THE

Scottish Provident Institution.

Instituted 1837. Incorporated 1848.

Head Office: 6, St. Andrew Square, Edinburgh.

IN THIS SOCIETY are combined the Advantages of
Mutual Assurance with Moderate Premiums.

THE PREMIUMS are so moderate that at usual ages for Assurance £1200 or £1250 may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) £1000 only—the difference being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

THE WHOLE SURPLUS goes to the Policyholders, on a system at once safe and equitable,—no share being given to those by whose early death there is a *loss* to the common fund. On this principle large additions have been made to the policies of those who live to participate, notwithstanding the lowness of the premiums.

Examples of Premium for £100 at Death.—With Profits.

AGE.	25	30*	35+	40	45	50
During Life.....	£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7
25 Payments	2 10 2	2 13 0	2 17 9	3 4 6	3 14 0	4 8 7
15 Payments	3 8 5	3 12 1	3 16 0	4 5 8	4 16 2	5 11 8

* A PERSON OF 30 may secure £1000 at Death by a yearly payment, *during life*, of £20: 15s., which would in most Offices secure (with profits) £800 only. Or he may secure £1000 by 25 payments of £26 10s., being thus free of payment before age 55.

† AT AGE 35, the Premium *ceasing before age 60* is, for £1000, £28 17s. 6d., being about the same as many Offices require during the whole of life. To Professional Men and others whose income is dependent on health, the limited payment system is specially recommended.

THE SURPLUS at last Investigation (1894), amounted to **£1,423,000.**

More than one half of the Members who died during the last Septennial period were entitled to **Bonuses** which, notwithstanding that the premiums do not as a rule exceed the non-profit rates of other Offices, were on the average equal to an addition of about 50 per cent. to the policies which participated.

The ACCUMULATED FUNDS exceed **£10,000,000.**

ARRANGEMENTS as to SURRENDER, NON-FORFEITURE, LOANS on POLICIES, IMMEDIATE PAYMENT OF CLAIMS, FREE RESIDENCE, &c., are specially liberal.

November, 1897.

JAMES GRAHAM WATSON, *Manager.*

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON OFFICE: 17, KING WILLIAM ST., E. C.—J. MUIR LEITCH, *Secretary.*

31, GREAT PORTLAND STREET, W. Telegrams: { SELFHELF, LONDON.

THE pick of the output of a number of Irish Factories, and of Peasant handwork, comes solely to my DEPOT here; and from thence is distributed all over the Globe. The taste bestowed on the selection, the variety, and the value are beyond question. Nothing but what is made of Pure Wool finds any space in my warehouse. Great strides have been made by the manufacturers of recent years towards meeting the wants, and even fancies, of the British and Foreign public; and they fear no competition in their own class of goods. Now that shoddy is rampant everywhere, all interested in the perpetuation of the good name and fame of our manufactures should study to support those who strive after that object; assist thereby in the development of Irish trade, our immediate interest: and at the same time procure satisfaction to themselves.

RETAIL, WHOLESALE, AND EXPORT.

Description of some of my Standard Goods. Detailed Catalogues on application.

IRISH FRIEZES (strong, rough TWEEDS) made in the Marquis of Waterford's Industrial House (*vide special circular*). These are *par excellence* the Cloths for Country Suits, for Travellers, for Sportsmen, and for Cold Climates, being substantial, warm, pliable, hard-wearing, and almost weather-proof; made in useful mixtures; dark and light, plain and plaids. Make also most useful and comfortable Ulsters. Price 3s. yard, 28 inches wide. (*vide Special Circular.*)

IRISH HOMESPUNS.—These, like the FRIEZES, are admirable for gentlemen's Country Suits, Fishing, Shooting, Golfing, etc.; they are lighter in weight, and more loosely woven, after the style of Harris Homespuns. 28 inches, 3s. yard; in pretty light weavings and fancies.

Very stout **IRISH TWEEDS** for rough country wear at home or abroad; wonderful value. 2s. 6d. and 2s. 9d. yard; splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.

Extra thick **FRIEZES**, plain and napped, for heavy travelling and driving Ulsters or Suits in high latitudes, double width, from 8s. to 10s. 6d. yard.

Useful and substantial **IRISH TWEEDS** for ordinary wear, town or country, 2s. 9d., 3s. and 3s. 3d. yard, 28 inches. (For youth's wear many of these are excellent, being hard twisted and closely woven.)

IRISH "SAXONY" TWEEDS for more dressy wear, of smooth appearance, made from fine colonial wools: 3s. 6d. & 3s. 9d. yard. Finest, 4s. and 4s. 8d. yard.

