The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock, and current income raised in a county rate. Certain contributions are also received from the Imperial Exchequer. The capital disbursements for the year ended 31 March, 1897, amounted to £758,698, including Blackwall Tunnel, £190,518; parks and open spaces, £21,306; street improvements, £86,957; housing of the working classes, £125,583; main drainage, £61,204; fire brigade, £74,521; and lunatic asylums, £147,851. The maintenance of such works, the sinking fund to pay off debt, and the interest on the debt, together with all recurring disbursements of every kind, are paid out of rates. Some idea of the nature and amount of this class of disbursements will be gathered from the statement on page 341.

The Council's powers to expend capital money and raise Stock, or, as they are called, "borrowing powers," are conferred by its annual Money Act. The Act of last session sanctioned, for the year ending March, 1898, expenditure on various improvements and services not exceeding £3,400,745, but a large proportion of this amount was a regret of unexercised powers contained in previous Acts. The Act also conferred powers to lend during the year to the School Board, vestries, and other public bodies not exceeding £2,150,000.

The Council issued £2,500,000 of a new 2½ per cent. stock last July; it is called London County Consolidated Stock, and is not to be redeemed at any fixed date. The Council, however, reserves power to redeem at any time after the 19th March, 1920, and a sinking fund has to be provided, under Treasury approval, sufficient to repay all expenditure within a period of 60 years. The tenders amounted to £4,322,990, and the average price obtained was £100 9s. 8d. per cent. The total stock now outstanding amounts to £38,011,638. The first issue of London County bills was made in May last, and was most successful, £600,000 being raised by six months' bills at an average rate of £1 2s. per cent. per annum. The gross debt of the Council, including liabilities transferred from the former counties of Middlesex, Surrey, and Kent, stood, on 31st March last, at £37,300,912; against this there were loans owing to the Council from the School Board, vestries, and other public bodies amounting to £14,598,860. Property was held to the extent of £2,490,976, and there were also other assets bringing down the net liability to £19,105,941.

The rating for the year 1897-98 amounts to 11½d. in the pound over the whole county, including the

City, and a further rate over the county outside the City of 2¼d. in the pound, together 14d.; in 1896-97 and 1895-96, the rate was 15d.; in 1894-95 14d.; in 1893-94 13d.; in 1892-93 12¼d.; in 1891-92 11¾d.; in 1890-91 13¼d.; and in 1889-90 12¼d. The rateable value of the County of London on 6th April, 1897, was £36,098,722—a 1d. rate producing £150,411.

In considering the question of rating, the grants paid by the Council in relief of local rates (indoor paupers, registration of electors, &c.) must be borne in mind; they tend to lighten the burden in some parishes and increase it in others; generally speaking, the effect is to materially

benefit the poorer parishes. Each parish pays an equal rate in the £1 on its rateable value, but receives back, for instance, 4d. per day per head of the indoor paupers; the City receiving ½d., and St. George-in-the-East about 11¼d. in the pound under this head alone. A still more important step towards the equalisation of London rates was effected by the London (Equalisation of Rates) Act, 1894, under which the Council is to levy half-yearly a rate of 3d. in the £ to make an "equalisation fund;" and then to distribute the fund on the basis of population.

The amount raised by county rate for the year to 31st March, 1897, is made up as follows:—

ESTIMATED RECEIPTS.		ESTIMATED EXPENDITURE.	
1. CASH BALANCE on 1 April, 1897 ...	£345,547	1. DEBT:—	
2. RECEIPTS in aid of expenditure:—		Redemption	£548,960
Exchequer Contribution	£505,675	Dividends on Stock	1,136,657
Interest on loans advanced, on cash balances, &c.	512,701	Interest on sundry liabilities	19,471
Rents	90,800	Management of stock, income tax, &c.	51,300
Sundry contributions, fees, fines, &c.	184,858		£1,756,388
	1,294,034	2. GRANTS:—	
3. TRANSFER from Tramways Account	45,000	To Guardians for indoor paupers	£326,809
4. GRANT from Local Taxation Account under the Agricultural Rates Act, 1896	931	To Guardians and others out of the Exchequer contribution	228,377
5. COUNTY CONTRIBUTIONS required to be raised:—		Registration of Electors	15,000
For General County purposes, equal to a rate of 11¾d.	£1,767,268	Main roads	12,300
For Special County purposes, equal to a rate of 2¼d.	296,373		582,486
	2,063,641	3. PENSIONS (including Superannuation and Provident Fund)	45,950
[Total rate, 14d.]		4. ESTABLISHMENT CHARGES	130,720
	£3,749,153	5. JUDICIAL EXPENSES	44,365
		6. SERVICES:—	
		Main Drainage	£224,030
		Fire Brigade	170,293
		Parks and Open Spaces	107,590
		Bridges and Ferry	38,420
		Embankments	12,310
		Pauper Lunatics	75,280
		Industrial Schools	30,285
		Coroners	25,300
		Weights and Measures	14,745
		Miscellaneous	54,942
			753,195
		7. TECHNICAL EDUCATION	150,000
		8. PARLIAMENTARY EXPENSES, Inquiries, Rating Appeals, Election of Councillors, &c.	29,675
		Total Expenditure	3,492,775
		9. TRANSFERS to Sundry Accounts	2,831
		10. ESTIMATED CASH BALANCE on 31 March, 1898	253,544
			£3,749,153

OFFICERS OF THE COUNTY COUNCIL.

Clerk of the Council, C. J. Stewart	£2,000	Medical Officer, Shirley Forster Murphy, M.D.	£1,250
Comptroller, H. E. Haward	£1,000	Public Control Dep., Alfred Spencer	£800
Engineer, Sir Alexander Binnie, Kt.	£2,000	Statistical Officer, G. Laurence Gomme	£800
Architect, T. Blashill	£1,500	Chemist, F. Clowes, D.S.O.	£700
Solicitor and Dep. Clerk, W. A. Blaxland	£1,200	Parliamentary Agent, H. L. Cripps	£1,100
Assist. Sol. (Conveyancing), G. P. Jackson.	£1,000	Parks Dep., J. J. Saxby	£600
Valuer, A. Young	£1,250	Chief of Fire Brigade, Comm. L. de L. Wells	£900
		Manager Works Dep., W. Adams	£1,500

THE CITY COMPANIES, NUMBER OF LIVERYMEN (1897), CORPORATE AND TRUST INCOMES, MASTERS, CLERKS, AND HALLS.

As will be seen from the following table, many of the London Livery Companies are possessed of great wealth. Of some portion of the property they are merely trustees, and no doubt render periodical accounts to the Charity Commissioners; but of the "Corporate" property they are the sole owners, are not bound to render any account, and may dispose of the income as they please. Fifteen of the Companies have more than ten

thousand pounds a year; some of them are very liberal in their charities, especially in the way of education. Some of the Companies invite fresh members to join, others do their utmost to repel. Corrections have been made from time to time by more of the Companies; those marked † have revised this year's list, but others take no notice of the application. Where the return was incomplete, the Editor allowed the old figures to remain.

COMPANY.	No. of Livery.	Corpo- rate Income	Trust Income.	Total Income.	Master or Warden 1896-7.	Clerk.	Hall.*
		£	£	£			
Mercers †	183	48,000	35,000	83,000	Sir Cecil C. Smith	John Watney	4 Ironmonger Lane.

* These Companies having no Halls, the address of the Clerk is given in brackets.

The rateable value of the Halls of the London Companies is about £55,000, and that of their Schools and Almshouses about £18,000 a year. The value of their Plate and Furniture is about £320,000, and the annual income of the livings in their gift—several of the "great" Companies are patrons

of livings—about £12,300. In 1880 the Companies were indebted to the extent of about £270,000.

The above information is mainly derived from the report, in 5 vols., published in 1884, of the City Livery Companies' Commission appointed in 1880, of which the late Earl of Derby was chairman.

LONDON WITHIN VARIOUS BOUNDARIES.

Metropolitan and City Police Districts	443,421	4,766,661	5,633,806	*

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1895-96 of £38,716,378. The number of new houses built since 1849 up to and including the year 1895 is 598,192 with 4,007 in course of erection; the new mileage since 1849 being 2,043.

* Not shown in the Census.

THE following list of Life Offices, with two or three unimportant exceptions, contains the names of all the British offices, of two Colonial companies, and of four offices founded in New York. Various particulars are given which will be of assistance to an assurer in selecting an office, and of interest to many policyholders.

DATE OF FORMATION.—The first column in the table states the year in which the office was established. This is of considerable importance, inasmuch as the normal rate of mortality is not fully experienced until the company has been doing business for five-and-twenty or thirty years. Any company established more recently than this must be judged largely by its prospects instead of by its results.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system, whereby the whole of the surplus or profits are allotted to the participating policyholders, or whether the company has proprietors or shareholders by whom part of the surplus is received as dividends upon their share capital. The former class of companies are indicated by the letter M.; the latter by the letter P. It cannot be assumed that either Mutual or Proprietary Offices as such offer superior attractions to policyholders. Many of the life offices also transact the business of fire insurance. Such companies are marked F. in the table. The life and fire funds are kept separately, and the funds of one department are not liable for the claims of the other except the share capital, which is usually liable for the claims of both branches. Sickness and accident assurance has been greatly increased in recent years, and some offices issue insurance of this sort as well as life assurance. Such companies are indicated by the letter S. Three life offices also grant marine insurance; these are indicated by the letter M. The companies in the first part of the Table all transact "ordinary" life business; the companies doing Industrial business are stated separately. The letter "I" indicates which ordinary offices do industrial business and the letter "O" shows which industrial companies also issue ordinary policies.

FUNDS.—The Funds as stated in the table are in all cases taken from the Revenue Accounts deposited by the offices with the Board of Trade. The Paid-up Capital of Proprietary Offices that transact Life business only is included in the Funds. Paid-up capital of offices transacting other classes of business as well is excluded from the Funds as stated in the Table, because such capital is available for other claims than those of the Life Branch. The Funds as well as the premium income are derived from the latest annual accounts published by the offices, the date in the majority of cases being December, 1896. The amount of the funds taken alone affords no indication of the financial state of a company, but is a useful indication of the magnitude of a company's business. The stability of a company cannot be judged unless its liabilities are known as well as its assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassigning parts of such risks as the offices do not feel justified in retaining in their entirety. The amount of the Premiums is perhaps the most important item in the annual accounts of a life office, and a comparison of the expenses with the premiums affords a useful indication of the economy with

which an office is managed—a most important point for a policyholder to pay attention to.

EXPENSES.—The expenses of a life office include not only the salaries of officials, rents of offices, cost of advertising, &c., but also in most cases the commission paid to agents for the introduction of business. The amount of expenses as so understood is less important in itself than in relation to premium income, consequently we have stated in the table the percentage of the premium income absorbed in commission and expenses. The average percentage of the whole of the British Offices is about 14½%, of which 5½% is expended on commission and 9% on other expenses. This ratio taken by itself is frequently misleading, because a large proportion of a company's expenditure is incurred in obtaining new business. If the proportion of new business to total business is large, the percentage of the total premiums absorbed in expenses is also large; but when the expenses are distributed between new business and old, or renewal, business, a fair indication is obtained of the real expenditure that an office is incurring. Perhaps the most satisfactory way to split up this expenditure is to assume that the percentage of new premiums absorbed in expenses is ten times as much as the percentage of renewal premiums absorbed in expenses. The expenses per cent. of new premiums given in the table means therefore that if, as in the case of the Alliance, 45.9% of the new premiums goes in expenses, one-tenth of this percentage or 4.59% of the renewal premiums is the cost of managing the renewal business. These two percentages taken together exactly amount to the total expenditure of the office. The relative economy or extravagance of the various offices may therefore be better judged by the percentage of new premiums absorbed in expenses than by the percentage of total premiums. The average annual expenditure of British offices is 8% of new premiums and 8% of renewal premiums.

VALUATIONS.—The last three columns of the table are derived from the valuation returns made by the companies to the Board of Trade usually every three, five, or seven years. These returns contain a great deal of information, and show the real position of a life office in a very complete manner. It is not possible in the space here available to give anything but a very small part of the information supplied by these returns. A valuation consists of a calculation of the present liability of an office under its existing policies after making allowance for the amount it will have to pay and to receive. In making this calculation it has to be assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most frequently used being published by the Institute of Actuaries. These are called the Healthy Males (H^m) and the Healthy Males excluding from observation the mortality in the first five years of assurance (H^m(⁵)). The reason for excluding the first five years of assurance is, that shortly after medical examination, which is a necessary prelude to life assurance, the mortality is exceptionally light. The net liability of an office as shown by its valuation varies with the mortality table employed and the rate of interest assumed. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes that only a low rate of interest will be earned, while the liability on account of mortality appears greater by some

tables than by others. The more stringent the basis on which the valuation is made the greater the liability appears, and consequently the larger the reserve provided to meet future liabilities. In a well-managed office the calculated liability is always greater, sometimes very much greater, than will actually be experienced. Consequently the position of an office is very strong and satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated liability and the experienced liability is larger, and the surplus available for bonuses is larger also. As an approximate guide in this matter we may state that the H^m and H^m (s) tables in conjunction are more stringent than the H^m table alone, that the H^m is more stringent than English No. 3; English No. 3 more stringent than Northampton,

and Northampton more stringent than American, and that with every table the lower the rate of interest assumed the more stringent the valuation. For comparison with the rate of interest assumed in the valuation we give the average rate of interest actually earned during the last valuation period. The greater the margin between the rate of interest earned and the rate of interest assumed the greater is the surplus, and, speaking generally, the larger the bonus. The rate of interest earned upon the total funds is stated wherever possible; in certain cases however the rate earned upon the investments alone is the only rate that can be ascertained, and in such cases the rate earned appears higher than it would if the total funds, both invested and uninvested, had been employed in calculating the rate yielded.

- * Atlas. Interest earned excludes Reversions.
- * Caledonian. Fire business commenced 1805.
- * Equitable. With additional reserve of one-third of clear surplus.
- * Equity and Law. Interest earned excludes Reversions.

- * Hand-in-Hand. Fire Business commenced 1806. Funds stated exclude General Accumulated Fund, £1,686,828
- * Law Union and Crown amalgamated 1891.
- * London, Edin., and Glasgow. Expenses exclude amount charged to Capital.
- * Marine and General. Also insures Mariners, &c., effects.
- * Marine and General. Expenses include those of Marine Branch.
- * National Mutual. Amalgamated 1890.
- * National Mutual. Expenses include Amalgamation Expenses.
- * Scot. Acc. Accident Business commenced 1877. No account yet available.
- * Scot. Amicable. Net premiums valued at 31 per cent. so strengthening Reserves by £200,000.
- * Sun of Canada. Commenced business in Great Britain in 1823.
- * Sun of India. Now taken over by Sun Life.
- * Victoria Mutual. Accepts monthly payments.
- * Union Fire Business commenced 1714.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If the policy does not participate in profits, both the sum assured and the premium remain unchanged. If the policy does participate in profits, a higher premium is charged and bonuses are declared from time to time. The bonuses may usually be used either to increase the sum assured or to reduce the premium, or they may be taken in cash. It is usually to the advantage of an assurer to take a policy that participates in profits, but to overcome the objection of the higher premium that participation in pro-

fits usually involves, a plan has been adopted in recent years whereby future bonuses are anticipated and used to reduce the premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed the bonuses anticipated, the difference is paid to the policyholder; if however the anticipated bonuses exceed the declared bonuses, the difference has to be paid by the policyholder or to remain as a debt upon the policy. We give below the average premiums charged by British offices for the three classes of policies. The rates quoted are the amounts payable annually for the whole of life to assure £100 at death.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The rates in the above table are the average of the rates of all the offices that quote these three classes of policies respectively. The next table shows the annual premiums payable throughout life for the assurance of £100 at death with participation in profits in the different offices. Premium rates alone are not sufficient for judging the relative merits of life offices for participating policies. An office charging a high premium is more likely to give large bonuses than an office charging a low premium, and therefore the

bonuses as well as the premiums have to be taken into account. But the details of bonuses are too voluminous to be given here; they may be obtained from various insurance annuals. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. The offices that make a special feature of this sort of policy are the London Life, the Metropolitan, and (under one class of policy) the Hand-in-Hand.

* In the cases marked thus the rates are quoted for Assurances payable at ages 55 and 60, without mention being made as to the number of premiums payable. Thus it may in these cases be necessary to pay one more premium than in the case of those not marked *. For instance, a person Assuring at age 35 next birthday for a sum payable at age 60 may have to pay 26 premiums in an office marked *, while he would only pay 25 premiums in an office not so marked. In the latter case the sum Assured is sometimes paid on the anniversary of the day on which the Assurance was effected, sometimes on the anniversary of birth.

† With Tontined or Deferred Bonuses.

LIFE ASSURANCE PROGRESS.

The "Life Assurance Companies Act, 1870," renders it imperative for every Life Office transacting business in Great Britain to make returns in a prescribed form. These are published annually in a blue book at the end of which, in

1882 and since, is a summary of the accounts. From these summaries we have compiled the following table, showing the progress of the Life Assurance business of British offices. The business of foreign and Colonial companies doing business in the United Kingdom is not included.

INCOME.	ORDINARY LIFE COMPANIES.		INDUSTRIAL LIFE COMPANIES.	
	1882.	1897.	1882.	1897.
Premiums (less re-assurances)	11,658,319	18,657,348	1,941,994	6,616,613

Immediate Annuities.

The following Table shows the amount of Annuity granted by the undermentioned Companies for every £100 paid. The age last birthday is that upon which the payment is based, but many offices quote intermediate rates for every half or quarter year of age. By a few Companies the proportionate amount of Annuity is payable to day of death.

The Annuity is calculated as payable half-yearly; the annual payment is in nearly all cases higher if paid annually and less when paid quarterly.

By way of comparison the rates for Annuities paid through the Post Office Savings Banks are given, but as Insurance Companies have the means of safely investing at a higher rate of interest than can be obtained from Government, they are able proportionately to offer more advantageous terms to annuitants: to those about to purchase, a study of the Comparative Table of Rates will consequently be found useful. The Ages quoted range from 45 to seventy years, Annuities being usually purchased within that range of age. The rates of the Legal and General, and the London, Edinburgh and Glasgow are being revised and cannot be quoted at present.

*Fire Insurance.

RATES.—For merchandise at the principal ports, and for mills and manufactories and other leading industries throughout the United Kingdom, all the offices charge the same, whilst for minor risks each office makes its own estimate, and charges the premium in its judgment applicable. The following is a digest of the scale put forward by some of the oldest companies, and the rates and classification are those which are generally adopted.

Common Insurances.—At 1s. 6d. to 2s. per cent. per annum, with certain exceptions:—

1. Buildings covered with slates, tiles, or metals, and built on all sides with brick or stone, or separated by party-walls of brick or stone which are carried through the roof, and used for residence, or non-hazardous purposes.

2. Goods in buildings as above, such as household goods, plate, wearing apparel, and printed books, liquors in private use, and personal effects not comprised in the following categories.

Hazardous Insurances.—At 2s. 6d. to 3s. 6d. per cent. per annum, with certain exceptions:—

1. Buildings of timber and plaster, or not separated by partition walls of brick or stone, or not covered with slates, tiles, or metals, and thatched barns and outhouses, having no chimney, nor adjoining to any building having a chimney; and buildings falling under the description of common insurances, but in which hazardous goods are deposited, or hazardous trades are carried on.

2. Goods.—The stock and goods of bread-bakers, tallowchandlers (not melters), inn-holders, drapers, stationers, also chemists and grocers not dealing in mineral oils.

Doubly Hazardous Insurances.—At 4s. 6d. to 5s. per cent. per annum, with certain exceptions:—

1. Buildings.—All thatched buildings having chimneys, or communicating with or adjoining to buildings having one, although no hazardous trade shall be carried on, nor hazardous goods deposited therein, and all hazardous buildings in which hazardous goods are deposited, or hazardous trades carried on.

2. Goods.—All hazardous goods deposited in hazardous buildings, and in thatched buildings having no chimney; also china, glass, mathematical and musical instruments, pictures, and jewels in private use.

Much depends upon the surroundings of the building insured; for a printer's or bookbinder's workshop, in a narrow lane, with old wooden houses near it, the premium would possibly be from 10s. to 15s.

Special Insurances.—5s. per cent. per annum and upwards:—

Buildings and contents among others of workers in wood, dealers in mineral oils, large drapers, some mills, warehouses, and factories; in the case of some theatres the rate is as high as 31s. 6d. per cent.

Close proximity to, or communication with, any building containing very hazardous goods or used for any specially hazardous trade will, of course, also increase the risk.

The most recent returns of 43 British Fire Offices give a premium income of £1,854,405; Losses, £1,050,335; Expenses, £6,336,881. Funds exclusive of Capital, £28,917,228; Paid-up Capital, £8,418,547. The losses amount to 56¹/₂ per cent. of the premiums and the expenses to 33⁶/₁ per cent., making together 89⁷/₃ per cent. of the premiums.

LIFE AND ACCIDENT COMPANIES.

Several companies that formerly did Accident business only, now transact Life business also. Among these are the Scottish Accident and Life, and the Sickness, Accident, and Life Association. Among Life Offices recently taking up Accident business are the Guardian and the Sun Life.

Rules by which the Personal Estates (including leaseholds) of English Persons, and the Movable Estates of Scottish persons, Dying Intestate are Distributed.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* Where this is prefaced the Regulation applies to Scotland only.]

By the Intestates' Estates Act, 1890, passed in the Session 53 & 54 Vict., c. 29, a very important change is made in the law as regards provision for widows of men who die intestate and without issue after the first of September, 1890, whereby it is enacted that the real and personal estate of an intestate so dying, passes absolutely to the widow as far as the first £500 in value is concerned. If under £500 she takes the whole; if above £500 she takes £500 in addition to what she was entitled to under the law previously in force. This Act is not applicable to Scotland.

If the Intestate die, leaving

His representatives take in the proportion following:—

Wife only, no blood relations.....	Half to wife, other half to the Crown.
Wife, no near relations	Half to wife, rest to next-of-kin in equal degree to intestate.
Wife and child, or children, and children of a deceased child	One-third to wife, rest to child or children; and if children are dead, then to their lineal descendants, subject to this, that such child or children as had estate by settlement of intestate, or were advanced by him in his lifetime, shall bring such estate or advancement into account (but heir does not bring real estate into account).
Wife and father	*One-third to wife; one-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate in life must collate the advances); one-third equally among living children <i>per capita</i> (see NOTE A, next page), and issue of dead children <i>per stirpes</i> .
Wife and mother	Half to wife, and half to father.
Wife, brother, or sister and children of a deceased brother or sister	Half to wife, and half to mother.
Wife, mother, nephews, and nieces	*Half to wife, one-sixth to mother, two-sixths to Crown failing kin.
Wife, mother, brothers, sisters, and nephews and nieces (children of deceased brothers and sisters)	Half to wife, one-fourth to living brother or sister, one-fourth to deceased brother's or sister's children.
No wife or child	*Half to wife, one-sixth to brother, two-sixths equally among children of dead brother or sister.
Children by one or more wives and the issue of deceased children	Half to wife, one-fourth to mother, and other fourth to nephews and nieces <i>per stirpes</i> .
Husband and children	*Half to wife, one-sixth to mother, two-sixths among nephews and nieces <i>per stirpes</i> .
Mother, but no wife, child, father, brother, sister, nephew, or niece.....	Half to wife, residue to mother, brothers, sisters, and nephews and nieces (as to nephews and nieces <i>per stirpes</i>).
Mother and brother or sister	*Half to wife, one-sixth to mother, two-sixths among the brothers and sisters (who take <i>per capita</i>), and the nieces who take <i>per stirpes</i> .
Mother, and brothers and sisters	All to next-of-kin of equal degree.
Father, and brothers and sisters	All children equally <i>per capita</i> , issue of deceased children <i>per stirpes</i> ; no difference between children of different wives.
	*One-half equally amongst all living children; the other half equally amongst living children <i>per capita</i> , and issue of dead children <i>per stirpes</i> .
	Whole to husband.
	The whole to mother.
	*One-third to mother, two-thirds to the Crown failing kin.
	Equally between them.
	*Mother one-third, brother two-thirds.
	Whole to them equally.
	*Mother one-third, brothers and sisters two-thirds equally <i>per capita</i> .
	Whole to father.
	*One-half to father, the other half equally amongst brothers and sisters <i>per capita</i> (see NOTE B).

Child and grandchild by deceased child.....	{ Half to child, half to grandchild, who takes by representation. *Three-fourths to child, one-fourth to grandchild.
If no child, children, or representatives of them...	All to next-of-kin in equal degree to intestate.
Brother or sister, and children of a deceased brother or sister	{ Half to brother or sister <i>per capita</i> , half to children of deceased brother or sister <i>per stirpes</i> . Whole to brother.
Brother and grandfather.....	All to daughter.
Brother's grandson, and brother's or sister's daughter	All to brother.
Brother and two aunts.....	Half to brother, half to wife.
Brother and wife	All to grandfather.
Grandfather, no nearer relation	Equally to both.
Father's father, and mother's mother.....	All to grandmother.
Grandmother, uncle, or aunt.....	*All to uncle or aunt if paternal. All to uncle.
Uncle, and deceased uncle's child.....	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child	{ *Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle. Equally to all.
Two aunts, nephew, and niece	*Nephew and niece.
Uncle's or aunt's children, and brother's or sister's grandchildren	Equally to all.
Nephew by brother, and nephew by half-sister ...	*Brother's or sister's grandchildren. Equally <i>per capita</i> (see <i>NOTE A</i>). *All to nephew by brother.
Nephew by deceased brother, and nephews and nieces by deceased sister	{ *Each in equal shares <i>per capita</i> , and not <i>per stirpes</i> . *The same, having regard to <i>NOTE B</i> .

NOTE A.—*Per capita*, that is, taking individually, and not by representation. Thus, if A. die leaving three brothers or sisters, they each take an equal part of his effects in his or her own right. But if either of them die, leaving children, his children would take his share *per stirpes*, that is *through him*, and not in their own rights.

NOTE B.—By English Law, brothers and sisters of the half blood, whether by the mother's or father's side, share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother) and their issue.

NOTE C.—Posthumous brothers and sisters take equally with those born in lifetime of father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate and also showing the persons entitled to administer personal estate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. Custom of London for Administration of Personal Estate abolished in 1856. Leaseholds are Personal Estate. The Dower (viz., widow's thirds) of widows married since 1833 is in the majority of cases barred by the purchase deed. Generally put in by Solicitors to avoid the inconvenience of dower attaching.

In each instance it is supposed that there are no nearer relations than those named.

The persons named within brackets are those who are entitled to administer.

If Intestate die, leaving

Real Property would descend to—

Wife only, no blood relations ...	{ One-third to wife for life, rest to Crown; copyholds to lord of manor. [<i>Wife</i> .] One-third to wife for life; rest to eldest son or his issue. [<i>Wife</i> .] One-third to wife for life in any case. [<i>Wife</i> .] Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female.
Wife and child, or children, and children of a deceased child ...	{ If no son, rest to daughters equally. [<i>Either daughter, or not exceeding three</i> .] If daughters and grandchildren (sons and daughters of deceased daughter) rest to daughters and eldest son of deceased daughter.
Wife and father.....	{ One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will. [<i>Wife</i> .]
Wife and mother	{ One-third to wife for life; rest to mother, there being no heirs on father's side. [<i>Wife</i> .]

<p>Wife, brother, or sister, and children of a deceased brother or sister.....</p>	<p>One-third to wife for life in any case; rest to eldest brother or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.) [<i>Wife.</i>] Sister and children of deceased sister, rest equally between sister and nephew (eldest). [<i>Ditto.</i>] Sisters and nieces, only, children of deceased sister, rest equally between nieces. [<i>Ditto.</i>]</p>
<p>Wife, mother, nephews, and nieces.....</p>	<p>One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son. [<i>Wife.</i>]</p>
<p>Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters) ...</p>	<p>One-third to wife for life in any case; rest to eldest brother. [<i>Wife.</i>] Rest to nieces, equally, if children of elder brother deceased.</p>
<p>No wife or child or issue of a deceased child.....</p>	<p>Lineal ancestor paternal, males of whole blood first. [<i>Father or grandfather, as case may be.</i>] All to eldest son, or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c. [<i>Either sons or daughters, not exceeding three.</i>] Daughters equally.</p>
<p>Children by one or more wives, and the issue of deceased children.....</p>	<p>Husband for life; afterwards to only child or to eldest son or issue of a deceased eldest son. [<i>Husband.</i>] If all daughters, to them equally.</p>
<p>Husband and child or children ...</p>	<p>All to mother in default of lineal ancestors on the father's side, or issue of such ancestors. [<i>Mother.</i>]</p>
<p>Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father...</p>	<p>All to eldest brother. [<i>Mother.</i>] All to sisters. [<i>Mother.</i>] All to father. [<i>Father.</i>]</p>
<p>Mother, and brothers and sisters</p>	<p>See above, "Rest to eldest son or his issue," under head "Wife and child," &c. [<i>Child.</i>]</p>
<p>Father, and brothers and sisters</p>	<p>All to brother. [<i>Brother.</i>]</p>
<p>Child and grandchild by deceased child</p>	<p>All to great-nephew, if eldest brother's grandson. [<i>Nieces.</i>] All to brother's daughter if child of eldest brother.</p>
<p>Brother and grandfather.....</p>	<p>Brother, all. [<i>Brother.</i>]</p>
<p>Brother's grandson, and brother or sister's daughter</p>	<p>One-third to wife for life; rest to brother. [<i>Wife.</i>] All to grandfather. [<i>Grandfather.</i>]</p>
<p>Brother and two sons.....</p>	<p>All to father's father. [<i>Either, or both.</i>]</p>
<p>Brother and wife</p>	<p>All to uncle or aunt. [<i>Grandmother.</i>]</p>
<p>Grandfather (no nearer)</p>	<p>Uncle, unless deceased uncle was elder brother, when his child takes all. [<i>Uncle.</i>]</p>
<p>Father's father, & mother's mother</p>	<p>Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side. [<i>Deceased uncle or aunt's children, not exceeding three.</i>]</p>
<p>Grandmother & uncle, or aunt on father's side (no nearer)</p>	<p>Nephew. [<i>Two aunts.</i>]</p>
<p>Uncle, and deceased uncle's child</p>	<p>Eldest brother's grandson, or if granddaughters between them equally. [<i>Either, not exceeding three.</i>]</p>
<p>Uncle by mother's side, and deceased uncle or aunt's child ...</p>	<p>Nephew by brother. [<i>Either, or both.</i>]</p>
<p>Two aunts, nephew, and niece, children of deceased brother ...</p>	<p>All to eldest nephew, son of deceased brother. [<i>To either of the nephews and nieces, not exceeding three.</i>]</p>
<p>Uncle or aunt's children, and brother's grandchildren through a son</p>	
<p>Nephew by brother, and nephew by half-sister</p>	
<p>Nephew by deceased brother, and nephews and nieces by deceased sister.....</p>	

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

THE entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 37. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as remodelled under

the 1 in 10 Act of 1894, will be found in detail on page 40.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the District Probate Registries (see page 359), application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

In Almanacks previous to 1886 tables were given showing the EXPECTATION OF LIFE, and the numbers of survivors out of a given number of births at each successive year of life. Those tables were constructed by the late Dr. Farr, of the General Register Office, and were calculated on the death-rates of 1838-54; but since that time very important changes have occurred in the death-rates at different ages, and consequently new tables have been constructed by Dr. W. Ogilvie, who succeeded Dr. Farr, on the basis of the death-rates of 1871-80. The following table gives the results both of the older and the later calculations; the first two columns in the male and female parts, respectively, giving the survivors at each year of life out of a million born of the corresponding sex, by the older and the newer calculation; and the two other columns giving similarly the expectation of life at each year :-

AGE.	MALES.				FEMALES.				A. E.
	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).		OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).		
	1838-54.	1871-80.	1838-54.	1871-80.	1838-54.	1871-80.	1838-54.	1871-80.

January 19.—Parliament opened by Royal Commission.

LORDS. The Address moved by Lord Weymouth and seconded by Lord Kenyon. Lord Kimberley, speaking as leader of the Liberal Peers, referred to the retirement of Lord Rosebery, and congratulated Lord Salisbury upon the conclusion of a Treaty of Arbitration with the United States. Lord Salisbury expressed a conviction, that unless essential reforms were adopted, the doom of the Turkish Empire could not be very long postponed. The Address was agreed to.

COMMONS. Lord Folkestone moved, and Mr. Lyttelton seconded the Address. Sir W. Harcourt after referring to the American Arbitration Treaty, and the appointment of the South African Inquiry Committee, reminded the Government that the Irish demand in the matter of taxation would have to be taken into consideration. Mr. A. J. Balfour replied.

January 20.—Mr. P. O'Brien's amendment to the Address, for the release of the Irish political prisoners, negated by 204 votes to 132.

January 21.—An amendment to the Address by Mr. Dillon, with regard to the relief of distressed Irish agriculture, defeated by 189 votes to 125.

January 22.—Lord George Hamilton made a statement as to the Plague in India. Sir H. Howarth moved an amendment to the Address, condemning the Government for having released the dynamitar prisoners, which elicited a warm retort from Mr. A. J. Balfour.

January 25.—Debate on Sir H. Howarth's amendment resumed by Mr. Davitt, Sir M. White Ridley, Mr. Asquith, Mr. Dillon, and Mr. Healy. The amendment was negated, as also was one by Mr. Kearley regarding Food Products.

January 26.—The Address agreed to after an amendment by Sir W. Wedderburn, asking for an inquiry into the condition of the people of India, had been rejected by 217 votes to 90. Mr. C. Disraeli also moved an amendment which was subsequently withdrawn, advocating the sending of a special envoy to Constantinople.

January 27.—Debate on a proposal of Sir Howard Vincent to amend the Merchandise Marks Act.

January 28.—Discussion on the motion for the adjournment of the House, drawing attention to the dispute between Lord Penrhyn and his Welsh quarrymen. Debate on the reappointment of the South African Committee, and an amendment moved by Mr. Maclean.

January 29.—After an important speech by Mr. Chamberlain, Mr. Maclean withdrew his adverse amendment, and the South African Committee was reappointed.

February 1.—Mr. Balfour explained the provisions of the Education Bill, which was to relieve Voluntary Schools, and a long discussion ensued upon the financial resolution preparatory to the introduction of the Bill.

LORDS. Statement by Lord Onslow as to the steps taken by the Government with regard to coping with the Famine in India.

February 2.—**COMMONS.** After the closure had been moved and carried, Mr. Balfour's motion for precedence for the Education Bill carried.

February 3.—The Queen's answer to the Address in reply to the speech from the Throne read.

February 4.—Debate on the Voluntary Schools

Bill continued by Mr. Asquith, Mr. Balfour, Mr. Haldane, Sir W. Harcourt, Mr. Chamberlain and others, and the Bill read a first time.

LORDS. Lord Lansdowne announced the intention of the authorities of putting the Brigade of Guards upon the roster for Foreign service.

February 5.—The Post Office Consolidation Bill read a second time.

COMMONS. The Dongola Expedition Vote discussed in Committee and agreed to, as also was a vote to defray the expenses of the Indian Troops at Suakin.

February 8.—Discussion on the Army Estimates.

LORDS. Statement as to the Indian Famine and relief measures.

February 9.—Lord Herschell's Bill, for further regulating Local Government Elections, read a second time.

COMMONS. Mr. S. Smith's motion, for Disestablishment and Disendowment of the Church in England and Wales, defeated by 204 votes to 86.

February 10.—Mr. C. H. Wilson moved the second reading of a Bill for the total prohibition of the sale of intoxicating liquors on Sunday. The Home Secretary said he could not support the measure, especially as a Royal Commission was inquiring into the subject. On a division, the second reading was negated by 206 votes to 149.

February 11.—Mr. Balfour moved the second reading of the Voluntary Schools Bill, and in the debate that followed, Mr. W. D. Green, Mr. Lloyd Morgan, Lord Cranborne, and Mr. J. Morley, spoke.

LORDS. The Duke of Devonshire spoke on the Navy and the Volunteer force.

February 12.—The Local Government Elections Bill read a third time.

COMMONS. Army estimates: discussion on the proposed increase of the Army, and the sending of the Guards to Gibraltar.

February 15.—Resumed debate on the second reading of the Voluntary Schools Bill: speeches by Mr. Canning, Mr. Robson, the Solicitor General, Sir F. Lockwood, Sir J. Gorst and others.

LORDS. Lord Salisbury replying to a question condemned the action of Greece in Crete.

February 16.—**COMMONS.** Adjournment of the House moved on the question of Crete. Voluntary Schools Bill read a second time.

February 18.—The London County Council scheme, for the building of a County Hall, rejected by 227 votes to 146. Mr. Chamberlain announced the indemnity claim of the Transvaal Government in respect of the Jameson raid as £1,667,938 3s. 3d.

February 19.—Army estimates discussed.

February 22.—Mr. Labouchere moved the adjournment of the House on Cretan affairs, which led to a lively discussion.

February 23.—Mr. Atherley Jones moved for a Royal Commission to inquire into the working of the Judicature Acts, but after a discussion the motion was withdrawn.

February 25.—Statement in both Houses in regard to the policy of Great Britain in Crete.

February 26.—**COMMONS.** East London Water Bill read a second time. In Committee of Supply, Mr. Goschen moved a supplementary vote of £507,000 for the Navy, which was agreed to.

March 1.—Committee on the Voluntary Schools Bill. Several amendments to Clause I. negatived. The closure moved and carried.

LOBDS. A Bill introduced and read a first time to regulate the transfer of church patronage.

March 2.—Lord Salisbury made a statement with regard to British policy in Crete.

COMMONS. Sir W. Harcourt moved the adjournment of the House on the affairs in Crete, which led to a debate in which Mr. Curzon, Mr. T. P. O'Connor, Sir E. Ashmead Bartlett, Mr. Courtney, Mr. Labouchere, Mr. T. G. Bowles, Mr. Bryce, Col. Saunderson, Mr. Balfour, Mr. J. Morley and others, took part. Ultimately the motion was withdrawn, and the House resumed the Committee stage of the Education Bill.

March 3 and 4.—Committee on the Education Bill.

March 5.—Discussion on the Naval Estimates: speeches by Sir C. Dilke, Mr. Goschen, Mr. Robertson, Sir A. Forward, Sir J. Colomb, and others.

LOBDS. Debate on the Report of the Commission on Financial relations between Great Britain and Ireland.

March 8.—Lord Templemore moved the second reading of the Parliamentary Franchise (Women's) Bill, which was negatived without a division.

COMMONS. Questions asked as to Crete, and Committee on the Voluntary Schools Bill resumed.

March 9, 10 and 11.—Voluntary Schools Bill in Committee.

March 12.—Navy Estimates discussed in Committee of Supply, and votes agreed to.

March 15.—*LOBDS.* Lord Salisbury made a statement with regard to the blockade of Crete.

March 16.—*COMMONS.* Clause I. of the Voluntary Education Bill passed by 279 votes to 107, after the suspension of the 12 o'clock and the closure had been carried.

March 18.—The Education Bill passed through Committee stage.

LOBDS. The Duke of Abercorn asked the Government to appoint a Commission to inquire into the working of the Irish Land Act of 1881. Lord Salisbury assented to the proposal.

March 19.—*COMMONS.* Naval Estimates in Committee of Supply.

March 24.—The second reading of the Court of Criminal Appeal Bill moved by Mr. Pickersgill, and seconded by Sir A. Rollit. After a debate in which Mr. Bucknell, Mr. Ambrose, Sir M. White Ridley, Sir E. Clarke, Sir H. Fowler and others took part, the second reading was carried by 129 votes to 85.

March 25.—The Voluntary Schools Bill read a third time after a motion for its rejection had been moved by Mr. Asquith.

March 26.—Civil service votes in Committee of Supply. Motion to reduce Lord Salisbury's salary negatived by 128 votes to 44.

LOBDS. Voluntary Schools Bill read a first time.

March 29.—Mr. Blake moved a resolution on the report of the Financial Relations Committee, showing Ireland to be unduly taxed.

March 30.—*LOBDS.* Second reading of the Voluntary Schools Bill carried by 109 votes to 15, after speeches by the Duke of Devonshire, the Archbishop of Canterbury, Lord Kimberley and others.

March 31.—*COMMONS.* Mr. Blake's resolution, after discussion, negatived by 317 votes to 157.

April 1.—Motion for adjournment of the House on Cretan affairs moved and seconded, but negatived without a division.

April 2.—Civil Service Estimates in Supply. *LOBDS.* Debate on the Education Bill, which was reported without a division.

April 5.—*COMMONS.* Sir J. Gorst explained the provisions of the Necessitous Board Schools Bill. After a discussion the resolution authorising the Bill was agreed to.

April 6.—Mr. Seaton Carr initiated a discussion on the inadequate production of food supplies in the United Kingdom.

April 7.—The Agricultural Produce (Marks) Bill read a second time by 160 votes to 91, and referred to a Select Committee.

April 8.—The Evidence in Criminal Cases Bill read a second time.

April 9.—Civil Service Estimates in Committee, and the House adjourned for the Easter recess.

April 26.—The Necessitous Board Schools Bill read a second time.

April 27.—Indian Officers Pension grievances discussed. Motion on Foreign-made Goods negatived without a division.

April 29.—Budget statement by the Chancellor of the Exchequer. The revenue for the year had increased nearly three millions and a half over the estimate, amounting to £103,950,500, and the expenditure to £102,335,000. The estimated surplus for the coming year was stated as £1,559,000, which would not allow of any reduction of taxation.

April 30.—Civil Service Estimates.

May 3.—Sir M. White Ridley explained the Employers' Liability Bill, which was read a first time. The Merchant Shipping (Undermanning) Bill read a second time and referred to the Standing Committee on Trade.

May 4.—Sir C. Cameron counted out on a resolution in favour of adult reformatories.

May 5.—Mr. Allen's Mines (Eight Hours) Bill rejected by 227 votes to 186.

May 6.—On the consideration of the Budget resolutions, Mr. Knox moved an amendment calling on the Government to extend the operation of the Agricultural rating to Ireland, which was supported by a number of Irish Conservatives. The motion was negatived by 219 votes to 127.

May 7.—Foreign Office Vote in Supply. Government Policy in Crete criticised.

May 10.—Committee on the Budget: Tea resolution agreed to.

May 11.—Budget resolutions agreed to, and Finance Bill introduced and read a first time. Resolution in favour of limiting the duration of speeches carried.

May 12.—Irish Sunday Closing Bill read a second time by 201 votes to 172.

May 13.—Foreign Prison-made Goods Bill read a second time.

May 14.—Irish Estimates discussed in Committee of Supply.

LOBDS.—Lord Dunraven called attention to the prevalence of contagious disease in the Army, especially in India, and moved for an inquiry.

May 17.—Discussion resumed on Lord Dunraven's motion in which the Duke of Cambridge, Lord Playfair, Lord Lister, Lord Kimberley and Lord Lansdowne took part. Ultimately the motion was withdrawn.

COMMONS. The second reading of the Workmen's (Compensation for Accidents) Bill debated,

JULY.

1. The Queen reviewed about 30,000 troops at Aldershot, including the Indian and Colonial contingents.

2. Celebration of the 1,300th anniversary of St. Augustine's landing in England.

7. Princess Christian opened the new Birmingham General Hospital on behalf of the Queen.

10. Herr Andrée started for the North Pole in a balloon, but up to the end of November nothing had been heard of him, and a relief expedition was despatched by the Norwegian Government.

13. The South Africa Committee, of which Mr. W. L. Jackson was chairman, issued their report and did not recommend their re-appointment.

16. The Queen addressed a personal letter of thanks to her subjects through the Home Secretary.

22. Meeting of London Telegraph employes to see what steps could be taken to remedy their alleged grievances.

24. Private Ward, of the 1st Devon, won the Queen's Prize at Bisleigh.

26. At Malakand, Lieut. Costello gained the Victoria Cross.

27. Gangadar Tilak arrested at Bombay for publishing seditious libels in a newspaper.

28. Lord Salisbury replied to Mr. Sherman's despatch of May 10, relative to the Behring Sea Fisheries.

30. Notice was given by Her Majesty's Government to the Foreign Secretaries of Germany and Belgium that existing treaties of commerce between Great Britain and those states would terminate on July 30, 1898.

Consols, highest, 113½; lowest, 112¾.

AUGUST.

3. The Bishops of the Church of England paid a visit to Glastonbury.

4. The King of Siam lunched with the Queen at Osborne.

5. Mr. T. C. Garth's *Hyacinth* won the German Emperor's Cup at Cowes, and H. R. H. the Prince of Wales' *Briannia* won the "Meteor Challenge Shield."

6. The King of the Belgians visited Her Majesty at Osborne.

— Parliament prorogued.

7. The German Emperor and Empress arrived at St. Petersburg on a visit to the Czar until the 14th.

— Major-General Hunter's forces captured Abu Hamed after a short skirmish with the Dervishes.

— The King of Benin made his submission to the acting Resident.

8. Señor Canovas del Castillo, Premier of Spain, assassinated by an Anarchist: his body was publicly interred on Aug. 13.

10. Statue of Charles Darwin unveiled at Shrewsbury.

15. Duel fought at Paris between Prince Henry of Orleans and the Count of Turin, because of the former's allegations against the conduct of Italian officers in Abyssinia. Prince Henry of Orleans was slightly wounded.

16. The National Gallery of British Art, the gift of Mr. Tate, and erected on the site of Millbank prison, opened to the public from this date.

17. The Duke and Duchess of York left Euston for Dublin, where they arrived on 18th, and opened a textile exhibition on 19th. On Aug. 20 the Duke was invested with the insignia of a Knight of St. Patrick at the same time as Lord Roberts of Kandahar, V.C. Leopardstown Races were visited on the 21st, Howth Castle on 22nd, and Dublin Horse Show on 25th.

— Conspicuous gallantry of Viscount Fincastle (now V.C.), Lieut. Col. Adams (now V.C.), and Lieut. Maclean (who died from wounds received), at Landikai, on the North-West Frontier of India.

18. President Faure left Paris for St. Petersburg.

— The British Association met at Toronto, Ontario, under the presidency of Sir John Evans, K.C.B.

19. H.M.S. *Thrasher* in collision with the *Phaeton* off the Eddystone.

23. Fort Ali Musjid suddenly attacked by the Afridis, and Fort Maude fired by them after being abandoned by the garrison. Fort Sadda was also assaulted, but the attack was beaten off.

25. Assassination of Don Ildiarte Borda, President of the Republic of Uruguay.

30. Two of the seditious Indian editors rigorously dealt with by the Satara Court.

31. President Faure returned to Paris from St. Petersburg.

Consols, highest, 113¾; lowest, 111¾.

SEPTEMBER.

1. The Duke and Duchess of York visited the Duke of Abercorn at Baron's Court.
3. Mr. Jackson arrived in the Thames on board the *Windward* from the Polar Expedition, on which he started July 11, 1894.
8. Doncaster Races: Mr. Gubbins' *Galtee More* won the St. Leger.
— H.R.H. the Duke and Duchess of York visited Belfast and opened the new Dock, leaving for Glasgow in the evening.
10. Revolution in Guatemala: the rebels captured San José.
11. Two cases of typhoid fever notified at Maidstone.
13. Fort Saragari captured by rebels after the Sikh garrison had been exterminated; Forts Cavnagari and Lockhart successfully held out against them.
14. Gangadar Tilak found guilty of publishing seditious articles and sentenced to 18 months' imprisonment.
24. Bank rate raised to 2½ per cent.
25. Duel with pistols between Count Badeni, the Austrian Premier, and Herr Wolff, of the German National Party, the former being wounded in the arm.
28. The 1st Battalion of the Grenadier Guards left England for Gibraltar.
— Opening of the 37th Church Congress at Nottingham.
29. Disaster to the *Thrasher* and *Lynx* off Dedman Point, Cornwall; four stokers scalded to death.
— Lieut.-Colonel Alderman Horatio D. Davies, M.P., elected Lord Mayor of London for the ensuing year.
Consols, highest, 112½; lowest, 111¼.

OCTOBER.

1. The King of Siam left England for the Continent.
— Great fire at Pascal's confectionery works, Blackfriars Road, S.E.
7. The Indian Famine Fund officially closed after £549,300 had been subscribed, but small balances arrived after this date.
8. General Weyler received his recall from the command in Cuba.
11. Collision between troops and populace in the streets of Rome owing to a popular demonstration against a proposed imposition of the income-tax.
— A German journalist sentenced to eight months' imprisonment for publishing a libellous article about King Leopold of Belgium.
14. Bank rate raised from 2½ to 3 per cent.
15. Lord Hillingdon (Chairman of the Bankers' Clearing House) and several of the most influential bankers in London memorialised the Chancellor of the Exchequer against his proposal to the Bank of England.
— The King of Corea proclaimed himself Emperor.
17. Disastrous fire in Nova Scotia; the town of Windsor entirely destroyed and 3000 persons rendered homeless.
18. General Lockhart cleared the Chagru defile, driving the hostile Oraksai and Afridi tribesmen on to Dargai, where they were routed by Generals Westmacott and Kempster.
— The Duke of Cambridge visited Bath and

received the freedom of the city, subsequently laying the foundation stone of a new art gallery.

19. Sir Nathaniel Lindley appointed Master of the Rolls in succession to Lord (now Viscount) Escher, resigned.
— The Chancellor of the Exchequer informed Lord Hillingdon that no radical currency changes were contemplated.
20. Gallant charge of the Gordon Highlanders, under Colonel Mathias, at Chagru Kotal, Piper Milne being particularly conspicuous for bravery. The ridge was cleared, and the brilliant action formed the turning point in the campaign.
21. It was announced in U.S. journals that the Chancellor of the Exchequer had informed the Washington Government that the reopening of the Indian mints could not be considered for the present.
— Sir Courtenay Boyle, at the direction of the Board of Trade, invited the employers and unionists on strike in the engineering dispute to consider a drafted basis of proposals. This was subsequently taken into consideration, but neither side found it practicable.
23. The Prince of Wales laid the foundation stone of the new buildings for Christ's Hospital (the Blue Coat School) at Horsham.
24. Serious railway accident near Peekskill, U.S.A., through the collapse of a bridge, the train being hurled into a river and many persons killed.
25. Special service at Westminster Abbey to mark the commencement of a new judicial year, attended by the judges and members of the bar; at a reception subsequently held by the Lord Chancellor the new Lord Mayor (Alderman and Colonel Davies, M.P.) was presented.
27. Sudden death of H.R.H. Princess Mary Adelaide Duchess of Teck, after an operation.
28. The Chancellor of the Exchequer at Bristol explained the attitude assumed by the British Government against the currency proposals made to Great Britain and France by the Washington Executive.
— Polling in the Barnsley Division of Yorkshire resulted in the election of Mr. Walton (Liberal) by a majority of 3,290 over Mr. Blyth (Conservative) and 5,653 over Mr. Curran (Labour).
29. Sudden death of Mr. Henry George ("Progress and Poverty"), the principal opponent of Judge Van Wyck and Mr. Seth Low for the Mayoralty of New York.
30. Daring robbery from the Diamond Merchants' Alliance Company's premises in Piccadilly; over £15,000 worth of jewellery stolen.
31. The business premises of Messrs. Carter, Paterson and Company in the Goswell Road destroyed by fire.
— St. Patrick's Cathedral, Melbourne, erected in 40 years at the cost of £240,000, dedicated.
Consols, highest, 112½; lowest, 111¼.

NOVEMBER.

1. Alarming accident at Victoria Station, Manchester, one person killed and six others injured.
2. Judge Van Wyck, the Tammany nominee, elected Mayor of "Greater New York" by an overwhelming majority.
3. Funeral of H.R.H. the Duchess of Teck at Windsor.
— Installation of the Right Hon. Joseph Chamberlain, M.P., Secretary of State for the Colonies, as Lord Rector of Glasgow University.
4. Bye-election in the Middleton Division of

Lancashire, Alderman Duckworth (Liberal) receiving 5,954 votes to 3,664 recorded for Mr. Mitchell, his Conservative opponent.

— Occupation Day, Buluwayo, Rhodesia, celebrated by the opening, with full formalities, of the extension of the railway from Capetown, a feat of great magnitude and importance.

5. Murderous attack on the President (Moraes) of Brazil resulting in the assassination of the Minister of War (General Bitencourt) who warded off the attack.

9. Lord Mayor's Day and the Prince of Wales's birthday, celebrated with customary solemnities in London.

15. The new Rhodesian Railway handed over for future working to the Cape Government.

19. Great fire at noon, originating in 15 Well Street, E.C., and spreading to Hamsell Street, Edmunds Place, Jewin Crescent, Bradford

Avenue, Redcross Street, Fore Street, Wood Street, Monkswell Street and Nicholl Square; 105 houses burned out, the (estimated) damage amounting to £1,750,000. Fifty-one steamers and 288 firemen were engaged, while 15 million gallons of water were used for its extinction.

20. One case of typhoid fever reported to the authorities at Maidstone, making the total 1,853, of whom 133 had succumbed.

25. London School Board Election.

27. Results published of School Board Election: 29 Progressives; 20 Moderates; 2 Roman Catholics; 2 Independents; 1 Independent Moderate; 1 Labour.

— Prince of Wales's Hospital Fund reached £188,751. (See also p. 292).

Consols, highest, 113½ (26th); lowest 111¼.

Bank rate 3 per cent.

PRINCIPAL FAIRS IN SCOTLAND, IRELAND, AND WALES.

SCOTLAND.

MANY of the principal Fairs in Scotland have lapsed, and those that are still held have declined in a great measure in recent years, so much so in fact, that in a few more years we may expect to see them become defunct. This decadence is in consequence of the rapid growth of the Auction-mart system, which affords sellers and buyers certain facilities and advantages which formerly, under the old system, did not exist. Our object is to furnish such information as may be useful, particularly to English buyers who intend visiting Scotland for the purpose of purchasing the native cattle or sheep.

WEST HIGHLAND CATTLE.—Important special sales are held in May, June, Sept., Oct. and Nov., at Stirling, Oban, Perth, Inverness, and Fort William.

FAIRS.—Falkirk Trysts (Larbert Station), and Tues. in Aug.; and Tues. and day before in Sept. and Oct. Doune Tryst (Doune Station, near Stirling). First Wed. in Nov. and day before; 4th Wed. and day before in Nov. All the best cattle are sold on the first day at each of these fairs.

ABERDEEN POLLED ANGUS CATTLE.—The best quality of this remarkable beef producing breed of cattle is very much in private breeder's hands, and although some excellent stores can be bought in the Aberdeenshire and Forfarshire Auction marts in the Spring and Autumn, it is from the breeders that most English buyers draw their supplies.

GALLOWAY POLLED CATTLE.—Castle Douglas and Lockerbie are the only Auction marts in Scotland where large sales of this class of cattle are held in the Spring and Autumn. Very large sales of pure-bred Galloway, and cross-bred (Blue Grey) cattle are also held on the Border, at the Carlisle Auction marts in the Spring and Autumn.

BLACK-FACE (HORNED) SHEEP.—Practically, all the fairs where this class of sheep was formerly sold are now defunct, except, perhaps, Grantown in the Spring, where young sheep and lambing ewes are sold. For high-class quality, Lanark is the premier mart, and very large sales of young sheep are held in the Spring; for lambs in Aug. and Sept.; and for cast ewes in Oct. Lockerbie, Peebles, Stirling, Perth and Inverness, Ayr, and Thornhill, Dumfriesshire, Ayr, marts where large numbers of black-face sheep are sold during the Spring and Autumn.

CHEVIOT SHEEP.—Special sales are held, principally in the Autumn, for this class of sheep at Hawick, Newcastle, and on the Border at Rothbury and Bellingham.

NORTH OF SCOTLAND CHEVIOT SHEEP

(which are generally a larger kind than the Border sheep), are sold in large numbers in the Autumn at the Perth and Inverness marts.

CROSS-BRED SHEEP (Border, Leicester and Black-face) are mostly sold as lambs in Aug. and Sept. at all the South of Scotland marts, perhaps the best quality class being at Carlisle Auction marts at the fairs, Aug. 26 and Sept. 19. A good class of Cross-bred lambs, mostly by a Wensleydale (Yorkshire) ram out of a Black-face ewe, can be obtained at the Castle Douglas and Ayr marts. Three-quarter and Half-bred (Border, Leicester and Cheviot) lambs are sold in July and Aug. at St. Boswells; also at Hawick, Peebles, Rothbury, Newcastle and Lockerbie marts.

KELSO GREAT RAM SALES, and Fri. in Sept.

CLYDESDALE HORSES.—These horses are sold in great numbers at all the South of Scotland fairs, and although cattle and sheep have gone into the Auction marts, the supply of horses at the fairs shows no appreciable falling off. The principal fairs are: Dumfries, Tues. and Wed. after Castle Douglas (Candlemas fair) in Feb.; Wed. before May 26; Sept. 24 and 25, if Tues. and Wed., if not, Tues. and Wed. after; Wed. before Nov. 22. Castle Douglas: Feb. 11 if Mon., if not, Mon. after (Candlemas fair); Sept. 23 if Mon., if not, Mon. after; Mon. before Nov. 22. Glasgow: 2nd and 4th Wed. in Jan.; every Wed. in Feb. and March; 1st and Wed. in April; 1st Wed. in May, June, July, Aug., Sept., Oct. and Dec. Rutherglen: Fri. after May 4; Tues. after June 4; Fri. after July 25; Fri. after Aug. 25; Wed. before 1st Fri. in Nov. Edinburgh: Tues. and Wed. after and Mon. (Hallow fair); and Wed. after Hallow Fair (Big Wed.). St. Boswells: July 18. Falkirk Trysts: 2nd and 4th Wed. in Jan. Clydesdale horses are also sold at the Ayr, Lanark, Edinburgh, Stirling and Perth Auction marts, also at the Border fairs held at Longtown (Cumb.), Carlisle, Staghawbank, Newcastle, Wigton (Cumb.) and Cockermouth, dates of which are shown in the English List.

IRELAND.

PRINCIPAL HORSEFAIRS.—Armagh (co. Armagh), 1st Thurs. in each month. Athlone (co. Roscommon), 3rd Mon. in Jan. and March. Ballinascloe (co. Galway), 1st Tues. in Oct. and four following days. * 1886—Gladiator, first French bred horse that won; 1867—snow fell during the day; 1866—second received 300 sovs. and the third 200 sovs. out of the stakes; 1878—start altered to New Level Post; 1876—Kisber, the first Hungarian bred horse that won. The Derby is now a stake of £6,000—£5,000 to the winner, £500 to the nominator of the same, £300 to the second, and £200 to the third horse.

† This race was established in 1776, but did not receive the name until 1778, when it was named out of compliment to Colonel St. Leger, and run for the first time on Doncaster town moor.

ETON AND HARROW.

Yr.	Winner.
1884	Drawn; rain 2d day.
1885	Harrow won by 3 wickets.
1886	Eton won by 6 wickets.
1887	Eton won by 5 wickets.
1888	Harrow won by 126 runs.
1889	Harrow won by 9 wickets.
1890	Drawn; rain 1st day.
1891	Harrow won by 7 wickets.
1892	Harrow won by 64 runs.
1893	Eton won by 9 wickets.
1894	Drawn; rain 1st day.
1895	Drawn.
1896	Drawn.
1897	Drawn.

DOGGETT'S COAT & BADGE.

Yr.	Winner.
1884	C. Phelps, Putney.
1885	G. Mackinney, Richmond.
1886	H. Cole, Deptford.
1887	W. G. East, Isleworth.
1888	C. R. Harding, Chelsea.
1889	G. M. Green, Barnes.
1890	J. T. G. Sansom, Kew.
1891	W. A. Barry, Victoria Docks.
1892	G. Webb, Gravesend.
1893	J. Harding, jun., Chelsea.
1894	F. Pearce, Hammersmith.
1895	J. H. Gibson, Putney.
1896	R. J. Carter, Greenwich.
1897	T. Bullman, Shadwell.

AQUATLO CHAMPIONSHIP.

Yr.	Winner.
1882	Hanlan beat Trickett.
1883	Hanlan beat Kennedy.
1884	Hanlan beat Wallace Ross.
1884	Hanlan beat Cook.
1884	W. Beach beat Hanlan.
1885	W. Beach beat Hanlan.
1885	W. Beach & Neil Matterson.
1886	W. Beach beat J. Gaudaur.
1886	W. Beach & Wallace Ross.
1887	W. Beach beat Hanlan.
1888	P. Kemp beat T. Clifford.
1888	P. Kemp & Hanlan (twice).
1888	H. Searle beat Kemp.
1889	H. Searle & W. O'Connor.
1890	P. Kemp & Neil Matterson.
1891	J. Stanbury & J. McLean.
1892	J. Stanbury & J. Sullivan.
1896	J. Stanbury & C. R. Harding.
1896	J. Gaudaur & J. Stanbury.

After Trickett had carried off the Championship to Australia in 1890, a Championship of England Cup was instituted, which, after being held in turn by R. W. Boyd, J. Higgins, and W. Elliott, was finally won by Hanlan, when he defeated the latter in 1879.

* Searle died in December, 1889, and O'Connor in 1892. O. B. Harding is the reputed champion of England.

BILLIARD CHAMPIONSHIP.

Yr.	Winner.
1871	Roberts, jr. & J. Bennett.
1871	W. Cook & J. Roberts, jr.
1872	W. Cook & J. Bennett.
1873	W. Cook & J. Roberts, jr.
1874	W. Cook & J. Roberts, jr.
1875	J. Roberts, jr. beat Cook.
1875	J. Roberts, jr. beat Cook.
1877	J. Roberts, jr. beat Cook.
1880	J. Bennett beat W. Cook.
1883*	J. Bennett beat T. Taylor.
1885	J. Roberts, jr. beat Cook.
1885†	Roberts, jr. & J. Bennett.

Cook died in 1893.
* Bennett resigned.
† Roberts made the largest break of these matches—125. This and the previous match were 3,000 up; the others, with the exception of the first, 1,000 up. No match since 1885.

LAWN TENNIS CHAMPIONSHIPS.

1893 J. Pim (G).
1894 Miss L. Dod (L).
1894 J. Pim (G).
1895 Mrs. Hillyard (L).
1895 W. Baddeley (G).
1896 Miss C. Cooper (L).
1896 H. S. Mahony (G).
1897 Miss C. Cooper (L).
1897 E. F. Doherty (G).
1897 Mrs. Hillyard (L).

BILLIARDS.

Best "spot-in" break (exhibition match) 3,304, by W. J. Peall, 1890; match for money 2,031, by W. J. Peall, 1888. Best spot-barred breaks, 1,392, by J. Roberts, jun., 1894, and 1,467* by T. Taylor, 1891. Greatest number of spot-hazards in succession 633, by W. J. Peall, 1888. Longest run of successive nursery cannons 195, by H. W. Stevenson, 1896. Longest run of successive losing red hazards 98, by J. Roberts, 1894. Largest number of successive screw-back red hazards 186, by J. G. Sala, 1888. Highest break on a championship table 165, by W. Cook, 1880. Fastest 1,000 up game all in, W. J. Peall, 1884, 44 min. Fastest 1,033 spot-barred, J. Roberts, jun., 1894, 59½ min. Mr. S. S. Christey is the Amateur Champion (spot-in), and S. Fry spot-barred.

Professional Records.—Greatest distance run in 1 hour 11 m. 24½ yds., by F. E. Bacon, June 19, 1897, at Rochdale, while J. Bailey (1881) ran 35½ m. in 4 hours, and C. Rowell 89 m. 1,540 yds. in 12 hrs., and 150 m. 395 yds. in 23 hours, Feb., 1882.

Amateur Records.—W. G. George ran 11 m. 93½ yds. in 1 hour, July 28, 1884; G. Crossland, September 22, 1894, ran 50 miles and a half in 2 hours, both at Stamford Bridge. T. P. Conneff in America, 1894, ran 1 mile in 4 m. 15 sec., but not in an open competition.

E. A. Johnson	6 0½	1881
E. A. Johnson	5 3	1878

Putting the Weight, 26 lbs, G. R. Gray, 47ft., 1893. Throwing the Hammer, 26 lbs, J. Flanagan 50ft. 8 in., 1897. Both in America, from 7ft. circle, amateur world's records. 1 These records are the only ones generally accepted in this country, though it is certain that several professionals have travelled the distance a yard or two yards quicker. Geo. Seward's apocryphal 61 secs. is no longer accepted. On July 9, 1890, an American amateur, W. C. Downs, ran a straight ¼-mile in 47 2-5th secs. at Boston.

500 yds., 52½ secs., and 600 yds., 1 m. 11 2-5th secs., both by E. C. Bredin. Half-mile, 1 m. 54 2-5th secs., by F. J. K. Cross. High Jump, 6ft. 4½ in., by J. M. Ryan. Throwing the Hammer (26 lbs., 9 ft. circle), 127 ft., by J. Flanagan. Putting the Shot (16 lbs., 7ft. sq.), 46ft. 5½ in., by D. Horgan. 6 The pole-jumping record is held by an amateur, R. D. Dickinson, with 17 ft. 9 in. at Kidderminster, 1892. 7 Made in New Zealand. 8 Not Music-hall exhibitions. 9 Made in America. 10 Made in Australia. * Balls jammed in mouth of pocket.

2 Made after leaving the amateur ranks, in a match with Cummings, Aug., 1886, beating previous record by nearly 4 secs. 3 In America F. P. Murray is credited with 1 mile in 6 min. 29 2-5th secs., 3 miles in 21 min. 9 2-5th secs. 4 British amateur records.—100 yds., 16 secs., by A. Wharton, C. Bradley, and A. R. Downer; 200 yds., 21 4-5th secs., by C. G. Wood; 3 yds., 31 2-5th sec., by C. G. Wood

N.E.—The following records (amateurs) are also authentic: 200 Yards Hurdles in England G. E. Shaw, 15 4-5th secs., on grass. In America, on cinders, S. Chase, 15 2-5th secs. Walk, London to Brighton, 52½ miles, E. Knot, 9 h. 26 m. 44 secs., 1897. Throwing the cricket ball, 127 yds. 1ft. 2 in., by W. H. Game, at Oxford, 1873. Greatest distance in 6 six days professional contest, 623 m. 1,220 yds., by G. Littlewood, New York, 8th December, 1882.

* Paced by tandems, &c., with wind shields. † Flying starts.

In professional bicycling, M. Cordang, Sept. 16, 1897, at the Crystal Palace, rode 377 miles 600 yards in 12 hours. At Madison Square Gardens, New York, Dec. 7-12, 1896, E. Hale (England), rode 1,900 miles 1,408 yards in 124 hours.

Cricket.—Highest individual score, A. E. Stoddart, 485, Hampstead v. Stotes, 1896. Largest gross score, Orleans Club v. Rickling Green, 920, Aug. 3rd, 1882. In a first-class match, Yorkshire, 887, v. Warwickshire May 8, 1896. Also in first-class cricket, highest individual score, A. C. MacLaren, 424, for Lancashire v. Somerset, at Taunton, July 1895. Lowest score in an innings, 12, by Oxford University (one man absent) v. M.C.C. and Ground, at Oxford, May 1877. Most runs made in a year in England, 2,780, by K. S. Ranjitsinhji, in 1896, in 55 innings (7 times not out), average 57.9. England v. Australia matches, 27 in Australia, 19 in England; England won 25, Australia 15, drawn 6, up to November 30th, 1897.

Trotting.—Fastest mile, in America, 2 m. 3 3/4 s. by Alix, 1894. Fastest pacing mile, 2 m. 0 1/2 s., by John R. Gentry, 1896.

10,000	J. J. Eden	Hamar	0 17 56	1895

Eden must have beaten several of the English measurement times in the above records.

All Foreign Records in miles are doubtful. With a wind, T. Donoghue, in 1887, skated 1 mile straightaway on the Hudson River in 2 min. 12 3/5th secs. Our champion, Fish Smart, in 1881, skated 1 mile straightaway, with a flying start, in 3 min. dead, no wind; and in 1893, J. E. Aveling, at Lingay Fen, skated a quarter-mile in 28 1/2 secs.

With the wind, or on doubtfully-measured tracks, much faster times than the above are recorded. H. Hagen, of Norway, a professional, on Feb. 28, 1892, skated a half-mile in 1 min. 20 1/2 secs. In England, 1893, Marten Kigma, a Dutch professional, skated 1 mile with three turns in 3 min. 8 secs.

COURSING.—WATERLOO CUP.

UNIVERSITY BOAT RACE.

Table with columns: Yr., Place of Rowing, Winner, m. s., Won by. Contains rowing race results from 1839 to 1897.

* First race rowed in outriggers.
† First race in present style boats without keels.
‡ Sliding seats used for first time.
§ The Oxford bow-man caught a crab and sprung his oar when leading.
|| Rowed on a Thursday. ¶ Rowed on a Monday.
‡ Rowed on a Wednesday. d Two races this year.
e Rowed in a snowstorm. c Rowed on a Friday.
Oxford have now won 31 and Cambridge as races—the 1877 contest being a dead heat.

THE CRICKET MATCH.

Table with columns: Yr., Result, Yr., Result. Contains cricket match results from 1839 to 1897.

ORIOKET—continued.

Table with columns: Yr., Result, Yr., Result. Contains orioket results from 1867 to 1888.

In 1827, 1844, and 1888 the matches were not finished. Summary:—Cambridge, 32; Oxford, 26; drawn, 3.

ATHLETICS.

Table with columns: Year, Result. Lists athletic events and winners from 1864 to 1897.

* Ties in Hundred and High Jump. Oxford have won 24 times to Cambridge 19.

The best records in the series of sports are:—
100—10 secs., by J. H. Wilson (Oxford) in 1869-70; and G. H. Urmon (Oxford) in 1877.
440—49½ secs., by W. Fitz-Herbert (Camb.) in 1895.
1 Mile—4 min. 19½ secs. by W. E. Lutyens (Camb.) in 1894.
3 Miles—14 min. 44 secs., by F. S. Horan (Camb.) in 1893.
* Hurdles—16 secs., by A. B. Loder (Camb.) in 1876, and W. R. Polloch (Camb.) in 1884.
High Jump—5 ft. 12 in. by E. D. Swanwick (Oxford) in 1893.
Long Jump—27 ft. 5 in., by C. B. Fry (Oxford) in 1882.
Putting the Weight, 36 lbs. (to ft. square), 36 ft. 1 in., by J. H. Ware (Oxford) in 1886.
Throwing the Hammer, 101bs. (30 ft. circle), W. Lawrence (Oxford) 120 ft. 1 in. in 1887. The square and circle were first introduced in 1880.
* These times are those returned by the Official Time-keeper.

RUGBY FOOTBALL.

Table with columns: Year, Result. Lists rugby football results from 1873 to 1897.

Oxford 9; Cambridge 8; drawn 7. Total, 24.

ASSOCIATION.

Table with columns: Year, Result. Lists association football results from 1873 to 1897.

Cambridge, 13; Oxford, 20; with one drawn game in 1889-9.

GOLF.

1897. Cambridge won by 5 holes. Of the 19 matches played, 10 have been won by Cambridge and 8 by Oxford, one having been halved.

BIRTHS.

WHEN a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration thereof rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free of charge when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence, or at the house where the child was born, when the Registrar on so attending to register may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the superintendent Registrar, and on payment of fees to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees. It is important to persons of all classes to be able to prove their age and the place of their birth. The only legal proof of these is afforded by the civil registers, which the law now requires to be made as above described. The child's baptismal name, if changed, or not previously given, may be inserted in the register within twelve months after the registration of the birth.

DEATHS.

WHEN a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The nearest relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased in the same (Registrar's) sub-district. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased. The written

notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

CORONERS' INQUESTS are held in all cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are supposed by the law to demand inquiry. Still, it often occurs that a medical man quite familiar with the case will give his certificate that the death arose naturally, from heart disease, apoplexy, &c., and in such case a coroner's inquest is dispensed with. Coroners do not intrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person having been duly summoned as a witness is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting jurymen being £5. The exemptions of persons from serving on juries contained in Jury Acts also apply to Coroners' inquests. There have

been many instances of Coroners' inquests into the cause of fire, even where there is no loss of life, and this is an excellent practice.

VACCINATION.

THE parent of every child born in England must, within three months after the birth, or the person having the custody of any child must within three months after receiving the custody have it vaccinated by some medical practitioner, or take it to the Public Vaccinator of the vaccination district in which the child shall be then resident, to be vaccinated. When the child is not vaccinated by the Public Vaccinator, the parent or custodian must also transmit a certificate of successful vaccination, signed by the medical practitioner, to the Vaccination Officer appointed by the Guardians of the district, within seven days after the performance of the operation. For neglecting to procure vaccination, or to transmit the certificate as required, a penalty of 20s. is incurred.

MARRIAGE BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—“Banns” formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. Formerly banns might be proclaimed on Church holidays, but the Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony. If there is morning service the right time for banns is after the Nicene Creed; and if there be afternoon or evening, and no morning service, then the right time is after the 2nd lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the Established church of the parish. In like manner in Scotland the publication takes place in the parish church, even where the parties are married in the Anglican or Episcopal church. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage. The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Wood's case*, 4 S. & T. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or “ecclesiastical parish,” the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the “mother church” or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score

of insufficiency of age that banns are “forbidden.” By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on a registrar's certificate without banns.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 401). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; the penalty is far less severe on a Dissenting minister or registrar taking part in an irregular marriage. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two witnesses present, and that these witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Act of 1857. An incumbent may under this Act refuse to marry a divorced person, but he must allow another clergyman of the diocese to perform the service.

Although the presumption of law is in favour of the validity of a marriage, great care should be taken to comply with the directions of the several statutes in every particular. Where it is impossible to comply literally, the parties must do all they can to comply with the law.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 1d. Searches on the register-books may be made on payment of small fees, viz., 1s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knightrider Street, or at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays, 10 to 2), are available for London and all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties; nor will any agent be allowed to interfere, either in procuring or paying for the licence. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to about thirty shillings, in addition to the cost of stamps, 12s. 6d. The cost of licences through a clerical surrogate in

the country varies, according to the diocese, from £1 15s. to £2 12s. 6d. By the 4th George IV. c. 76, it is enacted, "in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized."

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, this being the usual mode of obtaining a marriage licence, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury (after application at the Faculty Office, 23 Knight-riders St., Doctors' Commons), under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must be such as to meet with his Grace's approval. Fees for licence stamp, &c., average £29 8s.

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

NOTICE AND DECLARATION.—In case of an intended marriage by Certificate at a register office (i.e., the superintendent registrar's office), or a certified building (i.e., usually a Roman Catholic or Nonconformist church or chapel), it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A.) to the superintendent registrar of the district within which the parties shall have dwelt for the space of seven days then next immediately preceding; or if the parties dwell in different superintendent registrars' districts, a like notice must be given to the superintendent registrar of each district: every form of notice contains solemn declarations that there is no lawful hindrance to such marriage, as to the necessary residence, the ages of the parties, and consent of parent in case of a minor; such notice and declarations must be signed before a registration officer of the district, namely, a superintendent registrar, or registrar of births and deaths or marriages or the deputy of some such registrar. If the marriage is intended to be had by licence, it is necessary for only one of the parties to give notice to the superintendent registrar, in manner before mentioned, in whose district he or she has resided for the space of fifteen days immediately preceding, and if the other party reside in a different superintendent registrar's district, it is not requisite that notice should be given to such last-mentioned superintendent registrar; but one of the parties must, for the space of fifteen days immediately preceding the giving of the notice, have had his or her usual place of residence within the district of the superintendent registrar to whom such notice is to be given. In case a minister did not happen to attend and the parties wished, they might be married before the registrar without any religious ceremony.

CERTIFICATE.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the

superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

LICENCE.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one whole day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the licence.

MARRIAGE CEREMONY.—After the expiration of twenty-one days after the entry of the notice if the marriage is intended to be had without licence, or of one whole day if by licence, the marriage may be contracted at the register office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties is required to declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.;" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." A wedding-ring is usually required. In case a minister does not happen to be present, and the parties wish it, they may be married in any chapel or building certified for marriages, the registrar only being present with the two witnesses. The marriage laws of Scotland are peculiar, and cannot here be set out; but it may be mentioned that "Gretna Green weddings" are obsolete, a period of residence being now required by law. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in all places where the Welsh tongue is commonly used. If both parties are of the Jewish persuasion, they must give notice to the registration officer, in manner before mentioned, and may marry according to their usages in a synagogue or private dwelling-house, and at any hour of the day; the marriage must be registered by the secretary of the synagogue to which the husband belongs. If both parties are members of the Society of Friends, they must give notice to the registration officer in manner before mentioned, and may be married in a Friends' meeting-house, and the marriage must be registered as soon as conveniently may be after its solemnization by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a registrar of marriages is not requisite at such marriages of Jews or members of the Society of Friends. The provisions as to Notices and Licences given above do not apply to Ireland. [Marriages before a Registrar in that country are regulated by 7 & 8 Vict. c. 81, and 26 & 27 Vict. c. 27; the Act regulating marriages in that country in places of Worship is 33 & 34 Vict. c. 110.]

CERTIFICATE OF BIRTH, DEATH, OR MARRIAGE.—On giving the name and date this can be obtained at Somerset House on payment of 3s. 7d. made up as follows: 2s. 6d. for certificate, 1s. for

search, and 1*d.* for stamp. Enquiries by post from residents in the Metropolis will not be considered; attendance in person or by agent is necessary. Certificates are also obtainable from the superintendent registrar of the district in which the birth, death, or marriage took place at the above rate.

FEES FOR MARRIAGE AT REGISTRY OFFICE.

For entering notice of a marriage without licence into the marriage notice-book ...	s. d.
For entering notice of a marriage by licence into the marriage notice-book, 1 <i>s.</i> ; stamp duty, 2 <i>s.</i> 6 <i>d.</i>	1 0

For every marriage solemnized in the presence of the Registrar without licence...	5 0
Ditto, by licence	10 0
For every certificate of marriage	2 6
Stamp duty on ditto	0 1

MARRIAGES OF BRITISH SUBJECTS ABROAD.

AN Act was passed on the 27th June, 1892, to consolidate enactments relating to the marriage of British subjects outside the United Kingdom. This Act came into force on the 1st January, 1893. An Order in Council was passed on the 28th October, 1892, laying down Regulations for Marriages under the Act.

British subjects desirous of being married at an embassy, legation, or consulate, must give seven days' notice of the intended marriage, but one of the parties at least must have resided for that time in the district immediately preceding the giving of such notice. After the suspension of such notice for fourteen days the marriage may take place, provided one or both parties have resided for three weeks immediately preceding within the consular district. In cases where one of the parties only has dwelt within the district of the officer by whom the marriage is to be solemnized, the non-resident party, if resident abroad, must give notice to the Consular Officer for the district in which he or she resides; or, if resident in a place in the United Kingdom, the same notice must be given as if that party were about to be married at that place. A Consular Officer holding a warrant for a district can only solemnize a marriage at his own official house. He cannot solemnize a marriage at the office of any subordinate consular officer, or elsewhere. No marriages performed at any other place are valid under the Foreign Marriage Act. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present; and an oath, declaration, or affirmation must be made by both parties with reference to their age, and parents' consent, if minors.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of 18th August, 1892, and are payable to Her Majesty's Government:—

For receiving notice of an intended marriage.....	£ s. d.
For receiving notice of a caveat	0 10 0
	1 0 0

For every marriage solemnized by or in the presence of a Marriage Officer and registered by him

For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place

For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same

Marriages may be solemnized between the hours of 8 a.m. and 3 p.m.

The ceremony, if a marriage under the Foreign Marriage Act, may be performed by, or in the presence of, any Ambassador, Minister, *Chargé d'Affaires*, or any of the Secretaries authorized for that purpose, or by any Consul-general, Consul, Vice-consul, Consular agent (or any person duly authorized to discharge their duties), or Pro-consul, provided that such consular officer is furnished with a warrant signed by the Secretary of State for Foreign Affairs. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorized Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church. If the service be not that of the Church of England, the contracting parties must make a declaration before the Marriage Officer to the effect that they know not of any lawful impediment why they may not be joined in matrimony, and that they call upon the persons present to witness that they take each other respectively to be lawful wedded husband and wife. In the absence of any religious ceremony, such declaration is sufficient.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of Her Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited. A consular officer is authorized to register, at the consulate at which he is appointed to reside, marriages solemnized in accordance with the *local law* between parties of whom one at least is a British subject, provided that he be satisfied by personal attendance that the marriage has been so solemnized; he cannot be required to attend at the solemnization of a *lex loci* marriage beyond the place at which he is appointed to reside.

A marriage which would not be valid if solemnized in England would be equally invalid if solemnized in one of Her Majesty's embassies, legations, or consulates abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity (such as that between a man and his deceased wife's sister) would not be valid

in England even if valid in the country where the marriage was contracted.

Marriages may also be solemnized under the "Foreign Marriage Act, 1892," before any governor, high commissioner, or resident, who may be duly authorized to that effect, and also before the commanding officers of any of Her Majesty's ships on a foreign station.

BRITISH NATIONALITY AND NATURALIZATION.

NATIONALITY.—The following are, by the law of England, deemed to be British subjects:—

1. All persons born in Her Majesty's dominions, whether of British or of Foreign parents.
2. Children of natural-born British subjects, wherever born.
3. Grandchildren of natural-born British subjects, wherever born.
4. Persons naturalized (a) By Special Act of Parliament, (b) Under the provisions of the "Naturalization Act, 1870."

The above does not apply to married women, who are deemed to be subjects of the state of which their husbands for the time being are subjects.

Natural-born British subjects can only deprive themselves of British nationality, (1) If they happen to be born in the British dominions of foreign parents, in which case they may, if of full age and if under no disability, make a declaration of alienage; (2) If they voluntarily become naturalized in a foreign state.

British subjects born in foreign countries sometimes become, by the law of the country of their birth, subjects or citizens of that country. In such case they may, by the law of England, when of full age, and if under no disability, make a declaration of alienage, and they then cease to be British subjects. Should they retain their British nationality, and continue to reside in the country of their birth, their British nationality will not avail them if claimed as subjects or citizens of the country in question.

NATURALIZATION.—Although in rare instances aliens are naturalized by special Act of Parliament, the ordinary way of becoming naturalized as a British subject is by fulfilling the requirements of the "Naturalization Act, 1870." The applicant must either have resided in the United Kingdom for a term of not less than five years, or have been in the service of the Crown for a similar period. He must also furnish evidence of his intention, when naturalized, either of residing in the United Kingdom, or of serving under the Crown. All applications for certificates of naturalization should be addressed to the Secretary of State for the Home Department.

The privileges of naturalized British subjects are thus stated in the "Naturalization Act":

"An alien to whom a certificate of naturalization is granted shall in the United Kingdom be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, to which a natural-born British subject is entitled or subject in the United Kingdom, with this qualification, that he shall not, when within the limits of the foreign state of which he was a subject previously to obtaining his certificate of naturalization, be deemed to be a British subject unless he has ceased to be a subject of that state in pursuance of the laws thereof, or in pursuance of a treaty to that effect."

With reference to the last paragraph of the foregoing extract, it may be mentioned that the only country with which Great Britain has yet

concluded a treaty on the subject of naturalization is the United States of America. In all other countries, therefore, it is incumbent on the person concerned, if he wishes to have British protection in the country of which he was previously a subject, to show that he has ceased to be a subject of that state.

A natural-born British subject, who has become naturalized in a foreign country, may obtain a certificate of re-admission to British nationality on fulfilling the conditions required in the case of aliens applying for a certificate of naturalization.

The children of naturalized British subjects, if born in the British dominions, are by the law of England deemed to be British subjects. If born abroad, they are only deemed to be naturalized British subjects provided that their father was naturalized under the Naturalization Act, 1870, and that during infancy they became resident with their father, or mother being a widow, in any part of the United Kingdom.

British colonies have power to legislate on the subject of naturalization. Colonial naturalization is, however, only operative within the limits of the particular colony in which the naturalization may have been granted.

The following fees are leviable under the Naturalization Act, 1870:—

	£	s.	d.
On grant of certificate of naturalization	5	0	0
For registration of declaration, with or without oath of allegiance	0	10	0
For certified copy of any declaration or certificate with or without oath	0	10	0

STATUS OF ALIENS.—Real and personal property of every description may be taken, acquired, held, and disposed of by an alien in the same manner in all respects as by a natural-born British subject, but the acquisition of a title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any municipal, parliamentary, or other franchise.

Aliens are not entitled to be tried by a jury *de mediato lingue*, but are triable in the same manner as if they were natural-born subjects.

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of such child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *excusate* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *excusate* renders the employer liable to an action. A man who is adjudged the father of a bastard child may be peremptorily discharged by his employer. In case any living new-born child is found exposed, it is the duty of any person finding such child, and of any person in whose charge such child may be placed, to give information to the Registrar of Births.

NOTIFICATION OF INFECTIOUS DISEASES.

THE Act of 1889 (52 & 53 Vict. c. 72) is the outcome of very much public discussion, at medical and other Congresses. The problem was not simple, and there were objections to every mode of solving it. But an Act was clearly necessary, as it was useless to give to local authorities all kinds of powers for destroying and disinfecting, and yet not to ensure that information should be furnished to them. As the medical profession protested against any new duty being cast solely upon them (although they know far more about the matter than any other people), the duty of informing the authorities is placed on the "head of the family" in the first instance; and by sect. 3, the head of the family, and failing him the nearest relatives of the patient, and failing them the person in charge of the patient suffering from any infectious disease, must give notice (in writing or print, in an approved form) to the medical officer of health of the district. Secondly, the medical man attending the patient must send a certificate giving all the particulars to the Officer of Health. Failure to give the notice or the certificate renders the defaulting person liable on summary conviction to a fine not exceeding £2. Forms are to be prepared and circulated; and the local authority is to pay the certifying practitioner a fee on each certificate of 2s. 6d. if the case occurs in private practice, and 1s. if in a public body or institution. The local authority is to give public notice before bringing the Act into operation.

SECT. 6 gives a long list of the diseases, beginning with small-pox and cholera, and ending with fevers of several kinds, and the local authority may by sect. 7 add other diseases to the list. Therefore each locality is liable to have its own list of contagious diseases; and the public must rely, not on the list in the Act, but on the list to be published in the locality. Sect. 9 provides for expenses; and sect. 10 directs what is to be done in London by the officer of health on receiving a notice. Sect. 11 concerns medical men only; while sect. 12 only concerns Woolwich. Sect. 13 applies the Act to ships, boats, vans, sheds, and other places used as habitations. In London, therefore, i.e., the Metropolitan District, the Act is already in force; and householders should procure the information required at their vestry halls.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875, it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty not exceeding £5. A person suffering from such disorder who enters a public conveyance without previously notifying to the owner or driver that he is so suffering, shall be ordered by the Court

to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance is required to immediately provide for the disinfection of such conveyance after it has to his knowledge conveyed any person suffering from a dangerous infectious disorder; but no such owner or driver can be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. Any person who knowingly lets for hire any house, room, or part of a house in which any person has been suffering from any dangerous infectious disorder without having such house, room, or part of a house, and all articles therein liable to retain infection, disinfected to the satisfaction of a legally qualified medical practitioner, as testified by a certificate signed by him, is liable to a penalty not exceeding £20. Any person letting for hire, or showing for the purpose of letting for hire, any house or part of a house, who, on being questioned by any person negotiating for the hire of such house as to the fact of there being, or within six weeks previously having been therein, any person suffering from any dangerous infectious disorder, knowingly makes a false answer to such question, is liable to a penalty not exceeding £20, or to imprisonment with or without hard labour for a period not exceeding one month. Where, on the certificate of the Medical Officer of Health, or of any two medical practitioners, it appears that any urban or rural sanitary authority that any house, or part thereof, is in such a filthy or unwholesome condition that the health of any person is affected or endangered thereby, or that the whitewashing, cleansing, or purifying of any house, or part thereof, would tend to prevent or check infectious disease, the local authority may give notice in writing to the owner or occupier of such house, or part thereof, to whitewash, cleanse, or purify the same as the case may require, and such person is liable to a penalty not exceeding 10s. for every day during which he fails to comply with the notice, and the sanitary authority may cause the required work to be done, and may recover the expenses from the person in default. A sanitary authority may direct the destruction of any bedding, clothing, or other articles which have been exposed to infection from any dangerous infectious disorder, and may give compensation for the same. Where any suitable hospital or place for the reception of the sick is provided within the district of a sanitary authority, or within a convenient distance of such district, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, may, on a certificate signed by a legally qualified medical practitioner, and with the consent of the superintending body of such hospital or place, be removed by order of any justice to such hospital or place at the cost of the sanitary authority. The foregoing provisions do not apply to the Metropolis, but the requirements of the law there in force are in most respects the same. The perfect isolation of every case of dangerous infectious disease is the only effectual mode of preventing its spread, and this is best attained by the voluntary co-operation of patients and those in charge of them with the medical attendant or Medical Officer of Health when the disease first makes its appearance.

Architects' Fees are easily calculated, it being the custom to charge 5 per cent. on the value of new work, if exceeding £500; if below that sum, an increased scale is usual, rising to 10 per cent. for works under £100. An increased charge is also made for alterations to existing buildings. If PLANS, &c., are prepared for works which are never carried out, the charge is one-half the above, with a further half per cent. if tenders have been invited and received. These charges do not include negotiations for purchase of site, &c., nor settlement of difficulties with adjacent owners and public authorities. If ADVICE be sought as to decorations, fittings, and furniture, a further charge is usual.

Surveyors' Fees.

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2s. per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £200, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1½ on the excess, and out-of-pocket expenses. But it is now usual to make a bargain for a fixed and moderate sum.

VALUATION of land—6d. per acre, and out-of-pocket expenses. No fee less than 5 guineas.

Auctioneers' Fees.

FOR THE SALE OF FREEHOLD AND COPYHOLD ESTATES AND HOUSES AND GROUND LEASES, BY PRIVATE CONTRACT OR BY AUCTION—£5 per cent. on the first £100; £2½ per cent. up to £5,000; and on the residue above that sum £1½ per cent.; and the usual commission of £5 per cent. in addition on the amount paid for fixtures, furniture, and effects, and in addition for any disbursements.

FOR LETTING UNFURNISHED HOUSES, OR DISPOSING OF LEASES OTHER THAN GROUND LEASES BY ASSIGNMENT OR OTHERWISE.—Where the term is for three years or less, £5 per cent. on one year's rent; where for more than three years, £7½ per cent. on one year's rent, and (in either case) upon the premium or consideration, and £5 per cent. commission on any sum obtained for fixtures, furniture, or effects of any kind.

FOR LETTING FURNISHED HOUSES, IN TOWN OR COUNTRY.—When let for a year or less period, £5 per cent. on the rental. When let for more than a year, £5 per cent. on first year's rent, and £2½ per cent. on rent for remainder of term. Where a property is let, and the tenant afterwards purchases, the commission for selling will then become chargeable, less the amount previously paid for letting, whether furnished or unfurnished.

FOR VALUATIONS OR SALE OF FURNITURE, FIXTURES, AND OTHER EFFECTS BY AUCTION OR OTHERWISE.—£5 per cent. up to £500, and £2½ per cent. on the residue.

FOR VALUATION OF FURNITURE AND EFFECTS, FOR PROBATE OR ADMINISTRATION.—£2½ per cent. on the first £100, and £1½ per cent. on the residue.

FOR VALUATION OF PROPERTIES.—£1 per cent. up to £1,000, 5s. per cent. beyond, on full amount of valuation. In valuations for Mortgage, if an

advance is not made, one-third of the above scale, the minimum fee to be £3 3s.

FOR NEGOTIATING THE PURCHASE OF ESTATES, HOUSES, AND GROUND LEASES.—£2½ per cent. up to £500, and £1 per cent. beyond that amount.

FOR NEGOTIATING THE TAKING OF FURNISHED OR UNFURNISHED HOUSES.—Half the scale for letting.

FOR LETTING BUILDING LAND.—Amount of one year's ground rent, or by agreement.

FOR MAKING AND EXAMINING INVENTORIES, AND MAKING CATALOGUE FOR AUCTION SALE.—From one guinea, according to length, exclusive of expenses.

MAKING SCHEDULE OF FIXTURES TO ATTACH TO LEASE.—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING SCHEDULE OF DILAPIDATIONS, AND SERVING NOTICE TO REPAIR.—From 2 to 5 guineas per day.

FOR SETTLING AMOUNT OF DILAPIDATIONS.—3 per cent. on amount, and out-of-pocket expenses.

RAILWAY, SCHOOL BOARD, CORPORATION, BOARD OF WORKS, AND OTHER COMPENSATIONS.

AMOUNT OF AWARD.

£1,000 fee	18 Gs.	£5,000 fee	38 Gs.
1,200	19	6,000	43
1,400	20	7,000	48
1,600	21	8,000	53
1,800	22	9,000	58
2,000	23	9,500	61
3,000	28	10,000	63
4,000	33	12,000	73

No fee less than 7 guineas, and a fee of 3 guineas per day for London valuers, and 5 guineas per day for valuers outside the London area, for attendance in London before jury or arbitrator.

MANAGEMENT of estates, including collection of rents—Tithes—rent charges, ground rents, &c., from 3 to 5 per cent.; cottage property, from 5 to 10 per cent., according to agreement, which should be specially made.

ALLOWANCES UNDER THE BANKRUPTCY ACTS, 1883 AND 1890.

The following charges are to be subject to reduction by agreement with the Official Receiver or the trustee, or to increase with the sanction of the Committee of Inspection and the Official Receiver:—

Brokers.—For inventory not exceeding 5 folios, 10s. 6d.; additional per folio to 20 folios, 1s. 6d.; each folio after 20, 1s. For inventory and valuation:—On the first £100, £2 10s.; for the next £400, £1 5s.; above £400 up to £10,000, £1; above £10,000, 10s. Travelling expenses in addition.

Auctioneers.—For sales by private contract half the above charges for inventory and valuation; for sales by auction (in addition to certain out-of-pocket expenses) of chattel property, 5 per cent. on first £500, 4 per cent. on next £500, above £1,000 2½ per cent.; and of estates in land, including prior valuations for determining amount of reserve bids, on first £300 5 per cent., on next £1,600 2½, above up to £5,000 1½, and above £5,000 1 per cent. Cost of surveys, dilapidations and specifications, £2 to £5.

Accountants.—For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, including necessary affidavit, £1 1s. to £5 5s. Chief-clerk's time, 10s. 6d. to £1 11s. 6d. Other clerk's time, per day of seven hours, 7s. 6d. to 16s. These charges to include stationery, except the forms used.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, however remote may seem the probability of death, however confident that his property will pass to those he most wishes to benefit, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by means of a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious of the very benefits which had demanded a life-long struggle to provide. Thus a widow may find, to her grievous disappointment, that the estate, a life policy perhaps, or a few hundreds in Consols, is not all hers, but has to be shared with a distant cousin of her husband's, whose name perhaps she had never before heard. Or it may be the eldest son of an intestate ousting all his brothers and sisters from possession of the real estate, or an improvident or unbusinesslike nearest relative may claim to administer the estate. Instances might be multiplied in which negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g. the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, signed by the testator in presence of two witnesses, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of

wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold lands and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And I revoke all former wills and codicils. Dated this tenth day of December, 1890."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be],
 in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses.

THOMAS SMITH
 [Signature
 of
 Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

I is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause

should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London-street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee under the will. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary if it is well known who are the persons intended; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees."

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life" [or during her widowhood]

and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

WHO CANNOT MAKE A WILL.—A minor cannot make a will. A woman married before the 1st of January, 1883, can make a will with her husband's consent; but without such consent she can only (under the Married Women's Property Act) bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

REVOCAION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors, or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1896, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted, p. 410.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors

and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executor, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

NEW ESTATE DUTY.—The Finance Act of 1894 imposes a graduated duty, for which see p. 430.

LEGACY DUTY, varying according to the relationship, is payable excepting where the legatee is the wife or husband of the testator or testatrix, or intestate. (See p. 431).

TRUST FUNDS AND INVESTMENTS

BY RULE OF THE SUPREME COURT, DATED NOVEMBER, 1888, trustees may invest trust funds in the following securities:—

2½ per Cent. Consols; to be reduced, 5th April, 1903 to 2¼ per cent. Consols and Reduced 3 per

in each case that such stocks shall not be liable to be redeemed within a period of fifteen years from the date of investment.

Local Loans Stock under the National Debt and Local Loans Act, 1887

THE RULE OF COURT OF NOVEMBER, 1888, will be little referred to now that all the foregoing items in more extensive, and in some cases slightly different, language, are authorized by the Trustee Act, 1893, the more important clauses of which, especially where the Rule of Court is varied, may be summarized as follows:—This Act, which consolidates the enactments relating to trustees, authorizes mortgages on freeholds, or property equivalent to freehold, not only in England and Wales, but also (where not prohibited) in Ireland and Scotland. A very few leaseholds, viz., terms of 200 years, at a nominal rent, are also authorized by the Trustee Act, 1893.

THIS ACT ALSO AUTHORIZES investments by trustees upon any securities guaranteed by Parliament, and these include the following:—Certain Canada Government stocks, the Turkish Loan of 1855, the Egyptian 3 per cent. guaranteed Loan, a Jamaica 4 per cent. Loan, and one or two others of small amount. In addition to Metropolitan Stock, any stocks of the London County Council are now authorized; also any Corporation or Municipal stocks of the cities or boroughs (about 60 in number) having at the last census a population exceeding 50,000. Also stocks, &c., under certain conditions, of Waterworks Companies and of Water Commissioners. Another very important addition to the list of trust securities is this: Preference, Debenture, Guaranteed, or Rentcharge Stocks of British Railway Companies which have paid 3 per cent. on their ordinary stocks for ten years. This includes all the great lines in England, Ireland, and Scotland, except a few, e.g., the North British, Great Eastern, and Chatham and Dover, which have not, for the whole period of ten years, paid regular dividends to their ordinary shareholders.

THE ACT FURTHER AUTHORIZES trust investments in certain Indian Railways guaranteed by the Indian Government, which can be found on reference to the Stock Exchange official lists. But with regard to the entire list, a trustee cannot invest in anything which is (directly or by implication) prohibited by the terms of his trust. It remains to add (1) that by this Act a trustee may buy at a premium under fixed conditions, but not where the stock is redeemable within 15 years at par, "or some other fixed rate." (2) The last power, as well as every other, is to be used at the "discretion of the trustee"—a phrase which can only be taken in a technical sense, as the Court expects him to show a prudent and cautious discretion, and forbids him, for instance, to favour the tenant for life at the expense of those to follow after.

3. A trustee must consider what is directed, and what is forbidden, by the terms of his trust, before resorting to any of the securities authorized by the Rule of Court, or by the new Act.

4. The Settled Land Act of 1882 also gives a list of securities on which "capital money" arising from sales of property under that Act may be invested—it does not materially differ from the above. The safest plan for a trustee to adopt is this: after looking to his trust, to see that nothing is prohibited, to turn his attention solely to the Act of 1893, sect. 1, and take his choice of the securities therein mentioned. Nearly all of them are at a high price,

and he can hardly make sure of obtaining 3½ per cent. for trust money.

If the deed or will under which he is acting authorizes Colonial or Foreign Government Securities, but not otherwise, he may consult the list of such securities, and select one or more, so as to obtain a return of 4 per cent. or even 4½, and these are the rates usually obtained, and the same on a mortgage.

All the investments authorized by the Trustee Act may be regarded as quite secure; the only one needing caution is that of mortgages: on these not more than two-thirds of the well-ascertained value should in any case be advanced.

High, unimpeachable security generally means a low rate of interest, and when people are dealing with trust money they must confine themselves to the investments permitted by the Court, or they may run considerable risk. When investing their own money they may find many channels sufficiently safe for all ordinary purposes which will yield considerably over 2½ per cent. Before investing, it will be well to take the advice of some person well conversant with money matters, and to make the purchase through a banker.

SOLICITORS' CHARGES.

THESE are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. It is too lengthy for insertion here, but a copy of the Remuneration Act, and the "General order made thereunder," with judgments bearing thereon up to the end of the Hilary sittings, 1889, is obtainable of the Incorporated Law Society, Chancery Lane, W.C., price 5s. Vol. I. contains a concise table of charges, which table is in daily use among solicitors themselves. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase, or mortgage—money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

Regulations for Motor Cars.

APPLICABLE TO ENGLAND AND WALES.

THE following is a summary of the regulations issued by the Local Government Board, supplementary to the Locomotives on Highways Act:—

A light locomotive means a vehicle propelled by mechanical power, under three tons in weight unladen; only used for the purpose of drawing one vehicle, such vehicle and its locomotive together not exceeding in weight unladen four tons; not emitting any smoke or visible vapour, except from any temporary or accidental cause.

In calculating the weight of a vehicle unladen, the weight of any water, fuel, or accumulators used for the purpose of propulsion shall not be included.

It must be capable of being worked either forwards or backwards. The tyre of each wheel must be smooth, with a breadth varying according to the weight of the vehicle, from four inches to two and a-half inches. There must be two independent brakes, each capable of preventing two wheels on the same axle from revolving. If a vehicle is drawn by the locomotive, it, too, must have an efficient brake, controlled by a competent person; or else, the brakes on the locomotive must be able to control the vehicle. The width of a locomotive must not exceed six and a half feet. A lamp is to be carried during the period between one hour after sunset and one hour before sunrise, exhibiting a white light forwards and a red light in the reverse direction. If drawing another vehicle, it must have the name of its owner and his address conspicuously painted on it, together with its weight on the right or off-side in letters white on black, or black on white, not less than one inch in height. The weight must also be painted on every locomotive weighing unladen a ton and a-half and upwards.

Greatest possible speed is fixed at twelve miles an hour. If the weight be one ton and a-half, and does not exceed two tons, the speed shall be not more than eight miles an hour. If the weight exceeds two tons, the speed shall be not more than five miles an hour. Whatever the weight, if used to draw any vehicle, the speed shall not exceed six miles an hour.

This regulation has effect for six months, from Nov. 9, 1895, and thereafter until the Local Government Board direct otherwise.

GENERAL REGULATIONS.—The police are to regulate speed and stoppages for the convenience of the general traffic. A bell or other instrument shall give warning of the approach or position of the light locomotive. The ordinary rules of the road shall be observed. The name of owner shall be given whenever demanded by a constable, or on the reasonable request of any other person.

A breach of any regulation may, on summary conviction, be punished by a fine not exceeding ten pounds.

SCOTTISH REGULATIONS.

The limit of speed is fixed at ten miles an hour if the locomotive be under one and a-half tons unladen; if over this but under two tons, the limit is eight miles, and from two tons onwards the maximum is fixed at five miles an hour. Whatever the weight if used to draw any vehicle the maximum speed must not exceed six miles an hour.

FARES BY DISTANCE: If hired and discharged *within* the Four-Mile Radius, for a distance not exceeding two miles 1 0

For every additional mile or part of a mile
If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0

If hired *within* but discharged *outside*, the Four-Mile Circle, whole distance not exceeding one mile, *1s.*; exceeding one mile, then for each mile *ended* within the circle, *6d.*; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, *2s.*; two-wheeled Cabs 2 6

For every additional quarter of an hour or part of a quarter, four-wheeled Cab, *6d.*; if a two-wheeled Cab 0 8

If hired *outside* the Circle, wherever discharged, for one hour or less 2 6

If above one hour, then for every quarter of an hour or less 0 8

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should be particular in noticing these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE OR BY TIME.
LUGGAGE.—For each package carried outside the carriage 0 2

EXTRA PERSONS: For each above two (two children under 10 years of age count as one person) 0 6

WAITING:—By distance: for every 15 minutes completed—if hired within the Four-Mile Circle, four wheels, *6d.*; two wheels ... 0 8
If hired without Circle, 2 or 4 wheels 0 8

GENERAL REGULATIONS.—Fares are according to distance or time, at the option of the hirer, expressed at the commencement of the hiring; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is *40s.*

The driver of every hackney carriage shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any hackney carriage shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty *40s.*, if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having

failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of *40s.*

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any hackney carriage shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of *£10.*

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a hackney or stage carriage should be made at the Lost Property Office, New Scotland Yard.

On the 31st December, 1896, there were licensed public carriages:—Hansoms, 7,385; clarences, 3,449; omnibuses, 3,001; tram-cars, 1,169; total, 15,204. Drivers and conductors:—Hackney drivers, 13,623; stage drivers, 6,643; conductors, 7,598; total, 27,864.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, streets, and public buildings in London. How many failed we are not told, but the annual average number of applicants who passed the examination during the past five years was 948. The proportion of drivers to carriages is 12'34 drivers to 10 carriages; 153 of the drivers are over 70 years of age. In 1870 the accommodation of the Metropolitan public was provided for at the rate of one stage carriage to 2,917 people; in 1892 the proportion was one to 1,724.

Of lost property, 38,025 articles were deposited, of which 19,461 were claimed by the owners, and *£3,040 2s. 3d.* awarded to the drivers and conductors.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authority of each district, but under certain circumstances the cleansing of footways and pavements adjoining premises, and the removal of filth and asphalt refuse, may be imposed upon occupiers. It is, however, unlawful in any Urban Sanitary District to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

A quire of paper contains 24 perfect sheets; an outside quire 20, some of which may be torn.

All founders cast their type nearly to one uniform height, though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ems.

A very minute type, used only occasionally, is:—

Brilliant. A column the size of this in the Almanack if set in *Brilliant* would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures, on paper.

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

* Only the six thus marked were indisputably General or Œcumenical.

Medical Fees.

UNLIKE those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of doctor or patient. A medical man living in the eastern suburbs of London will perhaps charge but half a crown or three-and-sixpence if waited upon by a patient, but, when he removes to the neighbourhood of Cavendish Square, the fee charged for the first visit will be two guineas, and one guinea for the second and every subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

GENERAL PRACTITIONERS.	RENTALS.		
	£50 to £25.	£25 to £50.	£50 to £100.
Ordinary Visit	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.
Night Visit	Double an ordinary visit.		
Mileage beyond two miles from Home..	1s. 6d.	2s.	3s. 6d.
Detention per ½ hour	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.
Letters of Advice	Same charges as for an ordinary visit.		
Attendance, on servants	2s. 6d.	3s. 6d.	5s. 6d.
Midwifery	21s.	21s. to 63s.	63s. to 105s.
Administ'g. Chlfrn.	10s. 6d.	21s.	42s.
CONSULTANTS.			
Advice or Visit alone	21s.	21s.	21s.
Advice or Visit with another Practitioner	21s.	21s. to 42s.	21s. to 42s.
Mileage beyond two miles from Home..	10s. 6d.	10s. 6d.	10s. 6d.

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

Population, Births, and Deaths.

Population of 36 large towns in the United Kingdom, and of 25 foreign cities, with the rate per thousand of births and deaths for one year ending September 29, 1897, from the latest quarterly returns issued by the Registrar-General.

* Rate not stated.

It will be observed that some of the populations given in this table differ from those shown in other parts of the Almanack.

From the beginning of the Christian era to A.D. 300, no mention is made in ecclesiastical history of tithes. In the 4th and 5th centuries, voluntary offerings, which were called tithes, were given to the clergy. Soon afterwards prelates and princes obliged the laity to give a "full tenth" of their revenues, fruits, &c., and the Church enjoyed this for two or three hundred years. In the 8th century the laity obtained part of the tithe, and appropriated it to their own use. This was restored again by order of the Lateran Council in 1180. At the Reformation, much of the Church land passed into the hands of laymen, and has since remained free from tithe. From various other causes a great deal is now exempt. Originally the tithe was divided into four equal parts:—For Church edifices, Bishops, Clergy, and the Poor, and was charged upon produce of all kinds, gains from manual occupations and trades. The latter charges gradually ceased, but the tenth of produce was taken until, with increasing population, it became such a check to improved cultivation, and caused so much friction in the matter of collection, that it was commuted in 1836 by Act of Parliament to a payment in money. The land was valued, and a modus fixed, based upon the average value of corn for the preceding seven years, and payments, collected half-yearly by the clergy or lay-owners, have since been made on a septennial average. The value fixed amounted in some cases to as much as ten shillings per acre. The better the land for corn-growing, the larger was the sum to be paid, as it was a direct charge upon the corn grown. The prices upon which the Act was based being per quarter—wheat at 5s. 2d.; barley, 3s. 8d.; and oats, 2s. Consequently much land, not being worth the tithe, is now out of cultivation, or let at a price which just covers the charge. An Act passed in 1891 makes it compulsory for the owners of the land, instead of the occupiers, to pay the tithe, which amounts in the aggregate to about four millions annually, of which sum £766,334 is paid to 2,096 lay-owners or impropriators. Extraordinary tithes were an additional charge made, when the Commutation Act was passed, upon hop, fruit, and market-garden grounds. These special industries were so affected by the tax, which in some cases amounted to thirty shillings an acre, that serious resistance against the payment ensued, and an Act was passed in 1886 providing that it should not be levied on land brought under such cultivation after the passing of the Act, but land under these crops at the time was permanently burdened with the impost. The tithe map and apportionment for each parish is deposited with the incumbent and churchwarden. Any one interested therein may have access to the same and obtain extracts by paying 2s. 6d. for inspection, and 3d. for every 72 words contained in the extract. Tithe may, upon the joint application of the land-owner and tithe-owner to the Board of Agriculture, be redeemed for a sum not less than 25 times its amount. This is dependent upon the consent of the Board, and sometimes on that of the Bishop and patron. Town property and building land is often redeemed, agricultural land rarely, the cost being too great. Since the Commutation Act of 1836 £26,414 16s. 10d. has been redeemed, the redemption money being £665,574 2s. 2d.

The average for the past seven years is computed to the Thursday next before Christmas Day; it is taken every year, and the result published in January.

The average Tithe Rent Charge for the past sixty-one years is £97 19s. 4½d., and for the past seven years £73 14s. 6½d.

* Approximate only.

The figures given in the above table are based mainly on Returns prepared by the Director of the United States Mint and published in his annual Reports. Under "British Empire" are included Australasia, Great Britain, Canada, British Guiana, British India, and Africa. The mines of the South African Republic, however, from 1887 to 1896 produced upwards of 6½ per cent. of the

total gold output of the world, and the increase under "British Empire" in recent years is mainly attributable to those mines.

Gold has been valued in the table at the legal rate of £3 17s. 10½d. per troy ounce standard, and silver at its *counting* value in this country, namely 5s. 6d. per troy ounce standard.

The Imperial Coinage.

THE authorised Coinage of the United Kingdom consists of the following pieces, some of which are issued only on special occasions:—

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
GOLD:			
Five Pound	616 ³ / ₇₂₃ Grains.	612 ⁵ / ₅₀₀ Grains.	Grains. 1 ⁰ / ₀₀₀₀₀
Two Pound	246 ⁵⁴ / ₈₉₅	245 ⁰ / ₀₀₀	0 ⁴ / ₀₀₀₀₀
Sovereign	123 ² / ₇₄₄₇	122 ⁵ / ₅₀₀	0 ² / ₀₀₀₀₀
Half-Sovereign	61 ⁶ / ₃₇₂₃	61 ¹ / ₂₅₀	0 ¹ / ₅₀₀₀₀
SILVER:			
Crown	436 ³ / ₆₃₆₃	—	2 ⁰ / ₀₀₀
Double Florin	349 ⁰ / ₉₀₉₀	—	1 ⁶ / ₇₈
Half-Crown	218 ¹ / ₈₁₈₁	—	1 ² / ₆₄
Florin	174 ⁵ / ₅₄₅₄₅	—	0 ⁹ / ₉₇₇
Shilling	87 ² / ₇₂₇₂	—	0 ⁵ / ₇₈
Sixpence	43 ⁶ / ₃₆₃₆	—	0 ³ / ₄₆
Groat or 4d.	29 ⁰ / ₉₀₉₀	—	0 ² / ₆₂
Threepence	21 ⁸ / ₈₁₈₁	—	0 ² / ₁₂
Twopence	14 ⁵ / ₅₄₅₄₅	—	0 ¹ / ₄₄
Penny	7 ² / ₇₂₇₂	—	0 ⁰ / ₈₇
BRONZE:			
Penny	145 ⁸ / ₃₃₃₃	—	2 ⁹ / ₁₆₆₆
Halfpenny	87 ⁵ / ₅₀₀₀₀	—	1 ⁷ / ₅₀₀₀
Farthing	43 ⁷ / ₅₀₀₀₀	—	0 ⁸ / ₇₅₀₀

STANDARD GOLD contains eleven-twelfths of fine metal and one-twelfth of alloy; fineness, 916⁶⁶/₁₀₀₀. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, intrinsically worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d.

STANDARD SILVER consists of thirty-seven-fortieths of fine metal and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958³³/₁₀₀₀), is practically obsolete.]

*BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

THE "REMEDY" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight, but, under the provisions of the Coinage Act, 1891, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

BANK POST BILLS are drawn for any sum from £10 to £1,000, and made payable to order at seven days' date, or at sixty days'. No charge is made for bills so drawn; they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

OLD MONIES.—Guinea, 21s.; Carolus, 23s.; Moldore, 27s. 6d.; Angel, 10s. Noble, 6s. 8d.; Tester, 6d.; Groat, 4d.

SCOTS MONEY.—Merk=1s. 1½d.; Pound=1s. 8d.; Shilling=1d.; Plack=2 Bodles=4d. Scots.

* It is interesting to note that the weight of a penny is one-third, of the half-penny one-fifth, and of the farthing one-tenth of an ounce avoirdupois, approximately. Further, the half-penny is one inch in diameter.

418 Principal Monetary Units of Foreign Countries.

For some countries not included in this list, see note below.

COUNTRY.	Money of Account.	Circulating Value. (See note.)	Number of Coins receivable for £1 at par. (See note.)
Argentine Republic	Peso of 100 centesimos	3s. 11½d.	5'05
Austria-Hungary	Florin or gulden of 100 kreutzer	1 11½	10'2
"	Crown (new unit) of 100 hellers	0 10	24'0
Belgium	Franc of 100 centimes	0 9½	25'2
Brazil	Milreis	2 3	8'9
Bulgaria	Leva of 100 stotinkis	0 9½	25'2
Chile	Peso of 100 centavos	3 11½	5'05
China	Tael of 1,000 cash	6 6½	3'07
Denmark	Crown of 100 öre	1 1½	18'2
Egypt	Pound of 100 piastres	20 3¾	0'985
Finland	Markka of 100 penni	0 9½	25'2
France	Franc of 100 centimes	0 9½	25'2
German Empire	Reichsmark or mark of 100 pfennige	0 11¾	20'4
Great Britain and Ireland	Pound or sovereign of 20 shillings	20 0	1'0
Greece	Drachma of 100 lepta	0 9½	25'2
Holland and Java	Florin or guilder of 100 cents	1 8	12'0
India	Rupee of 16 annas	1 10½	10'6
Italy	Lira of 100 centesimi	0 9½	25'2
Japan	Yen of 100 sen	4 4¼	4'67
Mexico	Peso of 100 centavos	4 3¾	4'64
Norway	Crown of 100 öre	1 1½	18'2
Ottoman Empire	Piastre	0 2¼	110'7
Persia	Khan of 20 shahis (varies)	0 7	34
Portugal	Milreis	4 5¼	4'50
Roumania	Ley of 100 banis	0 9½	25'2
Russia	Rouble of 100 kopecks	3 2	6'30
Servia	Dinar of 100 paras	0 9½	25'2
Spain	Peseta of 100 centimos	0 9½	25'2
Sweden	Crown of 100 öre	1 1½	18'2
Tunis	Piastre	0 6	40'3
Turkey	Pound of 100 piastres	18 0¾	1'107
United States	Dollar of 100 cents	4 1¼	4'87

In Belgium, Bulgaria, Greece, Italy, Roumania, Servia, Spain, and Switzerland the money of account is identical with that of France—the franc—the names alone differing. Nearly all the South American States issue standard coins corresponding to the peso of Chile, which is identical with the 5-franc piece of France. The principal circulating medium of Austria-Hungary, Russia, Argentine Republic, and Brazil is paper, but, in the first-named country, the paper is in process of being withdrawn, and the currency placed on a gold basis, with the crown (see above) as a new unit of account. In British Honduras the money of account is now the United States gold dollar of 100 cents, subsidiary coins being specially struck for the Colony. Ceylon and Mauritius

also possess special subsidiary currencies on the basis of the rupee. By an Order in Council passed in 1894 a British dollar was authorised to be issued for circulation in the East. It is identical in weight and fineness with the Japanese yen, and has been made legal tender in Hong Kong, the Straits Settlements, and Labuan. The last two columns of the Table are calculated on the supposition that the relation between the values of gold and silver remains fixed at 15½ to 1; in other words, that the price of standard silver is 60½d. per oz. troy. They give therefore the full metallic values on that basis, not the values for purposes of exchange, which are very variable, and depend mainly on the price of silver (see Table, below).

Price of Silver, 1887-96.

The Average yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—

1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.	1896.
d.	d.	d.	d.	d.	d.	d.	d.	d.	d.
44½	42½	42½	47¾	45½	39½	35¾	29	29¾	30¾

In the United States the price of silver is quoted in cents per Troy ounce *fine*. In order to convert an English quotation into cents per ounce *fine*, first express the pence as a whole number

and decimal fraction and then multiply by 2'192; to express a United States price on the English system multiply the cent by 0'4562.

PRESENT VALUE OF A LEASE, FREEHOLD ESTATE, OR ANNUITY,

Per £100 clear Annual Rental or Value, without any deduction whatever.

In the following Table, compound interest at the rates of 3, 4, 5, 6, and 7 per cent. is reckoned.

Years.	3%	4%	5%	6%	7%	Years.	3%	4%	5%	6%	7%
1/4	49	48	48	48	47	44	24 25	20 55	17 66	15 38	13 56

							IN PERPETUITY.				
							33 33	25 00	20 00	16 66	14 28

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? **ANSWER:**—£124 years' purchase or £1,924.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £200 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? **ANSWER:**—Looking at the Table of Expectation of Life on p. 357, it will be seen that the expectation for age 54 is about 17 years; and

from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 12 1/2 years' purchase. The present payment required would therefore be £1,227 approximately.

Notes to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

UNIFORMITY.—An edict of King Edgar decreed that there should be but one Standard Measure, that kept at Winchester; and by the 27th section of Magna Charta there was to be one Weight for all England. Nevertheless numerous customary weights and measures have continued in use—custom was stronger than law, especially with regard to land, corn, and wool. In 1824, however, an Act was passed rendering uniformity compulsory from the 1st of January, 1826, since which time the Imperial Statute System of Weights and Measures has been in general use, although some remains of the older form still linger.

Avoirdupois Weight.

Drachm..... *dr.* = 27½ grains (27.34375).
 Ounce *oz.* = 16 drachms, 437.5 grains.
 Pound *lb.* = 16 *oz.*, 256 *dr.*, 7,000 grains.
 Customary Stone, *st.*, Butcher's Meat = 8 lbs.
 Legal Stone.....*st.* = Horseman's weight = 14 lbs.
 Quarter*qr.* = 28 lbs.
 Cental or Quintal, *cent.* = 100 lbs.
 Hundredweight, *cwt.* = 4 *qrs.*, 112 lbs.
 Ton *T.* = 20 *cwt.*, 2,240 lbs.

Avoirdupois weight is used in almost all commercial transactions and common dealings, but in addition to the above there are special weights for various articles, the chief of which are:—

A Quarter Loaf = 4 lbs.
 A Peck of Flour, 2 Gallons = 14 ”
 A Firkin of Butter = 56 ”
 A Firkin of Soft Soap..... = 64 ”
 A Box of Fish, about = 90 ”
 A Barrel of Gunpowder = 100 ”
 A Barrel of Raisins = 112 ”
 A Seam of Glass, 24 stones of 5 lbs. = 120 ”
 A Barrel of Butter—4 firkins = 224 ”
 A Barrel (or pack) of Soft Soap = 256 ”
 A Faggot of Steel..... = 120 ”
 A Pig of Ballast = 56 ”
 A Fodder of Lead, London and Hull = 19½ *cwt.*
 A do. Derby = 22½ *cwt.*; Newcastle = 21½ ”
 A Cask of Blacklead = 11½ ”
 A Sack—Potatoes, 168 lbs.; Flour, 280 lbs.; Coals, 224 lbs.; a ton of Coals, 10 sacks.

The Metrical System of weights is used in Belgium, France, Germany, Italy, Portugal, Spain, Sweden and Norway, and some other countries, the unit of which is the *Gramme*=15.432 grains; the chief multiple of the *Gramme* is the *Kilogramme*=2,204.6 lbs.: in practical use this is found inconvenient for small purchases, and nearly all commodities are sold by the demi or half kilo. The *Centner* of 50 kilos=110½ lbs., very nearly represents the English *cwt.*; but heavy goods are sold by the *Tonneau* of 2204.621 lbs., about 19 *cwt.* 77 lbs., the *Myriagramme* being ignored. See p. 424.

In the United States and in Canada the *cwt.* is generally reckoned as 100 lbs., and the ton of 20 *cwt.*=2,000 lbs.

In Russia the *Pood* of 35 lbs. is the commercial weight: 63 *Poods*=1 English ton.

Indian Weights (Bengal).

Tola, unit of postage = 180 grains.
 Chittak = 5 Tolas; Seer (16 Chittaks) = 2½ lbs.
 Imperial or Indian Maund = 82½ lbs.

Madras.

Viss = 3.09 lbs., Maund = 25 lbs., Candy = 500 lbs.

Troy Weight.

Carat = 3.17 grains.
 Pennyweight..... *dwt.* = 24 grains.
 Ounce..... *oz.* = 20 *dwt.*, 480 grs.
 Pound *lb.* = 12 *oz.*, 240 *dwt.*, 5,760 grs.
 Hundredweight. *cwt.* = 100 lbs.

Troy is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries', and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries; but the carat varies: in France it is 3.18 grains, in Holland, 3.0 grs., and in the U. S. 3.2 grs. In the U. K. the jewellery ounce is divided into 151½ carats or 600 pearl grains.

The *oz.* Troy and Apothecaries' = 1.09714 *oz.* avoirdupois; but the *lb.* Troy and *lb.* Apothecaries' = only 0.82286 *lb.* avoirdupois; while 175 *lb.* Troy and Apothecaries' = 144 *lb.* avoirdupois.

Apothecaries' Weight.

Scruple ☉ = 20 Grains = 30 grs.
 Drachm ☽ = 3 Scruples = 60 ”
 Ounce ☿ = 8 Drachms = 480 ”
 Pound ♀ = 12 Ounces = 5760 ”

The avoirdupois *oz.* of 437½ grains, and the *lb.* of 7,000 grains are the weights named in the British Pharmacopœia; drugs are purchased by avoirdupois, but compounded by apothecaries' weight. The apothecaries' *oz.* and *lb.* may now be considered obsolete.

Hay and Straw.

Truss of Straw, 35 lbs. Truss of Old Hay, 56 lbs.
 Truss of New Hay (to September 1st), 60 lbs.
 Load, 35 Trusses—Straw, 11 *cwt.*, 2 *qrs.* 8 lbs.; Old Hay, 18 *cwt.*; New Hay, 19 *cwt.* 1 *qr.* 4 lbs.

Wool.

Clove, *cl.* = 7 lbs.
 Stone, *st.* = 2 Cloves 14 lbs.
 Tod, *td.* = 2 Stones 1 *qr.*
 Wey, *wy.* = 6½ Tod 1 *cwt.* 2 *qrs.* 14 lbs.
 Pack, *pk.* = 240 lbs.
 Sack, *sk.* = 2 Weys 13 *qrs.*
 Last, *la.* = 12 Sacks 39 *cwt.*

Since the advent of SHODDY, some of the above weights have become nearly obsolete, although the terms are still in use with different values: thus 16 lbs. = 1 *st.*; 28 lbs. = 1 Tod; 20 lbs. = 1 Score; 12 Score or 240 lbs. = 1 Pack.

Worsted Yarn.

Wrap, 80 yards; Hank = 560 yards = 7 Wraps.
 Counts or Numbers are the number of hanks in a *lb.*

Cotton Wool.

Cotton Wool, Bale variable; U.S.A. average 477 lbs.; Egyptian, 719 lbs.; East Indian, 396 lbs.; Brazilian, 220 lbs.

Cotton Yarn.

Thread = 1½ yards.
 Lea, or Skein, *sk.* = 120 Yards. } Also same
 Hank, *hk.* = 7 Skeins, or Leas. } for silk.
 Spindle, *spd.* = 18 Hanks.
 Counts = the number of Hanks in 1 *lb.*
 Bundle Hanks, either of 5 lbs. or 10 lbs.
 Reels of Cotton vary from 30 to 1,760 yards, but by the new Act must be marked correctly.
 Bundles of Cotton are chiefly made up for export.

Liquid Measure.

The Gill contains 8.66 cubic inches.
 The Pint contains 4 gills or 34.66 inches.
 Quart = 2 pints = 8 gills.
 Gallon = 4 quarts = 32 gills.
 Pin = 4½ Gallons or ½ Barrel. Gals. Qts. Pts.
 Firkin or Quarter Barrel 9 36 72
 Anker (10 gallons) 10 40 80
 Kilderkin, Rundlet, or ½ Barrel 18 72 144
 Barrel 36 144 288
 Tierce (42 gallons) 42 168 336
 Hogshead of Ale (1½ barrel) 54 216 432
 Puncheon 72 288 576
 Butt of Ale (3 barrels) 108 432 864

Practically, the only measures in use are gallons, quarts, pints, and gills, the others are merely nominal; e.g., the hoghead of 54 gallons, *old measure*, contains but 52 gallons, 1 quart, 1 pint, and 3 3/5 gills imperial measure; and of wine six nominal quart bottles go to the gallon. Of wines imported in casks the following are the usual measurements:—

Pipe of Port or Masdeu	= 115 gallons.
" Teneriffe	= 100 " "
" Marsala	= 93 " "
" Madeira and Cape	= 92 " "
" Sherry and Tent	= 108 " "
Butt of Lisbon and Bucellas	= 117 " "
Aum of Hock and Rhenish	= 30 " "
Hogshead of Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons.	

In the United States the old British or "Wine-chester" wine gallon of 231 cubic inches is in use; the names of measures are the same, but the capacity of the gill is only 7 2/1875 cubic inches.

Apothecaries' Fluid Measure. Marked

60 Minims η (drops) = 1 Fluid Drachm.....	13	
8 Drachms	= 1 Ounce	13
20 Ounces	= 1 Pint	0
8 Pints	= 1 Gallon	C., or Cong.
1 Drachm = 1 Tea-spoonful.	} <i>Prescribing medicine by the spoon, glass, or cupful, is unsafe, as all those vessels vary in size. Graduated glass measures may be purchased for a few pence.</i>	
2 Drachms = 1 Dessert-spoonful.		
4 Drachms = 1 Table-spoonful.		
2 Ounces = 1 Winegallonful.		
3 Ounces = 1 Teacupful.		

Dry or Corn Measure.

Quart... = 2 Pints.	Strike ... = 2 Bushels.
Pottle... = 2 Quarts.	Coomb... = 4 Bushels.
Gallon = 4 Quarts.	Quarter. = 8 Bushels.
Peck ... = 2 Gallons.	Load ... = 5 Quarters.
Bushel. = 4 Pecks.	Last ... = 10 Quarters.

Boll of Meal = 140 lbs.; 2 Bolls = 1 Sack.
 Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—
 Wheat, English, 63 lbs. Foreign, 62 lbs.
 Barley, English, 52 and 56 lbs. French, 52 1/2 lbs. Mediterranean, 50 lbs.
 Oats, English, 40 & 42 lbs. Foreign, 38 & 40 lbs.
 Rye and maize, 60 lbs.
 Buckwheat, 52 lbs. to the bushel.
 Grain of all kinds is frequently sold by the stone of 14 lbs.

Coals were formerly sold by measure: 3 heaped bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by heaped measures and the sack of three bushels: of coke, four bushels are usual.

Fruit—The Covent Garden bushel basket is 17 1/2 inches in diameter at top, 10 inches at the bottom, and is 10 inches deep. The smaller market baskets are said to vary in size according to the season and the supply.

Cubic or Solid Measure.

Cubic Foot	= 1,728 Cubic Inches.
Cubic Yard	= 27 Cubic Feet, 21'033 bushels.
Stack of Wood ...	= 108 Cubic Feet.
Shipping Ton ...	= 40 Cubic Feet merchandise.
Shipping Ton ...	= 42 Cubic Feet of Timber.
Ton of displacement of a Ship=	35 Cubic Feet.

Measures of Length.

Mile Geographical, Admiralty Knot, or Nautical	
Mile, 6,080 Feet = 1'15 Mile Statute.	
League = 3 Miles.	
Degree = 60 Geographical, or 69'121 Statute	es.

Inch, in.	= 72 Points, or 12 Lines.
Nail, $\frac{1}{2}$	= 2 1/2 Inches.
Palm	= 3 Inches.
Hand	= 4 Inches.
Link	= 7 1/2 Inches.
Quarter (or a Span)	= 9 Inches.
Foot	= 12 Inches.
Cubit	= 18 Inches.
Yard	= 36 Inches.
Face, Military	= 2 Feet 6 Inches.
Face, Geometrical	= 5 Feet.
Fathom	= 6 Feet.
Rod, Pole, or Perch	= 5 1/2 Yards.
Chain (100 Links)	= 22 Yards (4 Poles).
Cable's Length ...	= 100 Fathoms, 600 Feet.
Furlong	= 40 Rods, 220 Yards.
Mile	= 8 Furlongs, 80 Chains, 320 Rods, 1,760 Yards, 5,280 Feet, 63,360 Inches.

Although no longer sold by that measure, Calicos, &c., are sometimes said to be "Ell wide"—the English Ell being 1 1/4 yard, the Flemish Ell 3/4 yard, and the French Ell 1 1/4 yard.

The old *Scottish Mile* was 5,220 feet: ten *Scotts Miles* being about equal to 11 1/4 Statute Miles. Eleven *Irish Miles* were equal to 14 Statute Miles.

Square, Surface, or Land Measure.

The Square Foot contains 144 Square Inches.
Yard = 9 feet = 1,296 inches.
Rod, Pole, or Perch = 30 1/4 yards = 272 1/2 feet.
Chain = 16 rods = 484 yards = 4,356 feet.
Rood = 40 rods = 1,210 yards = 10,890 feet.
Acre = 4 roods = 160 rods = 4,840 yards.
Yard of Land = 30 acres = 120 roods.
Hide = 100 acres = 400 roods.
Mile = 640 acres = 2,560 roods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.

An Acre roughly stated has four equal sides of 69 1/2 yards: accurate measurement gives each side 208 7/11 feet.
 The sides of a square half-acre would be 147'58 1/2 feet, and of a square quarter-acre, 104'355 feet.

The above Imperial Measure is now employed in the United Kingdom, in Canada, Australia, and the Colonies generally, also in the United States; but occasionally some older measurements are referred to, of these—

The Lancashire Acre of 160 perches, each containing 49 square yards = 7,840 square yards.
The Cheshire Acre of 160 perches, each containing 64 square yards = 10,240 square yards.
The Irish Acre, equal to 1'619835 Statute; or 1 Statute equal to 0'617347 Irish.
The Cunningham Acre, equal to 1'291322 Statute; or 1 Statute Acre is equal to 0'7744 Cunningham.
The Scottish Acre = 1'261183 Statute (nearly 6.104 square yards).

Measures of Time.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Hour.
24 Hours	= 1 Day.
(23 1/2 56m. 4s. = 1 Sidereal Day.)	
7 Days	= 1 Week.
28 Days	= 1 Lunar Month.
28, 29, 30, or 31 Days	= 1 Calendar Month.
12 Calendar Months	= 1 Year.
365 1/4 Days	= 1 Common Year.
366 Days	= 1 Leap Year.
365d. 5h. 48m. 46s.	= 1 Tropical Year.
The Astronomical Day commences at noon, and is computed from 1 to 24 hours.	
In 400 years 97 are Leap-years and 303 common, Leap-year being omitted every 100th year, but not omitted every 400th. (1900 is not a Leap year.)	

Angular Measure.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Degree.
30 Degrees	= 1 Sign.
90 Degrees	= 1 Quadrant.
4 Quadrants, or 360° ...	= 1 Circumference, or Circle.

The Earth rotates at a velocity of 15 degrees an hour (about 17'366 miles a minute at the Equator); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of a Circle $\times 3.1416$ gives Circumference.
 Diameter Squared $\times .7854$ gives Area of Circle.
 Diameter Squared $\times 3.1416$ gives Surface of Sphere.
 Diameter Cubed $\times .5236$ gives Solidity of Sphere.
 One Degree of Circumference $\times 57.3$ gives Radius.
 Diameter of Cylinder $\times 3.1416$, and product by its length, gives the Surface.
 Diameter Squared $\times .7854$, and product by the length, gives Solid Contents.

A Circular Acre is 235 504 feet, a Circular Rood 117 752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either as force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute." To understand the basis of this system requires a great deal of very careful study, and more space than we have at our disposal; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

For the measure of

VOLT	Electromotive force = about 92.6% of that given by one Daniell's battery cell.
OHM	Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.
AMPÈRE	Current = the current 1 volt will drive through 1 ohm.
COULOMB	Quantity = 1 ampère flowing for 1 second of time.
MICROFARAD .	Capacity = .000,001 coulomb at 1 volt pressure.
WATT	Power = 44 ft. lbs. per minute.
Board of Trade Unit	= 1000 Watts 1 hour.
745 Watts	= 1 horse-power.

In incandescent lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes.

One Board of Trade unit will keep a 16-candle incandescent lamp alight for about 16 hours.

Fish Measure.

Herrings are sold by the *Cran*, containing 26½ imperial gallons, on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stornoway; but on the West Coast, Isle of Man, and in Ireland, by the *Mase*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200.

Timber and Wood.

40 cubic feet rough, 50 cubic feet squared = 1 load.
 50 cubic feet of planks = 1 load.
 100 superficial feet = 1 square of flooring.
 120 Deals = 100.

Width of Battens 7 inches; Deals, 9 inches; Planks are 2 to 4 inches thick, and 10 or 11 inches wide.

Carpenters', Bricklayers', and Builders' Measurements.

Stock or kiln bricks	8½ inches $\times 4\frac{1}{4} \times 2\frac{1}{4}$
Welsh fire-bricks	9 " $\times 4\frac{1}{2} \times 2\frac{1}{4}$
Paving bricks	9 " $\times 4\frac{1}{4} \times 1\frac{1}{4}$
Square tiles	9¾ " $\times 9\frac{3}{4} \times 1$
"	6 " $\times 6 \times 1$
Dutch clinker bricks	9 " $\times 3 \times 1\frac{1}{2}$
A Rod of Brickwork 16½ feet $\times 16\frac{1}{2}$ feet $\times 1\frac{1}{2}$ brick thick = 306 cubic feet, or 11½ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.	

A Square of Flooring is 100 square feet.
 Ordinary bricks weigh about 7 lbs. each; a load of 500 weighs over 1½ ton.

Sizes of Slates.

	in. in.		in. in.
Empress	26 \times 16	Ladies	16 \times 10
" Small	26 \times 14	" Small	16 \times 8
Princesses	24 \times 14	" Large	14 \times 12
Duchesses	24 \times 12	"	14 \times 8
Marchionesses	22 \times 12	Plantation	13 \times 11
" Small	22 \times 11	Doubles	13 \times 10
Countesses	20 \times 10	"	13 \times 7
" Wide	20 \times 12	Smalls	12 \times 8
Viscountesses	18 \times 10	Ditto	12 \times 6
" Small	18 \times 9	Ditto	11 \times 5½

Water.

Cubic inch
 = .0361 lb. || Gallon | = 10'0000 " |
| Cubic foot = 62'3210 lbs. | or 6'2321 gallons. |
| 35'943 cubic feet (210 gallons) | = 1 ton. |

The gallon is = 277¼ cubic inches, = 0.16 cubic feet, = 10 lbs. distilled water.

Water for Ships: Ton, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18.

Cisterns: 1 cubic foot is equal to about 6¼ gallons, or 62'321 lbs. A cistern 4 feet by 2½ and 3 deep will hold about 187 gallons, and weigh nearly 16 cwt. in addition to its own weight.

A TON WEIGHT OF THE FOLLOWING WILL AVERAGE IN CUBIC FEET

Earth	21	Coal, Newcastle ..	43
Clay	18	Pit Sand	22
Chalk	14	River ditto	19
Thames ballast	20	Marl	18
Coarse gravel	19	Shingle	23
Coal, Welsh	40	Night Soil	18
A cubic foot of pure gold weighs 1,210 lbs., pure silver 655 lbs., cast iron 450 lbs., copper 550 lbs., lead 710 lbs., pure platinum 1,220 lbs., tin 456 lbs., aluminium 163 lbs.			

Old Scottish Measures.

LIQUIDS.

4 Gills ..	= 1 Mutchkin.	2 Pints ..	= 1 Quart.
2 Mutchkins	= 1 Chop-pin.	4 Quarts .	= 1 Gallon.
2 Choppins	= 1 Pint.	8 Gallons	= 1 Barrel.

CORN MEASURE.

4 Lippies ..	= 1 Peck.	4 Firlots .	= 1 Boll.
4 Pecks ..	= 1 Firlot.	16 Firlots	= 1 Chalder.

Old Scottish Weights.

16 Drops 1 Ounce, 16 Ounces 1 Pound, 16 Pounds 1 Stone.

Metric Weights and Measures.

THE French Metrical System is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Mètre*. The cube of the tenth part of the *mètre* was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo*, and *myria*, from the Greek, and the subdivisions by *deci*, *centi*, and *milli*, from the Latin:—

MEASURES OF LENGTH (UNIT MÈTRE).

Time and Watch on Board Ship.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon *Watch* noon to 4 p.m.
 First Dog " " ... 4 p.m. to 6 p.m.
 Second Dog " " ... 6 p.m. to 8 p.m.
 First " " ... 8 p.m. to midnight.
 Middle " " ... 12 a.m. to 4 a.m.
 Morning " " ... 4 a.m. to 8 a.m.
 Forenoon " " ... 8 a.m. to noon.

This makes seven *WATCHES*, which enables the crew to keep them alternately, as the *Watch* which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two *Watches*.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds; then two more strokes with a second's interval apart, then a rest of two seconds, thus:—

- BELL, ONE SECOND; B., TWO SECS.; B. s.; B. ss. B. s.; B. ss.; B.**
- 1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.
 - 2 Bells at 1 (struck with an interval of a second between each—B. s, B.), the same again at 5, 7, and 9 p.m.; 1, 5, and 9 a.m.
 - 3 Bells at 1.30 (B. s, B. ss, B), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.
 - 4 Bells at 2 (B. s, B. ss, B. s, B.), 6 and 10 p.m.; 2, 6, and 10 a.m.
 - 5 Bells at 2.30 (B. s, B. ss, B. s, B. ss, B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.
 - 6 Bells at 3 (B. s, B. ss, B. s, B. ss, B. s, B.) and 11 p.m.; 3, 7, and 11 a.m.
 - 7 Bells at 3.30 (B. s, B. ss, B. s, B. ss, B. s, B. ss, B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 a.m.
 - 8 Bells (B. s, B. ss, B. s, B. ss, B. s, B. ss, B. s, B.) every 4 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

INVESTMENT OF DIVIDENDS ON 2½ CONSOLIDATED STOCK, 2½ ANNUITIES, AND LOCAL LOANS STOCK.—Holders of amounts of less than £1,000 may instruct the Bank to receive and invest their dividends by filling up forms, to be obtained at the Head Office, at any of the Branches, or at any Money Order Office. A commission is charged of 1d. per £, or part of a £, with 3d. additional for each advice of a purchase, should such advice be required.

STOCK CERTIFICATES TO BEARER can be obtained in exchange for 2½ per Cent. Consolidated Stock, 2½ per Cent. and 2½ per Cent. Annuities, Local Loans 3 per Cent. Stock, and Metropolitan Police Debenture Stock; India 3 per Cent. and 3½ per Cent. Stocks; Metropolitan and London County Stocks; New Zealand, New South Wales, and Queensland Stocks; and the various Corporation Stocks. The charge for Issue is 2s. per Cent., and for Reinscription 1s. per Certificate, except India Stocks, where the charge in each case is 2s. 6d.

DIVIDENDS are paid in one of the following modes:—

- I. To the stockholders personally, or to their attorneys, or in a Joint account to one of the stockholders, at the Bank of England. [Stockholders may arrange for the receipt of their dividends, free of charge, at any of the country branches, on application to the agent.]
- II. By transmission of dividend warrants by post, at the risk of the stockholder, under the following regulations:—
 1. Any stockholder residing within the United Kingdom who desires to have his dividend-warrant sent to his address by post, must fill up a form of application, to be obtained at the Bank, or at any of its branches, and for English Government Stocks at any Money Order Office.
 2. In the case of joint accounts, to the first stockholder upon his sole request, provided the Bank have not received any written notice to the contrary from any other of the stockholders.

TRANSFER DAYS, any day but Saturday, from 11 to 3; for buying and selling, 11 to 1; for accepting, 9.30 to 4. Dividends are payable from 9 to 4; on Saturdays, 9 to 2. Transfers made on Saturdays are charged a fee of 2s. 6d.

GENERAL HOLIDAYS.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and following day, or if that be Sunday, then the Bank is closed on Monday. The Stock Exchange, in addition to the Bank holidays, is also closed on May 1 and November 1. At the Custom House Inland Revenue Office, and the Docks, the day appointed to be kept as the Queen's Birthday; and at the Docks, Coronation Day (June 28) and the Prince of Wales's Birthday (November 9) in addition. In Scotland: New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

CORPORATE and UNINCORPORATE BODIES , Upon the <i>net</i> annual value, income, or profits accrued in respect of all real				1,000,000 " "	—	8	0
				Fractions of £100 on the whole estate are disregarded; e.g., an estate of £1,050 counts as one of £1,000, and pays only 2 per cent.			
				Gifts made by the deceased within a twelvemonth of death are subject to aggregation with the rest of the estate.			
				In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled by some other disposition passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty is payable at the rate of £1 per cent. on the settled property, but from			

that payment the *ad val.* stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

Small estates up to £300 and £500 gross, are charged, at the option of the accounting parties, with fixed duties of 30s. and 50s., and are exempt from all other death duties.

Where the net value is under £200 the *ad valorem* duty amounts to £1 only.

Interest at 3 per cent. per annum is also payable on the Estate Duty on Personalty from the date of the death up to that of delivery of the affidavit.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, with interest at 3 per cent. per annum, and that on certain annuities may at option be paid in 4 yearly instalments with 3 per cent. interest, and interest on realty begins from 12 months after death.

FACULTY OR DISPENSATION :

In England, in all cases, £30.
,, Scotland or Ireland, in some cases £20, in others £25.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

100, for £50, or frct. part of £50 5 0 ... 1 10 0 ... 3 0 0
Agreement for lease not exceeding 35 years, same as actual lease.

LEGACY AND SUCCESSION DUTIES:—Also see "Estate Duty."

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.

(Except in the cases of small estates, see note to Estate Duty. No succession duty is payable where the principal value of all the successions on the same death does not amount to £100: 16 & 17 Vict. c. 51, s. 18.)

Rates of duties payable on legacies, annuities, and residues (£1 per cent. Legacy Duty practically abolished since 1881), and of Succession Duties where deceased died before 1st July, 1888, or where Estate Duty, Finance Act, 1894, is payable (in which latter case 1 per cent. is also practically abolished).

- To Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see above)£1 per cent.
- To Brothers and Sisters of the Deceased, or their Descendants£3 per cent.
- To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants£5 per cent.
- To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants£6 per cent.
- To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased£10 per cent.
- Where deceased died on or after 1 July, 1888, and Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 11½ respectively.
- The Husband or Wife is chargeable with Estate Duty, but not Legacy Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same, are subject to a Penalty of £10 per cent. on the amount or value of such Legacy, Residue, or Share of Residue.

Persons not giving notice of a succession, or not delivering an account, are subject to a Penalty of £10 per cent. upon duty calculated at £1 per cent. for every month of delay.

SPOILED STAMPS.

ALL applications for allowance must be made within six months from the time of spoilage of unexecuted instruments, or within six months of the date or of the first execution of others.

If beyond this date, special application should be made to the Commissioners of Inland Revenue.

The hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3 on Monday, Tuesday, Wednesday, Thursday, and Friday, and from 10 to 1 on Saturday.

The hours of attendance at Telegraph Street, Moorgate Street, E.C., for the allowance of sea policy and general spoiled stamps, are from 11 to 3 on Monday, Wednesday, and Friday.

DEEDS STAMPED AFTER EXECUTION.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution.

WITHOUT PENALTY, OR PAYMENT OF THE DUTY ONLY:—

Agreements under hand only, liable to the duty of 6*d.*—Agreements for letting furnished houses for less than a year.—Appraisements.—Attested copies, within 14 days of first execution.

Life policies, within one month of first execution. Foreign Sea policies, within 10 days of arrival in U. K.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where the deed or instrument has been wholly executed *abroad*, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY IN ADDITION TO PAYMENT OF THE DUTY:—

Articles of clerkship.

Bills of exchange upon stamps of sufficient amount but of improper denomination.

Charter-parties. Receipts, within certain limits of time.—*vide* Table of Penalties.

Contract notes. Delivery orders.

Letters of allotment. Scrip certificates.

Share warrants. Warrants for goods.

Policies of insurance liable to fixed duty of 1*d.*

INSTRUMENTS WHICH CANNOT BE LEGALLY

STAMPED AFTER EXECUTION:—

Inland.—Bills of exchange (except as before mentioned).—Bills of lading.

Marine policies executed in the United Kingdom. Proxies.—Voting papers

TABLE OF PENALTIES USUALLY ENFORCED:—

Agreements under hand only. At—*£ s. d.*
tested copies or extracts: after the expiration of 14 days from their first execution 10 0 0

Charter-parties, within 7 days from *£ s. d.*
their first execution 0 4 6

Charter-parties after the expiration of 7 days, but within one month 10 0 0

Receipts, within 14 days after they have been given 5 0 0

Receipts, after 14 days, but within one month (beyond this period receipts cannot be stamped under any conditions) 10 0 0

Other instruments not enumerated, excepting those which cannot be legally stamped after execution 10 0 0

In addition to these penalties certain documents are also liable by way of further penalty on stamping to a forfeiture of an amount equal to the stamp duty deficient.

All applications for the remission, mitigation, or return of penalties must be made by memorial, addressed to the Commissioners of Inland Revenue, Somerset House, and supported by statutory declaration, such declaration being exempt from stamp duty.

EXEMPTION FROM ALL STAMP DUTIES:—

Transfers of shares in the Government or Parliamentary Stocks or Funds.

COMPANIES ACT, 1862.**FEEs TO BE PAID BY STAMPS.**

On registration, with a capital of *£2,000, £3; £3,000, £3; £4,000, £4; £5,000, £5.*

INLAND POSTAL RATES.

The prepaid postage of Letters, Books, and Parcels to any part of the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, and the Scilly Islands, is as follows:—

LETTER POST.

Not exceeding 4 oz. 1d.
For every additional 2 oz. ½d.

BOOK POST.

Not exceeding 2 oz. ½d.

PARCEL POST.

Not exceeding.	s. d.	Not exceeding.	s. d.
1 lb.	0 3	6 lb.	0 8
2 "	0 4	7 "	0 9
3 "	0 5	8 "	0 10
4 "	0 6	9 "	0 11
5 "	0 7	11 "	1 0

NEWSPAPERS.—A prepaid postage of one half-penny is charged for the inland transmission of any daily or weekly registered newspaper, the weight being disregarded. If more than one paper be included in a packet, the charge is as by an insufficiently paid letter, or transferred to the Parcel Post, whichever charge is the lower, with a fine of 1d. in addition to any deficient postage.

WEIGHTS AND DIMENSIONS.

LETTERS.—The weight is unlimited. Maximum length 2 ft.; width 1 ft.; depth 1 ft., unless sent to or from a Government office.

NEWSPAPERS.—Not over 5 lbs. in weight, 2 ft. in length, or 1 ft. in width or depth.

BOOK POST.—Packets exceeding 3 oz. now pass unconditionally at the rate of 1d. for the first 4 oz., and ½d. for every additional 3 oz.

PARCELS.—The limit of weight is 11 lbs. The parcel must not be more than 3 ft. 6 ins. in length, or length and girth combined, more than 5 ft. A short parcel may be thicker; thus, if it measure no more than 3 ft. in length, it may measure as much as 3 ft. in girth, i.e., round its thickest part.

GENERAL REGULATIONS.

If the postage of letters, books, or newspapers be not paid in advance, *double postage* will be demanded on delivery; and if the postage be insufficient, *double the deficiency* will be charged. Parcels are not accepted for transmission unless the charges are prepaid.

No advertisement, decoration or printed matter, beyond the address, is permitted on the right hand half of the address side of envelope or wrapper.

BOOK POST.—Packets not exceeding 3 oz. in weight may be sent for ½d. if the following conditions are complied with.

Any matter wholly printed on paper (paper sent as stationery not admissible), books and periodicals, manuscript, deeds and agreements, circulars produced in identical terms by any mechanical process (productions of the type-writer and imitations thereof are admissible provided that at least 20 identical copies are forwarded at the same time, and handed in at the counter of the Post Office), prints or photographs (when not on glass, or in cases containing glass, or any like substance), together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, and must contain no communication in the nature of a letter.

CONVEYANCE OF SINGLE LETTERS BY RAIL.—On payment of 2d. to a servant of the railway, in addition to the usual 1d. stamp, *Inland* letters not exceeding 4 oz. may be forwarded by the next available train or steamship by those companies in agreement with the Post Office, to be called for at the station to which the letter is addressed, or to be transferred from thence to the nearest letter-box for postal delivery. The letter must be taken to a passenger station of the railway company. Railway letters may be handed in at any express delivery post office for immediate conveyance to the railway station on payment of the express fee of 3d. per mile.

EXPRESS DELIVERY SERVICE.—Letters and parcels are now forwarded immediately in the London postal area, and in most large provincial towns, by special messengers, at the following rates:—Not exceeding 1 lb. in weight, inclusive of railway, omnibus, or tramcar charges, for every mile or part of mile, 3d. Ordinary postage is not charged. If the packet exceeds 1 lb. in weight, for each lb. or part beyond first lb., 1½d. Cabs may be used if specially paid for. Fees to be paid in stamps. Express mail letters may not be posted in any letter box, but must be handed in over the counter, and clearly marked *Express Delivery* above the address on the left hand corner of the cover. The covers of express letters should be marked with a broad line from top to bottom both on front and back. No Express Delivery on Sundays, Good Friday (except in Scotland), and Christmas Day. Articles of a dangerous or offensive nature are prohibited.

NEWSPAPERS.—No writing in the nature of a letter is permitted, but the wrapper may bear the name and address of the sender.

NOTICE OF REMOVAL and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen.

PARCEL POST.—The Parcel should be distinctly marked in the left-hand top corner "Parcel Post," and handed across the counter of the receiving houses or given to a rural postman. It must not be posted in a letter-box, and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Money is received at the District Offices in London, at the offices in Bedford Street, Charing Cross, Gracechurch Street, Lombard Street, Mark Lane, and Ludgate Circus, and at the head offices at Edinburgh and Dublin, and in certain large provincial towns when the postage of a number of parcels amounts to 20s. These parcels must be presented at the offices between 9 a.m. and 3.30 p.m., and must be tied up in bundles representing a postage of 5s. each. Money payments as above are also received at the Chief Office till 4 p.m. Parcels will be collected in London and a few large towns when the number reaches 10 at a time, or 50 a week. The name and address of the sender should be on the outside of every parcel. A greater weight than 11 lbs. must not be accepted from one person by a rural postman on foot, or 21 lbs. by a mounted postman, unless he shall have received notice on the day previous that a greater weight would be sent; and either of them may refuse parcels if already loaded.

Parcels left "to be called for" are charged 1d. a day after they have lain in the office one clear day, the maximum charge being 1s. 6d.

Parcels addressed to, or sent from the Channel Islands, are liable to customs duty, and the sender must make a declaration of contents at the office

of posting. Parcels for the Isle of Man are treated as those for the British Isles generally.

No parcels are received on Sundays, Christmas Day, or Good Friday. For Bank Holidays, see page 440.

Insurance.—Compensation to the amount of £3 can be claimed for loss or damage. To secure compensation where no insurance fee is paid, a certificate of posting should be filled up and handed in for the signature of the post-office official. The insurance fee in stamps can be paid only at a post office. See also REGISTRATION below.

(No compensation will be granted for damage done to a fragile article, unless the word "fragile," or its equivalent, appears on the cover.)

POSTE RESTANTE.—This is intended solely for the accommodation of strangers and travellers who have no permanent abode in the town. Letters and parcels may be addressed to the *Poste Restante* at every Head Post Office in the United Kingdom and to all Branch Post Offices in London. Letters or parcels to be called for should have the words "*Poste Restante*" included in the address. No initials, or fictitious names, or Christian name only, will be taken in, but are at once sent to the Returned Letter Office for disposal; and all persons applying for "*Poste Restante*" letters must prove their identity. Foreigners must produce their passports. *Poste Restante* letters from abroad are not kept more than two months; at Provincial Post Offices only one month; letters posted in London, for one fortnight. After these intervals they are sent up to the Returned Letter Office. When, however, letters addressed "to be called for" bear a request for their return within a specified time, if not delivered, they are dealt with in accordance with such request.

RE-DIRECTION.—Letters re-posted unopened more than a day after delivery are charged with postage at the prepaid rate. If re-posted the same day no charge is made, provided they do not appear to have been opened or tampered with. Parcels may be re-directed free of charge if the original address and the corrected address are both in a delivery from the same office. *Post-cards, book-packets, and newspapers* are permitted to be re-directed, under the same conditions as those relating to letters.

REGISTRATION.—The fee for registering an inland letter, newspaper, or postal packet (including parcels) is 2d. in addition to the postage. These must be handed to an agent of the Post Office, and a receipt taken. By prepayment of a fee of 2d. in addition to the postage and registration fee, the sender of a registered letter may obtain an acknowledgment of its due delivery. The latest time for registering for the night mails is usually half an hour before the box closes for letters; in the case of parcels, half an hour before the latest time for posting ordinary parcels. If an inland packet marked "Registered" be put in a letter-box it will be liable on delivery to a charge of 8d., less any amount prepaid for registration. The payment of the registration fee effects an insurance on the packet against loss or damage up to £50, at the following rates:—Fee 2d., compensation £5; 3d., £10; 4d., £15; 5d., £20; 6d., £25; 7d., £30; 8d., £35; 9d., £40; 10d., £45; 11d., £50.

RETURNED AND MISSING LETTERS.—Inland letters undelivered, and containing an address, are returned, a registration fee of 2d. being charged should anything of value be inside. If without an address, and containing nothing of value, they are at once destroyed. Undelivered foreign letters are

returned, unopened, to the countries whence received. Senders of ¼d. packets should place a request for their return, in the upper left hand corner of the outside cover, in case of non-delivery. Inquiries for missing letters should be made at the Secretary's office, G. P. O. North, St. Martin's-le-Grand, between 10 a.m. and 5 p.m.; Saturdays between 10 a.m. and 1.30 p.m. The Returned Letter Office is at Mount Pleasant, E.C.

SOLDIERS' AND SEAMEN'S LETTERS.—Letters to non-commissioned officers, private soldiers and seamen serving abroad, not exceeding ½ oz., are forwarded for 1d., with a further charge if they pass through a foreign country.

STAMPS, ENVELOPES, ETC.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 10s.) are sold of the respective values of ¼d., 1d., 1½d., 2d., 2½d., 3d., 4d., 4½d., 5d., 6d., 9d., 10d., 1s., 2s., 3s., 4s., 5s., 10s., 20s., and £5. These may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell 1d. stamps and registered letter envelopes.

The perforation of stamps with initials is recommended. The perforation of the stamps on post-cards, newspaper wrappers and embossed envelopes is also not objected to. Stamps perforated otherwise than with initials, embossed stamps, or stamps cut from envelopes, wrappers or post-cards, are not available for postage.

EMBOSSSED ENVELOPES.—Embossed Halfpenny Envelopes are in two sizes, Commercial, in packets of 10 for 5½d., and Foolscap, 10 for 6d.; they are also sold singly. Penny Envelopes of the following sizes are kept in stock:—A, 4¼ × 3½, in packets of 20 for 1s. 10d.; C, 5¼ × 3, 24 for 2s. 2d.; and a cheaper quality (Commercial), 20 for 1s. 9d.; but all may be had in smaller numbers. Envelopes embossed with a twopence-halfpenny stamp (sizes L, 5½ × 3½, and M, 5½ × 4¾ ins.) are sold at the following rates:—L, 1 for 2½d., 10 for 2s. 2½d.; M, 1 for 2½d., 10 for 2s. 3d.

REGISTERED LETTER ENVELOPES, for foreign and inland letters, bearing a twopenny stamp embossed on the flap for the payment of the registration fees are of five sizes, and are sold: F, 5½ ins. × 3½ ins.; G, 6 ins. × 3½ ins., 2½d. each, or 12 for 2s. 2½d.; H, 8 ins. × 5 ins., H, 9 ins. × 4 ins., 2½d. each, or 12 for 2s. 7d.; K, 11¼ ins. × 6 ins., 3d. each, or 12 for 2s. 10d.

LETTER CARDS are sold thus:—1 for 1¼d., and 6 for 9d., also in packets of 96 for 9s.

POST-CARDS impressed with a halfpenny stamp are sold at the rate of 10 for 5½d., or 11s. per parcel of 240; a thicker quality being 10 for 6d., or 5s. per parcel of 100. They can also be had in sheets of 22 cards at £11 8s. and £12 6s. per quarter ream (180 sheets) respectively. Reply Post-cards are about double the rates for single cards, but are not sold in sheets.

COLONIAL AND FOREIGN POST-CARDS are supplied in packets of 10, price 10d.; singly, 1d.

Private cards, bearing an adhesive ¼d. stamp, and corresponding as nearly as possible to the size and weight of the official card, may be used.

Private Post Cards are also admissible for foreign and colonial post provided they are in conformity with the official cards in size and weight.

WRAPPERS bearing a halfpenny stamp may be had at ¾d. each or 7 for 4d.; 2s., 10d. per parcel of 480. With a penny stamp the price is, singly 1¼d., or 4 for every 4¼d.; 2s., 3d. per parcel of 240.

Uncut sheets of *halfpenny* wrappers, 14 on each sheet, may be obtained in quarter reams of 120 sheets for 43 1/2s.

LONDON POSTAL ARRANGEMENTS.

FOR the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	South Eastern (S.E.)
Eastern (E. and N.E.)	South Western (S.W.)
Northern (N.)	Western (W.)
North Western (N.W.)	West Central (W.C.)

Of these the E.C.—comprising the whole of the City, the W.C.—the district between Temple Bar and Charing Cross, and the S.W.—containing nearly all the Government Offices, are the most important. In the E.C. or City district there are twelve deliveries daily. By appending the initials the sorting of letters is facilitated, and frequently two or more hours saved in the delivery. In the other districts there are from six to eleven collections and deliveries. Letters properly directed, and properly posted, should be delivered within from two to four hours.

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at Chief District offices, Branch offices, Receiving houses, and Pillar boxes before 6; in suburban places, half an hour to an hour and a half earlier.

LATE INLAND LETTERS.—Inland letters and post-cards bearing an extra 1/4d. stamp are forwarded by the night mails if posted at the town Branch offices and Receiving houses before 7 p.m., and at St. Martin's-le-Grand before 7.45. At certain District offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters having an extra 1/4d. stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to the time of the departure of the train bearing the mails, varying from 8.15 to 10.

NIGHT POSTING.—Country letters too late for the ordinary mails, but posted in the London districts before the 9 o'clock collection, are delivered by the first post next morning if for places (about 250) within the range of the supplementary night and midnight despatches. Later collections are made in London and the suburbs—mostly between 11 and 12—the letters, &c., for the provinces being despatched by the early morning trains, and those for London and suburban districts coming within the first morning delivery. For early trains and the same delivery a collection is made from 2 to 3 a.m. on certain main routes; also at many places in the N.W., S.W., W., and W.C. districts; and at 3.15 in the E.C. district. At all the Chief District Offices the boxes are cleared at 6 a.m. for the first delivery in London districts, and at 7 a.m. for local letters.

LATE FOREIGN LETTERS, with an extra 1d. stamp, may be posted till 7 o'clock at Lombard Street, Gracechurch Street, Mark Lane, Eastcheap, Leadhall Street, Throgmorton Avenue, Threadneedle Street, Fleet Street, Ludgate Circus, Charing Cross, Bedford Street, Cannon Street, the District offices, and St. Martin's-le-Grand; with an extra 2d. at the latter office till 7.15, or till 7.30 with an extra 3d.

FOREIGN AND COLONIAL POST.

LETTER POSTAGE.

A charge of 3/4d. the half ounce is now made for letters addressed to any part of the world.

The Foreign Post-card Rates to all places to which Post-cards are available is 1d. single, 2d. return.

Inland cards are transmissible abroad if the

additional postage be supplied by an adhesive 1/4d. stamp.

BOOKS, NEWSPAPERS, &c.

NEWSPAPERS, BOOKS, PRINTED PAPERS, AND COMMERCIAL PAPERS generally, 1/4d. per 3 ozs.

PATTERNS AND SAMPLES, 1/4d. per 3 ozs.; but with a minimum charge of 1d.

COMMERCIAL PAPERS, 1/4d. per 3 ozs.; but with a minimum charge of 3/4d.

The limits of size to British Possessions or non-Union countries* are—length 4 ft., width or depth 1 ft., and must not exceed 5 lbs. in weight. To countries in the Postal Union the length is limited to 18 in.; weight not to exceed 4 lbs. If in the form of a roll, the limits of size in either case are 30 in. in length and 4 in. in diameter.

The above-named rates should in all cases be prepaid; no packet can be sent forward wholly unpaid, but, if by inadvertence the postage is insufficiently prepaid, double the deficit will be chargeable on delivery.

MAILS for Canada are made up every Wednesday and Thursday evening, and Saturday afternoon; to the United States every Monday, Wednesday and Saturday morning and Saturday afternoon; and to Newfoundland alternate Friday evenings.

To the West Indies alternate Wednesday mornings.

To Australasia, every Friday evening, and various other days

To India, every Friday evening.

To China, Japan, Hong Kong and Ceylon, Friday evening, and various other days.

To Portugal, Morocco and Tangier, every morning; to Roumania every morning and evening; to Greece, Monday, Wednesday and Friday mornings, and every Friday evening.

To Egypt, Sunday; Monday and Wednesday morning, and Friday evening, and various other days; to Cyprus, Friday evening; to Malta, every afternoon and Sunday morning.

To the Cape and Rhodesia every Saturday afternoon; to West Coast of Africa and Abyssinia, every Friday evening.

To Buenos Aires, Monte Video, and Rio Janeiro, alternate Wednesday and Friday mornings and Wednesday evening.

To Mexico, Wednesday and Saturday mornings and evenings; to Chile, alternate Wednesdays, morning and evening, and various other days, with U. S. mails.

To other parts of the world, the places and rates are too numerous for insertion; particulars may be obtained at every Receiving house.

PARCEL POST.

The rules and regulations to be observed are similar to those relating to inland parcels, with the addition that every parcel must have a Customs declaration respecting the contents. This must be on a form obtainable at any Post Office: the duties cannot be prepaid, but are collected on delivery. Certain articles are prohibited; among them letters nearly everywhere; firearms to Colombia, Constantinople, and Gibraltar; opium to Hong Kong, Siam and India; and pork and bacon to some places. The charges for India and the Colonies and for Foreign Countries are as follow:—

* Abyssinia, Afghanistan, Africa (Native possessions on the West Coast), Arabia, Bechuanaland Protectorate, British Central Africa, China, Friendly Islands, Madagascar, Morocco, Niger Protectorate, Orange Free State, Samoa, Sarawak, Sierra Leone Protectorate, Society Islands.

* The limit of weight to Bechuanaland Protectorate, British Central Africa and Rhodesia is 7 lbs.

To India and the Colonies generally and to Constantinople, Beyrout, Smyrna, and Egypt the maximum length is 3 feet 6 inches, or length and girth combined 6 feet; Canada, length 2 feet, depth or width 1 foot; to Italy, Spain, Greece, and parts of Turkey, length 2 feet, length and girth combined 4 feet; other places in Europe, 2 feet in any direction.

INSURANCE OF COLONIAL PARCELS.—Insurance may be effected for parcels to the following Colonies and possessions, up to the value of £50, at the following rates:—5d. for £12; 7½d. for £24; 10d. for £36; 1s. 0½d. for £48; 1s. 3d. for £50. The parcels insured must comply with the regulations of the Colonial Parcel Post.

MONEY AND POSTAL ORDERS.

MONEY ORDERS, INLAND.—The highest amount of money ordered in one order is limited to £10. The commission charged is:—

† Parcels for Greece and Roumania must be packed in some stronger material than paper or cardboard.
‡ Must be packed for opening by Customs.
§ See also Tangier.

For sums not exceeding £1, 2s.; £8, 3s.; £10, 4s.

Money orders will under no circumstances be paid on the day of issue. The rules and regulations are on the forms issued.

TELEGRAPH MONEY ORDERS.—These are issued between all post offices authorised to transact telegraph and money order business. They are limited to £10, and the commission is for sums not exceeding £8, 4s.; above this, to £10, 6s., in addition to the charge for an advice to the postmaster and its repetition, the minimum being 9d. Any telegraphic communication to the payee is a further charge, the minimum being 6d.

POSTAL ORDERS.—Unlike Money Orders they are issued for fixed sums; those of 1s. and 1s. 6d., at a charge of 3/4d.; of 2s., 3s. 6d., 4s., 5s., 6s., 7s., 8s., 10s., and 10s. 6d., 1s.; those of 15s. and 20s., 1 1/4d. These orders must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Stamps to the amount of 5d. may be affixed to the face of an order, so that practically any odd sum can be transmitted by means of postal orders. The name of the payee should be inserted by the purchaser before parting with it. Payment may be deferred for a period not exceeding ten days, by writing across the order the words "Payable after — days," and by inserting the name of the office of payment. Postal Orders are payable at any office in the United Kingdom, and at Constantinople, Malta, Gibraltar, India, Straits Settlements, Hong Kong, and Newfoundland.

The Chief Money Order Office in London is at Mount Pleasant, E.C.

MONEY ORDERS, FOREIGN AND COLONIAL.—These are issued in the United Kingdom on the undermentioned places, the commission being for sums not exceeding £2, 6s.; £8, 1s.; £10, 1s. 6s.:

TELEGRAMS.

INLAND.—Telegrams may be sent to all parts of the United Kingdom at the rate of 6d. for the first twelve words, and one halfpenny for every additional word; stamps in payment to be affixed to the form by the sender. The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. Five figures are counted as one word, so is a letter preceding or following a group of figures. The charge includes delivery within the town postal limits, or within three miles of a head office—beyond that limit the charge is 3d. per mile from the office door. Portage to be paid by sender. Telegram forms are of two kinds—one issued gratis; the other (A1), embossed with a stamp, may be purchased singly, or interleaved with carbonic paper, in books of 20, price 10s. 2d.

FOREIGN TELEGRAMS are subject to a code of 25 rules, too lengthy to be transcribed. The charges vary from 2d. a word to Belgium, France, Germany, and Holland, 2 1/2d. to Luxembourg, 3d. to Algeria, Italy, Switzerland, Austria H., and Tunis, 3 1/2d. to Denmark, Gibraltar, Morocco, Norway, Portugal and Spain, 4d. to Bosnia-Herzegovina, Montenegro, Roumania, Servia and Sweden, 4 1/2d. to Bulgaria, 5d. to Tangier, 5 1/2d. to Russia and Spain *via* France, 6d. to Malta and Turkey, 6 1/2d. to Cyprus and Greece, 8 1/2d. to Tripoli, 9d. to the Azores and Canaries, 11d. to Turkish Islands, 1s. to 1s. 6d. to Canada and United States, 3s. 8d. upwards to India, 4s. 7d. upwards to Australasia, and 3s. 6d. to 12s. 2d. to South America.

SUNDAY TELEGRAMS.—In most provincial towns the Telegraph Offices are open from 8 to 10 a.m. in England; in Scotland and Ireland from 9 to 10 a.m. In London the following offices are always open:—Central; G. N. R., King's Cross (except from 1.30 to 2.30 p.m. on Sundays); G. E. R., Liverpool Street and Stratford; London Bridge (S. E. R.), Faddington, St. Pancras, Victoria (L. C. & D.), Waterloo and Willesden Stations, and West Strand Post Office, the offices at Birmingham; Bradford and Brighton (except between midnight Saturday and 7 a.m. Sunday); Bristol, Cardiff Docks, Derby, Devonport, Dover, Exeter, Falmouth, Holyhead, Hull, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Norwich, Nottingham, Penzance, Plymouth, Portsmouth, Sheffield, and Southampton; as also are those at Aberdeen, Dundee, Edinburgh, and Glasgow, in Scotland; and Belfast, Cork, Dublin, Londonderry, and Queenstown, in Ireland.

LONDON-PARIS TELEPHONE.—Public Call Offices, G. P. O., West (Bath Street), and West Strand Branch, open always, and Threadneedle Street Branch (week days, 8 a.m. to 8 p.m.). Fee—8s. per conversation of 3 minutes. Two consecutive conversations are permitted. NOTE.—Paris time is 10 minutes earlier than London time.

SUNDAY AND HOLIDAY ARRANGEMENTS.

At all offices in the PROVINCES which are open on Sunday, postage stamps are sold, and letters may be registered, during the time such offices

* Orders issued for the places marked thus * are retained by the remitter.

† Austrian agencies are Adrianople, Beyrout, Candia, Canea, Chios, Dardanelles, Dede Agatch, Durazzo, Gallipoli, Ineboli, Jaffa, Janina, Jerusalem, Kaifa, Kavala, Kerassonde, Lagos (Turkey), Mitylene, Prevesa, Retimo, Rhodes, Salonica, Samsoun, Santi Quarante, Trebizond, Valona, Vathy-Samos.

French Agencies for *Parcels only*, are Alexandretta, Atakia, Mersina, San Giovanni de Medua, and Tenedos.

are open. The same regulation applies to CHRISTMAS DAY and GOOD FRIDAY, but in LONDON, letters can neither be registered, nor despatched by express service on Sunday, Good Friday, or Christmas day. The hours at which telegraph business is attended to are, as a rule, from 8 to 10 a.m.; but no Money Order, Savings Bank, Insurance, or Annuity Business is transacted on these days, nor in Scotland on Sacramental Fast Days.

BANK HOLIDAYS AND FAST DAYS.—Where Bank Holidays are observed as public holidays, the counters of the head office and branch offices

are closed at 12 noon (in some small places they are not even opened) *except* for telegraph business, the reception of parcels, the sale of postage stamps, and the registration of letters. At no provincial town in England or Ireland is there more than one delivery of letters on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery so far as relates to himself.

In London the holiday arrangements are of an exceptional character, and due notice of them is given by means of bills at the various offices.

THE DISTRICT MESSENGER SERVICE.

Originated in 1880 for the purpose of supplying electrical call boxes by means of which "messengers," "cabs," "police," "fire brigade," and "doctor" can be electrically summoned. By this system, messages, letters, parcels, &c., are conveyed under license from the Postmaster-General from various stations to all parts of London, the Provinces and the Continent. Messengers are supplied for almost any purpose, and tickets for theatres can be obtained from any of the Company's offices, which are as follows:—

78 Park St., Mayfair, W.
Torrington Place Lodge, Torrington Sq., W.C.
Sloane Sq., S.W. (4 Holbein Place).
183 Piccadilly, W.
269 Regent St., Regent Circus, W.
27 Chancery Lane, E.C.
85A Brompton Rd., Albert Gate, S.W.
121 Finchley Rd., Swiss Cottage, N.W.
17 London St., Paddington, W.
Hotel Cecil, Strand, W.C.

Trafalgar Sq., S.W. (4 Charing Cross).
Artillery Mansions, 73A Victoria St., S.W.
82 Gloucester Rd., S. Kensington.
Charing Cross District Railway Station.
Westminster Bridge " "
Mansion House " "
Victoria St. " "
Broad St. House, Wormwood St., E.C.
66 Queen Victoria St., E.C.
120 Leadenhall St., E.C.

The charges are:—Half a mile and under, 4d.; over half a mile to one mile (including reply), 6d.; over one mile to one mile and a half (including reply), 9d.; beyond this distance, special rates. Messengers can also be engaged at 8d. per hour, exclusive of railway or omnibus fares. The district offices are open day and night, including Sundays and Bank Holidays. The company holds itself responsible up to £80 for articles entrusted to its messengers, provided the value has been previously declared.

POST OFFICE SAVINGS BANKS.

These are established at all Money Order Offices, and are opened for the receipt of deposits during the hours appointed for the sale of stamps, commencing at 8 a.m. Every such office is also open for the payment of withdrawals on week days during certain hours, which are specified in a notice exhibited at the office.

Deposits can be made from 1s. to £50 in one year, the total never to exceed £300 including interest, which is at 2½ per cent.

ANNUITIES AND LIFE ASSURANCE.—Immediate or deferred annuities from £1 to £100 may be

purchased through the Post Office on the life of any one over 5 years old. These are payable by equal half-yearly instalments.

Life insurances, from £5 to £100, are granted to persons between 14 and 65 years of age. Children between 8 and 14 can be insured for £5.

If the amount of the annuity or insurance purchased is less than £100, further amounts may be bought, until the total sum amounts to £100.

The Post Office Savings Bank is at 144A, Queen Victoria Street, E.C.

TWELVE YEARS' WORK OF THE POST OFFICE.

DURING the past twelve years the Post Office has delivered the following number of Letters, Post Cards, Book Packets, &c., through the various Post Offices in the United Kingdom:—

Year.	Letters.	•	†	Post Cards.	†	Books, &c.	†	Newspapers.	†
1885-86	1,403,500,000	39	3·2	171,300,000	6·9	342,200,000	6·8	147,700,000	2·8

• Number per head of the population.

† Annual increase per cent. per annum.

‡ Decrease.

THE EMPIRE OF INDIA.

THE BRITISH EMPIRE IN INDIA extends over a territory larger than the Continent of Europe without Russia. Afghanistan, Nepal and Bhutan are within the sphere of its influence. Baluchistan (130,000 square miles) and Kashmir with its dependencies of Chitral, Hunza, Nagar, are within its frontier. Within the boundary recently demarcated on the north-west and where the line is still undefined on the north-east there are also tracts of tribal territory under the political influence though not yet under the administrative rule of the "Indian" government. The political boundary of India marches with Persia from the sea to near Zulfikar on the Harirud; then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab, thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of the Victoria lake by the line demarcated in 1895 up to Chinese territory on the Taghdumbash Pamir. From this point the frontier touches the Chinese Empire, mainly along the crests of the Himalayas, till the limits of French control are reached on the Upper Mekong. The Indian frontier leaving the Mekong marches with Siam till it reaches the sea half way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, and the Laccadive Islands, Aden and Perim, the Somali Coast protectorate, and protectorates over Socotra, Bahrein, and various Chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from the 8th to the 37th degree of north latitude, and from the 61st to the 100th degree of longitude east of Greenwich; Calcutta itself lying in 88° E. long. Its total area may be taken to be 1,700,000 square miles, of which 750,000 square miles are under Native and the remainder under British administration. The population of India, shown by the census in February, 1891, if we include the population (computed or estimated) of Manipur, Sikkim, and the Shan States, but not the protected territory of Baluchistan and the Somali Coast Protectorate (60,000 sq. miles), was 288,350,000, of which 66,750,000 belonged to the Native States. The increase of the population of our Indian Empire in the decade 1881 to 1891 was 33½ millions, of which 5¼ millions were added by the inclusion of tracts, particularly Upper Burma, not enumerated in 1881, while the remainder of the increase being at the rate of over 10 per cent. in the decade, represents the ordinary growth of population. By 1898 the population of India may be taken to have increased to about 308 millions, of which 72 millions would belong to the Native States. The languages spoken in India, excluding European tongues and those which are spoken by less than 1,000 persons, are 78 in number, grouped in a dozen different families; of which 20 languages belonging to five families are spoken by not less than one million persons each. Other particulars regarding the population will be found on pages 465-467. Excluding the Province of Burma, which lies to the east of the Bay of Bengal and forms no part of the Indian Peninsula, we may broadly divide the country, for geographical purposes, into three sections, viz. :—the Himalayan region, the northern river-plains, and the southern table-land. The first of these includes the mountain-range of the Himalayas and their offshoots to the southward. This region, lying mainly beyond the limit of British administration, must be considered as the natural northern boundary of India, and may be described as consisting of two giant mountain-ranges running from north-west to south-east, with a series of great valleys beyond. The southern range, which rises precipitously from the belt of swampy land lying to the north of the Ganges and parallel to its course, springs up to a height of 20,000 feet above the plain, and culminates in the loftiest peaks yet measured on the globe—Mount Everest, 29,002 feet; Kunchin-Junga, 28,176 feet; and Dwhalagiri, over 27,000 feet, near the centre of the range, and Mount Godwin Austen (K. 2), 28,250 feet, near its junction with the Hindu Kush Mountains. The Himalayas, however, are not only a rampart of defence, but also serve to collect and store up a supply of water for the tropical plains below them. The sides of the Himalayas afford an admirable simultaneous representation of the various

The principal Government publications relating to India, presented to Parliament in 1897, were:—Statistical Abstracts, 1886-87 to 1895-96, C. 8,659; Moral and Material Progress Report, 1895-96, No. 328; Trade of British India, 1891-92 to 1895-96, C. 8,338; Sanitary Measures in India, 1895-96, Vol. xxvii.; Financial Statement for 1897-98, No. 193; Home Accounts, 1895-96, with Estimates 1896-97, No. 211; Explanatory Memorandum regarding the Accounts and Estimates of 1897-98, C. 8,539; Return of Net Income and Expenditure for eleven years 1885-86 to 1895-96, No. 110; Administration Report of Railways in India for 1896-97; Famine papers, 4 volumes, C. 8,302, 8,388, 8,504, 8,660; Plague, 2 volumes, C. 8,386, 8,511.

natural belts of the earth's surface, being divided into the tropical, the temperate, and the arctic zones as the upward journey is taken from the plains below. The vegetation of the Himalayan region includes such varied species as the tree-fern, the deodar or native cedar, numerous rhododendrons, the ilex, orchids, barley, oats, millet, and many common vegetables of domestic use. In the way of trade this region produces large quantities of timber, charcoal, barley, millet, and honey. The fauna are no less varied than the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear and ounce, eagles, partridges, and a large number of pheasants. The native tribes afford examples of both the Aryan and the Turanian races, together with an intermingling of the two. The northern river-plains, lying at the foot of the Himalayas, and stretching from sea to sea, comprehend the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from each other, four rivers take their rise in the Himalayas. Of these, two are on the north side of the mountains—the Indus, which flows westward, and the Sang-po or Brahmaputra, which flows eastward. The other two, on the southern slope, are the Sutlej, which, after flowing west and south-west for 900 miles and collecting to itself various other waters, joins the Indus; and the Ganges, which, during a south-east and easterly journey of nearly 1,600 miles, drains almost the whole of the Bengal plain. Meanwhile the Brahmaputra, which runs close along by the mountains on the northern side, having reached the eastern extremity of the Himalayas, turns sharply to the south, then to the west, and finally joins the Ganges, the two rivers discharging themselves together into the Bay of Bengal. The Indus is 1,800 miles long; the Brahmaputra nearly 1,500 miles long. It will be seen from this that the Himalayas send to India the water gathered on both their northern and southern slopes: this result is due to the peculiar *lie* of the land, and this it is which has not only given great abundance and wealth to the country, but has also made it the prey of the spoiler and invader for many centuries. The richest, the most populous, and the most prosperous part of India is to be found in the basins of these three great river-systems, which include in the aggregate an area of 1,125,000 square miles. Each of these rivers is of inestimable value to the country it drains, but particularly is this so with the Ganges. The Ganges is not only the great highway of Bengal, it is also the water-carrier and the fertiliser; without it traffic, where not impossible, would be enormously dear, and the province almost a desert. So rich is the Ganges valley that a wholly agricultural population of nearly 60 millions finds support on the soil at a density of over 700 persons to the square mile (the average density of the population of England and Wales being 500 to the square mile). There are several agricultural districts with a population exceeding 900 to the square mile. There are three harvests in Lower Bengal each year: pease, pulse, and various oil-seeds are reaped in April and May, the early rice crop in September, and the great rice crop two or three months later. The chief vegetable products of N. W. Bengal are the mango, the banyan, the wild cotton-tree, and the tamarind: while the delta region gives rice, the bamboo, and a large variety of palms (cocoanut, date, areca, &c.). In the north, again, we also find wheat, Indian corn, millet, and barley; while to the south, indigo, cotton, sugar-cane, tobacco, and many different dyes, drugs, and spices are also produced. These include the aloe, castor-oil tree, resins, and gums; but there are also grown the melon, pumpkin, tea-plant, yams, the opium poppy, the mulberry, and jute. Just as the Himalayas on the north and the Suleiman Mountains on the north-west form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due east and west from the head of the Gulf of Cambay, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel Coasts, which converge at Cape Comorin, and on the third by the Vindhya Mountains, north of the Nerbudda River. The Eastern and Western Ghats all but complete the triangle of mountain ranges with which this region is surrounded. As the Western Ghats lie so close to the coast, and afford no exit for rivers, we find no streams on the Malabar Coast south of the Tapti River: all the rivers—and they are both numerous and of great size—flow eastwards, and passing through gaps or defiles in the Eastern Ghats, discharge their waters into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N. E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.) at intervals further to the south; in the extreme N. W., too, south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards. The division line of the basins of these last two rivers is sharply defined by the Satpura Mountains, which lie midway between them. The physical geography of S. India has given it much of its history: the S. W. coast, shut in by the

mountains, is very primitive and moves slowly; the S.E., open and easy of access both from within and without, has advanced with rapid strides in commerce and all other civilising influences. The mountain slopes of this region, those of the Western Ghauts in particular, are still covered with the splendid vegetation of primeval forests of the tropics: teak, ebony, ironwood, and Indian mahogany abound, so also do the jackwood, blackwood, sandalwood, and the ubiquitous bamboo. Coffee is now largely cultivated there, and tea and cinchona are also grown. The elephant, tiger, bison, leopard, deer, sheep, and various smaller game afford limitless sport to the hunter. In the valleys and on the higher plains many crops are raised in profusion, chiefly the same as those grown in the lower basin of the Ganges. The southern table-land has in past times furnished considerable supplies of different minerals, including gold: those found and worked now are mainly lime, coal, and iron; some gold mines are also being successfully worked in Mysore. To the west of the peninsula the Indian Empire includes the mountainous, barren, and thinly populated region of Baluchistan, which has some mineral wealth in its coal and petroleum. East of the peninsula is the large province of Burma, watered by the Irawaddi and its tributaries and by the Salween. The delta region is flat; further inland the country is one of hills and rolling downs; and in the north the province loses itself in the mountains. Rice is the chief staple; cotton, sesamum, and tobacco are also extensively grown. The forests, particularly of teak, make a very large contribution to the exports. Among the industries still to be developed in the province is that of tea-cultivation, the tea-plant being indigenous. Burma is rich in minerals. Rubies, sapphires, and jade are mined. Gold and silver undoubtedly exist; wells for the production of petroleum have long been in operation; coal, copper, tin, lead, are also found. Three-fifths of the Indian Empire are under the direct rule of the British Government, and are divided for administrative purposes into eight principal Provinces—viz., Madras, Bombay, Bengal, the North-West Provinces and Oudh, the Punjab, Burma, the Central Provinces, and Assam, and five minor administrations. The remaining two-fifths are made up of a large number of Native States, whose chiefs are, as it is termed, in subordinate alliance with Her Imperial Majesty, KAISAR-I-HIND. Her Majesty's representative is styled the Viceroy and Governor-General, his relations with the Home Government being regulated by Act 21 & 22 Vict. c. 106, which substituted the authority of a Secretary of State for India, aided by a Council of fifteen members, for that of the East India Company and the Board of Control. By an Act of 1889, the Secretary of State is permitted to leave five of the seats on his Council unfilled. For the present members of Council see page 158.

