCE OF TRADE (Ratio of Imports to Exports).

An examination of this table shows that the imports of both countries were subject to considerable fluctuations, which is only natural, seeing that both depend largely upon foreign supplies, not only for the raw materials employed in their manufactures, but also for their food. The imports of Germany have undoubtedly decreased. That decrease, however, is smaller than appears from our table, if it be a fact that the values given for the imports up to 1879 are excessive. The exports of Germany increased largely during the period under review, although not without an occasional check, the falling off in 1885-6 being more especially remarkable. The exports of the United Kingdom have decreased upon the whole, but there took place a remarkable recovery in 1881-4, followed, as in the case of Germany, by a relapse in 1885. That relapse, however, was not nearly as severe as in the continental empire. Taking the whole period we find that the annual exports of Germany averaged £145,224,000, and those of the United Kingdom £216,935,000. The exports of 1886 are consequently 23 per cent. *above* the average in the case of the former, and 2'1 per cent. *below* it in that of the latter. This, at all events: does not justify very gloomy anticipations, especially, if the almost general depreciation in the price of commodities be taken into account.

The changes in the total value of imports and exports are, however, of comparatively small importance in comparison with the change which has taken place in the nature or character of the trade carried on by Germany. That country, although long known for the excellence of certain of its manufactures, has until recently

been an exporter of raw produce rather than of manufactured goods. Such is no longer the case. The German imports of manufactured goods certainly increased between 1872 and 1886 from £28,305,300 to £51,984,000, or 154 per cent.; but this increase was due to a few articles, and more especially to the increased import of yarns, which rose from £9,690,000 to £16,716,000. Yarns, however, are largely re-exported after they have been converted into cloth.* Turning from imports to exports of manufactured goods we find that they rose from £42,090,000 in 1875 to £108,178,000 in 1886, or 157 per cent. In 1875 they constituted only 36 per cent. of the exports; in 1886 75 per cent.

In certain branches this increase of exports has been truly astonishing. If we take quantities and deduct the imports of the same class of goods from the exports, we shall find that the net exports of silks rose between 1875-86 884 per cent.; woollens rose 296 per cent.; cottons 302 per cent.; machinery 260 per cent. (from 15,960 to 58,497 tons, net, notwithstanding that the imports rose simultaneously from 22,340 to 33,290 tons); glass 264 per cent.; paper 322 per cent.; spirits 258 per cent.; beer 466 per cent.; pig-iron, from a net import of 284,000 tons, rose to a net export of 858,000 tons; and sugar from a net import of 1,247 tons rose to a net export of 565,103 tons, an abnormal increase, brought about in consequence of improve-

* Thus, in 1885, raw produce and partly manufactured articles to the value of £1,800,000 were imported into the Zollverein to be improved ("zur Veredlung"). On re-exportation these had increased in value to the extent of £1,378,000.

ments in the manufacture of the articles having converted a "drawback" into a considerable "bounty."

The increase in values, computed in the same manner, has been equally remarkable. It reached (1875-85) 116 per cent. for all kinds of textiles and apparel, 781 per cent. for metal wares, 538 per cent. for machinery, 53 per cent. for glass and earthenware, 355 per cent. for paper, 210 per cent. for spirits, and 54 per cent. for beer.

The decrease in the imports, accompanied as it was by an increase of the exports, shows conclusively that German manufacturers were not only able to meet home demands more largely than in former years, but that their surplus production placed them in a position to compete successfully with the older manufacturing countries in the markets of the world.

We next consider the changes which have taken place in the direction of the German export trade, changes largely forced upon German merchants through the erection of artificial customs barriers, which nullify the geographical advantages of proximity, and by the development of manufacturing industries in neighbouring countries. Both these reasons apply more especially to Russia, the exports to which between 1880-85 fell to the extent of 29 per cent. Almost as considerable is the decrease in the exports to the United States, for it amounted to 17 per cent. in value. France and Belgium

likewise exhibit a decline, but all the rest of the world (with rare exceptions) appears to have received German produce in larger quantities than ever before. The following table speaks for itself:—

Countries to which Exported.	INCREASE OR DECREASE IN THE VALUE OF EXPORTS.

Total	144,643	145,762	223,060	212,433	+0.7	-4.8

Whilst this table exhibits very distinctly the inferiority of the present export trade of Germany to countries outside Europe as compared with that of the United Kingdom, it also shows that this trade is increasing very rapidly, and that the efforts of German merchants and their agents are bearing fruit. The exports of the Zollverein to countries outside Europe (exclusive of the United States) increased from £2,954,000 in 1880 to £4,528,000 in 1885, and although this increase is absolutely smaller than the increase in the exports of the United Kingdom, which grew (1880-86) from £109,220,000 to £112,235,000, it is relatively very considerable, for it amounts to 53 per cent. as compared with less than 3 per cent. for the United Kingdom. The actual increase in this branch of the German export trade

is larger still, but we have no information which would enable us to trace the millions' worth of goods annually exported through the Hanse Towns to their ultimate destination.‡

An examination of the Commercial Returns of various countries enables us to collect still further data on the expansion of the German Export Trade. It is highly interesting, for instance, to ascertain the relation which German and British Imports bear to total imports. The results of such a computation are presented in the following table (the increase and decrease being indicated by the symbols + and -).

This table clearly establishes the fact that Germany's share of the imports of most countries has increased immensely since 1875. The only countries of importance in our list in which much ground appears to have been lost are Russia, Austria, France, and Belgium, and even these may receive German produce through indirect channels. That ground, more-

* In 1884 the net export of sugar amounted to 624,103 tons.

† The exports from the Zollverein to the Hanse towns should for the most part be credited to countries outside Germany, and more especially to England and the United States. Want of information prevents us from apportioning them. Nor should it be forgotten that much of the trade between the United Kingdom and Germany passes through Holland and Belgium. The exports of the United Kingdom to these three countries combined only decreased 3.1 per cent.

‡ The exports of Bremen to countries outside Germany were nearly the same in 1885 as they were in 1875. In 1885 they amounted to £10,280,000, of which £5,100,000 went to European countries, £5,040,000 to America, and only £1,400,000 to the rest of the world. The Hamburg trade is far more cosmopolitan in its character.

over, has in several instances been recovered since 1880. The increase in Europe has been most remarkable in the case of Spain (153 per cent.), Portugal, Roumania, and Italy; and outside Europe, in Canada, Uruguay, the Argentine Republic, Chile, British India, Japan,

Australia, Western Africa, and the Cape. German successes have in fact been more marked in those countries which, notwithstanding a protective tariff, have not yet succeeded in developing their home industries. In proportion as these rise into importance, so will

the struggle for commercial supremacy become more severe. Even in the United States, Germany improved her position relatively to other countries, although her imports exhibit an absolute decrease, very considerable in amount.* It is quite true that the German imports into many of the countries in our list are as yet of trifling amount when we compare them with the transactions of English merchants.† The relative improvement which has taken place is nevertheless a symptom which cannot be ignored. The thin end of the wedge is being steadily driven in, and it will require all the energy and enterprise with which British

merchants are credited to prevent its being driven much further.

If we turn from the German to the British share in the imports we meet with a very different picture. England, with rare exceptions (as in the Argentina, Uruguay, the United States, and India), appears to have lost ground nearly everywhere, even though in many instances the total value of the imports may have exhibited an increase. It is some satisfaction, however, to be able to assert that some of the ground lost since 1875 has recently been recovered. This looks hopeful, and may be a sign that British commercial enterprise has taken a fresh departure. Of course British losses are not in all cases traceable to German competition. Belgians, Americans, and even Italians, are as keen in the search of new markets as Germans. Thus the Belgian share in the imports of Portugal has increased 170 per cent. since 1875, and that of America 140 per cent.; whilst in the Argentine Republic the share of Belgium is 100 per cent., and that of the United States 40 per cent., better than it was in 1875. France, on the other hand, appears to have lost ground in nearly all parts of the world. And even in Spain, notwithstanding commercial treaties, her share in the import trade has risen only 1 per cent., thus proving once more, that whatever benefits may be conferred by a protective tariff it cannot compel success in foreign markets.

* British and German shares of the total imports into the United States (in per cent.).

	British.	German.
1878-79	24'35	7'29

1883-84	24'34	9'74
1884-85	23'97	10'95
1885-86	29'28	10'88

† German imports into the countries named above as those in which German traders improved their position (Japan excepted) increased between 1875 and 1885 from £3,567,000 to £16,134,000 (352 per cent.), whilst British imports decreased from £104,722,000 to £105,919,000 (0'7 per cent.). It would thus appear as if British merchants pretty much held their own. But if we exclude Australia, it will be found that British imports fell from £83,401,000 to £73,085,000 (12 per cent.).

These then are the facts of the case broadly but sufficiently stated. They show that the export of German manufactures has increased, whilst the import of foreign manufactures into Germany has remained nearly stationary; that the value of the exports, notwithstanding severe losses in certain quarters, has also increased, and that in most markets of the world Germany has improved her position.

Now a few words of explanation. It will hardly be denied that the increase in the exports of German manufactures is in part due to the commercial policy of the German Empire. Up to 1879 the Zollverein may be said to have pursued a free-trade policy. In 1865 the duties on corn, fuel, chemical and most raw produce were removed. Further modification of the tariff in the direction of free trade took place in 1868, 1870, and 1872, in which year duties on pig-iron were abolished, and in 1877 when machinery and hardware were admitted duty-free. The reaction dates from July 15, 1879, when many of the old duties were restored, and they have been increased and multiplied since until hardly an article can pass a German custom-house without a duty being levied upon it.

It is only natural that protective measures like these should give a stimulus to manufactures, and equally natural that German manufacturers should be better able than they were before to monopolize the home markets, and to part cheaply and even below cost price with their surplus stock. And if an outlet for this surplus stock had to be sought beyond the seas it was because Germany's neighbours had entrenched themselves within custom's barriers even more formidable than were those erected by Germany itself. To a certainty, if Russia should get the worst in the long-looked-for war, a commercial treaty will be made one of the conditions of peace. This is not the place to inquire in how far a return to protection has improved or injured the economical position of Germany. Suffice to say that the apostles of free trade in that country, the followers of J. Prince Smith, still adhere to their old opinions. They have not been silenced, still less have they been convinced.

It would undoubtedly be a mistake to assume that the apparently favourable aspect of Germany's commercial relations is mainly the result of protective duties. Nothing could be further from the truth! Other factors have been at work, and must not be lost sight of. Germany has worked long and patiently to improve her manufactures, and her perseverance and enterprise are meeting with their due reward. "Cheap and nasty" is no longer a reproach which can be levelled at German manufactures in general, as was done by one of the experts whom the German Government sent to Philadelphia to report on the Centennial Exhibition. In many of its departments the products of German industry need not fear comparison with foreign products, and frequently they surpass them not only in price but also in quality. The advantages of universal education, the many facilities enjoyed for acquiring a technical knowledge of manufacturing processes, are bearing fruit. The heads of German manufactures are generally in the possession of technical knowledge, whilst in this country they are frequently mere business men, who leave the supervision of the manufacturing processes to subordinates. The German manufacturer is

moreover credited with adapting himself more readily to the tastes and requirements of his possible customers than does his English competitor.

Moreover, in Germany the price of coal and iron is not materially enhanced by exorbitant royalties, labour is cheaper, and taxation moderate, notwithstanding the large army, for the public domains have not been squandered upon court favourites. The taxation (Imperial and local) amounts in the United Kingdom to 57s a head, whilst in Prussia it does not exceed 23s.

At the same time we should not, with a view to the future, lose sight of the fact that if labour in Germany can still be called "cheap" (an assertion doubted by some competent judges) it is likely to become dearer. Strikes are of frequent occurrence; trades' unions increase in power, and the German workman will insist upon a higher wage notwithstanding the provision in sickness or old age promised for the future.

Chambers of commerce and commercial societies are ever active in Germany in spreading information likely to prove of service to merchants or manufacturers. Permanent exhibitions have been established at numerous centres of industry, and in February, 1885, there left Hamburg a "Floating Exhibition," which visited Lisbon, Morocco, and the principal ports of the Levant, establishing business relations everywhere. That the German merchant is ubiquitous is a well-known fact, and that his knowledge of foreign languages (taught efficiently at every secondary school) gives him an advantage, even when he stays at home, is undoubted.

It is scarcely likely that the German Protectorates recently acquired will at an early date lead to an appreciable expansion of German trade, but there can be no question that the new lines of subsidized steamers to Eastern Asia, Australia, and the Pacific will do so. Whether such subsidies are contrary to the principles of political economy or not may exercise the minds of German free-traders, but the results of such prodigality, if prodigality it be, are sure to be felt by British shipowners and merchants.

From what has been stated it will be seen that German competition in every field of commerce will in future have to be reckoned with. The sterling capacities of the English merchant, and the enterprise of the English manufacturer, are nowhere doubted, and least of all in Germany, but they will have to be put forth in their whole strength, if British commerce is to hold its ground.

THE Companies or Guilds of the City of London, whose title "Livery" recalls the days when each trade wore its peculiar costume, are supposed by some archaeologists to represent the "collegia opificum" of the Roman occupation. They more probably sprang from the religious, social, and industrial guilds which existed in London in Anglo-Saxon, Norman, and Plantagenet times. The archives of the Guildhall, the name of which shows their connection with the municipality, speak among others of a "Frith Guild" and a "Knighten Guild," societies the main objects of which were the relief of poverty and the performance of masses for the dead. The following are the ordinances of one of these associations, framed in the thirteenth century: "All the bretheren and susteren shall go in procession on the feast of Corpus Christi. . . . If any one of the guild falls into poverty, which God forbid, and has not the means of support, he shall every week have sevenpence out of the goods of the guild. . . . If any one dies in the city without the means of burial, the guild shall find the means according to the rank of him who is dead. . . . If any one wishes to make a pilgrimage to Jerusalem each brother or sister shall give him a penny, if to Rome a halfpenny; and they shall go with him outside the gates of the city, and on his return they shall meet him and go with him to his mother church. . . . If a brother or sister dies outside the city on pilgrimage or elsewhere, they shall do for his soul what would have been done if he had died in his own parish. . . . When one of the guild dies he shall, according to his means, bequeath five shillings or what he will to the guild. . . . On feast days the brethren and susteren shall have three flagons and six tankards with prayers, and the ale in the flagons shall be given to the poor who most need it. After the feast a mass shall be said and offerings made for the souls of those who are dead." Most of these rules became obsolete at the Reformation, but the legacies of "five shillings or what he will," invested in house property in the City, which has vastly increased in value, are the origin of the Companies' present estate. Each industry had its own quarter. Thus Paternoster Row contained the sellers of beads for prayers, the Poultry poulterers, Ironmonger Lane ironmongers, the Vintry wine-sellers, Cordwainer Street shoemakers. But, as membership was hereditary, the guilds always contained members who did not follow their trades. So Chaucer, an officer of the Corporation, says of a London pageant—

"An haberdasher and a carpenter,
A weaver, a dyer, and a tapiser,
Were all yclothed in a liverie
Of a solemne and great fraternitie.

Well seemed each of them a fair burgeis
To sitten in a guildhall on a deis."

These bodies, or bodies formed by grouping them together, received charters in the reigns of Edward III. or Richard II., and, as the twelve "great" and the many minor "livery Companies of London," have had their charters renewed by succeeding sovereigns down to the accession of the House of Hanover. The terms of the instruments often refer to the relief of poor members as an object of the incorporation. Their principal effect, however, was to organize the trade and manufactures of mediæval London, by giving the "Courts" power (1) to

compel all engaged in them to join Companies, and (2) to search for and destroy defective wares within a radius of several miles from St. Paul's. The Companies formed were of three classes: (1) those consisting of merchants and wholesale dealers, such as the Mercers and Grocers, in whose arms respectively a ship and a camel laden with spices are prominent; (2) those consisting, like the Fishmongers, of shopkeepers and their apprentices; (3) those consisting, like the Goldsmiths, Clothworkers, and others deriving their names from "arts and mysteries," of master manufacturers and artizans.

For between two and three centuries the Companies of London, thus organized, acting in concert with the merchants of "the Staple" in the provincial towns and on the Continent, and giving advice to and receiving directions from the Privy Council as to mercantile policy, controlled the trade and manufactures of England. The Baltic ports northwards, Bordeaux southwards, were the furthest points to which English ships then sailed. The principal products of the country were wool in an unmanufactured state and woollen goods. The "wools of England," called by the king in the "Ordinance of the Staple," "the sovereign merchandize and jewel of our realm," were to England then what wine is now to France, what gold has been to California and Australia. Sheep-farming was found to be lucrative by the Cistercian monasteries of Yorkshire, and by many of the landed aristocracy and gentry; and the art of weaving was taught by the fugitive Walloons, who had found an asylum in London and the eastern counties. In addition to "clothworking," the smelting of iron, of which the wealds of Kent furnished an abundant supply; the making of armour and bows, the latter from the wood of the forests which surrounded London; the working of silk and leather, and the manufacture of the precious metals, were all practised with much success in London. The English capital was at once a great manufacturing town and the chief port of northern Europe.

The monopolies of the Companies, however, and their powers of search were always of doubtful legality, and their constitution being only suited to a limited area, to the inspection of factories and shops in one street or one quarter, the spread of London beyond its walls and the growth of the great suburbs, particularly those of Southwark and Westminster, seriously interfered with their efficiency as superintendents of production. The disappearance of villeinage, too, and with it that of the mediæval theory of status as the basis of the relations of master and servant and of employer and employed, of which the Companies were a part and an expression, tended to weaken their authority. The spread of the doctrines of Wickliffe also strongly tended to bring their religious observances into disrepute.

At the time of the Reformation they had ceased to have any effective control over the trade and manufactures of London, though a few of the numerous statutes relating to them, such as, e.g., the statutes of Labourers, and of Apparel, those dealing with (1) the assizes of food and fuel and the privileges of the royal purveyors, (2) the status of alien merchants and the protection of the manufacturers and tradesmen of London from foreign competition, (3) the staple and the conflict between the

jurisdiction of the Crown and that of the municipality as regards trade, (4) the encouragement and regulation of the woollen and other industries, including the famous Act of Charles II. with respect to "burying in the woollen," were promulgated since the Reformation. Of their three original functions, therefore, two—those of common worship and association for commercial purposes—became obsolete more than three centuries ago. Their remaining function, that of hospitality and charity, has since this period been the only one which it has been possible for them to discharge. "A nursery of charities and a seminary of good citizens" is the definition given by one of the "great" Companies, the Grocers, of its modern condition.

As regards the connection of the Companies with the municipality of London, for a few years, at a very early epoch, the Companies were substituted for the wards as divisions of the City. Since then the householders in the wards, being freemen of the City, have been the electors to the Courts of Aldermen and of Common Council. Till 1835, however, the freedom of the City could only be obtained through a Livery Company. Since then the freedom of the City and of a Company have not been convertible terms, as the former can be obtained through the City Chamberlain by any householder. But the freemen of the Companies have still the right to claim as such the freedom of the City, and it is not uncommon for them to pay the City fee to the officers of the Company on joining, for payment over to the Chamberlain. On promotion to the livery this is still more usual.

The halls, built probably by subscription, were the commencement of the metropolitan estate of the London Companies. But some of their almshouses and schools are very ancient. From the time of their incorporation they received large sums under wills, in which the first trust was generally to maintain a chantry or a priest to pray for the repose of the soul of the testator, and to keep a light burning at the altar in St. Paul's or some other church of the patron saint of his craft. Then would follow doles to the almspeople, and often an absolute gift to the Company. The sums left were in early times always invested in the purchase of land in or near the City. The licences in mortmain of the Companies speak of small amounts, e.g., "lands to the value of twenty marks a year towards the support of the poor men of the commonalty," but most of the land in London was held in "free burgage" direct from the Crown, and by the custom of the City the Companies could accept lands devised to them while so held without limitation. A Company accordingly would find the money and have the land purchased and conveyed to trustees in trust to convey it to some one person in trust to leave it to the company by his will. The association then obtained the purchased land under the will of the nominee of their nominees. It is to investments in City lands made in this way by the "Courts" during centuries that the Companies owe their present wealth.

The endowments to "superstitious uses," which were numerous and inextricably associated with trusts for secular objects, were confiscated at the time of the suppression of the monasteries. The Companies, to preserve their schools and almshouses, raised a large sum and brought back the confiscated rents and rent-

charges from the Crown. Subsequently their halls and nearly all their house property perished in the Great Fire. Fire insurance was then unknown, and the expense of rebuilding was borne by the Companies without State or municipal aid. The last important event in their history has been the part forced upon them by James II. in the "colonization" of Ulster. The estate in the county of Londonderry which they were then compelled to purchase is generally considered to have been excellently managed.

There are at present in all 72 London Livery Companies. There were once several more, of which all that is known is that, under whatever circumstances, they have ceased to exist. In the other old cities and towns of England scarcely any of the guilds survive. The Merchant Adventurers of Bristol, and the Cutlers of Sheffield, are exceptions. On the Continent almost none are left. Those of France were reformed during the Ministry of Colbert, suppressed during that of Turgot, then again restored, and finally were dissolved during the Revolution. In almost all other continental countries the guilds have been suppressed. Traces of their former existence are to be met with, as in the "merceries" of Augsburg and Venice; but Berne is the only European capital besides London in which these stately corporations, with their mediæval tradition of charity and hospitality, have been permitted to survive.

Corporate and Trust Property, Income and Expenditure.

The property real and personal at present belonging to or held in trust by the London Companies is supposed to be of the capital value of 15 millions sterling. The annual income thence arising is between £700,000 and £800,000 a year, or about that of the Universities of Oxford and Cambridge and the colleges of both. Of this sum £600,000 consists of rents arising from (1) the Metropolitan estate, (2) estates in English counties, (3) the Irish estate. The Metropolitan estate consists of the Companies' halls, almshouses, schools, and other institutions within the metropolitan area; some thousands of shops, offices, warehouses, and wharves in the City of London proper, many of them of great value; and other house property outside the City but within the metropolitan area. The Companies are owners of agricultural land or of house property or of rent-charges in nearly all the English counties. Two possess estates in Wales, one land in the Isle of Man. Several of the Companies possess a considerable amount of real property in the county of Londonderry. The estate is the remnant of the lands in Ulster which the Companies were compelled to purchase as above stated, but great part of which they have recently sold.

Of this sum of £700,000 to £800,000 a year, £200,000 a year is trust or charitable income; the remaining sum of upwards of £500,000 is corporate or private income.

The charitable income, £200,000, arises from about 1,100 benefactions, the earliest not less ancient than the fourteenth century, the latest under wills proved within the last few years. Of this sum £75,000 is spent on almshouses and the relief of poor members. Most of the great Companies and several of the minor Companies maintain almshouses for their poor, e.g., Whitlington College, Islington (Mercers), St. Peter's

Hospital, Wandsworth (Fishmongers), the Goldsmiths' almshouses at Acton and Hackney, those of the Salters at Watford, &c. Some are mere cottages, others large establishments with a governor and a chaplain. The number of persons relieved annually, almspeople and pensioners, male and female, is about 2,500. The cost of maintaining the almspeople is about £60 a year; the allowance to the pensioners is, on an average, about £50 a year each.

On education £75,000 is spent. Several of the great Companies, the Goldsmiths, Fishmongers, &c., and some of the minor Companies, *e.g.*, the Leathersellers, are trustees of scholarships tenable at Oxford and Cambridge. The Companies manage (1) five schools, at which a classical education is given, *viz.*, St. Paul's, Merchant Taylors, Tunbridge, Aldenham, and Great Crosby School; (2) several middle-class schools for children of both sexes in London, such as the Stationers' School, Bancroft's Hospital at Mile End, Dame Owen's School at Islington, and about twenty similar schools in the provinces. The number of boys and girls undergoing education is about 10,000.

A sum of £50,000 is applicable to charitable objects of a general kind defined in upwards of 500 wills. £9,000 a year is allotted to Church of England schools, £5,000 a year to the indigent blind, the remainder principally to the relief of the poor in the City and of many urban and rural parishes throughout England. Persons who in early times came up from the country to London and made fortunes commonly left legacies to their native places.

The corporate or private income of upwards of £500,000 a year includes a sum representing the value of the halls, furniture, &c., and is thus not all available. Of the available part, which may be estimated at £425,000, (1) £175,000 is spent on the restoration and decoration of the halls, rates, taxes, repairs, and improvements in connection with the house and agricultural property held by the Companies, salaries of the "clerks" and other officers and servants, "Court Fees" paid to the members of the Courts for attendance at business meetings, committees, and entertainments; (2) £150,000 is appropriated to benevolent objects. Thus, with the charitable income of £200,000, £350,000, or half their income, taking it at £700,000, is spent by the Companies on benevolent objects.

Of this sum of £150,000 about £10,000 is spent on the relief of poor members, in addition to the £75,000 of trust income above mentioned. About £50,000 is spent on education. The Companies largely add to the value of their exhibitions at Oxford and Cambridge, and have founded similar endowments in connection with University and King's Colleges, London, Girton and Newnham colleges for the higher education of women, and the London School Board. Several of their schools are supported entirely out of corporate income. For some years past, also, they have been active in the promotion of "technical education," both in London and the provinces. In particular, they have built, at an expense of more than £100,000, the "Technical Institute" in South Kensington, and carry on a system of examinations in "technology" in the manufacturing towns, in many of which they also subvention technical colleges.

About £90,000 is expended on benevolent objects of a general kind. Where the Companies have land in the provinces they support

the religious and secular charities connected with their estates. As regards London, where the bulk of their property is situated, they make a voluntary contribution of between £70,000 and £80,000 a year to public and benevolent objects. Of late, also, some of the Companies whose names represent existing trades have given exhibitions of works of art or of processes of manufacture, and have become supporters of trade benefit societies.

Public Duties.

The following public duties are still performed by Companies:—The Fishmongers examine the fish brought into Billingsgate Market. The Goldsmiths assay plate, and keep the "pyx." The Vintners employ "tackle porters" at the London Docks, and with the Dyers protect the swans on the Thames. The Society of Apothecaries confers licences, has a laboratory at its hall, and a botanical garden in Chelsea. The Founders stamp weights. The Gunmakers have a "proof house" in London. The Scriveners admit notaries. The Stationers maintain a register of publications at their hall. These duties are for the most part imposed by statute.

Admission, Grades of Membership, Numbers, and Privileges.

The "freedom" of a London Company is and always has been obtainable in three ways: (1) by patrimony, *i.e.*, on proof of the applicant's father having been "free;" (2) by servitude, or apprenticeship, *i.e.*, by the applicant becoming colourably bound to a freeman; (3) by redemption, or purchase. The numbers of the "liverymen" are fixed by the Court of Aldermen, those of the "Courts" by the terms of the charters. The Courts admit to the freedom, and "call" freemen to the liveries, and "liverymen" to the Courts. The promoted liveryman commences as "junior warden," and after having been "master," becomes an "assistant," or ordinary member of the "Court." Fees are generally charged at each stage.

The number of freemen is difficult to fix. Probably there are 15,000, many of them poor persons. There are 7,000 liverymen, 1,500 of whom form the "Courts." The liverymen are of respectable position, including many men of eminence.

All members are entitled to relief in case of misfortune out of the trust funds, if any, for such purpose. Liverymen have a legal right to a place at any banquets which are chartered franchises, and are invited by the Courts to other entertainments, sometimes to three or four dinners a year. The Courts have the entire control of the Companies' affairs, and exercise much hospitality. The splendour of the entertainments of the more opulent Companies is proverbial.

The 7,000 liverymen form part of the Parliamentary constituency of the City of London. Two of the largest liveries, those of the Spectaclemakers (356) and Loriners (386), are believed to be often joined for the sake of the vote for the city.

The liverymen of the Companies who are also freemen of the City form the "Common Hall," which proposes to the Court of Aldermen two Aldermen, one of whom the Court elects Lord Mayor.

A full list of the Companies, their Trust and Corporate Incomes, with the number of Liverymen, Fees, &c., being the continuation of this article, will be found at page 331.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

The following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive:—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11th Dec. & 19th Aug., 11th Dec. & 31st Aug., in Somerset, Devon, and New Forest.	11th Dec. & 19th Aug.	11th Dec. and 19th Aug.
Bustard....	2nd Mar. & 31 Aug.	None.	11th Jan. & 31st Aug.
Deer, Male.	None.	None.	1st Jan. & 9th June.
„ Fallow	None.	None.	Michaels. & Dec. 31.
Grouse or Red Game	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.
Hare	None.	None.	21st Apr. & 11th Aug.
Heath or Moor Game	None.	As "Muir-fowl."	11th Dec. & 11th Aug.
Landrail ..	As "Wild Birds."	As "Wild Birds."	11th Jan. & 19th Sep.
Muirfowl, or Ptarmigan	None.	11th Dec. & 11th Aug.	11th Dec. & 19th Aug.
Partridge..	2nd Feb. & 31st Aug.	2nd Feb. & 31st Aug.	11th Jan. & 19th Sept.
Pheasant ..	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11th Jan. & 19th Sep.

It is unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds' Protection Act, 1880, from 2nd March to 31st July, both inclusive, throughout the United Kingdom, except the Island of St. Kilda. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence. In the case, however, of the under-mentioned birds, the penalty is £1 for each bird for each offence:—

American quail.	Bonxie.	Curlew.
Auk.	Colin.	Diver.
Avocet.	Cornish chough.	Dotterell.
Bee-eater.	Coulterneb.	Dunbird.
Bittern.	Cuckoo.	Dunlin.

Eider-duck.	Nightingale.	Shearwater.
Fern-owl.	Oriole.	Sheldrake.
Fulmar.	Owl.	Shoveller.
Gannet.	Ox-bird.	Skua.
Gontsnucker.	Oyster-catcher.	Smew.
Godwit.	Pecwit.	Snipe.
Goldfinch.	Petrel.	Solan Goose.
Grebe.	Phalarope.	Spoonbill.
Greenshank.	Plover.	Stint.
Guillemot.	Ploverspage.	Stone Curlew.
Gull (except Black-backed).	Pochard.	Stonehatch.
Hoopoe.	Puffin.	Summer snipe.
Kingfisher.	Purle.	Tarrock.
Kittiwake.	Razorbill.	Teal.
Lapwing.	Redshank.	Tern.
Lark.	Reeve or Ruff.	Thicknee.
Loon.	Roller.	Tystey.
Mallard.	Sanderling.	Whaup.
Marrot.	Sandpiper.	Widgeon.
Merganser.	Scout.	Wild duck.
Murre.	Sealark.	Willock.
Night-hawk.	Seamew.	Wimbrel.
Night-jar.	Sea parrot.	Woodcock.
	Sea swallow.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s.

The Secretary of State in Great Britain, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. Such orders have been made for the county of Lincoln, the Isle of Ely, the Liberty of Peterborough, and the county of Huntingdon, where the close-time is from 15th March to 31st August; for Essex, from 15th March to 1st August; and for Northumberland from 1st March to 11th August. Within the limits of the Exe Fishery District in Devonshire, shags or cormorants are exempted from the close season.

The Act does not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

SEASONS FOR HUNTING AND GROUND GAME SHOOTING.

There is no statutory close-time for fox hunting or rabbit shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognized date for the opening of the fox hunting season, which continues till the following April. Otter hunting lasts from mid-April to mid-September. The period for deer hunting or stalking varies from about Aug. 12 to Oct. 12 for stags, and from Nov. 10 to the end of March for hinds. Hares are in best condition in January, February, and March.

CLOSE-TIME FOR SALMON.

I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon—the word "Salmon" includes all migratory salmonidae—are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for salmon is prohibited. The close-time for nets begins on 1st September, and ends on 1st February; and for rods it begins on 2nd November, and ends on 1st February. The commencement and termi-

nation of the close season may be varied by a bye-law by the local boards of conservators (see p. 603), but it must never begin for nets later than 1st November, nor be less than 154 days. For rod and line a minimum close-time is 92 days, which must commence not later than 1st Dec.

For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law.

The following are the cases in which these dates have been varied by bye-law:—

Close-time for	Nets.	Rods.
Avon & Stour.	15 Aug. to 1 Feb.	2 Oct. to 1 Feb.
Taf and Ely ..	31 Aug. to 30 Apr.	15 Nov. to 30 Apr.
Teify	—	20 Oct. to 1 Feb.
Ayrton	—	15 Nov. to 14 Feb.
Yorkshire	—	16 Nov. to 29 Feb.
Dart & Exe ..	1 Sept. to 1 Mar.	2 Nov. to 1 Mar.
Teign	" to 2 Mar.	21 Nov. to 2 Mar.
Towy*	" to 15 Mar.	2 Nov. to 15 Mar.
Ouse (Sussex).	" to 1 Apr.	1 Nov. to 1 Apr.
Usk & Rumney	" to 1 May.	2 Nov.
Stour (Kent)...	" to 15 Jun.	" to 1 May.
Severn†	" to 15 Jun.	—
Lune (tidal) ..	8 Sep. to 1 Mar.	15 Nov. to 1 Mar.
(non-tidal) ..	15 " " }	
Eden. ‡	—	16 Nov. to 15 Feb.
Dovey	14 Sep. to 30 Apr.	30 Nov. to 30 Apr.
Kent & Leven.	15 Sep. to 1 Mar.	1 Nov. to 1 Mar.
Sciort	" "	15 Nov. to 1 Mar.
Dwyfach	" "	" "
Derwent (Cum)	" to 10 Mar.	" to 10 Mar.
Cleddy	" to 15 Mar.	1 Nov. to 1 Feb.
Coquet	" to 25 Mar.	" to 31 Jan.
W. Cumb'rland	" to 31 Mar.	14 Nov. to 10 Mar.
Conway	" to 30 Apr.	15 Nov. to 30 Apr.
Ogmore	" "	" "
Clwyd & Elwy	" to 15 May	" to 15 May
Axe	20 Sep. to 30 Apr.	20 Nov. to 30 Apr.
Taw & Torridge.	21 Sep. to "	16 Nov. to 31 Mar.
Avon & Erme..	1 Nov. to 4 Apr.	15 Nov. to 4 Apr.
Camel	" "	1 Dec. to 30 Apr.
Powey§	" "	" "

No fresh salmon may be sold between 3rd September and 1st Feb., except such as can be proved to come from parts beyond the seas, or to have been taken, if in the United Kingdom, in legal netting season and in legal manner. Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st Feb. and 3rd November, may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the Kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon is prohibited between 3rd September and 30th April, unless it can be proved that the salmon exported or entered for exportation was caught during the time at which its sale would be legal in the United Kingdom: the *onus probandi* lies with the person exporting.

The capture and sale of "unclean" salmon,

* Between Carmarthen Bar and St. Govin's Head, 1st September to 30th April for nets.

† In Borough of Shrewsbury only.

‡ Below Old Sandsfield, 10th September to 10th February for nets and rods.

§ Below Lostwithiel only.

i.e., salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the Local Conservancy Boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

II. SCOTLAND.

In Scotland the annual close-time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and for rods, from 1st November to 10th February, except as follows:—

Close-Time for	Nets.	Rods.
Add, Aray, Eckkaig, N. & S. Esk, Fyne, Ruel, Shira.	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Beauly, Dunbeath, Lossie, Nairn, Ness, Spey, Kyle of Sutherland.	27 Aug. to 10 Feb.	16 Oct. to 10 Feb.
Forth	ditto	1 Nov. to 10 Feb.
Bervie, Carradale, Fleet, Garnock, Girvan, Inner, Iorsa, Irvine, Laggan, Luce, Sorn, Stinchar, Ugie, Ythan, and rivers of Orkney, Harris, & Uist.	10 Sept. to 24 Feb.	11 Nov. to 24 Feb.
Annan, Nith.	ditto	15 Nov. to 24 Feb.
Rivers of Shetland	ditto	16 Nov. to 30 Jan.
Urr	ditto	30 Nov. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	27 Aug. to 10 Feb.	15 Sept. to 10 Jan.
Halladale, Strathy, Naver, Borgie, Hope.	Do. do.	11 Sept. to 11 Jan.
Tay*	21 Aug. to 4 Feb.	11 Oct. to 4 Feb.*
Findhorn	27 Aug. to 10 Feb.	11 Oct. to 10 Feb.
Tweed	15 Sept. to 14 Feb.	11 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

III. IRELAND.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts. With the exception of certain tributaries in some of

* R. Earn close-time for rods is from 1st Nov. to 4th Feb.

the districts, the close-time is as follows (all dates inclusive). The second column shows the point of delimitation on the coast between the various districts, which include all rivers, &c., within their respective coast-limits.

District.	Coast Limits.	Cl.-T. Net.	Cl.-T. Rod
Dublin ..	Skerries	16 Aug. to	1 Nov. to
	to	1 Feb.	31 Jan.
Wexford..	Wicklow	16 Sept. to	1 Oct. to
	to	10 Apr.	14 Mar.
Waterford	Kiln Bay	16 Aug. to	1 Oct. to
	to	31 Jan.	31 Jan.
Lismore ..	Helvick Head	16 Aug. to	31 Oct. to
	to	31 Jan.	31 Jan.
Cork	Ballycotton H.	16 Aug. to	13 Oct. to
	to	14 Feb.	14 Feb.
Skibbereen	Galley Head ..	16 Sept. to	1 Nov. to
	to	30 Apr.	16 Mar.
Bantry ..	Mizen Head ..	1 Oct. to	1 Nov. to
	to	30 Apr.	16 Mar.
Kenmare	Crow Head ..	16 Sept. to	1 Nov. to
	to	31 Mar.	31 Mar.
Killarney	Lamb Head ..	1 Sept. to	31 Oct. to
	to	30 Apr.	30 Mar.
Limerick..	Dunmore Head	1 Aug. to	31 Oct. to
	to	11 Feb.	31 Jan.
Galway ..	Hags Head ..	1 Sept. to	16 Oct. to
	to	15 Feb.	31 Jan.
Ballinakill	Slyne Head ..	1 Sept. to	1 Nov. to
	to	15 Feb.	31 Jan.
Bangor ..	Pigeon Point..	1 Sept. to	1 Oct. to
	to	15 Feb.	30 Apr.
Ballina ..	Benwee Head	13 Aug. to	16 Sept. to
	to	15 Mar.	31 Jan.
Sligo.....	Coonamore ..	16 July to	1 Oct. to
	to	31 Dec.	31 Jan.
Bally-shannon.	Mullaghmore	19 Aug. to	10 Oct. to
	to	1 Mar.	28 Feb.
Letter-kenny	Rossan Point	20 Aug. to	2 Nov. to
	to	3 Feb.	31 Jan.
London-derry	Malin Head ..	1 Sept. to	16 Oct. to
	to	14 Apr.	28 Feb.
Coleraine	Downhill.....	20 Aug. to	20 Oct. to
	to	3 Feb.	15 Mar.
Ballycastle.	Portrush.....	15 Sept. to	2 Nov. to
	to	17 Mar.	31 Jan.
Dundalk..	Donaghadee ..	20 Aug. to	1 Nov. to
	to	31 Mar.	29 Feb.
Drogheda	Clogher Head	17 Aug. to	30 Sept. to
		30 Jan.	30 Jan.

In Ireland the weekly close-time is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2nd October and 1st February, except in Norfolk and Suffolk, where, under a local Act (the Norfolk and Suffolk Fisheries Act, 1877), the conservators have fixed the close-time for trout, for nets only, at from 10th September to 25th January; and except in the Thames, when the close season is from 10 Sept. to 31 March.

By an Act passed in 1876, the trout and char close-time may be varied by bye-law by local boards of conservators, so, however, that it does not commence earlier than the 2nd September nor later than the 2nd November, and is not less than 123 days. The following dates have been fixed under this Act. In the districts marked * the close-time, as altered, applies only to trout. The sale of trout and char, however, is abso-

lutely prohibited throughout England and Wales from 2nd October to 1st February:—

- *Eden ... 1 Sept. (rods 16 Oct.) to last Feb.
- Severn ... { in horo' of Shrewsbury, 1 Sept. to 15 June (for nets only).
- *Taf, Ely ... 29 Sept. to 1 Feb. (for rods and nets).
- *Cleddy ... 29 Sept. to 1 Mar. (ditto)

- *Coquet... 1 Nov. to 3 Mar. (for rod & line only).

In Scotland there is no close-time for trout and char. In Ireland the close-time for trout is the same as for salmon. This may be altered, but not shortened, by the Inspectors. For pollen, however, the close-time is fixed by the Pollen Fishery (Ireland) Act, 1881, from 1st November to 31st January.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1872, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh-water, except those kinds which migrate to or from the open sea) is fixed from 15th March to 15th June, both inclusive, for all parts of England and Wales except Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first, and £5 for a subsequent conviction. The close season, however, does not apply to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Secretary of State, and the Avon & Stour, Avon & Erme, Wye, Eden, and Towy fishery districts have been so exempted; also the Kent & Leven, Severn & Yorkshire districts, as regards pike, the Usk as regards eels, and certain parts of the Severn as regards other fish than grayling. In Norfolk and Suffolk close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. By an Act of 1866 the close season for freshwater fish above referred to is declared not to apply to fishing for eels, otherwise than by angling. But for these fish a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from January 1 to June 24; in Ireland, with

† Rivers Braint and Cefni, 15th Oct. to 1st Nov.

ne or two exceptions, from January 11 to June 10. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June. In the Thames, between 1 March and 31 May, eels may not be taken by any other means than by veils, bucks, or baskets.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4¼ inches, measured across the largest diameter of the back, or lobsters under 4 inches, measured from tip of beak to end of tail when spread out flat.

CLOSE-TIME FOR OYSTERS.

By the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters, from 14th May to 15th August. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to the 31st August inclusive,

in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and till that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied by the Inspectors of Fisheries in the following cases:—

Tralee Bay.....	11th Mar. to 31st Oct.
Galway Bay.....	1st Jan. to 30th Nov.
Strangford Lough....	1st Mar. to 31st Aug.
Achil Sound, Clew Bay	and April to 30th Sept.
Sligo, Ballisodare and	
Drumcliffe Bays..	30th April to 1st June.

Taking oysters from licensed beds is made larceny.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence, and soldiers, sailors, volunteers, or constables on duty, or at practice, or occupiers of land, or their servants, killing or scaring birds or vermin need not take out a gun licence. The rates of duty are given at p. 400.