IRISH (thin) HOMESPUNS make capital suits for warm climates or for home summer wear, being light, woolly, and cool, 2s., 2s. 3d. and 2s. 6d. yard, 28 inches. Some of these are also admirably suited for ladies' Gowns, Cloaks, and Ulsters, others for Cycling; and still others for small boys' suits.

DONEGAL HOMESPUNS, hand-spun and hand-woven by the peasantry, 2s. to 3s. 6d. yard, according to weight and merit, 26 to 29 inches wide. The thin ones are perfect for tropical climates, the medium for ordinary summer lounge wear, whilst the heavier are almost identical with the genuine high-priced Harris homespuns, and made in exactly the same way. (*vide Special Circular.*)

Cork, Galway, Kerry, and Mayo peasant-made homespuns, 2s. 3d. upwards.

UNDYED HOMESPUNS, light, medium, and heavy, 2s. 3d. to 3s. 6d. yard.

IRISH HOMESPUN TWEEDS for a serviceable all round suit; and boys' wear, 28 in., 2s. 8d. yd. Special **IRISH TWEEDS** for Mourning and Clerical wear, 2s. 9d., 3s., 3s. 3d. and 3s. 6d., 28 in.

IRISH SERGE CLOTHS (pure indigo navy and woaded black) of superior manufacture and high recommendation. Single width, 3s., 3s. 6d., and 3s. 9d.; double width, 6s. to 10s. yard, according to weight and fineness of wool. The wealthiest yachtsman can't purchase better cloths.

IRISH MELTONS; PILOT CLOTHS; DIAGONALS; VICUNAS; WHIP-CORDS or RIDING TWEEDS AND TROUSERINGS; all of sterling value, and fixed, closest prices.

IRISH FLANNELS, SHIRTINGS, TRAVELLING RUGS, HORSE CLOTHING; all of exceptional worth. Such goods are not to be had in the ordinary way of trade.

HAND-KNITTED SOCKS AND STOOKINGS, made by the Irish peasantry: Socks, 7d., 10½d. and 1s. pair; Stockings, plain knitting, 1s. 9d., 2s. 3d. and 2s. 9d.; Fancy, 3s. to 4s. 6d. pair. Gloves 1s. to 2s. pair. These appear marvels of cheapness to buyers used to Scotch knitting and Scotch prices.

FLANNEL TWEEDS for thinnest tropical suits, made of selected wools, mostly natural browns; well spun, and woven on hand-looms. They wear extremely well and don't shrink. Anglo-Indians, "Cape" residents and others are urged to give this speciality of mine a trial. 16½d., 21d., 2s., 2s. 4d. & 2s. 6d. yd.

Patterns of any of above by request. Applicants must be explicit in stating their wants as to quality, and fancy as regards pattern; and whether for Town or Country wear. A promise also must be given that they will be returned, within a week, anywhere in the United Kingdom (those living in London are expected to call and view the stock for themselves); abroad, by next mail after a week's time for examination.

A discount of 10 per cent. is allowed off above prices for orders aggregating over 100 yards at a time—7½ per cent. ditto over 50 yards; and 5 per cent. over 25 yards—an inducement to circulate the patterns amongst friends, especially when sent to distant countries, the higher discounts being under my usual TRADE prices.

Parties abroad, not caring to wait for Patterns to be sent to order, may depend upon my exercising every care and fidelity in selecting for them, if they give a clear indication of their wants and enclose a remittance (as I know by experience the kind of clothes best suited to every climate and country). Any surplus will be enclosed in parcel.

Customers employing their own tailor will find the cost of making a suit, with furnishings, varies from about 21s. in the county to 35s. in London. With this information an estimate can be made of the total cost, and saving effected.

All Cloths average 28 inches wide, except when stated to be double width; 7 yards single width, or 3½ yards double is the quantity for an ordinary size man's suit; 5 yards to 9 yards for Ulster, according to length and if cape is required. The weight of a suit length varies from 3 lbs. for a light Homespun or Tweed to 8lbs. for a thick Frieze. When parcels are to be forwarded by post the cost must be added to remittance: if by rail or sea, charges will be booked forward.

Correspondence in English, Welsh, German, French, and Italian. (Established over 50 years.)

AN

Almanack

For the Year of Our Lord

1898

BY
JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE

Astronomical and other Phenomena

A LARGE AMOUNT OF
 INFORMATION RESPECTING THE GOVERNMENT
 FINANCES POPULATION COMMERCE AND
 GENERAL STATISTICS OF THE BRITISH
 EMPIRE THROUGHOUT THE WORLD
 WITH SOME NOTICE OF
 OTHER COUNTRIES
 &c. &c.