For the knowledge we possess of the period that preceded the commencement of connected history in India we are chiefly indebted to the sacred books of the Hindus, the accounts of Greek and Chinese writers, the records of inscriptions and coins, and the evidences of race and language. The existence of various races in India speaking languages not cognate, proves that the country has been subject to successive invasions in remote ages. The first of which we possess direct evidence is that of the ARYANS, who, coming from north of the Hindu Kush, over-spread Persia in one direction and Northern India in the other. The *Vedas*, which are the most ancient and venerated of the sacred writings of the Indian Aryans, and are written in Sanskrit of the earliest type, are supposed to date from 1400 B.C. In the early *Vedas* all classification and ranking of the gods is absolutely wanting; something of the kind, however, is done in the *Upanishads*, which form a kind of commentary on the *Vedas*, and make some attempt to solve the problems of creation, the nature of the Deity, and the human soul. The *Upanishads*, in fact, founded admittedly on the *Vedas*, contain the germs of those great systems of Hindu philosophy which, in their later development, brought about the separation of the creed of the vulgar from that of the educated. The *Mahabharata* and *Ramayana* are epic poems of later date, abounding in extravagant myths, from which, however, the learned have succeeded in gaining a general knowledge of the habits and

condition of the people and of the course of events during the dark period of Aryan conquest. Themselves a branch of the Indo-European race, by whom Europe had already been colonised, the Aryans are believed to have entered India some 2000 years B.C. They were then a pastoral and agricultural people; their form of government was patriarchal, and the offices of prince and priest were united in the same person. Their conquest seems to have been confined at first to the country south of the Himalayas on the west of the Jumna, where they long remained, before they began their advance southwards and eastwards down the Gangetic valley. The enemies they met, who had preceded them in the occupation of the country, were a yellow-skinned, serpent-worshipping race in the Himalayan districts, and in the south a dark-skinned population, short in stature, treacherous, and degraded. The condition of the people, as well as the progress of their wars with the older inhabitants of the country, can be clearly traced in the sacred poems. It appears that when Oudh and Bengal had been subdued, the deified hero Râma effected the conquest of Southern India, and afterwards that of Ceylon. By this time a great change had come over the Aryan invaders. Their primitive simplicity had disappeared. Patriarchs had become luxurious princes, whose priestly duties were deputed to the sect of Brahmans; and by the fifth century, when, it is supposed, the *Laws of Manu*, a digest of the current customary laws, were compiled, this caste had succeeded in estab-

lishing its superiority over the Kshetriyas, or military caste, to whom it had been at first subordinate. The *Laws of Manu* give a good idea of what the priestly caste wished Indian society to be at the period when they were composed. In them we find mention made of the existence of caste and village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Sákya Muni, or Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died at a great age in 543 B.C. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood; and within three centuries from the death of its founder it had been accepted as the national religion. For more than a thousand years it existed in India side by side with Brahmanism, which it never succeeded in ousting. But either from internal dissensions of its own, or from persecution without, Buddhism became practically extinct in India before the twelfth century, though it still flourishes not only in China and Japan, but also in Nipal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. One branch of it, however, survived in the distinct sect of the Jains, whose religion was a combination of Buddhism and Brahmanism. The followers of this creed, of which the antiquity and relations with Buddhism are much disputed, are still very numerous in Guzerat, and may be found in many parts of India.

With Alexander's invasion (327 B.C.) we reach the first landmark in the political history of India. Herodotus tells us that the twentieth satrapy of Persia had previously included part of the north-west of India. Alexander himself did not penetrate beyond the tributaries of the Indus, though he sailed down the river; his Indian possessions fell to Seleucus, whose ambassador, Megasthenes, has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village-communities of the Punjab, and speaks of the peoples as brave and truthful, and averse to litigation, and of the women as chaste; and he notes the absence of slavery. Asoka (B.C. 260-220), the grandson of Chandragupta, whose edicts throw light upon this period, was the great patron of Buddhism, which became for a time the State religion throughout the greater part of India. Our last contributors to a knowledge of India before the period of authentic history are the Buddhist pilgrims from China, who visited the country between the fifth and tenth centuries.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between 126 B.C. and 544 A.D., over Northern India. Their inroads, as well as the existence of ancient aboriginal tribes in India, left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus.

So early as A.D. 664 Arabs began to make predatory expeditions against Guzerat and Sind. The conquest of Persia, towards the middle of the seventh century, at length brought the successors of Mohammed to the Indus, and in the N.W. of India they made some temporary acquisitions during the ensuing hundred years. However, two centuries more were to pass before the foundations of a durable Mohammedan empire were laid. It was in the year 999 that Mahmud

declared the independence of the kingdom of Ghazni in Afghanistan—a proceeding which he followed up by at least twelve expeditions into India, one of which carried him beyond the Jumna, and another ended in the occupation of Guzerat. Later, in 1024, he conquered and annexed to his kingdom the provinces of Lahore and Mooltan. The succeeding dynasties of Afghan kings held power in India for 500 years; but the advance of their power was gradual, for it was not till 1206 that Delhi was taken, and the greater part of Hindustan annexed by Kutb-ud-din, with whose memory is connected the Kutb Minar, near Delhi; and the first Mohammedan invasion of the Deccan took place in 1294.

From this time onward the history of India is the history of invasion, dynasty following dynasty, while the Mongol hordes again and again swept into the country. At length, during the reign of the last monarch of the Toghliak line, the famous Tamerlane burst into India at the head of a mighty host, and captured and sacked Delhi in 1398: he left behind him Khizr Khan, who thenceforward held the reins of power. A period of misrule, tyranny, and anarchy ensued, and fittingly paved the way for the total conquest of the country by the Mogul emperors.

THE MOGUL EMPIRE.—The Mongols, or Moguls, a Mohammedan Power, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, and, as has been stated, again and again invaded that country. In 1398, during the invasion of Tamerlane, or Teimur, a great part of Hindustan was laid waste. In 1526 *Sultan Baber*, a descendant of both these Tartar chiefs, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE. *Humayoon* (1530-56) lost the whole of the territory conquered by Baber, but recovered a portion of it shortly before his death. *Akbar*, his son (1556-1605), being a minor, the Government was for five years under a regency, but it was a much longer time before Akbar's many opponents were subdued and his Empire firmly established, embracing Cabul, Candahar, all Hindustan, and a portion of the Deccan. The Mogul Empire thus absorbed not only the Afghan kingdom in Hindustan, but also the independent Mohammedan kingdoms of Bijapur, Golconda, Ahmednagar, Berar, and Bidar, in the Deccan. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men whom he drew around him were Raja Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet; nor should we overlook Bairam Khan, Akbar's faithful guardian in his youth. The revenue of Akbar's empire is estimated to have been 19 millions sterling; and this gradually increased till under Aurangzeb, at the close of the 17th century, the imperial revenue amounted to £43,500,000. *Jehangir* (1605-28) received in 1615 an embassy despatched by James I., under the conduct of Sir Thomas Roe. His empress was the famous Nur Mehal. Under *Shah Jehan* (1628-58) the Mogul Empire reached its zenith. Many public works and grand buildings testify to his magnificence and taste, amongst others the Taj Mahal at Agra, which is said to have been the work of a French architect—Austin of Bordeaux. The close of *Shah Jehan's* reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658-1707) defeated his brothers and put them to death; his father he kept a prisoner for the rest of his life. *Aurangzeb* had great ability and courage,

and was a master of dissimulation; but bigotry and distrust were the bane of his policy, and the decline of the Mogul Empire dates from his reign. Four sons disputed the right of succession: at last *Bahadur Shah* gained the coveted crown, but only for five years. Dying in 1712 he was succeeded by his son, *Jehundar Shah*, who was cruelly murdered by one *Farokshir*, a great-grandson of the famous *Aurangzeb*, who seized on the crown. He in turn was himself put to death six years later, and *Muhammad Shah*, grandson of *Bahadur*, came to the throne. The viceroys of his own appointment grew uneasy and rebellious, and all unconsciously aided in the growth of the *Mahratta* power. One of them refused his aid to his sovereign, and the *Mahrattas* in consequence subdued the *Deccan*. In 1738, to avenge an alleged insult, *Nadir Shah* of *Persia* invaded *India*, captured *Delhi*, and gave the city over to the mercy of his terrible followers, who are said to have slain more than 100,000 of the inhabitants, and to have levied as contribution and carried off as plunder, treasure equal to more than £50,000,000 sterling. In spite of this enormous sacrifice, peace was only obtained by giving up to the conqueror all the country west of the *Indus*. On the death of *Muhammad*, in 1748, the country was fast going to decay—it was, in fact, only waiting for a fresh conqueror. The *Mahrattas* were there ready for the work to be done. About 1724 the *Deccan*, *Oudh*, and *Bengal* became practically independent under *Nizam-ul-Mulk* (ancestor of the present *Nizam*), *Sadat Khan*, and *Alivardi Khan* respectively.

THE MAHRATTAS.—Simultaneously with the decline of the *Moguls* rose the power of the *Mahrattas*. They were *Hindus*, and the country from which they came may be roughly described by drawing two lines from *Nagpur* to *Surat* and *Goa* on the west coast. The founder of their power was *Sivaji* (1627-1680), a chieftain of the family of *Bhonslah*. *Balaji Vishvanath* (1712-1720), *Peishwa*, or *Prime Minister*, succeeded in making that office of paramount importance and hereditary in his family; *Sivaji's* descendants thenceforth holding a merely nominal position as *Rajas* of *Satara*. Under the *Peishwas*, aided by *Scindia*, *Holkar*, and the *Gaekwar*, who formed independent States about this time, the *Mahrattas* rapidly extended their territory and influence. In 1760 *Delhi* was in their hands, and though they suffered a disastrous defeat at *Panipat* in 1761, at the hands of *Ahmed Shah*, the *Afghan* invader, they remained for some time the first Power in *India*, and were the most dangerous opponents of the *English*. Their system, however, was one of organised plunder rather than of settled government. Like the *Pindaris*, a horde of freebooters who followed in their train, they were a scourge to the country. It was not until both *Pindaris* and *Mahrattas* were finally overthrown in 1818, that *India* enjoyed the blessings of internal peace. The *Mahratta* empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of *European* adventurers, who, either from love of adventure or thoughts of gain, had been attracted in increasing numbers to the shores of *India*.

EUROPEAN ADVENTURE.—From time immemorial the trade of *Europe* with *India* and the farther *East* has been the most lucrative branch of the world's commerce, and has enormously enriched in turn each nation that has carried it. In the 15th century it was mainly possessed by the *Venetians* at its *European* end, and by the *Arabs*, the successors of the old *Phoenicians*, in its *Eastern*

portion; the chief centres of the trade of the *Arabs* were *Calicut*, *Ormuz*, *Aden* and *Malacca*. Seeing the large profits to be derived from this trade, the rising nations of *Europe* in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to *India*. The sea route round the *Cape of Good Hope* was discovered by *Vasco da Gama*, who anchored before *Calicut* on 20th *May*, 1498. From that time until they lost their naval supremacy the *Portuguese* may be considered to have enjoyed the monopoly of *Indian* trade. The first *Portuguese* viceroy, *Francis of Almeida* (1505-1509), established numerous factories and fortresses, and took possession of *Ceylon* and the *Maldivé Islands*; while his successor, *Alfonso de Albuquerque*, captured *Goa* (1510), and extended the *Portuguese* dominion in various places, but notably on the *Malabar* and *Malacca* coasts. This dominion had, in 1542, practically amounted to an entire regulation of the *Asiatic* coast trade with *Europe* from the *Persian Gulf* to *Japan*, and for nearly sixty years afterwards the *King of Portugal* was the virtual suzerain of the southern coast of *Asia*. When the *Portuguese* crown fell into weak hands its power in the *Eastern* seas began to decline; and it was almost annulled in 1580, when the crowns of *Spain* and *Portugal* were united under *Philip II.*, and the *Asiatic* interests of *Portugal* were subordinated to the *European* interests of *Spain*. The *Portuguese* were content to bring the exports of *India* to *Lisbon*; they left it to the *Dutch* to carry them thence to the other parts of *Europe*. But when *Philip II.*, on account of the revolt of the *United Provinces*, shut the harbour of *Lisbon* against them, the *Dutch* (1580) were driven either to forego the trade or seek it in the *East* themselves. The enterprise of the nation decided the question, especially as the *Spanish* naval supremacy had been shattered by the defeat of the "Invincible *Armada*" in 1588. In 1602 "The *Dutch East India Company*" was formed by the amalgamation of the previously existing trading societies, and between 1602 and 1620 the principal *Portuguese* settlements in the *East* were captured. In 1661 the *Portuguese* possessed only those remnants of their *Indian* possessions which they still hold. The *Dutch Eastern Empire*, situated mainly in the *Malayan Peninsula* and contiguous islands, passed with the *Mother Country* under the dominion of the *French* in 1810. Attacked in consequence and conquered by the *English* in 1812, it was surrendered again to the *Dutch* in 1816, since which date it has remained in *Dutch* hands.

ENGLISH DOMINION.—At the close of the 16th century the *English* also began to feel the necessity of freeing themselves from dependence on others for the supply of *Indian* produce, and to desire a share in the profits of *Indian* commerce. After the success of some smaller ventures, the *English East India Company* was incorporated by *Queen Elizabeth* by royal charter on the 31st *December*, 1600; there were 125 shareholders, the capital was £70,000, and the official title was "The *Governor and Company of Merchants of London* trading to the *East Indies*." When voyages to *India*—and almost profitless voyages they proved to be—were first undertaken on the joint-stock account, the company's capital was raised to £400,000. Quarrels with the *Portuguese* ensued; and no footing of any kind was obtained until the year 1615, when *Captain Best*, with four *English* ships, won a great victory over the *Portuguese* squadron off *Surat*, where a settlement was established, and a

satisfactory treaty concluded with the Emperor Jehangir. Under the terms of this treaty, King James I. sent out as ambassador Sir Thomas Roe, who was not only granted various trading concessions, but was also permitted to reside at the Court of the Great Mogul. When Charles I. was in need of money he granted a second charter to a new Company. Confusion was the result; and piratical and other acts dishonourable to Europeans followed. The Protector Cromwell, however, was equal to the crisis; the rival companies were merged into one, the famous Navigation Act was passed, a reign of order was established, and the English traders gained a reputation for general honesty which—in spite of individuals and solitary cases—they have ever since maintained. In 1639 the English, who had acquired a narrow strip of land, six miles in length and one mile inland, on the coast just below Masulipatam, built a factory there and having surrounded it with a wall, mounted it with guns, and named it Fort St. George; fourteen years later (1653) this settlement of Madras became an independent Presidency. When, in 1661, Charles II. was married to Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay: five years afterwards it was formally made over to the English monarch, who in his turn, in 1668, transferred all his rights over it, together with the responsibilities connected with it, to the East India Company for an annual payment of £10. In 1687 the factory at Surat was given up by the Company, and Bombay was made the seat of the Western Presidency. Although in 1634 the Company had obtained certain treaty rights concerning Bengal from the Mogul, and six years afterwards a factory had been established at Hooghly, near the mouth of the Ganges, yet in that part of the country they held no territorial possessions as in Bombay and Madras. In 1688 the exactions of the Mohammedan authorities forced them to abandon their settlement. They were, however, invited to return, and in 1689 were laid, amid swamp and jungle, the foundations of Fort William, afterwards destined to develop into the modern city of Calcutta. In 1698 a rival company called "The English East India Company" to distinguish it from the old "London Company," was started with a capital of two millions. The competition resulted in over-trading; the home markets were glutted with all kinds of Indian produce, and the English manufacturers were loud in their complaints. In 1702 the two rival companies were united, and in 1708, thanks to the prudence and tact of Lord Godolphin, the whole of the English companies were at last amalgamated under the charter granted by Queen Anne to "The United Company of Merchants Trading to the East Indies." England having entered upon the war of the Austrian succession in 1744, the rival companies of England and France first came into collision in 1746, the immediate result being the capture of Madras in that year. Had Duplex received continuous support from home, he might have succeeded in founding a French Empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army at Wandewash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French. The territory retained by the French in India since that date is insignificant; and in these possessions they are forbidden by treaty to hold

any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and the victory of Plassey in the following year made British influence predominant in Bengal. Clive was appointed first Governor of Bengal in 1758. In 1763, in his absence, the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). As a result of this battle, they received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Behar, and Orissa, and the jurisdiction over the Northern Circars. Clive returned a second time to Bengal as Governor, and before he left finally in 1767, he succeeded in reforming the services, in which great abuses existed. After an interval of misrule Warren Hastings (1772-85) was appointed President of Calcutta, and then Governor-General in 1774, on the creation of that office under the Regulating Act of 1773. He not only greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council, of which Sir Philip Francis, the reputed author of *Junius*, was a member, but was also the first great administrative organiser of the British possessions in India. He repelled Hyder Ali's memorable invasion of the Carnatic (1780), and defeated the triple alliance of the Nizam, the Mahrattas, and Hyder Ali. In so doing he probably saved British India. The first reign of Lord Cornwallis (1786-93) was marked by the complete reform he effected in the Company's Civil Service, by the introduction of the Permanent Settlement of the Land Revenue in Bengal, and by the Second Mysore War. After the uneventful rule of Sir John Shore, afterwards Lord Teignmouth (1793-98), came the administration of the Marquess Wellesley (1798-1805), of which the events were numerous and important. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. His son and successor, Tippon, equally courageous and equally hostile to the English, was in 1798 in secret correspondence with the French, who had then the predominant influence in the military councils of the Nizam and of Scindia, were strongly established in the islands of Mauritius and Bourbon, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippon, and the restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta Confederacy. The campaigns of Lord Lake and Sir Arthur Wellesley, in the Second and Third Mahratta Wars, curtailed the power of Scindia and Holkar, and added to the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not establish, a system of subsidiary alliances with Native States, which promised to give greater security than the balance of power attempted by Lord Wellesley's predecessors. Lord Minto (1807-13) established peaceful relations with the Sikhs, Cabul, and Persia, through the mediation of Metcalfe, Mountstuart Elphinstone, and Malcolm respectively, occupied the Mauritius, and extended British influence in the Eastern Seas. Under the Marquess of Hastings (1814-23) the Bombay Presidency, hitherto the smallest of the three, attained its present dimensions on the annexa-

tion, in 1818, of the territory of the Peishwa, whose power had lasted a little over 100 years. By his wars in Central India, Lord Hastings also delivered the country from the ravages of the *Pindaris*, freebooters who organised bands, sometimes many thousands strong, and devastated the country in all directions; and he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. A war with Nepal also occurred during Lord Hastings' régime. In 1823 Lord Amherst succeeded the Marquess of Hastings, and marked his period of office by a conquest in another direction. The King of Ava had been not only guilty of great insolence to the Governor-General, but was ever making encroachments on British territory. The result was the First Burmese War, which cost us 20,000 lives and nearly £14,000,000, but gave us the fertile provinces of Aracan and Tenasserim, and, practically, Assam. While Lord William Bentinck was Governor-General (1828-35), steam communication with India was introduced, Suttee (or widow-burning) was abolished, educated natives were admitted more largely into the service of the Company, and various measures were passed affecting education, economy, and justice. The Charter of the East India Company was in 1833 renewed for twenty years, on condition that the Company should altogether abandon its trading, and allow of the settlement of Europeans in the country. Lord Auckland's resolution to support Shah Shuja against Dost Mohammed brought on the First Afghan Expedition (1839-42), and the serious disaster attendant on the fatal Retreat from Cabul. This was atoned for in the administration of Lord Ellenborough (1842-44), which also saw the Conquest of Sind by Sir Charles Napier. Lord Hardinge (1844-48) conducted in person the First Sikh War, and fought a series of severely-contested battles, ending with Soobraon (1846). Lord Dalhousie's administration (1848-55) was fruitful in events. The Second Sikh War resulted in the submission of the Sikhs, who at Chillianwallah and Goojerat gave further proof of their bravery. The annexation of their country was followed by that of Tanjore; and the Second Burmese War (1852) deprived the King of Burma of his sea-board provinces. Lord Dalhousie promoted the introduction of Railways and the Telegraph. He established cheap postage; promoted steam navigation with England *via* the Red Sea; and opened the Ganges Canal, still the largest irrigation work in India. His annexation policy was much criticised at home: it proceeded on the principle that British being preferable to native rule in the interest of the subject populations, gross misrule or a break in the natural succession justified the transfer of a Native State to the British Government. In 1849 Satara, and in 1853 Jhansi, thus became British territory; and after the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after long and painful hesitation on the part of the Directorate, and after repeated warnings to the Government of Oudh—a Government marked by tyranny and oppression—that kingdom was also added to the list of annexations. The proclamation was made on February 13, 1856, and the transfer took place without the shedding of blood or the striking of a single blow. Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace. It was, however, his fate to meet the greatest crisis that has threatened

the British Empire in India. A Mutiny of the native troops broke out on the 10th of May, 1857, at the station of Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of 40,000 of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign of Sir Hugh Rose (Lord Strathnairn), and all the heroism displayed during that momentous time, will never be forgotten. The Great Mutiny proved the deathblow to the East India Company, whose glorious annals were brought to a close by the transfer of its entire authority and administration to the Crown.

THE BRITISH INDIAN EMPIRE.—The Act for the better government of India established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st of November, 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died November 20th, 1863. The attention of Sir John (Lord) Lawrence (1864-69) was directed to the necessity for financial retrenchment, which arose chiefly from increased military expenditure. His rule was also marked by the Bhutan War and by the terrible Orissa Famine of 1866. Lord Mayo (1869-72) succeeded in carrying out a number of measures for the reform of the administration and for the development of the resources of the country, of which perhaps the chief was the introduction of the system of provincial finance, a large measure of decentralisation since extended. He was assassinated on the 8th of Feb., 1872, while on a visit to the convict settlement at Port Blair, in the Andamans. During the time of Lord Northbrook (1872-76), H.R.H. the Prince of Wales visited India, and received a loyal welcome from all classes. In the same period occurred a famine in the Lower Provinces of Bengal, and the deposition of the Gaekwar of Baroda for misrule and disloyalty. Lord Lytton's Viceroyalty (1876-80) was made eventful by the terrible Famine in Southern India, by the Second Afghan War, and by the Queen's assumption of the title of EMPRESS OF INDIA. He was succeeded by the Marquess of Ripon (1880-84), whose peaceful rule was marked by the extension of local self-government. He, in his turn, gave place to the Marquess of Dufferin (1884-88), whose régime was remarkable for the Third Burmese War, by which Upper Burma and its dependent Shan States were added to the Empire. In this Administration, too, the north-western frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased; and the Jubilee of Her Majesty's reign (1887) was enthusiastically celebrated by all classes and races throughout India. The Marquess of Lansdowne (1888-93) succeeded Lord Dufferin. In 1891 trouble occurred in the small State of Manipur, which led to a temporary military repulse and to the murder of British officers. Minor military operations were undertaken on the frontier, and a British control was extended over the petty principalities of Hunza and Nagar, feudatories of Kashmir. In view of the advance of Russia and France, various measures were taken to increase the strength and efficiency of the army in India. In domestic policy Lord Lansdowne's administration was responsible for a change in the currency law by which the Mints were closed to

free coinage of silver, and the rupee currency cut away from its silver basis to be eventually, it was hoped, attached to a gold standard. The reconstitution of the Legislative Councils introduced a more popular element into the government of India, while the opening of the public service more widely to the natives of India gave them a larger share in the work of administration. With the year 1894 began the present vicereignty of the *Earl of Elgin and Kincardine*, which has been full of events, particularly in 1897: frontier wars, famine, earthquakes, plague, seditious agitations, boundary settlements, financial embarrassments, and peaceful reforms. In 1895 a rising in Chitral and the danger to a beleaguered British garrison made necessary a formidable military expedition which was conducted with rapidity, precision, gallantry and success. At its conclusion it was at first decided by the Liberal Government to abandon Chitral, but on the change of Ministry, the decision was reversed. The British hold over Chitral was strengthened, the direct road from Peshawar by the Lowari pass was opened, garrisons were posted on the Malakand pass and at Chakdara, and arrangements were made with the intervening tribes for keeping the road open, protecting the postal runners, and assisting the yearly relief of the Chitral garrison. The influence of the British officers was also used to keep the peace of the valley. For two years the arrangements worked peaceably. In 1897, however, almost simultaneously along the whole border the tribes rose against the British garrisons. Religious fanaticism, excited by the preaching of the Mullahs or priests, was the immediate cause of the rising, which may also have been a kind of protest against recent British movements in tribal territory. The first outbreak was a treacherous attack of the Waziris in the Tochi Valley, then the onslaught of the Buner and Swat tribes on the Malakand position; the Mohmands north of Peshawar followed suit by a raid on Shabkadr; then the Afridis assaulted and captured the posts held by Afridi levies in the Khaiber pass, and their neighbours, the Urakzais, attacked the garrisons on the Samana range. Troubles perhaps having no connection with the others also threatened at Quetta, but these did not come to a head. A series of military expeditions had to be rapidly organised. More than 60,000 troops were moved against the tribes; their territories were invaded; their opposition was broken after some severe fighting, and fines in money and arms inflicted upon them. The final settlement of these frontier difficulties had not been reached on going to press, nor was it then known how much the expeditions will have cost Government. Lord Elgin's Government has been responsible for the following measures of frontier extension and frontier demarcation. The F Amir boundary was delimited with Russia. The demarcation of the frontier between Baluchistan and Persia was completed. Almost the whole of the border of Afghanistan on the side of Baluchistan and of India was delimited. The Mekong was accepted as the line of division of British and French territory north of Siam. The Burma-China boundary was defined in a Convention of 1894 and further modified by an agreement in 1897. A determination of the limits of the British protectorate on the Somali coast may also be expected to result from the recent agreement with King Menelek. In 1897 Lord Elgin had to face, in addition to troubles on the frontier, the internal calamities of famine, earthquake, and plague. The rains of 1896 failed

after the middle of August over a large area in India. Grain riots occurred at the end of September; and before the end of the year it was anticipated that over an area of 164,000 square miles with a population of 37 millions there would be famine, and that 4½ millions more in an area of 122,000 square miles would be severely straitened by scarcity. The anticipation was more than realised. Before the end of October, 1896, 50,000 persons were receiving state relief: the numbers rapidly increased till they reached nearly 3¼ millions in the beginning of March. The winter harvest brought a temporary reduction of numbers, but by the middle of April the totals began again to grow larger week by week till the middle of June, when about 4½ millions were being relieved. The relief works at this stage were in operation over an area of over 570,000 square miles containing a population of nearly 130 millions. Fortunately in almost all the distressed area the rains of 1897 were favourable, and by the middle of October the numbers on relief had fallen below one million. The distress may be expected to continue into 1898 in parts of the Bombay Deccan, Madras, the Central Provinces, and Burma. The expenditure of the Government of India in the relief of the sufferers in this, the most widespread famine on record, amounted probably to Rs. 10,000,000; in addition, the funds raised by charity have amounted to about Rs. 2,000,000. The Mansion House Fund was the largest ever subscribed, viz., £550,000. In addition Lancashire sent £180,000; and Glasgow and other towns as well as British colonies and foreign countries sent large and independent contributions. Considerable sums were also raised in India itself. The enfeeblement of the population by scarcity has no doubt led to abnormal mortality, but there has been no such terrible loss of life as occurred in the famine times in Southern India in 1876-78. On June 12, 1897, Assam and part of Bengal were visited by the most severe and disastrous earthquake of which there has been any record in India. In Assam alone the recorded deaths exceeded 1,500. Government buildings and roads were injured to the value of 35 lakhs; and private property received enormous damage; among the buildings seriously damaged in Calcutta was the English Cathedral. In September, 1896, came the first reports of bubonic plague in Bombay; in December it was also epidemic in Karachi. Poona, Cutch, Satara, Thana, as well as many other places of the Bombay Presidency, suffered very severely; nor had the epidemic disappeared by the autumn of 1897. The total number of deaths reported up to 8th October, 1897, was 11,000 in Bombay, and about 36,000 in the rest of the Presidency. About 70 per cent. of the cases reported resulted fatally. Stringent measures had to be taken to stamp out the epidemic. The diseased were taken to hospital; the infected were segregated; homes had to be searched for cases which the people were unwilling to report, and in many instances infected property had to be destroyed. Much irritation was caused by these measures, particularly in Poona. The writing of the native press became very virulent, and popular feeling was excited. This came to a head when two British officers, one the chief agents in combating the plague in Poona, were killed on the night of the celebration of the Queen's Diamond Jubilee. Prosecutions were thereupon undertaken by the Government against seditious newspapers. Various editors were tried

and sentenced under a section of the Indian Penal Code, the most important conviction was that of the Hon. Bal Gangadhar Tilak, a member of the Bombay Legislative Council, in which he sat as representative of the Poona Brahmin nobility. Other noticeable events of the present Viceroyalty have been the abolition of the Presidential army system, the imposition of the cotton duties, the elevation of Burma to a Lieutenant-Governorship, the creation of Legislative Councils for Punjab and Burma, an extended programme for the construction of railways, and the celebration of the Queen-Empress's Diamond Jubilee.

In August, 1897, the Government of India were asked their opinion on a proposal made by France and the United States that the Indian mints should be reopened to the free coinage of silver as part of an international arrangement for the establishment of bimetalism. In September the Government of India strongly recommended the rejection of the proposal. It was rejected accordingly. (See Papers presented to Parliament, C. 8,667.)

IMPERIAL LEGISLATION.—The original charter of the East India Company was granted by Queen Elizabeth at the end of the year 1600. *The Regulating Act (1773)*, which created the first Governor-General, created also his Council, and was the first that recognized the East India Company as a ruling body. It was followed, in 1784, by *Pitt's India Bill*, which, while leaving the Government of India nominally to the Court of Directors, in reality transferred it to a *Board of*

Control, whose President represented Indian affairs in the House of Commons; and in 1788 by the *Declaratory Act*, which expressly affirmed this important fact. The Act of 1784 also established the supremacy of the Presidency of Bengal, authorizing the historic phrase "The Governor-General in Council." In 1793 the Company's Charter was renewed for 20 years, and its exclusive privileges were continued. In 1813 an Ecclesiastical Establishment was formed, and the trade to India was thrown open; in 1833 the China monopoly was likewise abandoned; a legal member was at the same time added to the Governor-General's Council, and the North-West Provinces were made a separate Administration. In 1853 the Company's Charter was renewed for the last time. Bengal was put under a Lieutenant-Governor, and the Indian Civil Service was thrown open to competition. *Act 21 & 22 Vict. c. 106*, "An Act for the Better Government of India," received the Royal Assent on the 2nd of August, 1858. By it all the territories heretofore under the Government of the East India Company were transferred to Her Majesty the Queen, who in 1877 (*Act 39 & 40 Vict. c. 10*) formally assumed the title of Empress of India; and all the powers hitherto exercised by the East India Company, or by the Board of Control, were vested in the Secretary of State for India, assisted by a Council. The number of members of this Council who are appointed by the Secretary of State may not fall short of 10 or exceed 15.

The Government of India.

THE expenditure of the revenues of India is subject to the control of the Secretary of State for India in Council, who also conducts Indian business transacted in England. In matters requiring secrecy (*e.g.*, foreign policy) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. In all matters the Secretary of State, as the representative of Her Majesty's Government, can impose his orders on the Government of India. The Crown or the Secretary of State appoints the Viceroy and Governor-General, the Governors of Madras and Bombay, the Commander-in-Chief, the Ordinary Members of the Councils of the Governor-General and of the Governors of Madras and Bombay, and the Judges of the Presidency High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the approval of the Secretary of State. The term of these appointments, except judgeships, is usually for five years. The four Lieutenant-Generals commanding the forces are appointed, two from the British and two from the Indian service, on the recommendation of the Commander-in-Chief at home. Subject to the Secretary of State's control, the Supreme Executive Authority in India is the Governor-General in Council. The Governor-Generals' Executive Council consists of seven members, including the Commander-in-Chief, who is an Extraordinary Member, and the Public Works Member, whose post may be left vacant at the option of the Crown. Governors and Lieut.-Governors also become Extraordinary Members when the Council meets within their Province. All acts of the SUPREME GOVERNMENT IN INDIA run in the name of "The Governor-General in Council"; but the Governor-General himself has the power

of overruling the opinions of the majority of his Council. The Viceroy's Council, when it meets for purposes of Legislation, consists of the above members and of "Additional Members for making Laws and Regulations." There are similar Legislative Councils in Madras, Bombay, Bengal, the North-West Provinces (with Oudh), the Punjab and Burma. The business of the Government of India is divided into the Departments of Finance and Commerce, Home Affairs, Revenue and Agriculture, Military Administration, Legislation, Public Works, and Foreign Affairs. Each Department is under the charge of a Secretary, and is also the special care of a Member of the Supreme Council, who has authority to deal with affairs of routine and minor importance, and to select what is worthy of the consideration of the Governor-General and his collective Council. The Governor-General specially superintends the political business of the Foreign Office. The *Department of Finance and Commerce* looks to questions of Finance, to Stamps, Excise, the Post Office, and anything involving a permanent charge on the State; also to questions bearing on the commerce of the country. The most important subjects coming under the attention of the *Department of Revenue and Agriculture* are the Land Revenue, Forests, and the agricultural development of the country. The *Home Department* deals with the Educational, Medical, Sanitary, Ecclesiastical, and Judicial affairs, Municipalities, Local Government Boards, Police, and other matters, and has charge of the penal settlement of Port Blair. The *Foreign Department* conducts our relations with Afghanistan, Nepal, and other contiguous countries, and through its Political Residents and Agents in the various Native States supervises their administration and directs their relations with the paramount

power. The *Public Works Department* deals with matters connected with railways, telegraphs, roads, canals, buildings, &c. The *Marine Service*, as well as the *Army*, is under the *Military Department*. The *Legal Member* takes charge of Government Bills in the *Legislative Council*.

Separate *High Courts* have been established for the *Presidencies of Madras and Bombay* and for the *Lieutenant-Governorship of Bengal* (with jurisdiction also over *Assam*), and of the *North-West Provinces*. The *Punjab* has a *Chief Court*; the *Central Provinces*, *Oudh*, and *Mysore* have each a *Judicial Commissioner*, and *Burma* has two *Judicial Commissioners* (for *Upper and Lower Burma* respectively) and a *Recorder of Rangoon*.

The division of *India* into *Presidencies* is now misleading. The expression is a relic of the time when the three settlements of *Fort William*, *Fort St. George*, and *Bombay*, each under the management of a *President and Council*, comprised, or were supposed to comprise, the whole of *British India*. *British India* is now really divided into *thirteen Local Governments and Administrations*, viz.:—Under *Governors*, *Madras* and *Bombay*, also termed *Presidencies*; under *Lieu-*

tenant-Governors, *Bengal*, *North-West Provinces* with *Oudh* (of which the *Lieutenant-Governor* is *Chief Commissioner*), the *Punjab*, and *Burma*; under *Chief Commissioners*, *Assam*, *Central Provinces*, *Benar* (of which the *Resident* at *Hyderabad* is *Chief Commissioner*), *Ajmere Merwara* (the *Governor-General's Agent* in *Rajputana* being *Chief Commissioner*), *Coorg* (of which the *Resident* at *Mysore* is *Chief Commissioner*), *British Baluchistan* (of which the *Governor-General's Agent* in *Baluchistan* is *Chief Commissioner*), and the *Andaman Islands*. These several *Local Governments and Administrations* enjoy a large measure of *financial and administrative independence*. The *Governors of Madras and Bombay* have greater independence than the others, being alone permitted to communicate on certain minor matters direct with the *Secretary of State*.

The unit of administration throughout *British India* is the *District*, at the head of which is an executive officer, called *Collector-Magistrate* or *Deputy-Commissioner*, as the case may be. He has entire control, and is responsible to the *Governor of the Province*. There are 245 *Districts* in *British India*.

THE SUPREME GOVERNMENT, CALCUTTA.

[*Indian revenue figures are stated in tens of rupees under the denomination Rx.*]

[*Indian salaries are the substantive salaries (excluding allowances) stated in rupees per mensem.*]

Viceroy and Governor-General (Rs. 20,833 per mensem), His Excellency the Right Honourable the *Earl of Elgin and Kincardine*, P.C., G.M.S.I., G.M.I.E., b. 16 May, 1849, suc. 1863, m. *Lady Constance Mary Carnegie*, C.I. (Appointed January, 1894.)

Private Secretary, *Henry Babington Smith*, C.S.I.

Assistant Private Secretary, *F. W. Latimer*.

Military Secretary, *Colonel Algernon G. A. Durand*, C.E.

Aides-de-Camp, *Capt. R. E. Grimston*, 6th *Beng. Cav.*; *Lieut. S. H. Pollen*, *Wilts Regt.*; *Lieut. F. L. Adam*, *Scots Guards*; *Lieut. Viscount Fincastle*, *1st 16th Lancers*.

Extra Aides-de-Camp, *Lieut. Hon. H. Baring*, 4th *Huss.*; *Lt. R. N. Greathed*, R.A.; *Bt.-Maj. C. P. Campbell*, 2 *Central India Horse*.

Native Aides-de-Camp, *Risaldar-Maj. Bahauddin Khan*, *Sardar Bahadur*, 1 *C. I. H.*, and *Risaldar Wali Muhammad*, *Sardar Bahadur*, *Gov.-Genl.'s Bodyguard*.

Surgeon, *Brig.-Surgeon-Lt.-Col. B. Franklin*, C.I.E., *Indian Medical Staff*.

COUNCIL OF THE GOVERNOR-GENERAL.

Extraordinary Member, *H.E. General Sir. Wm. S. A. Lockhart*, K.C.B., K.C.S.I., *Commander-in-Chief in India* (1897).

Ordinary Members (5), *Sir Jas. Westland*, K.C.S.I.; *Sir J. Woodburn*, K.C.S.I.; *Mackenzie Dalzell Chalmers*; *Maj.-Gen. Sir E. H. H. Collen*, K.C.I.E.; *Arthur Charles Trevor*, C.S.I.

Extraordinary Members, the *Governors of the other Presidencies* when the *Council* shall assemble within their territory.

Additional Members for Making Laws and Regulations:—*Official*, *J. D. Rees*, C.I.E.; *C. C. Stevens*, C.S.I.; *Sir H. T. Prinsep*, *Kt.*; *H. E. M. James*. *Non-Official*, *Sir G. H. P. Evans*, K.C.I.E.; *Nawab Sir Amir-uddin Ahmad Khan*, K.C.I.E., *Rahadur*, *Fakhar-ud-doulah*; *Sir Lakshishwar Singh*, G.C.I.E., *Maharaja Bahadur of Durbhanga*; *Rao Sahib Balwant Rao Bhushkte*; *Sir P. Playfair*, *Kt.*, C.I.E.; *Rahimtula Muhammad Sayani*; *Pandit Bishambhar Nath*; *Joy Gobind Law*; *M. R. Ry. P. Ananda Charlu*, *Rai Bahadur*, C.I.E.

Sec. to Council, and Sec. to Government Legislative Department, *J. M. Macpherson*, C.S.I. Rs. 3,500

SECRETARIES TO THE GOVERNMENT OF INDIA.

HOME.—*John P. Hewett*, C.I.E. Rs. 4,000

Abp. of Madras (Rom. Cath.), The Most Rev. J. Colgan, D.D.
Abp. of Bombay (Rom. Cath.), Most Rev. T. Dalhoff.

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.

(1) **MADRAS** (area,* 141,189 sq. miles; pop.* 35,690,440), was the scene of our struggle with the French, whose principal settlement, Pondicherry, is 90 miles south of the city of Madras. Though the most important of the three Presidencies until Clive's conquest of Bengal, it was small in extent till 1801, when the annexation of the Carnatic raised it to nearly its present dimensions. It is larger than Great Britain and Ireland together,

and has a population equal to that of Italy. With a coast-line of 1,730 miles the province has not one good natural harbour; a large artificial harbour has been completed at Madras at great expense. The province is not naturally fertile, and possesses little mineral wealth. Its trade is served by the Madras railway; and the East Coast railway is being built to connect it with Calcutta. The Governor of Madras is assisted by a Council ordinarily of two members, to whom are added, for legislative business, other members not to exceed 21 (including the Advocate-General *ex officio*), of whom the first seven have been appointed on the recommendations of the

* The areas and populations of the separate provinces are for British territory only, and do not include the Native States subordinate to the provinces in question; the populations are taken from the census returns of 1891.

Madras Corporation (1), of other Municipal Councils (2), of District Boards (2), of the Chamber of Commerce (1), and of the University (1); the rest are selected by the Government.

CHIEF CITY, Madras. Population, 452,518.

Governor, Sir Arthur Klibank Havelock, G.C.M.G. (18 March, 1896).....Rs. 10,000

Advocate-Gen., V. Bashiyyam Aiyangar, C.I.E. (*acting*).....Rs. 1,800

(2) **BOMBAY**.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1661), and was made over by Charles II. to the East India Company in 1668. The Province (exclusive of Native States, but including Sind, Aden, and Perim) contains 125,144 sq. miles (about equal in size to Germany), with a population of 18,901,123: it is 1,050 miles in length, and has many fine natural harbours, Bombay and Kurrachee being by far the most important. Native States occupy about one-third of the Presidency; Sind, conquered in 1843, a non-regulation province, one-fourth; and Bombay proper the remaining 82,000 square miles. The greater portion of the people (76 per cent.) are Hindus, and 17 per cent. are Mohammedans. The greater part of the territory was obtained by annexations from the Mahratta powers, and by the lapse of the Satara State. Sind was conquered by Sir Charles Napier in 1843. Its administration is in some respects separate from that of the rest of the Presidency. Aden and its dependency, the Somali Coast Protectorate in Africa, belong to the Government of Bombay. Aden was occupied in 1839; the Somali Coast Protectorate in 1885. Area of Aden and Perim 85 square miles; popu-

lation 41,912. Cotton is largely produced for export and for manufacture in the constantly growing cotton mills of Bombay itself. The chief railway systems of Bombay are the Bombay Baroda to the north, and the Great Indian Peninsula eastwards; Karachi is the outlet for the North Western railway, the old Scinde Punjab and Delhi line. The Governor is assisted by a Council similar to that in Madras, already described, except that the first eight of the additional members are appointed on the recommendation of Bombay Corporation (1), of other Municipal Corporations (1), of District Boards (1), of Sardars of the Deccan (1), of Jaghirdars and Zamindars of Sind (1), of Bombay and Karachi Chambers of Commerce (1 each), and of Bombay University (1).

CHIEF CITY, Bombay. Population, 821,764.

John Nugent, C.S.I.; Sir E. C. K. Ollivant, K.C.I.E.....Rs. 5,120
Additional Members for Making Laws and Regulations, The Hons. Basil Lang (*Advocate-General*); A. T. Shuttleworth; J. K. Spence; T. R. McLellan; Mir Allahbakhsh Khan walad Mir Alibakhsh Khan Shahyani Talpur; T. B. Kirkham; Chimanlal Harilal Setalwad; Naoraji Nasarwanji Wadia, C.I.E.; Abdalla Meheralli Dharamsi; Lingapa Jayapa; W. H. Crowe; Rao Bahadur Ranchodlal Chotalal, C.I.E.; J. Monteath, C.S.I.; H. M. Thompson; A. Abercrombie; Phirozshah Merwanji Mehta, C.I.E.; Daji Aboji Khare.

Secretary to Council, S. L. Batchelor.....Rs. 1,250

SECRETARIES TO GOVERNMENT.

Chief Secretary, Revenue, Financial, and Separate Departments, Jas. Monteath, C.S.I.....Rs. 3,750
Educational, General, &c., De C. Atkins...Rs. 2,500
Public Works, H. M. Thompson.....Rs. 2,500

HIGH COURT OF JUDICATURE.

Chief Justice, Sir Chas. Fredk. Farran, Knt. Rs. 5,000
Judges, Hons. Henry James Parsons; Edward Townshend Candy; R. B. Mahadeo Govind Ranade, C.I.E.; Arthur Strachey; Badrudin Tyabji; Edmund McG. H. Fulton each Rs. 3,750
Commissioner in Sind, Henry E. M. James Rs. 3,750
Political Resident at Aden, Brig.-Gen. Charles A. Cuninghame.....Rs. 3,500

(3) **BENGAL** (area 151,543 sq. miles; pop. 71,346,987) was placed under a Lieutenant-Governor in 1854, having previously been part of the charge of the Governor-General. With a population nine millions in excess of that of the United States of America, it is spread over an area 1-23rd of that country. It occupies the Valley of the Ganges eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur, to the west and south-west, are

ill watered and liable to drought. The chief products, besides rice, are opium, indigo, and jute. In the hills bordering the great alluvial plain, coal measures are also being largely worked. The East Indian line is the great railway artery of the Ganges Valley. The Eastern Bengal railway also terminates in Calcutta. The Lieutenant-Governor is assisted by a Council for the purposes of making Laws and Regulations, of not more than 20 members. Of the following list seven members have been appointed on the recommendations of the following bodies:—Calcutta Corporation (1), other Municipal Corporations (2), District Bodies (2), Bengal Chamber of Commerce (1), and Calcutta University (1).

Chief City, CALCUTTA (pop., including suburbs, 978,370).

Lieutenant-Governor (Rs. 8,333). Hon. Sir Alexander Mackenzie, K.C.S.I. (18 Dec. '95).

Private Secretary, Arthur Hy. Gayer Rs. 950
Aide-de-Camp, Lt. F. G. C. Ross Rs. 452

COUNCIL OF THE LIEUT.-GOVERNOR FOR MAKING LAWS AND REGULATIONS.

The Lieut.-Governor (*President*), The Honourable Sir Gregory Ch. Paul, K.C.I.E. (*Adv.-Gen.*); M. Finucane; C. W. Bolton, C.S.I.; W. H. Grimley; J. G. H. Glass, C.I.E.; H. H. Risley, C.I.E.; Rai Durga Gati Banerjee Bahadur, C.I.E.; J. Pratt; Maharaja of Darbhanga, G.C.I.E.; Nawab Syud Ameer Hossein, C.I.E.; Ananda Mohan Bose; Rai Eshan Chandra Mitra Bahadur; Guru Proshad Sen; Maharaja of Ghidaur, K.C.I.E.; Madhu Sudan Das; Arthur H. Wallis; Sahibzada Mahomed Bakhtyar Shah; M. C. Turner; Norendra Nath Sen.

SECRETARIES TO GOVERNMENT.

Chief Secretary, C. W. Bolton, C.S.I. Rs. 3,333
General, Revenue, and Statistical, M. Finucane

Rs. 2,916
Financial and Municipal, Herbert Hope Risley, C.I.E. Rs. 2,916
Public Works, J. G. H. Glass, C.I.E. Rs. 2,500

HIGH COURT OF JUDICATURE.

Chief Justice, Hon. Sir Francis W. Maclean, Kt. Rs. 6,000

Puisne Judges, The Hons. Sir Henry Thoby Prinsep (Rs. 4,166); James O'Kinealy; William Macpherson; Ernest John Trevelyan; Chunder Madhub Ghose; Dr. Gooroo Das Banerjee; Amir Ali, C.I.E.; Charles H. Hill; Robert F. Rampini; Stephen George Sale; L. H. Jenkins each Rs. 3,750

Adv.-Gen., Sir Gregory Charles Paul, K.C.I.E., B.A.

(4) The NORTH-WEST PROVINCES and OUDH (area, 107,503 sq. miles; pop. 46,905,085), with a population as large as that of the German Empire on less than one-half its area, form the upper part of the great plain of the Ganges to the west of Bengal, lying between the Himalayan Mountains and the hilly border of the central plateau. Originally the North-West Provinces formed part of the Bengal Presidency. In 1833 it was intended (Act 3 & 4 Will. IV. cap. 85) to establish a separate Presidency of Agra. The idea was dropped in 1835 (Act 5 & 6 Will. IV. c. 52), when, however, a Lieutenant-Governor was appointed for the separate administration of these provinces. OUDH, equal in size to Holland and Belgium, was annexed in 1856 and placed under a Chief Commissioner, but since 1877 the offices of Lieutenant-Governor of the North-West Provinces and Chief

Commissioner of Oudh have been combined in the same person. In 1887 a Council was established for making Laws and Regulations for the combined Provinces. Of the following list six members have been appointed on the recommendations of the following bodies:—Municipal Corporations (2), District Bodies (2), Chamber of Commerce of Upper India (1), and Allahabad University (1). The maximum number on the Council is 15. The character of the province resembles that of Bengal. The chief staple is wheat, and indigo, cotton, sugar, opium, and oilseeds are sown largely for commerce. Tea is also cultivated in the sub-Himalayan districts. The province is well served with railways, belonging to the East Indian, Oudh and Rohilkhand, and Rohilkhand-Kumaon systems. The *Chief City* of the North-West Provinces is ALLAHABAD (pop. 175,246); that of Oudh is LUCKNOW (pop. 273,028).

Lieut.-Gov., Sir Antony P. MacDonnell, G.C.S.I. (6 Nov. '95) Rs. 8,333

Priv. Sec., H. E. C. Dobbs Rs. 1,050
Aide-de-Camp, Maj. H. L. Pennall Rs. 890
Chief Sec. to Govt., H. F. Evans Rs. 3,000
Sec. to Govt., T. Stoker Rs. 2,250

COUNCIL OF THE LIEUT.-GOVERNOR AND CHIEF COMMISSIONER FOR MAKING LAWS AND REGULATIONS.

The Lieutenant-Governor (*President*). The Hons. Raja Rampal Singh; Babu Sri Ram Rai Bahadur; W. M. Colvin; Lt.-Col. W. E. Cooper, C.I.E.; J. O. Miller; C. W. Odling; J. Hooper; Pandit Bishambar Nath; Seth Raghubar Dayal; Saiyid Mahmud; Kunwar Aditya Narayan Singh; H. F. Evans; J. J. D. La Touche, C.S.I.; J. E. Gill.

HIGH COURT OF JUDICATURE (WITH JURISDICTION IN THE NORTH-WEST PROVINCES ONLY).

Chief Justice, Sir John Edge, Kt., q.c. Rs. 5,000
Puisne Judges, The Hons. George Edward Knox, Harrison F. Blair, Babu Pramoda Charan Banarji, William Robert Burkitt, Robert Smith Aikman each Rs. 3,750
Judicial Commissioner of Oudh, Joseph Deas Rs. 3,500
Add. Judl. Commr., George T. Spankie Rs. 3,333

(5) The PUNJAB (area, 110,667 sq. miles; pop. 20,866,847), with a larger population than Spain and Portugal together, occupies the north-western angle of the great northern plain of India, and receives its name from "Five Rivers" which, descending from the Himalayas, cross the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was administered by a Board of Administration. This Board was then superseded by a Chief Commissioner, who in 1859 was raised to the rank of Lieutenant-Governor. The division of Delhi was at the same time transferred to the Province from the North-West Provinces. In April 1877 the Indian Councils Act was extended by proclamation to the Punjab and a Legislative Council for the Province constituted, to consist of 9 nominated members, 5 being officials and 4 non-officials. Besides the territory under British Administration, which is about as large as the Kingdom of Italy, there is an area of one-third that size belonging to 34 Feudatory Native States, with a population of more than 4½ millions. Thirdly, there are the frontier tribes, split up into numerous clans with divergent interests, whose fighting strength is estimated at 130,000 men. The province is mainly

agricultural, and depends largely on artificial irrigation for its harvests. It possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form its principal exports. The various branches of the North Western system of railways serve the Punjab.

CHIEF CITY, Lahore. Population, 176,854.

Lieut.-Governor, Sir W. Mackworth Young, K.C.S.I.Rs. 8,333
Private Sec. & A.-de-C., B.-Maj. R. G. Egerton.
Chief Sec. to Govt., Herbert Ch. Fanshawe Rs. 2,500
Sec. P. W. Dept., Maj.-Gen. G. F. L. Marshall, C.I.E.
Financial Commissioner, C. M. Rivaz, C.S.I.Rs. 3,500

Settlement Commissioner, Lt.-Col. Jas. A. L. MontgomeryRs. 3,000
Judges of Chief Court, Sir C. A. Roe, Kt.; J. Frizelle; A. W. Stogdon; A. H. S. Reid; *Protul Chunder Chatterji*, Rai Bahadur.
Council for making Laws, &c. (Not yet appointed).

(6) The CENTRAL PROVINCES (area, 86,501 sq. miles; pop. 10,784,294), containing a population equal to that of Holland and Belgium combined on an area 3½ times that of those countries, were formed in 1861, out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. These provinces contain a large population of aboriginal tribes. Much has been done, by constructing railways (belonging to the Indian Midland, Bengal Nagpur, and Great Indian Peninsula systems) and roads, to open up the country, which possesses large coal-fields, as well as excellent iron ores, and is an important producer of rice, wheat, and cotton for export.

CHIEF CITY, Nagpur. Population, 117,910.

Chief Comm., Sir Charles James Lyall, K.C.S.I.Rs. 4,666
Chief Sec. to Chief Com., M. W. Fox StrangwaysRs. 2,000
Judicial Commissioner, J. F. Stevens.Rs. 3,166

(7) The Province of BURMA is bounded by China and by Chinese subordinate tribes, by Siam, by our provinces of Bengal and Assam, and by the sea. The area of Lower Burma is 87,957 square miles; that of Upper Burma, 83,473 square miles. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war of 1885. The province is thinly peopled. The population of Lower Burma was 4,658,627 in 1891; that of Upper Burma 2,946,933. The delta country of Lower Burma is flat, but above Prome it is an upland, hilly country. Rice is the main product of the delta region, and is very largely exported. The principal export besides rice is teak, which comes from the forests of both Upper and Lower Burma, and from the Shan States and Siam. The Upper Province is also rich in minerals, including gold, silver, rubies, jade, iron, lead, tin, coal, and petroleum. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, supply important navigable waterways. The main river is itself navigable beyond the town of Bhamo, 900 miles from its mouth. Manufactured goods are exported by land to the Shan States and to China. There is a large traffic by river and by the Burma railway, which is being extended to Myitkina on the Irrawaddy and to the Kunlon Ferry on the Salween. The inhabitants—of the common Indo-Chinese stock—belong to numerous different

tribes, who are distinguished by a variety of manners, languages, and religions. The most general religion is some form of Buddhism. By a proclamation dated 6th April, 1897, Burma was constituted a province within the scope of the Indian Councils Act. The Chief Commissioner was created a Lieutenant-Governor, and a Local Legislative Council of 9 members (5 official and 4 non-official), to be nominated by the Lieutenant-Governor, was constituted.

CHIEF TOWN OF LOWER BURMA, Rangoon. Pop. 188,324.

CHIEF TOWN OF UPPER BURMA, Mandalay. Pop. 188,815.

Lieut.-Governor, Sir Frederic William Richards Fryer, K.C.S.I.Rs. 6,666
Private Sec., G. B. H. Fell.
A.-de-C., Lt. E. G. Bromhead.

COUNCIL OF THE LIEUT.-GOVERNOR FOR MAKING RULES AND REGULATIONS.

The Lieut.-Governor (*President*); J. E. Bridges; E. S. Symes, C.I.E.; C. G. Bayne; J. Lewis; F. C. Gates; A. Pennycook; J. Macgregor; Maung Gaung, C.S.I.; the Kinwun Mirgyi; Hkun Saing, C.I.E.; the Sawbwa of Hsipaw.
Chief Sec., Edward Spence Symes, C.I.E.Rs. 3,000
Revenue Sec., C. G. BayneRs. 2,000
Financial Commissioner, Donald Mackenzie Smeaton, C.S.I.Rs. 3,000
Judicial Commissioners (Upper Burma), George Douglas Burgess, C.S.I.Rs. 3,000
(Lower Burma) Edwd. HoskingRs. 2,880
Recorder of Rangoon, Wm. Fischer Agnew, Rs. 2,880
 Rangoon by the mail route is 7,663 miles from London; transit 22 to 25 days.

Mandalay is 386 miles from Rangoon by railway; transit 24 hours.

Telegrams to Burma, per word by Eastern or Indo-European Cos., 4s. 2d.; *vid* Turkey, 3s. 10d. Post and parcel rates same as India.

(8) ASSAM (area, 49,004 sq. miles; pop. 5,476,833), ceded by Burma in 1825, was not annexed to Bengal until 1874, when it was made into a separate administration. A range of mountains divides the province into the Surma and Brahmaputra Valleys. The chief City of the Brahmaputra Valley is GAUHATI (pop., in 1891, 10,817), and of the Surma Valley SYLHET (pop., in 1891, 14,027). The revenue is comparatively small. The staple crop is rice. But Cachar, Sylhet, Sibsagar, and Lakhimpur are the most important tea-growing districts in India, producing in 1893-4, 97 million lbs. of tea. The mineral resources, consisting mainly of coal, petroleum, iron, and limestone, have only begun to be utilized. The construction of an important system of railways (the Assam-Bengal line) for the development of Assam is in progress. During 1897 the Lower Lushai Hills were transferred from Bengal to the Assam administration.

SEAT OF GOVERNMENT, Shillong. Pop., 2,185.

Chief Comm. (Rs. 4,166), Hy. J. Stedman Cotton, C.S.I.
Sec. to Ch. Comm. (Rs. 2,000), Paul G. Melitus, C.I.E.

(9) BERAR, also termed the *Hyderabad Assigned Districts* (area, 17,718 sq. miles; pop. 2,897,491), which lies to the north of Hyderabad, was placed in our hands by the Nizam in 1853, in payment of arrears due to the British Government and to meet for the future the cost of the Hyderabad contingent. The laws of British India do not run as such in Berar; they may, however, be in force as regulations which the Governor-General directs shall be followed in those districts. The

Province is fertile, and yields the finest cotton grown in India. It forms part of the charge of the British Resident at Hyderabad. The revenue and expenditure of the Hyderabad Assigned Districts, amounting respectively to Rx. 1,044,825 and Rx. 932,439 in 1895-96, are excluded from the Accounts of the Government of India. The surplus revenues, after defraying the cost of administration and the charges for the Hyderabad contingent, go to the Nizam's Government. The surplus in 1895-96, payable to the Nizam, was Rx. 112,386. The amounts paid over to the Nizam on account of the Berar surplus since the transfer of the province to British administration make up a total of Rx. 3,300,000. *Chief City*, ELLICHPUR (pop., in 1891, 36,240). The administration is under the *Resident at Hyderabad*, T. J. C. Plowden, C.S.I. (Rs. 4,000).

(10) AJMERE-MERWARA (area, 2,711 sq. miles, pop. 542,358), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmere-Merwara and the chief executive and judicial authority.

Agent to the Governor-General in Rajputana and Chief Commissioner of Ajmere-Merwara, Sir Robert J. Crosthwaite, K.C.S.I. (Rs. 4,000).

(11) COORG (area, 1,583 sq. miles, pop. 173,055), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.

Resident at Mysore and Chief Commissioner of Coorg, Lt.-Col. Donald Robertson (Rs. 4,000).

(12) BRITISH BALUCHISTAN was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan as *ex officio* Chief Commissioner. The districts comprised in this administration were partly acquired from Afghanistan by the treaty of Gundamuck, partly by arrangement with the Khan of Kalat. The Governor-General's Agent also supervises and controls, by advice, by arbitration, and if necessary by direct interference, the affairs of the rest of Baluchistan to the Persian frontier. The area and population of the Agency are not known. The population of British Baluchistan is 145,417. *Agent to the Governor-General for Baluchistan and Chief Commissioner of British Baluchistan*, H. S. Barnes, C.S.I. (Rs. 4,750).

(13) THE ANDAMANS (area, 2,508 square miles), a chain of islands in the eastern part of the Bay of Bengal, divided into two groups known as the Great and Little Andamans, are of tertiary formation, covered with a luxuriant vegetation, and inhabited by a tribe of Nigritos. The race is dying out. Since 1858 these islands have been used as a penal settlement by the British Government of India; Port Blair, with its safe and spacious harbour, on South Andaman, constituting the civilised portion. Much valuable timber is obtained from the jungles. Tea, rice, Indian corn, manioc, Otaheite potatoes, and artichokes are successfully cultivated, and experiments in Liberian coffee, cacao, and indigo are being persevered in. Of the entire population (about 15,000) four-fifths comprise the convict element. Convict labour is at present mainly devoted to the construction of cellular jails for future newly-arrived convicts and bad characters.

The Nicobar Islands (635 sq. miles) lie almost due south of the Andamans and to the north-west of Sumatra. They formerly belonged to Denmark, but were first occupied by the British in 1869, since when they have been affiliated to the Chief Commissionership of the Andamans. They consist of twelve inhabited and seven uninhabited islands, of which the most important is the

northernmost (Car Nicobar), containing half the entire population of the group, and supplying more than half the export trade; while the southernmost island (Great Nicobar) contains more than half the entire area, and presents a rich field for colonial enterprise. The principal products are coconuts. The inhabitants, numbering about 7,000, are strong, thickly-built men of the Malay type. Their chief characteristic is laziness. Their race in the central and southern islands is dying out. Attempts at colonisation made by the Danes in 1754 and 1831 failed. *Chief Com. & Superintendent*, Lt.-Col. R. C. Temple, C.I.E. (Rs. 2,600).

Portuguese India.—The city of Nova Goa, capital of the territory of the same name, and indeed of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast, about 265 miles S.S.E. of Bombay. Old Goa, five or six miles inland, is fast falling to decay, and New Goa, or Panjim, at the head of the harbour, a walled and strongly-fortified city, is now the centre of trade and government. The principal imports are piece-goods, ivory, raw silk, sugar, woollens, &c.; the principal exports are hemp, cowries, betelnut, toys, &c. The whole territory of Goa, 60 miles long by 30 miles broad, contains an area of 1,080 square miles, and a population of 561,384 (1891). The other Portuguese possessions in Western India are Damaun (pop. of town, 26,964; pop. of territory, 63,284, area 384 square miles), to the north of Bombay; and Diu, a town and fort on an island off the Guzerat coast (pop. 12,758, area 52 square miles). The revenue of the Portuguese possessions was 849,741 milreis (£188,831) in 1894-95, and the expenditure 959,436 milreis (£213,208). The trade is valued at 127,696 milreis. A military revolt broke out in Sept., 1895, and throughout 1896 the country was disturbed.

Governor-General, Duke of Oporto.

French India.—Pondicherry, the capital of the French possessions in Hindustan, is on the Coromandel Coast, 85 miles S. by W. from Madras. The fortifications were once strong, but in the war with England they were destroyed, and a clause in the Treaty of Paris forbids their being rebuilt or the place being garrisoned by a French force beyond what is required for police purposes. Rice, indigo, tobacco, betelnut, and cotton are cultivated. The chief exports are oilseeds; the imports consist of lace, fancy goods, furniture, and jewellery. There is no harbour to the place, though the roadstead is as good as any along this coast. The area of the French possessions in India is 205 square miles; the population is increasing. In 1891 it numbered 282,923. The chief settlement is Pondicherry, with an area of 115 square miles, and a population of 172,941. The other settlements are Chandernagore, on the banks of the Hooghly, 17 miles north of Calcutta (area 4 square miles, population 24,281); Karikal, in the Cauvery delta (area 53 square miles, population 70,526); Yanaon, in the Godavery delta (area 5 square miles, pop. 5,327); and Mahee, a small town on the opposite coast of India (area 26 square miles, pop. 9,978). Their trade is waning. In 1893 it had fallen to 16,937,000 francs, of which 9,431,000 francs represented their transactions with France. Of the total only 4,616,000 francs were imports into India.

The Budget for the French possessions in India in 1896 was 1,699,416 francs, besides the expenditure by France itself of 321,477 francs. *Governor*, M. Girod.

NATIVE STATES OF INDIA.

The administration of the Native or Feudatory States of India, with few temporary or unimportant exceptions, is not under the direct control of British officials. But it is subject to the control of the Supreme Government, which is exercised in varying degrees. The chiefs have no power of making war and peace, or of sending ambassadors to each other or to external states; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction, and in case of misgovernment the Supreme Government can dethrone the Chief or temporarily suspend him from the exercise of his powers. Some pay tribute, some do not. Generally speaking, the States are governed by their native Princes, Ministers, or Councils, with the help and under the advice of a political officer of the Supreme Government. A common characteristic of all Native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts and Chief Courts of the Provinces have no jurisdiction. The Assigned Districts of Hyderabad (Berar), Mysore (Bangalore), of Kalat (Quetta and Pishin), are still technically foreign, or Native States territory. The Shan States are on the other hand technically part of British India, though they are administered by their local Sawbwas or petty chiefs.

Afghanistan, Nepal, and Bhutan are considered as independent States, though within the British sphere of influence. For these States, however, see pages 470, 471.

Excluding these countries and that of the trans-Salween Shan States, of which the area is not defined, the Native States of India may be said to cover an area of 750,000 square miles, and to contain a population of over 70 millions. The gross revenues of the chiefs come to about Rs. 21,000,000, out of which an annual tribute of nearly Rs. 800,000 is paid to the British Government, and they maintain troops to the aggregate number of 80,000 men in addition to their Imperial Service troops. The States vary greatly in size and importance. Hyderabad, for instance, is as large as the kingdom of Italy, and the Nizam enjoys a gross revenue of Rs. 3,820,000. On the other hand, in Kattywar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of a single village. In the case of such petty estates, it is not correct to speak of native rule; the nominal chief may have some very limited magisterial powers, though this is not always the case, but the administration is regulated and carried on by the British Government in its executive capacity. The amount of control exercised by the British Government over a Native State in its internal affairs depends upon a number of considerations, and varies from State to State. Although the number of Native States, large and small, amounts to as many as 650, only about 200 are of any real importance. Most of these States are of more recent origin than the British power in India. They may be classed under fifteen heads: 1. The Indo-Chinese group of States, and the numerous Hill Tribes of the North-East Frontier. 2. The aboriginal Gond and Kole tribes, under petty princes of aboriginal or Rajput blood, in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 3. The Himalayan Hill States, west of

Nepal (including Cashmere). 4. The numerous Afghan and Baluch tribes of the North-West Frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. 5. Kalat, with the other Baluch Chiefships which are more or less subordinate to Khelat. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. 7. The three Northern Mohammedan States of Khaaripur in Sind, Bahawalpur to the north-east of it, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 8. The ancient sovereignties of Rajputana, lying to the south of the Punjab, and between Sind and the North-West Provinces. 9. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 10. Guzerat, including Kutch and the numerous petty chiefships of Kattywar. 11. The Southern Mahratta States. 12. Baroda. 13. Hyderabad. 14. Mysore. 15. The Malayalim States of Travancore and Cochin, lying together in the far south.

Hyderabad is the premier State in India. The present Nizam was installed in 1834. Cashmere was granted to Gholab Sing by Lord Hardinge, after the First Punjab War. As a frontier State facing the Russian power, Kashmir has a special importance. British influence in it has in late years been strengthened by placing Indian garrisons in its northern province of Gilgit and its feudatory State of Chitral. The present Maharaja came to the throne in 1885, since which date the administration of the State has been much improved under the advice of the British Resident. Of the Sikh States the most important is Patiala. Rajputana measures some 400 miles from north to south, and 530 miles in breadth; it has a population of twelve millions. Of its nineteen principalities, the most important are Jodhpur (Marwar), Oudipur (Meywar), and Jaipur. During 1897 the State of Jhallowar, in consequence of the deposition of its chief and the absence of other heirs to the succession, was broken up, and the larger portion reabsorbed into the parent state of Kotah. The Rajput dynasties are very ancient, and resemble feudal monarchies. A large part of the area of Jodhpur, Bikaner, and Jeyulmere is desert. The Governor-General's Agent's headquarters are at Ajmir; he has under him a staff of twenty officers, distributed among the States to overlook the administration, and give advice when it is needed or asked for. The Central India States, which are one-third less in extent than Rajputana, are split up into nearly four times as many States. The two most important are Gwalior and Indore, which include between them one-half of the whole area. The opium grown in Malwa is a valuable, though diminishing, source of revenue to the Maharaja of Indore and to the Indian Government. Bhopal, one of the principal Mohammedan States in India, has for three generations prospered under female rule. In 1875 the reigning Gaekwar of Baroda was deposed, but the native administration was continued under an adopted heir. In 1881 the province of Mysore, which had been administered by the British Government since 1834, was restored to native rule. The present Maharaja is a minor and the State is under a regency.

The salutes enjoyed by the Native Princes may be taken to indicate their relative importance. Those with eleven guns or more are addressed with the title of His Highness. Some of the chiefs who by their enlightened administration or for other causes have earned the special appro-

bation of Government have had their salutes increased; but such increase is personal and lapses on the death of the particular chief. The following is a list of the Chiefs having salutes of thirteen guns or more, with some particulars as to their States. In each group the States are given in alphabetical order. In addition to the list given

below there are 35 Chiefs having salutes of eleven guns, of whom six have two additional guns in their salutes personal to the present ruler, and there are 26 Chiefs with salutes of nine guns; in one of these cases the present ruler has a personal addition of two guns to his salute.

TABLE OF PRINCIPAL INDIAN CHIEFS, SHOWING SALUTES TO WHICH THEY ARE ENTITLED, AND AREA, POPULATION, AND REVENUE OF THEIR STATES.

SALUTE AND TITLE OF CHIEF.	Area in sq. miles.	Population in 1891.	Revenue actual for last year recorded or approximate.	Date of Succession.
Salutes of 21 Guns.				
Baroda, The Maharaja of (Gaekwar)	8,226	2,415,396	Rx. 1,713,000	27 May, 1875.
Hyderabad, The Nizam of	82,698	11,537,040	3,819,000	26 Feb., 1869.
Mysore, The Maharaja of	27,936	4,843,523	1,832,000	1 Feb., 1895.
Salutes of 19 Guns.				
*Bhopal, The Begum (or Nawab) of	6,784	954,901	400,000	31 Oct., 1868.
*Gwalior, The Maharaja (Sindhia) of	29,047	3,378,774	1,447,000	3 July, 1886.
*Indore, The Maharaja (Holkar) of	8,400	1,091,689	730,000	12 July, 1886.
*Jammu and Kashmir, The Maharaja of	80,900	2,543,952	552,000	12 Sept., 1885.
Kalat, The Khan of	106,000	220,500	80,000	15 Aug., 1893.
Kolhapur, The Raja of	2,855	913,131	330,000	17 Mar., 1884.
Meywar (Udaipur), The Maharana of	12,753	1,863,126	375,000	21 Dec., 1884.
Travancore, The Maharaja of	6,730	2,557,736	881,000	19 Aug., 1885.
Salutes of 17 Guns.				
Bahawalpur, The Nawab of	17,285	650,042	160,000	25 Mar., 1866.
Bhartpur, The Maharaja of	1,982	640,303	273,000	15 Feb., 1894.
Bikanir, The Maharaja of	23,173	831,955	289,000	19 Aug., 1887.
Bundi, The Maharaja Raja of	2,220	295,675	72,000	28 Mar., 1889.
Cochin, the Raja of	1,362	722,906	210,000	Sept., 1895.
†Jaipur, The Maharaja of	15,579	2,823,966	666,000	18 Sept., 1880.
Karauli, The Maharaja of	1,242	156,587	48,000	14 Aug., 1886.
Kotah, The Maharaja of	3,784	526,267	248,000	11 June, 1889.
Kutch, The Rao of	6,500	558,415	235,000	1 Jan., 1876.
Marwar (Jodhpur), The Maharaja of	34,963	2,582,178	568,000	11 Oct., 1895.
Patiala, The Maharaja of	5,951	1,583,521	620,000	14 April, 1876.
Rewah, The Maharaja of	13,000	1,503,176	165,000	4 Feb., 1880.
Tonk, The Nawab of	2,552	380,069	162,000	30 Dec., 1867.
Salutes of 15 Guns.				
Alwar, The Maharaja of	3,144	767,786	268,000	5 June, 1892.
Banswara, The Maharawal of	1,946	211,641	24,000	1842.
Datia, The Maharaja of	836	185,728	90,000	10 Dec., 1880.
Dewas, The Senior Raja of	155	77,922	35,000	1861.
Dewas, The Junior Raja of	134	65,723	37,000	23 May, 1892.
†Dhar, The Raja of	1,739	167,504	85,000	May, 1860.
Dholpur, The Maharaj Rana of	1,154	279,890	125,000	9 Feb., 1873.
Dungarpur, The Maharawal of	1,447	165,400	21,000	28 Sept., 1846.
Idar, The Maharaja of	1,900	302,134	63,000	26 Dec., 1868.
Jaisalmir, The Maharawal of	16,062	115,701	14,000	12 April, 1891.
Khairpur, The Mir of	6,109	131,937	73,000	April, 1894.
Kishengarh, The Maharaja of	858	125,516	43,000	25 Dec., 1879.
†Orchha, The Maharaja of	1,933	333,389	90,000	15 Mar., 1874.
Partabgarh, The Maharawal of	886	87,975	43,000	18 Feb., 1890.
Sikkim, The Maharaja of	2,702	30,500	9,000	April, 1874.
Sirohi, The Maharao of	1,964	190,836	38,000	16 Sept., 1875.
Salutes of 13 Guns.				
†Benares, The Raja of (not a Ruling Chief)				
Jaora, The Nawab of	872	112,280	175,000	30 April, 1865.
Kuch Behar, The Maharaja of	1,307	578,054	213,000	Aug., 1863.
Rampur, The Nawab of	945	551,249	317,000	27 Feb., 1889.
†Tipperah, The Raja of	4,086	137,442	50,000	31 July, 1862.

* Within their own territories these chiefs have salutes of 21 guns permanently.
 † The present chief has a salute with two additional guns as a personal salute, or, in the case of Jaipur, of four additional guns.
 ‡ The present chief enjoys the title of Maharaja as a personal distinction.
 § The Maharani Regent of Mysore enjoys also a personal salute of 19 guns.

INDIA IN PARLIAMENT,

AND INDIAN LEGISLATION IN 1896-97.

There was no legislation in Parliament in 1896-97 dealing directly with Indian affairs. The famine and plague were the principal Indian topics of discussion in addition to the usual budget debate. Some discussion also occurred on the subject of the spread of venereal disease among British troops in India, and the new cantonment regulations adopted by the Government of India with a view to checking the disease. The Royal Commission on Indian expenditure concluded its examination of evidence, but had not decided on its report at the time of going to press.

In 1896-97 the outbreak of plague made necessary the passing of the Epidemic Diseases Act, 1897 (III. of 1897), designed to prevent the spread of dangerous epidemic disease. The embarrassments of famine gave the occasion for passing Act XI. of 1897, to enable Local Authorities to borrow money for temporary emergencies. More permanent conditions were dealt with in the other Acts, of which the chief were—XX. of 1896, Sindh Incumbered Estates Act, for the relief of Jaghirdars and Zamindars in Sind; II. of 1897, to amend the Criminal Tribes Act, 1871; the Indian Fisheries Act, No. IV. of 1897, for the protection of fisheries; and VIII. of 1897, the Indian Reformatory Schools Act. The Punjab Land Revenue and Municipal Laws were amended by Acts XVII. and XVIII. of 1896. The Negotiable Instruments Act and the Indian Stamp Act were also amended. The General Clauses Acts of 1863 and 1877 were consolidated and extended by Act X. of 1897. Obsolete enactments were repealed by Act V. Act I. of 1897 amended the law regulating inquiries into the behaviour of public servants, and Act IX. amended the law relating to Government and other provident funds. Act XI. facilitated the introduction of Indian currency into the Bhopal State.

INDIAN APPOINTMENTS.

The civil administration of British India is recruited from four sources—1. Competitive examination in England; 2. The Indian Staff Corps; 3. The patronage of the Secretary of State; 4. The patronage of the local Governments. The next examination of candidates for appointments in the *Covenanted Civil Service* of India will commence in London on 2nd August, 1898, the number of appointments varying with the requirements of the local Governments. Inquiry on the subject at the India Office or the Civil Service Commission. The appointments are distributed between (1) Upper Provinces, &c.; (2) Lower Provinces and Assam; (3) Madras; (4) Bombay; (5) Burma, according to their requirements. The number of appointments to be offered in 1898 will probably be about 65. Successful candidates may express their preference for the provinces in which they wish to serve. But their allotment will depend upon a consideration of all the circumstances, especially the requirements of the public service. The candidates for this examination must be over 21 and under 23 on 1st January preceding. The selected candidates will be on probation in England for one year only, and will receive an allowance of £100 if they pass their probation at one of the Universities or Colleges approved by the Secretary of State for India. Application for admission to the examination must be made on or before the 31st May, on forms

that can be obtained at any time after 1st December preceding, from "The Secretary, Civil Service Commission, London, S.W." Examination fee is £6. Seniority in the service depends on the order of the list resulting from the combined marks of the competitive and final examinations. Within a certain time of the candidate's arrival in India, he must elect to serve in the executive or the judicial branch of the administration, the summit of the profession in one branch being the Lieutenant-Governorship of a Province, in the other a Judgeship of the High Court. The salary of a covenanted civil servant commences at Rs. 4,800 a year. The number of covenanted civilians at present in the Indian Service is about 1,000. The Native Army absorbs the larger proportion of the *Indian Staff Corps*; but out of a total of about 2,500 officers some 380 are attached to the Police or the Public Works Department, or are in Civil or Political departments. Thirty-five appointments in the *Indian Staff Corps* are offered to successful candidates for admission to the Royal Military College, Sandhurst, at each competitive examination, viz. in June and November. Upon receiving his commission a successful candidate is provided with a passage to India, and is attached for a year to a British regiment, and then transferred to a native regiment. Till he has passed certain language and professional tests, which must be passed before the end of the third year from appointment to the Indian Staff Corps, he is practically on probation. Nominations to Indian cadetships and Honorary Indian cadetships, giving special facilities for entrance into the army, with choice of appointment to the Indian Staff Corps, are also given by the Secretary of State for India. Applications should be made to the Military Department of the India Office. Any officers who may from time to time be required to supplement the direct supply from Sandhurst will be drawn from R. A. or Line regiments serving in India, subject to certain conditions. A Lieutenant's Staff Corps pay commences at Rs. 2,700 a year. The *patronage of the Secretary of State for India* is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Ecclesiastical, Judicial, or Educational Departments. *Chaplains*, on appointment, will, for the first three years, be on probation only. Appointments, usually of distinguished graduates of the Universities of the United Kingdom, are made to the *Indian Educational Service* by the Secretary of State. No limits of age are fixed. Appointments are in the first instance usually for five years, the salary beginning at Rs. 500 a month, with annual increments of Rs. 50 a month. The number of appointments varies year by year and is not large. The Local Governments have many appointments in their gift, but no one who is not a native, a covenanted civilian, or an officer of the Staff Corps can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: *Opium, Salt, Customs, Survey, Mint, Public Works Department, Police*. The *Public Works Department* is recruited from the Royal Indian Engineering College at Coopers Hill, from the corps of Royal Engineers, and, in respect of natives, from the Civil Engineering colleges in India. The President of the Coopers Hill College near Staines is Col. J. Pennycook, c.s.i., B.E. About 50 candidates, between the ages of 17 and 21 on the

1st July of the year of admission, are admitted in September each year to the college at Coopers Hill. Applications for admission should be made not later than 15 June. After a three years' course of study, during which the annual charge is £183, the students undergo a competitive examination, and the highest obtain appointments in India (commencing at Rs. 4,200 a year), the number of these being twelve for those who entered the college in 1897, and probably the same number for those entering in 1898. Candidates for the *Telegraph Department* enter the college in the same manner, but their competitive examination is at the end of two years, and the number of appointments offered in 1898 and subsequent years will probably be three annually. The commencing salary is Rs. 3,500 a year. The *Forest Department* of India is recruited from this country; the examination which is held conjointly with that for the Indian Police Department usually takes place towards the end of June. In 1898, six appointments will be offered for competition, the limits of age being 17 and 20 on the 1st of June, 1898. Applications should be made to the Revenue Department of the India Office before 1st May, 1898. In the entrance examination good sight, good hearing, and good powers of physical endurance are insisted on. The course of study extends over about three years, divided into seven terms, to be passed mainly at Coopers Hill, and a period of study under supervision in continental forests. The charge for each of the seven terms spent at the college is £61, and for the period of foreign study is £150. Probationers who acquit themselves creditably during their college course will begin on arrival in India as Assistant Conservators of Forests, on a salary of Rs. 4,200 a year. In June, 1898, an examination, which is the same as that for Forest appointments, is to be held in England for ten appointments to the Indian Police, for Madras four, Bengal three, N.-W. P. and Punjab one, and Bombay two. Candidates must be between 19 and 21 on 1st June, 1898, and applications must be sent before 1st May, 1898, to the Secretary, Judicial and Public Department, India Office, to whom also any inquiries should be addressed. Selected candidates will be allotted as probationers to provinces "upon a consideration of all the circumstances, including their wishes." Initial salary of a probationer is Rs. 3,000 a year. On passing the necessary examinations, which must be done within two years of arrival in India, the probationer will be appointed an Assistant-Superintendent on Rs. 300 a month. Examinations for the *Medical Service* take place generally in February and August. The number of appointments to be offered in February, 1898, has not been yet (Nov. 1897) advertised. In previous years the number of appointments made after each examination has been about 12. The examination will be conducted together with that for admission to the Army Medical Staff. Candidates must be between the ages of 21 and 28 at the date of examination, and must possess a diploma or diplomas entitling them under the Medical Acts to practise both medicine and surgery. No candidate may compete more than three times. Successful candidates are required to attend a course for not less than four months at the Army Medical School at Netley, during which period they receive an allowance of 8s. a day, to cover cost of maintenance. The commencing salary in India is Rs. 3,810 a year; the highest medical appoint-

ment in India carries a salary of Rs. 32,400. The greater part of the medical service is in civil employ, but liable to be recalled to medical duty. Appointments are also made by the India Office to the Royal Indian Marine (limits of age 17 and 22), the Bengal Pilot Service (age 18 to 22), and the Indian Nursing Service.

The *Ecclesiastical Establishment* in India, which forms a Civil, not a Military department, consists of eight Bishops (whose names will be found at page 451), and 160 Chaplains. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when ministering to British regiments. Applications for appointment to the Ecclesiastical Establishment should be made to the Secretary of State. Chaplains are on probation for the first three years after appointment.

Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a partial summary will be found in the India List, published by Messrs. Harrison, 55 Pall Mall, S.W.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31ST MARCH, 1895 AND 1896.

The notation *Rx.* signifies ten Rupees. (A Rupee was approximately equivalent to 1s. 1'000d. in 1894-95; to 1s. 1'638d. in 1895-96; and to 1s. 2'454d. in 1896-97.)

The Currency legislation of June, 1893, was intended eventually to establish a stable rate of 1s. 4d. the rupee, or 15 rupees to the £1. Exchange on 3 Nov., 1895, however, stood at about 1s. 3½d.

Total	Rx.98,370,167	Rx.96,836,169

The cost of the Bombay and Madras armies is charged to those Presidencies; the remaining military expenditure is debited to India.

The following is a Table of Revenue and Expenditure for 1842-43, and for each tenth year since, and for 1895-6, together with the totals of 54 years between 1842-3 and 1895-6, the values being stated in the notation of Rx. (Rx.=Rs. 10). It should be borne in mind that the area of British territory in India has risen since 1842 from 626,000 to 965,000 square miles:—

REVENUE.

	Land.	Opium.	Taxes.	Public Works.	Tribute & other.	Total.

During these 54 years there have been 24 years of surplus and 30 of deficit, the net deficit amounting to 44'76 millions of tens of rupees. During the 15 years previous to the Mutiny there had been 11 years of deficit and 4 years of surplus, the net deficit amounting to 11'42 millions. The Mutiny years 1857 to 1862 added 36'28 millions to the total of deficits. Since 1862, there have been 20 years of surplus and 14 of deficit, yielding a net surplus

of 2'94 millions, to which may be added 5'33 millions charged but not spent (therefore really surplus) under the head of Famine Insurance. Under this head has also been charged expenditure on construction of railways and irrigation works designed to protect the country against famine to the amount of 11'70 millions. The year 1895-97 was originally estimated to give a surplus of Rx. 463'000; but famine intervened, and more than swallowed up a considerable increase that accrued under exchange; the revised estimates gave a deficit of Rx. 1,997,000, which, however, still later figures quoted by Lord George Hamilton on 6 Sept., reduced to Rx. 1,594,000. Famine throws its shadow also over the budget of 1897-98, which works to a deficit of Rx. 2,464,000 with exchange taken at 1s. 2'54d. Exchange may be expected to show a better rate, but will not counterbalance the fresh adverse influence of heavy military expenditure on the frontier. The annual burden of taxation in India is calculated to amount to about Re. 1, 4 annas per head of population, if the land revenue demand which is of the nature of rent be excluded. Including land revenue it would be about Rs. 2, 5 annas.

The INDIAN DEBT stood on the 31st March, 1897, at Rx.109,121,000, plus £114,883,000; adding Rx.18,804,000 for other obligations, the liabilities of the Indian Government are shown at Rx.127,925,000 + £114,883,000. On the side of assets there are Rx.92,981,000 for railways constructed by the State, £59,236,000 for purchased railways, £4,935,000 for advances to Railway Companies, Rx.31,898,000 for Irrigation Works, Rx.12,205,000 lent to Corporations, &c., and cash balances amounting to Rx.13,466,000 and £2,815,000, making altogether totals of Rx.150,551,000 and £66,986,000. The liabilities uncovered by assets stand at £47,897,000 in sterling, diminished by Rx.22,626,000, the amount of net assets in rupees. In 1896-97 a 3 p. c. rupee loan was raised for the first time to the amount of 4 crores. Tenders were accepted at an average premium of over 3 p. c.

The statement of expenditure on the preceding page distributes the charges for interest on debt, partly under Interest, partly under Railway Revenue Account, and partly under Irrigation; viz., charged on ordinary Debt Rx.3,438,076, under Railways Rx.5,796,081, under Irrigation Rx.1,222,409, making a total of Rx.10,456,566, to which may be added Rx.606,723 for interest on obligations other than Debt.

EXCHANGE AND CURRENCY.—The net sterling expenditure of the Indian Government was, in 1896-97, about 1½ millions, or half a million more than the average of the 10 previous years. The less the value of the Indian silver coinage relatively to gold, the greater the number of rupees required to meet this sterling expenditure. With low exchange also a larger number of rupees is required to meet the pay of the European soldier in India, and to compensate officers for the loss they suffer on remittances to England. Ten rupees used approximately to be equivalent to each £1 sterling. Excess expenditure caused by the fall of the rupee below this rate is the "loss by exchange." Previous to 1872-73 the average value of the rupee was about 1s. 11d., its highest value having been slightly above 2s. 2d. in 1860-61, and its lowest almost as low as 1s. 9d. in 1848-49. In 1871-72 the value of the rupee relatively to gold began to fall rapidly; in five years it had sunk from over 1s. 11d. to 1s. 8½d. The next five years it

remained fairly steady at something under 1s. 8d. During the last fifteen years the following are the figures, together with the actual loss thrown on the Indian Exchequer by the depreciation of the rupee below its nominal value of £1 = Rs. 10.

Year.	Average Rate.	Loss by Exchange.
	<i>s. d.</i>	<i>Rx.</i>
1882-83	1 7 525	3,205,000
1883-84	1 7 336	3,359,000
1884-85	1 7 308	3,536,000
1885-86	1 6 254	4,290,000
1886-87	1 5 441	5,632,000
1887-88	1 4 898	6,049,000
1888-89	1 4 379	6,383,000
1889-90	1 4 566	6,735,000
1890-91	1 6 090	5,468,000
1891-92	1 4 733	7,201,000
1892-93	1 2 985	10,287,000
1893-94	1 2 547	11,523,000
1894-95	1 1 101	15,045,000
1895-96	1 1 638	13,991,000
1896-97*	1 2 458	12,138,000

The currency of India is the silver rupee, which contains 165 grains of fine silver and 15 grains alloy. With silver at 60 pence the oz. the value of the rupee would be 18s. Until June, 1893, possessors of silver had the right of getting it coined into rupees at the Indian Mints. At that date the Indian Mints were closed for public coinage of silver. By a provision in the law, allowing the public to purchase rupees at the rate of 15 for £1, i.e. at 1s. 4d. the rupee, Government indicated that this was the rate at which it was expected exchange would permanently settle itself. The expectation has not yet been realised. For some time prices of both silver and Bills showed a tendency to fall. In July, 1894, silver was procurable at 28½ per oz., and Bills at less than 1s. 1d. the rupee. In 1897 the value of silver fluctuated considerably, having fallen at the beginning of September as low as 23¼d. per oz. The rupee exchange stood then at 13¼. Latest prices (Nov. 3, 1897) are silver at 26¼d. per oz., the rupee at 1s. 3¼d. At these rates rupees are valued at 60 per cent. more than the value of the silver of which they consist.

THE OPIUM REVENUE.—The growth of the poppy in *British India* is strictly confined to the districts of Behar and Benares in Bengal, in which 520,000 acres were under poppy cultivation in 1895-6. The opium manufacture has been a Government monopoly for more than a hundred years. The cultivators undertake to deliver the whole of the produce at the contract price, recently raised from Rs. 5 to Rs. 6 for a seer, or 2 lbs., and when the crop is ripe the juice is collected and sent to the Government Agencies at Ghazipur and Patna. Here it is dried to a certain consistency, and packed in chests containing about 140 lbs. each. It is then sent down to Calcutta, disposed of by auction at monthly sales, and exported to China and the Straits Settlements. In the year ending 31st March, 1896, 37,695 chests were thus sold for export, at a rate of Rs. 1,390 per chest. The sales realised Rs. 5,240,000. The cost of production of Government opium in 1895-96 was Rs. 2,065,000, and the net revenue Rs. 3,175,000, to which, however, may be added Rs. 222,000 as

the value of opium issued for the use of the Excise Department in India.

A large quantity of opium is also grown in the Native States of Central India, and pays duty on its entry into the Bombay Presidency. This opium is called Malwa opium, and is also exported for the most part to China. The revenue derived by the Indian Government from this duty, at Rs. 650 per chest, amounted in 1895-96 to Rs. 1,656,000, 25,475 chests having paid duty. The cost of collection is insignificant. In July 1896 the rate of duty was reduced to Rs. 600 per chest. It was further reduced in Oct., 1897, to Rs. 500 a chest.

The opium exported to China pays the Chinese Government a duty of Rs. 350 a chest, which exempts it from any future payment of "likin" or transit duty to which the native-grown drug is liable. In face of the competition of the native-grown drug the imports of Indian opium into China are declining.

SALT.—The duty on salt is Rs. 2.8 annas a maund (82½ lbs.) in the whole of India, excepting Burma, where it is 1 rupee a maund. The total consumption of salt in British India in 1896-97 is stated at 35,300,000 maunds. The net revenue from salt in 1895-96 was Rs. 8,341,000.

RAILWAYS, &c.—Excluding the 59 miles of lines in French and Portuguese territory, the number of miles open for traffic on 31st March, 1897, was 20,390; 11,736 miles on the standard (5 ft. 6 in.) gauge, 8,366 on the metre gauge, and 288 miles on other gauges. In addition to the open lines there were 4,138 miles of line then under construction, or already sanctioned for construction. Sanction was given during the year 1896-7 for the construction of 1,055 additional miles of line. The total amount of capital expended on the open Railways (including steamboat service and ferries) up to 31st December, 1896, was Rs. 253,162,000, of which Rs. 191,187,000 represented the cost of standard gauge lines and Rs. 61,052,000 lines on the metre gauge; the gross earnings per mile averaged Rs. 313 on the standard gauge and Rs. 153 on the metre gauge, the percentage of working expenses on gross earnings being 47 and 51 respectively, and the percentage of net earnings on total capital outlay on open lines 5.17 and 5.27 respectively. The year's net receipts on the Indian railways in 1896 were Rs. 13,168,000, or a return of 5.20 per cent. on the capital sunk (as measured in rupees), against Rs. 14,112,000, or a return of 5.78 per cent. in 1895; the number of passengers increased by 7¼ millions to 161 millions, but the goods traffic declined from 33¼ to 32¼ million tons. Owing mainly to fall in exchange there is yearly a net loss to Government on working the railway system in India calculated for 1895-96 at Rs. 1,620,000, and for 1896-97 at Rs. 2,810,000. With these figures the loss for the whole period since 1858-59 to end of 1896-97 would amount to Rs. 55,574,000. But it should be remembered that the railway account is charged with interest on outlay at the rate of 4 per cent., whereas the Government can now raise money at less than 3 per cent.; and the interest charges include large amounts (in 1896-97 43 lakhs) for sinking funds for the redemption of the capital of certain railways purchased by the State. On Irrigation works the Government have laid out a capital of Rs. 37,475,000, which, apart from the advantages to cultivators and protection against famine, gave a return to the State in 1895-96 of about 4.1 per cent. In the famine years of 1896-97 the return to the State was much greater, and the value to

* Revised estimate (the actual rate was 1 = 45s.).

the cultivators inestimable. About 11 million acres are in ordinary years irrigated by Government works. The net expenditure of the Government of India in 1895-96 on public works, old and new, including special Defence and Famine Relief Works, was Rs. 11,168,000, of which only Rs. 4,087,000 was reckoned as capital not chargeable to revenue. There are 75,000 square miles of Forests reserved and scientifically worked by the State in British India, besides about 56,000 square miles of forests belonging to the State which may hereafter be reserved. The forests yielded in 1895-96 a net revenue of Rs. 749,000. The length of *Telegraph* lines in India on 31st March, 1896, was 46,375 miles. They yielded in 1895-96 a revenue of 5.24 per cent. on their capital cost of Rs. 5,877,000. The number of messages approached 4½ millions. The *Post Office*, which conveyed 413 millions of letters, post-cards, and newspapers, &c., was worked at a net profit to Government of Rs. 70,000.

ARMY.—The actual strength of the *Army of India* on the 1st April, 1896, is shewn in the statement below.

For police duties and frontier service the regular military is supplemented by about 170,000 Native Police, officered mainly by Europeans. In addition, the Native Army Reserves numbered 15,000 men (infantry), and the Imperial Service Troops furnished by Native States contributed 18,000, of whom 8,000 were cavalry, besides transport corps and sappers. Further, there were European and Eurasian volunteers to the number of 29,000, of whom 27,000 were declared efficient. British troops have been re-armed with the magazine rifle, the Native infantry with the Martini-Henry, and the Field artillery with new breech-loading guns. The army is now under a single Commander-in-Chief, and is divided, as is shown in the following statement, into five Lieutenant-Generals' commands :—

The ROYAL INDIAN MARINE consists of four troopships of 1500 to 4000 tons each, three other steamers of about 1000 tons each, and a number of smaller craft for harbour and river navigation. The trooping service between England and India is carried out by hired steamers. In 1896, the largest of the Indian troopships, the *Warren Hastings* (3901 tons) was wrecked on the coast of the Island of Réunion. The principal officers and ships of the R.I.M. are as follows:—

Director of the Royal Indian Marine and Resident Transport Officer, Bombay, Rear-Admiral Sir J. Hext, B.N. (retired), A.D.C., K.C.I.E.

Assist. ditto, Capt. P. J. Falle.

Deputy ditto (Calcutta), Capt. A. Gwyn.

The business of the Indian Troop Service is under the superintendence of the Director of Troopships at the Admiralty.

[The R.I.M. Troopships carry no armament: the figures below denote tonnage and indicated horse-power].

Canning, 2246 (1077), troopship, Bombay. *Comm.*

Clive, 2722 (2304), troopship. *Comm.* G. A. Rose.

Dalhousie, 1524 (2202), troopship, Rangoon.

Comm. E. J. Beaumont.

Lawrence, 4 guns (6 pdr.) 902 (1277), despatch vessel, Persian Gulf. *Comm.* G. S. Hewett.

Mayo, 1125 (2157), Port Blair. *Comm.* T. A. L. de Berry.

Minto, 960 (2028), Aden. *Comm.*

BOMBAY DOCKYARD (7 docks).—*Staff-Officer*, *Comm.* W. Chandler; *Constructor*, R. Watson;

Inspector of Machinery, F. O. Gadsden.

CALCUTTA DOCKYARD (9 docks).—*Staff-Officer*, *Comm.* H. B. Hooper; *Constructor*, T. Avery;

Inspector of Machinery, C. Fuller.

EDUCATION makes steady progress. The number of educational institutions in 1895-96 was 152,841, and the number of male scholars was 3,995,921, and of female scholars 397,188. The proportion of scholars to the population of school-

going age is only 12'05 per cent. Of the institutions, about three-quarters are maintained by the State, or aided by grants; the remainder being private and unaided. There are five Universities in India, founded on the model of the University of London, viz., those of Calcutta, Madras, Bombay, and Allahabad, and the Punjab University. The total expenditure on education in India is constantly increasing, and amounted to Rx. 3,506,000 in 1895-96, of which 26'28 per cent. was provided by provincial revenues and 29'94 per cent. from fees.

The INDIAN MUNICIPALITIES began for the most part in 1834-35 to enjoy the more popular system of representation granted to them by Lord Ripon's measures of Local Self Government. The number existing in India in 1895-96 was 755, with a total population of 15,828,000, and an income, exclusive of loans, of over 3½ millions (Rx.). In almost all districts in British India there are local district boards, partly representative, for the management of local interests. The total income, inclusive of loans, administered in India by local bodies, including municipalities, port trusts, and district boards, was in 1895-96 Rx. 9,356,000.

MAILS for India are made up and despatched from London *via* Brindisi, every Friday evening. Letters reach Bombay in 17, Madras in 19, Calcutta in 20, and Rangoon in 22 to 25 days. The postage rate for letters to any part of India or Burma is 2½d. and for cards 1d.; newspapers, not exceeding 4 oz. 1d.; books, magazines, &c., every 2 oz. ½d.

The PARCEL POST (to Aden and Burma also) is made up every Wednesday morning, the limit is 11 lbs., and the charge—first lb. 1s., and every subsequent lb. 8d.

TELEGRAPHS.—Two lines of telegraphic communication are open. The charges by the Indo-European Company or by the Eastern Company per word are—to India, 4s.; Burma, 4s. 2d. *Via* Turkey the rates are—for India, 3s. 8d., and for Burma, 3s. 10d.

The P. and O. Company convey parcels to India

at the rate of 1s. per lb. (limit 50 lbs.) for any post-town or district in British India; books at the rate of 6d. per lb. There are various regulations and restrictions, which may be learnt from the notice issued from the P. and O. Company's offices, 122 Leadenhall Street, and 25 Cockspur Street.

WEIGHTS, MEASURES, AND MONEY.

Weights.

1 Tola	=	61 $\frac{1}{4}$ dr. avoird.
5 Tolas	=	2 $\frac{1}{2}$ oz. "
16 Chittacks = 1 Seer	=	2 $\frac{1}{2}$ lbs. "
40 Seers..... = 1 Mun (Maund) =	=	82 $\frac{1}{2}$ lbs. "
27 $\frac{1}{2}$ Maunds (nearly 27 $\frac{1}{4}$) Maunds ..	=	1 ton.

Lineal measures vary throughout India; in Bengal 3 $\frac{1}{2}$ Beegahs go to an acre.

A lac (lakh) is 100,000; a crore is 100 lacs.

Exchange of 1s. 4d. = R. 1.

1 Pie	=	1 $\frac{1}{2}$ d.
3 Pie ... = 1 Pice	=	1 d.
12 Pie ... = 1 Anna	=	1 d.
16 Annas = 1 Rupee	=	1s. 4d.
16 Rupees = 1 Gold Mohur =	=	£1 1s. 4d.

A rupee contains 165 grains of pure silver and 15 of alloy.

Frontier Land Trade.—The registration of the trade which crosses the land frontier of British

India is defective, but constant efforts are made to render it more complete and accurate.

The following is a table showing the land trade of India with the neighbouring regions, some of which, such as Kashmir and the Shan States, are not, politically, foreign countries; Zimmé (Chieng-mai) is a province of Siam:—

	1895-96.		1896-97.	
	Imports.	Exports.	Imports.	Exports.
	Rx.	Rx.	Rx.	Rx.

SEA-BORNE TRADE OF INDIA.*

The course of trade with India is shown by the fact that in the last 47 years Indian exports of merchandise have exceeded the imports by 1.038 million Rx., while in the same period the net imports of treasure have amounted to 491 millions.

	1894-95.	1895-96.	1896-97.
	Rx.	Rx.	Rx.
Imports of Private Merchandise	70,167,438	69,316,395	71,954,439

Bills drawn on India for interest on enfaced rupee paper	762,000	831,000	839,000
Excess of surplus Exports over remittances by Government	3,735,000	204,000	-7,159,000

* Aden is not a part of India for purposes of trade statistics. The trade of Aden in 1896-97 was valued at 936 lakhs, of which 736 lakhs were by sea, and 51 lakhs inland. The trade of the Somali coast amounts to about 100 lakhs. Aden is a great emporium for the commerce of the Arabian and African coasts.

By the Tariff Act of 1896 cotton yarn and cotton sewing thread were exempted from duty, and the tax on other cotton goods was reduced to 3 $\frac{1}{2}$ per cent. Most other articles pay a 5 per cent. duty. There are special import duties on arms and ammunition which are taxed mainly for police

purposes. Liquors pay duty, generally at Rs. 6 a gallon L.P.; and salt pays Rs. 1 a maund (82 lbs.) in Burma, and Rs. 2'8 annas in the rest of India. Iron and steel goods, however, pay 1 per cent., and machinery, coal, raw cotton, jute and wool, grain and pulse, oilcake, manures, living animals, unmanufactured tobacco, quinine, gold, precious stones and pearls, and a few other unimportant items are free from duty. Opium grown in the native States pays duty on crossing the land frontier into British Indian territory; and opium not covered by a government pass pays Rs. 24 per seer of 80 tolas.

Failure of the rains, with consequent famine, and plague at the great commercial centres of Bombay and Karachi fully accounted for the great decline in the export trade of India in 1896-97. In the previous year the conditions had been favourable to a revival of trade.

The Indian sea-borne trade was shared by the various maritime provinces as follows, the figures being lacs of rupees for imports and exports of merchandise respectively:—Bengal 30'29 and 45'56; Bombay 26'90 and 33'16; Madras 5'82 and 11'83; Burma 4'55 and 9'38; Sind 4'39 and 3'99.

The total number of vessels which entered and cleared at Indian ports from and to foreign countries declined in 1896-97 from 10,297 ships, with a tonnage of 8,226,600 tons to 9,940 ships aggregating 7,698,585 tons. Of this tonnage 80 per cent. sailed under the British flag. In the coasting trade of India there were in 1896-97 293,794 vessels registered as having entered and cleared, representing a tonnage of 25,464,000 tons. Steamers are gradually replacing the sailing vessels and native craft engaged in the coasting trade.

The value of the coasting trade, imports and exports being added together, amounted to Rx. 74,604,638 in 1895-96, and Rx. 68,200,970 in 1896-97.

The following statement exhibits the principal articles of the foreign trade of India in 1896-97, Government transactions being excluded.

	IMPORTS.		EXPORTS.	
	Lacs Rs.	(excluding re-exports, amounting to 4,03'4 lacs.)	Lacs Rs.	(excluding re-exports, amounting to 4,03'4 lacs.)
Cotton goods and yarn ...	29,75'0		Cotton	12,97'0
Metals (excluding hardware and cutlery) ...	5,46'2		Rice	11,94'8

South America		1,43'7
Zanzibar & E. Africa.....		1,37'5
Turkey in Asia		1,10'0
Aden		1,07'7
Holland		83'9

For the first five months of 1897-98 the foreign trade of India shows the following variations as compared with 1896-97:—

Imports of merchandise, decrease 444 lacs, or 14 per cent.; treasure, increase 229 lacs, or 45 per cent. Exports of merchandise, decrease 471 lacs, or 11 per cent.; treasure, increase 45 lacs, or 16 per cent.

The output of the 154 collieries in India in 1896 was 3,848,000 tons. The 147 cotton mills at work contained 3,844,300 spindles, and the 29 jute mills 216,139 spindles. There were also 6 woollen and 10 paper mills, and 24 breweries. With regard to other industries particulars are not so precise.

The Home Charges amounted in 1895-96 to £15,379,953 (Rx. 27,065,176), thus:—Railway Revenue Account, including Railway Debt, £5,748,000; Interest and Management of Debt, other than that for Railways, £2,656,000; Stores, £783,000, of which £58,000 were Marine, £447,000 Military, and £145,000 for Special Defence Works; Army Effective charges at home amounted to £1,001,000, and non-effective charges to £2,908,000; Civil and Marine non-effective charges aggregated £1,119,000; Furlough payments amounted to £589,000, of which £306,000 were under the head of Military. The cost of the India Office was £187,000. The Home charges for 1896-97 are estimated at £15,561,000, and for 1897-98 at £15,916,000. The Royal Commission, appointed to enquire into Indian expenditure and into the question of the division of certain charges between the Indian and English treasuries, produced no reports in 1897 up to the time of going to press.

Famine Relief and Insurance.—In 1895-96, the grant for famine relief and insurance was fixed at Rx. 1,000,000 a year. Since 1881 to the end

of 1895-6, the total amount appropriated under this head amounted to Rx.17,644,000; of this total actual famine relief had cost only Rx.320,000, Rx. 1,814,000 had been spent in constructing protective irrigation works, and Rx. 6,551,000 in constructing protective railways, while Rx.3,623,000 had been set against charges in the railway revenue account to cover the loss on the working of certain protective railways, and Rx.5,327,000 used for the reduction or avoidance of debt. During this period there had been no serious

wide-spread famine in India. In the year 1896 began the most serious and widespread famine in Indian experience, see page 448. The loss to the Government treasury from famine and plague in the two years 1896-8 was estimated by Lord George Hamilton at 12 crores, besides advances, which may be recovered, of 2 crores. By the beginning of 1898 famine may be expected to have passed away except in certain dry parts of Bombay and Madras and Burma.

LARGE CITIES WITH POPULATIONS EXCEEDING 150,000
(INCLUDING CANTONMENTS).

Note.—The populations of Aden and Andaman Islands are not included in these columns.

470 COUNTRIES CONTIGUOUS TO OR IN RELATION WITH BRITISH INDIA.

FRENCH and Portuguese possessions in India are described on page 455. The Native States in India which enjoy almost complete independence are Nepal and Bhutan, both of which have slight political relations with China, but with no other foreign Power. In Nepal there is a British Resident, but he does not interfere in matters of internal government.

Outside India there remain to be described; (1) within the sphere of influence of India, Baluchistan, Afghanistan and parts of Arabia; (2) the independent States of Persia and Siam; (3) the dependencies of Russia, of China, of France, of Italy, and of Turkey, so far as these come within the purview of the British Government in India.

NEPAL.

Sovereign, His Highness Maharaja Dhiraj, Pirthivi Bir Bikram Shamsher Jang Bahadur, Sah Bahadur Shamsher Jang, b. 8 August, 1875; suc. 17 May, 1881; m. a daughter of the Prime Minister.

Prime Minister, His Excellency Maharaja Sir Bir Shamsher Jang Rana Bahadur, G.C.S.I., appointed 22 November, 1885.

The Kingdom of Nepal lies between British India on the south and Tibet on the north, and occupies the southern ranges of the Himalayas for a distance of about 500 miles, extending about 20 miles beyond the base of the mountains into the plains. It has an area of about 54,000 square miles, a population of about 2,000,000, and for administrative purposes it is divided into four provinces, and these into fifteen districts. Nepal may generally be described as a wild, mountainous country, containing, amongst others, Mount Everest. Between the sterile ranges, however, lie many beautiful valleys, the soil of which is extremely fertile; their elevations are from 2,000 to 6,000 feet above the sea level. The lower hills are covered with jungles of sal, pine, spruce, mimosa, oak, &c., in which wild animals abound. The chief minerals are copper, iron, sulphur, jasper, marble, and rock crystal. Nepal has commercial relations with Tibet and British India, and the value of its exports to the latter in 1896-7 was Rs.14,895,000; the imports amounting to Rs.14,047,000. The revenue, realised chiefly from land rent, and from export and import duties levied at the frontier, amounts to about Rs.15,000,000. The trade routes are numerous, the most important being that connecting Katmandu with Motihari and Segowli, in Bengal. Nepal exports rice and other grains, oilseeds, *ghi*, ponies and cattle, opium, musk, madder, borax, jute, hides and furs, ginger, cardamoms, and yaks' tails. It receives in exchange raw and manufactured cotton and twist, woollen cloth, shawls, rugs, flannel, silk brocade, embroidery, sugar, spices, indigo, tobacco, salt, &c. The manufactures are coarse woollen cloth, iron, copper and brass vessels, and bell-metal. The aborigines are of the Mongolian type, and the religion is Hinduism among the upper, and a form of Buddhism among the lower classes. The country was conquered by the Gurkhas in 1767. The frequent aggressions of these people brought on a war with the British, in 1814, which was concluded by the Treaty of Segowli in 1815, but it is only within the last forty years that our relations with the country have become friendly. The

policy of seclusion is, however, consistently followed by the native rulers. A Resident of the Indian Government resides at the capital, but does not interfere in internal affairs. Representatives of Nepal greet each new Viceroy with messages and presents. Complimentary missions are also sent periodically to China. On occasions when friction arises between Nepal and Tibet, Chinese authorities intervene in the interests of peace. Under arrangements with the State, recruits in large numbers are obtained from the hill tribes of Nepal for the Gurka regiments. The army of Nepal numbers 42,000 men (including 25,000 irregulars), with 1,000 guns. The sovereign is the nominal chief; but the real power rests with the Prime Minister. The chief receives a salute of 21 guns in British India.

Katmandu—British Resident, Col. Henry

*Wylie, G.C.S.I.Rs. 2,250
Transit, 22 to 24 days.*

BHUTAN.

This is another outlying State on the southern slopes of the Himalayas with physical features and productions somewhat similar to those of Nepal. In 1863 the Government of India engaged in war with it in consequence of certain outrages to British subjects and representatives. There is no British agent now residing in the State. The Government of Bhutan is dual in form, with a spiritual chief, the Dherma Raja—who is an incarnation of the founder of the State—and a temporal chief, the Deb Raja, who governs. Bhutan has closer relations with Tibet than with India; its commerce with the latter is insignificant. Such relations as there are between Tibet and India are friendly. There is no knowledge of the area (about 20,000 square miles), population, or revenue of the State.

BALUCHISTAN.

Khan of Kalat, His Highness Mir Mahmud Khan, G.C.I.E., 1893. Salute in British territory 19 guns.

Baluchistan is a term of political geography. Its northern and western boundaries were finally laid down by agreements with Afghanistan and Persia in 1896. It comprises, (1) "British Baluchistan," which includes the Khan of Kalat's assigned districts of Quetta and the Bolan and is a province of British India; (2) the country inhabited by the Marri and Bugti tribes; (3) the Bori and Zhob valleys, which are directly under the British Political Agent; (4) the Native State, including Kalat proper which is under the immediate rule of the Khan, Sarawan and Jhalawan, or the tracts belonging to the two leading Brahui clans and their chiefs, the Chiefship of Las Bela, Kharan, and Makran. The area of division (4) is given at 106,000 square miles, with a population of 220,500. It has a sea-coast 600 miles in length, with harbours at Sunmiani, Kalmat, and Gwadur; its other boundaries march with India, Afghanistan, and Persia. The country is mountainous, the rivers deficient, and cultivation confined to narrow valleys. The summer heat is intense, and in the higher altitudes the winter cold is no less severe. Camels, horses, kine, buffaloes, sheep, and goats form the live-stock of the country; wheat, barley, millet, dates, and fruit are largely grown. Lead, copper, and petroleum are the principal mineral products. The most numerous

tribe is that of the Brahuis, who, as well as the Baluchis, are Sunni Mohammedans. The Khan of Kalat is the head of a rather loose confederacy; and till his treaty with the British Government in 1876, he received a rather spasmodic obedience from his feudal inferiors. The principal feudatories are the Jam of Las Bela and the Khan of Kharan. Mir Khudadad Khan, c.o.s.i., who was Khan of Khelat from 1857 to 1893, was deposed in the latter year in favour of his son, the present Khan, having been guilty of a number of barbarous and cruel acts, culminating in the murder of his prime minister. The influence of the British Political Agent is extensive though undefined, and the State cannot be considered as independent, even in regard to internal administration. It has no relations with other foreign Powers, and British troops occupy the strong fortress of Quetta commanding the Bolan Pass, and have the treaty-right to occupy any other position in the State. *Capital, Kalat.*

Agent to the Governor-General in Baluchistan and Chief Commissioner of British Baluchistan, Hugh S. Barnes.....Rs. 4,000 per mensem.
Telegrams 3s. 7d. or 3s. 3d. a word.

AFGHANISTAN.

Amir, His Highness Abdur Rahman Khan, Ziaul-Millat-wad-Din, c.o.b., c.o.s.i., s. 1880, b. 1845; has four sons, of whom Sardar Habibulla Khan, c.o.m.g., is the eldest, and Sardar Nasrullah Khan, c.o.m.g., the second, and Umar Jan the youngest, but born of a mother of higher rank than his half brothers. Salute in British territory 21 guns.

By agreement with the Amir, Afghanistan has no foreign relations with other Powers except the Government of India. In all other respects Afghanistan is independent, and the rule of the Amir despotic.

The country lies on the north-west frontier of India, between the parallels of 60° 40' and 74° 30' E. longitude, and 30° and 38° 20' N. latitude, bounded on the west and south by Persia and Baluchistan, and north by the Russian provinces and dependencies in Central Asia. The northern boundary from Persia to the Oxus at Khamiab was laid down by an Anglo-Russian Commission in 1886. East of Khamiab to the Lake Victoria (Wood's Lake) the river is the northern frontier. From Lake Victoria the boundary eastward to the Chinese frontier has been determined and demarcated in 1895 by a joint Anglo-Russian commission. Within these limits the area has a breadth from north to south of about 500 miles, and a length from east to west of about 600 miles. The area may be estimated at 270,000 sq. miles. Geographically its three divisions are the Oxus basin, the Kabul (or Indus) basin, and the Helmand basin. Politically the country is divided into five provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan with Wakhan. The country is generally rugged and mountainous, the elevation being, with few exceptions, more than 4,000 feet above the sea; the climate is severe, cold in winter, hot in summer. The population is estimated to number 4 or 5 millions, who are divided into a number of tribes,—Ghilzais, Tajiks, Duranis, Hazarachs, Aimaks, Uzbegs, &c. All are Sunni Mohammedans except the Hazarachs and Kizilbashes, who belong to the Shiite sect, and the Kafirs, who are idolaters. The Amir has by degrees reduced all the tribes to subordination.

In 1896 he also brought into submission the hitherto independent Kafirs, Kafiristan having been assigned to the Afghan sphere of influence under the Durand agreement. In the cultivable parts of the country there are generally two crops in the year, one of wheat, barley, or lentils, the other of rice, millet, &c.; wheat, however, being the staple food. Afghanistan is also rich in fruits of many kinds. The mineral wealth of the country is reputed great, but few mines are worked. The roads are unsuitable for wheeled traffic, there being only one good road in the country—that made by the English from Peshawar to Kabul through the Khaibar pass, the route by which India has so often been invaded. Goods are conveyed by beasts of burden, mostly by camels. In the 11th and 13th centuries the Afghan empires of the Sultans of Ghazni and Ghor, and in the last century that of Ahmed Shah, extended over the Punjab. In 1838 the country was occupied by British troops, but three years later a national revolt broke out at Kabul, which resulted in the destruction of an English army, and the abandonment of the country to its native rulers. A second invasion by the English in 1879 led to the temporary occupation of Kabul and Kandahar, and to the annexation to the Indian Empire of the chief passes between Afghanistan and India. The trade of Afghanistan with India is valued at about Rs. 1,150,000. The Amir's revenue is unknown, and consists largely of payments in kind. It may perhaps be estimated at 10 million rupees. He receives a subsidy of Rs. 1,800,000 a year from the Government of India, and has received from the same source considerable quantities of arms. The Amir has organised a regular army of perhaps 60,000 men; with the help of English engineers he has started factories for the manufacture of guns, rifles, and cartridges. He is also turning his attention to manufactures of articles of commerce, wine, soap, paper, &c.; but his system of monopolies and restrictions on trade is detrimental to commerce. The Amir has an agent with the Government of India, an agent at Peshawar, and a business agent.

CAPITAL, Kabul. Other cities, Khulm, Kandahar, Herat, all famous commercial cities.

Letters require stamps of P. O. Kabul for transmission beyond the Indian frontier. Postage from Peshawar to Kabul, letters and newspapers weighing $\frac{1}{2}$ of a Tola, 6d.

British Agent at Kabul, Maulvi Ghafur Khan.

PERSIA.

Sovereign, Shah Muzaffer-ed-Din Mirza, b. 25 March, 1853; succeeded 1 May, 1896.

Heir-Apparent, (or Veli Ahd) Ali Mirza Itezzad-es-Sultaneh, Governor of Azerbaijan, b. 1872; proclaimed 12 June, 1896.

Minister for Foreign Affairs and Wazir-i-Azam, H. E. Mushir ed Dowleh.

Interior, H. E. Mukhber-ud-Dowleh, k.o.i.e.

War, Mussret ed Dowleh.

Justice and Commerce, Abbas Mirza Mul Kara.

Secretaries, Mirza Hussein Kuli Khan, Mirza Mehdi Khan, and Mirza Abdul Ghuffar Khan.

Consul-General, Harry Seymour Foster, M.P.

Persia, called by the natives Iran, is situated between 25° 10'—39° 50' N. lat. and 44° 15'—53° E. long., extending about 700 miles from north to south, and about 900 miles from east to west, and comprising an area of 630,000 square miles. The Caspian Sea, which bounds it

on the north, is wholly under Russian influence; the Persian Gulf on the south is dominated and policed by the British Government. The northern frontiers of Persia are in contact with Russian provinces; its eastern with Afghanistan and Baluchistan, which are within the British sphere of influence; and its western with Turkey. The population was estimated in 1881 at 7,653,600, possibly increased by 1891 to 9,000,000. The greater part of the country is an elevated tableland, encircled, except on the east, by mountains. The northern mountain ranges rise to 12,000 feet above the sea, and the peak of Demavend to 18,469 feet. The central and eastern portion of the plateau is a vast salt desert. With the exception of the Karun it has scarcely a river that can be termed navigable, though some of the rivers are several hundred miles in length, and possess great volume of water. The Karun from Mohamerah to Ahwas has been thrown open to foreign navigation, and ships of all nations may make use of it. Messrs. Lynch Bros. run a fortnightly steamer to Ahwas. The Upper Karun from Ahwas to Schuster is also navigable, but its navigation is reserved to the Persian flag. Railways are practically non-existent, and the Shah has bound himself not to allow the construction of railways in Persia before the end of the century. Cart-roads are being made between Tehran and Tabriz, Tehran and the Caspian, and between Tehran and Ahwas on the Karun. A carriage-road also exists between Meshed and Ashkhabad in Russian territory. Travelling is mostly done by post-horses and caravans, and transport by pack-animals. The whole country is divided into provinces, of which the chief are Azarbijan, Ghilan, Mazanderan, Astrabad, Ardelan, Kermanshah, Irak-Ajemi, Khorassan, Fars, Luristan, Kerman, and Laristan, which are under Governors-General. The chief products are wheat, barley, and other cereals, cotton, sugar, rice, tobacco, and opium. Its minerals are salt, iron, and coal; copper, lead, antimony, sulphur, &c., also turquoises and some other precious stones are found. The most important manufacture is that of silks, of the richest and most gorgeous kind. The Persians excel in their dyes, also in brocade and embroidery. Arms, carpets, shawls, felts, cotton and woollen fabrics are among the manufactures. The royal treasury is reputed to contain immense wealth in gold and other valuables, but the administration of the state is corrupt, and suffers frequently from a want of means. The commerce of Persia with Russia is chiefly through ports on the Caspian Sea, or by the Trans-Caspian railway, and with British India by way of the Persian Gulf. European goods also reach Persia from the Black Sea, *via* Trebizond and Tabriz. The trade through Afghanistan between Persia and India has been almost ruined by the Amir's fiscal policy, but a new route has been recently opened up from Quetta to Persian Seistan, which avoids Afghan territory and the exactions of the Amir's officials. Of the foreign trade of Persia half passes north through Russia and Turkey, half south by the Persian Gulf. The Persian Gulf trade is mainly with India and the United Kingdom. In 1895 it amounted to between 6 and 6½ millions sterling in value. Some British goods also reach Persia through Turkey. The exports consist of silk, tobacco, wool, carpets, opium, gums, hides, dates, &c. Protection to British trade is secured by the Treaty of 1841. The Imperial Bank of Persia is an English Com-

pany, which has its head office at Tehran and branches in the chief cities. These are, with their populations, Tehran (210,000), Tabriz (180,000), Isfahan (60,000), Meshed (60,000), &c. The regular army numbers about 80,500 (of whom 24,000 with the colours), with 200 field guns; the militia 70,000 men. There are 4,150 miles of telegraph, the greater part managed by the Indo-European telegraph department of the Government of India. The Persians are mostly Mohammedans of the Shiah sect. There are also a considerable number of Armenian Christians. The Government is an absolute despotism; the laws are based on the precepts of the Koran; the dispensation of justice is summary. The present Shah succeeded on the assassination of his father Naser-ud-Din. The total revenue has been calculated at 55,369,516 kranas (= £1,652,820), and the expenditure at 42,233,472 kranas (= £1,260,700) for the year 1888. The kran is a silver coin weighing 71 grains, and has depreciated relatively to gold with the fall in silver. In 1895 the exchange was about 5½ kranas to the £1. 10 kranas = 1 tuman. The weights and measures in use in the country are not uniform.

SIAM.

King, Khoualoukorn, b. 21 Sept., 1853; succeeded 1 Oct., 1868.

Crown Prince, Prince Somdet Chawfa Maha Vajiravudh, b. 1880; *procl.* 17 Jan. 1895.

Chief Minister, H. R. H. Krom Luang Dewawongse.

Legal Adviser, Robert J. Kirkpatrick.

Envoy Extr. and Min. Plen. in London, Marquis de Maha Yotha, 23 Ashburn Place, South Kensington, S.W.

1st Secretary, Marquis Visuddha.

English Secretary, Frederick W. Verney.

Attaché, Baron Yote Yothee.

Interpreter, Edward H. Loftus.

Honorary Consul-General, D. K. Mason.

Consul, James Riches.

The Kingdom of Siam lies between the British

Indian province of Burma and its dependencies on one side, and the territory of French Indo-China on the other. By the Anglo-French agreement of May, 1896, the main central part of Siam, including the basins of the Rivers Menam, Petcha Bouri, and Petriou, was neutralised, the two governments agreeing not to send troops into it or to obtain any exclusive advantages in it. Freedom of action was retained by the two powers in regard to the portions of Siam west and east of the neutralised zone. The western portion includes the Malay States dependent on Siam which are adjacent to the British protected Malay States under the Governor of the Straits Settlements. The eastern portion, including the provinces of Battambang and Angkor, are in close connection with the French protected State of Cambodia and the territories acquired by France by the treaty with Siam of 1893. By this treaty France also acquired a certain right of interference with the Siamese administration west of the Mekong to a distance of 25 kilometres from that river. The King paid a visit to Europe in 1897, and was well received in London, Paris, and other capitals. More amicable relations with the French authorities in Indo-China are expected to result. The area of Siam may be taken at 220,000 square miles, with a population variously estimated between $7\frac{1}{2}$ and 38 millions, but probably numbering about 12 millions, of whom about 4 millions are Siamese, the rest being Chinese, Shans, Laos, Malays, Burmese, and hill tribesmen. The revenue is estimated at £2,000,000. Bangkok is the only much-frequented port; Chantaboon, which was occupied by the French as a guarantee for the fulfilment of the treaty to which Siam assented in 1893, is still in their possession. Siamese trade, which centres at Bangkok, is very largely in the hands of British firms, or of Chinese trading from Singapore and Hongkong. The chief products are rice, teak, sandalwood, rosewood, and fruits and garden products. The chief exports are tin, rice, teak, pepper, salt fish, dried fish, teel-seed, bullocks, skins, sapanwood, carda-

moms, horns, birds' nests, &c. The chief imports are shirtings, linen, glass, cutlery, cotton manufactures, gold leaf, china goods, opium, kerosene, jewellery, liqueurs, silk goods, and hardware. The Government is monarchical; the King appoints the successor. There is a new Legislative Council of State consisting of the ministers, six Royal Princes, and from 10 to 20 members appointed by the King. A number of Europeans, principally English, Belgians, Danes, and Germans are employed in the service of the Siamese State. There is an army of 8,000 men, and a few small gunboats. A telegraph connects Bangkok with Saigon (Cochin-China), and with Burma. An important railway from Bangkok to Korat is under construction. It is open to traffic as far as Ayuthia.

Exchange in 1896 was slightly above 2s. the dollar.

Revenue and expenditure .. each about	£2,000,000
Imports from United Kingdom, 1896	141,536
Exports to United Kingdom, 1896	110,264
Total Imports at Bangkok, 1896	2,104,434
Total Exports at Bangkok, 1896	3,036,291

Over 80 per cent. of this trade is with Singapore, Hong Kong and Bombay; $7\frac{1}{2}$ per cent. of the entire steam tonnage at Bangkok is under the British flag.

Indian land trade with Siam was valued in 1896-97 at Rs 31,00,000.

R U S S I A I N C E N T R A L A S I A.

THE Russian provinces of Central Asia are the Trans-Caspian, with an area of 214,237 square miles, and a population of 301,476; and Turkestan, with an area of 409,414, and a population of 3,341,913. The population of 1897 gave a total for both provinces of 4,175,100. The Trans-Caspian Railway, starting from Uzunada on the Caspian, goes through Merv, crosses the Oxus at Charjui, and passes through Bokhara to Samarcand. The line is under military control, and is about 900 miles in length. An extension to Tashkent and branches to other points are under construction. Englishmen may not travel upon it except by special authority. It has been the means of greatly increasing the Central Asian trade of Russia, and has led to an immense increase of cotton cultivation in Central Asia for export to Russia. Trans-Caspia is in contact with Persia and Afghanistan, while Turkestan stretches into the Pamir region. Its southern boundary was fixed by the Pamir agreement between Russia and England. The Russian forces in Turkestan and Trans-Caspia number about 42,000 men; there are no native corps. The provinces do not pay the charges of occupation and administration.

Governor-General of Turkestan, Baron Vrevsky.

Besides these provinces directly administered by Russian officials, the Russian Empire in Central Asia includes the two vassal States of Bokhara and Khiva.

BOKHARA.

Amir, Syed Abdul Ahad, succeeded Nov. 12, 1885.

Once the most famous State in all Central Asia, but since the capture of Samarkand by the Russians, in May, 1868, a vassal State of Russia. By the treaty of 1873 no foreigner may be admitted into Bokhara without a Russian passport. Steps have been taken to incorporate the Bokhara customs administration with that of the Russian provinces. Bokhara, with Karategin, has an area of 92,300 square miles, and a population of 2,130,000. The Amir retains an ill-trained native army of about 10,000 men. The Uzbeqs, of Turkish extraction, are the dominant race, but the Aryan Tajiks or Sarts are the aboriginal inhabitants of the country. The people are fanatical Mohammedans of the Sunni sect. Slavery has been abolished through the influence of Russia. The country produces corn and fruit, cotton, silk, wine, tobacco, and hemp. Sheep, horses, goats, and camels are numerous; gold, salt, alum, sulphur, and coal are among the

mineral productions. The foreign trade is valued at 32,000,000 roubles, imports slightly exceeding its exports. The Amu-Darya, or Oxus, which forms the southern frontier of the country, is now navigated by Russian steamers. The Russian paper rouble is current. The capital, Bokhara, has 70,000 inhabitants.

Telegrams, per word, 1s. 11d.

Russian Political Resident, Major Ignatieff.

KHIVA.

Khan, Syed Mohamed Rahim Khan, suc. 1865.

A Russian vassal State in Western Turkestan, on the western side of the Lower Amu-Darya, or Oxus, which here flows into Lake Aral. The Russians captured Khiva on May 20th, 1873, abolished slavery, and compelled the Khan to

acknowledge himself a vassal of the Czar. The area is 22,320 square miles, with about 700,000 inhabitants, dominant among whom are the Uzbeqs. The people are Mohammedan of the Sunni sect. The fields and gardens are irrigated by canals, derived from the Oxus; all the surrounding country being a barren wilderness, affording but little pasturage. Wheat, melons and other fruits, cotton, and wool are among the productions. The State has no external relations except with Russia. The Khan's military force is limited by treaty with Russia to 2,000 men, and he pays tribute to Russia to the amount of 150,000 roubles a year, out of a yearly revenue of 500,000 roubles.

CAPITAL, Khiva. Population, 6,000.

CHINA IN CENTRAL ASIA.

YUNNAN, TIBET, CHINESE TURKESTAN.

India is in contact with three provinces of China. On the north-east of Burma is the province of Yunnan (area 107,969 square miles, population 11,721,576). In 1897 an agreement was made between Great Britain and China, supplementing the frontier Convention of March, 1894, which laid down a boundary between Burma with its dependencies and Yunnan, and made arrangements for trade, extradition, &c. The question of access to Yunnan and Szechuen is one of great importance to the commercial nations of Europe. The shortest route is through French territory by the Red River. There are competing routes, viz., through Burma, for which an extension of the Burmese railway system to the Kunlon Ferry on the Salween is now under construction; through Siam and up the Mekong Valley; and through China, either up the Canton or West River, or up the long waterway of the Yang-tze-kiang. French consulates are already being established in advance of French trade in Yunnan. By the agreement of 15 January, 1896, Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in the provinces of Yunnan and Szechuen. The province is reputed to be rich in minerals, and in parts has a large and busy population. Next to Yunnan is *Chinese Tibet*, or Bodyul, as it is named by its inhabitants, which may perhaps be called a province of China, though it is in internal matters practically independent. Tibet forms the northern frontier of India, from Burma to Kashmir; but, separated by the gigantic range of the Himalayas, the intercourse between the two countries

is of the slenderest description. It contains the sources of almost all the great rivers of India and China. It is itself a plateau of extraordinary altitude, seldom lower than 10,000 feet, and protected by the vast mountain ranges of the Kuen-lun in the north and the Himalayas on the south. The capital, Lhasa, is the religious centre of a special form of Buddhism, contains a large population with a great number of Buddhist monasteries, and continues to be out of the reach of European travellers. The country is, no-doubt, very rich in minerals, but these are little worked; cultivation is carried on under extreme climatic difficulties; and the whole country is still shrouded in mystery. Steps are being taken to improve the Indian trade with Tibet, which is valued at about 21 lakhs of rupees. There are as yet no British representatives in Yunnan or Tibet. *Chinese Turkestan*, including Yarkand and Kashgar, was re-occupied by China in 1878, on the suppression of the revolt of Yakub Beg. Little is known of its area and population. Russia has special treaty rights in the north, and a Russian consul is at Kashgar. A representative of the Indian Government (Mr. G. Macartney) also resides at that place, but without the title of consul. Trade between India and Chinese Turkestan has to pass by the lofty pass of the Karakoram (18,500 feet), or by the very difficult routes through Kashmir and Hunza, and by almost as lofty passes across the Hindu Kush. Leh is the centre in Kashmir through which this trade passes. In 1895-96 the value of the Leh trade exceeded 62 lakhs. It is increasing rapidly.

FRENCH POSSESSIONS.

French India. See page 455.

French Indo-China.—These possessions consist of Cochin-China, Tonquin, Annam, and Cambodia. Since the union created in 1867, they have been under a single governor-general, with a lieutenant-governor for Cochin-China, and residents-general for the other three divisions. The first cession of Cochin-China was in 1862; its western provinces were occupied in 1867. Cambodia recognised the French protectorate in 1863; its present status is, however, regulated by a convention of 17 June, 1884; the effective protectorate over Annam dates from 1874, but present relations are determined by a convention of 6 June, 1884. Tonquin may be said to have been

finally conquered when peace had been concluded with China in 1885. The Lao country up to the Mekong was added to the French protectorate as a result of the dispute with Siam in 1893, and the Mekong was finally fixed as a boundary between French and British dominions in 1896. Cochin-China is wholly annexed and directly administered by French officials. Annam is governed by a king, with his court at Hué. Subject to the control of the French Resident, the Annamese kingdom is an absolute despotism, after the Chinese type, and the administration is in the hands of the king's officials. In Cambodia the French Resident presides over the State Council, and French interference in internal administration is greater than

It is in Annam: but government is carried on in the name of the King of Cambodia. In Tonquin there is a native Regent, who is head of the native administration. But he does not rule. The direction of affairs is in the hands of the French Resident and his subordinate officials. The French possessions extend northwards to 23° 20', and march with China as far west as the Mekong, which river forms the western boundary along almost the whole length of the French Colony. The area and population, of which estimates vary greatly as well as revenues, are given below:—

	Area. Square miles. (In 1891.)	Pop. (In 1891.)	Receipts from Local Revenues, 1893.
Cochin-China	23,082	2,034,453	35,000,000francs.
Cambodia ...	38,500	1,500,000*	6,000,000 "
Annam and Laos.....	100,000	5,000,000*	2,000,000 "
Tonquin	34,740	10,000,000*	27,000,000 "
Total	196,422	19,534,453	70,000,000 "

The deltas of Cochin-China and Tonquin are fertile; Annam, connecting them, is a long mountainous tract, with a narrow littoral on one side, and a wild sparsely populated hill tract stretching to the Mekong on the other. Rice, cotton, sugar, seeds, tobacco, spices, and fish, are the principal productions of the alluvial districts. The principal mineral production is coal, which is largely mined at Tourane, on the coast of Annam, and at Hongay and Kebao on the Tonquin coast. Other minerals, including gold, silver, tin, copper, lead, &c., are said to exist in the protectorate. The principal harbours are Haiphong in Tonkin, Tourane and Thuanan (for Hué) in Annam, and Saigon. The Saigon river is navigable to the capital, and small craft can reach Hué by the Hué river. But the chief routes of inland navigation are the Mekong, which, notwithstanding obstructions and rapids, has been navigated up to where it divides British and French territory; but it is not likely to develop into an important commercial route; the Red River, which can be ascended by steamers as far as Laokai on the Chinese frontier; and the Black River. Much has been done towards improving the canal and road communications in the deltas, and two small lines of railway have been built, of which the most important connects Hanoi with Langson. Concessions for the construction of other lines have been given. The export trade of Indo-China was valued in 1896 at 35 million dollars (about £3,600,000) about four-sevenths consisting of rice and two-sevenths of fish. The imports are half the exports. In addition the trade of Annam and Tonkin in 1896 is stated at 32¼ million francs,

* Estimated.

of which 7½ millions were exports. Trade tends to decline, but the share of it obtained by France is somewhat larger than it was owing to heavy protective duties. The colony does not pay its way. Up to the present it has cost the French Budget nearly 60 millions sterling, the charges on the budget for 1897 being 27½ million francs. The total receipts are approximately as shown above. The principal currency is the new French colonial dollar; its exchange value in 1896 was about 2.65 francs the dollar. The French army of occupation numbers about 8,000, in addition to 12,000 native troops.

Other French possessions with which India is in contact are: (1) Jibuti on the Somali coast, and the adjoining protectorate which includes the old headquarters, now almost deserted, of Obok. The coast line of the protectorate extends for 200 miles; the limits inland at a distance of about 25 miles have been recently fixed by an agreement with King Menelek of Ethiopia. This agreement also includes a concession for a railway from Jibuti to Harrar and on to Adis Abeba. The population of the protectorate is perhaps 50,000. The revenue is nil. There is an Anglo-French agreement which determines the boundary of the French and English spheres of influence in the direction of Harrar, which place neither party is at liberty to annex. (2) Réunion, in which there is a large number of Indian coolie immigrants; area, 700 square miles, population, 167,847; and (3) Madagascar, for which see page 563. •

ITALIAN POSSESSIONS.

ITALY possesses the colony of Eritrea on the west coast of the Red Sea, with its capital at Massowah, having an area computed at 4,000 square miles, and a population of 250,000. By the treaty with Ethiopia of 26 Oct., 1896, the

Italian colony was restricted to a coast strip, and the claim to a protectorate over Ethiopia was abandoned. The chief exports of Massowah are skins, ivory, butter, gums, and mules.

ARABIA AND TURKISH DEPENDENCIES.

ADEN is a portion of British India; it is the emporium of the whole trade of Southern Arabia, its imports and exports amounting to 94 million rupees in value. It is also the centre of

a British protectorate over the neighbouring Arab tribes from Perim to Ras Sair, which are independent of Turkish rule and are in subordinate treaty relations with the Government of India. Also

politically dependent on Aden are the Somali Coast Protectorate on the opposite continent of Africa, the Kooria Moorla islands, valuable for their guano, and the protected island of Sokotra, which has an area of 1,000 square miles and a population of 5,000, mostly Bedouins. At Ras Sair begins the territory subject to the Sultan of Muscat (Oman), who is in treaty relations with the Government of India, and has a political agent of that Government at his court. Muscat, with its commercial suburb of Muttra, a town of 60,000 inhabitants, is the centre of trade for this portion of Arabia. In the interior Muscat territory marches with El Hasa and Nejd, which form part of the Turkish Pashalik of Basra. The trade of Muscat, mainly British and British Indian, is valued at 4½ million dollars. Off the south shore of the Persian Gulf is the island of Bahrein, which is under British protection. It is the chief centre of the pearl fisheries of the Gulf. The independent tribes on the coast itself are bound together under treaties with the Indian Government to maintain a maritime trade for the prevention of piracy and the slave trade and for the cessation of hostilities at sea. Their chiefs are in consequence sometimes referred to as the "Trucial" chiefs. The British Political Resident in the Persian Gulf, who resides ordinarily at Bushire, is the recognised arbiter in the quarrels of these tribes, and the peace of the Gulf is maintained by the British flag. In 1896 the peace of the Gulf was not disturbed as in 1895. At El Bidaa begins the Turkish Pashalik of Basra, which extends for 600 miles to Ali Garbi on the Tigris and Kalat-al-Daraj on the Euphrates. The higher basins of these rivers form the Pashalik of Baghdad, which extends to Syria and Kurdistan. Not far from Baghdad itself is the town of Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Sbat-el-Arab and its branches is considerable; much of it is carried by the vessels of the Euphrates and Tigris Steam Navigation Company. The Basra trade alone in 1895 was valued at £2,499,000, of which £1,400,000 were imports. The Pashaliks of Bussorah and Baghdad were incorporated together previously to 1871; then they were separated for four years, again incorporated, and again in 1884 separated. In the Pashalik of Bussorah are now included the dis-

tricts of Amara, Muntaffik, and Hasa, each under a subordinate Mutasarrif. The province extends over Central Arabia, as far as the Nefud and Syrian deserts. Beyond these deserts are the Turkish provinces of Hejaz, in which are included the sacred cities of Mecca and Medinah, with the port of Jeddah, and Yemen with its chief port at Hodeida, and towns at Sanaa, Assir, and Taiz. The Sinai peninsula and the old land of Midian belong to Egypt.

The whole peninsula of Arabia may be considered to have an area of 1,220,000 square miles, and a population of five or six millions, of which perhaps three are in the Turkish province of Yemen. A large portion is desert, but in the interior, which is elevated, are many extensive tracts affording good pasturage. The inhabitants are Bedouins (Bedawi) and Muhammadans, with the exception of a small Jewish population; their wealth consists largely of horses, camels, asses and mules, for which Arabia is famous. Millet is cultivated for home consumption. Dates and coffee are largely exported. The climate is healthy; but the insanitary condition of the holy cities is a source of contamination, and in some years, the spread of cholera or plague among Mohammedan pilgrims. The European Governments are accordingly interested in the improvement of the sanitary condition of the pilgrimage.

Greater Britain in the East.

THE following accounts of the different British Colonies and Possessions have been revised by the Local Governments, to whom the Editor begs to return his warmest thanks. He is also indebted to the "Colonial Office List," which contains information upon every subject connected with the British Colonial Empire.

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 53'—9° 51' N. lat. and 76° 42'—81° 55' E. long. Its area is about 25,365 square miles, or more than three-fourths of that of Ireland. Its greatest length is, from north to south, 266 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, although tropical, it is healthy, except in the low-lying jungle. There are no great extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature

at Colombo being nearly 81° F. The coolest months are December and January; the hottest are April and May.

The population of Ceylon numbers (est. 1896) 3,298,342, the most important element being the Singhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. According to the 1891 census, the population then consisted of Singhalese, 2,041,158; the Tamils, a race of Southern India, 723,853; the Moormen and other races, 216,156; the Burghers or Eurasians, 21,231; and the Europeans, 6,068. There is also a sprinkling of Veddahs, who are perhaps the aboriginal race of

the island; and of Afghans and of Malays. In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of padi and dry grain. Of the exports, coffee still stood first in value in 1887, although the production has decreased enormously of late years; while next to it came tea, the production of which has proportionately increased. Among other products are cinchona, cocoa, cardamoms, vanilla, and cinnamon. The last was in Dutch times a Government monopoly and the most important product of the island. In 1896 the export of coffee was 23,122 cwts., of tea 110,095,193 lbs., of cinchona 1,377,180 lbs., and of cinnamon 3,182,823 lbs.

About one-fifth of the island is under cultivation, and the leading areas in 1895, in acres, were:—

Rice.....	589,077	Cocoanuts.....	862,582
Other grain.....	138,633	Cinchona.....	4,336
Tea.....	322,810	Cinnamon.....	40,475
Coffee.....	22,475		

Among the more important native industries are gold, silver, ivory and tortoise-shell work, pottery, mats, fans, and wood-carving. As regards mineral wealth, Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Manab, off the N.W. of the island, is in some years a valuable source of revenue. The manufacture of salt is a Government monopoly, and yielded in 1895 a revenue of Rs. 1,033,704.

There are about 300 miles of railway open, and in 1895 the post and telegraph offices numbered 364, there being 1,727 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 5 members, and a Legislative Council of 18 members including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island.

For administrative purposes the island is divided into nine provinces, at the head of each of which is a government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

THE MALDIVÉ ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Mohammedans. The islands are poor and unhealthy, and the main exports are dried fish, cowry shells, cocoanut coir, and tortoiseshell.

Colombo, distant 5,300 miles; transit, 20 days. Parcels, first lb. 9d., then per lb. 6d. to 11 lbs.; telegrams per word, by Eastern Co., 4s. 1d.; vid Turkey, 3s. 9d.

STRAITS SETTLEMENTS.

This is the name given to the British possessions on the west coast of the Malay Peninsula, of which the whole southern portion, comprising about 25,000 square miles, is now under the protection, and a large portion under the direct control, of the British Government in Singapore. The importance of this portion of H.M.'s dominions has rapidly increased of late years, and it is now, in point of trade, revenue, and general prosperity, in the front rank among the Crown Colonies.

The name is derived from the Straits of Malacca, on which the Settlements are situated. The settlements forming what is known as the Colony of the Straits Settlements are Singapore; Penang, or Prince of Wales's Island, with Province Wellesley and the Dindings; and Malacca. The Cocos or Keeling Islands, a coral group in the Indian Ocean, on the route from Ceylon to Australia, have since 1886 been a dependency of the Straits Settlements. The colony has an entire area of about 1,472½ square miles. The population in 1891 was 512,342 (Singapore, 184,554; Penang, Prov. Wellesley and Dindings, 235,618; Malacca, 92,170). The great bulk of the population consists of Chinese and Malays.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

The rainfall in 1896 amounted in Singapore to 74.07 inches, and in Penang to 136.27 inches.	
Public revenue in 1896.....	\$4,266,064
Public expenditure in 1896.....	3,957,090
Public Debt.....	nil
Total imports, 1896.....	201,343,700
Total exports, 1896.....	173,720,814
Imports from United Kingdom, 1896.....	21,680,591
Exports to United Kingdom, 1896.....	26,012,414

The trade returns are only approximate, as there are no custom-houses in the colony.

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, sugar, rice, sago, tapioca, spices, dye-stuffs, tea, coffee, tobacco, gums, tin, &c.

The Government consists of a Governor, assisted by an Executive Council of 8 members, and a Legislative Council of 8 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang. The Resident Councillors of Penang and Malacca have seats in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and three puisne judges, and constitutes also a court of appeal from which there is yet another appeal in certain cases, viz. to the Privy Council. There is also in Singapore and Penang a Vice-Admiralty Court; and in each settlement there are ordinary magistrates' courts, together with Courts of Requests.

SINGAPORE is an island situated off the easterly extremity of the Malay peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 226 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government, for all the settlements, is the town of Singapore, situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E., with 162,547 inhabitants in 1891. The harbour, in the extent

of its shipping, is one of the greatest ports in the world, being a point of call for vessels trading between Europe or India and the far East, the North of Australia, and the Netherlands Indies. For its defence several batteries to carry heavy guns have been constructed, at a cost of nearly £100,000, paid by the colony, for which the Imperial Government has furnished guns. The trade returns for 1896 amounted to \$290,431,830, the value of exported tin being \$17,731,289.

The number of ships entering and clearing in 1896, exclusive of native craft, was 9,105, with a tonnage of 7,968,510. The total for the whole colony was 17,482, with a tonnage of 12,244,333. The total native craft entered at all three ports during the same year was 16,732 (tonnage, 583,229). The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. There are excellent docks. It is a free port; no duties are levied upon anything except wines; the opium and spirit trades are farmed out to Chinese, and the Chinese element is conspicuous among the trading classes.

PENANG is the northernmost of the Settlements. It includes Pulo Penang or Prince of Wales's Island (on the eastern side of which is Georgetown, the port and capital, population 1891, 84,948), and the strip of mainland opposite, known as Province Wellesley (population 1891, 108,117). The DINDINGS, 80 miles to the South of Penang, have also been included in the Settlement for administrative purposes under the Resident Councillor, who also has Consular authority over the Siamese Tributary States on the west coast of the peninsula between Province Wellesley and British Burma. Penang island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1896 amounted to \$100,964,333; the export of tin from the port being \$13,667,671 in 1896. Population (1891), 235,518.

PROVINCE WELLESLEY is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1800, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices, and tapioca plantations.

The Dindings are at present little developed; but they contain what is considered the best port on the western side of the peninsula, named Lumut, where a District Officer is stationed, and steamers call regularly at Pulo Pangkor. They comprise a group of islands (of which Pulo Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the English, and

retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, 17th March, 1824, being exchanged for the British settlements in Sumatra.

Revenue1875, \$118,000; 1896, \$349,448

THE FEDERATED MALAY STATES

are closely connected with the Straits Settlements; they are the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government administered under the advice of a British Resident-General, who controls the Residents subject to the instructions of the High Commissioner who is also Governor of the Straits Settlements.

The first two States extend from the border of Province Wellesley to that of Negri Sembilan, Pahang is on the East Coast, and Negri Sembilan inland near Malacca. All are governed by their native rulers under the above-mentioned control.

High Commissioner, Lieut.-Col. Sir Charles

Bullen Hugh Mitchell, c.o.m.g.

British Resident-General, Sir Frank Athel-

stone Swettenham, k.c.o.m.g.

Judicial Commissioner, Laurence C. Jack-

son, q.c.

(1) *Pérah* has an area of 10,000 square miles, and in 1891 the population numbered 214,254. The chief industry is tin-mining; but rice, sugar, and coffee have been largely cultivated. Revenue, 1896, \$3,960,871. The chief town is Taiping, in the district of Larut.

The following railways are in operation: from Port Weld to Taiping 8 miles, and from Taiping to Ulu Sapetang 9 miles; from Teluk Anson via Ipoh to Chemor 62 miles, and an extension is under construction to Taiping and Prai, about 100 miles.

British Resident, W. H. Treacher, c.o.m.g. \$9,600

(2) *Selangor*, with an area of 3,500 square miles, and a population of over 150,000, lies immediately south of Pérah, and, like that State, depends largely for its prosperity upon its tin-mining. Liberian coffee, cocoanuts and pepper are being planted with success. The revenue in 1896 was \$3,756,936; and a railway, 22 miles long, from the capital, Kwala Lumpur, to the port of Klang, was opened in July, 1886, and this has since been extended inland to Kwala Kubu, a distance of 38½ miles, with a branch line from Kwala Lumpur to Sungei Beai, 9 miles long. Fresh sections to connect Klang with Kwala Klang, and from Kwala Kubu to Tapali in Perak (65 miles) are under construction. Imports (1896), \$9,131,195, exports, \$12,006,108.

British Resident, J. P. Rodger \$8,400

(3) *Negri Sembilan* is the name of a confederacy of small States in the interior of the peninsula, the affairs of which have been placed under a British Resident residing at Seramban. The confederacy comprises Sri Menanti, Rembau, Johol, Tampin, Sungei Ujong, Jelébu, and other small States, comprising about 3,360 square miles, with a population of 41,617 in 1891. Its revenue in 1896 was \$555,329.

A railway, 23 miles in length, connects Seramban, the administrative centre of the confederacy, with Port Dickson on the Malacca coast. The cultivation of Liberian coffee is attracting considerable attention.

British Resident, E. W. Birch \$6,000

(4) *Pahang* is a large State on the east coast, to which, in 1888, a British Resident was sent at the request of the Sultan. The country is of great extent, exceeding 12,000 square miles, and is already full of tin-mining and gold-mining enterprise. Pop., 1891, 57,542. Rev., 1896, \$160,947.

British Resident, Hugh Clifford \$6,000

HONG KONG,

an island situate off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10'—22° 17' N. lat. and 114° 6'—114° 18' E. long. It is about eleven miles long and from two to five miles wide. The colony comprises, with the opposite peninsula of Kaulung, which is part of the mainland of China, an area of 30½ square miles. The island lies close to the mainland, being separated at one point by a narrow strait (the Li-ü Mun Pass) not more than ¼ of a mile wide. The city of Victoria lies along its northern shore, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some ten square miles. The port is free. It possesses excellent docks, capable of holding the largest vessels, and is fortified.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is over 1,800 feet high. This peak is a favourite place of residence in the hot season, which lasts from March to October. During the winter months, from November to February, the climate is cooler and invigorating. The thermometer ranges from a minimum of 32° in February to a maximum of 93° in August. The average annual rainfall is 85 in., of which not less than 70 in. are received between May and September, when the S.W. monsoon prevails.

Hong Kong was first taken possession of by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842, British Kaulung being subsequently acquired by the Peking Convention of 1860. It is a military and naval station for the protection of British commerce, and it is the centre of a vast trade in many kinds of produce—chiefly opium, sugar flour, oil, amber, cotton, ivory, betel, sandal wood, rice, tea, woollens, silks, salt, &c.

It is calculated that, exclusive of the traffic which merely passes through the harbour without breaking bulk, the actual trade of the colony amounts to over £20,000,000 sterling per annum. In the year 1896 shipping to the extent of 8,250,853 tons entered the port.

The population of the colony in 1896 numbers 239,419, of whom 226,710 were Chinese. The white residents, including the garrison, numbered about 12,709.

Much encouragement is given by the Government to education in the colony, and the Chinese are fully alive to the advantages arising therefrom. In 1897 there were 111 schools subject to Government supervision, attended by 7,302 pupils. There were also many private schools, attended by about 2,720 pupils.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members including himself.

BORNEO, LABUAN, SARAWAK.

By an arrangement with Her Majesty's Government, which came into force 1st January, 1890, the administration of the Colony of Labuan was transferred from the Colonial Office to the British North Borneo Company, whose territories, together with Sarawak and the Native State of Brunei, have been placed under a British Protectorate.

BRITISH NORTH BORNEO.

British North Borneo includes the northern part of that island, from the Sipitong River on the west to 4° 10' on the east coast, together with all the islands within three leagues. Its area is about 30,000 square miles, and the population is estimated at 150,000. The inhabitants are Mohammedan Malays with an infusion of Chinese and Arab blood on the coast, and various aboriginal tribes resembling Dyaks in the interior. The country was ceded to a company by the Sultans of Brunei and Sulu in 1877-8, and was subsequently transferred to the British North Borneo Company, to whom a royal charter was granted 1st November, 1881. The territory ceded has a coast-line of some 987 miles, with many excellent harbours. The soil is rich, producing rice, sago, sugar-cane, coffee, cocoa, gambier, pepper, tea, tobacco (total product, 1896, 10,448 bales, \$1,372,277), hemp, cinchona, and other tropical products. The country also produces gutta-percha, india-rubber, beeswax, edible birds' nests, camphor, gum, and timber. About 700,000 acres of land have at present been taken up by agricultural companies on cultivation leases. Gold, copper, coal, and other minerals have been found. The company does not itself engage in trade. The revenue is derived from opium and other farms, sales of land, royalties on exports, and duties. The principal places are Sandakan, the headquarters of the administration, Gaya on the west coast, Kudat in the north, Silam on the east, and Mempakol in Brunei Bay.

The government is administered by a Governor, assisted by a Council and by Residents of

districts. The mode of government adopted is similar to that of a British colony, with modifications to meet native customs and local circumstances. A metre gauge railway (52 miles) is being constructed from the north coast to the interior.

CAPITAL, Sandakan; population of Sandakan Bay, 6,319.

Public revenue, 1896	\$411,699
Public expenditure, 1896	496,015
Total imports, 1896, \$1,832,188. Exports, \$2,473,753

Principal Medical Officer, J. H. Walker, M.D.	4,278

Office of the British North Borneo Company, 15 Leadhall Street, E.C. Sec. H. G. Forbes.

Sandakan is distant 9,500 miles. Transit, average 35 days. Parcels, first lb. 11d., additional per lb. 8d. to 11 lbs.; telegrams, 5s. and 5s. 3d. per word.

LABUAN

is an island of the Malay Archipelago, situated about six miles off the north-west coast of Borneo, in 5° 16' N. lat. and 115° 15' E. long. Its area is about 31 square miles; and its population is 5,853. It was ceded to Great Britain by the Sultan of Borneo in 1846, being at that time uninhabited. A British settlement was established in 1848, the first Governor being the late Sir James Brooke. The island has a fine harbour, and possesses extensive coal-measures, which are now being developed by the new Central Borneo Company, Limited. In 1896, about 46,449 tons of coal were produced.

The trade of Labuan consists in the exchange of cloth, rice, crockery, ironware, &c., for the produce of Borneo and the neighbouring islands (gutta-percha, india-rubber, birds nests, canes, bêche-de-mer, wax, sago, &c.). There are three manufactories in the island where the raw sago imported from the coast of Borneo is converted into flour, and then exported to Singapore. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage.

The government is administered by a Governor, who is also Governor of the British North Borneo Company's territory.

CHIEF CITY, Victoria. Population, 1,500.	
Public revenue, 1896, \$55,008; Expenditure, \$53,888

SARAWAK.

Raja, H.H. Sir Charles Johnson Brooke, G.O.M.G., born 3 June, 1829; *suc.* his uncle, the Raja Sir James Brooke, 11 June, 1868; m. 1869, Margaret Alice Lily de Windt, of Highworth, Wilts.
Heir, Charles Vyner Brooke (Raja Muda), b. 26 Sept. 1874.

Resident, 1st Div., Hon. C. A. Bampfykde ...	\$6,000
Resident, 3rd Division, Hon. H. F. Deshon ...	5,400
Treasurer, Hon. Charles S. Pearce	5,400
Postmaster-General, (vacant)	3,000
Sup. of Surveys, &c., H. D. Ellis	£500
Principal Medical Officer, A. J. G. Barker	\$4,200

The Sarawak territory lies on the north-west coast of Borneo, with a seaboard of 400 miles, an area of about 50,000 square miles, and a population of about 300,000, composed of various races. The government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained, the transfer being approved by H. M. Government, August, 1891. The country produces sago, gutta-percha, india-rubber, beeswax, birds' nests, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper.

Revenue, 1896, \$493,760; Expenditure... \$444,200
Imports, 1896, \$2,274,159; Exports \$2,425,565

CHIEF TOWN, Kuching. Distance from London 8,700 miles; transit 30 to 35 days. Parcels, per lb. 9d. (limit 11 lbs.); telegrams, 5s. and 5s. 3d. per word.

BORNEO.

Sultan, His Highness Hasim Jalil Alam Akmalidin, *suc.* May, 1885.

Next to Australia and New Guinea, this is supposed to be the largest island in the world. It was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S., and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area

of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,845,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, and Bugis (the aboriginal Celebes). Rather more than two-thirds of the island is included within the Dutch possessions in the East Indies, the remainder belonging to the Sultan of Brunei, the Raja of Sarawak, and the British North Borneo Company, over all of which a British Protectorate has been established. The British Colony of Labuan, which formerly belonged to Borneo, is situate in close proximity to the N.W. coast. The mineral kingdom includes gold, silver, diamonds, antimony, quicksilver, iron, tin, and coal, the latter abundant. The principal imports are opium, tea, cottons, cloths, hardware, brass, iron, &c.; exports, sago, beeswax, edible birds-nests, camphor, hides, rattans, tortoiseshell, trepang, cinnabar, antimony, coal, diamonds, and gold.

CAPITAL, Brunei. Population, about 15,000.
Imports from United Kingdom, 1896..... £6,922
Exports to United Kingdom, 1896..... 332

High Commissioner and Consul-General for the Territories of the B. N. Borneo Company, Brunei, and Sarawak, Sir Chas. Bullen
Hugh Mitchell, G.C.M.G. (Singapore).
Consul at Brunei, Noel Trevenen £800
Sandakan—Consular Agent, W. B. Fryer.

Parcels, 1st lb. 11d., then 8d. per lb. to 11 lbs.; telegrams sent by post from Singapore.

Greater Britain in America.

THE British Possessions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—

(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to is divided into two divisions, equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second division, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. In the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder than in other parts of the country. The soil is generally fertile, and all the products of the temperate zone are cultivated.

THE DOMINION OF CANADA.

THE Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the extensive regions long under the quasi-government of the Hudson Bay Company, now styled Manitoba and the North-West Territories; in fact, the whole of British North America except Newfoundland and Labrador. This territory, nearly as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,315,647 square miles, exclusive of the great lakes and rivers. The total population of the Dominion is about 5,250,000, a number which is rapidly increasing, and notwithstanding its diversity of origin, is fast being welded into one harmonious and homogeneous whole. The descendants of the French Colonists reside chiefly in the Province of Quebec, where out of a total population of 1,400,000 above 1,000,000 are Roman Catholics, the majority of whom still very generally use the French language. A Religious Census of Canada was taken in 1891, and the numbers were:—Roman Catholics 1,992,017, Methodists 839,815, Presbyterians 734,193, Church of England 646,059, Baptists 302,565, Congregationalists 28,157, and Lutherans 63,982. Canada possesses an Active Militia numbering 38,000 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000.

Few possessions of Great Britain have made greater strides of late years in wealth, trade, and general advancement than the Dominion of Canada. The population has increased very rapidly: in 1841 it was about 1,538,500; in 1851, 2,380,988; in 1861 it was 3,182,418; in 1871, 3,635,024; in 1881, 4,324,810; and in 1891, 4,833,239. In 1881 there were 35 cities and towns of 5,000 inhabitants and upwards, having a total population of 660,040; in 1891 there were 47 of such cities and towns, and their total population was 1,030,250. The greatest strides during the past twenty years have been made at Winnipeg, in Manitoba, where the population increased from 241 (1871) to 7,985 in 1881, and to 31,649 in 1896. The growth of the city of Vancouver, British Columbia, during the last six years has, however, been even more rapid. In 1885 the city had no existence, while in April, 1891, the census population was 13,685. The general rate of increase throughout the Dominion in the last decade was 11.74 per cent.

Canada was originally discovered by Sebastian Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, now called the North-West Territories, admitted into the Dominion. British Columbia followed in 1871, and Prince Edward Island in 1873, Newfoundland alone remaining a separate colony.

OTTAWA is 3,540 miles from London; letters are nine to eleven days in transit. Mails despatched from London on the evenings of Wednesday, Thursday, and Saturday. Parcel Post rates for parcels not exceeding 1 lb. 8d., for each lb. or fraction of lb. to 11 lbs. (limit), 6d. Telegraph charges from 1s. to 1s. 6d. per word.

POLITICAL CAPITAL and Seat of Government, Ottawa. Pop. (1897), 53,000.

CIVIL ESTABLISHMENT.

Governor-General, Right Hon. the Earl of Aberdeen, G.C.M.G. (appointed 1893 for five years)	£10,000
Secretary, David Erskine	750
Aide-de-Camp, Lieut. Herbert William Wilberforce, 2nd Dragoon Guards	205
" " Lieut. Gerard P. Tharp, Rifle Brigade	205
Commanding the Forces (Halifax), Lieut.-Gen. Alexander G. Montgomery-Moore, 18th Hussars.	1,384
Commanding the Militia, Major-General William Julius Gascoigne	820

The Executive Government and authority is vested in the Queen, and exercised in her name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of an Upper House, styled the Senate, and a House of Commons. The Senate consists at present of 81 members, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 4 for Manitoba, and 2 for the North-West Territories. The members of the Senate are appointed for life by the Crown on the nomination of the Ministry for the time being; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the Queen, and the owner of a property qualification amounting to \$4,000. The House of Commons is chosen every five years at longest, and consists at present of 213 members; 92 being elected for Ontario, 65 for Quebec, 20 for Nova Scotia, 14 for New Brunswick, 7 for Manitoba, 6 for British Columbia, 5 for Prince Edward Island, and 4 for the North-West Territories. The House of Commons is also composed of natural-born or naturalised subjects of the Queen, no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, each of which returns a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also a separate Legislature and Administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered as in England by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of Queen's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure; and trial by jury prevails everywhere throughout the Dominion. The Queen's Privy Council is at present composed of 14 Ministers and two Members without port-folio.

The number of industrial establishments in 1891 was 75,968, with an invested capital of \$354,620,750, employing 370,256 hands (273,424 men, 70,280 women, 19,476 boys, and 7,706 girls under 16 years of age), and producing goods to the value of \$475,238,886. The amount paid in wages amounted to \$100,663,650. \$31,466,324 were invested in land, \$60,303,043 in buildings, \$81,401,247 in machinery and tools, and \$181,450,136 other than fixed.

The principal articles of trade between Canada and the home country in 1893 were as follows:—

Imports from Canada to United Kingdom.	
Animals	£2,022,494
Bacon and Hams	1,021,065
Cheese	2,589,321
Corn: Wheat	1,022,372
Oats	288,128
Pease	394,049
Maize	539,205

HIGH COMMISSIONER FOR CANADA IN LONDON. Rt. Hon. Lord Strathcona and Mount Royal, G.C.M.G.	
Secretary, Joseph G. Colmer, C.M.G.	
Offices, 17 Victoria Street, London S.W.	

ONTARIO AND QUEBEC.

The area of these provinces is 568,928 (Ontario, 222,000, Quebec, 346,928) square miles (including the portions of the great lakes within the boundary), comprising all the basin of the St. Lawrence on the north side of that river and the great lakes, and on the south side N. of the parallel of 45°, and extends from 42° to 55° N. lat. and 57° to 90° W. long. The Province of Ontario, formerly called Upper Canada, and the Province of Quebec, formerly Lower Canada, are separated from each other by the River Ottawa. Quebec also comprises the Isle of Anticosti and the Magdalen Islands, in the Gulf of St. Lawrence. Nearly 80 per cent. of the inhabitants of Quebec are of French descent, preserving their original language, religion, and customs; 95 per cent. of those of Ontario are British.

The timber trade, the original occupation of the people, is still of great commercial value, although fast yielding to those of agriculture, dairy-farming, and cattle-raising. The fisheries are deserving of notice as an extensive branch of industry. The mineral resources of the country are scarcely yet developed. Great part, however, especially the regions north of Lakes Huron and Superior and around Lake of the Woods and Rainy Lake, are valuable for their mineral products, such as iron, zinc, lead, copper, nickel (deposits of nickel ore in the Sudbury district of Ontario, are found over an area of about 3,000 sq. miles, and mining and smelting operations are actively carried on), silver, cobalt, &c., and in the eastern, northern, and western districts of Ontario gold has been discovered in quartz veins over extensive areas; in 1897, a number of mills were completed, and these are now working. Phosphate of lime and asbestos are abundant, and sandstone, limestone, slate, and marbles of nearly every imaginable colour are also found in many parts. Petroleum and salt are produced in large quantities. During the last thirty years agriculture has made vast progress, both in Ontario and Quebec. The land is generally very fertile, and produces all the varieties of cereals, fruits, roots, &c. Cattle-raising and dairy-farming are also very important industries, and at present large exports are principally from these provinces—Montreal, Toronto, and Quebec being the great centres of distribution. These provinces, doing 82 per cent. of all the manufacturing of the Dominion, contain the chief manufacturing centres of Canada, which are becoming very important, employing considerable capital and labour. Montreal and Toronto command a vast overland system of communication, by canal and railway, both with Canada and the Eastern and Western parts of the United States. The educational system in force in these provinces, and in fact throughout the Dominion, provides practically free instruction, and gives successful pupils the chance of acquiring the highest education at a moderate cost.

The returns collected by the Bureau of Industries in Ontario, show that in that province in 1896 the total area of cleared land was 12,671,851 acres, of which 8,511,444 acres were under crop, the total value of the land being \$557,468,270. The total area under pasture was 2,669,744 acres, with 320,121 acres of orchards and gardens. The average production of the principal field crops in Ontario in 1896 was, in bushels per acre: fall wheat, 17.2; spring wheat, 13.8; barley, 27.4; oats, 34.2; rye, 15.0; peas, 21.1; corn, 75.8; buckwheat, 17.9; beans, 17.5; potatoes, 119.0; mangolds, 467.0; carrots, 374.0; turnips, 471.0; hay (tons), 0.93. The total wool clip amounted to 5,581,387 lbs., the average weight of the fleeces being 5.63 lbs. The total quantity of cheese made in 1,164 factories (in 1895) was estimated at 109,230,340 lbs., valued at \$8,607,389. There were 135 creameries in operation, which made 4,600,000 lbs. of butter, valued at \$877,220. The returns of live stock show that there were 624,749 horses, 2,181,958 cattle, 1,819,348 sheep, 1,269,631 pigs, and 7,734,167 poultry in the province in 1896. Fruit growing is here engaged in on a very extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph is the best place of its kind in Canada, and supplies a general education together with a technical training in agriculture. The students meet part

of their expenses by the labour they perform on the Experimental Farm attached to the College, the annual balance of cost for board, washing, and tuition (payable by the students' guardians) being from £10 to £15 for natives of Ontario and from £20 to £30 for students from other parts. A central experimental farm has been established by the Dominion Government at Ottawa, and branch farms in connection with it have been established in the several provinces, and in the North West Territories. Free grants of land are obtainable in this province, and improved farms can also be bought at advantageous rates.

In the Province of Quebec the lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to establish two great national parks (Laurentides National Park, containing about 1,600,000 acres, and the Trembling Mountain Park) to favour the planting of trees along highways and on farms, and to organize an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of 62,000,000 acres, of which 32,000,000 are under licence to cut timber. Improved farms may often be obtained in the Eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purposes of settlement unsold on 30 June, 1896, was 6,931,978 acres. In 1895 there were 1,471 cheese factories and 302 butter factories, forming a total of 1,773.

ONTARIO. Population (Census 1891), 2,114,321. The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 92 members elected for four years (no property qualification being necessary), representing 91 electoral districts into which the province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of eight members, acting as the Ministry of the province; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 181,220); Hamilton, the Birmingham of Canada (48,980); Ottawa, the Federal Capital, with a large lumber trade and woodenware manufactories (44,154); London (31,977), Kingston (19,264), Belleville (9,914), Chatham (9,000), Stratford (9,501), Guelph (10,539), St. Catharine's (9,170), Brantford (12,753), St. Thomas (10,370), Windsor (10,000).

QUEBEC. Population (Census 1891), 1,488,535. The Government of this province is vested in a Lieut.-Governor and an Executive Council, consisting of 24 members appointed for life, and a Legislative Assembly of 74 members elected for five years to represent the same number of electoral districts in the province. The principal cities are Quebec (population, 63,090), the capital of the province, with a large export timber trade and the great seaport town of Canada; and Montreal (population, Census 1891, 216,650), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence rivers. Other important towns are Three Rivers (8,334), Levis (7,301), Hull (11,265), Sherbrooke (10,110), St. Hyacinthe (7,016). Ocean-going steamers ascend the St. Lawrence as far as Montreal. The tonnage of sea-going vessels that arrived at and departed from the ports of Montreal and Quebec in 1892 was 1,440,481 tons and 945,403 tons respectively.

Quebec is 2,634 nautical miles from London.

NOVA SCOTIA, a province of the Dominion, is a peninsula between 43° 30'–46° N. lat. and 61°–56° 15' W. long., and is connected with New Brunswick by a low fertile isthmus about sixteen miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles, one-fifth part of which consists of lakes, rivers, and inlets of the sea; of the whole, about 5,000,000 acres are fit for tillage, that is, nearly half the entire area, and the soil in the western half of the province, particularly in the Annapolis Valley and around the Basin of Minas, is unsurpassed for fertility, owing to the rich marine deposits left on the shore-land by the tides of the Bay of Fundy. The climate is delightful, and the winter is not so cold as in other parts of the Dominion. The population of the entire Province in 1891 was 450,395. In 1891 there were 6,080,695 acres of land occupied (1,993,997 improved), of which 969,548 acres were under crop, 994,113 acres in pasture, and 30,036 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding 600,000 to 700,000 tons. Fruit cultivation is making wonderful progress; apples especially are claimed to be the best in the world; in 1891, the product was 1,051,592 bushels, and many new orchards are coming into bearing. Halifax, the capital of the province, has a magnificent harbour covering 10 square miles. It is the principal winter port of Canada, and is the entrepôt of a large trade with the West Indies and South America. It is the principal naval station of North America, and the British Government have an extensive dockyard there. The Dry Dock can accommodate the largest vessels afloat for repairs. The coal deposits are extensive and of good quality, 2,235,472 tons being the output in 1896; iron-ores are plentiful, and gold mines are now being worked with profit, £2,454,600 representing the product of the past 35 years. The principal fisheries are upon the eastern coast. In 1893 the total value of their produce was \$6,407,279. The fish of which the largest catches in value are made are cod, halibut, haddock, mackerel, herring, salmon, and lobsters. The manufacturing interest is also a growing one. In order to give an impetus to farming, the Government have established an agricultural college and experimental farm near Truro, where both men and women can receive a good practical education in agriculture and domestic economy. The Annapolis Valley is one of the greatest apple-growing regions in the Dominion. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at £8 16s. per 100 acres, and 1s. 10d. per acre for any additional quantity. Hunting, shooting, and fishing abound; among wild animals there are bears, foxes, moose deer, otter, mink, sable, musquash, hares, racoons, and squirrels; and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, and curlew.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of

21 members, and a Legislative Assembly of 38 members.

CAPITAL, Halifax. Population, 38,556. Principal towns, Dartmouth (6,249), Truro (5,102), Windsor (2,838), Sydney (2,426), Annapolis Royal (2,832), Yarmouth (6,089), Amherst (3,781), Pictou, New Glasgow, Lunenburg.

Agent-General for Nova Scotia in London, John Howard, Cannon Street, E.C. 143
Halifax is 2,463 miles from Liverpool. Telegrams, 1s. per word.

CAPE BRETON ISLAND, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 86,794 inhabitants. The chief town is Sydney, on the eastern coast, having valuable collieries in the neighbourhood.

NEW BRUNSWICK is situated between 45°-48° N. lat. and 63° 47'-69° W. long., and comprises an area of 28,200 square miles, with a population in 1891 of 321,263. It was first colonised by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests, the fisheries, and the shipbuilding trade. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. With reference to the agriculture of the province, according to the Census of 1891 the occupied land amounted to 4,471,250 acres, of which 1,509,790 acres were improved, 1,018,704 acres being under crop, 479,607 acres in pasture, and 11,479 acres devoted to gardens and orchards. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1895 of the value of \$4,403,158, ranking second in importance to those of Nova Scotia. St. John is also a winter port of Canada; and new railway connections tapping the Intercolonial Railway at Rivière du Loup are now completed, adding to its importance and trade.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 46 members elected by the people.

CAPITAL, Fredericton. Pop. (1891), 6,502; chief cities, St. John and Portland (39,179), and Moncton (8,765).

Fredericton is 2,748 miles from Liverpool *via* Cape Race, or 2,535 miles *via* Belleisle and Chatham, N.B.

MANITOBA, formerly the Red River Settlement, was formed into a distinct Province in 1870, and admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49°-53° N. lat. and 90°-101° W. long. (these parallels and meridians forming its boundaries), and the Canadian Pacific Railway connecting the Atlantic and Pacific coasts, entirely through British territory, is sure to give an important impetus to the rapid development of this Province. Its area is 116,021 square miles, somewhat smaller than Great Britain and Ireland. Its population, census 1891, was 152,506, being an increase of 145 per cent. since 1881, and in 1896 was estimated at about 200,000. The Red River intersects the province, which appears destined to become a great agricultural country. The soil is fertile and productive, emigration is invited and encouraged, and liberal grants of land are made to settlers. According to the census returns of 1891, there were 6,000,000 acres of land occupied, 1,696,583 being cultivated (1896). The acreage under wheat in 1897 was 1,290,882. The crop in 1897 is estimated at 21,284,274 bushels, and about 40,000,000 bushels of all kinds of grain. The main line of the Canadian Pacific Railway traverses Manitoba, and there are several other lines in operation. The Red and Assiniboine rivers are also navigable throughout their entire course in the province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an Executive Council of 5 members and a Legislative Assembly of 40 members.

CAPITAL, Winnipeg. Population (1896), 38,000. Principal towns, Portage la Prairie, pop., 4,000; and Brandon, pop., 5,500.

*NORTH-WEST TERRITORIES.—These Territories (which were formed into a distinct Province in October, 1897) comprise nearly the whole of British North America from the boundary of the United States (lat. 49° N.) to the most northerly part of the continent, and from the western shores of Hudson's Bay to the Rocky Mountains. The area is calculated at 2,497,427 square miles. Until recently it was very sparsely populated, but of late years, owing to the widespread knowledge of its great fertility and immense mineral resources, a large immigration of desirable settlers has set in. Out of this vast territory, the Dominion Government formed in 1882, for the convenience of settlers in the southern part of the Territories and for postal purposes, four provisional districts, named Assiniboia (89,535 square miles), Saskatchewan (107,092 square miles), Alberta (106,100 square miles), and Athabasca (104,500 square miles). In October, 1895, the unorganized and unnamed part of the Territories to the north was divided into four similar districts, named Ungara Franklin, Yukon, and Mackenzie, while the district of Athabasca was enlarged to an area of 265,000 square miles. Three of these districts are now represented in the Dominion Parliament; Assiniboia sending two representatives, and Alberta and Saskatchewan one each. The whole of this territory is stated to possess varied and great resources, over 150,000 square miles being reported favourable for stock-raising and agriculture, the former being largely followed in Alberta, where the climate is milder, owing to the influence of the Chinook winds from the Pacific. Both Assiniboia and Alberta are traversed by the Canadian Pacific Railway, and settlement is rapidly taking place along its route, and generally throughout the territory, where many other railways have been projected, several of which are now being made, while others are already in operation. It has large mineral deposits, iron, coal, and gold having been found. The most notable discovery of gold has been made in 1897 on the tributaries of the Klondyke river in the Yukon district, almost within the Arctic circle. The beds of all rivers on the eastern slope of the Rockies are being examined, and some very successful strikes have been reported. Coal is abundant in all districts, especially in Alberta, where mines are now being largely worked, and are connected by branch lines with the Canadian Pacific Railway. It is watered by some of the finest rivers on the American continent, and it is estimated that there are about 10,000 miles of navigable waters within its boundaries. The fur trade was till recently almost the sole commercial occupation of the inhabitants. In 1870 it was included in the Dominion, previous to which it had been held by the Hudson's Bay Company. Grants of 160 acres of land are given to settlers free of cost, and other lands can be bought at prices from 12s. 6d. per acre upwards, according to location.

A census of the three Provisional districts of Assiniboia, Alberta, and Saskatchewan, was taken in August, 1894, by the North-West Mounted Police, when the population was found to be 86,851, of whom 13,345 were Indians. The population of the other portions of the Territories, not included in the above census, in 1891 was 32,168,

making a total population of 99,967. According to the census returns of 1891 there were in the three districts 2,910,144 acres occupied, and 194,773 acres cultivated. On the ranches in the districts of Alberta, Assiniboia, and Saskatchewan, there were 231,222 cattle, 60,699 horses, and 64,920 sheep. The southern half of the district of Alberta is specially adapted for stock-raising of all kinds, animals being able to graze at large during the winter; and it is estimated that there are now over 145,000 head of cattle in this district alone. Assiniboia, Saskatchewan and the northern part of Alberta are more particularly adapted to mixed farming, pastoral pursuits merging into agricultural in most districts, but in some are altogether confined to agriculture, in which case wheat is generally the only crop grown. A large tract of land, enclosing hot mineral springs of remarkable curative powers, has been reserved by the Dominion Government at Banff, in the Rocky Mountains, as a national park; the grounds are being laid out under Government superintendence, and the place is becoming one of the most popular and beneficial health resorts on the continent.

The Government consists of a Lieut.-Governor and a Legislative Assembly of 29 elected Members, advised by an Executive Council of 5 members of the Assembly. The three provisional districts of Alberta, Assiniboia, and Saskatchewan are now divided into 29 electoral districts, thereby securing an entire representation to its population.

CAPITAL, Regina. Population (1895), 1,583.

Regina is 4,750 miles from London, <i>via</i> Liverpool, Montreal, and Canadian Pacific Railway.	