SALMON LICENCES.—It is not so generally known that in salmon fishery districts in England and Wales, and in Ireland, it is necessary to take out a licence to fish for salmon. In Scotland no such licence is needed. A licence is available only in the district, and for the season, in which it is issued. The rates on nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from about £5 to £2. The rate of licence duty on a rod and line is £1 in all parts of Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Derwent.....	} 20/-	*Eden.....	} 21/-
*Lune.....		*Seint.....	
*Ribbles.....		Dwyfach.....	
*Dee.....		Towy.....	
Clwyd & Elwy..		*Ogmore.....	
*Conway.....		Cleddy.....	
*Dovey.....		Taff and Ely.....	
*Ayrton.....		Rumney.....	
*Teify.....		Taw and Torridge..	
Usk.....		*Kent and Loven.....	
*Wye.....		*West Cumberland	
Avon and Erme		Severn.....	
*Dart.....		Camel.....	
*Teign.....		Fowey.....	
Exe.....	Trent.....		
Axe.....	*Esk (Yorkshire) ..		
Frome.....	Avon, Brue, & Parret		
Avon and Stour	Tamar and Plym ..		
Yorkshire.....	Onse (Sussex).....		
Tees.....	Wear.....		
*Tyne.....	Coquet.....		

TROUT LICENCES.—In some districts in England and Wales licences to fish for trout are necessary. A licence to fish for salmon covers the right to fish for trout, but persons not holding a salmon licence, and fishing for trout or char, exclusively of salmon, in the following districts, must take out a licence for the former:—In the Conway*, Taff, Ely, Rumney, Usk, Wye, Severn, Trent, Yorkshire, Wear, and Coquet the duty is 1s. on each rod and line. In the Yorkshire Esk, 2s. 6d. In the Eden*, Kent, Ayrton, Teify, Towy, Avon, Brue, Parret*, Teign, and Tyne*, 2s. 6d. In the Camel and Fowey, 3s. In the Cleddy*, 3s. 6d. In the Clwyd and Elwy*, 4s. 6d. In the Derwent* (Cumb.), Seint*, Avon, and Stour, 5s. In the Avon, Erme*, and Dart*, 10s. In those districts marked * licences for short periods are issued at lower rates. Licence duties are also payable on nets, ranging from £5 downwards. In Ireland and Scotland no trout licences are necessary.

Fishery Districts, Boards of Conservators, and Inspectors.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon Fishery Acts, 1861 to 1876, in the hands of local boards of conservators appointed for the purpose. By the Freshwater Fisheries Act, 1873, Fishery Districts may be formed, and Boards of Conservators appointed for waters containing trout; and by the Freshwater Fisheries Act, 1884, power is given to make Fishery Districts for freshwater fish only, and "freshwater fish" are defined for the purposes of that Act to be all fish except salmon living temporarily or perma-

nently in fresh water. Under these various powers Boards of Conservators have been appointed for 48 Fishery Districts in England and Wales. The limits of the Fishery Districts, with the names of the clerks to the various Boards, are given in the following list:—

[The districts generally include all rivers running into the sea between the points named, and in the cases marked † also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries, where the distance is less than six miles across, as in the case of the Solway, the Bristol Channel, and the Humber.]

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
†Eden.....	Junction of R. Esk to Skinburness Pt	T. H. Hodgson, Carlisle.
†Derwent.....	Seaton to St. Bee's Head	T. C. Burn, Cockermouth.
†West Cumberland	St. Bee's Head to Haverigg Point ...	J. Webster, Whitelaven.
Kent and Leven ..	Haverigg Point to Warton	S. H. Jackson, Ulverston.
†Lune	Warton to Blackpool	T. Ball, Lancaster.
†Ribbles	Blackpool to Formby Point	T. J. Backhouse, Blackburn.
Dee	East Boundary of Cheshire to Air Pt.	G. S. Carr, Chester.
Clwyd and Elwy ..	Air Point to Rhos Bay	P. Browne, Rhyl.
Conway	Rhos Bay to Aber	C. T. Allard, Llanrwst.
†Seiont	{ Garth Point to Llanelhaiarn Pt. & } { to Twyn y Parc Pt., in Anglesey }	R. J. Davids, Carnarvon.
†Dwyfach	Llanelhaiarn Point to Criccieth	T. Roberts, Portmadoc.
Dovey	Criccieth to Cynvelin	W. B. Davies, Dolgelly.
†Ayron	Carreg Tipog to New Quay Head	T. H. Maddy, Aberayron.
†Teify	New Quay Head to Dinas Head	H. W. Howell, Aberayron.
Cleddy	Dinas Head to St. Govin's Head	R. T. P. Williams, Haverfordwest.
†Towy	St. Govin's Head to Worm's Head	W. M. Griffiths, Carmarthen.
†Ogmore	Porthawl to Cold Knap	S. H. Stockwood, Bridgend.
†Taff and Ely	Cold Knap to Bute Dock	G. E. Halliday, Cardiff.
†Rumney	Bute Dock to Ty ton y Pill	Colonel Lyne, Newport.
†Usk	Ty ton y Pill to Collister Pill	C. R. Lyne, Newport.
†Wye	Collister Pill to Lydney Pill	E. Owen, Builth.
†Severn	Lydney Pill to Avon Battery	J. Stallard, junior, Worcester.
Avon, Brue, & Parret	Avon Battery to County Boundary	T. F. Barham, Bridgwater.
Taw and Torridge..	{ West Boundary of Somerset to } { ditto of Devon	W. H. Toller, Barnstaple.
Camel	West Boundary of Devon to Peel Pt.	J. R. Collins, Bodmin.
Fowey	Peel Point to Ram Head	W. Pease, Lostwithiel.
Tamar and Plym ..	Ram Head to Stoke Point	C. V. Bridgman, Tavistock.
Avon and Erme	Stoke Point to Start Point	G. B. Lidstone, Kingsbridge.
Dart	Start Point to Hope Ness	A. Pike, Totnes.
Teign	Hope Ness to Clerk Rock	S. Hacker, Newton Abbot.
Exe	Clerk Rock to Ottermouth	B. J. Ford, Exeter.
Otter	Ottermouth to Beer Head	—
Axe	Beer Head to Portland Bill	W. Forward, Axminster.
Frome	Portland Bill to Hampshire Boundary	P. E. L. Budge, Wareham.
Avon and Stour	W. Boundary of Hants to Hurst Castle	R. D. Sharp, Christchurch.
Ouse (Sussex)	Portobello to Seaford Head	F. Holman, Lewes.
Rother	Fairlight to Dungeness	T. J. Smith, Rye.
Stour (Kent)	North to South Foreland	F. G. Haines, Canterbury.
†Ouse and Nene	{ West Boundary of Norfolk to Lap- } { water Hall	Joseph Miller, Bedford.
Welland	Lapwater Hall to Western Point	S. B. Sharpe, Market Deeping.
†Witham	Western Point to Gibraltar	H. Snaith, Boston.
†Trent	Ingoldnell's Point to Trent Falls	C. K. Eddowes, Derby.
†Yorkshire	Trent Falls to Thorney Beck	J. H. Phillips, Scarborough.
†Esk (Yorkshire) ..	Thorney Beck to Skinningrove Beck	W. Brown, Whitby.
Tees	Skinningrove Beck to Hardwick Hall	M. B. Dodds, Stockton.
†Wear	Hardwick Hall to Souter Point	C. Smart, Sunderland.
†Tyne	Souter Point to Newbiggin Point	R. Gibson, Hexham.
†Coquet	Newbiggin Point to Hawick Burx	C. Percy, Alnwick.

There are also certain bodies created by local statutes, having authority over the fisheries, e.g., the Thames Conservancy Board, the Lee Conservancy Board, the Conservators of the Medway, and the Conservators of the Norfolk and Suffolk Fisheries.

These Boards have power to make bye-laws, not only for the regulation of salmon-fishing, but also, during the salmon close-time, for the regulation of other kinds of fishing which are prejudicial to the Salmon Fisheries; and heavy penalties are fixed for infractions of such bye-

laws. They also have power to make bye-laws for the protection of the freshwater fisheries for trout and "coarse" fish. They are also empowered to issue licences for fishing for salmon, trout, and char (see p. 602). The exercise of these powers is subject to the approval of the Board of Trade as the "Central Authority," under whom three Inspectors of Fisheries are appointed: viz.:—

Chief Inspector, A. D. Berrington.

Inspectors: C. E. Fryer, and H. N. Malan.

SCOTLAND.—In Scotland there are 123 Fishery Districts, nearly each separate river forming a district of itself, but only 31 Boards of Conservators. The powers of these Boards are

limited to the Salmon Fisheries; the administration of the law being subject to the general supervision of the Fishery Board of Scotland, acting under the Secretary for Scotland.

Inspector of Salmon Fisheries, A. Young, III, George Street, Edinburgh.

IRELAND.—In Ireland there are 22 districts, embracing between them the whole country, each with a separate Board of Conservators. The list of districts is given at p. 601. The Inspectors of Fisheries, subject to the Lord Lieutenant, have power to make bye-laws and regulations under the Salmon Fishery Acts.

Inspectors: Sir Thos. F. Brady, Major J. Hayes, and Alan Hornsby, Dublin Castle.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The asterisk (*) signifies that the fish are then

in their prime; the dagger (†) signifies that the fish may be obtained, but are not at their best; the double dagger (‡) signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish. River crayfish can be obtained in the spring, summer, and autumn. It is a moot point whether it is legal to take freshwater crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year. American and Portuguese oysters are in their prime in our hot months; they are never in spawn here.

(c) In the close season salmon from Holland, and also from certain British rivers where fishing is permitted later in the year than usual, are largely sold.

(d) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

ACCIDENT insurance is one of the latest developments of the business-like tendency of Englishmen to provide against contingencies. Life, fire, and marine insurance were established, and on a fairly sound basis, long before the first timid attempt was made to secure a provision against the loss occasioned by personal accidents. The reason for this is not far to seek. Death is inevitable; fire is so destructive and so generally alarming that it appeals powerfully to the imagination; while such vast sums are intrusted to the safety of a vessel that marine insurance soon became a necessity for a maritime and commercial nation. But there were other reasons for the tardy appearance of accident insurance. The most careful householder may suffer from the carelessness of a neighbour, and the most cautious of shipowners may lose his venture through a hurricane; whereas it is natural to people to feel that they are not as others, and that leading quiet, steady lives they may rely upon avoiding those dangers to life and limb which the daily press continually record. There is no doubt that in the gradual evolution of insurance the provision against accidents could not long have been delayed, but the first step is indicative of the feeling above expressed, and was an attempt—ultimately crowned with success—to provide against death or disablement occasioned by railway accidents, that is to say, by causes over which the sufferer had no control. The premier company was the Railway Passengers Assurance Company, and this fact is worthy of record because a new field of enterprise was opened up, and another link in the chain of commercial safeguards forged.

The Railway Passengers Assurance Company, founded in 1848 and started in 1849, had been but a short time in existence when the Accidental Death Insurance Company was formed (in 1850) to extend the principle to fatal accidents generally; almost immediately, however, enlarging its scope so as to embrace non-fatal accidents. The older company followed suit, and has since become far and away the largest accident company in the kingdom, and the foster-mother of like companies across the seas. The earlier years were not times of unmixt prosperity. The Accidental Death Company transferred its business, while its competitor saw its first receipts more than swept away by the loss of two lives, to which event a tragic interest attaches, as there is every reason to believe that a son was anxious to realize the sum recently insured on his father's life, but failed, two deaths from drowning being recorded instead of one. In spite, however, of difficulties at the outset, the system gradually made way, another company, this time a provincial one—the Norwich and London—was founded in 1856, and since then the numbers have steadily increased, until in recent years the competition has become both keen and widespread.

At the first glance it would seem that there is no contingency less amenable to the laws of average than accident—the very word implies the unforeseen and unexpected. And yet, from statistics kindly placed at our disposal by the Railway Passengers Assurance Company, it appears that the uniformity of the occurrence of accidents is most striking, so much so that the companies can with confidence rely upon

one in twelve of their policyholders meeting with an accident in the year, while out of every 1,400 a death may be looked for. [It may be observed that the experience of American Accident Companies gives a much higher average.] The casualties for which compensation is chiefly paid are those met with in the ordinary pursuits of every-day life, that castle the Englishman's house forming no effectual rampart against danger; heavy sums, indeed having been paid for injuries met with in bed from the crash of a chimney through the roof, to the fall of a plaster image. Man, in fact, according to these records, finds danger awaiting him at every turn—the playfulness of his own children, a loose stair-rod, a casual pail left by a careless housemaid, an insecurely-fastened picture—all go to swell the causes of accident, while even at the dinner table maiming has resulted from the carving-knife, and death has overtaken the soup eater who unwarily swallowed a nail, and the eater of beef who tackled a mouthful beyond his powers. The danger is only varied, not avoided, by leaving the shelter of the house. As the Registrar-General's annual reports conclusively show, the deaths from street accidents in our cities are considerable in number, and with the vast traffic, warehouses from which bales are lowered, the traps down which coals are shot, the driving of more or less skilled Jehus, this is little to be wondered at. But the country districts show an equally high average of conveyance accidents, and there are of course elements of danger which are absent from towns. The return for England and Wales shows an accidental death-roll of 15,000 a year, and for every death it is estimated that 140 non-fatal accidents occur.

It is only natural that the knowledge of these things should become more widely known, and a desire to provide against them more widely spread.

The scope for accident insurance widens steadily, inasmuch as civilization brings with it additional sources of risk, and these outnumber the safeguards furnished by science. The most backward European countries show a low rate, while the more advanced show a high rate of accident, and the ratio of accidents to population is vastly increasing, if we may accept the figures of a French statistician, who finds that in 1830 the deaths by accident were (in France) 15 to 100,000, while in 1860 they were 28 to 100,000.

There is one consideration that forces itself upon us in contemplating the information supplied, and that is the extent to which modern amusements contribute to the score of killed and injured. Hunting and shooting furnish their quota, and may be said to be fixed quantities; but as with each generation new sports are devised, new means of accident are proportionately brought about. Football may perhaps be added to the above-named as a permanent and steady source of danger, increasing, if anything, in popularity; but late years have added to the list mountain climbing, bicycle and tricycle riding, and in these last days tobogganing. The reason for the existence of accident insurance is thus fully justified, and it is satisfactory to see the spread of a principle so valuable in its application. The company upon whose records we have already drawn has

paid no less than £2,500,000 for 125,000 accidents, and is now disbursing compensation at the rate of £120,000 a year. Taking all the accident companies together it is estimated that there are 250,000 lives insured, and that £400,000 are awarded annually as compensation for death and disablement.

In 1880 an Act was passed by which employers, who up to that time were in a great measure free from responsibility for injuries occurring to their workpeople, were in certain circumstances called upon to compensate them for injuries received when at work. This, the Employers' Liability Act, opened up another field for insurance, if a restricted one, and the Employers' Liability Corporation was formed to work it, and has been succeeded by others in the same line. Since then many of the accident companies have also entered upon this class of business.

Annexed is a list of companies engaged in accident insurance, and existing in June, 1887. Their incomes vary from £230,000, in the case of the Railway Passengers Assurance Company, to a few hundreds, but it is not in all cases easy to give the exact receipts, as many of the companies transact other business, and the sources of income are not always kept distinct:—

1887 ,, 1888	Do.		7d.	George J. Goschen.	Do.

* Differential rate upon scale of incomes abolished. Incomes under £100 exempt; and incomes of £100 and under £200 per annum received an abatement of £60 from the assessment;—thus £100 paid on £40; £160 upon £100; £199 upon £139; but £200 paid on £200.

† Under £150 exempt; if under £400 the tax is not chargeable upon the first £120.

WHEN a "Strange Preacher" makes his appearance at Church, the attendants not unnaturally inquire what he is, and whence he comes? To some extent he answers the latter question himself by means of that curious and apparently useless appendage over his shoulders, the Hood. This may be very plain, or somewhat striking, perhaps of scarlet cloth with a black silk lining, or of scarlet cloth with a lining of pink silk; if of white, he comes from Oxford; if with pink, he graduated at Cambridge. Hoods are not confined to clergymen of the Church of England, they are symbolic of the degrees taken at some college or university by their wearers; and an LL.D., of London, preaching at a dissenting chapel, is not less proud of his scarlet cloth, with blue silk lining, than his brother Doctor of Glasgow, whose hood is of black velvet and dark red silk. Generally speaking, the hoods most commonly seen in English churches are those of B.A. or M.A.; but Literates are now increasing, and their hood, "black, but not of silk," are difficult to distinguish from the corded silks of their more ambitious brethren. Formerly degrees were only conferred in Arts, Divinity, Laws, Physic, and Music; now they are also granted in Science, Surgery, Literature, and Engineering. Women graduates adopt the same terms as men, so that now there are not only lady Doctors, but also lady Bachelors.

Members of the Royal College of Physicians are usually called Doctors, and place M.D. after their names, but are not entitled to wear hoods unless they have received a collegiate or university degree.

The following is a list of degrees conferred in the United Kingdom, with the abbreviations made use of to designate them.

A.K.C., Associate (Theological) of King's College. Hood: black silk, edged with mauve silk.

B.A. or **A.B.** Bachelor of Arts. This degree is granted by all Universities excepting those of Scotland. The Bachelor's hood is black, trimmed with white fur; *Lampeter*, border of white fur spotted with black; the *London Univ.* having instead an edging inside of russet-brown silk.

B.C.L. Bachelor of Civil Law. Granted by Oxford and Durham. Hood: Oxford, pale blue silk, white fur trimming; *Durham*, purple silk, bound with white fur.

B.D. Bachelor of Divinity. Granted by all Universities but London and the Queen's Univ., Ireland. Hood: Oxford, Cambridge, Dublin, and Durham, plain black silk; *Lampeter*, black lined with puce; *St. Andrews*, violet silk, with white satin lining; *Glasgow*, black silk, black velvet border, lined with purple silk; *Aberdeen*, black silk, red silk lining; *Edinburgh*, purple silk, with white fur border.

B. Eng. Bachelor of Engineering. Dublin and Queen's University, Ireland. Hood: black silk, lined with green.

B.S. Bachelor of Surgery. Given by Cambridge, Dublin, and London. Hood: Dublin, crimson silk, bound with blue, black lining.

B.Sc. Bachelor of Science. Given by Glasgow, Edinburgh, and London. Hood: Glasgow, black silk, lined with yellow silk; *Edinburgh*, black silk, green lining, white fur border; *London*, black, with inside edging of gold-coloured silk.

D.C.L. Doctor of Civil Law. Given by Oxford and Durham. Hood: Oxford, scarlet cloth,

crimson silk lining; *Durham*, scarlet cashmere, white silk lining.

D.D. or **S.T.P.** Doctor of Divinity. Granted by all Universities but London and Queen's Univ., Ireland. Hood: Oxford and Durham, scarlet cloth, black silk lining; Cambridge, ditto, with pink silk lining; *Durham*, scarlet cashmere, lined with purple silk; *St. Andrews*, violet ditto, white satin lining; *Glasgow*, black velvet, black silk lining; *Aberdeen*, purple cloth, white silk lining; *Edinburgh*, black cloth, purple silk lining.

D. Lit. Doctor of Literature. London. Hood scarlet cloth, lined with russet silk.

D.M. See M.D.

D.Sc. Doctor of Science. Granted by Glasgow, Edinburgh, and London. Hood: Glasgow, black velvet, gold-coloured silk lining; *Edinburgh*, black cloth, lined with green silk; *London*, scarlet cloth, lined with gold-coloured silk.

LL.B. or **B.L.** Bachelor of Laws. Granted all Universities but Oxford, Durham, *St. Andrews*, and *Aberdeen*. Hood: Cambridge, same as for B.A.; *Dublin* and *Queen's Univ.*, black silk lined with white; *Glasgow*, black silk, dark red silk lining; *Edinburgh*, black silk, blue silk lining, with border of white fur; *London*, black silk, blue silk edging.

LL.D. Doctor of Laws. Granted by all Universities but Oxford and Durham. Hood: Cambridge, Dublin, and Queen's Univ., scarlet cloth lined with pink silk; *London*, ditto, with blue silk lining; *St. Andrews*, scarlet cloth or silk, white satin lining; *Glasgow*, black velvet, dark red silk lining; *Aberdeen*, purple cloth, pale blue silk lining; *Edinburgh*, black cloth with blue silk lining.

LL.M. Master of Laws. Given by Cambridge. Hood: the same as the Camb. M.A.

L.Th. Licentiate of Theology. Given by Durham. Black silk, faced with velvet, and bound with purple silk.

M.A. Master of Arts. Granted by all Universities. Oxford and *St. Andrews*, black silk lined with red silk; Cambridge, *Aberdeen*, and *Edinburgh*, black silk lined with white silk; *Dublin* and *Queen's Univ.*, black silk, lined with dark blue; *Durham*, ditto, lined with purple silk; *London*, ditto, lined with russet silk; *Glasgow*, ditto, lined with bell-heather red silk.

M.B. Bachelor of Medicine. Granted by all Universities but Queen's Univ., Ireland. Hood: Oxford, dark blue silk, white fur trimming; Cambridge, black silk, white silk lining; *Dublin*, *Aberdeen*, and *Edinburgh*, black silk, crimson silk, lining and border of white fur; *Durham*, scarlet silk lined with purple, and bound with white fur; *London*, black silk, with violet silk edging; *St. Andrews*, crimson silk, lining of white satin; *Glasgow*, black cloth, lined with scarlet silk.

M.D. Doctor of Medicine. Granted by all Universities. Hood: Oxford, Dublin, and Queen's Univ., scarlet cloth, crimson silk lining; Cambridge, ditto, pink silk lining; *Durham*, purple cashmere, lined with scarlet silk; *St. Andrews*, crimson cloth, white satin lining; *Glasgow*, black silk, lined with scarlet silk; *Aberdeen*, purple cloth, crimson silk lining; *Edinburgh*, black cloth, crimson silk lining; *London*, scarlet cloth, violet silk lining.

M.Eng., Master of Engineering — Dublin. Hood: white silk, lined with green.

M.S., **M.Ch.**, **C.M.**, or **M.O.** Master of Surgery.

Granted by all Universities but Oxford. Hood: *Cambridge*, same as M.A.; *Dublin and Queen's Univ.*, crimson silk, bound with blue, white lining; *St. Andrews*, crimson silk, white satin lining; *Glasgow*, black cloth, lined with scarlet silk; *London*, black silk, lining of violet silk.

Mus. Bac. *Bachelor of Music*. Granted by all Universities except the Scottish. Hood: *Oxford*, lilac silk, white fur trimming; *Dublin*, blue silk, white fur border; *Cambridge*, same as B.A.; *Durham*, white silk, purple silk lining, bound with fur; *London*, blue silk, white watered silk lining.

Mus. Doc. *Doctor of Music*. Granted by all Universities except the Scottish. Hood: *Oxford*, white silk brocade, lined with crimson silk; *Cambridge*, puce silk, lined with white; *Dublin*, crimson cloth, white silk lining; *Durham*, scarlet silk, purple silk lining; *London*, same as Mus. Bac.

These comprise the better known degrees. There are, however, others of rarer occurrence—viz.: The Archbishop of Canterbury has also the faculty, one of the few relics of his ancient power as Official Legate of the Pope, of granting degrees of M.A., B.D., D.D., M.D., Mus. Doc., &c., which are termed *Lambeth* degrees. The particular University at which a person has graduated is sometimes added after the letters of degree, as M.A., Oxford or Oxon; Cambridge or Cantab; Durham or Dunelm; Dub. or T.C.D. (Trinity Coll., Dublin). The colonial universities, as also the continental, are not entered in the table given above, which is restricted to a notice of such *authorized* degrees as are conferred in the British Islands. Private societies and individuals are in existence from whom fanciful and fictitious degrees can be obtained; no learning, no residence, no examination is required; indeed not any other qualification but that of cash.

The Hoods and Tippets of the various Theological Colleges may be noticed here. By the 58th Canon of 1604 such clergymen as are not Graduates (commonly called *Literates*) are bidden

to "wear upon their surplices, instead of hoods, some decent tippets of black, so it be not silk." In accordance with this direction, it has been resolved by the Upper House of Convocation, that all the Theological Colleges of the Church of England have a uniform hood for their non-graduate members, to be of the substance the same for all, and to be, according to the Canon, "black, but not of silk;" each College, however, being at liberty to add to the hood a coloured edging, border, or binding, by which its own students might be distinguished. This resolution, which has further been accepted at a conference of Theological College principals and tutors, held at Oxford, may therefore now be taken to be the law on this subject. The following Theological Colleges have already conformed to the resolution of Convocation, the *Lincoln* tippet being of black stuff edged with blue silk; *Chichester*, the same with an edging of crimson silk; *Truro*, an edging of white fur. *London* College of Divinity, an edging of scarlet silk.

General Rules for distinguishing Hoods.—Only a very few of the multitudinous and multicoloured hoods given above are seen borne by the clergy in public worship. The most common are the B.A. and M.A., previously noticed. The B.A. of Oxford is black corded silk, with white fur border; the Cambridge B.A. is a more ample hood of black stuff, with wider border of fur. A black silk hood, with red silk inside, is the Oxford M.A. A black and white silk hood of ampler dimensions is the M.A. of Cambridge. Plain black silk would be the B.D. of Oxford or Cambridge. *Scarlet cloth* would denote a Doctor, either of Divinity or Law, according to the lining. *Purple* is generally the sign of a Durham degree.

The letters appended to names in the Almanack are chiefly F.R.S., F.S.A., F.R.A.S.T.S., indicating that the persons using them are Fellows of the Royal Society, the Society of Antiquaries, or the Royal Astronomical Society.

Wills: Testators and Executors.

DIRECTIONS FOR MAKING A WILL.—Every man having a wife or family should make his will. However small his estate, however remote may seem the probability of death, however confident that his property will pass to those he most wishes to benefit, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by means of a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious of the very benefits which had demanded a life-long struggle to provide. Thus a widow may find to her grievous disappointment that the estate, a life policy perhaps, or a few hundreds in Consols, is not all hers, but has to be shared with a distant cousin of her husband's, whose name perhaps she had never before heard. Or it may be the eldest son of an intestate ousting all his brothers and sisters from possession of the real estate, or an improvident or unbusinesslike nearest relative may claim to administer the estate.

Instances might be multiplied in which negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in many cases essential, but it is always desirable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g. the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary therefore to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of

another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e. the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases and carefully rounded periods are entirely out of place. Avoid the use of what may be thought "legal terms" when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, signed by the testator in presence of two witnesses, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should, if possible, be written on one side of a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes such things as freehold lands and houses, while personal property consists of money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on all property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And revoke all former wills and codicils. Dated this tenth day of December, One thousand eight hundred and seventy-seven."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will afterwards sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is thought to be better that a person who is named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written

the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be], in the joint presence of us, who thereupon signed our names in his [or her] and each other's presence.

THOMAS SMITH
[Signature
of
Testator.]

William Jones, of Vine Cottage,
Silver Street, Reading.
Henry Morgan, of North Street, Reading.

It is desirable that the addresses of the witnesses should be given, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." The person signing the testator's name must not be one of the witnesses. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When some change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"A codicil to my will, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee under the will. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary if it is well known who are the persons intended; but it is desirable to state their relationship, if any.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons must be designated "executors and trustees." When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or

entitled to, unto the said John Jones and Edward Matthews, upon trust for my children, in equal shares, such shares to be paid or transferred to them, if male, on their attaining the age of 21 years, and, if female, on their attaining that age or marrying." Where the widow is to have a life interest use the following words: "upon trust for the separate use of my wife during her life (or during widowhood), and on her death or re-marriage upon trust for my children then living, and the issue then living of any of them who may have died previously thereto leaving issue, such issue to take equally among them if more than one then deceased parents share, and the shares of all of them to be paid or to be confined to them, if male, on their attaining the age of 21 years, and, if female, on their attaining that age or marrying."

WHO CANNOT MAKE A WILL.—A minor cannot make a will. A woman married before the 1st of January, 1883, can only bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a proctor or solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions) by marriage, or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife, Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder as may be specified in the will. For this purpose the investments most strongly recommended will be found on page 389.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated briefly as follows:—To estimate the value of the property left, or get it valued. Where the personal estate exceeds £300 in value debts payable out of the personal estate may be deducted from the value on which probate duty is to be paid. It is a good plan for an executor before proving, or for the next of kin before applying for administration, to publish a short advertisement in a local paper for debts. To take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will. To collect all the property of the deceased and pay all his just debts, and, before distributing the estate, it is advisable to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will.

PROBATE DUTIES.—A scale of the government tax on probates of wills and letters of administration will be found on page 402.

LEGACY DUTY, varying according to the relationship, is payable excepting where the legatee is the wife or husband of the testator or testatrix. The 1 per cent. duties formerly payable are abolished, so far as the stamp duty covers them. But a testator leaves £1,000 worth of personal property, and legacies of £5,000 charged upon his real estate, legacy duty is payable on £4,000 by persons who would have had no duty to pay if the estate had been sworn under £5,000, being now included in the affidavit stamp. If deceased died on or after 1st June, 1881, every pecuniary legacy or residue, although less than £20, is chargeable with duty. For scale of duties see p. 401.

The following is a simple form of will, in which all the property is left to one person:—

This is the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks. I give and devise all my estate and effects, real and personal, over which I have any power of disposition by will, unto my only son, Thomas William Smith, absolutely, and I appoint my said son executor of this my will, and I hereby revoke all former wills and codicils. Dated this tenth day of December, One thousand eight hundred and eighty-seven.

Signed by the testator in the joint presence of us, who thereupon signed our names in his and each other's presence.

THOMAS SMITH.

WILLIAM JONES, of Vine Cottage, Silver Street, Reading.

HENRY MORGAN, of North Street, Reading.

On the morrow of St. Martin (12th November) certain high officials, usually the Lord President of the Council, the Chancellor of the Exchequer, the Lord Chancellor, several Judges, the Clerk of the Council, and others, assemble in the Court of the Queen's Bench Division of the High Court of Justice, and after certain ceremonies have been gone through, three gentlemen are nominated for the office of Sheriff for every one of the counties of England and Wales, except Middlesex, the Sheriff of which is elected by the citizens of London; Cornwall, nominated by the Prince of Wales as Duke of that county; and of Lancaster, by the Queen as Duchess. The three names, engrossed upon a parchment roll, are afterwards brought before Her Majesty, who then, with a golden bodkin, pricks through the parchment against one name for every county. The name thus pricked is usually the first on the list, and they come into office after Hilary Term. The following is a list of the gentlemen thus nominated whose names stand first upon the roll:—

BEDFORDSHIRE.—Francis Pym, of Radwell House, Baldock.

BERKSHIRE.—Henry Waring, of Beenham House, near Reading.

BUCKINGHAMSHIRE.—Edward Dent, of Fernacres, Fulmer, Slough.

CAMBRIDGE AND HUNTINGDON (SHIRES).—William Montagu Tharp, Chippingham Park, Newmarket.

CHESHIRE.—Baron Wm. Henry von Schröder, of the Rookery, Nantwich.

CORNWALL.—

CUMBERLAND.—Henry Fraser Carwen, of Workington Hall.

DERBYSHIRE.—Samuel William Clowes, of Norbury.

DEVONSHIRE.—Edward Byrom, of Culver House.

DORSETSHIRE.—George Troyte-Bullock, of North Ooker House.

DURHAM.—David Dale, of Darlington.

ESSEX.—Edward North Buxton, of Knighton, Woodford.

GLOUCESTERSHIRE.—Sir William Henry Marling, Bart., of Stanley Park, Stonehouse.

HEREFORDSHIRE.—Charles Archibald Hewett, of Hope End, Ledbury.

HERTFORDSHIRE.—William Bruce Greenfield, of Flamsteadbury, near Watford.

KENT.—William James Thompson, of Kippington, Sevenoaks.

LANCASHIRE.—

LICESTERSHIRE.—John Bertie Norreys Entwistle, of Kilworth House, Rugby.

LINCOLNSHIRE.—Alexander Samuel Leslie Melville, of Branston Hall.

MONMOUTHSHIRE.—Robert William Kennard, of Blaenavon.

NORFOLK.—Major Michael Stocks, of Wood Hall, Hilgay.

NORTHAMPTONSHIRE.—Edmund Giles Loder, of Floore.

NORTHUMBERLAND.—Alexander Browne, of Doxford, Chathill.

NOTTINGHAMSHIRE.—Fredk. Platt, of Barnby.

OXFORDSHIRE.—John Darell-Blount, of Mapledurham House.

RUTLAND.—Fred. Charles Chapman, of Belton.

SHEPHERSHIRE.—Arthur Pemberton Heywood-Lonsdale, of Shavington, Market Drayton.

SOMERSETSHIRE.—Antony Gibbs, of Charlton House, Wraxall, Nailsea.

COUNTY OF SOUTHAMPTON.—William Wickham, of Binsted Wyck, Alton.

STAFFORDSHIRE.—Frederick Charles Perry, of Dunston Hall, Penkridge.

SUFFOLK.—Gery Milner-Gibson-Cullum, of Hardwick House.

SURREY.—Hon. Francis Henry Baring, of Banstead Park.

SUSSEX.—Lieut.-Col. James Clifton Brown, of Holmbush, Horsham.

WARWICKSHIRE.—Alfred Hewlett, of Haseley Manor, Warwick.

WESTMORELAND.—William Dilworth Crewdson, of Helm Lodge, Kendal.

WILTSHIRE.—Charles Nicholas Paul Phipps, of Chalcot, Westbury.

WORCESTERSHIRE.—John Henry Crane, of Oakhampton, Astley, Stourport.

YORKSHIRE.—Sir James Robert Walker, Bart., of Sand Hutton.

Wales, North and South.

ANGLESEY.—Henry Herbert Williams, of Treacastell, Beaumaris.

BRECONSHIRE.—John Morgan, of Brecon.

CARDIGANSHIRE.—John Thomas Morgan, of Nantceirs Hall, Aberystwith.

CARMARTHENSHIRE.—John Williams Gwynne Hughes, Tregib, near Llandilo.

CARNARVONSHIRE.—Sydney Platt, of Bryn-y-nenadd, Llanfairfechan.

DENBIGHSHIRE.—Captain John Charles Best, of Plas yn Vivod, Llangollen.

FLINTSHIRE.—William Henry Gladstone, of Hawarden Castle.

GLAMORGANSHIRE.—John Henry Rowland, of Ffrwd Vale, Neath.

MERIONETHSHIRE.—William Thearsby Poole, of Caenest Llanbedr.

MONTGOMERYSHIRE.—William Corbett Windre Vaynor Park.

PEMBROKESHIRE.—Arthur Pieton Saunders Davies, of Pentre Boncath.

RADNORSHIRE.—Major John James, of Lyons Hall.

OLD AND NEW STYLE.

The Gregorian, or Roman, reform was at once adopted by those European nations which were in communion with Rome. Protestant nations did not so readily accept even an improvement emanating from Rome, and Greece and Russia still adhere to the Old Style. England adopted the New Calendar by Act of Parliament, 2 George II. c. 23, passed in 1751. The change took effect in the following year, 1752, which was a leap year; the 3rd day of September was made the 14th, and thus the earth was, so to speak pushed forward eleven days to overtake the sun. In some places the populace rioted, under the impression that they had been cheated out of so many days' wages. Another change was made by the same Statute. For 400 years previously, the civil and legal year had begun on the 25th March (*Annunciation, B. V. M.*). On the 1st of January, 1753, the commencement of the year was transferred to that day.

In citing dates of events occurring between January 1 and March 25, and between 1582 and 1752, it is customary to insert both the civil and historical year. As, e.g., Charles I. was executed, January 30, 1648, or 1648-9. The revolution in England took place in February, 1688, or 1688-9. The lower, or the last, figure always indicates the historical year, according to our present computation.

THE French Academy is composed of 40 members, elected for life, and is the highest of the five Academies constituting the *Institut de France*. The special object of this institution is the composition of the historical Dictionary of the French language. It was founded in 1635, by Cardinal Richelieu, and re-organized in 1816. The other Academies are as follows:—

Académie des Inscriptions et Belles-lettres, founded 1663, 40 members.

Académie des Sciences, founded 1666, divided into 11 sections, each of which comprises 6 members.

Académie des Beaux-Arts, 5 sections, comprising 40 members, as follows:—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6.

Académie des Sciences Morales et Politiques (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of free members and of foreign correspondents.

MEMBERS OF THE ACADEMIE FRANÇAISE.

Nisard, Jean Marie Napoléon Désiré, *born* at Chatillon-sur-Seine, 1806, *elected* 28 Nov., 1850, *predecessor* De Féletz.

Legouvé, Ernest Wilfred Gabriel Jean Baptiste, *b.* in Paris, 1807, *e.* March, 1855, *p.* Ancelot.

Augier, Guillaume Victor Emile, *b.* at Valence, Drôme, 1820, *e.* 31 March, 1857, *p.* Count de Salvandy.

Brogie, Duc de, Jacques Victor Albert, *b.* in Paris, 1821, *e.* 20 Feb., 1862, *p.* Lacordaire (father).

Feuillet, Octave, *b.* at Saint Lô (Manche), 1821, *e.* 3 April, 1862, *p.* Scribe.

Doucet, Charles Camille, *b.* in Paris, 1812, *e.* 6 April, 1865, *p.* De Vigny.

Ollivier, Olivier Emile, *b.* at Marseilles, 1825, *e.* 7 April, 1870, *p.* De Lamartine.

Marmier, Xavier, *b.* at Pontarlier, 1808, *e.* 19 May, 1870, *p.* De Pongerville.

Aumale, Duc d', Henri Eugène Philippe Louis d'Orléans, *b.* in Paris, 1822, *e.* 30 Dec., 1871, *p.* Count de Montalembert.

Rousset, Camille Félix Michel, *b.* in Paris, 1821, *e.* 30 Dec., 1871, *p.* Prévost-Paradol.

Mézières, Alfred Jean François, *b.* in Paris, 1826, *e.* 29 Jan., 1874, *p.* St. Marc-Girardin.

Dumas, Alexandre, *b.* in Paris, 1824, *e.* 29 Jan., 1874, *p.* Lebrun.

Lemoine, John Emile, *b.* in London, 1815, *e.* 13 May, 1875, *p.* Janin.

Simon, Jules François, *b.* at Lorient, 1814, *e.* 16 Dec., 1876, *p.* De Remusat.

Boissier, Marie Louis Antoine Gaston, *b.* a Nîmes, 1823, *e.* 8 June, 1876, *p.* Patin.

Sardou, Victorien, *b.* in Paris, 1831, *e.* 7 June, 1877, *p.* Autran.

Renan, Joseph Ernest, *b.* at Tregnier, 1823, *e.* 13 June, 1878, *p.* Claude Bernard.

Taine, Hippolyte Adolphe, *b.* at Vouziers, 1828, *e.* 14 Nov., 1878, *p.* De Loménie.

Audiffret-Pasquier, Duc d', Edmond Armand Gaston, *b.* in Paris, 1823, *e.* 24 December, 1878, *p.* Bishop Dupanloup.

Iabiche, Eugène Marin, *b.* in Paris, 1815, *e.* 26 Feb., 1880, *p.* Sylvestre de Sacy.

Du Camp, Maxime, *b.* in Paris, 1822, *e.* 26 Feb., 1880, *p.* St. René-Taillandier.

Rousse, Aimé Joseph Edmond, *b.* in Paris, 1817, *e.* 13 May, 1880, *p.* Jules Favre.

Sully-Prudhomme, René François Armand, *b.* in Paris, 1839, *e.* 8 Dec., 1881, *p.* Duvergier de Hauranae.

Pasteur, Louis, *b.* at Dôle, 1822, *e.* 8 Dec., 1881, *p.* Littré.

Cherbuliez, Charles Victor, *b.* at Geneva, 1829, *e.* 8 Dec., 1881, *p.* Dufaure.

Perraud, Adolphe Louis Albert, Bishop of Autun, *b.* at Lyons, 1828, *e.* 8 June, 1882, *p.* Auguste Barbier.

Pailleron, Edouard Jules Henri, *b.* in Paris, 1839, *e.* 7 Dec., 1882, *p.* Charles Blanc.

Mazade-Percin, Louis Charles Jean Robert de, *b.* at Castelsarrazin, 1820, *e.* 7 Dec., 1882, *p.* Count de Champagny.

Coppée, François Edouard Joachim, *b.* in Paris, 1842, *e.* 21 Feb., 1884, *p.* De Larade.

Lesseps, Ferdinand Marie de, *b.* at Versailles, 1805, *e.* 21 Feb., 1884, *p.* Henri Martin.

Duruy, Jean Victor, *b.* in Paris, 1811, *e.* 4 Dec., 1884, *p.* Mignet.

Bertrand, Joseph Louis François, *b.* in Paris, 1822, *e.* 4 Dec., 1884, *p.* J. B. Dumas.

Halévy, Ludovic, *b.* in Paris, 1834, *e.* 4 Dec., 1884, *p.* Count d'Haussonville.

Say, Jean Baptiste Léon, *b.* in Paris, 1816, *e.* 11 Feb., 1886, *p.* About.

Leconte de Lisle, Charles Marie René, *b.* at St. Paul, Island of Réunion, 1818, *e.* 11 Feb., 1886, *p.* Victor Hugo.

Hervé, Aimé Marie Edouard, *b.* at St. Denis, Island of Réunion, 1835, *e.* 11 Feb., 1886, *p.* Duc de Noailles.

Gréard, Vallery Clément Octave, *b.* at Vire, 1828, *e.* 18 Nov., 1886, *p.* Count de Falloux.

VACANT CHAIR — *Cuvillier-Fleury.*

“ “ *Viel-Castel.*

“ “ *Caro.*

Permanent Secretary and Treasurer, Charles Camille Doucet.

Chef du Secrétariat et Agent Spécial, M. Julia Pingard.

Offices: Palais de l'Institut, 3, Rue Mazarine, Paris.

National Rifle Association, Wimbledon.

ONE of the revivals of the past quarter of a century has been that of the taste for ancient gold and silver ware, but especially of silver. Previous to that time there were comparatively but few persons who cared about old silver plate; but most preferred that which was new, and the old was transferred to the melting-pot; but now the tide has turned, and old plate is one of the things most coveted by all persons professing to have taste. With the revival of this taste there has also grown up with it the very laudable desire to know something of the history of the manufacture and manufacturers of the plate itself. The literature of the subject is not large, but it is almost exhaustive, and for the materials of this Article readers of the Almanack are indebted to Mr. Wilfred Cripps, whose volume on "Old English Plate," published by Mr. Murray, contains nearly all that can be said upon the subject. Readers are also further indebted to that gentleman for the loan of the following illustrations, without which this paper would scarcely be intelligible.