LONDON

OFFICE: 12, WARWICK LANE,

PATERNOSTER ROW

PREFACE TO THE XXXTH ANNUAL VOLUME.

IN the earlier portion of the present issue of the Almanack every section has been subjected to rigid supervision. Where possible without interfering with utility, contractions have been made in some departments to provide space for expansions and additions in others. In this way, the Army and Navy Estimates are presented in a tabular form; the Insurance Section has been remodelled and extended; a page has been allotted to Indian and Colonial Governors; the most notable Wills of the year are for the first time included under a special heading, and an instructive table of our Fighting Ships has been added to the Navy list.

Additional space has been devoted to Sport, and to the list of Fairs; the Postal Guide has been re-arranged, and considerable expansion of the pages devoted to the various Orders of Knighthood has been necessitated by the long list of Honours conferred in the year of Jubilee.

In the supplementary portion of the Work will be found an exhaustive article on the various Foods Supplied from Abroad—both from Foreign Countries and from Greater Britain. In the Geographical section a full-page Map of India, and several smaller Maps have been inserted; the Reports of the various Royal Commissions for the year, a new table of the Postal Work of the World, and a *complete* list of the recipients of the Volunteer Officers' Decoration, since its Institution in 1892, also find a place in the volume.

These and other additions and extensions have necessitated a further increase in the Work, which now extends to Seven hundred and seventy-six pages.

The information afforded throughout has in every case been brought down to the latest possible date.

Thanks must once more be heartily expressed for corrections and suggestions from innumerable correspondents. Every letter has received consideration, though it has been impossible to act in every instance upon the suggestions offered. It is trusted that the Almanack may continue to merit this friendly co-operation, which tends so essentially to progression and improvement with each succeeding issue.

In order that full advantage may be taken of such suggestions, letters should reach our hands not later than October.

WARWICK LANE, PATERNOSTER ROW,

DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 4th to the 10th of January there is moonlight from 6 P.M. till 6 A.M., but from the 19th to the 23rd it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—

HOURS FOR LIGHTING BICYCLE AND OTHER LAMPS.

These times will be found on pp. 14, 18, 22, 26, 30, 34, 38, 42, 46, 50, 54, 58.

WHITAKER'S ALMANACK FOR 1898.

BEING THE SECOND AFTER BISSEXTILE, AND 61 AND 62 OF QUEEN VICTORIA.

Common Notes for the Year.

Golden Number XVIII	Ascension Day—Holy Thursday May 19
Epact 7	Birth of Queen Victoria (1819) " 24

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example:—To know on what day of the week May 4 fell in the year 1891, in the table of years look for 1891, and in a parallel line, under May, is fig. 5, which directs to col. 5, in which it will be seen that May 4 fell on Monday.

Configurations of Jupiter's Satellites at 4h. A.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks at 6h. 2m. morn., and Twilight ends at 6h. 6m. aft., the length of the Day being 7h. 32m.

Jan. 2. Earth at least distance from the Sun, 1h. aft.

Jan. 3. Occultation of the Pleiades:—17 Tauri, magnitude 4; 23 Tauri, magnitude 4; 7 Tauri, magnitude 3; 27 Tauri, magnitude 4. The disappearances take place at 7h. 13m. aft., 75° from the vertex; 8h. 2m. aft., 125° from the vertex; 8h. 46m. aft., 96° from the vertex; 10h. 1m. aft., 103° from the vertex, respectively; the corresponding reappearance at 8h. 27m. aft., 284° from the vertex; 9h. 11m. aft., 212° from the vertex; 10h. 8m. aft., 231° from the vertex; 10h. 59m. aft., 181° from the vertex.

Jan. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 10.6s.

Jan. 6. Occultation of 125 Tauri, magnitude 5. The disappearance takes place at 0h. 56m. morn., 29° from the vertex; the reappearance at 1h. 58m. morn., 269° from the vertex.

Jan. 7. Partial eclipse of the Moon, visible at Greenwich, see p. 67.

Jan. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 9.3s.

Jan. 22. Total eclipse of the Sun, invisible at Greenwich, see p. 67.

Jan. 29. Mercury at greatest elongation (25°) West, 4h. aft.

In this month the Mornings increase 26m., and the Afternoons 46m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

MORNING AND EVENING STARS.

♁ MERCURY is an evening star in the first Week of this month, and a morning star after the 8th. Is in Sagittarius.