PRINCE EDWARD ISLAND, the last admitted province, lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say, between 46°—47° N. lat. and 62°—64° 30' W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,000 square miles (about equal to that of the English county of Norfolk), and its population (census 1891), 109,078. The history of the island is somewhat strange: it was discovered simultaneously with the neighbouring countries, and was first settled by the French, who held it for many years, but only as a fishing station. The English took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756—1763), and compelled the greater part of its French inhabitants to leave. From that time it has remained, without intermission, in the hands of the English. By an Act passed in 1798, which

* See Map, p. 599.

came into operation 1st February, 1799, the island received its present name from Prince Edward, Duke of Kent, having been previously known as St. John's Island. The island is divided into three counties (King's, Queen's, and Prince), each of which elects 10 representatives. The freehold of the island was originally held by a number of absentee landlords, who were finally bought out under the Land Purchase Act of 1875. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. There were (1891) 718,092 acres of improved land, of which 536,175 acres are under crop, 178,072 acres of pasture land, and 3,845 acres of gardens and orchards. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. The rivers, too, contain extensive deposits of what is known as mussel mud, which is raised in the winter by a dredging machine worked on the ice, and afterwards used on the land as a fertiliser, where it helps largely in producing excellent crops of hay. The conditions obtaining on the island are favourable for the rearing of live stock, of which a large number are exported to other parts of the Dominion and the New England States of America. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour, is distant from Liverpool 2,630 miles, transit about 8 days. Population, 11,373. Summerside (pop. 2,882) and Georgetown (pop. 1,660), on the east coast, are also ports of considerable size, and the centres of shipbuilding trade.

Assist. Judge & V.-C., R. R. Fitzgerald	3,200

BRITISH COLUMBIA occupies the western frontier of the Dominion of Canada extending from the summit of the Rocky Mountains and the 120th meridian of longitude, west by the 60th parallel of north latitude to the boundary of Alaska; thence southward and along the Pacific coast (including QUEEN CHARLOTTE ISLANDS and VANCOUVER ISLAND) to the Straits of Fuca; thence easterly along those straits and the 49th parallel of latitude to the summit of the Rockies. The area of the mainland is calculated at 383,300 square miles; Queen Charlotte Islands at 6,000 sq. miles; and Vancouver Island at 14,000. The present coal supply, averaging about 1,000,000 tons per annum, is obtained from the latter, where the coal mea-

asures are extensive. Coal, however, is distributed over a wide area of the Province, the other principal deposits so far as known being in the Queen Charlotte group of islands on the north-west coast, and in the south-eastern parts of Kootenay district near the Crow's Nest Pass, through which a railway is under construction to enter the mineral belt, now being exploited. This will afford a readily accessible supply of coke for the several smelters already in operation or those that in future may be erected. In addition to the main line of the Canadian Pacific Railway which enters the Province through the Kicking Horse Pass and penetrates it to the coast at Burrard Inlet upon the outlet of which Vancouver City is built, and the Esquimalt and Nanaimo Railway from Victoria to Wellington on Vancouver Island, four branch lines of the former have been constructed. Communication is afforded from the termini of the Nakusp and Robson branches with the main line by steamboats which ply regularly from Revelstoke on the Columbia River to the Little Dalles south of the boundary line, the river in question being the main artery of traffic for the principal portion of the Kootenay mining region. The Nelson and Fort Sheppard, an independent line of railway, runs south from Nelson connecting on the American side of the line with the Spokane Northern; the Kaslo and Slocan Railway connects the mines of the Slocan district with Kaslo on Kootenay Lake, on which steamboats ply from Nelson southward, calling at Pilot Bay, Ainsworth and Kaslo, connecting with the Great Northern at Bonner's Ferry. The Columbia and Western Railway has been built from Trail to Rossland in the Trail Creek mining district, where most important gold mining developments have taken place, and it is proposed to extend this line to Midway, in the Yale district, and northward to connect with the C. P. R. system at Vernon. A short line of railway runs from Victoria to Sidney on the Gulf of Georgia; the Westminster Southern from New Westminster connects with the Great Northern at Seattle, *via* Blaine; Vancouver and Westminster cities are connected by an electric tramway, having an hourly service. Two projected lines prominently before the public are of important character. One is proposed to run from Vancouver *via* New Westminster, the Fraser Valley, and Hope, direct to the mines of southern Kootenay, with an ultimate outlet at Crow's Nest Pass. The other, the British Pacific Railway, is projected from Victoria along the east coast of Vancouver Island to Seymour Narrows, where it is proposed to cross to the Mainland and run from Bute Inlet through the interior to Yellow Head Pass, and if an eastern connection be made, will follow the original line of the C. P. R. survey over the prairies. The greater part of the interior of Vancouver Island and a very large portion of the Mainland, especially northward, have been as yet but partially explored. From the knowledge already possessed, however, it is known that almost the entire area is highly mineralised and is interspersed as well with extensive and fertile agricultural valleys, the main requirements of which, to be made available for settlement, is railway communication. Although, as compared with the whole area of the Province, the agricultural lands are limited, they are, nevertheless, considerable in extent and capable in the aggregate of sustaining a large farming population. The climate of the coast is mild, while the interior is subject to great extremes of temperature. There are very large ranges of pasturage in

the interior which forms part of the great central plateau which extends from the Gulf of Mexico northward to within the Arctic circle. The portions at present accessible for agriculture and partially settled are:—The southern end of Vancouver Island, the New Westminster district, the north and south Thompson valleys, and the valleys of the Okanagan. In East Kootenay and the Cllicotin district there are several millions of acres of pastoral and agricultural lands of promising character. Generally speaking, the Province is well adapted for the growth of such fruit, cereals, grasses, and vegetables as are common to the temperate zone, and of such products as flax, hops, sugar-beet and tobacco, &c. There is, perhaps, the largest compact reserve of valuable timber in America on the British Columbia coast, consisting of Douglas fir, spruces, red and yellow cedar, and hemlock, the present available supply of which is variously estimated at from 40,000,000,000 to 100,000,000,000 feet. Some 60 mills are in operation, with an annual capacity of about 550,000,000 feet. The most active and extensive mines are Trail, Slokan, and Toad Mountain in Kootenay, Boundary in Yale, Alberni, and Clayoquot on Vancouver and Texada Islands. The old placer diggings in Cariboo are being mined by improved hydraulic processes on an extensive scale. Next to mining the greatest natural resources of British Columbia are its fisheries, the output of which is valued at about \$4,000,000 per annum, and give employment to between 8,000 and 10,000 persons. Salmon canning on the Fraser River and the coast inlets is the principal branch of the fishing industry, but deep-sea fishing is growing into importance yearly. The coast waters abound with many economic food fishes, the principal of which are salmon, halibut, and cod.

The history of British Columbia is comparatively recent. A little over a hundred years ago its waters were frequented by vessels of several nations, principally British and American, engaged in trading with the natives. From about 1810 to 1846 what was known as the Caledonia and Oregon territory was occupied by the Hudson Bay Co. as a fur preserve. Vancouver Island was exclusively the possession of that company from 1849 to 1859, with a Governor dating from 1850 and a Parliament from 1856. The Mainland, as British Columbia, and Vancouver Island each became independent Crown Colonies in 1858, when the gold excitement began, and continued so until 1866, when they were united under one government. In 1871 British Columbia entered Confederation. After the first gold excitement progress was slow until the construction of railways began, when improvement was very rapid, and from 1881 to 1891 the census showed an increase of population from 47,000 to 100,000. The population of the Province in 1891 is classified as follows:—Whites, 65,266; Indians, 23,257; Half-Breeds, 214; Chinese, 9,091; Japanese, 306; Negro, 36; total 98,170. Four lines of steamships ply to and from the Orient and one to Australia. There are a number of coast lines covering the waters south to San Francisco and north to Alaska. Capital of the province, VICTORIA, at the south end of Vancouver Island, a population (1897) of 20,000. VANCOUVER CITY, the terminus of the Canadian Pacific Railway, on the Mainland, 80 miles from Victoria; population (1897) about 20,000. NEW WESTMINSTER, the seat of the salmon industry of the Fraser river, 8,000; NANAIMO, the coal city of the West, 5,000; and Rossland, 5,000.

RAILWAYS.—One of the most important is the CANADIAN PACIFIC, stretching across the entire continent, from Montreal to Vancouver on the coast of British Columbia, a total distance of 2,905 miles. The town of Vancouver, the western terminus of the road, has been built up within the last few years, and already contains a population of 14,000. The main line, starting from Quebec, runs to Montreal, then through Ottawa, Carleton Junction, Renfrew, North Bay, Sudbury Junction, Port Arthur, Ignace, Winnipeg, Carberry, Brandon, Moosomin, Qu'Appelle, Regina, Moose Jaw, Swift Current, Maple Creek, Medicine Hat, Crowfoot, Calgary, and Stephen—the last-named on the summit of the Rocky Mountains—and then through the Selkirk Range to Vancouver, on the Pacific coast. The chief office of the Canadian Pacific Railway is at Montreal. The share capital amounts to \$142,324,882. President of the Company, Sir William C. Van Horne. Vice-President, Thos. G. Shaughnessy. Secretary, Charles Drinkwater. The total length of the Canadian Pacific Railway system is 7,218 miles, 300 of which are cut through the solid rock. The last spike was driven on the 7th November, 1885, and the road was opened for general traffic on 28th June, 1886, since which time there has been a daily mail service between the Atlantic and Pacific coasts. The time occupied in making the road was four years six months, an average of 2.6 miles per day. The distance from China, Japan, and the Pacific coast generally to Liverpool is from 1,000 to 1,200 miles less by the Canadian Pacific Railway than by the Central Pacific Railway.

The Imperial and Dominion Governments having granted the Canadian Pacific Railway annual subsidies of £45,000 and £15,000 res-

pectively, a mail service has been established between England and China over this line, the distance being shortened by several days, and the overland journey being entirely through British Territory. Steamers have been built in England specially for this service, and mails have been landed in London within twenty-one days from leaving Yokohama.

THE GRAND TRUNK was originally formed in 1853 by an Act of the Legislature, amalgamating the following lines, viz. — Grand Trunk, Great Western, Midland, Georgian Bay, London, Huron and Bruce, Wellington, Hamilton, Northern and North-Western. North Simcoe, Montreal and Champlain, Beauharnois, Jacques Cartier, Waterloo Junction, and Cobourg, Blairton and Marniora, thus forming a continuous line through the provinces of Quebec and Ontario. The total loan and share capital of the company amounts to over £65,000,000 sterling. The mileage of the lines owned and leased is 3,512 miles, in addition to which the company controls 674 miles in the States of Michigan, Indiana and Illinois, making the mileage of the entire system 4,186 miles. The eastern extremities of the line are Quebec and Portland, Maine, and it extends westward to Detroit, Chicago, Grand Haven and Muskegon, supplying the means of communication with Montreal, Toronto, Hamilton, Niagara, Buffalo, Detroit, and all the principal cities and towns in the provinces of Quebec and Ontario. *President*, Sir Charles Rivers Wilson, C.C.M.G., C.B.; *Vice-President*, Joseph Price; *Secretary*, Walter Lindley. *London office*, Dashwood House, New Broad Street E.C.

NEWFOUNDLAND.

This island, the twelfth largest island in the world, is situated between 46° 37'—51° 39' N. lat. and 52° 35'—59° 25' W. long., on the north-east side of the Gulf of St. Lawrence. It is about 317 miles long, and 316 miles broad, and contains about 42,200 square miles, and at the end of 1891 it had a population of 197,934, not including those resident in the portion of Labrador (4,106) within the jurisdiction of Newfoundland. Of these 72,342 are Roman Catholics, 68,075 Church of England, 52,672 Methodists, 1,447 Presbyterians, and 3,398 various. This is the oldest English Colony. It was discovered by John Cabot in 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bona Vista. The inhabitants are chiefly located on the coast-line of the shore and bays, and the greater part are engaged in fishing; for cod in summer, and seal fishing in winter and spring; these are the two main industries of the island. Lakes and rivers abound; it is estimated that about one-third of the surface is covered with water. The interior is practically in a state of nature; but a survey has been made for the purpose of constructing a railway, which is now in process of being built, and which will open up large tracts of rich agricultural, mineral, and timber lands, but hitherto of small value. There are about 560 miles of railway at present; the Government is rapidly pushing to its completion the line to the Exploits River and thence across the island to Port-aux-Basques (500 miles completed), which is about nine hours by steam from Cape Breton, the nearest point of the mainland. The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon in the Straits of Belleisle on the south to Cape Chudleigh at the entrance of Hudson's Straits on the north; it possesses valuable cod, herring, trout, and salmon fisheries. There are a few Moravian missionary settlements on the coast, and also some posts of the Hudson Bay Company.

The principal exports of the Colony are codfish, value \$3,640,392; cod and seal oil, value \$576,689; sealskins, \$372,063; tinned lobsters, \$376,711; copper, copper ore, iron pyrites and other minerals, \$668,294; and Labrador exports, \$657,307; besides which there is a prospect of a coal-mining industry being developed.

The Government is a responsible one, administered by a Governor, appointed by the Crown; a responsible executive of seven, a legislative council of not over fifteen, appointed for life, and a House of Assembly of thirty-six, elected by the people every four years. The first general election, under the "ballot system" and "Manhood Suffrage Acts," passed in the 1889 session of the Legislature, and in 1890 the franchise was given to all males of 21 years and over.

BRITISH GUIANA,

which includes the settlements of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America, and comprises a vast area (estimated at 109,000 square miles), the boundaries of which are, in part, undetermined. It has a seaboard of more than 300 miles. The Essequibo River intersects the country in its entire length; the Corentyne River separates it from Dutch Guiana; the Cuyuni is the great waterway on the west. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The Venezuelan boundary line has not yet been properly defined, but arbitration has been decided

upon by the British and Venezuelan governments, and it is anticipated that the tribunal will commence its sittings early in 1898. The territory still left in question contains the valuable mines known as Venezuelan. There are but two towns, properly so called, Georgetown, population 53,176, and New Amsterdam, population 8,903. The climate is hot, but not generally unhealthy; the country is now almost free from the epidemics of yellow fever which were once prevalent. The cultivated portion of the country, amounting to 83,000 acres, of which 70,812 acres are in sugar-cane, is confined to the sea-coast and to a short distance from the rivers. It is very like Holland, being below the level of the sea and intersected with canals constructed by its former Dutch owners. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The chief product is sugar, which forms 82 per cent. of the export trade of the colony. Good coffee is also produced. The other principal products are rum, molasses, coconuts, timber, and gold. The returns of the leading exports for the year 1896-7 were as follow:—Sugar, value £1,098,398; rum, £136,927; molasses, £20,926; timber, 404,234 cubic feet, value £30,960; gold, 125,108 oz., valued at £449,836. The population, April, 1891, was 278,328 (1897, est. 283,000), of whom about one-third were Indian immigrants. There are about 10,000 aboriginal Indians, belonging chiefly to Arawak, Acawai, Carib, and Warau tribes; they are occupied largely in fishing, hunting, and raising crops of cassava. The territory now forming the Colony of British Guiana was first partially settled by the Dutch West India Company in 1580, and was from time to time held by Holland and France, and was finally surrendered to this country at the Peace of 1814. It was stipulated that the Dutch laws and institutions should be maintained.

The Government consists of a Governor and a Court of Policy of 15 members besides the Governor—7 official and 8 elected by the direct vote of the people—in which the Governor has two votes, and a veto on any measure at any stage. The Court of Policy discharges the functions of a Legislative Council, except as to levying taxes, which is the prerogative of what is called the Combined Court, composed of the Court of Policy and of 6 Financial Representatives elected directly by the people. There is, besides, the Executive Council, consisting of the Governor, 6 official and 3 unofficial members nominated by the Crown, which exercises all the executive and administrative functions of government other than those before mentioned. An elective member of the Court of Policy must be the owner of 80 acres of land in the colony, of which 40 at least must be under cultivation, or of immovable property value £1,562 10s., or of house and land of an annual rental of £250. The qualification for the general electors, who number only about 2,756, is, *Country*—Ownership of 3 acres of land under cultivation, or tenancy of 6 acres, do.; tenancy of a house of £40 rental; income of £100 a year; payment of £4 3s. 4d. taxes. *Town*—Ownership of house, value £104 3s. 4d.; tenancy of house, rental £25 a year; income and taxes as above. The general electors also choose the Financial Representatives, who must have a similar qualification, or an annual income of £300. There are 1,072 miles of Post Office telegraph lines, and 17 cables, and 70 post-offices;

also a Post-office Telephone Exchange in Georgetown with over 400 subscribers. There is a line of Railway along the sea coast from Georgetown to Mahaica, 21 miles in length, owned by the Demerara Railway Company, constructed at a cost of £280,000, and extensions of this line east and west are being rapidly constructed; another line has been opened connecting the Essequibo and Demerara rivers. The depression in the sugar market in 1894-95 has caused much apprehension, and it is feared that many estates will go out of cultivation unless a revival takes place. Attention is in consequence being given to other industries such as farming and rice-growing, and there is good prospect of a development of gold mining in the interior, for which purpose railways are being projected to the richer districts, and roads are in course of construction.

Georgetown, 3,963 miles; transit, 13½ days by R. Mail steamer on alternate Wednesdays from Southampton. Parcels, first lb. 10d., then 8d. per lb. (to 11 lbs.); telegrams, per word, 10s.

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 29' 5" to 15° 53' 55" N. latitude, and from 89° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west

and south by Guatemala, and on the east by the Caribbean Sea. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 56° to 96°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The Census (1891) gives the population at 31,471 (males, 16,268; females, 15,203).

The staple products are the natural woods of the colony, viz., mahogany and logwood, but there are many other excellent furniture woods. Wood-cutting, in fact, forms the chief industry of the colony. The average annual export of mahogany, of which the cost, ready for shipment, is \$40 to \$50 per 1,000 ft., amounted in the year 1896 to 2,769,676 ft.; while that of logwood, costing \$10 to \$15 per ton, reached 34,539 tons in 1896. There are some sugar estates; and coffee plantations have been started. Fruits, including bananas, plantains, coconuts, pineapples, oranges, and mangoes, are being rapidly and extensively grown, while inland there are extensive regions of good pasturage, and there are indications that gold and other minerals exist; whether in payable quantities remains to be proved. Other exports are: Sugar, 2,636 lbs.; rum, 1,194 gals.; cedarwood, 33,639 ft., and india-rubber, 19,895 lbs. The value of bananas shipped during the year 1896 was \$64,868. The latest returns of the area under cultivation are as follows:—Indian corn, 4,633 acres; sugar-cane, 1,766 acres; yams, fruits, &c., 6,046 acres; rice, 55 acres; coffee, 102 acres. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at \$1 per acre, or leased at an annual rental of 10c. to 30c. per acre. The transit trade with the neighbouring Republics used to be considerable, but has seriously declined of late years with the growth of direct communication by mail steamers. Of the total goods exported in 1896, \$1,073,638 represent the value of the produce and manufactures of the colony itself; and \$304,882 that of British, foreign, and other colonial produce and manufactures in course of transit through the colony.

On the 15th October, 1894, the gold dollar of the United States was made the standard coin, with a subsidiary silver coinage, and a paper currency. The sovereign and half-sovereign are legal tender at \$4.86 and \$2.43 respectively.

There are forty-seven schools in the colony, all but one of which are denominational, and in receipt of Government aid.

British Honduras is governed as a Crown colony. The Executive Council consists of the Colonial Secretary, the Treasurer, the Attorney-General, and the Inspector Commandant of Constabulary, and three unofficial members appointed by the Sovereign. The Legislative Council includes the following members:—the Colonial Secretary, the Treasurer, the Attorney-General, and not less than five unofficial members appointed by the Sovereign.

CAPITAL, Belize; population (1891), 5,767.

Telegrams sent by post from New Orleans.

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., comprising an area of about 19 square miles, and containing (1896) an estimated population of 15,932, of whom 8,117 are white, exclusive of army and navy. These islands derive their name from Bermudes, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly-fortified dockyard, where the British North American squadron refits.

These islands have become a favourite winter resort for visitors from the neighbouring States of America and the Dominion of Canada. Numbers repair thither from November until April to escape the cold of the North American Continent: large hotels have been erected for their accommodation. The climate during this period is most salubrious, the range of thermometer being 60° to 70°, and invalids derive great benefit from the mildness of the winter.

The soil is, on the whole, poor. The products of the island chiefly consist of onions and potatoes, which are grown in large quantities for the spring supply of the New York market, a few melons and pumpkins, and arrowroot of a very fine quality. Lily bulbs, especially the Bermuda Easter Lily, are grown for export, chiefly to the United States. The sea abounds with fish; a few turtles are taken.

The Government is administered by a Governor, who is also Commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,123 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton, on the coast of Long Island, is the chief town and the seat of government: population (1891), 1,854. The churches and chapels are all

endowed under a temporary Act: the sum of £10 is paid for every hundred of the denomination.

Greater Britain: The Australasian Colonies.

AUSTRALASIA, that is, Austral or Southern Asia, comprises the great island-continent of Australia, the islands of New Zealand and Tasmania, and a vast number of smaller islands, chiefly in the Southern Hemisphere, between the Pacific and Indian Oceans, together with a portion of the island of Papua or New Guinea.

The whole of the British Possessions in this area, including Fiji and a portion of New Guinea, is estimated to contain 3,173,882 square miles, and a population of 4,872,000.

AUSTRALIA forms the main portion of Australasia, and is the largest island on the face of the globe, extending from 10° 39' to 39° 11¼' S. lat., and from 113° 55' to 153° 16' E. long. Its boundaries on the N. are Torres Straits, the Sea of Timor, and the islands of New Guinea (Papua), Timor, Flores, &c.; on the E., the South Pacific Ocean; on the S., Bass's Strait, Tasmania, and the South Pacific Ocean; and on the W., the Indian Ocean. Its nearest point to Asia is situate at a distance of 1,600 miles S.E. of Singapore, the extremity of the continent in this direction; the intervening space being occupied by the East Indian Archipelago, chiefly in the possession of Holland. The area of this vast island-continent is estimated at 2,946,601 square miles. The greatest dimensions are in length from E. to W. 2,400 miles, and in breadth from N. to S. 1,971 miles; it has a rapidly-increasing population, which in June, 1897, was estimated at 3,476,439. It is divided into five colonies—New South Wales, Victoria, Queensland, South Australia, and Western Australia. There are many excellent and spacious harbours in various parts of the coast, but very few remarkable indentations; at an average distance of sixty miles a range of steep mountains runs along the E. coast, but the greater part of the shore on the N., the W., and S. is low and sandy. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray rivers. Nearly all round the coast, however, and in the eastern portion of the island, is a rich grazing country, admirably adapted to the rearing of sheep of which there were (1897) in New South Wales, 48,318,790; Victoria, 13,180,943; Queensland, 19,593,696; South Australia, 6,323,993; Western Australia, 2,248,976. Sheep farming is the pre-eminent branch of industry, and it is chiefly as a wool-producing country that Australia has risen into importance. Years of drought occasionally occur constituting the greatest impediment to the progress of the colonies, often followed by years of flood. The commencement of the seasons is as follows: Autumn, about March 21; Winter, June 21; Spring, September 23; and Summer, December 22. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hunter, Clarence, Richmond, Macleay, Brisbane, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, the Fortescue, De Grey, and Fitzroy; and the Victoria, the Flinders, and Mitchell, which debouch into the Gulf of

Carpentaria, on the north; but they are of little service in facilitating internal traffic. The most extensive mountain system on the Australian continent takes its rise near the S. E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland. The highest point is Mount Kosciusko (7,328 ft.), in New South Wales. In 1896 there were 11,400 miles of railway in operation, of which no less than 10,727 are Government and 673 private lines. New South Wales owned 2,724; Victoria, 3,129; Queensland, 2,506; South Australia, 1,889; Western Australia, 1,152.

Speaking generally, it may be said that one of the most marked characteristics of the whole continent is the scarcity of rivers and fresh-water lakes. There are few rivers of any considerable size along the whole coast-line (8,850 miles); indeed, for 1,500 miles along the S. coast there is not a single watercourse. Lakes are numerous, but nearly all are salt, and even those barely merit the name, being dependent for their supplies of water upon the rivers and floods. They are more like marshes than lakes: at one time they are immense reedy swamps; at another time they are areas of submerged levels, with broad mud banks for shores that render the water absolutely unapproachable. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c. The settled portions are intersected by railways, already extending to 11,144 miles, as shown above, and with about 76,300 miles (excluding telephone wire) of telegraphic wire, connecting together all the principal towns on the continent. Direct steam communication is established with England and the Continent by means of the Peninsular and Oriental, the Orient, Messageries Maritimes, the North German Lloyd, and other lines; there is a weekly mail from London. (See pp. 437, and 701—710.) "The Great South Land" is believed to have been first seen by De Gonneville, a French navigator, in 1503, and was inserted in a map constructed by Le Testu of Dieppe about the year 1542. Portions of the coast on the north-west and south were sighted by the Dutch and English at different times, but practically speaking, the Island Continent was made known to the world by Captain Cook in 1770, when he saw the land to the west of Cape Howe, and explored the whole eastern coast to Torres Strait. Subsequently Flinders sailed round it, in 1802, and gave it the name of "Australia." Following the favourable report of Cook, the first British settlement was formed at Port Jackson (Sydney) in 1788. The aborigines are rapidly becoming extinct; the present number being about 100,000.

POSTAGE.—The Australasian Colonies joined the Postal Union on the first of October, 1891. Parcels from the United Kingdom to all the Colonies: 1 lb., 1s., excess to 11 lbs., 6d. per lb.; the same rates applying to parcels from the Colonies to the U.K.

GENERAL STATISTICS OF AUSTRALASIA.

ALL THE COLONIES, EXCEPT FIJI AND NEW GUINEA.

Gross amount of public revenue, 1896—7	£30,690,226	Total tonnage of vessels, exclusive of coasting trade, entered and cleared	£19,613,999
Gross amount of expenditure, 1896—7	30,359,134	Imports from United Kingdom, 1896	24,967,037
Public debt, June, 1897	227,466,494	Exports to United Kingdom, 1896	29,172,801

THE AUSTRALIAN NAVY.

NEW SOUTH WALES.—Acheron and Avernus, torpedo steam launches. Captain commanding *Naval Forces*, Francis Hixson (late master R.N.); Chief Executive Officer, G. S. Lindeman, R.N.

QUEENSLAND.—Gayundah, double-screw steel ship, 2 guns, 360 tons, 400 h.p.—Otter, gunboat, steel, 1 gun, 220 tons, 460 h.p.—Paluma, double-screw iron ship, 2 guns, 360 tons, 400 h.p.; with Bonito, Stingaree, Fumba, Bream, Midge, Dolphin, and Mosquito.

SOUTH AUSTRALIA.—Protector, cruiser, 9 guns, 920 tons, 1641 h.p. Commander and Naval Commandant, W. R. Creswell, R.N., C.M.G., £300; *Ch. Eng. and Eng.-in-Charge of Submarine Mine Defences and Torpedo Corps*, W. Clarkson, £300.

VICTORIA.—Cerberus, double-screw iron armoured

plated turret ship; Nelson (frigate), with Countess of Hopetoun, Childers, Nepean, and Lonsdale. Torpedo boats: Gannet, Lady Loch, Commissioner, Customs No. 1, and Gordon. Officers: *Naval Comm.*, Capt. George Neville, R.N., £1,050; *Comm.* H. C. Kingsford, R.N., £600; *Fleet Eng.* J. L. Breaks, £450; *Staff-Surg.* C. A. Stewart, £150.

WESTERN AUSTRALIA.—Victoria, gunboat.

TASMANIA.—One torpedo boat.

NEW ZEALAND.—Four torpedo boats and 4 steam torpedo launches.

Australian Auxiliary Squadron—

(The cost of maintenance and interest on cost of construction being borne by the seven Colonies.) Boomerang (735 tons), Karrakatta (735), Katoomba (2,575), Mildura (2,575), Ringarooma (2,575), Tauranga (2,575), Wallaroo (2,575).

NEW SOUTH WALES.

The whole of the eastern part of Australia, including the several colonies of New South Wales, Victoria, and Queensland, received the name of NEW SOUTH WALES from its first explorer, Captain James Cook, in 1770. The present colony of New South Wales originated in a penal settlement formed by the British Government, when Captain Arthur Phillip, R.N., its first Governor, arrived at Botany Bay, in H.M.S. *Sirius*, in January, 1788, with an armed tender, six transports and three store-ships, where they anchored, but subsequently proceeded to Port Jackson, which was found to be more suitable than Botany Bay for the new settlement: he there landed the 756 "persons" under his charge, and the British ensign was for the first time hoisted on the shores of Sydney Cove, now the capital and seat of government.

The colony is situated between the 29th and 36th parallels of S. lat. and 141st and 153rd meridians of E. long., and comprises an area of 310,700 square miles—i.e., more than six times the area of England, and nearly three times the size of Great Britain and Ireland—with a population, Census 1891, of 1,132,234, and 1,311,440 on June 30, 1897. The early history of the colony was not free from trouble. The first Governor, Capt. Phillip, remained from Jan. 26, 1788, to Dec. 10, 1792, and was succeeded by Capt. Grose, Dec. 11, 1792, to Dec. 12, 1794; Capt. Paterson, Dec. 13, 1794, to Sept. 1, 1795, when a duly appointed Governor, Capt. Hunter, R.N., arrived, and remained from Sept. 7, 1795, to Sept. 27, 1800. Capt. P. G. King followed, Sept. 28, 1800, to August 12, 1806, when he was followed by the unfortunate Capt. Bligh, whose rule came to an abrupt termination by a general revolt; and after an interregnum of nearly two years, Major-General L. Macquarie arrived, and, Jan. 1, 1810, assumed the governorship, which he retained for nearly eleven years, since which time there has been a regular succession. "Botany Bay" was for many years almost synonymous with Australia, and had a most unsavoury reputation; but with the cessation of the long European war after Waterloo, and the great distress in this country consequent upon the return of so many men discharged from the Army and Navy, attention was attracted to Australia as a centre of emigration. In 1813 the interior of the country was explored, and the great plains being found admirably adapted for sheep-farming, several breeds of sheep, including the celebrated merino, were introduced, and a foundation laid for the future prosperity of the country. The agricultural progress of the colony has been truly marvellous. In the year 1792 there were but 23 head of cattle, 11 horses, 105 sheep, and 43 pigs. On the 31st December, 1896, there were 510,636 horses, 2,226,163 cattle, 48,318,790 sheep, and 214,581 pigs. In 1895, 303,061,122 lbs. of wool, valued at £8,817,877, were produced.

Minerals at first attracted but little attention, but in these the country is also rich: the gold fields were discovered in 1851, and up to the end of 1896 these had produced, since first discovery, £43,399,958 (coal, £31,819,331). Copper, silver, tin, iron, antimony, asbestos, cinnabar, and kerosene shale are also found; and in small quantities, diamonds, rubies, opals, and other precious stones. The total value of minerals raised in 1896 was £4,351,209.

Agriculture is one of the principal industries of

the colony. About 1,659,717 acres are under cultivation (excluding 334,016 under permanent artificial grasses), producing during the year ended 31st March, 1897, 15,582,262 bushels of wheat, maize, and other kinds of grain, with 84,214 tons of potatoes, and 27,468 cwt. of tobacco. Sugar, cane to the extent of 320,276 tons was produced also 794,256 gallons of wine, and 5,845,896 dozens of oranges. So rich is the soil, and so genial the climate, that almost every kind of fruit and vegetable may be grown. The total extent of land alienated or in process of alienation at the end of 1896 was 45,257,468 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 126,307,790 acres. At Sydney the mean temperature in the shade for 37 years averaged 62° 9". Taking an average of the principal stations in each district of the Colony the mean temperature in the shade for the Table Lands is 57°—the Coastal District 64°—and the Western Plains 65°. The western portion of the country is unfortunately not well watered, and the chief rivers, the Darling and the Murrumbidgee, both tributaries of the Murray, which divides the colony from Victoria, are only navigable for part of the year; the coastal districts are, however, watered by numerous streams, and the Richmond, Clarence, Macleay, Manning, Hunter, Hawkesbury, and Shoalhaven are the principal rivers which empty their waters into the Tasman Sea. In 1851 the south of the country was formed into the separate colony of Victoria, and in 1859 the northern portion into that of Queensland.

The number of people in New South Wales of the Church of England denomination, according to the Census of 1891, was 502,980. The Head of the Church is the Most Revd. The Primate Bishop of Sydney. The See of Sydney, now Metropolitan, was erected in 1836, when it comprised the whole of Australia, but in 1847 took its present designation; the other Sees in N. S. Wales are those of Newcastle, 1847, Goulburn, 1863, Bathurst, 1869, Grafton and Armidale, 1869, and Riverina, 1885; the clergy number 344.

All religions are free, there is no establishment, and all payments are voluntary, with the exception of such as remain due by the State, under former arrangements. About two-thirds of the people are Protestants, the greater part members of the Church of England, according to the 1891 Census; there are 286,911 Roman Catholics. The head of the Roman Catholic Church is His Eminence the Cardinal Archbishop of Sydney, with bishops of Maitland, Bathurst, Armidale, Goulburn, Wilcannia, and Grafton; the clergy number 311. Presbyterians and Methodists come next, but almost every sect is represented. Education is compulsory. The total enrolment in 1896 was 221,603, and the average daily attendance during that year was 142,192; the gross disbursements of the Public Instruction Department amounted to £756,680; and includes an amount of £15,592 received from Government by university-affiliated colleges, and Sydney Grammar School. The University of Sydney, incorporated in 1851, enjoys a deservedly high reputation; degrees granted there rank with those of Oxford and Cambridge. Of churches the total number belonging to all denominations was 2,049.

The ordinary passage-money by first-class steamers averages, cabin, £60 to £70; intermediate, £32 to £37; steerage from £15 15s. The population

(Census 1891) was 1,132,234, made up of males, 612,562, and females, 519,672, showing a preponderance of males of no less than 92,890.

The estimated number of aborigines in the colony is 6,984, of which 2,230 are adult males, and 1,757 adult females and 2,997 children.

The estimated population on 31st December, 1896, was 1,297,640, and on June 30, 1897, 1,311,440.

"Responsible government" was established by the Constitution Act, 18 & 19 Vict. c. 54, and is vested in a Governor appointed by the Crown, and a Legislative Council consisting of not less than 21 members; the Council at present consists of 65 members. The Legislative Assembly consists of 125 members, representing 125 electoral districts, elected under an Act assented to on June 13, 1893, and receiving a salary of £300 per annum. With few exceptions all natural-born or naturalised males, 21 years of age, who have resided 12 months in the Colony and three months in the district are entitled to the franchise. The voting is by ballot, and property qualification and plural voting are abolished.

Railways, roads, and bridges have their several departments. There were open on June 30, 1897, 2,639½ miles of Government railway, upon the construction of which £37,369,205 has been spent; there are also 84 miles of private railway lines, and 7 miles of private tramways; and on Dec. 31, 1896, there were 30,820 miles of telegraph-wire with 855 stations, in addition to 1,771 miles of telephone wire. The Post Offices and receiving offices numbered 2,006, the number of letters conveyed was 63,895,315; of newspapers, 45,558,340; of packets and book parcels 15,603,639; and of parcels, 506,111. There are now 62½ miles of Government tramways open for traffic; capital expended, £1,452,670.

In 1896 the number of vessels entered and cleared was 6,432, with a total tonnage of 6,189,760. There were on March 31st, 1897, 13 banks of issue, with a paid-up capital of £19,755,780. The total average assets within New South Wales on the same date were £44,312,282, the total average liabilities within the colony being £31,975,486. The savings bank of New South Wales had deposits amounting to £4,149,658. There were also 502 Post Office savings banks having deposits amounting to £4,372,965. The Public Debt on 30 June, 1897, amounted to £61,074,498, mostly incurred for the construction of railways, waterworks and sewerage, telegraphs, and other reproductive public works.

While fully trusting to the ability and willingness of the mother country, the colony has not been unmindful of defence. In December, 1896, there were enrolled in the permanent and volunteer naval and military service of the colony 8,048 men; 1,046 artillerymen, 116 engineers, 101 submarine miners, 77 electricians, 3,017 infantry, 355 mounted rifles, 381 lancers, 64 army service corps, 110 medical staff corps, 2,021 members of attached rifle clubs, 180 others, staff, &c. The naval brigade and naval artillery volunteers comprise 580 officers and men. The officers and men who formed the well-known "Soudan contingent" were chiefly selected from these forces. The cost of defence for the year ended 30th June, 1897, was £224,116, and the expenditure up to end of June, 1897, from Consolidated Revenue, £4,576,647; from Loans, £1,242,006; volunteer land orders, £167,845; total, £5,986,498 (which is exclusive of the cost of the Soudan contingent, £121,630).

SYDNEY, the chief city and Capital, stands on

the shore of Port Jackson, surrounded by scenery of surpassing beauty. It extends four miles north and south by three miles east and west; and contains 115 miles of streets with 22,500 houses, and a population of about 96,330, or, including suburbs, 1,600 miles of streets, 89,500 houses, and a population of 410,000. About 3,100 acres have wisely been set apart for parks and open spaces: here are situated the Government buildings, Royal Mint, the University, National Art Gallery, Free Public Library, Observatory, two cathedrals, and numerous churches. The other large towns outside the metropolitan area, with their populations, are Newcastle, 14,800; Broken Hill, 20,790; Bathurst, 9,300; Goulburn, 10,700; Parramatta, 13,500; Maitland, E. & W., 10,600; Wickham, 5,900; Grafton, and South Grafton, 6,300; Albury, 5,700; Hamilton, 5,350; and Tamworth, 5,500.

[NORFOLK ISLAND, the residence of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn Island, is attached to New South Wales, and was given a constitution with a governor and elective council in 1895. Governor, Col. Spalding. Pop. about 750.]

Lord Howe Island (pop. 55) and Pitcairn Islands are also dependencies.

Sydney, *via* Suez Canal, is 12,043 miles from London; transit from 30 to 43 days. Telegrams, 4s. 11d. per word.

VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), from which it was severed, and erected into a separate colony, in 1851; and although one of the youngest, and, in point of area, the smallest colony on the Australian continent, is still almost the most populous and probably the wealthiest. It comprises the south-east corner of Australia, at that

part where its territory projects farthest into the southern latitudes: it lies between the 34th and 39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 490 miles, its greatest breadth is about 300 miles, and its extent of coast line nearly 700 miles. The entire area comprises 87,884 square miles, or 56,245,760 acres, of which 2,864,342 were under cultivation in 1895. Its population on the 30th June, 1896, was 1,177,444, including about 8,500 Chinese and aborigines. At the census of 1891 the native Victorians numbered about 713,000; natives of other Australian colonies about 80,000; English, 163,000; Irish, 85,000; Scottish, 51,000; Chinese, 8,000; and natives of other countries about 40,000. Nearly four-fifths of the population are Protestants, while the Roman Catholics number about 250,000. The Victorian aborigines at the time of the first colonisation of the district were, according to the most trustworthy estimates, about 15,000 in number; in 1851 the official return gave 2,693, while the census of 1891 showed them to be as few as 565 (325 males and 240 females). The birth-rate of Victoria for 1895 was 28·56 per 1,000; the death-rate, which is remarkably low, was 13·25 per 1,000. Victoria is the principal gold-producing colony of Australia, to which it owes its extraordinarily rapid progression: from the discovery of gold in 1851 to the end of the year 1895, the quantity raised—60,186,321 oz., estimated at £4 per oz.—amounted in value to £240,745,284. During the year 1895 the gold produced in the colony amounted to 740,086 ozs. The value of other minerals raised to the end of 1895, consisting principally of tin, copper, and antimony, is estimated at about £1,459,929. From its geographical position it enjoys a climate far more genial to Europeans than any other colony within the continent of Australia. There were 3,120 miles of railway completed at the end of June, 1895, all of which belonged to the Government, the capital cost amounting to £37,922,206, or an average of about £12,151 per mile. Of this amount £3,147,940 was paid from general revenue, the remainder being raised by loans. The net income, after paying all working expenses, was £1,038,198, equivalent to a return of nearly 2·75 per cent. on the mean debenture capital. There were 772 stations for electric telegraphs, extending over 7,091 miles (poles), which produced a revenue of £95,896 in 1895, the total mileage of wire being 14,409, and the telegrams transmitted numbering 2,036,449. There were also 10,822 miles of telephone wire in connection with exchanges, &c. The chief sources of income until 1862 were the customs duties and sales of public lands; but fresh sources of revenue, derivable from the railway system, public works, land tax, income tax, and stamp duties, have since been added. Wool, gold (including specie), wheat, flour, biscuit and butter are the staple productions of the colony. In 1895 the chief exports were of the following respective values:—Wool, £5,151,153; gold (including specie), £3,759,737; butter, £978,687; wheat, flour, and biscuit, £629,960; and live stock, £1,040,873. A trade is also springing up in preserved and frozen meats, the value of preserved meat exported in 1895 being £47,737, and of frozen meat £209,179. The principal imports of the colony in 1895 were wool (from across the border), £2,367,915; live stock, £361,569; sugar and molasses, £647,982; gold (including specie), £1,421,553; cottons, £927,269; woollens, £496,920; and timber, £174,146. The estimated number of sheep in 1894-95 was 13,180,943.

Agriculture, although formerly neglected, has of late years much improved, wheat and oats being the two cereals chiefly cultivated; the dairy industry has also made marked progress. Of the 2,864,342 acres under cultivation in 1895-96, 1,412,736 were wheat crops and 255,503 oats. In 1894-95, 1,909,972 gallons of wine were produced, being more than the production of the previous year by 419,788 gallons. Manufacturing industry has made much progress in Victoria. The shipping statistics of the colony furnish abundant evidence of the magnitude and value of its trade. In 1895, 3,837 vessels, of an aggregate tonnage of 4,348,686, with 164,411 men, entered and cleared at Victorian ports.

MELBOURNE, the chief city and the seat of government, also an episcopal see, is distinguished for its University, Museum, Mint, Public Gardens, Observatory, Public Library, Hospital, its churches and other institutions: with its suburbs it contained on 31 December, 1895, an estimated population of 452,258 inhabitants, being the most populous city in the southern hemisphere. The other important towns are Ballarat, pop. 45,326; Bendigo (Sandhurst), pop. 42,381; Geelong, pop. 24,575; Castlemaine, pop. 7,021; Warrnambool, pop. 6,600; and Stawell, pop. 5,250.

The Government is vested in a Governor appointed by the Crown, aided by an Executive Ministry consisting of 10 members, and a Parliament consisting of a Legislative Council of 48 members elected for 14 provinces, and a Legislative Assembly of 95 members for 84 districts.

Note.—The salaries of public officers were, with a few exceptions, reduced during the years ended 30th June, 1894, 1895, and 1896, by various percentages varying from 5 per cent. for salaries from £100 to £150, to 15 per cent. for salaries over £100.

SOUTH AUSTRALIA.

South Australia was established as a British Province by 4 & 5 Will. IV., cap. 95, but not proclaimed until 28th Dec., 1836, so that its history falls within Queen Victoria's reign. Originally it comprised 300,000 square miles, but the addition of the Northern Territory in 1873, and by other extensions, the area is now 903,650 square miles, or twice that of Germany and France combined, and fifteen times greater than England and

Wales. The Province is situated between 11° and 37° S. lat. and 129° and 141° E. long., and covers 12° of longitude and 27° of latitude; on the east are the colonies of Victoria, N.S.W., and Queensland, with Western Australia on the west. The total length is 1,850 miles with an extreme breadth of 650 miles, and the seaboard extends over about 2,000 miles.

Meteorology.—The mean temperature of the original colony is 74°, with a mean rainfall of 16 inches on the plains and 42 inches in the hills, the 60 years' average at Adelaide being 21 inches. The winter temperature averages 53° with 100° for summer, but the climate is so dry that the inconvenience is comparatively slight. The settled portions may not unfairly be compared to Southern France and Italy in respect of climatic conditions.

Water Supply.—The source of the Torrens river provides the capital with an abundant water supply; the reservoirs have a total capacity of 2,000,000 gallons, and it is claimed that Adelaide is the best drained city in Australia.

Government.—The Government is administered by a Governor and two Houses of Parliament; the Legislative Council with 24 members, and the House of Assembly with 54 members. There are 6 Cabinet Ministers, members of the Legislative and *ex officio* members of the Executive Council, of which the Governor is president. For both Houses the members are elected by ballot, and there is universal adult suffrage for all natural born or naturalized British subjects male and female, with a small property qualification in addition for electors to the Legislative Council, who numbered 45,843 (8,223 women) in 1895, those for the Assembly numbering 138,344 (59,935 women).

Local Government.—Local Government is administered by 33 Municipalities and 141 District Councils, the aggregate assessment of property within their boundaries being £2,463,563 and the revenue amounting in 1895 to £249,807, the expenditure, chiefly on roads, being £246,775.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and two Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 130 annually, which is at the rate of 1 in every 2,733 of the population. The Real Property Act makes the transfer of land as easy and cheap as any commercial transaction, and since the passing of the Act (1853) land to the value of £14,859,856 has been brought under the statute.

Vital Statistics.—The population at the 1891 census was 320,431, and on 30th June, 1897, 356,835 (184,241 males and 172,594 females), the capital containing 40,984, or, including suburbs, 145,212 inhabitants. The birth rate is 28·46, death rate 11·48, and marriage rate 6·20 per 1,000.

Religion.—About 85 per cent. of the whole population are Protestants, the remaining 15 per cent. being Roman Catholics.

Education.—There is a university at Adelaide, founded in 1831, and endowed by private munificence and Government grants, the total income being about £12,000. Degrees are granted in the faculties of Arts, Law, Medicine, Science, and Music. There are 8 professors and 13 lecturers, with 320 undergraduates; all classes are open to women. A State school of mines and industries has also been established, and there are about 1,000 students. Primary education is provided by the State, and controlled by a responsible

minister: it is secular, compulsory, and free; there are 640 State schools with 60,000 scholars, and the expenditure in 1896 was £124,110, the total outlay on school buildings amounting to £442,833. The Public Library, Museum, and Art Gallery are supported by the State at an annual cost of £8,777.

Finance and Currency.—The currency is in British sterling. There are 8 Banking Institutions in Adelaide with 133 branches, having a total liability of £7,797,520 and assets £7,754,673 in 1896; their note issue amounted to £399,787. The Government Savings Bank in Adelaide has 131 agencies with 102,981 depositors (£3,128,666 bearing interest at 3 per cent.).

The Public Revenue for the year ended 30th June, 1897, amounted to £2,628,049, of which sum £924,644 was raised by taxation (customs, and land and income tax), £1,020,925 accruing from railways; £259,755 from posts and telegraphs; £120,410 from crown lands; £98,648 from waterworks, and £224,036 from miscellaneous sources. The Expenditure was £2,615,850, including £947,824 for interest and redemption of debt; £622,271 for railways; £199,922 for posts and telegraphs; £141,836 for crown lands; £140,000 for education, and £705,834 for ordinary Government services.

Debt.—The Public Debt amounted (30th June, 1897) to £24,414,000, having been raised for railways (£12,330,963); waterworks, &c. (£4,500,220); telegraphs (£879,118); roads (£1,580,784); harbour improvements (£1,460,378); school buildings (£191,400); defences (£373,162); and other public purposes. It is at the rate of £64 11s. 9d. per head of the population, and bears an average interest of 4 per cent.

Commerce in 1896.—Total value £14,754,824, or £42 per head of the population, an increase of 50 per cent. since 1887:—

	Imports from.	Exports to.
United Kingdom	£2,220,611	£2,286,740
British Colonies	4,193,314	4,481,444
Foreign Countries	746,845	825,870

Shipping.—The total tonnage inwards and outwards in 1896 was 3,317,887 tons, or double that of 1887; 2,744,085 tons were British, and 573,804 tons were Foreign.

Railways.—The total length of Government lines open in 1896 was 1,724 miles, and Adelaide is in direct communication with her ports and with the capitals of the other colonies. Melbourne is distant 483 miles, Sydney 1,059 miles, and Brisbane 1,780 miles, two trains daily running each way. The total cost to 30th June, 1897, was £12,573,393 or £7,305 per mile; the working expenses in 1895 were £604,189 and the net receipts £438,269, or 3½ per cent. on the cost. The whole system is controlled by a Railway Commissioner.

Posts and Telegraphs.—The Adelaide and Port Darwin line of cable was laid in 1872, the whole cost (£515,000) being borne by the colony; the total length of the cable is 1,975 miles; this completed intercommunication with the other capitals and the outside world. There are in addition 5,865 miles of local lines and 254 stations, the number of messages being 19,530 in 1896. The combined receipts of the Post and Telegraph Services was £259,895 in 1896-97, with a net profit of £59,973.

Agriculture.—Of the total area about two-thirds are farmed or grazed, and 2,584,395 acres cultivated. The colony produces wheat of the finest

quality, there being 1,693,045 acres in 1896-97; other crops are hay, 339,257; oats, 40,215; barley, 14,484; and potatoes, 6,417 acres, with 512,561 acres lying fallow. The quantity of wheat produced in 1896-97 was only 2,804,493 bushels, as against 9,240,108 bushels in 1892-93, and other crops have diminished in like manner, owing to the unprecedented drought of 1896. English fruit, as well as oranges, lemons, almonds, and olives, is being successfully grown, and fruit drying is becoming a profitable industry.

In 1887 there were 4,590 acres of vines, and in 1896, 18,333 acres, the export of wine being 23,787 gallons in 1887 and 391,233 gallons in 1896. Brandy and other spirits are also produced. The export of South Australian wines to the United Kingdom is handicapped by the imposition of a duty higher than that on ordinary French wines.

Sheep and Cattle.—There were 6,323,993 sheep in 1896, and 47,042,861 lbs. of wool (valued at £1,228,991) were exported in that year, cattle numbering 337,225 and horses 177,078; 4,616,675 lbs. of butter were made, and 1,733,420 lbs. (value £70,459) exported in 1895.

Mines and Mining.—Copper is widely distributed in lodes throughout the colony, in addition to gold, silver, lead, manganese, bismuth, and iron-coal; about £2,000,000 worth of gold has been produced since 1852, and £20,000,000 of copper since 1844, while the silver mines at Broken Hill have produced over £19,000,000 since 1883.

Defences.—The military defence of the colony is entrusted to a volunteer force and militia, the latter, which embraces cavalry, artillery, and infantry, being 1,736 all told. Two land batteries, one at Glanville and the other (having some heavy armaments) at Large Bay, have been constructed to resist attacks by sea; and there is one gun-boat—the *Protector*—belonging to the colony to aid the land defences.

Revenue (1895, £2,553,510), 1896 £2,628,049
Expenditure (1895, £2,487,008), 1896 ... 2,615,860

grams, 4s. 9d. a word.

QUEENSLAND.

This colony, situated in lat. 10° 40'—29° S., and long. 138°—153° 30' E., comprises the whole north-eastern portion of the Australian continent. It was formerly a part of New South Wales, but was separated therefrom, and erected into a distinct colony, in December, 1859.

Its eastern seaboard was discovered by Captain Cook in 1770; some years afterwards its coast was visited by Capt. Flinders; but the first attempt to explore and settle any portion of the interior was made by Oxley, the Surveyor-General of New South Wales, who, in 1823, entered the River Brisbane, and selected the site of its future capital city of that name on a spot about 20 miles from its mouth, in Moreton Bay. The subsequent settlement of the country has followed the discoveries of a series of explorers.

Queensland proper possesses an area of 668,497 square miles (i.e., equal to more than 5½ times the area of the United Kingdom), of which the Government have parted with the fee simple of 12,850,842 acres; under a system of deferred payment, 1,776,034 more are in process of alienation out of the total of 427,838,080 acres, but an additional area of 254,787,200 acres has been leased out for sheep and cattle runs, large tracts of recently-explored country on the borders of the eastern boundary of South Australia having been taken up and stocked during the last few years. Most of the productions of both temperate and tropical countries can be cultivated with success in Queensland. Wheat, oats, and barley flourish on the downs, and are used both for grain and also as hay and green food for cattle; while a still larger area is devoted to maize, which yields an average crop of about 25 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, and various English fruits. In the year 1896, 100,774 tons of sugar were produced. The chief articles of export, the produce of the Colony, in 1896, were:—Wool, £2,976,984; gold, £2,090,224; silver, lead, £59,188; tin, £46,779; pearl and tortoise-shell, £98,893; meat, £845,779; extract of meat, £52,758; green fruit, £87,013; oysters, £17,144; béche-de-mer, £4,334; sugar, £863,080; timber, £5,427; hides and skins, £449,265; coal, £10,353; tallow, £337,967; live stock, £1,151,306. The climate generally may be considered sub-

tropical; the summer is the rainy season, and is naturally hot, but even in winter the vegetation of Queensland is not wholly arrested. At Brisbane the average temperature for 1895 was 68°6'; the maximum reading for 1895 in shade was 93°0' and the minimum 36°4'. Wool is at present the staple production; rich gold, copper, tin, lead, quicksilver, antimony, and coal deposits are found in several districts; timber also of fine quality for cabinet manufacture, the Moreton Bay pine and the *Dammara robusta*, together with the cedar of Queensland, forming valuable products for export. The broad plains afford the richest pasturage. At the end of 1896, the horses numbered 452,207, and the cattle, 6,507,377. The official returns give 19,593,696 sheep, and 97,434 pigs. The population of this vast territory at the end of 1896 was estimated to be 472,179, consisting of 264,613 males, and 207,566 females.

At the end of 1896 there were 2,430 miles of railway open; the length of telegraph wires being 18,035 miles, and the number of post-offices 1,092. In 1896 there were 772 State schools in operation, with 1,717 teachers and an average daily attendance of 54,316 children; and 175 private schools, with an average attendance of 10,510.

Among statistics of a miscellaneous character that testify to the vigour and prosperity of Queensland are the returns of banking deposits, which on the 31st Dec., 1896, were £10,879,640, apart from the £3,329,380 in the hands of the Government savings bank at the end of the year. In recent years Deposit and Savings Banks have been carrying on business in Brisbane, and are now holders of considerable sums of money.

The shipping trade of Queensland is considerable, the number of vessels entered inwards during 1896 being 649 (tonnage, 562,759), and the number outwards 645 (tonnage, 531,289). The defence of Queensland was provided for by an Act of Parliament passed in 1884, under which a force of about 3,000 men are at present enrolled. These comprise 3 classes, "Permanent Defence," numbering about 150; "Defence" (paid for each day's drill) some 2,000 strong, the rest being "Volunteers." Besides these, however, every male above 18 and under 60 helps to form one of four lines of "Reserves" according to his age and conjugal condition, and is liable for military service if required. The marine defences include a battery at Lytton commanding the entrance to the Brisbane River, and at Thursday Island commanding the Torres Straits, and some torpedo works carried out under the advice of Sir W. Jervoise. The colony possesses, in addition, a torpedo boat, two gun-boats, and a picket-boat; also five Naval Reserve corps.

Amount of public revenue in 1896	£3,613,150
Amount of public expenditure, 1896 ..	3,604,263
Public Debt, 31st December, 1895	31,873,934

	1,708,395
	3,158,173

The contour of the Queensland coast-line and

the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, and Adelaide; hence we find numerous ports of considerable size extending along the coast, the chief of them being Brisbane (pop. 100,913), Rockhampton (14,392), Maryborough (11,724), Townsville (10,356), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Among other places of importance are Ipswich (13,059), Toowoomba (10,936), Charters Towers (13,320) and Gympie (10,972).

The Constitution was slightly altered by an Act of 1869, but is now very similar to that of the other Australian colonies, and comprises a Governor, Legislative Council, and Assembly—the former consisting of 39 members, nominated for life by the Crown, and the latter of 72 members elected by the colonists. The administration of the law is in the hands of the Supreme Court, attached to which there is a Chief Justice, together with four puisne judges, and in those of the inferior courts, which are constituted as in New South Wales.

WESTERN AUSTRALIA,

includes all that portion of the continent west of 129° E. long., the most westerly point being N 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length therefore is, from north to south, 1,450 miles, and 850 from east to west. It embraces an area of 975,920 square miles. A very large proportion of this is heavy timber country. The jarrah (*Eucalyptus marginata*), sometimes erroneously called mahogany, covers immense tracts of land in the S.W. portion of the colony: its timber is extraordinarily durable, and as it resists the white ant and the "Teredo navalis," it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandal-wood (*Santalum ygnorum*) has long been an article of export; the eucalypt (*Eucalyptus gomphocephala*) and karri (*Eucalyptus diversicolor*), eucalypt of enormous size, are valuable timber trees. The "karri," which sometimes attains the height of 300 feet, is considered to be equal to the "jarrah" for many purposes. The occupied portion of the colony extends along the western coast for about 1,200 miles, while the mining population has penetrated about 350 miles into the interior, and the population, June 30th, 1897, was 157,819. The average temperature of Perth (lat. 32° S.), for the past nineteen years, was 64.5°, while the mean for the barometer was 30.047 inches. The climate is, undoubtedly, one of the healthiest and most enjoyable in the world; from the northern extremity to the southern it varies considerably, in the south being like that of France, but of a higher temperature; while in the north it is hot, but tempered by cool sea-breezes, and the atmosphere, as a rule, is free from the moistness characteristic of tropical climates generally. There are two seasons, the wet and the dry, the former lasting from April to September. The total rainfall at Perth during 1895 was 33.01, the average for the past 19 years being 33.367. The colony was first settled in 1829, and for many years made but little progress. It is, however, at the present time giving every indication of very rapid development. The chief products are gold, wool, timber, pearls and pearl-shells, lead, copper, tin, horses, and cattle. Cultivation has in the past been retarded by want of sufficient labour and means of transport; large tracts of fertile soil, in the south-western districts, where sandalwood and other trees grow abundantly, are suitable for the culture of the vine, olive, and fig. The climate and soil are admirably adapted for silk-growing and for vintage purposes, the latter of which will, in all probability, prove in the future one of the most important industries of the colony, and there are at present 2,294 acres of vineyards in the colony. Good wheat-growing soils also exist in large areas in the southern division, and the produce is of excellent quality and abundant yield. At present there are, however, only 163,288 acres under cultivation. Magnetic iron, lead, copper, and tin ores exist in large quantities. The Yilgarn and Coolgardie goldfields (situated about 350 miles to the eastward of Perth), as well as other fields, are being rapidly developed.

the export of gold being 231,512 ozs. in 1895 281,265 ozs. in 1896, and 265,230 ozs. in the first six months of 1897; about 191,832 ozs. of gold having been already obtained from the former, and 339,673 ozs. from the latter, and there seems to be every prospect of the fields proving the richest in Australia. Gold is also being found in the Kimberley, Pilbarra, Ashburton, and Murchison districts. The total amount of gold exported from the colony from 1886 to 31 October, 1897, is about 1,494,363 ozs. There are 1,490 miles of railway open (30 June, 1897); the Eastern and Great Southern Railways connect Perth, the capital of the colony, with Fremantle and Albany (King George's Sound), the two principal ports. Railway communication has also been established between Perth and Kalgoorlie, and between Perth and Coo. There is direct telegraphic communication with England by the Eastern Extension Telegraph Co.'s cable from Roebuck Bay on the N.-W. coast, in addition to the line through Eucla to Adelaide. The imports chiefly consist of sugar, tea, tobacco, spirits, beer, soap, ironmongery, clothing of various kinds, &c. The exports are of wool, gold, jarrah and karri timber, lead, tin, copper ore, whale oil, guano, sandal-wood, pearls and pearl-shells, kangaroo skins, &c. The estimated value of the exports for 1896 was:—Wool, £257,506; timber, £116,420; sandal-wood £65,800; pearls, £20,000; pearl-shells, £30,213; gold, £1,068,808; guano, £4,506; tin ore, £4,338; skins, £18,111. The stock returns of the colony are as follows:—Horses, 57,527; cattle, 199,793; sheep, 2,243,976; and pigs, 31,154. In 1896 the vessels entered inwards numbered 731 (tonnage, 1,079,329); and those outwards 479 (tonnage, 859,621).

Revenue (1886, £388,564) 1896	£2,440,390

			466,895

Under an Act of the Imperial Parliament, 53 & 54 Vict. c. 26, the colony is ruled by a Governor appointed by the Crown, a Legislative Council, and a Legislative Assembly. This Act was proclaimed and came into operation 21st Oct. 1890. Of the population one-half belong to the Church of England, one-fourth are Roman Catholics, and the remaining fourth belong to various other denominations. The Bishop of Perth is assisted by a Synod in which the lay element forms a prominent feature. The Synod was established in 1872, and so far appears to work well. The educational system is compulsory; and the numerous elementary schools, which exist all over the colony, are under the control of the Minister of Education. There is a school in Perth for the higher education of boys. The total amount expended on education during the year ended 31st December, 1896, was £32,750.

The principal towns in the colony are:—Perth (pop. about 25,000), on the right bank of the Swan River estuary, 12 m. from Fremantle; Fremantle

(15,500); Albany (3,500), and Geraldton (3,000); Coolgardie (15,000), Kalgoorlie (7,000), Southern Cross (15,000), Cue, Esperance, York, and Guildford (from 1,000 to 3,000 each). There are, also, numerous smaller townships scattered throughout the colony, e.g., Bunbury, Busselton, Bridgetown, Pinjarra, Newcastle, Northam, Marble Bar, Cossack, Roebourne, &c.

• And Allowances.

NEW ZEALAND,

a colony in the South Pacific Ocean, consisting of three islands, known as the North, Middle (or South), and Stewart Islands, situate about 1,200 miles E. of New South Wales, between 33°—50° S. lat. and 162° E. long.—173° W. long. Portions of them were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1814, but no colonisation took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area (inclusive of the Auckland and Kermadec Islands), is stated at 104,471 square miles, or 66,710,320 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 44,468 sq. miles; Middle Island, 58,525; Stewart Island, 665, with

only 252 inhabitants; and an adjacent group, named the Chatham Islands, contain 375 sq. miles.

The European population of New Zealand was ascertained by the Census taken on 12th April, 1896, to be 703,360 (371,415 males and 331,945 females). The native population (Maoris) was found by a Census taken in February, 1896, to be 39,854 (21,673 males and 18,181 females), chiefly in the North Island, making the total population of the colony, including Maoris, 743,214 persons. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., so long as they desired to retain them; the right of pre-emption was, however, reserved to the Crown if they wished to alienate any portion. This right was abolished by legislation in 1862, when the Crown relinquished its right of pre-emption, whilst at the same time the purchase of native lands for the Crown did not abate, but continued side by side with the private purchases until 1894, when the right of private purchase was withdrawn. The seat of government was at first fixed at Auckland, but was removed to Wellington in 1865.

New Zealand in many parts is very mountainous; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The geographical position and physical features of these islands tend naturally to render the climate greatly varied; yet it is remarkable for its salubrity, and resembles in many respects that of Great Britain, though its atmosphere is drier and more elastic. The extremes of daily temperature vary throughout the year only by an average of 20°: London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole colony for the different seasons is:—Spring, 55°; Summer, 63°; Autumn, 57°; and Winter, 48°. The climate, in short, is admirably adapted for raising every fruit, flower, and edible that flourishes in Great Britain. Amongst the productions most peculiar to New Zealand are the Kauri pine (found only at the northern extremity of the islands), much valued for ship-building, from its lightness and elasticity, the resin of this tree forming also one of its most valuable exports, Kauri gum; and the native flax, considerable quantities of which are transmitted to the United Kingdom and the United States of America for the manufacture of ropes and twine. Wool is largely produced, tallow and timber are also among the principal exports of the colony, and a large and increasing trade in frozen meat has been developed. Gold mining, both alluvial and quartz, is an important industry in many districts, and a rich iron ore, in the form of iron sand, has been found in Taranaki. Coal is widely distributed, and copper is met with in several localities.

The total extent of land under all kinds of crop (excluding lands in artificial grasses), and of land broken up but not under crop, is (1897) 1,451,073 acres, while there are 10,045,273 acres of land in sown grass of which 5,736,558 acres had not been previously ploughed. The value of the principal articles of export for the year 1896 is as follows:—Wool, £4,391,848; frozen meat, £1,251,993; agricultural products, £572,355; gold, £1,041,428; Kauri gum, £431,233; tallow, £208,881; and timber, £133,511. In April, 1896, the number of sheep was 19,138,493; horned cattle, in November, 1896, 1,138,572; and horses, in November, 1896,

249,732. In March, 1897, there were 2,018 miles of government railway lines in working order, and 124 miles more under construction; and the colony possesses in addition 167 miles of private lines, together with an excellent coaching system. The shipping trade is also considerable, and regular lines of steamers run between the numerous ports, besides direct steam communication with England. During 1896 the vessels entered inwards numbered 393 (tonnage, 614,097); and those entered outwards 592 (tonnage, 627,659).

	7,541,981

The General Government consists of a Governor, aided by a Ministry, a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for seven years only), at present consisting of 46 members, and a House of Representatives, consisting of 74 members elected for three years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election, nor may they be appointed to the Legislative Council.

The State system of education is free, secular, and compulsory. There are (December, 1896) 1,533 public primary schools, with 3,515 teachers and 131,037 scholars; there are also 283 private schools, with 13,547 scholars, and, in addition, 74 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 24 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation of the colony amounts to 32,000,000 letters and post-cards, 13,000,000 newspapers, and above 13,000,000 books and packets, and the work is effected by 1,464 post-offices. There are 6,283 miles of telegraph line carrying 16,470 miles of wire. The administration of the law is carried out by a Supreme Court, consisting of a Chief Justice and four puisne judges, and by district judges, stipendiary magistrates, and justices of the peace.

New Zealand has 4 torpedo-boats.

CAPITAL, Wellington, in the North Island.

The population of the chief cities and towns on 12th April, 1896, was as follows:—Wellington (and suburbs), 41,758; Auckland (and suburbs), 57,616; Dunedin (and suburbs), 47,280; Christchurch (and suburbs), 51,330; Invercargill (and suburbs), 9,996; Napier, 9,231; Nelson, 6,659; and Oamaru, 5,225. COOK ISLANDS FEDERATION.

A group of 6 islands, with a few islets, situate in the Eastern Pacific between 18° 15' to 21° 47' S. lat. and 157° to 160° W. long. The population numbers about 8,000 Maoris, and 150 to 200 of European and other nationalities. The chief island is Rarotonga, about 23 miles in circumference, with a population of 2,500. The chief products are coffee, copra, and lime-juice, oranges and other tropical fruits. The Exports in 1896 were £2,709—the Imports £23,068. The Chief of the Federal Government is Makea Takau-Ariki Vaine (Queen) of Avarua in Rarotonga. Parcels 1 lb. 1s. 2d., then 10d. per lb. to 11 lbs.

TASMANIA

is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, in which are situated the Furneaux Group and King Island, included within the colony. It lies between $40^{\circ} 33' - 43^{\circ} 39'$ S. lat. and $144^{\circ} 45' - 148^{\circ} 30'$ E. long., and contains an area of 26,215 square miles, or 16,778,000 acres of land, of which, on 31st December, 1896, 229,529 acres were under crop, and 203,306 under artificially-sown grass; wheat 74,516, barley 3,988, oats 44,768, potatoes 21,651, hay 47,798. The statistics for 1896 show that 723,838 acres were leased from the Crown principally for pastoral purposes, besides numerous islands. Agricultural land in a state of nature can be selected for purchase at £1 an acre for cash, or at £1 6s. 8d. to be paid off in yearly instalments extending over fourteen years. The estimated population, 31st December, 1896, was 166,113, and contains representatives of all the principal religious bodies; half of them are stated to belong to the Church of England, and are under a bishop and 58 clergymen. The Roman Catholic Church, to which about 20 per cent. of the population belong, has also an archbishop and coadjutor bishop in the island; and the various Nonconforming bodies have their synods, presbyteries, and conferences as in Great Britain. The aboriginals have become quite extinct, the last, a female, "Truganini," having died in 1876. This island was first discovered by Tasman, in December, 1642, and named by him "Van Diemen's Land," in honour of his patron, the then governor of the Dutch possessions in India. It was subsequently partially explored by Captain Cook. In 1803 Lieut. Bowen was despatched from Sydney with a few soldiers and convicts to form a penal settlement, and finally fixed upon the spot where Hobart now stands. In 1825 it was severed from New South Wales and formed into a distinct colony. Transportation of criminals was abolished in 1853, and the name officially changed from Van Diemen's Land to Tasmania. The climate is fine and salubrious, and well suited to European constitutions; it is, in fact, the healthiest of the whole Australasian group. The hot winds of Australia do not reach the island. At Hobart in 1894 the mean annual temperature being $55^{\circ} 00'$, the mean summer temperature being $62^{\circ} 7'$, and that of winter $47^{\circ} 9'$. The thermometer rarely rises as high as 100° or falls below 29° . The average rainfall for 1894 was 27.39 inches. The surface of the country is generally undulating and covered with forests. There are many mountains of from 1,500 to 5,000 feet in height. There are also several wide expanses of level, open plains. The chief products of the colony are wool, gold, silver, copper, timber, tin, and fruit; the wool is much esteemed, and commands a high price in the English markets. Tasmanian stud sheep are in great request in the other colonies, and bring high prices. The live stock of the colony is celebrated for its general excellence, and great attention is paid to its improvement; the estimated totals on Dec. 31, 1896, were as follows:—Sheep (and lambs), 1,650,567; cattle, 157,730; horses, 29,547; and pigs, 70,142. The wheat ranks high for its quality; the yield per acre is large, and the sample heavy. The woods of Tasmania are scarcely yet fully appreciated; the sources of supply are practically inexhaustible, abounding in the most beautiful cabinet woods and the largest-size timbers, adapted for every variety of

purpose. (A small consignment of wood blocks consisting of blue gum and stringy bark was sent to London for paving purposes in 1894.) The fauna of the colony are of special interest, and include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. The mineral kingdom is also well represented, and of late great attention has been directed to its development. The silver fields on the west coast have become the leading mineral feature of the colony; over 49,000 acres have been taken on mineral leases, and a large population with considerable capital has been attracted. Mines of both lode and stream tin, of great richness, are being worked in the north-western and north-eastern portions of the colony. The value of tin exported in 1896 was £159,038, of silver £222,948, and of copper £1,659. Iron-ore exists in nearly every district. Gold has been found in many places; the amount exported in 1896 was £232,180. Coal, of a good quality, and in easily-accessible positions, is very generally distributed over the island. Jams and green fruit to the value of £169,705 were exported in 1896. There are in all 475 miles of railway open, including the main line running from Hobart to Launceston, through the island. There are 216 telegraph stations, with 3,028 miles of wire; a submarine cable (427 miles) communicating with the Universal Telegraph System; 544 miles of telephone; 328 post-stations, and 2,495 miles of post roads. The shipping of Tasmania is considerable. On Dec. 31, 1896, the total registered shipping for the year was 44 steamers and 159 sailing vessels, with a total tonnage of 16,535. The inward entries during 1896 were 661 (tonnage, 449,323); and the outward entries 678 (tonnage, 441,538). The present military defence is mainly composed of volunteers, who number 499, and 966 of all ranks in the Country Rifle Clubs. On the Derwent and the Tamar, batteries have been constructed, and the colony possesses a torpedo-boat.

With the object of stimulating production direct from the soil, a Department of Agriculture was formed in 1892. There is a central Council, and branches in the various agricultural districts. Through these Boards the cream of the experience of farmers is collected and disseminated, and the Council provides expert and scientific assistance.

Primary education is administered by a Department, under which are 270 State schools.

Amount of public revenue, 1896	£797,976
Amount of public expenditure, 1896	750,241
Public debt, 31 December, 1896	8,251,778
Total imports, 1896	1,192,410
Total exports, 1896	1,496,576
Imports from United Kingdom, 1896	423,784
Exports to United Kingdom, 1896	315,978

The Constitution of Tasmania was settled by Local Act (18 Vict., No. 17). By this Act the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 18 members, elected for six years; and the latter of 37 members, elected for 3 years. The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. For local purposes the island is divided into municipal, police, and road districts, which elect their own councillors and trustees.

CAPITAL, City of Hobart. Population, with suburbs, 36,300. Other towns are Launceston, pop. 23,122, Zeehan, Ulverstone, E.

FIJI

is a group of 200 to 250 islands in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,451 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji), and Vanua Levu (Great Land). The area of Viti Levu is 4,112 square miles, and that of Vanua Levu 2,432 square miles. The island of Rotumah (pop. 2,156) was annexed in 1881. The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the breadfruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), cocconut, sugar-cane, tea, cotton, maize, tobacco, and arrowroot. Sugar, pearl-shells, maize, béche-de-mer, and copra and cocconut oil, were for some time the chief exports, but the cultivation of fruit, especially bananas and pine-apples, for export to Australia and New Zealand, has extended rapidly of late years, and the value of

this export has of late been second only to that of sugar. Fiji was ceded by its chiefs to the British Crown, and the islands were formally annexed by Sir Hercules Robinson, on Oct. 10, 1874. Sir Arthur Gordon (now Lord Stanmore), the first Governor, landed in the colony in June, 1875. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of three official members. Laws are passed by a Legislative Council, of which the Governor is president, and which contains six official and six unofficial members, all nominated by the Crown. Native administration is carried on through the chiefs under the Governor's supervision. The population (31 Dec., 1896) was 120,500; comprising 100,321 native Fijians, 10,433 Indian immigrants, 3,292 Europeans, and some Polynesians, half-castes, and Chinese.

Public income, 1896	£73,869
Public expenditure, 1896	73,099
Public debt, 1896	218,897
(of which £98,595 is to the Imperial Government, bearing no interest)	
Imports from British colonies, 1896	230,805
Exports to British colonies, 1896	401,506
Total imports, 1896	242,492
Total exports, 1896	435,342

CAPITAL, Suva, in the island of Viti Levu.

Suva is 11,000 miles from London: transit from London *via* Vancouver, about 33 days; parcels, not ex. 1 lb., 1s., excess 8d. per lb. to 11 lbs.; telegrams sent by post from Sydney or Auckland.

BRITISH NEW GUINEA.

Papua or New Guinea, the largest island in the world after Australia, extends for 1,490 miles from N.W. to S.E. between the equator and lat. 12° S. and between E. long. 130° 50' and 154° 30'. Its greatest breadth is 430 miles, and its area about 306,000 sq. miles. The N.W. half, to the W. of 141° E. long., belongs to Holland, which annexed it in the 16th century. The E. portion was independent until 1884, when it was divided between Great Britain and Germany. The colony of British New Guinea comprises the southern and south-eastern shores of the island, from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of inter-

section of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between the 8th and the 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland; and furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude.

The extent of territory is about 90,000 square miles, about half as large again as England, with a small population, the number of which is at present unascertained, but is probably not over 150,000. All tropical trees and fruit grow abundantly. The most important export is beche-de-mer; pearl-shell, copra, gum, and sandal-wood are also exported, and alluvial gold has been found.

The territory was at first taken over as a Protectorate under the management of a Special Commissioner; but on the Colonies of Queensland, New South Wales, and Victoria undertaking to guarantee £15,000 a year for the cost of administration, which was further secured by a Queensland Act, the Queen's sovereignty was formally proclaimed on the 4th Sept. 1888, and the territory was constituted as a colony under the name of British New Guinea. It is governed by a Lieut.-Governor, with a nominated Legislative Council consisting of not less than two other persons.

The ports of Entry are Samarai, Port Moresby, and Daru.

CAPITAL, Port Moresby.	Pop., about 1,500.
Revenue, 1895-6,	£6,547; Expenditure, £15,000

Port Moresby is 12,000 miles from London; postage and parcels, same as to Queensland.

WESTERN PACIFIC.

There are a large number of scattered islands, or groups of islands, in the Pacific Ocean which are British possessions or under British protection. Among them are the islands known as Cato, Raine, Bell Cay, Bramble Cay, Pilgrim, Ducie, Bauman, Roggewein, Teinhoven, Coral, Dudosa, Suwarrow, Starbuck, Little Scrub, Palmerston, Surprise, Vostok, Willis's Islets, and many others: to which must now be added Christmas, Fanning, and Penrhyn Islands, which were formally annexed in 1898, the Hervey or Cook Islands, the chief of which is Bararotonga, over which a protectorate was established in the same year, and the Gilbert Islands, April, 1892. A Protectorate was established over the Southern Solomon Islands in 1893.

For the Western Pacific a High Commissioner has been appointed by the Crown, with jurisdiction over all islands in that portion of the ocean which are not within the limits of a British colony or within the jurisdiction of any civilized power. His functions are to carry out the provisions of certain Acts of the Imperial Parliament, passed in 1872 and 1875, for the protection of the Pacific Islanders, and to adjudicate upon disputes between British subjects living in the islands within his jurisdiction, which includes the New Hebrides, the Tonga, or Friendly Islands, the Samoan or Navigators Islands, and various other small groups. He is assisted by Deputy Commissioners, with criminal jurisdiction in cases punishable with less than 7 years' penal servitude, and with civil jurisdiction in Common Law, Equity, and Bankruptcy; and by Judicial Commissioners with powers analogous to those of the Supreme Court of a colony. There is a right of appeal in certain cases to the Supreme Court of Fiji. The expenses of the High Commission are defrayed from Imperial funds.

Greater Britain: The West Indian Colonies.

THE West Indies are an immense number of islands and islets, some of them mere rocks, extending from 10° to 27° North, and from 59° 30' to 85° West. They are divided by geographers into (1) the Bahamas, (2) the Greater Antilles, and (3) the Lesser Antilles, of which the last named are subdivided into the Leeward and Windward Islands. The islands lying off the coasts of South America and Central America respectively form two separate groups in addition to those already mentioned. The total area of the West Indies is probably about 95,000 square miles, of which the Greater Antilles occupy not less than 83,000 square miles. The prevalent character of the islands is bold and mountainous. In Cuba and Hispaniola the highest points are more than 8,000 feet above the sea-level, and in Jamaica there are hills almost as high. Others, too, among the smaller islands rise to between 4,000 and 6,000 feet in height, and several of them contain active volcanoes, while nearly all of them show signs of volcanic action. The climate is tropical, but the surrounding seas tend to counteract the otherwise intense heats of the torrid zone. The mean yearly temperature of the islands is about 78°, but that of the higher lands is often much less. Slight frosts occasionally occur in the higher regions of Cuba, but snow is never known to fall. The seasons alternate from drought

moisture, and in most parts of the archipelago there are two wet and two dry seasons. In the whole it may be said that the climate is generally healthy, and between the months of November and May in many of the islands it is delightful. During the great rains, however, intermittent fevers are prevalent. The vegetable productions of the West Indies are both varied and abundant, the principal articles of commerce including sugar, coffee, cocoa, cotton, pimento, nutmegs, indigo, tobacco, maize, guava, ginger, annatto, loes, sassafras, the castor-oil tree, and medicinal drugs. Of the more common fruits here are the pine-apple, pomegranate, cocoa-nut, cabbage-tree, oranges, lemons, limes, iron-tree, the mango, shaddock, papaw, banana, and plantain. Yams, sweet potatoes, and manioc also grow freely. The mountains in the greater islands furnish a varied abundance of timber, including mahogany, cedar, lignum-vitæ, iron-wood, Indian-fig, well adapted for cabinet-work, shipbuilding, and other arts. The grains of England are not grown in the West Indies. Indian corn yields abundant crops almost everywhere, while rice, as a profitable investment, is all but confined to the island of Trinidad. The total population of the West Indies is nearly 4,000,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The islands of the archipelago, at the time of their discovery, were inhabited partly by the Caribs, a fierce and warlike race, and partly by a less savage race known as the Arrowauks. Both these native Indian races, however, are now extinct, with the exception of a few scattered families. By far the largest of the West Indies are the magnificent islands of Cuba (see p. 577), and Hispaniola. Hispaniola is about 400 miles long from east to west, and has an extreme breadth of 150 miles. Its total area is about 28,250 square miles, and the official estimate of the population—probably too high—is 800,000. The Republic of San Domingo occupies the eastern part of the island, and that of Hayti the western part.

The first spot on which Columbus landed in the New World in 1492 was San Salvador, one of the Bahamas. On the same voyage Cuba and Hispaniola were discovered, and the other islands very shortly afterwards. For some time the West Indies remained in the undisputed possession of Spain, subject only to occasional visits from French and English ships. At the commencement of the 17th century, however, the English, French, and Dutch began to form settlements, and to import negroes from West Africa to work the plantations; and whenever war broke out in Europe it spread to the West Indies, where the most bitter struggles were carried on for the possession of these sources for the supply of sugar and other tropical products. These contests terminated in 1810 by the conquest of almost every island by Great Britain; but some of the most valuable were afterwards restored to their previous owners. At the present time the principal islands are divided as follows:—*British*: Jamaica, Turks and Caicos Is.; all the Bahamas; Antigua, Montserrat, Nevis, St. Christopher, Dominica, the Virgin and the Cayman Islands, Grenada, St. Vincent, Tobago, St. Lucia, Barbados, Trinidad; and the islands off the coast of British Honduras. *Spanish*: Cuba, Isle de Pinos, Porto Rico, Bieque, and Culebra. *French*: Martinique, Guadeloupe, Desadea, Marie Galante, Les Saintes, St. Bartholomew, and St. Martin (the last partly Dutch). *Dutch*: St. Eustatius, Saba, Bonaire, Curaçao, Aruba. *Danish*: Santa Cruz, St. Thomas, St. John. *Venezuelan*: Coche, Cuagua, Tortuga, and Margarita. *Independent*: Hispaniola, divided into the two Republics of Hayti and San Domingo.

Those of the West Indies belonging to Great Britain have an area of about 13,750 square miles, and a population of 1,350,000. In the early part of the century slavery existed in all the islands; and when it was abolished, and the protective duties repealed, an entire collapse took place, and many persons were ruined. They are now again resuming their proper position, and becoming in most cases the scene of a moderate prosperity. Attention has been turned to the development of other industries besides sugar and rum; in Trinidad and Grenada with cocoa and nutmegs, and in Jamaica with tobacco and fruit. The methods of sugar production have been slowly but steadily improved; and, under the government of the Crown, in most of the islands communication has been opened up, and railways and telegraphs introduced.

Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 32' North lat. and 76° 11'—78° 21' W. long. It is the largest and the most valuable of the British West Indian Islands, being 144 miles in

length and 49 in extreme breadth, containing an area of 4,193 square miles, and a population, in April, 1891, of 639,491, showing an increase during the previous decade of 58,587, and (1891) including whites, 14,692; coloured, 121,955; blacks, 488,624, and a number of Coolies and Chinese. It was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid. From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Western Peak of the Blue Mountains, an elevation of 7,350 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 185 miles of railway open. Telegraph stations and post-offices are established in every town and in very many villages. The number of accounts open in the savings banks was 29,719 (1897). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the United States. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the senior military officer, the Colonial Secretary, Attorney-General, Director of Public Works, and the Collector-General (all *ex-officio*), and of such other persons, not exceeding 10, as the Queen or the Governor provisionally may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, with Port Royal, the naval station, pop. 46,542; the next in importance are Spanish Town, pop. about 5,000, and Montego Bay, 4,803.

Public revenue, 1896-97	£777,123
Expenditure from income, 1896-97	824,102
Expenditure from loans, 1896-97	45,343

TURKS AND CAICOS (Cayos or Keys).

These islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1874 they were annexed to Jamaica, from the north-west of which they are distant about 430 miles. They have an area of about 223 square miles. The population in 1891 was 4,744, of which the principal island, Grand Turk, contains 2,500.

A Commissioner administers the affairs of the Settlement, assisted by a Legislative Board. This Board has sole control of local finance, and passes local ordinances; but the supreme legislative body is the Legislative Council of Jamaica.

Revenue, 1896	£14,247

THE BAHAMAS,

a chain of islands lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 5,794 square miles, and a population in 1895 of 50,599, the most part being whites, and the rest descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Mayaguana, Harbour Island, Great Inagua, and Andros Islands. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the Peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1896 were valued at £81,091. The fruit trade, principally with the United States, is also very important. The total value of pineapples exported in 1896 was £16,490, and of oranges £2,785. Bananas, coconuts, tomatoes, and various other kinds of fruit and vegetables are also exported. Mahogany,

lignum-vitæ, mastic, iron-wood, ebony, logwood, and satinwood are found throughout the islands; tobacco, castor-oil plants, and cotton flourish, but enterprise is lacking to encourage these industries. The fibre industry may now be considered as fairly established, the estimated land under cultivation of the fibre plant being about 20,000 acres. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a Legislative Council of 9 members, and a Representative Assembly of 29 members.

THE LEEWARD ISLANDS.

The Leeward Islands under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda, (2) St. Christopher and Nevis, with Anguilla, (3) Dominica under Administrators, (4) Montserrat, and (5) the Virgin Islands, each having their own local legislature. These five presidencies make up the colony of the Leeward Islands, which is administered by a Governor, to whom the Administrators and Commissioners are subordinate, and which has also a general Legislative Council possessing concurrent legislative powers with the local Legislatures on certain subjects. The federal colony in 1891 contained 127,723 inhabitants (58,780 males and 68,943 females). The General Legislative Council consists of 10 nominated and 10 elective members.

(1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6' N. lat. and 61° 45' W. long., and is about 70 miles in cir-

cumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 20,000 are under cultivation. The population (with Barbuda) in 1891 was 36,699, including 17,124 males and 19,575 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands. It is almost entirely given up to the cultivation of sugar, the export amounting to £50,989 in 1895; but it also exports rum, molasses, tamarinds, and arrowroot.

Amount of public revenue in 1896	£54,951
Expenditure in 1896	57,345
Amount of public debt, 1896	137,871
Imports, 1896, £135,627; exports, 1896	131,113

Its local Legislative Council is elective, but the franchise is somewhat limited. The principal town, St. John's, has a population (1891) of 9,738. *President & Island Sec.* (the Col. Sec. of the Leeward Islands), George Melville, C.M.G. .. £50
Auditor-Gen., E. A. Foster

Treasurer, W. D. Auchinleck

Magistrate, W. H. Whyham

Do., G. C. Evelyn

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 45' W. Area, 75 square miles. Population, 580. The island is flat and fertile, producing corn, cotton, pepper, and tobacco. It was formerly a possession of the Codrington family.

Magistrate, J. F. Smyth (acting)

Redonda, a small island with a phosphate industry, has a population (1891) of 120.

(2) ST. CHRISTOPHER (ST. KITTS) AND NEVIS (WITH ANGUILLA).

These two islands, with their dependency of Anguilla, were united in 1882 to form one presidency, and taken together they are at least equal in importance to Antigua, having a population, 1891, of 47,662. St. Christopher, popularly called St. Kitts, is situated in lat. 17° 18' N. and long. 62° 48' W., about 46 miles to the west of Antigua: it comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about five and a half miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of nearly 4,000 feet. St. Kitts is essentially a sugar island. Sulphur is found in the mountains, but is not made an article of commerce. Basseterre, on the south coast of St. Kitts, is the chief town and the seat of government; population, 9,997 (males 4,110, females 4,987).

Nevis (separated from St. Kitts by a strait some 3 miles wide) is but a single mountain rising 3,200 feet above the sea, and has an area of 50 square miles, with a population in 1891 of 13,087. Sugar, rum, and molasses are the only exports, but some proprietors have extensive plantations of the lime, and coffee is being grown. Chief town, Charlestown. Population (1891) 8,338.

Anguilla (or Little Snake) is about 60 miles N. W. of St. Kitts, 16 miles in length, and varies in breadth from 3 to 1½ miles, containing an area of 35 square miles. Population, 1891, 3,669, of whom hardly any are white. Salt, obtained from a small lake in the centre of the island, and phosphate of lime are the principal productions, besides cattle and garden stock.

Amount of public revenue in 1896.....	£49,560
Amount of expenditure in 1896.....	56,500

(3) DOMINICA,

The largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 16 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 55,000 acres are cultivated, the major part being difficult of access. It is very mountainous and picturesque, and abounds in rivulets well stocked with fish. It is of volcanic origin. There was a slight volcanic eruption in 1883, destroying 6 square miles of forest. Sulphur, thrown out of the soufrières, is very plentiful, and good game is abundant. Land may be purchased at about 10s. an acre. Population (1891), 26,841 (males 12,059, females 14,782). The natives still speak a French patois, resulting from their former connection with France. The principal productions are cocoa, sugar, coffee, molasses, rum, lime-juice, fruit, spices, and cabinet woods. The soil is good. The climate varies greatly according to the altitude: on the high lands it is excellent, but in the lowlands and the coast districts the mass of vegetable matter of various kinds keeps it unduly moist. There is a Legislative Assembly which controls local finance and administration, half the members of which are elective. The principal town is Roseau, on the south-west coast; population (1891) 5,186.

(4) MONTSERRAT

is situated in 16° 42' N. lat. and 62° 13' W. long., 25 miles S.W. of Antigua. It is about 12 miles in length and 8 in breadth, comprising an area of 47 square miles, and in 1891 a population of 11,762 (5,331 males, 6,431 females). It was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles: it contains an active soufrière and several hot springs. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown; the Montserrat company alone has a plantation of 600 acres, and annually exports about 100,000 gallons of lime-juice, valued at £7,426. Sugar is the crop of greatest importance, the export in 1896 reaching £14,437, but there are no first class sugar estates. The chief town is Plymouth, with a population (1891) of 1,475.

Public revenue, 1896, £7,775; expenditure, £8,732	
Amount of public debt, 1897.....	18,000
Total imports, 1896, £20,192; exports.....	25,929
Commr. & Treasurer, Edward Baynes.....	£500

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and Denmark, form a connecting link between the Greater and Lesser Antilles. They form a thickly studded archipelago of islands and rocks, the majority of which are mountainous. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1891 was 4,639. There is good pasturage for cows, sheep, and goats. Sugar and cotton are raised in small quantities, and fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda in past years. The capital of the group is Roadtown, on the south side of Tortola; population (1891) 403. The R.M.S. *Tyne*, subsidized by the Colony, calls at Tortola twice a month.

Public revenue, 1895, £1,533; expenditure, £1,954	
Imports, 1895, £4,576; exports, 1895.....	3,810
Commissioner & Treasurer, N. G. Cookman ...	£308

THE WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian islands includes Barbados, St. Lucia, St. Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. There is one governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. There is a Court of Appeal, consisting of the judges of the three colonies and of Barbados, a common Audit, and a common Lunatic Asylum; but, with this exception, each island retains its own institutions, and is governed by an Administrator subordinate to the governor. The population, April, 1891, was 135,976; and the total area 508 sq. miles. Governor and Commander-in-Ch., Sir Alfred

Moloney, K.C.M.G.	£2,500
Private Secretary, and Clerk of the Councils, Grenada, M. H. De la Poer Beresford...	425
Assist. Private Sec., H. B. L. Barker.	

Transit, about 14 days. Parcels, 8d. per lb. to 11 lbs. (St. Vincent, 7d.); telegrams, Grenada, per word, 7s. 9d.; St. Lucia, and St. Vincent, 7s. 7d.

GRENADA (AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30'—11° 58' N. lat. and 61° 20'—61° 35' W. long. and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. It contains about 85,121 acres, of which about 20,418 are cultivated, and it had, in April, 1891, a population (including some of the Grenadines) of 53,209. The country is mountainous and very picturesque. The Grand Etang, a lake on the summit of a mountain ridge about 1,740 feet above the level of the sea, and Lake Antoine, are the most remarkable natural curiosities. The climate is healthy like that of the other islands of the group. Grenada was discovered by Columbus in 1498, and named Conception. The colony was founded by the French in 1650, and surrendered to the

British in 1762; in 1779 it was retaken by the French, but in 1783 it was ceded by the Treaty of Versailles to Great Britain, in whose possession it has since remained. The soil is very fertile; amongst the principal products are cocoa, spices, sugar, rum, cotton, and coffee: large quantities of fruit are also grown. The chief production of the island is, however, cocoa (or cacao), of which 90,194 cwts. (valued at £159,519) were exported during the year 1896. Nutmeg cultivation now occupies a prominent position, and is being largely developed (2,225 cwt., valued at £11,084, were exported in 1896). The forests are rich in many valuable timbers, particularly bullet wood, locust, mahogany, white cedar, and galba; and vanilla and several varieties of gum-yielding trees have been found to be indigenous. Large numbers of turtle are also caught and exported, and whales aremet with, especially among the Grenadines. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour and coaling station.

Amount of public revenue in 1896	£56,275
Expenditure in 1896	60,253
Public debt, 1896	127,770
Total imports, 1896	154,405
Total exports, 1896	183,583

Colonial Secretary, Edward Rawle Drayton ..	£600
Treasurer and Postmaster, C. Falconer Anton	450
Chief Justice, Sir Joseph T. Hutchinson ..	1,000
Attorney-General, Leslie Probyn	700
Registrar, (vacant)	350

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The chief produce consists of cotton, ground provisions, and live stock. The largest island is Carriacou, attached to the Government of Grenada, pop. 6,031.

St. Lucia,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent and 21 miles S.E. of Martinique, is 42 miles in length with an extreme breadth of 21 miles; it comprises an area of 233 square miles, with a population (in 1895) of 45,906. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are—Sugar 7,949,528 lbs. in 1896, molasses, cocoa—which is now being extensively cultivated—and logwood. St. Lucia at present stands alone amongst British sugar islands in having inaugurated the Central Factory system of sugar-growing. The chief places are Castries, the capital (pop. 1895, 7,000), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W. I., is the second naval station of the empire in these parts, and a coaling dépôt. Extensive harbour improvements have been carried out at a cost of £100,000, and the port has been strongly fortified by the Imperial Government. In 1896, 435 steamers (tonnage, 574,244), entered Port Castries, and many British and foreign war ships coaled.

Amount of public revenue in 1896	£55,331
Amount of expenditure in 1896	56,060
Amount of public debt, 1896	202,280
Total imports, 1896	190,533
Total exports, 1896	136,295

Administrator & Col. Sec., C. A. King-Harman, C.M.O. (and £100 entertainment allowance)	£800
Treasurer, D. G. Garraway	500
Chief Justice, Arthur Child	700
Attorney-General, P. J. K. Ferguson	400

St. Vincent,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 square miles, and a population (in 1891), including dependencies, of 41,054. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

It is one of the last islands upon which a struggle took place between the aboriginal Caribes and the white man, and the north part of the island is still known as the Carib country.

The chief products are sugar, molasses, rum, arrowroot, cassava, cocoa, coffee, cotton, and spices. The St. Vincent arrowroot has a specially good name in London. Its chief imports are linen, cotton, and woollen manufactures, American flour, fish, &c. The upset price of Crown lands is 20s. per acre, cash, or £2 if spread over 5 years. The capital is Kingstown, on the south-west coast (pop. 1891, 4,547).

Amount of public revenue in 1896	£26,487
Amount of expenditure in 1896	27,591
Total imports, 1896	71,489
Total exports, 1896	67,192

Administrator, Colonial Secretary, Registrar, Treas. & Collector of Customs, Harry Langhorne Thompson, C.M.G.	£700
(and £100 table allowance).

---	-----

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4' N., and longitude 59° 37' W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres, or about 166 square miles. About 100,000 acres are highly cultivated. The population in 1896 was estimated at 182,286, being about 1,114 to the square mile. The principal exports are sugar, molasses, and rum. The imports are rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. This island is the headquarters of H.M. forces in the West Indies, under a major-general, who resides in the island. Barbados is a station of the West India and Panama Telegraph Company, has a railway across the island, a tramway through town and suburbs, and telephonic communication throughout the island. The deposits in the savings bank on Dec. 31, 1895, were £175,997. Besides various fire and life offices, the island has its own mutual life and fire insurance office. In 1861 a project

for supplying the town with water was completed; and the country districts will shortly receive a Government supply through about 200 miles of mains. Liberal provision is made for elementary education, and Harrison's College, a school organised on the lines of the English public schools, places Barbados in the front of the West Indies as regards higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government. The government consists of a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members elected yearly on the basis of a moderate franchise.

The chief town and port is Bridgetown (pop. about 21,000), on the shores of an open roadstead known as Carlisle Bay; Speightstown, on the west coast, is further to the north.

Revenue in 1895	£185,582
Expenditure in 1895	184,020

TRINIDAD AND TOBAGO.

TRINIDAD.

Trinidad is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3'—10° 50' N. lat. and 61° 39'—62° W. long., and is about 55 miles in length by 40 in breadth. It comprises an area of 1,750 square miles, with an estimated population of 248,404. The island was discovered by Columbus in 1498, and was first colonized in 1588 by the Spaniards; it capitulated to the British under Abercromby in 1797. The chief town and port of entry, "Port of Spain," population 1891, 33,273, is one of the finest towns in the West Indies. Other towns

of importance are San Fernando (pop. 6,570), about 30 miles south of the capital; Princetown (pop. 4,197), and Arima (pop. 3,553). A remarkable phenomenon is the pitch lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1896, 96,385 tons (£106,920) were exported. The soil is rich and productive, its most important products being sugar, cocoa, molasses, rum, and cocoa-nuts, and various kinds of timber and fruits. The chief exports (1896) were:—Sugar, 120,562,942 lbs.; rum, 95,151 gals.; molasses, 1,378,254 gals.; bitters, 31,645 gals.; and cocoa, 23,481,848 lbs. The total extent of land under cultivation is nearly 200,000 acres, nearly one-sixth of the whole island. Coal is found in Manzanilla, and is indicated in other parts of the island. There are 71 miles of railway open, and a further extension will shortly be available by which the interior will be opened up; harbour improvements, waterworks and sewage operations are also being undertaken. The island is crossed by the telegraph wire of the West India and Panama Company, and by Government telegraph and telephone wires. Twenty-seven steamers from Europe arrive every month, and four from the United States and Canada.

The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

Revenue, 1896, £618,332; expenditure... £594,462

Public debt, 1895

Total imports, 1895, £3,276,864; exports 2,665,104

TOBAGO,

originally settled by the English, was held for some time by the French, and eventually was ceded to England in 1783. For many years it was included in the government of the Windward Islands; but since the beginning of 1889 has been annexed to the Government of Trinidad, with its finances distinct and controlled by a partially elective Board of Finance. It is between 11° 9' N. lat. and 60° 43' W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long and from 6 to 7½ broad, and has an area of 114 square miles, with a population (31st Dec. 1891) of 18,692. The Crown lands, suitable for cocoa and other economic plants, will be offered for sale by the Commissioner, the prices varying from 5s. to £1 per acre. The island is one of the most healthy of the West Indies; the living is of the cheapest; the temperature varies from 81° in February to 88° in September.

There are only two towns in the island, viz., Scarborough, the capital (1,370), and Plymouth.

Revenue 1896, £9,321; expenditure

Total imports, 1895, £13,332; exports..... 10,765

Commissioner, William Low

Parcels, per lb., 8d., limit 11 lbs.

There are two leading groups of British Colonies in Africa:—the West African colonies, situated upon the tropical, fever-stricken coast to the north of the Equator; and the South African colonies, which occupy the southern extremity of the continent, and are generally healthy and well adapted for European settlement. There are also the island of Mauritius and its dependencies, which are usually regarded as belonging to Africa, and the islands of Ascension and St. Helena in the Atlantic. And, besides the colonies, there are now large portions of the continent under British protection, viz., the territories of the Royal Niger Company, the Niger Coast Protectorate, and the Sierra Leone Protectorate on the West Coast; those of the British East Africa Protectorate upon the East Coast; the British Central Africa Protectorate; the Uganda Protectorate, the Zanzibar Protectorate, the Witu Protectorate, the Bechuanaland Protectorate, and the territories of the British South Africa Company (Rhodesia) to the North of Bechuanaland and the Transvaal. A portion of the Somali coast with the Island of Socotra is British, and is comprehended in the Empire of India (see p. 441).

SOUTH AFRICA.

The South African Colonies are the Cape of Good Hope or Cape Colony, Natal, Basutoland, and Zululand; and Her Majesty exercises a Protectorate over part of Bechuanaland, the territories under the Administration of the British South Africa Company, and Amatongaland, as far north as the Portuguese frontier. The first among the colonies in wealth and importance is the great self-governing colony of the Cape. Further along the coast to the north-east are the self-governing colony of Natal, and the Crown Colony of Zululand; and beyond them is the territory of Amatongaland, which extends to the Portuguese territory of Delagoa Bay. Inland, to the west of Zululand and Delagoa Bay, is Swaziland, the administration of which is under the Government of the South African Republic in accordance with the convention of 1894 between Great Britain and the Republic. Then, further to the westward, and extending for some 400 miles from north to south and about the same distance from east to west, is the South African Republic or Transvaal, which is under the suzerainty of Great Britain as regards its foreign relations, but is otherwise independent. Between the Transvaal and the Cape Colony is the Orange Free State; and between the Free State, Natal, and the Cape Colony is the small British colony of Basutoland. To the westward of the Transvaal is British Bechuanaland, now a part of the Cape Colony, beyond which, upon the west and north, is a British Protectorate, extending westward to the boundary of the German Protectorate. Upon the north, the interior as far as the Lakes Moero, Tanganyika, and Nyasa is also under British protection. To the west of the 20th meridian the whole country from the Orange River to the Cunene River, with the exception of the Walfish Bay territory, which forms part of the Cape Colony, is under the protection of the German Empire. The eastern coast from Delagoa Bay northwards to Cape Delgado belongs to Portugal.

The total area of the British Colonies, excluding territory which is only protected, is more than 300,000 square miles. The white population as at the 1891 census was, Cape Colony, 376,987; Natal, 46,788; Bechuanaland, 5,211; Basutoland, 578.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Dutch East India Company took possession of the shores of Table Bay, established a fort, and occupied the lands adjacent, in order to be always ready with supplies for their passing ships. Until 1796 the Cape remained in the hands of the Dutch, when it was captured by an English force; but in 1803 it was restored to the Batavian Government. In 1806 it was for the second time occupied by a British force, and at the general peace of 1814 it was formally ceded to the British Crown.

The history of the subsequent expansion of the Colony, and the formation of the various States and Colonies which have grown out of it, will be found under the separate headings.

The main geographical feature of South Africa is the great mountain range which begins near the Orange River, and stretches for more than 1,000 miles, right through the Cape Colony and Natal, towards the north-east. Its direction coincides with that of the

sea-coast, from which it is never more than from 100 to 150 miles distant. Viewed from the seaward side it is a veritable mountain range, rising in places to the height of 10,000 ft.; but when surmounted it is seen to be properly but the broken edge of the great table-land, between 3,000 and 4,000 ft. high, which occupies the whole of the interior of South Africa. From the mountains to the sea the ground descends, not regularly, but by a series of terraces or steps; and, as the British possessions also extend for some miles from south to north, the differences of elevation and latitude produce in them many varieties of climate. As a general rule South Africa is dry and well suited to Europeans. It is also suitable to the members of the great Bantu family, to which the Kafirs, Zulus, Bechuanas, Hereros, and other tribes now inhabiting South Africa belong. These tribes have been gradually coming down by land from the north-east, while Europeans have been coming in by sea from the south; and between the two invading streams the aboriginal Hottentots and Bushmen have been almost crushed out of existence. The Bantus have shown no signs of dying out from contact with civilization; and in comparing South Africa with Canada or Australia as a field for colonization, it must always be borne in mind that in South Africa there are three distinct elements in the population—the Dutch, the British, and the Kafir or (as it is usually, though not quite correctly, termed) Native, element. To reconcile the divergent interests of these separate elements, and to secure that the whole population shall live peacefully together, is the great problem of South African administration.

POSTAGE.—Cape Colony entered the Postal Union on JAN. 1, 1895.

CAPE COLONY.

THE CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S.W. extremity of the continent of Africa; but the extensive colony of that name, in which are now included the Diamond Fields, the Transkei territories, Bechuanaland, and Pondoland, is washed by the Atlantic and Indian Oceans on the west and south and south-east, while upon the north and north-east it is bounded by the German Protectorate and each of the other colonies and states of South Africa. It reaches in S. lat. from 25° to 34° 50', and in E. long. from 16° 25' to 30°. Its extreme length from E. to W. is nearly 600 miles, and its breadth 450. It has a coast-line of nearly 1,200 miles, and an area of 276,947 square miles, the latest estimate being 177,014,320 acres (276,577 square miles), of which 50,858,616 were not disposed of in 1897. The territory of Walfish Bay on the west coast is also a portion of the colony. The principal events in the history of the colony since it came under British rule have been the following:—Introduction of British settlers into the eastern districts as a barrier against the Kafirs, 1820; first Kafir war, 1834; commencement of the trekking of the Dutch Boers, which resulted eventually in the colonization of Natal and the Free States, 1836; second Kafir war, ending in the extension of the boundary to the Kei River, 1847; introduction of representative government, 1853; first diamond discovered, 1867; Griqualand West proclaimed a colony, 1871; introduction of responsible government, 1872; Gaika and Gcaleka rebellion, 1877-8; Basuto war, 1879-81; amalgamation of Griqualand West with the Colony, 1880; separation of Basutoland from the Colony, 1883; establishment of German Protectorate on the west coast to the north of the Orange River, 1884; incorporation of all the Transkeian territories, except part of Pondoland, with the Colony completed, 1885, annexation of Pondoland, 1894, and Bechuanaland, 1895.

The Colony is divided, geographically, into two parts by the main range of mountains, which, as already mentioned, follows the line of the South African coast at a distance of 100 to 150 miles from the sea; and the southern portion is divided again by two other ranges which run cross from W. to E., and are not quite so high

as the first. Between the mountains and the sea, in the south-western portion of the Colony, are the chief grain and wine producing districts; in the south there are extensive forests; and along the south-eastern coast, where the climate is almost tropical, tobacco and maize are successfully cultivated. Between the two upper ranges of mountains is an elevated tract known as the Great Karroo, which extends from W. to E. for 300 miles, and has a breadth of 70 miles. During a great portion of the year the Karroo is, as its name implies, a dry and barren district, but after rain it is covered with luxuriant vegetation, and supports countless flocks of sheep and many cattle and horses. It is here also that the important industry of ostrich-farming is carried on. The country to the north of the mountains is still more elevated, forming part of the great South African table-land. It supports, like the rest of the Colony, large numbers of sheep, and contains the chief mineral districts. The rivers of South Africa are numerous, but practically useless for either irrigation or navigation. Most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are mere shallow torrents, even the largest having sufficient water only for the smallest craft, or bars at their mouths which render entrance both difficult and dangerous. The climate is healthy, and its peculiar dryness and the uniformity of the temperature causes it to be much favoured by Europeans suffering from pulmonary complaints. The vegetation of South Africa has a peculiar and distinctive character; flowers of great variety abound everywhere. The principal native flora are heaths, proteas, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which are several species of aloes. The native animals are either disappearing altogether or retreating northward owing to the rapid spread of civilization. But elephants and buffaloes are still found on the south coast; and springboks abound in many parts.

The population of the whole Colony (Census of 1891) was 1,599,960, of whom the Europeans or whites were 382,198 (not including the population of Pondoland, circ. 166,000, 1896). In 1835 there were 46,166 births, and (in 1897) 31,579 deaths. The Dutch preponderate in the western, and the

English in the eastern districts. The principal industries are the production of wool and wine, and the rearing of horses, cattle, and ostriches, but great attention is paid to the culture of wheat, barley, and oats. There are important mines of copper in Namaqualand, the ores being of the richest kind, and yielding a percentage of from 34 to 36. The exports in 1896 amounted to 20,843 tons, value £218,422, against 7,300 tons in 1870. Gold is found in the Knysna and Prince Albert divisions, and manganese in the Paar. Coal is also raised of considerable value, the produce in 1896 being 105,365 tons. But by far the most valuable export is that of diamonds, which are chiefly found at Kimberley. The declared value of the diamonds exported in 1896 was £4,646,487.

The railways of the colony are mostly the property of the Government, which on June 30, 1897, owned and worked 1,892 miles. There are also 422 miles of privately owned railways worked by Government, and 181 miles privately owned and worked; in addition to which 100 miles are under construction for Government and 627 miles for private companies. To the 31st Dec., 1896, the capital expended by Government was £21,193,417, in which amount is included the money expended upon the Kimberley line. The returns for 1896 show a profit of £8 19s. 7d. per cent. per annum on the capital expended. There are 6,405 miles of telegraph open, carrying 16,267 miles of telegraph wire. The Colonial Forces in December, 1896, consisted of Cape Mounted Riflemen (817 officers and men); and horse and foot volunteers (6,535 officers and men). Extensive harbour works are being constructed at Table Bay (Cape Town), Port Elizabeth, and East London. On the works at Table Bay alone no less than £2,414,234 has been spent up to 31st December, 1895, and further works are in progress. The dockyard, &c., for the Royal Navy is at Simon's Bay. There are electric tramways in Capetown and Port Elizabeth.

Receipts (1845, £217,369); 1895-96..... £6,803,802

BASUTOLAND.

Basutoland is an inland colony, being completely hemmed in by the Cape Colony, the Orange Free State, and Natal. It lies between 28° 45' and 30° 40' South latitude and 27° and 29° 30' East longitude, and has a computed area of 10,293 square miles. The population in 1891 was 218,324 natives and 578 Europeans; the latter are no

allowed to settle without special permits (estimated pop. 1836, 250,000).

The territory is well watered, and enjoys a delicious climate. It is one of the finest grain-producing districts in South Africa, and the abundant grass enables the Basutos to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. The Basutos were first formed into a single tribe by a chief named Moshesh, about 1818. In 1852 they fought against the British Government and were defeated, but their country was not annexed. In 1856 disputes, resulting in hostilities, arose between Moshesh and the Orange Free State. These disputes continued more or less until 1868, when the Basutos, being hard pressed by the Free State, were saved from destruction, being taken under British protection. In 1871 their country was annexed to the Cape, but was not made subject to the general law of the Colony. In 1879 a chief named Moirosi rescued his son from justice, and it was only after severe fighting that his stronghold was taken by the Colonial forces. In the following year, owing to the extension to Basutoland of a Cape Act providing for a general disarmament, the whole tribe rebelled; and, after much negotiation, it was arranged that the Imperial Government should take over the country, receiving a subsidy of £20,000 (reduced to £18,000) from the Cape Government towards the cost of the administration. This arrangement was carried out in 1884, and Basutoland thus became a separate Colony. Basutoland entered the customs union in 1891, and a share of the dues is paid over to the Cape as a set-off against the £18,000.

The territory is now governed by a Resident Commissioner under the direction of the High Commissioner for South Africa; the latter possessing the legislative authority, which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The Revenue arises from the Cape contribution, the Post-office, native hut-tax, and the sale of licences. Telegraph offices have been opened at Maseru and Mafeking, in connection with the Cape Colonial system. There are 144 schools, with 7,543 scholars, nine-tenths being in the schools of the French Protestant Mission. There are two small Government schools, and grants in aid of education were made to the extent of £3,829 in 1895-6.

Revenue, 1896-97, £45,867; expenditure, £45,768. Imports, 1896-97, £135,560; Exports, £160,277.

 Distant from London 7,668 miles; transit through the Cape about 22 days. Parcels same rates as to the Cape. Telegrams, per word, 5s. 2d.

THE BECHUANALAND PROTECTORATE.
 The Protectorate is bounded on the east by the South African Republic and Matabeleland, on the south by Cape Colony, on the west by German

South-West Africa, and extends northwards to the northern boundaries of the Bamangwato territory. It is about 400 miles long and 450 miles broad, and its area is about 400,000 square miles.

The climate is healthy, but there is a great scarcity of water, and much of the country is thick bush. The natives have suffered much from the rinderpest and a bad harvest, and cattle-raising, the chief industry, has been almost entirely checked in consequence. The exports consist mainly of maize or mealies, wool, hides, cattle, and wood, for the Kimberley market. The local revenue is derived chiefly from customs, and the greater part of the expenditure will be met by a special grant in aid.

The High Commissioner (Cape) has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner and two Assistant Commissioners. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakathla), of Sebele (Bakweni), of Bathoen (Bangwaketsi), and of Ikaneng (Bamalete).

The railway from Kimberley to Vryburg and Mafeking has been opened for traffic as far as Francistown (Tati), 100 miles north of Palapye, and was extended in October, 1897, to Buluwayo, Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *via* Gaboroni's Palapye, Tati and Macloutsie to Buluwayo and Salisbury.

The chief European centres are Gaboroni's Palapye and Tati.

Governor, Sir Alfred Milner, G.C.M.G.
 (Governor of Cape Colony).
 Resident Commissioner, Francis James Newton, C.M.G. £1,000

NATAL.

The colony of Natal derives its name from the fact of its discovery by the celebrated Portuguese navigator Vasco da Gama, on Christmas Day, 1497. The Portuguese did not attempt to make any settlement, and two attempts made by the Dutch, in 1688 and 1721, were both unsuccessful. The country was occupied solely by natives until 1824, when the first European settlement was formed by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu Kingdom under Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony, and settled in the northern districts, where to this day the Boers preponderate, although the bulk of the whole white population of the Colony is British. The Boers attempted to set up an independent

government at Pietermaritzburg; but the Governor of the Cape took military possession of the district, and in 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government. It lies on the south-east coast of Africa, Durban or Port Natal being about 800 miles from Cape Town. Speaking roughly, it is in 30° E. long. and 30° S. lat. It comprises an area of 20,851 square miles, with a seaboard of 180 miles. The population in 1891 was estimated at 543,913, consisting of Europeans, 46,768; natives (Zulu-Kafir), 455,983; Indian Coolies, 41,142. The scenery is in parts picturesque in the extreme. The country is well watered, no less than 23 distinct rivers running through it into the Indian Ocean, but not one of them is navigable. On the N.W., Natal is bounded by the Drakensberg Mountains, a portion of the great range extending from Cape Town; and, as in the Cape Colony, the country rises from the sea to the mountains by a series of terraces. The coast region, extending about 15 miles inland, is highly fertile, and has a tropical climate. Sugar, coffee, indigo, arrowroot, ginger, tobacco, rice, pepper, and cotton thrive there, and the pine-apple ripens in the open air. Tea is also grown. The midland district is more adapted for cereals and other European crops. The upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The coalfields of the colony are of large extent, and are now connected by rail with the seaport of Durban; the output for the year ended 30 June, 1896, was 216,106 tons. The advantages accruing to the colony from the permanent establishment of this industry will be considerable, but they depend in great measure on the establishment of an export trade. Some attempts have been made to utilize the rich beds of iron ore which have been found in many parts of the colony. Large forests of valuable timber abound in the kloofs of all the mountain ranges, and many tracts along the coast are also well wooded. The chief exports in 1896-7 were wool, £505,614; gold, £49,887; sugar, £11,383; hides, £29,627; angora hair, £30,635; skins, £5,848; bark, £20,394; coal, £99,537.

In Durban, or Port Natal, the Colony has the only harbour of any importance on this coast. The bar, which hitherto has prevented large vessels from entering, is now in course of removal. There are 420 miles of railway open, all worked by the Government. The main line extends from the Port of Durban to Pietermaritzburg (the capital), from thence to Charlestown on the border and onwards to Johannesburg and Pretoria in the South African Republic. A branch line extends northwards from Durban to Verulam 19½ miles, and is now being extended across the Tugela river into Zululand, and another from South Coast Junction to Umkomaas, 25 miles. A branch to Harrismith, in the Orange Free State, from the main line, was completed and opened on July 13th, 1892, and the survey of a line from Harrismith to a point of junction on the Orange Free State line between the Sand and Valsch rivers was completed in 1892. There is a weekly mail service with England; and a telegraph cable to Zanzibar, Aden, and Europe, besides land lines to all parts of South Africa. There are Government High Schools at Pietermaritzburg and Durban; and of elementary schools there are 23 maintained by Government; there are also 447 private aided

denominational and aided native schools. The climate of the middle and upper districts is singularly beneficial to those suffering from pulmonary complaints. That of the coast district is, as already stated, tropical.

The Government consists of a Governor, a Legislative Council, and a Legislative Assembly. The former consists of 11 members, nominated by the Governor in Council, one half of whom retire every 5 years. The latter consists of 37 members elected by popular vote. There are 10,640 electors on the register, and there is a property qualification.

PIETERMARITZBURG, the capital and seat of government, is situated about 50 miles inland from Port Natal. Population (1896), 20,500.

ZULULAND.

The Territory of Zululand comprises about two-thirds of the country formerly under the Zulu kings. It is bounded on the south and south-west by Natal, from which it is divided by the Tugela river; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the South African Republic.

The Zulus are a tribe of warlike Kafirs, who formed themselves into a powerful kingdom about the beginning of this century under a chief named Chaka. In 1828, Chaka was killed by his brother Dingaan, who succeeded him; and Dingaan, having been defeated in 1840 by the Dutch and English settlers in Natal, was deposed in favour of his brother Panda. In 1873 Panda died, and was succeeded by his son Cetywayo. The relations between Cetywayo and the English in Natal were not unfriendly; but there had for many years been a dispute between Cetywayo and the Dutch Government of the Transvaal as to their boundaries, and, when the Transvaal was annexed in 1877, Cetywayo was disappointed to find the British Government of that country took the same view of his claims as the Dutch Government. The situation having become critical, Sir Bartle Frere sent an ultimatum to Cetywayo, and no reply having been received, a British army was marched into Zululand in 1879. After much fighting, in which the British suffered at first some serious reverses, Cetywayo was defeated, and his country divided among 13 chiefs. In 1883, Cetywayo was reinstated by the British Government in his kingdom; with the exception of the district on the north-east, which had been assigned to a chief named Usibebu, and the territory immediately adjacent to Natal, which was constituted a native reserve under British supervision. Usibebu, however, attacked and defeated Cetywayo, who had to take refuge in the Reserve, where he died in 1884; and the British Government, finding that the Zulus were unable to form an orderly administration for themselves, and that their lands were gradually being taken from them by the Transvaal Boers, decided at last to make what remained of Zululand a British Territory, which was done in May, 1887. On July 15, 1893, the territories of Sambane, Umbegeza, Mahlalani, and other petty chiefs, bounded on the South and East by the Pongolo river, on the North by the Maputa river, and on the West by Swaziland and the Transvaal, were declared to form part of Zululand. A magistracy has been established over these Territories, which now comprise the Ingwavama District.

The Territory, which has been divided into districts, is administered by a Resident Commissioner residing at Eshowe, under the supervision of the Governor of Natal, who is also Governor of Zululand. Native law remains in force as between natives, but the Governor can legislate by proclamation. The cost of administration is chiefly defrayed by a tax of 14s. on each hut. The only district in which the settlement of Europeans is allowed is that of Entonjaneni, where there are Boers whose farms were included in Zululand by the settlement of 1886, and who were thereby allowed to retain and occupy their holdings, the occupation of the remainder of the land by Europeans being prohibited, except for missionary, trading, or mining purposes. There is a telegraph line, from Lower Tugela to Melmoth *via* Eshowe, and another from Dundee, Natal, to the Nondweni goldfields. The magistracy

of Ndwandwe and Ubombo are connected by telephone with Melmoth, the line being 94½ miles in length. The mails from Lower Tugela, on the Natal border, to Eshowe, and from Vants Drift to Nondweni, are conveyed by tri-weekly and daily post carts respectively, and regular communication between Eshowe and the several magisterial districts is maintained by means of native runners.

Revenue, 1896 £66,982
 Expenditure, 1896 79,830
 Governor, The Governor of Natal (Sir Walter Francis Hely-Hutchinson, G.C.M.G.) 1,000
 Resident Commissioner and Chief Magistrate, Sir Marshal Clarke, K.C.M.G. (and allowance) 2,274
 The CAPITAL, Eshowe, is distant from London, *via* Cape Town, 8,100 miles; transit, 25 days. Parcels, same as to Natal; telegrams, 5s. 2d. per word.

RHODESIA.

(See also p. 603.)

Chairman of the British South Africa Company, Duke of Abercorn, K.G.
 Deputy do., Duke of Fife, K.T.
 Sec., H. Canning, 19 St. Swithin's Lane, E.C.
 Administrator, Earl Grey.

On Oct. 29, 1893, the B.S.A. Co. received a Royal Charter entrusting it with the development of the extensive regions lying to the South of the Zambezi, which the year before had been proclaimed British territory. A satisfactory understanding having been come to with Lobengula, the chief of the warlike Matabele, a pioneer force under Colonel Pennefather was despatched from Kimberley, and on Sept. 12, 1890, reached the vicinity of Mount Hampden, and there built Salisbury, the present capital of Mashonaland. Subsequently, in May, 1891, the field of operations of the Company was extended to the north of the Zambezi, and its territories, with the exception of the "British Central Africa Protectorate," (see p. 576), which is under direct Imperial administration, now cover the whole of British South Africa from Mafeking to Tanganyika. This territory embraces an area of 750,000 square miles, or 8½ times the size of Great Britain. The rainy season extends from November to February, when about 40 inches of rain fall.

Gold abundance, and silver, copper, blende, tin, antimony, arsenic, and lead have also been discovered. In January, 1896, Dr. Jameson, the then administrator of the Company, invaded the Transvaal with a small armed force; the expedition was met at Krugersdorp by an overwhelmingly superior body of Boers, and Jameson and his officers surrendered.

A railway from Kimberley to Vryburg (Bechuanaland) (126 miles) was opened on Dec. 3, 1890, and has been extended to Mafeking and thence *via* Palapye to Buluwayo, where the first train was officially received on Nov. 4, 1897 (Occupation Day), and this line will shortly be extended to Salisbury. The railway from Beira to Salisbury (295 miles), through Portuguese territory, has also been commenced. Salisbury already boasts some good hotels, a church, and a newspaper; it is defended by a fort, as are also the growing places of Tuli, Charter, Victoria, and Umтал.

CAPITAL, Buluwayo; distant from Cape Town 1,350 miles, transit about 80 hours; from London about 7,300 miles, transit 21 days (the capital of Mashonaland is Salisbury). Parcels, 2s. 9d. per lb.; limit, 7 lbs. Telegrams, 5s. 5d. per word.

WEST AFRICA.

(See also Map, page 602.)

The West African Colonies are the Gambia, Sierra Leone, the Gold Coast, and Lagos there being also a Protectorate, proclaimed 21 August, 1896, adjacent to Sierra Leone), which are all situated upon the coast of North-Western Africa between the mouths of the rivers Senegal and Niger. These were not originally colonies in the strict sense of the word, but merely trading settlements, in which the products of the neighbouring countries were collected and exchanged for European goods with as little outlay as possible; but of late years a great part of the revenue has been expended on the advancement of the scholastic and technical education of the native and on the encouragement of the cultivation of natural produce instead of its spoliation. The climate is such that Europeans cannot live there permanently, and even the negro inhabitants suffer greatly from malarial fever. The West Coast of Africa has, however, been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they used to supply slaves to their plantations in the West Indies and on the mainland of America. The importance of the coast was much diminished when these same nations agreed, at the commencement of the present century, to join in putting down the slave trade. The Dutch and the Danes relinquished their possessions; and although the French and the Portuguese maintained their positions, the English were practically without any serious rivalry in the development of a legitimate trade in tropical products, of which palm oil was the most important, to take the place of the trade in slaves. Within the last few years, however, the French have been spending large sums, and making strenuous efforts, with the avowed intention of founding a great French Empire in North-Western Africa. The Germans possess the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions; and, more to the south, the Congo Free State has been founded by the King of the Belgians. Each nation is striving to extend its influence as far as possible into the interior; and British authority is being extended, not only by means of the colonies, but also through the Royal Niger Company, which exercises, under a charter from the British Crown, all the functions of government ceded to it by the various rulers and people in the lower basin of the River Niger.

GAMBIA.

The river Gambia rises in the mountains at the back of Sierra Leone; it flows first towards the north, and then, turning towards the west, empties itself into the Atlantic about 100 miles south of Cape Verde. The chief town, Bathurst, is situated on an island at the mouth of the river in 13° 24' N. lat. and 16° 36' W. longitude. It is the only West African river which is navigable by ocean-going steamers, having 26 feet of water on the bar at low tide. Vessels drawing 10 feet can go up it for 250 miles. It was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the Treaty of Versailles, as British. It had no regular political institutions until 1807, when it was put under the Government of Sierra Leone, to which it was annexed in 1841.

The settlement now consists of the Island of St. Mary, British Combo, Albrede, the Ceded Mile, McCarthy's Island, and various other islands and territories on the banks of the river. The estimated population on 31 December, 1896, was 13,057. The climate is as unhealthy as that of any other part of West Africa during the rainy season, viz., from June to October; but during the rest of the year it is fairly healthy. Special inducements are held out to sportsmen, who are

promised good bags of hippopotami, antelope, monkey, alligator, and other delicacies. The chief export is ground-nuts, which forms nearly nine-tenths of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purposes as olive oil. Beeswax, rubber, and hides are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The annual value of the exports was on the decrease from 1882 to 1892, but the latest returns show a marked improvement. The chief imports are spirits, wines, sugar, guns, gunpowder, and cotton goods. Rice is also imported very largely. The colony has no debt, but, on the contrary, an amount of money invested. There is an armed police force in the settlement (numbering about 100 men), which performs both civil and military duties. The Gambia was made a separate colony in 1888. The government, which is that of a Crown Colony, is now vested in an Administrator, assisted by an Executive Council, and by a Legislative Council consisting of 4 official members (besides the Administrator) and 2 unofficial members, nominated by the Crown.

THE GOLD COAST COLONY.

(See also Map p. 602.)

This colony comprises the coast of the Gulf of Guinea from about 3° W. to 1° 10' E. of Greenwich, with a protectorate extending inland to an average distance of 300 miles, bounded on the West by the French settlements of ASSINIE and on the East by the German Colony of TOGOLAND. The population of the Colony and protectorate is estimated at 1,500,000 (exclusive of Ashanti), of whom 150 are Europeans. The natives are almost all Pagans; but the number of Mohammedans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Cormantyne, and subsequently many forts and factories were established, not only by the English and Dutch, but also by the French, the Danes, and the Germans, for the purpose of supplying slaves to their West Indian and American possessions. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the Coast, and also built forts at Dixcove, Secoodee, Commendah, Anamaboe, Winnebah, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the Government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1868, when an exchange was effected which gave all those on the West to Holland and those on the East to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the last Ashanti war of 1873-4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. The result of the war was that the Ashanti power was completely shattered, and the British possessions were left free for development without fear of native aggression or hindrance from European rivalry.

In 1894, however, Prempeh, the King of Ashanti, having successfully fought against the Nkoranzas who had revolted against his rule, threatened to attack the Attabubus, who had been given protection in 1890. This attack was averted by the despatch of an armed force, and an ultimatum was then sent to Prempeh warning him not to enter British territory, and suggesting that he should acquiesce in the establishment of a Residency at Kumasi. No definite reply could be obtained, and a military expedition to Kumasi, to compel compliance with the demands of Her Majesty's Government, was therefore decided upon. The expedition entered Kumasi without resistance, January, 1896, and Prempeh

made submission, but, failing to comply with the terms dictated, was brought to the coast as a political prisoner and lodged in Elmina Castle. A Resident was at the same time installed at Kumasi, and thus has commenced an entirely new departure in the relations of the Gold Coast Colony with Ashanti.

Within the last few years the French have begun to extend and develop their Colony of Grand Bassam and Assinie, which adjoins the British Colony on the West; and the German settlement adjoining the Colony on the East, called Togoland, is rapidly increasing in commercial importance. The produce of the Gold Coast is chiefly sent to Great Britain. Gold is found in considerable quantities, and ivory, gum-copal, monkey-skins, cotton, camwood, Guinea grains, and oil, are also exported to England. A trade has been recently developed in rubber, the quantity shipped in 1882 being 7,168 lbs., and in 1896, 3,735,439 lbs. (value £313,817), and other important exports are palm-oil, 2,394,563 gallons (value £126,857), rubber and palm kernels (13,046 tons, value £85,349, in 1896). Trade in timber also promises well. The chief imports are textiles, alcohol, and hardware. The climate is damp, hot, malarious, and unhealthy. Very little had been done for the natives during the 400 years that Europeans have occupied the Coast, until within the last few years. But the Government is now assisting the Roman Catholic, Methodist, and German missionaries in educational matters, and great efforts are being made to improve the sanitary condition of the Coast towns. The Government has established schools of its own; the towns are lighted and policed, and 515 miles of telegraphs have been established.

The seat of Government is Accra (population 16,276). The other principal towns are Cape Coast (11,614), Elmina (10,530), Addah (7,530), Saltpond, and Quitta. The Legislative Council consists of 6 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone (Lion Mountain) was ceded to Great Britain in 1787 by the native chiefs, to be used as an asylum for the many destitute negroes then in England; and great

numbers of liberated Africans from North America and the West Indies, besides those taken in slavers on the coast, have from time to time been settled there. In this respect Sierra Leone is really a colony, and differs from the other West African colonies, which were all formed as merely trading stations. But Sierra Leone, too, is now commercially important. The route from Freetown to the great central African plateau is shorter and easier than that from the navigable head of the Gambia, and the harbour is far the best in West Africa. So excellent is the harbour that it has recently been strongly fortified as a coaling-station for the Royal Navy on the Cape route to India. In addition to the peninsula, the colony now comprises Sherbro Island, and various other territories extending along the coast from the French Colony known as the "Guinée Française" upon the North to the Republic of Liberia on the South. The extreme length is about 185 miles, with an estimated area of 4,000 sq. miles. The population in 1893 amounted to 136,000, of whom 210 were resident Europeans. Of the rest, more than half were liberated Africans and their descendants, while the remainder belonged to the neighbouring tribes. The liberated Africans were brought from all parts of Africa, and as the result no less than 60 different languages are said to be spoken in Freetown. Almost every Christian denomination is represented in Freetown, and there are also many Pagans and Mohammedans. Education, though not compulsory, is in an advanced state. The climate is humid and enervating to Europeans, and malarial fevers are prevalent, especially at the beginning and end of the rains, which last from May to October. The peninsula itself produces hardly anything. The inhabitants are almost all employed in exchanging the products of the interior for European goods. The exports consist chiefly of palm-oil and palm-kernels; but benni-seed, cocoa-nuts, ginger, ground-nuts, india-rubber, gum-copal, hides, beeswax, and kola-nuts are also exported. The imports are chiefly ale and porter, apparel, including boots, shoes, and hats; beads, flour, and biscuits; cotton and woollen goods; cutlery, earthenware, and glassware; gunpowder and guns; haberdashery, hardware, lumber, provisions; spirits, chiefly rum and gin; tobacco and wine. The taxation consists of specific duties on wine, spirits, ale and porter, tobacco, gunpowder, guns, kerosine oil, lumber, hardware, salt, and sugar; and of a 10 per cent. ad valorem duty on other goods.

THE SIERRA LEONE PROTECTORATE.

A Protectorate was proclaimed over the territories adjacent to the Colony of Sierra Leone on August 31, 1896. The region has long been recognised as within the British sphere of influence, and lies between 7° and 10° N., and 11° and 13° W., being bounded on the N. and N.E. by French Guinea, and on the S. and S.E. by Liberia. It has an area of about 20,000 square miles and a population roughly estimated at 500,000.

For administrative purposes the Protectorate is divided into 5 districts under District Commissioners, the principal peoples being the Limba and Kurankos in the North, the Tinmenis and Susus in the centre, and the Mendis in the South. The principal products are rubber, gum, and palm trees, benni seed, rice, ground and kola nuts, while sheep and cattle thrive.

Parcels, same as the Colony.

LAGOS.

The Colony and Protectorate of Lagos, formerly one of the great centres of the African slave trade, is situated on the Bight of Benin and is comprised within 2° and 6° East longitude. Its sphere of influence extends to the 4th parallel of N. latitude, embracing the whole of Yoruba, a large and fertile region and one of the most successful fields of missionary enterprise; it was permanently occupied by Great Britain in 1861. Up till 1886 it formed a dependency of the Gold Coast, but is now a separate Crown Colony and Protectorate. The Protectorate comprises the kingdoms of Pokra, Okeodan, Ilaro, Ado, Igbesa, Awori, Jebu Remo, Mahin, Ogbo, and Jakri up to the right bank of the Benin river on the east, where it adjoins the territory of the Niger Coast protectorate. Lagos island has an area of 3¼ square miles, and the whole Colony and Protectorate includes 1,500 square miles, with 2,000,000 inhabitants. There are about 200 persons of European birth in the colony. The town of Lagos has 32,500 inhabitants.

Palm-oil and palm-kernels constitute at present the most important natural products of the Colony; the value of the palm-oil exported in 1895 having been £205,553, and that of kernels £320,434. The imports are chiefly cotton-goods (£274,427), spirits (£106,335), and tobacco (£25,615).	
Amount of public revenue, 1895	£142,049
Amount of expenditure, 1895	144,483
Total imports, 1895, £815,814; exports ...	565,595
Imports from United Kingdom, 1896	562,130
Exports to United Kingdom, 1896	1,256,717
Gov., Lt.-Col. H. E. McCallum, B.E., C.M.G.	£3,000
(and entertainment allowance £500.)

Harbour-Master, Capt. W. C. Speeding	400

Lagos is 4,279 miles from Liverpool; transit 22 to 26 days. Parcels, per lb. 9d.; limit, 11 lbs. Telegrams, 7s. 1d. per word.

THE NIGER COAST PROTECTORATE.

H.M. Commissioner and Consul-General, Sir Ralph Dinham Rayment Moor, K.C.M.G.	£2,500
Dep. Commr. & Consul, Major H. L. Galloway, D.S.O.	£800 to 900
Vice-Consuls, T.A. Wall (Post and Customs offices), A. G. Leonard, R. F. Locke	£600 to 800
District Commissioners, C. E. Harrison, A. B. Harcourt, W. F. W. Fosbery, A. A. Whitehouse, F. T. Bartwell, N. Burrows, H. Bedwell	£500
Comm. of Forces, Maj. R. L. Milne, D.S.O.	£600 to 800

Supt. Marine Dept., H. A. Child	600 to 700
Treasurer, F. E. Hodges	600 to 700
Judicial Officer, M. R. Menendez	600 to 800
Principal Medical Officer, R. Allman	1,000
Agents, London, Crown Agents for the Colonies.	

This "Protectorate," formerly called the "Oil Rivers Protectorate," includes the whole of the maritime region lying between Lagos and the Rio del Rey, with the exception only of the mouth of the Niger, assigned to the Royal Niger Company. The coast region was secured by treaties with the native chiefs, concluded by Mr. E. H. Hewett, c.m.g., in 1884, and was placed, in 1891, under an Imperial Commissioner, appointed by the Secretary of State for Foreign Affairs. The Protectorate was announced in the *London Gazette* of June 5, 1885, Oct. 18, 1887, and May 13, 1893. Centres of trade are Old Calabar, the capital (pop. about 15,000), Opobo, Bonny, New Calabar, Brass, Benin, Warri and Sapele. Early in January, 1897, a mission conducted by Mr. Phillips, deputy-commissioner, was massacred while on its way through the bush to Benin City, a large town about 60 m. from the mouth of the Benin river. Mr. Phillips and several members of the Protectorate staff were killed, two British officers only escaping. A punitive expedition was organised without delay, and Benin City was captured, after considerable resistance, in February. A British resident is now established at Benin City, and the power of the Fetish priests, or Ju-ju men (who were responsible for the human sacrifices for which the place was notorious) has been completely broken.

The leading exports are palm-oil, palm-kernels, rubber, ebony, and ivory. The leading imports are cotton-goods, cooper's stores, and hardware and outlery.

Revenue (from Customs Duties), 1895	£151,244
Total Imports, 1895-96	750,975
Total Exports, 1895-96	843,333
Imports from United Kingdom, 1895-96	575,447
Exports to United Kingdom, 1895-96	538,627

Steamers of the "British and African" and "African" lines run regularly between Liverpool and the principal ports. Headquarters, Old Calabar. Transit about 25 days.

Parcels, 9d. per lb. to 11 lbs.; telegrams, Bonny 8s. 3d., and Brass, 7s. 10d. per word.

THE ROYAL NIGER COMPANY.

(See also pp. 601, 602.)

Chartered and limited; Capital, £1,100,000.

Governor, Sir G. Taubman-Goldie, c.m.g.
 Deputy Gov., Rt. Hon. the Earl of Scarborough.
 Secretary, Henry Morley.
 Office, Surrey House, Victoria Embankment.
 Agent-General, William Wallace, c.m.g.
 Chief Justice, Samuel Moore.
 Principal Medical Officer, E. E. Craster.

The Royal Niger Company may fairly be described as the offspring of the "National African Company," which in the course of 1884 and 1885 bought out or amalgamated the French companies then trading on the Niger, and concluded treaties conferring territorial rights with about 300 native chiefs and states. It was consequently upon this vigorous activity that the British Government, on June 5, 1885, declared the whole of the coast lying between Lagos and the Rio del Rey a British Protectorate. A boundary, separating this newly created "British sphere" from the German Protectorate of Cameroons, has been settled by conventions made in 1886 and 1893. This boundary intersects Adamawa, a dependency of Sokoto, in the very centre, but assigns the capital, Yola, to England. This boundary terminates at a point on the south shore of Lake Chad, thirty-five minutes east of Kuka, the capital of Bornu, which is within the British sphere. Another line agreed upon in 1890, and drawn from Say on the Niger to Barua on Lake Chad, separates the French and British "spheres." The frontier between these "spheres" on the west of the middle Niger is not yet determined; but under treaties with the Mohammedan Sultan of Gandu, and the Pagan King of Borgu, the company claims a large extension westward. The "Protectorate" within the limits indicated covers an area of 500,000 square miles, and is estimated to contain from 20 to 30 millions of inhabitants.

A part of the maritime districts of these territories was formed into the "Oil Rivers Protectorate," now the Niger Coast Protectorate, but the whole of the remainder was granted to the Royal Niger Company, chartered on July 10th, 1886.

The very considerable political and administrative powers granted to the Company are exercised under the control of the Secretary of State for Foreign Affairs. Treaties with Sokoto, Gandu, and Borgu confer upon the Company the fullest jurisdiction over all non-native residents and visitors. Among the small tribes outside these empires, on the Lower Niger, and south of the Benue, the Company's power is scarcely limited at all. The authority is exercised there for the suppression of all slave-raiding, and the chiefs are required to submit their disputes to arbitration, instead of resorting to intertribal war.

The Company maintains 42 stations, of which the more important are:—Akassa, at the Nun mouth of the Niger, with workshops for the repair of steamers; Asaba, 150 miles up the river, the administrative headquarters, where are the supreme court, the central prison, a hospital, and a botanical garden; and Lokoja, at the confluence of the Benue, with the head-quarters of the military force. This force numbers about 1,000 men, chiefly Hausas, and is officered by Europeans. In addition to it each administrative district has its agent or magistrate, supported by a small police force. Thirty steamers navigate the Niger and its tributaries, and afford the principal means for the maintenance of order and security.

The principal exports are rubber, ivory, palm-oil, gums, hides, &c. The principal imports are cotton-goods, earthenware, hardware, powder, salt, silks, spirits, and woollen goods. The Company have prohibited the importation of rifles and cartridges into any part of their territory. Spirits are charged a heavy import duty, and cannot be imported at all into the districts lying to the north of lat. 7°. Their consumption, as a consequence,

is not now one-fourth of what it was before the grant of the charter. The revenue is chiefly raised by export duties, import duties being charged only upon guns, powder, salt, spirits, and tobacco.

A military expedition, organized and sent out at the close of 1896, captured Ilorin and deposed the Sultan (16 Feb., 1897), who was reinstated as the vassal of Great Britain on 6 March, 1897.

Parcels, *gd.* per lb. to 11 lbs.

FAST AND CENTRAL AFRICA.

(See also Map p. 630.)

THERE are no British Colonies on the East Coast of Africa to the north of Zululand (already treated of under the head of "South Africa"). But a large portion of the Continent, both on the coast and inland, is under British protection and is administered directly by the Imperial Government, through the Foreign Office. Just as on the West Coast, the rivalry of European Powers has resulted in the division of the territory on the East into "spheres of influence," the definition of whose boundaries has given rise to much diplomatic negotiation, and is not yet finally completed. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*; from Cape Delgado to the river Umba is *German East Africa*; the islands of Zanzibar and Pemba form a British Protectorate; and the East Africa Protectorate (together with the little Witu Protectorate), extends from the Umba to the river Juba, which forms the southern boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their recent annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. The history of the European occupation of East Africa may be briefly stated thus:—the Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognized their Protectorate over Usagara, and in the same year the Germans declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. The boundaries of the *Italian Sphere* were agreed upon in 1891. The Imperial British East Africa Company transferred the administration of their territories to the Imperial Government in 1895, having done much to promote the advance of civilization in the large tract of country now known as the "East Africa Protectorate."

The term "Central Africa" is rather misleading to the unofficial mind. It must be understood as not applying to Uganda, although that country is, properly speaking, the most "Central" of the British Colonies or Protectorates in the Continent, but as the name given to a territory of more than 500,000 square miles in extent, north of the Zambesi, the greater part of which is under the administration of the British South African Company; the rest, which is under direct Imperial control, being called the "British Central Africa Protectorate." (See page 526.) The respective limits of British and Portuguese possessions or protectorates in East Africa were determined by the Treaty signed at Lisbon on June 11, 1896.

THE EAST AFRICA PROTECTORATE.

Commissioner & Consul-Gen., Sir A. H. Hardinge, K.C.M.G., C.B. (See Zanzibar.)

Members of Protectorate Council, Sir A. H. Hardinge; Sir Lloyd Mathews; W. B. Cracknell. Secretary, A. Alexander.

Sub-Commissioners and Vice-Consuls, C. H.

Craufurd; J. Ainsworth; A. S. Rogers;

A. C. W. Jenner £500 to £500

Judicial Officer, E. Cator 700

Treasurer, E. Bradbridge 600

Collector of Customs, A. Marsden 400

Commandant of Forces, Major G. P. Hatch.

Agents in London, The Crown Agents for the Colonies.

The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3,

1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased to it by the Sultan of Zanzibar, or acquired by treaties entered into with native Chiefs. A British Protectorate was announced over these territories on June 18, 1895, and the Company handed over the administration on July 1, 1895.

These territories are now comprised under the name of "The East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, granted on a 50 years' lease by the Sultan of Zanzibar, as also the vast territories in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the

Juba) and north-east, by an agreement with Italy (1891). On the west the Protectorate adjoins that of Uganda. The administration of the Protectorate is carried on under the Foreign Office, and the Commissioner, Sir A. Hardinge, is also H.M. Agent and Consul-General at Zanzibar.

A great portion of this vast region consists of pasture lands, or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into four districts: (1) The Coast Province; (2) Ukamba; (3) Tanaland; and (4) Jubaland, of which the centres of administration are respectively Mombasa, Machakos, Lamu, and Kismayu. Of the four districts Ukamba is the only one which, generally speaking, is suitable for colonization by Europeans. There is also a vast region within the boundaries of the Protectorate which is almost unexplored, and has not yet been included in any administrative district.

Mombasa, which is connected with Europe by telegraph, is the capital of the Protectorate, and possesses, perhaps, the finest harbour on the east coast of Africa (population, about 24,000). There is also telegraphic communication along the coast between Mombasa and Lamu. The Uganda Railway has its terminus at Mombasa, which is now connected with the mainland by a railway bridge 1,732 feet in length.

The principal exports are ivory, rubber, cattle, gums, orchella weed, sesame, ebony, borities (poles and rafters), rhinoceros horn, hippopotamus teeth, &c.; the principal imports, on which is charged a duty of 5 per cent. *ad valorem*, are piece goods, rice, brass wire and beads, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

Capital, Mombasa; transit about 21 days. Parcels, first lb., 1s., then 8d. to 11 lbs. Telegrams, Mombasa, 5s. per word, other places, 5s. 5d.

THE UGANDA PROTECTORATE.

<i>Senior Medical Officer, Dr. R. U. Moffat</i>	450
<i>Agents in London, The Crown Agents for the Colonies.</i>	

A British Protectorate over the territory of Uganda was proclaimed in the "London Gazette" of June 19, 1894, and included only the country subject to King Mwanga, known as Uganda proper, bounded by the territories known as Usoga, Unyoro, Ankoli and Koki. This Protectorate has since been extended over Unyoro and Usoga—(see notice in "London Gazette," July 3, 1896). Uganda proper lies on the N.W. shore of Lake Victoria, between 500 and 600 miles in a direct line from the nearest point on the East Coast of Africa. It is situated on, and to the N. of the Equator. Usoga lies further to the East, on the N. shore of the Lake. Unyoro is to the N.W. of Uganda and extends to Lake Albert. Koki is to the S.W. of Uganda. The total population of the Protectorate may be roughly estimated at between 2 and 3 millions.

The capital town of Uganda is Mengo, but the centre of the Protectorate Administration is the neighbouring settlement of Kampala. The population of Uganda is estimated at over 300,000. The exports are at present almost confined to ivory. Principal imports are cotton cloths, prints, beads, &c. A small steambot has been placed on the lake, and efforts are being made to convey others thither.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son was declared King of Uganda, with a native council of regency.

The Uganda Railway.—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1895 H.M. Government decided to proceed with the construction of the railway, and in September of that year a Committee was formed with the late Sir Percy Anderson, assistant Under-Secretary of State for Foreign Affairs, as Chairman, to supervise the undertaking and organise details, under the authority of the Secretary of State for Foreign Affairs. The Committee meets regularly at the Foreign Office, and since the death of Sir Percy Anderson, the chair has been taken by the Hon. Francis Bertie, Assistant Under-Secretary of State.

The gauge adopted for the railway is one metre. The chief engineer and staff arrived at Mombasa in December, 1895, and a large number of labourers have been imported from India for the work of construction, in addition to such local labour as can be engaged. The total length of the line to be constructed is about 660 miles, and 100 miles were completed at the end of September, 1897. A telegraph line is also in process of construction. The necessary funds for the construction of the railway were provided by the *Uganda Railway Act, 1896* (59 & 60 Vict. ch. 38) by which the issue of £3,000,000 was authorized from the Consolidated Fund. From a Report laid before Parliament in June, 1897 (*Africa No. 4, 1897, C.—8435*) it appears that the total expenditure on the railway to March 31, 1897, was £397,838.

THE WITU PROTECTORATE.

Sultan, Omari bin Hamed, succeeded 1895. British Resident, A. S. Rogers. (See East Africa Protectorate.)

This Protectorate is a small tract of country extending about 66 miles along the coast, and 30 miles at furthest inland, at the mouth of the river Tana. The Germans proclaimed a protectorate over it in 1885, which they resigned to Great Britain by the agreement of 1890. (See introductory note.) The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31st, 1893. Witu is now regarded, for administrative purposes, as part of Tanaland, one of the districts into which the British East Africa Protectorate is divided.

Parcels, 1st lb. 1s., then 8d. to 11 lbs.

THE ZANZIBAR PROTECTORATE.

Sultan, Hamud bin Muhamad bin Said, succeeded his cousin, Hamed bin Thwain, 27th Aug., 1896. H. B. M. Agent and Consul-General, Sir A. H.

<i>Hardinge, K.C.M.G., C.B.</i>	£1,800
<i>Consul, Basil S. Cave, C.B.</i>	700
<i>Judge of H. B. M. Court, W. B. Cracknell</i>	1,000

President of Ministry, General Sir Lloyd William Mathews, K.C.M.G. (October, 1891).
Officer in Command of Native Troops, Brigadier General A. E. Raikes.

The Zanzibar Dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far South as Taughhi Bay and North as Warsheikh; but since the cession of the coast line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, they are now confined to the islands of Zanzibar and Pemba (98½ sq. m., and 165,000 inhabitants), and a ten-mile coast line from Wanga to Kipini, together with the islands of Lamu, Manda, and Patta, and the ports of Kismayu, Brava, Merka, Magdisho, each with a radius of 10 miles, and the port of Warsheikh, with a radius of 5 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Commissioner and Consul-General in the East Africa Protectorate (see p. 521), and the remainder, known as Benadir, is leased to the Italian Government. Zanzibar has been a British Protectorate since November, 1890.

On the sudden death of the late Sultan, Hamed bin Thwain, in August, 1896, Said Khaled, a member of the reigning family, seized the palace and held it with a large number of armed followers, in defiance of the protecting power. He proclaimed himself Sultan, but was not recognized as such by any of the foreign Consular representatives. Khaled having refused to quit the palace, it was found necessary to resort to force to compel his submission. After a bombardment of half-an-hour from the British warships in the harbour, Khaled fled to the German Consulate, whence he was eventually deported to German East Africa, and remains there under German supervision.

By a recent decree of Sultan Hamud the legal status of slavery has ceased to be recognized in the islands of Zanzibar and Pemba.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities to shipping and trade generally. It was declared a free port in February, 1892. The population of Zanzibar is about 250,000.

The principal imports, which amounted in 1896 to a total value of £1,275,470, are piece-goods, ivory, cloves, rice and groceries; the exports are piece-goods, ivory, cloves, copra, rubber, gum-copal, and many minor articles amounting in 1896 to £1,158,806. The largest proportion of imports (£385,537) comes from British India, £64,597 from Germany, £17,566 from France, and £118,022 from Great Britain. The largest exports are made to German East Africa, which in 1896 accounted for £413,492, the principal other participants being Great Britain (£129,199), and British India (£115,818). These figures refer to the port of Zanzibar, and not to the trade of the Zanzibar dominions. The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. There is no direct steam communication with the United Kingdom, passengers, mails, and goods having to tranship

at Aden. There are through steamers of French and German Companies.

The number of ocean-going vessels which entered the port in 1896 was—British 64, German 60, French 23, other nationalities 8, the total tonnage being 244,266. This does not include the coasting and dhow traffic, which is a very large one, extending to Bombay, Arabia, the Comoro Islands, and Madagascar.

Zanzibar is distant 8,064 miles, transit 20 days. Parcels, 1 lb. 1s.; then 8d. per lb. to 11 lbs.; telegrams, 5s. per word.

BRITISH CENTRAL AFRICA PROTECTORATE.

<i>H.M. Commissioner and Consul-General,</i>	
Alfred Sharpe, C.B.	£1,400
<i>Deputy Commissioner, Consul, and Commandant of Forces, Lieut.-Col. W. H. Manning ...</i>	800
<i>Assist. Dep. Commr., Capt. F. B. Pearce ...</i>	700
<i>Judicial Officer, G. B. Piggott ...</i>	600
<i>Senior Medical Officer, Dr. W. Poole.</i>	
<i>Agents in London, The Crown Agents for the Colonies.</i>	

This country, which was formerly termed Nyassaland, was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern portion of British Central Africa, and is administered directly by the Imperial Government through the Foreign Office. The remainder of the territory is administered by the British South Africa Company.

The population of the Protectorate was estimated in 1896 at 845,000, of whom 289 were Europeans and 259 British Indian subjects. The principal exports are coffee and ivory. The cultivation of coffee is largely on the increase, and there are prospects of a steady development of this industry. Rice, tobacco, sugar, cotton, and tea are grown. Total exports (April 1, 1896, to March 31, 1897), £23,299. Principal imports are soft goods, provisions and hardware, and amounted in the year ending March 31, 1897, to £30,054. On Lake Nyassa there are five British steamers (two of which are gunboats) and one German Government steamer. There are also gunboats and other steamers on the upper and lower Shiré river. At Chinde, situated in Portuguese territory at the mouth of Zambesi, is a piece of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

The Protectorate contains 19 administrative stations. Chief towns:—Blantyre (population about 100 Europeans and 6,000 natives) and Zomba, the headquarters of the administration. Communication is maintained between Chiromo (at the junction of the rivers Ruo and Shiré), and Chinde by the African Lakes Company's steamers, the Zambesi Traffic Co., and the African International Flotilla Company.

Between Chinde and Europe, the means of communication are Messrs. Rennie's line via Natal, the Union Steam Ship Co., the German East Africa S.S. Co., and the Portuguese Royal Mail steamers.

The construction of a railway to connect Chiromo with Blantyre is under consideration. The Protectorate will before long be connected by telegraph overland with the Cape, via Fort Salisbury. A local telegraph service is already open, as well as wires to Chinde and Quilimane.

Parcels, 1s. 6d. per lb. to 7 lbs. Telegrams, 5s. 8d. per word.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 500 miles east of Madagascar, between 57° 18'—57° 49' E. long. and S. lat. 19° 58'—20° 32', and comprising an area of 705 square miles. The resident population on the 31st December, 1896, was 374,942, of whom no less than 259,004 were Indians (the majority originally Coolies imported for working the sugar estates). The general population is mainly of French or mixed descent. The whole island is practically given up to producing sugar for export, and the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

Mauritius was discovered in 1505 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Count Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1712 they abandoned the island, and in 1715 the French took possession of it. Under the French it became a great centre of trade, and in 1789 the seat of French Government in the East was removed to it from Pondicherry. In the war between England and France it was a base for privateering expeditions, which inflicted serious damage on British trade, until it was taken by a British force in 1810. The French called it the Isle of France, and the French language and French law have been preserved under British rule. Its past greatness, and much of its present value, are due to the excellent harbour on the N.W. coast, on which the capital, Port Louis, stands. In 1896 there were 105 miles of railway and 64 post-offices in the island, with 135 miles of telegraph. A cable to Zanzibar was opened in 1893, bringing Mauritius and the Seychelles into telegraphic touch with the world. The annual trade of the island passes almost entirely through Port Louis.

The Government is more representative than that of an ordinary Crown Colony, being administered by a Governor, aided by an Executive Council of five officials, and two elected members of the Council of Government, and a Legislative Council of twenty-seven members, of whom eight are ex-officio, nine nominated by the governor, and ten elected for the various districts into which the island is divided. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. The department of public instruction comprises two branches—the Royal College for higher education, and the Schools' Department for primary education. The College, which is affiliated to the London University, is under the control of a Rector, who is assisted by a staff of professors. The Schools' Department is under the direction of a superintendent, aided by two inspectors. The government schools are supported wholly by the State, the grant schools only partially so. The total expenditure on education in 1896 amounted to Rs. 510,190. Of the pupils in the government and aided schools 70·97 per cent. are Roman Catholics, 2·96 per cent. belong to the Church of England, and 1·29 per cent.

to other Christian denominations; 24·98 per cent. are Hindoos and Mohammedans to whom no assistance is given. A British garrison of about 1,000 strong is maintained at Curepipe and Port Louis.

CAPITAL, PORT LOUIS. Population, 1897, 55,869.

DEPENDENCIES OF MAURITIUS.—(1.) THE SEYCHELLES ISLANDS, 940 miles due north of Mauritius

and about 1,100 east of Zanzibar, are governed by an Administrator, assisted by an Executive and Legislative Council. Originally discovered by the Portuguese, they were occupied by the French about 1742, captured by a British ship in 1794, and finally assigned to Great Britain at the peace of 1814. Although close to the Equator they are very healthy, the death-rate being but 14·80 per 1,000. The estimated population, 1895, was 17,625. There are about 30 islands, the whole area of which is variously estimated at 78 to 160 square miles. Mahé is the largest island; and Port Victoria, the capital, is situated on a fine harbour on the N.E. side, which is visited by numerous men-of-war, and steamers of the Messageries Maritimes Co., which make it a coaling station on their monthly voyages to and from Australia. The principal exports are vanilla, cocoa-nut oil, and tortoise-shell; but the most remarkable product is the unique double cocoa-nut, *Coco de Mer*.

Revenue, 1895, Rs. 233,282; Expenditure, Rs. 226,004

Imports, 1894, Rs. 604,000; Exports,

Administrator, Henry C. Stewart, C.M.G. Rs. 13,500

Judge, E. M. Brown

Collector and Treas., G. A. Banbury

Auditor, &c., J. Driver, B.A. Rs. 3,000

Government Med. Officer (vacant)

4,000

(2.) RODRIGUES, 350 miles almost due east of Mauritius. Population in 1895 estimated at 2,540.

Area, between 80 and 90 square miles. Cattle, beans, salt fish and goats are the principal exports. The island suffers much from hurricanes; and the revenue usually has to be supplemented by a grant from Mauritius. Magistrate, B. H. Colin, Rs. 5,120.

(3.) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by a magistrate, whose duty it is to enquire into the condition of the labourers, and settle any disputes which may be referred to him. The chief product is cocoa-nut oil. The most important

is Diego Garcia, one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station.

Transit: Mauritius, 24 days; Seychelles, 19 days. Parcels, *via* Colombo, 3 lbs. 2s., 7 lbs. 3s., 11 lbs. (limit) 4s.; *via* France, 3 lbs. 3s. 2d., 7 lbs. 3s. 9d., 11 lbs. 4s. 4d.; telegrams, 5s. per word.

Greater Britain in the Southern Atlantic.

ASCENSION,

an isolated island in the South Atlantic (3,417 miles from Plymouth, 690 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat., and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious. It remained uninhabited till 1815, when the English took possession of it. It now possesses a steam factory, naval and victualling yards, and a coaling dépôt. There are also excellent hospitals. Rabbits abound, and a few pheasants, guinea-fowls, sea-swallows, partridges, and goats, which afford some sport. The island is visited by the sea-turtle from January to May, which lay their eggs in the sand; as many as 276 being "turned" during the season of 1897. The weight is from 500 to 800 lbs., and they are sold at an average price of £2 15s. In 1896 there were about 16 acres of ground under cultivation, producing vegetables and bananas. The island is under the Board of Admiralty, by whom a naval officer is appointed as Captain in charge, and it is managed in all respects as if it were a man-of-war. There are no inhabitants except officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being 380 with about 60 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is of importance as a coaling station, and as a health resort for crews of vessels detained on the African coast. It has recently been strongly fortified.

Imports from U. K., 1896 £5,139

Officer in Charge, Capt. J. E. Blaxland, R.N. £800

Fleet Paymaster, Abraham Turner, R.N.

Staff Surgeon, C. W. Buchanan-Hamilton, R.N.

Transit, about 28 days outward through St. Helena, and 14 days homeward. Parcels, per lb. to 11 lbs. 8d. Telegrams forwarded by post from Cape Town.

TRISTAN D'ACUNHA

is the chief of a group of islands lying in lat. 37° 6' S. and long. 12° 2' W. These islands are of volcanic origin, and were discovered in 1506 by a Portuguese admiral, after whom they are named, and are very healthy. The population numbers about 100, and the inhabitants are said to be very long lived.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length: the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. These islands are visited by large numbers of seals and sea-elephants.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'—53° S. lat. and 57° 40'—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1896 of about 1,992. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonized, and from that time to the present have so continued, being, as a whole, the most southerly organized colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy; and the temperature is on the whole equable, the thermometer ranging in winter from 30° to 50°, and in summer from 40° to 65°. The islands are chiefly pasture-land, and kitchen-gardens occupy the only cultivated part, the population being mainly of the sheep-farming and seafaring industries. The chief exports in 1896 were wool £112,139, sheep-skins £11,431, and tallow £5,305. The total tonnage of vessels entered and cleared in 1896 was 109,667. There are three places of worship (one Church of England, one Roman Catholic, and one Presbyterian). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

There is a volunteer force of 100 men.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, and several other small uninhabited islands, are comprised within this colony.

Amount of public revenue, 1896 £12,538

Amount of expenditure, 1896 13,569

Total imports, 1896 69,985

Total exports, 1896 132,194

Imports from the United Kingdom, 1896... 62,641

Exports to the United Kingdom, 1896 131,183

The Government is vested in a Governor, aided by an Executive Council of three members, and a

Legislative Council, the members of both being appointed by the Crown.

<i>Governor and Judge, William Grey-Wilson, C.M.G.</i>	(and fees) £1,200
<i>Judge & Police Magis. (vacant)</i>	500
<i>Colonial Secretary and Magistrate, Frederick Craige-Halkett</i>	500

CHIEF TOWN, Port Stanley.

Port Stanley is distant about 8,130 miles, transit, 30 days. Parcels, 9d. per lb. to 11 lbs. Telegrams sent by post from Monte Video.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, and 1,800 from the coast of S. America, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population in 1891 of 4,116, including 1,986 males and 2,130 females. It is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day. The lowest temperature in winter is 51°. The total rainfall (1896) was 40 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21st May, 1501 (St. Helena's Day), and remained unknown to other European nations until 1538, when it was visited by Captain Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch colonized it *circ.* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch by Capt. Munden, of the English Navy, and was held by the East India Company, who had obtained a charter for its possession from

Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there 5th May, 1821), when it was ceded by them to the Crown. In those days it was a most important station on the route to India, and many highly-paid officials and wealthy merchants were settled in the island. Its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by American whalers and by a few sailing ships on their homeward voyage from the East Indies. The tonnage dues on calling ships was abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port. Its strategical importance as a coaling station for the British Navy is now recognized, and modern fortifications, with heavy guns, have recently been constructed by the Imperial Government. There is one good inlet only, on the north-west of the island—St. James's Bay—possessing a good anchorage. Oats, barley, root-crops and flax are grown. Of export trade in the ordinary sense there is none, and the natural products are not so fully developed as they might be. The fisheries might be better worked, and productive industries increased by the introduction of plants and trees for which the soil is adapted.

The number of vessels which called in 1896, excluding 159 boarded by island boatmen when passing, was 151.

The government of the island is administered by a Governor, with the aid of an Executive Council of 4 members. There is no Legislative Council, the Governor alone making all ordinances.

Greater Britain: In the Mediterranean.

CYPRUS,

is an island in the Mediterranean Sea, between N. lat. 34° 30' and 35° 41', and E. long. 32° 15' and 34° 35'. It is about 60 miles distant from the nearest point of Asia Minor; and 41 miles from Latakia on the Syrian coast, with which it is connected by a submarine telegraph cable. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards

the north-east. The area is about 3,584 square miles. The population in 1891 was 209,286 persons, of whom about 23 per cent. were Mohammedans, and the remainder mostly members of the Orthodox Greek Church. The principal productions are grain of various kinds, sesame, linseed, wine, silk, olives, locust-beans, cotton wool, and hides. The fertility of the soil has for centuries been proverbial. In 1896 the wine and spirits exported amounted to 1,472,578 gals., the bulk of which went to Turkey and Egypt. The climate varies in different localities. In the plains the summer

heat is very great, and the British troops suffered severely when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus still forms part of the Ottoman Empire; but by virtue of a treaty made between England and the Porte, dated 4th June, 1878, the government is administered by England for so long a time as Batoum and Kars may be kept by Russia. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of eighteen members, six being official and twelve elected. The island is divided into three electoral districts, each returning one Mohammedan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English barrister, who is assisted by two native judges, one being a Christian and the other a Mohammedan. There is also a Supreme Court for the whole island, consisting of two English judges.

The amount paid to the Sublime Porte yearly is £87,800 for revenue, £5,000 in compensation for State lands, and 4,166,220 oke of salt in kind (an oke=2·83 lbs.). This sum is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 12,515 in 1891; the other principal towns are Larnaca (population 7,593), Limassol (7,388), Famagusta, Kyrenia, and Papho.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24½ square miles; COMINO—the site of the Sultan's disaster in 1889, and several islets. The population of the whole group, 31 Dec., 1896, was 176,231, exclusive of the British troops, who numbered 9,707. In religion the Maltese are

Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants from families who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe, and usually speak Italian. There is a native order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are cotton, corn, oranges, melons, grapes, cummin seed, and early potatoes for the London market; figs and honey are plentiful. It was estimated that in 1891 the area under cultivation in the three islands was about 37,896 tumuli. From 4,000 to 5,000 women and children, chiefly in Gozo, are employed in making lace. The principal occupation of the people is, however, in connection with the shipping. In 1896 there were 59,329 persons living in Valletta and the "Three Cities" on the other side of the harbour, and many persons from the neighbouring villages come in daily to work at the Port. The harbour is one of the finest in the world, with such a depth that the largest vessels can anchor alongside the very shore. It is a most important port of call for the many vessels passing to and from the East and Australasia by the Suez Canal, being just half-way between Gibraltar and Port Said. There is also an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet; and an additional graving dock was opened on Feb. 12, 1892. The island is strongly fortified, and has a garrison of 11,887 (including 671 Royal Malta Artillery and a Maltese regiment of militia 1,509 strong). The climate, although not actually tropical, is very hot in summer. In the two hottest months (July and August) the average daily range of temperature is from 71° to 87° F., with an occasional rise to 96° or fall to 65°. In winter the range is from 48° to 58°, with an occasional fall to 41° or rise to 64°. Citta Vecchia, the former capital of the island, is a handsome old town of 7,446 inhabitants, and contains the ancient palace of the courts of justice, the Cathedral, and the Seminary. It has, however, been entirely eclipsed in importance by the modern fortified capital of Valletta, which was founded in 1566. Malta is well provided with an educational system. It possesses a University and Lyceum at Valletta; and 89 elementary schools, 2 secondary schools, and 29 night schools for boys, are maintained by Government at a cost of £21,049 in 1896; in addition to which there are Garrison schools and a Dockyard school, while 126 private schools attended by 3,763 pupils in Malta and Gozo, receive no aid from the government.

In ancient times, Malta was occupied in succession by Phoenicians, Greeks, Carthaginians, Romans, and Byzantine Greeks, as each nation secured the command of the Mediterranean Sea. It attained to a high degree of commercial prosperity, being especially noted in Roman times for its textile fabrics. It is said to have been converted to Christianity on the occasion of St. Paul's shipwreck in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger, of Sicily. For the next 400 years it followed the fortunes of that kingdom; but in

1530 it was handed over to the Knights of St. John, who proceeded at once to make it a stronghold of Christianity against the Turks. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by the Grand Master La Vallette. The Knights freely expended their vast revenues in fortifying the island and carrying out many useful and magnificent works, until, in 1798, they were expelled by Napoleon. The Maltese, however, rose against the French garrison, and with some help from British and Neapolitan forces, compelled it, in 1800, to capitulate. They then ceded the islands to Great Britain, and the cession was confirmed by the Treaty of Paris in 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 7 official and 3 unofficial members, and by a Legislative Council, called the Council of Government—5 official and 14 elected members. The Governor is President in both.

In 1896 the port of Valletta was entered by 3,726 vessels (tonnage, 3,293,200).

GIBRALTAR,

a rocky promontory, 3 miles in length and $\frac{3}{4}$ of a mile in breadth, and 1,439 feet high at its

greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Eliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1896 no fewer than 4,303 vessels entered, with a tonnage of 4,334,582. The chief sources of revenue are the port dues, the rent of the crown estate in the town, and duties on wine, spirits, and beer. An enclosed harbour with three graving docks, capable of accommodating the largest battleships in the British Navy, is being built at an estimated cost of about £4,000,000; the works include a commercial and coaling mole. The estimated resident civilian population 31 Dec., 1896, was 19,859. The actual strength of the troops at that date was 4,925.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation; there being no executive or legislative council. The currency is that of Spain. The accounts are kept in pesetas, which are approximately the same as francs.

See also Indian Section, pp. 441-476; Geographical Exploration, pp. 595-597; Treaties and Territorial Changes' pp. 598-60, and Maps, pp. 469, 598, 600, 602, 604.

A list of the Principal Foreign Countries, giving the Name of their Sovereign or Ruler and Statistics of the Area, Population, Products, and Commerce, distinguishing the Amount of Trade with this Country; the Names of Her Majesty's Ambassadors, Ministers, and Consuls are also given, together with their actual Salaries, and the names of the Foreign Ambassadors and Consuls resident in London.

To many Countries their distance from this country is given and, to nearly all, the time occupied in transit, the rates of Parcel Post, and cost of Telegrams.

POSTAGE.—There is a uniform rate to all parts of the world, the charge for letters being 2½d. the half-ounce; newspapers and books ½d. for two ounces; patterns and samples ½d. the two ounces, but with a minimum charge of 1d.; and commercial papers the same, but with a minimum charge of 2½d.

Many of the following Statistics have been revised specially for the Almanack by direction of the various Governments. The Editor is also indebted to Her Majesty's representatives at Foreign Courts, and to the British Consuls; he has also to thank several of the Foreign Ministers and Consuls in London for many particulars.

ABYSSINIA OR ETHIOPIA.

See also Map, p. 600.

Emperor (Negus Negusti or King of Kings) Menelek of Shoa, G.C.M.G., b. 1843, procl. 12th March, 1889. Viceroys of Tigré, Ras Alula. Viceroy of Shoa, Ras Makunan.

Abyssinia proper consists of four provinces, Tigré, Amhara, Godjam, and Shoa. The area of these provinces, lying between 8° and 15° 30' N. lat. and 36° and 40° E. long. may be reckoned at 100,000 square miles with a population of 3 or 4 millions. But the boundaries of the empire are indefinite except on the east where they touch the Italian colony of Massowah (Eretria) which is a narrow coast strip, the French colony of Obok or Jibuti, and the British Somali Coast Protectorate. Northwards the boundary is about 15° 30' N. lat., falling just south of Kassala. The arrangement between England and Italy in 1891 when Italy claimed a protectorate over Abyssinia, drew the westerly limit of Abyssinia along the 35° of longitude and the southerly limit along the 6° of N. lat. as far as the Shebeli river. A recent traveller gives almost the same boundaries,—viz., to the south a line from Irne on the Shebeli to a point immediately below Bonga in Kaffa, and to the west a line north and south along the western border of Kaffa—as the extreme limits of Abyssinian dominion either by peaceful occupation, by treaty with Chiefs, or by conquest. On the other hand French supporters of Abyssinian pretensions would extend these limits from near Kassala due west to reach the White Nile a little south of Khartoum, and along the whole length of that river as far south as lake Albert (2° N. L.) and then due east to the Shebeli. Russian and French expeditions are seeking to establish an Anti-British dominion across the Nile, between Abyssinia to the French Congo territory. There are the regions called 'the Equatorial Provinces of Ethiopia,' over which M. Leontiff, the Russian, is said to have been appointed Governor, and Prince Henri d'Orleans his deputy. It is no secret that English statesmen have declared most of this region to lie within the English and Anglo-Egyptian sphere of influence.

Abyssinia proper is volcanic and mountainous. It contains little mineral wealth, though iron and coal are not uncommon, gold is washed in various streams, and salt, saltpetre, sulphur, copper, silver, are also procurable. The lower country and deep valley gorges are very hot; the

higher plateaus are well watered and have a genial climate. In the hotter regions, sugar cane, cotton, coffee, indigo, banana, &c. flourish; in the middle zone the vine, palm, maize, wheat, barley, orange, peach and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 9,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, camels, oxen, goats and sheep, form a large portion of the wealth of the people, the wild game consists of elephant, rhinoceros, hippopotamus, zebra, giraffe, antelope, buffalo, hyena, linx, &c. To the north east the people are more akin to the Caucasian and the Semitic, to the south east more akin to the negro; on the west are the plain dwellers who talk Amharic; on the east the mountaineers speaking Tigré, which is akin to ancient Arabic. Of the Galla tribes to the south, some are Pagan, some Mahomedan, and some Christian; the Somalis are Mahomedan, but the Abyssinians are Christian and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. They themselves were converted to Christianity probably about 600 A.D. by monks from Egypt, but have long been isolated from the rest of the Christian world. At the end of the 15th century, an attempt was made by the Jesuits under the Portuguese power to bring the Abyssinian Church under the Papacy. For a time this event seemed likely; but, before the middle of the 17th century, the Jesuit influence was overthrown and expelled, and the Abyssinian Church reverted to its eastern forms, and no trace of Jesuit influence remained. There is no popular literature, and no education; there is a legal code said to be derived from Constantine, but practically government is autocratic, qualified by the power of revolt. There is no standing army, but all are soldiers, and in the struggle against Italy, the Emperor's army probably numbered 100,000, there being certainly that number of modern rifles in the country. The principal pursuits are war, agriculture, cattle breeding and hunting; industry is looked down upon; the chief exports are coffee, honey, wax, gums, muck, vegetable oils, spices, hides, ivory, gold, mules, cattle, and horses. The currency is the Maria Theresa (Austrian) dollar but Indian rupees also

find some circulation in Hassar. There is a demand for imported cloth and woollen goods, metal goods, and cutlery. The import duty on all goods is 8 per cent. *ad valorem*. There is a large trade between the British port of Zaila and Hassar. England came into conflict with Abyssinia in 1867-68 when the then capital, Magdala, was occupied by a British Army under Gen. Napier (Lord Napier of Magdala). In 1889 the Italians made a treaty with King Menelek, under which they claimed a protectorate over Abyssinia; this was repudiated by Menelek in 1893 and finally given up after the Italian defeat at Adowa (1st March, 1896). The subsequent treaty with Italy confined the Italian protectorate to a mere strip along the coast. Since that date Russian, French, and English missions have visited King Menelek at his new capital Antoto or Abdiss Ababa; the French mission under M. Lagarde, and the English mission under Mr. Rennell Rodd. A concession has been given for the construction of a railway under French auspices from Jibuti to the capital with a branch to Hassar. If built, this would take the trade which now mainly passes through the British port of Zaila, from which the road to Hassar is easier and shorter and more secure than that from Jibuti. The principal towns of Abyssinia, besides Antoto, are Adowa, the capital of Tigre, Gonfâr, Basso, Aksum, Ankober, and Hassar which is a dependency of Shoa. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor. Imports from the United Kingdom, 1896, £11,562. The Parcel Post is not in operation.

AFGHANISTAN. (See pp. 459 & 471.)

ALGERIA.

Gov.-Gen., M. Lépine, 1897.

Algeria, the most important French Colonial possession, was formerly inhabited by a nest of pirates, who infested the Mediterranean and made themselves a terror to merchants. As a punishment, the city of Algiers was bombarded in 1816 by Lord Exmouth, and piracy and Christian slavery were for ever suppressed in the Eastern States of Barbary. In 1830, in consequence of a dispute between their Consul and the Dey, the French besieged and took the city, and conquered and annexed the country, which is now a province of France. It is situated between Morocco and Tunis, bordering for about 630 miles upon the Mediterranean, and stretching southward into the Sahara. There are three distinct zones, viz., the fertile Tell, or maritime region; a steppe region, with shots or sebkhas (salt swamps); and the Sahara, with its oases, portions of which lie below the level of the sea. The area is 122,910 sq. miles, exclusive of the Sahara; the population (1896) 4,429,421, including 318,137 Frenchmen and 446,343 other Europeans. The country exports wheat and other cereals, wine, alfalfa or esparto grass, olive oil, fruits, vegetables, and tobacco. The mineral wealth is considerable, and iron, copper, quicksilver, zinc, and lead mines are being worked, while large deposits of phosphates have been discovered in the province of Constantine. The live-stock is numerous, and in 1896 included 255,408 camels, 645,460 horses, mules, and asses, and 11,437,120 sheep and goats. Algiers is much frequented as a winter health resort, the average mean temperature for 13 years being Jan. 54°; Feb. 55°; March 57°; April 61°; May 66°; June 71°; July 76°; Aug. 76°; Sept.

75°; Oct. 68°; Nov. 60°; Dec. 55° Fahr. There were (October, 1896) 2,925 miles of railway. The Revenue is not equal to the cost of administration if the army of occupation, which consists of 54,000 men and 15,000 horses, is included. Algiers has become an important coaling station, and in 1896, 2,677 vessels (mainly British) called at the port.

Total Revenue, 1895	£2,093,492
Imports, 1895, £10,448,493; exports	12,311,494
" French £8,126,536; " to France, 9,131,729	
Imports from United Kingdom, 1896...	261,417
Exports to the United Kingdom, 1896	531,523

ARGENTINE REPUBLIC.

President, Dr. J. E. Uriburu, sworn in 22nd Jan., 1895, for three years

Provisional Vice-Pres., Gen. Julio A. Roca. \$18,000.

Foreign Affairs, & Interior ad int.), Dr. A. Alcorta.

Justice and Public Instruction, Dr. L. Belauastegui.

Finance, Dr. W. Escalante.

War and Marine, General N. Levalle.

Minister in London, Don Luiz L. Domínguez, 16 Kensington Palace Gardens, W.

1st Sec. of Legation, Don Florencio L. Domínguez.

2nd Secretary, Don Luis H. Domínguez.

Consul-Gen., Don Sergio Garcia Uriburu, Broad St. House, New Broad Street, E.C.

Consul, A. Lumb, Broad Street House, E.C.

Vice-Consul, Miguel R. Carneiro.

Consul at Liverpool, Francisco P. Hansen.

Do. Southampton, G. Burmeister.

Do. Cardiff, I. C. Belvis.

Do. Manchester, D. Francisco Leys.

The Republic is composed of 14 provinces and 9 territories, with a large seaboard on the east coast of South America. It is estimated to contain 1,212,000 square miles, with a population estimated at 4,093,000. By the treaty of 23rd July, 1881, with Chile, Terra del Fuego has been divided between these two Republics. The country was discovered in 1517, and settled by the Spaniards in 1535. The principal productions are wool, hides, linseed, sugar, maize, wheat, and tobacco. The other products are tallow, Paraguay tea, and excellent European and indigenous fruits. The mineral products are copper, silver, coal, and salt. The export of frozen sheep to Europe

a becoming of great importance: there are at present 5 factories in working operation. The chief articles of export in the first half of the year 1897 were:—

Wool, 144,000 tons	£5,377,300
Frozen Mutton, 23,094 tons	184,753
Wheat, 87,603 tons	574,155
Maize, 286,098 „	724,487
Hides,	1,728,851
Sundries,	3,198,161

Total £12,807,707

The principal imports from the United Kingdom are machinery, hardware, and cotton, woolen, and linen goods. The total trade in 1895, with Great Britain £10,842,000; France £5,894,000; Belgium £4,527,000; Germany £4,896,000; and to other countries £17,567,000.

In 1897 there were 9,026 miles of railways in working order, connecting the principal cities of the Republic with the capital. Telegraphs, 21,000 miles, mostly government lines. Immigration is encouraged, the arrivals in 1889 reaching the unprecedented number of 218,744, mostly Italians, and in 1896 the total number of immigrants was 102,673; the language in ordinary use is Spanish. The Buenos Aires port works and the new port at the Ensenada have been opened for traffic, while two graving docks have been constructed at Buenos Aires and a naval port at Bahia Blanca.

The Argentine Republic is connected by cable with all the cities in the world. The Army consists of 749 officers and 10,906 men, in addition to the National Guard of about 400,000. The military school has 150 cadets, and the school for non-commissioned officers, 120. Navy (1897): 30 vessels, including 6 armoured vessels, 4 cruisers, 8 gunboats, 4 destroyers, 3 transports, 26 torpedo boats, and 2 vessels under construction. The naval school has 60 cadets, and the school of gunners, 80. Public instruction is much developed: there are 2 universities, 2 schools of engineering, 2 colleges of agriculture, 27 training colleges, and 3,751 public schools, and a school for deaf-mutes, with 9,035 teachers and 330,961 pupils in 1896. The climate of the Argentine Republic is temperate and healthy.

AUSTRO-HUNGARIAN EMPIRE.

Reigning Sovereign, Francis Joseph, Emperor of Austria, King of Bohemia, &c., and Apostolic King of Hungary, born 18 August, 1830; *suc.* 2 Dec., 1848; crowned King of Hungary at Ofen, June 8, 1867; married April 24, 1854, Elizabeth, daughter of Maximilian Joseph, Duke in Bavaria, born 24 Dec. 1837, and has issue 2 daughters.

Heir Presumptive, his nephew (son of the late Archduke Charles Louis), Archduke Francis Ferdinand of Este, born 18 Dec., 1863.

[There are three Ministries for the whole Empire—Foreign Affairs, Finance, and War.]

Minister of Foreign Affairs and of the Imperial and Royal House, Count A. Goluchowski.

Minister of Finance, M. Benjamin de Kállay.

Minister of War, Edler von Kriehhammer.

Navy (forming a department of War Office), Commander: Admiral Baron Maximilian Sternneck.

MINISTRY FOR AUSTRIA.

President and Interior, Casimir Count Badeni.

Pub. Instruct., Dr. Baron P. Gautsch.

Justice, Count T. Gleispach.

Finance, Dr. Chevalier L. de Bilinski.

Commerce, Baron H. Glanz.

Agriculture, Count T. Ledebur.

Defence, Count Zeno Welsersheimb.

Railways, Edler von Guttenberg.

Without Portfolio, Dr. E. S. Ritterer.

Ambassador in London, Count Franz Deym, 18 Belgrave Square, S.W.

Councillor and 1st Sec., Count Albert Mensdorff-Pouilly-Dietrichstein.

Secretaries, Count Alexander Palfy; Count Nicolaus Revertea.

Attaché, Count Francis Karolyi.

Naval Attaché, Capt. Ladislau Sztranyavaszky.

Military Attaché, Maj.-Gen. H.S.H. Prince Louis Esterhazy.

Chancellor, Eduard K. Rütli.

Consul-General, Baron Alfred de Rothschild.

Deputy Consul-General and Director of the Commercial Department of the Embassy, and Vice-Consul, Chevalier Walter de Princié (acting).

Secretary, J. Kohn.

Office, 11 Queen Victoria Street, E.C.

The largest State, next to Russia, on the continent of Europe, situated between 42°—51° N. lat. and 9° 30'—26° 20' E. long. It embraces an area of 261,649 English square miles, and a population (1895) of 44,448,474, viz.:—Austria proper, 115,914 sq. miles, population, 24,736,700; Hungary, 124,448 sq. miles, pop. (1890) 18,120,738; Bosnia and Herzegovina, 20,177 sq. miles, pop. 1,591,036. Among the population (41,359,204 without Bosnia and Herzegovina) there were in 1890 about 18,648,000 Slavs, 10,370,000 Germans, 7,435,000 Magyars, and 2,801,000 Roumanians. According to religion, there were (1890) nearly 32,312,000 Roman Catholics, 3,886,000 Protestants, 3,190,000 Greeks and Armenians, and 1,872,000 Jews. The Empire—the official denomination of which is now Oesterreichisch-Ungarische Monarchie (the Austro-Hungarian Monarchy)—is divided into the Austrian State and the Hungarian State, each having its own Parliament, Ministry, and Administration.