It must be premised that pure gold and pure silver in a manufactured state do not exist; both are alloyed with a coarser metal, gold sometimes with silver, but mostly with copper; and silver invariably with the latter metal: silver thus alloyed becomes less brittle and is more easily shaped by the workman's hammer. But mixed, the metal is of less value than when pure, and as the uninformed public could have no means of testing its intrinsic value, the Government at a very early period took some steps to insure uniformity in the quantity of base metal used as alloy. So far back as the year 1180 there appears to have been a test or check upon the manufacture, and in 1260 discreet men of the craft were appointed to watch over the ware produced for sale; but not till the year 1300 was there any actual legislation, the first ordinance being that

the Leopard's Head should be marked upon

all sterling articles of gold and silver. The Company of Goldsmiths of London was incorporated by Edward III. in the year 1327, and the leopard's head has ever since been borne on the company's shield. In addition to London there have been Assay Offices at York, Newcastle-on-Tyne, Norwich, Chester, Exeter, Sheffield, and Birmingham. In Scotland, Edinburgh and Glasgow have had this privilege: in Ireland, Dublin alone. One of the duties imposed upon the Company is to test all articles of gold and silver, except certain small articles, and having tested them to impress the HALL MARK thereon. Sterling silver is one invariable standard, viz., 11 oz. 2 dwts. of fine silver to 18 dwts. of alloy, which, when thus mixed becomes standard, and a pound troy coined into sixty-six shillings gives the nominal value of 5s. 6d. to the troy ounce.* In sterling gold there are twenty-two carats fine to two of alloy, the value of which is £3 17s. 10½d. In order to encourage the jewellery trade, other degrees of fineness are permitted, but these degrees are marked on articles sent to the

* Unlike gold, which has one fixed value, the price of silver varies considerably. In 1870 the price paid for it at the Royal Mint was five shillings and a halfpenny per ounce, while in 1885 it was purchased at 481 pence. At this price there was a profit, *Scowtoring*, of no less than 38 per cent. upon all the silver coined.

"Hall" for the purpose. The value of the various standards per ounce troy are—

Pure gold, 24 carats.....	£ s. d.
Standard, 22 carats.....	4 4 11½
2nd ditto, 18 carats.....	3 17 10½
3rd ditto, 15 carats.....	3 3 8½
4th ditto, 12 carats.....	2 13 1
5th ditto, 9 carats.....	2 4 5¾
	1 11 15½

From the above it will be seen that a jeweller can very well afford to sell fifteen carat "standard gold hall-marked" goods against their weight in sovereigns.

An ordinary piece of plate has the following marks:

1. That of the maker, which must be the first letters of his Christian and Surname.

2. That of the Company, the Leopard's Head. 

3. That which is supposed to be the Sovereign's mark, the lion passant. 

4. A letter denoting the year in which the plate is made, e.g. F

5. And, in the case of those articles which are chargeable with duty, the Sovereign's Head.

The maker's mark is placed upon the article by the manufacturer himself. The Sovereign's Head does not appear upon plate manufactured prior to the year 1784.

By the following table of date-marks the age of any piece of plate manufactured in London and assayed at Goldsmiths' Hall may be ascertained:

	Lombardic, simple....	1438-9 to 1457-8
	Lombardic, external cusps.....	1458-9 ,, 1477-8
	Lombardic, double cusps	1478-9 ,, 1497-8
	Black letter, small	1498-9 ,, 1517-8
	Lombardic	1518-9 ,, 1537-8
	Roman and other capitals	1538-9 ,, 1557-8
	Black letter, small	1558-9 ,, 1577-8
	Roman letter, capitals.	1578-9 ,, 1597-8
	Lombardic, external cusps	1598-9 ,, 1617-8

	Italic letter, small	1618-9 to 1637-8
	Court hand	1638-9 ,, 1657-8
	Black letter, capitals ..	1658-9 ,, 1677-8
	Black letter, small	1678-9 ,, 1696-7
	Court hand	1696-7 ,, 1715-6
	Roman letter, capitals.	1716-7 ,, 1735-6
	Roman letter, small ..	1736-7 ,, 1755-6
	Old English, capitals..	1756-7 ,, 1775-6
	Roman letter, small ..	1776-7 ,, 1795-6
	Roman letter, capitals.	1796-7 ,, 1815-6
	Roman letter, small ..	1816-7 ,, 1835-6
	Old English, capitals..	1836-7 ,, 1855-6
	Old English, small....	1856-7 ,, 1875-6
	Roman letter, capitals.	1876-7 ,, 1895-6

Leopard's Head, one being crowned and the other not, he will be fortunate indeed if the [Hall marks used   from 1756 to 1815.] stamp be sufficiently distinct for identification; but probably few persons will care for the plate manufactured during the last twenty years of George III.

1886	24,745	152,710	43,076	12,369	232,900

Each Assay Office has its distinguishing mark in lieu of the Leopard's Head of Goldsmiths' Hall, and its own cycle and chronological alphabet. The type and the shape of shield on which the letters are impressed change with each cycle. The learned virtuoso who a hundred years hence may wish to examine his plate, will be sorely puzzled to know whether that marked A was manufactured in the year 1796 or in 1876, the chief difference being the form of the shield. For 1876 he must carefully look for the Sovereign's head, and although the Lions appear remarkably alike (there is also a difference in the

In regard to the nationalities of the above the number of English was 146,301; Scotch, 25,323; Irish, 61,276 in 1886. Of English origin alone the number of persons who emigrated from 1850 to 1886 was 2,936,577; Scotch, 594,023; Irish, 2,557,950. There is a large influx every year of immigrants from abroad; the number in 1879, so far as is recorded, was 53,073, and in 1886, 108,879.

PERHAPS no one cause in particular can be assigned for the continued depression of British commerce, but the falling off is so great that there must be some cause for it. The amount is now becoming very serious, and is affecting all classes of the community. Compared with the year 1883, the difference is no less than £113,798,000—imports, £86,208,000; exports, £36,770,000, the loss being equal to £4 a head all round. One of the causes mentioned by more than one foreign consul is that English people do not understand the language and requirements of their customers, and that manufacturers do not adapt themselves to native requirements. The chief cause no doubt is foreign competition, direct by foreign merchants finding their way to our customers, and indirect by foreigners manufacturing goods for themselves not unfrequently by means of British machinery, British coal, and even British workmen. The amount of trade for the last two years was:—

Total Imports (1885)	£370,967,955
" " (1886)	349,863,472
Decrease in 1886	£21,134,483
Total Exports (1885)	£271,403,694
" " (1886)	268,667,017
Decrease in 1886	£2,736,977

Putting exports and imports together, the total foreign trade of the United Kingdom was:—

Total Imports and Exports (1885) ..	£642,371,649
" " (1886) ..	618,530,489

A decrease in 1886 of

The total value of the trade carried on with the following countries in 1885 and 1886 is thus stated:—

TOTAL IMPORTS.

FOREIGN.	1885.	1886.
Russia	£17,712,426	£13,571,786

EXPORTS OF BRITISH PRODUCE AND MANUFACTURES.—During the year 1886 the following were among the most important articles of British produce and manufacture exported to our colonies and foreign parts, giving the total value:—

Alkali (soda chiefly)	£1,788,078
Apparel, ready-made	3,902,215
Arms, ammunition, &c.	1,671,585
Bags and sacks, empty	707,092
Beer and ale	1,582,773
Biscuit and bread	518,169
Books, printed	1,116,737
India-rubber manufactures	971,108
Railway Carriages, Trucks, &c.	913,244
Cement	862,052
Chemicals and dye-stuffs	1,976,040
Coals, &c.	9,837,338
Naphtha, and similar products	£22,398
Corn, grain, and meal	309,097
Cotton yarn	11,487,389
Cotton manufactures—	
" White or plain	£32,237,682
" Printed, &c.	17,924,454
" Lace, &c.	2,363,683
" Stockings, &c.	487,378
Sewing Cotton	2,586,765
Hosiery and small wares	1,757,737

Total of all cotton manufactures, &c.	57,567,435
Earthen and china ware	1,901,625
Furniture, cabinet, and upholstery	632,207
Herrings and other Fish	1,738,448
Glass, plate, flint, bottles, &c.	970,377
Haberdashery, &c.	2,994,477
Hardware and cutlery	2,845,561
Hats	1,086,534
Implements and tools of industry ..	829,530
Leather, tanned, unwrought	1,362,000
" Boots, &c.	1,548,200
Linen manufactures	5,259,122
" Yarn	935,225
Jute manufactures, including yarn ..	2,080,637
Manures, including chemical manures ..	1,614,643
Medicines, drugs, &c.	814,213
Oil, seed	1,502,340
Painters' colours and materials	1,266,101
Paper and stationery	2,454,392
Pickles, vinegar, confectionery, &c. ..	1,152,497
Skins and furs of all sorts	84,111
Soup	416,710
Spirits	901,360
Sugar, refined	6,676
Steam-engines	3,012,561
Machinery (not steam-engines)	7,124,270
Other iron and steel manufactures, including raw material	21,817,720
Copper, brass, lead, tin, zinc, &c.	3,227,230
Telegraphic wires and apparatus ..	922,667
Silk manufactures, yarn, &c.	2,098,967
Wool, sheep and lambs'	932,700
Woollen and worsted yarn	4,410,821
" manufactures	19,738,341

* Millions and hundreds of thousands; the last three figures omitted: e.g., the weight of Tea in 1860 was 168,870,834 lbs., the quantity of Spirits in the same year, 36,764,464 gallons.

There are in England, including "Her Majesty's" (Master, the Earl of Coventry), of which there are 40 couples, the kennels being at Ascot Heath, 13 packs of Stag-hounds, containing between them 315 couples of hounds; besides two packs in Ireland, with 65 couples. The following are the Masters, the Kennels, and the numbers of the principal packs of Stag-hounds (with over 20 couples each):—

PACK.	COUPLES.	MASTER.	KENNELS.
County Down	35	Capt. R. W. B. Ker, M.P.	Montalto, Ballinahinch, county Down.
Devon and Somerset	32	Mr. C. H. Basset	Exford, Minehead, Somerset.
Enfield Chase	21	Colonel A. P. Someract.	Enfield Court, Middlesex.
New Forest	22	Mr. F. Lovell	Hinchelsea, Brockenhurst, Hants.
Norfolk	25	Mr. R. A. Barkley	Palgrave, Diss.
Rothschild's (Lord)	30	Lord Rothschild	Ascott, Leighton Buzzard.
Savernake Forest	22	Marquis of Anglesea	Savernake, Marlborough.
Surrey	33	Mr. Nickalls	Nutfield, Redhill, Surrey.
Ward Union	35	Committee	Ashbourne, county Meath.

Of Foxhound packs, there are no less than 156 in England and Wales, containing 5,902 couples of hounds; in Scotland, seven packs, with 278 couples; and in Ireland, 15 packs, with 324 couples. The following are the packs of Foxhounds containing 60 couples of hounds or more:—

PACK.	COUPLES.	MASTER.	KENNELS.
Albrighton	56	Major Legge & Capt. Foster ..	Whiston Cross, Shifnal.
Atherstone	53	Mr. W. E. Oakeley	Witherley, Atherstone, Warwickshire.
Badsworth	58	Mr. C. B. E. Wright	Badsworth, Pontefract.
Beaufort's (Duke of)	75	Duke of Beaufort, K.G.	Low St., Bedale, York.
Bedale	50	Mr. G. W. Elliott	Belvoir Castle, Grantham, Lincoln.
Belvoir	62	Duke of Rutland, K.G.	Berkeley Castle, Gloucestershire.
Berkeley	64	Lord Fitzhardinge	Stratton Andley, Bicester, Oxon.
Bicester and Warden Hill ..	53	Lord Chesham	Charlton Horothorne, Sherborne, Dorset.
Blackmoor Vale	80	Mr. M. Guest	Bramham Park, Tadcaster.
Bramham Moor	50	Mr. G. L. Fox	Bramham, Lincolnshire.
Burton	50	Mr. R. E. Wemyss	Reepham, Lincolnshire.
Cottesmore	60	Mr. W. Baird	Barbythorpe, Oakham, Rutland.
Craven	55	Mr. G. C. Ricardo	Waleot, Hungerford.
Crawley and Horsham	50	Mr. C. B. Goodman	West Grinstead, Sussex.
Croome	50	Mr. E. Walter Greene	Kynnersley, Severn Stoke, Worcester.
Essex	52	Mr. L. W. Arkwright	Harlow, Essex.
Essex Union	50	Mr. P. A. W. Carnegie	Billericks, Essex.
Fitzwilliam, The	59	Hon. G. C. W. Fitzwilliam ..	Milton, near Peterborough
Galway's (Lord)	50	Lord Galway	Serly, Bawtry, Yorks.
Garth's (Mr.)	60	Mr. T. Garth	Haines Hill, Twyford, Berkshire.
Goodwood	61	Earl of March	Goodwood.
Grafton	53	Lord Penrhyn	Wakefield Lawn, Stony Stratford, Bucks
H. H. (Hampshire)	55	Mr. A. H. Wood	Ropley, Alresford.
Hambleton	50	Mr. W. Long	Droxford, Bishop's Waltham, Hampshire.
Hertfordshire	56	Captain W. Peacocke	Kenesbourne Green, Luton.
Heythrop	52	Mr. A. Brassey	Chipping Norton, Oxon.
Holderness	52	Mr. A. Wilson	Eton, near Beverley.
Ledbury	50	Mr. A. Knowles	Ledbury, Herefordshire.
Mayneil	75	Mr. R. C. Pole & Mr. Bass, M.P.	Sudbury, Derbyshire.
Middleton's (Lord)	50	Lord Middleton	Birdsall, Malton, York.
North Cheshire	37	Captain E. P. Yates	Forest Kennels, Northwich.
North Staffordshire	56	Marquis of Stafford	Trentham, Stoke.
Oakley	50	Mr. T. B. Miller	Milton Ernest, Bedford.
Old Berkeley	56	Mr. H. Cox	Chorley-Wood Common, Rickmansworth.
Percy's (Earl)	50	Earl Percy	Greenrigg, Leebury, Northumberland.
Petworth	52	Lord Leonfield	Petworth Park, Sussex.
Portsmouth's (Earl of)	50	Earl of Portsmouth	Eggesford, N. Devon.
Pytchley	54	Mr. H. Langham	Brixworth, Northampton.
Quorn	55	Captain Warner	Quorn, Loughborough.
Rufford	50	Mr. T. H. Bayly	Rufford, Ollerton, Newark.
Shropshire	50	Mr. A. P. H. Lonsdale	Lee Bridge, Preston, Shrewsbury.
South Berks	60	Major Allfrey	World's End, Reading.
Southdown	55	Hon. C. Brand	Ringmer, Lewes, Sussex.
Southwold	50	Mr. E. P. Rawnsley	Bechford, Horncastle, Lincolnshire.
South Notts	50	Earl of Harrington	Gedding, Notts.
Tynedale	50	Mr. J. C. Straker	Stagslaw, Corbridge, Northumberland.
Vale of White Horse	55	Mr. C. A. Hoare	Cricklade, Wilts.
Warwickshire	52	Lord Willoughby de Broke ..	Kineton, Warwick.
West Kent	60	Hon. R. Nevill	Warren House, Otford, Sevenoaks.
Wynnstay	65	Sir H. W. Wynn, Bart.	Wynnstay, Ruabon.
York and Ainsty	53	Mr. E. Lycett Green	Acombe, York.
Zetland's (Earl of)	55	Earl of Zetland	Aske, Richmond, Yorkshire.

IRELAND.

Galway	50	Major Butson	Clonfert, Eyre Court, Galway.
Kildare	53	Major R. St. L. Moore	Jiginstown, Naas, county Kildare.
Meath	56	Mr. J. O. Trotter	Nugentstown, Kells, county Meath.

SCOTLAND.

Buocleuch's (Duke of)	51	Duke of Buccleuch, K.G.	St. Boswell's, Roxburghshire.
Eglinton's (Earl of)	50	Earl of Eglinton	Eglinton Castle, Irvine, Ayr.

The Imperial Coinage.

The authorized Coinage of the United Kingdom consists of the following pieces, some of which are issued only on special occasions:—

Denomination.	Standard Weight.	Least Current Weight.	Remedy.
GOLD:	Grains.	Grains.	Grains.
Five Pound....	616'37239	612'50000	1'00000
Two Pound....	245'54895	246'00000	0'40000
Sovereign....	123'27447	122'50000	0'20000
Half-Sovereign	61'63723	61'12500	0'10000
SILVER:			
Crown.....	436'36363	—	1'81818
Half-Crown....	218'18181	—	0'90909
Florin.....	174'54545	—	0'72727
Shilling.....	87'27272	—	0'36363
Sixpence.....	43'63636	—	0'18181
Groat or 4d....	29'09090	—	0'12121
Threepence....	21'81818	—	0'09090
Twopence.....	14'54545	—	0'06060
Penny.....	7'27272	—	0'03030
BRONZE:			
Penny.....	145'83333	—	2'91666
Halfpenny....	87'50000	—	1'75000
Farthing.....	43'75000	—	0'87500

STANDARD GOLD contains eleven-twelfths of fine metal and one-twelfth of alloy; fineness, 916'66. Twenty troy pounds of standard gold is coined into 934 sovereigns and one half-sovereign.

STANDARD SILVER consists of thirty-seven fortieths of fine metal and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings.

BRONZE is a mixture of copper, tin, and zinc.

THE "REMEDY" is the amount of variation in fineness and weight permitted.

TOKENS.—No person is allowed to coin any token to pass, or as representing bronze or other money under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the current weight.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50; also for £100, £200, £300, £500, and £1,000.

BANK POST BILLS are drawn for any sum from £10 to £1,000, are made payable to order at seven days' date, or at sixty days'. No charge is made for bills so drawn: they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by any (except by the Bank of England). No one, however, can be compelled to give change. Gold of the full weight is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze for sums over one shilling. Farthings, although a legal tender for the same amount, are generally refused if offered for a larger sum than sixpence.

SLANG TERMS FOR MONEY.—In addition to the ordinary terms there are others which, although puzzling to a foreigner, are tolerably well understood in this country. In Scotland, a man who flies "kites" may not be worth a "boodle," and in England not worth a "mag"—coins which no one ever saw. Such a man will toss you for a "bob." He, of course, would be shunned by the lady who lost a "pony" on last year's "Oaks," and by her husband who lost a "monkey" on the Derby at Epsom a day or two previously. The following words are commonly in use:—

- | | |
|-----------------------|-------------------------------|
| A Joey = 4d. | A Quid = £1. |
| Tanner = 6d. | A Pony = £25. |
| Bob = 1s. | A Monkey = £500. |
| Half a Bull = 2s. 6d. | Kite = An accommodation Bill. |
| A Bull = 5s. | |

IRISH MONETARY STATISTICS.—There are six banks in Ireland authorized to issue notes; the average circulation of notes for the twenty-eight years, 1859–86, was about £6,500,000; the largest issue, £8,334,000, was in 1882, and the smallest amount, £5,843,000, in 1862. The amount of deposits and cash balances in Joint-Stock Banks has gone on increasing from £12,967,000 in 1863 to £30,172,000 in 1886. Naturally there have been many fluctuations; in 1876 the highest amount, £34,240,000, was reached. It is interesting to note the increase of deposits in Savings Banks. In 1886 they amounted to £1,761,000; but in 1886 they had increased to £4,451,000, of which no less than £2,444,000 was invested in the Post Office Savings Banks, which during the past ten years have shown a steady increase, while the deposits in Trustee Banks during the same time have decreased, fluctuating between £1,981,000 in 1885 and £2,200,000 in 1887. These annual savings must be regarded as savings of the poorer and the middle classes, and exhibit a very satisfactory state of things. The investments of the upper classes, on the other hand, show a lamentable falling off. These investments are naturally of larger amounts, and in Government and India Stocks. In the year 1859 the amount upon which dividends was paid was £40,304,000, in 1885 this had fallen to £29,689,000; but in 1886 it had recovered to £30,680,000, a difference of £9,624,000 in the twenty-eight years. The number of banking establishments open, including branches, sub-branches, and agencies throughout the Island was 538; this number shows that there must be a considerable amount of trade in many of those smaller towns with whose names Englishmen are not familiar.

Sizes of Type.

All founders cast their type one uniform height and depth, but the letters vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems, he then, doubling that number, charges as so many (3,600) ems.

The smallest type cast in this country is:—

Brilliant. A column the size of this in the Almanack if set in *Brilliant* would contain 121 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures, on paper.

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

Printing is the art of producing impressions, from characters or figures, on paper.

Pearl, 95 lines, 4,370 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Ruby, 87 lines, 3,740 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Nonpareil, 75 lines, 3,000 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Minion, 64 lines, 2,360 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Brevier, 58 lines, 1,970 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Bourgeois, 53 lines, 1,500 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Long Primer, 47 lines, 1,360 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Small Pica, 43 lines, 1,120 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Pica, 37 lines, 890 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

English, 34 lines, 680 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Great Primer, 27 lines, 430 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

Double Pica, 22 lines, 280 letters—

Printing is the art of producing impressions, from characters or figures, on paper.

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10s. or less	½d.
On goods pledged for more than 10s.	1d.
For INTEREST on pledges not exceeding 40s., for every 2s. or part of 2s., per month ..	½d.
And after the first month any time not exceeding 14 days to be charged as half a month.	
On pledges exceeding 40s., for every half-crown, or part of half a crown, per month	½d.

FORFEITURE.—Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. At the end of that time they become the property of the pawnbroker.

Pledges above 10s., if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. But deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—such value to be the amount of the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under, the charge on form of declaration is one halfpenny; when the loan is above 5s., one penny.

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40s., provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon be-

tween the pawnbroker and the pawner at the time of making the contract:

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month will be charged as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10s.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all in Doctors' Commons, between 10 and 4, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but Licences obtained at the Bishop's Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office or at the Vicar-General's Office are available for London or the country. No instructions, either verbal or in writing, can be received, except from one of the parties; nor will any agent be allowed to interfere, either in procuring or paying for the licence. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, which, with the stamps, make the entire cost £2 2s. 6d. The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £2 12s. 6d. to £3 3s. By the 4th George IV., cap. 76, it is enacted, "in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of 15 days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized."

A TABLE OF THE NUMBER OF DAYS FROM ANY DAY IN ONE MONTH TO THE SAME IN ANY OTHER MONTH IN ORDINARY YEARS.

* When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £30'012 and deduct £1 = £29'012.

gives the sums required as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to Local Government Boards and other public bodies, for improvements, building of work-houses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1883, and examined by the actuary of the National Debt Office. It

Years	3 per Ct.	3½ per Ct.	4 per Ct.	4½ per Ct.	5 per Ct.
10	£ s. d. 11 14 5½	£ s. d. 12 0 5½	£ s. d. 12 6 7	£ s. d. 12 12 9	£ s. d. 12 19 0
20	6 14 5½	7 0 8½	7 7 2	7 13 9	8 0 5½
30	5 2 0½	5 8 9	5 15 8	6 2 9½	6 10 1½
40	4 6 6½	4 13 7½	5 1 0½	5 9 8	5 16 6½
50	3 17 8½	4 5 3½	4 13 1½	5 1 2½	5 9 6½

Of course, if the loan be for £1,000, each annual instalment as shown above must be multiplied by 10; if for £2,000, then by 20, and so on.

Section 50 of the County Juries Act, 1825, describes a juror as "A householder, or the occupier of a shop, warehouse, counting-house, chambers, or office for the purpose of trade or commerce, and having lands, tenements, or personal estate of the value of £100."

SPECIAL JURORS.—33 & 34 Vic., c. 77, s. 6, enacts that "Every man whose name shall be in the jurors' book, and who shall be legally entitled to be called an esquire, or shall be a person of higher degree, or shall be a banker or merchant, or who shall occupy a private dwelling-house, rated or assessed to the poor rate or to the inhabited house duty on a value of not less than £100 in a town containing 20,000 inhabitants and upwards, or rated or assessed to the poor rate or to the inhabited house duty on a value of not less than £50 elsewhere, or who shall occupy premises, other than a farm rated or assessed, on a value of not less than £100, or a farm rated or assessed on a value of not less than £300, shall be qualified and liable to serve on special juries in every such county in England and Wales, and in London respectively;" and by Section 11 of the "Juries Act, 1870," it is enacted that "in making out the list of persons within their respective parishes and townships qualified to serve as jurors, the overseers shall specify which of such persons are, in the judgment of such overseers, qualified as special jurors, and shall also specify in every case the nature of the qualification and also the occupation and the amount of the rating of assessment of every such person."

EXEMPTIONS FROM SERVING AS JURORS.—Peers, Members of Parliament, Judges, Clergymen, Roman Catholic priests, Ministers of any congregation, dissenters and of Jews whose place of meeting is duly registered, provided they follow no secular occupation except that of a schoolmaster; barristers-at-law, certificated conveyancers, and special pleaders, if actually practising; attorneys, solicitors, and proctors, if actually practising and having taken out their annual certificates, and their managing clerks, and notaries public in actual practice; officers of the courts of law, the clerks of the peace or their deputies, if actually exercising the duties of their respective offices; coroners, gaolers and keepers of houses of correction, and all subordinate officers of the same; keepers in public lunatic asylums; members and licentiates of the Royal College of Physicians in London, if actually practising as physicians; members of the Royal College of Surgeons in London, Edinburgh, and Dublin, if actually practising as surgeons; apothecaries certificated by the Court of Examiners of the Apothecaries Company, and all registered medical practitioners and registered pharmaceutical chemists, if actually practising as apothecaries, medical practitioners, or pharmaceutical chemists respectively; the master, wardens, and brethren of the Corporation of Trinity House, of Deptford Strond; pilots licensed by the Trinity House of Deptford Strond, Kingston-upon-Hull, or Newcastle-upon-Tyne, and all masters of vessels in the buoy and light service employed by either of those corporations, and all pilots licensed under any Act of Parliament or charter for the regulation of pilots; the household servants of Her Majesty; officers of the Post Office, commissioners of Customs, and officers, clerks,

or other persons acting in the management or collection of the Customs, commissioners of Inland Revenue, and officers or persons appointed by the commissioners of Inland Revenue or employed by them or under their authority or direction in any way relating to the duties of Inland Revenue; sheriffs' officers; officers of the rural and metropolitan police; officers of the navy, army, militia, and yeomanry, while on full pay; magistrates of the metropolitan police courts, their clerks, ushers, doorkeepers, and messengers; officers of the Houses of Lords and Commons; members of the council of the municipal corporation of any borough, and every justice of the peace assigned to keep the peace therein, and the town clerk and treasurer for the time being of every such borough, so far as relates to any jury summoned to serve in the county where such borough is situate; burgesses of every borough in and for which a separate court of quarter sessions shall be holden so far as relates to any jury summoned for the trial of issues joined in any court of general quarter sessions of the peace in the county wherein such borough is situate; justices of the peace so far as relates to any jury summoned to serve at any sessions of the peace for the jurisdiction of which he is a justice.

THE JUDGES.

THEIR AGES, AND DATES OF ELEVATION TO THE BENCH.

The Lord Chancellor (Halsbury)	June, 1825	63
Sir James Hannen (President)	Feb., 1868	67

Mr. Justice Kekewich	Nov., 1886	55
Mr. Justice Charles	Sept., 1887	49

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite;
For in driving your carriage along,
If you turn to the left you are sure to go right,
If you turn to the right you go wrong.

The following is the scale usually charged by respectable houses for:—

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2s. per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £200, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1¼ on the excess, and out-of-pocket expenses.

VALUATION of land—6d. per acre, and out-of-pocket expenses. No fee less than 5 guineas.

FOR THE SALE of freehold, leasehold, and copyhold houses and estates, ground leases, policies of insurance, reversions and other property, by private contract—5 per cent. on first £100, and 2½ per cent. on the next £5,000, and 1½ per cent. on excess; also, in addition, the usual commission for fixtures, furniture, and effects.

FOR THE SALE of the same by auction—2½ per cent. on the amount realized at the sale, and out-of-pocket expenses; or 1 per cent. on the reserve, and expenses, in the event of no sale being effected.

FOR THE SALE of furniture, &c., by auction—5 per cent. on the amount realized, and out-of-pocket expenses; 5 per cent. valuation of furniture, fixtures, stock-in-trade, and general effects.

FOR LETTING unfurnished houses or disposing of leases when the term is for 3 years or under—5 per cent. on one year's rent; where for more than 3 years, 7½ per cent. on one year's rent; and 5 per cent. on any premium up to £1,000, and 2½ per cent. on residue; and for fixtures, furniture, goodwill, &c., 5 per cent. up to £500, and 2½ per cent. on residue. Should the tenant afterwards purchase, the commission as above for selling will be due, less the commission for letting.

FOR LETTING furnished houses—5 per cent. on the rent payable for one year. If let for a longer period, 2½ on remainder of term.

FOR TAKING inventories and examining same—From one guinea, according to length.

FOR LETTING building land and brick earth—building land: one year's ground rent.—Brick earth: 5 per cent. on every year's rent: extra for checking royalty.

VALUATIONS for mortgage, sale, or purchase—1 per cent. and out-of-pocket expenses on first £1,000; and ¼ per cent. on all above that sum upon the full amount of valuation.

FOR NEGOTIATING the purchase of estates, houses, and ground leases—1 per cent. on amount of purchase-money, and out-of-pocket expenses.

FOR NEGOTIATING the taking of houses—Half the above scale for letting, and expenses.

MAKING schedule of fixtures to attach to lease—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING schedule of dilapidations, and serving notice to repair—From 2 to 5 guineas per day.

FOR SETTling amount of dilapidations—5 per cent. on amount, and out-of-pocket expenses.

RAILWAY, School Board, Corporation, Board of Works, and other compensations—

AMOUNT OF AWARD.

£	s.	d.	£	s.	d.
1,200	19	0	6,000	43	0
1,400	20	0	7,000	48	0
1,600	21	0	8,000	53	0
1,800	22	0	9,000	58	0
2,000	23	0	9,600	61	0
3,000	28	0	10,000	63	0
4,000	33	0	12,000	73	0

No fee less than 7 guineas, and a fee of 3 guineas per day for attendance in London before jury or arbitrator.

MANAGEMENT of estates, including collection of rents—Tithe-rent charges, ground rents, &c., from 3 to 5 per cent.; cottage property, 10 per cent.

CHARGES ALLOWED UNDER THE BANKRUPTCY ACT, 1883.

The following charges are to be subject to reduction by agreement with the Official Receiver or the trustee, or to increase with the sanction of the Committee of Inspection and the Official Receiver.

BROKERS' ALLOWANCES. £ s. d.

For inventory not exc. 5 folios	0	10	6
Additional per folio	0	1	6
For every ½ hour in going to or from premises if more than one mile from brokers	0	2	6
For inventory and valuation:—			
On the first £100	2	10	0
For the next £400	1	5	0
Above £400 up to £10,000	1	0	0
Above £10,000	0	10	0
Travelling expenses in addition.			

AUCTIONEERS' CHARGES.

For sales by private contract based on the valuation, half the above charges for inventory and valuation.

For sales by auction, including all expenses except newspaper advertisements.

Of chattel property not exceeding:—

On the first £100	£10	0	0	per cent.
On the next £400	5	0	0	"
Above up to £1,000	4	0	0	"
Above £1,000	2	10	0	"

Of estates, freehold, leasehold, &c., including valuations, for determining reserve bids:—

On the first £300	£5	0	0	per cent.
On the next £1,600	2	10	0	"
Above up to £5,000	1	5	0	"
Above £5,000	1	0	0	"

Costs of surveys, dilapidations, and specifications in discretion of Taxing Officer, £2 to £5.

ACCOUNTANT'S CHARGES.

For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, £1 1s. to £5 5s.

Chief clerk's time, 10s. 6d. to £1 11s. 6d.

Other clerk's time, per day of seven hours, 7s. 6d. to 16s.

These charges shall include stationery, except the forms used.

Medical Fees.

UNLIKE those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of doctor or patient. A medical man living in the eastern suburbs of London will perhaps charge but half a crown or three and sixpence if waited upon by a patient, but, when he removes to the neighbourhood of Manchester Square, the fee charged for the first visit will be two guineas, and one guinea for each second or subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

	RENTALS.		
	£10 to £25.	£25 to £50.	£50 to £100.
Ordinary Visit	2s. 6d. to 3s. 6d.	3s. 6d. to 5s.	5s. to 7s. 6d.
Night Visit	Double an Ordinary Visit.		
Mileage beyond two miles from Home..	1s. 6d.	2s.	2s. 6d.
Detention per hour..	2s. 6d. to 3s. 6d.	3s. 6d. to 5s.	5s. to 7s. 6d.
Letters of Advice	Same charge as for an ordinary visit		
Attendance on servants	2s. 6d.	2s. 6d. to 3s. 6d.	3s. 6d. to 5s.
Midwifery	21s.	21s. to 30s.	42s. to 105s.
CONSULTANTS.			
Advice or Visit alone	21s.	21s.	21s.
Advice or Visit with another Practitioner	21s.	21s. to 42s.	21s. to 42s.
Mileage beyond two miles from Home ..	10s. 6d.	10s. 6d.	10s. 6d.

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are usually rendered once or twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much—and the patient has no means of checking the correctness of the charge; but as medical men, like all others, are liable to err, there can be no reason why they should not render detailed accounts of their charges.

Population, Births, and Deaths.

Population of 31 large towns in the United Kingdom, and of 26 foreign cities, from the latest returns issued by the Registrar-General, with the rate per thousand of births and deaths for one year ending October 1, 1887.

CITIES AND BOROUGHES.	POPULATION.	Rate per 1,000.

It will be observed that some of the populations given in this table differ from those shown elsewhere, in consequence of the different areas taken.

THE Emigrant Information Office, established under the supervision of the Colonial Office, is at 31, Broadway, Westminster, S.W. Hours 10.30 a.m. to 6.30 p.m. Saturday 10.30 to 2 p.m. By written or personal application to the Chief Clerk at this office useful and trustworthy information respecting emigration can be obtained, together with the state of the labour market. Handbooks with maps, at a cost of 1d. for each colony, may also be had.

The following are some of the particulars likely to be required by intending emigrants:—

PASSAGES.

1. FREE PASSAGES.—*Queensland.*—To selected Agricultural Labourers, and single Female Domestic Servants (apply to the Agent-General). There are no free passages to any other colony.

2. ASSISTED PASSAGES.—*Canada.*—Assisted passages at £3 per adult to Farm Labourers and their families, and Female Domestic Servants.

Western Australia.—£10 is allowed to Farmers, Agriculturists, and others likely to be useful in country districts; but a deposit of not less than £100 (to be refunded in the colony) is as a rule required before any assistance is given.

New Zealand.—Assisted passages at £10 per adult are granted to a limited number of Farmers and Agriculturists with small capital. Before any one of this class receives such assistance he must show that he is possessed of £100, and of an additional £50 for each member of his family over 12 years of age.

No assisted passages to New South Wales, Victoria, South Australia, Queensland, Tasmania, the Cape, or Natal; but in the case of Queensland and the Cape passages at lower rates are given, under special conditions, to labourers engaged here by employers in these colonies.

Land Order Warrants to the value of £20 are given under certain conditions to persons paying their own passage direct to Queensland.

3. NOMINATED PASSAGES.—*Queensland, Western Australia, Tasmania, New Zealand, and Natal.*—Residents in these colonies can, under certain specified conditions, nominate their friends for free passages on making payments in the colony as under:—

Queensland.—Males, 12 to 40 years of age, £2; 40 to 45, £4; Females, 12 to 40 years of age, £1; 40 to 45, £4. Confined to agricultural Labourers and Female Domestic Servants.

Western Australia.—On payment of £6 to a limited number of nominees, approved by the Crown Agents for the Colonies.

Tasmania.—Adult Males, not above 40 years of age, £5; Females, not above 40 years of age, £3; Married Couples, not above 45, £6. The continuance of these passages is uncertain.

New Zealand.—Over 12 years of age, £10. As a rule, confined to Agricultural Labourers and Female Domestic Servants.

Natal.—£12 per adult. No nominated passages to Canada, New South Wales, Victoria, South Australia, or the Cape.

ARRANGEMENTS ON LANDING.

Canada.—Temporary Homes or Stations for emigrants are provided at Quebec and Halifax, and the principal towns in the Dominion.

Queensland.—There are Stations at the principal ports and in various parts of the colony, in which Government assisted emigrants are received free of charge for a few days.

Western Australia.—There is a Labour Registry Office at Perth, but no Government Home.

New Zealand.—There are Stations at the principal ports for the reception of emigrants.

No Government Stations in New South Wales, Victoria, South Australia, Tasmania, the Cape, or Natal.

BEST TIME FOR ARRIVING.

Canada.—April to middle of July; not the Winter months.

New South Wales and Victoria.—Any month—September to November for preference.

South Australia.—May to October.

Queensland.—April to October inclusive.

Western Australia.—September.

Tasmania.—Any month—September to November for preference.

New Zealand.—September to January.

Cape.—Any month.

Natal.—Any month—August for preference.

LABOUR DEMAND.

The demand for labour at the latter end of 1887 is—For *Farmers with Capital*—in all the Colonies; for *Farm Labourers*—good men in Canada (after the Winter), Victoria, Queensland, Tasmania, and New Zealand; for *Mechanics*—little or none in any colony; for *General Labourers*—moderate in Tasmania; for *Female Servants*—good in Canada and the Australasian colonies, and moderate at the Cape.

LENGTH AND COST OF PASSAGE.

The time ordinarily taken on the voyage, and the lowest rate of unassisted passages are:—

The average time by Sailing Vessel is about Three Months.	By STEAMER.		By SAILING VESSEL.
	Average Time.	Lowest Fare (about).	Lowest Fare (about).

COLONIAL AGENTS IN ENGLAND.

Canada.—High Commissioner, 9 Victoria Chambers, Victoria Street, Westminster, S.W.

New South Wales.—Agent-General, 5 Westminster Chambers, Victoria Street, S.W.

Victoria.—Agent-General, 8, Victoria Chambers, Victoria Street, S.W.

South Australia.—Agent-General, 8, Victoria Chambers, Victoria Street, S.W.

Queensland.—Agent-General, 1, Westminster Chambers, Victoria Street, S.W.

Western Australia.—The Crown Agents for the Colonies, Downing Street, S.W.

New Zealand.—Agent-General, 7, Westminster Chambers, Victoria Street, S.W.

Tasmania.—Agent-General, 3, Westminster Chambers, Victoria Street, S.W.

Cape.—Agent-General, 7, Albert Mansions, Victoria Street, S.W.

Natal.—Emigration Agent for Natal, 21, Finsbury Circus, E.C.

Population of the United Kingdom.

PREVIOUS to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was, in the years—

attracted the rural population to towns, in consequence of which many villages were comparatively deserted. The American War and the French Revolutionary War carried off large numbers of men; and this, coupled with the removal of the rustic population, gave rise to the impression that the inhabitants of the country had decreased, and were rapidly decreasing. The first general Census in 1801 dispelled this idea, and showed that, notwithstanding all drawbacks, there were many more people than any one supposed. Since the time named there has been a fresh numbering every ten years, with the following results:—

1570... 4,160,221
1600... 4,811,718
1630... 5,600,517
1670... 5,773,646
1700... 6,045,008
1750... 6,517,035

† Exclusive of the Army, Navy, and Merchant Seamen Abroad, who numbered in 1801, 442,013; in 1811, 502,536; in 1821, 299,095; in 1831, 260,191; in 1841, 202,954; in 1861, 212,194; in 1851, 260,356; in 1871, 216,080; and in 1881, 215,374.

** Incorrectly taken.

Briefly the Census of 1881 showed an increase of 3,262,173 persons and 572,402 inhabited houses in England and Wales; in Scotland, increases of 375,555 and 328,820; in the Channel Islands and Man, a decrease of 3,378 persons and an increase of 215 houses; but in Ireland, a decrease of 237,541 persons (or 76,420 families) and 47,272 inhabited houses; giving, after these deductions, an increase of 3,396,809 persons and 843,150 inhabited houses. The population in urban districts in England and Wales had grown more than twice as fast as that of the rural districts (19'63 per cent. against 7'42), and very nearly the same percentage prevailed in Scotland.

Local Taxation.—Poor Rate and Poor Rate Valuation in England.

THE credit of being the first canal-maker in England is attributed to Morton, Bishop of Ely, who, in the reign of Henry VIII., constructed a cut for navigation as well as for drainage between Peterborough and the sea, 40 miles long. It was not, however, until 1761-62 that the Duke of Bridgewater's attack upon the monopoly of the Mersey and Irwell navigation attracted serious attention to the subject of canals. There was a fierce and prolonged opposition in Parliament before the Bridgewater Canal, which was afterwards to be so conspicuous a success, received the Royal assent. The Grand Trunk, or Thames and Mersey Canal, for uniting the Mersey, the Trent, and the Severn, was the next planned, and was authorized by Parliament, after a very expensive contest, in 1766. In 1791-94 there was a canal mania, like the railway mania, which broke out on a large scale in 1845-46, and eighty-one canal and navigation Acts were passed in those four years alone. By 1800 over 100 canal Acts had been passed. Some of the old canal Acts allowed the proprietors to make railways as feeders to the canals for goods or minerals. For example, in 1776 the Trent and Mersey Navigation Company were authorized to make, among other railways, one from Frogual to Caldon, in Staffordshire; and, in 1802, further railways were sanctioned, extending from various points on their canal to Lane End, Hauley, and Burslem. The Monmouthshire Canal Navigation received powers to make railways in 1792 and 1802; and the Grand Junction Company obtained a similar Act in 1793. There were several other instances of like powers granted by Parliament before the close of the eighteenth century.

It is impossible to say with exactitude what is the total length of the canals and inland river navigation of the United Kingdom. The Board of Trade, in 1883, put it at 3,029 miles, exclusive of the rivers Thames, Severn, Wye, Humber, Wear, and Tyne in England; the rivers Clyde, Forth, and Tay, and the Caledonian Ship-canal in Scotland; and the Shannon and other navigations in Ireland. Other authorities have put the length of canals at 4,050 miles for England and Wales alone; at 4,033 miles for England, Scotland, and Wales; and at 4,333 miles for the inland navigation of England and Wales, 354 miles for that of Scotland, and 755 for that of Ireland, which, together with 1,875 miles of non-navigable rivers as feeders, comes to 7,336 miles for Great Britain and Ireland. Canal companies are not bound to make annual returns to the Board of Trade as to their capital and working, such as those which are required of railway companies. In Mr. Chamberlain's Railway Regulation Act Amendment Bill of 1884 it was proposed to provide that canal companies should send in returns, giving the name of the company, a short description of the canal, the name of the principal officer, and the place of the office; but, apparently, the financial position of the company was not provided for in the scheme. A parliamentary paper issued in 1870 professes to give some information on the subject of the amount of capital which has been sunk in canal enterprise, but the returns were evidently made out on different principles, and it is impossible, therefore, to calculate the total capital of canal undertakings in the United Kingdom.