♀ VENUS is a morning star in the first half of the month. In the latter half too near the Sun for easy observation.

♂ MARS, in Sagittarius, is a morning star throughout the month.

♃ JUPITER is in Virgo, not far from γ Virginis.

♄ SATURN is a morning star, in Scorpio, about 6° north of ζ Antares.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE POLE STAR.				ANGULAR DISTANCE OF THE MOON FROM POLLUX.				
R. A.				DECL. N.				
D.	2	4	5	D.	Position of Star.	6 P.M.	9 P.M.	Midnight.
10	1	21	50° 5	1	East	78 6 19	78 36 "	75 7 "
10	1	21	42° 0	2	East	66 15 11	64 46 49	63 18 34
19	1	21	33° 6	3	East	54 30 24	53 2 35	51 34 49
28	1	21	24° 3	4	East	42 49 3	41 21 33	39 54 5

In the early part of the month the constellations Camelopardus, Lynx, Gemini, Monoceros, and Canis Major are on the meridian about midnight. In Gemini there is a fine compressed cluster of small stars in the right leg of Pollux, in R. A. 6h. 48m., and Decl. 18° 8' N., nearly midway between γ and ζ Geminorum. This cluster is triangular in shape, and, in small telescopes, hardly distinguishable from a nebula. It can be best observed on the nights immediately before and after the 22nd. There is a very fine cluster in Canis Major, in R. A. 6h. 43m., and Decl. 20° 39' S., about 4° South of Sirius, with a very small astronomical telescope the individual stars can be easily distinguished; and with a low power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes.

* The Meteorological Observations throughout the Almanack are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest readings of the *Thermometer* with the average for 50 years; the mean of *Barometer* at a height of 150 feet above the mean level of the sea; the daily *Rainfall*, the daily *Sunshine* and the daily general direction and maximum force of the *Wind*.

Configurations of Jupiter's Satellites at a. a. m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5h. 42m. morn., and Twilight ends at 6h. 46m. aft., the length of the Day being 9h. 8m.

Feb. 5. Venus at greatest distance from the Sun, 1h. morn.

Feb. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 75s.

Feb. 10. Jupiter in conjunction with the Moon, 10h. aft., 4 7° 9' N.

Feb. 11. Mercury and Mars in conjunction, 6h. aft. 5° 0' 1" N.

Feb. 12. Occultation of 89 Virginis, magnitude 5. The disappearance takes place at 5h. 26m. morn., 172" from the vertex; reapparance at 5h. 54m. morn., 213" from the vertex.

Feb. 14. Occultation of δ Scorpis, magnitude 5. The disappearance takes place at 7h. 33m. morn., 115" from the vertex; the reappearance at 8h. 37m. morn., 227" from the vertex.

Feb. 14. Mercury at greatest distance from the Sun, 6h. aft.

Feb. 15. Venus in superior conjunction with the Sun, 10h. aft.

Feb. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 59s.

In this month the Mornings increase 51m., and the Afternoons 48m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

MORNING AND EVENING STARS.

♿ MERCURY is a morning star; near to ♄ Capricorn on the 19th.

♀ VENUS rises and sets too near the Sun to be observed till the end of the month, when it becomes an evening star.

♂ MARS is a morning star throughout the month, but having a large Southern declination cannot be well observed.

♃ JUPITER in Virgo near to ♀ Virginis.

♄ SATURN is a morning star; may be observed, rising in the south east, about 4½ hours before the Sun

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames, will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded. See Tides, p. 71.

5	West	57	2	52	58	34	28
6	West	69	22	42	70	56	16

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars situated in the Crab's southern claw, in R.A. 8h. 45m. 36s., and Decl. 12° 11' N., consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Præsepe," can be best observed in this month. It does not consist of a very great

number of stars, but the components are, as compared with those of other clusters, of considerable magnitude. It is situated in R.A. 8h. 34m., and Decl. 20° 20' N., about 1° to the west of a line joining the stars δ and γ Cancri.

The triple star ζ in Cancer may be examined in this month: it will be found in R.A. 8h. 6m. 20s., and Decl. 18° 1' N. Two of the stars are only 1" apart and the third about 5" from them.

RAINFALL IN MARCH, 1897.

In this month rain fell on 17 days. The total fall for the month was 3.33 inches; above the average of fifty years, 1841-90, by 1.87 inches.

MONTHLY NOTES.