The lands of the Austrian Crown are—Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Carniola, Coast-Districts (Görz, Gradiaca—Trieste, and Istria), the Tyrol and Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina, and Dalmatia. The lands of the Hungarian Crown embrace Hungary proper, Transylvania, Fiume, Croatia, and Slavonia. The soil produces grain of all kinds, potatoes, beetroot, and wine. Austria ranks next to France, Italy, and Spain as a wine-growing country (Austria, 1895: 78,820,962 gallons, and 30,514,198 in Hungary, 1894); but from its inland position and other causes the wines are not so well known in this country as they deserve to be: 767,138 tons of beet-sugar were manufactured in 1895-96. Industry is almost wholly confined to the western half of the monarchy, and more especially to Vienna, Bohemia, Moravia, and Silesia. Styria is the great centre of the iron trade; Brunn is famed for its woollens, Reichenberg for woollens and cottons, Trautenuau for linen, Bohemia for glass, and Vienna and Pilsen for lager beer. The mineral riches are very great, comprising gold, silver, copper, iron, quicksilver, lead, tin, zinc, and coal; petroleum is also found in Galicia.

The Empire possesses a powerful army, amounting, on the peace footing, to 377,018 men, with 14,657 officers; and the war establishment, including a Landsturm of 1,060,300 men, consists of 2,769,714 officers and men, with 2,192 field guns. Military service is compulsory on all. The navy consists of 133 vessels, of which 10 are line-of-battle ships, 3 ironclads, 13 torpedo vessels, and 63 torpedo boats. Pola is the great naval arsenal.

In the year 1895 the imports to Austria-Hungary amounted to £65,132,000; the exports from Austria-Hungary to £63,894,899—precious metals imported £4,512,233, exported £2,021,478. The value of some of the principal articles exported from Austria-Hungary in 1895 is as follows:—Cereals, animals, and mill produce £13,057,597; sugar, £5,006,395; wood, coal, turf, £7,862,679; raw materials and manufactures of the textile industry, £6,201,994; metals, machines and vehicles, £2,521,765; chemicals, grease and oils, £2,536,673; divers other materials, £5,047,196; manufactures, £19,587,687. The share Hungary took in the trade of the Austro-Hungarian Monarchy during the year 1895 is as follows:—Imports to Hungary, raw material, £9,348,750; manufactured goods, £35,941,000. Exports from Hungary, raw materials, £26,084,083; manufactured goods, £15,983,583. Commerce is carried on principally with Germany, Italy, Roumania, and Russia, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1894, 19,548 miles of railway were open for traffic. The commercial marine (Austria) consisted in 1895 of 1,693 vessels, burthen 165,550 tons, and Hungary 246 vessels, burthen 66,076 tons.

Duality extends to the annual budgets. Towards the common expenses Austria contributes to the extent of 68·6 per cent.; Hungary, to that of 31·4 per cent. These common expenses were estimated for 1895 at £13,617,000.

Each of the two countries has a separate Parliament and a separate Ministry.

Austria, Revenue, 1896 (estim.)	£55,500,516
" Expenditure, 1896 (do.)	55,380,813
Debt, Common 5%, December, 1895	229,675,020
" Austrian, " 1895	119,601,444

HUNGARY.

King, Francis-Joseph, also Emperor of Austria, crowned 8th June, 1867.

MINISTRY FOR THE KINGDOM OF HUNGARY, 1895.

President, Baron Desiderius Bánffy.

Ministre *à l'inter.*, Baron Samuel Josika.

Interior, M. Desiderius Perczel.

Finance, M. Ladislaus Lukács.

Instruction and Religion, M. Julius Wlassits.

Commerce, Baron Ernest Dániel.

Agriculture, Ignatius Darányi.

Justice, Alexander Erdelyi.

National Defence, Gen. Baron Géza Fejerváry.

Minister for Croatia, Emerich Josipovich.

Although the term Austria-Hungary is occasionally used, Hungary itself as a State is seldom thought of. Austria alone is mentioned as covering the whole monarchy. Actually Hungary is an independent state, which has, in almost every sense, a separate and distinct existence. The Emperor of Austria is also separately crowned as King of Hungary. In 1896 there were festivities at Buda Pest to celebrate the millennium of the Hungarian State.

Hungary, with its dependent states, has an area of 322,310 sq. kilometres, about 124,448 sq. miles, that is, rather larger than the United Kingdom, with a population of 17,463,791 at the census of 1890: to this Fiume contributes 30,337, and Croatia and Slavonia 2,201,927. The country is divided into 72 counties, with 474 districts for those of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia are annexes of the Crown of Hungary, but both countries have an autonomy for home affairs, law and public instruction. At the head of the Croatian Government is the *Ban*us Khuen Héderváry, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister; all other matters are in common, the Croatian Diet sending 40 members to the Hungarian Parliament, while the Hungarian Ministry contains a Croatian member.

The Hungarian Parliament consists of a Lower House of 433 members, elected for five years; of these Croatia sends 40, but they are not entitled to vote on matters connected with Hungarian justice, education, and home affairs. There is also an Upper House, consisting of the *Barones regni*, prelates, such members of the magnate families who contribute more than 3,000 florins to the land tax, the *Ban*us, and three members of Croatia sent by the Diet, and fifty members nominated by the Crown. Of the inhabitants there were about 8,000,000 native Magyars at the census of 1890, but a large portion of the other nationalities speak also that tongue. Those who do not are generally the uneducated, chiefly Roumanians in Transylvania, who are there nearly as numerous as the Hungarians, the Székelys, "the most excellent Hungarian race," and the Saxons of Transylvania. In addition to Buda Pest, which has about 600,000 inhabitants, there are five cities each containing more than 50,000 inhabitants, and thirty-two with more than 20,000 each.

Hungary excels in its agriculture. All the great plains produce vast quantities of grain of excellent quality. The returns for 1895 (excluding Croatia and Slavonia) give 56,759,473 hectolitres of wheat, 16,751,028 of rye, 19,368,848 of barley, 25,237,853 of oats, and 46,901,275 of Indian corn. The cattle number 4,879,038, sheep 10,594,831, horses 1,748,859, and swine 4,803,639. Hungary is not a manufacturing country; its exports, therefore, are chiefly of cereals, live stock, or of raw materials. Amongst them wheat figures for £3,655,000; barley £1,360,000; rye £1,065,000; and wheaten flour £5,801,000. The imports are chiefly manufactured goods; textile fabrics alone were valued at £12,103,000 in 1891, at £13,114,000 in 1892, at £11,924,000 in 1893, at £13,447,000 in 1894, and at £13,460,000 in 1895.

In mineral productions Hungary is one of the richest countries in the world. The chief products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, "brown coal," sulphur. The mines, however, are not so well worked as they should be, and might be made a much greater source of income to the State and to individuals. Salt, which is a Government monopoly, produced £1,127,000 in 1894.

The chief articles (over 4 million florins) of import in the year 1895 (in thousand florins) were:—

Cotton stuffs	58,649	Ribbons, &c.	6,177
Woolen cloth	75,738	Men's clothes	8,530
Wine in barrels	9,990	Boots and shoes	8,199
Silk fabrics	17,719	Sawn wooden wares	6,087
Women's dress	30,466	Oxen	6,037
Sugar, refined	10,104	Soling leather	5,666
Coffee	7,818	Pictures on paper	4,474
Cotton yarn	9,004	Linon	6,884
Coal	8,539	Books	5,074
Swine	4,079	Wooden furniture	5,020
Linen cloth	7,822	Tobacco, raw	6,630
Parts of machines	8,009	Rice	4,919
Overleather	7,330	Petroleum, raw	4,596

79.3 per cent. being manufactured articles. Hungary manages its own money matters, the income and expenditure for 1895 being as follows:—

Total imports, 1895	£45,331,000
Total exports, 1895	42,068,000
Income, 1895	42,640,226
Expenditure, 1895	41,261,224
Showing a surplus of £1,369,002.	

The National Debt of Hungary, 1895, was:—
I. 4 p. c. Gold Rentes Fl. 577,919,187
4 p. c. Hungarian Crown Gold Rentes 483,663,416
Other Gold Debts 227,764,361
Other debts, Paper and Silver 840,500,996
II. Debts, burdening single portfolios 37,650,079

(£180,493,630) = fl. 2,167,498,039

To the debt of Austria, contracted before 1867, Hungary pays the sum of £2,526,108 annually. As a set-off against its indebtedness the country possesses railways, mines, forests, and other national State property, valued at £27,220,978.

First Secretary, M. Wauters.

2nd do., Baron Raymond Nothomb.

Consul-Gen., François H. Lenders, 118 Bishopsgate Street Within, E.C.

Vice-Consul, Henri de Grelle Rogier, 130 London Wall, E.C.

Consul at Dover, Sir Wm. H. Crundall.

Vice-Consul at Harwich, William Groom.

A Kingdom of Central Europe, anciently inhabited by the Belgæ (a Celtic-speaking German tribe), and part of the *Gallia Belgica* of the Romans. In 1815 the country was joined to the Kingdom of the Netherlands, an arrangement which was upset by the Revolution of 1830. On Oct. 4, 1830, a National Congress proclaimed Belgium independent, and on June 4, 1831, Prince Leopold of Saxe-Coburg was chosen hereditary King.

Belgium has a frontier of 831 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (381 miles), on the east by Germany (60 miles), and the Grand Duchy of Luxemburg (80 miles), and has a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil.

Belgium has an area of 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Scheldt. The other harbours are at Ostend, Nieuport, and Blankenberg.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt (Escarot) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 6,495,885 on 31 Dec., 1896. It is consequently one of the most densely peopled countries of the world. It is divided into nine provinces, namely, Antwerp, Brabant, Flanders (East and West), Hainaut, Liège, Limburg, Luxemburg, and Namur. BRUSSELS (with suburbs, 531,011 inhabitants), is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (267,902 exclusive of suburbs), Ghent (159,218), and Liège (165,404).

The population increases decennially at the rate of about 10 per cent. From 1861 there has been an annual excess of immigrants over emigrants. In 1895 the totals were respectively, emigrants 18,617; immigrants 23,476. There are 1,004 females to every 1,000 males; and annually 29 births and 20 deaths to every 1,000 inhabitants.

French is the chief official language and that of the upper classes, but Flemish has also been adopted as an official language, and may now be used in criminal proceedings; it is spoken by the majority, and preponderates in Flanders and Brabant, including Antwerp; the study of it is making great progress. In 1890 45 per cent. spoke Flemish, 41 per cent. French, 11 per cent. both Flemish and French. Nearly all the inhabitants are at least nominally Roman Catholics, and in 1890 there existed 1,775 convents, inhabited by 4,120 monks and 21,242 nuns. Education can hardly be said to be in a satisfactory condition, for in 1890 29 out of every hundred inhabitants of 5 years of age and upwards were unable to read; and of the recruits levied in 1890, 13.45 per cent. were in a similar condition. There are four universities—Ghent (with 417 students), Liège (979), Brussels (1,265), and Louvain (1,179)—3,850 students in the academic year 1895-96,

besides a famous Academy of Art at Antwerp, a Conservatoire of Music at Brussels, Ghent, Liège and Antwerp, and numerous technical schools.

Belgium is essentially a manufacturing country, for although agriculture is carried on with much industry, like England it is largely dependent upon foreign supplies for its food. The soil is divided (*1889) among 1,173,169 proprietors. Of the total area 58 per cent. is under cultivation, 13 per cent. consists of meadows and pastures, 17 per cent. of forest. The mineral kingdom yields coal (1895, 20,451,000 tons), iron, zinc, lead, and copper. The leading manufactures are fire-arms (Liège), machinery (Seraing), iron and steel, glass (Charleroy), woollens (Verviers), cottons and linen (Ghent), lace (Brussels, Mechlin, and Bruges), hosiery (Tournai), beet-sugar (Hainaut), paper, beer. The exports, in addition to these manufactures, include also corn, butter, eggs, vegetables, coal, building-stones, hides, tallow, and rabbits. The domestic exports in 1896 amounted to £58,717,748. France, Germany, and England take the lead in this foreign commerce. The exports to the United Kingdom in 1896 were valued at £19,221,408, the chief articles being:—

Butter	£190,554	Lace	£107,768
Clocks & watches..	489,398	Linen yarn & mfs..	756,290
Cotton manufacts.	1,004,854	Preserved Meat ..	184,154
Eggs	604,323	Silk and manufs..	2,074,607
Flax	1,076,219	Sugar Refined ..	434,879
Glass	1,170,355	Unrefined ..	554,616
Gloves	431,814	Wool	600,423
Gold leaves	129,660	Woolen manufs..	430,301
Hides	317,995	Do. yarn	1,107,418
Hops	90,129	Zinc	547,558
Iron manufactures	889,960		

The imports of British produce and manufacture amounted to £12,336,634, and included—

Animals (horses)..	£223,093	Linen yarn & mfs.	£253,413
Caoutchouc	118,980	Machinery	721,081
Coals, &c.	339,799	Leather & manufs.	154,866
Cotton yarn & mfs.	1,999,474	Manure	205,911
Cycles	200,519	Metals & hardware	671,301
Fish	191,488	Woolen yarn & mf.	1,398,003

The value of foreign and colonial goods imported by Belgium included cotton, £255,200; wool, £10,297,160; coffee, £3,732,120; jute, £209,800; and palm oil, £25,640; the chief exports being cotton goods, £992,480; woollens, £3,344,800; coffee, £2,090,400; jute, £206,720; palm oil, £222,520. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1895) of 59 vessels (54 steamers), 87,213 tons, in addition to which there were 366 fishing boats. In 1893 there were 2,828 miles of railway (2.036 being the property of the state, with a gross revenue of about £1,785 per mile); the telegraphs had a length of 3,914 miles, and the post-office carried 356 millions of letters, post-cards, &c. The navigable rivers and canals have a length of 1,370 miles.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 62 senators (with the exception of 26 elected by the provincial councils), and 172 representatives are elected by the people, the former for 8, the latter for 4 years. Universal male suffrage, with plural voting up to 3 votes by property and educational qualifications, was introduced by the Electoral Law of 1894, and the united constituencies numbered about 1,407,000 voters, with 2,170,000 votes in 1897.

* Results of 1895 census not yet known.

† Board of Trade Figures.

‡ Belgian Government Statistics.

There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

The army, on a peace footing, numbers 47,361 men without officers with the colours (1896), while the total force upon paper appears to be 164,146. It is recruited by conscription, the term of service being thirteen years, of which from 28 months to four years are passed with the colours. Exemption can be purchased for 1,600 francs. There is also a *Garde civique* of 43,647 men. Antwerp is the principal fortress. In 1888 the Chambers voted £480,000 for the construction of new forts on the Meuse: they are to be armed with guns placed in iron cupolas according to the designs of Gen. Brialmont, to whom the execution of these works was intrusted. Belgium has neither a navy nor colonies; but the King of the Belgians is at the same time "Sovereign" of the Congo Free State in Africa.

Public revenue, 1896 £14,637,088
Public expenditure, 1896 14,686,972
Public debt, 1895, of all kinds 89,861,180
Total imports, 1896 (including Transit) 11,494,868
Total exports, 1896 108,812,084
Imports from U.K., 1896 12,326,634
Exports to U.K., 1896 19,221,408

This and Paraguay are the only States of South America without a seaboard, Antofagasta, its former port, having been ceded to Chile in 1884. It was formerly comprised in the Spanish Vice-royalty of Colombia under the name of "Peru," and derives its present name from its great liberator, Simon Bolivar. It extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is said to be 570,000 square miles. Its population is estimated at about 2,000,000. In the war against Chile, 1879, it equipped an army of about 6,000 men. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible, while gold,

partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: copper, lead, tin, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which are also its principal exports; its chief imports being iron, hardware, and silks.

Public revenue, 1894-5 £515,527
Public expenditure, 1894-5 552,479
Total exports, 1894 3,935,611
Total imports, 1894, over 1,000,000

chester Street.

Consul-General in Liverpool, J. C. de Pereira Pinto.

The Republic of the United States of Brazil was founded on the 15th of November, 1889, by a bloodless revolution which drove Dom Pedro from the throne. A provisional government was immediately formed, upon the model of that of the United States of America, under the presidency of Marshal Deodoro da Fonseca, and on February 24, 1891, a new Constitution was voted by the Constituent Assembly by which the President's term of office was fixed at four years. Everything went on much as usual; but the Church and the State were separated, civil marriages only made valid, and education secularised. A second revolution broke out in 1891 by which President Fonseca was unseated.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4° 22' N. and 33° 45' S. and long. 34° 40' and 73° 15' W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,261,000 square miles, and contained a population of 17,000,000 in 1891, the greater part of mixed blood. In 1871 there were 1,800,000 slaves, but in that year the work of emancipation was commenced; children were born free, but under certain regulations were compelled to serve with their mother until they reached the age of 21. On the 13th of May, 1888, a bill was passed for the immediate and unconditional manumission of all slaves, and now not one is to be found

throughout the States. There are about 1,000,000 "wild" Indians, and other uncivilised tribes; 100,547 immigrants, mostly Italians, Portuguese, and Spanish arrived at Rio in 1896. In 1896 the army consisted of 25,000 men, and the navy of 3 iron-clads, 5 cruisers, 3 torpedo boats, and 1 torpedo-catcher. Brazil contains 20 states, 16 of which lie along the coast, and 4 in the interior. There are 42 ports along the coast, of which the principal is Rio with a shore line of 123 miles. It is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries; and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods, adapted for dyeing, cabinet-work, or ship-building; among these are mahogany, log-wood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea, and in those regions European fruits and grain are reared in abundance, while the intermediate valleys are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, india-rubber, tobacco, and tropical products. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cotton also is being largely cultivated for export. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially Pará; and coffee, though also grown in the north, comes chiefly from the central portions of the country, Rio de Janeiro, Minas, and Sao Paulo. Tobacco is grown largely, especially in Bahia. The exports consist solely of the raw produce of the soil, and owing to the vast extent of the country, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. The imports consist of every description of manufactured articles, but there are 149 cotton-mills, giving employment to 30,000 hands, and representing an invested capital of 200,000 of contos of reis. The enormous protective duties were again increased in 1887, 1893, and 1896. In 1897 there were 9,072 miles of railway open, and about 3,500 miles in course of construction. Length of telegraph wires in 1897 about 11,376 miles; number of post offices, 2,862.

Public Revenue, 1896 £12,210,166
 Public Expenditure, 1896 13,918,750
 (of which £1,909,126 for the Army).

BULGARIA.

Prince, H. R. H. Prince Ferdinand of Saxe-Coburg, born 26 Feb., 1861; elected 7 July, 1887; m., 20 April, 1893, Princess Maria Louise de Bourbon, d. of Robert, Duke of Parma; b. 17 January, 1870; and has issue—Heir Apparent, Boris, Prince of Tirново, b. 30 January, 1894 (2nd son, Prince Cyril, b. 17 Nov., 1895).
President of the Council, Minister of Foreign Affairs and Public Worship, M. Stoiloff.
Minister of Finance, M. Theodoroff.
Minister of Interior, M. Beneff.
Minister of War, Col. Ivanoff.
Minister of Public Works, Ways and Communications, M. Madjaroff.
Minister of Public Instruction, M. Vazoff.
Minister of Commerce & Agriculture, M. Velitchkoff.
Minister of Justice, M. Zgouruff.

The Principality of Bulgaria, with which is now incorporated Eastern Roumelia, is under the suzerainty of Turkey. It was created by the Treaty of Berlin, 13th of July, 1878, and was to have been governed by a Prince elected by the National Assembly or Sobranje, with a popular legislature and constitutional government. By modification of the Constitution 1893, there is now one Deputy to each 20,000 inhabitants. On 7th July, 1887, His Royal Highness Prince Ferdinand of Saxe-Coburg was nominated, and is now recognized by the six great Powers as ruler. United Bulgaria is bounded on the north by Roumania, on the west by Servia and Macedonia, east by the Black Sea, and on the south by the Turkish province of Adrianople, the Danube forming the northern boundary line. The union of Eastern Roumelia with Bulgaria was proclaimed on the 18th September, 1885. Bulgaria contains the five famous Turkish fortresses of Widin, Roustchouk, Silistria, Shoumla, and Varna. Including E. Roumelia, it has a regular army of 39,780 men on a peace footing, and of 302,600 men, with 270 guns, in time of war. There is a flotilla of 16 steamers on the Danube. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal

imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. There are (1877) 607 miles of railway open and 406 under construction; there are 7,731 miles of telegraph and telephone wires. Nationalities and religions of the inhabitants (estimated in 1893):—

NATIONALITIES.	RELIGIONS.
Bulgarians	Orthodox Greek
Turks	Mohammedan
Greeks	Roman Catholic
Gypsies	Protestants
Jews	Jews
Germans	Armenians
Russians	Unknown
Various	

EASTERN ROUMELIA, or South Bulgaria, a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, and 992,386 inhabitants; it was intended to form an autonomous province, but since the successful revolution at Philippopolis, of September 18th, 1885, the former autonomous province of Eastern Roumelia has been incorporated with the principality, under the name of Southern Bulgaria, and the accomplished fact was recognised by the arrangement of April 5th, 1886, at Constantinople, whereby the Prince of Bulgaria was appointed at the same time Governor-General of Eastern Roumelia. Among the products of the country are wheat, wine, tobacco, silk, and attar of roses. The live-stock is very considerable.

The Province, under the name of South Bulgaria, now forms an integral portion of the Principality, with the same rulers, laws, and mode of administration. Its representatives (92) take their places in the General Assembly at Sofia with those from the Northern Province.

Bulgaria and Eastern Roumelia have an area of 38,562 sq. miles, with 3,310,713 (1893) inhabitants. Public revenue, 1896 (estimated) £3,645,756
Public expenditure, 1896 " 3,638,304
Public debt, Jan. 1, 1897 6,833,800

CAMBODIA. (See p. 474.)

CENTRAL AMERICA,

originally comprising one State, known, while in the possession of the Spanish Crown, as the Kingdom of Guatemala, but now divided into five independent Republics, viz., Guatemala, Salvador, Honduras, Nicaragua (including, since the treaty of 28th January, 1860, the Mosquito Territory), and Costa Rica, besides the territory of Belize, or British Honduras, situate upon the east side of the peninsula of Yucatan. It comprises the southern part of the continent of North America; and the total area is calculated in round numbers at 175,867 square miles (inclusive of British

Honduras, see p. 491), with a population of 3,053,000, about a quarter of whom are whites, Creoles of European parentage, the remainder Indians and Mestizos of mixed descent. From the year 1525, when the country was conquered by Dom Pedro de Alvarado, one of the companions of Cortes, to 1821, it remained subject to Spain, but in September of that year it effected its independence. A federal government was established, which, after some years of civil war, was upset in 1839, and the five confederated States above named proclaimed their absolute independence of each other. It possesses mines of gold, silver, copper, zinc, as well as other valuable mineral produce, with various marbles and other stone; but the real wealth of the country consists in the vegetable productions—woods, cotton, coffee, sugar, cochineal, indigo, cocoa, sarsaparilla, tobacco, &c.

Bascunan, 36 Victoria Street, S. W.

Consul, A. G. Kendall, 148 Leadenhall St., E. C.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 18° 28' and 56° 35' S., and long. 66° 30' and 75° 40' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 290,741 square miles, with a population (1896) of about 3,300,000, exclusive of Araucanians, Bolivian and American Indians, numbering about 50,000. The boundary with Argentina has been determined by a treaty concluded at Buenos Aires on July 23rd, 1881, and recently revised and confirmed, but the actual boundary line has still to be marked. The population increases but slowly, and immigration, although to some extent encouraged, is inconsiderable. The number of tribal Indians is small. The Araucanians on the mainland voluntarily submitted to government in 1883, but several tribes

on the islands and in the densely-wooded territory of Magellanes are still virtually independent. More has been done for education than in any other state of South America. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile-pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The mineral wealth is considerable; some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 40 days. There are 1,801 miles of railway open, 8,346 miles of telegraph, 484 post offices, and 5,250 miles of telephone, the last worked by an English Company. Contracts have been entered into for 600 additional miles in order to extend the trunk line through Araucania, and open up some of the mineral districts in the north as far as Huasco and Vallenar. These lines will be all Government property. A Civil War broke out in January, 1891, between the Congressionalists and the Presidential party, terminating, on August 28th, in the capture of Valparaiso by the former. The commercial marine numbers 191 vessels (40 steamers) of 90,738 tons. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 40 per cent. of the foreign trade is carried on with England. The regular army annually authorised by Congress consists of 5,000 men and 600 officers; the navy consists of about 12 large and 10 small ships of war. In 1896, at the request of the governments of Chile and Argentina, Queen Victoria consented to act as arbitrator in the boundary contentions of these two countries. There is a metallic currency with a gold \$ worth 1s. 6d.

Councillor of Legation, Sir Halliday Macartney, K.C.M.G., 3 Harley Place, Regent's Park, W.

Secretaries, Kingcast Tséng; Wang Sih-Kun.

Attachés, Ou Tsong-léen; Kung Sing Chang.

China Proper (or the Eighteen Provinces) contains an area of 1,534,953 square miles, its length from north to south being 1,860 miles by 1,520 in breadth. It is bounded on the north by Mongolia and Manchuria; on the west by Turkestan, Tibet, and Burma; on the south by Burma, Tongking and the China Sea; and on the east by the Pacific Ocean, the Yellow Sea, and Corea. The northernmost part of this area is in lat. 44° 50' N., and the southernmost point, Yulin Bay, in the Island of Hainan, in 18° 10' N. On the east it extends to long. 126° 10' E., on the W. to 97° 30' E. But the possessions of China extend far beyond these limits, and include Manchuria, Mongolia, and Dzungaria in the north, and Eastern Turkestan and Tibet in the west. To the area of China Proper must be added those of her dependent territories, the whole extending to about 4,468,750 square miles, or rather more than one-twelfth part of the entire land surface of the globe. To this should perhaps be added Manchuria, Mongolia, and Tibet, and some other dependencies more or less closely connected with the empire. Within these limits are four great mountain ranges, whence proceed some of the largest rivers in the world, and these, with their tributaries, furnish an unrivalled internal water-communication. The Amur, 2,400 m. in length; the Brahmaputra, which runs more than 1,000 miles within the Empire; the Hoangho, or Yellow River, which in its course of about 2,800 miles drains nearly 715,000 square miles of territory; and the great River Yangtze, which drains an area of 950,000 square miles, is said to flow nearly 3,200 miles. The most extravagant estimates of the population of this empire have been made at various times; it is generally thought that the so-called census returns of Chinese officials are untrustworthy, and that the population does not exceed a total of over 300,000,000, a recent official

Yellow Book giving the number of people as 303,241,969. The density of population in some parts is very great, but the statements regarding this require to be treated with caution. Of the 10,855 foreign residents in 1896, 4,362 were British, 1,439 Americans, 933 French, 870 Germans, 871 Portuguese, and 852 Japanese; and of the 672 foreign firms in China, 263 were British, 99 German, and 87 Japanese.

The NAVY consisted (before the war of 1894-95) of 3 ironclads, 7 cruisers, and 35 ironclad gunboats, 9 torpedo vessels built in England and Germany, and about 100 other vessels, some of which were built in the arsenals of Shanghai and Foochow, but the entire northern squadron was destroyed or captured in the war, and only a few vessels of no fighting value now remain in the possession of China. The MERCANTILE MARINE (1895) consisted of 166 steam and 88 sailing vessels, with a tonnage of 58,154. The ARMY at its full strength would number about 1,200,000 men. The chief imports are opium, cotton and woollen stuffs, kerosene, ginseng, and rice, whilst tea, silk, and silk manufactures, camphor, and sugar constitute the bulk of the exports. A war broke out in 1894 between China and Japan, owing to the attempt of the latter country to put an end to the unsettled state of affairs in Corea, over which country China claimed the suzerainty. Owing to the vigorous conduct of the war by Japan and the lack of organization in the Chinese forces, a speedy result was obtained, and the treaty of Shimonoeki signed on April 17, 1895. Corea was recognized as independent; the island of Formosa was ceded to, and a large indemnity (\$80,000,000) exacted by, the victors. In addition to their personal advantages, Japan obtained the opening of three new treaty ports, Shashih, Soochow and Hangchow. Twenty-six "Treaty" ports are thrown open to foreign commerce, and the customs are managed by European officials.

SHIPPING.—In 1896 the number of vessels entered and cleared at the treaty ports was 40,495, with a tonnage of 33,490,857; of these 19,711 were British (tonnage 21,847,032), and 2,030 were German (tonnage 1,945,019).

COMMERCE.—The total foreign trade of China in 1896 amounted to 343 millions of Haikwan taels (£57,117,473), which was shared by the nations of the world as under:—

Country.	Millions.	Country.	Millions.
Great Britain	55.8	U. S. A.	23.0
Hong Kong	24.4	Europe, except Russia ..	27.5
India	25.2	Russia	17.1
Singapore	4.9	Japan	26.7
Australasia	1.2	Macao	6.2
Mauritius	3	Cochin China	1.4
Brit. America	2.5	Turkey in Asia	1.7
Great & Greater Brit. ..	253.3	Foreign Countries ..	105.6

The principal exports to this country from China in 1896 were tea (£1,119,572), silk (£478,837), skins and furs of all kinds (£451,258), and straw for plaiting purposes (£348,453); while the chief articles exported to China from the United Kingdom were cottons and cotton yarn (£5,882,134), woolsens and worsteds (£785,225), machinery and mill work (£352,977), and metals (£671,890).

EDUCATION.—Nearly all the inhabitants are able to read more or less, with the exception of the women, of whom about 90 per cent. are absolute illiterates. In Peking, Tientsin, and Canton there are schools where a moderate education on western lines may be obtained, but these are not much frequented. The national universities have a unique syllabus and confine

themselves to the Chinese classics. The pioneer of advance in educational and all other matters is Li Hung Chang, G.C.V.O., and the western-style schools are under the direction of Sir Robert Hart, G.C.M.G.

RAILWAYS.—Two lines only are quite or nearly complete, with a total length of about 320 miles in 1897; 200 miles, from Tientsin to Shan-Hai-Kwan, are open; a line from Tientsin to Peking has been opened, and several other lines are authorized. There are about 3,000 miles of telegraph.

CUSTOMS.—The Imperial Maritime Customs is the controlling board; this body consists of 854 Europeans, a large proportion of them British subjects, all under the control of Sir Robert Hart, G.C.M.G. In addition to the collection of dues at the Treaty Ports the board manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations.

NATIONAL DEBT.—The debt was inconsiderable until the war with Japan, which has left China burdened with the payment of a heavy indemnity involving large foreign loans.

FINANCES.—Sir N. J. Hannen estimates the annual revenue as follows: land tax, 25,088,000 taels; grain tax, 6,561,000 taels; salt gabel, 13,659,000; likin, 12,952,000; customs (foreign), 21,989,000, (native) 1,000,000; duty and likin on natus opium, 2,229,000; miscellaneous, 5,500,000; total, 88,979,000 taels, or about £14,829,000.

Revenue and expenditure, 1896, about	£14,850,000
+Gross customs revenue, 1896	3,751,023
+Total debt, 1896, about	40,000,000

Consul in Liverpool, Don Juan V. Aycardi.

Consul at Southampton, Don Pablo Solano.

Formerly New Granada—a Republic with Constitution, 5 August, 1886—consisting of 9 Departments—Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander, and Tolima—in the most N.W. part of South America, and includes the isthmus connecting the two continents, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 83° W. long., comprising an area of 502,000 square miles, and possessing an estimated population (1895) of about 5,000,000, of whom more than one-half are whites and half-castes. It has been subjected to several revolutionary changes and civil wars. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the latter is by far the largest, consisting of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold (of which the output is estimated to exceed that of any of the South American Republics), silver, platinum, copper, iron, lead, coal, and precious stones. Its principal agricultural products are coffee, cotton, plantains, and bananas, while in some parts tobacco, which was largely grown in years gone by, is again receiving attention; also wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The plains yield large quantities of hides, and jerked beef is obtained from the cattle feeding there. The chief exports are coffee (11,215 tons in 1895, value £857,800), the precious metals, and india-rubber. All religions are tolerated. The standing army consists of about 10,000 men, and the navy of 3 small gunboats and one cruiser. Railroads are in their infancy, only 3½ miles being open in 1895, including the Panama line (47 miles), with about 6,500 (1894) miles of telegraph. The currency is paper, of which £2,571,863 was in circu-

lation in 1895; the rate of exchange average

\$12 to the £.	
Revenue, 1896	\$14,977,028
Expenditure, 1895	£1,571,783

PANAMA,

one of the nine Departments of Colombia, occupying the isthmus which joins North to South America. The area is 31,890 square miles, the population (1895) about 311,000. There are 97 primary schools, at which about 3,500 children attend; and 8 public and private colleges, with about 500 pupils. The once famous pearl-fisheries in the Gulf of Panama yield now but little, but other beds are being worked near the Chiriqui Islands, the production being about 1½ tons of shells monthly. Each ton produces about £15 worth of pearls. In 1890 tax was paid on 60 gold and 12 manganese mines, but only 11 gold and 1 manganese are being worked, and the bullion shipments have not been encouraging. The prosperity of the State depends very largely upon its favourable geographical position, which facilitates transit from the Atlantic to the Pacific. The distance from Limon Bay to Panama on the latter is only 35 miles, and the highest elevation of the watershed does not exceed 278 feet. A railway 47½ miles in length, fare first class, 20s., joins the two oceans, and a ship-canal was commenced in 1879 by Ferdinand de Lesseps, the diggings being begun in 1881. In March, 1889, work ceased owing to lack of funds. Up to the date of the stoppage of work 48,400,000 cubic metres of earth and rock had been removed, leaving a balance of 30,000,000 cubic metres to be removed for an eight lock canal, as proposed. The total length of the proposed Canal is 46½ miles; depth, 30 feet; width at bottom, 72 feet, and at surface of water, 124 feet.

The following figures taken from the report presented to the president and judges of the Court of the Seine, on July 25, 1890, by the liquidator, M. Monchicourt, will show the greatness of the enterprise:—

Total expenses at Panama	£31,330,937
Total expenses in Paris	15,628,066
Purchase of Panama Railway shares	3,730,727
Payments to the Civil Society of obligations for the lottery scheme	1,290,587
Payment to the Colombian Government	98,203
Total	£52,078,520

A new company (Compagnie Nouvelle du Canal de Panamá) has been formed in Paris with a capital of 65,000,000 fr., and work was commenced at Culebra on 1st Oct., 1894. A large amount is being spent upon the wharf at La Boca, the Pacific terminus.

CONGO FREE STATE.

(See also p. 603; Map, p. 600.)

Sovereign, Leopold II., King of the Belgians.
Governor-General, Colonel Wahis.
Secretary of State, M. van Etvelde.

The Congo Free State has sprung out of the discoveries of Mr. Stanley, and the explorations carried on subsequently by an International Association founded at Brussels under the presidency of the King of the Belgians in 1876. The new State was in the course of 1884 and 1885 recognized by the leading Powers of Europe, and by the United States, conditional upon its maintaining the principles of Free Trade, and of only levying such dues upon shipping, or otherwise, for which there shall be returned an equivalent in facilitating the operations of commerce. The territory of this State includes the right bank of the Congo to within a few miles below Shonzo; both banks of the river thence to Manyanga; the left bank only as far as the Equator, and thenceforth both banks. In the east it extends to Lake Tanganyika. The total area included within its limits amounts to 802,000 square miles, with a population of probably not over 8,000,000. The mighty Congo, with its numerous navigable tributaries, constitutes the leading feature of this so-called State. It is navigable for large vessels from its mouth at Banana to Matodi (95 miles), where the European steamers discharge and re-charge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls, which it has been proposed to avoid by a railroad 300 miles in length, the first section of which, from Matadi to Tumba, is now open for traffic. Above Leopoldville the river is navigable as far as the Stanley Falls, a distance of over 900 miles. The population of this vast territory consists of numerous negro tribes, of whom none have as yet attained a superior degree of civilization, whilst some still practise cannibalism. There are undoubtedly many fertile tracts, more especially along the rivers; but the barren mountain-land, which shuts out the coast from the more productive interior, necessitating as it does considerable expenses for the transportation of articles of commerce ill able to bear them, must always present a difficulty in developing the resources of the country. The railway has been surveyed up to the 214th kilometre, and completed up to the 160th kil., and one year's outlay up to June, 1895, was over 6,000,000 frs. The exports consist mainly of palm-kernels, palm-oil, ground-nuts, caoutchouc, copal, ivory, wax, sesam, dyewoods, copra, hides, and a few minor articles. The coffee plant, sugarcane, and cotton grow wild, and tobacco has been planted with success. Gold, iron, lead, copper, and other minerals have been found. The King of the Belgians has endowed this State out of his private fortune to the extent of £40,000 annually. Receipts, 1895, £280,108; Expenditure, '95 £329,452.

Imports, 1895, £427,432; Exports, 1895, £437,720.
Imports from United Kingdom, 1896 ... 98,559
Exports to United Kingdom, 1896 ... 12,985

COREA.

See also p. 603.

Emperor, Li Hsi, (King, 1846, proclaimed Emperor, 1877).

Corea, the bone of contention in the war between Japan and China (1894-5), is an Asiatic Kingdom consisting mainly of a peninsula lying to the north-east of China, between 34° and 43° N. lat. and 125° and 130° E. long., and measuring some 600 miles from north to south, and 135 miles from east to west. The area is estimated at upwards of 80,000 square miles, with a population variously estimated between 6 and 18 millions, but reckoned according to the "last government census" at 10,528,937. Corea has only three neighbours, China, Japan, and Russia. It possesses several good natural harbours. Off its southern coast is the island of Port Hamilton, which was occupied by Great Britain in 1885, but subsequently evacuated, China at the time guaranteeing that it should not be occupied by any other power, and Russia undertaking not to occupy Corean territory under any circumstances whatsoever. The name Corea is derived through the Portuguese from *Ko-ri* (Chinese Kao-li), the title of the previous dynasty from 920-1392 A.D.; to the inhabitants themselves the country is known as Cho-sen. Buddhism grafted on spirit and ancestor worship may be said to be the religion of the country. There are a number of American and British and other Protestant missionaries in Corea; but their following is small compared with the converts of the Roman Catholic missionaries. The people are tall, robust and good-looking. They belong to the Mongolian stock, and their language is Turanian with the addition of many Chinese words. The people are idle and unprogressive, so that the commerce of the country is falling into the hands of the Japanese. The soil is very fertile, but only partially cultivated: rice, beans, and all kinds of grain are raised, as also tobacco, hemp, pea-cotton, &c.; ginseng, a medicinal root much affected by Chinese, is an important article of cultivation and revenue under Government monopoly. Gold, copper, coal, iron, and galena abound, and a concession was recently granted to an American syndicate to work the gold mines in the neighbourhood of Ping-Yang. Native manufactures are in a very primitive condition; the only article calling for special notice being an excellent quality of paper made from the bark of *Broussonetia papyrifera*. The country, until the war of 1894-5, was considered to be subject to a rather indefinite suzerainty on the part of China, and was accustomed to send annual tribute missions to Peking; but by the Treaty of Shimonoseki Corea was declared independent of China. Japan enforced all her demands, possessed herself of Corea, and regulated its internal administration. The constitution as established by Japan is still in existence, but many reforms introduced by them have been allowed to fall into desuetude, and a strong tendency has recently shown itself to revive the abuses that were formerly rampant. The finances of the country have been placed on a

sound footing under the direction of the Chief Commissioner of Customs (J. McLeary Brown), who has proved conclusively during his eighteen months' tenure of office that Corea can exist on her own resources.

The army has recently been reorganized under Russian superintendence; the nominal force consists of about 5,000 men, of whom 1,000 constitute the Palace guard, the whole being drilled by Russian (27) commissioned and non-commissioned officers.

By recent Treaties of Commerce (that with Great Britain having been concluded in 1883), the capital, Séoul, and the three ports of Chemulpo (Jenchuan or Jinsen), Fusan, and Wonsan (Yuen-san or Gen-san) are open to foreign trade, and from Oct. 1, 1877, the ports of Chinnampo and Pingyang. The seaborne trade is almost wholly carried on in Japanese bottoms, the number of Japanese vessels cleared in 1896 being 1,389, with a tonnage of 424,984, British vessels numbering 13, tonnage 14,651. In 1894 the trade of Chemulpo with Japan and China amounted to \$3,088,012 and \$1,894,820 respectively.

Railways.—A French firm has obtained a concession to construct a line from Séoul to Wigu, and an American syndicate one from Séoul to Chemulpo.

Total revenue, 1896, about \$4,000,000

COSTA RICA, REPUBLIC OF.

(See also p. 603.)

President, Rafael Iglesias, *elect-d* 8 May, 1894.
Minister of Foreign Affairs, Señor R. Pacheco.

Consul-Gen. in London, John A. Le Lacheur, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1892) of 243,205. The chief exports are coffee (233,065 bags, £380,000 in 1896-97), sugar, caoutchouc, metals, sarsaparilla, dye-woods, hides, cedarwood, tortoise-shell, and fruits. In 1896, 1,692,000 bunches of bananas were exported, valued at £121,824. The chief ports are Punta-Arenas, on the Pacific, and Port Limon, on the Atlantic. The imports are dry goods, hardware, provisions, and machinery for drying and cleaning coffee from the United States, Germany, and England. A railway from Limon, on the Atlantic, to San José, the capital, 118 miles, and from thence to Alajuela, a further distance of 13 miles, is now open, and the chief imports and exports of the Republic are now made at Port Limon. There is a further line of railway, about 12 miles, from Punta-Arenas to Esparita on the Pacific, and a small line (4 miles) from Limon to Rio Banano. An American firm has contracted to construct a railway from San José to Titives on the Pacific. The line from Alajuela to Port Limon belongs to an English company styled "The Costa Rica Railway Com-

pany," and besides this a considerable amount of English capital is embarked in large tracts of lands, mines, markets, tramways, and other industries.

Public income (Budget), 1897 £676,652
 Public expenditure (Budget), 1897 672,826
 Public debt, foreign (consolidated 1888) 2,000,000
 Total imports, 1896, £949,763; exports, £1,119,543
 Imports from U.K., 1896 £225,448; exports £317,514
 \$11 50 = £1.

CRETE (OR CANDIA).

(See also p. 597.)

Sovereign, H. M. the Sultan of Turkey.
Governor-General (vacant).

Crete (or Candia) is an island about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles; the population amounts to about 250,000, of whom quite four-fifths are Christians, the remainder being Mussulmans speaking the Greek tongue. The island formed part of the early and later Roman Empire, and in 1669 was captured by the Turks, from whose rule it has been almost perpetually in revolt, there having been seven insurrections of note in 1821, 1865, 1868, 1877, 1889, and 1895. General attention has been directed upon the island owing to the calling in of Greece to aid the last-named rebellion, and the reproving action of the Concert of Europe, owing to the fact that the intervention of Greece seemed likely to render more difficult the fulfilment of treaty obligations towards Turkey.

A blockade was commenced in 1897 in order to coerce the revolutionists into submission and to prevent indiscriminate slaughter, but it was found impossible to prevent Greece from rushing into a disastrous war with Turkey on the mainland, during the finish of which the Greek forces were withdrawn from the island. The revolution is still smouldering, but it is hoped that the new governor will be able to pacify the island. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are wheat and fruit; and wool, soap, olive oil, and cheese are the principal exports.

The chief towns are Canea (pop. 22,000).
 CANDIA, the capital (pop. 14,000), and Retimo (pop. 8,000).

Candia—Consul, Sir Alfred Biliotti, K.C.M.G., C.B. £700

Vice-Consul, E. Cassimatis

Ditto—Manchester, P. A. Paulsen.

Ditto—Belfast, A. M. Münster.

A Kingdom of Northern Europe, and the smallest of the Northern States, with a Constitution dated 28 July, 1866; consisting of the islands of Zealand, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'–57° 44' N. lat. and 8° 5'–12° 40' E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,789 square miles, with a population in 1890 of (including Farøe Islands) 2,185,335, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. Its chief exports are those of agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle, the latter principally to Great Britain. Denmark possesses an army of 50,522 men on the warfooting; a navy consisting of 37 steam-vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men; and a mercantile marine of 3,651 vessels, with a tonnage of 345,583. There are 1,389 miles of railway and 8,201 miles of telegraph. There is a free harbour (Frihavn) at Copenhagen, opened 9th November, 1894.

San Domingo, formerly the Spanish portion of the island of Hayti, is the oldest settlement of European origin in America, having been founded in 1494 by Bartolomeo Columbus. The capital city contains the Cathedral and Columbus's residence. It comprises an area of about 20,596 square miles, with an estimated population of nearly 500,000. The chief products are tobacco, coffee, sugar, cocoa, mahogany, and a great variety of other furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, and divi-divi. Sugar, the most recent industry, is now the most important. The minerals are gold, copper, and iron. There are several miles of railway, and telegraphic communication has been established throughout the Republic, which is connected by cable with North and South America.

ECUADOR, REPUBLIC OF.

President, General Eloy Alfaro (1893) \$24,000
 Foreign Minister, Rafael Gómez de la Torre.
 Sub-Secretary to do., Leonidas P. Arteta.

Consul-General in London, Don Celso Neveas,
 3 Cophthall Buildings, E.C.

A State of South America, on 'its western side, being that portion of the original Republic of Colombia which lies on each side of the Equator, extending from lat. 1° 38' N. to 6° 26' S. (according to the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70° and 81° W. long., comprising an area of 120,000 English sq. miles. It has a population of about 1,270,000, mostly descendants of the Spaniards, a original Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 16 provinces and one territory. In 1891 there were 57 miles of railway open. An arrangement was recently made with the bondholders for the conversion of the Debt, but the Dictator, in 1895, suspended payment pending a further and less onerous arrangement; meanwhile a 10 per cent. surtax upon import dues is being collected and deposited in a Guayaquil bank. Guayaquil is the chief port: population, 1896, about 50,000. In 1890 the customs duties amounted to £460,162.

The population of the other chief towns is approximately as follows: Quito, 40,000; Cuenca, 25,000; Riobamba, 12,000; Ambato, Loja, and Latacunga, 10,000.

The GALAPAGOS ISLANDS (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

Director-Gen. of Customs, Alfred Caillard, G.M.O.
 British Controller-General, Daira Sanieh Administration, Harry Crookshank Pasha, F.Z.C.S.

The position and condition of Egypt are unparalleled. Nominally a province of the Ottoman Empire, it is also autonomous and under the rule of the Khedive by Firmans of the Sultan in 1841, 1866, 1867, 1879, and 1892, subject to the annual payment of a tribute of £682,092. It is at the same time entirely dependent for its existence as a Sovereign State upon the will of stronger Powers, England at the present moment being dominant. The title of Khedive was given by Firman of 14 May, 1867, and is hereditary. In consequence of a military revolt, headed by Arabi Pasha, which the Khedive was powerless to subdue, England was most unwillingly compelled to intervene, and is now in occupation of Egypt, and for many years to come must continue to exercise a very powerful influence over the fortunes of the country. Whilst British troops were re-establishing the authority of the Khedive in Egypt, a revolution, headed by Mohammed Ahmed, who proclaimed himself a Mahdi, broke out in the Egyptian territories in the Soudan. The Egyptian troops having been beaten in the field, General Gordon volunteered to proceed to Khartoum to withdraw the garrisons. He fell dying nobly at his post (26 Jan., 1885) before an English expedition, sent somewhat tardily to his relief, could reach him. Since then the whole of the upper valley of the Nile and the vast territories which had been brought under Egyptian rule, almost as far as the Equator, have been abandoned until the year 1896, when a military expedition under the Sirdar started for the south; the province of Dongola was recovered in that year, and Berber in 1897. There is a railway from Cairo to Dongola, which is now being extended to Berber. The Italians have established themselves in Abyssinia, and part of that country forms the colony of Eritrea (see p. 561, and Map, p. 600), but owing to serious reverses they have been gradually retreating, and will, it is said, shortly hand back the administration of part of their remaining territory to the Egyptian government. Nubia, Senaar, Kordofan, Darfur, and other districts acknowledge the sway of Khalifa Abdullah el Taashi, whom the Mahdi appointed his successor when he died. The whole of these former dependencies of Egypt have an estimated area of 760,000 square miles with 11,000,000 inhabitants. The population in 1882 was 6,806,381, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,716 French, 8,022 Austrians, 6,118 English, &c.), and by the census of 1897, 9,700,000, of whom about 100,000 are foreigners.

The cultivated portion of Egypt is confined to

The country annually inundated by the Nile, or capable of being irrigated by canals. Its agricultural products consist of cotton, millet, maize, wheat, rice, melons, gourds, sugar, hemp, &c. It has no metals; but salt, petroleum, nitre, marble, red granite, Oriental alabaster, and limestone are found. The chief imports are cotton stuffs, coals, provisions, woollens, coffee, tobacco, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cottonseed (85 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, cigarettes, ivory, and ostrich-feathers. Of the entire trade over 53 per cent. is carried on with the United Kingdom, 9 per cent. with Turkey, 8 per cent. with France and Austria. There are 958 miles of railway open to traffic.

The British army of occupation, October, 1892, numbered about 3,500 men, which was increased in January, 1893, by two battalions. There is a local military and police force of about 16,000 men. One of the beneficial effects of the English occupation has been the abolition, in 1890, of the hateful *Corvée*, or forced labour system, except in cases of emergency, such as the guarding of the Nile banks during the floods. In the same year Sir Evelyn Baring (Lord Cromer) was able to announce the Conversion of the Privileged Debt, by which large economies to the Egyptian Treasury were effected.

Egypt being now the high road to India, England is compelled to take an active part in supporting the Khedive. In consequence of gross mismanagement and extravagance, the finances of the country had got into a thoroughly disorganized condition, almost hopeless. Strenuous efforts, however, have been made to bring the Revenue and Expenditure into a state of stable equilibrium, and at the present moment Egyptian Finance stands in a position of acknowledged security.

THE SUEZ CANAL.

The Suez Canal was opened in 1869, the English Government acquiring by purchase, 25 Nov., 1875, shares to the amount of £4,000,000 (the present value being £22,299,000). The total length of the canal is 99 miles, with a width of 327 feet for 77, and 196 for the remaining 22 miles; the depth is 26 feet throughout. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war.

Traffic Returns:—

FINLAND.

Grand Duke, The Emperor of Russia.
Gov.-Gen. Lt.-Gen., S. Gontsharow (acting).
Secretary of State, Lt.-Gen. C. Von Daehn.

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808, but was, nevertheless, permitted to retain its ancient native institutions. The Finns call their country "Suomenmaa," that is, "Land of Fens," and very appropriately so, for Finland is a granite plateau, about 400 feet high, abounding in morasses and lakes. The hills nowhere attain a greater height than 4,000 feet, and that only in the extreme north: the coast, considered very beautiful, is much indented, and fringed with islands and reefs. Of the total area, 11½ per cent. is covered with lakes, 54 per cent. is woodland, and only about 10 per cent. is under cultivation, and the rest waste land or coarse pastures. The area is 144,254 square miles, with a population of about 2,572,801 in 1897, of whom about 2,195,900 are Finns, 360,000 Swedes, 12,000 Russians, and 2,000 Germans and 1,000 Laps; Laps lead a nomadic life in the north. Nearly all the inhabitants are Lutherans. Education is well cared for, and there is a flourishing university at Helsingfors, with over 2,000 students. Swedish is the language of the upper classes. The leading crops are rye, barley, oats, potatoes; but Finland does not produce sufficient cereals for home consumption, and large quantities are imported from Russia and Germany. Most of the land belongs to peasant proprietors. Thanks to the picturesque scenery, the abundance of fish and game, and the number of good routes by rail or steamer, the country is now becoming a favourite resort of tourists and sportsmen. The live stock, in addition to horses, cattle, sheep, pigs, and goats, includes also the reindeer in the extreme north.

Iron lake and bog-ore, copper, lead, and graphite are found, but no salt. The iron industry is of importance, and spinning and weaving of cotton, flax, and wool, distilling, the making of matches, sugar-refining, shipbuilding, saw mills, and other branches of industry are carried on with success. The forests are a great source of wealth. Immense quantities of timber are prepared for export, and owing to improved means of communication, and the use of machinery, the wood which formerly took two or three years to reach the ships, is now frequently felled, prepared, and exported in one year. The exports include timber, wood-pulp, butter, textile fabrics, paper, and iron. There are 1,491 miles of railway; and (1896) a marine of 1,920 vessels, of 265,830 tons.

Finland is a constitutional monarchy of a somewhat antiquated type. The Diet consists of four estates:—nobles, clergy, burgesses, and peasants, and is convoked triennially, and the country is chiefly governed by the Imperial Finnish Senate, comprised of 22 members. There are 9 battalions of Finnish Rifles, mustering 4,471 men, with a reserve of 30,000.

Public revenue, 1895 £2,624,070
 Public expenditure, 1896 2,174,983
 Public debt, 1897 3,454,592
 Imports, 1895, £6,905,662; exports, 1896 6,357,697

CAPITAL, Helsingfors. Pop., 85,000, inc. garrison.

FRANCE.

(See also pp. 593-505.)

Pres. of the Republic, Félix Faure, born at Paris 31 January, 1841; elected 17 January, 1895 (in place of Jean Casimir-Périer, who resigned).

Formerly a member of Chamber of Deputies and Minister of Marine £24,000

* *Premier and Minister of Agriculture, M. Méline.*
Minister of Finance, M. Georges Cochet.
Minister of Public Instruction, M. A. Rambaud.
Minister of Justice, M. Darlan.
Minister of War, General Billot.

* As a general rule modern French Ministries enjoy but a short term of office. In the years since the fall of the Empire there have been thirty-five Ministries:—

1870 M. Jules Favre.	1883 M. Jules Ferry (a).
1871 M. Dufaure.	1886 M. Brisson.
1873 Duc de Broglie.	1886 M. C. de Freycinet (3).
1874 General de Cissey.	1886 M. Goblet.
1875 M. Buffet.	1887 M. Rouvier.
1876 M. Dufaure (a).	1887 M. Tirard.
1876 M. Jules Simon.	1888 M. Charles Floquet.
1877 Duc de Broglie (a).	1888 M. Tirard (a).
1877 Gen. de Rochebouet.	1890 M. C. de Freycinet (4).
1877 M. Dufaure (3).	1892 M. Loubet.
1879 M. Waddington.	1892-3 M. Ribot (1 & a).
1879 M. Chas. de Freycinet.	1893 M. Dupuy.
1880 M. Jules Ferry.	1893 M. Casimir-Périer.
1881 M. Léon Gambetta.	1894 M. Dupuy (a).
1882 M. C. de Freycinet (a).	1895 M. Ribot (3).
1882 M. Duclerc.	1895 M. Bourgeois.
1883 M. Fallières.	1896 M. Méline.

Minister of Marine, Admiral Besnard.
Minister of Commerce, M. Henri Boucher.
Minister of Interior, M. Barthou.
Minister of Public Works, M. Turrell.
Minister of Foreign Affairs, M. Hanotaux.
Minister of Colonies, M. André Léon.
Ambassador to Russia, Comte de Montebello;
Austria-Hungary, Marquis de Reverseaux;
Germany, Marquis de Noailles; Italy, Monsieur
Billot; Turkey, Monsieur Cambon; U.S.A., M.
Jules Cambon.

Ambassador in London, Baron Alphonse de Courcel, Albert Gate House, Hyde Park.
Minister Plenipotentiary, M. Geoffray.
1st Secretary, Count E. de St. Genys.
2nd Secretaries, M. D. de la Chaussée; M. Doulet.
3rd ditto, Vicomte de Manneville; M. R. de Billy;
C. de Valdrome.

Attachés, J. Seydoux; Vicomte A. d'Espenilles.
Military Attaché, Lieut.-Col. Le Comte Du Poata-vice de Heusey.

Secretary Archivist, M. Knecht.
Consulate-General, 38 Finsbury Circus,
Consul-General, M. André Lequeux.
Consuls, M. Edouard Clavery; M. Gausсен.
Chancelier, M. Nettement.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 204,146 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests, Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent, as the wines of Bordeaux, Burgundy, Champagne, &c., evidence (1896, 982,435,365 gal.). The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1896, 27,583,000 French tons), pig iron (1894, 2,069,714 French tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. Its oyster fisheries are an important industrial feature. The increase of population is very slow, as will be seen from the following table:

Year. Population. Year. Population
 1700 19,660,300
 1801 27,349,003
 1821 30,461,873
 1856 36,039,364
 1866 38,067,064
 1872 36,102,921

France has always been attractive to foreigners, of whom (1891) 1,112,072 were resident there, the department of the Seine containing 186,792 in

1881 37,672,048
1886 38,228,003
1891 38,343,592
1895 38,133,365
1896 38,517,975

* France is the largest wheat-growing country in Europe, the average crop for the last three years amounting to 341,230,213 bushels (1894, 366,797 319; 1895 320,921,299; 1896, 320,989,019).

1896. There are about 517,000 Frenchmen in the Colonies and in various parts of the world, and a colonial population of (according to the estimates of the French Ministry of Commerce) 31,053,774; but with French protectorates 77,139,000, including France. Even the comparatively small increase of the population now shown was (as it, in fact, still is) largely due to immigration from other countries. The annual number of births has been steadily decreasing, whilst, at the same time, that of deaths has been more or less on the increase, viz. :—

Births.		Deaths.	
1884.....	937,758	—	—
889.....	880,579	794,933	—
1890.....	836,019	876,000	—
1893.....	874,000	867,000	—
1894.....	855,000	815,000	—
1895.....	834,173	821,986	—

In 1881 there were 650,000 Protestants and about 85,000 Jews, 40,000 of whom reside in Paris.

The effective strength of the ARMY under the colours in 1897 was 576,859, with a gendarmerie of about 25,861 men. On a war footing the army numbers fully 2,200,000 men, with 141,798 horses and 3,200 guns. The NAVY consisted in 1896 of 29 battleships (6 *building*), 9 armoured cruisers (1 *building*), 23 protected cruisers (14 *building*), 20 unprotected cruisers, 14 coast defence, 13 torpedo vessels (3 *building*), 211 torpedo boats (9 *building*), and 1 special vessel, with 2,084 officers and 43,451 men. The educational system is governmental, and presided over by a Minister of Instruction, part of the expense being defrayed by the State. In addition to the faculties of Theology, Law, and Medicine, the Lycées, the Colleges, the Naval and Military Schools, and the Ecole Polytechnique, the State supports numerous establishments for instruction in special branches of knowledge. The system of railways in France is very extensive; they are almost entirely *concedés*, and become State property after the expiration of the concession. The average length open for traffic in 1894 was 22,656 miles, the total receipts for 1894 from passenger and goods traffic, &c., being £47,319,063. The length of telegraphs is 62,862 miles. There is a mercantile marine of 15,536 vessels (14,301 sailing) of 894,071 tons.

The imports consist largely of food and raw materials; the exports of manufactured goods. The most important among the former are cereals and flour, wine (the imports of which exceed the exports), wool, raw silk, timber, hides and skins, cotton, coal, live animals, cotton yarns and manufactures. The exports rank thus:—woollens, wines, silks, hides and skins, raw silk, leather wares, haberdashery, &c., cheese and butter.

The trade in 1894 was shared thus:—

Exports, 3,028,100,000 francs—	
Great Britain	912,900,000
Belgium.....	478,000,000
U.S.A.....	185,000,000
Germany.....	324,600,000
Italy.....	98,100,000

Imports, 3,850,400,000 francs—

Great Britain	480,300,000
Belgium.....	371,900,000
U.S.A.....	327,000,000
Germany.....	310,000,000
Italy.....	121,600,000

The chief articles exported to the United Kingdom in 1896 were:—

Brandy.....	£1,195,479	Gloves.....	£902,608
Butter.....	4,537,695	Lace.....	612,783
Clocks and Watches	871,005	Leather & Hides	1,015,959
Corn, all kinds.....	827,851	Silk, all kinds.....	12,973,994
Cotton Manufacts.	14,641	Skins and Fur.....	443,401
Eggs.....	1,272,300	Sugar, Refined.....	1,018,530
Fish, £460,727; Poultry and Rabbits.	345,397	Unrefined.....	793,505
Flowers, Artificial.	502,882	Wines.....	3,405,314
Feathers.....	413,328	Wool.....	819,433
Fruit.....	248,943	Woolen Manfrs.....	5,943,308

The chief articles imported from the United Kingdom in 1896 were:—

Coals, &c.....	£2,524,426	Machinery.....	£1,324,729
Cotton Yarn.....	419,037	Metals & Hardware.	960,052
Cotton Manfrs....	638,600	Silk and Manfrs....	420,139
Iron and Manfrs.	351,840	Woolen Manfr., &c.	1,288,366
Leather and Hides	388,047	Yarn, Alpaca, &c..	668,821

The National Debt is stupendous, the nominal capital of the Funded Debt amounting in 1896 to £1,228,114,532 (the total of the Floating Debt being £51,653,672 in 1894), the heaviest debt ever yet incurred by any nation in the world.

The Interest on the Funded Debt paid in 1895 was as follows:—

Perpetual 3 per Cents.....	£18,245,077
Perpetual 3½ per Cents.....	9,505,697
Redeemable 3 per Cents.....	4,783,824

Total..... £32,534,358

In the Budget for 1897 preparation is made for the expenditure of 260,000,000 francs for establishing fortified posts and coaling stations at Madagascar, Martinique, and in the Mediterranean; and for increasing and restoring the existing fleet.

Revenue, 1896.....	£135,740,473
Expenditure, 1896.....	£135,727,563

(including Military..... £25,350,280 and Naval..... 10,637,096)

Total value of imports, 1896.....	151,944,000
Total value of exports, 1896.....	136,036,000
Imports from United Kingdom, 1896.....	20,517,320
Exports to United Kingdom, 1896.....	40,336,240

FRENCH COLONIES AND DEPENDENCIES.

(See also MAPS pp. 600 and 602.)

I. In Africa: Starting on the west coast we find (1) the FRENCH CONGO and GABON with the Congo Free State on the south and east, and the German Cameroons on the north and west, but undefined to the north-east. The area of this colony is about 280,000 to 290,000 square miles, and its population between 4,000,000 and 6,000,000; the principal exports are cocoa, coffee, ebony and other wood, gum copal, palm oil and rubber, the chief town and trading station being Loango on the coast. The next colony is (2) DAHOMEY between the British colony of Lagos and German Togoland; it consists of about 95 miles of the Benin coast, where are the settlements of KOTONOU and GRAND POPO with the hinterland, and contains an area of about 4,000 or 5,000 square miles inclusive of the Protectorates. The capital of the colony is Abomey and the chief port Whydah. Between the British colony of the Gold Coast and the republic of Liberia is (3) the FRENCH IVORY COAST comprising the settlements of GRAND BASSAM and ASSINIE and the KROO country with the hinterland; and next in order comes (4) FRENCH GUINEA comprising the settlements of RIVIERES DU SUD (capital, Konakri) and FUTA JALLON, and extending up the whole of the north-west coast (save where intercepted by Portuguese Guinea and the British colony of the Gambia) to join the colony of (5) SENEGAL (capital, St. Louis, pop. about 22,000), the principal exports of which are gold, ground nuts, gum, palm nuts and oil, and rubber. The total area of French Guinea and Senegal is about 60,000 square miles with a population of over 1,000,000. The territory watered by the rivers

Senegal and Gambia forms the district known as SENEGAMBIA. The hinterland of the Senegal and Guinea colonies forms the vast tract of territory known as (6) the FRENCH SOUDAN, which embraces an area of about 300,000 square miles, and contains an estimated population of between 3,000,000 and 4,000,000. In addition to the foregoing the greater part of (7) the SAHARA is a French Protectorate on the southern verge of which is the town of TIMBUCTU (pop. about 25,000). The area of this vast district is variously estimated but probably contains over 1,000,000 square miles; the population may number anything between 50,000 and 500,000.

On the north of the continent is the colony of (8) ALGERIA (see p. 533) practically part of France and the Protectorate of (9) TUNIS (see p. 581), and on the north-east coast (10) OBOOK and the GULF of TAJUBA, to the north of British Somaliland, having, with its dependencies, an area of about 45,000 square miles, and an estimated population of under 250,000. Off the east coast, in the Indian Ocean, is the vast island of (11) MADAGASCAR (see p. 563), with the dependencies NOSSI BÉ and SAINTE MARIE islands, and further east is the island of (12) REUNION, area about 970 square miles, estimated population 170,000, with the islands of ST. PAUL and AMSTERDAM, and KERGUELEN ISLAND to the south east.

II. In America, France possesses two small groups of islands off the south-east coast of Newfoundland of which ST. PIERRE and MIQUELON are the largest respectively; their combined area is about 95 square miles, with a total population of about 12,000, and they form an excellent basis for the French cod fishery. In the West Indies two of the most fertile of the Lesser Antilles belong to France, viz., MARTINIQUE (capital Fort Royal), area about 400 square miles, estimated population 190,000 (Total imports, 1896, £915,520, exports, £857,240); and GUADALOUPE (capital Pointe-à-Pitre), area about 500 square miles, estimated population 170,000 (Total imports, 1896, £870,508, exports, £751,756). Guadaloupe Proper has six dependencies; MARIE GALANTE and ILE DES SAINTES to the south and south-east, and PETITE TERRE on the east (part of the administrative island), with ST. BARTHOLOMEW and the northern half of ST. MARTIN, about 150 miles north-west and almost due south of Anguilla (British). In South America, CAYENNE or FRENCH GUIANA has an area of about 47,000 square miles, and an estimated population of about 26,000.

III. In Asia, France retains only PONDICHERRY, CHANDERNAGORE, KARIKAL, YANAON and MATREE (see p. 455), of her former Indian Empire, but FRENCH INDO-CHINA consisting of Cochin-China, Tonquin, Annam, and Cambodia (see p. 474), extends over about 203,000 square miles with a population of about 20,000,000.

IV. In Oceania, France possesses the penal colony of NEW CALEDONIA (capital Noumea), a large island containing an area of 5,000 to 6,000 square miles, with its dependencies, Isle of Pines, Loyalty Islands, Huon Islands, Chesterfield Islands, and the Wallis Archipelago annexed in 1886 (Total imports, 1896, £367,704, exports, £229,942); and the SOCIETY ISLANDS, Tahiti, Moorea, &c. (see p. 575), the LOW ARCHIPELAGO of Tuamotu, the MARQUESAS, and the AUSTRAL ISLES or Tubuai, and the GAMBIER ISLANDS, altogether amounting to about 1,400 square miles with about 20,000 inhabitants. CLIFFERTON in the N. Pacific is an isolated and desolate possession of about 2 square miles. By a con-

vention with Great Britain, of 24 Oct., 1887, it was agreed that the protection of persons and property in the New Hebrides (5,106 square miles, population 70,000) should be secured by means of a mixed commission of naval officers belonging to the French and British naval stations in the Pacific. (See p. 605.)

The Total Area of these Colonies and Possessions is over 3,250,000 square miles, and the population amounts to about 45,000,000; their trade in 1895 amounted to about £21,500,000 for Imports, and £24,450,000 for Exports. Imports to Colonies from U.K., 1896.....£935,563 Exports from Colonies to U.K., 1896.....£764,958 See also FRENCH INDIA, p. 455; FRENCH ASIA, p. 474; ALGERIA, p. 533; MADAGASCAR, p. 563; Map of Abyssinia, p. 600; and TUNIS, p. 581; and Treaties and Territorial Changes, p. 598.

THE GERMAN EMPIRE.

(See also p. 599.)

Emperor, William II. (King of Prussia), son of the Emperor Frederick and the Empress Victoria, Princess Royal of Great Britain. Born 27th January, 1859; succeeded his father 15th June, 1888; married 27th February, 1881, Princess Augusta Victoria of Schleswig-Holstein, b. 22nd Oct., 1858 (issue, 6 sons and a daughter). *Heir Apparent, Crown Prince William, born 6 May, 1882.*

Imperial Chancellor and Prussian Premier, Prince Clovis zu Hohenlohe-Schillingsfürst.

Foreign Affairs, Herr von Bülow.

Interior, Count von Pozadowsky Wehner.

Navy, Vice-Admiral Tirpitz.

Justice, Herr Nieberding.

Finance, Baron von Thielmann.

Posts, General von Podbielski.

German Ambassador to Austria, Count Eulenbug;

Italy, Baron Sauma; France, Count Münster;

Russia, Count Radolin; Turkey, Baron Marshall

von Bieberstein; U.S.A., Baron von Holleben

Ambassador in London, Graf von Hatzfeldt-Wildenburg, 9 Carlton House Terrace, S.W.

Councillor of Embassy, Count Arco-Valley.

2nd Secretary, Count H. Hatzfeldt.

3rd ditto, Baron Ritter zu Grünstein.

Attachés, Baron Eckhardtstein; Herr von Oppell.

Military and Naval Attachés, Capt. E. Guelich.

Technical do., Herr H. Muthesius.

Agricultural do., Dr. H. Gerlich.

Physician, Dr. H. Weber.

Consul-Gen., Baron G. von Lindenfels, 49 Finsbury Square.

Vice-Consul, Dr. F. C. Rieloff.

Councillor and Director of the Chancery of the

Embassy, William Adolph Schmettau.

Chancelliers, F. R. Moebius, F. Spies, F. Fischer.

The Empire, according to the Constitution of

16th April, 1871, is confederate, under the president-

ship of the King of Prussia, who bears the hereditary

title of German Emperor. He has the right and the duty

of representing the Empire for all purposes of international

law, of declaring war, making peace and treaties, &c. He is

the commander-in-chief of the whole army and navy in

peace as well as in war, except the military forces

of Saxony, Bavaria and Württemberg, which form

—but in peace time only—separate corps under the

command of their respective kings. He names and dismisses

the officers and functionaries of the Empire. His edicts,

made in the name of the Empire, must be countersigned

by the Chancellor, who, as the First Minister of the Empire, is by his

signature responsible for them. The third factor

of Government is the *Bundesrath*, formed of delegates of the confederated governments, and the *Reichstag*, or legislative parliament, consisting of one deputy to about every hundred thousand inhabitants of the Empire.

The departments especially belonging to the legislation, administration, or control of the Empire and its government are—all matters connected with the navy, post, and telegraphy, passports, emigration, colonization, political laws of the citizens, the whole civil law, coinage, banking, commerce, navigation, the railways, &c. The bills promulgated by the *Bundesrath* and the *Reichstag* in accordance, and sanctioned by the Emperor, are compulsory on all Governments of the Empire, and annul *eo ipso* all possible regulations contradictory to them in the different States.

This large Empire of Central Europe, situate in lat. 47° 18'—55° 52' N. and long. 5° 50'—22° 50' E., comprises the following 25 States, and a Reichsland (see p. 554):—

	English sq. miles.	Pop. 1895	1882-90 per cent.
1. Prussia	134,531	31,849,795	6·3
Heligoland.....	3/4	2,086	
2. Bavaria	29,634	5,797,414	3·6
3. Saxony	5,856	3,763,014	8·0
4. Württemberg	7,619	2,080,898	2·0
5. Baden	5,891	1,725,470	4·1
6. Hesse	3,000	1,039,368	4·7
7. Mecklenburg-Schwerin	5,197	595,883	3·2
8. Saxe-Weimar	1,404	338,887	3·9
9. Mecklenburg-Strelitz	1,144	101,513	3·6
10. Oldenburg	2,508	373,739	5·3
11. Brunswick	1,441	431,966	7·5
12. Saxe-Meiningen ..	964	234,005	4·5
13. Saxe-Altenburg ..	517	180,012	5·1
14. Saxe-Coburg and Gotha	765	216,624	4·9
15. Anhalt.....	917	293,123	7·8
16. Schwarzburg-Sondershausen	337	78,248	3·6
17. Schwarzburg-Rudolstadt	367	88,590	3·2
18. Waldeck	438	57,782	0·9

20. Reuss (younger line)	323	131,453	9·7
21. Schaumburg-Lippe	133	41,224	5·3
22. Lippe	475	134,617	4·8
23. Lübeck	116	83,324	8·9
24. Bremen	100	196,278	8·8
25. Hamburg	160	681,622	9·5
26. Alsace-Lorraine ...	5,601	1,640,986	2·4
Total German Empire	211,168	52,246,589	5·7

According to religious confessions there were (1890) 31,026,810 Protestants (62·8 per cent.), 17,671,929 Catholics (35·8 per cent.), 567,884 Jews (1·1 per cent.).

German is spoken by the bulk of the inhabitants, but there reside within the limits of the Empire over 3,240,000 persons of other nationalities, viz. 2,922,411 Poles and 121,345 Lithuanians in the eastern parts of Prussia; 117,883 Wends in Lusatia, 50,000 Czechs in the Bohemian frontier, 140,000 Danes in Schleswig, and 280,000 Wallones and French to the west of the Rhine. On the other hand, about 13,500,000 Germans live in Austria-Hungary, Switzerland, and Russia.

There are in Germany 26 towns of over 100,000 inhabitants—viz., Berlin (1,677,135), Munich

(350,594), Breslau (355,186), Hamburg (568,666), Leipzig (385,308), Cologne (281,681), Dresden (322,953), Magdeburg (202,234), Frankfurt-on-the-Main (180,130), Hanover (174,455), Königsberg (161,666), Düsseldorf (144,662), Altona (143,249), Nuremberg (142,590), Stuttgart (139,817), Chemnitz (138,954), Elberfeld (125,899), Bremen (125,684), Strassburg (123,500), Dantzig (120,338), Barmen (116,144), Stettin (116,228), Crefeld (105,376), Aix la Chapelle (103,470), Halle (101,401), Brunswick (101,047).

EMIGRATION.—Between 1871-91 1,992,188 Germans emigrated, of whom 1,896,963 went to the United States. In 1881 the number of emigrants reached the exceptional figure of 210,547; in 1886 it had sunk down to 79,875; in 1887 it rose to 99,712; sunk in 1890 to 91,925, reaching 115,392 in 1891, falling in 1892 to 112,208, in 1893 to 84,458, in 1894 to 40,964, in 1895 to 37,498, and in 1896 to 33,824.

EDUCATION.—There are (1895) 21 universities in the Empire, with 2,430 professors and teachers, attended by about 31,556 matriculated students. Education is general and compulsory.

Germany is becoming more and more a manufacturing country. In 1895, 36 per cent. of the population were supported by agriculture, 39 per cent. by mining and industries, 11 per cent. by commerce and transportation. Of the total area in 1893 48·7 per cent. are cultivated, 20·3 per cent. consist of meadows and pastures, 25·7 per cent. are covered with forest. The agricultural produce no longer suffices to support the population. The produce of the mines was valued in 1888 at £24,735,350, in 1889 at £27,790,000, and in 1894 at £33,757,550, and included 76,741,100 tons of coal, 22,004,600 tons of lignite, 12,392,100 tons of iron ore, 2,378,500 tons of mineral salts, besides copper, lead, zinc, &c. The Lower Rhine (Crefeld, Elberfeld-Barmen), Alsace (Mülhausen), Saxony (Chemnitz), Westphalia, and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1895 were the following:—

Butter	£536,246	Iron manufactures	16,000,068
Caoutchouc	174,779	Musical instruments	697,286
China, &c.	214,333	Oil seed and cake ..	372,680
Chemical manufa. .	235,814	Palm oil	273,090
Coffee (Raw)	117,884	Paper & pasteboard.	612,676
Corn of all kinds ..	282,359	Seeds of all kinds ..	395,949
Cotton mfs. & yarn ..	868,199	Sugar, refined	6,715,205
Eggs	782,121	unrefined	5,579,396
Farinaceous substances ..	312,315	Wine, spirits, and beer ..	153,944
Flax & hemp	271,721	Wood & timber	1,193,539
Glass	759,929	Wool & manufacts.	1,796,612
Hide & leather	540,719	Zinc	480,578

During the same period the chief articles of import from the United Kingdom were:—

Apparel	£138,773	Leather	£338,226
Caoutchouc manufa.	171,088	Linen (yarn, &c.) ..	522,874
Chemical products ..	312,439	Machinery	1,767,968
Coal, &c.	2,129,928	Manure	262,997
Cotton yarn	2,060,301	Oil seed, &c.	283,063
Cotton manufacts.	1,784,635	Painters' colours ..	105,864
Cycles	93,387	Slates	124,259
Hardware	124,636	Wool & yarn	4,449,243
Herrings	793,064	Woolen manufa. .	1,133,799
Iron, &c.	2,149,524	Yarn, Alpaca, &c.	914,428

The MERCANTILE MARINE in 1896 consisted of 3,592 vessels, with a tonnage of 1,502,044, manned by about 40,000 men; of these 1,058 were steamers, with a tonnage of 879,938.

The total length of the RAILWAYS in the Empire on 1st May, 1896, extended to 45,202 kilometers, of which 90 per cent. belong to the State. At the end of 1895 the length of telegraph lines

was 131,915 kilometers, the number of telegraph offices being 20,713, and 61,500,000 telegrams being sent and received. In 1896 there were 31,497 post-offices, with about 168,000 employés, and 2,253,000,000 letters, &c., were conveyed.

The NATIONAL DEBT, 1896, is £112,263,655. The funds created from the French war indemnity for building the Reichstag, and for invalids and war purposes, amounted (31 March, 1895) to £22,385,000.

The strength of the GERMAN ARMY on the peace footing amounted in the year 1896 to 585,440, including the Bavarian Army, and is made up of —23,088 officers, 78,217 non-commissioned officers, 479,229 privates, 2,107 doctors, 1,078 paymasters, &c., 583 veterinary surgeons, 1,138 armourers, 93 saddlers, with 97,850 horses, and 1,914 guns. The numbers of the army on the war footing cannot be so definitely determined, but the German army has 744,031 men and 19,391 officers, 242,415 horses and 2,040 guns; the dépôt troops, "Ersatztruppen," number 296,614 men, 4,796 officers, with 31,373 horses and 444 guns; the garrison troops, "Besatzungstruppen," with 416,032 men, 11,240 officers, 38,943 horses, and 324 guns. The "Landsturm," a last reserve, is not included in the above, but it is not organized in time of peace. Service in the army is compulsory, and Germany is prepared to place more than 3,350,000 men in the field fully armed in time of war. In October, 1892, a new army bill was presented to the Reichstag by which 4,400,000 men will be available in 1916.

The IMPERIAL NAVY in 1896 consisted of 21 battleships (3 building), armoured cruiser (building), 7 protected cruisers (6 building), 22 unprotected cruisers, 11 coast defence, 5 torpedo vessels, 105 torpedo boats (9 building), and 1 special service, with 511 guns, including 33 ironclads, mounting 168 guns, and 17 cruisers, with 22774, men in 1897.

Estimated expenditure, 1897-98	£66,415,091
(£27,190,545 for the Army, and £4,372,069 for the Navy in 1896-7.)	
Estimated revenue, 1897-98	66,415,091
Total imports (Zollverein), 1896	227,900,000
Total exports (Zollverein), 1896	187,690,000
Imports from the United Kingdom, 1896 ..	32,366,300
Exports to the United Kingdom, 1896 ..	35,755,000

PRUSSIA.

King, William II., German Emperor, born 27 Jan., 1859; suc. 15 June, 1888; married, 27 Feb., 1881, Augusta Victoria (born 22 Oct., 1858), daughter of the late Frederick, Duke of Schleswig-Holstein (issue, 6 sons and a daughter).

Heir Apparent, Prince Royal, William (German Crown Prince), born 6 May, 1882.

Premier & Minister for Foreign Affairs, Prince Clovis von Hohenlohe-Schillingsfürst.

Minister of State and Interior, Baron von der Recke. Vice-President and Finance, Dr. von Miquel.

War, General von Gossler.

Public Works, Herr Thielen.

Agric., Woods, & Forests, Freiherr von Hammerstein-Loxten.

Commerce and Mines, Herr Brefeld.

Justice, Dr. Schönstedt.

Instruction and Worship, Dr. Bosse.

Prussia is an extensive Kingdom of Central Europe, comprising the larger portion of Germany, situate in lat. 49° 7'—55° 52' N. and long. 5° 50'—22° 50' E. On the 14th June, 1895, the population was as follows:—

Provinces.	Sq. miles, English.	Population.
1. East Prussia	14,281	1,979,387
2. West Prussia	9,851	1,469,932
3. Brandenburg	15,405	4,410,829
4. Pomerania	11,626	1,574,950
5. Posen	11,182	1,773,936
6. Silesia	15,562	4,357,555
7. Saxony	9,746	2,704,539
8. Schleswig-Holstein	7,299	1,298,192
Heligoland	¾	...
9. Hanover	14,855	2,406,546
10. Westphalia	7,802	2,669,415
11. Hesse-Nassau	6,060	1,736,961
12. Rhenish Province	10,421	5,043,979
13. Hohenzollern	441	65,888
Total	134,531 ¾	31,349,795

Of the above 36·1 lived by agriculture and fishery.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. Its principal mountains are the Harz and the Riesen-gebirge, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 10,000,000 acres, chiefly consisting of fir. Its minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic

ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle constitute the principal sources of employment and wealth of the rural population of the entire monarchy. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated and largely exported. The western division is noted for its excellent fruits and vegetables, and the Rhenish provinces stand pre-eminent for their wines. Prussia has upwards of 100 mineral springs, possessing various properties and qualities. Its manufactures consist chiefly of linens, for which Silesia, Saxony, and Westphalia have long been noted. The cotton works are extensive. Besides these there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c.; woollens are made in almost every town and large village. Next in importance are leather, earthenware, glass, paper, and tobacco manufactures, and working in metals. Brewing is a business of great importance. The principal imports comprise coffee, tea, cotton, and other produce of the colonies; wines, silk, fruit, manufactured goods, tin, furs, and dyestuffs. The principal exports comprise linens, woollens, hardware, corn, wool, timber, pitch, linseed, tobacco, mineral waters; to which may be added horses, horned cattle, hams, salt meat, &c.; and from the Rhenish provinces, wine.

For the work of education there are about 34,000 elementary schools, attended by about 4,900,000 scholars. There are also 547 high schools, in addition to numerous technical schools.

There are ten celebrated universities in Prussia, attended by about 14,635 matriculated students in 1892; and the whole of the educational establishments are under the immediate control of the "Minister of Public Instruction and Ecclesiastical Affairs." The Royal Family belong to the Evangelical Church ('Evangelical' is a sort of compromise between Lutheran and Calvinist); and the majority of the population consists of Evangelicals (Protestants), who numbered 19,232,449 in 1890; of Catholics there were 10,252,818, and of Jews 372,059.

Public revenue, 1897-98 £102,301,566
 Expenditure, 1895-96 102,301,566
 Total debt, 31 March, 1897 324,905,931
 Debt charge, 1897 13,662,139
 CAPITAL, Berlin. Population, 1895, 1,677,135.

ALSACE-LORRINE.

Statthalter, Prince Hermann Ernst von Hohenlohe-Langenburg (1894), b. Aug. 31, 1832.

Minister of State, Herr von Puttkamer.

Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, was restored to Germany, after a sanguinary war with France, by the Treaty of Versailles in 1871. It embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxembourg. Wine, tobacco, and hops, iron, and coal are among its leading productions, and the cotton industry is most flourishing.

The new province is called a "Reichland," or imperial territory, and is governed by a "Statthalter," appointed by the Emperor. There is an elective Provincial Committee of 58 members. The area is 5,601 square miles. The population in 1895 was 1,640,986. French was spoken by about 210,000 persons.

The principal towns are Strassburg (135,608), Mülhausen (82,986), and Metz (59,794).

Revenue (1897-98) £2,810,533
 Debt (1897-98) (Rentes £36,172) 1,205,750

ANHALT, Duchy of.

Duke, Frederick, born 29 April, 1831; suc. 22 May, 1871; married, 22 April, 1854, Princess Antoinette of Saxe-Altenburg, born, 17 April, 1838.
Heir Apparent, Prince Friedrich, born 19 August, 1856; married, 2 July, 1889, Princess Marie of Baden; born, 26 July, 1865.

Prime Minister, Herr von Koschwitz.
 A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 905 square miles and a population of 293,298. Budget, 1897-98, £637,500; Credit (1896), £338,124.

CAPITAL, Dessau. Population, 42,375.

BADEN, Grand Duchy of.

Grand Duke, Frederick, born 9 Sept., 1826; Regent, 24 April, 1852; Grand Duke, 5 Sept., 1856; mar. 20 Sept., 1856, Louise, born 3 Dec., 1833, daughter of Emperor William I. of Germany.

Heir Apparent, Frederick, born 9 July, 1857; m. 20 Sept., 1885, Princess Hilda of Nassau, born 5 Nov., 1864.

President of Ministry, Dr. W. Nokk.
 A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It is divided into four districts, viz., Constance, Freiburg, Mannheim, and Karlsruhe, and comprises an area of 5,893 square miles, 3,231 of which are under cultivation—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce. The population in 1895 was 1,725,470, nearly two-thirds of whom were Catholics, and more than one-third Protestants (Jews 26,735). One-half of the people are engaged in agriculture, the other half mostly in manufactures. The principal manufactures are cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery. Elementary instruction is compulsory. There are 1,629 elementary schools, 56 colleges, a technical academy, and two universities, in addition to several technical, agricultural, normal, and other schools, including 2 State establishments for art. There are 946 miles of railway, almost entirely belonging to the State, constructed at a cost of over £22,000,000.

Budget, 1897 £2,600,634
 Debt Jan. 1, 1896 (only railways) 16,799,988

CAPITAL, Karlsruhe. Population, (1895) 84,030.
British Chargé d'Aff., G. Buchanan (Darmstadt).
Mannheim—Consul, Ferdinand Ladenburg ...

BAVARIA.

King, Otto, born 27 April, 1848; succeeded his late brother, Louis II., 10 June, 1886.

Regent and Heir Presumptive, Prince Luitpold, born 12 March, 1821, uncle of the late and present Kings; appointed Regent, 14 June, 1886; mar. 15 April, 1844, Archduchess Augusta of Austria-Tuscany, who died 26 April, 1864.

Ministers of State—President, Baron von Crallshaim, Dr. Baron von Riedel (Finance), Baron von Feilitzsch (Interior), Baron von Leonrod (Justice), Lt.-Gen. Freiherr von Asch (War), Ritter von Landmann (Instruction).

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between

47° 16'—50° 33' N. lat. and 9°—13° 48' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,622 square miles, and a population (in 1895) of 5,797,414 (3,959,077 were Roman Catholics, 1,569,176 Protestants, and 53,885 Jews). Bavaria contributes two corps d'armée to the forces of the German Empire, and a division at Metz; their strength is about 56,865 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in Lower Franconia and in the Palatinate. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. There are three Universities, viz., Munich, Würzburg, and Erlangen.

Budget, 1896-97 £17,267,825
 Public debt (including railway debt) ... 69,442,803

CAPITAL, Munich. Population (1895), 407,307.
British Minister Resident, Victor Drummond £1,500
2nd Secretary, F. D. Harford 375
Consul, John S. Smith —

BRUNSWICK, Duchy of.

Regent, Prince Albrecht of Prussia, born 8 May, 1837; elected 21 Oct., 1885.

Minister of State, Dr. Otto.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,441 English square miles, and a population (1895) of 434,213, of whom 411,377 are Protestants; 19,508 Roman Catholics, and 1,836 Jews. Budget, 1896-97, Income, £646,500; Expenditure, £686,340; debt, £3,100,291.

CAPITAL, Brunswick. Population, 115,138.

HESSE, Grand Duchy of.

Grand Duke, Ernest Louis, born 25 Nov., 1868; suc. 13 Mar., 1892; m. 19 April, 1894, Princess Victoria Melita of Coburg, b. 25 Nov., 1876.

President of Ministry, J. Finger.

A central State in the west of Germany, comprising two disconnected territories, nearly equal in size, containing an area of 2,966 square miles, and a population (in 1895) of 1,039,020, of whom two-thirds were Protestants. The southern portion is traversed by the Rhine, and the Main forms part of its boundary. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Giessen has a university, and there is a technical university at Darmstadt.

Budget, 1897-98 £2,026,682
 Public debt, 1897 (mostly for railways) 8,170,000

CAPITAL, Darmstadt. Population (1895), 63,745.
British Chargé d'Affaires, George William Buchanan (Darmstadt) £500
Consul-Gen., Sir Charles Oppenheimer (at Frankfurt).

MECKLENBURG-SCHWERIN, Grand Duchy of.
Grand Duke, Frederick Francis, b. 9 April, 1882; suc. 10 April, 1897.

Heir Apparent, Paul Frederick, b. 1854.
Minister of State, A. von Bülow.

A maritime State of Northern Germany, on the Baltic, comprising an area of 5,197 square miles, with a population of 596,883. The Legislative power is vested in representatives of the towns, and of the Knights' estates. Revenue, £1,080,000; debt (1894), £5,153,585.

CAPITAL, Schwerin. Population, 36,388.

MECKLENBURG-STRELITZ, Grand Duchy of.
Grand Duke, Frederick William, born 17 Oct., 1819; suc. 6 Sept., 1860; mar. 28 June, 1843, Princess Augusta of Cambridge, b. 19 July, 1822.
Heir Apparent, Adolphus Fred., b. 22 July, 1848; married, 17 April, 1877, the Princess Elizabeth of Anhalt, born 7 Sept., 1857.

A State of Northern Germany, consisting of two detached pieces, separated by Mecklenburg-Schwerin. Area, 1,144 square miles; population, 121,540. No proper budget. Finances in good condition.

CAPITAL, Neu-Strelitz. Population, 10,343.

OLDENBURG, Grand Duchy of.

Grand Duke, Peter, born 8 July, 1827; suc. 27 February, 1853; married, 10 February, 1852, Elizabeth, daughter of the late Prince Joseph of Saxe-Altenburg, born 26 March, 1826.

Heir Apparent, Frederic Augustus, b. 16 Nov., 1852; married, Feb. 18, 1878, to Princess Elizabeth, second daughter of the late Prince Frederick Charles of Prussia.

A maritime State of North Germany, situate on the North Sea and the Weser, with an area of 2,508 square miles and a population of 373,739. Revenue, 1894, £705,000; expenditure, £550,000; debt, 1894, £2,127,655.

CAPITAL, Oldenburg. Population, 23,118.

SAXE-COBURG AND GOTHA, Duchies of.

Duke, Alfred (H.R.H. Duke of Edinburgh), born 6 August, 1844; suc. 22 Aug., 1893; mar. Jan. 23, 1874, to the Grand Duchess Marie, only daughter of the late Alexander II., Emperor of Russia.

Children: 1. Alfred, hereditary prince, b. 15 Oct., 1874; 2. Marie, Princess, b. 29 Oct., 1875, mar. 11 Jan., 1893, to Prince Ferdinand of Roumania; 3. Victoria Melita, Princess, b. 25 Nov. 1876, mar. 19 April, 1894, Ernest Louis, Grand Duke of Hesse; 4. Alexandra, Princess, b. 1 Sept., 1878, mar. April 20, 1896, the Hereditary Prince of Hohenlohe-Langenburg; 5. Beatrice, Princess, b. 20 April, 1884.

A State consisting of two principal and several smaller detached portions, with an area of 765 English sq. miles, and a population (1895) of 216,603, the majority of whom are Protestants. The country is distinguished by beautiful forests and castles of the Duke (Reinhardtbrunn and Rosenau, favourite retreat of Queen Victoria). The capital, Gotha (population 31,670), is the seat of the oldest life assurance company in Germany; also of the famous Geographical Institute of Justus Perthes. Coburg (the other capital) has 18,688 inhabitants. The Crown revenue for the year 1894 was £46,000; that of the State (1895) £139,940.

British Minister Resident, Sir Alexander Condie Stephen, K.C.M.G., C.B. £950

SAXE-WEIMAR.

Grand Duke, Charles Alexander, b. 24 June, 1818; suc. 8 July, 1853; married 8 Oct., 1842, Princess Sofia of the Netherlands, born 8 April, 1824.

Heir Apparent, William, born 10 June, 1876.

Area, 1,388 square miles. Population (1895) 339,217. Income and expenditure, 1897-8 £482,810. CAPITAL, Weimar. Population, 1895, 26,670.

SAXONY.

King, Albert, born 23 April, 1828; suc. 29 Oct., 1873; mar. 18 June, 1853, Caroline, dau. of the late Prince Gustave de Wassa, b. 5 Aug., 1833.

Heir Presumptive, his brother, Field-Marshal Prince George, b. 8 Aug., 1832; mar. 11 May, 1859, Maria Anna Infanta of Portugal, who d. 5 Feb., 1884.

Ministers of State, Dr. Schurig, Herr von Metsch, Herr von der Planitz, Herr von Seydewitz, Herr von Watzdorf.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population of 3,783,014 (1895 census), among whom are 114,198 Roman Catholics, and 9,368 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation; its agricultural products consist of the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits of all kinds suited to the climate. The potato harvest in the year 1892 yielded 28,316,465 lbs. The forests supply timber of excellent quality, and in such abundance as to render them a great source of industry and wealth. The minerals are another great source of wealth, the ores being both rich and abundant. The mines consist of silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides coal, marble, porcelain-earth, and various gems—as topazes, chrysolites, amethysts, cornelians, &c. The smelting is centralized in large establishments belonging to the State. Manufacturing industry has been greatly developed, and in some branches carried to a high degree of perfection. The special manufactures of Saxony are: Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, and bottle glass; to these may be added musical instruments, chocolates, sweets, and cigars. The government factory at Meissen continues to produce the famous Meissen porcelain. The great fairs of Leipzig, although well attended, have lost much of their former importance. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden, Leipzig, the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 3,126 matriculated students in 1896); Freiberg, in the mining district; Zwickau, and Chemnitz, the Manchester of Saxony.

Saxony furnishes the 12th Army Corps of 41,225 officers and men.

Revenue and expendit., Budget, 1896-97 £11,430,000
 Amount of public debt (chiefly for railways), January, 1898 34,882,000

CAPITAL, Dresden. Pop. (1895), 336,440.

Brit. Minister Resident, Sir A. Condie Stephen, K.C.M.G., C.B. (see Saxe-Coburg)

Consul, H. Palmié

Leipzig—Cons.-Gen., Baron C. C. B. von Tauchnitz

Transit, 32 hours; postage, &c., same as Berlin.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hoheneck and Geroldseck, Waziegen, &c., born 20 Jan., 1865;

suc. 12 May, 1893. His sisters are:—Pauline, b. 19 Oct., 1855; m. 7 May, 1881, to the Prince of Bentheim-Steinfurt; Emma, b. 2 Aug., 1858, m. 7 Jan., 1879, to the late King of Holland, now Queen-Regent of the Netherlands; Helena F. Augusta, b. 17 Feb., 1861, married 27 April, 1882, the late Duke of Albany; Elizabeth, born 6 Sept., 1873; and a half-brother, b. 26 June, 1892. A Principality in the north-west of Germany, with an area of 438 square miles, and 57,766 inhabitants. The Budget for 1897 gives an income and expenditure of £70,021 each. There is also a Debt of £101,850.

CAPITAL, Arolsen. Population, 2,768.
Brit. Chargé d'Affaires, Sir Alexander Condie
 Stephen, K.C.M.G., C.B. (Coburg).

WÜRTEMBERG.

King, William II., born 25 Feb., 1848; succeeded 6 October, 1891; mar. 15 Feb., 1877, Princess Marie of Waldeck, who died 30 April, 1882; remar. 8 April, 1886, Princess Charlotte of Schaumburg-Lippe.
Hier Presumptive, Duke Nicolaus of Württemberg, born 1 March, 1833.

President of Ministry, Baron Dr. von Mittnacht. A Kingdom of South Germany, with an area of 7,528 English square miles, and a population (in 1895) of 2,080,898, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 23,260 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pastureland being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, freclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, fire-arms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, staves, beer, wine, &c.

Budget, 1897-98 £3,734,995
 Total amount of public debt, April, 1897
 (including £21,964,306 for railways) ... 23,700,101

CAPITAL, Stuttgart. Population, 158,321.
Brit. Min. Res., Victor A. W. Drummond (Munich)
Consul, Albert von Kaulla

THE HANSE TOWNS.

The Hanse Towns comprise the three Cities of Hamburg, Bremen, and Lübeck, each with a small rural territory, and are situated in the North of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway. Bremen is much smaller, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situate near the Baltic; its commerce is principally with Denmark, Norway, Sweden, and Russia.

The commerce between the Hanse Towns and Great Britain is very large; the imports from the United Kingdom to Hamburg alone in 1896 (excluding bullion) amounting to £20,497,200. In October, 1888, Hamburg and Bremen, following the example set by Lübeck several years previously, joined the German Customs Union. They retain, however, their sovereignty and local self-government, like the other States of the Empire.

HAMBURG possesses an area of 160 square miles, and had a total population in 1896 of 697,860.

Burgomaster, 1897, Dr. Versmann.

GERMAN COLONIES AND DEPENDENCIES.

The African colonies have a total area of about 923,430 square miles, with about 9,350,000 inhabitants; the Pacific colonies extend over about 86,525 square miles with a population of about 416,000. Of the 9,766,000 inhabitants 3,580 were whites in 1896, 1,350 being German officials and soldiers, and 1,778 non-Germans.

I. THE AFRICAN POSSESSIONS: TOGOLAND (23,160 square miles, pop. 850,000), capital Little Popo, exports india-rubber and ivory; and the CAMEROONS (191,074 square miles, pop. 4,500,000), capital Cameroon, in the west. DAMARALAND with GREAT NAMAQUALAND, capital Great Windhoek, in the south-west (326,117 sq. miles, pop. 250,000), and the large tract of country between Lake Nyassa and the Victoria Nyanza called GERMAN EAST AFRICA, capital Bagamoyo (383,079 sq. miles, pop. 3,750,000).

II. KAISER WILHELMSLAND, in New Guinea, with the SOLOMON ISLANDS and the BISMARCK ARCHIPELAGO (86,371 sq. miles, pop. 400,000), and the MARSHALL ISLANDS in the Pacific (154 sq. miles, pop. 16,000).

The total expenditure upon these Colonies for 1897-98 is estimated at £563,500, which is met by a

revenue of £161,500 and imperial grants of £402,000 and their trade is given in the following table:—

	Imports, 1895.	Exports, 1895.
Togoland	£117,650	£162,900
Cameroons	287,900	204,450
S.-W. Africa (1894-5)	95,065	6,238
East Africa	381,450	194,700
New Guinea, &c. (1894-5)	129,950	23,500
	£895,015	£591,788
Imports from Germany, 1896	£337,150	
Exports to Germany, 1896	230,250	
Imports from United Kingdom, 1896	92,677	
Exports to United Kingdom, 1896	52,211	

GREECE.

'See Map, p. 593.

King, George, second son of the present King of Denmark, born 24 Dec., 1845; elected King of the Hellenes, 30 (18) March, 1863; married 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, born 3 Sept., 1851, issue 5 sons and a daughter.

Heir Apparent, Prince Constantinos, Duke of Sparta, born 2 Aug., 1868; married 27 Oct., 1889, to the Princess Sophia, sister of the German Emperor, born 14 June, 1870.

Consul and Secretary, J. M. Joannides.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40'—40° 10' N. and long. 18° 20'—25° 50' E., comprising an area of 24,977 square miles (inclusive of the territory lost by the rectification of the Thessalian frontier after the war with Turkey in 1897), with a population (in 1895) of 2,433,806. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into sixteen provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar. Its exports consist of currants, olive oil, wine, lead from the mines of Laurium, and sponges. The army in 1895 consisted of 26,642 officers and men. The navy consisted in 1897 of 51 armoured vessels, 11 cruisers, 1 training ship, 51 torpedo vessels, and about 4,000 officers and men. There are 582 miles of railway open for traffic. There is a ship canal, cutting through the Isthmus of Corinth. Telegraphs, 4,569 miles. The mercantile marine consists of 5,809 sailing vessels, tonnage 223,158, and 103 steamers, tonnage 58,237.

Revenue, 1896 (estimated)	£3,813,757
Expenditure, 1896 (estimated)	3,750,102

GUATEMALA, REPUBLIC OF.

President, Reina Barrios (1894).

Min. of Foreign Affairs, Señor Don Jorge Muñoz.

Consul-Gen., Col. José Saborio, 150 Leadenhall St.

Guatemala, the most northerly of the Republican States of Central America, is situate in N. lat. from 13° 40' to 17° 40', and in W. long. from 88° 15' to 92° 30', and comprises an area of 46,774 square miles, and a population in 1892 of 1,510,000. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. There are about 350 miles of railway open, and the Inter-oceanic Railway connecting San José (Pacific) with Port Barrios (Atlantic) was commenced in September, 1892; when completed the capital, New Guatemala, will be within 290 hours of London. There were 2,643 miles of telegraph working in 1895. The chief ports are San José de Guatemala, Champerico on the Pacific, and Livingston on the Atlantic side. The principal export is coffee, valued at £2,234,962 in 1896; the other articles are hides, indigo, sugar, india-rubber, mahogany, sarsaparilla, and fruits.

HAWAIIAN (OR SANDWICH) ISLANDS.
(See also p. 605).

President of Republic, Sanford B. Dole, elected 4 July, 1894 (for six years).

Vice-Cons. in Lond., Cyril Hopkins, 32 Cornhill, E.C.

A rich, beautiful, and most interesting chain of islands, situate in the North Pacific Ocean, forming the Republic of Hawaii, extending from south-east to north-west, in lat. 19°–22° 15' N. and long. 154° 48'–160° 20' W., discovered by Captain Cook in 1778. They consist of 13 islands, 8 of which are inhabited. All are very mountainous, and appear to be chiefly of volcanic origin: they occupy a united area of 6,587 square miles, with a population, in 1896, of 107,000, of whom 75,000 are Hawaiians, 24,000 Japanese, 15,000 Chinese, 9,000 Portuguese, and 14,000 whites of European and American descent. Hawaii (Owyhee), the largest of the group, contains two stupendous volcanic mountains, Mauna Loa, which is still in activity, and Mauna Kea, each rising to nearly 14,000 feet. In 1881 there was a vast eruption and a lava that threatened to destroy the town of Hilo, and a similar eruption occurred in 1887, when the lava fortunately did little damage, and found its way into the open sea. The imports are chiefly manufactured goods, while the exports consist mainly of sugar, rice, bananas, coffee, wool, hides, &c. The islands are well situated for trade, being in the route between America, China, and Australasia. There is a commercial marine of 59 vessels of 29,024 tons; railways, 53 miles. Honolulu is lighted by electricity, and is well supplied with tramways and telephones. Public revenue, 1896 £407,409
Public expenditure, 1896 392,739
Public debt, Jan. 1, 1897 800,169
Total value of imports, 1896 1,477,687
Total value of exports, 1896 3,200,016

HAYTI, REPUBLIC OF.

President, Therasias Augustin Simon Sam, e'ect. 31 March, 1896 £4,800
Minister of Foreign Affairs, J. Ménos.

Minister in London, Louis Joseph Janvier, *Chargé d'Affaires,* 5 Albany Court Yard, W.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Hayti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. It contains 29,830 square miles, of which 9,242 square miles belong to Hayti. It lies in N. lat. between 17° 37'–20°, and in W. longitude between 68° 20'–74° 28'; and belongs to the group of the Greater Antilles. The portion belonging to Hayti contains a population of about 1,210,600. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits: it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, log

wood, cocoa, cotton, hides, sugar, honey, gums, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, China and Japan. Puerto Plata, on the eastern side of the island, is the principal sea-port of the Dominican Republic. Revenue, customs only, 1895–96.....£1,409,500
Expenditure, 1895–96 1,024,000
Debt (external, 1895) 886,600
,, (internal, 1895) 3,170,000
Imports, 1892, at Puerto Plata 80,465
Exports, 1892, from do. 107,777

HONDURAS, STATE OF.

President, Policarpo Bonilla, 1 Feb. 1895.
Foreign Affairs, C. Bonilla.

Consul-Gen., for the Greater Republic of Central America, M. J. Kelly, 8 Idol Lane, E.C.

The Middle State of Central America, stretching in N. lat. between 13° 10' and 16°, and W. long. between 83° 10' and 88° 40'; containing 42,658 English square miles, including a small portion of the Mosquito Territory, and the Bay Islands in the Gulf of Honduras. The population in 1897 was 398,877, mostly of aboriginal blood. It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortez, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. The country is mountainous, being traversed by the Cordilleras. The products are mahogany, fruit, cattle, cotton, sugar, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, furcile, rose and Lima wood. Its mineral wealth is great. The only railway (42-inch gauge) runs from Puerto Cortez to Pimienta, 60 miles, which it is intended to develop into an inter-oceanic railway connecting the Atlantic with the Pacific.

Revenue, 1895–96 £257,818
Expenditure, 1895–96 279,192
Debt (internal), July, 1897 500,849
Debt (exterior) (no interest paid) 5,985,108
Imports from U.K. 1896, £46,612; exports, £7,927.

HUNGARY (see p. 535).

ICELAND (Danish Colony).

Governor, Magnus Stephensen.

Danish Minister for Iceland, N. R. Rump.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of over 39,000 square

miles, or greater than that of Ireland. The population was estimated in 1894 at 72,177.

The present constitution was granted in 1874, and the assembly (Al-thing) is more or less controlled by the Government at Copenhagen. The only products of the island are sheep, cattle, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber.

Total Imports, 1894 £344,748
Total Exports, 1894 371,522

CAPITAL, Reykjavik. Population about 3,000.

Naval Attaché, Commander A. Bianco.

Archivist, Cavaliere G. Manetti.

Consul-General, Sir J. Montefiore, 44 Finsbury Sq
Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. 36° 38' 30"—46° 40' 30" N. and long. 6° 30'—18° 30' E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with an estimated population in 1893 of 30,535,848. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, the Duchies of Parma and Modena, and the Republic of San Marino. In 1870 the complete unity of the country under one crown was finally effected, and Rome became again the capital of Italy. The small community of San Marino, enclosed within the Italian Dominions, alone retains its independent form of government. The Kingdom is divided for administrative purposes into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389

miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines: the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. Its wines are numerous and celebrated. The finest olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari. The cultivation of silk forms an important agricultural industry. Fruits abound, and are of exquisite flavour, such as grapes, oranges, lemons, almonds, figs, dates, melons, pistachio-nuts, all of which are largely exported. The supply of sea and fresh-water fish is considerable. Sardines, tunny, and anchovies are exported. Among the principal minerals are iron, lead, zinc, copper, manganese and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. The total mineral produce is valued at £2,610,946 (1895), of which raw sulphur absorbed £800,000. The railway system is making rapid progress throughout the kingdom: in 1897 there were 9,592 miles open for traffic, and 23,665 miles of telegraph wire. The commercial marine (1892) consists of 5,624 vessels (316 steamers), of 811,264 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienne earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc, and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. The army in 1891, including the local and active militia, had a total nominal strength of 2,448,308 men on the war footing. The Force is divided into Regular Army in peace, 279,982, in war, 839,354; movable militia, 449,016; local militia, 1,559,938. The Navy in 1896 consisted of 13 battleships (2 building), 1 armoured cruiser (5 building), 15 protected cruisers (1 building), 1 unprotected cruiser, 15 torpedo vessels (3 building), 1 destroyer (building), 140 torpedo boats (1 building), and 2 special vessels. Spezia, the chief naval and military port of the kingdom, is securely fortified.

FINANCE.—The expenditure on the army in 1896-7 was £9,390,180, and on the navy £3,720,000, while the annual charge on the National Debt is about £23,000,000.

Public revenue, 1896-97 £63,903,465
Public expenditure, 1896-97 64,061,298
Public debt, 1897 518,141,619

COLONIES.—Italy only possesses one colony, ERITREA, a strip of Red Sea coast, forming with (French) Obok and Jibuti and the (British) Somali Coast Protectorate a definite boundary on the east of Abyssinia. Their sphere of influence at one time included the whole of the province of Tigre, in Abyssinia, and surrounding territory as far as the Egyptian town of Kassala, which they have held in trust for some time, but are now about to restore to its original owner. The capital of ERITREA is Massowah, a seaport town in 15° 28' N. lat. and 39° 25' E. long.

This ancient and extensive Empire, splendidly victorious (1894-95) in a war with China, consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Hon-dō (the name of the Empire being Nihon), Shikoku, Kiu-shū, and Hokkaidō or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, excluding the temporarily occupied territory, comprises an area of 162,655 square miles, with a population of 42,270,628, according to the last census, there being 21,345,750 men and 20,924,878 women.

Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C., the present Emperor being the 121st of his race; but the authentic history begins about 400 A.D. Within the last few years Japan has made unparalleled progress in civilisation and the adoption of Western manners and customs. The feudal system under which the country was governed by numerous Lords has been abolished, and the Mikado is now absolutely the Sovereign of the State, and since the revolution of 1868 she has shown a most remarkable power of adopting

Western knowledge and experience. A wise and enlightened ruler is at the head of the nation, and the first national Parliament, the outcome of the constitution granted to the people by the Emperor, promulgated 11th Feb., 1889, met for the first time in November, 1890. The feudal lords, who have lost all their powers of government, still retain their high social positions, and a new aristocracy with these as its basis has been formed; it consists of five grades, corresponding to the European titles of Prince (not imperial), Marquis, Count, Viscount, and Baron. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tôkiô, is 12,370 ft. high, dormant since 1707. Japan is liable to frequent and disastrous earthquakes. On October 28, 1891, an earthquake occurred by which 9,960 persons were killed, 20,000 injured, and 130,000 houses destroyed; again in 1896 a tidal wave destroyed 17,475 houses, and killed 26,990 people, in addition to 25,137 injured. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound, whilst agate, carnelian, and rock crystal are also found. Gold and silver mining is prosecuted on a small scale, and there is a fair supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "laquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat, and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied. The fruits are abundant, but for the most part of inferior quality. The chief manufactures are those of silk and cotton, japanned ware, porcelain, and bronze. The chief imports are raw cotton from China and India, and piece goods, metals, woollens, drugs, and machinery from Europe. Sugar is largely imported from China. The chief exports are silk, rice, tea, fish, copper, and matches. There were 1,697 miles of private railway open in 1896, and 1,460 were in course of construction. The Tokaido, Shinans, and Echigo, and Oshiu and Dewa lines are the property of the Government, with a total length of 593 miles, while 34 miles were under construction in 1896. The net profit on these lines was estimated at £542,576 in the budget for 1897-98.

The army consisted of 273,268 officers and men at the end of 1893; the navy at the same date consisted of 4 battleships, 8 armoured cruisers, 7 protected cruisers, and 13 other cruisers, in addition to 15 gunboats, 60 torpedo-boats, and a few miscellaneous craft [in 1897 there were building for the Japanese navy 4 battleships, 11 cruisers, 12 torpedo-boat destroyers, and 12 torpedo-boats] it was manned by 14,852 officers and men. The mercantile marine consists (1896) of 621 (387,500 tons) vessels, of which 448 are steamers. Under treaties with Great Britain and several other powers, the ports of Yedo (Tôkiô), Kanagawa (Yokohama), Hiogo, and Osaka (on the Inland Sea), Hakodate (in Yezo), Niigata, and Nagasaki,

are open to trade. The trade of Japan in 1895 was distributed thus:—

Great and Greater Britain	£10,609,167	China	£3,883,921
United States, A.	6,819,432	France	3,218,432
		Germany	1,631,121

The principal articles imported by the United Kingdom from Japan in 1896 were:—

China, &c.	£ 22,977	Silk	£114,771
Copper	135,785	Do., manufs.	201,586
Drugs	28,683	Skins and Furs	50,864
Paper	20,931	Straw	137,355
Rice	95,457	Tobacco	20,519

And the principal articles exported to Japan from this country in 1896 were:—

Arms	£78,671	Machinery	£899,048
Carriages	71,120	Metals	989,597
Chemicals	94,227	Painters' Colours	57,524
Cotton Yarn	1,102,241	Telegraph Wires	90,815
Manufs.	1,311,675	Woollens	811,380

Of the 1,528 foreign vessels (tonnage 1,993,420) that entered Japanese ports (1893), 777 were British (tonnage 1,307,838). The value of the silver yen or dollar has fluctuated greatly during the past two years, and is now equivalent to about 2s. 2d.

CAPITAL, Tôkiô, formerly called Yedo, the residence of the Emperor; population (1895), 1,342,153. Other cities are—Osaka, 490,003; Kiôto, the ancient capital, 339,896; Nagoya, 209,270; Kobé, 153,382; and Yokohama, 187,200.

The total cost of the war with China was about \$25,000,000, of which \$80,000,000 was repaid by indemnity.

JERUSALEM—PALESTINE.

Turkish Governor, Tewfik Bey, appointed 26

October, 1897.

Palestine, which occupies so prominent a place in the history of human kind, and in the affections of the Christian world, has fallen upon evil days. Her ancient glories are departed, and although the country still produces wine and olives, corn and the most varied fruits, its resources remain undeveloped owing to the lack of enterprise, the want of good roads, and the poverty of the inhabitants. Its popu-

* See Postal Guide, pp. 435-440.

lation has dwindled away, as is proved by the numerous ruins scattered over the country, until now it probably does not exceed 620,000. In and about Jerusalem, the Jews number from 45,000 to 50,000, and in the whole of Palestine from 80,000 to 100,000.

Geographically Palestine consists of a maritime lowland, the mountain region of Judah, which forms its backbone, the remarkable depression through which the Jordan wends its course towards the Dead Sea, and the elevated region lying to the east of the Jordan. The popular notion that Palestine is a barren country, not capable of yielding rich harvests, is a mistaken one. Its appearance is barren only during the dry season, when the grasses which cover the greater part of it are dried up, and the herdsmen retire with their flocks of sheep and goats to the loftier mountains. The alluvial lowland to the south of Mount Carmel is as fruitful as ever, and it only needs an honest and vigorous administration to restore Palestine to its former fruitful condition. The entire area is computed to be about 11,000 square miles.

Palestine comprises the independent Mutessariflik of Jerusalem (el Kuds), together with districts belonging to two other provinces, viz.: the vilayets of Beyrut and Damascus. The stream Nahr el Aujja, which enters the sea a few miles north of Jaffa, forming the boundary between the district of Jerusalem and the first-named vilayet, the country to the east of the Jordan and the Dead Sea being subordinate to the vilayet of Damascus. Arabic is the language commonly spoken, and 80 per cent. of the population are Mohammedans. There are, however, many Greeks, Jews, and Franks of all nations and denominations. A railway was opened connecting Jaffa (Joppa) and Jerusalem in 1892.

The principal ports are Acre, Haifa, and Jaffa, and their exports amount annually to over £500,000, consisting principally of sesamo, fruits, barley, olive oil, maize, and articles of Christian veneration, these latter weighing 2,700 cwts. The imports were valued at £650,000. Austria takes the lead in this commerce.

LIBERIA.

President, William David Colman, 13 Nov. 1896.
Vice-President, Hon. G. H. Ross.
Secretary of State, Hon. G. W. Gibbons.
Secretary of Treasury, Hon. A. Barclay.
Attorney-General, T. C. Stevens.
Postmaster-General, Hon. S. Ferdinand Dennis.
Con.-Gen. in London, H. Hayman, 3 Coleman St., E. C.
Consul, Sigismund Sinauer De Stein.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S. E., and Manna, N. W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a distance of 250 miles from the seaboard. The population consists of 25,000 emigrants from America and their descendants, and aborigines, numbering in all nearly 1,500,000. The principal exports are coffee, cocoa, sugar, wax, ginger, palm-kernels, palm-oil, indigo, hides, ivory, and gold-dust.

* See Postal Guide, pp. 435—440.

About 2,000,000 lbs. of these were exported in 1891. Liberia was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European Powers since 1847 as an independent State.

Revenue, 1888... £35,000. Expenditure... £33,000

LIECHTENSTEIN.

Prince, Johann II., born 5 Oct., 1840; suc. 12 Nov., 1858.

A Principality on the Upper Rhine, between the Tyrol and Switzerland. It has an area of 61 square miles, with (1896) 9,434 inhabitants, who are not liable to conscription.

Revenue, 1896, £10,794; expenditure (1896), £9,976; debt (1890), £5,280.

LUXEMBURG.

Grand Duke, Adolphus, Duke of Nassau, b. 24 July, 1817; suc., 23 November, 1890; mar. (2ndly) 23 April, 1851, Adelaide Marie, daughter of Prince Frederick of Anhalt-Dessau, born 25 Dec., 1833.
Heir, William Alexander, b. 22 April, 1832; m. 21 June, 1893, Princess Maria Anna of Braganza.
Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1895) 217,583, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1895 was £416,547, and there was a debt (Jan. 1, 1897) of £472,424. There are 270 miles of railway. The army numbers about 325 men. The capital, Luxemburg (pop. 19,909), is a dismantled fortress.

British Envoy, Henry Howard, C.B. (The Hague).
Parcels, 3 lbs. 1s. 3d.; 7 lbs. 1s. 8d., 11 lbs. 2s.; telegrams, per word, 2½d.

MADAGASCAR (French Colony, see p. 604).

Resident-General and Commander-in-Chief, General Gallieni.

The fourth largest island in the world, situated to the east of the African continent, from which it is separated by the Mozambique Channel, and surrounded by the waters of the Indian Ocean, in lat. 11° 57'—25° 38' S., and long. 43° 15'—50° 30' E. It is 975 miles in length, and 350 at its greatest width, contains an area of about 230,000 square miles, nearly double that of Great Britain and Ireland, and has a population of between 4,000,000 and 5,000,000. There are some traditions of an aboriginal race of pigmies; but, broadly speaking, the inhabitants of Madagascar are one people, speaking one language (though with many variations of dialect) related to the Malayo-Polynesian. Excluding the aboriginal element, the Malagasy may be divided into (1) the lowland tribes, the Sakalava on the west coast and the Betsimisaraka on the east; (2) the midland or forest tribes; and (3) the highland or inland tribes, including the Hova and the Betsileo. The Hova are the dominant tribe. Their dialect was reduced to writing, about the year 1820, by missionaries of the London Missionary Society,

who also introduced the art of printing, in 1826. Christian missions have been very successful in the island, the Protestants numbering about 450,000, and the Roman Catholics about 50,000. Polygamy still prevails among the less civilised tribes, but with the central tribes monogamy is the rule. An impress of Arab influence is noticeable in the native calendar, and doubtless the island was known to Arab and Indian traders hundreds of years before it was discovered, in 1506, by the Portuguese, who named it St. Lawrence. Insignificant attempts to plant establishments in Madagascar were made by the Portuguese, and subsequently by the Dutch and English. The first French colony was planted in 1662 by a company, called the "Société de l'Orient," under the patronage of Cardinal de Richelieu. In 1664 the French Company of the East Indies made Madagascar their head-quarters; but notwithstanding all efforts, the colony languished and had to be practically abandoned in 1686. France, however, retained her claims to the island. As a dependency of Mauritius the French Settlements in Madagascar passed to the British crown by the Treaty of Paris (1814), and in the year 1816 diplomatic and commercial relations were entered into between Great Britain and Radama I., King of the Hovas, who was acknowledged as sovereign of the whole island. The British claims were disputed in 1817 by the French, who in the following year occupied the island of Ste. Marie. Nosibé was occupied by them in 1840, and Diego Suarez was taken possession of as a naval station in 1885. In 1885 was the first serious attempt to establish a French protectorate over the island. At the end of this war the Malagasy agreed to pay an indemnity of £400,000, but declined to admit the political rights claimed by France. Difficulties arose in regard to the exequaturs to be issued to Consuls of other foreign nations in Madagascar, which were finally settled by the recognition of the French protectorate. A declaration, signed between Great Britain and France, August 5, 1890, recognised on the part of Great Britain the French protectorate and its consequences over the island of Madagascar, guaranteed religious tolerance and complete protection to missionaries of both countries, and maintained unimpaired the rights and immunities of British subjects. In 1894 the French Government determined to enforce its political claims on the Hova Government. A French envoy arrived at the capital on the 18th Oct. with an ultimatum, which was refused, and a force of 15,000 men was despatched to Madagascar in May, 1895, to march on the capital by the route, more than 200 miles long, from Mojuanga on the west coast. After suffering great hardships and loss from fever to the amount of nearly half the force employed, the French, under General Duchesne, without meeting very serious opposition from the Hova forces, numbering 20,000 men, occupied the capital on 30 September, and the next day a treaty was signed by the queen, by which all the French claims were admitted. The establishment of a French protectorate was preferred to absolute annexation, but in 1896 the island was declared a French Colony, although it is rather a possession, as, apart from the officials, there are probably not 100 Frenchmen in the island. The Prime Minister, Rainilaiarivony, who was made prisoner and deported, died at Algiers in 1896. The island is reputed rich in minerals, and the production of gold is increasing; copper, iron, coal, galena, and lead are also found. The

lowlands of Madagascar are fertile, and rice is cultivated in enormous quantities, while manioc, arrowroot, sugar-cane, tobacco, hemp, cotton, which also flourishes in the uplands of the interior, and vanilla are grown with excellent results, and coffee and tea have been planted. Silk can be produced successfully. There is a large supply of india-rubber, caoutchouc and gum-copal, as well as timber of many varieties in the forests. In the interior large numbers of cattle are bred. Unfortunately the low country is very unhealthy, while the inland plateaux are not very fertile. The principal exports are cattle, hides, india-rubber, gum-copal, wax, raffia sugar, vanilla, coffee, rice, orchilla-weed, straw hats, silk shawls called *lamba*, and *lamba* woven of the raffia-fibre, coloured with native dyes. Amongst imports the chief are unbleached American sheetings, English imitations of the same, prints, calicoes, muslins, flannels, cheap silks, beads, plate tin, paraffin oil, and preserved provisions. There is a 10% *ad valorem* duty on all imports. The legal coinage is the silver 5-franc piece.

CAPITAL, Antananarivo, with a population of about 100,000, distant seven days' journey, by palanquin, from the chief port of entry, Tamatave, with which there is communication by a Government telegraph, and by French mails, running weekly.

The other ports are, Mojanga, Tolia, Faradofay (Fort Dauphin), Mananjara, Mahanoro, and Vatomandry.

MALACCA.

Malacca, or the Malay Peninsula, has a southerly extension of about 900 miles, an area of 81,800 square miles, and about 1,250,000 inhabitants, including large numbers of Chinese. The country is hilly, densely wooded, abounding in game, and famous for its tin mines. The Isthmus of Kra, in about 11° N. lat., has been examined with a view to the construction of a ship-canal, which would much shorten the passage between India and China; but competent authorities have declared the scheme to be impracticable. The greater portion of the peninsula owns allegiance to Siam. Along its western coast are the British "Straits Settlements," and the Federated Malay States (see p. 476). The independent portion of the Malay Peninsula is occupied by a number of Mohammedan Malay States.

Parcels, 1st lb. 9d., then 6d. per lb. to 11 lbs.; telegrams, per word, 4s. 3d. and 4s. 6d.

MEXICO, FEDERAL REPUBLIC OF.

President of the Republic, Porfirio Diaz, acceded 1 Dec., 1884 (re-elected 3rd time 1896 until 1900).

Minister of Foreign Affairs, Don Ignacio Mariscal.

Minister in England, Manuel Iturbé, 87 Cromwell Road, S.W.

Chargé d'Affaires, Don Cayetano Romero.

Financial Agent, Don Luis Camacho, Bloomfield House, London Wall, E.C.

Consul, Don Adolfo Bulla, Broad St. House, E.C.

Liverpool—Consul-General, Don P. Garcia Conde.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, situated between 15°—32' N. lat. and 87°—117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 2 territories (Lower California, almost separated from the main portion by the Gulf of California), and the federal district of Mexico, making in all 30 political divisions, comprehending an area of 751,177 square miles, with an estimated population of (1889) 10,447,974, of whom "only about 3,500,000 are taxable." The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Vera Cruz, Progreso, and Tampico are the chief seaports on the Gulf of Mexico, Mazatlan and Guaymas on the Pacific. There were 6,673 miles of railway open in 1895, and 37,125 miles of telegraph. The railways have in a large measure been built by American and English companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can travel in six days from New York without change of carriage. The National Railway *via* Laredo taking five days to New York is also open. A third route *via* Eagle Pass (International Railway) is also completed. An efficient railway system will doubtless powerfully assist in developing the vast resources of this rich country. The principal crops are maize, wheat, barley, pulse, Chile-pepper, sugar, potatoes, coffee, cotton, tobacco, vanilla, flax, indigo, grapes, and all kinds of fruit. The maguery, or Mexican aloe, yields a favourite beverage, "pulque;" other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 70 per cent. consist of silver and gold; flax and hemp, coffee, hides and skins, timber, logwood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance. The army in 1888 was composed of about 27,000 men. The navy is limited to 7 small vessels, of about 200 to 300 tons, used for the prevention of smuggling. The following figures are officially supplied, the reckoning in Mexico being at the old gold rate of \$5 to the £, the actual value, Sept. 1895, being 26 pence to the Mexican \$.

MONACO.

Sovereign Prince, Albert, born 13 November, 1848; *suc.* 10 Sept., 1889; *mar.* 1869, Lady Mary Douglas-Hamilton, daughter of 11th Duke of Hamilton (the Pope declared the marriage a nullity, 1880); *2ndly*, Oct. 1889, the Duchesse de Richelieu, born 10 February, 1838.
Heir, Prince Louis, born 12 July, 1870.
Governor-General, Olivier de Ritt.

Consul-General in London, Theodore Lumley, 37 Conduit Street, Bond Street, W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the gambling establishment, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1886) 12,548 inhabitants. The whole available ground is built over, so that there is no cultivation. There is an army of 126 men.
British Consul, Sir James Charles Harris (Nice).
Vice-Consul, J. W. Keogh (Monaco).
English Chaplain (1895), Rev. F. Stewart.
 Parcels, 3 lbs. 1s. 4d., 7 lbs. 1s. 9d., 11 lbs. 2s. 2d.

MONTENEGRO.

Prince, Nicholas (or Nikita), born 7 October, 1841; *succeeded* his uncle, Prince Danilo, 14 Aug. 1860; *m.* 1860, Milena, daughter of Voyevod Peter Vukotich, b. 4 May, 1847; *issue* 3 sons, 6 daughters.
Heir Apparent, Danilo Alexander, b. 29 June, 1871.
Pres. of State Council, Voivode Bozo Petrovitch.
Foreign Affairs, Voivode Gavro Vukovitch.

A small Principality, which has always claimed to be independent, which claim was recognised by the Treaty of Berlin. It has an area of 3,486 square miles, and a population of about 220,000, of whom 10,000 are Mohammedans, 4,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, sardines, cattle, castradina (smoked mutton), hides, and tobacco. The only manufactures are coarse woollens. Agriculture is the principal occupation, but the fields are no larger than an ordinary tennis lawn.

The Prince's bodyguard numbers 150 men; but in war every male above the age of 17 years is forced to serve in the army, which musters about

35,000 men. The two ports, Antivari and Dulcigno, have about 150 coasting vessels.
 Revenue, 1896 about £5,000
 Public Debt, 1895 " 83,000
 Total Imports, 1896 " 57,000
 Total Exports, 1896 " 50,000

MOROCCO, EMPIRE OF.

Sultan, Muley Abdul Aziz, b. 1879, s. June, 1894.
 Grand Visier and Minister of For. Affairs, Sid Hamed Ben Musa.

Commissioner for Foreign Affairs at Tangier, Sid Hadji Mohammed Torres.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°–36° N. lat. and 1°–11° 40' W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sûs, Drâ, Wadi Taflet, Tuat, and others to the south, which are again subdivided into 33 districts, each under the superintendence of a "Kaid;" but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 314,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contains 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population variously estimated at from 4,500,000 to 8,000,000. The Jews number about 300,000, and reside chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. It is a country of great natural resources, which only need developing. The chief ports are Tetuan, Tangier (where the Representatives of fourteen nations reside), El Araish (Laraiche), Rabat, Casa Blanca (or Dar-al-baida), Mazagan, Safi, and Mogador. There are no railways, and telegraphic communication from Tangier is by submarine cable of Eastern Telegraph Company to Gibraltar, and by Spanish Government telegraph to Tarifa. The exports are almonds (£52,174 in 1893), maize, beans (£86,223 in 1896), peas (£36,778 in 1893), oil, wool (£140,928 in 1896), dates, oxen, fowls, eggs, carpets, slippers, goat-skins, leather, grain, ostrich-feathers, gums, esparto; and the imports, cotton, linen, muslin, and woollen goods, tea, coffee, sugar, candles, cloth, silk, iron, brass, hardware, &c. The army consists of between 15,000 and 20,000, one-half of whom are negroes, Sultan's bodyguard, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *Al Moghreb-al-Aksa*, a French paper, *Le Réveil du Maroc*, and three newspapers in Spanish are published at Tangier. There are three capitals, of which Fez, population 120,000, is the principal; Morocco, 50,000; and Mequinez, 56,000.

Imports, 1896 £1,514,545
 Exports, 1896 1,656,685

Chancellor, H. N. Brouwer.

Consul-Gen., H. S. J. Maas, 40 Finsbury Circus.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'–33° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces, and containing a total area of 12,582 square miles, with a population, on Dec. 31, 1896, of 4,859,451. The majority, about three-fifths, belong to the Dutch Reformed Church; and the remainder are Roman Catholics, and a small number of Jews, mainly in large towns, such as Amsterdam, where there are about 70,000. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of watercourses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. There are 2,686 miles of railway open (1897), and 20,226 miles of telegraph. The chief native products are cattle, sheep, potatoes, rye, barley, oats, wheat, buckwheat, chicory, clover, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping bricks, butterine, cocoa, chocolate, linen, rich damasks, cottons, woollens, silks, and "geneva." Diamond-cutting employs numerous hands in Amsterdam. The chief exports consist of refined sugar, flax, butter and margarine, cheese, cattle,

sheep, geneva. The royal navy consisted, on Jan. 1, 1897, of 131 men-of-war (25 of them iron-clads); and the army, on the war footing, of 1,950 officers and 76,431 men, with a militia (Schutterij) numbering about 43,716 more. The mercantile marine, on the 1st Jan., 1897, consisted of 172 steamers, tonnage 556,000, and 440 sailing vessels, with 279,000 tonnage, employing 18,300 men.

Holland figures largely in the trade returns of this country, a quarter of the value of which is represented by agricultural produce, but much of the merchandise sent to Holland was for distribution in Germany and other parts. The following are the chief articles imported from the United Kingdom in the year 1896:—

Animals (Horses) ..	£70,652
Biscuits and Bread ..	71,777
Caoutchouc manufs. ..	74,438
Chemical products ..	167,739
Coal, &c.	598,707
Cotton yarn ..	1,139,807
Cotton manufs.	986,636
Cycles, &c.	194,922
Grain, &c.	180,080
Metals, hardware ..	1,395,450

The chief exports to the U. K. for 1896 were:—

Books ..	£107,393
Butter ..	1,156,726
Cheese ..	734,611
Chemical manufa. ..	297,297
China, &c.	260,437
Cocoa, &c.	316,365
Coffee, raw ..	226,836
Corn, all kinds ..	173,036
Cotton manufa., &c. ..	980,229
Dye stuffs, &c.	564,337
Farinaceous sub., &c. ..	170,648
Fish ..	283,447
Flax ..	140,396
Fruit ..	219,960
Glass manufs., &c. ..	419,953
Gloves ..	910,521
Hides and leather ..	1473,529
Iron and steel, &c. ..	1,218,479

Revenue, 1897-8, estimated ..	£10,949,497
Expenditure, 1897-8, estimated ..	11,560,570
£1,144,694 for the army; £1,313,650 for navy, and £114,061 for colonies.)	

Public debt in 1896 ..	90,649,387
Total imports in 1896 ..	136,241,666
Total exports in 1896 ..	111,450,000
Imports from United Kingdom, 1896 ..	21,308,333
Exports to United Kingdom, 1896 ..	26,183,083

DEPENDENCIES.—The Dutch possessions in the EAST INDIES are very considerable, comprising the whole of the SUNDA ISLANDS, with the exception of a small portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA, with an area of 718,000 square miles, and a population (1895) of 34,273,561, of whom as many as 25,700,946 live in the islands of Java and Madura. Included in this estimate are many districts in the interior of SUMATRA, BORNEO, CEBLEBES, and other islands, in which Dutch sovereignty is merely nominal. In JAVA and MADURA the so-called "culture system" has been introduced with much success, for it has secured a sufficient supply of food for a dense population, besides furnishing coffee and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Dutch Resident. There is a colonial army of 1,391 officers and 40,270 men, with a reserve of 7,579 officers and men, one half of whom are Europeans. The colonial revenue for 1897 is estimated at £10,647,798, and is largely derived from the sale of coffee, salt, sugar, bark, and tin; whilst the estimated expenditure is £11,895,567. The exports, in addition to the above, include also sugar, tobacco, indigo, gums, and spices, and amounted in 1895 to £13,460,000, while the imports for the same year amounted to £18,757,250.

In South America the colony of SURINAM, or Dutch Guiana, embraces 46,072 square miles and contains 65,539 inhabitants; and in the West Indies, CURAÇAO and five other small islands belong to Holland, having an area of 436 square miles, with a population of 48,972. Exports from colonies to U.K., 1896 £792,592 Imports to colonies from U.K., 1896 ... 2,263,162

NICARAGUA, STATE OF.

President, Señor José Santos Yelaya, June, 1893.	
Foreign Affairs, Manuel Coronel Matus.	
Finance, F. Lopes.	
Public Works, S. Muños.	
War, Home & Interior, Erasmo Calderon.	

Minister in England, M. Crisanto Medina.
Consul-General for the Greater Republic of Central America, M. J. Kelly, 8 Idol Lane, E.C.
Convul, Manuel de Montes.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'—15° N. lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles, including a large portion of the Mosquito Territory, and a population of 310,000, of whom about three-quarters are mixed blood, and the rest Indians, besides the Mosquitos who are mostly in a savage state. In 1891 there were 93 miles of railway open, and several lines projected, with 1,591 miles of telegraph, connected with the Pacific cable from Mexico to Peru. A Ship Canal connecting the Pacific with the Atlantic (see p. 539) was commenced in Oct., 1890. The interest on the foreign loan has been reduced to 4 per cent.

Public revenue, 1896..... about £400,000
 Public expenditure, 1896 ,, 350,000

NORWAY.

(For SWEDEN see p. 578.)

King of Sweden and Norway, Oscar II., born 21 January, 1829; suc. 18 September, 1872; married 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, born 9 July, 1836 (and has issue four sons).

Heir Apparent, Oscar Gustaf Adolf, Duke of Wermland, Crown Prince, b. 16 June, 1858; m. 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, born 7 August, 1862.

MINISTRY (14th Oct., 1895).

I. Council of State at Christiania.

President of the Council of Ministers, Minister of State and Chief for the Department of Public Accounts, Dr. G. F. Hagerup.
Defence, Maj.-Gen. C. W. E. B. Olsson.
Ecclesiastical Affairs and Public Instruction, J. L. E. Sverdrup.
Justice and Police, H. Smedal.
Interior, O. J. Olsen.
Public Works, F. Stang Lund.
Finance and Customs, B. Kildal.
State Secretary, H. Lehmann.

II. Delegation of the Council at Stockholm.

*Minister of State, G. W. W. Gram; Ministers, T. v. W. Engelhart (and a vacancy).
 General Secretary, H. Schlytter.*

Envoy Extraordinary in London (see under Sweden, p. 578).

Norway, an independent kingdom, since 1814 united with Sweden under the same King of the House of Bernadotte (the fundamental law of the 17th of May (4th of November), 1814, the Act of Union with Sweden of the 6th of August, 1815). The Parliament of 114 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odels-thing" and "Lagthing." The western and northern portion of the peninsula is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,500 sq. miles, with a population (1896) of 2,082,000. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren table-lands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains. Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it has been

necessary to import considerable quantities of corn, meat, and butter. The fisheries give employment to a large part of the population throughout the year. The most important are cod and herring; the exports of these with other sea-products and fish-oil were valued at £2,261,068 in 1895. The mineral products are similar to, but far less valuable than, those of Sweden. Timber-dressing, mechanical engineering, textile manufactures, ship-building, and pulp-making are the principal departments of Norwegian industry. The exports of forest produce were valued at £2,866,465 in 1896, the value of wood-pulp alone being £846,976. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, fish, oil and other products of the fisheries, pulp, skins and furs, nails, textile manufactures, minerals, ice, condensed milk, margarine, butter, cattle, &c. The principal articles imported by Great Britain from Norway in 1896 were:

Fish.....	£475,467	Paper & Rags	£1,245,110
Ice	262,298	Timber	1,607,407

and the principal articles exported to Norway from this country in 1896 were:

Coal.....	£264,298	Metals	£327,417
Cottons, &c.....	290,231	Wool & Woollens	153,764

The navy consists of 55 steamers (4 being monitors) and 209 guns. The mercantile marine, 31 Dec., 1896, consisted of 7,192 vessels, of 1,566,558 tons. The army by law consists of 18,000 men of the line, and cannot be increased without the consent of the Storting, but the number of trained men and officers under different names is about 36,000. Military service is obligatory and personal after the completion of the twenty-third year. The period of service is five years in the line, four years in the "landvern," and four years in the "landstorn." The administration of Norway is entirely distinct from that of Sweden, and it retains its own laws. The debt was incurred chiefly in the construction of railways (1,119 miles open). The length of telegraphs belonging to the state in January, 1897, was 5,232 miles.

Revenue, 1897-98	Estimated £3,702,389
Expenditure, 1897-98	do. 3,681,856
Public debt, 1 July, 1897	9,940,444
Total imports, 1896	12,335,503
Total exports, 1896	8,137,170
Imports from United Kingdom, 1896 ...	2,759,548
Exports to United Kingdom, 1896	4,312,166

OMĀN.

Sultan, or Sovereign, Seyyid Feysal bin Turkee, *suc.* 4 June, 1888.

Omān is a Mohammedan State in S.E. Arabia with a coast-line of about 1,500 miles along the Gulf of Persia, the Gulf of Omān, and the Arabian Sea, an area of 81,000 square miles, and a population of 1,600,000. The small territory of Gwadar on the Mekran coast also belongs to it. Zanzibar, on the African coast, was a dependency of Omān until 1856. The country rises from a bare and burning coast until in Jebel Akhdar it attains an elevation of 10,000 feet. In the interior, however, among the Bedouins, the authority of the Sultan is hardly even nominal.

The population of Omān is chiefly Arab, but there is besides a considerable foreign element, consisting of Banians and Khojas from Western India, Persians, East Africans, and Nubians. The chief productions are dates, grain, fruit, and sugar; and the fisheries are very productive. The revenue is about 180,000 dollars. The exports consist of dates, cloth, salt, fruits, pearls, dried fish, and matting. The imports are—sugar, rice, piece-goods, coffee, wheat, raw silk, cotton, &c. Omān has no independent coinage; the East India rupee and (Austrian) Maria Theresa dollar are the current coins, the latter being the most used. The rainfall is very scanty, averaging about 6 inches annually.

Muscat, the capital, with 60,000 inhabitants, trades with India, the Persian Gulf, Batavia, Zanzibar, and Yemen, but has little direct intercourse with Europe.

Total exports, 1896-97 \$1,909,300
" imports, 1896-97 2,879,500
British Consul, Major C. G. F. Fagan.

Transit, 24 days. Mails weekly *via* Bombay; telegrams sent by post from Jask and Gwadur.

ORANGE FREE STATE.

President, M. T. Steyn, 21 Feb., 1896, for 5 years.
Government Secretary, P. J. Blignaut.
Chairman of the Volksraad, C. W. H. van der Post.
Chief Justice Supreme Court, M. de Villiers.

Consul-General in London, Sir William Dunn, Bart., M.P., 43 Broad Street Avenue, E.C.

A South African Republic, situated to the N. of the Cape Colony, and bounded, E. by British Basutoland and Natal, N. by the Transvaal, and W. by Griqualand West; it has an area of 48,326 square miles, with a population of 207,503, of whom 77,716 are whites. It was founded by Dutch emigrants from the Cape Colony. The

country was proclaimed British territory by Sir Harry Smith in 1848, but, by the convention entered into on the 23rd of February, 1854, between Sir George Clerk, Her Majesty's special commissioner, and the representatives of the people, the inhabitants were declared "to all intents and purposes a free and independent people, and their Government to be treated thenceforth as a free and independent Government."

The Orange Free State is essentially a pastoral country, but the eastern part especially is admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal and gold mines exist. The chief exports are wool, ostrich feathers, hides, diamonds, grain, &c. It possesses State property valued at nearly £1,000,000.

The legislative power is vested in the Volksraad, comprising 58 members, elected by the various constituencies into which the State is divided.

Public revenue, 1896 £374,774
Public expenditure, 1896 381,861
Public debt, 1896 about 45,000
Exports, 1896 1,744,484
Imports, 1896 1,206,457

CAPITAL, Bloemfontein. Pop. (1892), 5,817.

A fund of £200,000 has been established, the interest of which, amounting to £12,000 yearly, in addition to a further sum of £40,000 yearly, is devoted solely to educational purposes, whilst the Government is also a shareholder to the amount of £70,000 in the National Bank.

Parcels, per lb. 1s., limit 11 lbs.; telegrams, per word, 5s. 2d.

PARAGUAY, REPUBLIC OF.

President, Señor Eguaguiza, (25 Nov., 1894). £1,900
Foreign Secretary, José Segundo Decoud.
Minister Plenipotentiary to London and Paris, Señor Eusebio Machain.

Consul-General in England, Christopher James, 18, Eldon Street, E.C.

Consul in London, A. F. Baillie.

Consul-General, Glasgow, John Galloway.

One of the most rising States of South America, and, except Bolivia, styled by some as the "Garden of South America," the only one without any seaboard, situate between 22° 4'—27° 30' S. lat. and 54° 32'—61° 20' W. long. Its area is computed at 145,400 square miles, or about one-fifth larger than the United Kingdom, enclosed within the rivers Parana and Paraguay; and contains a population of about 600,000. Now that it has a settled government, Paraguay may be considered one of the most promising countries of South America; its capabilities are practically exhaustless, and the climate favourable to Europeans; the average of the thermometer for 1887 was 73°. The chief crops are maize, rice, coffee, manioc, tobacco, sugar-cane, and oranges. Among its principal trees are several species of dye-wood, and many yielding juices or gums, as the caoutchouc or india-rubber; there is also the valuable tree Quebracho, use for tanning, and the valuable shrub called "Yerba Mate," or Paraguay tea-plant—one of its principal articles of commerce; there are an immense number of hardwood and other timber trees; medicinal plants also are very numerous. Stock-raising is the chief industry, and, there being excellent pasturage, it is capable of great development. The chief articles of export are oranges, hides, tobacco, yerbamate, and timber. The army, 60,000 men strong in the war of 1865-72, has been reduced to 30,000 men,

but there is at present no navy. A railway, 155 miles in length, belonging to an English Company, is open, but is said to be unprofitable. Revenue, 1895, \$5,120,247; Expenditure, \$4,992,006. Imports, 1895, £492,010; Exports, £424,290. Imports from United Kingdom, 1896, £13,779.

CAPITAL, Asuncion. Population, 35,000.
British Minister, Hon. W. A. C. Barrington (Buenos Aires).
Consul, W. J. Holmes £450
 Parcels, 3 lbs. 2s. 6d., 7 lbs. (limit) 4s.; telegrams, per word, 4s. and 4s. 6d.

PERSIA (See p. 471).

PERU, REPUBLIC OF.

President, Señor Nicholas Pierola, installed 8 Sept. 1895, for four years.

1st Vice-President, Guillermo E. Billinghurst.
and do., Augusto Seminario y Vascones.

Premier, Señor Romana.

Foreign Affairs, Dr. Enrique de la Riva-Agüero.

Public Works, Señor Puente.

Justice, Señor Lavalle.

Finance and Commerce, Ignacio Rey.

War, Colonel Rosage.

Minister to England and France, Señor Don José F. Canevaro (*Legation*: 3 Park Place, S.W.).

Secretary, Don Alejandro N. Puente.

Attaches, José Maria Valle Riestra; Carlos del Castillo y Boza.

Consul-Gen. in London, Don Eduardo Lembeke, 237, Winchester House, Old Broad St., E.C.

Vice-Consul, Don Eduardo Higginson.

Consul-General at Southampton, H. Guillaume.

Do., Liverpool, Robert B. Crowe.

Peru is an important maritime Republic of South America, situated between parallels 1° and 19° S. latitude and between 68° and 81° 20' 45" longitude W. On the west it is washed by the Pacific Ocean, having a coast-line of 1,300 miles. It is bounded on the north by the Republics of Ecuador and Colombia, on the east by the Brazils and Bolivia, and on the south by Bolivia and Chile.

The most northern port on the Pacific is Tumbes. The boundary line commences a short distance north of that port; it runs southwards as far as the river Macara, following its course until about lat. 3°, long. 79° W.; thence it rises in a north-easterly direction by Andoas to Santa Rosa, which is the extreme northern part of Peru. The line then passes from the river Napo to the Brazilian frontier, which commences at the confluence of the Apaporis with the Yapura 1° 31' 29" S. lat., 69° 24' 55" W. long., thence to the point of juncture of the river Caticché with the Putumayo 2° 55' 12" S. lat., 69° 40' 28" W. long.; it thence descends, cutting the Putumayo three times, to San Antonio, 4° 13' 21" S. lat., 69° 54' W. long., as fixed by the Peruvian-Brazilian Commission of 1873. The Commission of 1874 fixed the eastern boundary as follows:—The line descends the river Guaporé and Mamoré, which form the Madera, to a point half-way between the Amazon and the mouth of the Mamoré, 65° 2' S. lat.; thence it passes east to west to the river Yavari, 6° 59' 29" S. lat., 74° 26' 6" W. long., ascending that river to the Marañon (Amazon). The boundaries between Peru and Bolivia are not definitely fixed, but it is understood the line follows the river Beni to the Andes, traversing Lake Titicaca, and thence follows the Andes until it reaches the river

Camerones, which river now forms the boundary between Peru and Chile, as determined by the treaty of peace between those countries in 1883.

The total area of Peru is about 455,000 square miles, being as large as England, France, Spain, and Portugal together; and its population, of which no census has been taken since 1876, is about 2,972,000, including 350,000 Indians. The country is traversed throughout its length by the Andes, running parallel to and about 60 miles distant from the Pacific coast. The region between is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper, coal, and petroleum are conspicuous. The interior provinces, i.e., those on the eastern side of the Andes, are of vast extent and fertility, with a climate ranging from temperate to tropical. These regions are intersected by numerous fine rivers, forming the head streams of the Amazon, by which there is uninterrupted communication with the Atlantic. Gold is found in most of the interior and southern regions. The medicinal productions of the interior are of great value, comprising cinchona or Peruvian bark, sarsaparilla, copaiba, &c. Coffee, cocoa, india-rubber, &c., are indigenous to the country. Important mines of gold, silver, and copper exist, some of which are now being worked. The Lobos and other islands on the Pacific coast are famous as the sources whence Europe has been supplied with Peruvian guano. The deposits at Huanillos in Chile, conceded to the Peruvian Corporation, are being worked, and give a high-class guano.

An arrangement was concluded in October, 1889, by the Peruvian Government for the cancelling of its external debt, in pursuance of which the State railways, the guano, the large silver mines of Cerro de Pasco, and vast tracts of land are vested in the Peruvian Corporation. The total length of the railways held by the Peruvian Corporation and now open and working is 772 miles. There is also water communication on Lake Titicaca with Bolivia, the Peruvian Corporation owning 3 steamers, the largest being 571 tons; the navigation of the lake and of the river Desaguadero has been improved, two dredgers being at work. About 46 miles of railways are held by private companies.

The army on a peace footing consists of about 3,500 men, with a police force of about 2,400, and there are 4 war-ships. The principal imports are cotton manufactures, ironware and cutlery, woollen goods, and machinery. The chief exports are guano, cotton, hides, goat skins, sheep, and alpaca wool, sugar, silver, coffee, cocoa, vanilla, rubbers, and cinchona.

Public revenue, 1895	\$8,598,178
Public expenditure, 1895	8,004,316

Financial Agent, Albilio Lobo.

The most westerly Kingdom of Europe, and a part of the great Iberian Peninsula; it lies in 37°-42° 8' N. lat. and 6° 15'-9° 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 34,606 square miles, with a population in 1890 of 5,082,247, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 401,624) form part of the kingdom, which thus has a population of 4,708,178. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnuts, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last from its hardness and purity is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. There is a commercial marine of 36 steamers and 433 sailing vessels, about 110,000 tonnage. Railways, 1,420 miles in extent, were open for traffic in 1892, and there are 8,079 miles of telegraph wire. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt, which now amounts to about £31 a head of the population.

In January, 1892, the King announced that, in view of the financial condition of the country, his Majesty had resolved to relinquish, for the benefit of the Treasury, one-fifth of the amount of his civil list.

The army in 1896 consisted of about 30,000 men,

on a peace footing, and of 125,057 men with 264 guns on a war footing; and the navy of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 4,898 sailors.

	834,541	7,917,456

THE AZORES and MADEIRA are an integral part of Portugal Proper; the CAPE VERDE ISLANDS off the Cape of that name in Senegambia consist of St. Antonio, St. Nicolas, Fogo, Santiago, Boavista, Sal, and some smaller islands, having a total area of 1,490 square miles, and a population of about 111,000; the capital is St. Vincent. In West Africa a portion of the GUINEA Coast, with the BISSAUGOS ISLANDS, was acquired in 1885; the capital is Cacheo, and the territory has an area of 14,370 square miles with about 1,500,000 inhabitants. In the Gulf of Guinea the two islands of ST. THOMAS and PRINCIPE were obtained in 1879; these islands are extremely fertile and have an area of 420 sq. miles (population about 21,000). Between the French Congo and the Free State are the territories of LANDANA and CABENDA, area about 2,030 sq. miles (population 30,000); and extending from the left bank of the Congo river to the right bank of the Cumene river is the vast kingdom of ANGOLO, with about 1,350 miles of coast line and an area of 510,670 sq miles, population about 3,750,000. The capital of Angola is St. Paul de Loanda, other important places being Benguela and Mossamedes: there are about 300 miles of railway open, and about 250 miles of telegraph wires. In South East Africa are the important colonies of LOSENZO MARQUES and MOZAMBIQUE, together constituting PORTUGUESE EAST AFRICA, which extends from Tongaland (British Colony) to the British Central Africa Protectorate in the North West, and German East Africa in the North East, and is bounded on the West by the S. A. Republic and Rhodesia; and on the East by the Mozambique Channel; the total area is about 297,750 sq. miles, and the population 1,500,000. In the southern province are the ports of Lorenzo Marques (Delagoa Bay) and Beira, and in the northern, Quilimane, Mozambique, and Ibo: the trade of Beira in 1896 was £302,140 for imports and £17,900 for exports, that of Lorenzo Marques being £12,543,011, mainly for imports on their way to the Transvaal. Part of Mozambique is leased to the Mosambique Company, who administer the Manica and Sofala territories. The railways in operation are the Delagoa Bay Railway from Lorenzo Marques north-west to join the Transvaal system on the frontier, about 60 miles, and the Beira Railway, from Beira to Umtali on the borders of Rhodesia, about 180 miles. In Asia, Portugal possesses GOA, DAMAUN, and DIU (see p. 454), and TIMOR in the East Indian Archipelago, and MACAO, an island near the mouth of the Canton river, having a total area of 7,811 sq. miles, and an estimated population of 1,004,456. Imports to Colonies from U.K., 1896. £1,647,485 Exports from Colonies to U.K., 1896. £93,047

ROUMANIA.

King, Charles, second son of Prince Charles Antoine of Hohenzollern-Sigmaringen, born 20 April, 1839; elected Hereditary Prince 26 March, 1866; confirmed 24 Oct. 1866; proclaimed King by vote of both Chambers, 26 March; crowned 22 May, 1881; mar. 15 Nov. 1869, Elizabeth (Carmen-Syva), dau. of the late Hermann von Wied, born 29 Dec., 1843.

Heir Presumptive (Nephew), Prince Ferdinand von Hohenzollern, born 24 August, 1865; proclaimed Heir Presumptive 26 Mar., 1889; mar. 10 Jan. '93 to Princess Marie of Edinburgh, and has issue Carol, born 15 Oct. 1893, and Elizabeth, b. 1894 Prem and Min. of For. Affairs, M. Demeter Sturdza.

Interior, M. Phérékyde.

Finance, M. George Cantacuzena.

War, General Berendez.

Instruction, S. Haret.

State Lands, M. Stolojan.

Public Works, M. T. Bratiano.

Justice, M. A. Djuvara.

Envoy Extraordinary and Minister Plenipotentiary,

M. de Balaceanu, 28 Victoria St., S.W.

Councillor of Legation, D. Nedeyano.

Consul-General in London, Capt. James Inman, 68 Basinghall Street, E.C.

The Kingdom of Roumania consists of the Moldo-Wallachian provinces formerly belonging to Turkey, but which by the Treaty of Berlin, 13 July, 1878, were recognised as an independent State, and the territory of the Dobruja added to them. On the 26th March, 1881, Roumania was raised to a Kingdom. The entire area is 46,314 square miles, with a population of about 5,500,500. The dominating religion is that of the Greek Church (4,529,000); Roman Catholics, 114,200; Protestants, 13,800; Jews, 400,000. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle, sheep, and horses, of which immense numbers are reared on its far-stretching pastures. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, rock-salt, spirits, hides, wood, and cattle. The total length of railways is nearly 1,700 miles, and there are 223 telegraph offices with 9,915 miles of wire.

An International Commission, created by the Treaty of Paris, 1856, and whose powers were enlarged by the Treaty of Berlin, 1878, has its seat at Galatz, and exercises sovereign powers over the navigation of the Danube: the British representative is Lieutenant-Colonel Trotter, Consul-General. Its income, principally derived from shipping dues, amounts to about £60,000 per annum. On November 10, 1892, a large dock was opened at Ibraila (Brahilov), and in 1896 a canal through the "Iron Gates" rendered the hitherto dangerous part perfectly navigable.

The field army consists, on the peace footing, of 30,000 men, but in time of war this can be raised to 158,000, and there is a militia in addition. There is also a small navy of 12 steamers.

Public revenue, 1894-95	£7,714,098
Public expenditure, 1894-95	7,816,897
Public debt, 1894	47,585,630
Total imports, 1894	16,885,591
Total exports, 1894	11,707,935
Imports from United Kingdom, 1896 ...	1,352,795
Exports to U. K. (chiefly corn), 1896 ...	3,204,114

Consul-General, Alexander de Volborth, 17 Great Winchester Street, E.C.

Agent of Ministry of Finances, Gabriel Kamensky, 21 Blomfield Road, Maida Hill, W.

Assist. do., Gregory Wilenkin.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28'—76° 33' N. and 17° 40'—64° 30' E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until lately included also a large section of North America. The empire comprises:

European Russia:—	English Squares Miles.	Population in 1897.
Russia Proper (50 Provs.)	1,887,043	94,188,750
Poland (10 Provs.)	49,142	9,442,590
Finland (Grand Duchy)	144,211	2,527,501
Asiatic Russia:—		
Caucasia (11 Provs.)	182,449	9,723,553
Siberia (8 Provs. and Regions)	4,823,112	5,731,732
Central Asia (10 Provs. and Regions)	1,364,124	7,590,275
Russian subjects in } Khiva and Bokhara }	6,412
	8,450,081	129,211,113

Of the total population 64,616,280 are men and 64,594,883 women.

In the European parts of Russia alone the population increases annually at the rate of nearly a million and a half. The largest towns are St. Petersburg (1,267,023), Moscow (988,610), Warsaw

(614,752), Odessa (404,651), Lodz (314,780), Riga (284,943), Kieff (248,750), Kharkoff (170,682), and Tiflis (159,862). The various nationalities in 1882 were represented about as follows:—

Russ, 69,770,000; Poles, 6,010,000; Lithuanians, 2,910,000; Germans, 1,120,000; Swedes, 270,000; Tajiks (Persians), &c., 1,125,000; Armenians, 800,000; Jews, 2,954,000; Caucasians, 2,850,000; Finns, 2,000,000; Turks and Tartars, 7,700,000; Mongols, 530,000; various, 584,000. The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there are:—Greek Catholics (including Dissenters), 72,990,000; Roman Catholics, 8,910,000; Protestants, 4,766,000; Jews, 2,954,000 (a very competent authority gives the number of Jews as being nearer four millions); Mohammedans, 11,814,000; and Pagans, 450,000. European Russia consists of an immense plain; throughout its vast extent it does not contain a single mountain. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries; and the surface along the southern borders is mountainous, rising in many places far above the limit of perpetual snow.

A great portion of Russian territory is totally unfit for cultivation; in the north the barren tundras are almost constantly frozen, producing only moss; of Finland lakes, see description in Almanack, p. 544; and in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst all the interior provinces and nearly the whole of Siberia are clothed with forests. The country between the Baltic and Black Seas, however, is eminently fertile, producing abundance of grain. The chief cereals raised are wheat, barley, oats, buckwheat, millet, and especially rye, the staple food of the inhabitants. Hemp and flax are extensively cultivated, and of late years potatoes and tobacco. The forests of European Russia are extensive, occupying an area of 460,000,000 acres. The fir, pine, birch, oak, lime, maple, and ash trees predominate. The Ural Mountains (forming the boundary between Europe and Asia), which contain nearly all the mineral riches of the country, are the principal seat of mining and metallic industry; producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. The naphtha springs on the Caspian are annually increasing in importance, and already flood certain European markets with petroleum. An immense bed of coal, both steam and anthracite, apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper), Mariupol, Rostoff, and Taganrog being the outlets.

England is an excellent customer; nearly all her purchases are articles of native produce. The exports in 1896 to the United Kingdom amounted to £2,677,443, the chief articles being:—

Butter	£75,080	Hemp	£73,159
Corn, wheat	5,287,240	Oil-seed cake	395,615
" oats	4,405,298	Ore	158,720
" barley	1,999,562	Petroleum, &c.	688,181
Bristles	138,630	Seeds, all kinds	1,201,682
Eggs	629,701	Wood and timber	4,257,310
Flax	1,221,523	Wool, &c.	347,219

On the other hand, Russia purchases but a small amount of goods produced in the United

Kingdom, the total amount for the year 1896 being but £11,403,810; the chief articles were:—

Alkali.....	£63,284	Implements & tools.....	£251,797
Coals, &c.....	89,336	Machinery.....	1,939,953
Chemical products.....	244,959	Manure.....	61,354
Cotton yarn and manufactures.....	366,246	Metals, all kinds.....	1,699,889
Herrings.....	244,212	Wool, yarn and manufactures.....	679,652

With metallurgical and engineering factories, Russia possesses many extensive manufacturing establishments for weaving, tanning, fur-dressing, &c. Linen is largely manufactured by hand-loom, the chief operations consisting in spinning and weaving flax and hemp. Woollen and worsted stuffs, fine cloths, and mixed fabrics are also produced. The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow, and bristles.

The Russian Army has been reorganised since the Turkish War. On a peace footing over 800,000 men, with 3,400 guns, are supposed to be under arms; in European Russia, 420,000 combatants, with 2,800 guns; in the Caucasus, 250,342 combatants and 300 guns; and in Asia, 131,116 combatants, with 196 guns. On a war footing it includes altogether 2,532,496 men, with 3,400 guns. The Navy (for which an expenditure of £6,200,000 was estimated for 1897) consists of the Baltic fleet, that of the Black Sea, and of certain flotillas comprising 10 battleships (8 *building*), 9 armoured cruisers (2 *building*), 2 protected cruisers (3 *building*), 3 unprotected cruisers, 12 coast defence (4 *building*), 16 torpedo vessels (1 *building*), 5 torpedo-boat destroyers, 152 torpedo boats (20 *building*), and 4 special vessels (1 *building*), with an armament of 1,348 guns.

Of railways, there were open, November, 1896, 25,898 miles. There are 5,980 post-offices, carrying, in 1897, 280,000,000 letters, &c. Of telegraphs there are 3,790 offices, with 91,000 miles of line.

The sea-going commercial marine consisted in 1893 of 948 sailing vessels and 242 steamers, of 100 tons and upwards, with a total tonnage of 492,202.

Vice-Consul, Man. de Montis, 8 Jeffrey Sq., E.C.

Salvador, the smallest, though in point of population the second, forms part of the GREATER REPUBLIC OF CENTRAL AMERICA, the other states being Honduras and Nicaragua. It extends along the Pacific coast for 170 miles, with a general breadth of 43 miles and contains an area of about 7,228 English square miles, with a population estimated at 750,000. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. Its mineral resources are being developed, and in Cabañas gold has been discovered, carrying 79 ounces of free-milling gold to the ton. A railway 34½ miles in length connects Acajutla with Ateos, 21 miles from capital, has been extended to Sta. Ana, the coffee centre, and is expected to reach the capital in 1898; another line has been commenced from the port of La Union to San Miguel. The only river of importance is the Lempa over which a bridge was constructed in 1897 at the cost of £28,600. Earthquakes are frequent; the capital (now rebuilt) was entirely destroyed by one in 1873.

Revenue, 1896	£957,297
Expenditure, 1896	937,255
Imports, 1896	307,282
Exports, 1896	665,357

SAMOA (NAVIGATORS ISLANDS).

King, Malietoa Laupepa, reinstated 9 Nov., 1889.
 Chief Justice, W. L. Chambers (American) £1,200
 Municipal President, Dr. Raffel (German) £1,000

A group of islands in the Southern Pacific, near Fiji and Tonga, the largest of which are Upolu, Savaii, and Tutuila. The group has an area of 1,076 square miles and about 25,000 inhabitants. Apia in Upolu, is the seat of government and the centre of trade, which is mainly in the hands of a German firm. The only export is copra.

By a treaty signed at Berlin, 14th June, 1889, Great Britain, Germany, and the United States have guaranteed the independence of Samoa, and provided for its government, the Chief Justice and Municipal President being nominated by the three Treaty Powers. The Municipality of Apia is under an elected Municipal Council of six members, whose resolutions have to be submitted to the Consuls of the Treaty Powers sitting as a Consular Board. A Land Commission, appointed by the Treaty Powers for two years to investigate all titles and claims to land in Samoa, completed its work in 1894. There is steamship communication four-weekly from America, and three times a month from Australia and New Zealand.

Total imports, 1896	£60,831
Total exports, 1896	52,729
Imports from Great Britain & Cols., 1896	37,100
British Consul, at Apia and H.M. Dep. Commr. (Western Pacific), E. G. B. Maxse	£500
(With £100 as Dep. Commr.)	

CAPITAL, Apia (pop. about 1,250). Transit from London via America, 26 days.

Parcels (which should be sent via New Zealand), 1 lb. 1s. 2d.; then, 10d. per lb. to 11 lbs.

SAN MARINO.

A small "Republic" in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60 (20 nobles, 20 townsmen, and 20 peasants), of whom two act jointly as Regents. The area is 33 square miles, the population 8,000. There is an "army" commanded by several "generals," and titles and decorations, it is said, are bestowed freely for a consideration. The village of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has a castle, fortified by King Berengar of Lombardy, a fine church, and a theatre. Agriculture and viticulture flourish. By a treaty concluded in 1872 the Republic has placed itself under the protection of Italy.

SERVIA.

King, Alexander (Obrenovitch), b. (a) 14 August, 1876; succeeded his father, King Milan (who abdicated), 6 March, 1889. Took royal authority into his own hands (1st) 13th April, 1893. Premier & Foreign Affairs, M. Vladan Georgevitch (October, 1897).

Interior, M. Andonovitch.

Public Works, Colonel Atanakovitch.

Finance, M. Stefan D. Popovitch.

Justice, M. Costa Christitch.

Public Instruction, M. Andreas Georgevitch.

War, Colonel Vuchkovitch.

Commerce, M. Lozanitch.

Envoy Ext. and Min. Plen. in London, M. Chedomille Mijatovitch, 27 Pembroke Gdns., S.W.

Consul-General in London, H. W. Christmas, 42A

Bloomsbury Square, W.C.

Consul in Manchester, Otto Baerlein.

A Kingdom of Eastern Europe, governed by an hereditary sovereign. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people. This constitution was suspended 21 May, 1894, by Royal decree and that of 1869 provisionally restored. It is separated from Hungary by the Danube and Save. By the Berlin Treaty, 1878, it received a large accession of territory, and now has an area estimated at 18,757 square miles, with a population in 1895 of 2,314,153. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The production of wine has suffered severely from Phylloxera and bad seasons, and of late the country has been compelled to import grapes and wine from Macedonia. The cultivation of prunes is very extensive, and these are sent chiefly to Austria-Hungary, Germany, and the United States. The live stock (1895) included 166,940 horses, 910,726 cattle, 3,566,713 sheep and goats, and 894,564 pigs. Lead, zinc, quicksilver, antimony, copper, iron, and coal are found. Carpet-weaving and embroidery, and the making of jewellery and filigree work, are of some importance. The imports consist in the main of cottons, sugar, and colonial goods, hardware, woollens, &c.; the exports of dried prunes (11.6 per cent.), pigs and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. The direct trade of Servia with the United Kingdom is small (imports, 1896, £164,872; exports nil). There were (1894) 624 kilometres of railway, and 3,174 kilometres of telegraph, with 111 post offices and 392 kils. of telephone. The army, on a peace footing, numbers 13,000 men, with 144 guns. On a war footing it includes a field force (70,000 men, 264 guns), dépôts (25,000 men, 36 guns), a reserve (58,000 men, 220 guns), and a levy-en-masse. Every man between 18 and 50 years of age can be called to arms. Education is compulsory and free, and has been making rapid strides of late years.

Revenue, 1896	£2,546,388
Expenditure, 1896	2,534,224
Public debt, 1896	14,420,464
Total imports, 1896	1,337,913
Total exports, 1896	2,135,438
Imports from United Kingdom, 1896	66,344

 Financial Delegate, Nicasio E. Jauralde, 37 New Broad Street, E.C.

A Kingdom situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.—9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the Ancient Provinces, still best understood, are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary and Balearic Isles, comprising an area of 196,173 English square miles, and a population in 1887 of 17,550,216. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated table-land, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain is rich in minerals, especially iron, copper, and lead, and as capital is attracted its resources will be developed. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and

flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry, and tent wines are made; in the south-east, the Malaga and Alicante; these are the best known, but there are many others which only require to be brought before the English public in order to secure a market. Now that the country is in a more settled condition, there is little doubt that it will attract travellers, and then become better known. Most of the principal towns now possess very fair hotel accommodation. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery, and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c.; trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home trade is rigidly protected by high customs duties.

The principal exports to the United Kingdom in 1896 were:—

Copper ore	£1,193,849	Nuts	£158,613
Cork	120,276	Quicksilver	285,901
Fruit; Almonds	250,359	Esparto, &c.	339,612
Grapes	279,891	Wine	693,622
Oranges & lemons	3,685,990	Onions	219,225
Iron ore	3,117,084	Pistons (iron and copper)	666,184
Lead	5,002,640	Silver ore	233,343
Raisins	462,922		

And the chief imports from the United Kingdom:—

Alkali	£207,230	Machinery, all sorts	380,147
Chemical products	76,441	Manure	252,919
Coal and coals	840,449	Metals, all sorts	317,848
Cotton manufactures	121,438	Wool, &c.	271,702
Linens, &c.	£168,996		

The army on the peace footing consists of 120,000 men. On a war footing it is raised to 480,000 men, with 510 guns. The colonial forces, including militia, number 236,000. Service is compulsory on all for 8 years in Spain, or 4 years in the colonies. The navy consists of 126 steam vessels, including 7 ironclads, and about 22,000 men. During 1896, 38,357 vessels (tonnage 28,010,792) entered and cleared at Spanish ports.

Nearly all the 49 Provinces are now connected by railways, of which about 6,070 miles have been completed, and there are 14,710 miles of telegraph.

An extraordinary budget was passed in 1896 to provide for an expenditure of £8,814,146 above the ordinary expenditure: this consisted of £1,157,190 payable to the Tobacco Co. as balance of the 1887 loan, £2,287,027 grant, and £2,880,000 navy expenditure, and £2,489,929 subventions to Railway Cos. This was to be met by loans of £2,400,000 from the Tobacco Co., and £3,720,000 on the Almaden quicksilver mines, the balance £2,694,146 being expected to accrue in six years from the new navigation law.

Public revenue, 1897-'98 (estimate) .. £43,591,638
 Public expenditure, 1897-'98 (estimate) 42,997,409
 National debt, 1897:

Spanish	£283,045,771
Cuban	70,220,000

Interest on debts, 1897	£353,265,771
Total imports, 1896	13,963,745
Exports	29,366,906
Imports from U. K. to Spain, 1896	34,890,400
Imports from Spain to U. K., 1896	3,898,370
Exports from Spain to U. K., 1896	11,997,919

SPANISH COLONIES AND DEPENDENCIES.

(See also p. 604.)

I. In the West India: Spain possesses the island of CUBA, the "Queen of the Antilles," by far the largest of the West India Islands, which was discovered by Christopher Columbus on 28th October, 1492, and first colonized by his son Diego, who founded Santiago and Trinidad in 1514, and Havana in 1519. In 1762 a British force under Lord Albermarle captured Havana, but the island was restored to Spain under the Treaty of Paris of 1763. In shape Cuba is long and narrow, lying at the entrance of the Gulf of Mexico (making with Yucatan and Florida the Yucatan and Florida channels on the south and north), between 74° and 85° W. long., and 19° and 23° N. lat., with a total length of about 750 miles, and an average breadth of 60 to 70 miles, the area being nearly 42,000 square miles. The population of the island is about 1,600,000, composed of Spaniards, Creoles, and Mulattoes and Negroes, the last named being prohibited by law from holding any government appointment.

There have been numerous revolts in the island, the most formidable being that of 1859-76, when 145,000 soldiers were employed to quell the rising, and the present disturbance, which has given rise to a difference between Spain and the U.S.A. and has already called forth Marshal Campos (1895) General Weyler (1896), and General Blanco (October, 1897) and about 200,000 Spanish troops. The Revenue seldom exceeds \$20,000,000, and there is a debt of £70,220,000 on which the annual interest was £3,359,900 in 1896; the imports in 1892 amounted to £11,400,000, the exports being valued at £18,000,000. The principal products are sugar, coffee, tobacco (250,000 bales exported in 1892), cigars and cigarettes, and mahogany and other woods; the principal imports are rice, beef, and flour. The capital, Havana, has about 200,000 inhabitants; other important towns, Santiago de Cuba (70,000), Puerto Principe (45,000), Holguin (35,000), Sancti Spiritu (30,000), Cienfuegos (28,000), and Cardenas (24,000).

Further to the east is the island of Puerto Rico, which has an area of about 5,300 square

niles, and about 800,000 inhabitants; the capital, San Juan, has a population of 23,000, Ponce 38,000, and San German (31,000) being also towns of importance. The products are sugar, coffee, and tobacco.

The exports from the Spanish West Indies into the United Kingdom amounted to but £35,841 in 1896, the imports from the United Kingdom being £1,202,447.

II. In Africa: In the Gulf of Guinea, Spain possesses the island of FERNANDO PO, and ANNOBOM, CORISO and ELOYO islands off the coast of French Congo. In 1891 she relinquished her claim to Coriso Bay, retaining, however, CAPE SAN JUAN and the right of navigation over the rivers Benito and Muni. Part of the Western Sahara forms the Spanish Protectorate of RIO DE ORO (150,100 square miles, population 100,000), to the north-west of which are the CANARY ISLES (area about 3,000 square miles, population 300,000), which are administratively an integral part of Spain. In Morocco are several "Presidios": IFRI near Cape NON, TETUAN and CEUTA (30 square miles, population 16,000) opposite Gibraltár, and the coast towns of Gomera, Alhucemas, Melilla, and the Zafarin Islands.

III. In the East Indies: THE PHILIPPINE ISLANDS, second only in importance to Cuba, have an area of about 114,400 square miles, with 5,500,000 inhabitants. The capital is Manila, in the island of Luzon (population about 160,000), other large towns being Lauag (31,000), Lipa (42,000), Banang (36,000), Batangas (34,000). The principal products are hemp, sugar, coffee, indigo and copra, in addition to the tobacco plant, which is extensively grown in the island of Luzon: the principal exports to the United Kingdom being sugar and hemp. The colonial troops in the islands number about 17,000, and these were largely reinforced in 1896 and 1897 to help quell a serious revolt that had broken out.

The total trade in 1896 was £2,150,000 for imports, and £7,500,000 for exports.

To the south-west of the Philippines is the SULU ARCHIPELAGO (area about 1,000 square miles, population about 60,000), and to the south-west the PELEW or PELAO ISLANDS, and further to the west are the CAROLINE and LADRON or MARIANNE ISLANDS together containing an area of about 950 square miles with about 40,000 inhabitants.

The total area of these colonies and possessions is about 323,750 square miles, and the total population about 8,500,000.

Imports to Colonies from U. K., 1896. £2,274,228
Exports from Colonies to U. K., 1896. £2,680,325

SWEDEN.

(For NORWAY, see p. 568.)

King of Sweden and Norway, Oscar II., born 21 January, 1829; suc. 18 September, 1872; married 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, born 9 July, 1836 (and has issue, 4 sons).

Heir Apparent, Oscar Gustaf Adolf, Duke of Wermland, Crown Prince, b. 16 June, 1858; m. 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, born 7 August, 1862.

MINISTRY FOR SWEDEN.

Prime Minister, E. G. Boström.
Min. Foreign Affairs, Count L. Douglas.
Justice, P. L. L. Annerstedt.

Instruction, G. F. Gilljam.

Finance, Count H. H. Wachtmeister.

Ministers sans porte feuille, Baron A. L. E. Akerhielm, S. H. Wikblad.

Envoy Ext. and Minister Plenipotentiary in London, Count Carl Lewenhaupt, 52 Pont Street, S.W.

Secretary of Legation, (vacant).

Consul-General, Carl Juhlin-Dannfelt, 24 Great Winchester Street, E.C.

Vice-Consul, C. M. Fallenius.

The Kingdoms of Sweden and Norway, now united under one sovereign, embrace between them the entire north-western peninsula of Europe, usually called Scandinavia, situate between lat. 55° 20'—70° 12' N. and long. 4° 37'—31° E., bounded by the Baltic Sea and Gulf of Bothnia on the east, and the Atlantic on the west.

Sweden comprises the eastern half of the peninsula, and, except the capital, is divided into 24 governments, "Län," with an area of 172,877 square miles, and a population, Dec. 1896, of 4,962,568 nearly all of whom are Protestants, and for the most part well educated. About 60 per cent. of the population are devoted to agriculture, about 275,000 being owners, and 45,000 tenants of the land they cultivate. The coast-line is about 1,550 miles in extent. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kilen Mountains, which separate Sweden from Norway, and may be divided into three separate districts; the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-twelfth of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes; a large quantity of oats are annually exported. The forests are very extensive, covering nearly one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, as supplying not only pitch and tar, but also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts, of Lapland, and mineral trains run from Luleå to Gellivare, i.e., about 130 English miles. Considerable mines of coal are being worked in Scania. The chief imports are coffee, sugar, wine, tobacco, and other ordinary colonial produce, coals, cloth, yarn, wool, cotton, hides, salt; oils, wheat, rye, pork, and machinery. The chief articles of export are timber, oats, cattle, butter, iron, steel, paper, matches, iron and zinc ores, &c. The chief exports to Great Britain in 1896 were:

Bacon	£207,556	Matches	£204,999
Butter	1,664,685	Paper & rags	984,226
Corn	228,900	Timber	4,461,789
Iron & manufact.	5,297,914		

and the chief imports from Great Britain in 1896 were:

Coal	£928,621	Metals	£595,345
Cottons	264,105	Sugar	63,239
Machinery	211,374	Wool & Woollens	559,259

Commercial travellers in Sweden are compelled to take out a licence costing 100 crowns a month, or they incur the risk of being fined.

Railways 6,145 miles in length (of which 2,283 are the property of the State) were open in January,

1897; and 5,325 miles of telegraph (exclusive of railway telegraph), 166 stations, and 1,046 railway telegraph stations. Of telephone wires there were in 1897 67,895 miles.

The field army of Sweden numbers 39,994 officers and men, with 240 guns and 6,852 horses; the militia and Landstorm, 413,000 more. The navy consists of 58 steamers and 252 guns, 17 being ironclads, and 13 for coast defence, with 6 sailing vessels. The officers and men of the navy number about 6,000, with a reserve of 121 officers. Revenue of Sweden, 1898, Budget £6,612,665
Amount of public debt, 1 Jan., 1897 15,945,296
[Expended in the construction of railways.]
Total imports, 1896 £19,730,925
Total exports, 1896 18,728,053
Imports from United Kingdom, 1896 4,246,868
Exports to the United Kingdom, 1896 9,524,137

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'—47° 84' N. lat. and 5° 58'—10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,469 square miles, with a population of 2,933,334 in 1888, who are divided between Roman Catholics, 41 per cent., and Protestants, 59 per cent., Jews numbering 7,400, and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romanshe (in the Grisons), 1½ per cent. The most important cities are Zürich, pop. (1896) 147,877, Geneva, 80,778, and Basle, 88,853. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along the whole of its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c.; clocks and watches have long been the staple products of Geneva and Neuchâtel, while leather, gloves, pottery, tobacco, and snuff, cheese, &c., are made. Being an inland country, the direct trade with the United Kingdom is comparatively small. In 1894 there were 2,407 miles of railway in working order, and 4,693 miles of telegraph.

The military establishment on a war footing, including Landwehr, consists of 209,603 men—staff 1,025, infantry 160,966, cavalry 6,048, artillery 29,597, engineers 7,357, others 4,600. To this number must be added the Landstorm, or final reserve, of 276,161 more.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 147 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of £540; the Vice-President and other members of the Federal Council £480 each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council.

TIBET (see p. 472).

TONGA ISLANDS (FRIENDLY ISLANDS).

King, Jioaji Tubou II., b. 18 June, 1874.

A group of islands in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and 17,500 inhabitants. The limits of the kingdom are between 15° and 23° 30' south, and 173° and 177° west, and it is composed of three groups of islands, called Tongatabu, Haapai, and Vavau. At the former is the seat of government. Soil generally is fertile; the principal exports are copra, green fruit, kava, and whale oil. Most of the imports come from British ports, whilst the majority of the export trade is shipped in foreign bottoms.

Total imports, 1895 £87,240

Total exports, 1895 113,240

Imports from British Possessions, 1895... 79,119

Exports to do. do. 1895... 23,349

H. M. Deputy Commissioner and Vice-Consul,

R. B. Leefe.

TONQUIN (see p. 472).

TRANSVAAL, OR S. AFRICAN REPUBLIC.

(See also p. 603.)

President of the Republic and Chairman of the "Uitvoerend Raad" (Executive), Stephanus J. Paul Krüger, b. 10 Oct., 1825, re-elected April, 1893, for five years.

Vice-President, General P. J. Joubert.

Chairman of 1st Volksraad, F. G. Wolmarans.

Do. and do. S. Malherbe.

Secretary of State, Dr. W. J. Leyds.

Consul-General in England, Montagu White,

Amberley House, Norfolk Street, Strand.

Vice-Consul, Baron A. Quarles de Quarles.

The larger portion of the South African Republic lies to the west of the Drakenberge (Mt. Mauch 8,725 feet) and slopes down to the Limpopo river and Bechuanaland; a smaller section lies to the east of that range towards the Indian Ocean. The Republic is shut in by British territory on all sides, except along the greater part of its eastern frontier, where it is closed in by Portuguese territory from having direct access to the sea. The area (including Swaziland, 5,560 sq. m.) amounts to 119,200 sq. miles; the population probably exceeds 750,000, of whom only 150,000 are whites. The latter include 63,000 Transvaal Boers and 87,000 Uitlanders, 80 per cent. of whom are probably British subjects. In 1896, 451,801 natives paid the hut-tax.

Steppes and bush predominate and favour pastoral industries, whilst agriculture labours under many drawbacks. Gold, first discovered in 1871, constitutes the wealth of the country, coal and silver are also found, whilst iron ores and

other metals are known to exist. Railways connect the Republic with Delagoa Bay, Durban and the Cape; the total length open for traffic in 1896 was 890 miles, with about 200 miles under construction. Of the commerce 70 per cent. is with Cape Colony.

The legislative power is vested in a First Volksraad, elected by first class burghers, and a Second Volksraad, of no actual power, elected by the second class burghers. The privileges of First Class burghers are confined almost exclusively to white persons, who resided in the Republic prior to 1876, and their descendants. Naturalised aliens and their children enjoy the very restricted privileges of Second Class burghers, whilst the bulk of the white population are without political rights. The President is elected for 5 years by the First Class burghers.

The Transvaal or South African Republic was founded in 1840 by Boers who, dissatisfied with British rule, had migrated from Cape Colony, and its independence was recognised by the British Crown in 1852. In 1877, when Sekukuni had defeated the Boers, and it was feared that the whole of South Africa might become involved in a disastrous native war, Sir Theophilus Shepstone was despatched to the Transvaal. He found the public treasury empty, and the country in a state of anarchy; to save it from further disaster he proclaimed it British territory. Protests against this usurpation were unheeded, and on Dec. 16, 1880, at Heidelberg, the flag of the Republic was once more hoisted, and after the battle of Majuba Hill (Feb. 27, 1881) Britain once more recognised its independence. By the convention of Feb. 27, 1884, it remains merely retains the power of vetoing any treaty which the Republic may make with all foreign powers, except the Orange Free State. Swaziland was placed under the administration of the Republic in 1894, the rights of the natives (who retain their King) being safeguarded. Dr. Jameson's invasion of the Republic, in support of an expected rising of a portion of the foreign population at Johannesburg, speedily came to an end with the surrender of the invaders on January 1, 1896.