Prior to 1845 canals were subject to no general legislation, and were regulated only by the pro-

visions of their own special Acts. In that year the attention of the Legislature was directed to the competition then going on between railways and canals, and it was thought advisable to give encouragement to the weaker of the competing parties—the canals. Accordingly an Act was passed, giving to canal companies the same power for varying their tolls as was given to the railway companies. In the same session an Act was passed to enable canal companies to become carriers of goods, and to make working arrangements, &c., upon the same terms, &c., as granted to railway companies; and two years after, the canal companies were given power to borrow money for the above purposes. In 1846, there being upwards of 200 Bills containing provisions for railway and canal amalgamations, a committee appointed to consider the subject reported that while amalgamation between railways and canals should not be altogether refused, each case should be thoroughly sifted; and they recommended generally the imposition of a low scale of charges upon all parties to the scheme, strict regulations for maintaining the canals in an efficient state of repair, &c., and that power should be secured to the public of carrying passengers and all kinds of goods on canals. By-laws were to be subject to careful revision, as, for instance, in the suspending of navigation for various purposes and during uncertain periods; while, in cases of conversion of a canal into a railway, care should be taken that no district is deprived of efficient means of general communication, and that the company should afford due facilities of access to canal companies and other parties who may be affected by the change. In 1853 railway speculation revived, and alarm was created by the number and magnitude of the amalgamation schemes proposed in the bills of that session. Accordingly another select committee was appointed, the main result of which was the passing of the Railway and Canal Act of 1854, requiring companies to make arrangements to afford all reasonable facilities for receiving and forwarding traffic without unreasonable delay and without partiality. An Act of 1858, passed at the instance of the canal interest, was to prevent, without legislative sanction, the virtual amalgamation of canals with railway undertakings, which, under previous Acts, had been going on under the name of "leases" of independent canals by railway companies, who were also canal companies by virtue of previous purchases of canals. In 1872 a select committee of Lords and Commons was appointed to inquire into the subject of railway amalgamations. The following general suggestions were made for the improvement and development of canals: No inland navigation now in the hands of a public trust should be transferred to or placed under the control of a railway company. That if the trustees of an inland navigation, &c., apply for power to purchase compulsorily a canal from a railway company, such purchase should be favourably regarded by Parliament. That the utmost facility should be given for the amalgamation of adjoining canals, &c., with one another. That no canal should be transferred to or placed directly or indirectly under the control of any railway company, &c., until it has been conclusively ascertained that such canal cannot be amalgamated with, or worked by, adjacent canals, &c. These and other re-

commendations of a stringent nature "were not put forward by the committee, in the expectation that they will, if adopted, ultimately maintain a system of general competition between canals and railways," but as "putting an end to the present unsatisfactory state of things, and of encouraging, facilitating, and compelling the full development and utilization of the inland navigation of the country." One outcome of the labours of this committee was the creation of the Railway Commission under the Act of 1873. This commission was appointed principally in order that the Railway and Canal Traffic Act of 1854 might be carried into effect. The general objects of this Act are stated above; but sect. 16

of the Act of 1873 provides that no agreement between a canal company and a railway company, by which a railway company would obtain control over a canal, &c., shall have any validity unless it is approved by the Railway Commissioners. Sect. 17 provides that where any canal is already either the property of a railway company, or managed by a railway company, the railway company shall be required to keep it in good navigable condition. A further select committee in 1882 recommended "that Parliament do not sanction any further control, direct or indirect, of canal navigation by a railway company;" and "that the powers and jurisdiction of the Railway Commission be extended."

SUMMARY.

Length not owned by Railway Companies.....	1,593
Length owned by Railway Companies.....	1,436
Gross Total.....	3,029

COMPANIES REGISTERED IN 1886.

Up to the 31st December, 1886, the combined capitals of the principal new Joint-Stock Companies incorporated from the 1st January in the same year, of which particulars have been obtained by the Share and Loan Department, amounted to £133,986,919, distributed as follows:—

Banks.....	£2,060,000	Brought forward	£114,404,467
Canals and Docks.....	800,000	Railways.....	11,580,000
Commercial and Industrial.....	55,501,139	Shipping.....	3,986,252
Financial Land and Investment.....	20,637,150	Tea and Coffee.....	240,000
Gas and Lighting.....	1,540,500	Telegraphs and Telephones.....	2,511,000
Insurance.....	4,389,000	Tramways and Omnibuses.....	772,500
Coal, Iron, and Steel.....	5,535,950	Waterworks.....	492,700
Mines—British.....	555,000		
„ Foreign and Colonial.....	23,385,728	Total.....	£133,986,919

The general result shows an increase of nearly 23 millions as compared with 1885, and of about 15½ millions as compared with 1884.

Some progress is being made with the practical application of electricity as a motive power for tramways, but, so far, the Blackpool Corporation and the Giant's Causeway appear to be the only lines worked upon that system. The Cable system is also in use on a few of the lines, but it has not yet been proved conclusively what is the best system to be adopted for the working of the tramway lines.

The returns of the Board of Trade show that the total capital expended in the construction of Tramways in the United Kingdom up to the present time is about £13,000,000. The length of line open for traffic is about 000 miles. Twenty-

five thousand horses, nearly 500 locomotive engines, and about 3,500 cars are employed in the working of the lines. The number of passengers carried in one year is close upon 400,000,000. The gross receipts are about £2,700,000, the working expenses £2,100,000, and the net receipts £600,000, thus showing an average return upon the capital expended of about 5 per cent. As compared with railways, the tramways, so far, have returned a much better yield to the proprietors; the capital invested in railways yielding, at present, about 4 per cent. only. Future legislation may, however, affect these comparisons.

RAILWAYS AND THEIR HISTORY.

The earliest reference to railways on the plan of making a distinct surface and track for wheels is found in Roger North's "Life of Lord Keeper North," where it is stated that at Newcastle-on-Tyne, in 1776, the coals were conveyed from the mines to the banks of the river "by laying rails of timber exactly straight and parallel; and bulky carts were made with four rollers fitting those rails, whereby the carriage was made so easy that one horse would draw four or five chaldrons." One hundred years afterwards—viz., about 1776—Mr. Carr constructed an iron railroad at the Sheffield Colliery.

Railways, or tramways of wood, upon which waggons were propelled by animal power, were thus in use as early as the seventeenth century, but it was not until near the beginning of the present century that iron was substituted for wood. James Watt first conceived the idea of utilizing steam for locomotion. This was probably about 1780. George Stephenson, however,

was the first to introduce steam locomotive power into practical use. This was in 1825, the jubilee celebration of which event took place under the auspices of the North Eastern Railway Company at Darlington in September, 1875.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a railway from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the county of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." The original application was for a canal, but the canal was dropped after the second reading. On the 24th February, 1804, Trevethick's patent locomotive steam engine was tried at Penydarren, near Merthyr, and conveyed along a tramroad, 10 tons of bar iron,

Cannot be given previous to 1860.

* As a matter of printing convenience, the tables illustrating the British Railway System have been placed out of their proper position.

and about 70 persons, a distance of 9 miles. The application passed the third reading as a railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevethick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Carmarthen-shire, the Kilmarnock and Troon, the Severn and Wye, the Berwick and Kelso, the Gloucester and Cheltenham, and other small undertakings, about twenty in number altogether, with an aggregate of 250 miles, and an authorized capital somewhat under a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, mileage 54, and capital £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states with men and horses "or otherwise." George Stephenson came upon the scene immediately after this Act was obtained, was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the bill finally passed in 1823, when the construction of the line was rapidly proceeding. The 27th of September, 1825, was fixed upon for the opening day, and amid many prognostications of evil the programme was successfully carried out. The speed attained did not average more than five miles an hour, but the practical application of steam for traction purposes was realized. The engine used upon the occasion, driven by

Stephenson himself, and named the "Locomotion," has been preserved, and is still in the workshops of the North Eastern Company. No carriages were provided for the special accommodation of passengers using the line until some weeks after the opening. This line, the germ it may be called of the railway system, proved a great success financially and otherwise. Nevertheless, the employment of locomotives remained almost unknown to the public at large until the opening of the Liverpool and Manchester line, five years later. The Monkland, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—including the Canterbury and Whitstable, a remarkable undertaking, worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place; and even then the aid of the press, powerfully and influentially invoked, failed to arouse anything in the shape of enthusiasm. Royal patronage was not bestowed upon the opening ceremony, although eagerly solicited. To the great minds of the time, however, the event assumed more than ordinary importance, and it is reported that the impression made upon Lord Brougham's contemplative mind forced a tear from his eye. The next scheme was for a line from London to Birmingham, the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and persever-

ance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of, as it had before been against, railways. The London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Brighton, Birmingham and Manchester, and Edinburgh and Glasgow, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

The expenditure incurred in securing legislative authority to construct railways was enormous. The Parliamentary costs of the Brighton railway averaged £4,806 per mile; of the Manchester and Birmingham, £5,190 per mile; and of the Blackwall, £14,414 per mile! The solicitors' bill for the South Eastern railway contained 10,000 folios, and amounted to £240,000. These few facts, however, afford but a feeble idea of the reckless wastefulness of capital on railway undertakings. It is universally allowed that, under a better policy, not only a much better railway system might have been provided, but a saving might have been effected of at least fifty millions.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projects, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the legislature. The public mind in the meanwhile was greatly exercised in connection with the lines already

opened. The Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying ten per cent. dividends, and some of the smaller lines were yielding even larger returns. Attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. Projectors came forward with abortive schemes, eager to supply a want which seemed insatiable. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania." At least four times as many schemes came before the credulous and overweening public as ever came to receive legislative deliberation, and between the close of the 1845 session and the opening of that for 1846, no less than 1,300 projects were brought out. It was calculated that even the small parliamentary deposits required to be lodged with each Bill would aggregate to something like sixty millions. The coolest and most practical heads were absolutely carried away in the prevailing excitement. It gradually dawned upon the minds of reflecting people, that of the £600,000,000 required, a vast proportion were mere paper projects or competitive schemes, alike unnecessary and uncalled for. At the instigation of the Government, probably, the screw was applied, the bank rate was raised from two to four per cent. within a month, the alarm spread, shares fell, and even consolidated eight per cent. The collapse soon followed: much money was lost, and a deal of wisdom gained.

General legislation relative to railways was introduced about 1840. The lines that had been constructed previous to this were established under Special Acts. Their wonderful increase, considering the obstacles placed in their way by the aristocracy and landowners, until they saw the land and the property in the vicinity of the

lines rapidly improving in value, originated a new species of legislation. More than anything else in the nature of public or private enterprise, it was beginning to be felt that the railways were instrumental in promoting the interests not only of the rich, but perhaps even in a greater degree the interests of the community at large. The enormous development of the trade of the country was ascribed to the instrumentality of railways. It is not wonderful, therefore, that a new branch of law for their regulation was introduced. The variety and repeated alterations in the railway laws showed the difficulty of dealing with the various and often conflicting interests concerned. The Railways' Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways' Further Regulation Act of 1844, the Railways' Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c. In their civil and commercial importance, and the enormous interests they represented, railways soon came to occupy the attention of leading minds of the day,

and an active part in their administration was shared by members of the Government and of both Houses of the Legislature. The railway interest has continued powerfully represented. At the present time about 50 members of the Upper House are upon the direction of our railways, and at least 130, or one-fifth, of the members of the House of Commons are officially connected with them. This does not, however, represent the aggregate power of the railway interests in the Legislature, for much larger numbers hold more or less a pecuniary stake in the lines.

The number of persons employed in working the railways of the United Kingdom is about 370,000. This does not include those employed in the construction of new lines. The number dependent upon those thus actively employed must be very large. And when we consider the vast numbers besides who are indirectly employed in private establishments, administering to the requirements of the companies in iron-works, engine and carriage works, printing, and so forth, the social dependence upon their existence must be something considerable in the public economy. At the close of last year there were in use upon the railways 15,400 locomotive engines, 34,216 carriages for the conveyance of passengers, 12,673 other vehicles attached to passenger trains, 468,537 waggons for the conveyance of live stock, minerals, and general merchandise, and 12,664 miscellaneous vehicles. There is over £828,000,000 of capital sunk in

RAILWAYS IN 1886.

The general report to the Board of Trade in regard to the traffic and working of the railways in the United Kingdom for the year 1886 shows much the same general features as those of the preceding year. The net earnings, although somewhat larger than in 1885, were less than in 1884; and the decrease in the dividends recorded for the previous year has been further continued. The increase in the net

earnings is due, in only a very small degree, to the increase in the receipts, and is accounted for almost entirely by a diminution in the working expenditure. There was a considerable increase under the head of passenger traffic, but this was counterbalanced by a further decline in the receipts from goods. The increase of capital for the year was less than usual; and it appears that in the year 1886 there was a smaller investment of new capital in railways than in any previous year for many years past. The proportions of the different descriptions of capital show no change, ordinary capital amounting to 37 per cent. of the total, guaranteed and preference 38 per cent., and debenture stock 25 per cent.; the total nominal capital now amounting to £828,000,000. Although the increase last year was less than it had been for many years past, yet it was of sufficient amount to outweigh the slight increase in net earnings. The dividends were thus further injuriously affected; the loss, of course, falling exclusively upon the ordinary shareholder, whose income has now shown a diminution each year since 1883. The increase of about £400,000 in the passenger traffic receipts, and of £100,000 in the miscellaneous receipts was almost exactly balanced by a decrease of £500,000 in the receipts from goods traffic. The decrease in the receipts from goods traffic has now been in progress for several years. It is observed that the increase in the passenger traffic receipts is almost entirely due to the continued expansion of the third class traffic; while the receipts from first and second class passengers have, as has been the case for several years past, again fallen off. How far this decrease in first and second class traffic may be continued it is of course impossible to say, but the policy of the railway companies, as a whole, in fostering the third class traffic would, so far as can be judged from the figures published, appear to have been advantageous, not only to the travelling public, but also to the railway shareholders. How far the diminution of receipts from merchandise traffic may have been caused by a diminution in business done, as dis-

tinguished from reductions in charges for conveyance, does not appear directly from the returns which the companies are required to furnish; but that last year, as compared with the previous year, there may have been some diminution in business done, appears to be shown by the tonnage conveyed, which shows a reduction in the mineral class of nearly two million tons, and in merchandise of something less than one million. Of course, as has been pointed out in former reports, these figures are not decisive, and the proper figures to indicate such a result would be the number of tons conveyed one mile; but so far as they can they appear to point to an actual diminution of business, as well as a diminution of the charges for conveyance. The traffic receipts per train mile again show a diminution. The decrease in the case of passenger traffic per train mile, although not of itself of great importance, when considered in connection with an actual increase in the receipts from this source, would appear to indicate that more work has been done by the railway companies for the same money. In the case of the goods traffic the decrease in the receipts per train mile is more considerable, and the diminution in the last decade was from 5s. 6d. to 4s. 9d., or nearly 9d. per train mile. The large

increase in the number of passengers carried is explained, to some extent, by the opening of two new, but important, though short journey lines, in the early part of the year, viz., the Mersey Railway, and the Glasgow City and District Railway. Some five million passengers were conveyed over each of these lines during 1886. As in the previous year, there was noticed a considerable diminution of working expenditure, although the total receipts remained almost stationary. There was a diminution of £270,000 in the working expenditure, this having taken place along with an increase in the train mileage run. The expense per train mile again shows a diminution, having, in fact, now been steadily decreasing for several years, the decrease during ten years being very striking, amounting to close upon 6d. per train mile, the rate of cost in 1876 having been 3s., or thereabouts, as compared with 2s. 6d. last year. In almost every item, with the exception of rates and taxes, there is more or less of a diminution. As in former years railway shareholders have benefited by a still further diminution in the charges for compensation, which has been in great measure due to, and may be set off against, one of the causes of increase in the cost of railway working, viz., the general adoption of the block system, and of the

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares.

system of interlocking points and signals, for which the Board of Trade have pressed. Another fact which may have materially assisted the railway companies in their endeavours to reduce expenses is, that during the last ten years there has been a general fall in prices. To what extent the decline in wages also may have been an advantage to the railway companies is at present somewhat obscure, although it may reasonably be assumed that some decline, however slight, has taken place during the period. Against a decrease in the traffic receipts per train mile, the companies were able to set a considerable decline in the working expenditure per train mile, so that on balance they are not so much worse off as the decrease in the receipts would appear to imply. The increase in the net earnings, as compared with the previous year, was not sufficient to compensate for extra capital, the consequence being that the percentage of net earnings on invested capital again shows a decrease. The loss has naturally fallen most heavily upon the ordinary capital, which has to bear not only any deficiency in the net earnings, but also the increased payments which have been made on account of additions to that description of capital bearing preferential dividend or interest. The point touched last year in the average dividend on ordinary capital was altogether the lowest in any year of the past decade. The reason why the dividend on ordinary capital has not declined in a greater degree than has actually been the case, can of course only be that, during the last few years the ordinary capital has benefitted to some extent by the reduction in the rate of interest upon other descriptions of capital. It is further observed that there are considerable changes in the amounts of ordinary capital at various rates of dividend. The most important of these are, the diminution in the amount receiving between 5 and 6 per cent., which has declined from about $\frac{1}{4}$ to about $\frac{1}{5}$ of the whole; while the increase in the amount receiving between 4 and 5 per cent., which, from being about $\frac{1}{3}$, has become about $\frac{1}{2}$ of the whole. It still remains true, however, that the bulk of the ordinary capital of the railway companies receives dividends ranging between 3 and 7 per cent., the total amount receiving such rates being over 70 per cent. of the whole. The final result, notwithstanding the increase in passenger receipts and net earnings, and the decrease in working expenditure, is of course the least satisfactory to the railway ordinary shareholder of any that have been shown for several years. The increase in net earnings caused mainly by economies in work-

ing has not been sufficient to balance the investment of new capital in railway undertakings, although this latter may almost be considered a minimum amount. Consequently the percentage of net earnings on capital has fallen off, and this reduction is felt more especially by the holder of ordinary capital, to whom the return last year was in fact lower than in 1879, which was a year of great depression. The decrease in the goods traffic receipts, coming as it does in continuation of what has been going on during the last two or three years, is the most unfavourable feature of the working, especially from the appearance of a decline of actual business, however slight, which is presented. Whether there will be improvement from the point here recorded—and there has apparently been some improvement during the current year—remains to be seen.

RAILWAY ACCIDENTS.

To the public generally one of the most interesting points in connection with the working of the railways is the increased immunity from accident, as evidenced by the great decline for a considerable number of years past in the charges paid by the companies by way of compensation for personal injury to passengers. In 1875 the cost per train mile of compensation for personal injury was 0'44d., whereas in 1885 it was 0'11d. only per train mile. In loss and damage of goods, similarly, the cost in 1875 was equal to 0'32d., whereas in 1885 it was 0'16d. only per train mile. One of the chief causes of increase of cost in railway working in the period has been the general adoption of the block system, and of the system of interlocking points and signals, on which the Board of Trade have insisted. But against any direct increase of expenditure from this cause there may fairly be set this reduction in the item of compensation from injuries. The reduction, in fact, represents almost a pure gain to the railway companies.

The general report of the Board of Trade upon the accidents which occurred upon the railways of the United Kingdom during the year 1886 shows that the total number of persons killed in the working of the railways during the year was 938, and the number of injured 3,539. Of these numbers, 95 killed and 1,342 injured were passengers, but of these only 8 were killed and 615 injured in consequence of accidents to or collisions between trains; the deaths of the remaining 87 passengers and the injuries to 727 were due to a variety of other causes, but more especially to a want of caution on the part of the individuals themselves. Of the remainder, 425

killed and 2,016 injured were officers or servants of the companies or of contractors; of suicides there were 80; of trespassers, 205 were killed and 91 injured; of persons passing over the railway at level crossings, 81 were killed and 25 injured; and of other persons from miscellaneous causes, 52 were killed and 71 injured. In addition to the above, 51 persons were killed and 3,868 were injured from accidents on the companies' premises, which cannot be considered as "railway accidents," as they were not connected with the movement of railway vehicles. The proportions of passengers killed and injured during the year from all causes were one in 7,637,730 killed, and one in 540,674 injured. These are by far the lowest numbers ever recorded; while those killed and injured from causes beyond their own control are also very much less than in any previous year.

The return thus shows that the number of passengers killed and injured through causes beyond their own control, during 1886, although more than in the preceding year, is greatly less than in any previous year since 1874. The number of inquiries directed by the Board of Trade, which had considerably decreased in the previous year, had very slightly increased during 1886, and the number of investigated train accidents for the year was only 62, as compared with 149 ten years ago. The number of inquiries into accidents classified under certain heads shows, under every head, a decline compared with previous years. Thus, for instance, under the head

of engines or vehicles meeting with obstructions, or leaving the rails, or through defects in permanent way or works, the number of investigated accidents last year was 7, the lowest number recorded. Similarly, from trains entering stations at too great speed, and from engines and trains being run or turned wrongly into sidings, or otherwise, the numbers are the lowest that have been returned. What had previously been the cause of a considerable number of investigated accidents disappeared entirely from the table last year, viz., collision between engines and trains following one another on the same line of rails. Without introducing invidious comparisons it is pointed out that of the 62 investigated train accidents, 8 occurred on the London and North Western, 7 on the London and South Western, 5 on the Great Western, and 5 on the Lancashire and Yorkshire. The numbers on other lines were 4 or under. The returns of railway servants killed and injured happily continue to show a decline. The casualties which can properly be considered to have occurred in the course of working the railways, and not including other casualties which have occurred on the premises or in the workshops or warehouses, or otherwise, of the companies, show that 23 servants were killed and 301 were injured whilst employed in coupling and uncoupling vehicles; 96 were killed and 867 were injured whilst employed in various shunting operations; 18 were killed and 54 injured by being caught between vehicles; 10 were killed

NOTE.—The greatest performance in running is probably that of the "Charles Dickens," an engine belonging to the London and North Western Company, which runs from Manchester to Euston and back daily, Sundays, &c., excepted. It is worked by two drivers, who take charge on alternate days. The daily run is 367 miles. The American Mail is worked on Sunday mornings from Dublin to Queenstown, a distance of 177¼ miles, by one engine, in 4¼ hours. Two stoppages are made for water.

and 24 injured by falling between trains and platforms; 87 were killed and 118 injured whilst working on the permanent way; and 81 were killed and 111 injured whilst walking, crossing, or standing on the line on duty. The number of servants killed in what is usually considered the most dangerous of railway operations, viz., coupling and uncoupling of vehicles, was the lowest recorded in these returns. Similarly, the numbers killed by train accidents in the past year was 4, the lowest number ever recorded. There has thus been a proportionate, if not an absolute, decrease for many years past in the number of servants meeting with casualties in the employment of the companies. On the other hand, accidents to persons other than passengers or servants, such as, for instance, persons passing over railways at level crossings, show a serious increase, the numbers having been 81 killed and 25 injured, being a considerable increase on the numbers in the previous years. Trespassers and suicides unfortunately have also increased. It is a question whether, if better gates and fences were provided, and more stringent rules enforced, so great a loss of life need occur. On the whole, the information given in the report shows that the working bears a favourable comparison with any preceding year, when the traffic and length of line in operation did not amount to anything like the present dimensions. The extension of the various improvements from year to year, as well as the re-arrangement of stations, the heightening of platforms, the provision of foot-bridges and subways, and a continuous footboard, all of which matters have met with considerable attention from the companies, tend to lessen the number of accidents and add to the safety of the travelling public.

The attention of the Board of Trade continues to be directed to the means employable for preventing accidents, not only to passengers, but to the servants of the companies. By the courtesy of the railway companies opportunities have been given to the chief officers of the Board of seeing most of the methods suggested, with the view of facilitating the coupling and uncoupling of vehicles.

BLOCK SYSTEM.

There has been no relaxation during the past year in the progress made for rendering railway working more safe, by the extension of the interlocking and absolute block systems over a larger railway mileage, and continual progress is reported in this matter, so essential to the safe working of the railways. The proportion in which signal and point lever had been interlocked on railways was 92 per cent. in England, 79 per cent. in Scotland, and 52 per cent. in Ireland. The amount of interlocking and block working on some of the railways in England and Scotland, is, however, still short of what is necessary for safe working, whilst in Ireland it may be said that the progress made is far from satisfactory. At the end of the year the block system had been adopted on 14,639 miles out of 18,339 miles open for traffic.

The electrical interlocking of the block system instruments with the outside signals, properly carried out, is an effectual protection against many of the accidents which occur, and the Board of Trade inspectors continue to call attention to the fact that this electric locking, as now in operation upon the London, Chatham, and Dover,

the Metropolitan District, and some other lines, is well worthy of the consideration of the managers of other companies.

CONTINUOUS BRAKES.

In several cases the good effects of continuous brakes have been specially mentioned, whilst in other cases the accidents and collisions might, according to the statements in the reports of inquiries, have been either prevented or their effects mitigated had the trains been fitted with quickly-acting continuous brakes, automatic in their action, instead of those with which the trains were fitted. It appears that 41,747 vehicles used in passenger trains had been fitted either with continuous brakes or with pipes only for running with vehicles so fitted, and that 9,500 vehicles remain to be so fitted. Brakes apparently complying with the conditions laid down by the Board of Trade are fitted to 25,292, or 50 per cent. of the vehicles running in passenger trains. Those only complying with some of the conditions are fitted to 16,455, or 32 per cent. The application of continuous brakes of the various descriptions has increased from 19 per cent. in 1878 to 82 per cent. in 1885, or at an average rate per annum of about 7 per cent.

RAILWAY COMPENSATION.

It is satisfactory to have to record a continued steady decline in the amount paid by way of compensation for personal injury to passengers. There is not a single company of any importance that has not claims constantly coming in for the most trivial injury, nevertheless the total is not more than half what it was a few years ago. A summary of the amounts paid last year by the principal companies, and the amount of compensation paid for the loss and damage of goods is as follows:—

	Passengers.	Goods.
COMPENSATION—		
Great Eastern	£19,638	£8,661

THE CHEAP TRAINS ACT.

THE "Cheap Trains Act, 1883," is a measure which affects not only railway shareholders and the public generally, but especially the working classes whose domiciles have been interfered with by the extension of the railway systems into crowded centres of London and other large urban areas. The Act has been received by the railway companies with indifference, its provisions being regarded as partial so far as free and untaxed locomotion is concerned, and nothing less than total repeal of all taxation is the universal desire of the railway proprietors and authorities. To the public generally, and more especially to the working classes, who obtain a direct remission of the passenger tax, and for whom additional workmen's trains have to be provided, the Act is of very great benefit.

The Act, which took effect 1st October, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of two per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

If at any time the Board of Trade have reason

to believe that upon any railway a due and sufficient proportion of accommodation is not provided at fares not exceeding a penny a mile, or that such proper and sufficient trains are not provided for workmen going to and returning from their work, at such fares and at such times between six in the evening and eight in the morning as appear to the Board of Trade to be reasonable, steps may be taken to compel the company to provide such accommodation.

Provision is also made in the Act continuing the companies' powers as to special mileage and exceptional charges, and also enlarging their powers in dealing with the charges over distances which include fractions of a mile over a quarter of a mile. The Queen's forces, including officers or men in the navy or naval volunteers, or in the regular, reserve, or auxiliary forces of the army, or in any police force when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

RAILWAY SERVANTS' RISKS.

Some idea of the relative amount of risk run by the different classes of railway servants is afforded by the following table, which shows the number of men employed in various occupations, and the number of fatal accidents and injuries to each class, in the year 1886:—

CLASS OF SERVANTS.	Number Employed.	Number Killed and Injured in 1886.		Proportion to the Number Employed.	
		Killed.	Injured.	Killed.	Injured.
Breaksmen and Goods Guards	7,407	43	409	1 in 192	1 in 18
Gatekeepers.....	1,605	5	3	1 " 321	1 " 535
Permanent-way men	37,840	92	145	1 " 411	1 " 261
Firemen	12,795	18	195	1 " 711	1 " 65
Engine-drivers	12,874	8	143	1 " 1,609	1 " 90
Porters and Shunters.....	48,070	88	572	1 " 546	1 " 84
Inspectors	3,518	6	17	1 " 586	1 " 207
Passenger Guards	5,902	2	59	1 " 2,951	1 " 100
Ticket Collectors, &c.....	2,060	2	2	1 " 1,030	1 " 1,030
Pointsmen and Signalmen	19,012	11	39	1 " 1,728	1 " 487
Labourers	70,405	37	72	1 " 1,902	1 " 977
Station Masters.....	6,165	6	6	1 " 1,027	1 " 1,027
Mechanics	55,940	9	24	1 " 6,213	1 " 2,331

The figures referring to goods guards are a very startling record of the dangers to which these men are exposed, necessarily in a few cases; but in a great many instances they arise from indifference, or daring, which ordinary reason should be able to restrain. That most dangerous part of their employment, viz., the coupling and uncoupling of waggons, has recently been greatly relieved of a few of the greatest elements of danger, inasmuch as it will soon be unnecessary to pass under or between the waggons at all.

FURTHER LEGISLATION FOR RAILWAYS.

Mr. Mundella, the President of the Board of Trade, introduced a Railway and Canal Traffic Bill on March 11, 1886. This met with considerable opposition from the railway interest, and meetings of the proprietors of all the leading companies passed resolutions condemning it. The Bill was read a second time on May 6, but was not further proceeded with in consequence of the political crisis, and was formally with-

drawn on June 10. On the reassembling, in August, 1886, the new Government, with regard to railway legislation, announced on August 30 that the Board of Trade hoped to be in a position to deal with the subject of railway rates next session. The Queen's Speech at the opening of Parliament on January 27 announced that a Bill for the regulation of railway rates would be introduced. The bill would be first presented in the House of Lords. This Bill for the "Regulation of Railways and Canals" passed the House of Lords with some modifications, and was subsequently read a first time in the House of Commons, but this House was unable to spare time for its further consideration. The discussions upon the important measure have, however, led to a better understanding of the questions involved, and have shown, as it is claimed by the Railway Companies, that no legislation seriously prejudicial to Railway Companies could fail to injure also the trading and agricultural interests of the country.

Indian Railways.

The construction of Railways in India, which commenced in 1853, has at various periods been conducted on three different principles: (1) by the employment of companies under a system of guarantee; (2) by the State itself through its own officials; and (3) by assisted companies with or without a guarantee or subsidy from the State. Three of the lines constructed on the old system of guarantee (the East Indian, the Eastern Bengal, and the Scinde, Punjab, and Delhi) have been purchased by the Government. The total length of railway open in India at 31st December, 1885, was 12,208 miles, and the capital expenditure was £166,146,651. The gross receipts for 1885 amounted to £17,989,625, the working expenses to £8,863,294, and the net revenue to £9,126,331. The net earn-

ings yielded a return of 5·84 per cent. per annum upon the invested capital. The total number of passengers carried in the year was 80,864,779, yielding £5,538,126; the aggregate tonnage moved amounted to 18,925,385 tons, the receipts from which were £1,915,375. The average cost of the 5½ feet gauge and of the metre gauge lines have been, respectively, £16,752 and £6,616 per mile of line. From the commencement of operations up to Dec., 1885, a gross sum of £64,650,021 has been advanced as interest by the State to the Guaranteed Companies, and up to 30th June, 1885, the total net earnings of these railways, exclusive of half of any surplus profits realized, amounted to £38,506,292, leaving a net amount of £26,144,629, which has been paid by the State. The surplus profits

realized during the year 1885 amounted to £785,866.

The rolling stock in use on all Indian railways consists of 2,974 engines, 6,870 passenger carriages, 52,217 goods waggons, and 3,318 other vehicles. The number of persons employed is 215,866, including 4,375 Europeans.

A marked feature of railway construction in India is the number of important large bridges at present in progress. One over the Hooghly, near Calcutta, consists of a central span of 120 feet and two side spans of 540 feet each. One over the Ganges, at Benares, consists of seven spans of 356 feet each; while one over the Indus, at Sukkar, has in it one span of the enormous width of 790 feet.

For the use of Overseers, Churchwardens, Vestry Clerks, Magistrates' Clerks, and Town Clerks, Superintendent and District Registrars, Coroners, and Municipal and Parochial Officers and Citizens generally, showing the days when certain Official Duties are to be performed; also the days when Inland Revenue Licences expire.

SUNDAY.—*In all computations of time the rule of law is, that Sunday counts as no day. All acts, therefore, which fall to be done upon a Sunday should be performed the day previous unless there is statutory provision to the contrary. Every meeting or adjourned meeting of any vestry or corporation, whether ecclesiastical or civil, or of any public company, for the nomination, election, appointment, swearing-in, or admission of any officer or officers, or for the transaction of any other secular affair of such vestry, corporation, or company, and every other meeting of a public and secular nature, which according to any Act of Parliament, or according to any charter, grant, constitution, deed, testament, law, prescription, or usage whatsoever, is or shall be required to be held on any Lord's Day, or on any day which shall happen to be on a Lord's Day, shall, by 3 & 4 Will. IV. c. 31, be held on the Saturday next preceding or on the Monday next ensuing, at the like hour with like form and effect as if the same had been held on such Lord's Day; and every matter transacted at any such meeting or adjourned meeting held upon any Lord's Day shall be absolutely void and of none effect to all intents and purposes whatsoever: provided always, that when no such nomination, election, appointment, swearing-in, or admission shall have taken place on such Saturday, every person whose term of office would have expired on any such Lord's Day shall continue in office, and exercise and enjoy all powers and privileges, until the Monday next ensuing, in the same manner as if such Monday had been the customary day of nomination, election, appointment, swearing-in, or admission. In the case of Bills of Exchange that fall due upon a day of rest such as Sunday, Good Friday, Christmas Day, or some day appointed for a solemn fast or day of thanksgiving, presentation for payment should be made on the business day preceding such day of rest. Bills of Exchange falling due on a Bank Holiday are not payable until the following day (see 34 & 35 Vict. c. 17), and when the last day of grace is a Sunday, and the second day of grace is appointed as a Bank Holiday, such bills are due and payable on the succeeding business day (see 45 & 46 Vict. c. 61).*

January.

1. Hereafter all deeds for the assignment of property or for a composition for the benefit of creditors, are required to be registered within seven days of execution, under the Deeds of Arrangement Act, 1887.

The Land Tax, Income Tax, and the Duties on inhabited houses are due on this date; so are dog licences, licences for carriages, male servants, and for using armorial bearings. These licences must be taken out before the end of the month, or within twenty-one days after first becoming liable to duty.

Lists of Voters in Parliamentary Boroughs and Counties come into force as the Registers for the ensuing year.

Watch Committee of Town Council to transmit to Secretary of State a copy of all rules and orders made since 1st October for the regulation and guidance of constables or policemen.

Between the 1st of this month and the 31st March, the Medical Officer of each workhouse and district to visit every pauper lunatic not in an asylum; and between the 1st and 7th day of this month make a report to the Clerk to the Guardians, or to the Overseers, of his visits during the preceding quarter, which report, within three days after its receipt, shall be transmitted to the Commissioners in Lunacy, and a copy to the Clerk to the Visitors of the asylum for the county or borough in which the union or parish is situate. Clerk to Guardians on this day, or as soon after as may be, to make out an annual list of all lunatics chargeable to the parish, and on or before the 1st February to transmit copies to the Commissioners in Lunacy, Local Government Board, Clerk to Visitors of Asylums, and Clerk of the Peace of the county, or Clerk to the Justices of the borough.

Return of Paupers relieved on 1st January to be made to Local Government Board.

2 Holiday on the Stock Exchange, and Bank Holiday in Scotland.

Quarter Sessions to be held this week. At these Sessions the Justices may name two of their body to fix the time for holding the next general Quarter Sessions, so that such time shall not be earlier than the 7th March nor later than the 22nd April, and to give notice of the day so fixed by advertisement in such newspapers as shall be directed by the Justices so assembled. But when no other day is so fixed, the Sessions to be held in the week next after the 31st of March. Should the 31st of March fall on a Sunday, "the next week after" is that beginning April 7th.

7 Registrars of Births and Deaths to transmit to Overseers, on or before this day, a return of all male persons dying within a parish included in a parliamentary or municipal borough between the 15th September, or the date when the preceding return was made, and the 31st December.

Last day for Medical Officers to send quarterly list of pauper lunatics to Clerk to Guardians.

Solicitors, conveyancers, special pleaders, and draughtsmen in Equity in Ireland must renew their certificates between this date and Feb. 5.

9 Last day for report on condition of Lunatic Asylums to be laid before the Justices. Clerk to Committee of Visitors to transmit a copy to Commissioners in Lunacy within 21 days.

Insurances due at Christmas must be paid.

Last day for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitors.

11 Hilary Law Sittings commence.

Bankers' returns to be delivered at the Stamp Office not later than to-day.

14 Registrars to apply on or before this day to the officiating minister of every church and other place of worship in which marriages may be solemnized within their sub-districts, for certified copies of all entries of marriages solemnized, or for certificates of "No Registry," during the quarter ended 31st December, 1887. Registrar to deliver these, on or before the 20th of this month, to the Superintendent Registrar.

Registrars of Dioceses to send to the General Register Office yearly lists of licensed chapels.

20 Registrars to deliver to Superintendent

Registrars, on or before this date, certified copies of Births, Deaths, and Marriages entered by them during the quarter ended 31st December, 1887.

21 On or before this day Returns to be sent to Mines Inspectors, giving particulars up to preceding 31st December, as required by s. 33 of Coal Mines Regulation Act, 1887.

25 Within seven days Companies, Corporations, and County Justices to deliver half-yearly accounts to the Commissioners of Inland Revenue, with a view to compounding Stamp Duties under Inland Revenue Act, 1887.

28 Last day for Clerk to Visitors of Asylums to transmit report to Commissioners in Lunacy.

30 Owners of property, to entitle them to vote in the election of Guardians, must sign and give Overseers the statement required by 4 & 5 Wm. IV., c. 76, containing the particulars set forth in the 7 & 8 Vict., c. 101, s. 15.

31 Last day for Superintendent Registrars to transmit to Registrar General copies of Births, Deaths, and Marriages for quarter ended 31st December.

Railway Companies, on or before this day, if required, to transmit to the Clerk of the Peace of the counties through which the railway may pass, a copy of their annual account prepared in accordance with 8 & 9 Vict. c. 20, s. 107.

February.

1 Within the first seven days of this month Justices of the Peace to issue precepts to Overseers, requiring lists of men qualified to serve as Parish Constables, if the Court of General or Quarter Sessions of the county have determined that it is necessary that one or more Parish Constables should be appointed for any parish within the jurisdiction of such court. Overseers to summon vestry meeting within fourteen days, and to furnish such lists before the 24th March.

Within the first 21 days of this month the Clerk of the Peace of every county, and the Town Clerk of every borough, to transmit to Secretary of State a printed copy of Register of Voters.

Last day for Coroners of boroughs to transmit to the Secretary of State returns in writing of inquests held by them in the preceding year.

Last day for Clerk to Guardians to transmit copies of annual list of pauper lunatics to Commissioners in Lunacy, Local Government Board, Clerk to Visitors of Asylums, and Clerk of the Peace, or Clerk to the Justices of a borough.

4 On or before this day Overseers of every parish containing a population exceeding 2,000 persons, to enter in a book the names and addresses of all persons claiming as owners or proxies to vote in the election of Guardians. Between this day and the 10th, at reasonable hours, the Overseers to allow any person to peruse such book without fee.

Last day to renew certificates of Solicitors, Conveyancers, and Draughtsmen in Equity in Ireland.

15 Last day for objecting to claims of owners to vote for election of Guardians.

18 Last day for Town Clerks to publish a notice of election of Auditors and Revising Assessors.

20 Last day for Clerks to Guardians to give notice to Overseers of day for hearing objections to owners' votes for election of Guardians.

Between this day and 1st of March, Chairman of Local Board to publish a notice in the Form L. in Schedule 4 of the Public Health Act, 1875, and

signed by him, of the time within which claims and objections respecting the register of owners and proxies for the district are to be made. A copy of such notice to be inserted in some local newspaper, and affixed at the places where parochial notices are usually posted.

On or before this day the Clerk of the Peace of every county, and the Town Clerk or other officer having charge of Register of Parliamentary Voters, to transmit a printed copy of such register to the Secretary of State.

24 Between this day and 1st March, Clerk to Guardians to provide for revision of list of proxies in election of Guardians.

25 Railway Companies to furnish accounts to Board of Trade.

27 Two days at least before the 1st of March the Mayors of boroughs to publish notices of the situation of polling-places for the election of Auditors and Revising Assessors.

29 Last day for Corporations aggregate, Joint Stock, or other Companies to send to Overseer, for entry in the Rate-book, the name of the officer who is to vote in the election of Guardians.

March.

1 Between this date and 1st August, persons shooting or taking wild birds are liable to penalties under the Wild Birds Protection Act, 1880 (43 & 44 Vict. c. 35).

Claims of owners and proxies to vote in Local Board elections, and objections to owners and proxies, to be sent to the Chairman of the Local Board on one of the first six days of this month.

From this day to the 21st of this month, copies of lists of men qualified to serve as Parish Constables to be in the custody of Overseers, and to be open to the perusal of inhabitants of the parish or township without payment, such lists to be affixed to doors of churches and chapels on the first three Sundays in this month.

On or before the 15th of this month, the Returning Officer in the election of Guardians (the Clerk to the Guardians) shall prepare and sign a notice of the ensuing election, which shall be in one of the forms No. 2 in Schedule A to the General Order of the Local Government Board of the 14th of February, 1877, and cause such notice to be published in the following manner:—

1st. A printed copy of the notice shall be affixed on the principal external gate or door of every Workhouse in a Union or separate parish under a Board of Guardians; or, where there is no such workhouse, on the external gate or door of the building in which the Board-room of the Guardians is comprised, and such notice shall be renewed, if necessary, until the 9th of April.

2nd. Printed copies of the notice shall likewise be affixed in such places as are ordinarily used for affixing notices of parochial meetings.

Town Council of borough, on or before this date, to transmit to Secretary of State a statement of receipts and expenditure up to last audit.

Two Auditors and two Revising Assessors are to be chosen for each Municipal Corporation.

On this day Mayors of boroughs to name some one member of the Council to whom, jointly with the Auditors, the Treasurer of the borough is to submit his accounts in this month and in September; and the Treasurer is to submit his accounts, made up from the 1st of September to the 1st of this month, to such member and Auditors to be examined and audited.

5 Last day for sending to Chairman of Local

Board a list of owners and proxies claiming to vote at Local Board elections.

14 Between this date and the 1st August any person exposing or offering for sale, or having in his control or possession, any wild bird killed or taken in the United Kingdom since the 1st of this month, is liable to penalty under the Wild Birds Protection Act, 1880 (43 & 44 Vict. c. 35).

15 Last day for publication by Clerks to Guardians of notice of election of Guardians, and first day for sending in nomination papers.

16 Not later than this day the Chairman of Local Board shall close the revision of register of owners and proxies: the revised register to continue in force for the next twelve months.

20 Within fourteen days from this date a special sessions to be held for appointment of the days for the holding of not less than eight nor more than twelve special sessions for executing the purposes of the Act relating to Highways (5 & 6 Will. IV. c. 50).

Railway Companies to pay quarterly instalments of Income Tax on or before this day.

24 Last day for inspection of lists of persons qualified to serve as Parish Constables. Overseers to send such lists to the Justices, who are to hold special sessions for the appointment before the 9th of April.

25 Quarter Day. Union accounts to be made up to the end of the week nearest to this date. Returns made to Local Government Board under Local Taxation Returns Act, 1877, by Corporations, Local Boards, Burial Boards, and other local authorities to be made up to this date.

Highway accounts, made up to this date, to be submitted to Highway Boards at their first meeting. Surveyors of Highways and Waywardens to be elected.

Half-yearly accounts of School Boards to be made up to this date.

On this date, or within fourteen days next after, Overseers of the Poor to be nominated and appointed by Justices.

Churchwardens and Overseers shall, within fourteen days after other Overseers have been appointed to succeed them, deliver to such succeeding Overseers a just, true, and perfect account in writing of all sums of money in their hands, as required by 17 Geo. II. c. 38, s. 1.

Medical Officer of Unions entitled to be paid any extra fees, to make out his quarterly account to this day, and lay the same before the Guardians: his claim shall be deemed to accrue at the expiration of one calendar month following this day, but the Guardians may pay it earlier.

Overseers, on or before this day, to distinguish in the Rate-Book the names of all rate-payers who have been rated to the Poor-rate for the whole year, and have paid the Poor-rates assessed for one whole year, except those rates made or become due within the last six months.

The Overseers, and every Collector appointed for a Parish, to make up their accounts to this day, and deposit them at some house within the parish seven days at least before the audit, for the inspection of the rate-payers.

Certificates of Notaries Public in Ireland expire on this day.

26 District Medical Officers to notify at the commencement of this quarter to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months; advise as to the continuance of such paupers in such list, and take the directions of the Board thereon.

Last day for sending in nomination papers to the Returning Officer of persons nominated to be Guardians.

28 On this date, or as soon after as may be practicable, Returning Officer to make out list of persons nominated as Guardians, and to cause a copy to be suspended in the Board-room of the Guardians, and another to be affixed on the principal external gate or door of the building in which the Board-room is comprised.

Hilary Law Sittings end.

30 Holiday at the Stock Exchange, Custom House, Inland Revenue Offices, and Public Dock Companies.

31 The following licences expire on this day:—To keep a Refreshment House, Hawkers'.

April.

1 In the months of April and May, or one of them, Overseers to ascertain with respect to all property in their parishes, whether any man is entitled to be registered as a voter in respect of a household qualification by reason of his being an inhabitant occupier. The Overseers to enter in the Rate-Book, in a separate column, the name of every man so entitled, and the description of the dwelling-house.

Watch Committee of Town Council to transmit to Secretary of State a copy of all rules and orders made since 31st Dec. for the regulation and guidance of constables or policemen.

Between the 1st of this month and the 30th June, the Medical Officer of each workhouse and district to visit pauper lunatics not in asylums. (See January 1.)

Keepers of Common Lodging Houses to lime-wash the walls and ceilings thereof in the first week of the month.

Treasurer of borough to submit his accounts for audit this month, in accordance with Local Taxation Returns Act, 1877.

2 Bank and General Holiday.

Last day to appoint days for holding special sessions under the Highways Act.

Quarter Sessions to be held this week. (See Jan. 2.)

4 Returns of assessed taxes made to this date.

6 Commencement of the Financial year.

7 Last day for Medical Officers to send quarterly lists of lunatics to Clerk to Guardians.

The Returning Officer in the election of a Local Board is, not later than this day, to cause the voting papers to be collected. Papers not collected may be delivered to him personally before 12 o'clock on the day or first day appointed for the examination and casting up of votes.

Registrars of Births and Deaths to transmit to Overseers, on or before this day, a return of all male persons dying within a parish included in a parliamentary or municipal borough during the three months ending 31st March.

Last day for Justices to nominate Overseers of the Poor.

9 Returning Officer in the election of Guardians to cause one of the voting papers to be delivered to the address of each rate-payer, owner, and proxy qualified to vote. Every person qualified to vote who shall not have received a voting paper shall, on application before twelve o'clock at noon on the 9th of April, to the Returning Officer at the place specified in the notice of election, be entitled to receive a voting paper, to fill it up in the presence of the Returning Officer, and deliver it to him.

On this day at the latest, and on as many

succeeding days as may be necessary, the Returning Officer in the election of a Local Board is to attend at the place appointed and ascertain the validity of the votes. He shall cast up such of the votes as he thinks to be valid, and ascertain the number of such votes for each candidate. He shall then cause a list to be made of the candidates, together with (in the case of a contest) the number of votes given for each and the names of the persons elected, and shall sign and certify the list, and deliver it, together with the nomination and voting papers, to the Local Board at their first meeting, the list during office hours to be open to public inspection, together with all other documents relating to the election, for six months after, without fee or reward.

Fire insurances due Lady Day must be paid.

Last day for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitors.

10 Easter Law Sittings commence.

12 The Returning Officer in the election of Guardians shall cause the voting papers to be collected, subject to provisions in the General Order of the Local Government Board, 14th February, 1877, Arts. 17 and 18.

13 The Returning Officer in the election of Guardians on this day, and on as many days immediately succeeding as may be necessary, shall ascertain the validity and number of votes for each candidate by an examination of such documents and persons as he may see fit. On this day, or as soon after as may be practicable, he shall make a list containing the names of all the persons nominated, and the names of the duly elected Guardians, and in the case of a contest the number of votes given for each, shall sign and certify the same, and shall deliver such list, together with the poll-book and all the nomination and voting papers which he shall have received, to the Board of Guardians at their next meeting, who shall preserve the same for a period of not less than two years. The nomination and voting papers and poll-books shall, during the six calendar months next following such delivery, be open between the hours of 10 and 6 on any day except Sunday, to the inspection of any person who may have nominated, or may have been nominated, at the election, or any person appointed in writing on behalf of either of them.

14 Poor Law Guardians of Unions continue to act as such until this day in each year, notwithstanding their successors may have been elected previously; and from and after this day every guardian newly elected for a Union shall act as such guardian for the ensuing year. At first meeting held after this date the Guardians to appoint the Union Assessment Committee.

The Returning Officer in the election of Local Boards is to make all his arrangements for the conduct of the election, so as to ensure its completion and the ascertainment of the result on or before this day, when the retiring members go out and newly elected members take office.

On this day, or within seven days preceding, Clerks of the Peace and Town Clerks to send their precepts to the Overseers.

Registrars to apply on or before this day for certified copies of all entries of marriages solemnized during the quarter ended 31st March.

20 Last day for Registrars to deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages for previous quarter.

30 Last day for Superintendent Registrars

to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages for quarter ended 31st March.

Waywardens continue in office until this day, when their successors are to come into office. (See sec. 11 of 41 & 42 Vict. c. 77.)

May.

1 Election of Vestrymen and Auditors under the Metropolis Local Management Act to take place during this month.

During this month and next owners may be compelled by the Surveyors of Highways to cut down trees growing in hedges near highways ordered to be widened.

Local Authorities in counties and boroughs to send to Secretary of State copies of orders made under Ballot Act as to polling districts.

Holiday at the Stock Exchange.

7 Bank Holiday in Scotland: see 34 & 35 V. c. 17.

14 Between this day and the 4th of August, a person shall not sell, expose for sale, or buy for sale any description of oysters other than those known as "deep-sea oysters."

15 Licences for Beer Retailers and Retailers of Wine and Spirits in Scotland expire.

18 Within sixty days from this date the half-yearly receipts for interest to savings-banks are to be made out and allowed.

Easter Law Sittings end.

21 Bank and General Holiday.

22 Holiday at Inland Revenue Office, Somerset House.

24 Queen's Birthday.

Holiday at the Custom House, Inland Revenue Offices, and Public Dock Companies.

28 Last day for Friendly Societies to make returns to the Registrar of Friendly Societies of accounts for 1887.

29 Trinity Law Sittings commence.

June.

1 Annual returns of rates, taxes, tolls, and dues levied for local purposes, required by Local Taxation Returns Act, are to be furnished to the Local Government Board in this month.

Where any poor rate due on the 5th of January last, from an occupier in respect of premises capable of conferring the franchise for a borough, remains unpaid on this date, the Overseers whose duty it may be to collect such rate shall, on or before the 20th of this month, unless such rate has previously been paid, give or cause to be given a notice in the form C 1, set forth in Schedule 2 (for Counties), and in the form C 1, set forth in Schedule 3 (for Boroughs) of the Registration Act, 1885, that such occupier will not be entitled to have his name inserted in the List of Voters in respect of premises in his occupation unless he pays, on or before the 20th of July next, all poor rates which have become due from him in respect of such premises up to the 5th of January last.

5 Where an owner of small tenements who has become liable to pay the poor-rates under the Poor-Rate Assessment and Collection Act, 1869, omits or neglects to pay before the 5th day of June in any year any rate, or any instalment thereof, which has become due previously to the preceding 5th of January, and has been duly demanded by a Demand Note delivered to him, or left at his usual or last known place of abode, he shall not be entitled to deduct any allowance to which he would otherwise be entitled under the Act, but shall pay such rate or instalment in full.

15 Sale of oysters prohibited. (See May 14.)

20 Overseers to publish notice in the Form B, set out in Schedules 2 and 3 to the Registration Act, 1885, stating that no person will be entitled to have his name inserted in any list of voters in a county or borough, unless he shall by 20th July next pay all rates and taxes due in respect of the year preceding the 5th January last.

Last day for Overseers to publish notice in Form No. 2 to Schedule 2 to the Registration Act, 1885, requiring County Ownership Voters before the 20th July next to send in claims to vote.

Copies of the ownership portion, and no other, of the Register of Voters in Parliamentary elections for counties to be affixed to church doors by Overseers for two Sundays at least, here to remain not later than the 25th July.

Railway Companies to pay quarterly instalments of Income Tax on or before this day.

24 Quarter Day. Medical Officers of Unions entitled to be paid any extra fees to make out their accounts quarterly to this day, and lay the same before the Guardians. (See March 25.)

25 District Medical Officers at the commencement of this quarter to notify to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months.

Sheriffs of London and Middlesex elected.

July.

1 Overseers to fix a copy of the ownership portion of the register and the lists, notices, and documents to be published (each copy being first signed)—(a) on or near the outside of the outer door, or of the outer wall near the door, of every church and public chapel in their parish or township, including chapels which do not belong to the Established Church; (b) if there is no such church or chapel, then in some public or conspicuous situation in their parish or township; and (c) if their parish or township is wholly or partly situate in an urban sanitary district and not in a Parliamentary borough, then in or near every public or municipal or parochial office, and (having first obtained the authority of the local postmaster, or if he refuses, of the Postmaster-General), in some public and conspicuous position in or near every post office and telegraph office; (d) also in or near every public or municipal or parochial office in their parish or township.

Watch Committee of Town Council to transmit to Secretary of State a copy of all rules and orders made since 31st March for the regulation and guidance of constables or policemen.

On this day at the latest the Board of Trade to lay before Parliament a Report respecting the applications to them, and their proceedings under the Electric Lighting Act, 1882.

Between the 1st of this month and the 30th of September, the Medical Officer of each work-house and district to visit pauper lunatics not in asylums. (See January 1.)

Licences for dealing in Game expire.

Special Sessions for Licences to deal in Game to be held during this month.

The provisions of the Merchant Shipping (Fishing Boats) Act, 1887, come into force.

2 Return of paupers relieved on 1st July to be made to Local Government Board.

Quarter Sessions to be held this week.

5 The following licences expire on this day:—Appraiser, auctioneer, house-agent, beer-dealer,

for sale of table-beer to be drunk off the premises, house agent, for sale of spirits and tobacco on board packet boats, dealer in plate, rectifier and compounder of spirits, dealer in spirits, for use of still or retort, retailer of sweets and made-wines, dealer in sweets or made wines, manufacturer of tobacco and snuff, for dealing in and selling tobacco and snuff, manufacturer of vinegar, dealer in foreign wines.

7 Last day for Medical Officers to send quarterly lists of lunatics to Clerk to Guardians.

9 Last day to pay Fire insurances due on Midsummer Day.

10 Last day for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitors.

14 Registrars to apply on or before this day for certified copies of all entries of marriages solemnized during the quarter ended 30th June.

20 The Clerk of the Peace in every county, riding, or division shall, on or before this day, issue his precept to the Churchwardens and Overseers of the several parishes, and the Overseers of the several townships, requiring them to make out, before the 1st September next, a true list of all men residing within their respective parishes and townships, and qualified and liable to serve on juries, and specify in the list the persons qualified as Special Jurors.

Last day for Registrars to deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages for previous quarter.

Last day for County Voters to send to Overseers their claims to vote.

Last day for Occupiers in counties and Householders in boroughs to pay poor rates due in respect of the year preceding 5th January last, so as to be retained on Register of Voters.

Registrars of Births and Deaths to transmit to Overseers, on or before this day, a return of all male persons dying within a parish included in a parliamentary or municipal borough during the period between 1st April and 15th July.

22 Overseers to make out list of persons disqualified as occupation voters by reason of the non-payment by the 20th of the poor rates due on the preceding 5th January. Such list to be open to public inspection until 5th August.

25 On or before this day Overseers to remove copy of Register of Ownership voters from the places where it has been published.

A person in lodgings on the Register of Voters for parliamentary and municipal elections for boroughs, and desirous of being on the next register in respect of the same lodgings, should, on or before this date, send his claim to be so entered to the Overseers.

Within seven days, Companies, Corporations, and County Justices to deliver half-yearly accounts to the Commissioners of Inland Revenue, with a view to compounding Stamp Duties under Inland Revenue Act, 1887.

31 On or before this day the Overseers are to make out the list of ownership claimants, that is to say, a list in the form No. 3 in the second Schedule to the Registration Act, 1885, of all persons who, on or before 20th July, have sent in claims to be registered as county voters.

On or before this day Overseers are to ascertain from the Relieving Officer acting for their parish or township the names of all persons who are disqualified by reason of having received parochial relief, and the Relieving Officer is bound to produce at such place in the parish or township, and at such times as are required by

the Overseers, the books in his possession containing the names of such persons.

On or before this day Overseers are to add on the margin of one copy of the ownership portion of the Register for their parish or township, and on the margin of the list of ownership claimants, the word "objected" before the name of every person therein whom they have reasonable cause to believe to be not entitled to be registered in the new Register; and the word "dead" before the name of every person therein whom they have reason, from the returns sent by the Registrars of Births and Deaths, or from their own knowledge, to believe to be dead. If it appears that any person is entered in the ownership portion of the Register for the parish or township in respect of a £50 rental qualification, the Overseers are to add the word "objected" before the name of such person, and to insert his name in the occupiers' list.

On or before this day Overseers are to make out the following lists of voters, according to the circumstances of the parish or township:—
 (a) The occupiers' list in counties; that is to say, a list of all persons entitled by reason of the occupation of property situate wholly or partly within their parish or township, to be registered as voters in respect of a £50 rental, a £10 occupation, or a household qualification. (b) The occupiers' list in boroughs; that is to say, a list of all persons entitled to be registered as parliamentary voters in respect of a £10 occupation or a household qualification, or to be enrolled as burgesses of the said municipal borough. (c) The reserved rights list; that is to say, a list of all persons entitled to be registered as parliamentary voters in respect of any right reserved by Section 31 or 33 of the Reform Act, 1832. (d) The old lodgers' list, that is to say, a list of all persons who, being on the Register of Voters previously in force for a parliamentary borough in respect of residence in lodgings, have, on or before 25th July, claimed to have their names inserted in the lists of parliamentary voters in respect of residence in the same lodgings. (e) A list of all persons who are entitled, in respect of the occupation of property, to be elected Councillors or Aldermen of the said municipal borough, but are not entitled to be on the Burgess Roll thereof. (f) The Burgess List; that is, a list of all persons entitled to be enrolled as Burgesses for a municipal borough.

Last day for Superintendent Registrars to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages for quarter ended 30th June.

Pawnbrokers' licences expire to-day; also licence to kill game, and to carry a gun.

August.

1 On or before this day Overseers are to sign one of the copies of the ownership portion of the Register and the list of ownership claimants, and of each of the lists specified under date 31st July, as the case may be, and to cause a sufficient number of copies of such list to be written or printed, and to publish in their parish the said portion of the Register with their marginal additions and the said list signed by them. The Overseers are also to publish at the same time the corrupt and illegal practices list, and keep a copy signed by them of each of such lists, and a copy of the ownership portion of the Register, which during fourteen

days after publication are to be open to public inspection. They are also to keep a copy of the list of defaulters in payment of assessed taxes, sent to them by the Collector of taxes, open to public inspection at any time between 10 a.m. and 4 p.m. on every day, except Sunday, during the next fortnight, without fee, and to deliver copies thereof on payment after the following rate:—

Not exceeding 100 names	os. 6d.
Exceeding 100 and not exceeding 200	1 0
" 200 " " 300	1 6
" 300 " " 400	2 0
" 400.....	2 6

On this day, or on any day until the 20th inclusive, a person desirous of having his name entered in the lodgers' list must send in his claim to the Overseers.

5 Last day for inspection of list of persons who have not paid poor rates due January 5.

6 Bank and General Holiday.

11 Between this day and the 31st registered voters and claimants may inspect rate books, and make extracts therefrom for any purpose relating to any claim or objection.

12 Trinity Law Sittings end.

20 Last day for giving notices to Overseers of objections to persons on the Register.

Last day for persons omitted from list of Occupiers in counties to send in their claims to the Overseers, and last day in boroughs to claim to vote in parliamentary and municipal elections.

25 On or before this date Overseers are to deliver copies of all lists to Clerks of the Peace and Town Clerks.

On or before this day Overseers in counties and boroughs to make out claim lists; that is to say, lists containing the name of every person who has claimed on or before 20th August to have his name inserted in any list of voters for their parish or township, making separate lists of—

COUNTIES: (a) Persons claiming to be registered in the occupiers' list; (b) Persons claiming to be registered as lodgers, but not comprised in the old lodgers' list.

BOROUGHS: (a) Persons claiming to have their names inserted both among the parliamentary voters for a parliamentary borough and the burgesses for a municipal borough; (b) Persons claiming to be inserted in a list of parliamentary voters only, but otherwise than as freemen or lodgers; (c) Persons claiming to be inserted in a list of parliamentary voters as lodgers, but not comprised in the old lodgers' list; (d) Persons claiming to be inserted in the list of burgesses only; (e) Persons claiming to be entitled to be elected Councillors or Aldermen, but not entitled to be on the Burgess roll; (f) Persons claiming to be omitted from the corrupt and illegal practices list.

Overseers to sign and publish the lists of persons claiming to be entitled to vote in Parliamentary elections in counties and boroughs, and of persons whose claims so to vote are objected to. The Overseers to keep a copy of such lists, which, with the original notices of claims and objections, are to be open to public inspection at any time between 10 a.m. and 4 p.m. on every day except Sunday, up to and including the 8th Sept., and copies are to be delivered to any person on payment after the rate referred to under date 1st Aug.

Last day for Town Clerk to make out and publish lists of freemen claiming to vote, and those objected to. Such list to be kept open for perusal till the 8th September.

31 Railway companies to furnish accounts to Board of Trade.

Last day for Overseers to make out list of men qualified and liable to serve on Juries.

September.

1 Licences for the manufacture and sale of playing cards and of patent medicines expire to-day.

Clerks to Boards of Guardians are, four weeks at least before the 29th of September, to estimate the probable expenditure in the relief of the Poor, and other charges by the Guardians on behalf of the Union and estimate the probable balance due to or from each parish at the end of the current half-year; apportion the sums to be contributed by the several parishes comprised in the Union, and prepare the orders on the Overseers or other proper authorities of the several parishes for the payment of such respective contributions, which orders shall be laid before the Guardians for their consideration a reasonable time before the expiration of the current half-year. The Guardians shall make the orders at the commencement of each half-year ending at Lady-day and at Michaelmas.

Last day for Overseers to make out the "Burgess List," and to deliver a copy to the Town Clerk. A true copy is also to be kept by Overseers for perusal by any person without payment of any fee at all reasonable hours for the last seven of the first fifteen days of Sept.

2 List of Jurors to be affixed to doors of churches and other places of public worship on the 2nd, 9th, and 16th of this month.

8 Town Clerk to cause a copy of "Burgess List" to be fixed on or near the outer door of the town hall on every day during the week next preceding the 15th inst.

Last day for inspection of lists of claims and objections and for inspection of the original notices of claims and objections.

10 Last day for transmitting to Town Clerk or to Clerk of the Peace, according to the form prescribed in Schedules 2 & 3 of the Registration Act, 1885, declaration as to misdescription in list of Parliamentary Voters or in Burgess List of name or place of abode of any person entered on the list, or in respect of whom there is any error in or omission from the list. The declaration to be open, free of charge, to public inspection at the office of the Town Clerk, or the Clerk of the Peace as the case may be, between 10 a.m. and 4 p.m. on every day except Sunday before the 15th of September, and the Town Clerk shall deliver copies thereof on payment of fourpence per folio of 72 words.

15 Between this date and last day of October Courts for revision of lists of Voters (boroughs) to be held by Revising Barristers. Clerk of the Peace to attend Revising Barrister's first Court, and Overseers to attend courts for their respective districts and parishes, produce list of voters, and answer questions.

Last day for persons whose names have been omitted from "Burgess List," and for persons objecting to any name in such list, to give notice to the Town Clerk.

Registrars of Births and Deaths to transmit to Overseers, on or before this day, or at such other time as shall be appointed by the Revising Barrister, a return of all male persons dying within a parish included in a parliamentary or municipal borough during the period between the 16th of July and the time when such return is made.

20 Between this date and the last day of

October, Courts for revision of lists of Voters (counties) to be held by Revising Barristers, but by sect. 4 of the Registration Act, 1885, those Courts may be held within the period proscribed for boroughs, and seven days' notice of each Court is sufficient.

Railway Companies to pay quarterly instalments of Income Tax on or before this day.

22 Last day for Town Clerk to make out list of persons claiming to have their names inserted in "Burgess List," and of names objected to. Copies of such lists to be affixed on door of Town Hall until 30th inst.

Within the last seven days of this month the Justices in every division in England and Wales are to hold a special sessions for receiving and examining the jury list, when the Churchwardens and Overseers are required to attend, and the lists, when approved, are to be forwarded by the Justices' Clerk to the Clerk of the Peace.

24 Sheriffs of London and Middlesex to be sworn in.

29 Quarter Day. Union accounts to be made up to end of week nearest this date.

Half-yearly or yearly accounts of School Boards to be made up to this day.

The Lord Mayor of London to be chosen.

30 District Medical Officers to notify, at the commencement of this quarter, to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months.

The following licences expire on this day: Brewer of beer, maker of methylated spirit, retailer of methylated spirit, hawker's half-yearly.

October.

1 On or before this day every body corporate or unincorporate chargeable with the duty of 5 per cent. on the annual value, income, or profits of its real and personal property, shall deliver to the Commissioners of Inland Revenue a full and true account of all property in respect whereof such duty shall be payable, and of the gross annual value, income, or profits thereof accrued in the year ended the preceding 5th of April.

Between the 1st and 15th, the Mayor and Revising Assessors to hold courts to revise Burgess Lists under Municipal Corporations Act, three clear days' notice being given. Revised list to be kept by Town Clerk; persons therein entered to be entitled to vote from 1st November.

Watch Committee of Town Council to transmit to Secretary of State a copy of all rules and orders made since 30th June for the regulation and guidance of constables and policemen.

Between the 1st of this month and the 31st December, the Medical Officer of each workhouse and district to visit pauper lunatics not in asylums. (See January 1.)

The Justices of every county, and the Watch Committee of every borough, on some day in this month, are to transmit to the Secretary of State, for the year ended 29th September last, a statement of the number of offences reported to the police within such county or borough, the number of persons apprehended by the police, the nature of the charges against them, the result of the proceedings taken thereupon, and any other particulars relating to the state of crime within such county or borough.

Assessment Sessions Valuation (Metropolis) Act, 1869.—For the purpose of hearing appeals under this Act against any valuation list in the metropolis, the Justices of the Peace shall, at the

time specified in this Act, assemble and hold a Court of General Assessment Sessions. The Justices who are to form the Court of General Assessment Sessions shall be appointed annually as follows:—Three Justices of the Peace of the County of Middlesex (of whom the Assistant Judge of the Court of the Sessions of the Peace of the said county shall be one) shall be appointed by the Court of General Quarter Sessions, or General Sessions of the Peace for the County of Middlesex. Two Justices of the Peace of the County of Surrey shall be appointed by the Court of General or Quarter Sessions of the Peace for the County of Surrey. Two Justices of the Peace of the County of Kent shall be appointed by the Court of General Sessions for the County of Kent. Two Justices of the Peace of the City of London shall be appointed by the Court of the Mayor and Aldermen of the City of London in the Inner Chamber. The said Justices shall be appointed in October in every year, or at such other time as may be from time to time fixed by the appointing body. They shall hold office for twelve months beginning on the 1st of November, and any casual vacancy may be filled up by the appointing body.

Keepers of Common Lodging Houses to lime-wash the walls and ceilings thereof in the first week of this month.

6 Last day for Medical Officers to send quarterly list of lunatics to the Clerks to Guardians.

10 The following licences expire on this day:—Banker's, beer retailer, cider, distiller of spirits, retailer of spirits in England and Ireland, retailer of sweets and made-wines (being a publican), for dealing in and selling tobacco and snuff (being a publican), retailer of foreign wine.

Last day for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitors.

13 Fire insurances due at Michaelmas must be paid.

15 Registrars to apply, on or before this day, for certified copies of all entries of marriages solemnized during the quarter ended 30th Sept.

Quarter Sessions to be held this week.

20 Last day for Registrars to deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages for previous quarter.

On or before this day, Town Clerk to cause "Burgess Lists" to be completed and copied into one alphabetical list.

22 Last day for Town Clerks to publish a notice of election of Councillors and to receive nominations.

24 Michaelmas Law Sittings commence.

31 Last day for Superintendent Registrars to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages for quarter ended 30th September.

Certificates of writers to the signet, solicitors, agents, and notaries public in Scotland, and of conveyancers, special pleaders, and draughtsmen in equity in England expire on this day.

Short licences to kill game expire.

November.

1 Burgesses are to elect persons qualified to be Councillors to supply places of those going out of office. Upon this day one-third of the whole number of Councillors to go out; such proportion to consist of those longest in office without re-election. Nominations must be sent in seven days at least before the day of election. The burgess-roll, made up from revised lists

of burgesses for any municipal borough, shall come into operation on this day, and shall continue in operation up to 31st October, 1889.

Holiday at Bank Transfer Office and Stock Exchange.

9 On this day, at noon, the Council of every borough is to hold a quarterly meeting; the first business being to elect a Mayor of such borough, who shall continue in office for one whole year.

Holiday at the Custom House, Inland Revenue Offices, and Public Dock Companies.

12 Sheriffs nominated in the Queen's Bench Division for appointment at end of January, 1889.

14 Certificates of notaries public in England expire on this day.

17 Between this date and December 15th, solicitors, proctors, and notaries public in England must renew their certificates.

20 Within sixty days half-yearly receipts for interest to savings banks to be made out and issued. Within nine weeks savings banks are to publish annual statement of accounts.

30 Last day for depositing plans and books of reference in the Private Bill Office of the House of Commons and with Clerks of the Peace.

Last day to renew certificates. (See Oct. 31.)

December.

1 Time expires for lodging declaration with Registrar of Solicitors for certificates.

Clerks of Union Assessment Committees to send in this month the totals of the gross estimated value of the property in the valuation lists of the several parishes to the Clerk or respective Clerks of the Peace of the county or counties within which such parishes may be situate.

15 Latest day for delivering notices, &c., to owners and occupiers affected by private bills.

19 Railway Companies to pay quarterly instalments of Income Tax on or before this day.

21 Election of Common Councilmen in the City of London.

Michaelmas Law Sittings end.

22 Latest day for leaving petitions, declarations, &c., at Private Bill Office.

25 Quarter Day.

26 Bank and General Holiday.

District Medical Officers to notify to the Board of Guardians at the commencement of this quarter the paupers whose names have been inserted in the permanent medical relief lists for a period of six months.

Medical officers of Unions entitled to be paid any extra fees, to make out their accounts quarterly to this day, and lay the same before the Guardians.

31 Clerk of the Peace to deliver, on or before this day, County lists of voters to the Sheriff of the county, and Town Clerk to deliver Borough lists to the Returning Officer of the borough.

Railway Companies to prepare an annual abstract of receipts and expenditure for year to 31st December, or some other convenient day in each year, and, if required, transmit a copy thereof, free of charge, to Overseers of parishes through which the railway runs.

Assessment Clerks to make out valuation returns. The powers of the Commissioners under the Local Government (Boundaries) Act, 1887, expire.

Latest day for leaving estimates, lists of occupiers, &c., at Private Bill Office.

The following licences expire on this day:—Male servants, carriages, dogs, and to use armorial bearings.

Specially prepared Roan Leather Covers, with gilt title, can be had for the Royal Atlas, 12s. 6d. each. "Since this fine Atlas was issued, sixteen years ago, it has had no rival in England, and certainly no superior. It was then and is still a credit to British cartography."—The Times.

W. & A. K. JOHNSTON

(Established 1825).

Geographers to the Queen, Educational and General Publishers,

EDINA WORKS, EASTER ROAD, EDINBURGH; AND

5, WHITE HART STREET, WARWICK LANE, LONDON, E.C.

"A work absolutely indispensable to every well-furnished library."—THE TIMES.

Price 12s. 6d. each in cloth; or in half-morocco, marbled edges, price 18s.

Volumes I. to XII. (ABBADIE—CRAIGIE), royal 8vo, of the

DICTIONARY OF NATIONAL BIOGRAPHY. Edited

by LESLIE STEPHEN.

VOL. XIII. will be issued on Jan. 2, 1888, and further Vols. at intervals of Three Months.

Intending Subscribers can enter their names with any Bookseller.

NOTICE.—After December 31, 1887, the price of each Volume of *THE DICTIONARY OF NATIONAL BIOGRAPHY*, will be raised from 12s. 6d. to 15s. in cloth, and from 18s. to 20s. in half-morocco. This alteration in price is made necessary by the great excess of the cost of production above the original estimate. The error in the calculation may perhaps be considered pardonable by those who have examined the work with sufficient care to appreciate the labour involved in its accuracy and completeness.

London: SMITH, ELDER & CO., 15, Waterloo Place.

W. M. THACKERAY'S WORKS.

THE EDITION DE LUXE. Twenty-six Volumes, imperial 8vo. Containing 248 Steel Engravings, 1,620 Wood Engravings, and 88 Coloured Illustrations. The Steel and Wood Engravings are all printed on real China paper. The number of copies printed is limited to One Thousand, each copy being numbered. The Work can only be obtained through Booksellers, who will furnish information regarding terms, &c.

NEW "STANDARD" EDITION. In Twenty-six Volumes, large 8vo, 10s. 6d. each. This Edition contains some of Mr. Thackeray's writings not before collected, with many additional Illustrations. It has been printed from new type, on fine paper; and, with the exception of the Edition de Luxe, it is the largest and handsomest edition that has been published.

THE LIBRARY EDITION. With Illustrations by the Author, RICHARD DOYLE, and FREDERICK WALKER. Twenty-four Volumes, large crown 8vo, handsomely bound in cloth, price 99; or half-russia, marbled edges, £13 13s.

* * * *The Volumes are sold separately, in cloth, price 7s. 6d. each.*

THE POPULAR EDITION. Thirteen Volumes, crown 8vo, with Frontispiece to each volume, scarlet cloth, gilt top, price £3 5s.; and in half-morocco, gilt, price £5 10s.

* * * *The Volumes are sold separately, in green cloth, price 5s. each.*

CHEAPER ILLUSTRATED EDITION. In Twenty-six Volumes, crown 8vo, price 3s. 6d. each. In Sets of Twenty-six Volumes, uniformly bound in cloth, price £4 11s.; or handsomely bound in half-morocco, price £8 8s. Containing nearly all the small Woodcut Illustrations of the former Editions, and many New Illustrations by Eminent Artists.

THE POCKET EDITION. In process of issue in monthly volumes. Price 1s. 6d. per volume in half-cloth, cut or uncut edges; or, 1s. in paper covers.

* * * *A List of the Volumes already published will be sent on application.*

London: SMITH, ELDER & CO., 15, Waterloo Place.

"The 'Cornhill' is the most interesting of English magazines."—*Vanity Fair*.

"The magazine reader will find no better investment for his sixpence."—*Pall Mall Gazette*.

"The 'Cornhill' still holds its place as the best of the sixpenny monthlies, and deservedly so."—*Scottish Review*.

THE CORNHILL MAGAZINE. Edited by JAMES PAYN. Contains each month, in addition to an instalment of a Serial Story by a Popular Author, **SHORT STORIES AND ARTICLES** by the best writers. Price 6d. Monthly.

London: SMITH, ELDER & CO., 15, Waterloo Place.

And all Booksellers.

* * * *Messrs. SMITH, ELDER & CO. will be happy to forward, post free on application, a Catalogue of their Publications, containing Lists of Works by W. M. THACKERAY, ROBERT BROWNING, MRS. BROWNING, JOHN ADDINGTON SYMONDS, MATTHEW ARNOLD, AUGUSTUS J. C. HARE, LESLIE STEPHEN, MISS THACKERAY, Sir A. HELPS, G. H. LEWES, Mrs. GASKELL, the BRONTE Sisters, and other Eminent Writers and Leaders of Thought.*

London: SMITH, ELDER & CO., 15, Waterloo Place.

SEVEN HUNDRED VOLUMES.

BOHN'S LIBRARIES.

CONTAINING

STANDARD WORKS OF EUROPEAN LITERATURE
IN THE ENGLISH LANGUAGE.

3s. 6d. or 5s. per Volume (with exceptions).

"I may say in regard to all manner of books, Bohn's Publication Series is the usefulest thing I know."—THOMAS CARLYLE.

"The respectable and sometimes excellent translations of Bohn's Library have done for literature what railroads have done for internal intercourse."—R. W. EMERSON.

"An important body of cheap literature, for which every living worker in this country who draws strength from the past has reason to be grateful."—PROFESSOR HENRY MORLEY.

"Bohn's invaluable Series."—The Rev. J. M. WILSON, H. M. of Clifton College, in "Essays and Addresses."

The attention of those forming Libraries is directed to the following selected List of Standard Works :

- | | |
|---|--|
| Adam Smith's Wealth of Nations. Two Vols., each 3s. 6d. | Irving's Works. Seventeen Vols., each 3s. 6d. |
| Addison's Works. Six Vols., each 3s. 6d. | Jameson's Shakespeare's Heroines. 3s. 6d. |
| Antoinus, The Thoughts of M. Aurelius. (LONG'S Translation.) 3s. 6d. | Kant's Critique of Pure Reason. 5s. |

STANDARD ENGLISH DICTIONARIES.

THE IMPERIAL DICTIONARY OF THE ENGLISH

LANGUAGE. A Complete Encyclopædic Lexicon: Literary, Etymological, Scientific, Technological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 3,000 Engravings on Wood. In Four Volumes, imperial 8vo, cloth, £5; or half-morocco, £6 6s.

"It will be for many years the most serviceable and most highly valued of English Dictionaries."
—*Saturday Review*.

A CONCISE ENGLISH DICTIONARY: Literary, Scientific, Etymological and Pronouncing. Based on the New Edition of OGILVIE'S Imperial Dictionary. By CHARLES ANNANDALE, M.A., LL.D. Fcap. 4to, cloth, 10s. 6d.; half-morocco, 15s.

"The 'Concise Dictionary' stands first—and by a long interval—among all the one-volume English Dictionaries hitherto published."—*Academy*.

THE COMPREHENSIVE ENGLISH DICTIONARY:

Explanatory, Pronouncing and Etymological. Containing all English Words in present use, numerous Phrases, many Foreign Words used by English Writers, and the more important Technical and Scientific Terms. By JOHN OGILVIE, LL.D. Illustrated by above Eight Hundred Engravings on Wood. Super-royal 8vo, cloth, 25s.; half-morocco, 32s.

THE STUDENT'S ENGLISH DICTIONARY:

Etymological, Pronouncing and Explanatory, in which the Words are traced to their ultimate Sources, the Root or Primary Meaning inserted, and the other Meanings given fully, according to the best usage. By JOHN OGILVIE, LL.D. Illustrated by about Three Hundred Engravings on Wood. Imperial 16mo, Roxburgh, 7s. 6d.; half-calf, 10s. 6d.

A SMALLER ENGLISH DICTIONARY:

Etymological, Pronouncing and Explanatory. Comprising all purely English Words in common use; also Lists of Affixes and Prefixes, Abbreviations, and Latin, French and Italian Phrases. By JOHN OGILVIE, LL.D. Imperial 16mo, cloth, red edges, 2s. 6d.; Roxburgh, 3s. 6d.

London: BLACKIE & SON, 49 and 50, Old Bailey.

The Revised Version is the Joint Property of the Universities of Oxford and Cambridge.

The ARCHBISHOP OF YORK says of the

OXFORD BIBLE FOR TEACHERS:

"The notion of including in one volume all the helps that a clergyman or teacher would be likely to want for the study of the Bible has never been realised before with the same success."

IS now issued in Twelve Sizes, with the Text arranged in each so as to correspond page for page with all the others.

Seven Sizes are printed on best Rag-made Printing Paper, and vary in price from 3s. to 45s.

Five Sizes are printed on thin opaque India Paper and are extremely light and thin. They vary in weight from 12½ ozs. to 22 ozs., and in price from 7s. to 45s., not exceeding an inch in thickness.

THE OXFORD BIBLE FOR TEACHERS.

It contains supplementary HELPS TO THE STUDY OF THE BIBLE, which have been carefully Revised and Enlarged from time to time by Dr. STUBBS, Bishop of Chester; Dr. EDWIN PALMER, Archdeacon of Oxford; Dr. ANGUS, and other eminent scholars. The scientific information was prepared under the supervision of Profs. ROLLESTON, WESTWOOD, LAWSON and EARLE—names of the highest authority in their several departments.

The BISHOP OF RIPON says of the

OXFORD BIBLE FOR TEACHERS:

"The OXFORD BIBLE FOR TEACHERS will be of invaluable service to teachers and Bible students."

THE SALE ALREADY EXCEEDS NINE HUNDRED THOUSAND COPIES.

SPECIAL ATTENTION IS CALLED TO THE

CLARENDON PRESS SERIES

of Standard Educational Works in CLASSICS, ENGLISH, MODERN LANGUAGES, MATHEMATICS, SCIENCE, LAW, HISTORY, PHILOSOPHY, &c.

6s. per annum, post free.

The Homœopathic World:

A Journal of Medical, Social, and Sanitary Science. Edited by JOHN H. CLARKE, M.D., Ext. Mem. Roy. Med. Soc. Edin.

GEORGE PHILIP & SON,

Geographical and Educational Publishers.

LIBRARY, COMMERCIAL, FAMILY AND TRAVELLING ATLASES.

THE BEST LIBRARY ATLAS.

Philips' Imperial Library Atlas. Fifty-one Maps (size 22 by 27 inches), with complete consulting Index of nearly 150,000 Names. Imperial folio, half-bound Russia, gilt, £5 5s.; Imperial folio, full-bound morocco, gilt extra, £6 6s.

"The size of the maps exceeds that of any work of similar pretensions hitherto published in this country. Every effort seems to have been made to render it solid and complete."—*Times*.

THE BEST FAMILY ATLASSES.

1. **Philips' Family Atlas of Physical, General and Classical Geography.** Sixty-two Maps (size 13 by 11 inches), accompanied by Introductory Letterpress and a copious Consulting Index. Imperial 4to, handsomely bound in cloth, gilt edges, price £1 1s.

2. **Philips' Popular Atlas.** Thirty-seven Maps (size 18 by 13½ inches), with a complete Consulting Index. New Edition, thoroughly revised. Crown folio, strongly half-bound, gilt edges, price £1 1s.; Superior Edition, with additional Maps, half-bound morocco, price £1 11s. 6d.

THE BEST CLASSICAL ATLAS.

Philips' Classical, Historical and Scriptural Atlas. Fifty-one Maps (Size 22 by 27 inches). Illustrating the Ancient Classics, Historians and Poets. Imperial folio, half-bound morocco, gilt edges, price £2 2s.

Forms a complete vade mecum to the Classical Student, and an interesting book of reference to the lover of General Literature.

Just published, Four Vols., crown 8vo, cloth, price 24s., or each Vol. separately, price 6s.

Manuals of Commerce. Technical, Industrial and Commercial. Illustrated with Maps, Statistical Charts and Tables, by JOHN YEATS, LL.D., F.G.S., F.S.S., &c.

Vol. I. **The Natural History of the Raw Materials of Commerce.** Illustrated by Synoptical Tables and a Folio Chart, a copious List of Commercial Products and their Synonyms in the Principal European and Oriental Languages; Glossary, Index and large Map.

Vol. II. **The Technical History of Commerce;** or, The Progress of the Useful Arts. With Industrial Map and Tables of Alloys.

Vol. III. **The Growth and Vicissitudes of Commerce.** With Statistical Supplements, Maps and Chart of Produce.

Vol. IV. **Recent and Existing Commerce.** With Statistical Supplement, Maps showing Trade-Areas, Tabulated List of Places important in Business or Trade.

"A valuable and important contribution to Commercial Science."—*Economist*.

THE BEST COMMERCIAL ATLAS.

Philips' Handy General Atlas. Fifty-five Maps (size 18 by 13½ inches), with a Consulting Index of 40,000 Names. New and Enlarged Edition. Crown folio, half-bound morocco, gilt edges, price £2 2s.; or full-bound morocco, gilt extra, £3.

"Clear and easy of reference. Selections of names most judicious."—*Athenæum*.