The chief towns are Johannesburg, population (1896), 102,714, of whom 51,225 are Whites, 44,396 Kaffirs, and 7,063 half-breeds; Pretoria, 12,000; Potchefstroom, 4,000; and Klerksdorp, 2,500.

Of the total revenue the *Times* estimates that seveninths are contributed by the Uitlanders. The war expenditure amounted to £943,510 in 1896-7.

Public revenue, 1893, £1,702,688; 1897-8 £4,886,499

Public expenditure, 1897-8 4,702,028

Public debt, 1895 (excl. Rail. guar.) ... 2,704,351

Imports, 1895 14,088,130

Exports, 1895, about 9,000,000

Gold output, 1896 8,603,821

TRIPOLI.

Governor-Gen., Namyk Bey, appointed June, 1896.

A Vilayet, or province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the States of Barbary, comprises the four sub-provinces or Mutesarrifiaks of Tripoli,

Khoms, Jabel and Fezzan. It has an area of 399,000 square miles, and a population of 1,000,000, but this is uncertain. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. The military force of the country now numbers about 10,000 men. The revenue is chiefly raised by a poll-tax, regulated according to the wealth of each individual, and by tithes. Principal articles of import: metals, British and other European manufactures, tea, beads, wines and spirits, besides a number of articles for barter in Wadai, Bornu, and the Soudan, whither caravans proceed regularly from Tripoli. The principal articles of export are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle and horses. Benghazi, which formerly was part of the vilayet, was placed, in 1875, for administrative purposes, directly under Constantinople, and now forms a separate and independent Mutessarifik. The ancient ruins in Cyrenica, i.e., at Cyrene, Ptolemais, and Apollonia are interesting to explorers as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the capital. The town of Benghazi has a population of about 15,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests.

Total imports, 1896 £360,000
 Total exports, 1895 375,250
 Imports from United Kingdom, 1896 73,889
 Exports to United Kingdom, 1896 229,982
 CAPITAL, Tripoli. Population, about 30,000.

TUNIS.

(*French Protectorate*; see p. 603).

Bey, H. H. Sidi Ali Pasha; born 1817; suc. 28 October, 1882.

Heir Presumptive, his brother, Taib Bey, born 1821.
French Resident General, M. Millet (14th Nov. 1894).

The Regency of Tunis, formerly a tributary dependency of the Ottoman Empire, may now be considered an informally annexed dependency of France, nominally under the dominion of the Bey, but in reality under the control of a French Resident. By treaty, 12 May, 1881, "the occupation is to cease when the French and Tunisian authorities recognize by common accord that the local government is capable of maintaining order." By a convention signed 10 July, 1882, France administers the country and collects the taxes in the name of the Bey, who is granted a civil list of £37,500, and the princes a sum of £30,000. It is in the north of Africa, situated on the Mediterranean, east of Algeria, between lat. 32° 20'—37° 25' N. and long. 7° 40'—11° 15' E. It comprises an area of 44,920 square miles, and has about 1,500,000 inhabitants, of which there are about 25,000 Europeans.

The chief town, Tunis, is the largest and most commercial city of Barbary, with a population of 145,000, of whom 45,000 are Jews and 28,000 Christians (8,000 Italians, 7,000 Maltese, and 3,000 French). It possesses considerable manufactures of silk and woollen stuffs, shawls, carpets, man-

ties, fez caps, berouses, also otto of roses and jessamin. The chief exports are grain, oil, wool, and esparto grass. N.E. of Tunis is the site of the ancient city of Carthage. There are 258 miles of railway and 1,245 of telegraph.

Revenue, 1894 £1,023,899
 Expenditure, 1894 869,459

Councillor of Embassy, Hamid Bey.

1st Sec., Phédon Enotiadis Bey.

2nd do., Faïd Ibrahim Bey.

Consul-General, Emin Effendi Férdjullah, 7 Union Court, Old Broad Street, E.C.

This Empire (about which so little good has been said lately owing to the disturbances in Armenia, see p. 591, and throughout the dominions, which from the decadent state of internal machinery, have been allowed to go on unchecked or perhaps encouraged, consists of the following districts:—

I. **TURKEY IN EUROPE**, formerly very extensive, is now reduced to 66,500 square miles, with a population of 4,668,000. (This, however, does not include Bulgaria, Eastern Roumelia, and Bosnia, which jointly have an area of 58,739 square miles, and a population of 4,320,110.) The total population includes about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,000,000 are Mohammedans. A great part of the surface is covered with mountains of moderate elevation. Since the Balkans no longer lie within the limits of the empire (although Turkey is entitled to occupy their passes in case of war), the loftiest moun-

tains are those of the Rhodope or Despoto Dagh (7,454 ft.) in the east, and the mountain-ranges of Albania in the west. To the latter belongs the Skhar Dagh (10,007 ft.), the culminating point of the whole Balkan peninsula. Rivers are numerous, the principal of which are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, cotton, barley, millet, sesame and other oil-seeds, and tobacco; the natural products are the pine, beech, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing works. In Europe, 838 miles of railway are being worked, and 1,136 in Asia, and about 1,000 miles are being constructed in Europe and Asia.

II. TURKEY IN ASIA, the larger of the two divisions, comprises Asia Minor, Syria, including Palestine, the greater part of Armenia (where the recent massacres and reprisals originated), and Kurdistan, Mesopotamia (the valley of the Euphrates and Tigris), and the western portion of Arabia, bordering the Red Sea, with the district of El Hassa on the eastern side of the Persian Gulf, having a total area of 680,000 square miles, and an estimated population of 16,333,000 inhabitants. To this number must be added the autonomous island of Samos (180 sq. miles, pop. 40,513), and Cyprus (see p. 526), which pays an annual tribute. Of the total population about 6,800,000 are Turks, 5,300,000 Syrians and Arabs, 1,000,000 Greeks, and 12,000,000 Mohammedans.

In AFRICA, Turkey rules Tripoli and Barka (399,000 sq. miles, pop. 1,010,000), and levies a heavy tribute upon Egypt.

Nominally, therefore, the Turkish Empire has an area of 1,710,000 square miles, with about 39,500,000 inhabitants, but of the vast territories only 1,145,500 square miles, with 22,011,000 inhabitants, are under the direct rule of the Turks, the rest paying a tribute or merely acknowledging the suzerainty of the Porte.

It was arranged by the Berlin treaty that Bulgaria, Servia, Montenegro, and Greece should take upon themselves a portion of the Turkish debt, but little appears to have been received from these emancipated or aggrandized States. The tribute from Eastern Roumelia, fixed by Organic Statute at £218,180, but since reduced to £138,200, is, as a rule, punctually paid by the Bulgarian Government.

The TURKISH ARMY on a peace footing numbers (actually) 10,000 officers and 170,000 non-commissioned officers and men, and is composed of 292 battalions of infantry, 202 squadrons of cavalry, 165 field batteries, 46 mountain batteries, 15 horse batteries, 31 companies of engineers, and 1,338 guns, besides 132 companies of Garrison artillery. These are formed into seven army corps, with headquarters at Constantinople, Adrianople, Monastir, Erzeroum, Damascus, Baghdad, and Sana (Turkish Arabia), an independent division at Tripoli,

another in the Hedjaz, and a brigade in Crete. In time of war these can be supplemented by twelve army corps of redifs, and an indefinite quantity of *mustahfs*. It is also proposed to form 100 regiments of local militia (Hamidieh cavalry) of which 60 are already enrolled, and in case of emergency it is probable that over 1,000,000 men of all categories could be called to arms.

The NAVY consists of 102 steamers (including 18 ironclads) and 25 torpedo-boats, with a total peacetime strength of about 15,000 men.

The commercial marine of Turkey consists of 106 steamers, £1,204 tons, and 169 sailing vessels 44,471 tons (Oct. 14, 1897.)

Commerce.—The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank.

The principal imports to the United Kingdom in 1896 were:—

Corn	£2,827,791	Gum	£137,509
Dye-stuffs	308,007	Opium	182,360
Fruit: Fig	179,157	Seeds	195,289
Dried	158,373	Straw	100,639
Raisins ..	493,395	Wool & Woollens	1,016,978

and the chief articles sent by this country to Turkey in 1896 were:—

Coal	£234,570	Metals: Iron	£127,227
Cotton yarn	599,471	Copper	92,741
Cottons	3,212,844	Woollens	253,832
Machinery	64,792		

Finance.—Sir Edgar Vincent's report of December, 1896, estimates an annual deficit of £1,253,070, but points out certain reforms by which this can be avoided. The total amount of the loans negotiated since the year 1854, and still outstanding, is £131,500,000, and additional debts bringing the total to £163,050,000 (Russian war indemnity outstanding £31,225,000, out of a total 32,100,000 originally owed; indemnity to Russian subjects £50,000 out of a total of £318,180, and £275,000 due to the Damascus Railway).

Revenue, 1897-98 (estimated)	£16,050,370
Expenditure, 1897-98	16,578,360
Turkish Debt (Loans), 1896	131,500,000
Indemnities owed, 1896	31,550,000
Total Imports, 1891-92	22,321,763
Total Exports, 1891-92	13,972,773
Imports from United Kingdom, 1896 ..	5,249,875
Exports to United Kingdom, 1896	5,230,075

A Federal Republic, consisting of 45 partially	
independent States, 5 organized and 1 un-	
organized Territory, occupies the central portion	
of North America, between the Atlantic and	
Pacific Oceans, in lat. 25°-49° N. and long. 67°	
-124° 30' W. The area is estimated at 3,581,885	
square miles, of which rivers and lakes cover	
38,400 square miles. This area includes the vast	
district of Alaska, in the extreme north-west of	
the continent, purchased from Russia, 18th October,	
1867, comprising 577,390 square miles. About one-	
third of the country is estimated to be in a state of	
cultivation. The population of the whole of the	
States and Territories, according to the Census of	
1890, was 62,622,250. In 1892 the Indians on	
reservation numbered 133,382; off reservation:	
115,891 (not including 58,806 civilized Indians),	
Chinese, 107,475; Japanese, 2,039; and Alaska	
31,795 (23,274 Indians); in addition to which	
figures no official data will be given before the	
census of 1900. Every country under Heaven is	
represented. The increase in the ten years, 1880-	
1890, was 12,466,467.	
Its coast-line on both oceans is reckoned to have	
a length of about 13,200 miles, excluding the	
numerous bays and sounds, besides 3,620 miles	
on the great lakes. The principal river is the	

mighty Mississippi-Missouri, formed by the confluence of these two noble streams, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,357,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward, the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt, and lead, which in Missouri, Colorado, and Idaho appear inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in

The financial condition of the United States of America exerts a great influence on that of other nations. The extensive trade transacted by the Union with all parts of the world necessarily reacts on the exchanges of the countries with which business is engaged in. The following is a statement of the debt on the 1st October, 1896:—

Two per cent. bonds.....	\$25,364,500
Four per cent. bonds and certificates.....	721,999,760
Five per cent. bonds.....	100,000,000
Pacific Railway Bonds, at 6 per cent.....	64,623,512
Debt on which interest has ceased since maturity.....	1,621,790
Debt bearing no interest.....	372,471,636
Certificates and Treasury notes, offset by cash.....	564,524,323

Total debt.....	1,850,605,581
Less cash and reserve in Treasury.....	805,678,778

Actual indebtedness.....\$1,044,926,743

On Oct. 1, 1895, the actual indebtedness was \$985,713,148.

The total decrease in the debt since August 31, 1865, when, after deducting the cash in the treasury, it amounted to \$2,756,431,571, to Oct. 1, 1896, has been \$1,711,504,828.

Balance Sheet for Year ending June 30, 1896.

RECEIPTS.

Customs.....	\$160,021,752
Internal revenue.....	145,762,885
Miscellaneous sources.....	20,191,583

\$325,976,200

EXPENDITURE.

Civil service and miscellaneous.....	\$87,216,235
War department.....	50,830,921
Navy department.....	27,147,732
Indians.....	14,165,588
Pensions.....	139,434,001
Interest on public debt.....	35,385,029
For the sinking fund.....	5,333,350

\$357,512,796

The total income for the previous year was \$313,390,075, and the expenditure, including sinking fund, \$357,331,664.

The NAVY of the United States on the 1st November, 1896, consisted of 5 battleships; 2 armoured, 13 protected, and 10 unprotected cruisers, 19 coast defence, 2 torpedo vessels, and 3 torpedo boats, with 6 battleships and 19 torpedo boats building. Enlisted men (active list), 11,000; commissioned officers (active list), 1,243; warrant officers (active list), 206.

Marine Corps.—Commis. officers (active list), 76; privates & non-comm. officers (do.), 2,600.

The ARMY (June 30, 1896) consists of 2,169 officers and 24,869 enlisted men.

The Government of the United States is, by the Constitution, intrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the legislature thereof directs, a number of electors, equal to the whole number of Senators and representatives to which the State may be entitled in the Congress; but no Senator or representative, or any one holding office under Government shall be appointed an elector. The Electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex-officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, and others, so that the State can never be without a Head or Ruler.

AREA AND POPULATION OF EACH STATE AND TERRITORY IN THE UNITED STATES, AND DATE OF ADMISSION OF NEW STATES INTO THE UNION.

States and Territories.	Date of Act of admission.	Area.	Population 1890. White and Coloured.

Total		3,025,600	62,630,250

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population, at present 1 for 173,901. The Senate consists of 90 members, and the House of Representatives, 1896, of 357 representatives and territorial delegates.

The Supreme Judicial Authority is vested in a Chief Justice and eight Justices, who are appointed by the President by and with the advice and consent of the Senate, to hold their offices during good behaviour.

Our trade with the United States is to that country of the most satisfactory kind, as nearly all the goods received from there are of native growth or manufacture. England is her best customer. The chief articles received from the U.S. in the year 1896 were:—

Animals, living	£7,674,381	Fruit	£927,421
Bees and hams	6,825,322	Iron & steel mfrs.	1,799,017
Beef (fresh)	4,216,247	Lard	222,639
Cheese	1,234,637	Leather	2,900,471
Copper, &c.	2,250,043	Meat (fresh and salt)	804,626
Corn, wheat	9,704,950	Oil, &c.	979,599
Barley	906,980	Oil seed cake	833,390
Oats	1,051,702	Paraffin	600,334
Pease	114,101	Petroleum	2,984,304
Oatmeal	274,367	Skins and furs	580,583
Maizemeal	122,989	Sugar	777,031
Maize	5,053,304	Tallow & Stearine	397,491
Wheatmeal & flour	6,786,600	Tobacco	3,412,754
Cotton	27,965,225	Wood, all kinds	2,806,377
Fish	739,841		

And the chief items imported from the United Kingdom in the year 1896 were the following:—

Alkali	£495,912	Glass manufactures	£106,151
Apparel	105,928	Hardware, &c.	153,866
Bleaching materials	257,735	Jute	1,103,202
Books	313,026	Linen	5,524,635
Cement	135,026	Machinery	541,503
Chemical products	524,939	Metals, all kinds	2,146,046
Coal, &c.	186,059	Materials for paper	200,702
Cotton manufactures	2,360,129	Salt	97,939
Earthen and china ware	722,154	Silk and manufactures	304,937
Fish	222,201	Skins and furs	530,801
Flax & Hemp	106,133	Wool and yarn	577,611
		Woolen manufactures	3,716,863

POSTAL.—The number of Post Offices in the United States, June 30, 1896, was 70,360. The postal revenue was \$82,499,208. The number of inland money orders issued was 23,962,053, and the amount \$172,100,649'02.

Of international money orders the number issued was 925,799, and the value \$13,852,615'74.

RAILWAYS.—The total mileage of railways in the U. S. on June 30, 1895, was 180,657'47, being an increase during the year of 1,948'92 miles.

MERCANTILE MARINE.—On July 1, 1896, it consisted of 22,908 vessels, of which 6,595 were steamers, and 16,313 other than steamers.

MINES.—In 1893 the U.S. produced 60,000,000 ounces of silver, as follows:—

Arizona	2,925,700	Nevada	1,561,300
California	470,100	New Mexico	459,400
Colorado	25,838,600	Utah	7,196,300
Idaho	3,919,600	All other States	674,000
Montana	16,945,000		

The total imports and domestic exports, and Imports and Exports, to and from the U. K., for the year ending June 30, 1896, were as follows:—
 Total imports (merchandise) \$779,724,674
 Total domestic exports 863,200,487
 Imports from United Kingdom (1896) 169,963,434
 Domestic Exports to U. K. (1896) 401,145,205

COMMERCE OF THE UNITED STATES.

Merchandise only, 1792 to 1896.

YEAR.	EXPORTS.	IMPORTS.	TOTAL.

URUGUAY.

President, Don Juan Lindolfo Questas, acting President until March 1, 1898.

Minister of Foreign Affairs, Dr. Mariano Ferreira.

Interior, Dr. Edward MacEachen.

War and Marine, General Diaz.

Finance, Juan Campisteguy.

Education and Public Works, Jacob Varela.

Minister Plenipotentiary and Envoy Extraordinary, Dr. Alberto Nin.

Secretary of Legation, Dr. Alfonso S. de Zumaran.

Consul-Gen., Col. E. C. Abella, 83 Victoria St.

A Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W., containing an area of 72,172 square miles, and an estimated population of 787,053 (1894); was formerly a dependency of Spain. United to the Argentine Confederation early in the present century, it was afterwards annexed by Portugal, and became later a province of Brazil; but through the bravery of the patriotic "thirty-three" it succeeded in throwing off the Brazilian yoke, declared its independence 25th of August, 1825. A war in consequence en-

suing between Brazil and the Argentine Confederation, both the Powers agreed, through the mediation of Great Britain, to recognize Uruguay as a sovereign and independent State. The imports from the U. K. are numerous, the principal being woollen and cotton goods, hardware, and coals. The chief exports are wool, hides, horn, hair, tallow, and jerked beef. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (5,205,272 in 1895), and sheep (12,820,736 in 1895), the wool of which is of excellent quality. Gold mines exist at Cuñapird. The principal river is the Uruguay and its affluents, of which the Rio Negro is the chief. There are 1,002 miles of railway open, and 4,025 miles of telegraph in 1891. Revenue, 1893-94, £3,271,700; Expenditure, £2,765,957; Public debt, 1893, £25,047,598; Brazilian, £744,680; Total imports, 1895, £5,491,200; Exports, £6,924,180; Imports from United Kingdom, 1895, £1,475,492; Exports to United Kingdom, 1895, 316,109

1889	28,269	168,771	28,294	28,461	253,795
1890	22,520	152,413	21,179	23,004	218,116
1891	21,578	156,395	19,547	20,987	218,507
1892	23,254	150,339	15,950	20,799	210,342
1893	24,732	148,949	11,203	23,300	208,814
1894	17,459	104,001	10,917	23,593	155,030
1895	16,622	126,502	10,567	31,450	185,181
1896	15,267	98,921	10,354	37,383	161,925

The total amount of the year's Trade for 1896 was £738,188,118, against £702,522,065 for the year preceding, and £748,944,115 in 1890, which was the largest amount ever known. The Exports of British produce amounted to £240,145,551, our chief customers being the United States for £24,424,225, France £15,015,722, Holland, &c., £10,559,361, Germany £22,328,270, Belgium £7,816,152. India imports to the value of £30,097,768, Australasia £21,915,555 (an increase of more than £4,500,000), British North America £5,755,726, while the British West Indies now accounts for £2,122,189.

The total Imports in 1881 amounted to £117s. 4d. per head of the population, and in 1896 to £11 3s. 11½d., the total Domestic Exports for the same years being £6 14s. 0d. and £7 10s. 3d.

Imports by Parcel Post in 1896 were £1,012,357, and the Exports £1,659,669, a total increase of £331,738.

The following is a summary of the business done during the year. In the case of both imports and exports there is a considerable increase.

The totals for the years 1895-96 were:—

Total Imports (1895)	£416,689,658
" " (1896)	441,808,904

Increase in 1896	£25,119,246
------------------	-------------

Total Exports (1895)	£285,832,407
" " (1896)	296,379,214

Increase in 1896	£10,546,807
------------------	-------------

Putting exports and Imports together, the total Foreign Trade of the United Kingdom was:—

Total Imports and Exports (1895)	£702,522,065
" " (1896)	738,188,118

An increase in 1896 of	£35,666,053
------------------------	-------------

The total value of the Trade carried on with the following countries in 1895 and 1896 is thus stated:—

Total Imports.

FOREIGN.	1895.	1896.
Africa, Western	£52,123	£41,051
America, Central	976,014	949,354
America, United States of	86,548,860	106,347,349

Food supplied from Abroad.

THE United Kingdom obtains from abroad immense supplies of food auxiliary to those produced at home. The following tables shew the quantities and values of the principal articles of such food imported therein in each of the twelve years from 1885 to 1896, distinguishing the imports from foreign countries from the imports from Greater Britain—i.e., British Possessions abroad. Rice, maize, sago, &c., not being grown in the United Kingdom, are not comprised within the term "auxiliary."

WHEAT.

YEAR.	From Foreign Countries.		From Greater Britain.

1896	64,288,640	19,959,445	5,737,340	1,719,544

The principal foreign places to which Great Britain is indebted for wheat are the United

States and Russia, and the principal British possessions, as Canada. In the year 1896 the quantities imported therefrom were, in round figures, as follows:—United States, 30,700,000 cwt.; Russia, 17,200,000 cwt.; Canada, 3,600,000 cwt. In 1895 the average value of wheat imported from foreign countries was 6s. 2d. per cwt., and from Greater Britain 6s. per cwt., as compared with 7s. 10d. and 7s. 9d. respectively in 1885.

OTHER CEREALS.

(VIZ.:—BARLEY, OATS, RYE, PEASE, AND BEANS.)

YEAR.	From Foreign Countries.		From Greater Britain.

1895	3,411,898	15,217,963	353,932	1,584,437
1896	3,654,174	16,408,951	309,478	1,433,838

In the year 1896 the quantity of butter imported from foreign countries was 2,728,269 cwt., with a value of £13,910,614, nearly one half of which was imported from Denmark; in the same year the quantity imported from Greater Britain was 309,449 cwt., with a value of £1,443,750. Practically the whole of the margarine imported comes from foreign countries: in the year 1896, 925,905 cwt. were imported from those countries, and of this 861,887 cwt. came from Holland. The average value of the butter imported in that year from foreign countries was £5 2s. per cwt., and from Greater Britain £4 13s. per cwt. The average value of the margarine imported was £2 14s. per cwt.

CHEESE.

1896	953,818	2,193,202	1,291,128	2,707,858

In the year 1896, of the cheese imported from "Foreign Countries," 581,187 cwt., valued at £1,234,037, were imported from the United States, and 293,106 cwt., valued at £734,975, from Holland; of that imported from "Greater Britain," 1,234,500 cwt., valued at £2,589,655, came from Canada. The average value of the cheese imported in that year from foreign countries was £2 6s. per cwt., and from Greater Britain £2 2s. per cwt., as compared with £2 6s. and £2 1s. respectively in 1885. This is one of the few articles included in the tables where the supply from Greater Britain in recent years exceeds that from foreign countries.

EGGS.

YEAR.	From Foreign Countries.		From Greater Britain.

1896	1,526,131,560	3,997,303	63,269,760	187,353

The principal foreign countries from which eggs were imported in 1896 were France, Germany, Russia, Belgium, and Denmark, the number and value of the eggs imported from those countries in that year being as follows:—France, 393,093,120, valued at £1,273,200; Germany, 351,658,320, valued at £782,121; Russia, 288,740,160, valued at £639,952; Belgium, 269,269,080, valued at £644,322; Denmark, 187,904,760, valued at £522,985. Nearly 95 per cent. of the eggs imported from Greater Britain in that year came from Canada. The average value of the eggs imported in 1896 from foreign countries was about 7½d. per dozen, and from Greater Britain about 8½d. per dozen, as compared with 8½d. and 10d. respectively in 1885.

LARD.

YEAR.	From Foreign Countries.		From Greater Britain.

1892	4,781,161	10,159,423	353,349	734,410
1893	3,935,721	10,702,676	251,577	667,391
1894	4,513,953	10,201,990	395,435	653,725
1895	5,000,454	10,133,543	352,482	690,454
1896	5,382,623	9,929,033	626,315	1,061,571

In the year 1896 4,092,512 cwt. of bacon valued at £7,158,426 were imported from foreign countries, of which about 67 per cent. came from the United States, and about 30 per cent. from Denmark; and 1,290,111 cwt. of hams valued at £2,770,607 were imported from foreign countries, nearly the whole of which came from the United States. In the same year 457,014 cwt. of bacon valued at £696,089, and 169,301 cwt. of hams valued at £305,482 were imported from Greater Britain, practically the whole of which came from Canada. The average value of the bacon imported in 1896 from foreign countries was £1 14s. 11d. per cwt., and from Greater Britain £1 10s. 5d. per cwt.; the average value of the hams imported from foreign countries in that year was £2 2s. 11d. per cwt., and from Greater Britain £2 3s. 2d. per cwt.

BEEF (FRESH).

1887	647,600	1,461,497	8,594	16,696
1888	795,212	1,832,884	41,447	86,422
1889	1,285,601	2,843,782	100,151	185,372
1890	1,716,761	3,670,770	137,832	252,245
1891	1,771,113	3,793,319	149,398	245,176
1892	1,960,850	4,222,674	118,787	190,474
1893	1,582,285	3,477,840	225,766	352,756
1894	1,799,417	3,773,830	304,687	439,858
1895	1,680,732	3,496,738	510,305	778,810
1896	2,126,813	4,289,942	532,887	738,886

In the year 1896 nearly the whole of the fresh beef imported from foreign countries came from the United States, and nearly the whole of that imported from Greater Britain came from Australia and New Zealand, the quantities therefrom being as follows:—United States, 2,074,644 cwt. valued at £4,216,247; Australia, 494,975 cwt. valued at £678,971; and New Zealand, 28,803 cwt. valued at £41,804. The average value of the fresh beef imported from foreign countries in 1896 was £2 0s. 4d. per cwt., and from Greater Britain £1 7s. 9d. per cwt., as compared with £2 11s. 11d. and £2 11s. 11d. respectively in 1885.

MUTTON (FRESH).

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Cwt.	£	Cwt.	£
1885	234,762	648,507	338,106	837,810
1886	251,124	522,766	402,323	882,617
1887	321,500	607,753	461,614	964,976
1888	444,866	835,263	543,144	1,104,212
1889	614,447	1,287,423	610,611	1,287,973
1890	753,813	1,613,358	902,606	1,834,418
1891	588,756	1,157,548	1,074,238	2,124,453
1892	712,386	1,449,895	987,580	1,997,207
1893	774,642	1,555,983	1,196,858	2,317,880
1894	849,141	1,556,725	1,445,925	2,784,502
1895	928,867	1,476,640	1,682,568	3,119,038
1896	1,042,008	1,613,220	1,853,150	3,105,326

In the year 1896 nearly the whole of the fresh mutton imported from foreign countries came from the Argentine Republic and Holland, and practically the whole of that from Greater Britain came from Australia and New Zealand, the quantities therefrom being as follows:—Argentine Republic, 801,733 cwt. valued at £1,071,891; Holland, 229,283 cwt. valued at £515,864; Australia, 774,020 cwt. valued at £1,175,327; and New Zealand, 1,079,109 cwt. valued at £1,929,956. The average value of the fresh mutton imported in 1896 from foreign countries was £1 11s. 6d. per cwt., and from Greater Britain £1 13s. 6d. per cwt., as compared with £2 14s. 3d. and £2 9s. 6d. respectively in 1885. It will be noticed that the supply of fresh mutton from Greater Britain exceeds that from foreign countries.

PORK (FRESH).

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Cwt.	£	Cwt.	£
1885	70,448	184,801	60	151
1886	80,994	200,266	11	27
1887	151,319	373,484	45	117
1888	243,814	559,542	28	71
1889	117,347	287,371	121	323
1890	45,217	109,700	32	64
1891	127,429	302,567	89	158
1892	131,978	309,909	129	256
1893	181,860	455,097	231	447
1894	179,796	435,359	587	1,187
1895	287,694	665,597	590	1,249
1896	298,771	686,014	640	1,227

Pork is not an article of large import, and nearly the whole of that imported comes from foreign countries. In the year 1896, 244,344 cwt. of fresh pork, with a value of £555,527, came from Holland alone. The average value of fresh pork imported in that year was £2 5s. 11d. per cwt., as compared with £2 12s. 6d. in 1885.

OTHER MEAT (SALTED, PRESERVED, &C.).

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Cwt.	£	Cwt.	£
1885	885,039	2,057,622	222,539	529,744

1887	793,494	1,592,329	262,098	593,667
1888	860,112	1,762,651	211,658	445,448
1889	1,110,137	2,232,994	146,130	336,913
1890	1,206,470	2,511,585	161,802	385,340
1891	1,212,426	2,444,357	151,749	351,556
1892	1,269,713	2,599,590	184,109	391,970
1893	964,176	2,095,547	191,548	418,150
1894	956,948	2,034,594	254,505	545,402
1895	1,065,190	2,184,474	468,555	902,522
1896	1,096,755	2,150,807	387,260	774,430

Under the head of other meat are included salt beef and pork, beef and mutton preserved otherwise than by salting, and any meat not included in any other table. The following table shows some of the imports included above for the year 1896:—

	From Foreign Countries.		From Greater Britain.	
	Quantity	Value.	Quantity	Value.
	Cwt.	£	Cwt.	£
Salt Beef	241,487	295,685	6,049	8,015
Salt Pork	238,696	272,675	16,643	19,291
Beef preserved otherwise than by salting	233,288	660,901	168,673	393,053
Mutton do.....	6,551	10,932	116,000	190,910

The bulk of the salt beef and pork came from the United States, and most of the preserved mutton came from Australia and New Zealand.

OXEN AND BULLS.

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Nos.	£	Nos.	£

1896	685,295	1,006,666	84,297	126,968

In the year 1896 upwards of 266,700 sheep and lambs came from the United States, 339,300 from the Argentine Republic, and 83,700 from Canada; the average value in that year from foreign countries was £1 9s. 5d. each, and from Greater Britain £1 10s. 1d. each, as compared with £2 3s. 2d. and £2 0s. 4d. respectively in 1885.

APPLES (RAW).

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£
1885	2,086,696	623,319	300,989	93,712
1886	2,749,908	715,323	511,552	141,772
1887	1,539,362	436,015	405,098	127,904
1888	2,876,510	753,767	920,082	276,393
1889	2,879,565	756,019	732,750	218,366
1890	1,855,257	536,701	719,700	249,371
1891	2,057,691	636,644	1,089,682	397,353
1892	3,041,913	875,630	1,474,778	478,182
1893	2,805,079	615,657	654,905	227,875

1895	2,111,752	594,544	1,180,510	365,729
1896	3,362,653	851,566	2,814,303	730,929

In the year 1896 about 78 per cent. of the apples imported from foreign countries came from the United States, and about 94 per cent. of those from Greater Britain came from Canada. The average value of the apples imported from foreign countries in that year was 5s. 1d. per bushel, and from Greater Britain, 5s. 2d. per bushel, as compared with 6s. and 6s. 3d. in 1885.

ONIONS (RAW).

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.

1896	6,014,738	673,494	72,167	8,455

In the year 1896 upwards of 1,811,000 bushels of raw onions were imported from Spain, 1,581,000 bushels from Holland, and 1,094,000 bushels from Egypt. The average value of raw onions imported from foreign countries in that year was 2s. 3d. per bushel, and from Greater Britain 2s. 4d. per bushel, as compared with 2s. 9d. and 3s. 6d. in 1885.

POTATOES.

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Cwt.	£	Cwt.	£
1885	1,237,224	281,840	1,062,710	445,966
1886	1,361,289	309,600	1,346,600	489,665
1887	1,655,428	417,855	1,107,299	557,049
1888	954,934	259,840	1,428,873	542,194
1889	662,677	206,061	1,201,749	529,978
1890	752,017	223,674	1,188,083	490,583
1891	1,860,295	554,219	1,332,541	642,605
1892	1,670,377	389,428	1,337,959	560,904
1893	1,632,697	356,447	1,195,422	550,505
1894	1,540,482	477,465	1,163,321	552,626
1895	2,731,096	671,005	1,026,160	498,917
1896	957,869	326,887	1,286,758	581,088

In the year 1896 of the potatoes imported from foreign countries 751,896 cwt. valued at £239,579 came from France, and 100,991 cwt. valued at £56,223 from the Canary Islands, and nearly the whole of those imported from Greater Britain came from the Channel Islands. The average value of the potatoes imported in 1896 from foreign countries was 6s. 10d. per cwt., and from Greater Britain, 9s. per cwt., as compared with 4s. 7d. and 8s. 5d. in 1885. It will be observed that in several of the years included in the table the quantity of potatoes imported from Greater Britain exceeds that imported from foreign countries.

FISH.

YEAR.	From Foreign Countries.		From Greater Britain.	
	Quantity.	Value.	Quantity.	Value.
	Cwt.	£	Cwt.	£
1885	1,228,547	1,609,109	292,023	385,505
1886	1,428,771	1,765,053	250,426	393,270
1887	1,416,066	1,648,404	188,601	384,019
1888	1,707,236	1,948,134	200,408	376,231
1889	1,790,858	2,209,943	197,171	378,680
1890	2,034,250	2,221,947	261,724	599,590
1891	2,091,208	2,213,519	261,162	596,430
1892	2,290,681	2,218,604	259,936	541,396
1893	2,088,639	2,178,993	231,199	503,758
1894	2,203,649	1,869,528	352,328	777,552
1895	2,101,292	2,231,981	357,351	746,490
1896	2,291,294	2,423,855	330,738	789,228

In the year 1896, out of a total of 773,591 cwt. of fresh herrings imported (all from foreign countries), 762,820 cwt., with a value of £116,645, came from Sweden and Norway; out of a total of 216,052 cwt. of oysters imported, 151,282 cwt., with a value of £100,924, came from the United States, and 55,089 cwt., with a value of £116,792, came from France; out of a total of 175,723 cwt. of sardines imported, 174,569 cwt., with a value of £516,608, came from foreign countries. Of the other kinds of fish included in the table, 346,789 cwt., valued at £405,274, were imported from Norway; 271,115 cwt., valued at £637,303, from the United States; 266,012 cwt., valued at £250,295, from Holland; 184,491 cwt., valued at £119,964, from Denmark; and 236,424 cwt., valued at £649,296, from Canada.

In the case of several of the articles included in these tables, a small portion thereof is not retained for home consumption, but is re-exported, but in nearly every case it is a very small proportion of the total quantity imported.

Speaking generally, in the case of fresh mutton, cheese, potatoes, raw apples, meat not separately enumerated, fresh beef, and oxen and bulls, a considerable proportion of the total quantity imported in 1896 came from Greater Britain, the proportions therefrom being, fresh mutton, 64 per cent.; cheese, 57 per cent.; potatoes, 57 per cent.; raw apples, 46 per cent.; meat not separately enumerated, 26 per cent.; fresh beef, 20 per cent.; and oxen and bulls, 18 per cent. In no other case did the proportion from Greater Britain exceed 13 per cent. of the total quantity imported, and in most cases it was much lower.

The particulars below relate to a few articles of auxiliary food not included in the above comparative tables:—

Articles.	From Foreign Countries.		From Greater Britain.	
	Quantity imported in 1896.	Value.	Quantity imported in 1896.	Value.
	Cwts.	£	Cwts.	£
Oatmeal and Groats	441,690	275,986	113,060	54,980
Milk (Condensed, &c.)	610,603	1,169,126	732	1,226
Poultry and Game	693,976	...	11,502
Rabbits	117,138	321,903	53,735	79,709

LAST year we were able to record the happy return of Nansen, this year, alas! we can merely announce the departure of Dr. Andrée, who ascended in a small balloon on July 11, from Danes island, on the N.W. coast of Spitzbergen, in the fond hope that kindly breezes would waft him across the icy wastes of the Arctic, to some friendly port in Siberia or North America. He was accompanied by Dr. Strindberg and M. Fraenckel, and before making his perilous ascent shook hands with Capt. Sverdrup and the other officers of the *Svenkaund*, and expressed himself confidently as to the ultimate success of his venture. The balloon, when last seen, at 20 minutes to 3, seemed to be rapidly travelling to the N.N.E. The only authentic news since then was brought by a homing-pigeon picked up by the captain of the *Alken*. Its message read thus, 'July 13, noon, 82° 2' N., 15° 15' E. good passage E. 10° S. (?) All well! This my third pigeon-post. Andrée. Thus, in the course of two days, the progress made only amounted to 130 miles, and as the floating power of the balloon is likely to be exhausted in the course of eight days, the chance of it traversing the Arctic sea is a most remote one. Still, even should Andrée alight upon the ice, he may be able to get safely back to Spitzbergen. Indeed, it was thought that a reddish-brown object observed floating in the water off Prince Charles Foreland, on September 23, may have been the balloon, but a relief expedition, which left Tromsø on November 4 in the *Victoria*, has returned without any news from the explorer.

But if Andrée's balloon ascent is the sensational event of the season, the return of Mr. Jackson from Francis Joseph Land, after a stay there of three consecutive years, promises the richest harvest for science. The greater portion of this Arctic group of islands has been explored, with the aid of Mr. Armitage, Mr. Bruce, Mr. Fisher, Dr. Kottlitz, and other scientific specialists. The results of last season's exploration show that Gillis Land of some old maps has no existence, or rather that it is identical with Francis Joseph Land. The expenses of this expedition have been borne by Mr. Harmsworth.

Captain Robertson, of Dundee, discovered a few small islands to the south of Francis Joseph Land, and proved that the land supposed to have been discovered in 1874 by Captain Johannsen has no existence. Wyche's Land, which English map-makers will persist in calling after King Charles of Sweden or Würtemberg, has been circumnavigated by Mr. Arnold Pike and Sir Savile Crossley.

Perhaps of more immediate practical interest than the above expeditions are the efforts made by Admiral S. Makarov to render the navigation of Kara Sea more certain than it has been hitherto. In the course of last season eleven vessels succeeded in crossing this sea for the Ob or Yenisei. Captain Wiggins, who initiated this sea-route in 1874, was not of the party.

In Greenland a Danish expedition under Lieut. Petersen has been at work, and Mr. Peary has succeeded in bringing home a big meteorite, weighing 70 tons, from Cape York. This enterprising American has now made arrangements with the Eskimo for accompanying him next year, when he hopes to be able to complete the exploration of the coast of Greenland. Among other expeditions planned for next year, we may mention Sir M. Conway's proposed visit to Spitzbergen, and an attempt at the exploration of the coast of

Greenland to the south of Scoresby Land, which is to be made by Lieut. Amstrup.

Turning to the Antarctic regions we are glad to be able to announce that the Royal Geographical Society has taken upon itself to organize a well-founded expedition. In the meantime we must be content with such scanty information as can be gleaned in the course of a single summer season by the *Belgica*, commanded by Lieut. de Gerlache of the Belgium navy, or during a flying visit to South Shetland by Dr. O. Nordenkjöld.

In Asia the greatest results have been achieved by Dr. Sven Hedin, who has been exploring the centre of that continent since 1894. He reached Peking on March 14, and thence journeyed home by way of Urga and the Siberian Railway. His last exploit was an exploration of the Tibetan plateau to the south of Khotan, in the course of which he discovered mountains rising to a height of 24,000 feet, and 23 salt-water lakes. During the two months which he spent in this inhospitable region he did not meet with a single human being. The Danish travellers, Lieuts. Olufsen and Phillipsen have completed their exploration of the Pamirs, in the course of which they are reported to have discovered a tribe of dwarfs keeping domestic animals of diminutive proportions, when all they said was that the people of Wakhan were under middle height and their cattle of small size—all of which we knew before. The districts bordering upon Pamir in the west, and especially eastern Bokhara, have been visited by Colonel Kumetzof and by Dr. Korsynski, Director of the Botanical Gardens of St. Petersburg.

Another attempt to reach Lhasa, the capital of Tibet, has failed. Mr. H. Savage Landor, who crossed into Tibet in July last, was arrested by the Tibetan authorities, and only liberated through the good offices of the Peshkar of Garbyang, after he had been subjected to the most revolting tortures. It is to be hoped that this barbarous conduct on the part of a neighbouring country will meet with due punishment through the Indian authorities.

The wide domains of Russia have attracted both Russian and foreign explorers. That veteran alpinist, M. von Döbny, returned once more to his old love the Caucasus, and ascended the virgin peak of the Datakht Kort (13,820 feet), in the eastern part of that mountain range.

In Russian Turkistan a party of scientific men, headed by a son of the naturalist Fedchenko, so well known in connection with the earlier explorations of the Tien-Shan, has been examining the glacier region to the south of Aulie Ata. The other members of the party were Lidasky, Volarovich, and Arsenyef. Commercial interests have led to orders being given for a survey of the lower Yenisei, including the bay of the Ob, and of Lake Baikal, the latter by Lieut. Drizhenko, as also to the journey of M. Saint-Yves to Western Siberia.

Southern Arabia and the island of Sokotra were visited last winter by the late Mr. Theodore Bent (died May 5), chiefly for archaeological purposes.

To Major A. C. MacMahon we are indebted for an excellent map of the southern borderlands of Afghanistan—the result of boundary surveys. In Burma Lieut. Pottinger failed in reaching the source of the Irawadi, owing to the hostility of the Black Mairus. The new Anglo-Chinese frontiers in the north-east have been surveyed by an

international commission, of which Mr. Herbert Thirkell White is the British member. Siam has been explored in all directions by Mr. Warrington C. Smith. In March M. Jean de Neufville crossed the difficult mountain country separating Chieng Kuang from Luang Prabang, on the Mekong.

Two explorers have gone to the east on behalf of the French colonial office—namely, M. Raoul, who is to study the flora of Burma, Indo-China, and the Eastern Archipelago in search of commercially useful plants; and M. Chailley-Bert, to report on the colonial administration of the Duhl.

M. Bonin has returned to France after a remarkable journey through Western China, in the course of which he crossed a pass 10,000 feet in height, which separates the upper Yang-tse from the Hwang-ho. The Sikiang, or Canton River, only recently opened to foreign commerce, is being surveyed by H.M.S. *Tuesed*, whilst the hydrographical features of the great lowland plain of China are the subject of inquiry on the part of Dr. E. von Cholnoky, of the Hungarian Geological Survey.

The 'commercial' mission, under M. Brennier, despatched from Lyons, has terminated its labours. Meanwhile two other 'commercial' missions, the one German and the other Belgian, have arrived in China.

Before leaving Asia reference should be made to an exploration of Christmas Island by Mr. C. W. Andrews, the expense of which is borne by 'Challenger' Murray.

In AFRICA it is once more the indefatigable M. Foureaux, whom we find making another attempt to penetrate the Ahaggar Highlands. He succeeded on this occasion in reaching the Tasinja Wells in the Azgar country (26° 30' N., 8° 15' E.), but had to return owing to the prohibitive demands made upon his purse by would-be guides. He travelled altogether 1,400 miles, 283 of which were over new ground.

Our knowledge of Guinea, or the wide region extending from the Senegal to the Niger, has been vastly increased by the military expeditions, commanded by Captains Henderson and Donald Stewart, Lieutenants Voulot, Baud, Bretonnet, and others (see p. 602). By the side of these, such successes as were achieved by other expeditions seem but small. Mention should nevertheless be made of Lieut. Bonnin's surveys on the Upper Senegal; of M. Eysserie's attempt to travel up the Bandama river, on the Ivory Coast, which was frustrated by the hostility of the natives; and of Major Leonard and Mr. F. James' visit (in December, 1896) to Bendi, the capital of the Aro, about a hundred miles inland from Opobo. This was the first visit paid by Europeans to this famous fetish town.

Lieut. Gentil, when last heard of, had reached the Nana river, in 6° 40' N., and was about to embark in the hope of being able to reach Lake Taad, and Bornu. He is being followed by M. de Bégnagie, who has conceived the bold idea of travelling from the Congo to the Mediterranean.

From the Congo State we hear of a careful survey of Lake Leopold, by M. Hector Cambier; and of the appointment of Lieut. Clément Brasseur as commandant of Katanga-urua, where important geographical work awaits that experienced officer. Mr. Arnot's old station in Katanga has been occupied by Messrs. Campbell and George, who promise to engage in scientific work.

From Cape Town we receive the gratifying intelligence that the trigonometrical survey of

Cape Colony is to be extended through Rhodesia to the Zambezi, and beyond that river to the Shire Highlands. As far as Salisbury there will be two series of triangles connected by loops. The cost of this survey will be borne jointly by the Colony and the South Africa Company.

In Nyasaland, Mr. J. McCloumie has been appointed head of a "scientific department" which speaks well for the future. Meanwhile attention should be directed to the establishment of a meteorological service, and to the extended travels of Mr. John Gibbs and Mr. Andrew Law of the African Lakes Corporation, and to M. Foa's second passage through that protectorate on his way to Lake Tanganyika and the Congo.

From German East Africa we learn from G. Schillings that Lake Kinarok, which Drs. Fischer and Baumann believed they saw, has no existence whatsoever, and from Capt. Langheld, that Lake Rikwa, which figures very prominently upon all our maps, has dried up and shrunk into an insignificant swamp.

The most important achievement to be recorded from British East Africa, is the measurement by Mr. C. S. Smith of a series of triangles connecting Mombasa with the Victoria Nyanza. This important achievement, together with the surveys carried on in connection with the railway now building, the topographical work done by Mr. Holey and other station commandants, and the meteorological observations fully referred to in last year's report, will soon make our knowledge of British East Africa very complete. Now that a steamer has been placed upon the Victoria Nyanza we may look forward to an exact survey of that lake.

Dr. M. Schöller has returned to Mombasa (March 18), from his extended travels in British East Africa, which took him past Kilimanjaro, the active volcano, Doenye Ngai (in the ascent of which he failed), and Lake Naivasha, to Kaviron and Uganda. He was accompanied as far as Kaviron by Dr. A. Kaiser.

Somal and Galla Land, lying between the river Jub and Lake Rudolf, has been successfully traversed by Mr. J. S. Cavendish and Lieut. Andrews. The party started from Berbera, reached Lugh, on the Jub, in November, and travelled thence to Lake Rudolf, Kikuya (August 5, 1897), and Mombasa—a most remarkable journey.

Lieut. Vannutelli and Citerni, the sole survivors of Capt. Botego's expedition, have returned to Italy. The expedition had set out from Barawa on October 11, 1895, and reached Lake Rudolf in July. Bottego, having satisfactorily proved that the Omo is a feeder of Lake Rudolf, and not the headstream of the Jub, bent his way to the northwest, followed the upper Sobat for a considerable distance, but was treacherously murdered by a Galla chief in the Lega country (March 16). Out of 86 men only 20 escaped with their lives. They were liberated, on June 6, by order of King Menelik, whose capital they reached on June 22. Dr. Sacchi, who left Lake Rudolf for the coast in September, with important scientific collections, has not yet been heard of.

In Abyssinia useful geographical work has no doubt been done by members of the political missions, which jostled each other on the road from Harar to Addis Abeba (see p. 600), but the only strictly scientific expeditions to be recorded are those undertaken by Dr. Radzevich, of the Russian Red Cross Society, whose object it was to study the hygienic conditions of the country, and by Dr. Dimitriyef, a Russian geologist. Count

Edward Wickenburg, who intended to explore Southern Abyssinia, never got beyond Harar (April, '97), permission to proceed to Addis Ababa being refused him. Northern Somaliland has been visited by a numerous hunting party, headed by Mr. Aylmer, and including Mr. and Mrs. Lort-Phillips, Mr. and Miss Gillett, Miss Cole, Mr. Bland, and Mr. Fremantle.

The military operations in the Egyptian Sudan seem to have yielded exceptionally valuable geographical results, the longitudes of the principal places along the Nile as high up as Berber having been determined by means of the telegraph.

IN AUSTRALIA the fate of the missing members of the 'Calvert Expedition'—Mr. Ch. F. Wells and Mr. J. W. Jones—has been ascertained. The late leader of the expedition, Mr. L. A. Wells, in June last discovered the corpses of these men about 15 miles to the south-west of the Joanna springs (20° 14' S., 125° 50' E.). They had not been killed by natives, but had perished of thirst. The two skeletons previously discovered by Mr. W. F. Ruddock, in 23° 35' S., 120° 10' E., were not those of the missing men, but of a woman and a native.

In New Guinea Sir W. M. Macgregor is continuing his explorations, whilst in the neighbouring German colony the success achieved by Dr. Lauterbach in 1896—when he reached the upper Ramu from the east—is to be followed up. A steam-launch has been despatched for the further exploration of this, one of the great rivers of the island, and to serve as a basis for an excursion into the snow-capped Bismarck Mountains.

The borings in the coral atoll of Funafuti were resumed in 1897, and on September 16 Prof. Edworth David had reached a depth of 643 feet. During the last 120 feet the borer passed through coral reef rock, or a dead and gone reef. This proves subsidence, and goes far to support Darwin's old theory, the correctness of which had recently been questioned by Mr. Dana and Dr. Murray.

Prof. Schausinsfeld, the Director of the Bremen Museum, has recently returned from the Pacific with a rich ethnological collection gathered in Hawaii, Samoa, and elsewhere.

Several remarkable mountain-ascents have to be placed on record from AMERICA. Prince Amaïeo of Savoy landed at Yakutat bay on June 22. After a thirty-eight day's march he reached the Malaspina Glacier, where he met Mr. H. Bryant, who had failed in his assault upon Mount St. Elias, and who subsequently lost the whole of his collection by shipwreck. The real ascent was begun and the summit (18,000 feet) was reached on August 1. The return to Yakutat bay only occupied ten days: *facile est descendere*. Mt. Orizaba, in Mexico, was ascended in March by K. Th. Stüpel, and its height determined by aneroid. It is supposed to be 18,333 feet, which only differs to the extent of 19 feet from the result obtained by Dr. Scoville's trigonometrical operations. Thirdly, we have to record quite a number of ascents in the Andes of Chile accomplished by members of Mr. Fitzgerald's expedition, including one of the Aconcagua (23,000 feet), the loftiest summit of the new world. This was accomplished on January 14, 1897, by Zurbriggen, the Swiss guide, Mr. Fitzgerald being left behind a few hundred feet beneath the summit. The Tupungato volcano (21,000 feet) was ascended by Mr. Stuart Vines and Zurbriggen, and various

other summits (exceeding 17,000 feet), by Mr. Lightbody and Mr. Gosse.

In Canada the rapid development of the Klondike goldfields and the desire to open an outlet through Hudson's Bay for the grain grown in the north-west, have led to the organisation of several surveying expeditions. On the Upper Yukon the boundary following the 141st meridian has been carefully marked out by Mr. W. Ogilvie. An expedition for the discovery of an easy overland track by way of Fort Edmonton left Liverpool on October 29. It is headed by Mr. Clathworthy, formerly a civil engineer in the service of the Canadian Pacific Railway. A careful survey is to be made. The Hudson Bay expedition left Halifax in the *Diana* on June 3, 1897. It is commanded by Capt. Wakeham, with whom are two experienced geologists, Dr. R. Bell and Mr. Low, who have been afforded an opportunity of examining a portion of the coast land.

In the United States about 21,000 square miles were surveyed in the course of last year under the direction of Mr. Henry Gannett. Two interesting expeditions were undertaken to the Mesa encantada in New Mexico, the one by Prof. W. Libbey, the other by Mr. Hodge, but of the "Enchanted City" not a trace was found.

Prof. E. Regel, after a careful examination of the country around Antioquia (in Columbia) and a journey from that city, across the Paramos to the Hondo, and down that river to Baranquilla, where he arrived on May 13, has returned home.

M. Robuchon, who arrived in Lucre on Jan. 22, has spent the season in an exploration of the Amazonian slopes of Bolivia.

In the Andes, both Chilean and Argentine surveying parties are at work (see map, ALMANACK 1897, p. 588). Dr. Stange, at the end of last year, ascended the Renihue valley (42° 30' S.), and crossed the 'central' Cordillera (Jan. 1) to the head of the Chubut. Far more extensive were the explorations carried on by an expedition led by Dr. H. Staffen, with whom were Dr. Fischer, Dr. P. Dusen, and other scientific men, for it embraced the entire region lying between the Aysen river, in 45° 20' S., and the Rosales pass, in 41° N. On the eastern side of the Andes, to the south of the lake Nahuelhuapi, an Argentine expedition, under M. J. P. Wiag, was encountered.

In the Brazilian valley of the Amazonas some excellent work appears to be doing. Dr. Paes de Carvalho has long agitated for a regular survey of the province of Para. In the near time we must be content with such information as can be gleaned in the course of excursions like that of Dr. Fr. Katzer, the geologist, of the Museo Paraense. Higher up on the river, in the province Amazonas, Dr. R. Fayer is continuing his explorations. He claims to have discovered of the Cassiquiare, a tribe of Indians of the most pronounced Chinese type.

Oceanography is likely to profit by the scientific exploration of the Red Sea, which has been continued this year in the *Pola*, the captain of that vessel, Capt. P. von Schott, being aided by a staff of scientific experts. Prince Albert of Monaco has continued the examination of the Alice Bank, discovered by him near the Azores and now states that it rises within 25 fathoms of the surface. In the Bering Sea, between Bering Island and Kamchatka, Captain Moser, U.S.N. has sounded the unexpected depth of 3,111 fathoms.

E. G. RAVENSTEIN.

EUROPE.

CRETE.—If the reforms in the government of Crete agreed to by the Concert of the European Powers, and accepted by the Sultan (September, 1896), have not yet been carried out, this is due to the injudicious interference of the Greek government. A Greek consul had been permitted a seat on the international commission for the settlement of Crete, whilst the Turkish delegate had been rejected, and all objections of the Sultan had been overruled; and about the middle of January it was announced that tranquility had been restored in Crete, and Turkey had agreed to the organization of an international gendarmerie. Yet Greece, on the 21st of that month, mobilized her fleet; Prince George left the Piræus on February 10 with sealed orders, and Colonel Vassos, on February 15, landed a Greek force near Canea, and summoned that place to surrender. Upon this Canea was occupied by an international force of 450 men, and Vassos withdrew to the interior, where he gave life to an agitation in favour of union with Greece. Greece justified her aggressive action on the ground of the massacres and the intense excitement at Athens. Russia (and Germany) advocated strong measures, including a blockade of the Greek ports, but Lord Salisbury mediated, and on March 3 Greece was informed by the Powers that Crete could not be ceded to her under existing circumstances, that the Powers were prepared to guarantee to Crete an effective autonomous regime under the suzerainty of the Porte, and that the Greek troops and ships must be withdrawn within six days. Greece on March 8 replied that autonomy would not realise her aspirations as to Crete, and refused to withdraw her troops, who might be employed in the restoration of order, so that the wishes of the Cretans as to their future might be ascertained.

But then came the disasters in Thessaly, and between May 14 and 23, Greece withdrew her troops.

Very little progress has been made since then. Turkish troops and international forces still occupy some of the coast towns, crowded with Mahomedan refugees who have been expelled by their Christian countrymen from their homes in the interior, where anarchy reigns supreme, and life and property are no longer safe. The Porte, elated by its easy victory over Greece, is less willing than hitherto to defer to the wishes of the Powers.

On October 12, the Porte proposed that both Christians and Mohammedans should be disarmed by the Ottoman troops, with the co-operation of the international forces, all to be placed under the command of a European general in the Turkish service. This offer was declined by the Powers. On October 27, the Cretan Assembly met and resolved to submit gratefully to the will of the Powers, but to ask for the immediate withdrawal of the Turkish troops.

Since then much time has been spent in the selection of a Christian Governor. Among the various candidates proposed, Prince Francis Joseph of Battenberg seems to have the best chance. Once the treaty between Turkey and Greece shall have been signed, the concerns of Crete will no doubt be speedily settled, and that island may then look forward to a lengthened period of peace and prosperity.

GREECE AND TURKEY.—Greece, in February, had invaded Crete, and in the course of March levies raised by the Ethnike Hetairie (National Society) crossed the frontier of Thessaly into Macedonia. Turkey not unnaturally took measures for defence. A war appeared to be imminent, when the European Powers in identical notes delivered at Athens and Constantinople (April 6, 1897), declared that in the event of a conflict the aggressor would not be permitted to derive the slightest advantage from the impending conflict, whatever its result might be. Turkey, under the provocation received, formally declared war on April 17, recalled her ambassador from Athens and handed his passports to the Greek ambassador at Constantinople. Edhem Pasha, the Turkish commander-in-chief, at once began his forward move, forced the Meluna Pass after a fierce fight on April 18, occupied Larissa, beat the Greek army at Velastino, and entered Pher-sala (May 6) and Volo (May 7).

Greece then (May 10) appealed to the Powers to mediate, offering to evacuate Crete, and the Powers agreed to do so on condition that Greece should unreservedly place her interests in their hands. To this Greece assented (May 11), the Sultan ordered a suspension of hostilities, and this disastrous war seemed to be ended, when Colonel Manos (May 14) at the head of a Greek force again invaded Epirus.

Edhem Pasha then advanced once more, overthrew and dispersed the Greeks who opposed him at Domoko (May 17-18), forced the Phourka Pass, and was on the point of occupying Lamia when

he received orders to suspend hostilities. A formal armistice on sea and land was concluded at Tarata, near Lamia, on June 3.

The peace negotiations between the six Powers representing Greece and Tewfik Pasha were opened at Tophaneh Palace on June 3, 1897. They proved tedious, and it was only on September 27 that the peace preliminaries were communicated to the Greek government, and the Sultan invited Greece to appoint plenipotentiaries to negotiate a definite treaty. These plenipotentiaries met for the first time on October 18, and their labours are now (November 25) nearly completed. The leading conditions of this treaty are:—A strategic rectification of the frontier of Thessaly, the payment of a war indemnity of £4,000,000; an arrangement for guarding against the abuse of consular immunities; the payment of compensation for losses sustained by private persons in consequence of the action of the Greek forces; and a settlement of the liabilities incurred by Greece when Thessaly was ceded to her in 1881.

The new boundary is shown on our sketch-map. The area ceded only amounts to 87 sq. m. It is all mountain-land and includes only one small village (Kuchuvleni) which is not inhabited by Greeks. The payment of the indemnity is to be guaranteed by the appointment of an international Commission of Financial Control, to whom certain revenues set apart for that purpose are to be assigned. The reference to the treaty of 1881 concerns an undertaking by Greece to assume a portion of the Turkish debt.

ASIA.

CHINA AND RUSSIA.—By a treaty reported to have been contracted by Count Cassini, at Peking, in September 1896, China, in recognition of the friendly attitude observed by Russia during and after the war with Japan, grants to Russia the right of building and controlling railways through Manchuria, connecting Vladivostok (on the Pacific) and the Siberian frontier with Kirin, Mukden and Peking; liberty to exploit the mineral wealth of Manchuria; and, on demand, a lease for 15 years of the port of Kiau-chau in Shantung, and in case of war the right of using Port Arthur as a base for military operations. Russia, for the purpose of "controlling" the railway, is to be permitted to employ her military forces. China, on the other hand, after the expiration of thirty years, may purchase the railways built.

On December 23rd, 1896, the construction and working of the railways referred to in this treaty was entrusted by the Tsar to an "Eastern Chinese Railway Company," to be formed by the Russo-Chinese bank. The shareholders in this new company must be either Russian or Chinese subjects, and the work of construction is to be begun not later than August 15th, 1897.

CHINA AND GERMANY.—The murder of two German Roman Catholic missionaries at Yen Chofu, in Shantung, provoked Germany to occupy that place, which boasts an excellent harbour, with the view of obtaining satisfaction for this outrage. On November 15th, about 600 men were landed; the Chinese forces, numbering 1,500 men, abandoned the three forts, the German flag was hoisted, and measures taken as if for a prolonged stay.

CHINA AND BRITAIN.—China, having surrendered to France by a treaty concluded in 1893 certain territories which she had promised not to cede without having previously obtained the con-

sent of Britain (*see* ALMANACK, 1896, p. 583), Lord Salisbury insisted upon reparation being made for this breach of the convention of 1894. This has been done by an agreement, signed on June 5, 1897. China now cedes the Shan state of Kokang, on the upper Salwin, and a perpetual lease of a small territory to the west of the Shweli River, which is traversed by the Nam-Wan. In addition to this, certain commercial concessions are granted, including free intercourse between Yun-nan and Burma, the opening of the West River or Si-kiang as far as Wu-chau, 180 miles above Canton, and the appointment of consular agents to certain towns of China.

COREA.—Russia and Japan, by a treaty signed in May, 1896, but only published in February, have virtually taken Corea under their joint protection. They both recognise Corea as an independent state, and declare their readiness jointly to guarantee foreign loans, in order that an army and police force for the maintenance of internal order may be organised. Japan will be permitted to keep in the country 200 gendarmes for the protection of her telegraph lines, and three military detachments for the protection of her settlements of Seoul, Fusan and Gensan. Russia is to be permitted to maintain military detachments of the same strength for the protection of the Russian legation and consulate. These troops are to be withdrawn as soon as order has been completely restored.

KATAR PENINSULA.—We stated last year that this district of Arabia had been proclaimed a British Protectorate. No such proclamation has taken place.

ACHIN.—The Dutch have not yet succeeded in making themselves masters of this territory in Sumatra. They hold Kota Raji and other places, and occasionally capture one of the enemy's strongholds, but hardly a month passes without some report of heavy fighting.

PHILIPPINE ISLANDS.—The efforts of the Spanish authorities to suppress the rebellion proved unavailing until quite recently, and, as in the case of Cuba, it is only in consequence of promised reforms that things appear to have mended. Negotiations were opened in October, after the advent of D. Sagasta to power, and we are given to understand that about the middle of November the leaders of the rebellion had tendered their submission to General Primo Rivera, the governor-general, on condition of a free pardon.

AFRICA.

EGYPT.—This year's campaign in the Sudan has led to a further extension of the borders of Egypt. The troops started simultaneously from Dongola, up the Nile, and from Korosko across the Desert. Abu Hamed was occupied by Colonel Hunter on August 7, and the railway to that place from Korosko has since been completed, and is being continued to Berber. The latter, on its voluntary evacuation by the Dervishes, was occupied by friendly Arabs on September 7, and received an Egyptian garrison on September 13. Two gunboats, which had been hauled up the fifth cataract, steamed up to Metemme, the great stronghold of the Khalifa, which they shelled on October 25, and subsequently proceeded beyond that place to the sixth cataract. The road between Berber and Sawakin is once more open, Osman Digna having retired beyond the Atbara.

The Egyptians now have fortified posts at

Dongola, Korti, Merawi, Abu Hamed, and Berber. The Gekdul Wells, in the Bayuda desert, are held by the friendly Jaalin, who were driven out of Metemba by the Khalifa's forces (July 1). The Hassanie and Hawawin are likewise friendly to Egypt.

An envoy of the Khalifa at Constantinople (October) is agitating in favour of recognising the Khalifa as the ruler of an independent state, to be under the sovereignty of the Sultan and the protection of France.

Kassala was threatened by the Dervishes in January, but the prompt action of General Viganò

caused them to retire precipitately. In October, Col. Parsons paid a visit to that place with a view to its restoration to Egypt and occupation by Egyptian troops, 1,500 of whom are now on their way.

ABYSSINIA.—Menelik, the king of kings in Ethiopia, ever since the crushing defeat of the Italians in March, 1896, has wonderfully risen in the opinion of several of the great powers, and embassy after embassy has been received at his court.

Major Nerazzini, who reached Addis Abeba, the new capital, on October 6, 1896, returned to

treaty concluded by him on October 26, 1896, are not as favourable as we were at first led to believe. The Italian prisoners were released, and it is left to Italy to determine the sum to which Abyssinia is fairly entitled for their maintenance; a treaty of commerce and amity is promised, and an Italian resident will be received at the Court of Menelik, but the liberal concessions in regard to the boundaries (see ALMANACK, 1897, p. 589) of Eritrea have been withdrawn, and King Menelik offers a boundary which, starting from Tomat, on the Atbara, will pass to the south of Digea and follow the coast at a distance of 40 miles inland. This boundary is slightly in advance of that

Rome last August. The terms of the preliminary accepted in 1891, and still leaves Italy in possession of an extensive territory, but as our map shows, it deprives her of the strong line of defence formed by the Mareb river, and is consequently objected to by military men. Italy, however, will have to yield compliance should Menelik insist, and Captain Ciccardicola, who left Rome on October 6 for Addis Abeba for the purpose of settling all outstanding questions, has no doubt been instructed to that effect. Meanwhile, and until the boundary shall be definitely settled, Italy is debarred from ceding any territory now held by her in Abyssinia.

Italy will also be permitted to hold Lugh on the Jub, and a coastal belt, 180 miles broad, in Somaliland.

France entered upon the scene immediately the defeat of the Italians became known, her action being initiated by the late M. Deloncle, the governor of French Somaliland. Not recognising the treaties for the partition of Africa concluded by her rivals—Britain, Germany, Italy, and Belgium—France considers herself at liberty to establish herself on the Upper Nile.

Having compelled the Congo State (in 1894) to evacuate all stations to the north of the Bomu, she at once made preparations for the invasion of the old Egyptian province of the Bahr el Ghazal, and this forward movement seems to have been timed so as to coincide with a corresponding move on the part of Abyssinia. At the end of June, 1897, Captain Liotard occupied the old station of Dem Ziber; on July 23 he was at the famous Meshra er Rek, whence boats are to carry him to Fashoda on the Nile. About the same time (on July 22), an Abyssinian force commanded by a Frenchman, the Marquis de Bonchamps, left Lega for the same place, Fashoda being nearly equidistant from the Meshra and Lega. But we anticipate.

M. Lagarde, a formally accredited ambassador, arrived at Addis Abeba in March, and remained about ten months. He is supposed to have concluded a treaty, which has not been published, but the terms of which may be surmised from what happened subsequently. This official mission was followed up by an unofficial one, headed by Henry, Duke of Orleans. He arrived at Addis Abeba on April 11, was joined there on the 23rd by the Russian Count, N. Leontief, and jointly they secured a charter which conferred upon them the government of a vast region stretching from the Jub to the Nile, only a small portion of which is in actual possession of Abyssinia or subject to the raids of her ruthless armies.

A military expedition was organised at once with the object of assisting France in her endeavour to gain a footing on the left bank of the Nile. Capt. Clochette (since dead) led the vanguard, the Marquis de Bonchamps following on May 17 with the gross of the army. On June 9 he crossed the Didesa, on July 1 he was at a place called Gore (?) in Lega, and on July 22 he left that place for Fashoda, as stated above, where he expects to meet the Congo forces commanded by Capt. Liotard.

The Duke and Count Leontief had, in the meantime, returned to Paris, where the former was seriously wounded in a duel (August 15) to which he had been challenged by the Duke of Turin, on account of libellous statements reflecting upon the conduct of Italian officers in Abyssinia.

M. Bonvalot, the companion of Henry of Orleans in Central Asia, visited King Menelik at the same time as his former chief, but to all appearance not on the same business: in fact, the two former friends were on the worst possible terms with each other. M. Bonvalot's venture seems to have been essentially of a commercial nature.

In connection with French interests in Abyssinia it should be mentioned that a railway is now building from Jibuti to Harar and Addis Abeba, a concession for which was granted by King Menelik on March 9, 1894, to M. Ilg, a Swiss engineer in his service, and to M. Chefneux.

French activity in Abyssinia at last brought

Great Britain into the field. On March 28, 1897, a mission, headed by Mr. J. Rennell Rodd, and including among its members Colonel Wingate, of the Egyptian staff, Captain Speedy, Count Gleichen, and Dr. Pinchin, landed at Zella, and proceeded at once to Addis Abeba, where it stayed from April 28 to May 14. During these few days a satisfactory treaty was arranged. The assertion of a French paper that by this arrangement Britain recognises the whole of the vast territory bounded by the Nile in the west, and by the 2nd and 14th parallels in the north and south, as an Abyssinian sphere of influence will no doubt turn out to be a myth.

Russia, ever since the despatch of the Red Cross Mission in 1896, has maintained friendly relations with Abyssinia, and on October 19 Colonel Vlasof, with a numerous suite and an escort of 20 Cossacks, left St. Petersburg for Addis Abeba as special envoy. About the same time a scientific mission, headed by M. Demetrief, left Russia for the same destination. The Russian influence, it can hardly be doubted, will be exercised on behalf of France rather than on that of Great Britain.

UGANDA.—British power in Uganda has gained in strength as a result of the prompt suppression of a rising headed by King Mwanga. Colonel Ternan, at the head of a small force, defeated the king's army on July 20, 1897, at a day's march to the south of the Roman Catholic mission station of Villa Maria, in Buddu, and again on July 29, at Marongo. The king has since escaped into German territory. On his return to Port Alice, Colonel Ternan proclaimed the young prince in his stead. The great chiefs rallied round the administrator, and two or three of them will act as a regency during the king's minority. It is to be hoped that the mutiny of the Sudanese serving in Major S. R. L. Macdonald's expeditionary force will not injuriously affect the condition of Uganda, even though the ulterior objects of this expedition should have been frustrated. The mutineers, who were joined by Mohammedan Buganda, murdered Major Thrus-ton and other officers, and took possession of Fort Lubwa, at the outlet of the Nile from the Victoria Nyanza. On October 19th, they sustained a severe defeat. The whole affair is wrapped in mystery.

TOGOLAND.—By an agreement of July 9, 1897 (ratified July 23), the conflicting claims of France and Germany, at the back of the Gold and Slave Coasts have been arranged (see map). By this arrangement France cedes a small district lying to the west of the lower Mono, and recognises the important places of Sansaane Mangu, Yendi, and Gambaga as lying within the German sphere, whilst Germany surrenders any claim she may have had to places lying to the north or east of the new boundary. The respective claims of Great Britain and Germany within the territory "reserved" in 1888, and outside of it, are stated to be in course of settlement.

NUPE.—The brilliant success achieved by the expedition of the Royal Niger Company, which was led by Sir G. P. Goldie and Major Arnold against Nupe and Ilorin, has done much to strengthen British influence on the Lower Niger. The Sultans of Sokoto and Gandu were officially informed of the punishment which it was intended to inflict upon the Emir Abu Bekri of Nupe, whose misdeeds were duly set forth. The expedition, consisting of 600 Haussas, left Lokoja

on January 6, 1897, the command of the river being secured by a flotilla under Mr. Wallace. On January 14 the forces collected by the Markum Mohammed, the son of the late Sultan Omri, were dispersed at Kabba. Three days afterwards (having marched 209 miles in the course of ten days) the expedition crossed the Niger at Egbom, and after a few skirmishes, Bida, the capital, was occupied and the British flag hoisted on January 29. The Sultan Abu Bekri was deposed, and a treaty concluded with his successor, the Markum (Kosoji, February 5), who surrenders the whole

of Nupe lying to the south-west of the river and a strip, three miles wide, along the right bank, to be directly administered by the Company, and undertakes to rule the remaining portions of the country in accordance with the directions he may receive.

ILORIN.—Even before the signature of this treaty, on February 2, 320 Hausas were sent up the Niger to Jeba, where they marched upon Ilorin, whose Sultan had been raiding the adjoining parts of Yoruba. The town was captured after two days' fighting, on February 16,

and two days afterwards a treaty was signed, by which Sultan Suliman places himself under the protection of the Company, and accepts any boundary that may be proposed to him.

BENIN.—The massacre of a peaceful British expedition by the King of Benin on January 5 last has been speedily avenged. A punitive expedition, led by Captains O'Callaghan and MacGill, occupied Benin after some sharp fighting on February 18, and found the place reeking with the blood of human victims. Of the six chiefs directly responsible for the massacre, only one is still at large: three died and two were executed. The king, who voluntarily surrendered on August 5, is being exhibited on board the *Ivy* as an object lesson against the practice of juju

and slave raiding. Thus has passed away the third and last of the great native kingdoms of the Guinea coast.

The negotiations between Great Britain and France having led to nought, both Powers have recently exhibited an unwonted activity in extending and fortifying their claims by making fresh treaties with native chiefs or by actual occupation. Having at considerable length set forth in the **ALMANACK** for 1896 all that was done up to the close of 1895, we confine ourselves to the present occasion to giving an account of what happened recently.

France took the field first, and did so with considerable military forces, which enabled her to occupy a large number of posts, the principal

among which are shown on our sketch-map. Lieut. Voulot, coming from the north-west, occupied Wagadugu, the capital of Mosi, on September 1, 1896, and on January 27, 1897, installed a new "Naba" under French protection. The arrival of Major Destenave with reinforcements, in February, enabled him to occupy Sati in Gurunsi. Further reinforcements, commanded by Major Caudralier, arrived at Sati later on, but that force, when marching to the south, was attacked in Lobi by the dreaded Samori's forces and completely annihilated. This shows the precariousness of the French position even in districts where France claims to exercise exclusive jurisdiction.

Lieut. Baud, starting from Carnotville, occupied Fada Ngurma, the capital of Gurma, on February 25, and induced the "king" to accept French protection.

Even more important, as far as British interests are concerned, was an expedition led by Lieut. Bretonnet, who, starting from Carnotville, reached the Niger at Ilo (January 21) and, descending that river, occupied Busa, one of the principal places in Borgu.

More recently a French expedition coming from Dahome crossed the clearly-defined boundary of the country of Lagos, passed through Saki, met with a check at Ibadun, and then retired in a northerly direction towards Kissi and the Niger.

At the present time the French hold a large number of posts in the countries lying at the back of the Gold Coast and Lagos, and on the banks of the Niger, including Wagadugu in Mosi, Sati in Gurunsi, Wangara in Sugu, Kuande, Nikki, Bue and Busa in Borgu, Fada Ngurma and Kojar in Gurma, Gomba, Ilo and Kandi in Gando. Fort Arenberg, built by Captain Toutée in 1895, has been evacuated in consequence of British protests, whilst Fort Archinard, near Sai, was little more than a camp which Captain Hourst occupied for a few days during his descent of the Niger, the chief of Sai having refused him permission to camp near that town.

The convention concluded by M. de Chevigne with Awelimmiden on May 15th, does not affect the questions pending between Britain and France, as the territory occupied by these Tuareg lies to the north of Sai and outside the empire of Sokoto. By this convention the Awelimmiden place the conduct of their foreign relations in the hands of France, and undertake to admit none but Frenchmen to trade in their country.

In comparison with the activity exhibited by France, but little was done by Great Britain. In the Hinterland of the Gold Coast the farthest inland post actually held by a British force is Gambaga, the capital of Mampursi. It was occupied in December, 1896, by Captain Donald Stewart. Early in 1897 that officer advanced in the direction of Mosi, but when he reached Tangurku he found that he had been anticipated by the French and withdrew. A small force under Captain Henderson met a native force commanded by a son of Samori in the north-west; but subsequently these forces were driven back, and no collision between Samori and the colonial troops has taken place since July last. Sir W. Maxwell left Cape Coast Castle on July 26 for an extended tour through the interior, returning to Kumasi in November. Reinforcements for the inland stations left Cape Coast Castle in November, under Colonel Northcot, and crossed the Prahsu on November 18.

At Lagos a military force for service in the interior was being assembled in October.

The furthest station on the Niger actually occupied is Liabu, below the Busa rapids, but Britain trusts to the treaties concluded with Gando and the still powerful empire of Sokoto, in 1885, 1890, and 1894—that is, long before the French were heard of in this part of the world—as conferring "plain rights," which Lord Salisbury declared at the Lord Mayor's banquet he would not allow to be overridden. These treaties, as well as those concluded prior to the French in Gurma, have not always been followed up by actual occupation, and hence the French claim the benefit of the *Utī possidetis*. This possession, however, seems to be a precarious one, especially as regards the stations established without leave within the limits of Gando, which the Sultan of Sokoto looks upon as one of his dependencies. As to the territories lying to the east of the Niger, there can be no dispute, since France, by the convention of 1890 (ALMANACK 1896, p. 580), has recognised all to the south of a line drawn from Sai on the Niger to Barua on Lake Tsad, and including the whole of Sokoto, as lying within the British sphere.

Negotiations for settling these conflicting claims were opened at Paris in October. The British Commissioners are Mr. Gosselin and Colonel W. Everett, whilst France is represented by Captain Binger and M. Lecomte.

CONGO STATE.—On December 14, 1896, Commandant Chaltin left Dooga, on the upper Welle, for the purpose of occupying a post in the territory to the west of the Nile, leased to the State by the British Government. On February 14 he reached the Nile opposite Bedden, and marching northward he met a force of Mahdists, completely routed it (February 17), and subsequently occupied Rejaf, which is stated to have at present a population of 11,000 souls, a wonderful increase since the evacuation of the province by the Egyptians.

Reinforcements under Baron Dhanis, which it was intended should join Commandant Chaltin, never reached him. The Batetela and Bakusa, from beyond the Congo, forming the advance guard, under Lieut. Leroi, mutinied and killed their officers; the mutineers were subsequently joined by a portion of the main body, Baron Dhanis narrowly escaping, while his brother was mortally wounded. Lieut. Sanders, with a small following, took refuge in the British fort of Katwe, which was unsuccessfully attacked by the mutineers in May. We are told that the mutiny was finally suppressed in July, but Chaltin's position may in the meantime have become precarious.

No serious attempt has been made to refute the charges brought by Sir Charles Dilke against the administration of the Congo State on April 2, 1897, in the House of Commons.

RHODESIA.—SIGNOR VIGHIANI, the Italian Senator, has made his award as regards the exact course of the boundary separating Rhodesia from the Portuguese province of Mozambique, and the proposed delimitation is to be effected in the course of the ensuing year. Capt. Freire Andrade, the Portuguese Commissioner, will consequently defer his departure from Lisbon until April, 1898.

SOUTH AFRICAN REPUBLIC.—A treaty of alliance between the South African Republic and the Orange Free State was concluded at Bloemfontein on March 17, 1897. It provides that in case

of the independence of one of these States being menaced or attacked, they shall give each other mutual support with all the forces at their disposal.

At the same time a protocol was signed, pledging the contracting parties to submit to their legislatures bills creating a Federal Council of Delegates, to meet annually for the discussion of questions of common interest, and facilitating the naturalisation of citizens of either State.

TUNIS.—An agreement has been concluded, on September 18, 1897, between Great Britain and France, by which the treaties and conventions of every kind in force between the two countries are extended to the Regency of Tunis. The exceptional privileges heretofore claimed on behalf of British consuls and subjects are consequently abrogated. The treatment of the most favoured nation, in matters of commerce, is guaranteed, and cotton goods of British manufacture shall not be subject to import duties higher than five per cent. *ad valorem*. This is not, however, to preclude preferential treatment in the case of French imports.

MADAGASCAR.—On September 28, 1896, General Gallieni abruptly informed Queen Ranavalô that Madagascar was henceforth French territory, and that its inhabitants were French "subjects." He at the same time abolished the Hova flag, and hoisted that of France.

On February 27, 1897, he called upon her to resign, as being a "superfluity" in a French colony, and at once ordered her removal to Réunion, where she arrived on March 4. These severe measures were taken on the ground of an alleged conspiracy against the life of General Gallieni, in which the Queen was implicated. Madagascar, consequently, is no longer a "Protectorate" but a "colony."

AMERICA.

PELAGIC SEALING.—Lord Salisbury having declined to join a conference in which representatives of Russia and Japan would participate, two conferences of experts took place, the one attended by the United States, Russia, and Japan; the second confined to Great Britain, Canada, and the United States. The latter sat November 10-16; it was attended by Professor D'Arcy Thompson, Professor Macoun, and Dr. Jordan. Both these conferences agree that the herds on the Pribylof Islands have decreased, and that pelagic sealing was so destructive that the governments interested should jointly stop it for one year. A treaty to give effect to these recommendations was concluded on November 6 between the United States, Russia, and Japan; and an Anglo-American Commission is to be appointed to deal not only with sealing, but also with all other pending disputes. The British Empire will be represented on the Commission by Sir Julius Pauncefote and Sir W. Laurier, the United States by Mr. Foster and Mr. Casson.

ALASKA.—In the *ALMANACK* for 1896-7, p. 584, we have already referred to the disputed boundary between Alaska and the Dominion, and since the development of the goldfields on the Upper Yukon (Klondike) a settlement of this question has become urgent. In the treaty with Russia (1825) it had been agreed that the boundary should be carried across the summits of the mountains running parallel with the coast, but should never exceed a distance of 10 leagues (30 sea miles) from the ocean. Whilst the United States contend that this distance is

to be measured from the heads of all bays and fiords, the Dominion authorities insist that the outer coast is to be the base of measurement. Our little sketch-map shows how these conflicting interpretations would operate in the case of the Lynn Canal, which gives the readiest access (over the Chilkoot and White Passes) to the Upper Yukon. The United States would draw the boundary across the passes named,

which are 15 miles from the head of Lynn Canal, whilst the advocates of the Canadian claim would draw it at a distance of 30 miles from the mouth of the canal; thus assigning the ports of Seward City, Dyea, and Skagway, which are at present occupied by the United States, to the Dominion. The importance of this question is obvious; and what applies to Lynn Canal applies with equal force to numerous other fiords of this much-indented coast.

BAFFIN'S LAND.—In the course of last summer a Canadian Government expedition visited Cumberland Sound, and hoisted the British flag, thus taking formal possession of Baffin's Land. This was done in view of an eventual development of trade through Hudson's Strait, which might have tempted some other Power to seize this commanding position.

CENTRAL AMERICA.—On June 15, 1897, a treaty was signed at Guatemala by the plenipotentiaries of Honduras, Nicaragua, and Salvador, on the one hand, and the representatives of Costa Rica and Guatemala on the other, by virtue of which these five States will be known in future as "Republica Major de Central America." A Diet, consisting of three representatives from each of the State legislatures, is to meet annually at one of the State capitals, and will direct the foreign relations of the Federal Republic. This treaty was to have been ratified by September 15; but before this could be done a rebellion, headed by Prospero Morales, broke out in Guatemala. According to the latest advices, the Government forces have recaptured Gueztatenango and won other advantages.

BRITISH HONDURAS.—A treaty, signed as long ago as July 8, 1893, but supplemented in April last by an additional article, and ratified only July 21, defines the boundary between British Honduras and Mexico. The boundary ascends the Rio Honda and its tributary, the Blue Creek, as far as Garbutt's Falls, whence it runs due south. No territorial change arises from this treaty. The clause added in April secures to Mexican vessels the free navigation of the territorial waters of British Honduras.

CUBA.—Spain has at last yielded to the legitimate demands of the population of Cuba. General Weyler's efforts to suppress the rebellion have proved unavailing, and the prosperity of the island has been ruined for many years to come. The output of sugar, which in 1894 amounted to 1,100,000 tons, is estimated, for 1897, at only 150,000 tons, whilst the output of tobacco has fallen from 500,000 to 75,000 tons. The rebels held the field, and do so still, although in May 140,000 Spanish soldiers were arrayed against them. There can be no doubt that the rebels profited much from the moral and material support extended to them by American sympathisers, whose views found expression in December, 1896, when the Committee on foreign relations of the Senate passed a resolution calling for a recognition of the Cuban Republic. On September 23, 1897, General Woodford, the American ambassador at Madrid, presented a note to the Duke of Tetuan, in which the injury done to American commerce in consequence of the rebellion was dwelt upon. This note was replied to by Señor Sagasta, who had assumed office on October 4, and who expressed a confident hope that the reforms proposed would quickly lead to a pacification of the island, especially if the American Government would more strictly fulfil the duties of international law in checking the filibustering expeditions fitted out by American sympathisers.

On October 11 General Weyler was recalled, and Marshal Blanco appointed Governor-General and Commander-in-Chief. Cuba, in accordance with the resolutions of the Spanish Cabinet, is to be granted a liberal measure of home rule. A local parliament, elected by universal suffrage, is to have control of the tariff and of taxation, and there is to be a responsible ministry of five members, presided over by the Governor-General. The control of the armed forces, police, church, law courts, and foreign relations will, however, be exercised by the Imperial Government. Cuba will continue to be represented in the Cortes by senators and deputies.

COLOMBIA.—The boundary dispute between Colombia and Costa Rica has been referred to the arbitration of France, Mexico, or Switzerland. (Treaty signed November, 1896.)

The dispute between the Republic and Great Britain with regard to the construction of the railway between the River Magdalena and the town of Medellin will be settled by a Court of Arbitration appointed in February by the President of the Swiss Republic.

VENEZUELA.—The treaty for settling the boundary between Venezuela and British Guiana was signed at Washington on February 2, 1897. The question in dispute is referred to an arbitral tribunal consisting of two jurists appointed by Great Britain (Lord Herschell and Mr. Justice Henn Collins), two jurists appointed by Venezuela (Chief Justice Fuller and Justice Brewer, of the Supreme Court of the United States), and of a fifth jurist, to be selected by the above, or, in case of their failure to agree, by the King of Sweden. (Prof. F. von Mertens, of St. Petersburg, has since been selected.) Broad rules are laid down for the guidance of the arbitrators, and "adverse holding or prescription during a

period of fifty years shall make a good title." The tribunal will meet at Paris in the course of next summer. Ex-President Cleveland will act as counsel for Venezuela. (See last year's ALMANACK, p. 587.)

BRAZIL.—The dispute about the boundary between Brazil and French Guiana has been referred to the arbitration of the President of the Swiss Republic. The treaty was signed at Rio de Janeiro, October 11, 1897. (See Map in ALMANACK, 1896, p. 584.)

THE PACIFIC.

HAWAII.—On June 16, 1897, a treaty was signed at Washington by which Hawaii, or the Sandwich Islands, has become a territory of the great American Republic. The United States recognises the public debt of Hawaii up to the amount of four million dollars, and grants rights of citizenship on all the inhabitants, with the exception of the Chinese and Japanese. The existing government, under President S. B. Dole, will remain in power until Congress shall have determined the future constitution of the country. The treaty was ratified on September 10 by the Hawaii Senate, but still awaits ratification on the part of the Senate of the United States. The Japanese Government (September 20) is willing to accept 100,000 dollars in settlement of all claims for damages to Japanese subjects consequent upon the annexation.

PALMYRA, a fertile lagoon island with a good landing place, over 900 miles to the South of Hawaii, in lat. 5° 50' N., long. 162° 16' E., is reported to have been annexed by Great Britain in May, 1897, as being suitable for landing the proposed cable between Canada and Australia; but as a matter of fact, this island, together with Fanning and other islets belonging to the same group, has been a British possession ever since 1888. The island was discovered by Captain Fanning in 1798. An American citizen, Mr. Luther Wilson, disputes the British claims. He says that the island was occupied in 1861 by the Government of Hawaii, and was subsequently ceded to the Pacific Navigation Company, from whom he bought it.

Another island, *Necker Island*, one of the Hawaii group, has likewise been mentioned in connection with landing a Pacific cable.

SOCIETY ISLANDS.—Raiaeta and Huahine, two islands of the Windward Islands (see last year's ALMANACK, p. 589), have definitely become French, the rebellious Queen Mamai having been defeated in a hotly-contested fight, and deported, with 136 of her subjects, to New Caledonia (February 28, 1897).

NEW HEBRIDES.—The future of these islands is causing some anxiety in Australia, as the French are gradually acquiring land, and absorbing the trade by subsidised steamers. At present the islands, in accordance with the Convention of 1887, are governed by an Anglo-French Commission, and the British Government will not consent to their being absorbed by France without previously consulting the Australian colonies.

E. G. RAVENSTEIN,

THE WEATHER IN THE BRITISH ISLANDS DURING THE YEAR ENDING
31ST OCTOBER, 1897.

THIS summary of the weather experienced in the British Islands during the year commencing November 1st, 1896, and ending October 31st, 1897, has been mainly compiled from data contained in the Daily and Weekly Reports issued by the Meteorological Office. It is hoped that the remarks

on each month will be useful for purposes of reference and comparison, especially when considered in relation to the daily results of the Greenwich observations as given for each month in the Calendar of the Almanack.

November, 1896.—Altogether the weather was rather mild and dry, with an unusual prevalence of sunshine. There was a good deal of mist in the central district, and fog was reported on three days in the east. The air was bright and bracing till the 8th, sunshine by day, & still by night, heavy frosts in the morning, steady NE breezes, very little rain. Onward to the 23rd there was more than usual dry weather, with hoar-frost, and some delightful sunny days. The last week was mostly dull. The lowest temperature, 19°, was reported at Llandovery on the 7th; the highest, 56°, at Aberdeen on the 11th. At 8 A.M. Greenwich time, 4th, while Scilly had 46°, Oxford had only 28°, and Loughborough, 26°; 5th, Scilly, 47°, Parsonstown and Loughborough, 26°; 6th, Stornoway and Scilly, 49°, Cambridge, 27°, Parsonstown and Loughborough, 24°; 7th, Valentia, 51°, Yarmouth, 26°; 10th, Aberdeen, 50°. Dungeness, 30°; 19th, Valentia, 50°, Loughborough, 30°; 30th, Valentia, 47°, Oxford and Cambridge, 23°. Stornoway on the 6th had 1'15 of rain; 22nd, 1 inch; 23rd, 1'05. The least atmospheric pressure, 29 inches, occurred on the 15th; the greatest, 30'7, on the 25th. A severe NE gale sprang up in the night of the 7th over the south-east of England, and, continuing on the 8th, caused deplorable losses in the North Sea. A cyclonic storm passed over the northern portion of these islands during the 13th and 14th. Bright sunshine, estimated in percentage of its possible duration, ranged between 32 in south-west England, and 9 in north Scotland.

The *Autumn* was seasonable, exception made of the cold in October; the rainfall, though an average, commenced excessive and ended deficient; and sunshine was fairly prevalent throughout.

December, 1896.—The weather was extremely changeable, there was rain nearly every day, and snow-showers in many places between the 14th and 22nd. Between the downfalls the sky was often clear, so that bright sunshine was rather more prevalent than usual. Occasional mists

and fogs were reported in England. A few cold days with hoar-frost brought down the mean temperature, otherwise the air was mild. The lowest temperature, 9°, was reported at Braemar on the 23rd; the highest, 58°, at Leith on the 26th. At 8 A.M., 1st, Valentia had 49°, while Nairn had only 27°; 15th, Scilly, 45°, Nairn, 24°; 20th, Valentia, 41°, Parsonstown, 17°; 24th, Valentia, 49°, Yarmouth, 27°; 29th, Valentia, 49°, Loughborough, 29°. On the 1st, Prawle Point had 1'15 inch of rain; 13th, Valentia, 1'03, Roche's Point, 1'20; 27th, Valentia, 1'08. Aurora was seen in north Scotland on the 4th, in Norfolk on the 5th. Atmospheric pressure was least, 28'5 inches, on the 6th; greatest, 30'45, on the 20th. About the 18th frost was severe in places; Christmas Day and the 27th had genial sunny weather. An erratic cyclonic storm ravaged these islands from the 1st to 7th, and wrecked the Chain Pier at Brighton. A swiftly progressing storm passed from south Ireland to Dover during the night 13th to 14th. Bright sunshine ranged between 26 per cent. in north Ireland, and 10 in north-west England. Early on the 17th a distinct shock of earthquake was experienced over nearly the whole of England from Tavistock to Lancashire and from Wales to Yarmouth, severely in the counties Hereford, Salop, Gloucester, and Worcester, where it caused some structural damage.

January, 1897.—The weather was cold, wet, gloomy, with very little sunshine. New Year's Day was fine and genial; the weather then became mild and rainy, soon passing into frost with frequent showers of snow. In northern and eastern parts snow fell on the 9th. Still waters did not freeze firmly enough for good skating. In the metropolitan district, between 4 and 5.30 P.M., 25th, during snow and hail, a violent squall from NW brought keenly cold air. On the same day NW gales blew over Scotland with squalls of snow and hail. Much snow fell in Aberdeenshire on the 30th. Snowdrifts blocked several railways. Much damage was done by the rough weather both on land and sea. Thunderstorms

occurred at Scilly on the 7th, in England and Wales on the 22nd, over south-east England on the 25th. Aurora was seen in north Scotland on the 1st. Atmospheric pressure was greatest, 30.5 inches, on the 2nd and 20th; least, 29, on the 6th and 25th. The highest temperature, 53°, was reported at Killarney on the 6th; the lowest, 13°, at Braemar on the 18th. At 8 A.M., 2nd, while the temperature at Roche's Point was 49°, Cambridge had only 24°; 10th, Scilly, 47°, Nairn, 20°; 29th, Scilly, 44°, Dungness, 23°. At Roche's Point, 1.1 inch of rain fell on the 6th. Fog was prevalent in east England on 4, mist on 3 days. Bright sunshine varied between 32 per cent. in south Ireland, and 12 in east Scotland.

February, 1897.—The weather was mild, dull, extremely variable, with many rainy days, considerable falls of snow between the 2nd and 5th, winds chiefly from SW, very little sunshine. The latter part of the month had small showers, and was often dry and dusty, with brisk winds. The 18th, 20th, and 27th were fine, with warm sunshine, affording the freshness of spring. Fog was reported on 8 days in the south, 5 in the east, 4 in the central district; mist on 3 or 4 other days in most districts. The lowest temperature, 7°, was reported at Braemar on the 4th; the highest, 64°, at Aberdeen on the 26th. At 8 A.M. of the first four days, while the temperature at Scilly was 51° to 49°, at Nairn it was as low as 17° to 4°; and on the 12th, while Scilly had 50°, Nairn had only 26°. Aurora was seen in north Scotland on the 3rd, 24th, and 26th. The least atmospheric pressure, 29.1 inches, occurred on the 2nd; the greatest, 30.7, on the 22nd. Bright sunshine varied between 22 per cent. in east Scotland, and 12 in north-west England.

During *Winter* the temperature and rainfall were normal, though rainy days were numerous, affording little sunshine, but much variable weather.

March, 1897.—The month was quite false to its reputation. It was a time of heavy rainfall, broken by a week of exceptionally warm westerly winds. The west of Ireland had nearly double the normal rainfall. The month was probably the wettest March on record for many parts of the British Islands. There occurred no less than fifteen separate and distinct cyclonic-wind systems. That on the 3rd was remarkable for frequent lulls and gusts. Aurora was seen in north Scotland on the 1st and 3rd. Thunderstorms occurred in south-west England on the 3rd, in Ireland on the 4th, in Wales on the 17th. On the 2nd, 1 inch of rain fell at Belmullet, 1.06 at Holyhead, 1.15 at Roche's Point. Fog was reported in south-west England on 7 days, snow on 2 days in north Scotland. Atmospheric pressure was least, 28.6 inches, on the 3rd; greatest, 30.2, on the 20th. The highest temperature, 64°, was reported at Cambridge on the 21st; the lowest, 15°, at Braemar on the 30th. Bright sunshine varied between 33 per cent. in east England and 20 in north Scotland.

April, 1897.—The weather was variable, rainy, with occasional showers of snow or hail, gusty winds, frosty mornings, also mists. The lowest temperature, 13°, was reported at Braemar on the 3rd; the highest, 70°, at Llandoverly on the 27th. At Parsonstown 1.18 inch of rain fell on the 3rd, at Braemar 1.2 on the 13th. The winds were from eastward on 16 days. The least atmospheric pressure, 28.9 inches, occurred on the 1st; the greatest, 30.3, on the 10th. Thunderstorms occurred in England on the 7th, 14th,

16th, h, 28th. Aurora was seen in north Scotland on the 5th, and, on the 23rd, also in Wales. The University Boat-race was rowed in dull threatening weather on the 3rd. On the 1st, a harsh gale from NNE blew over England. Good Friday, the 16th, was wet and gloomy. A thunderstorm on the 27th, 6.30 to 7.30 P.M., in the south-west of London was attended by hail and rain amounting to more than an inch of water. The ground was thickly covered with hailstones, some remaining during the whole of the next day. They did much damage to trees and shrubs. Bright sunshine varied between 41 per cent. in south England and 32 in Ireland.

May, 1897.—The weather was rather cold, dry, and dusty; winds frequently keen from eastward. The decade ending 23rd, was very fine, blue skies and brilliant sunshine, though the air was chilly by day and cold by night, and sharp frosts in the mornings. The lowest temperature, 25°, was reported at Llandoverly on the 12th; the highest, 79°, at Southampton on the 18th. The week ending 22nd had unusual sunshine, 73 per cent. for the entire Kingdom, as much as 87 at Carlisle. Swirls of dust were of frequent occurrence, dust being everywhere, in streets, roads, and fallows. Atmospheric pressure was greatest, 30.5 inches, on the 16th, a very serene day; least, 29.1, on the 28th. Thunderstorms occurred in east England on the 28th and 30th. Bright sunshine varied between 52 per cent. in south England and 39 in north Scotland.

The *Spring* had latterly much wind from eastward, but on the whole temperature tended to mildness, very variable weather passing from a general rainy dull condition into one of dry clear air and prolonged sunshine.

June, 1897.—The weather was normal, but extremely variable, tumultuous with lightning and thunder, blasts and squalls, heavy showers of rain and hail interspersed with days of cold and gloom, or days of heat and brilliant sunshine. The lowest temperature, 31°, was reported at Nairn on the 7th; the highest, 90°, at Greenwich on the 24th, with 144° in sunshine, humidity 63 per cent. On the 8th, 1.05 inch of rain fell at Oxford; 15th, 2.27 at Ardrossan, 1.72 at Malin Head; 19th, 1.17 at Valentia; 28th, 1.04 at Hurst-castle. Local heavy rains attended thunderstorms on 1st, 6th, 13th, 24th, 26th, 28th. The 6th had an oppressive atmosphere of a sullen grey tint. In the evening a thunderstorm gave 1.36 of rain in about an hour at Sydenham, and at the same time a thunderstorm occurred in Lincolnshire. A violent gale on the 16th caused the wreck of the *Foudroyant*, and much damage by wind and water. At London, the Diamond Jubilee Day, 22nd, was overcast and threatening till 11.30 A.M. when the sun shone out brilliantly for the rest of the day. On the 24th, 1 to 2 P.M., a thunderstorm and squally wind passed over Middlesex, accompanied by large hailstones and much rain, causing considerable destruction. Passing onward, about 3 P.M. it devastated a large tract of Essex, causing immense loss of crops. After a very hot afternoon, between 5 and 6 P.M. a thunderstorm burst over London. During the day thunderstorms occurred over all the southern portion of England. Atmospheric pressure was greatest, 30.3 inches, on the 11th; least, 29.4, on the 18th. Bright sunshine varied between 48 per cent. in south-west England and 22 in north Ireland.

July, 1897.—The weather was very fine, very dry, with much sunshine, though the mean

temperature only slightly exceeded the normal value. The highest temperature, 88°, was reported at Southampton on the 16th; the lowest, 35°, at Ilandoverly on the 8th. Thunderstorms occurred on the 19th in south England, on the 20th and 27th in the south-east, 21st in the midlands, 25th and 26th over most parts of England, 24th, 26th, and 27th in north Scotland. They often were attended by heavy local rainfalls; thus, 2·4 inches fell at Stroud, Gloucestershire, between 4·30 and 6 P.M., 20th. On the 20th, 1·66 fell at Oxford; 24th, 1·06 at Valentia. Atmospheric pressure was greatest, 30·4 inches, on the 11th; least, 29·1, on the 6th. Winds from eastward prevailed on nine days. The 15th and 24th were the hottest days, when solar radiation attained 151° at Greenwich. Bright sunshine varied between 55 per cent. in south England, and 35 in south Ireland. The week ending 17th had 69 for the kingdom generally.

August, 1897.—The weather was unusually warm, with prolonged sunshine in the east of England, where the rainfall was normal; wet elsewhere, especially in Ireland, where sunshine was scanty, and the temperature only slightly exceeded the normal. The highest temperature, 90°, was reported at Cambridge on the 5th; the lowest, 37°, at Braemar on the 17th. The temperature at Greenwich on the 5th rose to 89°·5 in the shade, to 148° in sunshine; and this station had some sunshine on every day, amounting to 220 hours. Thunderstorms occurred on fourteen days in various districts, mostly in England. They gave heavy local rains. On the 11th, 1·01 inch of rain fell at Aberdeen; 26th, 1·02 at Jersey; 1·19 at Spurn Head; 29th, 1·75 at Belmullet; 30th, 1·22 at Spurn Head, 1·03 at York. The greatest atmospheric pressure, 30·25 inches, occurred on the 3rd; the least, 29·1, on the 31st. The winds came from eastward on ten days. Notwithstanding the numerous rainy days the duration of bright sunshine exceeded the average, and ranged between 50 per cent. in east England, and 27 in north Scotland.

For the *Summer* the dominant feature of the weather was heat and brilliant sunshine. The rainfall was irregular in distribution; some localities got too much, others not enough. Hot weather was prolonged much beyond its usual duration. Smart showers, fresh breezes, hot sunshine, rapid drying characterised the weather until about August 21st, when Autumn intruded with decided cold, dull, rainy, stormy weather.

September, 1897.—The same description of weather as in the latter part of August continued until September 10th, when more favourable conditions prevailed until the 27th. The weather was rather colder than usual, due to preponderance of northerly winds; and, though rainy days were numerous, the rainfall and the sunshine were about normal. The lowest temperature, 29°, was reported at Braemar on the 9th; the highest, 73°, on the 13th, at Ochertyre. The least atmospheric pressure, 29·2 inches, occurred on the 2nd and 24th; the greatest, 30·6, on the 13th. Thunderstorms occurred on the 6th on the east coast, and on the 29th over the south-east portion of England, the latter being very severe. On the 1st, 1·25 inch of rain fell at Donaghadee, 1·10 at Holyhead; 3rd, 1·40 at Stornoway; 29th, 1·09 at Sumburgh Head, 1·11 at Wick, 1·45 at Cambridge, 1·03 at London, 1·13 at Oxford, 1·18 at Scilly. Fog prevailed for one day in England, the date varying with different localities, and 5 or 6 days were misty in the south and east districts.

A cyclonic storm crossed the entrance to the Channel on the 1st, traversed Wales and the north midlands to the Yorkshire coast by next morning. On the 4th, a lingering waterspout of large size appeared off Cromer. Bright sunshine varied between 41 per cent. in south-west England, and 27 in north Scotland.

October, 1897.—The weather was mild, dry, and superbly fine. The highest temperature, 77°, was reported at Lairg on the 17th; the lowest, 23°, at Glenlee on the 13th. Snow fell over north Scotland on the 12th. At 8 A.M., 14th, the temperature at Hurstcastle was 58°, while at Aberdeen it was only 35°; 15th, Hurstcastle, 60°; Sumburgh Head, 35°; 25th, Valentia, 53°, Nairn, 31°; 26th, Valentia, 58°, Nairn, 32°; 27th, Jersey, 58°, Leith, 38°; 28th, Valentia, 56°, Loughborough, 37°; 29th, Valentia, 60°, Loughborough, 35°; 31st, Scilly, 57°, Cambridge, 37°. On the 13th, 1·19 inch of rain fell at Valentia; 15th, 1·10 at Aberdeen; 16th, 1·43 at Valentia, 1·40 at Roche's Point. Aurora was seen in north Scotland on the 1st and 27th. The greatest atmospheric pressure, 30·6, occurred on the 21st; the least, 29·0, on the 15th. Anti-cyclonic conditions prevailed after the 18th, giving gentle south-easterly winds and brilliant weather till the closing days, when a good deal of mist and fog appeared at night and early morning. There was fog on 7 days, mist on 5 in east England, less in other parts, very little in the north and west. Bright sunshine varied between 45 per cent. in south England, and 27 in north Ireland. During the week ending the 23rd, south Ireland had 64 per cent., and the entire Islands 44 of bright sunshine.

The Year's Weather and the Crops.—In November the dry bracing air, bright sunshine, clear starry nights, morning frosts, few days of strong winds, enabled farmers to sow a large area of wheat. The moderate conditions of weather during the winter were favourable to the wheat plant. March was very mild and very wet, so that little corn could be sown. The wet weather and sodden soil prevented work on arable land, but the mildness brought on the autumn-sown crops. May was dry and harsh, with parching northerly winds and occasional frosts at night, causing damage to vegetation. About mid-May, sharp ground-frosts were general. During the third week, a large percentage of sunshine was experienced over the entire Kingdom, the finest recorded since the establishment of sunshine-recorders in 1881. These conditions of weather favoured an abundant crop of hay. The growth of all crops was rapid in June, owing to rain and warmth. At the beginning of July, the prospect for the harvest was exceedingly good. July, with its intense heat, its brilliant skies, and its fitful thunderstorms, benefited wheat alone of all the crops; whilst grass, roots, beans, peas, potatoes, oats, all declined in condition. During July and far into August the weather was hot, brilliant, and abnormally free from rain, except where the numerous thunderstorms, local in their incidence, happened to bring a capricious distribution of rain, usually of brief duration. Rain fell opportunely in some localities, while others closely adjacent received none. The want of moisture began to be felt by the farming community, meanwhile the winds were drying, the sunshine the hottest and most brilliant ever experienced. Wheat alone of all the crops remained unaffected by the heat and dryness,

but it did not prosper, moisture was wanted to swell the grain. Thus the early promise of harvest was depreciated. Up to August 21st, the weather was very favourable for harvesting. A good deal of rain succeeded, injuring the corn which had not been carried. Sir J. B. Lawes, in his annual report on the wheat, states:—"The only remarkable feature in the climate of the harvest-year ending August 31st, 1897, which has not occurred to some extent before during the Rothamsted experiments, was the great rainfall of September, 1896." The unmanured plot yielded only $8\frac{1}{2}$ bushels per acre, against $16\frac{1}{2}$ in 1896. A reduction of nearly nine bushels per acre over the yield of last year, upon a crop grown under exactly similar conditions, shows very clearly the uncertainty of the British climate. The yield per acre on the plot served with farmyard-manure was $37\frac{1}{4}$ bushels; the mean of five plots, three of which had artificial manures, was $25\frac{1}{4}$, the mean weight per bushel 61 lbs., 2 bushels below and $1\frac{1}{2}$ lb. above the averages of the 45 years, 1852-96. The yield of wheat generally is regarded at or about average. Sir J. B. Lawes estimates the harvest of the United Kingdom to yield nearly 6 millions of quarters available for consumption, leaving a requirement of 24 millions of quarters of imported wheat.

The crop of mangel proved very good, and was gathered in favourable weather.

In October, wheat-sowing commenced under excellent conditions of soil and of weather.

The death-rate for London, which for the week

ending November 21st was 19.9 per thousand per annum, fell by December 26th to 15.1, rose by February 6th to 20.6, was lowest, 13.5, July 3rd: rapidly increased to the highest, 26.2, August 2nd, and quickly fell to 15.3, October 2nd: that for the thirty-three great towns of England and Wales was similar, but rather higher. The rates were swelled by diarrhoea. At London, the deaths weekly attributed to this disease were 16, June 19th, and increased rapidly to 621, August 14th, decreased as rapidly to 32, October 9th. To the excessive and long continued heat of the summer is due the high death-rate in August. A hot summer in the British Islands is certain to be unhealthy. The cause of diarrhoea is indicated by the tale of "the peach of emerald hue warm with the sun and wet with the dew, which wrought the damage which the doctor could not undo," for eating fruit under-ripe or over-ripe disarranges the alimentary system, whence fatal result ensues. Diphtheria has been more or less present, declining, it is said, at the period of Board School holidays; and, due allowance being made for the length of the incubation period, increases as soon as the children reassemble. The deaths in London from diphtheria varied between 25 in the week ending September 25th, and 65, October 30th. The deaths from phthisis were not so numerous as from diseases of the respiratory organs, nor did the weekly numbers vary so much. During the year, the deaths from the latter class of diseases ranged from 492 in the week ending November 14th, to 102 August 28th, and increased to 326 October 30th.

Earthquakes and Volcanic Eruptions in 1897.

On October 3 five successive shocks of earthquake were felt at Limasol, Cyprus, between the hours of 5 and 12 p.m. On October 15, at 11 p.m., a shock was felt in the Rhondda Valley, and the whole population of the district were so alarmed as to rush from their houses into the streets. At first the idea was that a terrific explosion had occurred somewhere in the vicinity, and hundreds of miners waited about for some hours expecting to hear news. The shock was so violent that in some houses the occupants were thrown out of bed, and chairs and other articles of furniture were overturned and in some cases broken. Houses were also rocked in an alarming manner. It is remarkable that on the morning of the same day, at 6.30 a.m., a very slight shock of earthquake was felt at Mentone. On December 17, at 5.35 a.m., a smart shock was experienced over a large area in the western part of England. It was accompanied, or rather slightly preceded, by a heavy rumbling sound, which was variously described as similar to that from a heavy vehicle drawn rapidly by, the rumbling of a train as it passes through a tunnel, the working of a steam-roller, the reverberations of a loud clap of thunder, &c., &c. No very serious damage appears to have resulted, but the visitation was felt by large numbers of people, nearly all of whom were awakened either by the rumbling noise or by the rocking of their beds and the rattling of pieces of furniture. In London very few persons noticed any shock, though it was slightly felt in the northern suburbs, but it travelled up to Lincoln,

thence across to Preston, and south as far as Yeovil, and throughout Wales. At Bristol the shock was severely felt; and at Hereford, St. Peter's Cathedral and St. Nicholas Church sustained damage. An old lady died from fright. The visitation apparently covered a much larger area than the earthquake of April 22, 1884, though it did not do so much damage. According to the investigations of Mr. G. J. Symons, the earthquake of 1897 was spread over an area ten times as great as that of 1884. Prof. Milne said that "the district where motion appears to have been most severely felt is to all seismologists a well-known haunt for British earthquakes. If we draw two lines from Monmouth, one running north to Kendal, and the other in a north-easterly direction to the Wash, and then a third line from Kendal in an easterly direction to Scarborough, we enclose an area, roughly triangular in form, within which statistics tell us that between 1833 and 1873, no fewer than 159 shocks have been recorded." The disturbance no doubt had its origin in the displacement of rocky strata, and the sound proceeded from the grating of stony surfaces. On January 15 three severe shocks of earthquake occurred on the Island of Kishim, in the Persian Gulf. About 5,000 inhabitants, chiefly Arabs, dwelt on the island, but half of these were reported as killed. This estimate of the loss could not have been much exaggerated, for before the close of January 1,400 bodies of the victims had been recovered from the ruins. On April 29 a disastrous earthquake occurred in the

West Indies. The island of Montserrat appears to have been the centre of the seismic disturbance, although the majority of the fatalities occurred on the island of Guadeloupe. The shock was accompanied with a tidal wave. Hundreds of people lost their lives amid the falling houses, and enormous damage was done to property. On May 8 a violent shock of earthquake was felt in Rome. A panic resulted, and there were several narrow escapes. On May 12 it was announced that Vesuvius had been in a state of eruption during the previous 48 hours, and that two large streams of lava had been flowing down the mountain side, uniting with the lava deposits which took place two years ago. The activity in the principal crater was merely normal. A short time later it was reported that another large stream of lava was flowing from the side of Vesuvius, and a space 2,000 metres long and 500 wide was covered with the burning mass, so that of the original soil not a trace remained. The volcano showed great activity, and a large number of incandescent stones and burning cinders were being hurled to a considerable height, as in the case of the great eruption of 1872. All the slopes of Vesuvius are covered with burning débris. On May 15 an earthquake shock was reported from Reno Nevada. On May 30 an earthquake, more or less severe, occurred at 1 p.m. in Ohio, West Virginia, Western Pennsylvania, Maryland, and N. and S. Carolina. No serious damage is reported though much consternation was caused. The duration of the shock was from 10 seconds to a minute. On June 5 shocks occurred at Montana. On June 10 a Corfu telegram to the *New York Herald* states that two very severe earthquake shocks were experienced there at 2.30 in the afternoon, but the place escaped serious damage. On June 12, a smart shock of earthquake was felt at Calcutta at about 5 p.m., lasting some seconds. Although in some parts of the

city little damage was done and the visitation appeared to be brief, the earthquake made itself severely felt in other parts, and it is supposed that from first to last the disturbances continued for fully five minutes. The disturbance appears to have been one of the most severe which ever visited that part. An inspection of the streets showed that few houses had escaped damage of some description, and a large number are in ruins. There were 8 natives killed and many seriously injured. The cathedral spire fell down, and other church towers and spires have collapsed. The Town Hall, High Court, and other prominent public buildings were badly damaged. The Post Office at Chittagong was reported to have been swallowed up. The shock was also felt at Simla, Agra, Bombay, Manipur, and at places far down in the central provinces. Considerable damage was done at Hoogly, Burdwan, Dacca, Gopalpur, Patna, Raniganj, Bankipur, Balasor, &c., &c. At Darjeeling there was a terrific shock, destroying and damaging many houses. At Manipur the ground opened, and the town of Kohima was severely damaged. At Cherrapoonjee some of the hillsides slipped owing to renewed shocks, and in the Cherra Hills 650 people lost their lives. Near the village of Sylhet the loss of life was 300. The earthquake covered a wide area, and was quite exceptional in force, and appalling in the loss of life and destruction of property which it occasioned. On July 1, a despatch from Manila in Spain gave some details of the eruption of the volcano Mazon in the Philippines. The village of Libong was completely destroyed, and 120 of the inhabitants lost their lives. The eruption was accompanied by a violent shock of earthquake, which was felt in many parts of the country. On July 6, three severe shocks of earthquake occurred at short intervals at Voltry and the neighbourhood in the province of Genoa, Italy, but no damage was done.

Storms and Floods in 1896-97.

A RECORD of storms and floods of the most disastrous character during a whole year, the world over, can only be given in the briefest terms in the short space at disposal. The year commences November, 1896, and ends October, 1897. On November 4th it was reported that the town of Ribeira Grande, in the Azores, was almost destroyed, a number of people lost their lives, the crops were ruined and many cattle perished by recent floods. In this month, floods were reported in Servia, rendering the peasantry very destitute. During the latter part of the month, the rainfall at Montserrat, Leeward Islands, surpassed all previous experience. From the 25th the down-pour became incessant, and in the night of the 28th there was a perfect hurricane. Streams overflowed, destroying all the bridges. Roads disappeared, houses were destroyed, and general havoc overtook cultivation. Some four score people lost their lives.

During the last week of December, destructive floods occurred in various parts of Greece by the overflow of the Salambria and other streams, from which incalculable damage resulted. Several villages were inundated and some lives

lost. The southern part of Thessaly was a vast lake. Numerous sheep and cattle were drowned. Serious damage was also occasioned by floods in Boeotia, and the northern districts of the Peloponnesus. On the 29th a report from Melbourne stated that a violent cyclone had practically demolished the town of Nevertire, in New South Wales. Nearly all the buildings were levelled to the ground; two houses were lifted and blown to atoms. Loaded wool-trucks were raised from the line and deposited in the railway-yard. Men were blown long distances, and personal casualties were numerous. The telegraph-line was destroyed. In the early morning of the 28th, a bog-slip occurred near Killarney, in Ireland, which not only devastated a large tract of country, but caused a lamentable loss of life. It was preceded by heavy rainfall. The accident has been investigated and reported upon by a committee of the Royal Dublin Society.

In January, floods following heavy rains occurred in the Thames Valley, in Essex, and in the vicinity of Northampton. They did not entirely subside until the middle of February in the midland and eastern counties, especially in

Leicestershire, Lincolnshire, and the Thames Valley. These floods covered extensive areas. Roads were blocked, houses inundated, bridges broken, besides damage to seed-beds.

In the early days of March, extensive areas of the midland and southern counties of England were flooded, while the winds wrought ruin to buildings, trees and fences, besides numerous wrecks at sea. The Mississippi Valley suffered from floods in March, owing to heavy rainfall and the melting of snow. 50 persons were drowned near Memphis, and by estimation 5,000 refugees flocked to Memphis and Dyersburg.

The first week of April brought overflow of the Garonne. The district of Bordeaux was several feet under water. Cattle were drowned and many farmers ruined.

About June 7th, as the result of heavy rains, various parts of Switzerland were flooded, and much damage done to the crops. Near Brientz the railway and roads were covered with debris brought down by the Lammbach. Between 5 and 6 P.M., 18th, a tornado suddenly assailed Paris, lasting not longer than ten seconds, but in this short time it uprooted trees, overturned carriages, toppled over chimnies, lifted roofs, scattered about all detached objects, killed 21 persons, and injured 90. About 3 P.M., 24th, an appalling tornado, lasting about a quarter of an hour, traversed a district of Essex. It unroofed houses, toppled over chimney-stacks, levelled plantations, and destroyed crops. Glass and slates were broken by lumps of ice which fell. It was experienced over Epping, Chelmsford and Colchester, an area embracing 100 square miles. Large numbers of animals were killed, but human life seems to have escaped destruction.

About July 5th, hailstorms and inundations were reported from many parts of France. Bridges, houses, railways, telegraphs, and crops were destroyed, representing an enormous loss. The Gaze overflowed. The inhabitants of Luz, Bareges, and the Bastan villages in the Pyrenees had to desert their houses. The destruction was so serious that in a night many people passed from comparative wealth to direst poverty, notwithstanding no deaths were reported. On the 21st, the north side of London experienced a heavy fall of rain and hail, when the sewers proved inefficient and local floodings occurred. By the 28th, owing to heavy rains, Feodosia and Kertch were under water, the warehouses and

dwellings in the low-lying quarters of both towns being completely flooded. At the end of July, considerable loss of life and destruction of property were reported from various parts of Europe, through floods arising from persistent heavy rains. In Prussia Silesia the devastation was more wide-spread than at any previous period during the present century. The Oder, Wein, Neisse and other rivers carried away bridges and houses. Similar destruction occurred in the Tyrol and in northern parts of Bohemia.

At the beginning of August floods of surpassing magnitude were developed in the Tyrol, Saxony, and Bohemia. Railway-bridges were destroyed, houses and whole villages submerged. The Danube at Vienna rose 12 feet. About the middle of the month serious floods occurred in Asiatic Russia, due to heavy rains, causing the rivers Ingoda, Chilka, Tsehiki, and Onon to overflow. Numerous bridges and many houses were destroyed, and crops were lost. Fortunately few lives were lost. In the latter part of August many of the rivers in Telemarken, in Southern Norway, overflowed their banks. Bridges were swept away, and the ordinary means of communication disorganized. For thirty-five years the roads were never so badly injured by floods.

On September 9th a typhoon was experienced at Yokohama, causing floods, attended by much loss of life and property. On the 12th, a hurricane in Texas demolished houses at Port Arthur and Sabn Pass; a great wave followed, overwhelming both towns, unfortunately with some loss of life.

About the 13th extensive floods occurred in the neighbourhood of Valdepenas, in Spain, owing to heavy rains; traffic on the railway was interrupted, and measures of relief had to be taken for the distressed people.

On September 1st a very high tide in the Thames, together with the thunderstorms of the previous week, caused acres of the low-lying land to be submerged above Teddington.

On October 12th a terrible cyclone occurred in the Philippine Islands, devastating Leyte. An immense wave engulfed several villages, drowning many hundreds of natives. On the 24th, floods were reported in Italy by the overflow of the Salinetto, Jordino, Tronto, and other rivers, owing to heavy rains. Railway traffic was stopped, and many buildings undermined by water.

Progress of Astronomical Science, 1897.

THE ASTEROIDS AND PLANETS.

To the end of September, 1897, 425 minor planets have been discovered. At the same time last year 417 had been discovered; since then eight more have had permanent numbers assigned to them, and names have been given to the following:—

No. 345. Tercidina.	No. 412. Elisabetha.
„ 346. Hermentaria.	„ 413. Edburga.
„ 347. Pariana.	„ 416. Vaticana.
„ 348. May.	„ 420. Bertholda.
„ 350. Ornamenta.	„ 421. Zähringia.
„ 354. Eleonora.	„ 422. Berolina.

Of the eight new planets discovered in the past year, four of them were found by Wolf, one by Witt, and three by Charlois.

It appears that the proportion of new planets to old ones, found on the photographic plates, is

small. In the "Bulletin Astronomique" for October 1896, it is stated that out of thirty-nine plates taken in the past year, no planets were found on eleven—the remainder contained in the aggregate fifty-two planets, forty-six of which were old ones, and six were new discoveries.

The rotation periods of the different planets continue to receive attention from various observers, with more or less conflicting results. M. Nylands made a determination of Jupiter's rotation period from observation of spots at different Jovian latitudes, and finds in south latitude 12° a period of 9h. 55m. 0s., in south latitude 33° one of 9h. 56m. 24s.

It seems probable, from circumstances connected with the observations, that these spots are not portions of the planet itself, or are, at any rate, not rigidly attached to it, and therefore that

the periods observed are those of the spots only, differing (though perhaps not greatly) from that of the planet. The rotation periods of Mars and the Earth are the only ones known with any great degree of accuracy.

Professor Schaberle observed Jupiter's fifth Satellite in February, 1896, with the great Lick telescope. It had been lost sight of since 1894, yet its observed place was in good accordance with the prediction of the ephemeris.

The suggestion of Sir W. Herschel that his observations showed the period of rotation of the third Satellite to be nearly the same as that of its revolution round the primary, receives confirmation from the observations made at the Lowell Observatory, which give 7h. 5m. about as the time of rotation.

Towards the end of August, large spot groups were observed on the sun, one of which had a diameter between four and five times that of the Earth. This was a somewhat unusual occurrence, as the maximum spot period was supposed to have occurred some three years previously. As regards the question of oxygen in the sun, we may consider that the thin lines found by Ruge and Paschen, which coincided with those of oxygen as seen in a vacuum tube, do not belong to the solar atmosphere. The recent observations of Mr. Jewell show that in each case the line was weak or strong according as the sun was high or near the horizon, leading to the conclusion that they are of terrestrial origin, and probably due to the presence of aqueous vapour in the atmosphere.

Arrangements are in progress for observing the total eclipse of the Sun on January 22, 1898. Very valuable results may be expected from the favourable conditions under which it will be visible. The length of path of the shadow across India will be about 1,000 miles, with a breadth of about 50 miles, several points on the track of the shadow being easily accessible by railway.

f (1896). A new Comet discovered by Perrine in Vulpecula, at the Lick Observatory on November 2, 1896. It was observed at Edinburgh with the 15-inch refractor, in which it appeared as a faint round nebulosity, with a nucleus equal to a Star of about the 12th magnitude. It was observed at Greenwich on the 29th and 30th of November, and noted as being rather bright, with a decided nucleus. After perihelion, it was not visible in the northern hemisphere. It was nearest to the Earth on April 12, 1897, being then about seventy-three millions of miles distant.

g (1896). Another Comet discovered by Perrine at Lick in R.A. *oh.* 52m. 27s. and Decl. 6° 24' N. This showed as a Star of about the 8th magnitude, with a tail about 30' long, and having a bright and well-defined nucleus. It passed the perihelion on November 26, 1896. According to Professor Ristenpart, there is some reason for supposing a connection between this Comet and that of Biela, judging from the elements, which closely resemble those of Biela, affording a fair presumption that Perrine's Comet may have separated from Biela's, which is known to have split up into two Comets in 1845.

D'Arrest's Comet (June, 1851) was found by Perrine (at the Lick Observatory) on June 28, in R.A. 2h. 1m. and Decl. 6° 14' N., in the north-east part of the constellation Cetus. The perihelion passage occurred in May, and at the time of re-discovery the Comet was steadily declining in brightness. It was observed by Cerulli on August 25, and described as being

extremely faint and agreeing well with the predicted place, being only 30s. in defect in R.A. a (1897). Observed by Perrine, at the Lick Observatory, on October 16, 1897, in R.A. 3h. 36m. and Decl. 66° 47' N., and reported as equal to a Star of the 8th magnitude. A small tail was observed. The Comet is supposed to have passed perihelion at the time of discovery.

Struve's companion to Procyon was re-observed by Professor Schaberle, in position angle 318° and distant from Procyon 4''·6. It had not been seen since 1874, when Professor Otto Struve and his assistant observed it. The position angle was then 95°. At this time it could not be seen with the 26-inch refractor at Washington. Dr. Anwers gave it a period of very nearly 40 years, with a radius of orbit of 1''.

The companion to Sirius was observed by Professors Aitken and Schaberle on October 24, in position angle 189°, and distant 3''·81. These results were confirmed by Professor Schaberle, who observed it again on the 29th and 31st of the same month. This faint companion became invisible in 1890, owing to its near approach to the brighter Star, and was re-observed by Dr. See, at the Lowell Observatory, in August, 1896. The place of Dr. See's Star does not agree with the predicted place of the previously observed companion, but that observed by Schaberle and Aitken does. These latter observers were unable to detect Dr. See's Star, and possibly assuming that there was no error in the observations of Dr. See, there may be two companions to Sirius. The observations of Schaberle and Aitken receive further confirmation from those of Pritchett, made with the Equatorial of the Morrison Observatory, which give for position angle 195° and distance 3''·5.

A new variable Star was discovered by Dr. Anderson, of Edinburgh, in R.A. *oh.* 42m. 14s., and Decl. 34° 53' N. An increase in magnitude was noticed between October 21 and November 8: from this date to December 24 its magnitude changed from 8·5 to 9·4. A second new variable was also discovered by the same observer on May 29; ten days later it appeared to have undergone no change, but on July 9 and 10 he was unable to see it with a 2¼-inch refractor. The Star is situated in Coma Berenices, in R.A. 12h. 23m. and Decl. 32° 17' N.

The interesting variable Nova Aurigæ, which had, for some years past, remained at 9½ magnitude, was examined at the Radcliffe Observatory on March 10, and found to have diminished to the 11½ magnitude. The flickering fluctuations in brightness, which had attracted the attention of observers in previous years, were again noticed. A day or two subsequently, the magnitude was recorded as 11·6. It is perhaps going through another series of rapid changes.

OBSERVATORIES.—At Greenwich, the 6-inch photographic telescope has been mounted, and is, at the present time, in full work. The same mounting carries, as a pointing telescope to the 26-inch, the 12¼-inch telescope (formerly housed under the old drum-shaped dome, where now stands the 28-inch Equatorial), a reflector of 30 inches on the Cassegrain plan with a 6-inch finder, and a photoheliograph of 6 inches aperture. Including all attachments, this instrument weighs about 10 tons, yet being well balanced can be moved easily. After many trials, a suitable site has been found for the new Magnetic Pavilion, at some distance and nearly

due east from the main buildings of the Observatory.

At the Cape Observatory, work with the McClean telescope has been delayed, while the hydraulic floor was being constructed. The whole installation is expected to be complete at the end of 1897. The astrographic work goes steadily on. Fifty-five plates for catalogue, and 244 for the chart, were taken in the period embraced by the last "Report." Out of the chart plates, 174 were passed as satisfactory, and 26 of the catalogue plates were completely measured by two observers. An examination of the plates taken for the Cape photo "Durchmusterung," showed that 218 stars appeared to be missing. Out of these, 8 have been proved to be new variables, and 104 new double stars have been discovered. The Government have agreed to the proposal for an increase in the staff at the Cape Observatory, somewhat on the same lines as at Greenwich, and have granted the funds for a new reversible Transit Circle. Mr. Joseph Lunt has been appointed physical assistant at the Cape, and will have charge of the McClean telescope.

At the University Observatory, Oxford, Professor Turner and his staff have been chiefly engaged on the work of the astrographic catalogue. A grant from the Royal Society was obtained to enable the Professor to employ more computers for the measurement of the plates already taken, and the energies of the staff have been employed rather in measuring, than obtaining, more of the desired number of plates. Of 1,180 taken, 155 have been already measured. Some of the reductions have also been proceeded with, and it is estimated that one-fifth of the whole work has been done. Professor Turner is trying the experiment of a photographic Transit Circle, and intends (should the instrument turn out as successful as is hoped) to use it in determining the places of the fundamental stars for the reduction of the astrophotographic catalogue.

At the Cambridge Observatory, a new photographic telescope is shortly to be erected. The instrument will be made by Sir Howard Grubb, and it is hoped that the building will be commenced in the present year. It is proposed to use it principally for the determination of stellar parallax.

At the meeting of the British Astronomical Association on March 31, 1897, it was announced that the Royal Botanic Society had offered a site for an Astronomical Observatory in Regent's Park, at a peppercorn rent, an offer which the Association gladly accepted. This site is near to that where Mr. Bishop's Observatory formerly stood, and where Mr. J. R. Hind made his planetary discoveries. No doubt so large a society will be enabled to build an Observatory fully equipped with modern appliances, the advantages of which will be much appreciated by the numerous body of amateur astronomers who are anxious to extend their astronomical studies, yet prevented from doing so by considerations of cost.

Owing to the prevalence of bad weather at Paris during the greater part of the past year, the astrophotographic work has been somewhat retarded. One hundred and forty catalogue plates were taken, and only three chart plates of the Ecliptic. Sixty-one of the catalogue plates have been measured, giving an average of nearly five hundred stars to each plate. The third volume of the Paris Catalogue of Stars, ranging

from 12h. to 18h. of R.A., has been published during the year. The whole is expected to be finished in 1900.

Bad weather generally interfered with the work at the Bidston Observatory. The Transit instrument has been mostly used for the determination of time, and also by students (for educational purposes), under the superintendence of the Director. The Equatorial has been devoted to the observation of Comets.

Although the Melbourne Observatory is crippled by the want of funds (owing to the depressed state of the colonial finances), great progress has been made in taking plates for the astrographic chart, but their discussion is delayed by the insufficiency of the present staff. The reduction and printing of the meridian observations are also at a standstill from the same cause.

At the Perth Observatory, Western Australia, the two most important instruments are the transit circle and the astrographic equatorial with coelostat. It is purposed to undertake observations for determination of the places of the southern fundamental stars. The Observatory will also take charge of the meteorology of the colony. Daily weather charts of the entire continent, accompanied by weather forecasts, will be issued.

Dr. P. Harzer has been appointed to the Directorship of the Kiel Observatory, as well as Professor of Astronomy, in the room of Dr. Krueger.

The Karlsruhe Observatory, under the management of Dr. Valentiner, has been transferred to Heidelberg, where a new building has been erected for the instruments.

A new Observatory is being built at Rössgen, in Saxony, and will be devoted to stellar photometry, catalogues of coloured stars, and the construction of photographic charts of those regions of the sky which contain variable stars.

At the Observatory on Mount Etna, some difficulty has been experienced in carrying on the work, not as might have been expected owing to fiery eruptions, but from frequent snowfalls, often over 7 feet, and sometimes as much as 16 feet in depth. The Observatory is 9,600 feet above the sea, the mean temperature for the year being only a little above the freezing point.

Soon after the great lens of the Yerkes Observatory had been safely installed, one half of the ascending floor of the dome fell, and was completely wrecked; fortunately without accident to life or limb, or injury to the instrument. The opening ceremony was further delayed by the absence, in Europe, of Mr. Yerkes.

On October the 21st, the formal presentation took place of the great telescope, the Observatory, and its other equipments. Mr. Yerkes, in his speech, expressed the pleasure he had in presenting such a gift to the University of Chicago, and President Harper accepted the gift on behalf of the University.

The 24-inch lens of the Lowell Observatory, used by Dr. Drew for physical observation of Mars, is to be applied by Dr. See in re-observing the region of the southern hemisphere which was formerly surveyed by Sir John Herschel.

ASTRO-PHOTOGRAPHY.—At a meeting of the permanent "Comité International" in May last, it was considered that the progress of the work on the photographic catalogue and chart had progressed satisfactorily. It was resolved that the probable error of the rectangular co-ordinates measured must not exceed $0''.20$, and that as soon

as each Observatory taking part in the work had measured these, they should be published with the data for reducing them to equatorial co-ordinates. Also, that the method of determination of magnitude adopted by each should be such as would enable them to be easily reducible to one common system. The chart is to be produced by photogravure on copper, the original scale being doubled. M. Loewy, who had been for many years on the staff of the National Observatory at Paris, has been appointed to the Directorship, in place of M. Tisserand.

M. Perrotin has resigned the Directorship of the Nice Observatory to undertake the management of the Astro-Physical Observatory at Meudon.

Professor M. F. Folie, Director of the Royal Observatory, Brussels, has resigned on account of ill-health.

On the retirement of Professor Newcomb from the office of Superintendent of the American Nautical Almanack, Professor Hendriksen has been appointed to fill his place.

M. Boudenot, Deputy of the Pas de Calais, moved a resolution that the time in France and Algeria should be Paris time, retarded by 9m. 21s. As Paris is this much east of Greenwich in longitude, it is practically adopting the Greenwich Meridian. If this should be finally accepted by France, Spain and Portugal would probably fall into line, and then Western, Central, and Eastern European time will be in use in their respective zones.

From May the 1st, in Belgium, time reckoning for general use will count 24 hours for the day, the hour after Noon being called 13A. instead of 1A. P.M., and so on. It is much to be wished that we in England would adopt a similar course. Such a method has long been in use in Italy. In Ireland, Dublin time is still used.

In America, Miss Catharine Bruce has given a sum of money for the foundation of a prize to be presented annually for services rendered to astronomy, without restriction of race, nationality, or sex.

The gold medal of the Royal Astronomical Society was awarded to Professor E. E. Barnard, and Mr. Lewis Swift has received the first award of the Hannah Jackson-Gwilt gift from the same Society, which consists of a bronze medal and a gift of money.

In answer to a question asked in the House of Commons, on July 26, Mr. Goschen said that as soon as the arrangements had been completed the public would have an opportunity of purchasing copies of such photographs, taken with the Thompson telescope at Greenwich, as the Astronomer-Royal may consider suitable.

Astronomers came in for a share of the Jubilee honours, the Astronomer-Royal being created a C.B., Dr. Huggins and Professor Lockyer, C.B., being each made K.C.B.

OBITUARY.—Dr. Hugo Gylden, who died on November 9, 1896, in his 56th year, was born at Helsingfors in Finland, and, after studying at the University there, entered the Observatory at Pulkowa as a pupil of Dr. Struve. He was appointed Director of the Stockholm Observatory in 1871, leaving for Göttingen after 13 years' service. He was the author of numerous scientific works, and is said to have published more than 200 memoirs, those on astronomical subjects being of very high merit. Dr. K. Bohlín has been appointed Director at Stockholm in succession to Dr. Gylden.

Professor W. C. Winlock, born in March, 1859, died in September, 1896. Professor Winlock graduated at Harvard in 1880, and was appointed to the U.S. Naval Observatory at Washington, a position he held till 1889, when he was chosen Curator of the International Exchanges in the Smithsonian Institution, to the Annual Reports of which he contributed the papers on the progress of astronomy.

Dr. Julius T. Wolf—the last of Argelander's pupils, died in the past year, at the ripe age of 76. Dr. Wolf managed his private Observatory at Bonn, directing his attention chiefly to photometric work.

Dr. Benjamin Gould died in November, 1896, aged 72. Born in Boston, he graduated at Harvard in 1834, and was the founder and editor of the "Astronomical Journal," a valuable and well-known publication to all astronomers. Unfortunately its publication was suspended in 1861 by the outbreak of the Civil War. In 1870 he went to the Argentine Republic, and built the National Observatory at Cordova, of which he was the Director for several years. While here he published his great work, the "Uranometria Argentina" (the Uranography of the southern hemisphere), for which he was awarded the gold medal of the Royal Astronomical Society in 1883. Dr. Gould was one of the earliest astronomers to perceive the advantages that photography would possess for astronomical investigations. On his return home, in 1885, he resumed the interrupted publication of the "Astronomical Journal," continuing it till the end of his life. Previously to taking up his astronomical work, he, in 1845, went to Europe, and studied for a short time at the Observatories of Greenwich, Paris, and Berlin. In 1866, Dr. Gould was engaged in the determination of difference of longitude between European and American stations, by means of the Atlantic cable. Dr. Gould had been in ill health some time previous to his death, which was accelerated by an accidental fall downstairs.

Dr. Axel Möller (born February 16, 1830, died in October, 1896), was Professor of Astronomy and Director of the Observatory at Lund in Sweden. He was elected an Associate of the Royal Astronomical Society in 1874, and was awarded the gold medal in 1881 for his investigation of the path of Faye's Comet, and its disturbing effect on the orbit of the Asteroid Pandora (55).

Mr. Thomas Gwyn Elgar, an amateur astronomer, died in the beginning of the year 1897. He was the author of "The Moon" (a valuable contribution to scenography), containing a full history of our Satellite, accompanied with maps of the principal physical features. Mr. Elgar was educated at the Bedford Grammar School, and studied mathematics under De Morgan at King's College, London. He was by profession a civil engineer, and, settling in Bedford in 1866, devoted himself to astronomy. Mr. Elgar was elected a Fellow of the Royal Astronomical Society in 1871, and, when the British Astronomical Association was formed, undertook the direction of the Lunar Section. Mr. Elgar was chiefly known by his investigations on the geography of the Moon; that, and his book (mentioned above), is evidence of the great labour and skill displayed on this, his favourite study.

Professor Wilhelm Döllén, a well-known Russian astronomer, died on February 16, 1897. He was appointed an Assistant at the Dorpat Observatory in 1839, and transferred to Pulkowa

in 1844, where he remained till 1890, when he retired from official life to Dorpat, at the same time that Otto Struve resigned the direction of the Pulkowa Observatory.

M. Antoine D'Abaddie, geographer and astronomer, was born in Dublin in 1818. After travelling in Brazil, he lived several years in Abyssinia, and was the author of very important works on both these places. Besides his writings he was also a practical observer, having observed the Solar Eclipse in Norway in 1851, that of 1860 in Spain, and again in 1882 at St. Domingo. He was one of the observers of the Transit of Venus in 1874, and took the direction of the expedition to the Antilles, to observe that of 1882. In 1896, he bequeathed to the Paris Academy, of which he was made a member in 1867, an estate in the Pyrenees, subject to life interest to his wife, and a sum yielding 40,000 francs, on the condition that the Academy should prepare a catalogue of half a million of stars within 50 years.

E. J. Stone, F.R.S., Radcliffe Observer, died at Oxford on May 9, 1897. Mr. Stone was born in 1831, took the degree of fifth Wrangler in 1859, and was elected a Fellow of Queen's College, Cambridge. In 1860, he was appointed Chief Assistant at the Greenwich Observatory, and, after 10 years' service, was transferred to the Cape Observatory, the work of which he directed till 1879. He then retired, partly through ill-health, and on his arrival home was appointed Radcliffe Observer. While at Greenwich, he undertook a re-discussion of the observations of the Transit of Venus made in 1769, deriving from them a value for the Solar Parallax differing from that previously found. The re-discussion gave 8".85 for the Parallax, equivalent to a mean distance of the Earth from the Sun of 92,560,000 miles. For this work, the Royal Astronomical Society awarded him their gold medal in 1859. While at the Cape, Mr. Stone reduced and published the observations of his predecessor, Sir Thomas Maclear, and completed the systematic observation of the southern hemisphere, producing a catalogue of 12,441 stars. This was published in 1881. Mr. Stone observed the Transit of Venus in 1874 at the Cape, and was entrusted by the Government Committee with the organisation of the expeditions for observing that of 1882, afterwards superintending the work of the

discussion of the results. In 1881, Mr. Stone was awarded the Lalande prize of the Academy of Sciences in Paris; he also served the office of Secretary to the R.A.S. for four years, and was elected President in 1881. The science of mathematical astronomy has been enriched by many other valuable papers contributed by him. Mr. Stone has been succeeded by Dr. A. H. Rambaut.

The Rev. A. Freeman, Rector of Murston, near Sittingbourne, and a well-known astronomer (whose contributions to astronomy and science generally were of a high order), died on June 12, 1897. He acted as Plumian Professor of Astronomy from 1860 to 1882.

Dr. Alibert Marth died on August 5, 1897, at Heidelberg, in his 69th year. Dr. Marth was a pupil of Professor C. A. F. Peters, and came to England as assistant at Mr. Bishop's Observatory in Regent's Park, where he discovered the Asteroid Amphitrite (29) in 1854. From 1855 to 1862 he had charge of the Durham University Observatory, and assisted Mr. Lassell in observations of Satellites and nebulae at Malta. In 1881, he took charge of Colonel Cooper's Observatory at Markree Castle, County Sligo. He was the author of many communications to the Monthly Notices of the Royal Astronomical Society, including valuable Ephemerides of Satellites of Planets, and surface configuration of Mars and Jupiter. He became a fellow of the R.A.S. in 1878, and the University of Durham conferred on him the honorary degree of M.A.

Alvan G. Clark died at Cambridge, Massachusetts, in June 1897, in his 65th year. At the early age of 20 years, he entered into partnership with his father. He was the maker of the largest lenses at present in use, having produced the 20-inch lens of the U.S. Naval Observatory; the 30-inch of Pulkowa; the still larger one of the Lick Observatory; and finally, that of the recently-installed telescope of the Yerkes Observatory, the largest lens in existence.

Astronomical and physical science sustained a serious loss by the death of Mr. Adam Hilger, another famous optician, on April 3, 1897. Mr. Hilger was more particularly known as a maker of spectroscopes, and the auxiliary instruments used by astronomers, as well as the optical instruments required by physicists.

SOME ELEMENTS OF THE PLANETARY SYSTEM.

Name.	Mean Distance from Earth in Millions of Miles.	Sidereal Period of Revolution round Sun.	Time of Axial Rotation.	Real Diameter in Miles.	Volume $\ominus=1$.	Density $\ominus=1$.
The Sun...	92.9	D.	H. M.	866,400	131,000	0.25
Mercury...	56.9	88	607 48	3,030	0.056	2.23

Neptune ..	2,698.8	60,127	9 30½	32,900	100	0.20
			...			

* The periods of rotation of Mercury and Venus are more probably equal to their periods of revolution.
 N.B.—The numbers in the third column refer to the mean distances at inferior conjunction for inferior planets; at opposition, for the superior planets.

To use this Table, take the Sun's declination in the left-hand column, and under the required latitude on the horizontal line will be found the apparent time of Sunset. Subtract the quantity found as above from 12h., and the remainder will be the apparent time of Sunrise.

This Table is arranged for Northern latitudes, but will serve equally well for Southern by changing the declination from North to South, and vice versd.

DECLINATION.		LATITUDE.

The local mean time of the observed altitude, when reduced to the corresponding Greenwich mean time, may be converted into sidereal time by means of the table on the next page. It will be observed that the sign on the left-hand side of the correction in Table I. is to be used when the argument is on the left, and *vice versa*; + means that the correction is to be added to the reduced altitude and - that it is to be subtracted. The corrections derived from the double-entry Tables II. and III are always added. In order to make the quantities taken out from Table III. additive they have been increased by 1'; this quantity must therefore be taken away from the final result.

TABLE III. (1888.)

To obtain the Sidereal Time corresponding to any given Mean Time, by means of the above tables, all that is required is to take the Sidereal Time at the preceding Mean Noon (which will be found on the second page of each month) and add to it the Sidereal Equivalents opposite to the hours, minutes, and seconds of the given Mean Time. If the sum of these numbers comes out more than twenty-four hours, twenty-four hours must be subtracted from it. For example:—

Let it be required to find the Sidereal Time corresponding to the Mean Time 21h. 15m. 30s. on November 6:—

Sidereal Time at Noon on November 6	H. M. S.	
Mean Time intervals and equivalents from table	21h. =	15 2 54
above	15m. =	21 3 26 ⁹⁹
	30s. =	15 2 ⁴⁶
		30 ⁰⁸

Corresponding Sidereal Time = 12 21 53⁵³

This table may also be used to show the acceleration of Sidereal on Mean Solar intervals, by subtracting the Mean Time arguments from their Sidereal Equivalents.

(Additional to pages 13 to 77.)

PERIODICAL COMETS.

These form a constantly increasing and highly interesting class of bodies. There is not a single year that passes but which is marked by the return of a periodical comet. The diligence of modern observers has enriched this department with some notable discoveries, but it appears that though new comets of short period are being introduced by means of planetary perturbations, there are others which encounter vicissitudes of a character sufficiently powerful to endanger their existence. Biela's double comet appears to have disappeared, and it is very probable that Brorsen's comet has followed the same fate, for it could not be found in 1890. No doubt the materials of which these bodies consisted still exist and obey the laws of gravitation, but in the form of comets they will probably never be seen again. Many additions to our knowledge concerning periodical comets have been made in recent years. Thus during the 13 years from 1880 to 1895 there were no fewer than 16 comets of short period discovered. In 1897 four of these comets were expected to return to the Sun, but the conditions were not favourable in three cases and not one of the objects appears to have been re-detected. Success in this direction may, however, yet attend the efforts of comet seekers before the close of the year. Quite a large number of periodical comets are expected to appear in 1898 and 1899, and no doubt the majority of them will be reobserved in their predicted places. The celebrated Eneke's comet, which has the shortest period of all the bodies, will return to perihelion in May next. Wolf's comet, which was well seen in 1884 and 1891, will also return in the summer of 1891, though its position will not be so favourable as it was in the years mentioned. Its perihelion passage will probably occur on June 30, and the following ephemeris is by Berberick:—

EPHEMERIS OF WOLF'S COMET.

Date.	R.A.		Declination.	Bright-ness.
	h.	m.		
1893, June 3	1	42.3	+ 18 18	1.7
" July 5	3	18.3	+ 19 43	2.1
" Aug. 6	4	49.3	+ 16 51	2.3
" Sept. 7	6	4 9	+ 10 2	2.4
" Oct. 9	6	56.9	+ 0 38	2.4
" Nov. 10	7	17.9	- 9 21	2.4
" Dec. 12	7	4.1	- 16 20	2.1
1899, Jan. 13	6	34.1	- 15 31	1.4
" Feb. 14	6	21.4	- 11 31	0.8

In later returns of the comet its position remains unfavourable. Seven revolutions of this object are equal to three of Jupiter and a close approach of these bodies will occur in 1922-3, depriving us, perhaps, of the sight of the comet for a long time, if not for ever. The following table will show the various comets, returns of which are anticipated during the next few years:—

Date of Return.	Period in Years.	Name of Comet.
1898. April ...	5.818	Pons-Winnecke.
May.....	3.303	Eneke.
June ...	8.534	Swift (1889, VI.)
June ...	6.821	Wolf.
Sept. ...	6.307	Tempel (1867, II.)
1899. Jan.....	8.687	Denning (1881, V.)
Mar. ...	33.178	mp el (1866, I.)

Date of Return.	Period Years	Name of Comet.
1899. April ...	6.309	Barnard (1892, V.)
May.....	6.609	Tuttle (1858, I.)
May.....	6.909	Holmes (1892, III.)
July.....	5.211	Tempel (1873, II.)
1900. Feb.....	6.627	Finlay.
July.....	5.800	De Vico-Swift.
Oct.....	5.398	Barnard (1884, II.)
Dec.....	5.456	Brorsen.
1901. Aug. ...	7.480	Denning (1894, I.)
Aug. ...	3.303	Eneke.
1902. Sept. ...	7.059	Swift (1895, II.)
Dec.....	5.534	Tempel-Swift.

A proportion of these must be regarded as uncertain, as they have been observed at one apparition only, but the majority will undoubtedly return at the computed times. It forms a most entertaining branch of astronomical work to trace a small comet threading its way amongst the neighbouring stars from night to night. Large comets appear promiscuously and with more or less suddenness, and in the present state of our knowledge it is impossible to definitely predict the times of their apparitions. The only intimation of their approach is that given by those persevering observers who regularly sweep the firmament in quest of such objects, and are sometimes fortunate enough to sight them before they have visibly developed the conspicuous features which belong to comets of the largest class.

Meteors, also known as Shooting Stars, Bolides, Fireballs, &c., are to be seen at all times and seasons, though they vary considerably in regard to numbers. This branch of astronomy is increasing both in interest and importance, and has made rapid advances during the last half a century. It will doubtless attract special attention during the next few years as it is probable that several brilliant showers of meteors may be observed. There were grand displays in 1899, and for several years near 1833 and 1866, and the period being 33½ years, a maximum return is expected in about 1899. The display is not limited to one year, but apparently recurs in 5 or 6 successive years. Thus in 1898 on the night of November 14 the phenomenon may return with some brilliancy. The meteors are termed Leonids, the particular point from which their flights are directed being within the well-known "Sickle of Leo." They move with great swiftness (apparent velocity 44 miles per second) and leave phosphorescent streaks along their paths. The radiant point does not rise until about 10.20 p.m., so that intending observers should not watch for meteors before that time, but afterwards, and the most productive period will probably be after midnight. There will be no moonlight to interfere with the observations, and this is a fortunate circumstance. When the shower is repeated in 1899, there will be a full Moon and the display will be partially overpowered. In 1900 the Moon will be in her last quarter and interfere to a small extent, but in 1898 there will be no moonlight to obliterate the smaller meteors, though the years of chief abundance will be 1899 and 1900, according to the cycle exhibited by the meteors. On about November 23, 1898, there ought to be another display of these objects, for showers of slow meteors were seen on Nov. 27, 1872, Nov. 27, 1885, and Nov. 23,

1892. These meteors have a short period corresponding with that of Biela's comet and are visible in the evening hours. Their return in 1898 is highly probable, and they should be attentively looked for. The majority of meteor showers are of feeble character, and they are exceedingly numerous. Below we give a selected list of radiant points determined from observations at Bristol in recent years:—

From the above paragraph it will be inferred that the eclipses of the satellites furnish a easy method of determining longitudes; by observing the local times of immersion or emersion. A longitude so determined will not be very accurate in consequence of the gradual extinction of the light, which makes it difficult to estimate the true time of eclipse. The three outer satellites make the difficulty still greater, owing to their slower motions.

With the first satellite, and careful observation, a fair approximation to the longitude may be obtained in circumstances where more accurate and elaborate methods are not available.

No.	Epoch.	Radiant Point.		Name of Shower.
		R. A.	Dec.

35	Nov. 13-28	155	+40	Leo Minorids.
36	Nov. 20-28	63	+22	ε Taurids.
37	Nov. 23-27	25	+43	Andromedes.
38	Dec. 1-14	108	+33	Geminids.
39	Dec. 7-12	119	+29	α Geminids.
40	Dec. 18-29	194	+67	κ Draconids.

The Leonids, No. 31, should be specially looked for in 1897 and few following years, as they form splendid showers of streak-leaving meteors at intervals of about 33 years. There were fine displays of these meteors between 1864 and 1869, and the maximum occurred in 1866.

The Perseids, No. 21 in the foregoing list, display some singular characteristics, for they are probably visible for more than a month, during which period their radiant point is in constant motion to the eastward. The place of the radiant on alternate days during four weeks of the chief activity of the shower is as follows:—

EPHEMERIS OF THE PERSEID RADIANT POINT.

Date.	Position.		Date.	Position.	
	R. A.	Dec.		R. A.	Dec.
July 19	19	+51	Aug. 2	36	+55
" 21	22	+52	" 4	38	+56
" 23	25	+52	" 6	40	+56
" 25	27	+53	" 8	42	+57
" 27	30	+54	" 10	45	+57
" 29	32	+54	" 12	47	+57
" 31	34	+55	" 14	50	+58

Large meteors should be particularly looked for on the following nights:—

January 2, 21, 31; February 3, 7, 10; March 1, 2, 4; April 11-12, 19-20; May 2, 4, 15, 31; June 6-7, 22, 29-30; July 11, 20-21, 25-30; August 3, 5, 7-13, 15, 19-22; September 1-2, 6-7, 11-13, 25; October 13, 15, 17-18, 22, 24, 29; November 1-2, 4, 6-9, 11-15, 19, 27; December 8-9, 11-12, 21. The most noteworthy dates are in heavy type.

TELESCOPIC POWERS NECESSARY FOR OBSERVING CELESTIAL OBJECTS.

LARGE Nebulae such as those in Orion and Andromeda, and bright comets, require very low powers and an extensive field of view, so that the object may be presented in its entirety and its light not so much dispersed as to obliterate the fainter portions. If it is desired to critically examine the structure of a comet's nucleus or details of a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers 70 and 100, reveals the spots in great variety of form and grouping.

The craters, mountains, and plains of the Moon are satisfactorily seen with 100, though for very minute features powers of 300 and 400 are necessary on a 12-in. glass. Solar and lunar eclipses are best visible under powers of 50 and 75. The power used should not be too high to enable the whole disc of the Sun or Moon to be seen in the field of view.

Occultations of naked-eye stars by the Moon may be well observed with a 3-in. glass, power 75.

The phases of Mercury may be discerned with 75; those of Venus are plain with far less power. To see these planets under their best aspects, examine them near the times of sunrise or sunset.

The most conspicuous spots on Mars, such as the *Syrts Magna* (Kaiser sea of Proctor and Green's charts), may be discerned with 90 on a 2-in. refractor, but powers of 300 and 350, and an 8-in. refractor or 10-in. reflector, are essential to display the outlines of the more delicate markings.

Jupiter's belts are perceptible in a 1½-in. telescope, power 40, but for studying their different forms and variable appearances and the proper motions of the bright and dark spots a larger telescope and powers of 250 and 300 are requisite. The four bright satellites are visible in an opera-

glass. Transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and power of 150. Satellite V. has never been seen in any glass smaller than 18½-in. Cassini's division in Saturn's ring and his principal dark belt are to be readily glimpsed with a 2½-in. glass, power 120. But magnifiers of 300 and 350, and a much larger aperture, are necessary to reach the delicate features of the planet. A good 4½-in. refractor will sometimes show Encke's division in the ring, also the interior crape ring and five of the satellites, but the air must be good. Titan, the largest of the Saturnian moons, is visible in any small telescope; and Iapetus is also an easy object, though sometimes unduly faint; but Tethys, Rhea, and Dione are much more difficult, requiring care and attention. Enceladus can be seen in a 6½-inch refractor or an 8-inch reflector, but Mimas and Hyperion will need telescopes of at least 10 inches.

For very close double stars, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as in a Lyrae, then a moderate power, such as 100, will give excellent results. For very difficult and close pairs, large apertures are necessary, because separating power is a function of aperture. For observing variable stars a good field-glass is to be recommended. For groups of stars, a comet eyepiece, power 30 and field of 1¼", will be best.

TABLE OF MEAN REFRACTIONS.

Apparent Altitude.	Mean Refraction.	Apparent Altitude.	Mean Refraction.
0° 0'	34 55	15° 0'	3 32
0° 10'	32 49	16° 0'	3 19

12° 0'	4 25	75° 0'	0 16
13° 0'	4 5	80° 0'	0 10
14° 0'	3 47	85° 0'	0 5
15° 0'	3 32	90° 0'	0 0

This Table of Mean Refractions is derived from that by the late Professor Bessel. With the argument 'apparent altitude' it gives the correction to be applied to observed altitudes in order to free them from the effect of atmospheric refraction. As refraction causes all bodies to appear more elevated above the horizon than they really are, the quantities in the table must be subtracted from the observed altitudes.

For an altitude not in the Table, the value of the mean refraction may easily be obtained by interpolation. For example, let the mean refraction be required for 6° 35': here opposite to 6° 30' we have 7' 50", and opposite to the next argument, 7° 0', 7' 20" for the mean refraction, and we see that for an increase of 30' in the altitude, the refraction has decreased 30"; therefore a simple proportion shows us that we must decrease the value corresponding to 6° 30' by 5", which will give 7' 45" as the mean refraction corresponding to 6° 35' of apparent altitude.

The Variable Star Algol (Beta Persei).

THIS is one of the most conspicuous and noteworthy variable stars in the heavens. Its changes of lustre are so considerable and performed in so brief a period that a special degree of interest is attached to this object. Its remarkable fluctuations of light were discovered so long ago as 1669 by Montanari, but the period was not accurately determined until long afterwards. The apparent magnitude of the star oscillates between 2.2 and 3.7, and it passes through its various gradations of brilliancy in 2d. 20h. 48m. 51s. The period is becoming shorter, for it has decreased eight seconds since 1782, when it was 2d. 20h. 48m. 59s.,

according to Goodricke. The star is usually a little fainter than 2nd mag., and remains so for 2d. 13½h., when it rapidly declines in lustre, and within some 3¼ hours becomes about 3½ mag. It continues at this minimum about 15 minutes, then it suddenly acquires greater brilliancy, and in 3¼ hours recovers its ordinary magnitude. The following are the computed times of minima in 1898. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight on the northern horizon, but in the autumn and winter months it may be viewed with advantage:—

JANUARY.			FEBRUARY.			MARCH.			AUGUST.			SEPTEMBER.			OCTOBER.			NOVEMBER.			DECEMBER.

Perpetual Calendar.

By H. F. L. MEYER.

EXPLANATIONS.

The old style ended in Italy on Oct. 4, 1582, and the new style began on Oct. 15, 1582; but in England the old style ended on Sept. 2, 1752, and the new style commenced on the following day, that day being called Sept. 14, 1752. Thus in that year the dates from Sept. 3 to Sept. 13 did not exist. In most other countries the change took place between 1582 and 1752, but Greece, Russia, and the Balkan States still adhere to the old style.

Examples.—To find the day of the week for 17 Nov., 1247. Under the year 47 in the line of the century 1200 stands Tu; take Tu above Nov., and in this line, over the 17th day, stands Su = Sunday.

On what day of the week was April 7, 1800? The letter for the century is W, which for Apr. stands in the second column of the central table, and in this line stands M for the 7th.

When will June 6 be on a Monday? The 6th day shows the M in a line, which for June gives Sa, and Sa for 1800 shows the year 98, and for 1900 the years 4, 10, 21, &c.

LEAP YEARS.

The years in heavier type are leap years, for which the two months January and February must be used. Examples below.

CENTURIES.

96	97	98	99	00

HISTORICAL NOTES.

The 1st January of the year 87 was a Saturday, and of the year 87 was a Monday. The letter for the year 9 is Tu, therefore the 26 July of that year was a Friday. The letter for 90 is W, therefore we use the W for any of the months in that year, and find 6 Jan. to be a Sunday.

There were 5 Sundays in FEBRUARY, when the 29th fell on a Sunday. The 29th shows Su in the last line in which line stands F for FEBRUARY, and F in the line 1800 shows in the column the leap years 1824, 1852, and 1880. The F of 1700 shows 1728, 1756, and 1784.

Which months in 1897 had 5 Sundays? The letter for 1897 is Sa. Use Sa in all the columns, and see how many dates the Su of each line shows.

Sa in the first column belongs to Jan. and Oct., and the Su shows the dates 2, 9, 16, 23, and 30. Sa in the second column is for Apr. and Jul., with the Su dates 3, 10, 17, 24, and 31, but as April has 30 days it is excluded. The third and the next 3 columns show only 4 dates for the Su. The last column gives May, the Su of which has five dates in the first column. The required months are Jan., May, July, and Oct.

A NEW CALENDAR.

The division of the solar year of 365 days into 13 months of 28 days each (excepting the last month which would have 29 or, in leap year, 30) and the commencement of the year on the shortest day would make the calendar more rational and consistent with astronomical events, and also simpler; for the 1st, 8th, 15th, and 22nd days of each month would be on a certain day of the week, and the dates of the full moons, &c., would be more regular. The first day of the first month of the year 1898 would then be the day that is now called Tuesday, 21 Dec. 1897; the last day, the 29th, of the first month, would be a Monday, being Monday, 17 Jan. 1898. The first day of the 13th month would be a Tuesday, that is, Tuesday, 22 Nov. 1898 and the last day the 29th (which is the odd day in 365 = 7 × 4 × 13 + 1) would be a Tuesday, that is 20 Dec. 1898. Christmas Day would then fall on the 5th day of the new year. The new year 1899 would begin on Wednesday, being 21 Dec. 1898; and the first day of 1900 would be a Thursday. The leap day in 1904 would be the 30th of the 13th month.

Examples for Leap Years.

When will Jan. 25 be on a Friday? The 25th day shows the F in the sixth line above it, and in this horizontal line stands Tu for Jan. and W. for Jan. Now Tu for 1800 gave the year 95, and gives for 1900 the years 1, 7, 18, &c., and W is for the leap years in 1900, which are 24, 52, and 80.

In what years will Jan. 1 fall on a Sunday? The 1st day gives the Su for Jan. and Jan. in the 7th line of the week days, and these Su and M for 1800 show the year 99, and for 1900 the years 5, 11, 22, 28, 33, &c.

For further examples see the next column.

ATHLETICS.

AMATEUR athletics were not perhaps in a very flourishing condition in 1897. The shock of 1896, when so many of the champions were relegated to the cold shades of professionalism, had a marked effect upon the meetings of the following year, and, without any bright particular stars to draw the public, the big gates of the preceding seasons were not obtained, and, except on a Bank Holiday or Jubilee Day, athletic meetings were but poorly attended. This was the inevitable result of the action of the Amateur Athletic Association, but we do not anticipate for a moment that the lack of public interest is anything more than temporary, and that with the development of some new champions of proved power, speed, and stamina, athletic sports will be quite as attractive as in the past, and foot-racing flourish once again as second only to cricket as a summer pursuit and pastime.

As regards performances, the year will not be memorable; indeed, the only records made in this country were in connection with walking, and it requires a great stretch of imagination to consider the gait now allowed to pass as fair walking anything but a compromise between a trot and a shuffle. Notwithstanding the vigilance of the A.A.A., the majority of the so-called amateurs of the modern dispensation are up to every conceivable professional dodge, and false entries, and even worse frauds, were constantly being detected, and punishment meted out to the offenders. Every year it becomes more and more evident that the gentleman amateur finds it impossible to mix with the "scum of the course" in the dressing tent, and University and public school men are obliged, much against their will, to give up athletics when they take up a business or profession, owing to the objectionable surroundings of the sport in the present day. This is one reason why golf is so popular. There is no money to be made out of it, it costs money to belong to a good club, and the company on a golf links has some pretensions to decency and social standing. Athletics, football, and cycling are all being ruined by popularity and big gates, and the future of athletics seems to get worse and worse. In America, the English visit of 1895 has certainly done a lot of good, at least four of the New York A.C. team of that year are now declared professionals, and, by latest advices, more will follow. Every amateur athlete in the States is now numbered, like a prize animal or amateur cyclist, but the system is by no means infallible in detecting frauds in such a huge country. B. J. Wefers, the New York wonder, late in the season was credited with 220 Yards in 21 secs. at the Canadian Championships in Toronto, a grand performance if correct, round a curve on a hard path, but otherwise the running and jumping American records remain *in situ quo*. Both in Australia and South Africa athletics are advancing by leaps and bounds, and in each country their Championships discovered exceptionally good men, considered quite equal to hold their own with the best the old country can produce, and it is just on the cards that in 1898 both Australia and South Africa, as well as America, will be represented in the A.A.A.'s Championships, to be held in London on the first Saturday in July.

The Cross-Country Championships, as usual, opened the ball in London in February. On the 20th of that month all three Associations, North,

Midland, and South, held their Championships. The Southern took place at the usual venue, Wembley Park, over a ten miles' course. Nine clubs (102 runners) competed, and the Finchley Harriers, with 98 points, won by 5 points, from the Ranelagh Harriers, the Essex Beagles and Bristol Harriers being a dead heat for third place with 108 points. G. Martin, of the Essex Beagles, was first man home in 65 mins. 37½ secs. The Cavendish Harriers won the Junior Championship over the same course at the same time. The Midland Counties Championship at Northampton was won as usual by the Birchfield Harriers, from five other clubs, with 51 points. S. J. Robinson, of the Northampton A.A.C., being first man home in 50 mins. 12 secs. for about 8½ miles. The Northern Championship at Crewe Hall Park produced twenty clubs, and 175 runners, the Manchester Harriers winning with 66 points from the Salford Harriers, 97 points. H. Harrison, of the winning club, was first man home in 63 mins. 42 secs. The Southern Counties Association, on March 6, brought off a so-called Inter-County race over the Wembley course, Middlesex winning easily from Surrey, Kent, Essex, Sussex, and Suffolk; C. S. Sydenham here easily defeated G. Martin in 65 mins. 48 secs. Naturally, the attempt to split up London into counties failed, as it always will. Another failure on the same day was the Scottish Championships at Paisley, the Clydesdale Harriers winning easily, only one other club finishing six men. S. Duffus was first man home. On the same, the so-called National Cross-Country Championship took place at Trafford Park, near Manchester, nine clubs entering, with 98 runners. The Southern Counties Association had previously withdrawn from the National body, owing to the gross mismanagement of the Championship when held out of London. The Salford Harriers and the Manchester Harriers made a dead heat for first place, 102 points each, S. J. Robinson, of Northampton, being first man home. The Birchfield Harriers were only fourth. The various college meetings at Oxford and Cambridge early in the year failed to produce any very startling performances, and it was impossible to gauge the relative chances of the two Universities for their Easter fixture until they both had held their club sports. The O.U.A.C. held theirs on March 8th and 10th, in fairly fine weather. C. R. Thomas, of Jesus, the old Reading athlete and Welsh Champion, won the Hundred, beating G. Jordan, of University, the President, in 10 secs. (official time); E. T. Garnier, of Oriel, won the Hurdles in 17 secs.; A. O. Dowson (New) won the Hammer with 97 ft. 5 in.; H. F. Deakin (Oriel) took the Mile in 4 mins. 31½ secs.; Hon. F. R. Henley (Balliol) won the Weight with 35 ft., 5½ in.; H. S. Adair (Oriel) carried off the High Jump with 5 ft. 8½ in.; G. Jordan (University) won the Quarter easily in 50½ secs.; and C. H. Carleton (B.N.C.) landed the Three Miles in 16 mins. 2 secs., the Oxonian, Fremantle, not starting; A. L. Danson (Balliol) and W. S. K. Hole (B.N.C.) ran a dead heat for the Half Mile in 2 mins. 3 secs. The Cambridge U.A.C. Sports came off on March 6th and 8th, also in fine weather. W. N. Pilkington (Trinity) won the Hundred from F. L. Carter (Caius) by a yard, in 10½ secs.; E. H. Cholmeley (Jesus) won the High Jump with 5 ft. 8½ in.; Putting the Weight went to J. H. Bullock (Trinity), 39 ft.;

F. L. Carter (Caius) won the Quarter in 5½ secs., C. G. Davison, of Sydney, being second; W. H. Maundrell, of Corpus, won the Hurdles in 16½ secs.; and H. F. Howard (Trinity Hall) won the Mile in 4 mins. 33½ secs. Throwing the Hammer was won by J. A. Halliday (Trinity) with 106 ft. 4 in.; E. Fancee de Laune (Jesus) won the Long Jump with 20 ft. 1½ in.; and W. V. Wood (Clare), the President, won the Three Miles in 15 mins. 29½ secs. The Cambridge team were then selected, and given a trial on the following Saturday against the London Athletic Club at Fenners, the Inter-Varsity programme being selected. The L.A.C. men won by five events to four. Pilkington (Cambridge) won by inches from H. C. Woodyatt (L.A.C.) in 10½ secs., Carter (Cambridge) being third; Howard (Cambridge) won the Mile in 4 mins. 27½ secs., E. J. Wilkins (L.A.C.) being only beaten a foot; E. H. Cholmeley (Cambridge) won the High Jump with 5 ft. 8 in.; and W. FitzHerbert (Cambridge) came out in much improved form, and won the Quarter in 5½ secs. The events won by the L.A.C. were:—Long Jump, E. Batchelor, 21 ft. 7 in.; Weight, W. J. M. Barry, 40 ft. 4 in.; Hurdles, W. M. Fletcher, 16½ secs.; Hammer, W. J. M. Barry, 127 ft. 6 in.; Three Miles, C. S. Sydenham, 14 mins. 56 secs. The Eton College Sports were held about this time, the meeting lasting several days. The best performances were:—100 Yards, Neave, time 10½ secs.; Hurdles, J. L. Phillips, Captain of the Boats, 17½ secs.; Cricket Ball, E. Penn, 106 yards; Quarter Mile, E. Penn, 57½ secs. The Mile was a very poor exhibition as regards time, Macnaughten, the winner, taking 5 mins. 24 secs. for the distance. The Irish Cross-Country Championship was won by the Cork City Harriers, on March 20th, at Clonskeagh, just outside Dublin. The Friday before the Boat Race, April 2nd, a cold and dull but fine day, saw the decision of the thirty-fourth Inter-Varsity Meeting, at the Queen's Club. H. R. H. the Duke of York was present, and, after some capital racing, on a carefully prepared cinder path, Oxford won by four events to three, two resulting in dead heats. An American megaphone was used for the first time in England at this meeting. F. L. Carter (Peterboro and Caius College, Cambridge) ran a dead heat for the Hundred with C. R. Thomas (Llandoverly and Jesus College, Oxford), a most sensational performance. Thomas, however, was far from well, and Carter was the least fancied of the lot, time 10½ secs. Half a yard would have covered the four. E. T. Garnier (Marlborough) won the Hurdles for Oxford easily in 16½ secs., the Cantab, Maundrell, being second; H. F. Howard (Aldenham and Trinity Hall, Cambridge) won the Mile from A. L. Danson, the old Rugbean and Oxonian, rather easily, in 4 mins. 27½ secs.; E. H. Cholmeley (Cambridge and St. Paul's) and E. O. Kirlew (Westminster and Oxford) tied for the High Jump at 5 ft. 7½ in.; and J. H. Bullock (Harrow and Cambridge) took the Weight (16 lbs., from a 10-foot square) with 37 ft. 6½ in.: he afterwards put 38 ft. 5 in. The Quarter Mile was looked upon as the special feature of the meeting, G. Jordan (Dulwich and Oxford) once again meeting his old opponent, W. FitzHerbert, of Charterhouse and Cambridge. At last Jordan had his revenge, beating the ex-amateur champion by eight yards in 49½ secs., only a fifth worse than the sports record, by FitzHerbert. The latter was evidently not in his best form. G. C. Vassall (Charter-

house and Oxford) won the Long Jump easily with 22 ft. 7 in., a fine performance, L. R. O. Bevan, the Cambridge Australian, being second with 21 ft. 8½ in.; Throwing the Hammer (30 ft. circle) was an easy victory for the Cambridge Harrovian, J. A. Halliday, with 97 ft. 9 in. Once more the last event on the card, the Three Miles, was left to settle the question, up to this point the score being level. W. V. Wood, the Cambridge Harrovian, second in the previous year to J. M. Fremantle, the Oxford Etonian, was again expected to make a close fight. At the two miles, these two were in front, Fremantle leading, and he won at the finish, rather easily, by fifty yards from Wood, in the official time of 14 mins. 47½ secs., but 15 mins. 7 secs. was the time of a number of outside clockers, and this was probably correct, the official timekeeper, after giving the time, springing his watch back to zero. This distinctly shows how necessary it is for the A.A.A. practice of having more than one timekeeper to be generally adopted. At the Spring Meeting of the South London Harriers at the Oval on the previous Saturday, H. C. Woodyatt (L.A.C.) clearly proved himself the best of the metropolitan sprinters by winning the level Hundred, on grass, from a large field in 11 secs., which form he supplemented, during the following months, by many victories from the scratch mark. On April 3rd, the Amateur Athletic Association's Ten Miles Championship was decided at Fallowfield, Manchester, only thirteen Northerners competing. A. E. Tysoe, of the Salford Harriers, went to the front in the last lap, and won a splendid race by a yard and a half in 55 mins. 59½ secs.; H. Harrison, of the Manchester Harriers, being second. In the early spring, the Queen's Club made an attempt to start an opposition Public Schools Athletic Meeting against the London Athletic Club's long-established fixture. The head masters, however, would have nothing to do with the new venture, and it collapsed. This left the way clear for the L.A.C. to introduce their eight Public School Challenge Cups into their First Spring Meeting, on April 10th, at Stamford Bridge. The Public School Cups were won as follows:—Hundred, A. M. Leggatt (Bedford Grammar), time 11 secs.; Hurdles, H. S. Keigwin (St. Paul's), time 17½ secs.; Long Jump, N. S. A. Harrison (Haileybury), 20 ft. 4½ in.; Quarter Mile, A. G. Ritchie (St. Paul's), time 53½ secs.; One Mile, H. W. Workman (Repton), 4 mins. 42½ secs.; High Jump, N. S. A. Harrison (Haileybury), 5 ft. 5 in.; Three-Quarter Mile Steeplechase, W. Winterbotham (S. Paul's), time 4 mins. 3½ sec. In the open events, H. C. Woodyatt (L.A.C.) won the Hundred from scratch in 10½ secs., and C. S. Sydenham won the Mile from scratch in 4 mins. 26½ secs.; one of the best handicap performances of the year. On this same day, in an open Walking Race to Brighton from London (Westminster Clock Tower), promoted by the Polytechnic Harriers, E. Knott (S.L.H.) beat the existing record, by covering the distance in 8 hrs. 56 mins. 44 secs. Really good performances were few and far between until the Championships, but we may mention C. S. Sydenham's Two Miles win from scratch at Surbiton Sports, on grass, April 24, in 9 mins. 37½ secs., an easy win. At Nottingham and Horley respectively on May 1st, J. W. Bradley and H. C. Woodyatt won invitation scratch races at One Hundred Yards, 10½ secs. being the time at each place, the fields including

the pick of the Northern and Southern sprinters at either venue. On the same day, at Burnley, S. Elliott, of the Salford Harriers, won the Northern Counties' Quarter Mile Championship in 5½ secs. On May 15, H. C. Woodyatt won the L.A.C. Open 120 Yards Handicap from scratch in 12½ secs., and later on, in June, also won the Civil Service Open 120 Yards from scratch in the same time. 12½ secs., besides several other open handicaps at this distance. At the Irish Championships, held as usual on Whit Monday, in Dublin, the results were:—Hundred, W. Newburn, 10½ secs.; Half Mile, C. H. Dickenson (D.U.), 2 mins. 4½ secs.; High Jump, P. Leahy (Charleville), 5 ft. 8 in.; Long Jump, W. M. Newburn (Dublin), 22 ft. 5½ in.; Putting the Weight, D. Horgan (Bauter), 44 ft. 8 in.; Hurdles, J. A. E. Mulligan (Roscommon), 16½ secs.; Hammer, T. F. Kieley (Carrick-on-Suir), 139 ft. 10 in.; One Mile Steeplechase, N. F. Barron (Kilkenny), 5 mins. 42½ secs.; Two Twenty Yards, J. F. Gallagher (Derby), 23½ secs.; a so. on June 22nd, Quarter Mile, J. C. Meredith (D.U.), 5½ secs.; One Mile, C. H. Dickenson (D.U.), 4 mins. 33½ secs. On the Saturday preceding the A.A.A. Championships, the Scottish Association held their Championship Meeting at Celtic Park, Glasgow, the first sports of the kind since the Association and Union had settled their differences. The performances were good, and the winners as follows:—Hundred, F. W. Sime, 10½ secs.; Hurdles, A. B. Timms, 17½ secs.; One Mile, H. Welsh, 4 mins. 24½ secs.; Half Mile, H. Welsh, 2 mins. 2 secs.; Hammer, J. D. McIntosh, 117 ft. 3 in.; Weight, J. D. McIntosh, 40 ft. 4 in.; Two Twenty Yards, F. W. Sime, 23½ secs.; High Jump, J. B. Milne, 5 ft. 6 in.; Broad Jump, H. Barr, 21 ft. 11 in.; Four Miles, J. Paterson, 21 mins. 10 secs.; Quarter Mile, J. Donaldson, 52½ secs. On the same day, at the Salford Harriers' Meeting, A. E. Tysoe won a level Mile in 4 mins. 28 secs., and C. H. Kilpatrick, the New York A.C. athlete, who had turned professional, and was matched with E. C. Bredin for a stake, was allowed to compete as an amateur in the level Quarter Mile, which he won from S. Elliott in 5½ secs. The A.A.A. Championships took place at Fallowfield, Manchester, on July 3rd, in cold, dull, gusty, miserable weather, which spoilt all the times, and reduced the attendance to very scanty proportions. Two New York A.C. men, W. S. Hipple and R. Sheldon, competed unsuccessfully. A. E. Relf, of the Finchley Harriers, won the Half Mile in 2 mins. 7 sec. from C. H. Dickenson, the Irish Champion. Against a strong wind, J. H. Palmer, of the Essex Beagles, beat H. C. Woodyatt by a foot in the Hundred, in 10½ secs. Also against the wind, in the Hurdles, A. Trafford, of the Birmingham A.C., won by three yards from Mulligan, the Irish Champion, in 17½ secs. In the Quarter Mile, S. Elliott, of the Salford Harriers, running in pneumatic shoes, won by a foot from H. Kenyon (Manchester A.C.), in the poor time of 53½ secs. The One Mile fell to A. E. Tysoe, of the Salford Harriers, in 4 mins. 27 secs., E. Wellin, of the Finchley Harriers, was second, beaten a yard; Welsh, the Scottish Champion, was badly spiked in the race, and lost a shoe, the contest being very unsatisfactory. In the Four Miles Walking Race, the holder, W. J. Sturgess, of the Polytechnic, again won, making a new record for the distance, viz., 28 mins. 24½ secs.,

and also establishing a new record at three miles, 21 mins. 14 sec. C. Bennett, of the Finchley Harriers, won the Four Miles Championship in 20 mins. 52½ secs., C. E. Haydon (S.L.H.) being only beaten a yard and a half. G. H. Lee, of the Polytechnic Harriers, won the Steeplechase (Two Miles) easily in 12 mins. 15½ secs. Throwing the Hammer, 16 lbs., with wire handle (9 ft. circle), fell to T. F. Kieley (Gaelic A.A.), with 142 ft. 5 in.; and D. Horgan (Irish A.A.A.), holder, won the 16 lbs. weight, from a 7 ft. square, with a fine put of 45 ft. 4 in., R. Sheldon (New York A.C.) was second with a put that beat all previous championship performances, viz., 44ft. 5½ in. J. Poole (Windermere) won the Pole Jump with 9 ft. 10½ in.; C. E. H. Leggatt (L.A.C.) won the High Jump with 5 ft. 9 in., and the same athlete, and the holder, again won the Long Jump with 21 ft. 4 in. Subsequently, July 17th, in a contest at Edinburgh, Ireland beat Scotland by seven events to four, but neither side was fully represented, and the performances were not remarkable. At the end of July, Private Cobroy, 1st Yorksire, won the Championship of the Army (half a mile) at the Aldershot Meeting, beating Lt. C. J. L. Allanson, R.A., the old Woolwich cadet, by a yard in 2 mins. 5½ secs. Allanson won the Officer's Mile in 4 mins. 46½ secs.; and Lt. L. B. Bradbury, 2nd Gordon Highlanders, won the Hundred in 11 secs., and the Quarter in 55½ secs. Nothing very remarkable took place during the remainder of the season, but on August 28th, A. E. Relf, the Half Mile Champion, won a Half Mile Handicap through a big field, on grass, at Havant, in the grand time of 1 min. 58½ secs.; and he also won a level Three Quarter Mile Challenge Cup at the Charity Sports, in London, on August 14th, at Wood Green, in 3 mins. 14½ secs., R. Wellin being second, and C. Bennett third, a real Championship performance. At the Finchley Harriers Sports, subsequently, on Sept. 4th, at Kensal Rise, A. E. Tysoe defeated Relf in a level 1,000 Yards Race in 2 mins. 24½ secs. rather easily. Relf, however, at the South London Harriers Meeting at the Oval, on grass, Sept. 11th, won a level Half Mile from Wellin, again second, in 1 min. 59½ secs. and at the same meeting, in the Hundred Yards Invitation Handicap, F. W. Cooper (Bradford Football C.), the winner of the Booth Hall Plate at Blackly, defeated J. H. Palmer, of the Essex Beagles, the Hundred Yards Champion, in 10½ secs. Cooper repeated his victory over Palmer at 75 Yards when the pair met shortly afterwards at the final Essex Beagles Meeting of the year. The annual match between the cadets of Woolwich and Sandhurst took place on Sept. 27th, at Woolwich, when Woolwich, after four successive defeats, at last managed to win the Shield by five events to four, the winners being:—Two Miles, W. A. Bayley (Sandhurst), 10 mins. 47½ secs.; Broad Jump, R. F. A. Hobbs (Woolwich), 20 ft. 3 in.; Hundred Yards, W. W. Muir (Sandhurst), 10½ secs.; High Jump, R. F. A. Hobbs (Woolwich), 5 ft. 4 in.; Half Mile, E. F. St. John (Woolwich), 2 mins. 5½ secs.; Hurdles, E. F. A. Hobbs (Woolwich), 17½ secs.; Shot, G. O. Turnbull (Sandhurst), 41 ft.; Quarter Mile, W. W. Muir (Sandhurst), 54 secs.; One Mile, E. F. St. John (Woolwich), 4 mins. 48½ secs. The Hon. Sec. of the Amateur Athletic Association is C. Herbert, 10 John St., Adelphi, W.C.