THE BEST DESK & TRAVELLING ATLASSES

Philips' Handy-Volume Atlases. Exact size of each Volume, 5½ by 3½ inches. Handsomely bound in cloth, rounded corners, price 3s. 6d. each, or in French morocco, gilt edges, packed in neat case, price 5s. each.

List of those already published.

1. **The World.** A Series of Sixty-four Plates (size 5½ by 7 inches), containing 120 Maps and Plans, embodying the most recent Geographical Information, accompanied by a complete Consulting Index of 12,000 Names, with Geographical and Statistical Notes to each Map.

"For travellers nothing could be more compact and useful. The Statistical Information is both useful and varied. The Maps are marvels of clearness and simplicity."—*Saturday Review*.

2. **The British Empire.** A Series of Sixty-four Plates (size 5½ by 7 inches), containing 120 Maps and Plans of the United Kingdom and British Colonies and Dependencies throughout the World. Accompanied by a complete Consulting Index of 10,000 Names, with Geographical, Statistical and Historical Notes to each Map.

"A delightful little volume, of which everyone should possess himself."—*Pall Mall Gazette*.

NEW AIDS to the STUDY of the STARS.

Philips' Revolving Planispheres.

1. **Edition for the Latitude of the British Isles** Price 2s. nett.

2. **Edition for Latitude 35° South of the Equator.** For use in nearly all the English-Speaking Countries in the Southern Hemisphere. Price 2s. 6d. nett.

These novel Planispheres consist of a circular disc, on which the principal Stars visible from our latitude are clearly indicated. By means of an exceedingly simple arrangement the disc may be made to revolve in such a way as to show only those stars visible at any given time. In addition to this may be shown the varying time of sunrise and sunset during the whole year.

The stars are clearly shown in white on a dark ground.

"The very thing to lie on the astronomer's library table."—*Knowledge*.

"Quite a stock of Uranographical information is concentrated in this ingenious appliance."—*Nature*.

London: GEORGE PHILIP & SON, 32, Fleet Street.

Liverpool: Caxton Buildings & 45-51 South Castle Street.

A MOST APPROPRIATE GIFT BOOK.

THE DAILY ROUND.

Meditation, Prayer, and Praise.

ADAPTED TO THE COURSE OF THE CHRISTIAN YEAR.

POCKET EDITION, super-royal 32mo, cloth, red edges, 3s.; Persian roan, gilt edges, 4s. 6d.; morocco, 6s. | LARGER EDITION, foolscap 8vo, cloth, red edges, 4s. 6d.; Persian roan, gilt edges, 6s.; morocco, 9s.

THERE ARE ALTOGETHER TEN DIFFERENT EDITIONS.

"The Daily Round" contains a passage of Scripture adapted to the Season, a suggestive Comment, a Meditation, a Devotion, and a Verse for Every Day in the Year. It is the only work of the kind which so completely and successfully carries out the teaching of the Church of England. Warm, devout, yet sober, calm, and uncontroversial.

"Nearly every bishop of all schools of the Church of England has expressed approval of 'The Daily Round.' To each day of the Church's year is devoted a single page, not of a sermon, nor of prayer, but of meditation, and each page has five parts—some words of Scripture, a statement of what those words mean, some thoughts and reflections on practical points, three or four lines of a short and well-conceived collect, and a verse of a hymn. Even a slow reader need not devote more than five minutes per diem to each page, and we shall not be surprised to find 'The Daily Round' growing into a companion to the Prayer Book, as dearly loved in our times as 'The Whole Duty of Man' was esteemed in the days of our great-grandfathers."—*Examiner.*

DAILY LIFE: Its Trials, Duties, and Difficulties. Short Practical Essays. By the Author of "The Daily Round." Fcap. 8vo, cloth, 4s. 6d. Roan, gilt edges, 6s.; Morocco, 9s.

DEVOTIONAL READINGS for FAMILY PRAYER. Adapted to the Course of the Christian Year. With a Form of Responsive Devotions for the Household for Every Day in the Week. Vol. I. MORNING. Vol. II. EVENING. Two Volumes, imperial 32mo, cloth, 6s.; Turkey roan, gilt edges, 9s.

THE UNCANONICAL AND APOCRYPHAL SCRIPTURES: Being the Additions to the Old Testament Canon which were included in the Ancient Greek and Latin, with Additional Matter found in the Vulgate and other Ancient Versions, Introductions to the several Books and Fragments, Marginal Notes and References, and a general Introduction. By the Rev. W. R. CHURTON, B.D., Canon of St. Albans, and Examining Chaplain to the Bishop. Large post 8vo, pp. 608, cloth, 7s. 6d.

THE GOSPEL STORY: A Plain Commentary on the Four Holy Gospels, containing the Narrative of our Blessed Lord's Life and Ministry, in Simple Language. By the Rev. W. MICHELL, M.A. Two Vols., fcap. 8vo, 6s.

"An admirable work for the Nursery, or for reading at Family Prayer."

THE HOLY COMMUNION: Its Nature and Benefits. With a Notice of some common Objections to receiving it, and an Explanation of what is required of them who come to the Lord's Supper. In Plain Language. By the Rev. W. H. RIDLEY. Cloth, 7d.; or fine paper, 1s.; neatly bound, 2s.

THE NARROW WAY: A Complete Manual of Devotion for the Young. With a Guide to Confirmation and Communion. *Two Hundred and Forty-fifth Thousand.* Cloth, price Sixpence; or Large Type, price One Shilling; neatly bound, gilt edges, Two Shillings.

London: J. WHITAKER & SONS, and all Booksellers.

[252

CHAMBERS'S ENCYCLOPÆDIA.

New Edition. On March 1, 1888, will be published, Vol. I., 10s., cloth; 15s., half-mor.

To be Completed in Ten Volumes.

The Work will also be issued in Monthly Parts, price 1s., to be completed in 74 Parts (exclusive of Maps). Part 1 will appear on March 1, 1888.

A large proportion of the articles have been entirely re-written, to adapt them more perfectly to the present position of the science or branch of knowledge to which they belong. The others have been carefully revised, and in many cases re-written to so large an extent as to be virtually new articles.

By the exercise of a rigid economy of space, which will be continued throughout, room has been found in the first volume for several hundreds of articles not contained in the corresponding volume of the old edition. These articles comprise Biography, Geography, History, Science, and all departments of knowledge.

Special regard has been given to American and Colonial subjects. The more important articles on matters connected with America have been written in the United States by American authors expressly for this edition.

W. & R. CHAMBERS, 47, Paternoster Row, London, E.C.; and 330, High Street, Edinburgh. [197

The Times says:

“‘Haydn’s Dictionary of Dates’ is the most Universal Book of Reference in a moderate compass that we know of in the English Language.”

Now ready, in One Vol., 18s.; half calf, 24s.; full or tree-calf, 31s. 6d.

THE EIGHTEENTH EDITION OF

HAYDN’S DICTIONARY OF DATES

ENLARGED, CORRECTED AND REVISED THROUGHOUT,

By BENJAMIN VINCENT, Librarian of the Royal Institution of Great Britain.

Containing the HISTORY OF THE WORLD TO THE PRESENT TIME, comprised in 1,000 Pages—12,000 Distinct Articles—120,000 Dates & Facts.

The Eighteenth Edition contains 55 more pages than the last, and 103 more than that published in 1873.

Prospectus and Specimen Page post free on application to

WARD, LOCK & CO., Salisbury Square, London, E.C.

[308

BURMESE IVORY.

AN IDEAL NOTE PAPER.

Sold in Imitation Ebony and Ivory inlaid Cabinets, containing Note Paper, Envelopes, and Correspondence Cards.

The Public Press is unanimous in its praise of this most beautiful material, which is “An Imitation of real ivory in colour and grain, and suits all tastes” (*Morning Post*). “It is quietly refined” (*Court Journal*), and “Really tempts one to go on writing” (*Court Society*), for on it “it would be impossible to write other than a nice letter, the most inferior handwriting being idealised” (*Lady*). It is the greatest success of the year, and is sold all over the world.

May be had at all Stationers’, or post free for 2s. 6d., direct from the Manufacturer,

J. HODGSON, 17, LITTLE TRINITY LANE, E.C.

[302

MIDLAND GRAND

LONDON.
WILLIAM TOWLE, Manager.

The **MIDLAND GRAND** is designed and arranged to meet the requirements of those who desire either the most sumptuous Apartments or a modest Bachelor's Bedroom; and the Cuisine and Wine List will be found to embrace the elegance of the French Cuisine and the choicest Vintages, and the simplest meals with the wine of the Gironde or the Rhone at one shilling the half-bottle.

The **MIDLAND GRAND** is exceptionally healthy, being situate in the most healthy part of London, away from the river fogs, and having a large free area all round it.

The **MIDLAND GRAND**, designed by the late Sir GILBERT SCOTT, has splendid Public Rooms, wide Corridors, every improvement, luxury and Home Comfort.

The **MIDLAND GRAND** forms the Terminus of the Midland Railway, whence Express Trains depart for Scotland, Manchester, Liverpool and all principal Manufacturing Towns.

The **MIDLAND GRAND charges for Attendance and Gas have been abolished.** One Hundred Rooms at 3s. 6d. and 4s. per day, inclusive. Board, Apartments, &c., 10s. 6d. per day for the Winter.

The **MIDLAND GRAND** has Passenger Elevators, Electric Light, Telegraph, Telephone to Theatres and business centres. Special service; comfortable Broughams, at very low fares. Table d'Hôte open to non-residents.

The Midland Omnibuses will meet Families coming to the Midland Grand Hotel. *Within Shilling Cab-fare of important business and West End centres and nearly all theatres. Close to Euston and King's Cross.*

The **QUEEN'S HOTEL, LEEDS,** and the **MIDLAND HOTEL, DERBY,** are under the same Management.

THE SCHOOL OF ELECTRICAL ENGINEERING AND SUBMARINE TELEGRAPHY,

(ESTABLISHED IN 1868)

12, Princes Street, Hanover Square, LONDON, W.

Manager—WM. LANT CARPENTER, B.A., B.Sc., F.C.S.
Secretary—LÉON DRUGMAN, A.S.T.E.

This Establishment is now the largest and most fully equipped School of its kind in the World, and it is devoted exclusively to the Training of Electrical Engineers. Many of its former pupils are now filling highly responsible positions. Since the opening of the School in 1868 upwards of 3,300 Pupils have passed through the Course.

NATURE OF THE TRAINING AND STUDIES.

The Practical portion of the Course comprises tuition and daily practice in the various systems of Electric Lighting, including the management of Steam and Gas Engines, Dynamo Machines, Arc and Incandescence Lamps, Accumulators, &c.; in the use of Electric Motors; in Submarine and other Branches of Telegraphy; and lastly, in the various applications of the Telephone. The theoretical portion is embodied in Lectures, which are delivered to the various classes through which the students successively pass by the Manager and by competent instructors. Certificates of competency are granted after Examination.

ELECTRIC LIGHTING, TELEPHONE and SUBMARINE TELEGRAPH COMPANIES, ENGINEERS and others, supplied with Efficient Officers.

TESTS MADE AND REPORTS FURNISHED.

The School is open daily, except Saturday, from 10 to 5. The minimum period necessary for a complete course of instruction is Twelve Months. New courses commence early in January, May and September, but pupils can enter at any time.

Copies of Testimonials from some of the most Eminent Scientific and Practical Electricians of the day, as well as a full Prospectus, Terms, &c., may be obtained by either personal or written application to the SECRETARY, SCHOOL OF ELECTRICAL ENGINEERING, 12, PRINCES STREET, HANOVER SQUARE, LONDON, W.

"Swansea; you may depend upon it, is destined to become the Ocean Port of England."—Sir H. MUSSEY VIVIAN, Bart., M.P.

SWANSEA HARBOUR TRUST.

Swansea Harbour is the only Free Port for ships seeking Cargoes and where they may lay in the Docks in safety for seven clear days without performing any operation. It is the most Westerly Port, the first in the Bristol Channel, advantageously and pleasantly placed upon an angle of two hills on the margin of a beautiful bay off the Atlantic.

The Harbour is controlled by a Trust, who see that the rates are at all times charged equally to all persons in respect of the same description of vessels and the same description of goods.

Regarding the Dock Charges, depth of water, and volume of Trade, there is a good deal of misrepresentation abroad—*e.g.*, the shipping charges range from nothing to 4½d. on the American Trade up to a maximum of 9d. per ton, and not from 4d. to 1s. 3d. as published in books of reference and various papers issued by rivals.

The Prince of Wales' Docks, very graciously inaugurated by T.R.H. the Prince and Princess of Wales, possess the longest and deepest Sea-Lock in the Bristol Channel, lighted by Electricity and accessible at all tides. Vessels do not have to wait turn, or Captains seek permission ashore to enter, but do so straight from sea every tide.

The difference in the cost of handling freight at Swansea, as compared with the premier Ports of London or Liverpool, represents an appreciable sum which may be saved at Swansea upon every ton of freight earned, sometimes pence and often shillings. Vessels bound foreign calling at Swansea for part Cargo or Coal pay upon the tons weight shipped and discharged, as most favourable to the ship, or, if for passengers only, with their ordinary luggage, they are free.

The Mumbles Lighthouse, first lighted in 1794, belongs to the Trust, and is maintained without any extra cost to shipping as a Ship Signal Station; it is connected with the Post Office System of Telegraphs by day and by night, which gives Shipowners the command of all the South Wales Ports; vessels calling for orders can communicate with their owners without lowering a boat; good and sheltered anchorage being found under the Mumbles Head at any state of the tide, free of all tolls, dues, pilotage, and other such charges.

The Registered Telegraphic Address in the General Post Office Place Book is "Swansea Bay Signal Station."

The quantity of Copper smelted at the local Works turned out in a year is about 21,000 tons, of the value of £1,500,000; one year's value of the Gold, Silver, Yellow Metal, and Lead is authoritatively given as £250,000. The Landore Siemens Steel Co.'s Works on the banks of the River employ 1,300 men. The Spelter, or Zinc, manufactured in Swansea, forms 19-20ths of the whole production of the Kingdom, of the total annual value of £350,000. The Tin and Terne plates made at Swansea are reckoned at five million boxes a year, valued at £2,500,000 sterling. Tersely put, there are over One Hundred Works of 36 varieties within a radius of four miles of Swansea Harbour.

The Imports and Exports of Swansea Harbour in tons dead weight carried over Sea may be classified as under. The Railway traffic upon the three great systems (the Great Western, L. & N. W. and Midland Railways) being probably four times more :

	1886.
	TONS WEIGHT.
Coal and Patent Fuel	1,523,937
Metals and other Ores	185,671
Iron, Steel, &c.	409,691
Timber, &c.	73,190
Materials Chemical Trade	60,339
Agricultural Produce	51,279
Vegetables, &c.	6,190
General Merchandise	96,000
	2,406,297

The net Tonnage of Shipping cleared from the Harbour in the year 1886, compared with 1876, bearing in mind that the largest increase has been in the net Tonnage of Steamers, was 60·6 per cent., the increase in the Tonnage of the Steamers in the same period being 197·42 per cent. The Tonnage of Exports showing an increase of 72·26 per cent., the Gross Revenue from the foregoing increasing by 96·62 per cent.

The Steamers of 2,000 tons carrying power and upwards in the year 1886, as compared with those in 1877, increased by 305 in number and 354,244 in tons, their proportion to the total Tonnage cleared out of the Harbour being 31·21 per cent. in 1886, against 1·89 only in 1887.

The direct loadings for America have risen from nothing in 1880 by gradual steps to 119 first-class Steamships in 1886.

Vessels entering the Wet Docks for the purpose of Dry Docking, and clearing out to sea without using the Dock waters, except in passing through, are free.

The population of Swansea, the Metallurgical centre of the world, last census was 95,655.

The number and tonnage of the vessels entered and cleared in 1886 was 9,256 in number, and 2,350,340 in net registered tons.

Sir H. Hussey-Vivian, Bart., M.P., when laying the central stone of the Lock of the Prince of Wales' Dock, remarked that:—"The geographical position of Swansea is manifestly as good as it possibly can be. The distance from Lundy Island to the Pier Head at Swansea is 40 miles, while to the Bute Docks it is 65, and 75 to Newport. Taking into consideration the time of the tide flowing, and presuming a vessel to sustain a speed of ten knots from Lundy, one-third of the vessels passing up the Channel would save a tide by coming to Swansea. A vessel coming to Swansea would leave Swansea seven hours sooner than Cardiff, and be that much further on the way."

Short Postal and Telegraphic Address, "Harbour Trust, Swansea."

HARBOUR OFFICES,

SWANSEA, 7th November, 1887.

ROBERT CAPPER,

General Superintendent.

Bunker coals at Swansea can be supplied at an inclusive price covering every charge.

NOTES FOR INVESTORS

BY

WILLIAM CORNFORTH,

Stock and Share Broker,

4, QUEEN VICTORIA STREET, LONDON, E.C.

- I. It is seldom wise to subscribe to New Companies. There are a few exceptional cases. I shall not hesitate to submit to my clients any New Company of which I know the soundness, and which is likely to be a great success; but such exceptional recommendation will be very rare. Enquiries as to value of new issues are answered without charge, and during the past year many clients who requested information have been saved from applying for shares now standing at a heavy discount.
- II. *In purchasing Shares, remember the need of being able easily to dispose of same.* It is almost impossible to sell some shares at any price. I therefore make it a rule to recommend only such Shares as can be sold on Stock Exchange. *Attention to this will save many losses and much chagrin.*
- III. As to Mines! The utmost caution is needed. Money placed in Mining Shares is risked: but if this is clearly understood, small investments may be made with fair chance of large profits. I give careful attention to mining matters, and can deal at close prices.
- IV. As to liability: Discriminate. Take a Bank like the London and County Bank; or an equally sound though smaller institution, the City Bank; with immense accumulated funds—well managed—with a Directorate of unimpeachable integrity and commercial aptitude; or an Insurance Company like the North British and Mercantile, or Commercial Union, with *Millions sterling* of Invested Funds. In these cases liability is *nominal*. But in weak Companies—with unknown men as directors—or needy adventurers in that position—*beware!*
- V. ~~I can confidently recommend as safe and good investments, Shares in such companies as:—~~London and County Bank: London Joint Stock Bank: City Bank: North British and Mercantile Insurance Company: Liverpool, London and Globe Insurance Company: Commercial Union Insurance Company: average yield in these about 5 per cent. Full particulars sent on application. Also particulars as to *smaller shares* in some Companies, and of Shares depressed in value but worth buying for good rise. Enquiries as to any Company answered.
- VI. I bear in mind that my clients invest their own money, and am always willing to act on definite instructions. In suggesting particular Shares, I have no personal interest whatever to serve. I think of my client's interest *first*, and yet am quite aware that following this rule I shall succeed in building up my own business.
- VII. All Railway and Foreign Stocks bought, sold and carried at close market prices. No tape dealing.

*Bankers:—*CITY BANK.

*References:—*In every large town in England.

PROMPTNESS AND DESPATCH MAY ALWAYS BE RELIED UPON.

Correspondence is invited. Every communication is treated as absolutely confidential.

MONTHLY LISTS SENT ON APPLICATION. See opposite page.

 The present Subscribed Capital of the Bank is £14,000,000, in 140,000 Shares of £100 each, held by upwards of
 7,000 Shareholders. The sum of £20 has been paid on each Share, thus making the paid-up Capital £2,800,000. The
 Rest or Surplus Fund is £1,645,620 4s. 9d.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The
 Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the
 Colony; attends to the purchase and sale of British and Foreign Stocks; collects Dividends on Government Funds,
 Railway Stock, Foreign and other Securities, payable in England or abroad; acts as Agents for the receipt of Military
 and other pay and allowances, and generally transacts every description of Banking business.

Sums of £10 and upwards may be deposited, repayable at call. Sums of £500 and upwards may be deposited upon
 seven days' notice of withdrawal. Interest is allowed thereon, according to the class of Deposit, but subject to alteration
 by public advertisement in the *Times* newspaper. Cheques cannot be drawn against Deposit Accounts, nor will Depositors
 be entitled to any of the usual Banking facilities of a Current Account. A Receipt is given for each Deposit,
 which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed
 thereon.

Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal Towns of Europe,
 Asia, Africa, and North and South America. They are issued free of expense and are payable by the Agents abroad,
 at the exchange of the day, without any deduction whatever for Commission. Letters of Credit are also granted, payable
 at all the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.
 The Officers of the Bank are not allowed to receive any Christmas Boxes or Gratuities.

CURRENT ACCOUNTS are kept in conformity with the practice of London Bankers. In cases where a remunerative Balance is not maintained, a Charge for Commission is made. Parties keeping Current Accounts have the facility of having approved Bills discounted—of obtaining Loans upon negotiable Securities—of depositing Bills, Coupons, &c., for collection—and of lodging with the Bank Deeds and other valuable property in Fireproof Strong-Rooms for safe custody.

DEPOSIT ACCOUNTS.—Money, in amounts of £10 and upwards, is received from the public generally, subject to 7 days' notice of withdrawal, and Interest is allowed thereon at the current rate of the day; the Bank notifying any change in the rate of Interest by Advertisement in one or more of the leading London Newspapers. If the money be withdrawn within a fortnight, no Interest is allowed. Persons having Current Accounts can transfer any portion of their Credit Balance to Deposit Account.

The AGENCY OF COUNTRY and FOREIGN BANKS, whether Joint Stock or Private, is undertaken by the Bank. LETTERS OF CREDIT, payable at any of the chief Commercial Towns and Cities of the World, are granted; also Mercantile and Marginal Credits. CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any of the places on the Continent where the Bank has an appointed Correspondent. Dividends, &c., on Government and other Stocks, Annuities, Pensions, &c., are received for customers of the Bank without charge; the Purchase and Sale of Stocks, Shares and Securities are also undertaken; and every description of Banking Business is transacted. The Officers and Clerks of the Bank are pledged not to disclose the transactions of any of its Customers. [97]

With this Bank have been incorporated, by purchase or amalgamation, the long-established private Banks of LOYDS and Co., and MOILLIET and SONS, of Birmingham; BARNETTS, HOARES and Co., and BOSANQUET, SALT and Co., of London; STEVENSON, SALT and Co., of Stafford and Lichfield; P. and H. WILLIAMS, of Wednesbury; A. BUTLIN and SON, of Rugby; R. and W. F. FRYER, of Wolverhampton; I. and J. C. WRIGHT and Co., of Burton-on-Trent; BECK and Co., of Shrewsbury and Welshpool; and the following Banking Companies, viz., the WARWICK and LEAMINGTON BANKING COMPANY, the SHROPSHIRE BANKING COMPANY, and the COVENTRY AND WARWICKSHIRE BANKING COMPANY. The Bank has Correspondents and Agents in most of the large towns in the British Isles, as well as in Australia, Canada, the West Indies, Mauritius and other Colonies, and thus offers to the public great facilities for transacting Banking business. Current Accounts are opened upon the terms usually adopted by Bankers. Deposits are received at interest subject to fourteen days' notice of withdrawal, or by special agreement. Drafts and Letters of Credit are granted upon Agents; and Circular Notes, payable in all parts of the world, obtained. Purchases and Sales of Government and other Stocks effected, and every description of Banking business transacted. A Declaration of Secrecy is signed, on appointment, by every person engaged in the Bank's service.

BRANCHES AND AGENCIES:—Aden, Badulla, Bombay, Calcutta, Colombo, Edinburgh, Hong Kong, Jaffna, Kandy, Kobe, Madras, Mahé (Seychelles), Mauritius, Melbourne, Newera Ellia, New York, Paris, San Francisco, Shanghai, Singapore, Sydney, Yokohama.

The Bank receives money on deposit, buys and sells bills of exchange, makes telegraphic transfers, issues letters of credit and circular notes, forwards bills for collection and transacts banking and agency business generally.

Interest allowed on deposits at 3, 4 and 5 months' notice, 3 per cent. per annum; at 6, 7 and 8 months' notice, 4 per cent. per annum; at 9 to 12 months' notice, 4½ per cent. per annum; at 3, 5 or 7 years' notice, 5 per cent. per annum. Interest paid half-yearly in London, 31st March and 30th September. Interest paid half-yearly in Scotland, 11th May and 11th November.

Current Accounts opened and cheque books supplied. Interest at 2½ per cent. per annum allowed on the minimum monthly balance, if not below £100.

Advances made against approved banking securities.

Pay and pensions drawn, insurance premia, subscriptions, and other periodical payments made at an uniform commission of one quarter per cent.

Securities bought, sold, and received for safe custody from constituents of the bank. Interest and dividends collected at an uniform commission of a half per cent.

Drafts issued upon the Bank's Eastern Branches at current rates, free of commission. Bills collected or negotiated and every description of exchange business conducted.

The fullest information can be obtained by application at any of the Branches and Agencies, or at the Head Office.

Bankers—Messrs. DRUMMOND.

Solicitors—Messrs. SHOUBRIDGE & MAY, 19, Lincoln's Inn Fields, W.C.

The business of this Company consists in the PURCHASE of, or LOANS upon—
REVERSIONARY INTERESTS, vested or contingent, in Landed or Funded Property,
or Securities; also

LIFE INTERESTS in Possession, as well as in Expectation.

Loans upon Reversions may be obtained either at an Annual Interest, or in consideration of deferred charges, payable upon the Reversions falling in.

PRESENT INCOMES are likewise granted upon the latter principle to persons entitled to Reversionary Interests, who may thus obtain the means of support until their property falls into possession, without being called upon for any payment until that event.

Prospectuses and Forms of Proposal may be obtained from the Secretary, to whom all communications should be addressed.

IMPORTANT COMMUNICATION.

FIRE AT WHITELEY'S.

WILLIAM WHITELEY, Westbourne Grove,
London, Oct. 12th, 1887.

HOBBS, HART & CO., LIMITED.

GENTLEMEN,—It affords me very much pleasure to express to you my satisfaction and admiration at the splendid fire-resisting powers of your Strong-room doors and the Safes.

The recent fire at my establishment in my opinion subjected them to the greatest possible test, and through all, they proved invulnerable.

The contents of both Strong Rooms and Safes were entirely preserved, although the fire was of such intensely destructive force.

You will be pleased to hear that it has been decided to adopt your Patent Clutch-rebated Doors for all the party walls in the new buildings now in course of erection.

I am, Gentlemen, faithfully yours,

Signed, WILLIAM WHITELEY.

WESTMINSTER BRANCH—1, Great George Street, S. W.

LIFE DEPARTMENT.

In the selection of an office in which to effect Life Assurances, the important points for consideration are:—

I. SECURITY.

II. THE RATES OF PREMIUM CHARGED.

III. THE CONDITIONS OF ASSURANCE.

IV. THE PROFITS TO THE ASSURED UNDER PARTICIPATING POLICIES.

It is claimed for the ALLIANCE that its large Capital, the amount of its Reserves, and the character of its Investments, afford security of a very high order.

The Rates of Premium will be found moderate, and the Conditions of Assurance most favourable to the Assured.

The Reversionary Bonuses resulting from the distribution of Profits ascertained at the close of the year 1883, allotted to Policies of Five years' standing, range from about £1 12s. per cent. per annum on the Sum Assured under Policies effected at age 20, to £3 16s. per cent. per annum on the Sum Assured under Policies effected at age 60.

FIRE DEPARTMENT.

Fire Policies are granted on the usual Terms.

The Directors are open to entertain applications for Agencies from parties who are in a position to introduce business of a high class. Life and Fire Proposal forms, Prospectuses, and Statements of Accounts, may be had on application to the Head Office of the Company, or to any of the Branch Offices.

LOANS are granted on the security of Life Interests, Freehold Property, and Rent Charges.

BRISTOL	2, Clare Street.	MANCHESTER	24, Booth St., Cooper St.
LEEDS	15, Park Row.	GLASGOW	149, West George Street.

TOTAL ASSETS, £1,754,042

(Exclusive of Value of Company's Freehold Office, 92, Cheapside).

LIFE DEPARTMENT.—All kinds of Life Assurance transacted.

THE PROFITS of the Life Department belong entirely to the Assured, and have always been very large. **THE ATLAS** offers the advantages of a Mutual Society, and the Assured incur no liability.

LIBERAL SURRENDER VALUES given in Cash, or by paid-up Policies.

POLICIES are not forfeited by neglect to pay the Premium, so long as there is sufficient Surrender Value to provide for the amount in arrear with interest.

CLAIMS are paid Eight Days after proof of death and title.

MORTGAGE ASSURANCES.—**THE DIRECTORS** call attention to their New Scheme, under which Advances are made on approved Properties; the repayments extending over 10, 15, or 20 years, if the borrower live, but ending at his death during the term.—(See special Prospectus.)

FIRE DEPARTMENT.—Policies issued free of expense.

LOSSES OCCASIONED BY LIGHTNING will be paid, whether the property be set on fire or not.

LOSS or DAMAGE caused by Explosion of Coal GAS in any building assured will be made good.

SEVEN YEARS' POLICIES granted on payment of Six Years' Premiums.

Active Agents Wanted.

SAML. J. PIPKIN, *Secretary*. [32]

BRITISH EMPIRE MUTUAL LIFE ASSURANCE COMPANY, New Bridge Street, London, E.C.

This Company being established on the **Mutual Principle**, all Surplus Funds belong to the Members. Every third year a careful Valuation of the Business is made, and large Bonuses have been declared.

The Average Cash Bonus (Triennially) exceeds 20 per cent. on the Premiums paid.

The Surplus Funds already appropriated exceed **One Million Sterling**.

It has an ANNUAL INCOME of **£240,287**.

An ACCUMULATED FUND, arising solely from Premiums, of **£1,136,846**.

And has PAID IN CLAIMS **£1,409,966**.

Policies absolutely indisputable after five years, provided the age of the Assured has been admitted. Policies kept in force when requested by appropriating the Surrender Value to the payment of Premiums.

No charge for voyage to, or residence in, any part of the World, except unhealthy climates.

Assurers under the TEMPERANCE SCHEME are placed in a separate Section.

Policies may be effected under the Deferred Bonus plan.

LOANS on FREEHOLDS, LEASEHOLDS and other SECURITIES considered.

Prospectuses, Copies of the last Report and Balance Sheet, and Board of Trade Returns, &c., can be obtained on application to any of the Agents of the Company, or to

Manager of Fire Department—F. J. MARSDEN. *Actuary and Secretary*—T. G. C. BROWNE.

Physicians—J. RUSSELL REYNOLDS, Esq., M.D., F.R.S.; W. R. GOWERS, Esq., M.D., F.R.S.

Solicitors—Messrs. WOODHOUSE, TROWER, FREELING & PARKIN, 5, New Square, Lincoln's Inn.

LIFE DEPARTMENT.

The last Quinquennial Valuation was made on the basis of the Institute of Actuaries (HM & HMs) Tables of Mortality and 3 per cent. interest, the net premiums only being valued, and the whole of the loading reserved. The sum of £175,228 was divided as a Bonus among 5,052 participating Policies, assuring, exclusive of existing bonus, £4,321,144, the annual premiums payable under which amounted to £132,533 2s. 2d.

The exceptional security offered by the paid-up Capital of £1,000,000 has attracted a large amount of non-participating business to the Company, and the profit derived from it during the five years (1879-84) was more than sufficient to pay the sum of £40,000 which the Proprietors took as their share of the surplus, and which was the sole benefit which they received from the Life business in return for the guarantee afforded by the unusually large paid-up Capital of the Company. The Policy-holders in the "Guardian" have, therefore, the security of a Proprietary Company with the Profits of a Mutual Society.

The full Bonus Report and Prospectus will be forwarded on application.

LIFE FUND (1886), £2,253,000. LIFE INCOME, £288,000.

FIRE DEPARTMENT.

Insurances effected upon Property at Home and Abroad at Moderate Rates.

Losses by Lightning are made good by the Company.

FIRE FUND (1886), £591,000. FIRE INCOME, £469,000.

The Directors are prepared to consider Applications for Agencies.

KENT FIRE OFFICE—Established in 1802. LIFE OFFICE—Established in 1824.

FIRE.—Insurances on Home Risks at Equitable Rates, against Fire, Gas Explosion and Lightning. The Funds exceed Three and a Half Years' Premiums.

LIFE.—This Company issues Policies, with practically Unrestrictive Conditions, at Moderate Premiums; gives very liberal Bonuses (of which some examples are shown below), and offers Absolute Security in the fact that the Funds, invested upon first-class securities, are equal to nearly 60 per cent. of the sum assured and Bonuses added thereto, and to more than Twenty-One Years' Premiums. The General Expenses of Management are at the rate of about £4 per cent. only on the total income.

THE FOLLOWING ARE SOME EXAMPLES OF "UNITED KENT" BONUSES :

Policy No. 462. Issued in 1831.	Policy No. 503. Issued in 1833.	Policy No. 767. Issued in 1840.
Original Sum Assured £500	Original Sum Assured £800	Original Sum Assured £999
Bonus already added £812	Bonus already added £2,015	Bonus already added £1,411
Total . . . £1,312	Total . . . £2,815	Total . . . £2,410

Policy No. 714. Issued in 1839.
Original Sum Assured . . . £1,000
The original premium of £25 5s. 10d. was entirely extinguished by bonus 15 years ago, and £543 has been since added to the sum assured.

Policy No. 1382. Issued in 1851.
Original Sum Assured . . . £1,000
The original premium of £38 12s. 6d. was extinguished by Bonus 10 years ago, and £290 has since been added to the sum assured.

N.B.—The above are actual results—not "Estimates."

FIGURES FOR THE YEAR ENDING 25TH MARCH, 1887.

FIRE FUNDS	£275,037
FIRE INCOME	87,443
LIFE FUNDS	511,695
LIFE INCOME	46,901

Income for the Year 1886	432,597
Amount Paid in Claims to the 31st December, 1886	14,950,919
Reversionary Bonuses allotted for five years ending 31st Dec., 1884	690,948
Total Reversionary Bonuses hitherto allotted	6,889,937

The Expenses of Management (including Commission) are about $\frac{4}{10}$ per cent. of the Income.

Policies are granted under the terms of the Married Women's Property Act, 1882.

The limits of free travel and residence have been largely extended, and rates of extra premium reduced.

Loans are granted on security of Policies, Life Interests, Reversions, and Borough and County Rates, as well as on other approved Securities.

Life Interests and Reversions are purchased.

Claims are paid immediately on proof of death and title.

Commission is allowed to Solicitors and others on Assurances effected through their introduction.

Prospectus and Form of Proposal will be sent on application to the Actuary. [108

The Capital of the LAW FIRE INSURANCE SOCIETY, amounting to £5,000,000, was subscribed before the Society commenced business in 1845, by nearly One Thousand Gentlemen connected with the profession of the Law; the shares are now held by a body of Shareholders comprising some of the highest and most influential members of the profession; and the success which has attended the operations of the Society is founded on the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements have always been met.

In order to meet covenants requiring continuance of Rent, notwithstanding destruction of Buildings by Fire, the Society will grant Insurances on Rent, the amount being specified in the Policy.

Attendance given at the Office of the Society daily from Ten till Four (Saturdays Ten till Two), where parties may obtain any further information respecting the terms on which Insurances may be effected.

GEORGE WILLIAM BELL, Secretary. [107

Manager and Actuary—WILLIAM PALIN CLIREHUGH.

PROGRESS OF THE COMPANY

During the Past Ten Years to 31st December, 1886.

YEAR.	NEW BUSINESS.		NET PREMIUM INCOME.	INVESTED FUNDS.
	Sums Assured.	New Premiums		
1876	£329,705	£11,168	£49,093	£139,983
1881	505,265	18,318	83,250	256,506
1886	608,870	22,013	127,442	476,772

It will thus be seen that in ten years the Net Premium Income has nearly trebled, whilst the Funds during that period show an increase in a still larger proportion.

Moderate Rates. Liberal Conditions. Undoubted Security.

W. P. CLIREHUGH, Manager.

Actuary and Secretary—EDWARD DOCKER, M.A., F.I.A.

POLICIES NOW IN FORCE £9,680,000
FUND ACCUMULATED and invested in FIRST-CLASS SECURITIES 1,900,000
POLICY CLAIMS PAID 6,900,000

The ASSOCIATION employs NO AGENTS, and pays NO COMMISSION in any shape, for the introduction of Policies. Its expenses are small, being less than 3 per cent. of its annual income from premiums and interest.

An investigation of its affairs is made every year, and the surplus is applied, first in reducing the premiums until they are extinguished, and then in increasing the sum assured. The first seven premiums are payable in full, and the reduction begins with the eighth. During the last 30 years this reduction has increased, on the average, at the rate of about One per Cent. per annum, and as the mortality among its members continues to be much within the estimate, and the funds of the Society are invested at a higher rate of interest than is assumed in the Valuations, it is expected that the premiums may be still further reduced.

PREMIUMS commenced before July, 1830 (4th Series), are this year reduced 70 per cent.

"	"	"	"	1876 (3rd Series),	"	"	80	"
"	"	"	"	1865 (2nd Series),	"	"	95	"
"	"	"	"	January, 1856 (1st Series),	"	"	100	"

And, as the reduction of premiums in the First Series can be carried no further, an addition of five per cent. of the annual premium has been this year made to the sum assured.

EDWARD DOCKER, M.A., F.I.A., *Actuary and Secretary.*

Solicitor—WM. BURCHELL, Esq.

Actuary—H. W. MANLY, Esq., F.I.A.

Secretary—HUBERT G. ROWSELL, Esq.

THE MUTUAL LIFE ASSURANCE SOCIETY exists solely for the benefit of its Members; and as it has no other interests to serve—no Shareholders or Guarantors to share in the profits and provide with dividends—all the regulations are framed with the object of securing to the Members the greatest benefits to be derived from an equitable system of Life Assurance.

The Funds amount to more than 14 times the Annual Premium Income, and are equal to 42 per cent. of the total sums assured; a degree of strength possessed by very few Offices.

A Policy in this Society is ABSOLUTELY FREE AND INDISPUTABLE after it has been in force five years, and the life assured has attained the age of 30; the due payment of the ordinary Annual Premium stated in the Policy being then alone necessary to secure to the Member or his representatives the full benefits of the assurance. [155]

Life Insurance at Half the Usual Cost.

MUTUAL RESERVE FUND LIFE ASSOCIATION OF NEW YORK.

Under the Supervision of the Insurance Department of the State of New York.

The Association has deposited £20,000 for the security of Policy holders in Great Britain, with the Board of Trade, and will be governed by English Law affecting Life Insurance.

This Friendly Society, to provide relief in Sickness, sums at death, endowments and annuities, was established in 1847, and has an invested fund of more than five years' annual premium income. Trustworthy Agents required. For terms and all information, apply to

G. W. HARDWIDGE, *Secretary.* [156]

THE LARGEST LIFE INSURANCE COMPANY IN THE WORLD.

THE MUTUAL LIFE INSURANCE COMPANY OF NEW YORK.

ESTABLISHED 1842.

Invested Funds (1886) exceed £23,787,000.
Annual Income £4,400,000:

Head Office for the United Kingdom: 17 & 18 Cornhill, London, E.C.

Bankers—THE BANK OF ENGLAND. | D. C. HALDEMAN. General Manager.

THE MUTUAL OF NEW YORK is a purely Mutual Company, and there are no Shareholders to absorb any of its profits, while the Invested Funds and Surplus all belong to the Insured. At the same time there is no Liability to the Policy-holder whatever beyond the payment of Premium named in his Policy.

The following figures will show that it is a **Policy-holders' Company** :—

The amount received in Premiums since the establishment of the Company is over £57,000,000
And the amount paid to Policy-holders is over £50,000,000

As follows :—

Claims £21,045,860.
Bonuses £15,410,015.
Surrenders £14,299,409.

Total paid to Policy-holders £50,755,284

And THE MUTUAL OF NEW YORK has now in hand for the Benefit of its Policy-holders over £24,000,000

THE MUTUAL OF NEW YORK's Distribution policy is the most liberal ever offered by any Insurance Company.

It places no restriction upon Residence, Travel, or Occupation after the policy has been two years in force.

Bonuses can be taken Annually in Cash, if so chosen, at the expiration of a Distribution period.

Every policy has a guaranteed surrender value after the third year.

Single, Joint Life and Surrendership Annuities granted.

THE MUTUAL OF NEW YORK, besides being under the Official Supervision of the Insurance Department of the Government for the State of New York, makes Annual returns to the British Board of Trade, in accordance with the Life Insurance Companies Act of 1870.

All Claims payable at the London Office in sterling, immediately upon acceptance of Proof of Death.

A. H. PHILLPOTTS, Esq., Director Bank of British North America.

Bankers—LONDON AND COUNTY BANK, 21, Lombard Street, E.C.; BANK OF BRITISH NORTH AMERICA, 3, Clement's Lane, Lombard Street, E.C.

Solicitors—Messrs. ASHURST, MORRIS, CRISP & Co., 6, Old Jewry, E.C.

LIFE ASSURANCE ONLY. PURELY MUTUAL.

All Profits belong to Policy Holders, and Apportionments are made annually.

STATEMENT FOR YEAR ENDING DECEMBER 31ST, 1886:—

ACCUMULATED FUNDS SURPLUS over all Liabilities and Reserve Fund, according to Valuation made by the Government **£3,199,448**
INCOME FOR YEAR **£3,874,847**

ACTUAL RESULTS.—The following Policies were taken out on the following plan at the London Office of the NEW YORK LIFE INSURANCE COMPANY (76 & 77, Cheapside) in 1872, and having matured, are now being paid:—

Plan—15-YEAR ENDOWMENT—15 Year Tontine Investment.

Policy No.	Policy Amount.	Annual Premium.	Total Amount Paid by Company.
91 800	£ 1,000	£ s. d. 66 0 5	£ s. d. 1,483 15 2
92 442	2,500	165 2 1	3,731 8 5
93,333	500	36 16 7	826 5 2
93,475	500	33 9 7	751 15 7
93,769	1,000	66 19 2	1,503 11 5
93,882	500	33 0 3	741 17 7

NOTE.—The Policy Holder in each case has been insured against death during the fifteen years, and being alive at the maturity of the Policy, is receiving an amount equivalent to the refund of all the premiums paid, with nearly five per cent. compound interest; thus his insurance during the fifteen years cost him nothing.

LIFE DEPARTMENT.

The principles on which this Company was founded, and on which it continues to act, combine the system of Mutual Assurance with the safety of a large Protecting Capital and Accumulated Funds, and thus afford all the facilities and advantages which can prudently be offered by any Life Assurance Office. Under these principles the business of the Company continues rapidly to increase.

Ninety per Cent. of the *Whole Profits* is divided among the Assurers on the Participating Scale.

The *Profits* are divided every five years. *Policies* are *indisputable* after Five years.

Annuities of all kinds are granted, and the rates fixed on the most favourable terms.

Prospectuses and every information can be obtained at the

The whole of the Profits are divided among the Members every five years.

The Association includes among its 20,000 Members EVERY CLASS OF SOCIETY.

FAMILY POLICIES.—By the "Married Women's Property Act," passed in 1870, a married woman may effect assurances on her own life or the life of her husband, or a man may assure his life specially for the benefit of his wife and children; and such policies are not affected by bankruptcy, and cannot be taken by creditors, &c.

By the new table of limited number of payments, Policies are not forfeited even by the non-payment of Premiums.

HALF-PREMIUM SYSTEM.—Assurances may be effected on the HALF-PREMIUM system for the first five years without debt or interest. Or, ONE-THIRD of the Premiums may be left at interest during the existence of the Policy. By this latter system an Assurance for £900 may be effected for the same present outlay as would assure £600 only.

FREE or PAID-UP POLICIES.—Assurers of five years' standing, under tables A 1, A 2, A 3, and F, or who have paid not less than £20 on their Policies, and whose age shall not exceed 60 years, may, if they desire to discontinue their Premiums, receive a FREE or PAID-UP POLICY payable at death for THE WHOLE OF THE AMOUNT CONTRIBUTED, up to the sum originally assured.

November, 1887.

JNO. EDWD. GWYER, *Secretary*.

Prospectuses and every information on application at the Chief Office, 27 MOORGATE STREET, London, E.C., or to the Agents.

THE PROVIDENT CLERKS' AND GENERAL GUARANTEE ASSOCIATION, Limited.

Subscribed Capital, £100,000. Called-up and Paid, £60,000.

This Association issues GUARANTEE POLICIES for situations of trust. It is specially authorised to guarantee the Employés of the Government. By an arrangement with the PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION, all persons Assuring their Lives with that Association, in connection with a Guarantee, will be enabled to effect the latter at a considerable reduction of Premium. This arrangement has been so framed as to be advantageous to both institutions.

Prospectuses, Forms of Proposal, &c., may be obtained of the Agents, or at the Chief Office, 61, COLEMAN STREET, E.C.

H. B. BRAIN, *Secretary*.

THE PROVIDENT CLERKS' And GENERAL ACCIDENT INSURANCE COMPANY, Limited.

Subscribed Capital, £50,000.

The Insurances granted by the Company are chiefly comprised in the following classes—provision for special cases being made on application at the Chief Office, 61, Coleman Street, E.C.

1. Insurance against Accidents of every kind, with or without allowances during entire or partial disablement.
2. Insurance against Railway Accidents only.
3. Insurance against Fatal Accidents during a Voyage.

EMPLOYERS' LIABILITY ACT.—The liability under this Act can be covered by special arrangements for Insurance.

To Assurers with the PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION and the PROVIDENT CLERKS' AND GENERAL GUARANTEE ASSOCIATION, Accident Policies are issued at reduced rates.

Insurances against Loss by Fire and Lightning are effected by the PHOENIX Company upon every description of Property, in all parts of the World, on the most favourable Terms. *The experience of over a Century* has proved the promptitude and liberality with which its engagements are always met by this Company; and the importance of its relations with the Public may be estimated from the fact that, since its establishment, it has paid in discharge of Claims for Losses more than

SIXTEEN MILLIONS STERLING.

Rates and Particulars of Insurance may be obtained at the Chief Offices, Lombard Street and Charing Cross, and from the respective Agents of the Company throughout the kingdom.

HON. E. C. W. PONSONBY.
DUDLEY ROBERT SMITH, Esq.
MARMADUKE WYVILL, Esq.

This Company has been in successful operation for **Ninety Years**, and during that long period every legitimate Claim has been fully and promptly discharged. The Shareholders' liability to make good the fulfilment of every contract is **practically unlimited**, the limitation clause usually found in life policies being non-existent.

The Rates of Premium have been carefully revised and adjusted upon the most recent data. Large Bonus Additions to Policies were declared at the Quinquennial Investigation in 1886, the calculations being based upon what is termed a **Three per cent.** Valuation, the Table of Mortality being the most stringent in existence.

THE FINANCIAL POSITION OF THE COMPANY IS AS FOLLOWS:—

Annual Premium Income	£94,000
Total Annual Income	£148,000
Invested Funds	£1,360,000
Amount of Policies in force	£3,170,000
Claims paid, including Surrendered Policies, upwards of	£8,000,000

The Company's Investments realize upwards of Four-and-a-Quarter per Cent.

TONTINE LIFE INSURANCE.—Attention is specially directed to a scheme introduced by this Company some fifteen years ago. It presents the best features of Endowment Insurance, combining the advantages of an Investment with those of Ordinary Insurance. To the Insured who from any cause may not be in a position or disposed to keep the Policy in force, an unusually large Surrender Value is given, and in common with the Company's other Policies, the Insured are entitled to liberal advances by way of Loan.

This department of the Company's business is entitled the **Survivors' Bonus Scheme**, and a Prospectus setting forth its peculiar advantages will be forwarded free on application.

THE STANDARD is one of the largest and most influential of British Offices, being established on a wide and popular basis, with connections throughout the British Dominions.

The business has steadily increased from the commencement, the present position of the Company being as follows:—

Sums Assured	£20,000,000.
Annual Revenue	£900,000.
Accumulated Fund	£6,600,000.

Among the Advantages offered by the STANDARD COMPANY are :

MODERATE PREMIUMS; FREE WHOLE-WORLD RESIDENCE;

UNCHALLENGEABLE AFTER FIVE YEARS;

REVIVAL ON VERY FAVORABLE TERMS;

SURRENDER VALUE OF FIXED AMOUNT OR PAID-UP POLICY IN EXCHANGE;

UNDOUBTED SECURITY; AND EARLY PAYMENT OF CLAIMS.

The Surplus Fund is divided every Five years, and already Four and a half Millions Sterling have, as the consequence of careful management, been added to Policies over and above the original sums assured for.

NAVAL AND MILITARY OFFICERS' Lives Assured on most favourable terms.

INDISPUTABLE POLICIES.—After three years most of the Society's Policies become free of every restriction, and practically all are *indisputable* on any ground except fraud, when the age has been admitted, as mentioned in the Prospectus.

The attention of persons effecting Life Assurances is directed to the terms offered by the

Scottish Metropolitan Life Assurance Company

The following are some of the special features of the Company:—

LOW PREMIUMS. The premiums are fully 20 per cent. lower than those of most Companies. These Companies charge Premiums admittedly much in excess of the amounts which, experience shows, are required to meet even an abnormal death-rate, but the Directors of the Scottish Metropolitan prefer to adhere to the original intention of Life Assurance, and to provide from the very outset as large a sum assured as *absolute safety* will permit.

ABSOLUTE SECURITY. The security afforded to policy-holders is unusually complete, the net premiums being, with compound interest at 4 per cent. per annum. reserved and invested at sight of Trustees to meet claims as they mature. *This item alone is sufficient to meet these liabilities.* Policy-holders have the additional security of a capital amounting to £80,000 subscribed by a substantial Proprietary.

CONDITIONS OF ASSURANCE. Most liberal.

- Claims payable on proof of Death.
- Whole-world Policies for Master-mariners.
- Monthly Premium Scheme (specially adapted for use in large Warehouses).

Chairman—The Right Hon. J. H. A. MACDONALD, C.B., M.P., &c.,

YORKSHIRE INSURANCE COMPANY: FIRE, LIFE AND ANNUITIES.

Established 64 Years.

CAPITAL £500,000. ACCUMULATED FUND £864,861. ANNUAL INCOME £167,088.

Trustees:

W. H. HARRISON BROADLEY, Esq. The Right Hon. Lord DERWENT. The Right Hon. Lord WENLOCK.

LIFE DEPARTMENT.—IMPORTANT AND LIBERAL CONCESSIONS.

Immediate Payment of Claims. Claims become payable *immediately on proof of death and title.*

World-wide Freedom of Travel, &c. Parties insuring with the Company are, after the first year, freed from the restrictions which have hitherto obtained in regard to Suicide, death by duelling, or by the hands of Justice; also freedom to reside and travel anywhere is granted, provided the parties are over 25 years of age, do not belong to the Military or Naval Profession, and are able to declare at the time of proposing that they have no intention of going abroad.

Policies Indisputable. Subject to these reservations, and the age being admitted, the Company's Policies are practically indisputable on any ground whatever, except fraud, after the first three years.

Free right of Revival of Lapsed Policies. In the case of Policies which have lapsed through the non-payment of the Premium within the usual 30 days of grace, there shall be the power on the part of the Assured to revive the same at any time within six months on payment of the overdue premium and interest at Five per cent. per annum, and *without any fine or fresh proof of health.*

Fixed and Liberal Surrender Values. For the benefit of Insurers who may be under the necessity of discontinuing their Policies, a scale of increased liberality has been adopted, which, whilst full and equitable at all ages, will be found especially advantageous in the case of the older Policies.

Full Surrender Value automatically placed to Assured's credit. The omission to pay the premium when due does not deprive the Assured of the right to the full Surrender Value of his Policy, which, whether applied for or not, is placed to the credit and at the disposal of the parties interested.

Right to Intermediate Bonus. Bonus Policies becoming Claims between two quinquennial divisions of Profits are entitled to an intermediate Bonus calculated at the rate of two-thirds of the Bonus declared at the division immediately anterior to the death.

FIRE INSURANCES effected by the Company on the most moderate terms, according to the nature of the risk.

YORK: St. Helen's Square.

Total number relieved since formation of Society in 1839 .. 384,751

Number of Fishermen, Mariners, &c., providently contributing yearly .. 53,000

DONATIONS and ANNUAL SUBSCRIPTIONS in aid of these National Objects are earnestly requested, and will be thankfully received by the Society's Bankers, Messrs. WILLIAMS, DEACON & Co., Birchin Lane, City; by all the London and Country Bankers; and at the Central Office by Central Office, Sailors' Home Chambers, Dock St., London, E. W. R. BUCK, *Secretary*. [165

THE INDIGENT BLIND VISITING SOCIETY.

27, RED LION SQUARE, W.C. FOUNDED 1834.

For Ameliorating the Condition of the Blind Poor of London.

The means employed are—1. House to House Visitation. 2. Regular Relief in Bread and Money; also Coals during the winter. 3. Special Relief in cases of Distress or Sickness. 4. Regular Weekly Pensions to the Aged and Infirm. 5. Grants in special cases to enable persons to earn their own livelihood. 6. Guides to places of Public Worship. 7. Elementary Education in Day Classes.

Over 900 were benefited last year. Contributions are most urgently needed, and will be gratefully received by the Secretary at the Office; or by Messrs. WILLIAMS, DEACON & CO., 20, Birchin Lane, E.C. *Secretary*, W. C. LESTER. [185

ROYAL HUMANE SOCIETY.

Instituted 1774. Supported by Voluntary Contributions.

Patron—Her Most Gracious Majesty THE QUEEN.

Vice-Patron—H.R.H. the DUKE of CAMBRIDGE, K.G., G.C.M.G.

President—His Grace the DUKE of ARGYLL, K.G., K.T., F.R.S.

Treasurer—Lt.-General Sir LOTHIAN NICHOLSON, K.C.B.

Honorary Rewards are granted for Saving Life from Drowning in all British Possessions.

Pecuniary Rewards are granted within an area of Thirty Miles around the Metropolis. During the Skating Season, experienced Icemen are provided to prevent loss of life in the various waters about London; and Boats are in daily attendance, morning and evening, to prevent fatal results attending Accidents to the enormous number of Bathers in the Serpentine.

Upwards of Three Hundred Places in and around London are furnished with Life-Saving Apparatus to rescue persons from Drowning.

The Society has for the past six years encouraged Swimming competitions with "reference to Saving Life from Drowning," and Prizes are annually given for proficiency in them at various leading Schools and Training Ships selected by the Committee.

The Society is known throughout all the civilised world, but the pecuniary support it receives is quite inadequate to its usefulness, and it is necessary to remind the inhabitants of London that during a severe winter the Society has to incur a large outlay in finding ice-boats, ladders and ropes, for the protection of those who venture on dangerous ice; also for the wages and equipment of Icemen.

Life Governor TEN GUINEAS. Annual Governor ONE GUINEA.

Donations or Subscriptions will be thankfully received by Capt. I. W. HOME, Secretary, at the Offices, 4, Trafalgar Square, London, W.C.; or by Messrs. DIMSDALE & Co., Bankers, 50, Cornhill.

METROPOLITAN
DRINKING FOUNTAIN & CATTLE TROUGH
 ASSOCIATION.

Supported entirely by Voluntary Contributions.

Offices: VICTORIA HOUSE, 111, VICTORIA ST., WESTMINSTER, S.W.

President—His Grace the DUKE OF WESTMINSTER, K.G., &c. &c.

Chairman of Committee and Treasurer—JOSEPH FRY, Esq.

Secretary—M. W. MILTON.

THIS IS THE ONLY SOCIETY FOR PROVIDING
FREE SUPPLIES OF WATER FOR MAN AND BEAST
 IN THE STREETS OF LONDON.

The relief it affords, both to human beings and dumb animals, is incalculable.

If it had not been for the operations of this society, thousands of people, young and old, who now quench their thirst at the Fountains, would probably be driven to the public house; and if it were not for the Troughs, the amount of suffering amongst the multitude of dumb animals continually crowding round them would be inconceivable.

Half-an-hour spent at one of them during the heat of the summer would do more to secure sympathy and support for the Association than any words which the Committee can use; they therefore very earnestly solicit liberal contributions, and trust the good work will not be permitted to languish for lack of funds.

Contributions may be paid to the Bankers, Messrs. RANSOM, BOUVERIE & Co., Messrs. BARCLAY, BEVAN & Co., or at the Office, to M. W. MILTON, *Secretary*,

FORM OF BEQUEST.

"I give and bequeath the sum of _____ to be paid (free of Legacy Duty), out of such parts of my personal estate as can be lawfully applied for that purpose unto the Treasurer for the time being of a Society called or known by the name of THE METROPOLITAN DRINKING FOUNTAIN AND CATTLE TROUGH ASSOCIATION, to be at the disposal of the Committee for the time being of the said Society,"

FEMALE ORPHAN ASYLUM, BEDDINGTON, SURREY.

INCORPORATED 1800.

ESTABLISHED 1758.

Bankers.— { LONDON AND SOUTH-WESTERN BANK (Bow Branch).
DIMSDALE, FOWLER & Co., 50, Cornhill, E.C.

THESE “Homes,” besides doing a vast amount of general Mission work, now feed, clothe, and provide a Christian and Industrial Training for over 2,000 Poor Children, and have since their formation rescued more than 11,000 Destitute Boys and Girls

In connection with these Institutions there are now **Forty-nine Cottage Homes for Girls**, forming a Village upon the *Family system*, at Ilford, Essex; a **Home for Little Boys** at Jersey; a **House for Babies** at Hawkhurst, Kent (under the Presidency of H.R.H. Princess Mary Adelaide, Duchess of Teck), and another at Bow; and **Three large Homes for Boys and Girls** in the East of London. There is also now being rebuilt a **Hospital for Sick Children**, to contain Sixty Beds, under skilful professional care; and a **Hotel for Young Workmen** who have left the Homes; whilst a **Labour House for Destitute Youths** too old to enter the Boys' Home, and a **Servants' Home for Older Girls** are in operation. An **Emigration Department**, consisting of **Distributing Homes** at Toronto and at Peterborough, Ontario, Canada, and an **Industrial Farm** near Russell, Shell River, Manitoba, is also actively employed.

These “Homes” present some *special features* which distinguish them from all others in the Metropolis, not the least remarkable being that Poor Children are sought for *by night and day* in the Lodging Houses and other miserable haunts of the Homeless Poor.

Really Destitute Children *are always eligible*, and may be sent to the Office at any time. Other cases not so urgent are, if brought under notice, carefully inquired into, and decided upon as speedily as possible.

Children are admitted irrespective of differences of age, sex, or creed, and in spite of physical defects that frequently lead to their being rejected elsewhere.

No voting or promise of money payments is ever required to obtain admission for a suitable, *i.e.*, a destitute case. **There is No Endowment, and the whole work is dependent solely upon the Free-will Offerings of the benevolent.**

£16 will support a healthy child for a whole year in any of the London Homes; £15 will keep a sick Boy or Girl in the Children's Infirmary, or at the Seaside Convalescent Home, for Six Months;

£8 10s. will pay for the complete outfit and passage money of any little one emigrated to the Branch Homes in the Colonies;

£30 will maintain for a whole year a Bed in one of the Infirmarys or Convalescent Homes; or £750 will endow in perpetuity a Name Cot in either of these branches.

The “Homes” are always open to Visitors, except on Saturday afternoon and Sunday; but the best time to see the Stepney Home is between 2.30 and 5 p.m., when the Workshops and Schools are in operation. The Girls' Village can be reached by train from Liverpool Street Station to Ilford, starting at 1.5 p.m. daily.

The Committee earnestly appeal for help from all those who pity destitute children, wherever found.

All Communications should be addressed to

DR. T. J. BARNARDO, 18 to 26, Stepney Causeway, London, E.

[277

EAST LONDON HOSPITAL for CHILDREN

AND DISPENSARY FOR WOMEN,

SHADWELL, E.

FOUNDED 1868.

Patrons—

HER MAJESTY THE QUEEN.

Her Royal Highness PRINCESS LOUISE, Marchioness of Lorne.

Her Royal Highness the PRINCESS MARY ADELAIDE, Duchess of Teck.

His Majesty LEOPOLD II., King of the Belgians.

President—The Earl of STRAFFORD.

Chairman—CHARLES CHESTON, Esq. Vice-Chairman—CHAS. A. PRESCOTT, Esq.

Treasurer—EDWARD S. NORRIS, Esq., M.P.

This Hospital being *almost entirely dependent upon Voluntary Contributions* for its support, the Managing Committee earnestly appeal to the benevolent for that generous help which is so much needed.

Last Year's Receipts, £7,053 1s. 6d. Last Year's Expenditure, £6,803 2s.

During the past year (1st May, 1886, to 30th April, 1887,) **1,018** Children were received as In-Patients, and **14,994** Women and Children were treated as Out-Patients, making a total of **16,012** of the Sick Poor to whom the benefits of this Charity were dispensed. The Hospital maintains **92** Cots and is open for inspection every day from 10 till 6.

Subscriptions and Donations will be thankfully received by the Bankers, The ALLIANCE, Bartholomew Lane, E.C.; Messrs. DIMSDALE, Cornhill; Messrs. COUTTS, Strand; Messrs. PRESCOTT & Co., Threadneedle Street, and by

ASHTON WARNER, Secretary. [59

DR. STEPHENSON'S HOMES.

THE CHILDREN'S HOME & ORPHANAGE

FOR THE RESCUE AND NURTURE OF ORPHAN AND NEGLECTED
CHILDREN OF BOTH SEXES.

Chief Offices: BONNER ROAD, VICTORIA PARK, LONDON, E.

Principal—Rev. T. B. STEPHENSON, B.A., LL.D.

General Treasurers—J. BARLOW, Esq., J.P. and J. E. VANNER, Esq.

Secretary—Mr. J. PENDLEBURY, M.A.

Branches at Edgworth, near Bolton; Hamilton, Ontario; Milton, Kent; Ramsey, Isle of Man; Princess Alice Orphanage, New Oscott, near Birmingham.

In connection with London Branch: Gordon Hall Mission, Children's Mission, Girls' Protection Agency, Girls' Parlour, Servants' Free Registry, Working Girls' Lodge, our own Hospital.

The Home receives Children of any age, of any sect, without election. It is conducted on the Family system; is a Religious and Industrial Institution; is a Training School for Christian workers; is dependent on *Voluntary Contributions*.

Within the last nineteen years, upwards of 2,200 Children have received the benefits of this Institution. About 750 are now in residence.

About £16 will pay the expenses of a child in the Home for a year.

The applications on behalf of Children in the greatest distress, and the utmost moral peril, are very numerous and very distressing.

Cheques and Post Office Orders should be made payable at Chief Office, to

T. B. STEPHENSON, *Principal*. [268]

ASYLUM FOR FATHERLESS CHILDREN.

Reedham, near Caterham Junction, Surrey.

Patron.—Her Most Gracious Majesty THE QUEEN.

Treasurer.—HENRY SPICER, Esq.

Bankers.—Messrs. BARCLAY, BEVAN & Co., 54, Lombard Street, E.C.

Office.—35, FINSBURY CIRCUS, E.C.

This Unsectarian Institution is entirely dependent upon public benevolence, having *no endowment whatever*.

It was founded in 1844 for the Maintenance, Clothing and Education of Fatherless Children of both sexes.

They are received from all parts of the Kingdom, at any age between *three months* and eleven years, and are retained until they are fifteen.

1,500 orphans have already been admitted to its benefits, 310 of whom are still in the Asylum.

Their requirements entail a yearly expenditure of at least £8,000, of which only £2,500 is provided by annual subscriptions.

The large balance is dependent upon donations and legacies. Help from the benevolent public is therefore urgently needed and earnestly requested.

The Secretary will be pleased to give any further information.

JOHN R. EDWARDS, *Secretary*. [39]

Cottage Homes for 300 Homeless Little Boys, Farningham.

Homes for 200 Orphan Boys, Swanley.

500 Homeless and Orphan Little Boys, from all parts of the Kingdom, are Fed, Clothed, Educated, Taught Trades, have Technical Instruction, a good Outfit, and a Start in Life. More than 1,000 sent out.
 Donations, Subscriptions, Collections, Legacies are earnestly solicited. Life and Annual Subscribers have Votes in proportion to their Contributions.

Treasurer—W. H. WILLANS, Esq., 3, Cophall Bldgs., E.C. *Bankers*—Messrs. SMITH, PAYNE & SMITHS, 1, Lombard St., E.C.

All Communications about Boys, Contributions, or other Kind Gifts, to be addressed to the London Offices, Bank Buildings, Ludgate Circus, E.C.

NATIONAL ORPHAN HOME.

In urgent need of £1,000 to pay off loan due to Bankers, and for repairs, &c., required at the Home.

This Orphanage receives Fatherless Girls from all parts of the United Kingdom; maintains, clothes, and gives them a plain education; and trains them to obtain, as soon as of sufficient age, their own living as domestic servants, or in such other respectable avocation as they may be fitted for.

The Committee of this truly excellent Charity earnestly plead for increase of funds to maintain the Fatherless Girls, of whom there are now about one hundred under its care; and they regret to state that, though the Building is capable of receiving another fifty of these poor Orphans, they are obliged to refuse painfully pressing demands for admission.

DONATIONS, especially ANNUAL SUBSCRIPTIONS, will be thankfully received by Messrs. HERRIES AND Co., Bankers, 16, St. James's Street; by the Treasurer; and by the Secretary (to whom all communications should be addressed), at the Office, 12, Pall Mall, S.W. [281

HOME FOR FEMALE ORPHANS

Who have lost both Parents.

GROVE ROAD, ST. JOHN'S WOOD, LONDON, N.W.

Patrons:—The EARL OF DARNLEY and The LORD EBURY.

President:—The EARL OF ABERDEEN.

Bankers:—Messrs. WILLIAMS, DEACON & Co., 20, Birchin Lane, London, E.C.

The Orphanage has been in existence over 100 years for the maintenance and education of Female Orphans who (having lost both parents) are descended from respectable parentage. They are elected by the votes of Subscribers, Donors and Governors every January and July; if not successful on the first occasion, votes are carried over, when they are usually successful at a subsequent election. They are admitted between six and eleven years of age, and are kept free of all expense till 16 years of age, when suitable situations and outfits are provided for them, or they are delivered to their friends.

An Annual Subscription of 10s. 6d., or more, constitutes a Governor, and gives One Vote at each Election for every Half-Guinea subscribed.

A Donation of Five Guineas, or more, constitutes a Life Governor, and gives One Vote at each Election for each Donation of Five Guineas.

A Donation or Collection of 10s. 6d., or more, gives One Vote for every Half-Guinea given or collected during the year.

The Orphanage is managed by the gratuitous services of a Committee of Gentlemen, chosen annually from the Subscribers; Lady Visitors, nominated by the Committee, attend to the domestic arrangements. The only paid officials are the Matron, Schoolmistress, Assistant, Teacher, Cook and Laundress; so that the Funds go directly for the benefit of the Children. They are educated on the principles of the Church of England, and there is Accommodation for 80 in the Home, the average maintained being about 75.

Forms of nomination and all information required will be gladly furnished on application to

The Hon. Secretary, E. B. RANDALL, Esq.,

4, Northwick Terrace, Maida Hill, London, N.W. [23

INFANT ORPHAN ASYLUM, WANSTEAD.

Patron—HER MAJESTY THE QUEEN.

Bankers—Messrs. WILLIAMS, DEACON & Co.

THIS INSTITUTION maintains and educates the Orphans of persons once in prosperity, from their EARLIEST INFANCY until Fourteen or Fifteen years of age.

It has received **3,600** Fatherless Children already. Sixty-three were admitted last year.

Elections will be held in May and November this year. Sixty Children will be elected.

Forms of Nomination can be obtained at the Office.

Nearly the whole of the Yearly Income arises from Voluntary Contributions. Assistance is therefore urgently needed, and will be thankfully acknowledged.

Life Subscription for One Vote...	£5	5s.	od.
" Two Votes	£10	10s.	od.
Annual Subscription for One Vote	£0	10s.	6d.
" Two Votes	£1	1s.	od.

OFFICES—100, FLEET STREET, E.C. HENRY W. GREEN, *Secretary*. [248]

EVELINA HOSPITAL FOR SICK CHILDREN.

SOUTHWARK BRIDGE ROAD, LONDON, S. E.

Supported by Voluntary Contributions.

This Hospital was established in 1869 to receive and treat Sick Children of the Poor, without distinction of creed.

There are 60 cots in the Hospital, and last year 511 children were received as In-Patients, while 10,427 were treated as Out-Patients, the total number of attendances being 35,975.

The Hospital is open every day from 2 till 4 o'clock for the inspection of Visitors.

The Committee of Management urgently appeal for Subscriptions or Donations to meet the necessary expenses of this Charity.

Contributions will be thankfully received by the Secretary at the Hospital, or they may be sent to the Bankers, Messrs. SMITH, PAYNE & SMITHS, 1, Lombard Street, E.C.

Copies of the Annual Report, with full information, will be gladly forwarded on application.

T. S. CHAPMAN, *Secretary*. [242]

DEAF AND DUMB ASYLUM, OLD KENT ROAD, and MARGATE, KENT.

4,841 Children have been admitted. 350 now in the Asylum.

During the last 75 years over 1,882 Children have been apprenticed to various trades, at a cost to the Charity of upwards of £17,528.

Deaf and Dumb Children are eligible for Election in January and July, from Seven to Ten years of age.

Annual Subscription, One Vote, 10s. 6d.; Life Subscription, One Vote, £5 5s. Votes increased with Subscriptions.

Donations and Subscriptions are earnestly solicited.

T. LYNN BRISTOWE, M.P., *Treasurer*.

Office—93, Cannon Street, City, E.C. W. H. WARWICK, *Secretary*. [158]

BRITISH ORPHAN ASYLUM, MACKENZIE PARK, SLOUGH.

For the Maintenance and Education of Destitute Orphans from all parts of the British Empire, of all denominations, whose parents were once in prosperous circumstances. Orphans are admitted between the ages of 7 and 12, and are retained until 15.

The aid of a beneficent British public is earnestly solicited for an Institution which has been carrying on its work of usefulness 60 years, and which is as dependent as ever it was on *Voluntary* support.

Subscriptions and Donations most thankfully received. Annual Subscriptions:—For One Vote, 10s. 6d.; Life Subscription ditto, £5 5s.; for Two Votes, £1 1s.; Life Subscription ditto, £10 10s.

Bankers—Messrs. WILLIAMS, DEACON & Co., 20, Birchin Lane.

Offices: 30, FINSBURY CIRCUS, LONDON, E.C. ALFRED MACKENZIE, Sec. [188

THE GORDON BOYS' HOME (The National Memorial to General Gordon).

Patron.—THE QUEEN.

President.—H.R.H. THE PRINCE OF WALES, K.G.

Chairman of Committee.—Field-Marshal LORD NAPIER OF MAGDALA, G.C.B., G.C.S.I.

New Buildings now open at WEST END, CHOBHAM, near BROOKWOOD.

OFFICES—20, COCKSPUR STREET, LONDON, S.W.

The Home (now established at West End, Chobham), when fully developed, will accommodate about 500 boys, chosen from the homeless and destitute, between the ages of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. The Candidate must be from 14 to 16 years. 2. He must not have developed, nor be likely to develop, such physical infirmity as would disqualify him for service in the Army or Navy, or for a Civil career in the Colonies or elsewhere, which would require active bodily exertion. 3. He must, in the opinion of the Committee, be really poor and unprovided for. 4. He must not have been convicted of crime. Whole or part payment of the sum (£22 per annum) necessary for the boy's maintenance will, in the majority of cases, be required; but *free admission* will be granted to such a number of deserving boys as can be provided for out of the general income of the Home.

There are now 120 Boys in the Home, and this number will be gradually increased as funds will permit.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; Messrs. DIMSDALE & FOWLER, Cornhill, E.C.; THE LONDON AND SOUTH-WESTERN BANK, 27, Regent Street, S.W.; and by the Secretary, at the Office, 20, Cockspur Street, S.W., from whom any further information can be obtained.

G. A. BEATY-POWNALL, Lt.-Colonel, Secretary. [160

ROYAL ALBERT ORPHAN ASYLUM FOR DESTITUTE CHILDREN.

Established on the Non-Canvassing System.

COLLINGWOOD COURT, NEAR BAGSHOT, SURREY.

Patron—HER MOST GRACIOUS MAJESTY THE QUEEN.

220 Destitute Orphans and Fatherless Children are fed, clothed, and educated on Christian principles in this valuable Institution. The girls are trained as servants; the boys are technically taught trades and other industrial pursuits, and turn out first-class workmen.

Funds are urgently needed to carry on and extend the work. The Institution is *entirely dependent upon Voluntary Contributions*, and derives no income from the purchase of votes on Election days. Contributions are earnestly solicited, and will be thankfully received by

Lt. Colonel the Hon. CHARLES ELIOT, *Chairman*.

SAMUEL HOARE, Esq., M.P., *Treasurer*.

Offices: 62, King William Street, E.C.

RICHARD WITHERBY, *Secretary*.

[163

LONDON ORPHAN ASYLUM, WATFORD

(FORMERLY AT CLAPTON). INSTITUTED 1813.

Office—21, GREAT ST. HELEN'S, BISHOPSGATE STREET, E.C.

Under the Patronage of Her Most Gracious Majesty.

For the Maintenance, Clothing and Education of Fatherless Children, who are respectably descended, but without means adequate to their support.

Orphans are eligible between the ages of seven and eleven, being retained until they are fifteen.

Over 5,000 Orphans have been benefited by this Society.

There is accommodation for 600 Orphans, but, owing to want of funds, there are many vacancies at the present time.

This Charity is dependent on *Voluntary Contributions* for meeting Nine-Tenths of its expenditure.

ANNUAL SUBSCRIPTION—For One Vote, 10s. 6d.; for Two Votes, £1 1s. LIFE SUBSCRIPTION—For One Vote, £5 5s.; for Two Votes, £10 10s.

ARTHUR R. CAPEL, *Treasurer*.

JAMES ROGERS, *Secretary*.

VICTORIA HOSPITAL FOR CHILDREN,

Queen's Road, Chelsea, S.W., & Churchfields, Margate.

Patroness—H.R.H. THE PRINCESS LOUISE (Marchioness of Lorne).

President—The Right Hon. THE EARL CADOGAN.

Chairman of Committee—HARVIE M. FARQUHAR, Esq.

Treasurer—MARTIN R. SMITH, Esq.

The Hospital has relieved, since it was established in 1866, to 31st December, 1885,
7,411 In-Patients, and 326,608 Out-Patients.

Has now 74 Beds, viz., 60 at the Hospital and 14 at the Convalescent Branch at Margate.
Is quite *Unendowed, and entirely dependent on Voluntary Support.*

Is *National* in its character, Patients from all parts, and of every religious denomination
being admitted.

Is in *urgent need of Funds.*

Is *Open Daily* for the inspection of Visitors from 2 till 4 o'clock (Winter), and from 2 till
5 o'clock (Summer).

THE WORK OF THE HOSPITAL FOR THE YEAR 1885:—

In-Patients treated	561	In and Out-Patients treated at the Hospital	
Of whom were cured and relieved ..	304—157	and afterwards sent to the Convalescent	
Died.. .. .	61	Home at Margate	168
Incurable	39	Out-Patients treated	9,433
		Representing Attendances	37,556

Subscriptions and Donations will be most thankfully received and acknowledged by
Captain BLOUNT, R.N., Secretary, at the Hospital; and by the Bankers, Messrs. HERRIES
& Co., 16, St. James's Street, S.W., and Messrs. SMITH, PAYNE & SMITHS, 1, Lombard
Street, E.C. [141]

THE HOSPITAL FOR SICK CHILDREN,

GREAT ORMOND STREET, BLOOMSBURY,

And CROMWELL HOUSE, HIGHGATE.

Established 1852.

Chairman—Lord ABERDARE.

Lady Superintendent—Miss C. J. WOOD.

The Committee very earnestly solicit Contributions towards the
current expenses of the Hospital. 178 Beds are maintained, viz.:—
126 Beds at the Hospital, and 52 at the Convalescent Branch, High-
gate. Upwards of 1,000 Out-patients are seen weekly at Great Ormond
Street.

The Charity is *not endowed*, but depends *entirely upon*
Voluntary support.

ADRIAN HOPE, *Secretary.* [220]

ROYAL ASYLUM OF ST. ANNE'S SOCIETY.

SCHOOLS—RED HILL, SURREY.

(Removed from Streatham Hill.)

OFFICE—58, GRACECHURCH STREET, E.C.

OBJECTS.—Orphans and other necessitous Children, born in Prosperity, whose parents (Clergymen, Naval or Military Officers, Members of the Legal, Medical and other Professions, Merchants or Traders) are now in Adversity.

ADVANTAGES.—Home, Clothing, Maintenance and Education. Forms of Nomination can be obtained at the Office. Funds are much needed, as the Institution is Unendowed. Children eligible under the rules can be admitted by purchase.

Treasurer—Sir R. N. FOWLER, Bart., M.P., Alderman.

Bankers—{ Messrs. BARCLAY & Co., 54, Lombard Street, E.C.
{ Messrs. DIMSDALE, FOWLER & Co., 50, Cornhill, E.C.

Half-Yearly Elections in June and December.

Life Subscriptions, £10 10s. with Two Votes; £5 5s. with One Vote. Annual ditto, £1 1s. with Two Votes; 10s. 6d. with One Vote. R. H. EVANS, Secretary. [179]

HOME FOR INCURABLE CHILDREN,

2, MAIDA VALE, W.

Patrons—H.R.H. The PRINCESS CHRISTIAN; H.R.H. The DUCHESS OF CONNAUGHT;

H.R.H. The PRINCESS MARY, Duchess of Teck.

President—H.R.H. The DUKE OF CONNAUGHT AND STRATHEARN, K.G.

Treasurer—F. AYLMEY LLOYD, Esq.

Bankers—Messrs. HOARE, 37, Fleet Street, E.C.; ALLIANCE BANK, 239, Regent Street, W.

This Institution, founded in 1875, was the first of its kind in the Metropolis, and, it is believed, in the United Kingdom. It is still nearly the only one devoted exclusively to the maintenance, care and medical treatment of Children (up to the age of sixteen) suffering from Chronic or Incurable Complaints of an aggravated character. It combines the advantages of a Home and a Hospital.

One hundred and fourteen Children have been received, and thirty are still under treatment. A small Weekly Payment is required for each child; but the expenses of such a Charity are necessarily very large, and the Committee appeal earnestly for help in carrying on and extending the work. Visiting hours, 3 to 5 p.m. daily. MISS COLEMAN, Acting Sec. [174]

NORTH EASTERN HOSPITAL FOR CHILDREN,

HACKNEY ROAD, E.

CONVALESCENT HOME, Freemasons' Road, Croydon.

President—J. G. BARCLAY, Esq. | Chairman—Lord F. J. FITZROY. | Treasurer—W. L. BARCLAY, Esq.

Bankers—Messrs. BARCLAY, BEVAN & Co., 54, Lombard Street, E.C.

This Hospital was established in 1867 for the Relief of the Sick Children of the Poor. It is situated in the densely-populated districts of Shoreditch, Bethnal Green, Hackney, Haggerston, and Hoxton. 711 In-Patients and 14,083 Out-Patients (all Children under 12 years of age) were relieved during 1886. The attendances of Out-Patients amount, on the average, to nearly 1,000 each week.

The New WARDS, opened by H.R.H. the DUCHESS OF CONNAUGHT, are in full operation, and the 55 Beds always occupied; and there is still an increasing demand for much larger accommodation. The Committee therefore make an Earnest Appeal for Aid to enable them to maintain and increase the work of Relief carried on at this Hospital. Annual Subscribers of £2 2s. may recommend One In-Patient and Five Out-Patients yearly. Donors of Twenty Guineas become Life Governors, and are entitled to a similar number of Tickets annually for Life. Collecting Boxes for Children may be had on application to the Secretary.

City Office : 27, CLEMENT'S LANE, LOMBARD ST., E.C. ALFRED NIXON, Secretary. [139]

FIELD LANE REFUGES AND RAGGED SCHOOLS, &c.

Vine Street, Clerkenwell Road. FOUNDED 1842.

President—Right Hon. the EARL OF ABERDEEN. Treasurer—WILFRID A. BEVAN, Esq., 54, Lombard St., E.C.

Bankers—Messrs. BARCLAY, BEVAN & CO., 54, Lombard St., E.C.; Messrs. RANSOM & CO., 1, Pall Mall East, S.W.

The Committee make an earnest Appeal for a continuance of support.

Maintains and Benefits upwards of 3,000 Weekly.

His Royal Highness the DUKE OF CONNAUGHT has characterised this work as "A perfect network of charitable operations—an immense boon to the poor."

The late EARL OF SHAFTESBURY, who was for upwards of forty years its president, said, in his last speech concerning it:—"The institution has conferred, and is conferring, an enormous benefit on the public at large."

Supported by Voluntary Contributions. Funds are urgently needed to sustain the operations of the Institution.

Contributions will be thankfully received by the Treasurer, Bankers, or by

PEREGRINE PLATT, Secretary, Vine Street, Clerkenwell Road. [42]

QUEEN CHARLOTTE'S LYING-IN HOSPITAL

And Midwifery Training School,

MARYLEBONE ROAD, LONDON, N.W.

FOUNDED 1752. INCORPORATED BY ROYAL CHARTER, 1885.

Dependent upon Charity for Support.

Patron.—Her Majesty THE QUEEN. *Vice-Patron.*—H.R.H. The PRINCESS OF WALES.

President.—The Right Hon. Viscount PORTMAN.

Treasurer.—ALFRED C. DE ROTHSCHILD, Esq.

OBJECTS OF THE CHARITY.

1. To provide an Asylum for the Delivery of Poor Married Women; and also of Deserving Unmarried Women *with their first child.*
2. To provide skilled Midwives to attend poor Married Women in their Confinements at their own homes.
3. The Training of Medical Pupils, Midwives and Monthly Nurses.

This is not merely a Hospital for poor women resident in the Metropolis. Its work is limited to no district; the help it affords is open to all, and Patients are constantly being received from remote parts of the country.

It is the only Lying-In Hospital in the N. and N.W. Divisions of the Metropolis, and the demands upon it by the poor of these Districts is very great.

The long-continued distress among the labouring population has caused a very great increase in the number of poor women applying for admission, so much so that the Hospital Building has been found too small to accommodate them, and it has therefore been enlarged by the Construction of a New Wing. This Extension was opened by their Royal Highnesses the PRINCE and PRINCESS OF WALES on June 25, 1886, and increases the number of beds from 54 to 81.

The work cost £5,000, and in order to meet this expenditure nearly half the funded property of the Charity had to be sold. *Contributions* towards the *Commemoration Fund* for making good this loss of Capital, and *Annual Subscriptions* to enable the Governors to meet the augmented yearly expenditure necessarily entailed by the enlargement of the Hospital, are most earnestly entreated.

A Midwifery Training School is incorporated with the Charity, which, being *the largest Lying-In Hospital in Great Britain*—receiving nearly 1,000 In-Patients annually, besides having a large Out-Patient maternity—possesses exceptional advantages for training purposes. During 1886, sixty-six Medical Pupils were admitted to the practice, and twenty-four Midwives and one hundred and thirty-nine Monthly Nurses were trained.

For full particulars respecting the Training School, Fees, &c., application should be made by letter to the undersigned.

G. OWEN RYAN, *Secretary.*

FORM OF BEQUEST OF MONEY, &c.

I give and bequeath to the Treasurer or Treasurers for the time being of a Corporation called the President and Governors of Queen Charlotte's Lying-in Hospital, Marylebone Road, N.W., the sum of *
to be applied in and towards carrying on the charitable objects of that Institution; and I direct that the said sum be paid, free of Legacy Duty, and that the receipt of the Treasurer for the time being of the said Corporation shall be a sufficient discharge to my Executors for the payment of the same.

* *The sum to be expressed in words at length.*

[309

CITY OF LONDON LYING-IN HOSPITAL, CITY ROAD, E.C.

Patroness—Her Grace ELIZABETH, DUCHESS OF WELLINGTON.

Treasurer—A. J. ROBERTS, Esq. *Bankers*—Messrs. ROBERTS, LUBBOCK & Co.

This Hospital, which was Instituted in 1750, affords Medical and Surgical treatment to poor Married Women, both as In and Out Patients, also for the Training of Midwives and Monthly Nurses.

Patients delivered last year, 1,587; delivered in the Hospital since 1750, 55,400.

The average expenditure exceeds the reliable Income by over £500.

New Annual Subscriptions especially solicited.

R. A. OTHWAITE, *Secretary.* [190

THE NEW HOSPITAL FOR WOMEN, 222, MARYLEBONE ROAD, N.W. *THE PHYSICIANS ARE WOMEN.*

Treasurer—Mrs. WESTLAKE, River House, Chelsea Embankment.

Hon. Sec.—Miss VINCENT, 6c, Hyde Park Mansions, W.

Physicians—Mrs. ANDERSON, M.D., Mrs. ATKINS, M.D., Mrs. MARSHALL, M.D., and Mrs. DE LA CHEROIS, L.K.Q.C.P.I. *Assisted by a Consulting Staff of Physicians and Surgeons.*

Assistant Physician—Mrs. DOWSON, L.K.Q.C.P.I. and L.R.C.S.I.