The Athletic autumn season opened at the Universities with the Freshmen's Sports at Cam-

bridge, November 1 and 2. The weather was fine but cold, and the form all round if anything above the average. The winners and their schools were:—Putting the Weight, C. S. Young (Brighton and Clare), 30ft. 5in.; High Jump, J. H. Banks (Exeter and Caius), 5ft. 3½in.; One Mile, H. W. Workman (Repton and Fembroke), time, 4 min. 43½ secs.; Workman won the L.A.C. Public Schools Challenge Cup Mile in the spring. One Hundred Yards, W. E. Hind (Uppingham and Trinity Hall), time 10½ secs.; Quarter Mile, P. M. Shanks (University College School and Christ's), time 53½ secs.; One Hundred and Twenty Yards, Hurdles, H. S. Keigwin (St. Paul's and Peterhouse), time 18 secs.; Three Miles, W. Winterbotham (St. Paul's and King's), by a foot from H. W. Workman, time, 15 min. 58 secs.; Long Jump, S. M. Sharwood (Brisbane and Trinity Hall), 19 ft. 10 in.; Throwing the Hammer, S. M. Sharwood, 92 ft. F. L. Carter (Caius) is President, and W. H. Maundrell (Corpus), Hon. Sec. of the Cambridge University A.C. The Oxford U.A.C. began their autumn meetings with the Freshmen's Sports on November 5 and 9. R. B. Arnold (Malvern and Magdalen) won the One Mile in the excellent time of 4 min. 37½ secs.; A. T. Beeching (Tonbridge and Worcester), took the High Jump with 5 ft. 1½ in.; F. J. H. Darton (Rossall and St. John's) won the Long Jump with 20 ft. 1½ in.; and Putting the Weight fell to R. B. Merriman (Harvard and Balliol), with 30 ft. 7 in., but he had been "putting" 36 ft. in practice. The Hundred was won easily by F. J. H. Darton (Sutton Valence and St. John's) in 11 secs. Darton also won the Hurdles, finishing alone in 2½ secs., and the Quarter Mile went to R. B. Arnold (Malvern and Magdalen) in 54½ secs. J. M. Fremantle, of Hertford, is President of the Athletic Club for the year, and E. T. Garnier, of Oriol, acts as Honorary Secretary. On October 10th, a boy, H. A. Jones, age 19 at Framlingham School jumped 23 ft. 6½ in. equaling record, but as the fall in the ground between take off and landing was 14½ inches the performance will not count. As there are rumours of another match with America, the winners and times of the American Amateur Championships, held August 28 at Manhattan Field, may be interesting: One Hundred Yards, B. J. Wefers (New York A.C.), time, 9½ secs.; 220 Yards, Wefers, time, 21½ secs.; Quarter Mile, T. E. Burke (N.Y.A.C.), time, 49 secs.; Half Mile, J. F. Cregan (N.Y.A.C.), time, 1 min. 57½ secs.; One Mile, J. F. Cregan, time, 4 min. 27½ secs.; One Mile Relay Race, New York A.C. (M. W. Long, 50 secs.; H. S. Lyons, 51½ secs.; T. E. Burke, 50½ secs.; B. J. Wefers, 49½ secs.); total, 3 min. 21½ secs. World's record; 120 Yards, Hurdles, on cinders, and loose top rail hurdles, J. H. Thompson, jun. (N.Y.A.C.), time, 16 secs.; 220 Yards, Hurdles, 2 ft. 6 in. high, loose top rail and on cinders, A. E. Krueazlein (Chicago), time, 25 secs. (the record is 24½ secs. by J. L. Bremer of Harvard in 1895); One Mile Walk, S. Liebgold (P.A.C.), time, 6 min 44½ secs.; High Jump, I. K. Baxter (N.Y.A.C.), 6 ft. 2¼ in.; Broad Jump, E. B. Bloss (N.Y.A.C.), 21 ft. 10½ in.; Pole Vault, J. L. Hurlburt, jun. (N.Y.A.C.), 11 ft. 1 in.; Throwing the Discus, weighing 4½ lbs. from a 7 ft. circle without follow, C. Hennemann (Chicago), 118 ft. 9 in., a world record; Putting the 16lb. Shot from a 7 ft. circle, C. Hennemann (Chicago), 42 ft. 7¾ in.; Throwing the Hammer, 16lb. from a 7 ft. circle, J. Flanagan (N.Y.A.C.), 148 ft. 5 in.; the Americans

cannot run longer distances than one mile. The Canadian Championships took place September 25 at Rosedale, Toronto; the N.Y.A.C. team won 11 out of 15 events; One Hundred Yards on grass, B. J. Wefers, 10 secs.; 220 Yards round a curve on a hard path, Wefers, 21 secs., world's record if course correct; Quarter Mile, M. W. Long (N.Y.A.C.), 49 secs., beating Wefers; Half Mile, H. E. Marvel (N.Y.A.C.), 1 min. 37½ secs.; One Mile, J. F. Cregan (N.Y.A.C.), 4 min. 24½ secs.; Two Miles, G. W. Orton (N.Y.A.C.), time 14 min. 25½ secs.; 120 Yards Hurdles, J. H. Thompson, jun. (N.Y.A.C.), time 16½ secs., probably on grass; Three Miles Walk, W. B. Fetterman (N.Y.A.C.), time 24 min. 6½ secs.; High Jump, W. C. Curral (N.Y.A.C.), 5 ft. 1½ in.; Broad Jump, E. B. Bloss (N.Y.A.C.), 23 ft. 1¼ in.; Pole Vault, D. Sinclair (Canada), 10 ft. ¾ in.; Putting the Shot, J. Gray (Canada), 42 ft. 9¼ in.; Throwing the Hammer, J. Flanagan (N.Y.A.C.), 145 ft. 3 in. It was subsequently found that Wefers ran 8 feet short of the 220 yards and the record will not stand.

BILLIARDS.

PROBABLY 1897 was the least interesting billiard season known for many years, and there are increasing indications that the days of exhibition games extending over a week or a fortnight are numbered. The champion can still draw, but there is not the same amount of money in the game as formerly, and even London cannot support three or four shows of this description every week. Less important matches of shorter duration, with a genuine money interest at stake, between good amateurs or even little-known professionals, are much better attended than most of the gate-money exhibitions of champion professors. The "push shot" is now admittedly not genuine billiards, but is not at present generally barred like the spot stroke, although in numerous amateur championships and other important competitions both these strokes are prohibited. The Amateur Championships remain as they were, and Christey and S. H. Fry are likely to enjoy in undisturbed possession their trophies for some time. As regards individual players, Roberts, the champion, is still in a class by himself—a head and shoulders above his fellow professionals. Diggle is certainly next to him, with Dawson close up in the third place. Neither has improved very much on his previous year's form, but Diggle relies largely on the push for his big breaks. Mitchell, North, and Richards were not quite so much in evidence as formerly, and Peall at times played up to his very best form, and then seemed to have long spells of staleness, when his play was barely equal to that of a good amateur. He very rarely had a chance of playing "all in," but when he did his manipulation of the red ball as the spot was as marvellous as ever. Of the younger players, H. W. Stevenson is certainly the coming man. His nursery cannon record, his breaks of 578, 563, &c., prove him to be a most dangerous opponent, and at last, in October, he managed to beat the champion at 9,000 in 24,000, a feat he had not before accomplished. W. Spiller has apparently gone off somewhat, and the extraordinary promise he gave at the end of 1896 has not so far been fulfilled. Although markers' tournaments have been numerous, the play, even of the winners, has not been of an exceptionally high character, and certainly none of the exponents have the freedom and power of cue of Hugh McNeil, who first made his mark, under the name of Harring-

ton, in one of these competitions. One foreign player, from Berlin, Hugo Kerkaw, who is credited with no less than 4,285 consecutive cannons on a small foreign table, played a series of matches in London and the country, but the continental game and tables are not much appreciated here. He made a break of 1,102 during his stay, beating E. Carter's 585 made here in 1896. The Billiard Association is supposed to rule and control the game, but the natural jealousies of the various billiard-table manufacturers and of the professional players themselves, make the task by no means easy for the governing body.]

John Roberts, the champion, who is now over 50 years of age, once more monopolised whatever public interest there was in exhibition billiard matches, but even his incomparable skill failed to draw the immense crowds of a year or two previously, when, no matter whom he might be playing, lovers of the game of billiards were perfectly willing to pay a big price to see the master execute some of his brilliant strokes. Roberts began his 1897 season in January, by meeting H. W. Stevenson, the hero of the nursery cannon record, the latter receiving 9,000 in 24,000. Roberts, amongst his best breaks, put on 525, 498, &c., and won by 66, after a close finish. Stevenson played well, and made a break of 483, 349, &c.; £100 a-side was the stated amount at issue. Roberts then gave J. Mack, of Manchester, a new name amongst the Metropolitan players, 5,000 in 12,000, and beat him without much difficulty. Mack made several breaks of over 200. The champion then gave H. McNeill 4,500 in 12,000, and beat him easily, although McNeill showed a glimpse of his best form with a 472. Then followed a £200 a-side contest, Roberts giving C. Dawson 8,500 in 24,000. The champion was quite off his play until the last week, and Dawson got home by 717. Roberts put in some magnificent breaks, amongst others 728, 667, 650, 580, 538, &c., but Dawson played very consistently, and a long series of innings, like 335, 339, enabled him to always keep his handicap to the good. Then followed Feb. 15th, the big gate-money match of the season, duly worked up to by challenges, articles, &c. The stakes were put down at £500 a-side, Roberts once more trying to give W. J. Peall (who so far had been playing very badly) 12,000 in 24,000. The Egyptian Hall was crowded every day, and the 10 o'clock evening papers in London had special headlines of the match. Peall won by 310, although Roberts at times was seen at his very best. Roberts's principal breaks were 707, 703, 611, 604, 591, 486, 486, 495, 414, 420, 401, and 59 other breaks of three figures—a marvellous sequence. Peall made 425, 395, 310, and 35 other three-figure breaks. Following this match Roberts gave Dawson 8,000 in 24,000, and after a capital match beat him by 192. Roberts's best break was 504; Dawson's, 431. Early in April, Roberts arranged another match with Peall on the same terms as before, viz., 12,000 in 24,000. The gate was not so good as on the previous occasion, and the play not quite so interesting. There was a slight alteration in the terms of the match, as the men agreed to play for one hour and three-quarters each afternoon and evening, instead of the game ceasing whenever either reached his quota of points in any of the twenty-four stages of the match. Roberts was altogether out of form during the first week, but Peall then followed with a period of incapacity. Finally, however, Peall again won by 627 points, on Easter Monday. Roberts made 73 three-figure

breaks, 478, 405, 392, 384, 372, 355, 352, 350, 340, 303 being his best. Peall altogether totalled 36 breaks of three figures, his chief contributions being 316, 310, 242, 227, 223, 208, 204. Roberts subsequently played some matches in the country, but of the purely exhibition order. Outside John Roberts's matches at the Egyptian Hall, most, if not all the interest of the season centred in the play of a serial contest at Messrs. Burroughes & Watts's rooms in Dean St., Soho. The firm, at the commencement of the season, engaged the following players: Dawson and Diggle (scratch), Peall 1,000, Spiller 2,000, for a series of matches 18,000 up spot barred, giving a purse of 100 guineas for the compiler of the highest aggregate, inclusive of the handicap points, up to the close of the season, March 31st. Diggle was always in front, and finally won rather easily, with Dawson second. Perhaps the most interesting of all these games was when Diggle and Dawson met at the end of February. Dawson evidently tried all he knew, and with best breaks of 264, 236, 237, &c., won by 757. Diggle made 407, 319, 324, 314, &c., but Dawson was at one time nearly 2,000 in front, and Diggle could never make up his lost ground. Subsequently, at Manchester, in April, Diggle turned the tables, and won, by reaching 18,000 to Dawson's 17,125, but the match was not nearly so interesting as the earlier one in London. It may be mentioned that at the end of 1896 playing against Diggle, Dawson scored his best spot-barred break, 762, but this was hardly equal to his previous best of 698 on a Standard table. About the same period H. W. Stevenson scored a break of 563 (107 cannons), when giving Harverson 3,000 in 18,000.

Amongst other competitions of the season may be mentioned Messrs. G. Wright & Co.'s Markers' Handicap for a £75 Challenge Cup, and £40 first prize heats 1,000 up spot barred, at their Saloon in Argyll Street. F. Copping, Grosvenor Club (150 start), won the final heat, beating B. Elphick, of Holborn (scratch), by 99. Copping made the best break of 191. Messrs. Wright also gave a valuable Challenge Cup for a London Press handicap, won by Mr. S. Dixon of the *Sportsman*. Messrs. Orme & Sons promoted a Markers' Tournament for £55 in prizes, push and spot barred, with 64 entries, heats 250 up. J. Ayres, of West Kensington, won easily, and C. J. Camps, with 85, took the prize for the highest break. Mr. W. S. Large, of Epsom, won the Licensed Victuallers' Championship Tournament, a very big affair. Oxford won both the billiard matches against Cambridge, the singles by 166 points, and the four-handed by 230 points, both 500 up. A. W. Greig, Jesus, Cambridge, represented his Alma Mater in the singles, against B. O. Hargreaves, of Oriol, Oxford, and W. Mendleson, of Jesus, Cambridge, the long jumper, was the Cantabs' second strong in the Four-handed Match against E. W. Walker, of Balliol, Oxford. Hargreaves made 45 and 40 as his best breaks; 44 was Walker's chief contribution. The spot stroke was allowed. The offices of the Billiard Association are 139 & 140, Fleet St., E.C.

The autumn season commenced in London as usual in October. John Roberts again occupying the Egyptian Hall, after a couple of women professionals had played a very uninteresting series of matches for a week. Roberts, on October 25th, when giving H. W. Stevenson 9,000 in 24,000, made a break of 666, but Stevenson won by 511. Roberts then gave C. Dawson 7,500 in 24,000, but the latter won by 378 points. Roberts, on Novem-

ber 15th, gave W. Speller 4,500 in 12,000; the champion on the first day of the match made a superb break of 681, the best of the 1897-8 season so far. On November 15th Thurston's London and Suburban Licenced Victuallers' Championship began with 172 entries. Messrs. Burroughs & Watts, at 57, Dean Street, Soho, began their exhibition season with the heats of an American Handicap Tournament, 9,000 up spot barred, each heat lasting a week. The players engaged and the handicap are as follows:—E. Diggle and C. Dawson scratch, W. J. Peall 750, W. Speller 1,000, J. Mack 2,000, J. Bateman (of Birmingham) and T. Aitken (of Aberdeen) 3,000. The prize will consist of £100 to the compiler of the highest aggregate number of points inclusive of the handicap start. This will leave only Stevenson, North, Richards, and W. Mitchell of the old professionals quite free lances in the game. W. D. Courtney, W. Cook, jun., and J. P. Mannock are also exhibitionists and instructors. H. Coles, a well-known professional player, died during the year. Memmott, who was frequently playing in London in 1896, was defeated August 9th-14th, at Brisbane, for the Championship of Australia, by Weiss. The game was 5,000 up spot barred, and Weiss won by 409 points. Weiss's best break was 204, Memmott's 292. A similar game between these two, earlier in the year, in Sydney, also resulted in a victory for Weiss.

CRICKET.

ALTHOUGH the International excitement of an Australian team in this country was missing from the Cricket Season of 1897, the County Championship was so unusually close and interesting (the ultimate destination of premier honours being in the balance until the very last week of the season) that the cricket records were even more eagerly watched than in the previous year. We were not without strangers within our gates, as a Philadelphia eleven was with us for several weeks during the summer, and met some of the best teams in the country; but the visitors were not quite up to the standard of our colonials, and although their chief matches are included in the season's averages the Americans had few pretensions to be considered a really first-class side. Once again we were favoured with dry wickets until almost the middle of August, so that the batsmen had all the best of the argument through the first part of the season, and some very large totals of runs were the natural result, the bowler's averages suffering from the same cause. When, at last, the rain came, and the ball at length had a turn, it was too late for the bowlers, who had literally borne the burden and heat of the day, to materially alter their totals. The County Championship first claims attention. Altogether, 132 matches were played amongst the fourteen counties, or six more than in the previous year, when the Australian contests had to be sandwiched in between the other fixtures. As before, the qualification for the Championship was a minimum of seven out and home games. An exceptionally large proportion of the matches, viz., 49, were left undecided; rain, and heavy scoring have, of course, been mainly answerable for this state of things. Yorkshire, Surrey, and Lancashire were the only counties to meet all their opponents in the full series of 26 matches, and it is certainly very satisfactory that two of these counties are left at the top of the list, instead of the Championship falling to a club which had

not a full fixture-card to run through. According to the rule laid down by the M.C.C., "One point shall be reckoned for each win, one deducted for each loss, unfinished games shall not be reckoned. The county which during the season shall have, in finished matches, obtained the greatest proportionate number of points shall be reckoned champion county." The objection to this plan is, that it is possible for a county to win one or two games and draw the rest, and thus gain the necessary percentage of points, but so far this possibility has not come off, and the only thing likely to be said against the right of Lancashire to be considered champion county is that Surrey beat them on the two occasions they met, and that Surrey won one more match than Lancashire. The results and relative positions work out as follows:—

	Played.	Won.	Lost.	Drawn.	Points in.	Finished Games.	Percentage.
Lancashire.....	26	16	3	7	13	19	63.42
Surrey.....	26	17	4	5	13	21	61.90
Essex.....	16	7	2	7	5	9	55.55
Yorkshire.....	26	13	5	8	8	18	44.44
Glouc'st'rahre.	18	7	5	6	2	12	16.66
Sussex.....	20	5	6	9	1	11	9.99
Warwickshire.	18	3	4	11	1	7	14.28
Middlesex.....	16	3	4	9	1	7	14.28
Hampshire.....	18	4	7	7	3	11	27.27
Notts.....	16	2	5	9	3	7	42.85
Somerset.....	16	3	9	4	5	12	50.00
Kent.....	18	2	10	6	8	12	66.66
Leicestershire.	14	1	10	3	9	11	81.81
Derbyshire.....	16	0	9	7	9	9	100.00

Another table will give at a glance the result of every match played, reading from left to right. 1 won. 0 lost. * drawn.

It is fifteen years since Lancashire gained the coveted honour, as they were undoubtedly really first in 1881. In 1889 they shared with Surrey, and both divided honours. They owe their success chiefly to the splendid batting of McLaren and the bowling of Briggs, Cuttall, and Hallam. By the middle of the season it was apparent that Surrey, Lancashire, and Essex were the most likely counties to come out at the top of the tree. Surrey were in front just before the finish and they easily beat Lancashire, and finally had only to escape defeat by Somerset and Sussex to secure the Championship, but the visit to Taunton again proved fatal to the Oval team, and this cost them the pride of place. Both Lancashire and Yorkshire (the 1896 champions) suffered considerably

from injuries to players; indeed, Lancashire at one time were without a leading bowler, the county wicket-keeper, and one of their best bats. The Yorkshire bowling scarcely seemed up to the previous year's calibre. It is difficult to account for Surrey's rather unsatisfactory display. With the splendid bowling team at their disposal, and a bat like Abel playing right through the season, they should have been invincible. The advance of Essex, after the hard struggle the executive have had to keep the Club going at all, is most satisfactory. They can now command good games at Leyton, and with a young and promising team they should do even better this year. Gloucestershire have certainly improved, and the same thing may be said of Sussex. Middlesex could not count a winning bracket until well into August, and with Albert Trotter to help them in 1898 their prospects are also encouraging. Warwickshire were also very badly off for bowling. Derbyshire went all through the season without a single victory. The highest score of the series was 681 for five wickets by Yorkshire *v.* Sussex. In this game J. T. Brown and Tunicliffe established a record for first-class cricket, by totalling 378 for the first wicket, although Abel and Brockwell beat this by one run for Surrey against Hampshire at the Oval a month later. Leicester, 35-35, both against Surrey, at Leicester, June 10, were the two lowest scores of the season. J. T. Brown's 311 for Yorkshire *v.* Sussex was the highest individual total of the season, in either county or first-class cricket. The closure has been applied in 22 instances, six times in the first innings and 16 in the second. Seven times the teams using it have won, in the other instances the matches remained drawn. The best averages of each county were: Lancashire, batting, A. C. MacLaren, 19 innings, twice not out, 879 runs, best innings 244, average 51'70. Bowling, Briggs, 47 innings, 1,149 overs, 340 maidens, 2,294 runs, 140 wickets, average 16'38. Surrey: batting, Abel, 39 innings, 3 not out, 1,833 runs, best innings 250, average 50'91. Bowling, Richardson, 51 innings, 1,398 overs, 436 maidens, 3,387 runs, 238 wickets, average 14'23. Essex: batting, A. J. Turner, 17 innings, 3 not out, 590 runs, best innings 111, average 42'14. Bowling, C. J. Kortright, 28 innings, 478'1 overs, 113 maidens, 1,349 runs, 68 wickets, average 19'83. Yorkshire: batting, J. T. Brown, 35 innings, 3 not out, 1,431 runs, best innings 311, average 43'36. Bowling, C. E. M. Wilson, 3 innings, 37 overs, 12 maidens, 78 runs, 4 wickets, average 19'50. Gloucestershire: batting, S. A. P. Kitcat, 4 innings, 1 not out, 185 runs, 95' best innings, average 61'66; W. G. Grace comes second, with 29 innings, average 39'96. Bowling, G. L. Jessop, 19 innings, 519'2 overs, 162 maidens, 1,113 runs, 58 wickets, average 19'18. Sussex: batting, Ranjitsinhji, 36 innings, 5 times not out, 1,318 runs, best innings 170, average 42'51. Bowling, Bland, 31 innings, 892 overs, 257 maidens, 2,232 runs, 95 wickets, average 23'49. Warwickshire: batting, W. G. Quaife, 27 innings, 6 not out, 983 runs, best innings 178', average 46'80. Bowling, Cresswell, 5 innings, 155'4 overs, 54 maidens, 268 runs, 12 wickets, average 22'33. Middlesex: batting, F. G. J. Ford, 14 innings, 1 not out, 524 runs, best innings 150, average 40'30. Bowling, S. Webb, 4 innings, 99'1 overs, 33 maidens, 213 runs, 14 wickets, average, 15'21. Hampshire: batting, F. E. Lacey, 12 innings, 2 not out, 385 runs, best innings 121, average 38'50. Bowling, Capt. F. W. D. Quinton, 5 in-

nings, 29'4 overs, 8 maidens, 77 runs, 6 wickets, average 12'83. Notts: batting, W. Gunn, 23 innings, 3 not out, 987 runs, best innings 230, average, 49'35. Bowling, W. Attewell, 23 innings, 90'1 overs, 391 maidens, 1,508 runs, 73 wickets, average 20'61. Somerset: batting, L. C. H. Palalret, 20 innings, 1 not out, 593 runs, best innings 92, average 31'21. Bowling, Capt. W. C. Hedley, 16 innings, 290 overs, 90 maidens, 655 runs, 32 wickets, average 20'50. Kent: batting, S. H. Day, 5 innings, 1 not out, 141 runs, best innings 121', average 35'25. Bowling, F. Marchant, 4 innings, 17'3 overs, 3 maidens, 58 runs, 3 wickets, average 19'33. Leicestershire: batting, Knight, 25 innings, 500 runs, best innings 110, average 20'00. Bowling, F. W. Stocks, 12 innings, 307'1 overs, 111 maidens, 705 runs, 31 wickets, average 22'74. Derbyshire, batting, G. Davidson, 27 innings, 3 not out, 745 runs, best innings 121, average 31'04. Bowling, G. Davidson, 25 innings, 768'1 overs, 345 maidens, 1,254 runs, 56 wickets, average 22'39. The Philadelphia team played their first match here June 7, 8, *v.* Oxford University. In all, they played fifteen first-class matches: won 2, against Sussex and Warwickshire, lost 9, and drew 4. G. S. Patterson (their captain) made 162, and A. M. Wood made 100 against Notts, on July 12th, and J. B. King's (their best bowler) average worked out to 24'2. Their highest total was 421, against Notts, and the highest score against them was Kent's 454. They sailed for home August 9th, after a very pleasant tour. Cambridge defeated Oxford by 179 runs, 77 by C. E. M. Wilson, for Cambridge, was the largest individual total. The scores were: Cambridge, 156-336; Oxford, 162-151. The weather was fine all three days, and undoubtedly the better team all round won. Eton *v.* Harrow resulted in a draw. Harrow made 236; Eton followed with 160. Harrow put on 248 for the loss of 4 wickets (T. G. O. Cole making 142), and then declared their innings closed. Eton played out time just under 4 minutes, losing 7 wickets for 208 runs. The first of the Gentlemen *v.* Players matches at the Oval, sides captained by Grace and Abel, was won by the Players, with eight wickets in hand. F. H. B. Champain, 81, was the best score for the Gentlemen, and Baker, 87, was the chief contribution for the Players. The great want of the Gentlemen's side was in the bowling. At the duplicate Lord's fixture, later on, Shrewsbury captained the Players, who won by 78 runs. Shrewsbury's 125 was the best individual score, F. G. J. Ford totalling two not out of 50 and 79, the latter the Gentlemen's best individual contribution.

Taking the season as a whole, and including in addition to the County Championship matches the Philadelphia contests, the chief fixtures of the Universities, the M.C.C. matches with the leading counties and the 'Varsities, and other important matches, viz., North *v.* South, Gentlemen *v.* Players, &c., the averages given below speak for themselves. Run-getting was even more general than in 1895, and although the leading average of 1896, viz., Ranjitsinhji's 57'91 was not equalled, there are three exceeding 50, as against one in the previous year. Abel, Quaife, and Ranjitsinhji, by reason of their more frequent appearances at the wicket, may be considered entitled to more credit for their figures than the three amateurs who head the list, Ford, Druce, and MacLaren, but the three last named have batted quite often enough to render their statistics absolutely reliable and a true and cor-

ect index of their play. Of these, MacLaren only began his cricket half-way through the season, when he did not have the advantage of the fast wickets of May and June, so that his brilliant performances with the bat are all the more meritorious. W. G. Quaife made a distinct advance in his figures from the previous year, and is a defensive batsman is probably without equal in the country. The Indian Prince, if not quite so brilliant as in 1896, distinctly proved that his powers are by no means diminished. Only one batsman, Abel, made more runs than he did, and 1,940 is a total which makes his average look even better than it really is. Abel, with six centuries to his credit, and W. Gunn with four, are again well up in the first flight, Abel's grand total of 2,099 being the maximum total of the year. W. G. Grace senr., is once more the marvel of the cricket field. Notwithstanding his age and weight he still holds his own with the younger players, and is thirteenth on the list, his total of 1,532 runs including four centuries, 126, 113, 116, and 131. Both J. T. Brown and J. A. Dixon have considerably improved on their former totals. H. W. Bainbridge only missed a grand total of four figures by two runs. J. Douglas did so well that it is most unfortunate he is so seldom able to take part in the very best cricket. Of the more recent introductions to first-class cricket, A. J. Turner, and H. B. Chinnery (son of the once one mile amateur champion runner) did well and are likely to still further add to their reputation in the future. In bowling, the splendid record of Richardson must first be noticed. In 1896 his performance with the ball was magnificent, obtaining 246 wickets with an average of 16, but he has improved upon this by taking 273 wickets with an average of about 14½. Altogether in four successive seasons he has now taken over 1,000 wickets. J. T. Hearne is not nearly so good by figures as in 1896, and the same may be said of Mold; Briggs took slightly fewer wickets, but his average was better. Taking batting and bowling together no less than four men in 1897 gained the distinction of scoring 1,000 runs and taking 100 wickets, viz., Hayward, G. L. Jessop, Hirst, and Wainwright. For four men to achieve this feat is quite without precedent in first-class cricket. In addition to all these four players being fine fielders, they have between them scored no fewer than 5,734 runs, and have taken 432 wickets. Possibly Hayward may be considered the best all-round cricketer in England. Gilbert Jessop's advance with both bat and ball was remarkable, and his batting average of 29 from 1,219 runs is likely to be still further improved upon. Amongst the amateurs, Wilson, Heseltine, De Zoete, Stocks, and Cunliffe come out best in the bowling. Albert Trott, who heads the bowling list, will this year be qualified for Middlesex, so he will have largely-increased opportunities of distinguishing himself. Bland, who was new to county cricket, had a fine bowling record for a first season, viz., 21'89; and Bull shares with Jessop the honour of being the only amateur bowler to take over 100 wickets. The following are the complete batting and bowling averages of the season, including all the leading matches and also those with the Philadelphians:—Batting averages (* signifies "not out"): Mr. F. G. J. Ford, 18 innings, 3 times not out, 805 total runs, 150 most in an innings, 53'66 average; Mr. N. F. Druce, 20 innings, 2 not out, runs 928, 227* most in an innings, average 51'53; Mr. A. C. MacLaren, 21 innings, 2 not out, 974 runs, 224 most in an innings, average 51'26; W. G. Quaife,

28 innings, 6 not out, 1,027 runs, most in an innings 178*, average 46'68; K. S. Ranjitsinhji, 48 innings, 5 not out, 1,940 runs, most in an innings 260, average 45'11; Abel, 50 innings, 3 not out, 2,099 runs, most in an innings 250, average 44'65; Mr. J. A. Dixon, 26 innings, 1 not out, 1,100 runs, most in an innings 268*, average 44'00; W. Gunn, 32 innings, 3 not out, 1,266 runs, most in an innings 230, average 43'65; Mr. A. J. Turner, 17 innings, 3 not out, 590 runs, most in an innings 111, average 42'14; J. T. Brown, 48 innings, 5 not out, 1,809 runs, most in an innings 311, average 42'06; Mr. H. W. Bainbridge, 26 innings, 2 not out, 998 runs, most in an innings 162, average 41'58; Mr. J. Douglas, 13 innings, 1 not out, 480 runs, most in an innings 110, average 40'00; Mr. W. G. Grace, senr., 41 innings, 2 not out, 1,532 runs, most in an innings 131, average 39'28; Mr. F. E. Lacey, 12 innings, 2 not out, 365 runs, most in an innings 121, average 38'50; Hayward, 39 innings, 3 not out, 1,368 runs, most in an innings 130, average 38'00; Mr. F. Mitchell, 15 innings, 0 not out, 570 runs, most in an innings 133, average 38'00; Mr. D. L. A. Jephson, 17 innings, 2 not out, 568 runs, most in an innings 102, average 37'86; A. Shrewsbury, 28 innings, 3 not out, 944 runs, most in an innings 125, average 37'76; Mr. C. J. Burnup, 18 innings, 2 not out, 597 runs, most in an innings 108, average 37'31; Mr. J. A. Lester, Philadelphia, 26 innings, 2 not out, 891 runs, most in an innings 92, average 37'12. Also the following well-known players' averages may be interesting—Capt. E. G. Wynyard, 22 innings, 0 not out, 713 runs, most in an innings 80, average 32'40; Mr. A. E. Stoddart, 21 innings, 0 not out, 650 runs, most in an innings 109, average 30'95; Mr. C. B. Fry, 16 innings, 1 not out, 443 runs, most in an innings 122, average 29'93; Brockwell, 45 innings, 0 not out, 1,328 runs, most in an innings 325, average 29'51; Mr. W. L. Murdock, 47 innings, 2 not out, 1,283 runs, most in an innings 130, average 28'31; Lord Hawke, 30 innings, 7 not out, 642 runs, most in an innings 91*, average 27'91; W. Storer, 42 innings, 3 not out, 1,073 runs, most in an innings 160*, average 27'51; Mr. W. W. Read, 16 innings, 4 not out, 291 runs, most in an innings 86*, average 24'25; Board, 41 innings, 1 not out, 870 runs, most in an innings 126, average 22'30. The principal bowling averages worked out on this ample principle are—A. E. Trott, 27'4 overs, 75 maidens, 692 runs, 50 wicket*, average 13'84; Mr. C. E. M. Wilson, 271 overs, 94 maidens, 458 runs, 33 wickets, average 13'87; Richardson, 1,603'4 overs, 495 maidens, 3,945 runs, 273 wickets, average 14'45; S. Webb, 99'1 over*, 33 maidens, 213 runs, 14 wickets, average 15'21; Nice, 105'2 overs, 41 maidens, 198 runs, 13 wickets, average 15'23; Cuttell, 1,121'4 overs, 442 maidens, 1,974 runs, 120 wickets, average 16'45; Briggs, 1,288 overs, 387 maidens, 2,560 runs, 155 wickets, average 16'51; Mr. C. Heseltine, 307'1 overs, 78 maidens, 709 runs, 41 wickets, average 17'29; J. T. Hearne, 1,619'3 overs, 647 maidens, 3,066 runs, 173 wickets, average 17'72; Mr. G. L. Jessop, 983'3 overs, 296 maidens, 2,071 runs, 116 wickets, average 17'85; Mr. H. W. De Zoete, 261 overs, 67 maidens, 636 runs, 38 wickets, average 18'05; Mold 838'4 overs, 283 maidens, 1,769 runs, 98 wickets, average 18'05; Mr. F. W. Stocks, 453 overs, 168 maidens, 994 runs, 55 wicket's, average 18'07; Hayward, 832'3 overs, 244 maidens, 2,073 runs, 114 wickets, average 18'18; Hallam, 1,042 overs, 449 maidens, 1,820 runs, 100 wickets, average 18'20; Haigh, 766'4 overs, 260 maidens, 1,713 runs, 91 wickets, average 18'82; Peel, 764

overs, 275 maidens, 1,405 runs, 72 wickets, average 19.5; Mr. F. H. E. Cunliffe, 655.4 overs, 212 maidens, 1,473 runs, 75 wickets, average 19.64; W. Attewell, 1,194 overs, 51 maidens, 2,029 runs, 102 wickets, average 19.89; Mr. C. J. Kortright, 505.1 overs, 118 maidens, 1,442 runs, 71 wickets, average 20.30. Also the following may be interesting: Mead, 927.4 overs, 322 maidens, 1,905 runs, 89 wickets, average 21.40; Bland, 1,140.2 overs, 337 maidens, 2,798 runs, 129 wickets, average 21.68; Mr. F. G. Bull, 1,007 overs, 243 maidens, 2,634 runs, 120 wickets, average 21.95; Mr. W. G. Grace, sen., 594.1 overs, 181 maidens, 1,242 runs, 56 wickets, average 22.17. Coming to the centuries of the season in first-class cricket, there were 25 instances of individual centuries scored in matches outside the County championship, including those for (2) and against (9) the Philadelphians, giving a grand total of 133. In 1896, with the Australians playing here, the total was 151. Of the 133, 29 were recorded in May, 25 in June, 44 in July, and 34 in August. The highest individual score for the year was J. T. Brown's 311, for Yorkshire v. Sussex, at Sheffield, in July; and eight others—Abel, Baldwin (Surrey), Brockwell, J. A. Dixon, N. F. Druce, W. Gunn, A. C. McLaren, and K. S. Ranjitsinhji—have been credited with over 200; Abel's name appearing twice with 250 and 215. In 1896, Prince Ranjitsinhji had no fewer than ten centuries to his credit, equalling W. G. Grace's record in 1871. In 1897 he had but five, a number equalling that of Wainwright but below Abel, who placed half-a-dozen to his account, all in the championship series. W. G. Grace, Gunn, and G. L. Jessop, each completed 100 on four occasions, and the following thrice: Bagshaw, Baker, G. Brann, J. T. Brown, N. F. Druce—all in extraneous fixtures—W. G. Quaife, Tydesley, and A. Ward. Eighteen totalled three figures more than once. The ten leading scores are—J. T. Brown, 311; Abel, 250 and 215; C. Baldwin, 234; Brockwell, 225; J. A. Dixon, 268 (not out); N. F. Druce, 227 (not out); W. Gunn, 230; A. C. McLaren, 244; K. S. Ranjitsinhji, 260. There were 38 players had the luck to bag a brace of spectacles during the season, W. Abel, for Surrey v. Hants, July 19th; Briggs, for Lancashire v. Hants, May 20th; H. B. Chinnery, for Surrey v. Middlesex, June 23rd; and W. W. Read, for Surrey v. Middlesex, June 28th, being the most notable of the list. On September 17th the following team left Tilbury Docks for Australia on the *Ormuz*, to play a series of matches in Australia: Mr. A. E. Stoddart (captain), Mr. A. C. McLaren, K. S. Ranjitsinhji, Mr. N. F. Druce, Mr. J. R. Mason, Richardson, Storer, Hayward, Board, J. T. Hearn, Hirst, Wainwright, and Briggs. Mr. McLaren, had left a fortnight previously. Jas. Phillips the Middlesex professional accompanied the team as umpire and manager. The colours adopted were the same as before, dark blue with thin stripes of light blue, white and red. Their first match against South Australia at Adelaide began Oct. 28th, and at midday on November 1st, in order to allow the Englishmen to travel to Melbourne to see the Cup run for, play was stopped. South Australia commenced and put in 409 (Hill 200). England with only ten men, Stoddart being too ill to play, then scored 475 (Ranjitsinhji 189, Storer 84). South Australia had added 187 for five wickets when play ceased. The second match v. Victoria commenced Nov. 6th, England winning by two wickets: Victoria 306 (W. Bruce 88) and 247. England 250 (Storer not out 71) and

305 (J. R. Mason 128 not out). The third match, began Nov. 12th at Sydney, v. New South Wales. England again won by eight wickets. New South Wales 311 (H. Domran 104) and 263; England 335 (A. C. McLaren 142, Storer 81) and 237 for two wickets (A. C. McLaren 100, and Ranjitsinhji 112 not out).

CYCLING.

CYCLING has now advanced far beyond the limits of a pastime and amusement. The bicycle is an important factor in the trade and the carrying methods of the country, to say nothing of the increasing importance of the machine in military tactics and manoeuvres. Cycle manufacturing and tyre companies are largely speculated in all over the country, and they have been the means of making millions of some of the most clever and astute of the promoters who first recognised the importance of the new industry, and anticipated the boom in cycling machines which followed their becoming a fashionable mount and a general means of locomotion amongst the better classes of both sexes. Everybody going out of town nowadays appears to take a cycle as part of his, or her, personal luggage, although the railway companies are inclined to dispute the right of the public to regard their two-wheeled steed in that category; but evidently, notwithstanding all opposition, the bicycle has come to stay, and its general use and necessity becomes day by day more and more apparent. The safety bicycle has quite superseded the tricycle, and very few ladies even now patronise the once popular three wheels. From a racing point of view, the past season has been most successful; better machines, better pacing, and new and improved tracks have caused most of the old records of the previous year to be replaced by fresh figures; indeed, from half-a-mile to 620 miles all the old path times are wiped out. It is satisfactory to note that all these new records have been made in England, but strange to say although up to 100 miles the Britisher is in front of the American, Frenchman, German, and other continental natives, after that distance a Hollander, Mr. Cordang, holds all the World's records. J. W. Stocks, R. Palmer, and J. Platt-Betts are the record-holders up to 100 miles, and are all Englishmen and professionals, although they began their racing careers as amateurs. The National Cyclists' Union has at length succeeded in doing away with the pro-amateurs, and its licensing system has so far worked well, although it is difficult to understand how a genuine amateur can allow himself to be ticketed and registered on the same lines as the professional. Amateur cycle racing, however, is at a very low ebb, and it is only outside London that an amateur cycle meeting can make two ends meet from a gate money point of view. At the end of the season the N.C.U. determined to put a stop to road racing and record making, so that probably the road records as they now stand will not be much altered in future. The motor tricycle, which was expected to be strongly in evidence in 1897, has not yet been much of a success, but motor cars have been used as pacers and wind protectors in cycling races abroad, and in the future the motor machine is sure to take its place on the road if not on the racing track. The Cyclist Touring Club has now an immense membership, and is in a great measure responsible for a much improved

supervision over the condition of the main roads of the country.

Racing for the season began in London as usual with the Surrey B. C.'s Spring Meeting at the Oval, on April 10th, on grass very much on the soft side. B. Jackson, 160 yards, won the One Mile Handicap in 2 mins. 35 secs.; T. M. Bourke won the Half-mile Sydney Challenge Cup in 1 min. 20½ secs.; and E. J. Callaghan won the Ten Miles Challenge Cup in 31 mins. 38½ secs. A Half-mile Professional Handicap was won by the scratch man, C. F. Barden, of Putney, in 1 min. 16 secs. On Good Friday a big professional meeting was held on the Wood Green track, the principal event, an unpaced ten miles race, falling to T. W. Chmn, with C. F. Barden second. On the same day at Catford, an amateur meeting was held, I. M. Bourke winning the Five Miles Scratch Race, with F. Burnand second, time 12 mins. 5½ secs. An electric motor tandem with two riders went six miles against time doing the distance on the track in 10 mins. 34 secs. An Easter Monday Meeting at Wood Green was very successful, the big race of the day, Five Miles for professionals, being won by G. E. Martin in 12 mins. 4 secs. On the same day, at Putney, C. F. Barden defeated A. Impens, of Belgium, on the time test, Barden riding a mile unpaced from a standing start in 2 mins. 8½ secs. Also on Easter Monday the new Aston Lower Grounds were opened with a big and well-attended meeting; A. W. Harris of Leicester, a noted ex-amateur rider, meeting with a serious fall and fracture of the skull, from which he died on the following Wednesday, clearly proving cement to be most dangerous surface for the fast racing of the present day. On May 1st, the Catford C. C. held another big fixture; several attempts at records failed, J. W. Stocks and T. Linton being the speed exponents; C. F. Barden, on the time test, was defeated by T. G. Gascoigne in an unpaced mile in 2 mins. 7 secs., a new record. A Quarter-mile Amateur Race fell to T. M. Bourke in 31½ secs., with E. J. Callaghan second, and A. S. Ingram third; T. Osborn, on the final sprint, won a Ten Miles Professional Race in 23 mins. 59 secs. On May 8th, at the Crystal Palace track (the record making track of the year), the Anerley B. C. promoted a race meeting; T. M. Bourke crawling through an Invitation Half-mile in 1 min. 29½ secs., M. Arbutnot being second. A Ten Miles Amateur Race was won by F. Burnand in 24 mins. 11½ secs. On May 5 and 16 the great French professional road race from Bordeaux to Paris took place. There were no English competitors: Rivière, paced by a number of motor cars, finally won after a desperate struggle with M. Cordang, in 20 hours 36 mins. 46 secs., a record. Also on May 15 there was a big professional meeting at the Crystal Palace for professionals; C. F. Barden won a mile handicap from scratch in the very fast time of 2 mins. 5½ secs., a better test of genuine speed than any of the paced trial records. Barden also won a lap (one-third of a mile) race in 46 secs. J. Platt-Betts, using a gear of 106 inches, went for the 1 to 5 miles records, paced by an army of multicycles: his times were—2 miles, 3 mins. 36½ secs.; 3 miles, 5 mins. 26 secs.; 4 miles, 7 mins. 15 secs.; 5 miles, 9 mins. 4½ secs.: he already held the one mile, viz., 1 min. 47½ secs.—all these are World's records. On the same day at Celtic Park, Glasgow, a new cement track 3½ laps to the mile with a maximum banking of nine feet, was opened before a gate of 21,000 spectators; A. A. Chase lowered the Scotch 1 to 5 miles, his full time, however,

being only 9 mins. 48½ secs. R. H. English, of North Shields, once a well-known amateur champion and subsequently a professional rider, died during the same week. On May 22nd, the first part of the Charity Festival took place at Catford; the meeting was a comparative failure. The Half-mile Amateur Corporation Cup was won by I. M. Bourke in 1 min. 32½ secs.; and the final heat of the Stanley Challenge Cup, distance five miles, was won by P. W. Brown, time 13 mins. 15 secs. May 29th saw the One Mile Championship of the London Centre of the N.C.U. at the Crystal Palace, and as a brilliant specimen of modern cycle-racing it stands almost unequalled. The winner, A. S. Ingram, won in 9 mins. ½ sec.—no wonder the spectators were few: the Half-mile was won by I. M. Bourke in 1 min. 32½ secs. At Wood Green, on the same day, a Brassard prize (10s. a day) was put up for the first time in England and won by A. A. Chase; the distance was ten miles, and the time 20 mins. 40½ secs. During the week J. Platt-Betts added two more records to his name, the standing start unpaced mile, 2 mins. 6½ secs.; and the ten miles, 13 mins. 40½ secs. Whit Monday, June 7th, saw race meetings all over the country but no very remarkable results; but on the Tuesday, at the Crystal Palace, there were two matches, one mile and one hour, between J. W. Stocks and J. Platt-Betts. Stocks won both, doing the mile behind pace makers in 1 min. 46½ secs.—a record; and Stocks won the one hour match by covering 33 miles, 164 yards in the time. During the week ending June 12, three noticeable performances took place; all, however, eclipsed later in the season. At Wood Green, in a Professional Twenty-four Hours' Race, in which neither Hure nor Rivière took part, G. A. Patterson rode 288 miles 460 yards in 12 hours, and 502 miles 280 yards in the 24 hours—British record. M. Cordang was thrown, and retired after heading all records up to 227 miles. Stocks made a then world's record for one hour at the Crystal Palace with 32 miles 448 yards, smashing all records from six miles, and M. A. Holbein on the North Roads covered 402 miles in the 24 hours. The first instalment of the N.C.U. Championships took place at Exeter, on the St. Thomas Ground, June 15th. The results will be found in our Sporting Records. Rain fell during the meeting. Accidents caused the amateur Quarter to lose much of its interest, J. A. Metcalf, the winner, finishing alone. The Five Miles Professional Championship, with Stocks, Betts, and Linton absent, and the race a crawl, was not exciting, Barden winning in 14 mins. 3½ secs., 12 mins. 45 secs. being the standard. Falls spoiled the 25 Miles Amateur Championship, ridden with pacemakers. The first five men were inside the standard time of 1 hour 5 mins. On July 17th, the second instalment took place at Birmingham. Fine calm weather, and 18,000 spectators made a success. The racing was nearly all of the last lap order. The first half of the Mile Final (amateurs) took over 4 minutes, and Summersgill, who won, was probably not the best man. The final of the Amateur Five Miles took 17 mins. 42 secs.—need we say more. The Quarter Mile Professional race was a quarter mile crawl, the Professional Mile time was 4 mins. 24½ secs., and C. F. Barden, probably the best man, did not win owing to the waiting tactics adopted; Stocks, Betts, and Linton did not enter. Between the two championship meetings, several important contests were decided. The London County Century Cup at

Herne Hill, on June 26, for amateurs, was won by F. R. Goodwin in 3 h. 55 mins. 22½ secs., but owing to difficulties with the N.C.U. as to pacing, the London County Club's Cuca Cup (twenty-four hours' race for amateurs) was abandoned for the year. The Oxford and Cambridge Inter-bicycle match took place on June 29 at Wood Green. The distances were one, four and ten miles; Cambridge won easily, taking the first two places in each event. A. K. Stuart (Cambridge) won the mile in 2 mins. 42½ secs., and the ten miles in 22 mins. 31½ secs. L. A. Kenny (Cambridge) won the four miles in 11 mins. 19½ secs. On June 25, J. P. Betts regained the record for the paced mile, doing 1 min. 45½ secs. at the Crystal Palace. On July 12, G. Hunt covered 411½ miles on the North Roads (beating Holbein's previous 404 miles) in twenty-four hours; and on the following day, R. Palmer, now a professional, put up a new Brighton and back record of 5 h. 9 mins. 45 secs., which, however, was finally lowered before the end of the season to 5 h. 6 mins. 42 secs. by W. J. Neason. On July 17, the Anerley B. C.'s Carwardine Cup (100 miles amateurs) was won by A. H. Harris in 3 h. 44 mins. 15½ secs. The International World's Championships for 1897 were held at Celtic Park, Glasgow, July 30th and 31st, and August 2nd. Some 45,000 attended during the three days, and the receipts amounted to nearly £2,500. No less than 73 competitors took part in the different races, and ten nations were represented, viz., England, Ireland, Scotland, France, Germany, Holland, Denmark, Sweden, Canada, and New South Wales. The results were—Ten Kilometres Amateur Team Championship, England 1st, with nine points, England winning three out of four heats. One Mile Amateur Championship, E. Schraeder, Denmark, time 3 mins. 24½ secs. 100 Kilometres Amateur Championship, E. Gould, England, time 2 h. 19 mins. 6½ secs. One Mile Open Championship, W. Arend, Germany, time 3 mins. 11½ secs. 100 Kilometres Open Championship, J. W. Stocks, England, time 2 h. 10 mins. 52½ secs. One Mile Match for the Championship of the World between the amateur and open champions: W. Arend beat Schraeder easily in 2 mins. 51 sec. After placing a lot of records to his credit, J. P. Betts sailed for Australia at the end of August, and the following month the usual autumn record breaking began. On Sept. 27th, J. W. Stocks, at the Crystal Palace, rode 32 miles 1,085 yards in the hour, beating all previous world's records from 6 miles, his time for 50 kilos. being 56 mins. 50½ secs. Previous to this, on Sept. 16th, M. Cordang, of Holland, also at the Crystal Palace, splendidly paced, covered 616 miles 340 yards in 24 hours, beating all records from 115 miles, and beating Huret's previous 24 hours' record by 50 miles 1,040 yards. Cordang was so fresh that he rode on and completed 1,000 kilometres in 24 h. 12 mins. 21½ secs., or 621 miles 674 yards. About this time, M. A. Holbein in attempting to beat the World's road 1,000 miles record, fell, and fractured one of his thighs. On September 28th, E. James and G. A. Nelson, at the Crystal Palace, beat the world's tandem records for ten miles by doing 17 mins. 50½ secs., and also making en route world's record for all types of machines at 5 miles, 8 mins. 58½ secs.; six miles, 10 mins. 35 secs.; seven miles, 12 mins. 24 secs. On the same day a quad team, T. Graham, J. Chalmers, J. Jones, W. Dixon, established a 5 miles record, 9 mins. 5½ secs., and a 10 miles, 18 mins. 7½ secs., for this type of machine. On September 31st, E. James and G. A. Nelson, at

the Crystal Palace, rode a standing start tandem mile in 1 min. 45½ secs., and 1 kilometre in 1 min. 7½ secs. With a flying start the same tandem rode a mile in 1 min. 38½ secs., and 1 kilometre in 1 min. ¼ secs. On October 6th, at Wood Green, E. W. Hitchcock and A. O. Earl scored an amateur tandem record for the hour with 27 miles 1,000 yards, and on the same day E. Gould beat all records on the roads for twelve hours, by covering 225½ miles in the hour. For this performance he was summoned and fined by the Sleaford authorities, which will probably put an end to open road record breaking in the future. On October 27th, R. Palmer at the Crystal Palace beat all records from 34 miles to 62 miles, riding 50 miles in 1 h. 34 mins. 45½ secs., and 100 kilometres in 2 h. 59 mins. 47½ secs. On October 29th, A. A. Chase beat the 100 miles road record by doing the distance in 4 h. 16 mins. 35 secs. On October 30th, F. W. Barnes lowered the 8th and back record to 11 h. 48 mins. 42 secs., the tricycle record for the same distance standing at 14 h. 8 mins. 37 secs., being a performance of J. G. Gibbins in 1897. Also, on October 30th, Lewin and Albone put on a new amateur tandem one-hour record at Putney, viz., 28 miles 120 yards. On November 4th, at the Crystal Palace, M. Lombart, of Amiens, made a flying start record of half a mile in 47 secs., and 1 kilometre in 58½ secs., and on the following day rode a standing start kilometre in 1 min. 8½ secs.—a world's record. On November 9th, the Road Records Association passed the following records:—Brighton and back, tandem safety, 4 h. 54 mins. 54 secs., by P. Wheelock and G. Tulford, Sept. 11th, 1897, and Edinburgh to Liverpool (single) 14 h. 35 mins. by T. B. Conway, of the Cuckfield B. C. On November 10th, R. P. Clark, riding a tricycle on the Wood Green track, beat all records for the type of machine at 1 mile in 2 mins. 10½ secs.; 5 miles, 11 mins. 18½ secs., and for the hour with 25 miles 1,085 yards. On November 16th, he added to these on the same track by beating all records from 26 miles, 1 h. 5 mins. 35½ secs., to 100 miles in 4 h. 44 mins. 7½ secs.—world's record for a tricycle. His 50 kilometres' time was, 1 h. 18 mins. 40 secs., and 100 kilometres 2 h. 48 mins. 12½ secs. In 4 hours he rode 85 miles 1,500 yards. The records for the year probably ended with W. T. Hall's reputed 50 miles, unpaced, on the road in 2 h. 37 mins. 53 secs. on November 16th, but this has not yet passed the Roads Record Association. The offices of the National Cyclists' Union, are 57 Basinghall Street, E.C.

FOOTBALL.

CERTAINLY no pastime has become more imbued with the commercial spirit of the age to its detriment than football, under both codes, Rugby and Association. The health-giving exercise of a few years ago has given place to a gigantic money-collecting organization, over governed and crushed down by legislation until a football player is no longer a free agent, but simply a paid hireling, or a puppet obliged to obey the commands of Union or Association, and not even allowed to play a scratch match without permission. The root of all evil (money) is of course the secret of this state of things. Association club matches in the North and Midlands can now secure a gate of 10,000 spectators, and in November, 1897, no less than £1,000 was taken at an ordinary League fixture, between two clubs, not by any means at the top of the tree in 'h.

competition. The Football Association has a most difficult task to hold the scales equally between the professional and amateur elements on its committee, and it is not to be wondered at that it is obliged to more and more shelve the interests of the amateurs in favour of the ever-growing and increasing professional claims for supreme and absolute consideration. The pay of a professional association player is now a comfortable income—£4 and £5 a week all the year round is not unusual, and a wealthy league club, in addition to this, can afford to pay a premium of £200 for the transfer to themselves of a really first-class man from some poorer organisation whose pay-sheet is getting beyond their means. All this may be modern football, but it is hardly sport, and the few football amateurs in spirit as well as in name still find themselves gradually ousted from any possibility of competition in the chief events of the year, which formerly only attracted the attention of the public schoolboy and the University man. The popularity of football has certainly been a good thing for the army, nearly every crack regiment having its team; but if the regimental matches happen to evolve some player of more than usual promise, the league teams committees are quite willing to buy the player in question out of the service and attach him to their club on a good salary. Under the Rugby code the same sort of thing will soon begin. The Union have fought hard and long for their rule, "professionalism is illegal," but the Northern Union have proved too strong for them. The latter's bait of six shillings a day once a week has been sufficient to draw all the best clubs in Lancashire and Yorkshire. Evidently the gigantic sham of the Northern Union's contention that they are still an amateur body, and that this six shillings a day once a week is all they ever pay a player, and therefore the man who takes this small amount once a week cannot be deemed a professional, is about to be abandoned. Everyone knows perfectly well that men are not brought from Devonshire, Cornwall, and Wales to Yorkshire and Lancashire and kept there for a whole year on six shillings a week. When the Northern Union are honest enough to openly declare for professionalism, they should do much better, and secure better support than they even do at present. The legislation of the year, so far as the Rugby Union code is concerned, has not been very drastic; but unless something is done to prevent the present too prominent practice of heeling out, forward play as it used to be understood will cease altogether. Given thoroughly proficient half-backs and properly-drilled three quarter-backs, the modern forward play pays, but without this trinity of conditions, heeling out is not a graceful or paying form of football. The Northern Union, with the candid intention to make the game more open and spectacular have done away with the line out, the ball being kicked from touch in any direction desired. This alteration is clearly not good play, but made solely in the interests of the spectators for faster and more exciting work. A charming ideal, surely. As a result, several good men have declined to play under the Northern rules owing to this new clause. Another new Northern Union rule has also been framed solely in the interest of the spectator and against scientific Rugby football play. A try is now to be three points, and a goal, however obtained, only two points. This will do away with the neatest and most scientific item of Rugby football; a neat pass, short run, and

a successful drop at goal. Dropping goals is the result of long school training, and of course the Northern Union player prefers a fighting, running, and painfully unskilled game according to his professional instincts. The local runner, whether he can play football or not, may make a run in, served by his speed. This will count more than all the clever, carefully trained football of the properly educated player. This, we are afraid, will be the Rugby football of the future, as rearranged for the betting spectator by the Northern Football Union.

Commencing with the Association game as the older of the two codes, the Football Association had a fairly quiet season as regards legislation; but a decision of the council that official sanction must be obtained before a match could be played by a scratch team, naturally brought a hornet's nest about the heads of the governing body elected and founded to govern amateurs and an amateur's pastime. As to the action of a certain high official of the Association we will say nothing, but this absurd ruling and claiming jurisdiction over scratch amateur elevens is the natural outcome of the attempt of any governing body to rule both amateurs and professionals by one set of laws and regulations. The Football Association must be either one thing or the other, amateur or professional, and how gentlemen amateur football players, university and public school men can allow themselves to be governed and controlled by League representatives is a mystery. Until the Football Association divides itself into two distinct and separate bodies, one amateur and one professional, there always must and will be friction and possible disruption. As regards the international matches, England, until the final and crucial test against Scotland, looked all over the winner of the international championship. England playing at home met Ireland at Nottingham on February 20, and won by 6 goals to 0. On March 29, England at Sheffield beat Wales by 4 goals to nil. Wales previously had drawn with Scotland—2 goals each—at Wrexham, March 20; and Scotland at Glasgow (March 27) had beaten Ireland by 5 goals to 1. Ireland had beaten Wales (March 6) at Belfast by 4 goals to 3. On the Scotland versus Wales form, England seemed certain to beat Scotland, but public form in football must never be reckoned upon, as when the Rose met the Thistle at the Crystal Palace (April 3) Scotland won by 2 goals to 1. The Scottish Association, as in the previous year, selected the very best available side, not excluding the Scotchmen in the pay of the English professional clubs. The scores were even, 1 goal each, until six minutes before the finish, when, after an accident to Crawshaw, one of England's best half-backs, Scotland, just before the call of time, gained the winning point by a goal from the foot of Miller. The teams were:—England—Robinson (Derby County), goal; W. J. Oakley (Corinthians), and Spencer (Aston Villa), backs; Reynolds (Aston Villa), Crawshaw (Sheffield Wednesday) and Needham (Sheffield United), half-backs; Athersmith (Aston Villa) and Bloomer (Derby County), right wing; G. O. Smith (Corinthians), centre; Chadwick and Milward (Everton), left wing. Scotland—Patrick (St. Mirren), goal; N. Smith (Glasgow Rangers) and Doyle (Celtic), backs; Gibson (Glasgow Rangers), Cowan (Aston Villa), and Wilson (Sunderland), half-backs; Bell (Everton) and Miller (Glasgow Rangers), right wing; Allan (Liverpool), centre; Hyslop (Glasgow Rangers)

and W. Lambie (Queen's Park), left wing. The international points were as follows:—Scotland won 2, drawn 1, lost 0, points 5; goals 9 for 4 against. England won 2, drawn 0, lost 1, points 4; goals 11 for 2 against. Ireland won 1, drawn 0, lost 2, points 2; goals 5 for 14 against. Wales won 0, drawn 1, lost 2, points 1; goals 5 for 10 against.

Next in importance to the Internationals, if not indeed before them, comes the Football Association Challenge Cup. The final tie was again decided at the Crystal Palace on April 10th, and Aston Villa meeting Everton, beat them by 3 goals to 2. This was public form exactly verified, and strange to say, all the scoring was done in the first half. Upwards of 65,000 people went through the Crystal Palace turnstiles on that day, so that probably the record gate of England v. Scotland at Celtic Park, Glasgow, in the previous year, was equalled if not beaten, as it is unlikely that more than 5,000 people would go to the Palace on the Saturday and not visit the scene of the match. Not only did Aston Villa win the Cup, but they also won the Championship of the League. This double event, Association Cup and the League Championship, has only once before been accomplished, viz., when Preston North End won in 1883-89. The League Competition First Division with 16 clubs engaged, each playing 30 matches, resulted as follows as regards the first 4 clubs: Aston Villa won 21, drawn 5, lost 4, points 47; Sheffield United won 13, drawn 10, lost 7, points 26; Derby County won 16, drawn 4, lost 10, points 36; Preston North End won 11, drawn 12, lost 7, points 34. In the 16 clubs in the Second Division of the League, Notts County were easily first with a record of 30 matches, 19 won, 4 drawn, 7 lost, points 42. Newton Heath were second. In the Southern League, Southampton St. Mary's were easily first with a record of 20 matches, 15 won, 5 drawn, 0 lost, 35 points; Millwall Athletic were second, winning 13, drawing 5, and losing 2, points 31. In the international League matches, Scotland beat both England and Ireland. The Heart of Midlothian, with a record of 18 matches, 13 won, 2 drawn, 3 lost, 28 points, was the head club of the Scottish League, and the Druids were top of the Welsh Senior League. The Old Corinthians won the Football Association Amateur Cup, having to play Stockton two matches before winning the final tie. The Old Corinthians also won the London Cup. The Glasgow Rangers won the Scottish Cup, the Cliftonville the Irish Cup, and Wrexham the Welsh Cup. The Inter-University match was played February 20th, at the Queen's Club, Cambridge, on paper, were the better side, but Oxford won by a goal to nil. Charterhouse furnished no less than 10 of the 22 players, 7 Oxonians, and 3 Cantabs. The Football Association also very properly took over the management of a very interesting match, Amateurs v. Professionals, played at the Queen's Club and won by the Professionals in heavy rain by 3 goals to 1. Amongst other notable Cup winners may be mentioned Cambridge University, Clare College, Oxford University, Oriol College, Inter-Hospitals, Guy's Hospital, Army Cup, R. A. (Portsmouth), Cavalry Cup, 2nd Life Guards. As regards clubs, the Casuals played no fewer than 75 matches, winning 37; but the Luton Town hold a better record, playing 67 matches and winning 50; the Old Cartusians played 31 matches and won 19; Aston Villa altogether played 55 matches and won 33. The

offices of the Association are 61 Chancery Lane, W.C., and Mr. F. J. Wall is the Secretary. The Secretary of the Football League is Mr. H. Lockett, 8 Parker's Terrace, Etruria, Stoke-on-Trent.

The Rugby Union certainly passed through a most trying time last season. Not only did the Northern Union gradually draw away all the best of the Lancashire and Yorkshire clubs to the "broken time" division, but the A. J. Gould testimonial dispute caused Wales to withdraw from the International Board after they (Wales) had beaten England in the first International of the year, so that England, Ireland, and Scotland were left to themselves for the remainder of the International fixtures. The Gould case was a somewhat curious complication. Gould's admirers, in Wales, started a shilling subscription after the manner of the W. G. Grace testimonial, to present the Welsh Champion player with a memento of his extraordinary success and prowess on the football field. Eventually some £600 was subscribed and the Welsh Union decided that the testimonial should take the form of the title deeds of a residence. The International Board decided that the acceptance of such a form of testimonial would be an act of professionalism, and it is hard to see how they could have arrived at any other conclusion. The Welsh Union objected to the jurisdiction of the Board in the matter and withdrew, and the other Welsh matches with Scotland and Ireland were cancelled. The testimonial was eventually presented to A. J. Gould on Easter Monday, at a big banquet at Newport. The Rugby Union by a very wise move practically dropped the Gould case at a meeting in September last, so that diplomatic relations between England and Wales once more exist and the usual Internationals will probably be played in 1898. It may be mentioned that since 1866, the close time for Rugby Union football has been curtailed, and play may now begin September 1st and last until April 20th. After Wales had beaten England, at Newport, Jan. 9th, by a goal and 2 tries to nil, the retirement of the winners robbed the competition of most of its interest. England, on Feb. 9th, in Dublin, were beaten by Ireland by 1 goal and 3 tries to 2 goals and 1 try, the English fifteen having very little the worst of the play. Ireland went to Edinburgh, Feb. 20th, with very good prospects of another victory, but Scotland won by 2 goals to 1 try. Then came the final test, England v. Scotland, at Manchester, on March 13th. Although the victory of the Rose was hardly expected, the return match between North and South at Dewsbury was the means of altering distinctly for the better the formation of the English fifteen. Earlier in the season the South had beaten the North by 1 try to nil, but at Dewsbury, on the second occasion, the North won easily by 2 goals and 1 try to a goal. The English team as revised proved a great improvement on its two previous combinations, and in the second half of the International match scored two goals and a try to a try. This left each country with 1 win, but altogether England scored 4 goals and 2 tries, 21 points; Ireland, 1 goal and 4 tries, 16 points; and Scotland, 2 goals and 1 try, 11 points. England had not won against Scotland since 1892. The sides were: England, J. F. Bryne (Moseley), back, E. F. Fookes (Yorks), W. S. Bunting (Richmond), O. G. Mackie (Cambridge University), and G. C. Robinson (Northumberland), three-quarter-backs. E. W. Taylor (Northumberland) and C. M. Wells (Harlequins), half-backs. R. F.

Oakes (Durham), W. B. Stoddart (Lancashire), J. Pinch (Lancashire), E. Knowles (Northumberland), J. Davidson (Northumberland), L. F. Giblin (Cambridge University), F. Jacob (Cambridge University), and H. W. Dudgeon (Richmond), forwards. Footland, A. R. Smith (Oxford University), back, T. Scott (Langholm), A. W. Robertson (Edinburgh Academicals), W. Neilson (London Scottish), and A. M. Boucher (Edinburgh Academicals) three-quarter-backs, J. W. Simpson (Edinburgh Royal High School), and M. Elliott (Hawick), half-backs. R. G. Macmillan (London Scottish), T. M. Scott (Hawick), W. McEwan (Edinburgh Academicals), J. H. Dods (Edinburgh Academicals), R. C. Stevenson (London Scottish), M. Morris (Royal High School), and A. H. Balfour (Watsonians), forwards. The North and South matches have always been alluded to. The County Championship never before produced so much interest, and at last Yorkshire, weakened by revolt and secessions, lost their championship, Cumberland even beating them. When Kent finally met Cumberland at Carlisle to fight out the final, it was a matter of general surprise that the Southern county not only won but won easily by 1 goal and 2 tries to a try. The Inter-University match at Queen's Club on December 9th was supposed to be a good thing for Cambridge, but Oxford won by two goals (one dropped) to a goal and a try. The Inter-Hospital Challenge Cup was won by St. Thomas', beating Guy's Hospital by a try to nothing. Turning to other competitions, Hull Kingston Rovers won the Yorkshire Cup, and Ulverston won the Lancashire Cup. In the Metropolitan district, Blackheath were certainly the champion club, with 25 matches and 15 wins. Richmond played 18 matches and won 12. The London Scottish were only able to boast 7 wins with 16 matches. In Wales it was a near thing between Newport and Cardiff once more. Newport played 28 matches, winning 23 and losing 4. Cardiff played 30 matches, winning 24 and losing 5, but another Welsh club (Llwynypia) not meeting class teams like Newport and Cardiff, played 33 matches, won 32, and lost 0. Some of the county clubs had wonderfully successful seasons in their class. Northampton played 36 matches and won 31. Barnstaple won 23 matches out of 30 played. The Northern Union chief competitions resulted as follows: Yorkshire Senior Competition, Brighouse Rangers first, with 30 matches, won 22, lost 4, drawn 4. Manningham second, winning 21, losing 5, drawing 4. The Lancashire Senior Competition resulted, Broughton Rangers first, 26 matches played, won 19, lost 2, drawn 5. Oldham second, won 20, lost 4, drawn 2. The Northern Union Cup was won by Batley beating St. Helen's by a goal and 2 tries to 1 try.

GOLF.

PROBABLY no new sport or pastime has made such rapid and general progress as golf. Comparatively speaking, a very few years ago golf was only known as the national game of Scotland, and only Scotchmen played it. Now, however, it is a British all the year round sport; golf clubs and links are to be found near every town of any size in England and Wales, to say nothing of India and Africa, including Benin and Buluwayo. Golf clubs are to be seen with everyone's luggage going out of town, and golf links are now always advertised as an extra and infallible attraction for any holiday resort or watering-place. The

game has so far escaped that bane of all modern athletic pursuits—over legislation and government; at present there is no golfing association. The Royal and Ancient Golf Club is to golf what the M.C.C. is to cricket, the custodian of its traditions and the maker of its laws. Indeed at the spring half-yearly meeting of the Royal and Ancient an attempt was made to form a representative committee of the leading clubs to revise the rule- and control the game, but on being put to the vote the majority were against any change. Undoubtedly the present code of rules, as revised by the Royal and Ancient G.C. in 1891, require considerable simplification. There are many modifications of the existing laws which are rendered absolutely necessary by the new conditions and developments of the game, consequent on its extraordinary increase and popularity, and sooner or later something must be done, even if a few of the ancient traditions of the game have to be interfered with. It is against the spirit of the time for amateurs and professionals to compete together for one and the same championship. So far it has caused no trouble, but supposing Mr. H. H. Hilton to be a good oarsman, sculler, or athlete, he would certainly be liable to protest when competing against amateurs under A.A.A. or A.R.A. laws, having played golf against professionals in a competition where the latter took money prizes. The resumé of the golf year is naturally confined to the championships. It is useless to give the innumerable details of the records of the various links which have been altered during any given season. Very early in the year came the news that the amateur championship of India at Calcutta had been won for the second year in succession by Mr. R. D. Murray, of the Calcutta G.C. The second best score was returned by Mr. Stuart, formerly captain of the Oxford University G.C. In Britain the amateur championship was held at Muirfield for the first time under the management of the Honourable Company of Edinburgh Golfers. The entry list of 74 included nearly all the cracks, and Mr. A. W. Smith, of Toronto, an old St. Andrews golfer. Play lasted from April 27th to the 30th. The weather was cold, dull, windy, hazy, and wet, and the holder, Mr. F. G. Tait, and most of the old and tried hands, were beaten in the initial rounds, two comparative youths being left to fight out the final tie. These two, Mr. A. J. T. Allen, of Edinburgh University, and Mr. J. Robb, of St. Andrews, met on the Friday over 35 holes. Mr. Allan, a medical student of twenty-one, who learned his golf at Musselburgh and the Braids, finally won by 4 up and 2 to play. Mr. Robb is the longer driver, but was excelled by Mr. Allan in approaching and putting. At a meeting after the championship, the venue of the future championships for the next six years was fixed as follows: 1898, Hoylake; 1899, Prestwick; 1900, Sandwich; 1901, St. Andrews; 1902, Hoylake; 1903, Muirfield; this rotation will hold good thereafter. The Open Golf Championship was held for the first time over the links of the Royal Liverpool Club, at Hoylake, on Wednesday and Thursday, May 19th and 20th. The Hoylake links medal record then stood at 73. In the championship the tees were put back as far as possible, and the round measured 6,157 yards. The entry was in every way representative of the best amateur and professional talent. To the Romford professional belonged the honour of returning the lowest score of the meeting, viz., 74, but he was beaten by one point by Mr. H. H.

Hilton, Royal Liverpool, whose four rounds aggregated 314, taking the Championship Cup, gold medal, and £30 in plate. James Braid was second with an aggregate of 315, prize £10. Mr. F. G. Tate, Black Watch, totalled 317; G. Pulford, Hoylake, making the same score; A. Herd, Huddersfield, aggregated 318; and Harry Varden, Ganton, 321. Mr. Hilton won the championship in 1892 at Muirfield, so this was his second victory. He is the only amateur who has ever so distinguished himself, but strange to say he has never yet been able to win the championship confined to amateurs, although he has on three occasions reached the final round. Mr. John Ball, jun., is the only other amateur who has succeeded in winning the Open Championship. The fifth annual Ladies Championship took place at the far-famed Gullane Links, May 25th-26th. The entries numbered 102, including Miss Pascoe, the holder, who went down in the first round. The weather was wet, cold, and unfavourable. On the Monday before the championship began Miss Orr, of North Berwick, won a stroke competition in which nearly all the championship competitors took part; Miss Orr's total was 87. In the final tie, Miss Edith C. Orr and Miss Orr met, and after a magnificent tussel Miss E. C. Orr won the Championship. In April, Hugh Kirkcaldy, a noted St. Andrews professional and open-champion of 1891, died at the early age of 29.

PEDESTRIANISM.

AFTER many years of almost stagnation, pedestrianism has once more taken a prominent place amongst the leading sporting events of the season. The action of the Amateur Athletic Association in 1896 in refusing any longer to recognise as amateurs under their laws, Bacon, Downer, Watkins, Crossland, Bradley, at once gave a fillip to money matches on the cinder path. E. C. Bredin, of his own free will, joined the ranks of the professionals. Conneff and Kilpatrick, the Americans, also gave up their amateur status and came to England to win matches and money, and amongst others J. J. Mullen and "James Craig" or G. B. Tinkler, his real name, came over from the Irish amateur fold to swell the professional ranks. For nearly ten years since W. G. George and W. Cummings ran their series of notable matches, Sheffield and Edinburgh short distance handicaps had been the only professional foot racing events which evoked the slightest public interest, but since the autumn of 1896 matches on the cinder path have been frequent and of increasing importance. Very early in the year, on January 23rd, at Burnden Park near Bolton, "J. Craig" and P. Carroll of America set the ball rolling by competing for the World's Championship at a mile, and £50 a side. The race, on a keen and wintry day, was won by Craig easily at the finish by ten yards in the slow time of 4 mins. 30½ secs. As the best times claimed for these two men at the distance were 4 mins. 26 secs. Craig, and 4 mins. 20 secs. Carroll, their right to run for the World's Championship when Bacon as an amateur did 4 mins. 17 secs. is doubtful. On the following Saturday, Jan. 30th, H. Watkins, of Coventry, ran his first match as a professional with H. A. instead of Greenwich over five miles at Catford Bridge for £50 a side. In cold wind and rain, Watkins won all the way as he liked by a lap in 25 mins. 40¼ secs., his two miles time being 9 mins. 55 secs. On the same day at Rochdale E. C. Bredin on a sloppy path with ice and water

mixed, also made his debut as a "pro." The distance was a quarter of a mile, and W. S. Mills of Rochdale, the supposed professional champion at the distance, his opponent. Bredin, a strong favourite, had his man safe one hundred yards from home, and won easily by twenty yards in 50½ secs., a grand performance under the circumstances. On the following Saturday, February 6th, Bredin met A. R. Downer at 400 yards for £50 a side at Burnden Park, Bolton. The track was soft and the distance too short for Bredin. Downer got away with the lead, and keeping it all through won by two yards, Bredin apparently closing up. The time, 44½ secs., is a professional English record, but in America on a straight path an amateur, W. C. Downs, in 1893 is credited with 43 secs., and at Stamford Bridge H. C. L. Tindall, an amateur, did 43½ in 1889. Downer next on March 20th gave "W. Cross" of Edinburgh, better known as an amateur as W. Lock of Eton, three yards in 150 at Wigan and beat him a yard and a half in "1 yard inside 15 secs." Once more Bredin, on May 1st at Rochdale, opposed Downer. The distance was a quarter of a mile and the stakes £100 a side. Bredin considered he was not quite himself when he met Downer at 400 yards, and also Downer was thought to be running over his distance at a full 44½ yards. Downer however in a boisterous wind alwaysled, and won all out by five yards in 48½ secs., a wonderful performance when the strong breeze is considered. On May 6th, also on the Rochdale ground, F. E. Bacon ran G. Crossland a Ten Miles match for the Championship and £200. It was Crossland's first appearance as a pro. Bacon was a strong favourite, and in pouring rain and wind Bacon waited on his man until the last half lap, and then won without difficulty in 53 mins. 38½ secs., the professional's record (W. Cummings') being 51 min. 6½ secs. Bacon next on May 29th at Aintree defeated H. Watkins at Five Miles easily in 25 mins. 31½ secs., and then on June 19th came the most noticeable event of the year at the Rochdale Athletic grounds, when Bacon on a dull rather drizzling evening beat Deerfoot's 1863 long standing one hour's professional record of 11 miles 970 yards, and W. G. George's 1884 amateur record of 11 miles 932 yards. A bicyclist and several runners paced Bacon and protected him from the wind. The ex-amateur finally accomplished the marvellous distance of 11 miles 1243 yards in the sixty minutes. The gate receipts were £530, and in addition to Bacon taking half this amount he also received £250 from the sporting paper which organised the race. Soon afterwards, in running a quarter mile against Bredin for a big prize at some Scottish Professional Sports, A. R. Downer broke down and Bredin won, and then, after a long delay by C. H. Kilpatrick's backers to see if he could run up to his American world's record time they matched him with E. C. Bredin for the World's Championship at 600 yards, 880 yards, and 1,000 yards each match, and £50 a side. The Six Hundred Yards took place July 31st at Rochdale before a small gate on a perfect day for fast time. Kilpatrick led until twenty yards from the tape, when Bredin shot by and won by two yards in 1 min. 13 secs., not equal to Bredin's own amateur record at the distance. The Half Mile took place at the L.A.C. grounds at Stamford Bridge on Monday evening, August 9th, in fine weather and everything conducive to fast time. Kilpatrick led until the last two hundred yards (time for the quarter 57 secs.) when Bredin, served by the slow pace, spurred by him and won all out, but easily, by nearly four yards, in 1 min. 55¼ secs. The 1,000

yards match was subsequently declared off. In the meantime F. E. Bacon and E. C. Bredin at last came to terms for a sequence of races, one at 1,000 yards to begin the series, and on the 18th Sept. Bacon at Colchester made an attempt on the Five Miles record, 24 mins. 40 secs., standing to J. White's credit. Half a gale of wind and rain quite spoilt the attempt, and Bacon could do no better than 25 mins. 42 secs. On Sept. 25th Bredin and Bacon met at Ashton-under-Lyne for the One Thousand Yards Championship and £50 a side. Bredin was allowed to lead at his own pace, the quarter mile time being only 1 min. 3 secs. In the last two hundred yards Bacon tried his usual spurt, but he had at last met a faster finisher than himself, and Bredin won by half a yard in 2 mins. 30½ secs. The track was slow and the race uninteresting. The pair then met again at three-quarters of a mile on Nov. 13th for the same stake at Catford, and Bacon won rather easily in the slow time of 3 mins. 2½ secs., as against the English professional time of 3 mins. 7 secs., by W. Richards.

RACKETS AND TENNIS.

Rackets deserve more than a passing mention in any epitome of the athletic year. The Grand Military Racket Championship at the Queen's Club, with thirteen entries, was won again by the holders Capt. J. C. B. Eastwood and Lt. Eustace Crawley, 12th Lancers, by 4 games to love. The Oxford and Cambridge racket matches were played at the Queen's Club, April 9th and 10th. Cambridge won the Doubles by 4 games to 2. The Cantabs were represented by E. Garnett, Charterhouse and Trinity, and J. S. Stogdon, Harrow and Trinity. The Oxonians were R. E. Foster, Malvern and University, and R. H. de Montmorency, Cheltenham and Keble. Garnett was the only old blue competing. In the singles Garnett for Cambridge won three games off the reel, 15-6, 15-5, 15-5. R. E. Foster represented Oxford. The Amateur Championships were held during April at the Queen's Club, H. K. Foster, the 1894-5-6 Singles Champion, once more winning, by defeating P. Ashworth by 3 games to 2, after Ashworth (who had held the Championship in 1890) had scored 2 games to 1. H. K. Foster and P. Ashworth, the holders, won the Doubles Championship by 4 games to 1, beating W. L. and R. E. Foster. The Public Schools Doubles Challenge Cup was played at the Queen's Club, West Kensington, April 20th, 21st, 22nd, and 23rd. Twelve Schools entered but Radley withdrew at the last minute. Harrow (F. W. A. Rattigan and L. R. Andrewes) and Winchester (E. B. Noel and R. A. Williams) met in the final, Harrow winning, but only after all seven games had been played, three of them having to be set. The winners scored 104 aces to go by their opponents. In the following week the New Princes Club started a Public Schools Singles Championship, but the affair was rather a frost, only five competing, Bradley, Marlborough, and Tonbridge alone being represented. L. P. Collins of Marlborough won the final from W. K. P. French, of the same school, by 3 games to one. On October 16th at the Queen's Club, Peter W. Latham, late of Manchester, met G. Standing, of New York, for the Racket Championship of the World and £1,000 a side. Latham since 1887 has held the Championship. In 1891 Latham met and defeated Standing, and the conditions of the present contest are the usual home and home matches, best of seven games in each court, or if the games are equal the match will be decided by the majority of aces. Latham won the

first half of the match by four games to one, the aces counting, Latham 75 to 56. The second portion of the match was played at New York, Nov. 27th, when Latham won by 4 games to 3, thus securing the match. Latham is also Tennis Champion, having wrested the Championship from C. Saunders some years ago.

The Tennis Amateur Champion for the year is Mr. J. B. Gribble, and Mr. H. E. Crawley holds the second prize for the year. J. F. Marshall and E. Garnett representing Cambridge, won by 3 sets to love, against A. Page and A. T. Garnett, Oxford, and in the Singles Marshall beat Page also by 3 sets to love. In the M.C.C. Tennis prizes at Lords in July, Mr. E. H. Miles defeated the Amateur Champion, Mr. J. B. Gribble, by 3 sets to 1, and subsequently Mr. E. H. Miles challenged and defeated the holder, Sir Edward Grey, for the M.C.C. gold prize by 3 sets to 1.

ROWING.

AMATEUR rowing during 1897 was in a most flourishing condition. Not only were the representative crews of Oxford and Cambridge well above the average, but the revival of the Kingston Rowing Club, with a really first-class eight and four, added considerably to the interest of the Regatta following Henley as compared with former years, when London and Thames have usually had all the Senior events to themselves. Thames and London were very evenly matched in both eights and fours, London perhaps being a trifle the better in both; but Kingston on their day were certainly the best eight, as proved by their victory in the Champion eights at the Metropolitan, and their four never seemed to row so well again after they had won the Wyfold at Henley. The Kingston crews came to Henley probably the best and hardest-trained men at the Royal gathering, they won their two events there, and after that certainly went off, and except on one occasion at Putney never performed so well again. Both Thames and London went to Henley rather on the rough side. Afterwards both "came on" and improved, whilst Kingston decidedly went rather stale. In all the regattas after Henley, the events both senior and junior filled well, and the racing interest and attendances left little to be desired. Except at Kingston the weather was exceptionally fine, the three Henley days being simply perfect for good racing, fast times, and the visitors. After Henley, as usual, senior paired rowing and sculling were at a discount; not one single decent pair competed at Kingston, Molesey, Walton, etc., and with the exception of Blackstaffe, the Universities and the leading clubs appeared to be without a really first-class sculler. So far, all the efforts of certain agitators to lower the social status of amateur rowing have failed, and it is to be hoped that the Amateur Rowing Association will hold fast to the traditions of the sport they govern, and not allow any introduction of a semi-professional element into a pastime which stands almost alone in purity and genuine amateurism amongst the present-day athletic, football and swimming organizations. Surely the National Amateur Rowing Association, the Tradesmen's Rowing Association, and the professional ranks, offer all the opportunities necessary for the oarsman or sculler unable to afford the expenses of rowing without a *quid pro quo*. Before the end of January both the University crews were in practice, Oxford with all but one of their old blues available and ready to row. The O.U.B.C. Torpids finished their six

nights' racing in gigs on Feb. 24, and during that period no less than 56 bumps were recorded, a record for these races. At the conclusion the respective heads of the three divisions were as follows:—First division, Balliol; second division, Christ Church; third division, Oriol. The corresponding fixture of the C.U.B.C., the Lent races, followed, rowed in two divisions, leaving Lady Margaret (St. John's) B.C., head of the first division, and Clare College in a similar position at the top of the second division. The Clinker Fours, at Oxford, were rowed in the middle of March, Keble, a big strong crew, just beating Christ Church by about half a second. In the meantime the Cambridge crew, under the care of Messrs. Trevor Jones and S. D. Muttlebury, had been steadily training on the home waters, finally coming to Putney on March 10th, Oxford, after a week at Henley, reaching the tideway on March 17, in charge of Mr. D. H. McLean. The Cantabs did not create a very favourable impression during the concluding days of their practice, and the Oxonians, chiefly owing to some marvellously fast trials between Putney and Mortlake, eventually started for the race on Saturday, April 3rd, with the long odds of 5 and 6 to 1 laid on their chance of success. The odds proved to be justified by the result, as the Dark Blues at the slower stroke, led from the Thames boat-house, were almost clear at Hammersmith Bridge, and finally won their eighth successive victory by $2\frac{1}{2}$ lengths in 19 mins. 12 secs., the intermediate times being Craven Steps 2 mins. 20 secs., mile 3 mins. 59 secs. (a record), Hammersmith Bridge 7 mins. 20 secs., Chiswick Church, 11 mins. 31 secs. (a record), Barnes Bridge 16 mins. The flood-tide was a fast one, the wind favourable, and the water smooth. The two crews were as follows, the old blues being started, viz.:—Oxford: *J. J. de Knoop (New) (bow), 11st. 6lb.; (2) G. O. Edwards (New), 12st. 1lb.; (3) *C. K. Phillips (New), 12st. 0 $\frac{1}{2}$ lb.; (4) *C. D. Burnell (Magdalen), 13st. 9lb.; (5) *E. R. Balfour (University), 13st. 8 $\frac{1}{2}$ lb.; (6) *R. Carr (Magdalen), 12st. 11 $\frac{1}{2}$ lb.; (7) *W. E. Crum (New), 12st. 3lb.; *H. G. Gold (Magdalen) (stroke), 11st. 11lb.; H. R. K. Pechell (Brazenose) (cox), 8st. 0 $\frac{1}{2}$ lb. Cambridge: D. E. Campbell-Muir (Trinity Hall) (bow), 11st. 5lb.; (2) *A. S. Bell (Trinity Hall), 12st. 1lb.; (3) E. J. D. Taylor (Caius), 12st. 13lb.; (4) B. H. Howell (Trinity Hall), 12st. 9lb.; (5) *W. A. Bieber (Trinity Hall), 13st. 1lb.; (6) *D. Pennington (Caius) 12st. 9lb.; (7) W. Dudley Ward (Third Trinity), 12st. 6lb.; *W. J. Fernie (Trinity Hall) (stroke), 11st. 13lb.; E. C. Hawkins (Caius) (cox), 8st. 1lb. Of these all but Balfour in the Oxford crew were Etonians; only Bell and Dudley Ward in the Cambridge boat coming from Eton. The only man who was unable to row for Cambridge when called upon, was the Hon. Rupert Guinness, who was too unwell to take an oar. It was Crum's fourth win, and he now shares with F. Willan, W. A. L. Fletcher, C. M. Pitman, and the late H. B. Cotton, the honour of never having been defeated in the 'Varsity Boat Race. All these are Oxonians. S. D. Muttlebury is the only Cantab who can claim four victories, but trying to do so for the fifth time he failed. The steady migration of all the best Eton oars to Oxford appears to be the only explanation for the long run of defeats experienced by Cambridge. Steady preparation for Henley monopolised all the energies of the Metropolitan and up-river clubs during April, May and June. In May, the Cantabs elected as

their B.C. president, W. Dudley Ward, the previous year's captain of the boats at Eton, a decided novelty, a freshman president being unheard of in the annals of the club. C. K. Phillips was selected for a similar position by the O.U.B.C. Committee. During the month of May the deaths of no less than three old blues took place, E. H. Farrie, of Trinity Hall, A. R. Poole, an Oxonian, and T. H. E. Stretch, of New College, who had been rowing in scratch crews against the Oxford and Cambridge eights in the previous month. The C.U.B.C. Pairs fell to W. Dudley Ward and W. J. Fernie (stroke), beating G. T. Bullard and B. H. Howell (stroke), but the latter won the Lowe Double Sculls, beating A. S. Bell and B. H. Etherington Smith. The O.U.B.C. May Eights gave some capital racing for the six nights, but New College never had their headships seriously endangered by Magdalen, and St. John's, losing four places, were left at the head of the second division. The New College eight were R. O. Pitman (bow), N. Middleton, W. L. Hitchings, C. K. Phillips, H. Thorpe, A. O. Dowson, W. E. Crum, A. Whitworth (stroke), P. Harper (cox). The remaining events of the O.U.B.C. summer term were the Sculls, won for the second year by the new president, C. K. Phillips, and the Pairs carried off by the two Etonians, R. Carr, and H. Gold (stroke), beating J. A. Tinne and F. Hussey (stroke). The C.U.B.C. June Eights, with only four nights' racing, saw Trinity Hall once more head of the Cam, no other crew having a chance with them. Emmanuel II. left off head of the second division, the first crew of the same college being second in the river to Hall. The head eight were D. Campbell-Muir (bow), N. L. Calvert, G. T. Bullard, B. H. Howell, L. C. T. Baines, A. S. Bell, W. A. Bieber, W. J. Fernie, J. G. Foster (cox). But for the absurd restriction to only four days' racing there would have been several more changes in the positions. Henley Regatta, which took place a week later than usual, on Wednesday, Thursday and Friday, July 14th, 15th and 16th, secured an entry of 56, or 2 less than on the previous anniversary. Several Dutch Crews competed, and also the Winnipeg champion amateur four of America, and Edward Hanlan Ten Eyck, son of the professional American sculler of that name. The American entries excited a good deal of discussion, and it was only immediately before the Regatta that Ten Eyck's name was passed by the Stewards as a competitor for the Diamonds. All three days were perfect from a racing point of view, fine, warm, and a light leading wind with smooth water. Records were made on each day, and the racing all through was excellent. New College, Oxford, won the Grand, beating Leander in the final heat, the race being an exact repetition of the tactics of the previous year when Leander beat New, only Leander this year tried the cutting-down game, and were beaten at the finish. The New College crew were: J. J. de Knoop, G. O. C. Edwards, B. O. Pitman, A. O. Dowson, C. K. Phillips, H. Thorpe, W. E. Crum, A. Whitworth (stroke), C. P. Scrooold (cox). Their time, 6 mins. 51 secs., tied record. New College, having beaten the Winnipeg four in their heat, met Leander in the final, and after another magnificent race, Leander won in the record time of 7 mins. 30 secs. The winning crew were: C. W. N. Graham, J. A. Ford, H. Willis, Guy Nickalls (stroke, and steers). A Leander pair, E. R. Balfour and Guy Nickalls (stroke), won the Goblets, now styled the

Nickall's Challenge Cup, in 8 mins. 39 secs., Bell and Fernie, the Trinity Hall men, being their opponents in the final heat. E. H. Ten Eyck, of Worcester, U.S.A., won the Diamonds, beating H. T. Blackstaffe of the Vesta B.C. in the final; the time, 8 mins. 35 secs., was a record, but Blackstaffe in his heat against McDowell, another Yankee, had beaten this by one second. Eton College once more won the Ladies' Plate, Emmanuel, Cambridge, being the losers in the final; Eton's time was another record, viz., 7 mins. 1 sec. The crew was: W. H. Chapman (bow), W. Astor, H. N. W. E. Guinness, H. J. Hale, Lord Vivian, F. W. Warre, J. L. Phillips, Hon. W. McClintock Bunbury (stroke), G. A. Lloyd (cox). Trinity College, Oxford, won the Visitors' Cup for fours, beating Jesus College, Cambridge, in the Final in 7 mins. 53 secs. Kingston R.C. won both the Thames Cup (eights) and the Wyfold Fours. For the Thames Cup they beat Christ Church, Oxford, in the final, after defeating Emmanuel, the Ladies' Plate crew in a trial heat. The Kingston eight was: F. W. Fergusson, F. H. Noke, A. C. Gibbons, H. C. Firmin, A. C. Fergusson, T. A. Kirkham, J. Crisp, H. M. Trouncer (stroke), T. Hudson (cox). The Delft Students eight were beaten in a heat for the Thames Cup, by Kingston, and the Utrecht University eight by Leander, in the first heat of the Grand. J. J. Blussé, the Amsterdam sculler, was beaten by Ten Eyck in a heat of the Diamonds. Ten Eyck, who is only eighteen, was given a dinner by the Putney watermen and boat-builders before he returned to the States. This is only the second time the Diamonds have ever left the country. The Metropolitan Regatta followed Henley on Monday, July 21. Kingston (the Henley crew) beat both London and Thames for the Champion Eights, but London beat the other two in the Senior Fours. H. T. Blackstaffe won the Senior Sculls. The Wingfield Sculls, or Amateur Championship of the Thames, followed on the Wednesday, from Putney to Mortlake, H. T. Blackstaffe winning rather easily from B. H. Howell, of Trinity Hall, and three other scullers, in 23 mins. 58 secs. At Staines Regatta, in the same week, London won the Senior Challenge Eights, a Trinity Hall crew the Senior Fours, Bell and Fernie (Hall B.C.) the Senior Pairs, and R. K. Beaumont (Thames R.C.) the Senior Sculls. About this time the Hon. W. Guinness won the Senior Sculls of the Eton College B.C. At Molesey Regatta Kingston won the Senior Eights, London the Senior Fours, and Beaumont, of the Thames, the Senior Sculls. At Kingston, London won both the Senior Eights and Fours, Beaumont again taking the sculls. Walton, July 31st, concluded the Metropolitan regattas, London taking the Senior Eights, Fours and Sculls, the last named, with C. H. R. Thorn, Logan and Bogle, of the Thames, won the Senior Pairs. W. Colin Romaine won the Amateur Punting Championship at Shepperton, on August 5th, and two days later, at Bray Reach, W. Haines, of Old Windsor, won the Professional Punting Championship, distance 1 mile, in 11 mins. 14 secs. On August 7th, Goring and Strealey Regatta, one of the best meetings after Henley, concluded the open fixtures of the season. H. W. Stout, London R.C., won the Senior Sculls, beating Beaumont, but the L.R.C. were beaten in Pairs, Fours and Eights by the Orkney Cottage B.C., an Eton-Leander combination. The Orkney eight contained R. O. Pitman (bow), H. A. Steward, J. L. Phillips, C. D. Burnell,

C. K. Phillips, H. Willis, R. C. Lehmann, C. J. D. Golzie (stroke). The brothers Phillips won the Pairs without a rudder, and Goldie stroked the Four a good trial for the probable stroke of the Cambridge Eight. The usual club regattas were held in the Autumn. In August the death was announced of E. R. Balfour, the famous Oxford double blue (rowing and football), following a chill caught when shooting in Scotland. On the Seine, in October, the thirty-sixth anniversary of the Amateur Championship was won by M. J. Blussé, of Amsterdam, who was defeated at Henley. Amateur rowing in France is not in a very flourishing condition. Blussé, who is a member of the De Hoop R.C., had previously carried off the Championship of Holland, and he subsequently also won the Coupe De Paris, beating MacHenry and H. Barrelet, probably the pick of the French scullers. The Eastbourne B.C. won the Four-oared Championship of the South Coast. Professional rowing did not produce any very wonderful results or important contests during the year, all the men competing being second or third-rate scullers, with no pretensions to championship honours. W. Haines, of Old Windsor, won the half-mile New Year's Handicap on the Tyne. On the 1st of February Haines gave C. Stephenson, of New Zealand, 4 seconds in a mile for £50 a-side, on the Tyne, and beat him easily. At the end of the same month, C. Gibson, of Putney, beat J. Bowering, of Wandsworth, from Putney to Mortlake for £25 a-side, after a capital race. On May 3rd, W. Haines sculled J. Wray, of Australia, a rather mysterious sculler, a match over the Tyne Championship Course for £100 a-side. Wray, a strong favourite, led at the Redheugh Bridge, and finally won easily. No Englishman after this being willing to oppose Wray, the latter went to America. On Monday, Sept. 13th, T. Sullivan, in a so-called gig, or rather, a 13 feet sculling-boat, defeated S. Emmett in an ordinary 32 feet sculling-boat very easily, from Putney to Mortlake, for £50 a-side. Perhaps the most important professional match of the year, took place on Monday, Sept. 27, when W. A. Barry, of Putney, met George Towns, of Australia, for £100 a-side from Putney to Mortlake, Towns winning a magnificent race by half a length in 22 mins. 34 secs. There were a good many challenges issued after the race, but nothing came of them; indeed, professional sculling in this country could hardly be in worse plight than it is at present, as Barry appears to be our fastest sculler. Towns, at his best, was a long way off championship form when he left the Antipodes early in 1897. A match between Wray and Towns is likely to be brought off before long. Mr. R. C. Lehmann, of 3 Bury St., St. James's, S.W., is Hon. Sec. of the Amateur Rowing Association. Rowing began again as usual at the Universities in the October Term; the non-coxswain racing fours being the opening event both at Oxford and Cambridge. At Oxford only three crews entered: New, the holders, Balliol, and University; Magdalen and Trinity did not compete. New won easily with a strong Etonian crew: *C. K. Phillips, H. Thorpe, J. Phillips, *G. O. Edwards (st.). (*Old Blues). At Cambridge seven crews competed, Trinity Hall being the holders. Third Trinity, with W. Dudley Ward (the president, No. 3), and C. J. D. Goldie (st.), were beaten by Hall in the first heat. Trinity Hall finally, on November 5th, won easily, the crew being B. C. Cox (bow), A. S. Bell (steer), G. T. Bullard, C. M. Steel (st.). Bell and

Steel are both Etonians, Cox came from Harrow, and Bullard from Haileybury. The C. U. B. C. coxswain gig fours will in future, as at Oxford, be decided in the Lent Term. On November 19th, R. B. Etherington-Smith, First Trinity, won the Colquhoun Sculls Amateur Championship of the Cam, beating C. J. D. Goldie, Taird Trinity, in the final heat.

SKATING.

AFTER an interval of a year, the winter of 1896 provided just one week's skating for the votaries of that charming winter pastime, and the National Skating Association were enabled to justify their existence, and owing to their admirable organization, bring off several championships in the few days available for racing. With two large and commodious indoor ice rinks now in London, at Niagara and Argyll Street, we are much better off in the Metropolis as regards practice on skates, and although these two rinks are not intended, and are never used for racing, our English figure-skaters are much more proficient than formerly, and can now well hold their own with the best of the Continental and American exponents, whose frequent opportunities of practice during long and hard winters gave them a distinct advantage over the denizens in the milder climate of Southern England. Indeed, considering that for very few days in a year is it possible to find any natural ice to skate on in England, and also that frequently a winter goes by without any ice at all, it is wonderful that skating has ever taken the hold in this country it has. As regards pace we are, and always must be at a disadvantage compared with the Norwegian, Dutch, and Russian skaters, who indulge in this kind of racing as we do in contests on the cinder path. Their skates are better than ours, they skate almost as soon as they can walk, their skating matches are attended by thousands of spectators, and such valuable prizes are given that it pays well to take up racing on the ice as a profession and a means of livelihood. In our table of records will be found a list of the most authentic times at various distances. The times given are those where the skater has not been favoured by wind, and where the courses have been, so far as can be ascertained, accurately measured. Few records are more difficult to obtain than skating times, as the measurements are frequently very carelessly and hurriedly laid down and not easily checked afterwards. In England the mile and mile and a half tracks are usually straight with three and five right-about turns, so that our times compare very unfavourably with the large circular tracks of the Continent and America. J. S. Johnson, the Yankee, is credited with some marvellous performances, and in some of his records under the metre measurement must have beaten en route even his intermediate fast mile and other times. As Johnson, however, was always managed and engineered by a very astute party during his record-breaking expeditions, perhaps some of his wonderful times are not so difficult to understand. It is somewhat curious that superlative excellence in skating and cycling seem to go together, A. A. Chase, J. J. Eden, and J. S. Johnson being instances in point. The Figure Skating Championship of the World will be decided in this country during the present year, so that notwithstanding our climatic disadvantages, we have fairly established our right to be considered

a factor in the pastime. The National Skating Association is chiefly answerable for this gratifying result of their labours.

Skating for the year opened with the Championships of Europe at Amsterdam, January 12th and 13th. The Dutch authorities gave no notice of the dates to the English N.S.A., and several Englishmen who were specially training for these events were thus prevented from taking part in the championships. The course was a double one of 700 metres in circuit with bends of 40 and 45 metres radius. The ice was good, with a fairly strong wind. J. Seyler, of Munich, who had been training at Davos, won all the three championships, with G. Estlander, of Helsingfors, second to him in each. Seyler's times were as follows: 500 metres, 48½ secs.; 5,000 metres, 9 min. 39½ secs.; 1,500 metres, 2 min. 39½ secs.; 10,000 metres, 19 min. 43½ secs. About the same time G. Fuchs, of Munich, at Davos, won the German Figure Skating Competition, scoring 165½ marks, E. Fellner, of Vienna, being second with 156½ marks. On January 16th and 17th the Davos International Meeting was held; Seyler was again the hero of the competition, and lowered three German and Austrian Union records. His times were as follows: 500 metres, 47½ secs.; 1,500 metres, 2 min. 33½ secs.; 5,000 metres, 9 min. 18 secs.; 10,000 metres, 19 min. 22½ secs. Three junior races at the same distances were decided, S. Lockwood, America, winning the 500 metres in 51½ secs., and the 1,500 metres in 2 min. 53½ secs. C. Edgington, of Oxford, who had been second to Lockwood in each of the two previous races, then won the 5,000 metres junior race in 10 min. 41½ secs.; his only opponent being F. C. Mitchell, another Oxonian. Edgington also competed in the 10,000 metres senior race, finishing third in 20 min. 53 secs. In the week ending January 30th, England was visited by a frost which enabled the National Skating Association to bring off several important matches, but a sudden thaw at the end of the week caused some of the chief fixtures, including the professional championship, to fall through. The ice was never in very good condition, and snow and wind added to the difficulties of finding a smooth hard surface for fair racing, consequently the times were indifferent, and the records of previous years were not equalled.

The Cambridge University branch of the N.S.A. led off at Littleport on Tuesday, the 26th, with a competition at three distances—220 and 360 yards with the wind, and 720 yards. G. O. G. Bramson, of Trinity Hall, won the 220 yards in 21½ secs. E. M. Vipan, Corpus, and R. S. Mason, St. Catherine's, tied for the 360 yards with 34 secs., and Bramson won the third in 1 min. 25½ secs. The Oxford University Championships were held on the Abingdon and Basingtoke Canal on Thursday, January 28th. It was intended to have mile and half-mile tests, but a rapid thaw set in. C. Edgington, of Magdalen, the president of the club and Davos competitor, was absent. The fastest time of the three mile heats was by W. E. Harrison, of Oriel, who won the gold badge in 1894, he did 4 min. 5 secs. for the distance. The subsequent match between Oxford and Cambridge fell through owing to the sudden break up of the frost. On the Wednesday the Littleport Skating Club held their professional meeting for the £50 Challenge Cup, previously held by James Smart, H. Lindahl, and F. Ward. Thirty-four of the best English skaters competed, including the three previous holders, and J. Bates, of Leigh, Lancashire, a miner and reputed flyer. Bates,

Lindahl, and Ward, were in the final round, and finally Bates won in 5 min. 17½ sec., F. Ward taking second prize in 5 min. 24½ sec. The mile and a half course was, however, 134 yards short of the actual distance, and so the times cannot be compared with the previous records for this prize. On the following day at Peakirk, over a quarter-mile course, distance a mile, Bates again won, defeating many of his old opponents. Bates' best time was 3 min. 33½ secs., W. Housden, of Wicken, being second, in 3 min. 38½ secs. The Quarter Mile Amateur Championship and the Duddlestone Amateur One Mile Cup were run for at Littleport on the Thursday. Mr. A. E. Tebbit, of Milton, the holder, easily retained his quarter-mile trophy in 40 secs. But he lost the one mile race, P. J. Evison, of Upward, winning in 3 min. 32½ secs., Tebbit, the amateur champion, being second in 3 min. 34½ secs. The three London meetings were all held at Hendon. On the Wednesday the N.S.A. Baker Challenge Cup, 220 yards straight for amateurs, was again carried off by the holder, F. Hiam, of Stratford, who defeated S. Markham, of Dalston, in the final in 22½ secs. Hiam had won a previous trial heat in 22½ secs., and Markham had covered the course in 22 secs. against E. Bates, of King's Cross. On the following day the London Professional Championship was decided with five turns in a mile and a half. H. T. Allen, of Clapton, won, his time being 6 min. 3 secs., and A. A. Chase, of Hornsey (the cyclist), was second in 6 min. 8 secs. The London Amateur Championship (a mile with three turns) was held on Friday, the ice being good. F. Hitch, of Clapton, the holder, was beaten, S. Markham, of Dalston, winning in 3 min. 45½ secs., with J. Gage, of Forest Gate, second, time 3 min. 49 secs. The frost broke up in London on the following Monday. The One Mile Championship of Scotland over a course half a mile in length with two turns, on Loch Leven, was won by J. Bayne, the local crack, in 3 min. 46 secs., W. Pollock-Wylie, the holder, being defeated. This race was held Monday, January 25th. On the last day of the skating week, the Yorkshire branch of the N.S.A. managed to hold the Amateur Championship of Yorkshire on an oval course of three laps to the mile. A. F. Burton won in 3 min. 33½ secs. The Amateur Championships of the World was decided February 5th and 6th, at Montreal, Canada. The course was 400 metres, but in the 5,000 metres, through a misunderstanding, the competitors went a lap short. The results were as follow: 500 metres, J. Naess, of Hamar, won in 46½ secs., equaling the world's record made February 3rd, 1895, by Maneth; 5,000 metres, McCullock, of Winnipeg, won in 8 min. 32½ secs., against Eden's record of 8 min. 47½ secs. Seyler was second in 8 min. 47½ secs. The result of the race stood, notwithstanding the error in the course. On the second day snow spoilt the ice, when the other two championships were decided. McCullock won the 1,500 metres after a dead heat with J. Naess, in 2 min. 40½ secs. McCullock also won the 10,000 metres (and the championship gold medal for the three victories) in 20 min. 2½ secs., Seyler being a bad second. The following races were also run at the meeting: 220 yards Amateur Championship of Canada, won by D. Brown, of Montreal, time 21½ secs. Professional races resulted as follows: all won by J. Nilsson, of Minneapolis, half mile in 1 min. 17½ secs.; one mile, 2 min. 41½ secs.; three miles, 7 min. 42½ secs. (run a lap short); five miles, 14 min. 47 secs., a world's record if correct.

On February 2nd, at the International Skating Meeting at Vienna, R. Meidinger won the long jump in skates with 4'88 metres, almost 16 feet English measurement. G. Hügel, of Vienna, won the Amateur Figure Skating Championship of the World at Stockholm on February 14th, with 339½ points out of a possible 405. On February 6th and 7th, Peder Oestlund won all the three Amateur Championships of Norway at Trondhjem, viz., 5,000 metres, time 9 min. 3½ secs., W. Manseth being second, as he was in all three races; 500 metres, time 46½ secs., a world's record; 1,500 metres, time 2 min. 26½ secs. The best N.S.A. English second class badge mile time during the frost was G. O. G. Bramson's 3 min. 36½ secs. at Hendon, January 27th. The N.S.A. Challenge Shield for combined figure skating was won at the National Skating Palace, Argyll Street, London, by the Davos Platz Branch, the holders, with 77½ marks out of a possible 90.

SWIMMING.

OWING to the energy, enterprise, and good management of some of the leading members of the swimming governing body, the Jubilee year 1897 will long be marked with a white stone by all followers of the natatory art. Never before had so many foreign and colonial champions come under the jurisdiction of the A.S.A., and never before had there been so many close and exciting races for the championships and other events, and generally so much interest in swimming. The Amateur Swimming Association had by no means a quiet time so far as legislative measures were concerned. The Yorkshire clubs were in open revolt, demanding separate and independent government; and the Southern Counties Association, owing to their objection to some of the acts of the Emergency Committee, and for various reasons, decided to withdraw from the A.S.A. at the end of 1897. There were faults on both sides, but a little tact and a give-and-take policy on the part of the A.S.A. would prevent such a serious blow to the present prosperity of swimming as the disruption of the governing body. One of the most noticeable incidents of the racing season was the defeat of Tyers in several of the championships. He had stood alone for so many years a head and shoulders above his fellows, that his invincibility was a canon of faith amongst swimmers. Both Derbyshire and Cavill, however, accomplished the unexpected, and it may be that in 1898 Derbyshire will prove even faster than Tyers ever was. It seems impossible to believe that Tyers trained properly; in 1897, and yet he put on one or two records during the year. Altogether Tyers' form is a mystery, and it will be curious to watch how he acquires himself this season. The Australian amateur champions swam well up to their colonial reputations. Of the two Cavills, the amateur is decidedly faster than the professional. These two left England at the end of the year, but Hellings remained in this country, and is likely to be a dangerous opponent to both Derbyshire and Tyers at short distances this summer. The address of the hon. sec. of the Amateur Swimming Association is Rathvon, Eltham. As regards records, it should be noticed that all recognised A.S.A. records must be made in A.S.A. costume and in still water. For all distances up to and inclusive of 500 yards they must be made in baths not less than 25 yards long, above 500 yards in open water over courses not less than 220 yards

in length. This will account for the fact that other and faster records than those mentioned below are frequently quoted, and in some very short baths marvellous performances have been done which are fully accounted for by the peculiar conditions under which they were accomplished.

As regards the racing of the season, it may be as well to mention in the review of the season one or two Australian performances, as the Antipodean winners subsequently visited our shores and took part in the A.S.A. championships and other contests. Early in the year news arrived that Percy Cavill, East Sydney S.C., had won the Quarter Mile Amateur Championship of New South Wales by three yards from J. H. Hellings in 6 mins. 3 $\frac{3}{4}$ secs., beating the Australian records but behind the world's record of 5 mins. 5 $\frac{1}{4}$ secs. by J. H. Tyers. The Australian course was 33 yards long. Very soon afterwards P. Cavill won an Invitation Quarter at the Sydney Natorium, in 6 mins $\frac{1}{2}$ sec., J. H. Hellings again being second. P. Cavill then annexed the Quarter and Half Mile Championships of Victoria, over a 110 yards course, and subsequently sailed with Hellings for England, where his brother, Ernest Cavill, the Australian professional champion, had already preceded him. In June, J. H. Tyers, with his suspension of the previous year removed, led off with a new record at 150 yards at the Warrington Baths. He did the distance in 1 min. 39 secs., beating both amateur and professional records. The Australian amateurs arrived by the *Orizaba* on June 18th, P. Cavill having previously added the Half Mile Open Water Australian Championship and record, 12 mins. 45 $\frac{1}{2}$ sec., to his account, the English record, by J. H. Tyers (13 mins. 20 secs.), having been made at Bradford, July 13, 1895. No sooner had the brothers, Ernest and P. Cavill, arrived, than they were informed of the death of another brother, Charles, who at Stockton, U.S.A., died in an attempt to beat his Melbourne Exhibition (1896) under-water record of 5 $\frac{1}{2}$ mins. In the same week came the first intimation that at last Tyers had met his match, J. H. Derbyshire, at Nottingham, beating him at 220 yards, in 2 mins. 43 $\frac{1}{2}$ secs., as against Tyer's own record of 2 mins. 41 secs. at Farnworth, in June, 1895. At the end of June the annual Oxford v. Cambridge swimming races took place at the Bath Club, Dover St., W. Oxford won all the events: 50 yards, A. J. MacCullach, New College, Oxford; 120 yards, C. W. Brodribb, University College, Oxford, time, 1 min. 27 secs., H. A. Powell, of Trinity College, Cambridge, being second in each event. Adams, of Balliol, Oxford, won the Quarter Mile in 6 mins. 45 $\frac{1}{2}$ secs. Oxford won the Team Race, 50 yards, and also the Water Polo by 5 goals to 2. The Life Saving Society's Meeting, on July 3rd, at the West India Export Dock, was perhaps the most important swimming gala ever held in any country previously. The One Mile Amateur Championship, course 1 furlong, was the principal item of the programme. J. A. Jarvis (Leicester S.C.) won in 32 mins. 28 $\frac{1}{2}$ secs., J. H. Tyers being second, and Arnold Toepfer (German Champion) third. B. A. Hart, Champion of America, Guy Seron, Champion of Belgium, P. Cavill (Australian Champion), and J. H. Derbyshire were amongst the defeated field, which included 20 starters. J. H. Hellings, of Sydney, won a Special 100 yards race in 1 min. 10 $\frac{1}{2}$ secs., and V. Sonnemans, of Brussels, won the National Graceful Diving Contest from H. S. Martin by 39 points to 38. Several other events were included in the programme, and the

Duke and Duchess of York were present in the steam-launch *Cintra* during the racing. The 500 Yards Championship was decided at the Osborne Baths, Manchester, July 15th, J. H. Derbyshire, of the Osborne S.C., winning by 10 yards from J. H. Tyers, with P. Cavill, 4 yards further away, third, time, 7 mins. 2 secs. The amateur record is 6 mins. 45 secs., by J. H. Tyers, Sunderland, 1834; Nuttall's time is 6 mins. 28 $\frac{1}{2}$ secs., at Stalybridge, 1890, but in a 21 yard's bath. The A.S.A. long distance Amateur Championship was decided July 17th, from the Anglian B.C. House, Strand on the Green, to Putney Steamboat Pier, distance 5 miles 100 yards, with the tide. Eighteen out of 22 entries started, and finally, Percy Cavill, of Australia, won in 1 h. 6 mins. 35 secs. The tide was running nearly 4 miles an hour, and the water was quite smooth. A. A. Green, of the Otter, led to the top of Chiswick Eyot, when Cavill went in front, and won by twelve seconds (beating all previous records) from Green, W. J. Haines was third, and B. A. Hart (America) fourth. Tyers and Toepfer did not start. The 1,000 yards A.S.A. Championship was next decided in the Wear, at Durham. Tyers, the holder, did not start, and J. H. Derbyshire won by 30 secs. from Duckworth, in 15 mins. 52 secs., or 50 secs. slower than Tyers' record in 1886, at Morecambe Bay. Next in order came the A.S.A. Plunging Championship, at Stafford, when the holder, W. Allason, of the Otter, reclaimed his title with a plunge of 68 ft. 11 ins. in the given minute. An international meeting was held at Brussels about this time, Hellings, the Australian, winning the 100 metres and P. Cavill the 500 metres. The English team beat the Belgians at Water Polo by 6 goals to 1, and a match between J. Hunt, of Manchester, and Guy Seron, Belgium Champion, resulted in a victory for the former by 4 yards, in 1 min. 8 $\frac{1}{2}$ secs. On July 31st, the A.S.A. Half Mile Championship, at the Botanical Gardens, Southport, was won by J. H. Derbyshire, with Cavill second, in 14 mins. 38 $\frac{1}{2}$ secs. Tyers, the holder, although present, did not start. On August 4th, at Devonport, the 1,000 Yards Professional Grand Challenge race was won by W. Evans (an ex-amateur) in 16 mins. 40 $\frac{1}{2}$ secs. The remaining West of England professional sea races resulted as follows: At Plymouth, for a 1,000 Yards Championship and £25 in prizes, S. W. Greasley was first, beating Evans in 15 mins. 58 secs. S. W. Greasley won a similar race at St. Ives Bay, and also at Penzance, W. Edwards, a sailor, aged 18, being second at the former place. About this time Hellings won two 100 yards races in Scotland, against their best swimmers in 1 min. 5 $\frac{1}{2}$ secs., and 1 min. 4 secs. On Monday, August 23rd, P. Cavill beat J. H. Derbyshire for the A.S.A. Quarter Mile Salt Water Championship at Skegness, in 4 mins. 33 secs. Tyers, the holder, aged 21 on Sept. 11th, once more did not start. Tyers, however, on the following Wednesday, came out and won for the third time the Ulph Challenge Cup at Great Yarmouth, in the sea, with W. J. Hawes second. On the same day, at Phillip's Park, Manchester, P. Cavill, over a 13 lengths 12 yards 1 ft. course to the half mile, made a new record for the distance by doing 13 mins. 10 $\frac{1}{2}$ secs., as against Tyer's 13 mins. 1 $\frac{1}{2}$ secs., at Bradford, in 1895, Derbyshire, giving the winner 10 secs., was beaten over 50 yards. Two records were put on about this time not recognised under A.S.A. rules, being in baths under 25 yards long, viz., J. A. Jarvis, at Birmingham, Kent Street Baths, half a mile in

13 mins. 12½ secs., and 120 yards at Northwich (Victoria Park), 1 min. 17 secs. On Sept. 8th, at Doncaster (Corporation Baths), on the St. Leger night, E. Cavill, of Australia, swam J. Nuttall for the Championship of the World, 17 lengths or 515 yards. Nuttall won easily in 6 mins. 50 secs., and 6 mins. 38½ secs. for 500, in a 30 yard's bath, a record for a bath of this length; Cavill retired at the tenth length, a length behind. Early in September, Johnstone Edwards, the 100 yards champion of Scotland, won the 220 yards Championship of Scotland at Glasgow beating M. Russell; and the eighth annual England v. Scotland Water Polo match at the Corporation Baths, Edinburgh, was won by Scotland by two goals to one, making the score stand: England, 5 wins; Scotland, 3. On September 10th J. H. Tyers and Percy Cavill met over one mile between the Central and Victoria piers at Blackpool for a so-called Amateur Championship of the World—a very doubtful title for any amateur to compete for. Cavill won easily by 100 yards, but the whole affair was most unsatisfactory, as all amateur international matches are sure to be. Tyers refused to meet Cavill in any more special matches, and on September 25th at Nottingham Tyers scored his sixth successive 220 Yards Championship, beating J. H. Derbyshire in the world's record time of 2 mins. 38½ secs. Just previously J. H. Derbyshire at Warrington had lowered the 100 yards record to 1 min. ¾ sec., and J. H. Tyers at Shrewsbury swam 110 yards in 1 min. 10½ secs. O. Conway, the 440 yards and 880 yards Irish Amateur Champion, won the Irish N.S.A. 100 Yards Championship in 1 min. 17 secs.; and Wales beat Ireland at Water Polo by 3 goals to 2 at Swansea, September 23rd. N. L. Russell won the Scotch Quarter Mile Amateur Championship in 6 mins. 20½ secs at Glasgow. As a result of the West of England matches, W. Evans and S. W. Greasley, of Leicester, swam a 50 yards match for £50 at Leicester in September, Evans winning by a foot in 7 mins. 22½ secs., slow time. At the end of September at Newport (Mon.) Scotland beat Wales at Water Polo by 3 goals to 2; and the Manchester Osborne, for the fourth year in succession, won the English Water Polo Championship at Burslem by beating People's Palace by 9 goals to 2. The final championship of the A. S. A. took place October 2nd at the Hornsey Road Baths, when, at 100 yards, after a magnificent struggle in the final heat, Tyers, the holder, won by six inches with Derbyshire and J. Hellings a dead heat for second place—time (in a 44 yard's bath), 1 min. 3½ secs. This is Tyers' sixth successive victory. At this same meeting the Lyndhurst Road Board School and Westbourne School swam a dead heat in points for the Public Elementary Schools of London Championship. Early in October S. W. Greasley beat W. Evans at 1,000 yards in Trafford Park, Manchester, and J. Hellings won a 120 yards invitation race at the Otter S.C. entertainment. The London Water Polo Championships were won as follows in October:—Junior Championship, City of Westminster beat Marcians; Senior Championship, Polytechnic beat Amateur S.C., the holders. The Otter S.C. won the Southern Counties Water Polo Championship. Also in October J. Hellings and J. H. Derbyshire met for the last time at 100 yards in the Westminster Baths over a 33 yards 1 foot course, and Derbyshire won by four yards in 1 min. 1½ secs., record for a 30 yards bath; and at the Bath Club, Dover Street, Piccadilly, J. H. Tyers,

in the same week, swam 200 yards in 2 mins. 2½ secs., a world's record for a 25 yards bath. E. Cavill, also at the Westminster Baths, defeated McCusker, the American champion, in a Quarter Mile match for the gate. The time was slow, 6 mins. 26½ secs., and McCusker is evidently not the man he was when he swam Nuttall some years ago for the championship of the world. Cavill and McCusker were unable to fix up any more matches in a contemplated series they had arranged. In the first week in November, at Gorbals' Baths, Glasgow, J. H. Derbyshire, in a handicap 100 yards race, starting from scratch, won by a touch in the world's record time of one minute for a 25 yards bath; but the record has not yet passed the Scottish A.S.A., and is doubtful. The London and West India Docks team, holders, won the International Life Saving Shield at Glasgow by half a point from Coventry.

THE TURF.

DECIDEDLY the most important incident in the turf year 1897, was the case of *Hawke versus Dunn*, followed by the civil action of Taylor *versus* Kempton Park Company. A man named Hawke, acting for a possibly well-meaning but certainly ill-advised body, styling themselves the Anti-Gambling League, obtained a summons in the Kingston Police Court against a well-known bookmaker, Richard Dunn, for using Tattersalls' ring at Kempton Park for the illegal purpose of betting. The Kingston Justices decided against Hawke, but on appeal the case was referred back to them for conviction, and they fined Dunn 20s. Following this decision bookmakers were summoned in various places, and racing, which without doubt depends chiefly on betting for its popularity and support, was threatened with virtual extinction. However, in the meantime, Taylor, a shareholder in the Kempton Park Company, brought an action in the Queen's Bench Division testing the Company's right to allow the enclosures to be used for speculative purposes, and also to test how far Statute 16 & 17 Vict. cap. 119, "An Act for the suppression of Betting Houses," affected betting on the racecourse. The case was heard May 31st, before the Lord Chief Justice, who decided that, according to the decision in the case *Hawke versus Dunn*, an injunction against the Company must go until an appeal could be disposed of. The appeal was heard before the Master of the Rolls (Lord Esher), and Lords Justices Lindley, Lopes, A. L. Smith, Rigby and Chitty, in June, and their Lordships delivered judgment early in July, the result being that the appeal was allowed, and the judgment in *Hawke versus Dunn* reversed. Lord Justice Rigby was the only dissident from this judgment. In consequence of this decision, all the various summonses for illegal racecourse betting standing over, were dismissed. Owing to these legal actions the Sporting League was formed, specially to protect the sports and pastimes of the people from interference by meddling and puritanical persons.

The flat racing season of 1897 may be said to have commenced with a Meeting of the Jockey Club at Derby House, St. James's Square, on Jan. 19th, Lord Rendlesham in the chair. Lord Suffolk here brought forward the proposed new rules for racing. Generally, the new rules increased the number of handicappers, gave fresh men opportunities, and allowed more time for the

adjustment of the weights, by giving 24 hours between the dates of closing the entries and publishing the weights. The rule for allowing out of season weight for age flat races for four-year-olds and upwards over a distance of two miles or more with a minimum weight of *9st. 7lb.* but for not less value than £200, under the authority of the National Hunt Committee stood over until the Craven Meeting, when the new rule became law.

Commencing with the classic races of the year, winter wagering established Galtee More and Velasquez as firm favourites for both Two Thousand and Derby. Vesuvian was at a fairly short price for both races, but it was more on the off chance of some accident to the other two than with any idea of his winning if the two cracks remained sound. Although Galtee More had beaten Velasquez in the previous Middle Park Plate, the latter's supporters soon recovered confidence in the son of Donovan, and laid odds on him for the Two Thousand during April. Before the day, however, May 5th, Mr. J. Gubbins's colt fairly established himself first favourite, and started with 5 to 4 against him, Velasquez's price being 6 to 4. Galtee More won easily in the hands of C. Wood, with Velasquez second, and Minstrel, an unlucky colt by Minting, third. Vesuvian declined this race and the Derby, so that evidently his party considered he had but little chance against the two cracks. The value of the Two Thousand was £3,700. Galtee More was, of course, at once established a very strong favourite for the Derby, and such faith had his party in his soundness and condition that a fortnight later they brought him out for the Newmarket Stakes, value £2,945, at the Newmarket Second Spring Meeting, when, with odds of 100 to 6 on him, he won easily from Berzak and a poor field. On June 2nd, before a tremendous crowd of spectators, Galtee More came to the post for the Derby, at the long odds of "4 to 1 on," Velasquez again being his most dangerous opponent at 10 to 1 against. The race was never really in doubt, the Irish horse winning easily by two lengths, Velasquez again being second, and History, by Hampton, third. This is the first instance of an Irish-bred horse owned by an Irishman, winning the Derby. The value of the Derby was £5,450. Galtee More put in an appearance at Ascot, winning the Prince of Wales' Stakes, value £1,775 with the top weight and 33 to 1 laid on his chance. This race has been fatal to more than one Derby winner, when attempting to give weight away over the 1 mile 3 furlongs up the Ascot hill. Once more Galtee More appeared in public before commencing his St. Leger preparation. This was at Sandown Park, on the Friday in the Jubilee week. He had one opponent in the Sandringham Cup, value £1,300, Cortegal, a filly by Galliard, an Ascot winner. The champion three-year-old of the year, however, with 9 to 1 on, won as he liked. As the time drew near for the St. Leger, odds, but not very long odds, were laid on Galtee More. Velasquez had somewhat redeemed his reputation since Epsom by winning the Newmarket July Princess of Wales' Stakes, £8,430, beating a good field of horses including Knight of the Thistle, Goletta, Vesuvian, Labrador, Regret, &c., a brilliant one mile performance. He had also run second to the Prince's horse, Persimmon, for the Eclipse Stakes. His fourth struggle with the Derby winner was looked forward to with interest, but almost on the eve of the race Velasquez was withdrawn in favour of

the One Thousand winner, Chelandry, and on the St. Leger day, Sept. 8th, Galtee More, at 10 to 1 on, won cleverly by less than a length from Chelandry, St. Cloud II. being third. The St. Leger stakes were £5,425 in value, and Galtee More joined the ranks of the six wearers "of the triple crown," viz, West Australian (1853), Gladiateur (1855), Lord Lyon (1866), Ormonde (1886), Common (1891), Isinglass (1893). On October 21st, in the Sandown Foal Stakes of £2,042, Galtee More at 100 to 8 on again defeated Cortegal easily, and in the Cambridgehire in the following week, attempted the hitherto impossible task of trying to win that race as a three-year-old, with the crushing weight of *9st. 6lb.* Although carrying top weight, he started favourite at 9 to 2 against, but finished nowhere, three 7st. three-year-olds being placed. Although defeated he was by no means disgraced, and he should certainly prove the Cup horse of 1898. As History, the third in the Derby, won the Great Yorkshire Stakes at York, and also the Free Handicap Sweepstakes (£900) with a good weight at the Houghton Meeting, probably both Galtee More and Velasquez are up to the average of three-year-olds, but outside these two the colts of the year were not of a very high class. The fillies were certainly below the average; Chelandry, by Goldfinch, won the One Thousand (value £4,250), her first performance of the year, rather easily, and her two-year-old form being decidedly good, she seemed likely to make a name before the end of the season. However, she never won another race. With 5 to 2 on she started favourite for the Oaks, value £1,215, but suffered defeat from Limasol, by Poulet. Her second to Galtee More in the St. Leger was certainly her best performance, and Velasquez gave her 12lb. and a beating in the Jockey Club Stakes, won by Love Wisely, Velasquez being second. Limasol, the Oaks winner, only started twice after that eventful contest, being nowhere in both the Gold Cup at Ascot and also in the Cesarewitch, with 7st. 10lb. Amongst the four-year-olds, H.R.H. the Prince of Wales's grand St. Simon colt, Persimmon stands far in advance of any other horse of his age. He made his first appearance in the Ascot Gold Cup, value £3,380, Winkfield's Pride, Love Wisely, and the Oaks winner, Limasol, were his opponents; 85 to 40 were freely laid on his chance, and he won in a canter by eight lengths, a fitting victory in the Jubilee year. Only once again did he sport the royal colours during the year, when he came out for the Eclipse Stakes, £9,285, at Sandown on July 16th. Starting at 100 to 12 on, he won easily from Velasquez. He has grown and thickened into a magnificent specimen of a thoroughbred. Count Schomberg, Winkfield's Pride and Love Wisely were after Persimmon the best of the Cup horses of the year, as St. Bris's Alexandra Plate victory at Ascot was not rather discounted by his poor show in the Cesarewitch, his only subsequent performance. The handicaps of the year, notwithstanding the hard ground, produced large fields and some heavy gambling. The Lincolnshire (£1,815) was won by Winkfield's Pride, carrying a big weight in an excellent field, and starting at 7 to 2 against. The Liverpool Grand National (£1,975) was an easy win for the favourite, Manifesto, a 6 to 1 chance, but the champion steeplechase of the year is not now the important event it once was. At Kempton Park, April 19th, Bridgroom, 4 years, *6st. 11lb.*, an even money favourite, won the Queen's Prize of £925, Clorane, 6 years,

10st. 2lb., being beaten into second place. In the Lancashire Handicap Steeplechase of £1,725 Knight of Rhodes, aged, 12st. 4lb., won, Manifesto, the favourite, falling. The two most noticeable events of the Newmarket Craven Meeting were the victory of Goletta in the Biennial, value £577, her first appearance for the year, and Lysander's win in the Column Produce Stakes. At the Epsom Spring Meeting Soliman, 5 years, 7st. 4lb., won the Great Metropolitan Stakes, value £925, and Balsamo, 4 years, 7st. 4lb., a 9 to 2 favourite, won the City and Suburban (£1,665). At Sandown Park, April 30th, Green Lawn, 6 years, 7st. 5lb., won the Esher Stakes, £855. Green Lawn is another of Kendal's progeny. At the same meeting, Manifesto, with the top weight, 12st. 5lb., won the Grand International Steeplechase Handicap easily. Count Schomberg's victory with the top weight, 8st. 10lb., in the Chester Cup, was the feature of the Chester Meeting, and at Kempton Park, May 14th, 15th, the Great Jubilee Stakes Handicap, £2,650, fell to the favourite, Clwyd, 6 years, 7st. 5lb., the top weights, Kilcock, 9st., and Victor Wild, 9st. 9lb., being second and third; Clwyd was a hot favourite at 3 to 1 against. Greenlawn, 6 years, 8st. 13lb., won the Prince's Handicap, £1,650, at Gatwick, May 22nd, and on the eve of the Derby, the French Prix du Jockey Club, at Chantilly, £7,195 was won by Palmistrie II. At Epsom Summer, Royal Flush, 4 years, 7st. 10lb., won the Royal Stakes Handicap of £900. Before Ascot, in France, Solitaire, 5 years, 11st. 1lb., won the Grand Steeplechase de Paris, of £6,136, and Doge carried off the Grand Prix de Paris, value £10,190, St. Cloud II. being the only English Derby horse competing. The Manchester Summer Cup, £1,887, was won by Piety, 4 years, 7st. 3lb. The going at Ascot was decidedly hard, but being just before the Jubilee the attendance in the stands and Royal enclosure beat all records. Masque II., the favourite, won the Stakes, £1,880. Count Schomberg gave Comfrey 24lb. and a beating in the Gold Vase, £560. Sandia, 3 years, 8st. 11lb., won the Fern Hill, £500. Knight of the Thistle, 4 years, 7st. 5lb., won the Royal Hunt Cup, £2,370, from the top weight, Victor Wild, 9st. 12lb. Minstrel, third in the Two Thousand, won the Ascot Derby, £1,175. Goletta at last ran up to her two-year-old form, and won the Coronation, £3,550. Balsamo won a four-year-old Biennial, £880. Eager won the Rous Memorial, £960. Vesuvian made his debut for the year in the St. James' Palace, £1,750, winning easily. The Hardwicke, £2,378, fell to Bay Ronald, 4 years, 9st. 7lb. El Diabolo, aged, 7st. 10lb., won the Wokingham, £870, and St. Bris scored his only victory of the year in the Alexandra Plate, £1,470. Bradwardine, the favourite, 3 to 1 against, won the Northumberland Plate, £1,025, and at the Sandown Park June Meeting, Ben Armine, 3 years, 6st. 7lb., won the Clarence and Avondale Handicap (£2670). Victor Wild, aged, 9st. 13lb., made his last and only winning appearance for the year in the Coronation Cup Handicap at Kempton Park, June 26th. At the Newmarket First July Meeting, Mousse, by St. Simon, won the July Stakes (two-year-olds), £1,400, and Velasquez's victory in the Princess of Wales' Stakes is mentioned elsewhere. The principal winners at Goodwood, July 27, &c., the turf being in good order, were: Steward's Cup, £652, Amphora, 4 years, 8st. 8lb., at 100 to 8. Goodwood Stakes, £495, Gluten, 4 years, 7st. 1lb., at 5 to 1; Chesterfield Cup, £582, Birch Rod, 4 years,

7st. 7lb., at 10 to 1, and Count Schomberg, the Cup, value £625. At Brighton, Eager, 9st., won the Cup, £487, distance 1 mile, and at Lewes, Merman, 5 years, 6st. 12lb., won the chief handicap (£990) from a good field. At York, Harvest Money, 4 years, 7st. 7lb., won the Great Ebor (£925) at 4 to 1. At Doncaster, the Great Yorkshire Handicap (£975) fell to Carlton Grange, 5 years, 7st. 12lb., at 5 to 1; the Portland Plate, £715, to Kilkerran, 3 years, 7st. 11lb., at 10 to 1; the Stakes (£600), to Butter, 3 years, 8st. 12lb., and Winkfield's Pride walked over for the C. Cup. The Newmarket Autumn Meetings were well attended, the going was good, and the racing excellent. At the First October, Butter won the 49th Triennial Produce Stakes. Bewitchment, 3 years, 6st. 8lb. at 7 to 1, the Great Eastern Railway Handicap, £566, Love Wisely, 4 years, 9st. 7lb., the Jockey Club Stakes, £8,667, at 5 to 2, beating Velasquez, Chelandry, Goletta, Merle, and a capital field of horses, and Lysander the Newmarket St. Leger, £475. At the Paris October 3rd Meeting, Winkfield's Pride, 4 years, 9st. 2lb., at 5 to 4, won the Prix du Conseil Municipal, £4,000, one of the few races in France open to English horses. At the Newmarket Second October the chief winners were Velasquez, 3 years, 8st. 5lb., in the Champion Stakes, £885, Asterie in the Newmarket Oaks, £510, Orelino in the Royal Stakes, and Merman, 5 years, 7st. 5lb., the Cesarewitch, £985, starting at 100 to 7. St. Bris, 4 years, 8st. 2lb., was a hot favourite at 4 to 1; and The Bush, 5 years, 8st. 3lb., put by since Lincoln for this race and ridden by C. Wood, was heavily backed at 7 to 1. Mrs. Langtry (the owner of the winner) who races as "Mr. Jersey," won a large stake by the victory, but Merman only got home by a neck from The Rush, the finish being remarkably close and exciting. All the interest in the Houghton Meeting centred in the Cambridgeshire, £1,425, which proved an exceptionally heavy-betting race, Galtee More, with his almost impossible weight of 9st. 6lb., being backed down to 9 to 2; Comfrey, the ultimate winner, was allowed to start at 25 to 1, his remarkable series of victories earlier in the season being forgotten. Tod Sloane, the Yankee jockey, however, almost got home on St. Cloud II., the Dispair colt only gaining the verdict by a head after a desperate finish. Count Schomberg was allowed to walk over for the Jockey Club Cup, £390. At the Liverpool Autumn Meeting the second week in November, Easter Gift, 5 years, 7st. 10lb., ridden by Sloane, won the Great Lancashire Handicap (£460) and the Liverpool Autumn Cup (£1,200); the last important handicap of the year fell to Chiselhampton, 4 years, 8st. 11lb., on November 12. The two-year-old form of the season is a most difficult problem, and it is by no means easy to fix upon the Derby favourite for 1898—a most unusual state of things. No sooner did the result of a juvenile race seem to discover a real crack, but at his very next appearance he was beaten. Probably Champ de Mars by Martagon—Fleur de Marie, and Cyllene by Bona Vista—Arcadia are the two best colts of the year. Strange to say, both made their first appearance at the Liverpool March Meeting, and both were only once defeated during the year. Champ de Mars won the Molyneux Plate £820 at Liverpool, the two chief two-year-old stakes at the first and second Spring Newmarket Meetings, worth £697 and £457, the Lingfield Stakes of £820, and the Prince of Wales's Stakes at Goodwood, £625. His only defeat was in the Derby Champion

Breeder's Biennial (£1,005), when with 9st. 2lb. he failed to give the weight away to Disraeli, 8st. 5lb. (his first appearance). Dieudonne, 8st. 2lb., was well beaten. A subsequent victory at Ayr concluded his running for the season. Disraeli subsequently ran second to Dieudonne for the Middle Park Plate, but was well beaten by Ninus in the Great Sapling Stakes. Cyllene won four races straight off the reel at Liverpool, Gatwick, Ascot, and Sandown (National Breeder's Produce, £4,993), the most valuable two-year-old stake of the year. His last appearance and only defeat was at Kempton Park, when he failed by half-a-length to beat Dieudonne, 9st., to whom he was giving 10lb., in the Imperial Produce Stakes of £2,954. Ayah, a filly by Ayrshire, won the Champagne (£1,300), and Batt by Sheen—Vampire won the Criterion (£636), but in the modern days of big stakes the old-time test races for the classic events of the following year are of no value. Dieudonne by Amphion—Mon Droit, after his Kempton Park and Middle Park Plate (£2,505) victories, where he defeated Disraeli by Galopin—Florio Rubattino, the Ascot New Stakes winner. Orzil, by Ayrshire, with five previous successive victories, appeared certain to be the Derby winter favourite, but his defeat in the Dewhurst Plate (£1,297) by the dark Hawfinch by Goldfinch 8st. 9lb., and Ninus by Sheen, 8st. 13lb., discounted his two previous victories. To make the tangle of two-year-old form still more complicated, Cyllene, Champ de Mars, Ninus, Cap Martin, and Baker are not entered for the Derby, so that Hawfinch, Batt, and Dieudonne must be considered the most likely horses to figure prominently in the Derby betting during the winter months. The Australian starting-gate system was tried in several events at the Newmarket closing meetings and worked fairly well, although the English flag-dropping arrangement hitherto in use is unlikely to be entirely superseded for many years to come. The magnificent and consistent performances of Galtee More had the effect of promoting his sire, Kendal by Bend Or—Windermere, to the top of the list of winning sires of the season. Early in November (Nov. 6) his stock had won £28,146, of which amount Galtee More's seven victories accounted for £22,637; Greenlawn, with £3,335, was his next best winner; St. Simon had to put up with second place; Persimmon (£12,665), and St. Bris (£11,470) being the chief contributors to his £22,414 at the same date. Ayrshire was third with £16,421, Orzil and Ayah being his best winners. Donavon, fourth, with £12,593, would have been nowhere without Velasquez, who was credited with £9,075. Galopin's £12,254 was mainly accounted for by Goletta (£5,796), Disraeli, and Galatia. Wisdom's chief winner was Love Wisely, £8,667 from one victory only. Hampton, Bend Or, and M'nting are low down in the list, and Martagon (£9,111) and Amphion (£7,974) owe their position to the two-year-olds Champ de Mars (£5,844), a son of Martagon, and Dieudonne (£5,450), whose sire is Amphion. At the conclusion of the season (November 27) the positions of the twelve leading jockeys were as follows:—M. Cannon, 145; S. Loates, 136; C. Wood, 122; F. Allsopp, 99; O. Madden, 79; F. Finlay, 76; T. Rickaby, 69; T. J. Calder, 66; N. Robinson, 59; W. Bradford, 61; S. Chandley, 51; J. Fagan, 49; J. Watts, 46. M. Cannon was at the top of the list from the very first. C. Wood, now 43 years of age, rode for the first time this season, after being for nine years without a licence.

Tod Sloane, an American jockey, arrived here early in October, and by November 6 had ridden 6 firsts and 3 seconds out of 12 mounts—a wonderful average. In Australia, the racing season so far has been most successful. The Australian Jockey Club Derby, Sept. 11, was won by Amberite, a son of the Australian crack sire and stayer Carbine. All three placed horses in this race were by Carbine. Amberite followed this up by winning the Caulfield Cup on Oct. 16, one of the principal handicaps of the year, with a heavy weight (7st. 6lb.) for a three-year-old. Amberite also won the Melbourne Derby, October 30, but he could only finish fourth in the big racing event of the Australian turf year—the Melbourne Cup, run for at Flemington, November 2. Gaulus, 6 years, 7st. 8lb., won; The Grafter, 4 years, 7st., was second; both are by Gozo out of the same mare, Industry. Arum, 3 years, 8st. 6lb., was third; Amberite, 3 years, 8st. 4lb., was beaten. Elusine won the Oaks on November 4. At the same meeting Arum, by Trenton—Aura won the Flying Stakes, another race of the same name, and the C. B. Fisher Plate. He is considered the best horse in the world by good Australian judges.

YACHTING.

YACHT racing did not receive special recognition in the Diamond Jubilee year, except at the hands of the German Emperor, who gave a valuable cup—personally designed—for a race from Dover to Heligoland. The Riviera regattas during February, March, and April, have of late years been regarded as part of the yacht-racing season, and a series of interesting matches were sailed between the Prince of Wales' famous cutter *Britannia*, and Mr. A. B. Walker's *Ailsa*. The two yachts commenced racing at Marseilles, and on finishing at Nice, honours were easy, each vessel having won ten prizes. In the second division the prizes were pretty evenly shared by the British cutter *Sapphire*, owned by Col. A. Paget, and the French yachts *Luciole* and *Malgre Tout*, and in the next class the Cowes-built boat *Aspodel* (Mr. T. H. Lambert), gained numerous prizes, the five-tonner *Fern*, first owned by Mr. A. B. Walker, and subsequently sold to Mr. T. H. Lambert, had however the best record of all the boats measuring between three and ten tons. Racing in home waters commenced rather lifelessly, the German Emperor's cutter *Meteor*, and Mr. Van Laun's *Caress* alone taking part in the first-class matches on the Thames, and there being no recognised class racing with either the 65 or 52 feet class, the running down of the *Isolde* (52 footer) by the *Meteor* at Southsea at the close of the season 1896, being the cause of a temporary collapse of the "20 ton" racing, while the *Isolde* and *Carina*, which were the only "40 tonners" fitted out, had attractions in home waters. Very few of the handicap class fitted out early, and the first noteworthy muster of vessels under racing colours, was in the matches from the Nore to Dover. The *Meteor* continued racing as far as Eastbourne, and then went across the North Sea to Kiel, and gained six prizes in a series of races in German waters. The race for the Emperor's Cup was started from Dover the day following the Jubilee pageant in London, and the fleet of thirteen starters was made up of the following cruisers and ex-racers:—*Freda*, Mr. Wyndham F. Cook, *Ariadne*, Mrs. Meynell Ingram, *Anemone*, Mr. J. H. Haggas, *Asterop*, Mr. A. Wood, *Goddess*, Mr.

W. F. L. Popham, *Merrythought*, Mr. Quentin, *Gwynfa*, Mr. Myring, *Lady Ruth*, Mr. Trollope, *Cygnets*, Mr. Nelson, *Cetonia*, Lord Iveagh, *Amphitrite*, Sir F. Wills, *Corisanda*, Duke of Leeds, and *Jullanar*, Mr. James. The *Cetonia* was the first yacht to arrive at Heligoland, then came *Ariadne*, *Amphitrite*, *Freda*, *Corisanda*, *Jullanar*, *Anemon*, *Asterop*, *Goddess*, and *Gwynfa*, the *Freda* being winner of the Emperor's Cup, *Ariadne* taking second prize, *Jullanar* third prize, and *Corisanda* fourth prize. There was really no racing of importance until the Clyde season commenced at the end of June, when the new cutter *Bona* of 82 rating, owned by the Duke of d'Abruzzi, made her debut. She commenced her career successfully, but did not meet the *Meteor* until the latter got to Belfast from Kiel, and it was at once evident that the German Emperor's cutter would have a difficulty to concede the small boat yacht racing Association time allowance. The *Ailsa* and *Britannia* had both been laid up on their return from the Mediterranean, but the Prince of Wales' yacht was fitted out for the Cowes week, and the first-class division was further augmented by the *Aurora*, a new cutter which had been built at Southampton for Mr. C. D. Rose, who in the previous year had owned the *Satanita*. There was some splendid racing inside the Isle of Wight with the big vessels, and the 20 rating class, but the 65 feet racing fell through owing to the *Careess* failing to keep some pre-arranged engagements with the *Isolde*. Throughout the season fresher winds prevailed than was the case in 1896, and as a consequence, the *Meteor* had not so good a chance of conceding the yacht-racing Association heavy time allowance she would have had in light steady breezes, beside which the German Emperor's cutter was not favoured with the best of good fortune. She gained, however, many notable victories, but the Duke d'Abruzzi's *Bona* was the principal prize-winner. The *Britannia* had a brief but brilliant season, as she won the two principal prizes at the Royal Yacht Squadron regatta, and started only four times. The *Aurora* had a short season, and a thoroughly disappointing one, yet she had hardly a fair opportunity of making herself a name. The *Isolde*, Mr. P. Donaldson, was again at the head of the 65-foot class, and the new 20 rater *Morning Star*, Mr. A. Coats, had a better record than Lord Dunraven's two-year-old *Audrey*, but there was close and interesting racing between the pair all

through. Competition was pretty keen in the smaller classes, and the *Westra*, Mr. J. C. Connell, unquestionably proved the best boat of the "five" rating division. In heading the winning list of the first-class yachts, the *Bona* started 26 times, and won 16 first and 2 second prizes; value £1,020. The German Emperor's cutter *Meteor* ranked next in order of merit, with 16 prizes, 6 of which were won in German waters. The *Aurora* won 3 first and 1 second prize in 12 starts, and the *Britannia* 2 first prizes in 4 starts. Mr. P. Donaldson's 40 rater *Isolde* had but a limited amount of class racing, but she managed to gain 22 first prizes and 3 second; value £850 in 42 starts. The *Careess* (67 feet), Mr. Van Laun, commenced the season well against the *Meteor*, and won 14 prizes; value nearly £500. *Cavina* (65 feet), Mr. P. M. Inglis, gained all her victories in Scotch waters, and finished with 11 flags. The *Morning Star*, Mr. A. Coats, headed the list in the 52-foot class with 17 first prizes and 9 second prizes in 37 starts; and *Audrey*, Lord Dunraven, ran a good second with 10 first prizes and 13 seconds in 39 starts; the *Penitent*, Mr. W. P. Burton, had, however, the best average, with 10 first prizes and 3 seconds in 17 starts. The most prominent winners in handicap matches were the *Maid Marion* cutter, 72 rating, Mr. M. B. Kennedy, *Namara*, yawl, 73 rating, Mr. W. B. Paget, *Creote*, cutter, 63 rating, Col. V. Bagot, and *Thelma*, cutter, 52 rating, Mr. Michels; and amongst other winners may be named, the *Anemon*, yawl, Mr. J. H. Haggas, *Hester*, cutter, Mr. J. Nairn, *Latona*, yawl, Mr. Johnstone, *Thalia*, cutter, Hon. Judge Boyd. In the 32-foot class the *Westra*, Mr. J. C. Connell, was first in order of merit, with the *Emerald*, Mr. J. Gretton, a good second. The *Lora*, Mr. A. C. Connell, had the best record in the 30-foot class with the *Carol*, Mr. Robinson, running her close, and the *Speedwell*, Miss Cox, was far in front of everything in the 24-foot class.

An important Meeting of the Council of the Yacht Racing Association was held November 12th. The Council decided not to recommend to the General Meeting any alteration in the rating formula as regards classes of 35 feet rating and under, but they decided to advise a minimum limit of displacement. The correspondence regarding the fouling of the *Jullanar* by the *Cetonia* in the German Emperor's Jubilee Cup was also dealt with.

LIGHT AND SOUND.

Light travels at the rate of 186,660 miles per second, and takes 8 minutes 18 seconds to travel from the Sun to the Earth. Any phenomenon, therefore, occurring on the surface of the Sun is not observed by an inhabitant of the globe till that time afterwards.

Sound travels in still air, at the freezing-point,

at the rate of 1,090 feet per second, and the report of a gun one mile distant would not be heard till nearly 5 seconds after the flash was seen. The moisture in the air and direction of the wind, as well as the temperature, would, to some extent, modify the time elapsing between the flash and the report.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

The following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive:—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11th Dec. & 19th Aug., 11th Dec. & 31st Aug., in Somerset, Devon, and New Forest.	11th Dec. & 19th Aug.	11th Dec. and 19th Aug.
Bustard.....	2nd Mar. & 31st Aug.	None.	11th Jan. & 31st Aug.
Deer, Male.	None.	None.	1st Jan & 9th June.
„ Fallow Male	None.	None.	Michaels. & 9th June.
Grouse or Red Game	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.
Hare*.....	None.	None.	21st Apr. & 11th Aug.
Heath or Moor Game	None.	As "Muir-fowl."	11th Dec. & 11th Aug.
Landrail ...	As "Wild Birds."	As "Wild Birds."	11th Jan. & 19th Sep.
Muirfowl, or Ptarmigan	None.	11th Dec. & 11th Aug.	11th Dec. & 19th Aug.
Partridge ...	2nd Feb. & 31st Aug.	2nd Feb. & 31st Aug.	11th Jan. & 19th Sep.
Pheasant ...	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11th Jan. & 19th Sep.

It is unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day. Sand Grouse may not be killed at any time.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880, 1881, and 1894, from 2nd March to 31st July, both inclusive, throughout the United Kingdom, except the Island of St. Kilda. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence. In the case, however, of the undermentioned birds, the penalty is £1 for each bird for each offence:—
 American quail. Colin. Dotterel.
 Auk. Cornish chough. Dunbird.
 Avocet. Coulterneb. Dunlin.
 Bee-eater. Cuckoo. Eider-duck.
 Bittern. Curlew. Fern-owl.
 Bonxie. Diver. Fulmar.

* See also below "Seasons for hunting and ground game shooting."

Gannet.	Owl.	Sheldrake.
Goatsucker.	Ox-bird.	Shoveller.
Godwit.	Oyster-catcher.	Skua.
Goldfinch.	Peewit.	Sniew.
Grebe.	Petrel.	Snipe.
Greenshank.	Phalarope.	Solan Goose.
Guillemot.	Plover.	Spoonbill.
Gull (except Black-backed).	Ploverspage.	Stint.
Hoopoe.	Pochard.	Stone Curlew.
Kingfisher.	Puffin.	Stonehatch.
Kittiwake.	Purre.	Summer snipe.
Lapwing.	Razorbill.	Tarcock.
Lark.	Redshank.	Teal.
Loon.	Reeve or Ruff.	Tern.
Mallard.	Roller.	Thicknee.
Marrot.	Sanderling.	Tystey.
Merganser.	Sandpiper.	Whaup.
Murre.	Scout.	Widgeon.
Night-hawk.	Sealark.	Wild duck.
Night-jar.	Seamew.	Willock.
Nightingale.	Sea parrot.	Wimbrel.
Oriole.	Sea swallow.	Woodcock.
	Shearwater.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Act does not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order, providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

SEASONS FOR HUNTING AND GROUND GAME SHOOTING.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognized date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about Aug. 12 to Oct. 12 for stags, and from Nov. 10 to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to foreign hares. The statutory close season for hares in Ireland has been varied for some counties by order of the Lord Lieutenant, and it is now mostly from April 1st to August 12th.

CLOSE-TIME FOR SALMON.

I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon—the word "Salmon" includes all migratory salmonidae—are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for salmon is pro-

hibited. The close-time for nets begins on 1st September, and ends on 1st February; and for rods it begins on 2nd November, and ends on 1st February. The commencement and termination of the close season may be varied by a bye-law by the local boards of conservators (see p. 654), but it must never begin for nets later than 1st Nov., nor be less than 154 days. For rod and line the minimum close-time is 92 days, which must commence not later than 1st December. For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law. The following are the cases in which these dates have been varied by bye-law:—

Close-time for	Nets.	Rods.
Avon & Stour	31 July to 1 Feb.	2 Oct. to 1 Feb.
Taff and Ely	31 Aug. to 30 Apr.	15 Nov. to 30 Apr.

Avon & Erme..	130 Sep. to 1 May	30 Nov. to 1 May
Camel	21 Sep. to 4 Apr.	1 Dec. to 30 Apr.
Fowey	31 Nov. " "	" " "

No fresh salmon may be sold between 3rd September and 1st Feb., except such as can be proved to come from parts beyond the seas, or to have been taken, if in the United Kingdom, in legal netting season and in legal manner. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st February and 3rd November may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3rd Sep-

tember and 30th April, unless it can be proved that the salmon exported or entered for exportation was caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The capture and sale of "unclean" salmon, i.e., salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the Local Conservancy Boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

II. SCOTLAND.

In Scotland the annual close-time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and, for rods, from 1st November to 10th February, except as follows:—

Close-time for	Nets.	Rods.
Add. Aray, Eckkaig, N. & S. Esk, Fyne, Ruel, Shira.	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Beauly, Dunbeath, Lossie, Ness, Spey, Halladale, Strathy, Naver, Borigie, Helmsdale.	—	16 Oct. to 10 Feb.
Girvan	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Bervie, Carradale, Fleet, Garnock, Inner, Iorsa, Irvine, Laggan, Luce, Sorn, Ugie, Ythan, and rivers of Orkney, Harris, & Uist.	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Nith	ditto	25 Nov. to 24 Feb.
Annan, Stinchar	ditto	16 Nov. to 24 Feb.
Rivers of Shetland.	ditto	16 Nov. to 31 Jan.
Urr	ditto	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tay	—	16 Oct. to 14 Jan.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. IRELAND.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts, in parts of some of

* Between Carmarthen Bar and St. Goven's Head, 25th September to 30th April for nets.
 † In Borough of Shrewsbury only.

 ¶ Except R. Erme, 30 Sept. (rods 30 Nov.) to 4 Apr.

which, however, it is different (all dates inclusive). The second column gives the point of delimitation on the coast between the various districts, which include all rivers, &c., within their respective coast-limits.

later than the 2nd November, and is not less than 123 days. The following dates have been fixed under this Act. In the districts marked * the close-time, as altered, applies only to trout. The sale of trout and char, however, is absolutely prohibited throughout England and Wales from 2nd October to 1st February:—

District.	Coast Limits.	Cl.-T.Net.	Cl.-T.Rod.
Dublin.....	Skerries	16 Aug. to 1 Feb.	1 Nov. to 31 Jan.

Coleraine .	Downhill	20 Aug. to 3 Feb.	1 Oct. to 28 Feb.
Ballycastle	Portrush	20 Sept. to 16 Mar.	1 Nov. to 31 Jan.
Dundalk...	Donaghadee ...	15 Sept. to 1 Apr.	1 Oct. to 2 Feb.
Drogheda .	Clogher Head..	4 Aug. to 12 Feb.	15 Sep. to 12 Feb.

In Ireland the weekly close-time is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday. Salmon and trout must not be sold in Ireland in the close season.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2nd October and 1st February, except in Norfolk and Suffolk, where, under a local Act (the Norfolk and Suffolk Fisheries Act, 1877), the conservators have fixed the close-time for trout, for nets only, at from 10th September to 25th January; and except in the Thames, where the close season is from 24th Sept. to 31st March.

By an Act passed in 1876, the trout and char close-time may be varied by bye-law by local boards of conservators, so, however, that it does not commence earlier than the 2nd September nor

*Eden ...	2 Sept. (rods 16 Oct.) to 28 Feb.

Wear	{ 2 Oct. to 1 Mar. (ditto)
*Dee	{ 14 Oct. to 14 Feb. (for rod & line only)
*Coquet ..	{ 1 Nov. to 3 Mar. (for rod & line only).

In Scotland there is no close-time for trout and char. In Ireland the close-time for trout is the same as for salmon. This may be altered, but not shortened, by the Inspectors. For pollen, however, the close-time is fixed by the Pollen Fishery (Ireland) Act, 1881, from 1st Nov. to 31st Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char" as the case may be.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1873, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15th March to 15th June, both inclusive, for all parts of England and Wales except parts of Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first and £5 for a subsequent conviction. The close-season, however, does not

† 25 Oct. above Amesbury.
‡ Rivers Braint and Cefni, 15th Oct. to 1st March.
§ 2 Oct. to March 31 for Windermere and Coniston and R. Duddon; and 1 Sep. to 15 Feb. for R. Bela.
|| April 30 between Lostwithiel and St. Winnow.

apply to eels taken otherwise than by angling or to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Trade, and the Avon and Stour, Avon and Erme, Wye, Eden, and Towy fishery districts have been so exempted; also the Kent and Leven, Severn and Yorkshire districts, as regards pike; the Usk as regards eels; and certain parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. For eels a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from January 1 to June 24; in Ireland, with one or two exceptions, from January 11 to June 30. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4½ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat.

CLOSE-TIME FOR OYSTERS.

By the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters

—except oysters taken in the waters of a foreign state—from 14th May to 4th August. By a recent decision foreign oysters temporarily deposited on English oyster layings for purposes of storage only do not come within this close season. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to 31st August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till 1st June in each year. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied by the Inspectors of Fisheries in the following cases:—

Tralee Bay	11th Mar. to 31st Oct.
Galway Bay	1st Jan. to 30th Nov.
Strangford Lough	1st Mar. to 31st Aug.
Achil Sound, Clew Bay and Sligo, Ballisodare and Drumcliffe Bays ...	and April to 30th Sept. 30th April to 1st June.

Taking oysters from licensed beds is made larceny.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; or owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence, and soldiers, sailors, volunteers, or constables on duty, or at practice, or occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence, need not take out a gun licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 432.

SALMON LICENCES.—It is not so generally known that in salmon fishery districts in England and Wales, and in Ireland, it is necessary to take out a licence to fish for salmon, and, in most rivers, for trout or char. In Scotland no such licence is needed. A licence is available only in the district,

and for the season, in which it is issued, except that in Ireland one rod licence is available in all parts of that country. The rates on nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from about £5 to £2. The licence duty on a rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Derwent	Ogmore	} 10/6
*Lune	*West Cumberland	
*Ribble	*Eden	} 21/-
*Dee	*Selont	
Clwyd & Elwy ...	Dwyfach	} 12/-

Taff and Ely ...	Coquet	} 5/-
Rumney	Cuckmere	

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1896, in the hands of local boards of conservators appointed for the purpose, with the Board of Trade as the central authority. Districts may be formed, and Boards of Conservators appointed, for waters containing salmon, or freshwater fish.

Such Boards have been appointed for 52 Districts. [The districts generally include all rivers running into the sea between the points named, and in the cases marked + also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries.]

These Boards of Conservators consist of three classes of members—those appointed annually by the County Councils of the various counties

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
+Eden.....	Sark Foot to Seaton	J. B. Slater, Carlisle.
+Derwent.....	Seaton to St. Bees Head	T. C. Burn, Papcastle, Cockerm'uth.

+Tyne	Newbiggin Point to Hawick Burn	R. Gibson, Hexham.
+Coquet.....	C. Peroy, Alnwick.

through which the rivers flow; *ex-officio* members, or those qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by the persons who have paid licence duty on instruments other than rod and line, used for salmon fishing in public waters. There are also certain bodies created by local

statutes, having authority over the fisheries, e.g. the Thames Conservancy Board, Lee Conservancy Board, and Conservators of the Medway.

These Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other kinds of fishing

which are prejudicial to such Fisheries. They are also empowered to issue licences for fishing for salmon, trout, &c. (see p. 653).

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 31 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Act, 1888, the Board of Trade has power to form sea fisheries districts within the territorial waters of England and Wales, and to appoint local Fisheries Committees. These committees may be appointed either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Trade, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on

fishing grounds, &c. The following districts have been created—including in each case the coast and territorial seas adjoining between the points respectively mentioned:—1. Northumberland (co-terminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, from Donna Nook to Hap-pisburgh. 4. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (co-terminous with that county). 6. Southern, from the western boundary of Dorset to Hayling Island. 7. Devon. 8. Cornwall (each co-terminous with the respective counties). 9. Glamorgan, from Naah Point to Worms Head. 10. Milford Haven, from Worms Head to Cemmaes Head. 11. Western, from Cemmaes Head to eastern boundary of Carnarvonshire. 12. Lancashire, from Carnarvonshire to Haverigg Foot. 13. Cumberland, Haverigg Point to Sark Foot.

Similar districts are being formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish moety in use are "in season" and "out of season."

In their prime; the dagger (+) signifies that the fish may be obtained, but are not at their best; the double dagger (‡) signifies that it is "close-time" as fixed by statute.

The asterisk (*) signifies that the fish are then

(a) This is for sea crayfish. River crayfish can be obtained in the spring, summer, and autumn. It is a moot point whether it is legal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for storage.

(c) In the close season salmon from Holland and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(d) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

There are in England, including "Her Majesty's" (Master, Lord Coventry), of which there are 40 couples; the kennels being at Ascot Heath, 19 packs of Stag-hounds, containing between them 461 couples of hounds; besides seven packs in Ireland, with 700 couples. The following are the Masters, the Kennels, and the numbers of the principal packs of Stag-hounds (with over 20 couples each):—

PACK.	COUPLES.	MASTER.	KENNELS.
County Down	34	Mr. F. Barbour	Ballinahinch, county Down.
Devon and Somerset	44	Mr. E. A. Sanders	Exford, Taunton, Somerset.
Enfield Chase	23	Colonel A. P. Somerset, c.s.	Enfield Court, Middlesex.
Essex	22	Mr. S. H. Newave	Mill Green Park, Ingatonses.
Gerard's, Mr.	22	Hon. R. Gerard	Wrightington Hall, Appley Bridge, Lancs.
Mid Kent	25	Mr. Aug. Lenev	Wateringbury, Maidstone.
New Forest	26	Mr. E. F. Kelly	Northerwood, Lyndhurst, Hants.
Rothschild's (Lord)	30	Lord Rothschild	Ascot, Leighton Buzzard.
Roscommon	26	Major Balfe	South Park, Castlereagh.
Surrey	25	Mr. F. Gregory	Horleyland, Horley, Surrey.
Seventh Dragoon Guards	24	Capt. Pollett	Mousehold, Norwich.
Ward Union	30	Mr. Percy Maynard	Ashbourne, county Meath.
Surrey, West	30	Mr. M. D. Rucker	Woodland Park, Leatherhead, Surrey.
Savernake	35	Mr. L. Phipps	Savernake, Marlborough.
Westmeath South	30	Lord Castlemaine	Ballykeeran, Athlone.

Of Foxhound packs, there are no less than 150 in England and Wales containing 6,040 couples of hounds; in Scotland, ten packs, with 253 couples; and in Ireland, 24 packs, with 884 couples. The following are the packs of Foxhounds containing 50 couples of hounds or more:—

PACK.	COUPLES.	MASTER.	KENNELS.
Albrighton	50	Mr. Jas. Foster	Whiston Cross, Shiffnal.
Atherstone	63	Mr. G. H. Hardy	Witherley, Atherstone, Warwickshire.
Badsforth	50	Mr. J. S. H. Fullerton	Badsforth, Pontefract.
Badminton	75	Marquis of Worcester	Badminton, Wilts.
Belvoir	64	Sir G. Greenall	Belvoir Castle, Grantham, Lincoln.
Berkshire, Old	50	Mr. F. C. Swindell	Kingston Bagpuzze, Abingdon.
Bicester and Warden Hill	55	Earl of Cottenham	Stratton Audsey, Bicester, Oxon.
Blackmore Vale	50	Mr. M. Guest	Charleton Horethorne, Sherborne, Dorset.
Blankney	50	Mr. N. C. Goding	Blankney Park, Lincoln.
Bramham Moor	50	Capt. J. R. Lane-Fox	Bramham Park, Boston Spa, Yorkshire.
Burton	55	Mr. T. Wilson	Reepham, Lincolnshire.
Oatistock	50	Mr. R. C. Pole	Sydling Court, Dorchester.
Cotswold	50	Major de Freville	Cotswold, Cheltenham.
Cottesmore	54	Mr. W. Baird	Ashwell Road, Oakham, Rutland.
Craven	50	Mr. W. H. Dunn	Walcot, Hungerford.
Crawley and Horsham	50	Mr. C. B. Godman	West Grinstead, Sussex.
Dartmoor	50	Mr. W. Coryton	Woodland, Ivybridge.
East-Sussex	50	Mr. J. C. Munro	Catsfield, Battle.
Essex Union	52	Messrs. E. Bowditch & Arkwright	Harlow, Essex.
Ferne's (Mr.)	50	Mr. C. W. Ferne	Great Burstead, Billericay.
Fitzharding's (Lord)	60	Lord Fitzharding	Medbourne, Market Harborough.
Fitzwilliam's (Mr.)	50	Mr. G. W. Fitzwilliam	Berkeley, Gloucester.
Galway's (Lord)	55	Lord Galway	Milton, near Peterborough.
Garth's (Mr.)	52	Mr. T. Garth	Serby, Bawtry, Yorks.
Grafton	52	Hon. E. D. Pennant	Haines Hill, Twyford, Berkshire.
H. H. (Hampshire)	54	Mr. F. Coryton & Col. Knox	Paupers Pury, Twcester.
Hambledon	50	Hon. F. Baring	Rooley, Alresford.
Harrington's (Earl)	50	Earl of Harrington	Droxford, Bishop's Waltham, Hampshire.
Hertfordshire	50	Mr. E. R. Sweder	Deiling, Essex.
Heythrop	50	Mr. A. Brassey	Kenesbourne Green, Luton.
Holderness	52	Mr. A. Wilson	Chipping Norton, Oxon.
Ledbury	65	Mr. F. T. Wilson	Etton, near Hull.
Meynell	53	Mr. H. Bass, m.p.	Ledbury, Herefordshire.
Middleton's (Lord)	50	Lord Middleton	Sudbury, Derby.
North Cheshire	53	Earl of Enniskillen	Birdsall, Malton, York.
North Staffordshire	55	Duke of Sutherland	Forest Kennels, Northwich.
North Warwickshire	50	Lord Algeron Percy	Trentham, Stoke.
Oakley	56	Mr. P. A. Whitaker	Kenilworth.
Percy	63	Mr. A. F. B. Cresswell	Milton Ernest, Bedford.
Puckeridge	54	Mr. J. E. Barclay	Greening, Leabury.
Pytchley	54	Mr. E. C. Barclay	Braughing, Ware, Herts.
Quorn	55	Mr. W. M. Wroughton	Brixworth, Northampton.
Rufford	50	Earl of Lonsdale	Quorndon, Loughborough.
Shropshire	50	Mr. L. Rolleston	Rufford, Ollerton, Newark.
South and West Wilts	60	Mr. A. P. H. Lonsdale	Lee Bridge, Preston, Shrewsbury.
Southdown	50	Mr. H. V. Harris	Sutton Veney, Warrminster.
Southwold	50	Hon. C. Brand	Ringmer, Lewes, Sussex.
Tedworth	50	Mr. E. P. Rawnsley	Belchford, Horncastle, Lincolnshire.
Tynedale	50	Mr. C. P. Shrubb	Tedworth, Marlborough.
Warwickshire	52	Mr. J. C. Straker	Stagshaw, Corbridge-on-Tyne.
Worcestershire	51	Earl Willoughby de Broke	Kinoston, Warwick.
Wynnstay	61	Earl Dudley	Fernhill Heath, Worcester.
York and Ainsty	50	Sir H. Williams Wynn, Bart.	Wynnstay, Ruabon.
Zetland's (Marquess of)	56	Mr. E. Lycett Green	Acombe, York.
		Marquess of Zetland	Aske, Richmond, Yorkshire.

IRELAND.

Kilkenny	50	Capt. Langrishe	Knocktopher Abbey, Kilkenny.
Kildare	53	Col. H. de Robeck	Jigginstown, Naas, county Kildare.
Meath	66	Mr. John Watson	Bective, Navan, county Meath.
Tipperary	55	Mr. R. Burke	Grove, Fethard, co. Tipperary.
Westmeath	50	Earl of Longford	Culleen, Mullingar.

SCOTLAND.

Berwickshire	50	Sir Jas. Miller, Bart.	Briery Hill, Edrom.
Buccleuch's (Duke of)	57	Duke of Buccleuch, &c.	Sr. Boswell's, Roxburghshire.
Eglinton's (Earl of)	50	Earl of Eglinton and Winton	Kilwinning Castle, Irvine, Ayr.

Nov. 16, 1896.—THE MANXMAN, dramatised from Hall Caine's novel, produced at the Lyric by Mr. Wilson Barrett.

Nov. 17.—Matinée of THE HAVEN OF CONTENT, by Malcolm Watson, at the Garrick.

Nov. 19.—A WHITE ELEPHANT, a farce by R. C. Carton, produced at the Comedy. Principal parts played by Messrs. C. Brookfield, Eric Lewis, C. Hawtrey, W. F. Hawtrey, Mesdames N. Boucicault, C. Calvert, L. Venne, and Compton.

Nov. 25.—Sir Henry Irving revived THE BELLS at the Lyceum.

Nov. 27.—THE KISS OF DELILAH, by George Grant and James Liale, put on at Drury Lane.

Dec. 1.—MY GIRL transferred from the Gaiety to the Garrick.

Dec. 2.—Afternoon performance of AS YOU LIKE IT at the St. James's, the leading parts being played by Messrs. J. Fernandez, H. B. Irving, G. Alexander, H. V. Esmond, Mesdames Fay Davis, D. Baird, and K. Phillips.

Dec. 5.—THE CIRCUS GIRL produced at the Gaiety, principal characters taken by Messrs. Seymour Hicks, H. Monkhouse, A. Williams, M. Farkoa, E. Payne, Mesdames K. Seymour, E. Haydon, and E. Terriss.

Dec. 19.—RICHARD III. revived by Sir H. Irving at the Lyceum.

Dec. 21.—THE EIDER DOWN QUILT, a farcical comedy by Tom Wootton, put on at Terry's.

Dec. 23.—BLACK-EY'D SUSAN and ALL THAT GLITTERS IS NOT GOLD revived at the Adelphi; the leading characters being acted by Messrs. W. Terris, H. Nicholls, Beveridge, Lablanche, and C. Fulton, Mesdames Millward, Vane Featherstone, and K. Kearney.

Dec. 24.—THE PILGRIM'S PROGRESS put on at the Olympic.

Dec. 26.—ALADDIN, pantomime, produced under the direction of Mr. Oscar Barrett at Drury Lane. The leading parts were taken by Messrs. D. Leno, H. Campbell, P. Cinquevalli, and the Bros. Griffiths, Mesdames Ada Blanche, Decima Moore, and C. Jecks.

CINDERELLA, pantomime, produced at the Grand Theatre.

Jan. 2, 1897.—A musical farce, A MAN ABOUT TOWN, put on at the Avenue, with Messrs. E. J. Lonnen, C. Cherry, and S. Howard, Mesdames Alma Stanley, May Edouin, and Alice Lethbridge in the principal parts.

Jan. 20.—The Carl Rosa Opera Company produced Godard's THE VIVANDIÈRE at the Garrick, the cast including Mesdames Zélie de Lussan and Beside Macdonald, Messrs. Alex. Marsh, C. Tilbury, and E. C. Hedmond.

Jan. 25.—THE PRODIGAL FATHER, by G. Macdonough, put on at the Strand, the leading parts being played by Messrs. H. Paulton, C. Collette, C. Weir, Mesdames May Halfrey, Lulli Valli, and Florence Gerard.

Jan. 28.—THE FREE PARDON produced at the Olympic.

Feb. 3.—THE VALKYRIE given by the Carl Rosa Company at the Garrick.

Feb. 6.—THE DAUGHTERS OF BABYLON produced at the Lyric. The cast included Messrs. Wilson Barrett, C. Hudson, E. Irwin, F. McLeay, and Manning, Mesdames Maud Jeffries and Lily Hanbury.

Feb. 8.—SWEET NANCY revived at the Court; also a new one-act play by Mrs. Bewinger,

entitled A BIT OF OLD CHELSEA produced, with Messrs. E. Maurice and Martin Harvey and Miss Annie Hughes in the principal parts.

Feb. 13.—MY FRIEND THE PRINCE, by Justin Huntly McCarthy, produced at the Garrick, the leading parts being played by Messrs. P. Lyndal, P. Arthur, F. Kaye, A. Boucicault, H. Ross, and E. Dagnall, Mesdames M. Clements, S. Carlisle, and Juliette Neville.

ROSEMARY revived at the Criterion.

Feb. 11.—NELSON'S ENCHANTRESS, with Mr. Forbes Robertson and Mrs. Patrick Campbell in the title rôles, brought out at the Avenue.

Feb. 20.—A new comic opera, HIS MAJESTY, words by F. C. Burnand and R. C. Lehmann, and music by Sir A. Mackenzie, produced at the Savoy. The leading characters were played by Messrs. Scott Russell, C. Kenningham, G. Grossmith, F. Billington, W. Passmore, John Hewson, Miss Florence Perry, and Madame Ilka Palmay.

Feb. 22.—Miss Elizabeth Robbins gave a matinée of Bechegaray's drama MARIANA at the Court, assisted by Messrs. H. Vezin, H. B. Irving, E. O'Neill, J. Welch, Mesdames Sitgreaves, M. Keegan, and Mabel Hackney.

Feb. 24.—Andran's comic opera, LA POUPÉE, put on at the Prince of Wales's. The principal characters were taken by Messrs. Courtice Pounds, Norman Salmond, Eric Thorne, and Willie Edouin, Mesdames Kate Mills, Ellas Dee, and Alice Favier.

Feb. 25.—THE MOHAGGIS, by J. K. Jerome and Eden Phillpotts, produced at the Globe, with Messrs. W. Grossmith, H. Reeves Smith, Blake Adams, D. Tovey, H. Shelton, Mesdames Laura Johnson and Beatrice Ferrar in the principal parts.

Feb. 27.—Return of Sir H. Irving to the Lyceum, revival of RICHARD III.

March 1.—THE PILGRIM'S PROGRESS revived at the Olympic.

THE DESTROYING ANGEL, "a mystic drama," produced at the Brixton Theatre.

March 9.—THE MARINERS OF ENGLAND produced at the Olympic.

March 10.—SAUCY SALLY produced at the Comedy by Mr. Charles Hawtrey.

March 25.—A new drama, THE PHYSICIAN, by Henry Arthur Jones, produced at the Criterion. The leading parts were acted by Messrs. C. Wyndham, A. Bishop, T. B. Talberg, J. G. Taylor, and L. Kenyon; Mesdames Marion Terry, E. Vining, and Mary Moore.

March 29.—THE PRINCESS and THE BUTTERFLY, comedy, by A. W. Pinero, produced at the St. James's. The cast included Messrs. G. Alexander, H. B. Irving, H. V. Esmond, Vane Tempest, B. Soutar, Mesdames Julia Neilson, D. Hammond, Cecil Raleigh, J. Opp, and Fay Davis.

March 31.—THE YASHMAK, a musical play, produced at the Shaftesbury, with Messrs. John Le Hay, L. D'Orsay, Mesdames Mabel Love, and Kitty Loftus in the principal parts.

April 10.—MADAME SANS-GÈNE, adapted by J. Comyns Carr, produced at the Lyceum, with Sir H. Irving and Miss Ellen Terry in the two leading parts. Among others who assisted were Messrs. Frank Cooper, F. H. Macklin, Mackintosh, N. Forbes, Cliffe, Tyars, Mesdames G. Kingston, J. Arthur, M. Rorke, and M. Milton.

April 17.—The Matinée Theatre, formerly known as St. George's Hall, opened by Mr.

Philip Yorke with *LA REVANCHE DES CIGALES*, a wordless play, and *A ROYAL ROUNDHEAD*, an operetta.

THE MANXMAN revived at the Lyric.

ON LEAVE produced at the Avenue, principal parts by Messrs. A. Playfair, W. H. Denny, J. Beauchamp, and G. Farquhar; Mesdames Kate Phillips, May Palfrey, C. Jecks, and Esmé Beringer.

April 19.—Evening performance of *THE MONEY SPIDER* at the Matinee.

April 23.—*DR. JOHNSON* produced at the Strand.

April 24.—*THE FRENCH MAID* put on at Terry's. The leading parts played by Messrs. H. Standing, Eric Lewis, H. Clarey, W. Guise, R. Green, Mesdames K. Cutler, Louie Pounds, Lillie Pounds, and K. Talby.

April 27.—*LOST, STOLEN, OR STRAYED*, a musical farce, produced at the Duke of York's Theatre. The principal characters were played by Messrs. F. Wheeler, J. H. Barnes, R. Harwood, H. de Lange, and Appleby; Mesdames Decima Moore, E. Sydney, and E. Cross.

LEAH revived at the Opera Comique, with Miss Grace Hawthorne in the title rôle.

April 28.—The new theatre, Her Majesty's, opened by Mr. Beerbohm Tree with Gilbert Parker's *THE SEATS OF THE MIGHTY*. The cast included Mr. and Mrs. Tree, Messrs. C. Brookfield, Lewis Waller, Murray Carson, Lionel Brough, C. Allan, and G. du Maurier; Mesdames Janette Steer, E. Ostlere, and Kate Rorke.

May 3.—Henrik Ibsen's *JOHN GABRIEL BORKMAN* given at an afternoon performance at the Strand, the principal characters being played by Messrs. W. H. Vernon, M. Harvey, and J. Welch; Mesdames Geneviève Ward, Beerbohm Tree, Elizabeth Robbins, and Dora Barton.

May 8.—A musical play without words *THE OLD CLO' MAN ('Chand d' Habits)*, produced as a first piece at Her Majesty's.

Mr. Wilson Barrett put on Sheridan Knowles's *VIRGINIA* at the Lyric.

May 10.—Italian Opera Season opened at Covent Garden.

May 15.—Mr. John Hare commenced a season at the Court with Finero's *THE HOBBY HORSE*.

The American drama, *SECRET SERVICE*, put on at the Adelphi. The principal parts were acted by Messrs. W. Gillette (the author), H. Woodruff, Campbell Gollan, Joseph Brennan, H. D. James, Mesdames Ida Waterman, Blanche Walsh, Odette Tyler, and E. Barrymore.

May 17.—A matinée of Ibsen's *WILD DUCK* given at the Globe by the Independent Theatre Company.

May 18.—*A COURT OF HONOUR*, by John Lart and Charles Dickinson, presented at the Royalty. The cast included Messrs. F. Terry, W. L. Abington, C. Fulton, Mesdames E. Calhoun, Ada Wilton, N. Boucault, and Vera Schlesinger.

May 22.—*OTHELLO* put on at the Lyric by Mr. Wilson Barrett.

May 19.—*BELLE BELAIR*, by R. Lumley, produced at the Avenue, with Messrs. Weedon Grossmith, Gilbert Farquhar, J. Beauchamp, M. Harvey, Mesdames Louise Moodie, Irene Vanburgh, and John Wood in the leading parts.

May 31.—*MACBETH* put on at the Olympic, with Mr. L. Calvert and Miss Laura Johnson in the leading parts.

June 3.—*THE MAID OF ATHENS*, a musical farce, produced at the Opera Comique.

June 5.—*A MARRIAGE OF CONVENIENCE*,

adapted by Sydney Grundy from Dumas's comedy, produced at the Haymarket Theatre. The principal parts were played by Messrs. William Terriss, Cyril Maude, S. Valentine, Mesdames A. Dairrolles, and Winifred Emery.

June 7.—*TRILBY* revived at Her Majesty's.

CASTE revived by Mr. Hare at the Court.

June 12.—*THE RED LAMP* revived at Her Majesty's.

June 16.—*ALL ALIVE OH!* produced at the Strand.

June 17.—Madame Sarah Bernhardt commenced a short season at the Adelphi Theatre with Alfred de Musset's *LORENZACCIO*.

June 23.—State performance at the Italian Opera, Covent Garden.

June 25.—The Indian and Colonial troops entertained at the Lyceum.

June 28.—Madame Réjane and the Paris Vaudeville Company appeared at the Lyric in *LA DOULOUREUSE*.

The Vienna Volks Theatre Company commenced a series of matinée performances at Daly's Theatre.

July 1.—*THE PRISONER OF ZENDA* revived at the St. James's.

July 6.—Madame Sarah Bernhardt appeared in Sardou's *SPIRITISME*, at the Adelphi.

July 10.—*THE SILVER KEY*, an adaptation of Dumas's *MILLE DE BELLE-ISLE*, by Sydney Grundy, produced at Her Majesty's. The principal parts played by Messrs. Tree, Waller, Allan, Lionel Brough, G. du Maurier, Mesdames Tree, G. Fillipi, and Evelyn Millard.

July 17.—*FOUR LITTLE GIRLS*, by Walter S. Craven, produced at the Criterion, with Messrs. James Welch, J. H. Barnes, W. Blakeley, R. Lambart, Mesdames M. A. Victor, E. Miller, V. Lyster, M. Beardale, and A. Ford.

July 31.—*TOMMY ATKINS* revived at the Princess's.

Aug. 5.—*SECRET SERVICE* played by an English company at the Adelphi, headed by Mr. William Terriss and Miss Millward.

Aug. 17.—*THE SLEEPING PARTNER* put on at the Criterion.

Aug. 21.—Mr. Wilson Barrett revived *THE SIGN OF THE CROSS* at the Lyric.

Sept. 4.—Mr. Hedmond opened a season of English Opera at Her Majesty's with Leoni's *RIP VAN WINKLE*.

Sept. 6.—*THE WIZARD OF THE NILE*, a comic opera, produced at the Shaftesbury, with Messrs. Dallas, Dagnall, Harrison Brookbank, Mesdames Amy Angarde, and Adele Ritchie in the principal parts.

Sept. 7.—*MISS FRANCIS OF YALE* produced at the Globe; principal characters by Messrs. Weedon Grossmith, A. Playfair, Reeves Smith, Mesdames May Palfrey, Ethel Hope, and Helen Ferrers.

Sept. 9.—*IN THE DAYS OF THE DUKE*, by Haddon Chambers and Comyns Carr, produced at the Adelphi. The cast included Messrs. W. Terriss, C. Cartwright, Beveridge, H. Nicholls, C. Fulton, L. Cantley, Mesdames M. Terry, Millward, and V. Featherstone.

Sept. 11.—Mr. Forbes Robertson revived *HAMLET* at the Lyceum, playing the title-rôle; Mrs. Patrick Campbell was the Ophelia; Mr. J. H. Barnes, Polonius; Mr. B. Gould, Laertes; Mr. Ian Robertson, the Ghost; and Mr. H. Cooper Cliffe, Claudius.

Sept. 13.—*THE PURSER* put on at the Strand.

Sept. 14.—Offenbach's *LA PÉRICHOLE* revived at

the Garrick, with Miss Florence St. John in the principal part, supported by Messrs. R. Clarke, F. Kaye, John Le Hay, and W. Howard.

Sept. 16.—THE WHITE HEATHER, by Cecil Raleigh and Henry Hamilton, produced at Drury Lane, the principal characters being acted by Messrs. H. Neville, H. de Lange, J. B. Gordon, E. Lorraine, Dawson Milward, Howard Russell, Mesdames John Wood, Kate Rorke, Patty Browne, and Beatrice Lamb.