This Hospital is established to enable poor women to be attended by *fully qualified Doctors of their own sex.* Twenty-six Beds are made up. During the past year 236 Patients were treated in the wards, and 4,635 attended as Out-Patients. In-Patients pay a weekly amount, according to their means. Out-Patients 6d. on entrance, and 2d. each visit afterwards.

The Hospital being Unendowed, Donations and Subscriptions are earnestly solicited.

Bankers—BANK OF ENGLAND, Burlington Gardens, W.

MARGT. M. BAGSTER, *Secretary.* [221

ESTABLISHMENT FOR GENTLEWOMEN DURING TEMPORARY ILLNESS. 90, HARLEY STREET, W.

Under the Patronage of HER MAJESTY THE QUEEN, H.I.H. and H.R.H. the DUKE and DUCHESS OF EDINBURGH and the ARCHBISHOP OF CANTERBURY.

This House is open for the reception of Patients requiring Medical and Surgical treatment, which is here given gratuitously by Eminent Practitioners. The weekly charges for Board and Lodging, with Nursing and Attendance, vary from £1 1s. to £2 5s. 6d.

Applications for admission to be addressed to Lady Superintendent, 90, Harley Street, W.

Additional Subscriptions and Donations will be most gratefully received. [232

HOMES OF HOPE, 4, 5 & 6, Regent Square, Gray's Inn Road, London, W.C.

The Homes were established for the less degraded class of Penitent Young Women.

Special efforts are made on behalf of Mothers with their first infants, who are really the most hopeful class of the fallen, and are generally greatly to be pitied.

A Home has been opened for the reception of such young women, before they become mothers, as are unfitted, from their previous good character and position, to mix with others. The applications for admission are painfully urgent.

Funds are greatly needed.

WM. HORNIBROOK, *Secretary.*

Bankers—LONDON & WESTMINSTER, Bloomsbury Branch, High Holborn. [175

The HOSPITAL for WOMEN

SOHO SQUARE, LONDON, W.

FOUNDED 1842. INCORPORATED BY ROYAL CHARTER 1887.

The Hospital for Women was the first established, in this or any other country, exclusively for the treatment of Diseases peculiar to Women.

This National Institution is entirely dependent upon *Voluntary Contributions*, which are most urgently needed.

In addition to the Free Wards, the New Wing, opened in 1869, is available for those able to contribute a weekly sum towards their maintenance.

Patron—H.R.H. THE PRINCE OF WALES, K.G.

President—THE DUKE OF WESTMINSTER, K.G.

Bankers { Messrs. BARCLAY, BEVAN & Co., 54, Lombard Street, E.C.
Messrs. RANSOM, BOUVERIE & Co., 1, Pall Mall East, S.W.

DAVID CANNON, *Secretary*. [180]

THE LONDON FEMALE PENITENTIARY, HIGH STREET, STOKE NEWINGTON, N.

(Founded at Pentonville, 1807.)

Patron—HER MAJESTY THE QUEEN.

This is the oldest Charity but one in the Metropolis for the Rescue and Reformation of fallen young women. It is perfectly unsectarian in constitution and management.

The Home has accommodation for nearly 70 inmates and is always full. It trains, feeds and clothes the objects of its care; procures for each deserving inmate, when she quits the Home, a respectable situation; provides an Outfit, and continues to recognise faithfulness in duty by suitable encouragement and rewards.

It has neither endowment, invested funds nor State aid to fall back upon, but is dependent on Annual Subscriptions, Donations and Legacies. The Industrial earning of the inmates, although providing 50 per cent. of the expenditure, falls short of the requisite amount by nearly £1,000 per annum.

Contributions will be thankfully received by the Bankers, BARCLAY, BEVAN & Co., 54, Lombard Street, E.C.; RANSOM, BOUVERIE & Co., 1, Pall Mall East, S.W.; or by

W. EDWIN PAGE, *Secretary*.

Office: 191, High Street, Stoke Newington, London, N.

[244]

BRITISH ASYLUM for DEAF and DUMB FEMALES

Office:—27, RED LION SQUARE, W.C.

LOWER CLAPTON.

ESTABLISHED 1851. (Certified under 25th and 26th Vict., c. 43.)

Under the Patronage of H.R.H. the PRINCE OF WALES, K.G., H.R.H. the PRINCESS OF WALES, & *President*—His Grace the ARCHBISHOP OF CANTERBURY.

Treasurer—The Hon. PASCOE CHARLES GLYN. *Bankers*—Messrs. GLYN, MILLS & Co., Lombard St.

Secretary—W. T. HILLYER, Esq.

OBJECTS.—a. To receive, educate, or continue the education of Adult Female Deaf Mutes from 10 years of age.

b. To give industrial training and religious instruction, with a view to enable Female Deaf Mutes to gain a livelihood and occupy some useful position in life.

c. To provide a Home for those who, from incapacity, infirmity, or age, are unable to do anything toward s their own maintenance.

An Annual Election of Inmates, free for three years, takes place in June. Inmates are also admitted by payment of a small annual amount for maintenance and instruction.

[287]

SONS OF THE CLERGY CORPORATION.

Founded A.D. 1655. Incorporated 1678.

Corporation House, 2, Bloomsbury Place, Bloomsbury Square,
LONDON, W. C.

Sums Paid in 1886:—

To Clergymen—Temporary Grants in time of need...	...	£4,443
To Clergy Widows—Pensions and Donations	...	£8,315
To Single Daughters of Clergymen—Pensions and Donations	£6,577	
To Clergy Children for Education, Outfits, and Apprentice Fees (102 being Orphaans)	...	£4,691 10s.
		<u>£24,026 10s.</u>

The total number of Grants and Pensions in 1886 was 1,609.

Annual Subscriptions and Donations are urgently needed.

Legacies also form a most important feature in the annual receipts of this old-established Charity.

W. PAGET BOWMAN, Registrar.

[186

HOME MISSIONS OF THE CHURCH OF ENGLAND CHURCH PASTORAL AID SOCIETY.

INSTITUTED 1836.

Vice Patrons—THE LORD ARCHBISHOP OF CANTERBURY; THE LORD ARCHBISHOP OF YORK.
President—J. D. ALLCROFT, Esq.

This, the oldest of the Home Missionary Societies of the Church of England, was founded shortly before the beginning of Her Majesty's reign. It has spent over £3,000,000 (exclusive of sums locally raised and paid to complete stipends) in Grants for the support of Clergy and Lay Agents in poor and populous parishes. The number of additional services held by these has been:—

SUNDAYS	1,534,409	COTTAGE LECTURES	1,375,734
WEEK-DAYS	937,795	BIBLE CLASSES	1,323,656

380 entirely new parishes have been worked up and formed by the labours of the curates and lay agents supported by this Society. In most of these cases new churches, with parsonages and schools, have also been built.

The Society now makes 767 Grants—619 for Clergy and 148 for Lay Agents—in 636 Parishes, with a population of over 5,000,000, at a cost, if all were occupied, of £58,000. But there are still a HUNDRED urgent cases on the list, which cannot be helped for want of means. The Committee EARNESTLY APPEAL for FURTHER SUPPORT.

Secretary—Rev. JAMES I. COHEN, M.A. Lay Secretary—E. DAVIDSON, Major General, R.E.

Offices—Falcon Court, 32, Fleet Street, London, E.C. Bankers—WILLIAMS, DEACON & CO., Birchin Lane, London. [22

OUR SAILORS.

S. ANDREW'S WATERSIDE CHURCH MISSION FOR SAILORS, FISHERMEN AND EMIGRANTS.

ESTABLISHED 1864.

Patrons—His Grace the ARCHBISHOP OF CANTERBURY and 24 BISHOPS.

Trustees.

Right Hon. W. H. SMITH, M.P. | Admrl. Sir E. A. INGFIELD, K.C.B. | Rev. CANON SCARTH.

Grants are made to the Incumbents of all the large dock parishes, viz.: London, Victoria, Royal Albert, Millwall Docks, Surrey Commercial Docks; also to Tilbury and Gravesend. Home ports helped: Liverpool, Grimsby, Brixham, Devonport, Sharpness and Hastings. Foreign stations to which money grants have been made: Port Said, Bombay, Hong Kong, Japan, Trieste, Constantinople, Palermo, Genoa, Dieppe, Odessa, Newfoundland, Rangoon, Pernambuco, Smyrna, Syra, &c.

FUNDS are much needed to keep up this extensive work. Books, Magazines and Illustrated Papers are most acceptable for Ship Libraries, and for distribution on board ship; also warm Clothing for Emigrants.

BANKERS.—London and County.

No. 65, Fenchurch Street, London, E.C.

WILLIAM EVAN FRANKS, Secretary. [69

CHURCH OF ENGLAND SCRIPTURE READERS' ASSOCIATION.

INSTITUTED IN 1844.

Patrons—The ARCHBISHOP OF CANTERBURY and the BISHOPS OF LONDON, WINCHESTER, ROCHESTER, and ST. ALBANS.

Treasurer—Sir WALTER R. FARQUHAR, Bart.

This Association was formed for the employment of godly and qualified Laymen in the work of the Church in the Metropolis, and is now supplying over 120 experienced and faithful workers to visit from house to house, and room to room, bringing the Word of God to the poor, the sick, the ignorant and the neglected. 112 populous London parishes are thus assisted, many of them among the poorest in the Metropolis.

Under the direction of the Clergy, the Readers also conduct Bible Classes and Cottage Lectures, report cases of sickness and distress, assist in Temperance work, Open-air Services, Prayer Meetings and Tract Distribution, and help generally in the Spiritual work of the parishes to which they are appointed.

Additional Help is Greatly Needed, and annual Subscriptions and Donations, however small, are earnestly solicited, especially from residents in more favoured parishes in London and the Suburbs.

Office: 56, HAYMARKET, S.W. T. MARTIN TILBY, *Lay Secretary*.
[278]

LONDON COTTAGE MISSION

Instituted in the year 1870.

Offices: 44, FINSBURY PAVEMENT, LONDON, E.C.

This Society is supported by Voluntary Contributions, and is established for the Religious, Intellectual, and Social Elevation of the Working Classes, by means of Gospel Services held in Mission Halls, Tents, Chapels or Churches, either rented, purchased, or built specially for the said purpose; Cottage Meetings held in the homes of the poor or otherwise, Addresses to Tramps and others in Lodging-house Kitchens, Open-Air Preaching, Special Services for Children, Sunday Schools, Mothers' Meetings, Maternity Societies, Clothing and other Clubs, Bible Classes, House to House Visitation, Tract Distribution, Working Men's Institutes, with Reading and Coffee Rooms, Lectures on Self-help, Thrift, &c., and other Social and Religious Subjects, Entertainments and Concerts, Temperance Societies, Bands of Hope, and Excursions into the country; also

For the benevolent and charitable purpose of Relieving the Sick and Destitute Poor by means of Temporary or Permanent Pecuniary Aid in deserving cases, weekly Irish-stew Dinners to poor Children, and gratuitous Distribution of Food, Fuel, and Clothing.

Also supports a large Convalescent and Country Home for poor Children, with nearly One Hundred Beds, at Halls Green Farm, Sevenoaks Weald, Kent.

Also supports the OUTCASTS' HAVENS, being Night and Day Refuges for Homeless and Destitute Boys and Girls, situate at 311 and 313, Burdett Road, and 1a, Dod Street, Limehouse, accommodating over 400 poor Children.

Also supports a Working Lads' Home, situate in Aston Street, Limehouse.

FUNDS ARE URGENTLY NEEDED to develop the good work the Mission has in view. Subscriptions and Donations will be gratefully received and acknowledged by Miss F. NAPTON, the Lady Superintendent, 304, Burdett Road, Limehouse, E.; the Bankers, THE LONDON and SOUTH-WESTERN BANK, 7, Fenchurch Street, E.C.; and by WALTER AUSTIN, *Managing Director*, 44, Finsbury Pavement, London, E.C. [293]

LONDON CITY MISSION

Funds Urgently Needed.

Bankers—Messrs. BARCLAY, BEVAN & Co., 54, Lombard St., E.C.

The Object of this Society, established 1835, is to evangelise the masses in the Metropolis, by carrying the Gospel to every house, garret, and lodging-house, and beseeching men to be reconciled to God through our Lord and Saviour Jesus Christ. The number of Missionaries is now 474. Every Missionary visits once a Month about 650 families, or 2,900 persons. They also meet constantly about Half a Million Working Men in Factories and elsewhere.

Special Missionaries have been appointed to various classes, amongst others to the Bakers, night and day Cabmen, Omnibus men, Canal boatmen, Soldiers, Sailors, and the Criminal classes, besides Foreigners from all parts of the world.

SUMMARY OF WORK DURING 1886-1887.

Visits and calls paid	3,343,248
New Communicants	1,828
Drunkards reclaimed	2,084
Induced to attend Public Worship	5,485
Adults visited who died	7,394
Of whom visited by the Missionary only	1,870

A large addition to the number of Missionaries is needed at once. It is estimated that over a Million of the Working Classes in London never attend any place of Public Worship.

All Communications to be addressed and Subscriptions sent to the Secretaries, 3, Bridewell Place, London, E.C.

F. A. BEVAN, *Chairman.* [161]

THE ARMY SCRIPTURE READERS' & SOLDIERS' FRIEND SOCIETY.

4, Trafalgar Square, Charing Cross, London, W.C.

Patrons—His Grace the ARCHBISHOP of CANTERBURY. Rev. Dr. EDGHILL, Chaplain-General.

President—General Sir A. J. LAWRENCE, K.C.B.

Treasurer—V. G. M. HOLT, Esq., 17, Whitehall Place.

Extract of Rule I.—The Sole object of this Society is to spread the saving knowledge of Christ among our Soldiers.

It has now 84 Scripture Readers on the list of the Society, of whom 11 are abroad and 73 at Home.

Contributions towards the work in which the Society is engaged will be thankfully received by the Treasurer, V. G. M. HOLT, Esq., 17, Whitehall Place; at the NATIONAL PROVINCIAL BANK OF ENGLAND, 212, Piccadilly, W.; and by the Secretary, Mr. WILLIAM A. BLAKE, at the Offices, No. 4, Trafalgar Square, W.C.; or by the *Hon. Secretary*, Colonel J. W. F. SANDWICH. [157]

Funds are urgently needed to carry on the operations of the Society.

The object of the Society is to afford to short-termed prisoners an opportunity of retrieving their character, and obtaining honest employment on their discharge from prison.

Cheques should be crossed Messrs. Drummond, Charing Cross, S.W., and made payable to T. RALPH PRICE, Sec. The "Discharged Prisoners' Home," under the superintendence of Mr. WILLIAM LANGMAID, the Society's Agent, who resides on the premises, is situated at 22, Stock Orchard Crescent, Caledonian Road, N. [41]

THE BAPTIST MISSIONARY SOCIETY,

Formed in 1792.

Its present sphere of labour embraces Continental India and the Island of Ceylon, China, Hayti, Trinidad, the Bahamas, Central Africa, Norway, France, Italy, and Japan. It also supports an Institution for Training Native Agency in the Island of Jamaica.

Besides preaching the Gospel, the Society has been honoured as the instrument of translating and printing the Holy Scriptures, either wholly or in part, in about FORTY-SEVEN of the Indian Languages, the Chinese, the Singhalese and the Dualla on the coast of Africa.

Treasurer—W. R. RICKETT, Esq.

General Secretary—ALFRED HENRY BAYNES, Esq., F.R.A.S.,
to whom all Money Orders should be made payable.

Bankers—Messrs. BARCLAY, BEVAN, TRITTON & Co., 54, Lombard Street, E.C.

[40]

CITY OF LONDON TRUSS SOCIETY.

35, FINSBURY SQUARE.

For the Relief of the Ruptured Poor throughout the Kingdom.

ESTABLISHED 1807.

Patron—H.R.H. The PRINCE OF WALES, K.G.

The patients, numbering about 9,000 in the year, are of both sexes and all ages—from Children a month old to Adults over 90. Upwards of 431,000 Patients have been relieved since the formation of the Charity.

Subscriptions and Donations will be thankfully received by the Society's Bankers, LLOYD'S, BARNETT'S & BOSANQUET'S Bank (Limited), 72, Lombard Street; and by the Secretary, at the Institution.

JOHN NORBURY, *Treasurer*.

JOHN WHITTINGTON, *Secretary*. [131]

THE SURGICAL AID SOCIETY.

Office: SALISBURY SQUARE, FLEET STREET, E.C.

President—The Right Hon. the EARL OF ABERDEEN.

This Society was established in 1862, to supply Trusses, Elastic Stockings, Artificial Limbs, &c. and every other description of mechanical support to the poor, without limit as to locality or disease.

WATER BEDS and INVALID CARRIAGES are Lent to the Afflicted.

It provides against imposition by supplying the appliance on the certificate of a Surgeon only. By special grants it ensures that every deserving applicant shall receive prompt assistance.

90,132 APPLIANCES HAVE ALREADY BEEN GIVEN.

Annual Subscription of £0 10 6 } Entitles to two recommendations
Life Subscription of 5 5 0 } per annum.

Contributions are earnestly solicited. *Bankers*—Messrs. BARCLAY & Co., Lombard Street.
WILLIAM TRESIDDER, *Secretary*. [166]

ST. LUKE'S HOSPITAL for LUNATICS, OLD STREET, LONDON, E.C.

Established A.D. 1751.

President—H.R.H. the DUKE OF CAMBRIDGE, K.G. *Treasurer*—ARTHUR POWELL, Esq.

THIS HOSPITAL was established for the care and cure of the Insane of those Classes of Society for whom no legal provision has been made. Patients are admitted either gratuitously or upon payment of a small weekly contribution, according to their circumstances.

Since the opening of the Hospital up to the 31st Dec., 1886, 23,373 Patients have been admitted, of whom upwards of 10,000 have been discharged cured.

The Committee most earnestly appeal for Donations in support of this Institution, which has for so long a period afforded valuable assistance and alleviation in this the heaviest affliction which it has pleased Divine Providence to inflict upon His creatures. A Governor's Qualification is 30 Guineas. A Subscriber of 10 Guineas, undertaking to contribute like amounts in each of the two years next following—so completing the requisite qualification—may be provisionally chosen a Governor, and be eligible at once to serve on the Committee.

PERCY DE BATHE, M.A., *Secretary*. [76]

HOSPITAL for DISEASES of the SKIN

(Removed from New Bridge Street, Blackfriars),

President—Sir JOHN LUBBOCK, Bart., M.P., F.R.S., &c. JOHN DEACON, Esq., Treasurer.
Bankers—Messrs. WILLIAMS, DEACON & Co., 20, Birchinn Lane, E.C.

This Hospital, the oldest and considerably the largest of its speciality in England, is the parent of all the Eye Infirmarys throughout the British Dominions. The admission is entirely free to the afflicted poor, all whose wants are gratuitously and liberally supplied.

A LIFE SUBSCRIPTION, which is £10 10s., or an Annual Subscription of not less than £1 1s., entitles the Donor to all the privileges of a Governor.

Annual Subscriptions and other Contributions will be thankfully received by the Bankers, or the Secretary at the Hospital, by whom all further needful information will be promptly supplied on application. ROBERT J. NEWSTEAD, Secretary. [178]

ROYAL WESTMINSTER OPHTHALMIC HOSPITAL.

KING WILLIAM STREET, WEST STRAND, W.C.

Founded in 1816 by the late G. J. GUTHRIE, Esq., F.R.S.

Patrons { Her Majesty THE QUEEN.
 { H.R.H. THE PRINCE OF WALES, K.G.

Chairman—Sir RUTHERFORD ALCOCK, K.C.B. Treasurer—Admiral LEVESON E. H. SOMERSET.

This Hospital receives the indigent poor on their own application without Letters of recommendation.

It has Thirteen Wards capable of accommodating fifty patients, but owing to the urgent want of Funds the Committee are compelled to exclude many distressing cases constantly pleading for admission.

Annual Subscriptions and Donations will be thankfully received by Messrs. COURTIS and Co., Strand; Messrs. DRUMMOND, Charing Cross, or at the Hospital by T. BEATTIE-CAMPBELL, Secretary. [24]

THE ROYAL ASSOCIATION IN AID OF THE DEAF AND DUMB

(Saint Saviour's Church, Lecture and Reading Room),
419, OXFORD STREET, LONDON, W.

Patron.—HER MAJESTY THE QUEEN.

President—The LORD BISHOP OF LONDON.

Treasurer—EDMUND C. JOHNSON, Esq.

Hon. Secretary—ARTHUR H. BATHER, Esq.

Chaplain—The REV. CHARLES RHIND.

Secretary—MR. THOMAS COLE.

Bank—THE LONDON AND WESTMINSTER, Stratford Place, W.

THE OBJECTS OF THIS CHARITY are to promote the spiritual and temporal welfare of the Deaf and Dumb—about 2,000 of whom reside in London—by the following means:—

1. To provide extended Religious and Secular Instruction among the Deaf and Dumb. The Deaf and Dumb are beyond the reach of ordinary ministerial agency for public religious instruction. The only means adapted to their condition is a *special provision* in the finger-and-sign language. This Association provides at present fourteen services per week in *eight parts of London*, besides Lectures, Classes, &c.
2. To visit the Deaf and Dumb at their own Homes.
3. To assist Deaf and Dumb persons in obtaining employment.
4. To relieve, either by gifts or loans of money, necessitous and deserving Deaf and Dumb Persons.
5. To encourage the early training of Deaf and Dumb children preparatory to their admission into Educational Institutions.

The Committee ask whether the reader will not, in *grateful acknowledgment for the great blessings of hearing and of speech*, give an Annual Subscription to this Society?

SUBSCRIPTIONS and DONATIONS may be paid to the London and Westminster Bank, Stratford Place, W.; or to the Secretary, Mr. THOMAS COLE, at 419, Oxford Street, London, W.

[144]

EXTENSION

OF THE

HOSPITAL for CONSUMPTION, BROMPTON.

The pressure for admission has rendered an Extension a long-felt necessity. A **NEW BUILDING** has been erected (opposite the existing Hospital), containing

137 ADDITIONAL BEDS,

making a total of 321 Beds, all of which are fully occupied.

The ordinary expenditure of the Parent Hospital is nearly £17,000 a year, and the Maintenance of the New Building increases the expenses to over £24,000 a year. The Charity being *unendowed*, is dependent on Donations, Annual Subscriptions and Legacies.

Contributions are therefore much needed, and are earnestly solicited in aid of the funds.

Treasurer—The EARL of LEVEN and MELVILLE.

HENRY DOBBIN, *Secretary*.

Bankers—Messrs. WILLIAMS, DEACON & Co.

THE CANCER HOSPITAL

(FREE, FOUNDED 1851).

BROMPTON, LONDON, S.W.

The late ARCHBISHOP OF CANTERBURY, in a Sermon preached by his Grace on behalf of this hospital, said: "There is no disease more pitiable than that to which this Institution is specially devoted. Could the greatness of the suffering be laid before you, no one endued with the feelings of humanity could resist the spectacle; they would think all they possessed a trifling sacrifice if, at such a price, they could mitigate such misery."

The only special refuge for poor persons afflicted with this fearful disease, *who are admitted free without letters of recommendation.*

Diet required to be most generous and medicines of the most expensive kind.

Out-Patients are seen on their own application daily, at 2 o'clock, except Sunday.

New Annual Subscriptions & Donations are urgently solicited.

Hon. Treasurer : GEORGE T. HERTSLET, Esq., St. James's Palace, S.W.

Bankers : Messrs. COUTTS & Co., Strand, W.C.

W. H. HUGHES, *Secretary.*

FORM OF BEQUEST.

"I give and bequeath unto the Treasurer for the time being of THE CANCER HOSPITAL, situate in the Fulham Road, Brompton, London, Middlesex, the sum of
(free of Legacy Duty), to be paid out of my personal estate not charged on land, to be applied towards carrying on the charitable design of the said Institution."

N.B.—Devises of Land or Bequests of Money charged on Land are void by the Statute of Mortmain. [147]

LONDON FEVER HOSPITAL,

For the treatment of Scarlet Fever, Typhus, Typhoid, Diphtheria, Measles, and all other Infectious Fevers.

Patron—H.R.H. THE PRINCE OF WALES.

President—The EARL OF DEVON. *Treasurer*—Sir R. N. FOWLER, Bart., M.P.

Hon. Secretary—C. J. STEWART, Esq.

Secretary—Major W. CHRISTIE, at the Hospital.

The LONDON FEVER HOSPITAL is the only Hospital in London for the special treatment and prevention of Infectious Fevers, in the case of persons who are not paupers. It has no endowment.

Special Privileges to Governors.—An Annual Subscriber of **One Guinea**, after the second payment, or a Donor of **£10 10s.** in one sum, becomes a Governor. The domestic servants of governors and employes of subscribing firms, clubs and hotels are treated free.

The Hospital affords absolute safety from the spread of disease by infected patients by admitting them into its wards and there isolating them. The admission fee is **Three Guineas**, which pays for as long a period of treatment and nursing as may be necessary, generally six weeks. This fee covers only about a fourth of the cost—the remainder is borne by the funds of the Charity.

73,000 patients have been treated in the Hospital since its foundation in 1802.

Funds are most urgently needed, not only to carry on this useful work, but to enable the Committee to build extra accommodation, suitable to the requirements—medical and otherwise—of the present day.

Well-appointed private rooms may be had at a charge of three guineas a week.

For admission apply to the Resident Medical Officer; for particulars apply to the Secretary,

Major W. CHRISTIE, London Fever Hospital, Liverpool Road, N. [14]

POPLAR HOSPITAL FOR ACCIDENTS,

BLACKWALL, LONDON, E.

OPEN FREE AT ALL HOURS FOR THE TREATMENT OF
ACCIDENTAL INJURY OR EMERGENCY.

President—EARL OF MEATH.

Vice-Presidents—The EARL of DERBY, Sir DONALD CURRIE, K.C.M.G., M.P.,
and others.

Treasurer—Sir R. N. FOWLER, BART., M.P. *Secretary*—Lieut-Colonel FENERAN.

Number treated last year, 9,363.

Remote from observation by the wealthier classes, in the centre of a very dense, poor population, engaged in the most *dangerous and laborious industries*, this Hospital is exactly situated where most required.

Accidents in the Port of London, in the Docks and Shipping, amongst the Factories and great Engineering Works, are of continual occurrence, and of the most appalling character.

It is over two miles distant from the nearest general hospital. Delay and Transport, always painful, are often vital considerations.

It earnestly appeals for support.

Treasurers { JOHN B. MARTIN, Esq., 68, Lombard Street.
GEORGE J. DRUMMOND, Esq., 49, Charing Cross.

The Council earnestly appeal for Donations and New Annual Subscriptions in
support of this Hospital. The Annual Income from all sources is only £6,000—the
expenditure £12,000 0—the Balance being made up by Donations and Legacies.
Average number of Patients received yearly 20,000, of which three-fourths are cases of
Accident and Emergency, or without letters.

ARTHUR E. READE, *Secretary.* [148]

ST. MARY'S HOSPITAL,

Cambridge Place, Paddington, W.

(Near the Great Western Terminus.)

Patron—**HER MAJESTY THE QUEEN.**

Dependent upon Voluntary Contributions for support.

The growth of the district in which this Charity is the only General Hospital has been so great, that the Hospital has recently had to be enlarged and the accommodation increased by one third, in order to meet the constantly-growing demands upon it.

Nearly thirty thousand of the sick poor are relieved annually, of whom upwards of two thousand four hundred are received into the wards.

Although the strictest economy, consistent with a high standard of efficiency, is observed, the maintenance of the Institution costs about £17,000 a year, while its reliable income is less than £6,000. To provide for this annual deficiency of £11,000, the Governors are entirely dependent upon the charitable contributions of the public.

Contributions, especially annual subscriptions, are earnestly solicited, and will be thankfully received by the Bankers, Sir S. SCOTT, Bart., & CO., 1, Cavendish Square, W., or by the Secretary at the Hospital.

Annual subscribers of Three Guineas, or donors of Thirty Guineas may recommend Three In-patients and Eighteen Out-patients annually.

Annual subscribers of Two Guineas, or donors of Twenty Guineas in one sum, may recommend Two In-patients and Twelve Out-patients annually.

Annual subscribers of One Guinea, or donors of Ten Guineas in one sum, may recommend Six Out-patients annually

THOMAS RYAN, *Secretary.*

NORTH-WEST LONDON HOSPITAL, KENTISH TOWN ROAD.

(Founded 1878.)

Patron—H.R.H. PRINCESS CHRISTIAN.

Chairman—REV. F. J. PONSONBY, M.A.

Treasurer—GEORGE HERRING, Esq.

A Medical Charity for the Sick Poor, also for any case of accident, urgency, or emergency. The only Institution of the kind in the North-West District. Forty-seven Beds are available, and eighteen of these are for Sick Children. Annual Expenditure about £3,000; annual Subscription List under £600, leaving upwards of £2,400 to be made up by Special Donations. Number of cases treated last year:—In-Patients, 602; Out-Patients, 33,687 (attendances). Help is greatly needed to maintain the In-Patients' Wards, especially those set apart for the suffering little ones.

ALFRED CRASKE, Secretary. [196]

WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

Supported by Voluntary Contributions.

Patron—H.R.H. the PRINCE OF WALES, K.G.

Treasurer—W. F. AINSWORTH, Esq.

This Unendowed Hospital is founded for the gratuitous Medical and Surgical treatment of the Sick or Maimed Poor. Accidents and urgent cases admitted at all hours, with or without letters of recommendation. Including 35 Cots for Children, there are 101 Beds.

About 1,100 In-Patients, including some 300 cases of accident, and 14,000 Out Patients are annually admitted for treatment. The Out-Patient attendances number about 42,000 annually.

The total amount of the Legacies received during the 31 years ended 1886 that the Hospital has been opened, is only £23,781 12s. 11d.

Funds are urgently needed to meet the annual expenditure of about £5,500 and to reduce the accumulation of debt, the bequest of former years of adversity, and which, at the end of the year 1886 amounted to nearly £5,800.

The EARLSWOOD ASYLUM

FOR IDIOTS AND IMBECILES.

RED HILL, SURREY.

Open to Cases from all Parts of the Kingdom.

THIS NATIONAL ASYLUM, established in 1847, now affords protection to nearly 600 inmates, and everything that kindness and science can suggest is employed to ameliorate their condition.

Eligible Cases are admitted by the Votes of the Subscribers for 5 years, and in many instances are allowed the advantage of a re-election for a second 5 years.

At each Half Yearly Election there are generally nearly One Hundred and Fifty Applicants seeking admission, of whom the Board can only elect 30 to 40, owing to want of sufficient Funds for a larger number.

Provision is made for the reception of Private Cases, on payments regulated by the Board of Management.

The Board *earnestly ask for additional aid.* The expenses are heavy, owing to the general helplessness of the poor inmates.

AN ANNUAL SUBSCRIBER has *one vote* at each Election for each Half a Guinea contributed. A LIFE SUBSCRIBER has *one vote* at each Election for each Five Guineas contributed.

COLLECTING BOXES and CARDS will be gladly supplied, and votes given in proportion to the amount collected.

The last Report and other Pamphlets may be had gratuitously on application.

H. GERARD HOARE, Esq., *Treasurer.*

Offices: 36, King William Street, E.C. JAMES DOWNING, *Secretary.* [137

DR. J. COLLIS BROWNE'S

CHLORODYNE

Dr. BROWNE
coined the word
CHLORODYNE
to designate his
discovery, there-
fore to apply
the word to
other prepara-
tions is dis-
honest.

We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES & CO., *Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.*

DR. J. COLLIS BROWNE'S CHLORODYNE is the TRUE PALLIATIVE in NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

DR. J. COLLIS BROWNE'S CHLORODYNE is a liquid medicine which assuages a PAIN of EVERY KIND, affords a calm, refreshing sleep WITHOUT HEAD-ACHE, and INVIGORATES the nervous system when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA. **I**MPORTANT CAUTION.—The IMMENSE SALE of this REMEDY has given rise to many UNSCRUPULOUS IMITATIONS. Be careful to observe 'Tra.'e Mark. Of all Chemists, 1s. 11d., 2s. 6d., and 4s. 6d. **J. T. DAVENPORT, 35, Gt. Russell St., W.C.**

IS THE GREAT SPECIFIC FOR CHOLERA, DYSENTERY.

DIARRHŒA, DYSENTERY. GENERAL BOARD of HEALTH, London, REPORT that it ACTS as a CHARM, one dose generally sufficient. Dr. GIBBON, Army Medical Staff, Calcutta, states: "2 DOSES COMPLETELY CURED ME of DIARRHŒA."

From Symes & Co., Pharmaceutical Chemists, Simla, *Jan. 5, 1880.*
To J. T. DAVENPORT, London.

DEAR SIR,—We congratulate you upon the widespread reputation this justly-esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourning there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of **DR. J. COLLIS BROWNE'S CHLORODYNE** in Diarrhœa and Dysentery, Spasms, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power.

J. T. DAVENPORT, 35, Gt. Russell St., W.C.

ONLY GENUINE.

COUGH, **C**OLDS, **C**ASTHMA, **C**BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Dr. J. C. BROWNE (late Army Medical Staff) DISCOVERED a REMEDY to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and, as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances being eliminated), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false*. This Caution is necessary, as many persons deceive purchasers by false representations.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice Chancellor Sir W. PAGE WOOD stated publicly in Court that **DR. J. COLLIS BROWNE** was UNDOUBTEDLY the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13th, 1864.

GODFREY'S

[206

THE KING'S OINTMENT.

A WESTERN EQUATORIAL AFRICAN

REMEDY FOR RHEUMATISM

Brought home by three brothers, who accompanied several unostentatious expeditions into the interior, by way of three rivers, Niger, Congo and Gambia.

This natural product is exported to Africans resident in the West Indies, and North and South America, by whom it is eagerly sought as a Sovereign Remedy for

Rheumatism and Neuralgia.

SOCIETY OF ARTS JOURNAL, No. 1824, VOLUME 35.—“There can exist no doubt of the remarkable medicinal value of many vegetable products of West Africa, known to and appreciated by the natives, but not yet familiarised in Europe.”

DIRECTIONS FOR USE.

Apply a small portion of the Ointment night and morning to the part affected, with the forefinger, rub it gently with the palm of the hand until it is absorbed.

Sold in little earthenware jars or Amphoræ, price 1s. each, postage 2d. extra.

TO BE HAD OF ALL CHEMISTS, OR DIRECT OF

J. C. & G. CAPPER, SWANSEA.

[284

FREEMAN'S CHLORODYNE

The Original and only True.

It is the *Greatest Medical Discovery of the Present Century*, and is regarded as a boon to mankind. It is the best known remedy for Coughs, Colds, Consumption, Whooping Cough, Bronchitis and Asthma.

It effectually checks and arrests those too often fatal Diseases—*Diphtheria, Diabetes, Fever, Cholera, Ague, &c.*

It acts like a charm in *Diarrhoea*, and is the only known Specific in *Cholera and Dysentery*.

It effectually cuts short all attacks of *Epilepsy, Hysteria, Palpitation, Convulsions and Spasms*.

It is the only Palliative in *Rheumatism, Gout, Cancer, Toothache, Neuralgia, Sciatica, Lumbago, &c.*

It rapidly relieves pain from whatever cause, allays the irritation of Fever, soothes and strengthens the system under exhaustive diseases, restores the deranged functions, stimulates healthy action of the secretions of the body, gives quiet and refreshing sleep, and **marvellously prolongs life**. It may be taken by Old and Young at all hours and times according to the Directions.

It is extensively used by Medical Men in their official and private practice, at Home and Abroad, who have given numerous written testimonials of its wonderful efficacy.

SPECIMEN TESTIMONIAL.

264, PETIT SACONNEX, GENEVA, SWITZERLAND, *January 6th, 1896.*

DEAR SIR,—I send by same post £1 16s., or 45 francs, for 8 bottles, value 4s. 6d. each. Your Chlorodyne has been used in a case of Cancer, notorious at St. Leonards-on-Sea, where Dr. Penhall and Dr. Harvey attended, and the case has given up as incurable, for the leg ought to have been cut off, and the patient was too weak to stand operation. Now, Dr. Metcalfe said the same thing, and your Chlorodyne cured the person, which indeed is my servant, after six years being still alive and perfectly well. I think it is due to you, as the Inventor of the remedy, to state the fact, that others in similar circumstances may never despair, as long as life is in the body. I authorise you to use my letter as you may think best, and also my name, to prevent people being humbugged by other rubbish, &c.

To Mr. RICHARD FREEMAN.

Your truly, WALTER SAVAGE LANDOR.

Sold by Chemists and Patent Medicine Dealers all over the World in bottles 1s. 1½d.; 2 oz. 3s. 9d.; 4 oz. 4s. 6d.; half-pints. 11s.; and pints. 20s. each, and by the Inventor, RICHARD FREEMAN, 70, Kennington Park Road, London, S.E. Free by post.

Purchasers are CAUTIONED not to have palmed upon them any substitute. See that the Trade Mark, "THE ELEPHANT," is on the wrapper, &c., and the words "FREEMAN'S ORIGINAL CHLORODYNE" are engraved on the Government Stamp—which is the only true Chlorodyne. [135

H. CONSTANTINE, 61, Fleet Street, E.C. [224]

THE CYCLOSTYLE.

Price from 2ls. (GESTETNER'S Patent.)

This is the best apparatus ever invented for taking a large number of copies from *one* original writing or drawing. It offers many advantages over any other system. In the first place, the writing with it is as easy and as quick as with an ordinary pencil. The process of writing can be suspended and resumed, if circumstances require it, without any difference whatever, at any subsequent time. Anybody can do the *printing* part of the arrangement—a lad or boy. The resulting copies, which can be obtained in any desired number, it only being a question of time, are in a

permanent ink, no matter what the colour, and can, therefore, be put away and filed for reference years afterwards. There is no washing, *no soaking*, *no melting* and no copying press necessary, nor is any recourse had to electricity or chemicals. Ladies can use it as well as gentlemen, and the simplicity of the arrangement for reproducing copies of writings, drawings, plans or music is unequalled.

Invaluable to En-
gineers, Builders and
Business Men, To
Clergymen, Schools
&c.

(Registered Trade Mark)

THE AMATEUR LITHOGRAPHER

Is the latest, most perfect, and cheapest apparatus for reproducing, without press, accurate fac-
simile copies of any pen-and-ink work.

The advantages of THE AMATEUR LITHOGRAPHER over all other methods of copying are:—
1. The writing is done with an ordinary pen (a fine, hard-pointed steel pen) and a flowing black ink.

2. The writing is at once visible.
3. No dotted or broken words or lines, but a perfect fac-simile equal to lithographic work; therefore most suitable for delicate work, as required by ARCHITECTS, BUILDERS, ENGINEERS, &c.

4. The Amateur Lithographer can be worked with equal efficiency in all climates.

5. Certainty in obtaining clean copies.
6. Great simplicity in working.
7. An unlimited number of copies are obtain-
able, which can be taken at intervals.
8. Errors in writing the original can be easily
erased.
9. Last, not least; the printing surfaces being
permanent no renewals are needed, except the
ink and the solution—both inexpensive—thus
making the Amateur Lithographer cheaper in
working than any copying apparatus extant.

Price Complete.	No. 1, printing surface 10 in. by 7 in.	£2 10s.
" "	" " " " 15 in. by 10 in.	£3 10s.
" "	" " " " 20 in. by 15 in.	£4 10s.

Can be seen at work and tested daily at the AMATEUR LITHOGRAPHIC CO., 16, Queen Victoria
Street, London, E.C. Specimen, &c., sent free to all parts.

FURNISH ON NORMAN & STACEY'S SYSTEM.

This Simple and Economical system, introduced by us, commends itself to all, and is admitted to be the most satisfactory method. One, Two or Three Years' credit, without registration or publicity of any kind. Selections from genuine Wholesale Manufacturers, who deliver goods free. Deposit not necessary. Personal applications solicited. Full particulars post free.

BORWICK'S BAKING POWDER,

**THE BEST
THAT
MONEY
CAN
BUY.**

How to make a Rich Plum Cake: Take $\frac{1}{2}$ lb. of butter and $\frac{1}{2}$ lb. of white sifted sugar, beat these with the hand well together to a cream, add 4 eggs, one at a time, and well beat each one with the butter and sugar; lightly mix in 1 lb. of flour, previously mixed with one teaspoonful of BORWICK'S GOLD MEDAL BAKING POWDER, then lightly mix with the whole $\frac{1}{2}$ lb. of sultanas; bake at once thoroughly in a quick oven.

AN EXCELLENT CHRISTMAS PLUM PUDDING.—Take three-quarters of a pound of flour, two ounces of BORWICK'S GOLD MEDAL BAKING POWDER, two ounces of bread crumbs, one-and-a-half pounds of suet, two pounds of raisins, one pound of currants, ten ounces of sugar, two ounces of almonds, one pound of mixed candied peel, salt and spice to taste. Mix ingredients well together, and add six eggs well beaten and three-quarters of a pint of milk; divide in two, and boil eight hours.

TO MAKE A GOOD PLAIN CAKE.—Mix well together one pound of flour, two full teaspoonfuls of BORWICK'S GOLD MEDAL BAKING POWDER, a little salt and spice, and a quarter of a pound of sugar; rub in a quarter of a pound of butter, add six ounces of sultanas, two ounces of currants, and one ounce of candied peel; moisten the whole with two eggs and half a teacupful of milk, previously beaten together. Bake in a quick oven very thoroughly. [61

WALKDEN'S

Established 1735.

INKS.

Walkden's Extra Black Ink, as manufactured for **150 years**, is unsurpassed for durability. It is *the Best Black Ink that can be made* for the use of Bankers, Lawyers and Public Companies, and for all documents of importance.

Walkden's Blue-Black Writing Fluid,

Warranted made from the Purest materials, is especially adapted for general Commercial use. It writes at first a splendid Blue Colour, and turns to an intense and very durable Black. It does not get thick or deposit sediment, and is the *Best Ink for Hot Climates*.

Walkden's Blue-Black Copying Fluid

flows freely and pleasantly from the Pen. Will give three good copies at one impression, or one a long time after writing. It may be used for all purposes.

Walkden's Brilliant Scarlet Ink. A very

beautiful preparation, which does not penetrate the Paper like some Red Inks. It is free from Acid, and may be used with Steel Pens.

“MELANYL:”

A CHEMICAL MARKING INK.

Requires No Heat. In One Bottle, ready for use.

*The Simplest and Best Marking Ink in the World. Absolutely Indelible.
Warranted Harmless to any Fabric.*