ONE SUMMER'S EVENING, by H. V. Esmond, produced at the Comedy. The leading parts were played by Messrs. C. Hawtreay, H. Kemble, Cosmo Stewart, Mesdames Eva Moore, L. Fairfax, and L. Rachel.

Sept. 18.—FRANÇILLON, with Mr. K. Bellew and Mrs. Brown Potter in the leading parts, played at the Duke of York's Theatre.

Oct. 2.—Mr. Fitzroy Gardner produced a "triple bill" at the Avenue with THE BARON'S WAGER, MY LADY'S ORCHARD, and THE MERMAIDS.

Oct. 4.—TWO LITTLE VAGABONDS revived at the Princess's.

Miss Ada Rehan commenced a short season at the Grand.

Oct. 5.—OH! SUSANNAH! brought out at the Royalty, with Messrs. Charles Glenny, A. Maltby, C. Bell, Mesdames K. Kearney, C. Jecks, A. Mansfield, and Louie Freear in the leading parts.

Oct. 6.—THE LIARS, by H. A. Jones, produced at the Criterion, the leading characters being acted by Messrs. C. Wyndham, T. Thalberg, H. Standing, A. Bishop, Mesdames J. Steer, C. Brooke, Irene Vanburgh, and Mary Moore.

Oct. 11.—NEVER AGAIN, a farcical comedy, put on at the Vaudeville, with Messrs. G. Giddens, A. Aynesworth, Robb Harwood, F. Gottschalk, Mesdames Agnes Miller, Maggie Fisher, and Helen Rous.

Oct. 13.—A fairy tale in three acts, from the German of Ernst Rosmer, THE CHILDREN OF THE KING, presented at the Court. The leading parts were played by Messrs. Martin Harvey, D. Boucicault, H. Ross, Fred Thorne, R. Soutar, Mesdames Isabel Bateman, H. Spong, L. Verdi, Neilson, and Cissie Loftus.

Oct. 16.—MORE THAN EVER and THE LADY BURGLAR put on at the Avenue.

Oct. 18.—THE VAGABOND KING, by Louis N. Parker, produced at the Métropole.

Oct. 21.—THE FANATIC put on at the Strand.

Oct. 23.—An opera written by the Marquis of Lorne, music by Hamish MacCunn, called DIARMID, produced at Covent Garden.

Oct. 25.—THE TREE OF KNOWLEDGE, by R. C. Carton, put on at the St. James's, with Messrs. G. Alexander, W. H. Vernon, F. Terry, H. B. Irving, and H. V. Esmond; Mesdames Carlotta Addison, F. Davis, and J. Neilson in the principal parts.

Oct. 30.—A Chinese play, THE CAT AND THE CHERUB, produced at the LYRIC. The leading parts played by Messrs. H. Blinn, R. Ganthony, F. Volpe, Mesdames A. Luce, H. Foster, and R. Benson.

Nov. 1.—Another Chinese play, THE FIRST BORN, put on at the Globe.

Mr. and Mrs. Tree played KATHERINE AND PETERUCHIO at Her Majesty's.

Nov. 4.—THE VAGABOND KING put on at the Court.

Nov. 6.—THE LITTLE MINISTER, by J. M. Barrie, produced at the Haymarket. The cast included Messrs. W. G. Elliot, C. Maude, C. Hallard, B. Thomas, M. Kinghorne, S. Valentine, E. Turner, Mesdames E. H. Brooke, S. Fairbrother, M. Mackenzie, and Winifred Emery.

Scientific and Engineering Summary for 1897.

THE WIRELESS TELEGRAPH.—The principal event of the scientific year has been the introduction of an electric telegraph, working without wires, by Signor Guglielmo Marconi. Our readers are doubtless aware that a telephonic or a telegraphic message on one wire can sometimes be "overheard" on a neighbouring wire by what is called "induction" through the space between the two wires. Mr. Preece, C.B., engineer-in-chief of the Post Office, has succeeded in sending telegrams 5 miles through the air between two parallel wires in this way, as recorded in a former Summary. It is not the air, but the luminiferous "ether" which conveys the message through space by means of waves set up in it by the electrical signals in the exciting wire. There is, however, another way of producing waves in the ether, and on this Marconi has founded his wireless telegraph. The principles of his invention have been known for several years. Heinrich Herz discovered that waves were set up in the ether by electric sparks, and Professor Righi devised a sparking arrangement for exciting the waves which Marconi has adopted. Moreover, Mr. Branly found that when the waves so produced passed through metal dust, or some other conductor in the form of powder, they caused the dust to cohere, and thereby made it a better conductor of electricity. Dr. O. J. Lodge also succeeded in transmitting telegraphic signals through a space

of several hundred feet by this means in the year 1894, at Oxford. It was reserved for Marconi, however, to apply the principle in a practicable manner. His transmitter for sending the messages through the ether consists of an induction coil for producing the electric sparks and a series of sparking balls of brass, capable of adjustment, as devised by Righi. The signals of the message are made by means of a signalling key in the circuit of the induction coil. This key is worked by the sender like an ordinary telegraph key, according to the Morse code. The sparking is thus controlled like the current in an ordinary telegraph wire. It will be understood that, instead of long and short currents flowing in a wire, we have in this case long and short groups of waves traversing the ether in all directions from the sparking balls. These waves proceed with the velocity of light. The receiver on which the message is received consists of a Branly "coherer" joined in circuit with a battery and a Morse telegraph instrument. The instrument is adjusted only to mark the paper when there are waves passing through the coherer. Hence, the groups of waves actuate the instrument, and the spaces between them do not. In short, the groups correspond to the signal currents, and the calms between, to the spaces between the signal currents of the ordinary electric telegraph. The coherer is made of nickel and silver dust mixed with

a little quicksilver, and as the dust is apt to stick together it is shaken apart by a small hammer after each group of waves passes through it. The hammer is worked from the Morse instrument by an electro-magnet, and the taps it gives to a glass tube containing the dust enable the receiving clerk to understand the message by his ear. In short, the Marconi telegraph not only "records" but "strikes" the message. Moreover, the apparatus can be attuned to etheric waves of a certain dimension, as a resonator is tuned to notes of a certain pitch, and the messages are thus rendered secret. To avoid the interposition of bodies which might act as an electric screen to the waves in travelling through space, the apparatus can be mounted on masts or connected with vertical wires which rise into the open space. Suppose, for example, that two ironclads are communicating with each other. The apparatus might be anywhere in the ships, provided it was joined to conductors running to the open decks, with a free space of ether betwixt their upper ends. Marconi's telegraph has been successfully tried in England, Italy, and Germany, over a space of from 10 to 15 miles. It is likely to be useful in telegraphing from moving vehicles, such as balloons, and from ships, lighthouses, or outlying islands. It is the first of its kind, but no doubt other wireless telegraphs, of one kind or another, will soon be invented. There is no saying how far the range may yet be pushed, and the new telegraph supersedes the old.

A NEW RECORDER FOR CABLES.—Mr. Ader has brought out a new telegraph instrument for recording the messages through long submarine cables. It resembles the siphon recorder of Lord Kelvin in general principle, but instead of a coil of wire oscillating between the poles of a magnet and actuating a siphon pen to write the message on a strip of travelling paper, the inventor employs an iron wire, and photographs the movement of the wire on a moving photographic slip, which is afterwards developed. The speed of signalling attained by it on the French Atlantic and other cables is 25 to 50 per cent. greater than that given by the siphon recorder.

ELECTRIC CABS.—During the summer a pioneer band of twelve electric cabs were introduced to the streets of London, and have proved successful. The wheels are driven by an electric motor worked from accumulators in a chamber under the body of the cab, and the controlling gear is at the hand of the driver. As these vehicles are at least as manageable as horse-cabs, and take up much less room, their advent will help to clear the over-crowded metropolitan thoroughfares.

ELECTRICITY FROM DUST.—The Shoreditch Vestry of London have introduced a system of developing electricity for lighting and other purposes from the dust and refuse of the Parish, which is consumed in "destructors," and the heat utilised to drive dynamos. Penny-in-the-slot meters for electricity have also been supplied to the workmen's dwellings of the parish to enable the tenants to procure the electric light at will.

RÖNTGEN RAYS.—The method of seeing and photographing invisible objects such as the bones by "X" rays, produced in a Crooke's tube, has been applied to illustrating the movements of the skeleton in living animals. A cinematograph is employed to combine a number of photographs of the skeleton in successive postures. The rays have also been applied to detect smuggled

articles in the baggage of travellers by the French customs officers. Luggage containing ordinary photographic plates not developed, are, however, examined in the usual way, in a dark room by means of red light.

THE PHONOGRAPH.—The phonograph of Edison has been greatly improved by M. Loiret by means of a new regulator of the speed, a new drum or tympanum to receive the sounds, and a new stylus with a sapphire point to imprint the sounds on the recording surface. Above all, the recording surface is now made of softened celluloid, instead of wax. The celluloid hardens, and the imprinted surface will last for a century. This new instrument, when fitted with a trumpet mouthpiece, speaks loud enough to enable an audience in the large lecture hall of the Trocadero at Paris to hear every word.

ARGENTAUUM.—Some attention has been aroused in chemical circles by the claims of Dr. S. H. Emmen, an Anglo-American chemist, of New York, to the discovery of a means of transmuting silver into gold, and thus realising to some extent the old dream of the "Philosopher's Stone." According to his own statements Dr. Emmen takes Mexican silver dollars and submits them to a mechanical treatment, including enormous pressure, together with chemical treatment with nitric acid. The gold appears to be genuine, for the American Bureau of Assays buys it and Sir William Crookes, the distinguished English chemist, has tested it in the spectrophotometer. As chemical tests fail to show any gold, or at best a mere trace of it, in the Mexican dollars before they are treated by Dr. Emmen, the inference is that his treatment changes the silver into gold. He supposes that there is a substance midway between gold and silver, which he calls Argentaurum (or "Silver-gold,") and that it can be transmuted into either metal. A silver dollar yields three-fourths of an ounce of gold, and Dr. Emmen is now preparing a plant which will transmute the silver on a large scale. The details of his process are not divulged for obvious reasons, but Dr. Emmen has already proved himself a skilful chemist, and as the so-called chemical "elements" are now only regarded as such because we are unable to break them up by the means at our disposal, it is possible that he has made a discovery which will create something like a revolution in chemistry and have an important influence on the social and political world.

LIQUEFACTION OF FLUORINE.—M. Moissan the distinguished French chemist, and Professor Dewar of the Royal Institution have liquefied fluorine gas under intense cold. Liquid oxygen was employed to cool the gas down to a temperature of 185 deg. Centigrade below zero. The gas is a most virulent substance, attacking even glass but the liquid which is of a yellow tinge has little or no chemical activity and will not "eat" glass.

MAKING DIAMONDS.—Dr. Quirino Majorama has succeeded in making small diamonds by vaporising carbon in an electric crucible and submitting it to a pressure of 5,000 atmospheres by a piston or plunger entering into the crucible. Hitherto diamonds have been made by dissolving carbon in molten metal and letting it crystallise out as the metal cooled. Sir William Crookes, F.R.S., is of opinion that the Cape diamonds were formed in this way.

THE GOVERNMENT LABORATORY.—A new Government Laboratory near Clement's Inn was opened

on October 1st. It consists of laboratories for mechanical, bacteriological, chemical, and other scientific tests in connection with Crown contracts, and the rectification of scientific apparatus, especially those used in the Revenue Service.

MICRO-METALLURGY.—This new science, which deals with the internal structure of metals as exhibited by the microscope and Röntgen rays, has received an important contribution from Mr. J. E. Stead who has taken many interesting photographs of the micro-structure of alloys. His results, which are interesting to engineer as well as chemist, have been communicated to the Royal Society.

THE STEAM TURBINE.—The steam turbine of the Hon. C. A. Parsons, that is to say a turbine or mill-wheel which revolves by the impact of steam not water on the blades, which has proved so useful in driving dynamos, has been adapted to the propulsion of ships. The S.S. "Turbinia" is 100 feet long, 9 feet in beam, and of 44½ tons displacement, is propelled by three steam turbines each driving a screw propeller, and has attained a speed of 35 knots, that is, nautical miles an hour. It is expected that this new type of engine can be applied, with even more advantage, to steamships of the largest size.

FIN BOATS.—An automatic mode of propelling boats has been invented by Mr. Linden of Naples. The boat is fitted with two horizontal fins resting on the surface of the water one in front, the other aft, at right angles to the keel. Each fin resembles a steel comb with flat teeth projecting backwards. The waves bend the teeth or blades, and these re-acting on the water move the boat in a direction contrary to that of the waves. When the fins, which resemble the tail-fins of a dolphin, are pointed forward the boat moves backward. When one fin points forward and the other backward the boat is stationary.

THE PARASOL SAIL.—A new sail for boats, and especially lifeboats, has been brought out by Mr. Percy S. Pilcher. It resembles a Japanese parasol, and is set so that the wind acts perpendicular to its mean surface. To this end the masts mounted in guides and bent over, so as to bring the sail into position. It can be furled or unfurled in a minute like a parasol, and has the great advantage of keeping the boat upright or upon "even keel."

SOARING FLIGHT.—Mr. Pilcher has begun to carry on the experiments on soaring flight in which Herr Lillenthal of Germany lost his life. With an aeroplane resembling wings or a parasol sail, and having a spread of 170 square feet, he has succeeded in soaring to a height of 70 feet above the ground, and he proposes to add a small engine of about 4 horse-power to transform the aeroplane into a flying machine.

FLYING MACHINES.—Trials have been made of the working models of several newflying machines, but none carrying human beings. The most novel is that of Herr Stenzel of Altona in Germany, which has wings of a parabolic shape 20 feet in spread, and flapping like those of a bird. They are worked by a compressed gas engine; and with a power of 1½ horses, the machine beats its wings every second with an acceleration of 15 feet per beat.

PHOTOGRAPHY.—Captain Colson has introduced a method of diminishing the period of exposure of photographic plates in order to get a good image. He finds that some of the light goes through the gelatino-bromide plates, and he therefore reflects it back into the film by a screen of white paper. He also proposes to make plates

with a thin, white opaque layer on the glass, and flow the emulsion over them. The layer would be easily made transparent for the production of copies.

METEOROLOGY.—An international committee for the simultaneous observation of the atmosphere by means of balloons with automatic or self-registering meteorological instruments, began work this year by sending up several balloons at the same time on the same night from different points of Europe, especially in France and Germany. So far the results were satisfactory, and America has been invited to join in this peaceful work for the benefit of the world. The use of kites with automatic instruments for exploring the higher atmosphere in this way is growing, especially in the United States, where at the Blue Hill Observatory, kites were recently sent up to a height of 10,000 feet.

THE VISTASCOPE.—Mr. Eddy, an American, has utilised the kite for observing a distant landscape. The kite carries a sort of gigantic camera, consisting of a mirror, which reflects an image of the landscape upon a semi-lucent screen. The observer, lying on his back, looks with a field-glass at the screen attached to the kite, and sees the image of the landscape. When the kite is not more than 150 feet high, the details of the landscape are distinctly seen.

A NEW FOSSIL.—A Belgian naturalist, M. Alphonse Proost, has discovered in the Eocene strata of Brabant, a fossil *Cybium* of a new species, which has been called after him. The *Cybium Proosti* is a large fish, resembling a shark, and according to the specimens found, 8 to 10 feet in length.

A NEW MONKEY.—A new species of monkey has been discovered in the mountains of Thibet. It is of large size, and chiefly remarkable for possessing a real nose, of the snub type, and a thick fur on the body.

THE ANGLO-SAXONS.—Mr. R. J. Horton Smith, from observations made on early Saxon skulls, has confirmed the view now accepted, that contrary to our historians, the old English were of mixed Anglo-Saxon and British race. The East and South Saxons were mainly of Saxon blood, but the West Saxons were less pure, and in the upper valley of the Bristol Avon the people were mainly British, as they are to-day. The East Anglian skull is broader, flatter and more capacious than the South Saxon. It is still a matter of opinion, however, whether the "Saxon" skulls of Mr. Smith are really Anglian or Saxon.

A NEW LAW OF HEREDITY.—Dr. Francis Galton, the well-known anthropologist, has brought before the Royal Society a law of heredity, first propounded by him in "Natural Inheritance," but now confirmed by observations on the breeding of dogs. Vast sums are spent on the rearing of pedigree stocks, such as horses, cattle, sheep, pigs, and so forth, and Mr. Galton's theory, which only applies to the same variety, and not to hybrids, will be of use to breeders. It shows that each of the two parents contributes one-fourth to their offspring, and each of the four grandparents one-sixteenth, and so on.

RELICS OF LEONIDAS.—Sarcophagi have been unearthed at Thermopylae, between the old barracks and the water-mills, containing human bones, medals, vases, and ores. They are supposed to be relics of Leonidas and his three hundred Spartans.

THE POTSHED OF THEMISTOCLES.—Early in the year the rim of a black terra-cotta vessel bearing

the words "Themistokles Phrearrios," in Archaic letters scratched on it with a sharp tool, was found by German excavators in the Areopagus at Athens. It is believed to be one of the actual voting ostraka by which Themistocles was condemned to banishment in the year 470 B.C. Hitherto three other voting potsherds have been found in Athens, bearing celebrated names, but none of Themistocles.

A SUBTERRANEAN LABORATORY.—M. Milne Edwards, the eminent French naturalist, has instituted an underground laboratory in the catacombs of Paris, near the Jardin des Plantes. His object is to observe the modifications produced on animals by living in darkness. The laboratory is in connection with the Museum of Natural History, and may be regarded as the first experimental laboratory of evolution. It already contains a generation of guinea pigs, who have never seen the light of day.

A NEW SEARCH-LIGHT.—It is well known that spongy platinum becomes white-hot when hydrogen gas or any hydro-carbon gas plays on it. This fact, which is due to chemical affinity, has been successfully applied by M. Brenot in the production of a portable lamp or search-light. Vapour of petroleum essence, mixed with air is pumped to a bead of spongy platinum, mounted in the focus of a reflector. A hand pump, like that of a syringe, is employed for this purpose. The light obtained enables a person to read at a distance of 100 yards.

GLOWWORM LIGHT.—Professor Muraoka, of the University of Kyoto, Japan, has found that glow-

worms emit rays which can penetrate opaque bodies such as metals after the manner of the "X" rays of Röntgen, provided they have first passed through cardboard and metal sheets. Apparently, the light is modified in traversing certain substances, and endowed with properties like those of the Röntgen rays.

TRANSFORMING COLOURS.—Mr. Shelford Bidwell, F.R.S., has devised a revolving screen, which transforms colours subjectively. As described to the Royal Society, it consists of a disc half black half white, with a nick or aperture between the two halves, and mounted on an axle. When interposed between the eye and a red wafer on a sheet of white paper, the wafer appears green, if the disc is turned fast enough. In the same way it transforms other colours, for example, those of pictures.

GOOD POTATOES.—M^r. Bussard and Condon, of the National Agronomic Laboratories, France, have been studying potatoes under the Röntgen rays, and find that the proportion of fecula or farina in the tuber diminishes from the skin to the centre. Nitrogenous matter, on the other hand, increases from the skin to the heart. Good varieties have 17 times more nitrogenous matter than fecula, and bad varieties only 8 times. Good potatoes are not "mealy," and the reason is that they are rich in albuminoid matter in proportion to fecula. Potatoes having more than 8½ of albuminoid to 100 of fecula, do not crumble in boiling, whereas those having 6½ parts to the 100 break down altogether.

Friendly Societies.

The following table gives particulars relating to ten of the largest Friendly Societies in the United Kingdom, including number of members, income, benefits, and accumulated funds, for the two years 1885 and 1895.

It will be noted that in this period of ten years the membership has increased from 1,672,326 to 2,210,476, an addition of nearly a third, while the income has increased by nearly forty per cent. The figures relate to male adults only.

Society.	Member-ship.	Total Income.	Total Benefits.	Total Accumulated Funds.
Independent Order of Oddfellows, Manchester Unity	1885 542,313 1895 665,233	£ 963,205 1,224,048	£ 576,642 726,096	£ 5,500,387 7,623,043

§ Total for nine Societies only.

THE home educational year has been a time of unusual stir and movement, the main feature in the last-named being viewed as progression or retrogression, according to the standpoint of the onlooker. But the ALMANACK, now, as ever, carefully avoiding partisan opinion, limits the scope of the present article to a convenient chronicle of the most trustworthy statistics and returns, adding thereto only such preliminary words, footnotes, and comments as may be useful for the guidance of the general reader. The more important questions recently uppermost in the minds of educationists were—(1) The establishment of a teaching university in London; (2) The organization of secondary education; (3) The proposal to grant the Cambridge B.A. degree to women; (4) The superannuation of elementary school teachers; (5) The additional public aid to voluntary schools; and (6) The additional public aid to necessitous board schools. Of these, the first has been once more relegated to the future through the Government Bill being withdrawn, by reason of the serious opposition with which it was threatened; the second has been carried over for active legislative treatment during 1898; and the fourth is still, if not actually in the clouds, only slightly below them. The fifth and sixth, however, having been the subjects of new legislation, call for more detailed consideration. It will be remembered that one of the subjects to which the present Unionist Government were pledged on coming into office and power was the granting of additional financial aid from public sources to the voluntary schools of England and Wales, and that the Education Bill of 1896 aiming at this object ended in withdrawal. The question, nevertheless, remained, and a new bill dealing with it was introduced in the Commons early in the session of 1897. This bill, which proposed (a) a substantial addition of State-aid (not Rate-aid, as a considerable section of the voluntary schools party desired) to the voluntary schools of all denominations, (b) the exemption of those schools from rates, and (c) the repealing of a portion of the 1876 Education Act, passed through all its stages in both Houses of Parliament without alteration or amendment of any kind whatever, and became law on April 8, 1897. It consisted of five clauses:—

(I.)—(1) For aiding voluntary schools there shall be annually paid out of moneys provided by Parliament an aid grant, not exceeding in the aggregate five shillings per scholar for the whole number of scholars in those schools.

(2) The aid grant shall be distributed by the Education Department to such voluntary schools and in such manner and amounts as the Department think best for the purpose of helping necessitous schools and increasing their efficiency, due regard being had to the maintenance of voluntary subscriptions.

(3) If associations of schools are constituted in such manner, in such areas, and with such governing bodies representative of the managers as are approved by the Education Department, there shall be allotted to each association while so approved, (a) a share of the aid grant to be computed according to the number of scholars in the schools of the association at the rate of five shillings per scholar, or, if the Department fix different rates for town and country schools respectively (which they are hereby empowered to do), then at those rates; and (b) a corresponding share of any sum which may be available out of

the aid grant after distribution has been made to unassociated schools.

(4) The share so allotted to each such association shall be distributed as aforesaid by the Education Department after consulting the governing body of the association, and in accordance with any scheme prepared by that body which the Department for the time being approve.

(5) The Education Department may exclude a school from any share of the aid grant which it might otherwise receive, if, in the opinion of the Department, it unreasonably refuses or fails to join such an association, but the refusal or failure shall not be deemed unreasonable if the majority of the schools in the association belong to a religious denomination to which the school in question does not itself belong.

(6) The Education Department may require, as a condition of a school receiving a share of the aid grant, that the accounts of the receipts and expenditure of the school shall be annually audited in accordance with the regulations of the Department.

(7) The decision of the Education Department upon any question relating to the distribution or allotment of the aid grant, including the question whether an association is or is not in conformity with this Act, and whether a school is a town or a country school, shall be final.

(II.)—After the last day of March, 1897, the following words in Section 19 of the Elementary Education Act, 1876, namely, "such grant shall not in any year be reduced by reason of its excess above the income of the school if the grant do not exceed the amount of 17s. 6d. per child in average attendance at the school during that year, but shall not exceed that amount per child, except by the same sum by which the income of the school derived from voluntary contributions, rates, school fees, endowments, or any other source whatever, other than the parliamentary grant, exceeds the said amount per child, and," shall be repealed so far as they apply to day schools in England and Wales.

(III.)—No person shall be assessed to or rated to or for any local rate in respect of any land or buildings used exclusively or mainly for the purposes of the schoolrooms, offices, or playground of a voluntary school, except to the extent of any profit derived by the managers of the school from the letting thereof.

(IV.)—In this Act, unless the context otherwise requires, the expression "voluntary school" means a public elementary day school not provided by a school board: any reference to the number of scholars in schools means the number of scholars in average attendance as computed by the Education Department: the expression "local rate" means a rate the proceeds of which are applicable to public local purposes, and which is leviable on the basis of an assessment in respect of the yearly value of property, and includes any sum which, though obtained in the first instance by a precept, certificate, or other instrument requiring payment from some authority or officer, is or can be ultimately raised out of a local rate as before defined: other expressions have the same meaning as in the Elementary Education Acts, 1870 to 1893.

(V.)—(1) This Act shall not extend to Scotland or Ireland.

(2) This Act may be cited as the Voluntary Schools Act, 1897.

It only remains to add that the estimated amount which the voluntary schools will receive under the new Act during the first financial year of its operation is £620,000, and that by an official minute of the Education Department the rate for town schools is for the present fixed at 5s. 9d., and that for country schools at 3s. 3d. per scholar.

While the Voluntary Schools Bill was passing through its various stages, it was urged by many that there were board schools in various parts of the country whose needs were not less pressing than those of the denominational schools themselves. This the Government admitted and undertook to remedy in a short separate Bill, though they absolutely declined to deal with both cases in a single Bill. Hence arose what is generally known as the Necessitous Board Schools Bill, the text of which runs thus:—

[Whereas by Section ninety-seven of the Elementary Education Act, 1870, it is enacted as follows:—"Where the school board satisfy the Education Department that in any year ending the twenty-ninth of September the sum required for the purpose of the annual expenses of the school board of any school district, and actually paid to the treasurer of such board by the rating authority, amounted to a sum which would have been raised by a rate of threepence in the pound on the rateable value of such district, and any such rate would have produced less than £20, or less than 7s. 6d. per child of the number of children in average attendance at the public elementary schools provided by such school board, such school board shall be entitled, in addition to the annual parliamentary grant in aid of the public elementary schools provided by them, to such further sum out of moneys provided by parliament as, when added to the sum actually so paid by the rating authority, would, as the case may be, make up the sum of £20, or the sum of 7s. 6d. for each such child, but no attendance shall be reckoned for the purpose of calculating such average attendance, unless it is an attendance as defined in the said minutes" and whereas it is expedient to amend the said section:]

(1.)—(1) Section 97 of the Elementary Education Act, 1870, shall have effect as if the sum of 7s. 6d. therein mentioned were increased by the sum of 4d. for every complete 1d. by which the school board rate for the year therein mentioned exceeded 3d., provided that the said sum of 7s. 6d. shall not be thereby increased beyond a maximum of 15s. 6d.

(2) "School board rate" means the rate in the pound on the rateable value of the district which would have produced the sum required in the said year for the purpose of the annual expenses of the Board, and actually paid in that year to the treasurer by the rating authority.

(3) In calculating for the purpose of the said Section ninety-seven and of this Act the annual expenses of a school board, the Education Department shall include such sum as is necessary for maintaining such working balance as the Education Department determine to be reasonable.

(II.)—This Act shall from and after September 29, 1897, be construed as part of Section 97 of the Elementary Education Act, 1870, and shall not extend to Scotland or Ireland, and may be cited as the Elementary Education Act, 1897.

It may be desirable to add here that the object of the Bill, according to Sir John Gorst, was to help those districts in which the number of children bears an unduly large ratio to the rateable value of the property, and that the

estimated expenditure caused by the new Act during the first year is rather more than £110,000, making a total annual outlay, under Section 97, of nearly £154,000. The new Act became law on June 3, 1897. Having thus given a brief account of the educational legislation, finished or promised during the session of 1897, it may be convenient to gather together here a few of the more noticeable events of the past year, and to arrange them in chronological order.

ELEMENTARY EDUCATION.

Mr. F. T. Howard, M.A. (Balliol College, Oxon.), appointed one of H.M. Inspectors of Schools (Nov. 1896); death of Mr. W. Williams, M.A., H.M. Chief Inspector of Schools in Wales (Nov.); death of the Rev. B. J. Baines, many years H.M. Inspector of Schools for S. Wales (Dec.); Mr. A. G. Legard trs. from Leeds to be H.M. Chief Inspector of Schools in Wales, (Dec); Mr. J. MacPherson Wattie, M.A. (Aberdeen), and B.A. (Oxon.) nominated one of H.M. Inspectors of Scotch Schools (Jan. 1897); Rev. E. Hammonds, M.A., Vice-principal of Battersea Training College, appointed Principal of the Bishop Otter Memorial College, Chichester (March); Mr. J. White, Fellow of Queen's College, Oxford, appointed an additional Assistant-secretary in the Education Department, (April); Mr. E. H. Howard (*vice* Mr. C. G. Colson, trs. to the Ashford and Hastings district) appointed one of H.M. Inspectors of Schools (May); Mr. W. H. Winch (St. John's College (Cantab.)), formerly an elementary school teacher, bracketed in the first place of the Moral Science Tripos at Cambridge (June); nine students from St. Hild's College, Durham, successful at the B.Lit. degree examination of Durham Univ. (June); Rev. D. J. Thomas, M.A., Vice-principal of Winchester Training College, appointed Principal of the Home and Colonial Training College, Gray's Inn Road, and of the Highbury Training College for Secondary Teachers (July); two third-year students at Edge Hill Training College gained the B.A. degree of Victoria University (July); Rev. E. B. Hugh-Jones, M.A. (Oxon.), appointed Vice-principal of Battersea Training College (July); death of the Rt. Hon. A. J. Mundella (July); Mr. G. M. Cowie, a Senior Examiner in the Education Department, appointed an Assistant-secretary, *vice* Mr. F. C. Hodgson, retired (August); Miss Callis (Stockwell Training College) appointed one of H.M. Inspectors of Schools (September); Rev. C. P. Whitaker appointed to be Lecturer in Theology and Ecclesiastical History at Exeter Training College (September).

SECONDARY EDUCATION.

The Lord President of the Council appointed a Special Committee to "consider the mode in which the grants in aid to science and art schools are distributed, and to report if it is desirable to make any alteration therein" (Nov. 1896); Rev. T. Field, Head-master of the King's School, Canterbury, appointed Warden of Radley (Nov.); Rev. Dr. Wace, Principal of King's College, London, appointed to St. Michael's, Cornhill (Nov.); Ven. Shadrach Pryce, Archdeacon of Carmarthen, and many years one of H.M. Inspectors of Schools in Wales, appointed to a seat on the Council of the Univ. College of North Wales (Dec.); Rev. A. H. Talbot M.A. (Oxon.), elected to the Provostship of Denstone College (Dec.); Rev. A. Robertson, D.D., Principal of Bishop Hatfield Hall, Durham, elected to the Principalship of King's College, London (January

1897); Mr. O. Owen, M.A. (Oxon.), Headmaster of the Oswestry High School, appointed Chief Inspector of Intermediate Schools in Wales (Feb.); Miss Steedman, late Head-mistress of the Welshpool Intermediate School, appointed Senior Lecturer at the Cambridge Training College (March); death of Miss Emily Shirreff (ætat. 82), well-known supporter of the higher education of women (March); Rev. G. W. Gent, M.A. (Oxon.), elected Principal of St. David's College, Lampeter (June); Dr. Hinchcliffe, of Dewsbury, bequeaths £50,000 for promoting higher education in the borough (August); Mr. S. Dunkerley, M.Sc., appointed Professor of Applied Mechanics at the Royal Naval College, Greenwich, *vice* Prof. J. H. Cotterill, M.A., F.R.S., retired (August).

HIGHER EDUCATION—THE UNIVERSITIES.

Mr. G. S. Robertson, the well-known Dark Blue hammer-thrower and weight-putter, carried off the Derby Scholarship (Oct. 1896); Balliol College secured seven places out of ten on the list for the Ireland and Craven Scholarships at Oxford (Dec.); the Gilchrist Traveling Studentship for Women Teachers awarded to Miss M. Erebner, M.A. (Jan. 1897); the syndicate appointed by Cambridge University recommend by a majority that the degrees of B.A., M.A., D.Sc., and D.Lit., but not degrees in Medicine and Divinity, be conferred by diploma upon women (March); death of the Rev. Canon Heaviside (ætat. 88), well-known Mathematical Coach and Examiner (March); the graduates of Cambridge University, by a majority of 1,051, defeat the proposal to admit women to titles for degrees (May 21); Mr. W. H. Austin, formerly a pupil in an elementary school in Birmingham, gains the Senior Wranglership at Cambridge University (June); Miss E. A. S. Dawes, D.Lit. (the only woman D.Lit.) and M.A. (London Univ.), elected a Member of the Council of the College of Preceptors (Oct.).

TECHNICAL EDUCATION.

Of the present working and direction of the English system of technical education there may be various opinions: of the imperative necessity of some such system there can be no question. England was being outstripped, or rather overtaken in the race for the commerce and trade of the world; hence arose the call for that technical education which now costs something that is rapidly passing towards a million pounds annually. If it be asked, is the country getting proper value for its money? the reply is, much value, yet not perhaps as much as will be obtained when the instruction is rightly organized throughout the land. At present it is under the direction of too many bodies of unequal strength and varying aims: it is less efficient than it might be because it needs a centre. Still, considering that legislation giving important financial support to technical education is no more than ten or eleven years old, it is genuine matter for satisfaction that distinct progress has been made, as is evident from the very full Return that is now issued by the Science and Art Department each year, "showing the extent to which and the manner in which local authorities in England, Wales, Scotland, and Ireland are applying funds" (under the Local Taxation [Customs and Excise] Act, 1890; the Technical Instruction Acts, 1889 and 1891; the Welsh Intermediate Education Act, 1889; the Technical Schools [Scotland] Act, 1887; the Technical Instruction Amendment [Scotland] Act, 1892, and the Public Libraries Acts) "to the purposes of technical education (including Science, Art,

Technical, and Manual Instruction)." The leading figures from the most recent edition of this return available will be found incorporated in the tables given on pp. 671-72. But it will probably be found of interest to supply here a few further particulars as to the action of the various local bodies with whom the control of technical education at present largely rests, though it must of course be borne in mind that the Science and Art Department, through its money grants in aid, exercises a greater or less influence over the instruction that is given. Thus in England (excepting the county of Monmouth) thirty-eight out of the forty-nine county councils are applying the whole, and the remaining eleven a part, of the residue received under the Local Taxation (Customs and Excise) Act to technical education; while out of the sixty-one county borough councils, fifty-four are devoting the whole, and seven a part, of the residue to technical education. Again, the councils of thirteen county boroughs, sixty-seven boroughs, and one hundred and nine urban districts in England are making grants out of the rates under the Technical Instruction Acts, and seven local authorities are devoting funds to technical education out of the rate levied under the Public Libraries Acts; while, during each of the years 1894-5 and 1895-6, twenty-five local authorities raised sums by loan on the security of the local rate under the Technical Instruction Acts. In Wales and the county of Monmouth the thirteen county councils and the councils of the three county boroughs are devoting the whole of the residue grant to intermediate and technical education, chiefly under the Welsh Intermediate Education Act, 1889; and in addition, the councils of eight counties, three county boroughs, five boroughs, and seven urban districts are making grants out of the rates under the Technical Instruction Acts, while one of these authorities is devoting part of the Public Libraries Rate to technical education. With regard to Scotland, out of the thirty-three county councils twenty-five are applying the whole, and four a part, of the residue to technical education. Again, out of the two hundred and four burghs and police boroughs, forty-six are applying the whole, and fifty-four a part, of the residue to technical education, one hundred and one are applying the whole to the relief of rates, and three have not furnished any returns. No amounts have been devoted to the building or maintenance of Science and Art Schools, Art Galleries, or Museums, out of the local rate under the Public Libraries Acts, though five school boards are making grants out of the school fund under the Technical Schools (Scotland) Act, 1887. In the case of Ireland, however, the residue is at present not applicable to technical education, though the whole question of technical and manual instruction in that country is now under the active consideration of the Government. Eleven local authorities are making grants out of the rates under the Technical Instruction Acts, and one of these authorities is also applying part of the rate levied under the Public Libraries Acts to technical education, while two other local authorities have decided to put the Technical Instruction Acts in force. It may be stated in conclusion that the whole amount of the residue paid to the councils of counties and county boroughs in England and Wales in respect of the financial year 1894-5 was £755,278 3s., of which £612,626 14s. 10d. was appropriated to educational purposes, and £142,651 8s. 2d. to the relief of rates; while the whole amount of the residue paid

to the councils of counties, town councils of burghs, and commissioners of police burghs in Scotland in respect of the same year was £39,300 14s. 11d., of which £28,201 12s. 3d. was appropriated to technical education, and £10,864 11s. 7d. to the relief of rates, no information having been furnished as to the disposal of the balance of £234 11s. 1d. So much then for statistics; but the general reader may not unreasonably inquire, What is technical education? And it must be admitted that to speak broadly it is more difficult to say what it is than what it is not. Fortunately, however, the Science and Art Department (South Kensington) answers the question, by giving in its yearly report a complete list of subjects it is prepared to recognise as falling under the head of Technical Instruction. This, slightly condensed, runs as follows:—(1) Agricultural engineering (including driving and working steam engines and machinery); (2) agriculture (practice of) and agricultural processes; (3) alkali manufacture; (4) ambulance work; (5) art needle-work; (6) bacon and ham curing; (7) baking and confectionery; (8) banking and financial science; (9) bee-keeping; (10) bent iron work; (11) bleaching, dyeing, and printing; (12) boat-building; (13) book-binding; (14) book-keeping and commercial terms, office-work; (15) boot and shoe manufacture and repairing; (16) bread-making; (17) brewing; (18) brick-laying; (19) brick-making; (20) cabinet and furniture making and designing; (21) carving in wood, stone, and other materials; (22) carpentry and joinery; (23) carriage building; (24) casting and moulding in plaster, gelatine, &c.; (25) cider and perry making; (26) civil engineering (Scotland only); (27) coal tar products; (28) commerce, principles of; (29) commercial law, history, geography, arithmetic, and correspondence; (30) cookery; (31) designing for porcelain, pottery, and glass; (32) designing for textile fabrics, silks, and calico; (33) designing for printing and laces; (34) designing for metal work and vases; (35) designing for book-binding; (36) domestic economy; (37) dressmaking; (38) economic science; (39) elastic web manufacture; (40) electrical engineering—electric lighting and transmission of power, electrical instrument making; (41) electrometallurgy; (42) enamelling; (43) engraving; (44) entomology; (45) etching; (46) farriery; (47) fish culture, fishing, and cognate subjects; (48) forestry; (49) framework-knitting and hosiery; (50) fretwork and turning; (51) fuel; (52) gardening; (53) gas manufacture; (54) general

tool-making; (55) gilding; (56) glass manufacture; (57) goldsmiths' work, &c.; (58) hand-spinning and weaving; (59) hat manufacture; (60) horticulture and arboriculture; (61) hosiery manufacture; (62) house painting and decoration; (63) illuminating and heraldic painting; (64) insurance; (65) iron and steel, the manufacture and working of; (66) iron and brass-founding; (67) kindergarten, theory and practice of; (68) lace-making and manufacture; (69) laundry-work; (70) leather, preparation and industries; (71) machine knitting; (72) manual and theoretical instruction in wood, stone, brick, metal, leather, glass, clay, basket, wicker, and fancy straw-work; (73) marquetry work; (74) mat and rug making; (75) millinery; (76) milling (flour manufacture); (77) mechanical and architectural drawing; (78) mechanical engineering; (79) metal colouring and bronzing; (80) metal-plate work; (81) mine surveying; (82) mining and prospecting; (83) modelling in various materials; (84) modern languages—French, German, Spanish, Italian, Portuguese, Norwegian, Swedish, Danish, Russian, Irish, Welsh; (85) music—singing and musical notation, instrumental and orchestral music; (86) needlework, embroidery, and crochet; (87) netting; (88) nursing; (89) oils and fats, including candle manufacture; (90) oils, colours, and varnishes, manufacture of; (91) oyster culture; (92) paper manufacture; (93) pattern-making; (94) pharmacy; (95) photography; (96) plasterers' work; (97) plumbing; (98) political economy; (99) pottery and porcelain manufacture; (100) poultry-keeping; (101) précis writing; (102) principles of education applied to the teaching of technical subjects; (103) printing; (104) repoussé work; (105) road-making, principles of; (106) rope-making; (107) sail-making; (108) sanitary science and engineering; (109) seamanship; (110) ship carpentry and joinery; (111) silversmiths' work (including plate and plated wares); (112) shorthand; (113) sloyd; (114) soap manufacture; (115) spirit manufacture and rectification; (116) sugar manufacture; (117) surveying, levelling, and taking out quantities; (118) tailors' work and cutting out; (119) teaching, science and art of; (120) telegraphy and telephony; (121) textile fabrics (spinning, weaving, and silk throwing); (122) tools, use of; (123) turnery; (124) type-writing; (125) upholstery; (126) veterinary science; (127) watch and clock making; (128) wool, the preparation and treatment of.

INTERMEDIATE EDUCATION BOARD FOR IRELAND.

The nearest approximation to any official return as to the state and general efficiency of secondary, as distinguished from elementary schools, is in Ireland, where there is an Intermediate Education Board which supervises, and conducts the examination of, a number of schools of a somewhat more advanced character than those under the control of the National Commissioners of Education. The subjects of the ex-

aminations conducted by the Board are as follows :—

Greek, Latin, English, Précis Writing, French, German, Italian, Celtic, Spanish, Domestic Economy, Plane Trigonometry, Algebra and Arithmetic, Euclid, Algebra, Arithmetic, Book-keeping, Natural Philosophy, Chemistry, Drawing, Shorthand, Music, and Botany; and the brief table below will be found to give the leading figures of the last five years according to the most recent report :—

Particulars.	1892.	1893.	1894.	1895.	1896.
No. of students presented for examination :—					
Boys	4,294	5,265	5,816	6,267	6,503
Girls	1,465	1,709	1,866	2,056	2,208
Total	5,759	6,974	7,682	8,323	8,711
No. of students who passed the examinations :—					
Boys	2,539	3,041	3,419	3,783	3,753
Girls	784	955	1,104	1,190	1,213
Total	3,323	3,996	4,523	4,973	4,966
Percentage of candidates who were successful :—					
Boys	59.1	57.7	58.8	60.4	57.7

Total	57.7	57.3	58.9	59.8	57.0

DEPARTMENT OF SCIENCE AND ART (GREAT BRITAIN AND IRELAND).

The more important and comprehensive of the tables of returns issued by the Science and Art Department will be found given below in a form at once concise and easy of comparison, but it may be of interest here to give a few further useful items for which those tables do not conveniently provide space. Under the head of science, there were 203 competitors for the seven Royal Exhibitions, twenty-two National Scholarships, and six Free Studentships to the Royal College of Science,

London, and the Royal College of Science, Dublin, the awards to these being made on the results of the May examinations; and, as in former years, a high standard was attained by the successful competitors. Under the well-known scholarship scheme, founded and endowed by the late Sir Joseph Whitworth in 1868, the competition in 1896 was for four scholarships of £125 a year each, tenable for three years, and thirty exhibitions of £50 each, tenable for one year, the total

number of competitors being 107, as compared with 117 in 1895, and the customary high standard of attainment being shown by the candidates. The report of the Dean and Council of the Royal College of Science, London, shews that during the session 1895-6 there were 309 students under

instruction in the various divisions of the school, of whom 181 were Government students, *i.e.*, Royal Exhibitioners, National Scholars, Local Exhibitioners, Free Students, and Teachers in Training, while the remaining 128 were private students paying fees.

* Exclusive of the amount—estimated at £42,861—to be devoted annually to Intermediates and Technical Education under the Welsh Intermediate Education Act, 1889.

NOTE.—The amounts in Tables (a), (b), and (c), under the head of Technical Education, above, are given to the nearest whole £

NOTE.—It may be useful to add here, for the benefit of those readers who are specially interested in the subject of Technical Education, that the "Return" from which the foregoing tables are made up shows the amount spent on Technical Education by Local Authorities in the United Kingdom—with the exception of eight which have made no return—during the year 1894-5, together with the estimated expenditure for the year 1895-6. It also furnishes particulars of the amounts raised by loan on the security of the local rate under the Technical Instruction Act, 1889,—mainly for the erection of Science, Art, and Technical Schools. With reference to the eight smaller authorities which have failed to furnish

any information, only one or two, and those are in Scotland, are believed to have applied any money to educational purposes during the two years in question. With regard to the outlay on Technical Education out of rates levied under the Public Libraries Acts, the Return includes only that portion of the rate which has been applied to the building or maintenance of Science and Art Schools, Art Galleries or Museums.

Finally, with a view to making the matter quite clear, it may be desirable to state that the grand totals of expenditure for the United Kingdom given above are exclusive of the sums allocated to Intermediate and Technical Education under the Welsh Intermediate Education Act of 1889.

OCT. 1896 to OCT. 1897.

DURING the past twelvemonth Royal Commissions on various subjects of much public importance have issued their final reports, and it seems desirable that a brief digest or summary of the salient features of those reports—the Commissioners' findings and their recommendations—should be included in the ALMANACK. Such a summary will therefore be found below of the reports of the special Commissions that were appointed to inquire into (I.) Agriculture, (II.) the Welsh Land Question, (III.) Electrical Communication with Lighthouses and Light-vessels, and (IV.) the West Indies Sugar Industry; together with a paragraph of leading notes based upon the fifty-first report of the Commissioners in Lunacy. In conclusion, a list is appended of those Royal Commissions whose labours are not yet completed.

I.—AGRICULTURE.

In September, 1893, a Royal Commission was appointed "to inquire into the agricultural depression prevailing in that part of the United Kingdom of Great Britain and Ireland called Great Britain, and whether it can be alleviated by legislation or other measures." The Commissioners held in all 177 meetings, and examined 191 witnesses; moreover, they appointed eight Assistant Commissioners to visit specially-selected areas in England and Scotland, representative of various types of agriculture, for the purpose of reporting generally upon the condition and prospects of the industry. In August, 1897, the final report of the Commission was issued, consisting of five distinct parts, the first four of which deal with (1) The distribution of agricultural depression as it has affected different districts in Great Britain, and its effects respectively upon owners, occupiers, and labourers; (2) The chief causes of the depression, viz., the fall in prices, foreign competition, and the cost of production; (3) miscellaneous subjects bearing generally upon the agricultural position; and (4) A summary of the recommendations made and the conclusions arrived at; while the fifth part contains a supplementary report devoted exclusively to the currency question. It is by no means easy to give a brief digest of the recommendations made, but the following may be mentioned as among those of the greatest importance: (1) Certain amendments to the Agricultural Holdings Acts (England and Scotland), 1893, as e.g., That notice to the landlord, but not his consent, be required in respect of the improving of roads and watercourses, and the making of small gardens, orchards, and osier beds; That the principles of the Arbitration Acts of 1889 be adopted; That the umpire should be chosen from a list approved by the Board of Agriculture; That wider powers of compensation be given to umpires and valuers; That notices of claim be done away with, subject to reservations; That the dilapidations for which a landlord may claim compensation be scheduled; That the sum recoverable as a penal rent be limited to the actual damage sustained by the landlord; That except on points of law there be no appeal from the award under the Acts; and That distress for rent be limited to such rent as has accrued within the preceding twelvemonth; (2) Certain remissions of tithe rent-charge and of rents and irrecoverable rents, and certain powers to be

given to the tithe-owner and tithe-payer to enter into agreements for the reduction of the amount payable, and for the settlement of the terms of redemption of tithe rent-charge; (3) Certain amendments of the Traffic Acts of 1888 and 1894 with reference to the rates on foreign agricultural produce, and the increase of rates generally since 1893, and proposed arrangements for the reduction of the charges for the carriage of agricultural produce by parcel post; (4) The recognition of the right of occupiers to compensation for damage to their crops by preserved game; (5) The proposals of the Food Products Agricultural Committee, so far as they relate to agricultural produce, to be carried into effect by legislation; (6) Certain recommendations of the House of Lords' Committee with reference to the marking of foreign meat, to be carried into effect by legislation; (7) Additional reports, both from home and abroad, to be made to the Board of Agriculture; and (8) The extension and raising of the standard of rural middle-class education, and the giving of further powers to the Board of Agriculture in respect of technical agricultural education. In the fifth part of the report, ten of the Commissioners make these two initial statements:—(1) As the fall in prices is by general admission at the root of all the agricultural difficulty, none of the foregoing recommendations pretend to be more than palliatives for distress; and (2) No attempt is made in the report to ascertain whether and how far this primary cause of depression could be mitigated or removed; and subsequently draw the following conclusions:—(1) The fall in prices is primarily responsible for agricultural depression; (2) There is no evidence to show that the food products of the world now are proportionately and appreciably greater than they were before the beginning of the fall in prices; (3) The views of Sir Robert Giffen appeared to show that the growth of the acreage of wheat has lagged behind the growth of population; (4) Agricultural depression is not by any means confined to England, but is general in Europe and the Australasian colonies, and is specially severe in the United States; (5) The general and common cause is probably discoverable in the great monetary changes of the years 1873 and 1874; (6) The only two countries free from the depression appear to be India (silver currency) and the Argentine Republic (paper currency); (7) A *prima facie* case has been established that agriculture has suffered and is suffering from the appreciation of gold, and from the divergence in the value of metals; (8) Pending a general adjustment of prices, the artificial advantage to producers in silver-using countries must continue; (9) The main question remaining is, how far relief is possible by a reversal of the monetary policy of 1873; (10) Such a change, to be brought about, must be by international arrangement; (11) A conference of the powers, ending in the reopening of the mints abroad and in India, and the whole or partial "restoration of silver," would be of the greatest benefit to the agricultural industry; and (12) H.M. Government should give effect to the unanimous resolution of the House of Commons (Feb. 1895), and promote such an international conference. It only remains to add that Mr. George Lambert and Mr. Channing issue two separate reports of their own, the former agreeing with the majority of

the Commissioners so far as dairying, railway rates, agricultural education, and kindred subjects are concerned, but thinking that otherwise the report is cast in "a landlord mould;" while the latter holds that the true solution of the problem is to be found in a radical alteration of the land tenure laws of this country.

II.—WELSH LAND.

The recommendations of the Royal Commission appointed to inquire into the land question in Wales may be grouped under eleven main heads, and a supplementary note. The following summary gives the more important conclusions at which the whole nine commissioners arrived:—

(1) *Estate management*.—Great care should be taken by estate owners in the appointment of agents; estate owners in Wales should conduct the business of the estate through a competent agent according to the customs of the estate; the landlord's influence should be exerted towards emphasising the solidarity of the estate as an economic unit where a particular industry is carried on; the landlord's expenditure (existing conditions remaining much the same) should in most districts be directed to the better equipment of the holdings, not for arable farming, but for stock and sheep farming, dairy farming, the poultry business, and market gardening; if the suggested statutory tenancy in place of a voluntary tenancy be not adopted, the agreements on estates should conform strictly to the law, especially the Ground Game Act of 1886, and the Agricultural Holdings Act of 1883; and lastly, political and religious questions, &c., should be rigidly excluded from consideration in the management of estates. (2) *Farming generally*.—With a view to adopting improved modern economic principles, (a) extended facilities should be given for agricultural education, (b) intelligence useful to farmers should be diffused under the direction of the Board of Agriculture, (c) associations for co-operation similar to those in some of the continental European countries should be founded, and (d) more attention ought to be paid by farmers to those departments of their art in which competition is most easily combatted; (3) *Burdens on land*.—The question of local as opposed to Imperial taxation and of the taxation of personalty as compared with that of realty, should be inquired into by a properly constituted commission—no special action on the question of railway rates need be taken at present; (4) *Law of landlord and tenant*.

—Certain amendments and detailed changes in the Agricultural Holdings Act of 1883 referring principally to (a) the giving of notices, of claim and counterclaim, (b) possible injustices to tenants in the event of the sale of an estate on the death of its owner, and (c) capricious eviction of tenants; (5) *Game laws*.—The statutes dealing with offences connected with game should be simplified and codified; (6) *'Distress'*.—The landlords should retain their present limited power of distraining for rent; (7) *Occupying freeholders*.—State loans (at a low rate of interest) should be granted to freeholders farming their own land, who have purchased their own holdings since 1868, and have borrowed at a high rate of interest on the security of their holdings; (8) *Cottagers and labourers*.—The Allotments Acts (1837, 1839) and the Small Holdings Act (1892), should be put into freer operation, and the provisions of the Housing of the Working Classes Act (1890), should be extended, with amendments, to rural districts; (9) *Commons*.—Power ought to be conferred on

county councils and district councils (a) to purchase on fair terms the rights of the lord of a manor, and (b) to make bye-laws for the use of commons by the commoners; (10) *Crown lands*.—A commission should be appointed to survey the Crown lands in Wales, and to make a proper return of the rents, dues, &c., payable from land in Wales to the Crown; and (11) *Witnesses Protection Act, (1892)*.—A public inquiry should be made into the operation of this Act and as to the desirability of amending it. The supplementary note mentioned above is subscribed to by six out of the nine Commissioners, and is to the effect (1) that any mere amendment of the Agricultural Holdings Act of 1883 is inadequate to redress the prevailing grievances of the tenancy from year to year, and (2) that nothing short of the creation of a judicial tenancy and the constitution of a special Land Court of wide powers will suffice to place the agricultural industry upon a sound basis while securing an equitable adjustment of the rights of those concerned.

III.—WEST INDIES SUGAR INDUSTRY.

The Royal Commissioners, Sir Henry Norman (chairman), Sir David Barbour, and Sir Edward Grey were to take into their general consideration the condition of the sugar industry in the West Indian colonies, with reference to the causes of the present depression and their origin, the possibility of replacing that industry by others which would supply employment for the labouring population, and the financial and social results of such contingent changes upon the colonies and their inhabitants. The report of the Commissioners naturally covers a very wide field, touching both upon the economic condition of the colonies generally, and the comparative condition of the individual colonies; and the conclusions which the Commissioners have arrived at may be conveniently summed up as follows:—The West Indian sugar industry is in danger of great reduction, if not in some cases of absolute extinction, this depression being due to the competition of other sugar-producing countries, and in particular of those producing beet-sugar under a system of bounties. It is not, however, due in any considerable degree to extravagance in management, to imperfection in the process of manufacture, or to absentee ownership. The depression is causing sugar estates to be abandoned, and this again is producing distress among the labouring population, and so seriously affecting the prosperity of the sugar-yielding colonies themselves, that possibly the greater number will be unable to provide (without external aid) for their own government and administration. In Dominica, it appears, the sugar industry is not now of great importance; in Jamaica, Trinidad, St. Lucia, and perhaps Montserrat and Nevis it could, after a time and at the cost of much suffering, be replaced by other industries, but this is not feasible in the case of Barbados, Antigua, and St. Kitt's. The total or partial extinction of the sugar industry will in most places seriously reduce both the condition of the labouring classes and the revenue of the colonies, and the best immediate remedy conceivable (a remedy which there is small hope of securing) would be the abandonment of the bounty system by Continental nations, though it is not clear that even this would prevent the occurrence of a similar crisis in the future. A plan strongly supported by Sir Henry Norman and by witnesses interested in the sugar estates, was the imposition of counter-

vailing duties on bounty-free sugar when imported into the United Kingdom, but to this proposal the other commissioners do not assent. The special measures of relief which the Commissioners unanimously recommend are:—(1) The settlement of the labouring population on small plots of land as peasant proprietors; (2) The establishment of minor agricultural industries and the improvement of the system of cultivation, especially among small proprietors; (3) The improvement of communication between the islands; (4) The encouragement of a trade in fruit with New York, and possibly, at a future time, with London; and (5) The grant of a loan from the Imperial Exchequer for the establishment of central factories in Barbados. The expenditure which the adoption of these proposals would entail is estimated thus:—(1) A grant of £27,000 a year for ten years to meet the remedies suggested in (2) (3) and (4); (2) A grant of £20,000 a year for five years; (3) Immediate grants of £60,000 and £30,000, or £90,000 in all; and (4) A loan of £125,000 to Barbados for the establishment of central factories. The Commissioners, however, are unable to form any estimate of the expenditure it may be necessary to incur in relieving distress (especially in British Guiana and Barbados), in promoting emigration, and in supporting and repatriating East Indian immigrants; but they foresee that it might be very great in the event of a sudden and general failure of the sugar industry, and they are clear that in such a contingency neither British Guiana nor Barbados would be able to meet the cost of administration for probably a considerable number of years.

IV.—ELECTRICAL COMMUNICATION WITH LIGHT-HOUSES AND LIGHT-VESSELS.

The fifth and final report of the Royal Commission on the above subject was signed by the chairman, the Earl of Mount Edgcumbe, and the eight other members of the Commission. When the inquiry began the only system of electrical communication with light-vessels which had been put to a practical test was the "Sunk" system, in which the "Sunk" light-vessel was electrically connected with the shore; and this, it seems, is still the best system of continuous connection brought under notice. In its present form, however, it cannot be regarded as providing an entirely satisfactory solution of the problem of maintaining efficiently, and at a reasonable cost, electrical communication with light-vessels anchored in deep water and in exposed positions. In spite of the efforts that are being made to perfect the system, it does not appear that any alterations in the apparatus by which the communication is effected will render it possible to maintain, under the "Sunk" system, trustworthy connection at a small cost with light-vessels exposed to very heavy weather. The Commissioners therefore turned their attention to a somewhat promising plan of establishing electrical communication by induction; but this proving a failure, they brought to the notice of the post office authorities Signor Marconi's proposal to signal through the ether without the use of wire, and, a preliminary experiment on the shores of the Bristol Channel between two points nearly nine miles apart ending very satisfactorily, arrangements have been made for a practical trial of the scheme in the case of a light-vessel. The Commissioners sum up their investigations and inferences thus:—

(1) The establishment and maintenance of electrical communication with shore, island, and pile lighthouses are perfectly simple matters; (2) in the case of rock lighthouses, the task is more difficult, but it is believed to be practicable with all such lighthouses by means of a continuous (or in exceptional instances of a non-continuous) system; (3) with light-vessels moored in shallow waters over soft bottoms, and not subject to heavy seas, connection can be made and maintained at a reasonable cost on the "Sunk" system; (4) in the case of light-vessels moored in deep waters, attention is directed to the new method of signalling without wires, and to the possibility of further discoveries in electrical science. The Commissioners further give a list of the light-vessels and lighthouses which (in accordance with their former recommendations) have been placed in electrical communication with the general telegraph system of the country, and also make various suggestions, with reference to outlying lighthouses, shore lighthouses, and storm-warning signals, for improving the machinery already existing along the coasts for rendering aid to distressed vessels, and for saving their crews from the perils of the sea.

V.—LUNACY.

The fifty-first Report of the Commissioners in Lunacy (of whom Lord Hatherton is the chairman) contains some curious and possibly misleading statistics, and not a little unsatisfactory information as to the control of lunatics and idiots. During the year ending 1st Jan., 1897, it seems that the number of lunatics in England and Wales rose from 96,446 to 99,365, yet this is not to be attributed to any important increase of insanity, but rather to (1) accumulation arising in part from a diminished discharge rate, and (2) a diminution in the death rate for the year of 1895, this last preserving the lives of no fewer than 722 patients who would have been removed by death had the rate of mortality of the preceding twelvemonth been maintained. On the other hand, the rate of recovery of health among lunatics during 1896 shows a distinct increase, 66 more being discharged in the year than would have left had the rate of 1895 prevailed. Private patients are regularly decreasing; while pauper patients are regularly and rapidly increasing, from year to year, in proportion to the entire population of the country. As to the general ratio of insanity, it will probably startle a good many readers to learn that whereas in 1859 there were 536 persons in the population for each one officially known to be insane, in 1869 the ratio had fallen to 418 : 1, in 1879 to 363 : 1, in 1889 to 337 : 1, and seven years later to 313 : 1. As to the causes of insanity, the Commissioners are in some doubt, but they are inclined to place among the most fruitful (1) hereditary influence; (2) previous attacks, and (3) intemperance in drink. It is anything but satisfactory to read that the asylum accommodation in several areas is seriously insufficient, and that, even where it exists, it is too often accompanied by overcrowded dormitories, unsuitable dining and sleeping-places, and (worst of all) by a lack of proper sanitary conditions, this last causing an appreciable amount of preventable sickness and death. Notwithstanding the extensions and improvements that are being carried out at many asylums, the advice given by the Commissioners from time to time has in too many cases been simply ignored, and they now record the fact

that there is an "acute pressure for asylum accommodation for pauper lunatics chargeable to the county of London," the annual increase of lunatics in the metropolis alone having been estimated by the County Council Committee at between 600 and 700. The Lunacy Commissioners also draw attention to the curious state of the law regarding idiots, institutions for their reception being visited by the Commissioners yet not placed under the full operation of the Lunacy Acts. These institutions can be registered if found satisfactory, but, oddly enough, if subsequently they become unsuitable and unsafe for their purpose, there is no provision for the withdrawal of the official certificate. Lastly, the visits of the Commissioners to workhouses have impressed them with the necessity for some further protection being given to the extensive and needy class of persons known as "the feeble-minded."

ROYAL COMMISSIONS on the following subjects have not yet finished their labours:—

- (1) Historical Documents.
- (2) British Horses. Improvement in Breed of.
- (3) Military and Civil Expenditure of India.
- (4) Liquor Licensing Laws.
- (5) Tuberculosis.
- (6) Local Taxation.
- (7) London Water Supply.

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have three days of Grace allowed; thus, a bill dated 1 Jan. at two months' date is not due till March 4; but no days of Grace are allowed on Bills drawn at sight or on demand; such must, therefore, be paid on presentation. Bills falling due upon "Bank Holidays"—Easter Monday, Whitsun Monday, the first Monday in August, and the 26th December—if the 27th be Sunday, then not till the 28th, are payable the day after; but those falling due on Sundays, on Good Friday, or Christmas Day, must be paid the day before.

Regulations respecting Passports.

FOREIGN Office Passports are granted only to British-born subjects, or to persons naturalized either in the United Kingdom or in the British Colonies; they are not limited in point of time, but are available for any time, or for any number of journeys to the Continent. When the party is a "Naturalized British subject," he will be so designated in his Passport, which will be issued subject to the qualification mentioned in the 7th Clause of the Act 33 Vict. c. 14.

Applications for Foreign Office Passports must be made in writing, and enclosed in a cover addressed to "The Passport Department, Foreign Office, London."

The charge is 2s., whatever number of persons may be named in it. Passports are issued at the Foreign Office between the hours of 11 and 4 on the day following that on which the application for the passport has been received, except on Sundays and Public Holidays, when the Passport office is closed. If the applicant reside in the country, and it be desired that the Passport be sent by post, a Postal order for 2s. must accompany the application. *Postage stamps will not be received in payment.*

Passports are granted to all persons either known to the Secretary of State or recommended to him by some person who is known to him, or upon the application of any *Banking firm* established in London or in any part of the United Kingdom; or upon the production of a certificate of identity signed by any Mayor, Magistrate, J.P., Minister of Religion, Physician, Surgeon, Solicitor or Notary resident in the United Kingdom; in certain cases the applicant's Certificate of Birth must be produced in addition to the certificate of identity.

If the applicant be a NATURALIZED BRITISH SUBJECT, and he reside in the country, his certificate of naturalization with his signature subscribed to the oath printed on it must be forwarded to the Foreign Office with the certificate of identity granted on his behalf; and his certificate of Naturalization will be returned with the Passport to the person who granted the certificate of identity in order that he may cause

the applicant to sign the Passport in his presence. If resident in London or suburbs, Naturalized British Subjects must apply *personally* at the Foreign Office for their Passport.

A Passport cannot be issued by the Foreign Office, or by an Agent at an outpost, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate; a Passport cannot be issued abroad to a Colonial Naturalized British Subject, except for a direct journey to the United Kingdom or to the Colony where he has been naturalized.

The bearer of every passport granted by the Foreign Office should sign his passport as soon as he receives it; without such signature either the *visa* may be refused, or the validity of the passport questioned abroad. Travellers who may have an intention of visiting the Russian Empire, the Turkish Dominions, or the Kingdom of Roumania at any time in the course of their travels, must not quit England without having had their passports *visés* at the Russian Consulate in London, 17 Great Winchester Street, E.C., at the Consulate-General of the Sublime Porte, 7 Union Court Old Broad Street, E.C., and at the Roumanian Consulate-General, 37 Old Jewry, E.C., respectively. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country resident in the United Kingdom, except as an additional precaution, which is recommended in the case of Passports of old date.

Although British subjects are now free to enter Belgium, France, Holland, Italy, Denmark, Sweden, and Norway without passports, and the rules about passports have been virtually relaxed in other countries, nevertheless, British subjects about to visit the Continent are recommended not to omit to provide themselves with passports, for even in those countries where they are no longer obligatory, they are found to be convenient, as offering a ready means of identification, and more particularly when letters have to be claimed at a *poste restante*. For residence in certain districts of Germany and Switzerland, a Passport is indispensable.

Up to the year 1858 the probate and safe custody of wills was entirely within the jurisdiction of the Ecclesiastical Courts. Complaints of the carelessness and insecurity to which the documents were exposed at the hands of sinecurists and absentee officials became very rife, culminating perhaps in the vigorous onslaught on the system which was made by Charles Dickens in "David Copperfield" and "Household Words." The result was the establishment throughout the country of forty District Registries. To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, which is freely open to the public. In the latter case, the original will, proved in the District Registry, is there kept, but a copy is sent to and filed at Somerset House, and may there be seen. Any will may be read by anybody who is ready to pay a search fee of one shilling; but the reader may not copy any part of the will except the names and addresses of the executors, and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninespence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Districts.	Registrar.	Registries.
Flint, Denbigh, & Merioneth	J. P. Lewis	St. Asaph.
Derbyshire	C. T. E. Wilde	Derby.
Nottinghamshire	W. G. Vincent	Nottingham.
Leicester and Rutlandshire	G. H. Nevinson	Leicester.
Lincolnshire	John Swan	Lincoln.
Salop and Montgomery	F. R. B. Walton	Shrewsbury.
Northants, N. Huntingdon, & Cambridge	Henry William Gates	Peterboro'.
Norfolk	G. R. Harman	Norwich.
Suffolk, East	B. P. Grimsey	Ipswich.
Essex, North	C. Wodehouse	Bury St. Edmunds.
Bedford & South Northants	C. C. Becke	Northampton.
Warwickshire	W. G. Middleton	Birmingham.
Staffordshire	T. W. H. Oakley	Lichfield.
Radnor, Brecknock, and Herefordshire	T. C. Paris	Hereford.
Cardigan, Carmarthen, and Pembroke	W. Morgan Griffiths	Carmarthen.
Glamorgan and Monmouthshire	Clement Waldron	Llandaff.
Worcestershire	H. A. Franklin	Worcester.
Gloucestershire, except Bristol	E. Sidney Hartland	Gloucester.
Bristol and Bath	Wm. H. Clarke	Bristol.
Oxford, Berks, & Bucks	Thomas M. Daventport	Oxford.
Somerset, East, except the Bath C. C. District	Langford Elliott	Wells.
Somerset, West	E. T. Alma	Taunton.
Devonshire	W. H. Bailey	Exeter.
Cornwall	W. H. Shadwell	Bodmin.
Wiltshire	H. Elliot Fox	Salisbury.
Dorsetshire	E. A. Smith	Blandford.
Hampshire	C. Wooldridge	Winchester.
Sussex, East	J. W. Heisch	Lewes.
Sussex, West	Sir R. G. Raper	Chichester.
Kent, East	H. M. Chapman	Canterbury.

DEPOSITORY FOR THE WILLS OF LIVING PERSONS.—It is unfortunate for the success of this institution that its existence is so little known. It may be added that the formalities and expense attendant upon depositing a will in Somerset House for safe custody do little to recommend that safety to the public. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vict. c. 77; but the provision has been almost a dead letter, for in three recent years there were only seven, nine, and seventeen testators found to place their wills in Somerset House. This may be done through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar.

Districts.	Registrar.	Registries.
Northumberland	H. E. Edwards	Newcastle-upon-Tyne.
Durham	Joshua Earles	Durham.
Cumberland and Westmorland	Wm. C. Butler	Carlisle.
Yorkshire, West Riding	G. Bridgeman	Wakefield.
" N. Riding	Henry Arthur Hudson	York.
" E. Riding, inc. York		
Lancashire, except Salford and West Derby Hundreds	J. G. Douglas-Willan	Lancaster.
Manchester and H. of Salford	Oswald Hardy	Manchester.
West Derby Hund.	T. E. Paget	Liverpool.
Chester	G. Middleton	Chester.
Carnarvon & Anglesey	H. B. Roberts	Bangor.

For Police purposes London is divided into two jurisdictions, that of the METROPOLITAN and that of the CITY Police. The former force superseded the "Night Watchmen" in 1830, when a Bill introduced by Sir Robert Peel authorised the establishment of a Metropolitan Police under the control of the executive government. The night watch system continued in the City itself until 1839, when a force of City Police was established under the control of the Common Council.

The CITY POLICE* district comprises an area of 671 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates. Although the area is comparatively small, the rateable value is enormous, and there are 31,148 night residents to be protected.

The Force comprises 1 Superintendent, 1 ditto, Detective Department, 3 Chief Inspectors, 15 District Inspectors, 22 Station Inspectors, 12 Detective Inspectors, 72 Sergeants, 7 Detective Sergeants, and 795 Constables; also 57 Constables on private service duty.

The METROPOLITAN POLICE* district embraces an area of 442,750 statute acres, with a population of between six and seven millions. There are within this area fifteen Police Courts, viz., Bow Street, Clerkenwell, Great Marlborough St., Greenwich, Lambeth, Marylebone, North London, South Western (Lavender Hill), Southwark, Thames (Stepney), West Ham, West London (Vernon St.), Westminster, Woolwich, and Worship St.

The Force on Oct. 19, 1897, consisted of 32 Superintendents, 579 Inspectors, 1,912 Sergeants, and 12,945 Constables, making a total of 15,468, with 316 horses.

It is scarcely possible to form an accurate estimate of the enormous actual value of the property under police protection, but the mean

rateable value of the metropolitan area for Metropolitan Police purposes for the year 1896-7 was £40,265,598. The Police Rate is now fixed by 31 & 32 Vict. c. 67 at 9^d. in the £, of which 4^d. in the £ is payable out of the Local Taxation Account under the Local Government Act, 1888. The total amount of Police Rate levied on the Parishes for the year ending 31 March, 1897, was £838,866, and the Local Taxation Account contributed £657,883 to the Police Fund during the year. The pay of the Force, including Chief Constables, Superintendents, Inspectors, Sergeants and Constables, was £1,282,107. During the year 1896, the criminal offences reported to the Metropolitan Police amounted to 18,536; a decrease of 1,458 as compared with the preceding year. The proportion of felonies relating to property was only 2'601 per thousand of the population, lower than any previous year. Of burglaries, 413 were committed in 1896, a decrease of 101 over 1895, and the estimated value of the property stolen in these burglaries was £2,874, of which £465 was recovered. Housebreakings numbered 1,368, and the value of the property lost was £15,364. Murder cases in 1896 numbered 21; there were seven death sentences, and in five cases the murderer committed suicide. Of manslaughter there were 24 cases in 1896 as compared with 37 in 1895. The number of Penal Servitude Convicts liberated on licence into the Metropolitan Police District was 849—25 less than in 1895.

* For the official staff of the two Forces, see pp. 176-77.

Metropolitan Fire Brigade.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organized and worked a fire-engine establishment of their own. On Jan. 1, 1866, the Metropolitan Board of Works took over these responsibilities.

By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade, and there is no limit as regards the amount of rate to be assessed.

The total expenditure for the year ended March 31, 1895, was £144,308. Of this amount the Treasury and the various insurance companies contributed £39,635, while the rate precepts furnished above £134,495 in 1892.

The strength of the Brigade in 1897 was as follows:—58 Land Fire-Engine Stations, 5 Floating or River Stations, 60 Hose Cart Stations, 204 Fire Escape Stations, 9 Steam Fire-Engines on

Barges, 57 Land Steam Fire-Engines, 66 Six-inch Manual Fire-Engines, 11 Under-six-inch Manual Fire-Engines, 37 Miles of Hose, 115 Hose Carts, 8 Steam Tugs, 13 Barges, 12 skiffs, 246 Fire Escapes, 7 Long Fire Ladders, 9 Ladder Vans, 2 Ladder Trucks, 2 Trolleys for Engines, 11 Hose and Coal Vans, 4 Waggons for Street Duties, 10 Street Stations, 153 Watch Boxes, 842 Firemen, including Chief Officer, Second Officer, Superintendents, and all ranks, 32 men under instruction, 16 Pilots, 78 Coachmen, 139 Horses, 102 Telephones between Fire Stations, 57 Alarm circuits round Fire Stations, with 580 call-points, 20 Telephones to Police Stations, 81 Telephones, and 7 Bell-ringing Fire Alarms and 1 Speaking Tube to public and other buildings.

The total number of calls for fires was 4,878, of which 923 were false alarms; of the latter no fewer than 399 were maliciously sent through the call-posts, only 7 of the offenders being arrested.

During 1896 there were 3,616 fires in the metropolis, and at 76 of them lives were lost.

Headquarters, Southwark Bridge Road, S.E.

Chief Officer, Commander L. de L. Wells, B.A. £900

Founded in 1824. Supported solely by Voluntary Contributions.

Patron HER MAJESTY THE QUEEN.

President THE DUKE OF NORTHUMBERLAND.

Offices: 14 John St., Adelphi. Secretary: Charles Dibdin.

DURING the year 1896 the receipts by the Institution in subscriptions and donations amounted to £10,534; in contributions from branches, £16,822; legacies, £43,448; Life-boat Saturday Fund, £16,205; and in dividends and interest on capital invested, £17,347; with Sunday collections, &c., a gross total of £78,664. The expenditure of the year reached a total of £75,417, and included £27,511 in payments for improving and repairing life-boats, carriages, houses, and slip-ways; £15,539 for lifeboat stores and subsidies to stations which are not self-supporting; £27,087 for payments to inspectors, coxswains, bowmen, signalmen and crews, &c., and in special awards and grants. The total number of lives saved by the

life-boats of the Institution and by special efforts for which it has awarded grants since its foundation in 1824 amounts to 40,544, the number of lives saved in 1896 being 461. In 1896 twenty vessels were also saved. The rewards granted by the Institution since 1824, include 99 gold medals and clasps, 1,154 silver medals and clasps, besides aneroids, binocular glasses, addresses, and £169,546 in money. Nearly three hundred life-boats are maintained under the auspices of the Institution on the coasts of the U.K. at an annual cost of £30,000. The average cost of a life-boat, including station and appliances, is £1,050, and the yearly expense of maintaining same is £100.

The Royal Humane Society.

Instituted 1774. Supported by Voluntary Contributions.

Patron HER MAJESTY THE QUEEN.

President THE DUKE OF ARGYLL.

THE income of the Society in 1896 was £2,055 (including £1,326 in various dividends—the proceeds of invested capital—£158 in subscriptions and donations, and a legacy of £422). The expenditure in the same period amounted to £1,815—£1,137 for office expenses, salaries and wages; £159 in awards for saving life; £268 in purchase of stock; and for life-saving apparatus £47, leaving an available balance for 1897 of £240.

During the year 1896, five hundred and sixty-seven persons were rewarded by the R.H.S. for saving 517 lives, and attempting to save the lives of 57 others. The "Cordon Bleu" of the awards is the Stanhope Gold Medal, instituted in 1873 (the first recipient being the late Captain Webb), and was awarded in 1896 to John H. Collin, second officer of the "Sultan," who made a gallant rescue of a Lascar fireman who fell overboard in the Indian Ocean. Extreme risk was run, both

from the heavy sea and from sharks, several of which were seen from the steamer. The other rewards include 9 silver medals, 74 bronze medals, 2 bronze clasps (which are usually given for a second act of bravery, to those already in possession of the medal), 343 testimonials, and 14 pecuniary rewards amounting to £159. Twenty three awards went to the Royal Navy, four to the Coast Guard and Royal Naval Reserve, thirty-two to the Army, eighteen to the Police Force, and thirteen awards were made on the recommendation of the Indian and Colonial Offices.

In addition to boats and ice-boats for the protection of bathers, life-buoys and drags, &c. are maintained at the cost of the Society in nearly 300 places in and around the Metropolis. The offices of the R.H.S. are at 4 Trafalgar Square, Charing Cross; and the Secretary is Major F. A. C. Cloughton.

Unclaimed Moneys and Dividends, 1897.*

Funds in (1) Supreme Court of Judicature (England), £59,732,768.

Funds in (2) Supreme Court of Judicature (Ireland), £5,381,213.

The proportion of these funds which may be classed as "unclaimed" is not stated, but very large sums in Chancery, amounting to £2,565,067, the owners of which are unknown, have been appropriated to various objects, and the Consolidated Fund is liable in respect of this debt to suitors.

Unclaimed Government Stock and Dividends, total (about) £5,000,000. Dividends due and not claimed for the quarter ending January 2, 1897, £265,303.

Unclaimed Dividends (Bankruptcy).—The total amount unclaimed is not stated, but the Consolidated Fund is liable in respect of a sum of £1,143,819, appropriated by the Government.

Intestates Estates reverting to the Crown.—Balance in course of administration, and not yet handed over to Crown, England, £119,397; Scotland, £40,316. There are also large estates

left by intestates in the past few years, now in possession of the Crown, which can be reclaimed on rightful heirs appearing.

Naval Prize Money.—£261,958.

Army Prize Money.—£77,138.

Soldiers' Unclaimed Balances (since 1863), £140,848.

Unclaimed Seamen's Wages and Effects, £23,772.

In addition, there are large unclaimed sums in the hands of solicitors who continually advertise for missing heirs and kindred; also funds in the shape of unclaimed Bank Deposits and Unclaimed Dividends of Companies, particulars of which are rarely published.

The foregoing summary shows the necessity for greater publicity as to unclaimed funds in the hands of the Government. It is high time that a Parliamentary Return, giving a list of the owners of all unclaimed funds, should be issued.

* From "Unclaimed Money," by Mr. Sidney H. Preston (London: E. W. Allen).

PREVIOUS to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1750.....	4,160,221	1670.....	5,773,646
1600.....	4,811,718	1700.....	6,045,008
1630.....	5,600,517	1750.....	6,517,035

During the eighteenth century, manufactures

attracted the rural population to towns, in consequence of which many villages were comparatively deserted. The American War and the French Revolutionary War carried off large numbers of men; and this, coupled with the removal of the rustic population, gave rise to the impression that the inhabitants of the country had decreased, and were rapidly decreasing. The first general Census in 1801 dispelled this idea, and showed that, notwithstanding all drawbacks, there were many more people than any one supposed. Since that time named there had been a fresh numbering every ten years, with the following results:—

	1801.	1811.	1821.	1831.	1841.	1851.	1861.	1871.	1881.	1891.

(a) These rates have been corrected for the varying length of the intercensal periods.

† Exclusive of the Army, Navy, and Merchant Seamen Abroad, who numbered in 1801, 442,013; in 1811, 502,536; in 1821, 589,095; in 1831, 260,191; in 1841, 202,954; in 1851, 212,194; in 1861, 250,356; in 1871, 216,080; in 1881, 215,374; and in 1891, 224,211. Incorrectly taken.

Briefly the Census of 1891 showed an increase of 2,028,086 persons and 612,977 inhabited houses in England and Wales; in Scotland, increases of 290,074 and 78,953; in the Channel Islands and Man, an increase of 6,582 persons and of 1,627 houses; but in Ireland a decrease of 470,086 persons (or 62,661 families) and 43,330 inhabited houses—giving after these deductions an increase of 2,854,656 persons and 656,638 inhabited houses.

The following is a complete list of the recipients of the Decoration from July 25, 1892 (the date of the warrant), to 1 December, 1897. Honorary office is given only in those cases where no active office is held. The figures after each name indicate the year in which the decoration was conferred. (r) means retired.

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting the *Institut de France*. The special object of this institution is the composition of the historical Dictionary of the French Language. It was founded in 1635, by Cardinal Richelieu, and re-organized in 1816. The other Academies are as follows:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 members.

ACADÉMIE DES SCIENCES, founded 1666, divided into 11 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6.

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of foreign correspondents.

MEMBERS OF THE ACADEMIE FRANÇAISE.

Legouvé, Ernest Wilfred Gabriel Jean Baptiste, born in Paris, 1807, elected March, 1855, predecessor Ancelet.

Brogiez, Duc de, Jacques Victor Albert, b. in Paris, 1821, e. 20 Feb., 1862, p. Lacordaire (father).

Ollivier, Olivier Emile, b. at Marseilles, 2 July, 1825, e. 7 April, 1870, p. De Lamartine.

Mézières, Alfred Jean François, b. in Paris, 1826, e. 29 Jan., 1874, p. St. Marc-Girardin.

Boissier, Marie Louis Antoine Gaston, b. at Nîmes, 1823, e. 8 June, 1876, p. Patin.

Sardou, Victorien, b. in Paris, 7 Sept., 1831, e. 7 June, 1877, p. Autran.

Audiffret-Pasquier, le Duc d', Edmond Armand Gaston, b. in Paris, 1823, e. 24 Dec., 1878, p. Bishop Dupanloup.

Rousse, Aimé Joseph Edmond, b. in Paris, 1817, e. 13 May, 1880, p. Jules Favre.

Sully-Prudhomme, René François Armand, b. in Paris, 1839, e. 8 Dec., 1881, p. Duvergier de Hauranne.

Cherbuliez, Charles Victor, b. at Geneva, 1829, e. 8 Dec., 1881, p. Dufaure.

Perraud, Adolphe Louis Albert, Cardinal Bishop of Autun, b. at Lyons, 1828, e. 8 June, 1882, p. Auguste Barbier.

Pailleron, Edouard Jules Henri, b. in Paris, 1829, e. 7 Dec., 1882, p. Charles Blanc.

Coppée, François Edouard Joachim, b. in Paris, 1842, e. 21 Feb., 1884, p. De Laprade.

Bertrand, Joseph Louis François, b. in Paris, 1822, e. 4 Dec., 1884, p. J. B. Dumas.

Halévy, Ludovic, b. in Paris, 1834, e. 4 Dec., 1884, p. Le Comte d'Haussonville.

Hervé, Aimé Marie Edouard, b. at St. Denis, Island of Réunion, 28 May, 1835, e. 11 Feb., 1886, p. Duc de Noailles.

Gréard, Vallery Clément Octave, b. at Vire, 1828, e. 18 Nov., 1886, p. Le Comte de Falloux.

Haussonville, le Comte Othénin Paul Gabriel de Cléron d', b. at Gurey-le-Châtel (Seine and Marne), 21 Sept., 1843, e. 26 Jan., 1888, p. Caro.

Claretie, Jules Arnaud Arsène, b. at Limoges, 3 Dec., 1840, e. 26 Jan., 1888, p. Cuvillier-Fleury.

Vogüé, le Vicomte Eugène Marie Melchior de, b. at Nice, 24 Feb., 1848, e. 22 Nov., 1888, p. Désiré Nisard.

Freycinet, Charles Louis de, b. at Foix, 14 Dec. 1828, e. 10 Dec., 1890, p. Emile Augier.

Viaud, Jean (Pierre Loti), b. at Rochefort, 4 July, 1850, e. 21 May, 1891, p. Octave Feuillet.

Lavisie, Ernest, b. at Nouvion-en-Thiérache (Aisne), 17 Dec., 1842, e. 2 June, 1892, p. Jurien de la Gravière.

Bornier, le Vicomte Etienne Charles Henri de, b. at Lunel, 25 Dec., 1825, e. 3 Feb., 1893, p. Xavier Marmier.

Thureau-Dangin, Paul Maria Pierre, b. at Paris, 12 Dec., 1837, e. 2 Feb., 1893, p. Camille Rousset.

Brunetière, Marie Ferdinand, b. at Toulon, 19 July, 1849, e. 8 June, 1893, p. Lemoine.

Heredia, José Maria de, b. at Santiago de Cuba, 22 Nov., 1842, e. 22 Feb., 1894, p. de Mazade.

Chief du Secrétariat et Agent Spécial, M. Julia Pingard.

Offices: Palais de l'Institut, 23 Quai Conti, Paris.

ON the morrow of St. Martin (12th November) certain high officials, usually the Lord President of the Council, the Chancellor of the Exchequer, the Lord Chancellor, several Judges, the Clerk of the Council, and others, assemble in the Court of the Queen's Bench Division of the High Court of Justice, and after certain ceremonies have been gone through, three gentlemen are nominated for the office of Sheriff for every one of the counties of England and Wales; Cornwall is nominated by the Prince of Wales as Duke of that county; and Lancaster, by its Duke the Queen. The three names, engrossed upon a parchment roll, are afterwards brought before Her Majesty, who then, with a golden bodkin, pricks through the parchment against one name for every county. The name thus pricked is usually the first on the list, and they come into office after Hilary Term. The following is a list of the gentlemen thus nominated whose names stand first upon the roll:—

BEDFORDSHIRE.—Henry Chernocke Gibbs Brandreth, Houghton Hall, Houghton Regis.

BERKSHIRE.—Frank Walters Bond, Wargrave Hill, Wargrave.

BUCKINGHAMSHIRE.—Sir Philip Frederick Rose, Bart., Rayners, Penn, Amersham.

CAMBRIDGE AND HUNTINGDON (SHIRES).—Fred Crisp, White House, New Southgate.

CHESHIRE.—Richard Hobson, The Marfords, Bromborough.

CORNWALL.—

CUMBERLAND.—George Graham Kirklington, Kirklington Hall, Carlisle.

DERBYSHIRE.—Sir Vaucey Harper Crewe, Bart., Calke Abbey, Derby.

DEVONSHIRE.—Sir Charles Daniel Cave, Bart., Manor House, Sidbury.

DORSET.—William Montagu Calcraft, Rempston Hill, Wareham.

DURHAM.—Samuel Peter Austin, Cocken Hall, Fencehouses.

ESSEX.—Colonel George Bramston Archer Houlton, Hallingbury Place, Gd. Hallingbury.

GLOUCESTERSHIRE.—Granville Edward Lloyd Baker, Hardwicke Court, Gloucester.

HEREFORDSHIRE.—John Riley, Putley Court, Ledbury.

HERTFORDSHIRE.—Charles Thomas Part, Aldenham Lodge, St. Albans.

KENT.—Noiman Watney, Valence, Westerham.

LANCASTER.—

LEICESTERSHIRE.—William Pochin Warner, Langton Hall, Market Harborough.

LINCOLNSHIRE.—William Hornsby, Burwell Park, Louth.

LONDON, COUNTY OF.—Samuel Henry Faudel-Phillips, 17 Grosvenor Street, W.

MIDDLESEX.—Irwin Edward Bainbridge Cox, Moat Mount, Mill Hill.

MONMOUTHSHIRE.—Samuel Courthope Bosanquet, Dingestow Court, Monmouth.

NORFOLK.—Simms Reeve, Brancaster.

NORTHAMPTONSHIRE.—Major-General Frederick Edward Sotheby, Ecton, Northampton.

NORTHUMBRLAND.—Augustus Edward Burdon, Hartford House, Cramlington.

NOTTINGHAMSHIRE.—Sir George Ernest Paget, Bart., Sutton Bonnington.

OXFORDSHIRE.—Lieut.-Colonel George Gosling, Stratton Audley Park.

RUTLAND.—Hon. William Charles Wentworth Fitzwilliam, Barnsdale, Oakham.

SHERIFFSHIRE.—John Townshend Brooke, Haughton Hall, Shifnal.

SOMERSET.—Hon. Edward William Berkeley Portman, Hestercombe.

SOUTHAMPTON, COUNTY OF.—John Bonham Carter, Adhurst St. Mary, Petersfield.

STAFFORDSHIRE.—Sir Thomas Fletcher Boughey, Bart., Aqualate, Newport, Salop.

SUFFOLK.—Thomas Henry Tacon, Red Hill House, Eye.

SURREY.—Lawrence James Baker, Ottershaw Park, Chertsey.

SUSSEX.—Sir Henry Harben, Warnham Lodge, Warnham.

WARWICKSHIRE.—Francis Seddon Bolton, Edgbaston.

WESTMORLAND.—William Stavert, Prizett, Kendal.

WILTSHIRE.—Sir William Roger Brown, Highfield, Trowbridge.

WORCESTERSHIRE.—John Howard Cortland, The Priory, King's Heath, Birmingham.

YORKSHIRE.—Robert John Foster, Harrowins, Queensbury, Bradford.

Wales (North and South).

ANGLESEY.—John Robert Davies, Ceris, Bangor.

BRECONSHIRE.—John James Williams, Aberclydach, Talybont.

CARDIGANSHIRE.—Sir James Weekes Szlumper, Sandmaish, Aberystwith.

CARMARTHENSHIRE.—St. Vincent Peel, Dan-y-rallt, Llangadock.

CARNARVONSHIRE.—George Farren, Trefenai, Carnarvon.

DENBIGHSHIRE.—James Sparrow, Gwersyllhill, Wrexham.

FLINTSHIRE.—Michael Antonio Ralli, Morannedd, Rhyll.

GLAMORGANSHIRE.—Thomas Roe Thompeon, Erw Delyn, Penarth.

MERIONETHSHIRE.—William Patchett, Alltfafrw Barmouth.

MONTGOMERYSHIRE.—Stafford Davies Price Davies, Martington Hall.

PEMBROKESHIRE.—William Howell Walters, Haroldston Hall.

RADNORSHIRE.—Frank Edwards, The Cottage, Knighton.

Foreign Moneys.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Market Price of Standard Silver in Pence per Troy Ounce.

Oz.	24	25	26	26½	27	27½	28	28½	29	29½	30
1	24	25	26	26½	27	27½	28	28½	29	29½	30
2	48	50	52	53½	54	55½	56	57½	58	59½	60
3	72	75	78	79½	81	82½	84	85½	87	88½	90
4	96	100	104	106½	108	110	112	114½	116	118½	120
5	120	125	130	132½	135	137½	140	142½	145	147½	150
6	144	150	156	159½	162	165	168	171½	174	177½	180
7	168	175	182	185½	189	192½	196	199½	203	206½	210
8	192	200	208	212½	216	220	224	228½	232	236½	240
9	216	225	234	238½	243	247½	252	256½	261	265½	270

By means of the above table, taken in conjunction with the column of the opposite page headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several prices other than those given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in the first column, find the numbers opposite to them in the column of the above table giving the price of silver and add these together, taking care to move the decimal point successively one, two, and three places, to the left; the result will be the coin's intrinsic value in pence.

Foreign Monneys and their English Equivalents.

COUNTRY.	GOLD COINS. Denominations.	Legal Weight in Grams.	Sterling Value.	SILVER COINS. Denominations.	Legal Weight in Grams.	Equivalent Silver in Troy Ounces.	Intrinsic Value with Silver at per Troy oz.

EXPLANATORY NOTES.—France, Belgium, Italy, Greece, and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and system, occasionally differing, however, in name. The same system has been in part adopted by Spain, Serbia, Bulgaria, Russia, and Rumania, but they have not joined the Union. Prussia and Sardinia and Bulgaria. See France, and footnote.

Switzerland

Tunis

Turkey

United States

Legal weight and fineness of the silver 5-fr. piece, generally termed "a franc." In Italy the corresponding coin is a "gourda." In most British colonies, English money is current. The currency of Ceylon, Mauritius, and the East Africa Protectorate is, however, based on the rupee of British India, that of the Straits Settlements, Hong Kong, and Labuan on the United States dollar, and of Canada and British Honduras on the Mexican dollar, and of Panama and British Guiana on the United States dollar. A British dollar, introduced by order in Council in 1894, and has been made legal tender in the Straits Settlements, Hong Kong, and Labuan. The exchange value of the moneys of those countries indicated by * is determined by the rate of exchange for the day, and may be taken as approximately that given in the last column of the table.

THE following are the values, according to the British standard, of the commoner measures of length, surface, capacity (dry and liquid), and weight in use in foreign countries. Those measures which appear in italics may be regarded as obsolete. It should be borne in mind that in the majority of semi-civilized lands the measures frequently vary with the locality, or with the species of thing to be measured. The chief authorities which have been consulted are Siegfried's "Münz-, Maass-, und Gewichts-Tabelle" (Leipzig, 1887), and Dr. W. A. Browne's "Merchants' Handbook" (Stanford, 1879). To the latter, inquirers may be referred for fuller information.

The Metrical System is fully given on p. 426.

Annam (Cochin China).

1 Tak	=	1'92 inches.
1 Thuok	=	19'2 inches.
1 Truon (2 Ngu).....	=	16'0 feet.
1 Saõ	=	24'0 feet.
1 Maõ	=	240'0 feet.
1 Li, or Mile	=	486'0 yards.
1 Dam	=	972'0 yards.
1 square Saõ	=	64'0 sq. yards.

1 Millerole.....	=	112'64 pints.
1 Pièce (Bordeaux).....	=	658'8 pints.
1 Pipe.....	=	1091'2 pints.
1 Tonneau.....	=	2204'6 lbs. av.

Germany.

The Metrical System was legalized throughout the Empire, Jan. 1, 1872, but French nomenclature is as far as possible avoided. The millimètre is also called Strich; the centimètre, Neu Zoll; the mètre, Stab; the décimètre, Kette; the litre, Kanne; the half-litre, Schoppen; the hectolitre, Fass; the décalitre, Neu Loth; the half-kilogramme, Pfund. The Centner is 50, and the Tonne is 1,000 kilogrammes. The chief obsolete measures are:

Prussian Fuss (12 Zoll).....	=	1'0297 feet.
" Elle.....	=	2'1881 feet.
" Ruthe.....	=	4'1188 yards.
" Meile.....	=	4'6805 miles.
" Morgen.....	=	2'5207 roods.
" Hufe (30 Morgen).....	=	18'929 acres.
" Metze.....	=	3'024 quarts.
" Scheffel (4 Viertel).....	=	1'512 bushels.
" Tonne.....	=	756 qr.
" Last (60 Scheffel).....	=	11'340 qrs.
" Ossel.....	=	1'007 pints.
" Anker (60 Ossel).....	=	7'559 gallons.
" Ohm (2 Eimer).....	=	30'237 gallons.
" Fuder.....	=	181'422 gallons.
" Zollpfund (30 Loth).....	=	1'1023 lbs. av.

The following are the values, according to the British standard, of the commoner measures of length, surface, capacity, dry and liquid, and weight in use in foreign countries. These measures which appear in italics may be regarded as obsolete. It should be borne in mind that in the majority of semi-civilized lands the measures frequently vary with the locality, or with the species of thing to be measured. The chief authorities which have been consulted are Siegfried's "Maass, Mass, und Gewichte-Tabellen" Leipzig, 1851, and Dr. W. A. Browne's "Merchants' Handbook" (Standard, 1875). To the same authorities may be referred for fuller information.

The Mexican System is fully given on p. 676.

Asian Countries.

1 Tok	=	120 inches.
1 Thook	=	222 inches.
1 Truan (2 Ngs.)	=	250 feet.
1 Sai	=	240 feet.
1 Mai	=	2400 feet.
1 Li, or Mile	=	4370 yards.
1 Dam	=	9720 yards.
1 square Sai	=	640 sq. yards.
1 Hai	=	6222 gallons.
1 Shita, or Tao	=	12444 gallons.
1 Fan (10 Li)	=	6005 Tr. grains.

Bremen Fuss	=	11' 3919 inches.
" Anker	=	7' 8 gallons.
Lubeck Fuss	=	11' 323 inches.
" Anker	=	8' 006 gallons.
" Pfund (32 Loth)	=	1' 0725 lbs. av.

Greece.

The Metrical System was introduced by an ordinance of Oct. 26, 1832. In Greece, gramme = millimètre; daktylos = centimètre; palame = décimètre; pecheus = mètre; stadion = kilomètre; skionis = myriamètre; stremma = are; kybos = millilitre; mystron = centilitre; kotyle = déclilitre; litra = litre; koilon = hectolitre; kokkos = centigramme; obolos = décigramme; drachme = gramme; mna = 1½ kilogramme.

Hayti, as in France.

India.—Bengal.

Under "The Indian Weights and Measures Act, 1870," the standard of weight is the Ser (Kilogramme) = 2' 20462 lbs. av.; the standard of length is the mètre = 3' 280899 feet; and the standard of capacity is the Ser (litre) = 1' 760773 pints, or 61' 027046 cubic inches.

1 Moot (4 Ungulee)	=	3 inches.
1 Háth (21 Ungulee)	=	18 inches.
1 Hyderabad Háth	=	35' 334 inches.
1 Guz	=	1 yard.
1 Coss	=	2000 yards.
1 Jojun	=	8000 yards.
1 Beegah	=	1600 sq. yards.
1 Beegah (N. W. Provs.)	=	3025 sq. yards.
1 Ser	=	2' 20462 lbs. av.
1 Ser	=	1' 76195 pints.
1 Tola	=	180 Tr. grains.
1 Seer (16 Chitaks)	=	2' 059 lbs. av.
1 Factory Maund	=	74' 66 lbs. av.
1 Bazaar Maund	=	72' 33 lbs. av.
1 Imperial Maund	=	82' 287 lbs. av.
1 Masha (8 Ruttee)	=	15' 0 Tr. grains.
1 Seer (4 Powah)	=	1' 961 pints.
1 Maund (40 Seer)	=	9' 8098 gallons.

Bombay.

1 Guz (24 Tussoo)	=	27 inches.
1 Beegah (20 Pund)	=	3927 sq. yards.
1 Seer (72 Tank)	=	7 lbs. av.
1 Maund	=	28 lbs. av.
1 Candy	=	560 lbs. av.
1 Sattara Candy	=	3055 lbs. av.

Madras.

English measures, and,		
1 Kole or Guz	=	33 inches.
1 Moolum	=	19½ inches.
1 Puddee	=	2' 8852 pints.
1 Mercal	=	2' 8852 gallons.
1 Parah	=	14' 4261 gallons.
1 Tola	=	180 Tr. grains.
1 Cutcha Seer	=	4320 Tr. grains.
1 Viss	=	3' 0857 lbs. av.
1 Maund	=	24' 6857 lbs. av.

1 Salma (16 Tumulo)	=	4' 964 acres.
1 Salma	=	7' 9372 bushels.
1 Pint	=	' 8331 pint.
1 Barrile (wine)	=	9' 35 gallons.
1 Libbra (12 Oncia)	=	4886 Tr. grains.
1 Rotolo	=	1' 745 lbs. av.

Mexico.

As old Spanish (q. v.).

Netherlands.

Since 1820 the Metrical System. Strep = millimètre; Duim = centimètre; Palm = déci-mètre; El = mètre; Roede = décamètre; Mijle = kilomètre; Wisse = Stere; Vingerhoed = centilitre; Maatje = déclilitre; Kan = litre; Vat = hectolitre; Korrel = décigramme; Wigtje = gramme; Lood = décigramme; Onze = hectogramme; Pond = kilogramme.

Norway.
The Metrical System since 1878.

Persia.

1 Zer (16 Gereh)	= 38 inches.
1 Fersakh (<i>Parasang</i>)	= 4 5 miles.
1 Chenica	= 289 gallon.
1 Capicha	= 578 gallon.
1 Collothun	= 1'809 gallons.
1 Artata	= 1'809 bushels.
1 Seer (16 Miscal) ...	= 284 Tr. grains.
1 Ratel	= 1'014 lbs. av.
1 Batman, or Maund	= 6'491 lbs. av.
1 Karwar	= 649'142 lbs. av.
1 Batman Rei	= 27 lbs. av.

Peru.

Metrical, old Spanish, and British; but Vara (3 pie) = 2'780 feet; Fanega (wheat) = 135 or 140 libra; Carga = 150 libra.

Philippine Islands.

1 Pulgada (12 Linea)	= '927 inch.
1 Pie	= 11'125 inches.
1 Vara	= 33'375 inches.
1 Gantah	= '896 gallon.
1 Caban	= 21'991 gallons.
1 Libra (16 Onzo) ...	= 1'0144 lbs. av.
1 Arroba	= 25'360 lbs. av.
1 Catty (16 Tael) ...	= 1'394 lbs. av.
1 Pecul (100 Catty)...	= 139'482 lbs. av.

Poland.

As in Russia, and,

1 Cwiere (6 Cal) = 5'60in.	1 Senurrow = 47'245 yds	
1 Stopa	= 11'212in.	1 Mila ... = 5'304mils
1 Loziec	= 22'425in.	1 Morgow = 1'382 acs

Portugal, Roumania, and San Domingo.

The Metrical System.

Russia.

1 Stopa (8 Vershok)	= 14 inches.
1 Arschine (16 Vershok)	= 28 inches.
1 Saschen (3 Arschine)...	= 7 feet.
1 Verst (500 Saschen) ...	= 1166'66 yards.
1 Desatine	= 13066½ sq. yards.
1 Vedro (100 Tscharkey)	= 2'704 gallons.
1 Anker	= 8'114 gallons.
1 Chetvert	= 46'2 gallons.
1 Sarokowaja	= 108'196 gallons.
1 Tschetwerik	= 2'885 pecks.
1 Pajak	= 1'442 bushels.
1 Last	= 11'540 quarters.
1 Zolotnick (96 Doli)	= 65'830 Tr. grs.
1 Funt (12 Lani)	= '9028 lb. av.
1 Pood (40 Funt)	= 36'1127 lbs. av.
1 Berkowitz	= 361'273 lbs. av.
1 Packen	= 1083'382 lbs. av.

Servia.

The Metrical and Turkish Systems.

Siam.

1 Niw	= '83 inch.
1 Kü'p (12 Niws)	= 10 inches.
1 Sawk (2 Kü'ps)	= 19½ inches.
1 Wah (4 Sok)	= 80 inches.
1 Sen (20 Wahs)	= 44'4 yards.
1 Yot (400 Sens)	= 9½ miles.
1 Röneng	= 2'525 miles.
1 Thang	= 3'75 gallons.
1 Coyan	= 375 gallons.
1 Tael (4 Bat)	= 936'25 Tr. grains.
1 Chang, or Catty	= 2'675 lbs. av.
1 Hap, or Pecul	= 133'75 lbs. av.
1 Kean (20 Piculs) ...	= 1675 lbs. av.

Spain.

The Metrical System was made compulsory on July 1, 1868. In many countries that were

colonized by Spain some of the old Spanish

measures are still used, e.g.,

1 Pulgada (12 Linea)	= '927 inch.
1 Sesma (6 Pulgada)	= 5'564 inches.
1 Vara (6 Sesma)	= 2'782 feet.
1 Estado (2 Vara)	= 5'564 feet.
1 Legua (of Castile)	= 4636'66 yards.
1 Fanegada	= 1'6374 acres.
1 Cuartillo (4 Capo)	= '109 gal.
1 Cuartilla (2 Azumbre)	= '8879 gal.
1 Arroba Mayor (or Cantara)	= 3'5517 gals.
1 Mayor (16 Cantara)	= 56'276 gals.
1 Medio (2 Cuartillo)	= '0621 bushl.
1 Almude (2 Medio)	= '1256 bushl.
1 Fanega	= 1'5076 bushels.
1 Cahiz	= 18'0919 bushels.
1 Tomin (12 Grano)	= '0213 oz. av.
1 Onza	= '0634 lb. av.
1 Libra (of Castile)	= 1'014 lbs. av.
1 Quintal	= 101'442 lbs. av.
1 Tonelada	= 1014'42 lbs. av.

Sweden.

The Metrical System since 1875.

1 Fot (10 Tum)	= 11'689 inches.
1 Mil (360 Ref)	= 6'6416 miles.
1 Kanna	= 4'608 pints.
1 Skoalpund (100 Ort)...	= '937 lb. av.

Switzerland.

The Metrical System since Jan. 1st, 1873.

1 Fuss (10 Zoll)	= 11'8112 inches.
1 Stunde (1600 Ruthe)...	= 2'9826 miles.
1 Malter (10 Viertel) ...	= 4'126 bushels.
1 Maass (4 Schoppen)...	= 2'641 pints.
1 Pfund (16½ Unze)	= 1'1023 lbs. av.

Tripoli.

1 Pike	= 26'416 inches.
1 Draâ	= 19'13 inches.
1 Orbah	= 1'476 gallons.
1 Hueba (4 Temen) ...	= 2'952 bushels.
1 Secchie (4 Bozze)	= 2'361 gallons.
1 Oka (40 Uckieh)	= 2'69 lbs. av.
1 Centner (100 Rottoli) ..	= 107'66 lbs. av.

Turkey.

1 Pike or Arshen	= 27¼ inches.
1 Pike or Arshen (land) ..	= 29¾ inches.
1 Halebi or Archim ...	= 27'9 inches.
1 Endazzezh (Silk)	= 25¼ inches.
1 Agatsch (3 Berri) ...	= 3'1159 miles.
1 Jubbeh (11 Rottol)...	= '4851 bushel.
1 Fortin (4 Killow)	= 3'8809 bushels.
1 Rottol (12 Okiejezh)...	= 2'513 pints.
1 Almud (8 Oka)	= 1'1519 gallons.
1 Cantar (100 Rottol)...	= 31'417 gallons.
1 Cantar (dry)	= 124'08 av.
1 Okiejezh (100 Dirhem) ..	= '70854 lb av.
1 Kéléor Oke (4 Okiejezh) ..	= 2'1975 lbs. av.
1 Batman (dry)	= 16'92 av.

United States.

The Metrical System, authorized 1866; also weight, length, and surface measures as in England, and old Winchester measure.

1 Pint (dry)	= '9694 pint.
1 Gallon (dry)	= '9694 gallon.
1 Bushel	= '9694 bushel.
1 Quarter	= '9694 quarter.

Uruguay.

Metrical System, introduced 1864; also as in Argentine Republic. Venezuela, the Metrical System, since 1857; and old Spanish.

One of the revivals of the past half century has been that of the taste for ancient gold and silver ware, but especially of silver. With the revival of this taste there has also grown up with it the very laudable desire to know something of the history of the manufacture and manufacturers of the plate itself. The literature of the subject is not large, but it is almost exhaustive, and for the materials of this Article readers of the Almanack are indebted to Mr. Wilfred Cripps, whose volume on "Old English Plate" contains nearly all that can be said upon the subject. Readers are also further indebted to that gentleman for the loan of some of the following illustrations, without which this paper would scarcely be intelligible.

It must be premised that *pure gold and pure silver* in a manufactured state do not exist; both are *alloyed* with a coarser metal, gold sometimes with silver, but mostly with copper; and silver invariably with the latter metal: silver thus alloyed becomes less brittle and is more easily shaped by the workman's hammer. But mixed, the metal is of less value than when pure, and as the uninformed public could have no means of testing its intrinsic value, the Government at a very early period took steps to insure uniformity in the quantity of base metal used as alloy. So far back as the year 1180 there appears to have been a test or check upon the manufacture, and in 1260 discreet men of the craft were appointed to watch over the ware produced for sale; but not till the year 1300 was there any actual legislation, the first ordinance being that

the Leopard's Head  should be marked upon

all *sterling* articles of gold and silver. The Company of Goldsmiths of London was incorporated by Edward III. in the year 1327, and the leopard's head has ever since been borne on the company's shield. In addition to London and the six others mentioned there have been Assay Offices at Bristol, Exeter, Newcastle-on-Tyne, Norwich and York, all of which are now closed. In Scotland, Edinburgh and Glasgow have this privilege: in Ireland, Dublin alone. One of the duties imposed upon the Goldsmiths Company is to test all articles of gold and silver, except certain small articles, and having tested them, to impress the HALL MARK thereon. Sterling silver is one invariable standard, viz., 11 oz. 2 dwts. of fine silver to 18 dwts. of alloy, which, when thus mixed, becomes *standard*, and a pound troy coined into sixty-six shillings gives the nominal value of 5s. 6d. to the troy ounce. There is, however, a higher standard, viz., 11 oz. 10 dwts. of fine silver to 10 dwts. of alloy, and this was the only legal standard for the manufacture of plate from March 1697, to June 1720; after that date the old standard was again adopted, but the higher standard (commonly known as "Britannia" standard, from the figure of Britannia on all such plate) still remained in use, and is used, though to a very limited extent, at the present day. The Britannia standard is denoted by a lion's head erased, as well as by the figure of Britannia, the latter in place of the leopard's head and lion passant seen on silver of the sterling standard. In *sterling* gold there are twenty-two carats fine to two of alloy, the value of which is £3 17s. 10½d. In order to encourage the home jewellery trade, other degrees of fineness are permitted, but these degrees are marked on articles sent to the "Hall" for the purpose. The value of the various standards per ounce troy are—

	£	s.	d.
Pure gold, 24 carats.....	4	4	11½
Standard, 22 carats.....	3	17	10½
2nd ditto, 18 carats.....	3	3	8½
3rd ditto, 15 carats.....	2	13	1
4th ditto, 12 carats.....	2	2	5½
5th ditto, 9 carats.....	1	11	10½

An ordinary piece of English silver plate has the following marks:

1. That of the maker, which must be the first letters of his Christian and Surname.

2. That of the Company, the Leopard's Head (this in London only).

3. That which is supposed to be the Sovereign's mark, the lion passant.

4. A letter denoting the year in which the plate is made, e.g. A

[And, in the case of those articles which were chargeable with duty, the Sovereign's Head; this is now no longer impressed, the duty having been abolished in June 1850.]

The maker's mark is placed upon the article by the manufacturer himself. The Sovereign's Head does not appear upon plate manufactured prior to the year 1784. And for the first year or so after its introduction it appeared in intaglio with the profile turned to the left; subsequently it appeared in relief like the other assay marks with the head turned to the right, although Queen Victoria's head is turned to the left again. The leopard's head is without crown from 1823.

In respect to gold plate we have precisely the same marks, with the exception of a crown in place of the lion passant and the degree of fineness as above stated; although previous to 1798 there was absolutely no distinguishing mark between gold of 18 carats and silver-plate, nor until 1844 for 22 carat gold. To prevent the importation of foreign plate of a lower standard than that required of English plate, all such plate of recent manufacture must be assayed and marked in the same way as that of home production, but with the addition of the letter F to denote its foreign origin.

Though there is now no duty upon gold and silver plate, the Hall marking is compulsory; no one can complain of this, as the charge for assaying and marking at Goldsmiths' Hall is little more than nominal, that for a dozen tea-spoons being but 3d., and for a dozen table spoons or forks and other wares weighing 5 oz. each and upwards one halfpenny per oz.

By the following table of date-marks the age of any piece of plate manufactured in London and assayed at Goldsmiths' Hall may be ascertained:

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 ,, 1477-8
	Lombardic, double cusps	1478-9 ,, 1497-8
	Black letter, small.....	1498-9 ,, 1517-8

	Lombardic	1518-9 to 1537-8
	Roman and other capitals	1538-9 ,, 1557-8
	Black letter, small	1558-9 ,, 1577-8
	Roman letter, capitals	1578-9 to 1597-8
	Lombardic, external cusps	1598-9 ,, 1617-8
	Italic letter, small	1618-9 ,, 1637-8
	Court hand	1638-9 ,, 1657-8
	Black letter, capitals...	1658-9 ,, 1677-8
	Black letter, small	1678-9 ,, 1696-7
	Court hand	1697 ,, 1715-6 From March 1697 on'y, see col. 1 of p. 674.
	Roman letter, capitals.	1716-7 ,, 1735-6
	Roman letter, small ...	1736-7 ,, 1755-6
	Old English, capitals...	1756-7 ,, 1775-6
	Roman letter, small ...	1776-7 ,, 1795-6
	Roman letter, capitals	1796-7 ,, 1815-6
	Roman letter, small ...	1816-7 ,, 1835-6
	Old English, capitals...	1836-7 ,, 1855-6

	Old English, small.....	1856-7 to 1875-6
	Roman letter, capitals	1876-7 ,, 1895-6
	Roman letter, small ...	1896-7 ,, 1915-6

Each Assay Office has its distinguishing mark in lieu of the Leopard's Head of Goldsmiths' Hall, and its own cycle and chronological alphabet. The type and the shape of shield on which the letters are impressed change with each cycle. The collector with even limited experience will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, e.g.:

An article marked with the letter **F** 1721-2 can be distinguished from letter **F** 1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head; and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from **F** 1831-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of **F** 1801-2); the absence of crown on leopard's head, and the presence of the Queen's vice the King's head.

The London Goldsmiths' letter for the year ending 29th May, 1898, is **b**, on a shield shaped like that of the last specimen shown above: that for 1899 is the letter **C**.

ASSAY OFFICES OUT OF LONDON.

* The date letters are changed in the middle of each year.

THE ACADEMICAL HOOD, which has become a quasi-ecclesiastical vestment, originated in the *almuce*, or *amys*, which was worn in the choir offices (simply for warmth) by the canons, &c., of collegiate churches, and, under the name of the *mozetta*, is still used by canons and other ecclesiastics of the Roman Communion. It consisted of two parts: (1) the tippet, or cape, worn round the shoulders, reaching nearly to the elbow, and buttoned upon the breast; (2) the cowl, or hood proper, which was attached to the tippet. Both were made of cloth or silk, according to the season, and were lined with fur or silk of varying colours. These variations in material and colour became later a convenient mode for indicating the academical degree of the wearer. As now worn, hoods (though cut with several minor variations, mostly the invention of modern tailors) are in the main of two principal shapes, according as they combine the tippet and hood, or consist of an exaggerated form of the cowl only. The distinction is at once evident when we compare the hood worn for the lower degrees of M.A., B.A., &c., at Oxford, Durham, Edinburgh, or Glasgow, with that adopted for the corresponding degrees at Cambridge, Aberdeen, or St. Andrews. The former, which we may call the Oxford-shaped hood, consists only of an enlarged cowl, while the Cambridge-shaped hood includes also the remains of the tippet. This latter is, however, retained by nearly all Universities for their higher degrees. The band, by which the hoods are lengthened out so as to fall far below the shoulders and the upper portion of the backs of the wearers, which they were originally intended to protect, is a modern development, as preposterous as void of authority, and should be discontinued.

It would be useless even to attempt a description of the many varieties which have lately come into use, representing the several Theological Colleges, together with some Colonial and Foreign Universities of recognized prestige, varying in shape from something in the direction of the full vestment of Cambridge, combining the Hood falling over the broader expanse of tippet, to the more simple cut of the lower Degrees at Oxford, marked by the well-known semicircle in the lower part, with linings and edgings of every colour and shade, from silver grey to light blue, and from maroon to gold. It may be mentioned that there are some enterprising individuals who have started a manufactory of designations, the initials of which look very smart, and with these distinctions "permission" to wear a Hood, independently of any University, College, or educational body, differing by a delicate shade of colour, and with a slight edging, from a well-known Hood of one of the great Universities.

There are some Hoods which may readily be recognized and easily described, and the two principal shapes of which have already been sufficiently described for all practical purposes. The simpler shape belongs generally to the Degrees of B.A. (*Bachelor of Arts*), M.A. (*Master of Arts*), and B.C.L. (*Bachelor of Civil Law*), at Oxford; and the full shape to the superior Degrees of Oxford and all the Degrees of Cambridge, there being a difference, as explained above.

The following is a list of the principal Degrees with a description, in nearly every case, of the corresponding Hoods:—

B.A. or A.B. *Bachelor of Arts*. This Degree is granted by all Universities excepting those of Scotland. In most Universities the Hood is

black, edged with white fur; *Cambridge*, double fur edging and full shape; *Dublin*, band round the neck edged with white silk, like the *Camb. M.A.*; *Lampeter*, black dots in the fur; *London*, brown silk or stuff, edged on the inside with russet-brown silk—after three years, or if an A.K.C., a further distinctive edging; *Victoria*, black, with an edging of pale blue silk.

B.C.L. *Bachelor of Civil Law*. Granted by Oxford and Durham. *Oxford*, blue silk, edged white fur; *Durham*, purple silk, edged white fur.

B.D. *Bachelor of Divinity*. Granted by all Universities but London, the Queen's Univ., Ireland, and Victoria. Hood: *Oxford, Cambridge, Dublin, and Durham*, plain black silk; *Lampeter*, black silk, lined violet silk, edged with white silk; *St. Andrews*, violet silk, with white fur border; *Glasgow*, black silk, bordered scarlet cloth, lined with white silk; *Aberdeen*, black silk, purple silk lining; *Edinburgh*, black silk, lined with purple silk, with white fur border.

B.Sc. Granted by most Universities. *Aberdeen*, black silk, lined green silk; *Edinburgh*, black silk, lined green silk, edged white fur; *Glasgow*, black silk, bordered scarlet cloth, and lined gold silk; *London*, black silk (lined white silk by member; of Convocation), edged yellow silk; *St. Andrews*, amaranth silk, lined white satin, edged white fur.

D.C.L. *Doctor of Civil Law*. Given by Oxford and Durham. Hood: *Oxford*, scarlet cloth, with crimson silk lining; *Durham*, scarlet cassimere, full shape, white silk lining.

D.D. or S.T.P. *Doctor of Divinity*. Granted by all Universities but London, Royal Univ., Ireland, and Victoria. Hood: *Oxford*, scarlet cloth, black silk lining; *Durham*, scarlet cloth, lined black silk; *Cambridge*, ditto, with lining of silk, shot with pink and violet; *Dublin*, scarlet cloth, black silk lining; *St. Andrews*, violet ditto, white satin lining; *Glasgow*, scarlet cloth, lined white silk; *Aberdeen*, scarlet cloth, purple silk lining; *Edinb.*, black cloth, purple silk lining.

D.Sc. *Doctor of Science*. Granted by most Universities. *Aberdeen*, scarlet cloth, lined green silk; *Edinburgh*, black cloth, lined green silk.

LL.B. or B.L. *Bachelor of Laws*. Granted by all Universities but Oxford and St. Andrews. Hood: *Aberdeen*, black silk, lined blue silk, edged white fur; *Cambridge*, same as for B.A.; *Durham*, full shape, double white fur edging, lined Palatinate purple; *Dublin and Royal Univ.*, black silk, lined with white; *Glasgow*, black silk, bordered scarlet cloth, Venetian red silk lining; *Edinburgh*, gives both degrees LL.B. and L.B.; the former is black silk, blue silk lining, with border of white fur; the L.B. hood is black silk, edged blue silk; *London*, black silk, lined with white silk, with blue silk edging; *Victoria*, black, with broad edging of violet-coloured silk.

LL.D. *Doctor of Laws*. Granted by all Universities but Oxford and Durham. Hood: *Cambridge*, scarlet cloth, lined pink silk; *Dublin and Royal Univ.*, scarlet cloth, lined with pink silk; *London*, ditto, with blue silk lining; *St. Andrews*, scarlet cloth, white satin lining; *Glasgow*, scarlet cloth, Venetian red silk lining; *Aberdeen*, scarlet cloth, Cambridge blue silk lining; *Edinburgh*, black cloth, blue silk lining; *Victoria*, same as M.D.

M.A. or A.M. *Master of Arts*. Granted by the

Universities. *Oxford and St. Andrews*, black silk lined with red silk; *Cambridge, Aberdeen, and Edinburgh*, black silk lined with white silk; *Dublin and Royal Univ.*, black silk lined with blue; *Durham*, ditto, lined with Palatinate purple silk; *London*, ditto, lined with russet-brown silk; *Glasgow*, ditto, lined with bell-heather red silk; *Victoria*, black, with lining of pale blue silk.

M.B. Bachelor of Medicine. Granted by all Universities. Hood: *Oxford*, dark blue silk, white fur trimming; *Cambridge*, black silk, lined with pink silk of a dark cherry colour; *Dublin*, black silk, lined white fur; *Royal Univ. of Ireland*, black silk, faced scarlet silk; *Edinburgh*, black silk, lined crimson silk, border of white fur; *Aberdeen*, black silk, with white fur trimming; *Durham*, scarlet silk, lined with purple, and edged with white fur; *London*, black silk, with violet silk edging; *St. Andrews*, crimson silk, white fur border; *Glasgow*, black cloth, bordered scarlet cloth, lined with scarlet silk; *Victoria*, black, broad edging of red silk.

M.D. Doctor of Medicine. Granted by all Universities. Hood: *Oxford*, the same as D.C.L.; *Dublin and Royal Univ.*, scarlet cloth, crimson silk lining; *Cambridge*, ditto, with dark cherry colour silk lining; *Durham*, scarlet cassimere, lined with scarlet silk, and faced with Palatinate purple silk; *St. Andrews*, crimson cloth, white satin lining; *Glasgow*, scarlet cloth, lined with scarlet silk; *Aberdeen*, scarlet cloth, crimson silk lining; *Edinburgh*, black cloth, with appended cape faced and lined with crimson silk; *London*, scarlet cloth, violet silk lining; *Victoria*, velvet or satin serge, gold colour, lined with silk of a lighter shade of same colour.

Mus.B. Bachelor of Music. Granted by most Universities. Hood: *Oxford*, light blue silk, white fur trimming; *Cambridge*, satin of a dark cherry colour, lined as the B.A. Hood; *Dublin and Royal University*, blue silk, white fur border; *Durham*, white silk, purple silk lining, bound with white fur; *London*, blue silk, white watered silk lining; *Edinburgh*, scarlet silk, lined white,

edged white fur; *St. Andrews*, blue silk, lined white, edged white fur.

Mus.Doc. Doctor of Music. Granted by nearly all Universities. Hood: *Oxford*, white silk, lined crimson; *Cambridge*, cream-coloured silk, lined with cherry-coloured silk; *Dublin*, crimson cloth, lined white; *Durham*, broaded white satin, lined Palatinate purple silk; *London*, same as Mus.Bac.; *Royal Univ.*, white brocaded silk, faced rose-coloured silk; *St. Andrews*, cerulean blue silk, lined with white satin; *Edinburgh*, scarlet, lined white silk.

The Hoods which represent Theological Colleges are a development of the "decent tippet of black, so it be not silk," of the 53th Canon. In accordance with this direction, it has been resolved by the Upper House of Convocation, that all the Theological Colleges of the Church of England have a uniform Hood for their non-graduate members to be in substance the same for all, and to be, according to the Canon, "black, but not of silk;" each College, however, being at liberty to add to the Hood a coloured edging, border, or binding, by which its own students might be distinguished. This resolution, which has further been accepted at a conference of Theological College principals and tutors, held at Oxford, may therefore now be taken to be the law on this subject.

There are still some Degrees conferred by the Archbishop of Canterbury (one of the few remains of the Primate's former office of Legate of the Pope), who, ever since the Reformation, has conferred Degrees in exercise of this ancient right, on persons of merit, learning, and position, who, from various causes, have not received them from Universities; thereby affording a fitting recognition of the attainments of some of the most learned and accomplished men in the kingdom. By custom, those on whom these *Lambeth Degrees* are conferred wear the robes of the corresponding Degree of the University of the Archbishop of Canterbury for the time being.

The Rules of the Road.

ON LAND.

The Rule of the Road is a paradox quite;

For in driving your carriage along,
If you bear to the left you are sure to go right,
If you turn to the right you go wrong.

But in walking the streets 'tis a different case;
To the right it is right you should steer;
On the left should be left enough of clear space
For the people who wish to walk there.

ANOTHER READING.

The rule of the path,

To get well along
Is "keep to the right,"
And you cannot go
wrong.

The rule of the road

Is a paradox quite,
If you keep to the left
You are sure to be
right.

AT SEA—STEAMSHIPS.

1. Two steamships meeting.

When both side-lights you see a-head,
Port your helm, and show your RED.

2. Two steamships passing.

GREEN to GREEN, or RED to RED,
Perfect safety—Go a-head!

3. Two steamships crossing.

If to your starboard RED appear,
It is your duty to keep clear;
To act as judgment says is proper;—
To Port—or Starboard—Back, or Stop her.

But when upon your port is seen
A Steamer's starboard light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.

Both in safety and in doubt,
Always keep a good look-out;
In danger, with no room to turn,
Ease her—stop her—go astern.

FOR SAILING VESSELS.

On Starboard Tack.

On starboard tack with yards braced tight,
See that your RED and GREEN are bright,
For every ship that's in your way
Must clear your track both night and day.

On Port Tack.

But if on the port tack you steer,
Stand by! for you must then keep clear
Of every close hauled ship ahead,
No matter whether GREEN or RED.

The following is a list of the Free Public Libraries in London with the hours when open and the names of the Librarians; those marked with an asterisk (*) have been, or are about to be, opened in accordance with the Public Libraries Act, and in their case the date in brackets denotes the year in which the Acts were adopted.

- * BARKING.—(1888), Local Board Buildings, 10 A.M. to 10.30 P.M. Librarian, George Jackson.
- * BARNET.—(1889), Hyde Institute.
- * BATTERSEA.—(1887), Central Library, Lavender Hill. Branches, Lurline Gdns., Victoria Rd., and Lamma Hall, Bridge Rd. West. 8 A.M. to 10 P.M.; Sundays, 3 to 9 P.M. Librarian, L. Inkster.
- * BERMONDSEY.—(1887), Spa Rd. 9 A.M. to 9.30 P.M.; Sundays (Winter months), 3 to 9 P.M. Librarian, Henry Frowde.
- BETHNAL GREEN.—London Street, E. 10 A.M. to 5 P.M.; 6 to 10 P.M. Librarian, G. F. Hilcken.
- BISHOPSGATE INSTITUTE.—62 Bishopsgate Street, Without. Librarian, C. W. F. Goss.
- * BOW.—(1896).
- * BRENTFORD.—(1889), 9 A.M. to 10 P.M. Librarian, Fred. A. Turner.
- BRITISH MUSEUM.—Great Russell Street, Bloomsbury. Reading Room, 9 A.M. to 8 P.M. (Closes at 7 from May to August.) Chief Librarian, Sir E. Maunde Thompson.
- BROMLEY-BY-BOW.—(1891), Central Library, Bow Rd. Branch, 126 Brunswick Rd. Lib., W. Pool.
- * BROMLEY, KENT.—(1892), Lib., J. Harrison.
- * CAMBERWELL.—(1889), Central Library, Peckham Road. Branches, 682 Old Kent Road; 130 and 132 Lordship Lane; Minet (jointly with Lambeth), Knatchbull Road, Camberwell. 9 A.M. to 10 P.M. Librarian, E. Foskett.
- * CHELSEA.—(1887), Central Library, Manresa Road. Branch, Harrow Rd., Kensal Town. 9 A.M. to 10 P.M.; Sundays, 3 to 9. Lib., J. H. Quinn.
- * CHISWICK.—(1890), 9 A.M. to 10 P.M.; Sundays 3 to 9. Librarian, H. J. Hewitt.
- * CHRIST CHURCH, SOUTHWARK.—(1889), Charles Street, Blackfriars Road, S.E. 9 A.M. to 10 P.M. Librarian, E. Austin.
- * CLAPHAM.—(1887), 1 North Side, Clapham Common. 10 A.M. to 8 P.M. Lib., J. R. Welch.
- * CLERKENWELL.—(1887), Skinner St., E.C. 8 A.M. to 10 P.M.; Sundays, 3 to 9 P.M. Lib., J. D. Brown.
- CRIPPLEGATE INSTITUTE.—Golden Lane, E.C. 8.30 A.M. to 9 P.M. Librarian, H. W. Capper.
- * CROYDON.—(1888), Central Library, Town Hall. Branches, South Norwood, Thornton Heath and Shirley. 10 A.M. to 10 P.M. Lib., T. Johnston.
- * EALING.—(1883), 9 A.M. to 10 P.M. Lib., T. Bonner.
- EAST HAM, NORTH WOOLWICH.—Librarian, Wallace Phipps.
- * EDMONTON.—(1891), Lib., P. W. Farnborough.
- * FULHAM.—(1886), Central Library, 592 Fulham Road, S.W. Branch, Wandsworth Bridge Road. 9 A.M. to 10 P.M.; Sundays, 3 to 9. Lib., F. T. Barrett.
- GUILDHALL.—10 A.M. to 9 P.M. Lib., Charles Welch.
- * HAMMERSMITH.—(1887), Central Library, Ravenscourt Park. Branch, Uxbridge Road. 9 A.M. to 10 P.M. Librarian, Samuel Martin.
- * HAMPSHIRE.—(1893), Temporary Library, Priory Road. Reading Room, Prince Arthur Road. Librarian, W. E. Doubleday.
- * HOLBORN.—(1891), 10 John Street, Bedford Row, W.C. 9 A.M. to 10 P.M. Lib., Harry Hawkes.
- * KENSINGTON.—(1887), Central Library, High Street, Kensington. Branches, 108 Ladbroke Grove, and 53 Clareville Grove, Gloucester Road, S.W. 9 A.M. to 10 P.M. Lib., H. Jones.
- * KINGSTON-ON-THAMES.—(1881), Lib., B. Carter.
- * LAMBETH.—(1886), Central Library, Brixton Oval. Branches, South Lambeth Road; Knight's

- Hill Road, West Norwood; Kennington Cross; 74 Lower Marsh; Minet (jointly with Camberwell). 9 A.M. to 10 P.M. Lib., F. J. Burgoyne.
- * LEWISHAM.—(1890), Central Library, Perry Hill. Branches, Lewisham and Sydenham. 10.30 A.M. to 9 P.M.
- * LEYTON.—(1891), 10.30 to 9.30. Lib., Z. Moon.
- MARYLEBONE.—Lisson Grove, N.W. 9.30 A.M. to 9.30 P.M. Librarian, D. G. Thompson.
- * MILE END.—(1896).
- * NEWINGTON.—(1890), 155 and 157 Walworth Road, S.E. 9 A.M. to 10 P.M., also on Sunday evenings. Librarian, R. W. Mould.
- PADDINGTON.—7 Bishop's Road, W. 4 to 7 P.M. Librarian, Miss F. E. Salusbury.
- * PENGE.—(1891), 10 A.M. to 10 P.M.; Sundays 3 to 6 P.M. Librarian, William Bridle.
- PEOPLE'S PALACE.—Mile End Road. 8 to 5, and 6 to 10; Sundays, 3 to 10.
- * POPLAR.—(1890), Central Library, 126 High St., Poplar, E. Branch, Wharf Road, Cubitt Town, E. 9 A.M. to 10 P.M. Lib., H. Rowlatt.
- * PUTNEY.—(1887), 9 A.M. to 10 P.M. Lib., C. F. Tweney.
- * RICHMOND.—(1879), 9 A.M. to 10 P.M. Librarian, Albert A. Barkas.
- * ROTHERHITHE.—(1887), Lower Road, S.E. 9 A.M. to 10 P.M. Librarian, H. A. Shuttleworth.
- ST. BRIDE'S FOUNDATION INSTITUTE.—Bride Lane, E.C. 12 to 3, and 5 to 9; Saturday, 12 to 5. Librarian, F. W. T. Lange.
- * ST. GEORGE, HANOVER SQUARE.—(1890), Central Lib., Buckingham Palace Road. Branch, South Audley Street. 9 A.M. to 10 P.M. Lib., F. Pacy.
- * ST. GEORGE THE MARTYR, SOUTHWARK.—(1896).
- * ST. GEORGE'S-IN-THE-EAST.—(1896).
- * ST. GILES (and St. George, Bloomsbury).—(1891), 198 High Holborn. 9 A.M. to 10 P.M. Librarian, W. A. Taylor.
- ST. MARTIN IN THE FIELDS (1887), and St. Paul, Covent Garden.—(1893), 115 St. Martin's Lane, W.C. 9 A.M. to 10 P.M. Lib., T. Mason.
- ST. PANCRAS.—29 Camden Street, Oakley Square. 5 to 10 P.M. Librarian, Mrs. A. M. Field.
- * ST. SAVIOUR'S, SOUTHWARK.—(1891), Southwark Bridge Road, S.E. 10 A.M. to 10 P.M.; Sundays, 2 to 10 P.M. Librarian, H. D. Roberts.
- * SHOREDITCH.—(1891), Central Library, 236 Kingsland Road, N.E. Branch, 91 Great Eastern St., Hoxton. 9.30 A.M. to 10 P.M. Lib., W. C. Plant.
- * SOUTHWARK.—See Christ Church, St. Saviour's, and St. George the Martyr.
- * STOKE NEWINGTON.—(1890), Church Street. 9.30 A.M. to 10 P.M. Librarian, George Preece.

SHOWING THE DATES OF EXISTING DIGNITIES, AND THE ORDER IN WHICH THEY WERE CONFERRED.

* Irish Peerages.

† Scottish Peerages.

‡ Merged in other titles.

The Peerage of the United Kingdom consists of—1. Those Peers of England whose titles date from before the Legislative Union with Scotland (1st May, 1707), and who therefore take precedence of all others; all these are Peers of Parliament. 2. Peers of Scotland created previous to the Union: of these, sixteen are elected to sit in the House of Lords. 3. Peers of Great Britain created previous to the Legislative Union with Ireland (1st January, 1801): these all sit in the House of Lords. 4. Peers of Ireland created previous to the Union: of these, twenty-eight are elected to sit in the House of Lords. 5. Peers of the United Kingdom created since the Legislative Union between Great Britain and Ireland. 6. Peers of Ireland of recent creation. By the Articles of Union the Sovereign was empowered to create one Irish Peer whenever three of the old Peerages become extinct. The last creation was that of the late Duke of *Abercorn* (1868), who sat in the House of Lords by virtue of his British Marquessate. 7. Life Peers. Of these there are five, Lords Watson, Macnaghten, Morris, Russell of Killowen, and Davey: they sit in Parliament, but the titles are not hereditary.

The Representative Scottish Peers are elected for every fresh Parliament, but those for Ireland are elected for life. Many of the others for both countries having had English or later titles granted to them, sit in the House of Lords by virtue of such titles: thus the senior Scottish Marquess, *Huntly* (1599), sits as Baron *Meldrum* (1815), and the senior Irish Duke, *Leinster* (1766), sits as Viscount *Leinster* (1747).

All Irish Peers not Peers of Parliament are eligible for seats in the House of Commons, and may represent any Borough, County, or University in England or Scotland, but not in Ireland: e.g., Viscount *Valentia* n.r. for the city of Oxford. Peers of Scotland cannot be elected as Members of Parliament in any of the three countries. Whitaker's TITLED PERSONS forms practically an *index* to this list.

WITH A GLANCE AT THE SHIPS OF THE PAST.

*. In most cases where lists of fleets are quoted in this article, the larger vessels only are mentioned, space being too limited to include the entire fleets.

Of all the marvellous results of man's inventive genius, none is perhaps more worthy of our wonder and admiration than that of the application of steam to navigation, more especially when we consider how humbly it originated, and with what rapid strides it has reached its present immensity. Although many engineers of the end of the last and the beginning of the present century had more or less claim to be inventors of the steamboat, there is a supposed instance of a ship being propelled by steam as early as 1543, when Blasco de Garay, a Spanish captain, exhibited in Barcelona harbour a vessel of 200 tons burthen which he had invented. The steam power, which worked a moveable wheel on either side of the ship, was supplied from a cauldron of boiling water placed under each.* To trace the history of steam navigation in all its details would occupy more space than it is possible to devote to the subject, and it would moreover exceed the limits of the present article, which is intended to deal specially with the development and progress of the mail and passenger services which are carried out by English companies. It will be sufficient for our purpose, therefore, if the year 1807 is taken as a starting-point—the year in which Fulton and Livingston built the *Clermont* at New York. This vessel was the first to make a completely successful voyage by steam from that city to Albany, and justly claims to be the first passenger steamer ever built. In 1812 the first European passenger steamer, the *Comet*, was built by Henry Bell and launched upon the Clyde. She was engined by John Robertson, who lived long enough to set up those very engines in the South Kensington Museum when they were deposited in that institution. Six years later Mr. Scarborough, of Savannah, determined to attempt the navigation of the Atlantic by steam. He accordingly purchased a vessel at New York while yet on the stocks, fitted her with engines, and named her the *Savannah*. On 19th May, 1819, she left Savannah for Liverpool, which port was safely reached on the 20th June. It cannot be said, however, that this was the first vessel to steam across the Atlantic, for, owing to rapid consumption of the fuel (pitch pine), she only used steam 18 days, sailing the rest. To Canada belongs the honour of having first made that journey entirely by steam. The *Royal William* was launched at Wolfe's Cove, Quebec, in 1831, and on the 17th August, 1833, sailed from Picton, N.S., arriving in England on the 11th September. She was sold on her arrival and chartered by the Portuguese Government for a transport, and subsequently purchased by the Spanish Government, fitted out as a man-of-war called the *Isabella Segunda*, and went into action against the Carlists at San Sebastian. She is stated to have been the first steam warship in the world. The *Sirius* was the next ship to make the passage by steam alone. She was built in London, and, on the 5th April, 1838, left Cork for New York, arriving there with seven passengers on the 23rd of the same month. Scarcely had she dropped anchor, how-

ever, when another vessel was sighted. This was the *Great Western*, which had left Bristol on the 8th April, and entered New York only a few hours after the *Sirius*, having completed the journey in the marvellous time of 14½ days. It may be of interest to mention that the *Great Western* made in all, between 1838 and 1843, 64 voyages across the Atlantic. Her fastest westward passage was made in 12 days 18 hours, and her fastest eastward passage in 12 days 7½ hours. In 1847 she was sold to the Royal Mail Steam Packet Company, and remained in their service for many years. She was finally broken up at Vauxhall in 1857, after a long and successful career.

Now that it had been proved beyond doubt that steam navigation could be carried on with success, companies were formed for the purpose of extending the use of steamboats and establishing regular services between country and country. In sketching the histories of the great lines of steamships, we will first turn our attention to those whose vessels ply between England and the United States, seeing that they are not only the largest but also the most numerous. The pioneer companies on this route were all established in 1838; they were, (1) The British and American Steam Navigation Company, (2) The Great Western Steam Navigation Company, (3) The Transatlantic Steamship Company. To the first of these belonged the *Sirius*, whose performance is already noted, and in 1839 the company launched on the Thames a vessel of much larger proportions. This ship, the *British Queen*, carried a crew of 100 men, 600 tons of coal, and £1,500,000 worth of cargo. She left Portsmouth for New York on July 12th, 1839, and made the passage in 14 days 8 hours. Before the year was out she had crossed five times more, and in the following year made five round voyages, i.e. out and home; from a financial point of view, however, she was a failure, and in 1841 was purchased by the Belgian Government. Her sister ship, the *President*, made only three passages, and after leaving New York for Liverpool on March 10th, 1841, she was never heard of again. This loss proved too heavy for the company to bear, and consequently the Transatlantic traffic was left in the charge of the two remaining lines. The Great Western Company owned the *Great Western* already mentioned, and built for their service the *Great Britain*, an iron steamer, which unlike those hitherto in use, worked by paddles, was propelled by means of an Archimedean screw. She made two passages only. She left Liverpool 26th August, 1845, and arrived off Sandy Hook 10th September, having made the passage in 14 days 21 hours. Her homeward passage was accomplished in 13 days 12 hours. She stranded in Dundrum Bay, September 22nd, 1846, just as she had started on her third voyage. This disaster closed the career of the second company. The history of this famous steamer is indeed a remarkable one. After remaining stranded from September, 1846, until the following August, she was floated, and on examination it was found that her hull had not sustained any material damage. She was purchased by a Liverpool firm, fitted with new machinery, and was employed in the Australian trade for many years. Afterwards she was converted into

* This was stated to be a figment by the late John Macgregor (Rob Roy). It was worked by paddles turned by hand.

a sailing ship, and was broken up at the Falkland Islands in 1890. The Transatlantic Company had in their service the *Royal William*, which they chartered from the City of Dublin Steam Packet Company. Liverpool was selected for the departure and arrival of the steamers of the Transatlantic line, the other companies having started their boats from Bristol and Portsmouth, and it is worthy of note that the *Royal William* was not only the first steamship to cross the Atlantic from Liverpool, but also the first that was built on the watertight-section principle. She left Liverpool on July 5th, 1828, and completed the voyage in 19 days. The next steamer of this company was the *Liverpool*, a much larger vessel, which started on her first voyage October 20th, 1838. On the 26th, however, she put back to Cork, and did not proceed on her journey until the 6th November, reaching New York on the 23rd. She made 6 round voyages, averaging 17 days westward and 15 on the eastward journeys, and was then purchased by the Peninsular and Oriental Company, who changed her name to the *Great Liverpool* in distinction from one they already possessed of that name. In 1845 she became a total wreck off Cape Finisterre.

The failure of these companies by no means decided that Atlantic steam navigation was itself a failure, for in 1840 was established the British and North American Steam Packet Company. As proof of its success it is only

necessary to mention that its principal promoter was the late Samuel Cunard, who, with George Burns of Glasgow and Charles MacIver of Liverpool, obtained from the British Government an annual subsidy of £60,000 for a monthly—and afterwards fortnightly—service of mail ships between Liverpool, Halifax and Boston.

The *Great Eastern*, the largest ship ever built, was 680 feet long, 83 feet beam, 28 feet draught (loaded), 23,000 tonnage, paddle engines 1,000 horse-power nominal, screw engines 1,700 horse power nominal. Designed by I. K. Brunel, she was commenced building at Millwall in the spring of 1854, and was launched, after many difficulties, on January 30, 1858.

The history of the *Great Eastern* was from the first financially an unfortunate one. She made several voyages to America at a great loss to her owners, but in 1865-66 somewhat redeemed her character by successfully laying the Atlantic Cable.

Subsequently, owing to her vast size, she was instrumental in laying most of the important telegraph cables across the Atlantic, in the Mediterranean, Red Sea, &c. In 1888 she was sold at auction in Liverpool to be broken up, fetching £58,000.

Before closing the historical portion of "Our Ocean Mail," it may be added that in 1825 the steamship *Enterprise* reached Calcutta from London in 113 days: she was 122 feet length of keel, and 27 feet beam.

TABULAR STATEMENT OF MEASUREMENTS OF SOME OF THE EARLIEST STEAMSHIPS.

	NAME OF SHIP.	Length.	Breadth.	Depth.	Tonnage.	Horse-power.
	Clermont	136 ft.	18 ft.	7 ft.	160	18
	Comet	45 ft.	11 ft.	5 ft.	23	4
	Savannah	380
	Royal William (Canada)...	146 ft.	44 ft.	17 ft. 9 in.	363	200
	Sirius	178 ft.	25½ ft.	18½ ft.	703	320
Brit. and Amer. Steam Navigation Co.	British Queen	275 ft.	37½ ft.	27 ft.	1,863	700
	President					
Great Western Company.	Great Western	236 ft.	35½ ft.	23 ft.	1,340	750
	Great Britain	322 ft.	40 ft.	31 ft.	3,270	1,500
Transatlantic Company.	Royal William	145 ft.	27 ft.	17½ ft.	817	540
	Liverpool	235 ft.	21 ft.	1,150	464
	William Fawcett	74 ft.	16 ft.	206	60

THE AFRICAN STEAMSHIP COMPANY may be said to be the earliest African line, having originated in 1832 in a private expedition, started by Mr. Macgregor Laird from Liverpool, for the purpose of exploring the Niger River. The successful issue of this expedition encouraged others for the purpose of opening up that part of Africa, and of putting down the slave trade. In 1852 the company received its charter, and agreed to perform a monthly mail and passenger service to West Africa, in consideration of which they received an annual subsidy of £30,000. The pioneer boats, which were built on the Mersey, by Mr. John Laird, and which rendered valuable service in the Crimean war, were the *Fore-runner*, *Faith*, *Hope*, and *Charity*. An unbroken service has been maintained by this company ever since its incorporation, and year by year numerous fine vessels have been added to the fleet. The Company has recently (1891) associated itself with the British and African Steam Navigation Company (see p. 704) under the conjoint management of Messrs. Elder, Dempster & Company, of Liverpool. The following are the largest ships:—

SHIP.	Gross Horse-Tons.	power	SHIP.	Gross Horse-Tons.	power
Akabo	4000	—	Cabenda	2777	258
Biafra	3500	—	Coomassie	2625	253
Merrimac	4177	390	Ethiopia	2523	234
Albertville	3500	308	Mayumba	2516	232
Leopoldville	3500	308	Palmas	2428	245
Illaro	3500	244	Monrovia	2402	221
Lycia	3282	288	Benin	2323	250
Etolia	3270	288	Niger	2006	221
Memnon	3176	278	Nubia	1958	251

Dahomey	2854	258	Eboe	2089	219
Angola	2870	257	Gaboon	1860	252

and seven smaller vessels.

In conjunction with the British and African Steam Navigation Company, they perform, in addition to three distinct services between Liverpool and West Africa, the following:— Liverpool to South-West Africa; Hamburg and Rotterdam to West Africa; Hamburg to South-West Africa; and Antwerp to South-West Africa; the last named being under contract with the Congo Free State.

TRANSIT: According to distance down Coast, 12 to 43 days.

FUNNEL: Cream. London Office, 21, Gt. St. Helen's, E.C.

PASSENGER RATES.—To West Coast, 1st cl., £18 10s. to £30; 2nd cl., £12 10s. to £22 10s.

THE ALLAN LINE was established in 1852. The vessels of this line are owned by Messrs. Allan Brothers, of Liverpool, although the fleet is really of Canadian origin, having been started so long ago as 1820. As a steam fleet, however, the Allan dates from 1852, when Sir Hugh Allan, of Montreal, tendered for service a line of steamers, which the Canadian Government determined should be established to meet the growing commercial requirements of the colony, and which they agreed to subsidize. In 1856 his engagement developed into a contract to carry the mails, and a weekly service between Quebec and Liverpool, a fortnightly one between Halifax and St. John's and Liverpool, and subsidiary services between Glasgow and Liverpool on this side and New York, Boston, Portland, Quebec, Philadelphia and other ports have since been regularly carried on. The *Parisian*, the "commodore" ship of the fleet, with a gross tonnage of 5,500 tons, and 6,200 horsepower, has performed the voyage from Moville, north of Ireland, to Rimouski, the mail station, 160 miles below Quebec, a distance of 2,300 knots, in 6 days, 20 hours, and homeward in 6 days, 15 hours, 2 minutes. Other fast passages made by steamers of this line are the following:—*Sardinian*, outward in 6 days, 23 hours, 30 minutes, and homeward in 7 days, 3 hours, and 20 minutes; *Sarmatian*, outward in 7 days, 3 hours, 40 minutes, and homeward in 7 days, 4 hours, 30 minutes; *Peruvian*, outwards in 7 days, 6 hours, and homeward in 7 days. The following are the principal steamers in the Allan fleet:—

SHIP.	Gross Tons.	SHIP.	Gross Tons.

FUNNEL: Red with white ring under black top. London Office, 103, Leadenhall St., E.C.

PASSENGER RATES.—To New York, 1st cl. from £10 10s., 2nd cl. £8 5s., steerage £5 5s.

THE ANCHOR LINE began their Transatlantic business in 1856 with a small ship called the *Tempest*, which had done service in their South American and Indian fleet of sailing ships. This was converted into a screw steamer, and was the first of their North American vessels. As soon as it was seen that their venture was succeeding, Messrs. Handyside & Henderson, the projectors of the line, turned their attention from their other

branches of trade to that between New York and Glasgow. Larger ships were rapidly built and continually added to the size of the Anchor fleet, and at the present time they own upwards of thirty steamers. Besides the American service, this company maintains a service from Glasgow and Liverpool to India, and another to the Mediterranean. Their principal vessels are:—

SHIP.	Gross Tons.	Horsepower.
Algeria	4,510	3,000
Anchoria	4,156	3,000
Arabia	3,598	1,920
Armenia	3,396	1,744

Scindia	4,534	2,500
Victoria	3,358	1,307

FUNNEL: Black. London Office, PASSENGER RATES.—New York, 1st cl. 9 to 21 guineas; 2nd cl. £6 10s.; steerage £5 5s.

THE BEAVER LINE of fast Mail Steamers trades between Liverpool and Canada, calling at Quebec and Montreal in the summer, and at St. John's, New Brunswick, and Halifax, Nova Scotia, in the winter months.

There is a regular weekly service leaving Liverpool every Saturday.

The fleet consists of the following full-powered vessels:—

SHIP.	Tons.
Gallia	5,300
Lake Ontario	5,300
Lake Superior	5,300
Lake Huron	5,000
Lake Winnipeg	4,000

FUNNEL: Black with two white bands. London Office, 16, St. Helen's Place, E.C.

PASSENGER RATES.—1st cl. 10 to 12 guineas; 2nd cl. £6 10s.; 3rd cl. £5 5s.

THE BIBBY LINE trades from Liverpool to Colombo and Rangoon, via Marseilles.

This line (which was first established in 1821) is now the recognised route for first-class passengers to Burmah, and controls a large share of the trade with Ceylon. They also, in conjunction with the daily steam service between Colombo and Tuticorin, offer the best facilities for those desirous of reaching Bangalore, Cochin, Calicut, Ootacamund, Trichinopoly, Madura, and Southern India generally.

These fast steamers, which are all of Harland & Wolff's most modern type, consist of:—

STEAMER.	Tons.	Horsepower.
Derbyshire ...	6635	5000
Staffordshire ...	6005	4500
Shropshire ...	5720	4000
Cheshire	5708	4000
Lancashire	4256	3500
Yorkshire	4261	3500

Besides affording special facilities for travellers to and from Egypt, Palestine, &c. (whether round the Bay or through France), they offer a pleasant opportunity for those going to or from the Riviera, or desiring a week at sea in a first-class passenger steamer.

This line is recognised by the Indian Government for officers returning at expiry of furlough.

Passengers from London joining the boats at Marseilles are enabled to reach Ceylon within 18 days, and Burmah within 23 days.

FUNNEL: Salmon with black top. *London Office*, 138, Leadenhall St., E.C.

PASSENGER RATES.—To Rangoon, 1st cl. £50; to Ceylon, £42 10s.

THE BRITISH AND AFRICAN STEAM NAVIGATION COMPANY, established in 1868, conveys passengers and mails from Liverpool to the West Coast of Africa. It has a fleet of 22 steamers, and, in conjunction with the African Steamship Company, performs seven distinct services to the West Coast of Africa. The company is under the management of Elder, Dempster & Co. Many of its captains, at the orders of the company, have explored and brought into prominence African rivers hitherto unknown to civilisation, and the names given to the various waterways, such, for instance, as the "Elder," "Dempster," "Jones," "Davey," "Sinclair," "Bond," &c., show at once the source of their discovery. The steamers, which are all modern passenger and cargo vessels, are named after the various African rivers and ports. The following is a list of the larger vessels of the fleet:—

SHIP.	Gross Tons.	Horse-power.	SHIP.	Gross Tons.	Horse-power.

BRITISH INDIA STEAM NAVIGATION COMPANY.—The first operations of this Company date from 1855, in which year the Honourable East India Company desired to establish a mail service between Calcutta and Burmah; and soon after a small company was formed under the title of the Calcutta and Burmah Steam Navigation Company. At the outbreak of the Mutiny in 1857, the Company rendered important service to Government by bringing up from Ceylon to Calcutta half of the 35th Regiment; since then the ships have been frequently utilized by the Government.

In 1862 the Company obtained the sanction of the Board of Trade to change its name from the Calcutta and Burmah Steam Navigation Company to the more appropriate and comprehensive title of the British India Steam Navigation Company. Since then its business has greatly increased, and boasts of having more steamers than any trading to the East, its magnificent

fleet consisting of 110 vessels with a total tonnage of 295,720. The largest ships of this line are—

TRANSIT, Ceylon, 28 days; Calcutta, 34 days; Burmah, 37 days.

FUNNEL: Black with two white bands. *London Office*, Austin Friars, E.C.

PASSENGER RATES.—Zanzibar, 1st cl. £52 10s., 2nd cl. £34; Colombo, 1st cl. £45 to £50, 2nd cl. £32; Madras and Calcutta, 1st cl. £47 10s. to £51 10s., 2nd cl. £32; Batavia and Queensland, 1st cl. £52 10s., 2nd cl. £37, 3rd cl. £16 16s.

CANADIAN-AUSTRALIAN LINE.—The natural outcome of the Canadian Pacific Railway has been the establishment of fast mail steamers between Vancouver, Australia, New Zealand, Hawaii, and the Fiji Islands. The fleet consists of—

SHIP.	Gross Tons.	Horse-power.
Aorangi	4268	5000
Miowera	3315	5700
Warrimoo	3326	5000

There is a four-weekly mail service. This route, as the Imperial highway to and from Australasia, is of considerable importance to the British Empire, commercially and strategically. The itinerary includes Vancouver; Victoria, B.C.; Honolulu, Suva, Wellington, N.Z.; and Sydney, N.S.W.

FUNNEL: Buff, with black top; hulls white. *London Office*, 130, Leadenhall St., E.C.

PASSENGER RATES.—Austral and New Zealand, 1st cl. £60 to £70; and cl. £35 to £40. Honolulu, 1st cl. £41; and cl. £25. Fiji, 1st cl. £50; and cl. £31.

THE CASTLE LINE was established in 1872, by Sir Donald Currie, since which time it has made itself a name not only for safety, but for speed and comfort.

The first vessel despatched to the Cape by Messrs. Donald Currie & Co. was the *Iceland*, which sailed from London and Dartmouth in January, 1872, and which was followed by the *Gotland* in February of the same year. Since 1876 the Castle Line steamships have carried the Royal Mails between England and South Africa.

It is interesting to note in the tonnage of the vessels of the Castle Line the increase in size as well as the increase in speed which has marked the company's progress. The *Gotland* and *Iceland* were vessels of about 1,400 tons gross register; the steamers now employed by the company in the Cape Mail service are of 3,600 to 7,500 tons gross register, and the voyage, which formerly occupied about 32 to 34 days, has been

accomplished by the Castle Company in 15 to 16 days.

A fleet of powerful steamers is at present engaged in keeping up regular communication between this country and South Africa, and additional steamers are employed on the South African Intercolonial and Mauritius service. The steamers are amply provided with watertight bulkheads, and other appliances for minimizing risk in case of accident, and are lighted throughout by electricity. The following are the largest ships of this line:—

SHIP.	Gross Tons.	Horse-power.	SHIP.	Gross Tons.	Horse-power.
Carisbrook Castle	7500	8500	Norham Castle	4392	5500
Braemur Castle	6300	4000	Hawarden Castle	4380	5500
Dunvegan Castle	5958	8000	Raglan Castle	4224	3000
Tantallon Castle	5636	8000	Dunolly Castle	4167	3000
Dunottar Castle	5645	7000	Doune Castle	4045	3000
Tintagel Castle	5531	4000	Lismore Castle	4045	3000
Avondale Castle	5531	4000	Pembroke Castle	4045	2500
Arundel Castle	4598	3400	Garth Castle	3660	2500
Roslin Castle	4487	5000	Harlech Castle	3204	2400

It is evidently the aim of Messrs. Donald Currie & Co. to possess a fleet of uniformly fine and fast steamers for their South African Mail service, and such a policy is without doubt calculated to meet the wishes of the public interested in South Africa, who look for regularity combined with speed more than merely an occasional fast passage. The *Tantallon Castle* has made the run from Southampton to the Cape in 15½ days, and from the Cape to Plymouth in 15 days.

The Castle Company have added to their fleet no less than seven new steamers during the past two years, with large capacity for cargo, and ample accommodation for passengers.

FUNNEL: Red with black top. *London Office*, 3, Fenchurch St., E.C.

PASSENGER RATES.—To Cape Town, 1st cl. 36 and 39 gs.; 2nd cl. 23 and 25 gs.; 3rd cl. 10 and 13 gs. Natal, 1st cl. 41 and 44 gs.; 2nd cl. 27 and 29 gs.; 3rd cl. 12 and 16 gs. Delagoa Bay, 1st cl. 43 and 46 gs.; 2nd cl. 29 and 31 gs.; 3rd cl. 14 and 18 gs.

THE CITY LINE trades between Liverpool and Glasgow, and Calcutta, Bombay, and Kurrachee. The company owns the following fine fleet of steamers, all of which are fitted with the electric light:—

SHIP.	Gross Tons.	Horse-power.	SHIP.	Gross Tons.	Horse-power.

FUNNEL: Black with two red bands. *London Office*,

PASSENGER RATES.—1st cl., Colombo, £42 10s. Madras and Calcutta, £45; 2nd cl. £30 to each.

THE CUNARD LINE.—The mail service was commenced on July 4th, 1840, when the *Britannia*, one of the Cunard fleet of four ships (the others being the *Acadia*, *Caledonia* and *Columbia*) left Liverpool for Boston, which port it fetched in 14½ days. The dimensions of these ships were as follows:—Length, 207 ft.; breadth, 34 ft. 2 in.; depth, 22 ft. 4 in.; tonnage, 2,050; h.p., 740. Additional interest is attached to the *Britannia* from the fact of its having conveyed Dickens when he visited America in 1842. To detail the various steps by which the Cunard Line has arrived at its present popularity would occupy more space than that at our disposal. It will be as well, however, to give in as concise a manner as possible the chief outlines of its history. An important period in its annals was the time when the American shipowners declared their intention of "running the Cunarders off the Atlantic," and many were the rivals which appeared to contest their supremacy. Of these the most important, perhaps, was the Collins Line, whose four ships, the *Atlantic*, *Pacific*, *Arctic* and *Baltic*, averaged on their passages from America 9 days, 17 hours, and to America 11 days, 10 hours, 26 minutes, whilst the Cunard ships could only show an average of 12 days, 19 hours, 26 minutes. Through bad management, however, this company soon became bankrupt, and their ships were sold. The Cunard Line has for many years been conspicuous for the speed, safety, and size—not only of its vessels but of its undertakings; and it is a significant fact that between October 1894 and October 1895 about 110,000 passengers were conveyed by them across the Atlantic. Two steamers, the *Campania* and *Lucania*, are subsidised by H. M. Government to be employed when necessity arises as armed cruisers. They are the largest passenger steamers in existence, and have made passages across the Atlantic averaging a speed of 22 knots per hour, whilst the *Etiruria*, with her sister vessel the *Umbria*, are of an ocean speed of 20 and 19½ knots per hour respectively. The Cunard Company, which in 1890 celebrated its jubilee, has been in existence on the Atlantic

for over 54 years, and during that time it has carried millions of passengers without loss of life.

The following is a list of "Cunarders" over 4,000 tons:—

SHIPS.	Gross Tonnage.	Horse-power.
Campania	12,950	30,000
Lucania	12,952	30,000
Umbria	8,127	14,500
Etruria	8,119	14,500
Servia	7,391	10,000
Aurania	7,268	9,500
Favonia	5,587	4,000
Cephalonia	5,517	4,000
Catalonia	4,841	3,200
Gallia	4,809	5,300
Soythia	4,557	3,115
Bothnia	4,535	3,160
Sylvania	5,598	4,500
Carinthia	5,598	4,500

The fastest passages on record ever made across the Atlantic were accomplished by the two new steamers of this line, the *Lucania*, westward, in 5 days, 7 hours, 23 minutes, eastward, 5 days, 8 hours, 38 minutes; *Campania*, westward, 5 days, 9 hours, 6 minutes, eastward, 5 days, 9 hours, 18 minutes. We need hardly say that such achievements are quite phenomenal.

The fastest recorded passages made by other vessels of this line were as follows:—To America, *Etruria*, 5 days, 22 hours, 28 minutes; *Umbria*, 5 days, 22 hours, 7 minutes. From America, *Etruria*, 6 days, 0 hour, 40 minutes; *Umbria*, 6 days, 1 hour, 15 minutes. The *Etruria* has made an average speed across the Atlantic of over 20 knots, and the *Umbria* of 19½ knots per hour.

FUNNEL: Red with black top. *London Office*, 93, Bishopsgate St. Within, E.C.

THE DOMINION LINE, whose steamers ply between Liverpool and Canada and the United States, was established in 1872. The fleet numbers among its vessels the following:—

SHIP.	Gross Tons.	Horse-power.	SHIP.	Gross Tons.	Horse-power.
*Canada ...	9000	8000	Labrador...	5000	5000
*Scotsman...	6041	3600	Ottoman ...	5000	3200
Vancouver	5500	5000	(*building)	9000	—

The *Labrador*, on the 9th Aug. 1895, embarked the mails at Moville (Ireland) at 2.15 p.m.; Belle Isle was reached at 7.5 a.m. on Aug. 14th, thus making the run from land to land in 4 days, 16 hours—the fastest passage on record.

FUNNEL: Black top, red band, white band, then red. *London Office*, 22, Billiter St., E.C.

PASSENGER RATES.—1st cl. £10 10s. to £30; 2nd cl. £7 5s. and £8; steerage, £5 5s. by all steamers.

EMPRESS LINE.—The magnificent twin-screw mail steamers of this line are owned by the CANADIAN PACIFIC RAILWAY, and run in connexion therewith between Vancouver and Japan and China, calling at Yokohama, Shanghai and Hong Kong. The fleet consists of:—

SHIP.	Gross Tons.	Horse-power.
Empress of India	6,000	10,000
Empress of China	6,000	10,000
Empress of Japan	6,000	10,000

* Twin screw.

These vessels carry the British mails—*via* the Canadian route—to and from China and Japan, and are all held at the disposal of the Admiralty for use as armed cruisers in case of need, receiving an annual subvention from Government.

FUNNEL: Cream. *London Office*, 67, King William St., E.C.

MESSRS. LAMPFORT & HOLT also have a fine fleet, consisting of over 60 steamers, running from Glasgow, Liverpool, Manchester, London, Antwerp, and New York, to Brazil, River Plate, and West Coast of South America. A large percentage of their steamers are capable of carrying cargoes of between 5,000 and 6,000 tons, and steaming between 10½ and 12 knots at sea. Their cargo steamers have accommodation for passengers to all South American ports. This line has also regular departures of fast passenger steamers between New York and Brazil. Their largest steamers are as follows:—

SHIP.	Gross Tons.	Horse-power (nom.)	SHIP.	Gross Tons.	Horse-power (nom.)
Bellagio	3919	450	Melbourne ..	3819	350
Canova	5000	564	Queensland	3892	350
Cavour	3500	623	Sallust	4500	550
Canning ...	5500	623	Virgil	4000	407
Cervantes ...	5000	564	Wordsworth	3260	450
Horace	4000	407			

FUNNEL: Blue with white band and black top. *London Office*, 36, Lime St., E.C.

PASSENGER RATES.—Brazil, 1st cl. £20 to £25; River Plate, £20; Chile and West Coast, £35 to £40.

THE NATAL LINE.—This line of steamers, sailing every fortnight from London to Natal, Delagoa Bay, Beira and East African ports, was established by Messrs. Bullard, King & Co. in 1879. They have a fleet of 12 steamers, of suitable tonnage, and corresponding draft in order that they may cross the bar at Natal, and thereby discharge their cargoes inside the harbour, without transshipment, and without lighterage charges to shippers. They have also a three-weekly colonial service, which is under contract with the Government of Natal, from Cape Colony and Natal, touching at East African ports, extending to Madras and Calcutta, and calling regularly at Ceylon.

There is a through service, at regular intervals, between China, Japan and South African ports.

The vessels of the fleet are as follows:—

SHIP.	Gross Tons.	Horse-power.	SHIP.	Gross Tons.	Horse-power.
Congella ...	1603	1100	Umkuzi	2050	1100
Pongola ...	1449	700	Umlazi	1759	1100
Umbilo	1923	1200	Umona	2031	1100

FUNNEL: Buff. London Office, 138, Leadenhall St., E.C.

PASSENGER RATES.—To Tasmania and New Zealand, 1st cl. £58 to £68 (return £100); 2nd cl. £36 15s. to £40 (return £65); 3rd cl. £15 15s. to £19 19s. (return £28 to £36).

THE ORIENT LINE of Steamers between England and Australia, though first started in 1877, was really a development of the old-established lines of fast clipper ships run by the well-known firms of F. Green & Co. and Anderson, Anderson & Co., who are the joint managers of the Orient Line.

The Orient Company is under contract with the Imperial Government for the conveyance of mails fortnightly each way between the United Kingdom and Australia for a subsidy of £85,000 per annum. The steamers sail from London on alternate Fridays for Sydney, calling at Plymouth, Gibraltar, Marseilles, Naples, Port Said, Suez, Colombo, Albany, Adelaide, and Melbourne. The homeward steamers start from Sydney on alternate Saturdays, calling at the same ports in the reverse order.

The fleet now includes the following:—

MAIL LINE.

SHIP.	Gross Tons.	Horse power.
Cuzco	3898	4000
Orient	5365	6000
Ormuz	6387	8500
Orotava	5857	7000
Oruba	5857	7000
Ophir	6910	10000
Orizaba	6297	7000
Oroya	6297	7000
Austral	5524	7000
New Steamer (building) about	8000	about 10000

PLEASURE CRUISING.

SHIP.	Gross Tons.	Horse power.
Garonne	3910	3500
Lusitania	3912	4000

The last-named steamers are despatched by the Orient Company on exclusively pleasure cruising voyages, varying in duration from two to eight weeks. The places visited include Spanish and Mediterranean ports, Greece, the Crimea, Norway, Madeira, the Azores, and the West India Islands, according to season.

FUNNEL: Black. London Office, Fenchurch Avenue, London.

PASSENGER RATES.—Albany, Adelaide, Melbourne and Sydney, 1st cl. £60 to £70; 2nd cl., £35 to £40; 3rd cl., 13 to 18 guineas.

THE PACIFIC STEAM NAVIGATION COMPANY, which was incorporated by Royal Charter in 1840, conducts a line of mail steam vessels from Liverpool to the Brazils and River Plate, continuing the voyage to the West Coast of America via the straits of Magellan. The company are the pioneers

of the steam trade along the shores of the Pacific and between Europe and the West Coast, their first steamers, *Chile* and *Peru* having been despatched from Liverpool in the year 1840. The fleet consists of 37 steamers, of the aggregate tonnage of 117,500, and horse-power 110,000; the largest of which are:—

SHIP.	Gross Tons.	Horse-power.	SHIP.	Gross Tons.	Horse-power.
Antisana ...	3584	3000	Oropesa ...	5317	5000
Chile	3225	3000	Orissa	5000	5000
Corcovado ..	4568	3500	Orotava ...	5552	7000

Oravia	5317	5000	Sarmiento	3603	3000
Orizaba	6184	7000	Sorata ...	4568	3500

The *Orizaba*, *Oroya*, *Oruba*, and *Orotava*, are running in the ORIENT Line, between London and Australia.

FUNNEL: Black. London Office, 5, Fenchurch St., E.C.

TRANSIT.—Liebon, 6 days; Rio, 19 d.; River Plate, 23 d.; Chile, 33 d.

PASSENGER RATES.—Brazil, 1st cl., £24 to £30; 2nd cl., £17 10s.; 3rd cl., £9. River Plate, 1st cl., £28 to £35; 2nd cl., £17 10s.; 3rd cl., £9. Chile and West Coast, 1st cl., £52 to £70; 2nd cl., £30 to £35; 3rd cl., £18.

THE PENINSULAR AND ORIENTAL COMPANY, familiarly known as the "P. & O.," is the second oldest steam-packet company in existence. This line had its origin in a small steamship undertaking, started in 1836 under the name of the "Peninsular Company," to trade between Falmouth and Lisbon. Their first vessel was the *William Fawcett*, a paddle-steamer, which was built in 1829, with a gross tonnage of but 206. The first formation of the Peninsular Company dates back to 1825 and was due to Mr. Brodie McG. Wilcox. The company's business gradually increased, and in 1840 they were incorporated by charter. The first vessel despatched for service in the Indian Sea was the *Hindustan*, of 1,800 tons burthen and 250 horse-power, and the company now carries the mails not only to India, but to China, Australia and neighbouring countries, and is served by a fleet of which the principal vessels are given below:—

SHIP.	Gross Tons.	SHIP.	Gross Tons.	SHIP.	Gross Tons.

Egypt	7912				

* Ships building.

The following are the contract times for the transit of mails:—

Indian mails—Bombay ...	16½ days.
China " —Shanghai	37½ "
Australian " —Melbourne	35½ "

With regard to the punctuality of the mails, it may be stated that during recent years not only has it been a most exceptional occurrence for a delivery to be even an hour late, but almost invariably the mails have been delivered considerably in advance of contract times. In 1887 the P. and O. Company celebrated its Jubilee. The s.s. *Caledonia* is at present the fastest vessel employed in the Indian trade, and has succeeded in landing the mails in Bombay within 12½ days of their despatch from London. Over £7,000,000 have been expended on the P. and O. fleet during the past 20 years.

FUNNEL: Black; hull black with cream band. *London Office*, 122, Leadenhall St., E.C.

TRANSIT.—Calcutta, 31 days.

PASSENGER RATES.—India, 1st cl. £55; 2nd cl. £35 to £37 10s. Australia, 1st cl. £70; 2nd cl. £35 to £40. Straits Settlements, 1st cl. £61; 2nd cl. £38. Hong Kong, Shanghai and Yokohama, 1st cl. £73 10s.; 2nd cl. £42.

THE ROYAL MAIL STEAM PACKET COMPANY, which dispatches steamers from Southampton to the West Indies, Central America, North and South Pacific, Brazil, and the River Plate, was founded in 1839. In the list of its largest vessels given below, the *Trent* is a namesake of the historic vessel which was boarded by the U. S. man-of-war *San Jacinto* in 1861, when the seizure of Messrs. Slidell and Mason temporarily led to very strained relations with the United States. The following is a list of the chief steamships of the Company:—

PASSENGER RATES.—West Indies, 1st cl. £22 10s. to £40; 2nd cl. £18 to £20; steerage, £15. Brazil, 1st cl. £30; 2nd cl. £20; steerage, £9. River Plate, 1st cl. £35; 2nd cl. £20; steerage, £9.

THE SHAW, SAVILL AND ALBION COMPANY, LMD.—Established 15 years ago as a public company, this line was for many years previously worked by Messrs. Shaw, Savill & Co. and the Albion Shipping Co.; it has been most successful; a special feature of its operations being the large amount of frozen meat carried. The following fine steamers form the company's fleet of passenger and cargo vessels, in addition to which they have a large number of cargo steamers and sailing ships. Their new twin screw steamer, the *Gothic*, is the largest steamship employed in the Australasian trade.

NAME.	Gross Tons.	Horse-power.	Length in Ft.

Tokomaru	6238	4500	425

The *Arawa* has made the fastest passages on record, viz., Plymouth to New Zealand, 38 days, 0 hours, 30 minutes, and New Zealand to Plymouth in 35 days, 3 hours, 40 minutes; but on this occasion excelled herself by 4 hours 26 minutes, her net steaming time being 34 days, 23 hours, 18 minutes.

FUNNEL: Buff with black top. *London Office*, 34, Leadenhall St., E.C.

PASSENGER RATES.—New Zealand, 1st cl. £58 to £68; 3rd cl. £15 15s. to £19 19s. Australia, 1st cl. £62 to £72; 3rd cl. £16 16s. to £23. Cape Town, 1st cl. £26 5s. to £28 7s.; 3rd cl. £8 8s. to £12 12s.

THE UNION STEAMSHIP COMPANY was first formed in 1853 under the title of "The Union Steam Collier Company," and commenced with a fleet of five steamers, the *Briton*, *Dane*, *Norman*, *Saxon*, and *Union*, having an aggregate tonnage of 2,327 tons only. In 1857 a contract was obtained for a monthly mail service to the Cape of Good Hope for five years at an annual subsidy of £30,000. The service proved so satisfactory that the contracts were not only renewed but extended, and at the present time the company's ships carry the mails from this country to the Cape and Natal, and also from Hamburg, Rotterdam, Antwerp and Southampton to Cape Town, Port Elizabeth, East London, and Natal, making calls at Madeira and Teneriffe.

In view of the great development of the South African gold fields, the directors in 1890 built the steamer *Scot*, the largest then ever designed for or employed in the South African trade. She was launched from the yard of Messrs. Denny, Dumbarton, on December 30, 1890. She has made the fastest passages on record between England and Cape Town, both outwards and homewards.

The *Scot* has since been lengthened 54 ft. by Messrs. Harland & Wolff, and her capacity for carriage has been largely increased. Her tonnage is now 7815.

In November, 1894, the new steel twin-screw R.M.S. *Norman* sailed on her first voyage from Southampton. She was built by Messrs. Harland & Wolff, of Belfast, and her gross tonnage is 7,537 tons. She has performed the voyage between England and Cape Town in 14 days 21 hours. In addition to the three enlarged "G's," recently added, the Union Company have ordered from Messrs. Harland & Wolff other steamers of similar character but larger tonnage. They will each measure about 400 ft. long, 53 ft. beam, and 30 ft. depth. A further order has also been placed with the same firm for a new twin screw

* Twin screw.

mail steamer, to be called the *Briton*, having the following dimensions and tonnage: length 530 ft., breadth 60 ft., depth 40 ft., gross tonnage 10,300, by far the largest and finest vessel yet introduced into the South African trade.

The fastest passages made by vessels of this line are—

THE WHITE STAR LINE. — The Oceanic Steam Navigation Co., better known as the White

Star Line, was founded in 1869, and the first steamer of the line, the *Oceanic*, 3,807 tons, commenced running in 1871. The Company rapidly increased the size of its fleet by the addition of the *Baltic*, *Adriatic*, *Celtic*, *Republic*, *Germanic*, *Britannic* and others. The founders of this line were Messrs. Ismay, Imrie & Co., who have indeed carried out their project with conspicuous success, the White Star being to-day one of the most popular of Transatlantic steamship lines. The following is a list of their vessels:—

SHIP.	Gross Tonnage.	SHIP.	Gross Tonnage.
*Oceanic (bldg.)	17,000	Coptic	4448
*Majestic	10,000	Belgio	4211
*Teutonic	10,000	Gaelic	4205
Germanic	5066	*Cymric	12,300
Britannic	5004	*Georgic	10,077
Adriatic	3887	*Cevic	8301

*Gothic	7720	*Nomadic	5749
Ionic	4748	*Tauric	5727
Doric	4784	Cufic	4639

The twin screw mail steamers *Majestic* and *Teutonic*, built by Messrs. Harland and Wolff, Belfast, were the first steamers specially constructed, under arrangement with the Admiralty, for employment as mercantile armed cruisers.

The *Teutonic* was present as an Armed Merchant Cruiser at the Naval Review in August, 1889, and she was also present in the same character at the Diamond Jubilee Naval Review.

The *Majestic*, in July, 1891, crossed from Queenstown to New York in 5 days, 18 hours, 8 minutes, the fastest passage on record up to that date, but in the following month the *Teutonic* lowered the record still further by making the passage in 5 days, 16 hours, 31 minutes. In August, 1896, the *Majestic* crossed from Queenstown to New York in 5 days, 17 hours, 56 minutes, thus excelling her previous best performance by 12 minutes.

The *Germanic* has been fitted by Messrs. Harland & Wolff with new engines and boilers, giving her considerably increased speed; her passenger accommodation has been also rearranged and re-decorated after the plan of the *Majestic* and *Teutonic*, so that she has more than retained her popularity with the regular Transatlantic voyager. The pioneer steamer of the line, the *Oceanic*, having completed 25 years successful work, was recently sold and broken up. There have been recently added the *Delphic*, a twin screw cargo steamer, for the New Zealand service, the largest employed in that trade, and the *Cymric*, a large twin-screw passenger and cargo steamer for the New York service.

Included in the White Star company's fleet there are ten new steamships of the largest size and most improved class, all propelled by twin screws, an important element of security in ocean transit, besides the *Magnetic*, a new twin screw mail and passenger tender.

FUNNEL: Cream with black top. London Office, 34, Leadenhall St., E.C.

PASSENGER RATES.—New York, 1st cl., £12 to £35; 2nd cl., £9 to £10.

THE NORTH GERMAN LLOYD.—This Company, whose steamers have for so many years called at Southampton, and which has spent many millions upon shipbuilding in this country, was established in 1857 by some Bremen merchants. From the modest beginning of two vessels, it has steadily developed into one of the largest lines in the world, with a total registered tonnage (including vessels building) of nearly 300,000. The s.s. *Kaiser Wilhelm der Grosse*, on her first voyage

* Receive annual subvention.

made the fastest westward passage, Southampton to New York, in 5 d. 22 h. 30 m.; and the fastest day's run, viz., 564 knots. The average speed was 21'39 knots. Homewards the same vessel averaged 21'87 knots. The *Kaiser Friedrich*, to be ready in April, 1898, is expected to be at least of equal speed. The chief services maintained by the company are:—Bremen to New York, weekly or bi-weekly, via Southampton at intervals, via Cherbourg, Genoa and Naples to New York three times a month; Bremen to Australia, China, and Japan, fortnightly, via Southampton; Bremen to River Plate, monthly, via Southampton; Brazil, fortnightly, via Antwerp; Bremen direct to Baltimore, weekly. The principal vessels of the fleet are forty seven in number, the largest being:—

SHIP.	Gross Tons.

We have been supplied with the following information by "Lloyd's Register of British and Foreign Shipping":—

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN THE UNITED KINGDOM DURING RECENT YEARS.

Year.	No.	Gross Tonnage.
1889.....	690	1,209,361
1890.....	743	1,194,795
1891.....	822	1,130,816
1892.....	681	1,109,950
1893.....	536	836,383
1894.....	614	1,046,508
1895.....	579	950,967
*1896.....	696	1,159,751

* In addition, there were launched in the United Kingdom, during 1896, 55 Warships of 163,958 tons displacement, of which 34 of 117,445 tons were for the British Government.

Of the merchant steamers (628 in all) launched in the United Kingdom during 1896, 1 (Pennsylvania, 11,330) was over 10,000 tons, and 2 were between 8,000 and 9,000 tons; 68 were between 4,000 and 7,000 tons each; and 254 were between 1,000 and 4,000 tons. Of sailing vessels (68 in

all), the largest was the "Lady Wentworth," of 2,715 tons; 4 were between 2,000 and 3,000 tons; and 17 were between 1,000 and 2,000 tons.

MERCHANT AND OTHER VESSELS (not Warships) UNDER CONSTRUCTION IN THE UNITED KINGDOM AT VARIOUS DATES. (Vessels not to be classed by Lloyd's Register are also included.)

30th September.	No.	Gross Tonnage.
1883.....	637	892,220
1884.....	363	421,050
1885.....	339	422,574
1886.....	256	349,120
1887.....	249	394,340
1888.....	400	698,995
1889.....	521	882,749
1890.....	406	652,248
1891.....	475	702,114

1896.....	355	659,641
1897.....	455	884,336

DESCRIPTION OF VESSELS BUILDING IN THE UNITED KINGDOM IN 1875 AND 1897 RESPECTIVELY.

DATE	STEEL.				IRON.				WOOD.				TOTAL.			
	STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.	
	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.
30 Sept. 1875	126	157,466	114	106,521	6	1,065	203	51,122	132	158,531	317	157,643
30 Sept. 1897	364	868,495	13	4,888	54	8,721	1	226	2	171	21	1,835	420	877,387	35	6,949

These figures show that the average size of vessels built at the present time is 2½ times that of vessels built twenty-two years ago. Then, steel was not used for shipbuilding purposes; now, it has all but supplanted iron. Then, the tonnage

in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant. Only six years ago, however, the proportion of sailing to steam tonnage stood at one to three.

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN EACH OF THE PRINCIPAL SHIP-BUILDING DISTRICTS OF THE UNITED KINGDOM DURING 1896.

* NOTE.—In the absence of satisfactory information, the records of numerous small sailing vessels (belonging chiefly to Greece, Turkey, Southern Russia, and the Dutch East Indies), have been omitted from the current edition of Lloyd's Register Book.

The supply of water to London is in the hands of eight companies incorporated under private acts of Parliament. Five of them draw their water from the River Thames, two from the Lea, supplemented by springs and wells, and one from deep chalk wells in Kent. Considerable interest has been taken during late years in proposals to place the water supply in the hands of a public body, but one of the chief difficulties has always been to find the authority to which the control should be entrusted. A bill was introduced by the Government, in the House of Lords, in the session of 1896, to empower the creation of a Metropolitan Counties Water Board, representing the councils of the counties and county boroughs situate within the metropolitan water area, together with the Common Council of the City of London and the Thames and Lea Conservancies, but, owing to opposition, the bill was dropped. Another serious difficulty is the settlement of the terms upon which any purchase should be based. The London County Council promoted bills in 1895 for the purchase of the companies' undertakings, containing a special form of arbitration clause on the lines that the purchase price should be based on the fair and reasonable value of the undertakings, due regard being had to the rights, special circumstances and obligations of the companies. The companies contended for compensation under the provisions of the Lands Clauses Consolidation Act. The bills were suspended at the committee stage, owing to the dissolution, and finally, in the following session (1896), on the Council's refusal to accept the ordinary arbitration clause, they were opposed by the Government and rejected.

The Council again introduced bills in 1897 to empower the Council to acquire the companies' undertakings by agreement, or, in default of agreement, within one year after the passing of the Act, compulsorily on arbitration terms, but like the bills of 1895-6 they were rejected.

The Government, however, promised a Royal

Commission, which has since been appointed, to inquire whether the undertakings should be acquired and, if so, by what authority or authorities, and, if not, whether additional powers of control should be exercised by local or other authorities.

Before 1889, the interests of the ratepayers were guarded by the Metropolitan Board of Works and the Corporation of the City of London; and whenever application was made to Parliament by any of the Companies for further powers, their proposals were carefully watched, and, by the joint action of these two bodies and the Local Government Board, many restrictions in the ratepayers' interests were placed upon the companies. No addition to share capital has been allowed since 1878 and the interest on debenture stock has, since 1894, been limited to such a rate as will, in the opinion of the Governor of the Bank of England, secure the issue of the stock at par. The additional debenture capital is, however, assumed to earn a considerably higher rate of interest, and, to prevent this going to swell the dividends already paid on the share capital, a clause, known as the "sinking fund clause," has been devised to intercept this difference between the interest paid and the interest earned; and the amounts, calculated as provided by the clause, which has been incorporated in all the recent acts, are paid over by the Companies to the Chamberlain of the City of London, to be held by him as trustee and invested to form a sinking fund to extinguish the capital of the Companies or otherwise, as Parliament may direct. The total amount of capital authorised subject to the sinking fund clause is now £5,320,000.

The quality of the supply and its sufficiency are matters which in recent years have engaged and still are engaging the serious attention of Parliament and of the London local bodies. The County Council is perfecting a scheme to bring water from Wales.

The following table summarises the financial position of the companies at the present time:—

NAME OF COMPANY.	Incorporat'd	Capital Called up.	Debenture and Preference.		ORDINARY.

SUMMARY.—The Coal produced in the U. K. in 1896 was valued at £57,190,147 (Durham, 8·3 millions; Glamorg., 8·1; Yorks, 7·7; Lanc., 7; Lanark, 3·9; Staff., 3·8; Derby, 3·2; Monm., 3; Northumb., 2·3; Notts, 1·9; and Fife, 1). A few of the above produce also Ironstone or Fireclay.

II. Metalliferous Mines (Metals, with Slate, Stone, Clay, Chalk, and Salt).

* * * Under the Metals information as to the extent of the output will be of more service than lists of the numbers of hands employed. Most, however, of the Iron, Stone, Slate, and Chalk mines or quarries are worked under either the Coal Mines or the Quarries Act, under which the former item is never supplied except in bulk; in these cases the latter may have to be substituted.

1 Total Arsenic from U. K. mines, £45,483 (Devon and Cornwall), also £8,007 Arsenical Pyrites.
 2 Total Chalk, £157,170 (chiefly Kent, but also Hants, Essex, Sussex, Surrey, &c.).
 3 Total Clays (Brick, China, Fire, Potter's, &c.), £1,442,069 (Staff., Yorks., Lanc., Cornw., Worc., Warwick's., Durham, Lanarks., &c.), including £5,952 Fuller's Earth (£5,809 Somerset, £1,143 Beds.).
 4 Total Copper (ore and precipitate), £23,770 (Cornwall, Devon, Anglesea, &c.). Chief supply obtained from France, after that Holland, and the United States, with some from Belgium, Sweden, &c.
 5 Total Gold from British Auriferous Quartz Mes., £4,257 (3 mines in Merioneth).
 6 Total Granite, £498,074 (Leic., largely Syenite; Aberd., Cumbd., Devon, Westmd., Kirkcudb., Argyle, &c.).
 7 Total Gypsum, £274,538 (Norths., Cumbd., Staff., &c.).
 8 Total Iron, as ore, £3,150,424 (Yorks., 0.9 million; Cumb., 7; Lanc., 4; Staff., 3; Linc., 3; Ayr., 2; Nthants., 1); value as pig iron, £11,375,474.
 9 Total Lead, smelted (on all figures above), £350,940 (Flint, 7,548 tons; Durh., 4,748; Derb., 3,992; I. Man, 3,646).
 10 Total Silver from British Lead mines, £36,365 (I. Man, 107,643 oz.; Flint, 52,505; Durh., 45,416).
 11 Total Limestone, £1,215,604 (Durh., Derb., Yks., Lanc., Som., Glamorg., Carnarv., Cumb., &c.).
 12 Total Oil Shale, £604,881 (W. & Mid Lothian, Lanarks., Renfrew, Stirling, Yorks., Staff., &c.).
 13 Total Rock Salt, £41,535 (Chesh., Lanc., and Antrim); in Antrim £10,870 of White Salt made herefrom.
 14 Total Brine Salt, £525,078 (Chesh., Lanc., Staff., Durh., Worc., and Yorks.).
 15 Total Sandstone, £1,447,695 (Yorks., Lanc., Lanark, Glamorg., Midloth., Dumfries, Glouc., &c.).
 16 Total Slate, £2,338,225 (Carnarv. and Merioneth, also Argyle, Cornw., Lanc., and I. of Man).
 17 Total Tin, £259,928 (all Cornwal, except £222 Devon).
 18 Total Whinstones, &c., £425,587 (Carnarv. & Warw., Diorite & Quartz-Porph.; Salop, Basalt; Staff., Yorks., &c.).
 19 Total Zinc, £66,553 (Denbigh, Cumberlan., Cardigan, I. Man, Flint, Carnarvon, &c.).
 * * * Total ALUM CLAY (Baritic), £1,918; ANTHRACITE, £690,302; BARYTES, £25,500; BLUESTONE, £1,125; IRON PYRITES, £4,603; OCHRE, UMBER, &c., £24,688; STRONTIUM SULPHATE, £5,188; URANIUM, £1,500. Also small quantities of Bismuth, Fluor Spar, Magnesium, Manganese, Petroleum, Potassium, Sodium, and Wolfram.

The history of canals in England dates from the time of the Romans, who constructed the *Caer Dyke*, 40 miles in length, connecting the rivers *Nene* and *Witham*, and the *Foss Dyke*, 11 miles, which is still navigable. A series of Acts regulating the navigation of the *Thames* run from the year 1423, of the *Lee* from 1424, and of the *SVERN* from 1503. In the year 1539 the Corporation of *Exeter* obtained an Act under which a canal was constructed 3 miles in length, parallel to the river, but subject to the tide; this was lengthened in 1625, and again in 1820, the Act for the present ship-canal being obtained in 1829. It was, however, not till the introduction of locks in the 17th century, that canal development became possible; in 1625 an Act for rendering the rivers *Aire* and *Calder* navigable was rejected, but passed in 1699, the tolls being, from May 1 to October 1, 10s. per ton, and from October 1 to May 1, 16s. per ton for the entire distance between *Leeds* and *Wakefield*. In 1737 powers were obtained for the construction of the *Bridgewater* canal, but lapsed; the work being finally carried out by the celebrated *Duke of Bridgewater*, and his engineer, *James Brindley*, under an Act of 1759, out of the *Duke's* private means. It was said to have cost £220,000, and was extraordinarily successful, the revenue it produced in the early part of this century being estimated at £130,000. The canal is now the property of the *Manchester Ship Canal Company*. The *Trent* and *Mersey*, or *Grand Trunk* canal, running across England, and connecting *Liverpool* with *Nottingham* and *Hull*, was commenced in 1766; in 1847 it was purchased by the *North Staffordshire* railway company. A period of canal enterprise followed the success of these undertakings, and by the year 1800 more than 100 canal and navigation Acts had been passed. It is noteworthy that prior to 1845, canal companies merely provided the waterway, and did not act as carriers; in that year, to meet growing railway competition, an Act was passed to enable canal companies to become carriers, and two years afterwards they were given power to borrow money for such purposes. Many companies availed themselves of these powers; but few now exercise them.

Prior to 1845 canals were subject to no general legislation, but were regulated by the provisions of their private Acts. In that year, besides the Act referred to above, an Act was passed giving to canal companies the same power of varying their tolls as possessed by railway companies. This was the era of railway and canal amalgamations, there being in 1846 upwards of 200 Bills containing such provisions. The *Railway and Canal Traffic Act*, 1854, aimed at checking the throttling of canals by the railway interest, and required companies to make arrangements to afford all reasonable facilities for receiving and forwarding traffic, and an Act of 1858, at preventing, without legislative sanction, the virtual amalgamation of canals with railways, which had been going on under the name of leases of inde-

pendent canals by railway companies, who were also canal companies by virtue of previous purchases of canals. In 1873 the *Railway Commission* was created; the Act also providing that no agreement between a canal company and a railway company, by which a railway would obtain control over a canal, shall have any validity unless it is approved by the *Railway Commissioners*; and that where any canal is already the property of a railway company, or managed by a railway company, such company shall be required to keep it in good navigable condition. The *Canal-Boat Acts* of 1877 and 1884, provide for the registration of boats by the rural sanitary authority, the *Local Government Board* is also compelled to appoint inspectors of boats, with powers similar to those of poor-law inspectors. The last, and most important piece of legislation affecting canals, is the *Railway and Canal Traffic Act* of 1888. Its principal provisions are:—the establishment of a new *Railway and Canal Commission*, consisting of two appointed, and three ex-officio Commissioners (see p. 174), having jurisdiction as to the legality of tolls and rates, power to order such reasonable facilities for traffic as may be required in the interest of the public, and under certain limitations, to fix through rates. Under this provision a uniform classification of merchandise, similar to that adopted for railways, has been fixed, and uniform tolls and rates (with some exceptions for special circumstances), which abrogate the varied charges hitherto made by canal companies under their private Acts. These came into operation on January 1, 1895. The following table shows the general scale of maximum tolls, rates and wharfage charges for traffic in classes A and B of the classification, which include a very large proportion of the traffic carried on canals. The "rate" includes carriage, the "toll" does not.

There are in the *United Kingdom* 3,827 miles of canal. These figures are based on the return made to the *Board of Trade* in 1888, since which no official figures have been published; but the inclusion of partially canalised streams and disused canals would bring the mileage to over 4,000. 1333 miles are owned or controlled by railway companies, and 2,494 miles are owned by 62 companies, having an outstanding capital (including *Government grants* to *Scotch and Irish canals*) of £30,545,000. The *Manchester Ship Canal Co.* owns 77 miles, with a capital of £15,412,000; 61 companies therefore own 2,417 miles, or 40 miles each, and have a capital of £15,133,000, not including sums spent out of revenue on capital account, which would bring the capital of the free canals, excluding the *Manchester Ship Canal*, to considerably over £20,000,000. The capacity of inland canals is governed by that of the locks, which vary from 220 ft. long, 42 ft. wide, and 15 ft. deep, to 60 ft. long, 7 ft. wide, and 3½ ft. deep. Horse haulage is still generally employed, but steam is gradually taking its place, the want of uniformity in locks

	Classes.	For the first ten miles.	For the next ten miles.	For the next ten miles.	For the remainder of the distance.	Maximum wharfage charge.
		Per ton per mile.	Per ton per mile.	Per ton per mile.	Per ton per mile.	Per ton.
Tolls	A & B	0 5	0 45	0 25	0 15	1 5
Rates	{ A	0 9	0 8	0 6	0 6	} 3
	{ B	1 15	1	0 9	0 75	

being the chief drawback to its extension. It seems probable that a lock 75 ft. long, 14 ft. broad, and 5½ ft. deep, capable of passing a 60 ton barge, will be generally adopted, these being the dimensions of locks on the principal canals, and being sufficiently large to allow of the economical employment of steam power. Canals stand much where they were in 1830, and owing to divided ownership and divergent interests, have been unable to adopt modern improvements. The first step must be the amalgamation of the smaller companies, or their purchase by stronger ones, and the freeing of important links owned or controlled by railways. Arrangements have been made by which coal is now carried at low through rates from the Derbyshire coalfields to the home counties and London; the Old and Grand Union Canals, now part of the Grand Junction Canal, are being put into thorough order, and further improvements are contemplated with a view to reducing the cost of haulage.

The Manchester Ship Canal is now excavated throughout to a depth of 26 ft.; the large docks at Manchester to 26 ft., and the smaller docks to 20 ft. The bottom width is 120 ft., at the curve of the Weaver outfall 140 ft., and at the bend at Runcorn 150 ft.; for a distance of about 2½ miles between Latchford Locks and Partington Coal Basin, the width at present is 90 ft., and from Barton Aqueduct to Manchester Docks (3 miles) 170 ft. The fixed bridges are 75 ft. above the normal water level; but as the headway is necessarily a few feet less when high tides or floods occur, masts should clear the bridges at 70 ft. above the water level. The Manchester Docks

are equipped with transit sheds of new design, hydraulic and steam cranes, seven-storey warehouses for cotton storage, four-storey warehouses for grain and general goods. The dock premises include 45 buildings containing 157 extensive depots. Oil tanks are also erected on the banks of the canal at Manchester by various firms for the storage of oil. There is a commodious grain elevator built on the latest American principle capable of storing 40,000 tons grain, also fitted with drying apparatus. The canal and docks are in direct communication with 14 inland canals which serve 750 miles of country. The company owns 8½ miles of railway.

The river Ouse has been closed to navigation from 1st October from Bedford to St. Ives. The Wilts and Berks Canal Co. have made application to the Board of Trade for a warrant of abandonment. The Thames and Severn Canal is re-opened from Stroud to Cirencester, and is expected to be re-opened to the Thames at Inglesham by February, 1898. The works for the improvement of the Upper Thames are progressing, and after June, 1898, vessels drawing 4 feet of water will be able to navigate the river to the junction of the Thames and Severn Canal at Inglesham.

The 17 canals tabulated below have a capital of £32,357,000, and own 1610 miles of waterway. The tonnage carried on them in 1895 was 23,901,000; receipts were £1,897,000; expenditure £1,318,000. The proportion of expenditure to receipts is 69 %.

THE following is a list of the Principal Tramway Companies in the United Kingdom, so far as returns are obtainable on application to the secretaries. The statistics given refer to the year 1896-7, except in the case of those to which an asterisk (*) is prefixed, where old figures relative to traffic returns have been allowed to stand, but the latest information with regard to the dividends is given. It is not claimed that this is a complete list, but particulars are given concerning each company whose secretary has been courteous enough to supply the information.

RAILWAYS AND THEIR HISTORY.

In the first half of the seventeenth century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of rails for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1801 that "edge rails" were introduced, the credit of their adoption being assigned to Lord Penrhyn's slate quarries in Carmarthenshire. James Watt had conceived the idea of utilizing

steam for locomotion, and there is a record of a steam locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line 6 miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the county of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 24th of February, 1804, Trevethick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron, and about 70 persons, a distance of 9 miles. The application passed the third reading as a

railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevethick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Carmarthenshire, the Kilmarnock and Troon, the Severn and Wye, the Berwick and Kelso, the Gloucester and Cheltenham, and other small undertakings, about twenty in number altogether, with an aggregate of 250 miles, and an authorized capital somewhat under a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states "with men and horses or otherwise." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the bill finally passed in 1823, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. A duplicate system of working was at first adopted, the passenger traffic being conducted by single one-horse coaches, while that of minerals was worked by a locomotive engine made under Stephenson's own directions and bearing the simple but significant designation of "No. 1." The first train consisted of 33 coal waggons with

one passenger carriage in the rear; and during a portion of its journey it attained a speed of fifteen miles an hour. It appears to have been only a few weeks or months before horse-power was wholly displaced by steam locomotives. The above notable engine was long exhibited in front of the Darlington Station of the Stockton and Darlington line; but it is now placed under cover, mounted on stonework, in the large Central Station of the same town. This line, the germ, it may be called, of the railway system, proved a great success financially and otherwise. Nevertheless, the employment of locomotives remained almost unknown to the public at large until the opening of the Liverpool and Manchester line, five years later. The Monkland, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—including the Canterbury and Whitstable, a remarkable undertaking, worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in traveling had really taken place; but even then the aid of the press, powerfully and influentially invoked, failed to arouse anything in the shape of enthusiasm. Royal patronage was not bestowed upon the opening ceremony, although eagerly solicited. To the great minds of the time, however, the event assumed more than ordinary importance, and it is reported that the impression made upon Lord Brougham's contemplative mind forced a tear from his eye. Leicester to Swannington came

* For year 1896. Dividends declared annually in December.

next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Brighton, Birmingham and Manchester, and Edinburgh and Glasgow, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

The expenditure incurred in securing legislative authority to construct railways was enormous. The Parliamentary costs of the Brighton Railway averaged £4,806 per mile; of the Manchester and Birmingham, £5,190 per mile; and of the Blackwall, £14,414 per mile! The solicitors' bill for the South-Eastern Railway contained 10,000 folios, and amounted to £240,000. These few facts, however, afford but a feeble idea of the reckless wastefulness of capital on railway undertakings. It is universally allowed that, under a better policy, not only a much better railway system might have been provided, but a saving might have been effected of at least fifty millions.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projectors, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000

miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature. The public mind in the meanwhile was greatly exercised in connection with the lines already opened. The Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying ten per cent. dividends, and some of the smaller lines were yielding even larger returns. Attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. Projectors came forward with abortive schemes, eager to supply a want which seemed insatiable. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania." At least four times as many schemes came before the credulous and overweening public as ever came to receive legislative deliberation, and between the close of the 1845 session and the opening of that for 1846, no less than 1,300 projects were brought out. It was calculated that even the small parliamentary deposits required to be lodged with each Bill would aggregate to something like sixty millions. The coolest and most practical heads were absolutely carried away in the prevailing excitement. It gradually dawned upon the minds of reflecting people, that of the £600,000,000 required, a vast proportion were mere paper projects or competitive schemes, alike unnecessary and uncalled for. At the instigation of the Government, probably, the screw was applied, the Bank rate was raised from two to four per cent. within a month, the alarm spread, shares fell, and even Consols dropped eight per cent. The collapse soon followed: much money was lost, and a deal of wisdom gained.

General legislation relative to railways was introduced about 1840. The lines that had been constructed previous to this were established under

Special Acts. Their wonderful increase, considering the obstacles placed in their way by the aristocracy and landowners, until they saw the land and the property in the vicinity of the lines rapidly improving in value, originated a new species of legislation. More than anything else in the nature of public or private enterprise, it was beginning to be felt that the railways were instrumental in promoting the interests not only of the rich, but perhaps even in a greater degree the interests of the community at large. The enormous development of the trade of the country was ascribed to the instrumentality of railways. It is not wonderful, therefore, that a new branch of law for their regulation was introduced. The variety and repeated alterations in the railway laws showed the difficulty of dealing with the various and often conflicting interests concerned. The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c. In their civil and commercial

importance, and the enormous interests they represented, railways soon came to occupy the attention of leading minds of the day, and an active part in their administration was shared by members of the Government and of both Houses of Legislature. The railway interest has continued powerfully represented. At the present time many members of the Upper House are upon the direction of our railways, and a still larger number of the members of the House of Commons are officially connected with them. This does not, however, represent the aggregate power of the railway interests in the Legislature, for much larger numbers hold more or less a pecuniary stake in the lines.

RAILWAYS IN 1896.

The number of persons employed in working the railways of the United Kingdom in 1896 was 465,112. The number dependent upon this large body must also be very great; and if we take into account the vast numbers besides who are employed in branches of trade which administer to the requirements of railways, the social dependence upon their existence must be something enormous.

At the close of the year 1896 there were in use upon the railways 18,956 locomotive engines, 42,284 carriages for the conveyance of passengers, 16,699 other vehicles attached to passenger trains, 619,081 waggons for the conveyance of live stock, minerals, and general merchandise, and 14,690 miscellaneous vehicles.

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1896, to £1,127,605,366. Of this sum, £1,029,475,335 (which includes £106,345,514 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1895 of £23,365,114, or 2·76 per cent. The £1,029,475,335 is composed of £103,144,070 guaranteed, £276,193,122 debenture, £256,999,644 preferential, and £380,073,903 ordinary stocks and shares, besides a sum of £13,064,596 raised by loans. The net receipts for the year amount to £39,926,698, equal to 3·88 per cent. on the total capital sunk, as compared with £38,046,065 in 1895, with a corresponding capital of £1,001,110,221, which gave a net receipt of 3·80 per cent. It is satisfactory to note in the interest of railway proprietors that the net earnings for the year 1896 give a percentage of 3·88 on the total capital sunk, and that although the percentage is still considerably below the average of former years, it is the highest since the year 1891. The growing confidence of the public in railway stocks is evidenced by the appreciation in the market value of all descriptions of these securities, and it is interesting to note that it is but a few years since that railway companies, who were willing to give from 4 to 5 per cent. interest on their loans, can at the present time raise money at a little more than half that interest, and even at this low rate investors will pay an advance on the issue price of par. The net revenue for the year—as again been largely affected by the increased wages and curtailment of the hours of labour of railway servants, also by the rapid growth of local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit, and to the benefits which the companies derive from the expenditure of the rates. This burden, unfortunately, shews a constant tendency to grow heavier year by year, and so adds another real and substantial grievance to the many under which the railway companies are now suffering.

Gross Earnings of the Railways.—The earnings for the year 1896 amounted to £90,119,122, as compared with £85,922,702 for the year 1895, which gives an increase of £4,196,420, equal to

4·82 per cent. The increase in the passenger receipts is £1,360,378, made up as follows:—

	1896. £	1895. £	Increase. £
1st Class.....	3,133,149	3,034,449	98,700
2nd „.....	2,058,139	1,935,029	123,110
3rd „.....	24,780,290	23,796,137	984,153
Seas. & Peri- odical Tk. } Holders ... }	2,514,767	2,760,352	154,415
	32,886,345	31,525,967	1,360,378

The numbers carried were:

	1896. No.	1895. No.	Increase. No.
1st Class.....	31,362,498	29,990,006	1,372,492
2nd „.....	60,372,782	58,567,859	1,804,923
3rd „.....	683,604,153	841,213,044	47,391,109
Seas. & Peri- odical Tk. } Holders ... }	1,263,863	1,196,827	67,036
	981,603,296	930,967,736	50,635,560

It will be seen that there is an all round increase in numbers and receipts in all three classes, including season ticket holders, and it is satisfactory to have to record, that whereas second-class traffic has hitherto been decreasing it shews this year an increase of nearly two millions in numbers and £123,110 in receipts. This increase is owing to the new plan which is being generally adopted by railway companies who run second class carriages, of calculating the fares upon a scale of 2d., 1½d., and 1d. per mile, according to the class of carriage, thus minimising the difference between the second and third class fare, and increasing the number of travellers in second class. The increase in numbers travelling by third class is 5·64 per cent. over 1895. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1896 to £6,234,520, as compared with £5,833,195 in 1895, being an increase of £399,325 or 6·84 per cent. The total figures of traffic falling under the heading of “goods” are £46,175,335, as compared with £44,034,825 in 1895, an increase of £2,140,450, or 4·85 per cent. The aggregate is made up of £25,901,425 from merchandise; £18,930,796 from minerals; and

RAILWAYS OPENED IN 1896.

North Wales and Liverpool Committee	Hawarden Bge.	Bidston Jet.	Mich. 28	14

£1,343,114 from live stock. The total quantity of goods carried in 1896 was 356,468,009 tons, as compared with 334,230,991 tons in 1895, showing an increase of 24,237,018 tons, or 6'65 per cent.

Expenditure.—The total working expenses of the whole of the railways for the year 1896 amounted to £50,192,424, equal to 53 per cent. of the gross earnings as compared with a total of £47,875,637 for the year 1895, equal also to 56 per cent. The increase compared with 1895 amounts to £2,315,787 or 4'83 per cent. The total number of miles travelled by passenger and goods trains during the year 1896 was 353,405,984 or 1'154,389 more than in 1895. Analysing the expenditure we find the item £12,929,165 for locomotive power; £4,263,664 for repairs and renewals of carriages, &c.; £8,167,546 for maintenance of permanent way, stations, &c.; and £15,560,499 for traffic expenses. The locomotive expenses in 1896 amounted to 8'77d. per train mile.

Compensation.—The amount paid for compensation for personal injuries sustained during the year 1896 amounted to £118,553, as compared with £120,697 for the year 1895, resulting in a decrease of £2,144, for which the railway companies are to be congratulated, seeing that they carried

nearly 51 millions more passengers than in 1895. In the movement of goods the companies have paid for damages and losses £271,169, as compared with £232,487 in 1895, an increase of £38,682.

We subjoin a statement showing the amounts paid by the principal companies under both heads:—

COMPANY—	Passengers.	Goods.

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares. From 1st November, 1891, the Great Northern Railway Company also abolished second-class fares to all stations north of Hatfield; from 1st January, 1892, the Great Eastern abolished it in the provinces; the Cambrian followed on 1st May of the same year, when it also disappeared from all journeys between London and Scotland, and on the 1st of July, 1897, the Furness Company discontinued second class accommodation.

Net Result of Working the Railways.—The gross receipts compared with those of the preceding year, show an increase from passengers (which includes season ticket, carriage, horse, dog and post office mail traffic) of £1,759,703; from goods, £2,140,450, and from rents, tolls, navigation and steamboats, &c., £296,267, or a total increase from all sources of £4,196,420. The net receipts for 1896 on the capital outlay give a sum of 3'88 per cent., compared with 3'80 per cent. for the year 1895, and 3'77 per cent. for the year 1894. As may be seen, however, on page 723, that over 23 millions additional capital has been raised during the year 1896, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive, and coupled with the fact that working expenses, and rates and taxes are yearly increasing in a disproportionate ratio to the net profit, a per-

centage of 3'88 on the net receipts for the year must be viewed as a very favourable result.

RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the increased immunity from accident, as evidenced by the great decline for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1895, the cost per passenger train-mile for personal injury was only 0'164., and in 1896 only 0'154. In loss and damage of goods, the cost in 1895 was 0'381., and in 1896 0'411. per goods train-mile. The gradual minimisation of the amount paid by the companies for compensation is owing to the improved modes of working and the mechanical appliances which have been adopted to secure the safety of the travelling public, and it is in facilitating this security that some of the chief causes of increase of cost in railway working—such as the more general adoption of the block system, and the system of interlocking points and signals, and of improved continuous brakes, on which the Board of Trade have insisted—may be accounted for. It is also very noticeable that on those lines where these improvements have not been carried out, the want of them has largely contributed to the accidents which have occurred. The general report to the Board of Trade for 1896 shows that although accidents and collisions of a serious nature have occurred during the year to passenger trains, yet the numbers (particularly in the case of the number killed) are very low when compared with the

millions of passengers carried by the companies during the year.

The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,093 killed and 16,879 injured (as compared with 1,090 killed and 9,318 injured in 1895).

The increase in 1896 in the number injured is owing to an order recently made by the Board of Trade, regarding the mode in which the returns are to be compiled by the Railway Companies. Hitherto some Companies have only reported accidents of gravity, but they are now directed to report all accidents, which prevent the servant injured from being employed for five hours on his ordinary work on one of the three working days next after the accident. We will now proceed to investigate under three distinct heads the various causes from which these accidents arose.

Accidents to Passengers.—Five passengers were killed and 338 injured from accidents to trains, rolling stock, permanent way, &c. (as compared with 4 killed and 399 injured in 1895), while 88 passengers were killed, and 1,198 injured from other causes—such as falling between carriages and platforms, or on to the platforms, on getting into or alighting from trains, passing over the line at stations, falling out of carriages during the travelling of trains, and is inclusive of 220 injuries resulting from the closing of carriage doors. In

addition to the above may be recorded 5 killed and 515 injured by accidents in which the movement of railway vehicles was not concerned, viz.: ascending or descending steps at stations, falling off platforms, &c., and is inclusive of 77 injured by being struck by barrows or stumbling over packages.

Accidents to Servants in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles used exclusively upon railways is concerned, show that 447 were killed and 3,986 injured during the year; of this number 3 deaths and 153 injuries were caused by collisions, 18 were killed and 488 injured in coupling or uncoupling vehicles, 23 were killed and 155 were injured by passing over or standing upon buffers during shunting, 15 were killed and 491 injured in getting on or off, or falling off, engines, waggons, &c.; 6 were killed and 344 injured whilst spragging or chocking wheels, 18 were killed and 445 injured by moving vehicles by capstans, turntables, props, &c., and 52 were killed and 506 injured during shunting operations; 101 were killed and 164 injured whilst working on the permanent way, sidings, &c., and 92 killed and 185 injured whilst walking, crossing, or standing on the line. In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not

RAILWAY SPEED.

concerned, have occurred, viz., 11 killed and 2,605 injured whilst loading, unloading, or sheeting waggons, 3 killed and 675 injured by the falling of waggon-doors, lamps, bales of goods, &c., 14 killed and 333 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

Accidents to Persons other than Passengers or Servants.—Under this head is classed casualties whilst passing over railways at level crossings; this caused 51 deaths and 27 injuries in 1896 (as compared with 65 deaths and 38 injuries in 1895). There were 261 deaths and 110 injuries resulting from persons trespassing on the railways, 114 persons committed suicide upon the lines in 1896 (compared with 96 in 1895).

The above figures may appear formidable, but in analysing them it becomes necessary to review the business done by the railways of the United Kingdom during the year 1896. The companies carried over 980 millions of passengers holding ordinary tickets, and besides this number there were over one million and a quarter persons travelling with season or periodical tickets (the number of journeys made with these tickets can only be guessed at); still the companies must have carried over 1,000,000,000 of passengers (a number not very far short of the entire population of the globe), and also moved 356,000,000 tons of goods and minerals, and run 354,000,000 of train miles. It will be interesting here to make a comparison of railway accidents with the number of persons "run over" in the streets of London. During one recent year 140 were killed and 5,330 injured from this cause, and assuming the population of London to have been five and a half millions, it will be seen that the average per million of population killed in the streets was *twenty-five* and injured *nine hundred and sixty-nine*, whereas the number of railway passengers killed by accidents to trains was *one in the million* of population, or one in 200 millions of the total number of passengers; those *injured* from the same cause being respectively *72 per million* and one in $2\frac{1}{2}$ millions. These results are mainly attributable to the great development of signalling and appliances for stopping trains which are in use at the present time.

BLOCK SYSTEM.

There has been no relaxation during the past year in the progress made for rendering railway working more safe, by the extension of the interlocking and absolute block systems over a larger railway mileage, and continual progress is reported in this matter, so essential to the safe working of the railways. The proportion in which the signal and point levers had been interlocked on railways was 99·7 per cent. in England and Wales, in Scotland 99, and 97·7 per cent. in Ireland, so that 99 per cent. is now given for the United Kingdom. At the end of the year the absolute block system had been adopted on 11,235 miles out of 11,252 miles of double lines open for traffic. When the orders made upon the railway companies under the Regulation of Railways Act, 1889, come into full force the absolute block and interlocking systems will have to be generally adopted.

CONTINUOUS BRAKES.

In several cases the good effects of continuous brakes have been specially mentioned, whilst in other cases the accidents and collisions might, according to the statements in the reports of inquiries, have been either prevented or their effects mitigated had the trains been fitted with quickly-acting continuous brakes, automatic in their action, instead of those with which the trains were fitted. It appears that 99·4 per cent. of the vehicles used in passenger trains had been fitted with continuous brakes, leaving 6 per cent. to be so fitted.

THE CHEAP TRAINS ACT.

The "Cheap Trains Act, 1883," is a measure which affects not only railway shareholders and the public generally, but especially the working classes whose domiciles have been interfered with by the extension of the railway systems into crowded centres of London and other large urban areas. The Act has been received by the railway companies with indifference, its provisions being regarded as partial so far as free and untaxed locomotion is concerned, and nothing less than total repeal of all taxation is the universal desire of the railway proprietors and authorities.

The Act, which took effect 1st October, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare

for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of two per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

If at any time the Board of Trade have reason to believe that upon any railway a due and sufficient proportion of accommodation is not provided at fares not exceeding a penny a mile, or that such proper and sufficient trains are not provided for workmen going to and returning from their work, at such fares and at such times between six in the evening and eight in the morning as appear to the Board of Trade to be reasonable, steps may be taken to compel the company to provide such accommodation.

Provision is also made in the Act continuing the companies' powers as to special mileage and exceptional charges, and also enlarging their powers in dealing with the charges over distances which include fractions of a mile over a quarter of a mile. The Queen's forces, including officers or men in the navy or naval volunteers, or in the regular, reserve, or auxiliary forces of the army, or in any police force when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

RAILWAY SERVANTS' RISKS.

Some idea of the relative amount of risk run by the different classes of railway servants is afforded by the table on p. 728, which shows the number of men employed in various occupations, and the number of fatal accidents and injuries to each class, in the year 1896.

The figures referring to goods guards and shunters are a very startling record of the dangers to which these men are exposed, necessarily in a few cases; but in a great many instances they arise from indifference, or daring, which ordinary reason should be able to restrain. That most dangerous part of their employment, viz., the coupling and uncoupling of waggons, has recently been greatly relieved.

FURTHER LEGISLATION FOR RAILWAYS.

The report by the Board of Trade in accordance with section 24 of the Railway and Canal Traffic Act, 1888, on the classification of merchantize traffic and schedule of maximum rates applicable thereto, determined in respect of the various companies, shows that the proposed rates and the actual charges approach nearer than anticipated. The adoption of the New Schedules would result in a serious but not overwhelming loss, and there is no probability that the loss would be recouped by an increase of traffic, as the decrease in revenue would affect hundreds of thousands of rates, and the reduction for any particular class of goods would be too small to encourage new traffic. As to terminals for station accommodation, and charges for servants' labour, the Board of Trade have adopted a uniform maximum based on as fair an average as it is possible to attain, and have limited the charge to services for loading, unloading, covering, and uncovering. It is also proposed that in all cases there shall be a truck rate for the conveyance of animals. The Companies believe that, if they rightly understand the principle laid down in the report as to the revision of rates, no serious

difference will be found to exist, but that it is the failure of these schedules to give due and fair effect to those principles that stands in the way of an agreement between the Board of Trade and the Companies. The new rates operated on and from January 1, 1893. The Workmen's Compensation Act, 1897. This Act, which received the Royal assent on August 6, 1897, and will come into operation on July 1, 1898, is intitled "An act to amend the law with respect to compensation to workmen for accidental injuries suffered in the course of their employment."

The Employers' Liability Act of 1880 only gives compensation in cases where the personal injury is caused by the negligence of the employer or his representatives, or by a defect in the works or machinery used in his business. The Act of 1897, entirely disregards the cause of the accident, with the exception of the wilful misconduct of the injured workman himself, and awards compensation to employes in all cases of personal injury by accident arising out of and in the course of their employment. It further provides that compensation for injuries received whilst performing duties involving considerable personal danger shall become a charge upon the profits of the undertaking, thus throwing a serious burden upon Railway Companies and other employers, specifically enumerated in the 7th section of the Act. The new Act will in time cause the entire extinction of the Companies' Accident Insurance Societies, by whatever title they may be known.

THE RAILWAY CLEARING HOUSE.

The question must often have arisen with the travelling public, when booking from a particular company's system to another, and probably before arriving at the destination having passed over several companies' lines, as to how the allocation of the through fare to each of the several companies, whose lines have been traversed by the issue of the through ticket, is attained. This business of allocation is conducted on what is termed "the Clearing System," and the arrangements are under the superintendence of a committee appointed by the Boards of Directors of such several railway companies who are parties to the Railway Clearing System. Lord Claud Hamilton is the Chairman and Mr. H. Smart the Secretary of this large institution, the premises of which are situated in Seymour Street, N.W., adjoining the L. & N. W. Euston Station. The *modus operandi* of dealing with traffic passing over more than two companies' lines, is as follows:—The stations render to the Clearing House, through their respective companies, a

monthly return of all through bookings, and the business of the Clearing House is to manipulate these returns, afterwards crediting each company with their proportion of those bookings. The goods, parcels, &c., traffic is dealt with in a similar way. Where two companies only are concerned the division of the receipts is, as a rule, settled privately and not dealt with through the Clearing Committee. The Clearing House is also a meeting place of the delegates from all companies, where arrangements are made relative to the working of through traffic; fares are compiled, tolls, proportions, etc., which each company shall receive in division are arranged, and disputes and queries, which of necessity arise in matters of so complicated a nature, are settled. The Clearing Committee minute the business transacted and circulate copies among the companies. There are also numerous other difficulties in working through traffic which are minimised by the Clearing System. The institution was opened in January, 1842, and obtained legal powers by the passing of the Railway Clearing Act in 1850.

Indian Railways.

The construction of Railways in India, which commenced in 1853, has been conducted on three different systems; first, the employment of companies under a system of guarantee; secondly, by the State through its own officials; and thirdly, by assisted companies either with or without guarantee or subsidy from the State, and working with capital wholly raised by themselves or partly with capital provided by the State. Out of eight lines constructed on the first system, five* have been purchased by the State. Two of these are worked by companies. The more important, the East Indian line, is carried on by the same company that constructed it in the first instance, on special terms as to the sharing of profits. The second, the South India line, is in the hands of a new company, whose capital was subscribed by the shareholders of the old one. The three remaining lines are worked by the

State, and all five come into the category of State lines in the accounts of the Government of India.

The general statistics for Indian railways in regard to their capital outlay, traffic, receipts, &c., will be found on page 462. In the following table, the annuities and stock created for the purchase of the lines, the yield on which does not depend on the profits of working, are excluded. The debenture stocks of the companies are also excluded. Some of the principal State lines worked by the State are given for purposes of comparison.

The figures of the Rajputana-Malwa line, which is worked by the Bombay-Baroda, are given separately, but in other cases the statistics of some minor undertakings are included in the totals of the railway by which they are worked.

The railways of India involve a yearly loss to the Indian revenues, amounting in 1896-97 to Rs. 2,810,200, and from the commencement to Rs. 55,574,264. The loss is due to the onerous rate at which the money was in the first instance raised, and to the fall in the value of the rupee while the liabilities continued to be largely calculated on a gold basis. See Table, p. 732.

*East Indian; *Eastern Bengal (part of the system now so called); *Oudh and Rohilkhand; *Scinde, Punjab and Delhi (now part of North-western system); *South Indian; Bombay, Baroda and Central India; Great Indian Peninsula; Madras.

Indian Railways.—STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, ETC.

In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

¹ Standard Gauge. ² Opened to traffic from July 1, 1896. ³ Metric Gauge.
⁴ Although for convenience classed amongst State Railways, this line is the property of the Bengal Central Railway Company, to whom the working was made over on Jan. 1, 1897.
⁵ Working transferred to a Company from Sept. 1, 1896. ⁶ £8,757,970 at 5½%; £500,000 at 4½%; £999,900 at 4½%; these last two amounts have been lately converted into capital stock.
⁷ In addition to the guaranteed interest a bonus of £2 5s. 6d. for 2st half and 6s. second half year of 1896, was declared payable in following half years.
⁸ £0 12s. 9d. ⁹ 10s. 9d. ¹⁰ £0 12s. 6d. for 1896 was declared.

County and Municipal Directory of England and Wales.

Containing a List of Counties, with the Acreage, Population, and Rental, the names of Lords-Lieutenant, High Sheriffs in office in January, Chairmen of Quarter Sessions and of County Councils, Clerks of the Peace and of County Councils, County Treasurers, Chief Constables (with the number of Officers), County Surveyors, Treasurers, Coroners &c. Also of Cities and Municipal Boroughs, with their Poor Law valuation, the names of the High Stewards, Mayors, Recorders, Stipendiary Magistrates, Town Clerks, &c. The statistical figures as to area, population, &c., are given according to the alterations of the county boundaries effected pursuant to the Local Government Act of 1888, the County Boroughs being excluded from the Counties.

The County Boroughs named in the Third Schedule of the Local Government Act, 1888, are distinguished by having a * prefixed.

Coinage, 1890—1896.

GOLD, SILVER, AND BRONZE MONIES ISSUED 1890—1896, FROM THE LONDON AND AUSTRALIAN MINTS

Year.	GOLD.			Silver.	Bronze.	Total.
	Lon	Mints.	Australian Mints.			
1890	7,680,200	5,281,500	12,961,700	1,694,688	90,285	14,746,673
1891	6,723,600	5,422,500	12,146,200	1,000,548	89,535	13,236,283
1892	13,907,800	6,325,700	20,233,500	849,932	58,556	21,141,988
1893	9,266,300	6,587,800	15,854,100	1,008,971	46,664	16,909,735
1894	5,678,100	7,233,900	12,912,000	942,856	33,485	13,888,341
1895	3,811,200	6,923,900	10,735,100	1,196,168	40,995	11,962,263
1896	4,808,900	7,110,400	11,919,300	1,735,161	122,860	13,277,321

Note.—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the three Mints of London, Sydney, and Melbourne. Coins struck at Sydney and Melbourne are distinguishable, however, from those struck in London by the fact that they bear minute "Min Marks;" the letter S being born by Sydney coins and M by those issued from Melbourne.

For the use of Parish Councils, Overseers, Churchwardens, Vestry Clerks, Magistrates' Clerks, Clerks of the Peace, and Town Clerks, Superintendent and District Registrars, Coroners, and County, Municipal, District, and Parochial Officers and Citizens generally, showing the days when certain Official Duties are to be performed; also the days when Inland Revenue Licences expire.

NOTA BENE.—1. A rule of law is that Sunday is no day. Any act, therefore, which falls to be done on a Sunday should be performed the day previous unless statutory provision exists to the contrary. Every meeting or adjourned meeting of any vestry or corporation other than Municipal, or of any public company, for the nomination, election, or admission of any officer, or for the transaction of any affair of such vestry, corporation, or company, which according to any Act of Parliament, charter, prescription, or usage whatsoever, is or shall be required to be held on any day which shall happen to be a Lord's Day, shall, by 3 & 4 Will. IV. c. 31, be held on the Saturday preceding or on the Monday ensuing; and every matter transacted at any meeting or adjourned meeting held upon any Lord's Day shall be absolutely void. When no such nomination, election, or admission shall have taken place on the Saturday, every person whose term of office would have expired on any such Lord's Day shall continue in office, and exercise and enjoy all powers and privileges, until the Monday next ensuing.

2. By the Municipal Corporations Act, 1882, when a limited time from or after any date or event is appointed for the doing of any act, the time is exclusive of the day of that date or of the happening of that event, and as commencing at the beginning of the next following day; and the act is to be done on the last day of the limited time, unless that should be a Sunday, Christmas Day, Good Friday, Monday or Tuesday in Easter Week, or a day appointed for a public fast or thanksgiving, in which case the act will be done in due time if performed the day following. The same applies to any act directed to be done on a certain day, and that day falls on one of the days above mentioned. Further, if any act or proceeding is directed to be done within any time not exceeding seven days, the days above specified are not to be reckoned.

3. "Three clear days" means that three days must intervene between the day on which a notice is given and the day on which a meeting is held, and notices sent by post must be delivered three clear days before a meeting.

4. In regard to Bills of Exchange that fall due on a Sunday, Good Friday, Christmas Day, or a day appointed for a fast or thanksgiving, presentation for payment should be made on the preceding business day. Bills of Exchange falling due on a Bank Holiday are not payable until the following day, and when the last day of grace is a Sunday, and the second day of grace is appointed as a Bank Holiday, such bills are due and payable on the succeeding business day (see 45 & 46 Vict. c. 61).

5. **PARLIAMENTARY ELECTIONS.**—The times that must elapse between the receipt of the writ by the Returning Officer and the dates fixed for the various steps in the election are as follows:—Assuming that the writ is received on the 1st of any month, the notice of election must be issued on the 2nd in Boroughs, and 3rd in Counties. The nomination must take place on the 4th or 5th in Boroughs, and on any day between the 5th and 10th (both inclusive) in Counties. The poll (if any) must be fixed for some date

between the 6th and 9th (both inclusive) in all Boroughs, except those mentioned in Rule 57, Schedule 1., to the Ballot Act, 1872, in which the date may be between the 7th and 12th (both inclusive).

6. **LOCAL GOVERNMENT AUDIT STAMP DUTY.**—The following is the scale of Stamp Duty payable by County and Urban and Rural District Councils and Parish Councils, and by the Chairmen of Parish Meetings on the Audit of their accounts by District Auditors:—

Where the total of the expenditure comprised in the Financial Statement is—		£	s.	d.		
Under £20	...	the sum shall be	0	10	0	
£20	and under £50	do.	0	5	0	
£50	do.	£100	do.	1	0	0
£100	do.	£500	do.	2	0	0
£500	do.	£1,000	do.	3	0	0
£1,000	do.	£2,500	do.	4	0	0
£2,500	do.	£5,000	do.	5	0	0
£5,000	do.	£10,000	do.	10	0	0
£10,000	do.	£20,000	do.	15	0	0
£20,000	do.	£50,000	do.	20	0	0
£50,000	do.	£100,000	do.	30	0	0
£100,000	and upwards	do.	50	0	0	

January.

1 S.—The Land Tax, Income Tax, and the Duties on inhabited houses are due on this date; so are licences for carriages, male servants, and to use armorial bearings. These licences must be taken out before the end of the month and thereafter within twenty-one days after a person becomes liable to duty. Dog licences must be taken out without delay: no grace can be claimed, but on renewal, if with other licences, they may be taken out any time during January.

Holiday on the Stock Exchange, and Bank Holiday in Scotland.

The Registers of Parliamentary, Local Government and Parochial Electors come into force for the year.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made for the regulation and guidance of borough constables since the last quarterly return.

Between this date and the 31st March, the Medical Officer of the parish to visit every pauper lunatic not in an asylum; and before the 7th of this month make a report to the Clerk to the Guardians, or to the Overseers, of his visits during the preceding quarter, which report, within three days after its receipt, is to be transmitted to the Commissioners in Lunacy, and a copy sent to the Clerk to the Visitors of the asylum for the county or borough in which the county or parish is situate.

Clerk to Guardians and Overseers of parishes on this date, or as soon after as may be, to make out an annual list of all lunatics chargeable to the parish, and send copies before the 1st February to the Local Government Board, the Commissioners in Lunacy, Clerk to Visitors of Asylums, and to the Clerk of the Peace of the county, or Clerk to the Justices of the borough, to be by him laid before the Justices.

Return of Paupers relieved on 1st instant and of children boarded-out, to be made to Local Government Board.

On this date, or within ten days after (if no other day be prescribed), municipal corporations to appoint members of the council as trustees of corporate property.

Registrars, except of London districts, to post to the Registrar-General a correct return of births and deaths registered during the preceding quarter.

Coroners to send return of inquests for preceding year to Secretary of State during this month.

Within fifteen days after this date Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnised.

Within fifteen days after this date bankers not registered under the Joint Stock Companies Act to deliver returns at the Stamp Office in London.

3 M.—Quarter Sessions to be held during this week. Under the Quarter Sessions Act, 1894, the Justices in General Quarter Sessions or at any adjourned or special meeting thereof, may at any time, when it may appear desirable for the purpose of not interfering with the Assizes then next ensuing, fix or alter the time for holding the then next General Quarter Sessions so that they shall be held not earlier than fourteen days before and not later than fourteen days after the week in which they would otherwise be held.

Within one week after the termination of Quarter Sessions the gaoler to send to the Secretary of State a calendar of the prisoners tried thereat.

7 F.—Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of the names, ages, and residences of all male persons of full age, and also, when and as required by the Overseers, of all women who have died between the 8th September (or the date when the preceding return was made) and the 31st December.

Latest date for Medical Officers to send quarterly list of pauper lunatics visited by them to the Clerk to Guardians.

Solicitors, conveyancers, special pleaders, and draughtsmen in Equity in *Ireland* must renew their certificates between this date and Feb. 6.

8 S.—Latest date to pay Fire Insurances due at Christmas.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and to Clerk to Visitors.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

11 Tu.—Hilary Law Sittings commence.

14 F.—Latest date upon which notices of appeal against supplemental valuation lists in the Metropolis can be given.

Registrars to apply on or before this date to the officiating minister of every place of worship in which marriages may be solemnized within their sub-districts, for certified copies of all entries of marriages solemnized, or for certificates of "No Registry," during the quarter ended 31st December last. Registrar to deliver these, on or before the 20th of this month, to the Superintendent Registrar.

Bankers' returns to be delivered at the Stamp Office not later than this date.

Latest date for Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnized.

21 F.—On or before this date Registrars to personally deliver to Superintendent Registrars certified copies of all entries of Births, Deaths, and Marriages made during the quarter ended 31st December last. Last day for Local Authority to send to Local Government Board reports under Canal Boats Acts.

On or before this date returns to be sent to Mines Inspectors, giving particulars up to preceding 31st December, as required by s. 33 of Coal Mines Regulation Act, 1887.

Latest date for Savings Banks to send annual statement of affairs to Commissioners for Reduction of National Debt.

24 M.—Between this date and the 1st February, Companies, Corporations, and County Councils compounding for stamp duties with the Commissioners of Inland Revenue to deliver half-yearly accounts to the Commissioners.

31 M.—Latest date for Clerk to Visitors of Asylums to transmit report to Commissioners in Lunacy.

Last day for Local Authorities to send to Local Government Board Analysts' reports for preceding year.

Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of the registers of Births, Deaths, and Marriages for the quarter ended 31st December last.

Railway Companies, on or before this date, if required, to send an abstract of their annual account to the Clerk of the County Council and the Overseers of the Poor of the counties through which the railway passes.

February.

1 Tu.—Within 21 days after this date the Clerk of the Peace of every county, and the Town Clerk of every borough, to transmit to the Secretary of State a printed copy of the Register of Electors.

On or before this date borough Coroners to send to the Secretary of State returns in writing of inquests held by them or their deputies in the preceding year.

Latest date for Clerk to Guardians to transmit copies of annual list of pauper lunatics to Commissioners in Lunacy, Local Government Board, Clerk to Visitors of Asylums, Clerk to the Council of any County, and to the Town Clerk of any borough.

Reports of Medical Officers of Health should be sent to Local Government Board during this month.

Companies, Corporations, and County Councils compounding for stamp duties to deliver half-yearly accounts and pay duty to Commissioners of Inland Revenue not later than this date.

Four weeks at least before the 25th March Clerks to Board of Guardians to estimate the probable expenditure for the ensuing half-year and the probable balance due to or from each parish for the current half-year, and prepare contribution orders to be laid before the Guardians before the expiration of the current half-year. These estimates and the subsequent apportionments must be made on the "Assessable" value of Parishes as determined by s. 2 of the Agricul-

ral Rates Act, and not on rateable value as hitherto.

2 W.—Candlemas. Scotch Quarter Day.

5 S.—Latest date to renew certificates of Solicitors, Conveyancers, and Draughtsmen in Equity in Ireland.

19 S.—Nine days at least before the 1st March Town Clerk to publish a notice of the election of auditors.

21 M.—Latest day for delivery of nomination papers in election of Auditors in Boroughs.

22 Tu.—Latest date for the Clerk of the Peace of every county, and the Town Clerk or other officer having charge of the register, to send a printed copy of the Register of Electors to the Secretary of State.

24 Th.—Four days at least before the 1st March the Mayors of boroughs to publish notices of the situation of polling-places for the election of Auditors.

March.

1 Tu.—Between this date and 1st August, persons shooting or taking wild birds are liable to penalties under the Wild Birds Protection Act, 1880, and persons selling or exposing for sale any hare or leveret (except a foreign hare) are liable to penalties under the Hares Preservation Act, 1892. Under the Wild Birds Protection Act, 1894, a Secretary of State may, on the application of any County Council, prohibit the taking of eggs within a county or any part thereof.

Ordinary day for election of elective Auditors in boroughs.

The Occupier of every Factory and Workshop must on or before this date send return of persons employed during year ending 31st December last, to Inspector of Factories, in pursuance of the Factory and Workshop Act, 1895.

Town Council of borough, on or before this date, to transmit to the Local Government Board a statement of receipts and expenditure up to last audit.

The Annual Parish Meeting is to be held in every Rural Parish on some day between 1st March and 1st April, to appoint Overseers, and where there is a Parish Council to elect the members thereof.

Borough Treasurers to submit their accounts to audit within one month from this date, or that approved of by the Local Government Board for the making up of such accounts.

15 Tu.—After this date, and until the 1st August, any person having in his control or possession any wild bird killed or taken in the United Kingdom since the 1st of this month, is liable to a penalty under the Wild Birds Protection Act, 1880.

20 S.—Within fourteen days after this date a special session to be held for appointment of the days for holding not less than eight nor more than twelve special sessions for executing the purposes of the Highways Act. [This is liable to alteration by the County Council.]

21 M.—Railway Companies to pay quarterly instalments of Income Tax on or before this date.

25 F.—Quarter Day. Union accounts to be made up to this date, or to the end of the Union week first completed after this date. Returns made to Local Government Board under Local Taxation Returns Act, 1877, by Corporations,

and other local authorities to be made up to this date. (See 31st March.)

Half-yearly accounts of School Boards to be made up to this date.

Overseers of the Poor to be nominated and appointed within fourteen days after this date in Urban parishes.

Churchwardens and Overseers in Urban parishes and Overseers in Rural parishes, within fourteen days after other Overseers have been appointed to succeed them, to deliver to such succeeding Overseers a just, true, and perfect account in writing of all sums of money in their hands, as required by 17 Geo. II. c. 38, s. 1.

Medical Officer of Unions entitled to be paid any extra fees, to make out his quarterly account to this date, and lay the same before the Guardians: his claim to accrue at the expiration of one calendar month following this date, but the Guardians may pay it earlier.

The Overseers, and every Collector appointed for a Parish, to make up their accounts to this date, and deposit them for the free inspection of the ratepayers at some house within the parish for seven clear days at least before the audit.

Trustees of Parochial Charities to prepare accounts to be delivered to Parish Councils, and forward copy to Charity Commissioners within fourteen days.

Surveyors of Highways and Waywardens to be elected on this day or within fourteen days after in those Rural Districts in which the transfer of powers to the District Council has been postponed by order of the County Council and Local Government Board.

District Medical Officers to notify at the commencement of this quarter to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months; advise as to the continuance of such paupers in such list, and take the direction of the Board thereon.

31 Th.—Under the Local Government Acts, 1888 and 1894, the local financial year ends on this date. All enactments relating to accounts of local authorities, or to meetings or other matters, are to be modified so far as is necessary to adapt them to the Act. The accounts of all County Councils, Urban and Rural District Councils, and of all Parish Councils and Parish Meetings, must be made up to this date.

Railway companies unincorporated to furnish statements of capital, traffic, and working expenditure to the Board of Trade not later than this date. Incorporated companies to send their returns within fourteen days after their first ordinary half-yearly meeting held in each year.

Quarter Sessions to be held the first week after this date. (See January 1.)

Hawkers', Refreshment-House Keepers', and Packet Boat liquor and tobacco licences expire on this date.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made since 31st December for the regulation and guidance of constables.

Treasurer of borough to submit his accounts for audit if made up to the 1st March.

April.

1 F.—In the months of April and May, or one of them, Overseers to ascertain with respect to all property in their parishes, whether any man

is entitled to be registered as a voter by reason of his being an inhabitant occupier, and enter in the Rate-book the name of every man so entitled, with a description of the dwelling.

Notice of intention to apply for an order under the Light Railways Act, 1896, must be advertised for two weeks during April or October.

Between this date and the 30th June, the Medical Officer of the parish to visit pauper lunatics not in asylums. (See January 1.)

The walls and ceilings of Common Lodging Houses to be limewashed in the first week of this month.

Registrars, except of London districts, to post to the Registrar-General a correct return of births and deaths registered during the preceding quarter.

District and Parish Councils to be elected this month.

During this and the two following months owners may be compelled to cut down oak-trees growing in hedges near highways ordered to be widened.

4 M.—Quarter Sessions to be held this week.

5 Tu.—Returns of assessed taxes made to this date.

6 W.—Commencement of the Financial year for Imperial purposes.

Within seven days before the 15th Clerks of the Peace and Town Clerks to send their precepts to the Overseers.

The Fund for aiding the equalisation of Rates in London is to be based on the Rateable Value as at this date in each year.

Latest date for Medical Officers to send quarterly lists of lunatics to Clerk to Guardians.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitation.

Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of all male persons of full age, and also, when and as required, of all women who have died during the three months ending 31st March.

Hilary Sittings end.

9 S.—Latest date to pay Fire insurances due on Lady Day.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

On this date, or within seven days before, Clerks of the Peace and Town Clerks to send precepts and copies of registers to Overseers.

13 W.—Registrars to apply to officiating ministers on or before this date for certified copies of all entries of marriages solemnized by them during the quarter ended 31st March.

15 F.—Guardians of Unions at their first meeting after this date to appoint the Union Assessment Committee, consisting of not less than six nor more than twelve.

Urban and Rural District Councillors and Guardians and Parish Councillors come into office.

Urban and Rural District Councils and Boards of Guardians must hold their Annual Meetings as soon as convenient after this date. Parish Councils must hold their Annual Meeting on or within seven days after this day.

20 W.—On or before this date Registrars to personally deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages made during the previous quarter.

19 Tu.—Easter Sittings commence.

30 S.—Latest date for Superintendent Registrars to send to Registrar-General certified copies of entries of Births, Deaths, and Marriages made during the quarter ended 31st March.

May.

2 M.—Local Authorities in counties and boroughs to send to Secretary of State copies of orders made under Ballot Act as to polling districts.

Copies of draft orders and other documents under Light Railways Act, 1896, to be sent to County, District, and Parish Councils, and various Government departments, during May or November.

Overseers in the Metropolis to make and deposit supplemental valuation lists before 1st June.

Holiday at the Bank Transfer Office and Stock Exchange.

Bank Holiday in Scotland.

14 S.—Between this date and the 4th of August, no person to sell, expose for sale, or buy for sale any description of oysters other than those known as "deep-sea oysters."

15 S.—Scottish Quarter Day.

Licences for beer retailers, retailers of wine and spirits, and dealers in tobacco and snuff in Scotland expire.

18 W.—Within sixty days after this date the half-yearly receipts for interest to savings-banks are to be made out and allowed.

24 Tu.—Queen's Birthday. The Custom House Inland Revenue Offices, and other Government Offices and the Public Dockyards are closed on the day on which the birthday is appointed to be kept.

27 F.—Easter sittings end.

31 Tu.—Before the 1st June Friendly Societies to make returns to the end of the preceding year to the Registrar of Friendly Societies.

Latest date for Overseers to enter names of inhabitant occupiers in rate-book for registration purposes.

Latest date for Overseers in the Metropolis to deposit supplemental valuation lists.

June.

1 W.—Annual returns of rates, taxes, tolls, and dues levied for local purposes, required by Local Taxation Returns Act, are to be furnished to the Local Government Board in this month.

Where any poor-rate due on the 5th of January last, from an occupier in respect of premises capable of conferring the franchise for a borough, remains unpaid on this date, the Overseers to give a notice, on or before the 20th of this month, to such occupier that he will not be entitled to have his name in the List of Voters in respect of his occupation unless he pays such rate on or before the 20th of July next.

4 S.—Where an owner of small tenements who has become liable to pay the poor-rates under the Poor-Rate Assessment and Collection Act, 1869, omits or neglects to pay before the 5th of June any rate due previously to the preceding 5th of January, he will not be entitled to any abatement, but must pay such rate in full.

7 Tu.—Trinity sittings commence.

15 W.—Sale of oysters prohibited. (See May 14.)

20 M.—On or before this date Overseers to publish the ownership portion of the register of county voters, and a notice to voters to send in claims to vote on or before the 20th July. Publication to be effected by affixing copies to churches and chapels, or to public buildings and post offices, there to remain for a period including two Sundays at least, but not later than the 20th July.

Overseers to publish notice that no person will be entitled to have his name in the list of Parliamentary £10 and inhabitant occupiers, or £10 Burgesses and County electors unless, on or before the 20th July, he has paid all rates due previous to the 5th January last. Notices of like effect are also to be served on occupiers who have not paid such rates.

Railway Companies to pay quarterly instalments of Income Tax on or before this date.

24 F.—Quarter Day. Medical Officers of Unions entitled to be paid any extra fees to make out their accounts quarterly to this date, and lay the same before the Guardians.

25 S.—Sheriffs of London to be elected.

27 M.—Quarter Sessions to be held during this week.

District Medical Officers at the commencement of this quarter to notify to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months.

July.

1 F.—Watch Committee of Town Council to send to Secretary of State a copy of all rules made since 31st March for the regulation and guidance of constables.

On this date at the latest the Board of Trade to lay before Parliament a Report respecting the applications to them, and their proceedings under the Electric Lighting Act, 1882.

Between this date and the 30th of September, the Medical Officer of the parish to visit pauper lunatics not in asylums.

Special Meetings of Local Authorities for the granting of Licences to deal in Game to be held during this month.

Registrars, except of London districts, to post to the Registrar-General a correct return of Births and Deaths registered during the preceding quarter. The Workmen's Compensation Act, 1897, comes into force on this day.

Return of paupers relieved on this date to be made to Local Government Board.

Before the expiration of this month County Councils are to appoint valuers for the purposes of the Finance Act, 1894, for the valuation of property for Estate Duty.

Licences to deal in Game expire.

4 M.—Boards of Commissioners under the Act for the Lighting of Towns in Ireland are elected on this day.

5 Tu.—The following licences expire on this date:—Appraiser, auctioneer, house agent, beer-dealer (retail) and retailer of table-beer to be drunk off the premises, dealer in plate, rectifier and compounder of spirits, dealer in

spirits, for use of still or retort, retailer of and dealer in sweets and made-wines, manufacturer of and dealer (not a publican) in tobacco and snuff, manufacturer of vinegar, dealer in foreign wines.

6 W.—Medical Officers to send quarterly lists of lunatics to Clerk to Guardians before this date.

Latest date to pay Fire insurances due on Midsummer Day.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and to Clerk to Visitors.

9 S.—Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

13 W.—Registrars to apply to officiating ministers on or before this date for certified copies of all entries of marriages solemnized by them during the quarter ended 30th June.

20 W.—The Clerk of the Peace in every county, riding, or division must, before this date, issue his precept to the Overseers, requiring them to make out, before the 1st September next, a list of all persons qualified to serve on juries, and specify in the list those qualified as Special Jurors.

Within two days after this date Tax assessors and collectors to make out and deliver to Overseers a list of the persons who have not paid the assessed taxes due for the year preceding the 6th April last.

Latest date for Registrars to deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages made during the previous quarter.

Latest date for county and parochial electors to send to Overseers their claims to vote.

Latest date for Occupiers in counties and Householders in boroughs to pay poor-rates due in respect of the year preceding 5th January last, so as to be retained on the Register of Voters.

Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of all male persons of full age, and also when and as required, of all women who have died between 1st April and 15th July.

Latest date for tax-collectors to send to Overseers lists of persons who have not paid assessed taxes for the year preceding April 6.

On or before this date Overseers to make out list of persons disqualified as occupation voters by reason of the non-payment by the 20th of the poor-rates due on the preceding 5th January. Such list to be open to public inspection during the next fourteen days.

25 M.—On or before this date Overseers to remove copy of Register of Ownership voters from the places where published.

All persons on the Register of Voters in respect of lodgings, and desirous of remaining on the register in respect of the same lodgings, must send to the Overseers, on or before this date, their claims to be so retained.

Between this date and the 1st August, Companies, Corporations, and County Councils compounding for stamp duties with the Commissioners of Inland Revenue, to deliver half-yearly accounts to the Commissioners.

31 S.—On or before this date Overseers are to ascertain from the Relieving Officer acting for their parish or township the names of all persons

disqualified from voting by reason of having received parochial relief.

On or before this date Overseers are to add on the margin of one copy of the ownership portion of the Register, and on the margin of the list of ownership claimants, the word "objected" before the name of every person therein whom they have reasonable cause to believe to be not entitled to be on the new Register; and the word "dead" before the name of every person whom they have reason, from the returns sent by the Registrars of Births and Deaths, or from their own knowledge, to believe to be dead. If it appears that any person is entered in the ownership portion of the Register for the parish or township in respect of a £50 rental qualification, the Overseers are to add the word "objected" before the name of such person, and to insert his name in the occupiers' list.

On or before this date Overseers to make out the occupiers' list in counties, the occupiers' list in boroughs, the old lodgers' list, and the non-resident list.

On or before this date Town Clerk to make out a list of freemen voters.

Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages made during the quarter ended 30th June.

Pawnbrokers' licences expire on this date; also licences to kill game, and to carry a gun.

August.

1 M.—Lammas Day. Scottish Quarter Day.

On or before this date Overseers are to sign one copy of the Register of ownership claimants, and of the lists specified under date 31st July. They are to cause a sufficient number of such lists to be printed, and to publish the Register with their marginal additions and signed by them. The Overseers are also to publish at the same time the corrupt and illegal practices list, and keep a copy of each of such lists, and of the ownership portion of the Register open to public inspection for fourteen days after publication. They are also to keep a copy of the list of defaulters in payment of assessed taxes, and allow it to be inspected, without fee, between 10 a.m. and 4 p.m. on any day except Sunday during the next fortnight; copies thereof to be delivered on payment.

On this date, or on any day until the 20th inclusive, a person desirous of having his name entered in the lodgers' list must send in his claim to the Overseers.

Overseers to make out lists of claims and objections of occupiers and lodgers.

Town Clerks to publish lists of freemen voters on or before this date, and keep copies thereof for inspection during the next fourteen days.

Companies, Corporations, and County Councils to deliver half-yearly accounts and pay duty to Commissioners of Inland Revenue not later than this date.

Clerks to Boards of Guardians are, four weeks at least before the 29th of September, to estimate the probable expenditure for the ensuing half-year and the probable balance due to or from each parish for the current half-year, and prepare contribution orders to be laid before the Guardians before the expiration of the current half-year.

Bank Holiday, in Scotland also.

5 F.—Latest date for inspection of lists of persons who have not paid poor-rates due January 5.

In boroughs in which there are ten acting justices, Licensing Committees to be appointed in the fortnight preceding the 20th August.

12 F.—Trinity Law Sittings end.

15 M.—Latest date for public inspection of the lists specified under date August 1.

Borough and county lists to be affixed to churches if published on the 1st inst.

20 S.—Latest date for Town Clerks and Overseers to receive notice of claims and objections, and of omissions from the Parliamentary Counties, Borough, and Parochial electors' lists and registers.

Latest date for lodgers to give notice of claims to Overseers.

Between this date and the 14th September the Justices in counties other than Middlesex and Surrey to hold the annual licensing meeting, and appoint special sessions for transferring publicans' licences.

On or before this date the Clerk to the Justices to give notice to Overseers of the time and place for holding petty sessions at which jury lists are to be produced.

25 TH.—On or before this date Overseers to deliver to Clerks of the County Council and Town Clerks copies of corrupt and illegal practices lists.

On or before this date Overseers to make out lists of claims and objections. These lists are to be signed and published by the Overseers, who are to keep a copy, with the original notices of claims and objections, open to public inspection at any time between 10 a.m. and 4 p.m. on any day except Sunday during the next fourteen days; and copies are to be delivered on payment.

On or before this date Overseers to deliver to Clerks of the County Council or Town Clerks the following lists:—Ownership claimants, ownership portion of register, ownership electors' objections, two copies of occupiers' and old lodgers' lists, one each of occupiers' and lodgers' claims and objection lists, two copies of the non-resident list, and one each of claim and objection lists.

31 W.—Latest date for Overseers to make out list of persons qualified and liable to serve on Juries.

September.

1 TH.—Licences for the manufacture and sale of playing cards and of patent medicines expire on this date.

List of Jurors and notice of special sessions to be affixed to doors of churches and other places of public worship on the first three Sundays of this month.

3 S.—Between this date and 1 Feb. next (both inclusive), salmon trout or char can only be sent by carrier if outside of package is marked with name of contents.

On or before this date declarations as to misdescription, omission, or other error in registers or burgess lists to be sent to Town Clerks, and in the case of county lists to Clerks of the County Councils; such declarations to be open to public inspection on any day before the 8th inst.

7 W.—As soon as possible after this date, and between the 8th September and the 12th October (both inclusive) Courts for revision of lists of parliamentary voters, burgesses, and county electors to be held by Revising Barristers. Clerk of the Peace to attend Revising Barrister's first Court, and Overseers to attend courts for their respective districts and parishes, produce list of voters, and answer questions.

Last day for inspection of lists of claims and objections to voters.

On or before this date, or at such other time as shall be appointed by the Revising Barrister, Registrars of Births and Deaths to send to Overseers a return of all male persons of full age, and also, when and as required, of all women, who have died between the 16th of July and the time when such return is made.

20 Tu.—Railway Companies to pay quarterly instalments of Income Tax on or before this date.

24 S.—Within the last seven days of this month the Justices in every division in England and Wales are to hold a special sessions for receiving and examining the jury list, when the Overseers are required to attend, and the lists, when approved, are to be forwarded by the Justices' Clerk to the Clerk of the County Council.

Sheriffs of London to be sworn in.

29 Th.—Quarter Day. Union accounts to be made up to this date, or to the end of the Union week first completed after this date.

Overseers' Accounts of Receipts and Payments to be made up to this date.

Half-yearly or yearly accounts of School Boards to be made up to this date.

District Medical Officers to notify, at the commencement of this quarter, to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months.

Within one month after this date annual returns of allowances granted under Poor Law Officers' Superannuation Act, 1896, to be sent to Local Government Board.

The Lord Mayor of London to be chosen.

30 F.—Half-yearly accounts of Urban and Rural District Councils to be made up to this date, and Financial Statements prepared for audit duly stamped.

The following licences expire on this date:—Brewer of beer (not for sale), maker of and retailer of methylated spirit.

October.

1 S.—On or before this date every body corporate or unincorporate chargeable with the duty of 5 per cent. on the annual value, income, or profits of its real and personal property, to deliver to the Commissioners of Inland Revenue a full account of all property in respect whereof such duty shall be payable, and of the gross annual value, income, or profits thereof accrued in the year ended the preceding 5th of April.

Notice of intention to apply for an order under the Light Railways Act, 1896, must be advertised for two weeks during April or October.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made since 30th June for the regulation and guidance of constables.

Between this date and the 31st December, the Medical Officer of the parish to visit pauper lunatics not in asylums.

Registrars, except of London districts, to post to the Registrar-General a correct return of Births and Deaths during the preceding quarter.

The Justices of every county, and the Watch Committee of every borough, on some day in this month, are to transmit to the Secretary of State, for the year ended 29th September last, a statement of the number of offences reported to the police, the number of persons apprehended, the nature of the charges against them, the result of the proceedings taken thereupon, and any other particulars relating to the state of crime within such county or borough.

In this month two or more of the justices having jurisdiction in a borough to appoint as many of the inhabitants not legally exempt as they think fit to act as special constables.

The walls and ceilings of Common Lodging Houses to be limewashed in the first week of this month.

7 F.—Latest date for Medical Officers to send quarterly list of lunatics to the Clerks to Guardians.

10 M.—The following licences expire on this date:—Bankers', retailers of beer, cider, spirits in England and Ireland, and foreign wines; publicans retailing sweets and wines, and dealing in tobacco and snuff; and distillers of spirits.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitors.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

12 W.—The revision of the lists of parliamentary voters, burgesses, county and parochial electors to be completed not later than this date.

Registrars to apply to officiating ministers, on or before this date, for certified copies of all entries of marriages solemnized by them during the quarter ended 30th September.

14 F.—Latest date to pay Fire insurances due at Michaelmas.

15 S.—Town Commissioners in Ireland are elected on this day.

17 M.—Quarter Sessions to be held this week. Music and dancing licences under 25 Geo. II. c. 36, to be granted and renewed.

19 W.—On or before this date Registrars to personally deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages made during the previous quarter.

On or before this date Town Clerks to complete burgess rolls, to come into operation for one year from 1st November next.

Nine days at least before the 1st November (i.e. on the 22nd) Town Clerks to publish a notice of election of Borough Councillors. All election notices must have the names and addresses of printer and publisher on their face.

24 M.—Nomination papers in the election of Borough Councillors to be delivered before five o'clock this day, i.e. seven days at least before the day of election.

Michaelmas Law Sittings commence.

26 W.—Mayor to attend at the town hall to decide on the validity of objections to nomination papers for Borough Councillors.

This day, i.e. four days at least before the day of election, Town Clerk to publish names and addresses of persons nominated for Borough Councillors, and Mayor to give notice of polling places.

31 M.—Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages made during the quarter ended 30th September.

Certificates of Writers to the Signet, solicitors, agents, and notaries public in *Scotland*, and of conveyancers, special pleaders, and draughtsmen in equity in *England* expire on this date.

Short licences to kill game expire.

December.

1 Tu.—Burgesses in England and Wales to elect Borough Councillors to supply the places of those going out of office. One-third of the Councillors, those longest in office without re-election, to go out. Municipal Borough Elections in *Scotland* are held on this day.

Copies of draft orders and other documents under Light Railways Act, 1896, to be sent to County, District, and Parish Councils, and various Government departments during May or November.

Burgess-rolls come into operation for one year.

Holiday at Bank Transfer Office and Stock Exchange.

5 S.—After the fourth day of Michaelmas Sittings courts to sit to hear appeals from Revising Barristers.

9 W.—Ordinary date of election of mayors of boroughs. The council of every borough being a county in itself, and the city of Oxford, to appoint a sheriff immediately after the election of the mayor, and elect borough aldermen to take the place of those retiring.

The Lord Mayor of London, having been chosen on St. Michael's Day, is, by 24 Geo. II. c. 48, to be presented at the Supreme Court of Judicature and sworn on this date, except the same shall fall on a Sunday, then on the day following.

11 F.—Martinmas. Scottish Quarter Day.

12 S.—High Sheriffs of England and Wales nominated in the Queen's Bench Division for appointment in January next.

15 Tu.—Solicitors' Annual Certificates expire.

16 W.—Between this date and December 15th, solicitors, proctors, and notaries public in *England* must renew their certificates.

19 S.—End of Trustee Savings Bank year (26 & 27 Vict. c. 87).

Within sixty days the half-yearly receipts for interest from the National Debt Commissioners to savings banks to be made out and issued.

Trustee Savings Banks to make up accounts to this date, and within nine weeks publish annual statement.

25 F.—Municipal Elections in *Ireland* in Boroughs constituted under the Municipal Corporations Act, 1843, are held on this day.

30 W.—Latest date for depositing plans and books of reference in the Private Bill Office of the House of Commons and with Clerks of the Peace.

Latest date for Special Pleaders, Draftsmen in Equity, and Conveyancers in *England* to renew certificates. (See Oct. 30.)

December.

1 Th.—Time expires for lodging declaration with Registrar of Solicitors for certificates.

Clerks of Union Assessment Committees to send in this month the totals of the gross estimated rental and rateable value of the property in the valuation lists of the several parishes to the Clerk or respective Clerks of the Council of the county or counties within which such parishes may be situate.

Chief Constables to transmit returns as to Constabulary force.

14 W.—Latest date for delivering notices, &c., to owners and occupiers affected by private bills.

Latest date for renewal of solicitors' certificates.

17 S.—Railway Companies to pay quarterly instalments of Income Tax on or before this date.

20 Tu.—Clerk of the County Council to make up the "County Register," that is, the Register of County Electors for local government purposes, and also the Parochial Registers, so that it shall be completed before this date. It will come into force on the 1st January next.

21 W.—Common Councilmen in the City of London to be elected on this date.

Michaelmas Law Sittings end.

Latest date for leaving petitions, declarations, &c., at Private Bill Office.

25 S.—Christmas Day. Quarter Day.

Medical officers of Unions entitled to be paid any extra fees, to make out their accounts quarterly to this date, and lay the same before the Guardians.

26 M.—Bank and General Holiday.

DEPOSIT BANK.

The Company receives MONEY ON DEPOSIT in large or small sums, repayable at 8 days' notice, and allows Compound Interest thereon, with Half-yearly Rests on the 30th June and 31st December, at the rate of £2 ros. per cent. per annum.

FOR PARTICULARS APPLY TO THE
Manager & Secretary, 63, CHANCERY LANE, LONDON, W.C. [271

A COMPLETE PEERAGE FOR HALF-A-CROWN.

PUBLISHED 15th JANUARY.

WHITAKER'S Titled Persons FOR THE YEAR 1898.

DESIGNED AS A COMPANION TO

WHITAKER'S ALMANACK.

THE ordinary contents of a Peerage, Baronetage, Knightage, and Companionage, including Dowager Ladies and Titled Issue, is presented in WHITAKER'S **TITLED PERSONS UNDER A SINGLE ALPHABET**; and to this is prefixed an extended list of the Royal Family, together with much descriptive and explanatory information never before given in any similar work. An alphabetical list of Country Seats is also a noticeable feature, helping appreciably to render the volume a handy and concise Court Guide.

The work is issued in distinctive binding, in similar size to the Almanack, and is published at half-a-crown.

London: J. WHITAKER & SONS, 12, Warwick Lane, E.C.

ANY QUANTITY, HOWEVER SMALL, DELIVERED FREE IN LONDON

OR TO ANY RAILWAY STATION IN GREAT BRITAIN AND TO ANY PORT IN IRELAND.

At prices which are the lowest in the trade.

REASONS WHY

THE PUBLIC SHOULD DEAL WITH

HATCH, MANSFIELD & CO., Limited.

- 1.—**BECAUSE** nowhere else is the same value obtainable.
- 2.—**BECAUSE** the guiding principle is **extent** of business, **not** magnitude of profits.
- 3.—**BECAUSE** the guarantees afforded, **with the exclusion of all doubtful vintages**, give absolute assurance of the highest quality,
- 4.—**BECAUSE** under the "New Departure" **carriage is paid** on "any quantity, however small."
- 5.—**BECAUSE** the accuracy of the above statements is demonstrated by the list of **customers**, which is published by their permission.

FULL PRICE LIST ISSUED MONTHLY AND SENT ON APPLICATION. 1255

The New Departure in the Wine Trade.

TO THE PUBLIC.

HATCH, MANSFIELD & CO'S position is essentially that of Distributing Agents between the great Wine Producers, Shippers and Distillers, on the one hand, and the Public on the other.

They are thus enabled to bring within the reach of all, at prices which are the lowest in the Trade, the widest possible choice of the finest Wines and Spirits; and they insure by their complete system of guarantees—particularly by the specification of Vintages, and the exclusion of all those of a doubtful character—that their Customers shall unquestionably be supplied with the best quality.

The question of Vintages is one of the utmost importance to Wine Drinkers, and goes far beyond the mere matter of taste. In the case of bad or doubtful Vintages, either the grapes never ripened thoroughly, or, owing to mildew, the Wines are unsound, and so injurious to health; it is only in good Vintage years when the grapes have attained perfection, and there has been no disease in the Vines, that the Wine is absolutely pure and wholesome; it is only Wines of good Vintage that invariably improve by keeping.

Our Calendars of Vintages clearly distinguish those Vintages which are universally accepted as good from those which are bad or indifferent,

Society for Promoting Christian Knowledge.

HISTORICAL CHURCH ATLAS. Illustrating the History of Eastern and Western Christendom until the Reformation, and that of the Anglican Communion until the Present Day. By EDMUND McCLURE, M.A. Containing Eighteen Coloured Maps, besides some Fifty Sketch Maps in the Text. 4to., cloth boards, leather back, 16s.

THEODORE AND WILFRITH. Lectures delivered in St. Paul's Cathedral in December, 1896. By the Right Rev. G. F. BROWNE, D.D., D.C.L., Bishop of Bristol. Small post 8vo, with several illustrations, cloth boards, 3s. 6d.

"The Bishop's polemic is sturdy in argument but scrupulously temperate in tone; and it need hardly be said that he illustrates his thesis with great ecclesiastical and archaeological learning."—*Times*, September 17.

THE ANCIENT HEBREW TRADITION AS ILLUSTRATED BY THE MONUMENTS. A Protest against the Modern School of Old Testament Criticism. By Dr. FRITZ HOMMEL, Professor of the Semitic Languages in the University of Munich. Translated from the German by EDMUND McCLURE, M.A., and LEONARD CROSSLE. With map. Large post 8vo, buckram boards, 5s.

"We are profoundly grateful to Dr. Hommel for work whose results will do much to reassure many a timid and distressed believer."—*Record*.

"We can recommend Dr. Hommel's well-argued and deeply interesting book to the careful consideration of all Biblical Students."—*Oxford Review*.

SIDE LIGHTS ON CHURCH HISTORY: THE LITURGY AND RITUAL OF THE ANTE-NICENE CHURCH. By the Rev. F. E. WARREN, B.D., F.S.A. Demy 8vo, cloth boards, 5s.

CHRISTIAN LIFE IN SONG (TE DEUM LAUDAMUS). THE SONG AND THE SINGERS. By the late Mrs. RUNDLE CHARLES. Cr. 8vo, cloth boards, 3s. 6d.

THE STRUGGLE OF THE NATIONS—EGYPT, SYRIA and ASSYRIA. By Professor MASPERO. Edited by the Rev. Professor SAYCE. Translated by M. L. McCLURE. With Maps, Three Coloured Plates and over 400 Illustrations. Demy 4to (approximately), cloth, bevelled boards, 25s.; half-morocco (bound by RIVIERE), 50s.

This is a Companion Volume to "The Dawn of Civilization," and contains the History of the Ancient Peoples of the East from the XIVth. Egyptian Dynasty to the end of the Ramesside Period. This interval covers the sojourn of the Israelites in Egypt and their Exodus therefrom. The recent discovery of an Egyptian Stele mentioning the Israelites gives special interest to this Volume, where the matter is discussed with his usual acumen by the Author.

"The translation by M. L. McClure is in both cases excellent. Professor Maspero's presentation of the new learning is at once eminently popular and attractive."—*Times*.

"The author has throughout attempted to reproduce for us the daily life of the various peoples of whom he treats, and in this he has succeeded admirably."—*Academy*.

THE DAWN OF CIVILIZATION (EGYPT and CHALDÆA). New and Revised Edition. By Professor MASPERO. Edited by the Rev. Professor SAYCE. Translated by M. L. McCLURE. With Map and over 470 Illustrations, including Three Coloured Plates. Demy 4to (approximately), cloth, bevelled boards, 24s.; half-morocco (bound by RIVIERE), 48s.

. Professor MASPERO, by using the result of the most recent researches in Egypt and Mesopotamia, has brought this New Edition up to the latest date.

THE CHRISTIAN CHURCH IN THESE ISLANDS BEFORE THE COMING OF AUGUSTINE. By the Right Rev. G. F. BROWNE, D.D., D.C.L., Bishop of Bristol. Post 8vo, cloth boards, 1s. 6d.

AUGUSTINE AND HIS COMPANIONS. By the Right Rev. G. F. BROWNE, D.D., D.C.L., Bishop of Bristol. Small post 8vo, cloth boards, 2s.

THE ROMANCE OF SCIENCE: THE MACHINERY OF THE UNIVERSE. Mechanical Conceptions of Physical Phenomena. By A. E. DOLBEAR, A.B., A.M., M.E., Ph.D., Professor of Physics and Astronomy, Tuft's College, Mass. Small post 8vo. With several Diagrams. Cloth boards, 2s.

THE QUEEN'S REIGN AND ITS COMMEMORATION. By Sir WALTER BESANT. Including the Diamond Jubilee Celebrations and the Naval Review. Large portfolio size, cloth boards, 5s.

LONDON: NORTHUMBERLAND AVENUE, W.C.;

43, QUEEN VICTORIA STREET, E.C.; BRIGHTON: 129, NORTH STREET. [315

Stanford's Atlases

PROSPECTUS, GIVING CONTENTS OF EACH, ON APPLICATION.

Second (Folio) Edition, Revised and Enlarged.

Dedicated by permission to HER MAJESTY THE QUEEN.

STANFORD'S LONDON ATLAS OF UNIVERSAL

GEOGRAPHY, exhibiting the Physical and Political Divisions of the various Countries of the World. 100 Maps and an Alphabetical List of Names, with Latitudes and Longitudes. Imperial folio, half-morocco extra. Price £12. Size, when shut, 16 inches by 23 inches.

STANFORD'S FAMILY ATLAS OF GENERAL GEO-

GRAPHY, exhibiting the various Physical and Political Divisions of the Chief Countries of the World. 50 Maps, with a List of Latitudes and Longitudes. Imperial folio, half-morocco. Price Five Guineas. Size, when shut, 16 inches by 23 inches.

Fifth (Quarto) Edition, Revised and Enlarged.

STANFORD'S LONDON ATLAS OF UNIVERSAL

GEOGRAPHY. Containing 48 Coloured Maps, carefully Drawn and beautifully Engraved on Steel and Copper Plates, and an Alphabetical List of over 30,000 Names, with Latitudes and Longitudes. Imperial 4to, half-morocco, cloth sides, gilt edges, 30s. Size, when shut, 12 inches by 15 inches.

STANFORD'S OCTAVO ATLAS OF MODERN GEO-

GRAPHY. Containing 38 Maps, carefully Drawn and beautifully Engraved on Copper Plates; also an Alphabetical List of over 30,000 Names, with Latitudes and Longitudes. Second Edition. Handsomely bound in half-morocco, gilt edges, price 21s. Size, when shut, 7½ inches by 12 inches.

Ordnance Survey Maps.

ALL SCALES of these valuable Maps can be obtained for any part of the British Isles from the London Agent, EDWARD STANFORD, 26 AND 27, COCKSPUR STREET, CHARING CROSS, S.W., Geographer to the Queen.

Noblemen and Landed Gentlemen will find the Ordnance Survey maps on the 6-in. or 25-in. scales invaluable for estate purposes; or, for residential purposes, the sheets of the 1-inch Survey can be mounted to make up admirable maps for hunting, driving, or walking, for 10, 15, 20 or any number of miles round. Such maps are most convenient when mounted on a spring-roller, or mounted and framed like a picture, and when so mounted they are ornamental and useful on the walls of a library, hall, or billiard-room. For illustrations and particulars, see **Stanford's Methods of Map Mounting**, sent post free.

Inquiries answered and Estimates for Mounting given. *Résumé* of publications post free on application to 26 AND 27, COCKSPUR STREET, LONDON, S.W.

London: EDWARD STANFORD, 26 and 27, Cockspur Street, S.W.

Geographer to Her Majesty the Queen.

COST PRICE LIFE ASSURANCE.

1 Guide to Offices yielding 2 and 3 per cent. (Compound Interest) on ordinary and Endowment Policies, respectively.

By **T. G. ROSE.**

"Interesting tables and illustrations of the most careful character."—*Insurance Record.*

"Vast amount of information."—*Citizen.*

"Valuable pamphlet."—*The Review.*

"Of interest to insurance experts."—*Financial Times.*

"The author seems to be perfectly well acquainted with the subject."—*Echo.*

"Is likely to be found useful."—*Yorkshire Post.*

"The author has dealt with the subject exhaustively, and also with consummate ability; the pamphlet should command an extensive circulation."—*Midland and Surrey Express.*

"This little pamphlet will serve a very good purpose. The ignorance and carelessness of insurers concerning the offices in which they are insuring are so notorious that the figures and tables given should prove of immense utility and interest, especially as they are extracted from the schedules supplied to the Board of Trade by the Life Assurance Offices themselves."—*Financial Standard.*

"Investment in a Life assurance or endowment policy as a means of earning interest on capital is not quite so plain a transaction as laying out the fund in Consols, but it is, nevertheless, the case that the return upon the outlay is greater under an insurance policy than from other equally safe sources. . . . It is not the best office that gets the most business, and if insurers would study the subject in their own interest there would be some extraordinary changes rapidly brought about in the condition of various prominent establishments. Mr. Rose has put together a mass of interesting facts."—*Capitalist.*

CORNFORTH & REACHER,

Stock and Share Brokers,

MANSION HOUSE BUILDINGS,
4, QUEEN VICTORIA STREET, LONDON, E.C.

We invite correspondence with Investors, to whose interests and needs special attention is devoted.

GOOD INVESTMENTS.

For permanent Investment the following may be named:—English Government, Corporation and Colonial Stocks; English Railway Stocks; Mortgage Debenture Bonds in Foreign and American Railways, *which yield dividends on Ordinary Stock*; Shares in first-class Banks, such as London and Westminster; London and County; Union Bank of London; London Joint Stock; City; Parr's and Alliance; National Provincial; Lloyd's, &c. &c.

A careful selection of the foregoing will provide an investment yielding an average return of about $4\frac{1}{2}$ per cent.

Investors desiring a larger percentage may turn their attention to the better class of Industrial Companies, such as Roberts' Stores (Islington and Stratford); Plummer Roddis (Drapers); Harrod's Stores; Slaters Limited (Restaurant Keepers and Provision Merchants); Bovril, Limited; Aërated Bread Company, &c. The Preference Shares and Debentures of the above-named appear to us well worthy of attention, even on the part of the most cautious investor. We make sound Home Industrial Shares a special feature, and are able to deal at closest quotations. Upon our advice many investors bought Slaters at par (now £1 $\frac{3}{4}$); Coats at £1 (now £70); Harrods at £1 (now £5 $\frac{1}{2}$); Aërated Breads at £2 (now £12).

MINES.

Mining Shares are, of course, speculative. Our Notes, carefully prepared each month and based on most recent information, should be seen by those interested in Indian, Australian and African (Gold or Diamond) Mines. Dealing at close prices. Prompt delivery. Cover business not entertained.

Stocks delivered to any London Banker against cash.

Foreign Correspondents will receive every attention.

Monthly Investment List free on application.

References can be given in every large town in England.

CURRENT ACCOUNTS are kept in conformity with the practice of London Bankers. In cases where a remunerative Balance is not maintained, a charge for Commission is made. Parties keeping Current Accounts have the facility of having approved Bills discounted; of obtaining Loans upon negotiable Securities; of depositing Bills, Coupons, &c., for collection; and of lodging with the Bank Deeds and other valuable property in the Fireproof Strong-Rooms for safe custody.

DEPOSIT ACCOUNTS.—Money, in amounts of £10 and upwards, is received from the public generally, subject to 7 days' notice of withdrawal, and interest is allowed thereon at the current rate of the day; the Bank notifying any change in the rate of interest by Advertisement in one or more of the leading London Newspapers. If the money be withdrawn within a fortnight no interest is allowed. Persons having Current Accounts can transfer any portion of their Credit Balance to Deposit Account. THE AGENCY OF COUNTRY AND FOREIGN BANKS, whether Joint Stock or Private, is undertaken by the Bank. LETTERS OF CREDIT, payable at any of the chief Commercial Towns and Cities of the World, are granted; also Mercantile and Marginal Credits. CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any of the places on the Continent where the Bank has an appointed Correspondent. DIVIDENDS, &c., on Government and other Stocks, Annuities, Pensions, &c., are received for customers of the Bank without charge; the purchase and sale of Stocks, Shares and Securities are also undertaken; and every description of Banking business is transacted. The Officers and Clerks of the Bank are pledged not to disclose the transactions of any of its Customers. [28

The present Subscribed Capital of the Bank is £14,000,000, in 140,000 Shares of £100 each, held by upwards of 6,830 Shareholders. The sum of £21 has been paid on each Share, thus making the paid-up Capital £2,830,000. The Rest or Surplus Fund is £1,800,000.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the Colonies; attends to the purchase and sale of British and Foreign Stocks; collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad; acts as Agents for the receipt of Military and other pay and allowances, and generally transacts every description of Banking business.

Sums of £10 and upwards may be deposited subject to seven days' notice of withdrawal or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to abatement by public advertisement in the *Times* newspaper. Cheques cannot be drawn against Deposit Accounts, nor will Depositors be entitled to any of the usual Banking facilities of a Current Account. A Receipt is given for each Deposit, which is not transferable, and must be surrendered on repayment of the amount according to the conditions printed thereon.

Circular Notes of £10, £25 and £50 are issued for the use of Travellers, payable in the principal Towns of Europe, Asia, Africa and North and South America. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for Commission. Letters of Credit are also granted, payable at all the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches. The Officers of the Bank are not allowed to receive any Christmas Boxes or Gratuities.

London, November, 1897.

The National Provincial Bank of England, Limited, having numerous branches in England and Wales, as well as Agents and Correspondents at home and abroad, affords great facilities to its customers, who may have money transmitted to the credit of their accounts through any of the branches free of charge.

Current accounts are conducted at the Head Office and Metropolitan Branches, and deposits are received and interest allowed thereon at the rates advertised by the Bank in the London newspapers from time to time.

The Bank undertakes the Agency of Private and Joint Stock Banks, also the Purchase and Sale of all British and Foreign Stocks and Shares, and the collection of Dividends, Annuities, &c. Circular Notes and Letters of Credit, payable at the principal towns abroad, are issued for the use of Travellers.

At the Country Branches Current Accounts are opened, Deposits received, and all other Banking business conducted.

The Officers of the Bank are bound to secrecy as regards the transactions of its customers.

Copies of the Annual Report of the Bank, Lists of Branches, Agents and Correspondents may be had on application at the Head Office, and at any of the Bank's Branches.

By order of the Directors.

CHEQUE BANK, LIMITED.

(Established 1873.)

Head Office—119-120, BISHOPSGATE STREET WITHIN, LONDON, E.C.
West End Office—14, COCKSPUR STREET, S.W.

Chairman of Trustees of Guarantee Fund—The Most Hon. the MARQUESS of TWEEDDALE,
Chairman of Board of Directors—The Right Hon. Sir EDWARD THORNTON, G.C.B., P.C.

The principle of the Cheque Bank being that no Cheque is issued to the Public until the maximum amount for which it can be drawn has been deposited, the Cheques are thereby Guaranteed, and can be readily cashed anywhere.

Special arrangements have been made with the principal Banks in the United Kingdom that these Cheques can be cashed on presentation at any of their Branches, and similar arrangements have been entered into with Bankers in all parts of the world. The Cheques are therefore the most useful form of Circular Note and Remittance to the country and abroad.

Current Accounts opened. No minimum balance.

Cheques, Bills, Warrants, Coupons, Dividends, &c. &c., collected for customers.

The Purchase and Sale of Government and other Stocks, Shares and Securities effected.

Deposits of £1 and upward received at Interest. Rates on application.

For Handbooks and full particulars apply as above

Bankers—UNION BANK OF LONDON, Limited, Charing Cross.

Solicitors—Messrs. SHOUBRIDGE & MAY, 32, Lincoln's Inn Fields.

This Company, established upwards of half a century, PURCHASES or makes LOANS upon REVERSIONARY INTERESTS, vested or contingent, in well-secured Property; also

LIFE INTERESTS in Possession, as well as in Expectation.

Loans upon Reversions may be obtained either at an Annual Interest, or in consideration of redeemable deferred charges, payable upon the Reversions falling in.

PRESENT INCOMES are likewise granted upon the latter principle to persons entitled to Reversionary Interests, who may thus obtain the means of support until their property falls into possession, without being called upon for any payment until that event.

Prospectuses and Forms of Proposal may be obtained from the Secretary, to whom all communications should be addressed.

D. A. BUMSTED, F.I.A., *Actuary and Secretary.*

[50

LAW REVERSIONARY INTEREST SOCIETY, LIMITED.

ESTABLISHED 1853.

OFFICES:—No. 24, LINCOLN'S INN FIELDS, LONDON, W.C.

Capital, £400,000. Debentures and Debenture Stock, £180,000.

DIRECTORS.

Chairman—JOHN CLERK, Esq., Q.C. *Deputy Chairman*—C. R. RIVINGTON, Esq., J.P., D.L.

EDWARD BULLOCK, Esq., Barrister-at-Law.

ARTHUR MOSELEY CHANNELL, Esq., Q.C.

RICHARD MILLS, Esq., 1 Gray's Inn Square.

HENRY E. NORTON, Esq., 10, Victoria Street.

EDWARD LEE ROWCLIFFE, Esq., 1, Bedford Row.

JOHN HERBERT SECKER, Esq., Barrister-at-Law.

Solicitors—Messrs. CAPRONS, DALTON, HITCHINS & BRABANT, Savile Place, Conduit Street.

PURCHASES.—The Society purchases Reversions and Remainders, whether absolute or contingent; Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

LOANS.—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

LIFE ANNUITIES are granted by the Society in exchange for Reversions and other Interests, and also in consideration for Reversionary Charges payable when the property falls into possession. In this way a reversioner can secure a fixed income and avoid the trouble and expense of obtaining successive loans.

Forms of Proposal and full information can be obtained at the Society's Offices.

W. OSCAR NASH, F.I.A., *Actuary.* [55

EDWARD ANGELL EADY,

WILLIAM LINDSAY COULSON.

Bankers.

PARR'S BANK, Limited, BARTHOLOMEW LANE, E.C.

Offices.

1, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust is established for the purpose of acquiring Freehold and Leasehold Properties, primarily in the London District, solely for investment purposes.

The Trust affords large and small capitalists opportunities for investment to great advantage, both as regards security and rate of interest. Transactions of a speculative character are studiously avoided, and only properties of sound commercial value dealt with.

The Investments consist of Shop Properties situate in main thoroughfares and well-established neighbourhoods, the whole of which are let on full repairing leases, and over twenty-five per cent. of the present income is derived from freeholds.

The Directors, Solicitor and Secretary serve without remuneration, being holders of the Founders' Shares, which receive no share of profits until a dividend of 6 per cent. is paid to the Ordinary Shareholders, and one-fourth of the balance of profits is carried to a Reserve Fund invested in Consols.

The Ordinary Shareholders thus obtain a preferential dividend of 6 per cent. per annum, and their position is further assured by the Reserve Fund.

The Directors invite applications for Capital in fully paid Shares of £5 each, bearing 6 per cent. interest.

Applications can be made direct to the Secretary at the Offices of the Trust,
1, Frederick's Place, Old Jewry, E.C.

[53

Favourably reviewed by over Eighty Influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

"Those who are seeking an Office for the purpose of assurance will do well to peruse this 'dialogue' before deciding upon any particular Company."—*Bullionist*.

"The statistics as to Endowment Assurance policies as investments are highly interesting and convincing."—*Citizen*.

"To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended as about the wisest step they could take. Everyone should read it."—*Fairplay*.

"There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable."—*Financial Times*.

"A dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a Company."—*Glasgow Herald*.

"The publication is of value to the insurance broker and other professional men, but of more value still to the intending insurer."—*Halifax Courier*.

"A cleverly-written dialogue. Both tables are explained with great lucidity."—*Law Journal*.

"All who contemplate insuring their lives should read, mark, learn and inwardly digest this able and interesting treatise."—*Leeds Times*.

"A well-written pamphlet. Anyone proposing to insure his life will easily find from the author's 'three interviews' how to spend his money to the best advantage."—*Liverpool Mercury*.

"Mr. Dent explains with singular clearness the canons by which the security of an Office may be tested, and its prosperity gauged, and shows the immense difference between the advantages offered by different Companies; all this being set forth in such simple, untechnical language, that the reader most unused to the phraseology of finance may follow him not merely with apprehension, but with real pleasure and interest."—*Manchester Examiner*.

"Conveys in dialogue form some very sound and exhaustive advice. Anyone contemplating effecting an insurance should first of all study this work."—*Money*.

"A valuable pamphlet on life assurance. . . There are two carefully prepared tables—No. 1, 'exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,' and No. 2, 'showing the different results to policy-holders, produced by the payment of the same money to the various Offices.'"—*Morning Post*.

"A most valuable and exhaustive pamphlet."—*Nonconformist*.

"One special branch of the question, which is most lucidly treated, is the value of life assurance considered simply as an investment."—*Southport Guardian*.

"An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book."—*Statist*.

April 30th, 1897:—

NEW BUSINESS.

The number of Policies issued was 423,149, at an Annual Premium of £270,990 18s.

CLAIMS.

The total amount paid to April 30th, 1897, was £1,855,941 0s. 2d.

BUSINESS IN FORCE.

The total number of Assurants on the Company's Books was 850,359, at an Annual Premium of £569,561 8s. 5d.

Chief Offices:

BROAD STREET CORNER, BIRMINGHAM.

[224

CLERGY. MUTUAL ASSURANCE SOCIETY,

Founded in the Year 1829.

Offices—2 & 3, THE SANCTUARY, WESTMINSTER, S.W.

Patrons { HIS GRACE THE ARCHBISHOP OF CANTERBURY.
HIS GRACE THE ARCHBISHOP OF YORK.

President—THE RIGHT HON. AND RIGHT REV. THE LORD BISHOP OF LONDON.

Vice-President—THE LORD HARRIS.

Chairman—THE VERY REV. THE DEAN OF WESTMINSTER.

Deputy-Chairman—THE HON. EDWARD W. DOUGLAS.

Bankers—MESSRS. COUTTS & CO. *Physician*—J. KINGSTON FOWLER, Esq., M.A., M.D.

Actuary—FRANK B. WYATT, Esq., F.I.A. *Secretary*—G. H. HODGSON, Esq., M.A.

The Society is conducted on the Mutual Principle, solely in the Interests of

THE CLERGY AND THEIR RELATIVES.

Accumulated Fund, £3,987,790. Annual Income, £407,694.

Special Features :—

1. The Annual Premiums charged are below the average, this fact being equivalent to an immediate BONUS.
2. The expenses of Management are on a remarkably low scale, No Agents being employed or Commission paid for the introduction of business. Large sums are thus saved to the Assured Members.
3. The rate of Mortality among the Members is very much lower than among the general population.
4. The combination of the above favourable circumstances has resulted in the return of exceptionally large Bonuses to the Assured Members. The Bonus declared for the 5 years ending 31st May, 1896, amounted to £560,000, making the total Bonuses distributed £3,182,812.
5. Assured Members have therefore absolute security with every prospect of the continuance of a high rate of Bonus.

WHOLE-LIFE and ENDOWMENT ASSURANCES
are granted at Low Premiums, with right of participation in profits.

THE FOLLOWING ARE SPECIMENS OF THE RATES:—

Age next Birthday.	WHOLE-LIFE ASSURANCE.		ENDOWMENT ASSURANCE.		Age next Birthday.
	Annual Premium for an Assurance of £100 payable at death.	"Reduced" Annual Premium for an Assurance of £100 payable at death (see Note).	Annual Premium for an Assurance of £100 payable at death or on attainment of age.		
			65	60	
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	
20	1 15 0	1 8 0	2 1 1	2 6 3	20
25	2 0 2	1 12 2	2 7 6	2 14 4	25
30	2 6 4	1 17 1	2 16 0	3 5 1	30
35	2 13 0	2 2 5	3 7 3	4 0 2	35

EQUITABLE
LIFE ASSURANCE
SOCIETY.

Every £1,000 which became a claim in 1896 was on the average increased at death to £2,119.

No Agents employed. No Commission paid.

FUNDS IN HAND - - - - - £1,325,000.

THE LATEST IMPROVEMENT in Life Assurance is

THE PERFECT ENDOWMENT ASSURANCE POLICY.

of this Society, which secures an annuity of five per cent. on the Sum Assured and bonus additions from the attainment of the selected age until death, and payment of the Sum Assured and bonuses at death.

As the total expenses of management of this old-established Mutual Society amount to only six per cent. of the premium income, it follows that 94 per cent. of the whole of the premiums are invested to accumulate for the benefit of the Assured and their families.

FRIENDS' PROVIDENT INSTITUTION

FOR MUTUAL LIFE ASSURANCE.

ESTABLISHED 1832.

ACCUMULATED FUND	£2,650,000
ANNUAL INCOME	£300,000

This Institution is the Life Assurance Office established by the Society of Friends (Quakers), and is under the management of Members of that Society.

The Scale of Premiums charged is below the average; but owing to careful selection of lives and economical management, very satisfactory Bonuses have been realized.

The advantages of the Institution are open to those persons who are or have been Friends; and to others also who are of Quaker descent, or are related to Friends by ties of kinship or marriage.

The Capital amounting to £5,000,000, was fully subscribed before the Society commenced business in 1845, and the shares are now held by a body of Shareholders, comprising some of the highest and most influential members of the legal profession. The success which has attended the operations of the Society is founded on its strong financial position, the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements are met.

LAW UNION AND CROWN

Fire and Life Insurance Company.

FOUNDED 1825.

Funds in Hand £4,025,000
Annual Revenue (1896) £590,000

LIFE DEPARTMENT.

The Claim of the "Law Union and Crown" to the favourable consideration of intending Assurers is based, not upon theoretical assumptions of the superiority of a particular system of Life Assurance, but on the Plain Issue of Actual Results.

On these results the Company invites comparison in Strength of Financial Position, Moderation of Premiums, Exceptional Largeness of Profits, and Simplicity and Liberality of Policy Conditions with any other Life Assurance Office, whether Mutual or Proprietary.

Financial Position.

The Company's Funds amount to upwards of £4,025,000. The security is, therefore, absolute.

Moderate Premiums.

Age.	Law Union and Crown Premium.	Average of the Premiums charged by 50 British Offices
20	£1 17 6	£1 18 9
30	2 8 4	2 9 0
40	3 4 0	3 4 8
50	4 9 10	4 10 8

Exceptionally Large Profits or Bonuses.

At each of the last two Quinquennial Divisions of Profits the Company added to all its Participating or Profit Policies a Reversionary Bonus at the very high rate of £2 per £100 per annum on the sum assured, and also on the amount of previous bonuses not surrendered for cash.

Further Advantages.

The Policies of the "Law Union and Crown" have practically one condition only, and that is the payment of the premium. Surrender Values are guaranteed and automatically applied to prevent the policy lapsing. Paid-up Policies are granted; and policies, with rare exceptions, are freed from all restrictions.

FIRE DEPARTMENT.

Fire Capital Subscribed £1,125,000

The Rates of Premium in the Fire Department are moderate, and Claims are settled with liberality and promptitude.

Intending Insurers and others are requested to apply for Prospectuses and all other information to the Company's Offices.

LIFE ASSURANCE IN ALL ITS BRANCHES.

SPECIAL FACILITIES FOR MARINERS' AND PASSENGERS' ASSURANCES.

Assurance Fund, 31st December, 1894 **£728,665**

Surplus on Valuation, H^m. and H^m. (S). 3 per cent.... **130,226**

Amount Divided **79,820**

Yielding a Reversionary Bonus of **£2 10s.** per cent. per annum on Whole Life Policies in force at the time of the previous Declaration of Profits, and **£2** per cent. per annum on those effected in the interim.

This rate of Bonus has been regularly paid for the past Twenty Years.

[96]

THE

LONDON LIFE ASSOCIATION

LIMITED,

81, KING WILLIAM STREET, LONDON, E.C.

ESTABLISHED 1806.

FUNDS IN HAND. £4,400,000.

Mutual Life Assurance,

and yet with **Statutory Limitation of Liability.**

Economical Management,

the Expenses being only **£4 13s. 5d.** per cent. of the Premiums, or **£3 3s.** per cent. of the Income from premiums and interest.

From the accounts published by the Board of Trade, it may be seen that the Association is managed at a lower ratio of expenditure to premium income than any other life assurance office doing business in the United Kingdom.

No Commission allowed or Agents paid,

the intervention of a paid Middleman being entirely dispensed with, at a saving to the Members of one shilling or more out of every pound paid in premiums.

Nearest Age,

instead of age next birthday, used in computing premiums.

Large Reductions of Premium Yearly

by sums ranging at the present time from **52** per cent. thereof to **Total Extinction** with some addition to the amount assured.

Half Premiums on Credit at 4 per cent

if it should be so preferred, the immediate advantage of a largely **Increased Sum Assured** being thus obtained.

The Association's System is almost unique, for while it more than provides for any possible fluctuation in rates of mortality or interest, yet the Policyholder is only charged the Actual Cost of Assurance, instead of having to pay a larger premium than necessary and subsequently get back a portion as "bonus."

**All the Profits belong to the Assured and are divided every Three Years.
 RATES LOW. BONUSES LARGE. CONDITIONS LIBERAL.**

Three Important Principles introduced by this ASSOCIATION.

1. No Policy allowed to lapse on account of non-payment of a premium so long as there is a Surrender Value sufficient to pay the premium overdue.
2. No Member compelled to pay a higher premium than that set opposite his age in the published table of rates.
3. The age of Members taken as at their nearest birthday.

AGENTS WANTED FOR TOWN AND COUNTRY.

Medical Officers—T. HENRY GREEN, Esq., M.D., and JOHN CRIFT, Esq., F.R.C.S.

Solicitor—THOS. MYDDLETON MORRIS, Esq.

Auditors—W. C. JACKSON, Esq., F.C.A.; G. BOLLAND NEWTON, Esq.; Wm. CASH, Esq., F.C.A.

Invested Funds exceed .. £2,000,000
 Profits declared to 1892 .. £4,600,000

Claims Paid £10,000,000
 Gross Annual Income .. £600,000

The Whole of the Profits are Divided every Five Years among the Members, without any deduction for dividends to Shareholders. At the last (1892) Division of Profits **£651,487 Cash Profit** was apportioned amongst the Members, being more than 37 per cent. of the amount paid in premiums during the previous Five Years.

There were then nearly 800 Policies in respect of which not only were the premiums entirely extinguished, but also Annuities were granted, or Cash Bonuses paid, whilst in the case of many Policies, the Original Sums assured are now more than doubled by the Bonus Additions.

Endowment Assurance Policies are issued combining Life Assurance at Minimum Cost with Provision for Old Age.

The practical effect of these Policies in the National Provident Institution is that the Member's life is assured until he reaches the age agreed upon, and on his reaching that age the whole of the Premiums paid are returned to him, and a considerable sum in addition, representing a by no means insignificant rate of interest on his payments.

LIFE DEPARTMENT.

The principles on which this Company was founded, and on which it continues to act, combine the system of Mutual Assurance with the safety of a large Protecting Capital and Accumulated Funds. Ninety per cent. of the Life Assurance Profits is divided among the Assurers on the Participating Scale. The Profits are divided every five years. Next Division Dec. 31st, 1900. Claims paid on proof of Death and Title. Cheap and simple arrangements for Naval and Military Officers. Annuities of all kinds are granted, and the rates fixed on the most favourable terms.

FIRE DEPARTMENT.

Property of nearly every description at Home and Abroad insured at the lowest rates of Premium corresponding to the risk. Net Premiums for 1896 amounted to £1,463,245 4s. 7d.

Life Policies in existence, 26,000 assuring (exclusive of Bonuses)	4,900,000

The Provident Clerks' is an old-established mutual office, and assures all classes of society.

All Profits go to the Policy-holders.

Valuation and division of profits every five years. Bonus Year, 1898.

There is no personal liability to the Members.

The Association offers undoubted security to its Members.

Exceptionally low Premiums for young lives.

Interim Bonuses Paid. Claims Paid immediately on proof of death and title.

November, 1897.

JNO. EDWD. GWYER, *Secretary*.

Prospectuses and every information on application at the Chief Office, as above, or to the Agents of the Association.

THE PROVIDENT CLERKS' AND GENERAL GUARANTEE ASSOCIATION, Limited.

Subscribed Capital, £100,000. Called-up and Paid, £80,000. Reserves, £40,000.
 Invested Funds, £110,000.

ESTABLISHED 1865.

This Association issues GUARANTEE POLICIES for situations of trust. It is specially authorised to guarantee the Employés of the Government. By an arrangement with the PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION, all persons Assuring their Lives with that Association, in connection with a Guarantee, will be enabled to effect the latter at a considerable reduction of Premium. This arrangement has been so framed as to be advantageous to both institutions.

Prospectuses, Forms of Proposal, &c., may be obtained of the Agents, or at the Chief Office,
61, COLEMAN STREET, E.C. H. B. BRAIN, *Secretary*.

THE PROVIDENT CLERKS' And GENERAL ACCIDENT INSURANCE COMPANY, Limited.

Subscribed Capital, £50,000. Called-up & Paid, £20,000. Invested & Reserved, £55,000.

ESTABLISHED 1876.

The Insurances granted by the Company are chiefly comprised in the following Classes—Provision for special cases being made on application at the Chief Office, 61, Coleman Street, E.C.

1. Insurance against Accidents of every kind, with or without allowances during entire or partial disablement.

2. Combination Policies, covering accident and disease.

3. Insurance against Railway Accidents only.

4. Insurance against Fatal Accidents during a Voyage.

Employers' Liability Act.—The liability under this Act can be covered by special arrangements for Insurance.

To Assurers with the PROVIDENT CLERKS' MUTUAL LIFE ASSOCIATION and the PROVIDENT CLERKS' AND GENERAL GUARANTEE ASSOCIATION, Accident Policies are issued at reduced rates.

H. B. BRAIN, *Secretary*. [293]

Favourably reviewed by over Eighty influential Newspapers.

“HOW TO SELECT A LIFE OFFICE.”

By **G. M. DENT, F.S.S.**

Extracts from a few Press Opinions.

MORNING POST.—“Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables.”

EVENING NEWS.—“Will be useful as a guide to those persons intending to insure their lives who desire to get as large a return for their money as is compatible with perfect security.”

STATIST.—“The form of question and answer relieves the work very much from the heavy character of a statistical inquiry.”

FINANCIAL TIMES.—“Carefully and skilfully compiled.”

POLICY-HOLDER.—“Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way.”

METROPOLITAN.—“Shows conclusively the great value of Life Assurance as an investment, and clearly states the considerations which should guide intending insurers in the selection of an office.”

ABERDEEN FREE PRESS.—“An ingenious and valuable pamphlet . . . will abundantly repay attentive study.”

BRADFORD OBSERVER.—“The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read.”

CARDIFF TIMES.—“In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money.”

GLASGOW HERALD.—“The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a Company.”

LIVERPOOL COURIER.—“The dialogue is smartly written and touches on many of the most important elements that have to be considered before a policy is taken in any Office. Appended are illustrative tables showing how widely different Offices vary in their mode of doing business.”

MANCHESTER EXAMINER.—“We heartily commend the little work to those about to insure, to those who are already insured, and to those who have made up their minds that they cannot or will not insure.”

SCOTTISH AMICABLE

LIFE ASSURANCE SOCIETY.

Established 1826.

Funds, £3,800,000. Claims Paid, £5,800,000.

LARGE COMPOUND BONUSES.—The Society being purely Mutual, all profits belong to the assured. The amount distributed has been so large, that the sums assured by the earlier policies are more than doubled in amount.

LOW PREMIUMS under the Society's popular Minimum Premium System.

ABSOLUTE SECURITY.—The valuation of the Society's Liabilities as at 31st December, 1895, was made by the most stringent tests applied to any similar institution, and shows that the Society's Reserves are unsurpassed by those of any other Life Assurance Office.

LIBERAL CONDITIONS.

HEAD OFFICE—St. Vincent Place, GLASGOW.

London Office—1, Threadneedle Street, E.C. [111]

THE SCOTTISH EQUITABLE LIFE ASSURANCE SOCIETY.

ESTABLISHED IN 1831—FOR MUTUAL LIFE ASSURANCE.

HEAD OFFICE: 26, ST. ANDREW SQUARE, EDINBURGH.

President—HIS GRACE THE DUKE OF BUCCLEUCH AND QUEENSBERRY, K.T.

Manager—THOMAS BOND SPRAGUE, M.A., LL.D. *Secretary*—J. J. M'LAUCHLAN.

THE LEADING FEATURES ARE—

PERFECT SECURITY. LIBERAL CONDITIONS OF ASSURANCE. MODERATE PREMIUMS. GUARANTEED SURRENDER VALUES. COMPLETE AND LIBERAL NON-FORFEITURE REGULATIONS. LARGE BONUSES. IMMEDIATE PAYMENT OF CLAIMS.

The Scottish Equitable being a purely mutual Society, the whole profits belong to the Members, who are expressly freed from all personal responsibility.

The next division of profits will be made as at 1st March, 1898.

The progress of the Society during the last fifteen years is shown in the following table:—

Year.	Policies in force.	Existing Assurances.	Annual Income.	Total Funds.
1872	13,481	£3,618,646	£329,641	£2,544,900

HOW TO MAKE ENDS MEET!

Is often a harassing problem for the Business and Professional Man when well and able to attend to his daily duties. But what is it when disease has laid hold of him or an accident has befallen him—when income is stopped or reduced, and expenses are growing? OUR system perfectly meets the difficulty. We insure against ALL Sicknes and ALL Accidents, from £1 to £10 per week. "The scheme is unique."—*Newcastle Chronicle*. Particulars free.

An Annual Election of Inmates, free for three years, takes place in June. Inmates are also admitted by payment of a small annual amount for maintenance and instruction. [121

THE BENEVOLENT SOCIETY OF ST. PATRICK.

PATRONS—

Her Majesty the Queen and H.R.H. the Prince of Wales.

PRESIDENT—

The Lord Rathmore.

The Schools of this Society are established for the Free Education, Clothing, Partial Feeding, and benefit of some 500 very poor children of Irish parentage, without distinction as to "their religious tenets or mode of worship."

H.R.H. THE DUKE OF YORK, at the Anniversary Festival, held March 17th, 1895, said:—"I congratulate you on having attained the 112th year of your existence. . . . The connection between the origin of the Illustrious Order of St. Patrick and the Benevolent Society of St. Patrick is a very interesting feature of your history. . . . In 1820, half a century before the foundation of the London School Board, you built your first large schools in London. . . . A matter of great importance is the supervision exercised by the Society, and the premiums for good conduct which it grants during the five years after the children have left the schools. . . . As your President, I should like to feel that a special effort has been made to increase the numbers of your scholars."

[With the aid of a legacy, bequeathed by the late Dr. Madden, the Society some years since added technical classes to their system of education, and much increased the usefulness of the schools.]

The Committee will gladly receive subscriptions or donations addressed to

A. F. RANALD DANIEL, *Secretary*, The School House, 61, Stamford St., S.E. [243

NEARLY
FIVE THOUSAND ORPHAN WAIFS
ARE ALWAYS BEING
MAINTAINED, EDUCATED AND TAUGHT TRADES
IN
“Dr. Barnardo’s Homes.”

“Christian, Protestant, Evangelical, but not Sectarian” is the religious motto of the Institutions. The work is supported by all sections of Christendom. In their operations all Evangelical Christians may and do join hands.

Applications for urgent cases are received at any hour of the day or night.

Destitute Children of any age or creed, of either sex, and of any nationality are eligible.

Deaf or Dumb, Blind or Crippled Children, or those Diseased and already Given Over to Death, are, if destitute, always eligible.

The most searching enquiry is made into every application, but no really destitute boy or girl is ever rejected. Each case is determined solely upon its merits, without election and without the intervention of wealthy patrons.

Over 32,000 Children have been received since 1866. From 50 to 60 Fresh Cases are admitted during the Winter Months.

About 1,500 Young Children are now Boarded Out in Rural Districts under careful supervision.

Technical Training in some one of the Fourteen Handicrafts carried on in the Homes is given to every Lad capable of receiving it.

All the Girls are brought up in Cottages on the Family System, or are boarded out in the Country, and carefully instructed in the various branches of Domestic Service.

9,395 Trained and Tested Children have already been placed out in the Colonies. Of these 98 per cent. have been successful.

Four Lodging Houses and a Night Refuge, open in the Metropolis, and Eight “Ever Open Doors” in Provincial Towns, are accessible throughout all hours of the day and night to Homeless “Waifs and Strays” seeking temporary shelter.

In all, these Institutions now include 86 distinct Homes, dealing with every age and class of destitute and needy childhood, and 24 Mission Branches.

The Homes are supported solely by the free-will offerings of the benevolent. £140 is required every day for food alone.

FUNDS ARE URGENTLY NEEDED FOR FOOD AND MAINTENANCE.

Donations and Subscriptions gratefully received by the Treasurer, WILLIAM FOWLER, Esq.; by the Chairman of Committee, HOWARD WILLIAMS, Esq.; by the Founder and Director, Dr. THOS. J. BARNARDO; or by the Bankers, LONDON AND SOUTH-WESTERN BANK (Bow Branch), and Messrs. PRESCOTT, DIMSDALE AND Co.

CHELSEA
HOSPITAL
FOR
WOMEN.

The Hospital has 52 Beds, and was founded for the reception and treatment of respectable poor women and gentlewomen in reduced circumstances, suffering from those many distressing diseases to which the female sex is liable, irrespective of social position. A great proportion of women thus afflicted are those upon whom the numberless misfortunes of ill-health most heavily fall—the poor gentlewoman, the governess, the wife of the lowly-paid clerk, the artisan, and the very poor. Their homes are altogether unsuited for the performance of a critical operation, nor can they there have the special nursing and care which their condition demands. It is therefore obvious that the work of this Charity in restoring Mothers, Wives and Daughters to that health upon which the maintenance of families so frequently depends is one of real value and importance.

FREE IN-PATIENTS

are admitted on recommendation of Subscriber, one Letter being sufficient for each Patient's entire stay.

CONTRIBUTING IN-PATIENTS

are received upon payment Weekly of 10s. 6d., 21s. or 42s., according to means.

OUT-PATIENTS

attend daily at 2 o'clock.

THE CONVALESCENT HOME

at St. Leonards-on-Sea contains 22 Beds.

The Hospital is entirely without Endowment or Reserve Funds of any kind, and is in pressing need of assistance.—Annual Subscriptions are especially solicited. Any contributions will be thankfully received, and information gladly given by

HERBERT H. JENNINGS, Sec.

[125]

CHARING CROSS HOSPITAL STRAND, W.C.

President—H.R.H. the DUKE OF EDINBURGH, K.G.

PRINCESS ALICE ORPHANAGE	New Oscott, BIRMINGHAM.
CONVALESCENT & INFANT BRANCH	Alverstoke, HANTS.

The Mission of **The Children's Home** is to rescue children who, through the death or vice, or extreme poverty of their parents, are in danger of falling into criminal ways, it is, therefore, at once an **Orphanage** and a **Refuge**.

The Home receives Children of any age, or any sect, without election. It is conducted on the **Family system**; is a **Religious and Industrial Institution**; is a **Training School for Christian Workers**; and is dependent on **Voluntary Contributions**.

Within the last twenty-eight years 4,043 children have received the benefits of this Institution. 984 are now in residence. About £16 will maintain a child in the Home for a year.

3,079 children have now passed through the Home, and there is the greatest cause for thankfulness to God for the present well-being and for the prospects in life of a large majority of this great number.

In connection with this work the **Gordon Hall Mission** is carried on in the East End of London; an agency for the **Protection of Girls** is at work, a Refuge being available night and day; a **Servants' Free Registry** is open, and **Lodgings** are provided for respectable young women during the interval between situations; also a **Mission to the poorest Children** of East London is very successfully carried on. A small number of **Epileptic Children** have already been received. The entire work is greatly in need of more liberal support. The smallest contributions will be thankfully received.

The need of such a work is painfully obvious. Our cities and towns are crowded with children exposed to every evil influence, shut out from all good, living a life worse than that of savages, and as they grow up they naturally take their places in the ranks of the pauper and the criminal. Yet they may be saved. Hundreds of cases prove that these little ones—some of them mere infants—are susceptible of every elevating influence, and need only the care of a Christian home to develop all that is good in their characters, and fit them for reputable and useful lives.

Collecting Books, Boxes, or Cards will gladly be forwarded to those who are willing to collect in aid of the funds of the Institution.

Cheques and Money Orders should be crossed City Bank, and Orders made payable at G.P.O.

Remittances to be made payable and sent to T. B. STEPHENSON, Bonner Road, LONDON, E.

J. PENDLEBURY, *Secretary*. [126

CITY OF LONDON TRUSS SOCIETY,

33, FINSBURY SQUARE.

ESTABLISHED 1807.

For the Relief of the Ruptured Poor throughout the Kingdom.

Patron—H.R.H. THE PRINCE OF WALES, K.G.

Treasurer—JOHN NORBURY, Esq.

The Patients (about 10,000 in the year) are of both sexes and all ages—from Children of a month old to Adults over 95. Over HALF A MILLION Patients have been relieved since the formation of the Charity. Additional Funds are greatly needed to meet the increasing demands on the charity. Premises, recently enlarged, providing *inter alia* a separate entrance, waiting room, and female attendants for female patients.

Subscriptions, Donations and Bequests will be thankfully received by the Society's Bankers, LLOYD'S Bank (Limited), 72, Lombard Street; and by the Secretary at the Institution.

N.B.—Patients are relieved in and from all Parts of the United Kingdom and the Colonies.

JOHN WHITTINGTON, Secretary. [129]

The EARLSWOOD ASYLUM

FOR IDIOTS AND IMBECILES,

RED HILL, SURREY.

Open to Cases from all parts of the Kingdom.

This NATIONAL ASYLUM, established in 1847, now affords protection to upwards of 600 inmates, and everything that kindness and science can suggest is employed to ameliorate their condition.

Eligible cases are admitted by the Votes of the Subscribers for 5 years, and in many instances are allowed the advantage of re-election for a second 5 years.

At each Half-Yearly Election there are generally over One Hundred and Fifty Applicants seeking admission, of whom the Board can only elect 25 to 35, owing to want of sufficient Funds for a larger number.

The Board *earnestly ask for additional aid*. The expenses are heavy, owing to the general helplessness of the poor inmates.

AN ANNUAL SUBSCRIBER has *one vote* at each Election for each Half a Guinea contributed. A LIFE SUBSCRIBER has *one vote* at each Election for each Five Guineas contributed.

COLLECTING BOXES and CARDS will be gladly supplied, and votes given in proportion to the amount collected: at the rate of Four for each Guinea.

Special Provision is made for the reception of Paying Patients, who have the comforts of a Private Home, as well as instruction and amusement.

The last Report and other Pamphlets may be had gratuitously on application.

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE QUEEN | Vice-Patron—H.R.H. PRINCESS OF WALES. | President—H.R.H. PRINCE OF WALES, K.G.
Chairman of Committee—Field Marshal Sir LINTORN J. SIMMONS, G.C.B., G.C.M.G.

NEW BUILDINGS NOW OPEN AT WEST END, WOKING, NEAR BROOKWOOD.
OFFICES—20, COCKSPUR STREET, LONDON, S.W.

The Home is constructed to accommodate 240 Boys, chosen from the homeless and destitute, between the ages of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. None are admitted below 13½ years of age or above 15½. 2. He must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £22 during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. There are now 240 Boys in the Home. Subscriptions and Donations are urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; Messrs. W. S. KING & CO., 45, Pall Mall, S.W.; by the Treasurer, General Sir DIGHTON PROBYN, V.C., Marlborough House, Pall Mall, S.W.; and by the Secretary, at the Office, 20, Cockspur Street, S.W., from whom any further information can be obtained. Lt.Colonel G. A. BEATY-POWNALL, Secretary. [135]

GORDON HOSPITAL FOR FISTULA, PILES, AND OTHER DISEASES OF THE RECTUM.

Surgeons—{ C. J. OGLE, Esq., M.R.C.S.
{ F. BOWREMAN JESSITT, Esq., F.R.C.S.

Assistant Surgeon—CHARLES RYALL, Esq., F.R.C.S.

Anaesthetist—A. G. FAUSSET, M.B.

The Management is vested in a Committee of Governors who are elected at the Annual Meeting. Both out-patients and in-patients are treated. The department of the former is entirely free: that of the latter is divided into two classes. Firstly, the really poor, who are received free of all charge. And, secondly, those who are able and who are willing to contribute towards the cost of their maintenance whilst under treatment. In every case all moneys received from patients, or whatever other source, are devoted to the Hospital. As the Hospital is entirely without endowment, the Committee earnestly appeal for Annual Subscriptions and Donations. Out-patients seen daily at 2 o'clock; also on Tuesday evenings at 8 o'clock. Apply to the Secretary. [136]

GENERAL LYING-IN HOSPITAL,

YORK ROAD, LAMBETH, S.E. ESTABLISHED 1765.

Patron—The QUEEN.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women, in indigent circumstances, and certain single women (with their first child after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss Annie Whyte, the Secretary, at the Hospital. [138]

Telegraphic Address—"ALUMNUS LONDON."

TRAINED MALE NURSES.

THE HAMILTON ASSOCIATION

(FOUNDED IN 1885 BY VOLUNTARY SUBSCRIPTIONS AND DONATIONS)

Supplies Trained Male Nurses for Medical, Surgical and Mental Cases in town or country. Terms, from Two to Four Guineas per week, according to the severity of the case and the experience of the nurse supplied. Also skilled Masseurs by day or hour. Travelling Attendants for Invalids.

Last Annual Report, Rules, &c., post free on application to the Medical Superintendent, 57, Park Street, Grosvenor Square, London, W. [143]

The Hospital & Home for Incurable Children, 2, MAIDA VALE, W.

Patrons—H.R.H. The PRINCESS CHRISTIAN; H.R.H. The DUCHESS OF CONNAUGHT; H.R.H. The PRINCESS MARY, Duchesses of Teck.

President—H.R.H. The DUKE OF CONNAUGHT AND STRATHBARN, K.G.

Hon. Treasurer—E. A. BONNOR-MAURICE, Esq.

Bankers—Messrs. HOARE, 37, Fleet Street, E.C.; PARR'S BANK, 239, Regent Street, W.

This Institution, founded in 1875, was the first of its kind in the Metropolis, and, it is believed in the United Kingdom. It was established with the object of providing for the maintenance, care and medical treatment of Children (up to the age of sixteen) suffering from Chronic or Incurable complaints of an aggravated character. It combines the advantage of a Home and a Hospital.

Over One Hundred and Eighty Children have been received, and there are Thirty cots. A small Weekly Payment is required for each Child; but the expenses of such a charity are necessarily very large, and the Committee *appeal earnestly for donations and new subscriptions*, which are much needed. Visiting hours, 3 to 5 p.m. daily. Miss A. COLEMAN, *Matron*. [140]

HOSPITAL FOR DISEASES OF THE THROAT, GOLDEN SQUARE, LONDON, W.

(FOUNDED 1863.)

President—THE EARL OF STRAFFORD.

Entirely Free to the Poor and Necessitous. Open always.

Out-Patients are seen daily at 1.30 p.m. Tuesday and Friday evenings, 6.30, and on Monday mornings at 9, specially for Children.

Number of Attendances registered last year, 43,972; In-Patients, 519.

The Committee of Management appeal for Help to carry on the constantly increasing work of the Hospital.

Treasurer—C. J. LACY, Esq.

Bankers—Sir S. SCOTT, Bart., & Co.

WM. HOLT, Capt., *Secretary*. [142]

HOSPITAL for DISEASES of the SKIN

(Removed from New Bridge Street, Blackfriars)

52, STAMFORD STREET, BLACKFRIARS, S.E.

ESTABLISHED 1841.

Patroness—H.R.H. THE PRINCESS OF WALES.

Chairman—Major-General LORD METHUEN, K.C.V.O., C.B., C.M.G.

Treasurer—JOSEPH GURNEY BARCLAY, Esq.

This was the first, and for many years the only, Institution in the kingdom established for the special treatment of Cutaneous Diseases. Over 357,000 Patients have been successfully treated.

NEW OUT-PATIENTS are received on Mondays and Thursdays at Two o'clock, and on Tuesdays, Wednesdays, and Fridays at One o'clock. Also on Friday Evenings at 7 p.m.

Medical Practitioners and Students are admitted to witness the Practice.

SUBSCRIPTIONS and DONATIONS are most earnestly solicited, and will be thankfully received by the Secretary, or by Messrs. BARCLAY & COMPANY, Limited, Bankers, 54, Lombard Street, E.C.

SAMUEL HAYMAN, *Secretary*. [175]

THE TEMPORARY HOME FOR LOST AND STARVING DOGS,

Battersea Park Rd., S. Lambeth, London, S. W.

The poor dog, in life the firmest friend,
The first to welcome, foremost to defend;
Whose honest heart is still his master's own,
Who labours, fights, lives, breathes for him alone.

PATRON—

Her Most Gracious Majesty the Queen.

President—His Grace the DUKE of PORTLAND.

Treasurer and Chairman—Sir GEORGE S. MEASOM, J.P.

OBJECTS—

1. To provide shelter and food for the lost, deserted and dangerous dogs of London.
2. To restore lost dogs to their rightful owners.
 3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
 4. To destroy, by a merciful and painless operation, all valueless and diseased dogs.

UPWARDS OF 230,000 DOGS

have been received during the past Ten Years.

FUNDS ARE URGENTLY NEEDED

to feed and shelter more than 500 dogs daily, to maintain the Home and meet the expenses of the Lethal Chamber and Crematorium.

CONTRIBUTIONS THANKFULLY RECEIVED BY

HENRY J. WARD, Secretary. [2,6

HOMES OF HOPE.

4, 5 & 6, Regent Square, Gray's Inn Rd., London, W.C.

(Established 1860.)

This Society was established in 1860 for the reception of the less degraded class of penitent fallen young women, for whom little provision had been made.

Young women are admitted on any day, and coming from any quarter whatsoever, if there be room in the Homes.

Special efforts are made on behalf of mothers with their first infants, who are really the most hopeful class of the fallen, and are generally to be pitied.

A Home has been opened for the reception of such young women, before they become mothers, as are unfitted, from their previous good character and position, to mix with others.

Since the Homes have been established, 3,704 have been admitted; of this number, 1,483 belonged to the class of young mothers who were thus saved from falling into deeper and continued sin; 516 were rescued from the surroundings of great temptation unfallen. In almost every case the mothers, and those admitted unfallen, have turned out well, and about 70 per cent. of the others.

While inmates of the Homes, the young women are trained in household and domestic duties, with a view to their becoming good and useful members of society. The great object, however, kept most anxiously before the Committee, is to afford them opportunities of religious instruction, and to impress upon them the extreme importance of turning to God with all their hearts.

The applications for admission are *painfully urgent*, and the charity is wholly dependent upon voluntary contributions.

The Secretary will be happy to forward the last Annual Report.

Bankers—LONDON AND WESTMINSTER BANK (Bloomsbury Branch),

HOSPITAL FOR CONSUMPTION,

BROMPTON.

THE Hospital contains 321 Beds, and in 1896 received 1,595 In-Patients; 13,416 Out-Patients were also treated. The yearly requirements of the Hospital cannot be estimated at less than £25,000 a year. Further, it has been decided, upon the unanimous and urgent advice of the Medical Staff, to establish a

COUNTRY BRANCH

AND

CONVALESCENT HOME,

and it is estimated that £20,000 will be needed to inaugurate this new departure.

The Charity, being unendowed, is dependent on Donations, Annual Subscriptions, and Legacies. Contributions are therefore earnestly solicited in aid of both objects.

INVALID CHILDREN'S AID ASSOCIATION. 18, Buckingham Street, Strand, W.C.

Patron—H.R.H. THE DUCHESS OF YORK.

The Association has been formed for the purpose of helping, *in every possible way*, the seriously invalided and crippled Children of the London Poor.

It works chiefly by Visitors, each of whom takes charge of one or more children: but it also endeavours to carry out whatever is most calculated to benefit the children placed under its care. Skilled nursing, medical advice and treatment, convalescent aid, loan of invalid carriages, industrial training, surgical appliances, are amongst the principal benefits secured.

Funds are greatly needed to meet the heavy expenses incurred. Visitors are also wanted who may be able to go into the poorer districts. Full particulars will be given by the Secretary, who can be seen at the Office at any time, except on the afternoons of Tuesday and Saturday.

N.B.—The Accounts are Audited by Messrs. JACKSON, PIXLEY, BROWNING, HUSEY & Co., of 58, Coleman Street. [251]

LONDON FEVER HOSPITAL, ISLINGTON, N.

Patron : H.R.H. The PRINCE OF WALES.

President ; The Rt. Hon. LORD BALFOUR OF BURLEIGH.

During the last 25 years over 22,000 persons suffering from infectious fevers, other than small-pox, have been treated in this hospital, and probably ten times that number of persons have been saved from infection by the isolation of these sufferers.

Patients pay a fee equal to about one-fourth of their cost, the balance falling upon the funds of the Institution.

Additional help in this great public work is urgently needed, and the benevolent are earnestly appealed to. Governors have the right of sending their domestic servants for free treatment.

Subscriptions and Donations will be gratefully received by the Secretary, at the Hospital.

Major W. CHRISTIE. [146]

THE LONDON ASSOCIATION OF NURSES.

Chief Office: 123, NEW BOND STREET, W.

(Between Brook Street and Grosvenor Street.)

Branch Office: 86, KENNINGTON PARK ROAD, S.E.

Superior Hospital-trained Nurses for Medical, Surgical, Mental, Monthly, Fever and all Infectious Cases; also Male Nurses and Medical Rubbers can be obtained immediately on application to the Superintendent.

Great care is taken in the selection of Monthly Nurses, who reside in a separate home, and never come in contact with those who attend infectious cases.

There is a Home in connection with the Association where invalids suffering from infectious illness can be received under the care of their own physicians, each patient being provided with a separate room and a trained nurse.

M. FIRTH, Superintendent.

Telegraphic Address—"FIRTH'S ASSOCIATION, LONDON."

Telephone—No. 1855, GERRARD.

[151]

THE LONDON CITY MISSION

EMPLOYS 478 MISSIONARIES,

And is in URGENT NEED of Funds.

IT is one of the oldest of the Home Missionary Societies, and has ever held fast to its Evangelical principles. Its work is still pioneering, inter-denominational, and subsidiary to that of the Churches.

Notwithstanding the uprising of other Evangelistic Agencies, the need is no less urgent now than formerly for persevering and systematic house-to-house visitation. In addition to 384 Missionaries, who give their whole attention to visiting the homes of the people, 123 men are set apart for the visitation of special classes, such as Bakers, Cabmen, Canal Boatmen, Navvies, Omnibusmen, Coachmen, Coalheavers, Foreigners, Gasworkers, the Fire Brigade, Police, Postmen, Railwaymen, Scavengers, Soldiers and Sailors; also to the inmates of Hospitals and Work-houses, the Landlords and Customers in Public-houses, and men in the Docks, Common Lodging-houses, Factories, &c., &c. More than half-a-million men were visited, and vast numbers of them personally dealt with, during the past year.

The labours of these devoted men have been largely blessed, and the Committee look with confidence to the liberality of Christians of all denominations for their future maintenance, and with the hope that the number may again reach 504.

At present there are upwards of 50 districts without any guaranteed support, and about 100 districts for which less than £40 was contributed last year.

For every gift of £50 per annum one of the former can be retained, and for sums varying from £5 to £40 per annum the occupation of the partially supported districts can be continued.

If friends are unable to contribute the whole sum necessary to maintain a Missionary, they may perhaps be able to offer £10, £5, or smaller sums. The subscriptions will be grouped for particular districts, and will thus remove the very pressing anxiety of the Committee.

Gifts will be gratefully acknowledged by the Treasurer—**F. A. BEVAN, Esq.**; or by the Secretaries—**Rev. T. S. HUTCHINSON, M.A.**, **Rev. ROBERT DAWSON, B.A.**

THE

LONDON HOSPITAL MEDICAL COLLEGE.

ONE HUNDRED AND THIRTEENTH SESSION.

The **SUMMER SESSION** will commence on **May 1st.**

The **WINTER SESSION** on **Oct. 1st.**

The Hospital, which is the largest general hospital in the kingdom, contains nearly 800 beds, all in constant use. There are wards for accidents, surgical and medical cases, diseases of women and children, and ophthalmic cases. Special departments for diseases of the eye, ear, throat, skin and teeth, and for cancer, tumours, diseases of the bladder, piles and fistula. Number of in-patients last year, 11,337; out-patients, 158,002; accidents, 14,625. Surgical operations daily.

APPOINTMENTS.—Resident accoucheur, house physicians, house surgeons, &c. More than 60 of these appointments are made annually. Numerous dressers, clinical clerks, post-mortem clerks and maternity assistants are appointed every three months. All appointments are free to students of this College. Holders of resident appointments are also provided free board. The New College Buildings are now complete, and afford more than double the former accommodation.

SCHOLARSHIPS AND PRIZES.—Thirty-two Scholarships and Prizes are given annually. Students entering in May are eligible to compete for the Six Entrance Scholarships, value £120, £60, £60, £35, £30 and £20, in September. Luncheons or dinners, at moderate charges, can be obtained in the Students' Club. Fees, 120 Guineas, or by instalments. A reduction of 15 Guineas is allowed to the Sons of Medical Men.

The London Hospital is in direct communication with all parts of the Metropolis. The Metropolitan District and other railways have stations within a minute's walk of the Hospital and College.

THE NATIONAL BENEVOLENT INSTITUTION.

FOUNDED BY THE LATE PETER HERVE.

Established 1819.

Incorporated by Royal Charter.

Under the immediate Protection and Patronage of Her Most Excellent Majesty the Queen, and His Royal Highness The Prince of Wales.

Treasurer—The Reverend Prebendary WHITTINGTON, M.A.

This Institution was founded for the Purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards. The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to £12,700 per Annum.

The total number of aged Persons who have been supported by the Institution is Two thousand five hundred and seventeen, the gross sum distributed to them up to the present exceeding £493,109.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily.

Office—65, SOUTHAMPTON ROW, BLOOMSBURY, W.C. HENRY C. LATREILLE, Secretary. [154]

THE NATIONAL HOSPITAL FOR CONSUMPTION,

on the Separate Principle, VENTNOR (*Incorporated by Royal Charter*), affords hospital treatment with home-like comforts to sufferers from Consumption and other Chest affections. It consists of ten Blocks of Buildings (standing in 22 acres), with separate Bedrooms for each Patient, facing the South and overlooking the Sea; also a Chapel, &c.; and its situation is in the sheltered Undercliff of the Isle of Wight. The results achieved with upwards of 14,000 cases already admitted have been most encouraging.

Funds for maintenance are urgently needed. A Donation of 30 guineas, or an Annual Subscription of 3 guineas, enables the contributor to recommend one In-Patient yearly. The yearly expenses exceed £10,000.

Bankers: THE LONDON AND WESTMINSTER, 1, St. James's Square, S.W.

Bankers—Messrs. BARCLAY & Co., Limited, 54, Lombard Street, E.C.

Office—35, FINSBURY CIRCUS, E.C.

This Undenominational Institution is entirely dependent upon public benevolence, having *no endowment whatever*.

It was founded in 1844 for the Maintenance, Clothing and Education of Fatherless Children of both sexes.

Orphans are received from all parts of the Kingdom, at any age between *three months* and eleven years, and are retained until they are fifteen.

1,969 children have already been admitted to its benefits, 310 of whom are still in the Orphanage.

Their requirements entail a yearly expenditure of at least £8,000, of which only £2,300 is provided by annual subscriptions.

The large balance is dependent upon donations and legacies. Help from the benevolent public is therefore urgently needed and earnestly requested.

The Secretary will be pleased to give any further information.

J. ROWLAND EDWARDS, *Secretary*. [160

Honorary Secretaries—Messrs. GEORGE POCOCK and PERCY R. POCOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10s. to 25s. per month.

There are at present 960 pensioners residing in various parts of the Kingdom, among whom upwards of £6,500 is annually distributed in pensions, paid monthly, through the agency of about 600 Honorary Almoners.

Elections take place in May and November in each year.

In addition to those Elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Thomas Pocock" and "James Templeton Wood" Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion. They can also assist in the Nomination of a Candidate.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

JOHN C. BUMSTED, Esq., *Treasurer*.
W. ELLIOTT TERRY, *Secretary*. [241

235, SOUTHWARK BRIDGE ROAD, LONDON.

ROYAL FEMALE ORPHAN ASYLUM, BEDDINGTON, SURREY.

Established at Lambeth, 1758. Incorporated 1800. Removed to Beddington, 1866.

Patron—HER MAJESTY THE QUEEN. *President*—H.R.H. THE DUKE OF CAMBRIDGE, K.G.

This Asylum maintains and educates Fatherless Girls, and at the age of 16 places them out in respectable private families. New Subscribers to this old Institution are most urgently needed. Children are eligible for admission from all parts of Great Britain. They must be between the ages of 7 and 10, and in all respects thoroughly sound and healthy. They are admitted by Election, held half-yearly, in June and December. Forms of nomination may be obtained at the Offices.

Life Subscription, 2 Votes .. £10 10 0	Annual Subscription, 2 Votes .. £1 1 0
Ditto 1 Vote .. 5 5 0	Ditto 1 Vote .. 0 10 6

A donation of 60 Guineas in one sum entitles the donor to the immediate presentation of One Child to the Charity, provided such child be eligible; Orphan Girls may be placed in the Institution and paid for at the rate of £12 12s. per annum, with an entrance fee of £2 2s. upon admission, pending election or otherwise.

Cheques crossed HOARE & CO. Subscriptions most thankfully received and all information given on application to the Secretary.

London Offices—32, ESSEX STREET, STRAND, W.C. BROUGH MALTBY, *Secretary.* [244]

THE ROYAL HOSPITAL FOR INCURABLES, WEST HILL, PUTNEY HEATH.

Sea-side House, 55, Marina, St. Leonards-on-Sea.

Office—106, QUEEN VICTORIA STREET, E.C.

The work of the Royal Hospital for Incurables is twofold: it affords a HOME for the most necessitous, and grants a Pension of £20 a-year in cases where a home already exists. The Charity is National in its character; persons are received as Inmates and Pensioners from all parts of the United Kingdom. Present number of Beneficiaries:—INMATES, 218; PENSIONERS, 648. Total, 866.

AN ANNUAL SUBSCRIBER has One Vote for each Half-a-Guinea; A LIFE SUBSCRIBER has One Vote for Life for each Five Guineas. The ELECTIONS are held Half-Yearly, in the months of May and November.

The Hospital may be visited any week-day between the hours of 12 and 6, by the Governors and Friends of the Institution.

Bankers—Messrs. GLYN, MILLS, CURRIE & CO., 67, Lombard Street, E.C.

Post Office Orders payable at Queen Victoria Street, E.C.

FREDERIC ANDREW, *Secretary.* [172]

ROYAL HUMANE SOCIETY.

Instituted 1774. Supported by Voluntary Contributions.

Patron—Her Most Gracious Majesty THE QUEEN.

Vice-Patrons—{ H.R.H. the DUKE of YORK, K.G.

{ H.R.H. the DUKE of CAMBRIDGE, K.G., G.C.M.G.

President—His Grace the DUKE of ARGYLL, K.G., K.T., F.R.S.

Chairman and Treasurer—Colonel HORACE MONTAGU.

Deputy Chairman—Vice-Admiral GEO. DIGBY MORANT.

Secretary—Major F. A. C. CLAUGHTON.

Honorary Rewards are granted for Saving Life from Drowning in all British Possessions.

Pecuniary Rewards are granted within an area of Thirty Miles around the Metropolis.

During the Skating Season, experienced Icemen are provided to prevent loss of life in the various waters about London; and Boats are in daily attendance, morning and evening, to prevent fatal results attending Accidents to the enormous number of Bathers in the Serpentine.

Nearly Three Hundred Places in and around London are furnished with Life-Saving Apparatus to rescue persons from Drowning.

The Society has for the past sixteen years encouraged Swimming competitions with "reference to Saving Life from Drowning," and Prizes are annually given for proficiency in them at various leading Schools and Training Ships selected by the Committee.

The Society is known throughout all the civilised world, but the pecuniary support it receives is quite inadequate to its usefulness, and it is necessary to remind the inhabitants of London that during a severe winter the Society has to incur a large outlay in finding ice-boats, ladders and ropes, for the protection of those who venture on dangerous ice; also for the wages and equipment of Icemen.

Life Governor.....TEN GUINEAS. Annual Governor.....ONE GUINEA.

Donations or Subscriptions will be thankfully received by Major F. A. C. CLAUGHTON, Secretary, at the Office, 4, Trafalgar Square, London, W.C.; or by Messrs. PRESCOTT, DIMSDALE, CAVE, TUGWELL & CO., Bankers, 50, Cornhill, E.C. [163]

ROYAL LONDON OPHTHALMIC HOSPITAL,

BLOMFIELD STREET, MOORFIELDS, E.C.

FOUNDED IN 1804.

Patrons—{ Her Most Gracious Majesty THE QUEEN.
 { H.R.H. THE DUKE OF CAMBRIDGE, K.G.

President—Sir JOHN LUBBOCK, Bart., M.P., F.R.S., &c. JOHN DEACON, Esq., *Treasurer*.
Bankers—Messrs. WILLIAMS, DEACON & Co., 20, Birchin Lane, E.C.

This Hospital, the oldest and considerably the largest of its speciality in England, is the parent of all the Eye Infirmaries throughout the British Dominions. The admission is entirely free to the afflicted poor, all whose wants are gratuitously and liberally supplied.

A LIFE SUBSCRIPTION, which is £10 to 100, or an Annual Subscription of not less than £1 1s., entitles the Donor to all the privileges of a Governor.

Support is urgently needed, both for the General Management and for the New Hospital (now building).

Subscriptions and Donations will be thankfully received by the Bankers, Messrs. WILLIAMS, DEACON & Co., Birchin Lane; or the Secretary at the Hospital.

ROBERT J. NEWSTEAD, *Secretary*. [250]

ROYAL NATIONAL MISSION TO DEEP SEA FISHERMEN.

Patron—HER MAJESTY THE QUEEN.

This Society has ministered for fifteen years to the spiritual and physical needs of the North Sea trawlers, as well as to the Fishermen on the West Coast, off the South of Ireland, East Coast of Scotland, and elsewhere. During recent years the Society has established two permanent hospital stations on the Labrador coast, which are also centres of spiritual effort. The steamers *Fulia Sheridan* and *Princess May* carry on itinerary medical Mission work along the whole 800 miles of coast frequented by the English-speaking fisher-folk. The Society has also shore agents at *Georgetown* (Gt. Yarmouth), *Grimsby*, *Ymuiden* (Holland), *Ostend*, &c. It thus wholly employs thirteen vessels (three of them being fully equipped hospital ships with surgeons on board), and the number of persons medically treated as in- and out-patients during 1896 was no less than 22,591.

The Council earnestly appeal for Funds. Large or small donations will be thankfully acknowledged. Cheques or Postal Orders to be made payable to **The Secretary (FRANCIS H. WOOD)**, and crossed "Lloyds Bank, Ltd."

Offices: BRIDGE HOUSE, 181, QUEEN VICTORIA ST., LONDON, E.C. [243]

ST. JOHN'S HOSPITAL FOR DISEASES OF THE SKIN.

FOUNDED A.D. 1863.

OUT-PATIENT DEPARTMENT—49, LEICESTER SQUARE, W.C.

President—The Right Hon. THE EARL OF CHESTERFIELD.

SUBSCRIPTIONS AND DONATIONS ARE EARNESTLY SOLICITED.

The Hospital maintains 50 Beds for Free In-patients. Out-patients are seen Daily at 2; also on Thursday mornings at 10.30 and every night, except Saturday, at 6.

Bankers.—The London and Westminster Bank and its Branches.

J. DUNLOP COSTINE, *Superintendent*. [252]

BEFORE SIXTY YEARS AGO.

The special claims of the SOCIETY FOR PROMOTING FEMALE EDUCATION IN THE EAST to recognition are:—

1. That it was the only Society for both Zenana Work and School Work existing in the Empire at the time of the Queen's Accession.
2. That it was then already carrying on Zenana Work in India, and Harem Work in Egypt, and School Work in China, the Straits, Egypt and India.
3. That it was the pioneer of all subsequent efforts in Zenana and Harem Work, for which it prepared the way, by encountering, and, to a certain extent, overcoming the greatest initial difficulties.
4. That it still occupies a wider sphere than any kindred Society in existence.
5. That by the help of God it has continued steadfast unto this day "in the Apostles' doctrine," and in the work of sending the Gospel to the heathen women and girls of the East.

The Committee urge these claims, and *Appeal for Help for their Commemorative Fund*, to enable them to strengthen and extend the work of the Society.

Secretary—Miss WEBB, 267, Vauxhall Bridge Road, S.W. [164]

SAINT MARK'S HOSPITAL

For Fistula, Piles, and other Diseases of the Rectum,

CITY ROAD, LONDON, E.C.

FOUNDED 1835.

PRESIDENT.

THE RIGHT HON. THE LORD MAYOR.

TREASURER.

RICHARD BIDDULPH MARTIN, Esq., M.P.

BANKERS.

MARTIN'S BANK, LIMITED, 68, LOMBARD STREET, E.C.

THIS is the only **entirely free** Special Hospital for the treatment of such painful and distressing diseases.

Funds are very urgently needed to open more Wards, and will be thankfully acknowledged by

EDGAR PENMAN, *Secretary*. [239]

ST. PETER'S HOSPITAL

For Stone, Stricture & Urinary Diseases, &c.

ESTABLISHED 1860.

HENRIETTA STREET, COVENT GARDEN, W.C.

President—Rt. Hon. THE EARL OF DUNRAVEN AND MOUNT EARL, K.P.

Treasurer—F. A. BEVAN, Esq.

ST. PETER'S HOSPITAL is intended for Persons of both Sexes suffering from Stone in the Bladder and other Diseases of the Genito-Urinary Organs, and contains 2 Wards for Men, 24 Beds; 1 Ward for Women and Children, 2 Beds, and a Private Ward for Paying Patients.

The number of Patients treated during the last twelve months was 474 In-Patients and 4,799 Out-Patients, the latter being seen Daily, *viz.*, Monday, 2 to 3 and 5 to 7; Tuesday, 2 to 3; Wednesday, 5 to 7; Thursday, 2 to 3; Friday (Women and Children only), 2 to 3; and Saturday, 4 to 7.

A Donation of Ten Guineas constitutes a Life Governor; a Subscription of One Guinea an Annual Governor. Subscriptions and Donations will be thankfully received by MESSRS. BARCLAY & Co., 54, Lombard Street, E.C.; MESSRS. HOARE & Co., 37, Fleet Street, E.C., or by

IRWIN H. BEATTIE, *Secretary*. [165]

ST. THOMAS'S HOSPITAL, LAMBETH, S.E.

THREE WARDS ARE STILL CLOSED TO THE SICK POOR
THROUGH WANT OF FUNDS.

Present Hospital Accommodation in South London is lamentably deficient, as shown by the following figures:—

London District.	Population in 1896.	Beds in General Hospitals.	No. of Extra Beds Required to give the same Proportion to Population.
South of the Thames	1,664,104	986	1,392
North of the Thames	2,768,914	3,975	—

Help in the form of Subscriptions and Legacies is most earnestly solicited.
Endowment of Bed, £1,000. Governor's Donation, £52 10s.

Bankers—UNION BANK, CHARING CROSS. *Treasurer*—J. G. WAINWRIGHT.

THE SURGICAL AID SOCIETY.

Chief Office: SALISBURY SQUARE, FLEET STREET, E.C.

President—The Right Hon. the EARL OF ABERDEEN.

This Society was established in 1862 to supply Trusses, Elastic Stockings, Artificial Limbs, &c., and every other description of mechanical support to the Poor, without limit as to locality or disease.

WATER BEDS and INVALID CHAIRS and CARRIAGES are Lent to the Afflicted.

It provides against imposition by supplying the appliance on the certificate of a Surgeon only. By special grants it ensures that every deserving applicant shall receive prompt assistance.

270 PATIENTS ARE RELIEVED EVERY WEEK.

Over 23,000 Appliances given in the year ending September 30, 1897.

Annual Subscription of £0 10 6	} Entitles to two recommendations per annum.
Life Subscription of 5 5 0	

Contributions are earnestly solicited. Bankers—Messrs. BARCLAY & Co., Ltd., Lombard St. RICHARD C. TRESIDDER, Secretary. [253

WEST END

HOSPITAL FOR DISEASES OF THE NERVOUS SYSTEM,
PARALYSIS AND EPILEPSY,

And especially for the Indoor Treatment of Young Paralyzed Children,

73, WELBECK STREET, CAVENDISH SQUARE, W.

Instituted 1878.

Under the especial Patronage of HER ROYAL HIGHNESS THE PRINCESS OF WALES.

Contains 50 Beds for Paralyzed Children.

Applicants must be in attendance at the Hospital for Examination by the Physicians at half-past one o'clock upon Mondays, Wednesdays or Thursdays, or six o'clock upon Tuesday and Friday evenings.

Patients contribute according to their means. The indigent are immediately and gratuitously treated upon production of a Certificate signed by a Subscriber to the Hospital, a Minister of Religion or Registered Medical Practitioner, that the applicant is known by the donor to be deserving of free Hospital Relief.

Urgent cases treated in the first instance without letter.

N.B.—Annual Subscriptions are earnestly solicited.

H. ALEX. DOWELL, Treasurer.

B. HECKSTALL-SMITH, Secretary. [170

WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

(Incorporated by Royal Charter, Nov. 1st, 1894) Supported by Voluntary Contributions.
Patron—H.R.H. the PRINCE OF WALES, K.G. | *President*—His Grace the DUKE OF DEVONSHIRE, K.G.
Treasurer—Rt. Hon. LORD ROTHSCHILD, | *Chairman*—WILLIAM BIRD, Esq., J.P., D.L.

Its annual income from Endowment is only £115, wherefore the Charity is dependent upon voluntary contributions to provide for its present annual expenditure of about £6,000, incurred in the treatment of about 1,600 In-Patients and 27,000 Out-Patients per annum.

It is the nearest General Hospital for Hammersmith, Fulham, Acton, Chiswick, Brentford and for large portions of Kensington and Barnes. When the present structure, which contains 97 Beds, was commenced in 1871, the population of those parishes was 218,468 persons, while now it is nearly 500,000 persons. Owing to this enormous increase the provision of beds has for many years past proved utterly inadequate.

Contributions towards paying off the debt of nearly £10,000 in respect of the new block of wards recently completed and intended to accommodate about 80 additional beds, are urgently needed. From 60 to 80 approved Patients always awaiting the next vacant bed.

Bankers { LONDON AND COUNTY BANK, Hammersmith, W.

THE AUTOMATIC CYCLOSTYLE.

The Latest Improvement in Duplicating Apparatus.

ADVANTAGES.

1. No skill required. The work being done by the Machine automatically, a novice can at once obtain perfect copies.
2. Great uniformity of copies. The pressure being constant and regular, the copies are all alike.
3. The process of re-inking is made much easier and cleaner. One inking suffices for 100 to 200 copies.
4. Equally adapted for reproducing written or type-written matter.
5. Great speed in taking copies. It is only necessary to turn a handle which lifts and lowers the frame, and time is gained by having a less number of re-inkings.

The merits of the Cyclostyle are now sufficiently well-known to require no enumeration here, and this new appliance for reproducing the copies will be found a great advance where many copies are required and in a short time. Inking, printing, raising and lowering of frame, automatically done.

THE AUTOMATIC CYCLOSTYLE.

Price Complete. { For Reproducing Handwriting, Octavo size, £3 3s. Quarto size, £4. Foolscap size, £4 4s. Special Machine for Hot Climates, fitted with Indiarubber Rollers, Foolscap size, £5 5s.; Quarto size, £5. Outfit of Materials for reproducing Typewriting, 12s. 6d. extra each Machine.

For COUGHS, COLDS, ASTHMA, BRONCHITIS
DR. J. COLLIS BROWNE'S

THE GREAT
 SPECIFIC FOR
 CHOLERA.

CHLORODYNE

D R. J. COLLIS BROWNE
 (late Army Medical Staff)
 DISCOVERED A REMEDY, to
 denote which he coined the word
CHLORODYNE. Dr. Browne is
 the **SOLE INVENTOR**, and, as the
 composition of Chlorodyne cannot
 possibly be discovered by Analysis
 (organic substances defying elimi-
 nation), and since the formula has
 never been published, it is evident
 that any statement to the effect
 that a compound is identical with
 Dr. Browne's Chlorodyne *must be*
false.

This Caution is necessary, as
 many persons deceive purchasers
 by false representations.

D R. J. COLLIS BROWNE'S
CHLORODYNE.—Vice-Chan-
 cellor Sir W. PAGE WOOD stated
 in the Court that Dr. J. COLLIS
 BROWNE was **UNDOUBTEDLY**
 the **INVENTOR** of **CHLORODYNE**,
 that the whole story of the defend-
 ant Freeman was deliberately un-
 true, and he regretted to say it had
 been sworn to.—See *Times*, July
 13th, 1864.

DIARRHŒA, DYSENTERY.

GENERAL BOARD OF HEALTH,
 London, REPORT that it ACTS as
 a **CHARM**, one dose generally suffi-
 cient. Dr. GIBBON, Army Medical
 Staff, Calcutta, states: "2 DOSES
 COMPLETELY CURED ME OF
 DIARRHŒA."

D R. J. COLLIS BROWNE'S
CHLORODYNE is the
GRUE PALLIATIVE in
NEURALGIA, GOUT,
CANCER, TOOTHACHE,
RHEUMATISM.

The Illustrated LONDON NEWS of
 Sept. 28, 1865, says:

"If I were asked which single medi-
 cine I should prefer to take abroad with
 me, as likely to be most generally useful,
 to the exclusion of all others, I should
 say **CHLORODYNE.** I never travel
 without it, and its general applicability
 to the relief of a large number of simple
 ailments forms its best recommenda-
 tion."

Royal Irish Fusiliers, Cork.
 Feb. 6th, 1865.

DEAR SIR.—I wish to give public
 testimony to the infinite value which
 your remedy for Dysentery and Diar-
 rhœa, **DR. BROWNE'S CHLORO-**
DYNE, proved to several members of

the Special Service Corps, in the recent
 Ashanti Expedition. I bought a small
 bottle just before leaving London for
 West Africa, and having used it myself
 with beneficial result, treated some of
 my comrades with equal success (I should
 say some of them were very bad). I should
 be very glad to recommend it to anyone
 about to travel in a treacherous climate,
 where they are so much exposed to this
 dangerous malarial
 "Gravelly" form,
 G. SMITH, "Band," R.I.F.
 To J. T. DAVENPORT.

D R. J. COLLIS BROWNE'S
CHLORODYNE is a liquid
 medicine which assures a PAIN OF
 EVERY KIND, affords a calm, re-
 freshing sleep WITHOUT HEAD-
 ACHES and INFLAMMATIONS, the
 nervous system when exhausted.

D R. J. COLLIS BROWNE'S
CHLORODYNE rapidly cuts
 short all attacks of
F, PILEPSY, SPASMS, COLIC,
F, PALPITATION, HYSERIA.

IMPORTANT CAUTION.—
 THE **IKEMENSE** SALE of this
REMEDY has given rise to many
UNSUBSTANTIAL IMITATIONS.
 Be careful to observe Trade Mark.
 Of all Chemists, Is. 3d., 2s. 9d.,
 and 4s. 0d.

SOLE MANUFACTURER,
J. T. DAVENPORT,
 33, GREAT BUNSLY STREET, W.C.

Dr. BROWNE
 coined the word
CHLORODYNE
 to designate his
 discovery, there-
 fore to apply
 the word to
 other prepara-
 tions is dis-
 honest,

TUNBRIDGE WELLS, KENT.

FULLER, SMITH & TURNER,

"GRIFFIN" BREWERY, CHISWICK.

THE "GRIFFIN" BREWERY, CHISWICK. From the River.

Messrs. FULLER, SMITH & TURNER invite critical consideration of the special purity and excellence of their Ales for Family use, a class of beer which they have made their speciality.

For a lengthened period an increasing proportion of their attention has been given to the production of the lighter qualities, the change in public taste, though very gradual, having been carefully watched and gauged by successive directors of their firm. Having developed every possible source of improvement and perfected their processes always with the aim of providing the very finest brews for the dinner table and home use, their Ales have acquired an unexcelled reputation wherever known.

The **CHISWICK BREWERY** was established in the early part of the last century, when the first of the Four Georges was on the throne, and the first Jacobite Rebellion was an event of only yesterday. The business was then carried on as "**YE OLDE GRIFFIN HOCK BREWERY**;" and a painting of the Griffin as a trade mark, dated six years later than the '45, can still be shown. In those days the heavier and more heady was the beer in demand; and the word "Hock," being the term under which a special class of heavy dark ale was known and largely consumed in London, was chosen as an appropriate part of the title. The use of the word still holds good in this district for what is known as "Four Ale."

The name of the firm carrying on trade at Ye Olde "Griffin" Brewery was altered from time to time, as different partners became identified with it. Originally Wood & Co., the style was successively changed to WOOD & FULLER, WOOD and THOMPSON, THOMPSON, FULLER and WOOD, and FULLER and THOMPSON, until, about 1843, it reverted into the hands of Mr. FULLER, who, taking into partnership Messrs. SMITH and TURNER, made the firm's name what it now is.

In all these years the one object of the proprietors has been to secure the most absolute purity, regardless of cost, combined with brilliancy, flavour and keeping qualities. The rapid extension of their business round all their different branches has proved that this sound policy is fully appreciated.

Dinner Ales.

During the last half-century the requirements of private trade have been specially met by the "GRIFFIN" BREWERY, and are now provided for in the best possible manner by the above XK and AK qualities.

It can be found, upon reference, that the gravity of ordinary beer in the last century was never less than 28 lbs., and was preferred to be as dark in colour as possible, the question of brilliancy not being much considered by the consumer. To-day these conditions are reversed, a light sparkling Ale being the one in request, and to attain the highest perfection in such a brand every ingredient must be of the purest and best, and manipulated in the most scientific manner.

The malt used by Messrs. FULLER, SMITH & TURNER is made from the finest selected Eastern Counties barleys, which, of late years, have been so well harvested, and the Hops are the choicest of East Kents that money can procure. In the years 1896-1897 the firm used no foreign material of any kind in their brewery, English Hops and Southern and Eastern County Malts being solely employed. Each sample of malt was submitted to analysis, and the foreign, being found inferior to the home-grown, was in every case rejected, without allowing the question of cost to influence the decision.

The "GRIFFIN" BREWERY is fortunate in possessing an unfailing supply of the purest possible water. This is drawn from a well sunk over 400 feet into the chalk. To its absolutely faultless purity must, in great part, be attributed the exceptional keeping quality of the beers. This same water has recently been utilised in the manufacture of the highest class Mineral Waters, for which it is of the utmost value. It has lately been submitted to the most stringent analysis by Drs. E. R. Moritz and C. H. Morris, Consulting Chemists to the Brewers' Society.

NOTE.—The cellar in which beer is kept should be of an equal temperature, ranging from fifty to sixty degrees. It is most important that the vent-peg be kept tightly in the cask, and when removed to permit the beer to run it should be carefully replaced. After tapping, three clear days ought to elapse, with the vent-peg eased, previous to any beer being drawn. A cask may be kept cool by having a turf of grass placed upon the top of it, and occasionally sprinkling the turf with cold water.

[301

FULLER, SMITH & TURNER,

"GRIFFIN" BREWERY, CHISWICK.

Christmas Ale.

The "GRIFFIN" BREWERY has made it a point to keep up the custom of vating the Strong Ale which was in such demand at the end of the last century, but which is now only required on special occasions. Immense vats are devoted to this purpose, and have been drawn upon for many public celebrations.

Bottled Beers.

Price List.

	Imp. Pint.		Imp. Pint.
PALE ALE	2/6	Stout	2/6
INDIA PALE ALE ...	3/6	Extra Stout	3/6

The convenience of bottled beers for storing and handling is now fully recognised in many families, and the four qualities quoted above may be said to cover the full range of present day taste, and will be found highly appetising and digestive.

Intending customers should write for particulars of the local deliveries, which will be forwarded upon request.

NOTE.—Bottled ales should always be kept in an upright position, and in a comparatively warm temperature (about sixty degrees); after removal the bottles should be allowed to stand for twenty-four hours.

The Ales of the "GRIFFIN" BREWERY are supplied to the households of H.R.H. the PRINCE OF WALES, the DUKE OF CAMBRIDGE, the PRINCESS VICTORIA OF HOHENLOHE, the DUKE OF NORFOLK, the DUKE OF BUCCLEUCH, the DUKE OF BEDFORD, the DUKE OF MARLBOROUGH, the DUKE OF SUTHERLAND, the DUCHESS OF MONTROSE, the MARQUIS OF SALISBURY, and the MARQUIS OF LORNE, as well as to numerous Clubs and Hospitals.

With what shall we cover the FLOOR?

Treloar's Carpets.

TRELOAR & CO. 25, Abchurch Lane, London, E.C. 4.

TRELOAR & SONS,

Ludgate Hill, London, E.C.

Telegrams:—"TRELOAR, LONDON."

Telephone:—No. 15044.

Artistic Floor Coverings.

NOTICE.

TRELOAR & SONS deal exclusively in Floor Coverings, and offer exceptional advantages to customers in consequence.

To enable intending purchasers to form some idea as to the merits of various British and Foreign Floor Coverings, they issue Sheets of Coloured Drawings representing a small portion of their Stock, and thus place before those about to furnish the most reliable information regarding every kind of Carpet or other Floor Covering.

Purchasers may rely upon getting the very best quality of every kind of Carpet if they wish for it, but the less expensive grades are also kept in stock. Customers residing in the country will be able to ascertain prices and particulars by consulting the Catalogue and the Coloured Drawings. Patterns and full detailed Estimates will be sent free upon application. Foreign Carpets will be sent on approbation if desired.

It is, of course, impossible to Catalogue all the various British and Foreign Carpets and Rugs. The patterns and colourings of Eastern Carpets and Rugs vary considerably; in fact, the great charm of these hand-made articles is that it is seldom two can be found exactly to match in every respect. At frequent intervals a list of Oriental Carpets and Rugs is issued in addition to the regular Catalogue. The Coloured Drawings are intended only to be a guide, and do not in the slightest degree represent the extent of the enormous stock of every description of Carpet and other Floor Covering.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS'

LIST OF COLOURED DRAWINGS OF ARTISTIC FLOOR COVERINGS.

Intended to be a Guide to Customers.

Upon application any of the above-mentioned Plates will at once be forwarded free by post.

Every description of British and Foreign Floor Coverings, Carpets, Rugs, Mats, Floor-Cloth, etc., etc., kept in stock. For Turkey, Persian and Indian Carpets, Koula Carpets, Kirman or Anatolian Carpets, Yhiordes Carpets and all Foreign Rugs for the floor, see Monthly List of sizes and prices.

All Goods sold for prompt cash. Cheques should be crossed "City Bank, Ludgate Hill Branch."

NOTICE.—When customers not known to the firm are ordering from the Country and find it inconvenient to remit with order, it will save time if a Reference in London, or to a Customer or Banker be sent. Customers ordering from a new address will oblige by notifying the fact.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS' CHEVIOT CARPETS.

REGISTERED AND PROTECTED BY TRADE MARK.

These well-known Carpets

are suitable for Bed-rooms, Sitting-rooms and Offices, &c. &c. They are adapted more for light than very heavy wear, and as a good floor covering at a moderate price they are frequently used. They are made and kept in stock in various other patterns in addition to those represented on the plates.

They are ALL WOOL

and it is necessary to caution the public against imitations made of a mixture of cotton and jute, which are sometimes offered at somewhat lower prices.

Other lengths in any of the foregoing widths made to order, but these Carpets cannot be made wider than 12 feet.

THE QUEEN says:—"The writer of this note had a year's experience of Cheviot Carpets, and, finding them to wear well and look well, has every reason to be satisfied."

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS' SHETLAND CARPETS.

These Seamless Carpets

are protected by Trade Mark and Registered. They are very heavy and reversible, being what is called in the trade "Three Ply." The designs, as may be seen, are in good taste. In addition to the patterns here shown we have a large stock of others in all colourings. Like Cheviot Carpets,

**They are All-Wool,
and the Wear is very Good.**

Being stouter than Cheviot Carpets, they, of course, will stand harder wear. Shetland Carpets are as heavy as Brussels Carpets, and will certainly

Wear longer and give greater satisfaction
than any of the cheap and inferior Brussels.

SHETLAND CARPETS

ARE KEPT IN STOCK IN THE FOLLOWING SIZES, VIZ. :—

FT. IN.	FT. IN.					£	s.	d.
9 0	by 7 6	1	15	9

Other lengths in any of the above widths made to order, but the Carpets cannot be made wider than 12 feet.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS'

KERVAL CARPETS.

PROTECTED BY TRADE MARK AND REGISTERED.

These are the latest Novelties in Seamless Carpets.

Although the price is so low, they have all the appearance and style of the finest productions of the Eastern looms.

They are All-Wool,

reversible, and are made in a great variety of patterns and colourings. Strongly recommended for hard wear.

These Carpets are wonderfully Effective considering the Cost.

KERVAL CARPETS

are made in the following sizes, of the patterns as shown on plate, as well as in various other patterns and colourings.

FT.	IN.		FT.	IN.				£	s.	d.
9	0	by	7	6	2	1	3

15	0	"	12	0	5	10	0

Other lengths in any of the above widths made to order, but these Carpets cannot be made wider than 12 feet.

CAUTION !

Many Imitations of TRELOAR'S SEAMLESS CARPETS are offered to the public. It is desirable, therefore, to mention that CHEVIOT, SHETLAND, PAISLEY, TWEED & KERVAL CARPETS are all protected by Trade Marks which cannot be used by any other Firm.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS'

" LUDGATE "

BRUSSELS SQUARES.

Of our famous "Ludgate" Brussels Carpets

our stock is large. The price is from 3/9 per yard; Border from 3/2 per yard, 18 inches wide, and the quality is guaranteed. We have generally in stock

A Large Number of Squares, Bordered all Round, and ready for Laying Down,

which we make up from remnants and old Patterns, and sell at a reduced rate. On application, if sizes required be given, prices and particulars of Squares in stock will be sent.

TRELOAR'S

Special Quality Stair Carpets.

Brussels, Wilton and Saxony.

We have made extra quality Brussels Carpets a special study, and being aware that supplying a good Carpet of the old-fashioned quality at a fair price, will in the long run do us more credit than selling a cheap common quality, we are content to let time prove that we can be relied upon.

Like many other coverings for floors, it requires care when first laid. It improves as the pile gets flattened down by wear. When it is laid upon stairs, for which purpose only the extra quality should be used, it should be frequently shifted, so as to give it an equal amount of wear in every part. The more often it is so shifted, the better it will wear, and the longer it will look bright and fresh. Prices for Brussels Stair Carpets from 3/9 to 4/6, or even higher. Width 27 inches.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS'

"LUDGATE"

AXMINSTER CARPETS.

SEAMLESS THICK PILE.

The demand for Seamless Carpets

has now become so great that manufacturers are compelled to make them. The trade was first brought to recognise this want by the introduction of our "Cheviot Carpets." Axminster Carpets are now made in various sizes

All ready for Laying Down, Bordered all round and Seamless.

Considering the quality, the prices will be found to be very moderate. Four patterns are shown on this Plate, others can be sent for inspection.

THE FOLLOWING ARE A FEW OF THE SIZES AND PRICES OF SEAMLESS
"LUDGATE" AXMINSTER CARPETS:—

FT. IN.		FT. IN.						£	s.	d.
10	0	by	6	0	3	2	0
10	0	"	7	6	4	7	0
12	0	"	9	0	6	2	0
12	0	"	10	0	6	18	0
15	0	"	12	0	10	5	0
18	0	"	12	0	12	8	0

Other lengths in any of the above widths kept in stock or made to order.

WE HAVE A

Large Assortment of other Patterns of these Carpets

always in stock. Axminster Carpets are made in many varieties. Axminster kept in stock at 2/11 per yard. In all Pile fabrics the darker patterns wear better than the lighter coloured.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS' ORIENTAL CARPETS.

Turkey, Persian, and Indian Carpets,
Daghestan Rugs, &c. &c.

ANTIQUÉ CARPETS AND RUGS.

We have in stock an assortment of all qualities, and are able therefore to suit all customers.

We have every reason to believe that the **CARPETS** imported by us from Turkey, Persia and India are shipped under such circumstances as to render it impossible for any other firm to sell at lower prices.

If favoured with enquiries, we will quote price and forward on approbation, any Carpets or Rugs, upon receipt of reference or remittance.

**We have all the Newest Colourings
and Designs,**

and any Carpet not in stock can be made to order in from Three to Four Months.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS' LINOLEUM.

PRIZE MEDAL, 1878.

Treloar's Linoleum. Warm, Elastic and Durable.

Plain Brown or Red, 1/3 to 3/- according to quality and thickness, and a lower quality still at 1/- per square yard; this, however, will not stand hard wear. Sometimes this lower priced Linoleum is considered good enough for using as a surround to carpets in bedrooms, etc., and with a pattern printed on it at 1/3 a yard, has a smooth bright surface which can be easily swept or polished.

TRELOAR'S LINOLEUM STAIR CLOTH.

This is made especially for the purpose. It is very pliant, the oxidised oil in it being greatly in excess of the quantity used in the ordinary Linoleum. It can be easily bent.

GREENWICH INLAID LINOLEUM

is a patented article, and is made in many new and appropriate designs in imitation of Tiles and Parquet Flooring. The pattern is not printed on the surface, as is the case in ordinary cloth, but goes right through the material, so that it cannot wear off. On a flat, even floor this Linoleum will, in fact,

Wear almost for ever.

Price 3/6 per square yard.

TRELOAR & SONS, Ludgate Hill, London.

TRELOAR & SONS' COCO-NUT FIBRE MATTING

PRICES.

	18-in.	24-in.	27-in.	35-in.	45-in.	54-in.	72-in.	wide.
Ordinary	-/8	-/10	1/0	1/4	1/3	2/2	2/8	per yd.

A Lower Quality from 1/- per square yard, and an Extra Superfine Quality at special price.

DOUBLE TWILL COCO-NUT FIBRE MATTING, in all widths, at 2/- per square yard.

NAPIER and other Mattings in all widths and various Colourings. Bordered, Striped, and a great variety of Pattern Mattings, suitable for Halls, Passages, Stairs, Sitting-rooms, Nurseries, &c. &c., at prices proportionate to the above, according to quality.

TRELOAR'S COCO-NUT FIBRE MATTING was laid down on the floors of the

Fine Arts Galleries of the International Exhibitions,

1851, 1853, 1862, 1865, 1867, 1878, 1883, 1884, 1885, 1886; is laid down in most of the Public Buildings of the country—at the Royal Albert Hall, the International Exhibition, South Kensington Museum numerous Hospitals, Lunatic Asylums, Hotels, &c. &c.

FIJI FIBRE IMPERIAL MATS.

(Registered).

"THE TRELOAR MATS may claim for themselves a place of honour of their own amidst the Art Manufactures of our day."—*Art Journal*.

Mats with Names, Crests, Mottoes, Monograms,
or Designs of any description, to harmonise with Architectural and other decorations.

THE

Patent Sanitary Dust Trap.

THE Patent Sanitary Dust Trap is intended to take the place of the ordinary shoot door, and consists of a drum-like hopper (A) working in a cylindrical casing (B); a lever (C) is provided by means of which the hopper is actuated. When the trap is opened dust and refuse can be safely

put in, and then, by an upward movement of the lever (C), the hopper is carried round and emptied down the shaft on the other side of the wall, the orifice being closed simultaneously with the revolving of the hopper. The perfect closing of the trap prevents any inroad of vitiated air from the shoot. The hopper revolves in dust-proof bearings, to obviate clogging.

Inside Size of Drum.		Over All Dimensions.

THE ÆOLIAN.

THE ÆOLIAN

*Is conceded by the World's best Musicians
to be, without question,*

THE GREATEST MUSICAL INVENTION OF MODERN TIMES.

By the invention of the ÆOLIAN, *even those devoid of musical knowledge can luxuriate in all the works of the great Masters, whether sacred or secular.* The ÆOLIAN looks like an upright piano, and sounds like an orchestra. It has a majestic volume of tone, which is controlled by stops, and increased or decreased by swells, the use of which may be learned in a few hours.

The music is *not in the least mechanical*; it may be tremulously sweet and low, or may vibrate, thrill, and thunder with all the power of a full ORCHESTRAL RENDITION. A touch of a finger changes the time—from presto to andante, from allegro to adagio—in an instant. The player has *absolute control* of the instrument, which responds to his will with more than life-like celerity and precision. There are red lines drawn upon the music to indicate the proper expression, and in a *week's time* the VERIEST NOVICE in music—especially if he has a good ear—can *render beautifully* the most difficult compositions. The ÆOLIAN is also fitted with a keyboard which can be played by musicians in the ordinary way, rendering the instrument a lifelong pleasure to every member of the family, whether musically educated or not.

Price from £21 to £160.

*We give DAILY RECITALS from 10 a.m. to 6 p.m., and your visit
will be deemed a favour.*

ADVERSITY.

The Sweet Milk of Adversity—PHILOSOPHY.

IT IS FOR YOU TO FIND OUT WHY YOUR EARS ARE BOXED!

"Life is not given to us for the mere sake of living, but always with an ulterior aim."—T. CARLYLE.

HUXLEY asks:—

"Who are the really great

AND

Successful men of the world?

Those who take honours in Nature's University, who learn the laws which govern men and things, AND OBEY THEM, are the really great and successful men in the world. Those who won't learn at all ARE PLUCKED, and then you can't come up again. NATURE'S PLUCK means EXTERMINATION." The simple meaning is, when ailing, pay no attention to the regulation of your diet, exercise, or occupation; attempt no conformity to the Laws of Life; or, when you have drawn an overdraft on the Bank of Life, &c., avoid the use of ENO'S "FRUIT SALT" (you cannot over-rate its simple but great value), and you will be surprised to—

"Learn of the body what a frail and fickle tenement it is, which, like the brittle glass That measures time, is often broke ere half its sands are run."

Every Travelling Trunk and Household ought to contain a Bottle of

ENO'S "FRUIT SALT."

"No matter where your feet may stray, nor what you meet with on the way, You never will through Illness Halt, if fortified with ENO'S SALT."

IMPORTANT TO ALL LEAVING HOME FOR A CHANGE.

—Don't go without a Bottle of ENO'S "FRUIT SALT." It PREVENTS any OVER-ACID state of the BLOOD. It should be kept in EVERY BEDROOM and TRAVELLING TRUNK, in readiness for any emergency. Be careful to avoid rash acidulated salines, and use ENO'S "FRUIT SALT" to prevent the bile becoming too thick and impure, producing a gummy, viscous, clammy stickiness or adhesiveness in the mucous membrane of the intestinal canal. FREQUENTLY the PIVOT of DIARRHŒA and DISEASE. ENO'S "FRUIT SALT" prevents and removes diarrhœa in the early stages. Without such a SIMPLE PRECAUTION the JEOPARDY of LIFE is IMMENSELY INCREASED. There is no doubt that where it has been taken in the earliest stages of a disease, it has in innumerable instances PREVENTED A SERIOUS ILLNESS. The effect of ENO'S "FRUIT SALT" on any DISORDERED and FEVERISH condition is SIMPLY MARVELLOUS. It is in fact NATURE'S OWN REMEDY and an UNSURPASSED ONE.

CAUTION.—Examine each bottle, and see that the CAPSULE is marked *Pr*. Without it you have been imposed on by a worthless imitation.

J. C. ENO, LTD., AT THE "FRUIT SALT" WORKS, LONDON