- March 1. Auditors of Boroughs to be elected.
 15. Close time for all wild birds till 1st August.
 18. Annual assembly of Parish Meetings in Rural parishes to take place on or within seven days before or after 25th.
 25. Lady Day. Quarter Day. Accounts of Overseers to be made up to this date for the past half-year.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 56m. morn., and Twilight ends at 7h. 36m. aft., the length of the Day being 10h. 50m.

Mar. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 49s.

Mar. 10. Jupiter in conjunction with the Moon, 1h. morn. 4 7' 4" N.

Mar. 14. Occultation of a Scoopid (Antares), magnitude 1. The disappearance takes place at 2h. 38m. morn., 111° from the vertex; the reappearance at 3h. 49m. morn., 35° from the vertex.

Mar. 16. Mercury in superior conjunction with the Sun, 4h. aft.

Mar. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 4' 3s.

Mar. 20. Sun enters Aries: Spring commences, 2h. aft.

Mar. 23. Venus in conjunction with the Moon, 7h. morn. ♀ 6' 38" S.

Mar. 26. Mercury and Venus in conjunction, 2h. aft. ♀ 1° 14' N.

Mar. 30. Mercury at least distance from the Sun, 5h. aft.

Mar. 30. Occultation of 3 Gemini-norum, magnitude 3½. The disappearance takes place at 1h. 13m. aft., 78° from the vertex; the reappearance on the 21st, at 2h. 19m. morn., 237° from the vertex.

In this month the Mornings increase 1h. 8m., and the Afternoons 5m.

MORNING AND EVENING STARS.

♁ MERCURY is a morning star till about the middle of the month; and towards the end, becomes an evening star.

♀ VENUS is an evening star; near to Mercury throughout the month.

♂ MARS is a morning star throughout the month. In Capricornus till the 13th, then enters Aquarius.

♃ JUPITER in Virgo; nearly in the same position as last month.

♄ SATURN is a morning star throughout the month.

At midnight, in the beginning of March, the constellations Ursa Major, Leo, Crater, and Hydra are on the meridian. In Ursa Major is a large planetary Nebula, appearing as a mass of attenuated light, from 3/4" to 4" in diameter; it is situated in R.A. 11h. 8m. 47s., and Decl. 55° 34' N. Its spectroscopic examination leads to the inference that it is a mass of incandescent gas.

Virgo comes to the meridian about midnight

towards the end of this month. Between Vir and Coma Berenices is a large Nebula, one of the class known as "Spiral Nebulae," situated in R. 12h. 13m. 29s., and Decl. 15° 0' N. With a lar telescope of 8 inches aperture it appears to resolve in the centre into two bright star-like points. This constellation is thickly strewed with nebulae, which may be best observed on t evenings immediately before and after the 22nd.

RAINFALL IN APRIL, 1897.

In this month rain fell on 16 days. The total fall for the month was 1'65 inches; below the average of fifty years, 1841-90, by 0'01 inch.

MONTHLY NOTES.

April 1. Refreshment House Licences to be renewed. Quarter Sessions to be held unless otherwise fixed.

5. Dividends on Consols, &c., due. Financial year, 1897-8, for Imperial purposes ends to-day.

6. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.

9. Fire Insurances must be paid.

11. English Bank Holiday, and 18 Edinburgh Spring Holiday.

15. Parish Councils to hold their annual meeting on or within seven days after this date.

THE SUN.

Configurations of Jupiter's Satellites at 11h. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3h. 37m *morn.*, and Twilight ends at 8h. 31m *aft.*, the length of the Day being 12h. 54m.

Apr. 5. Mean time of Sun's semidiameter passing the meridian 1m. 42s.

Apr. 6. Jupiter in conjunction with the Moon, 4h. *morn.* 4 6' 59" N.

Apr. 11. Mercury at greatest elongation (19°) East, 1h. *morn.*

Apr. 11. Occultation of A Ophiuchi, magnitude 4¼. The disappearance takes place at 2h. 38m. *morn.*, 39° from the vertex; the reappearance at 4h. 8m. *morn.*, 347° from the vertex.

Apr. 18. Mars in conjunction with the Moon, 2h. *morn.* 6' 10" S.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 51s.

Apr. 22. Mercury in conjunction with the Moon, 3h. *morn.* 2' 2" S.

Apr. 30. Occultation of ε Leonis, magnitude 5. The disappearance takes place at 1h. 1m. *morn.*, 1° from the vertex; the reappearance at 1h. 15m. *morn.*, 331° from the vertex.

Apr. 30. Mars at least distance from the Sun, 9h. *aft.*

In this month the Mornings increase 1h. 2m., the Afternoons 48m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

MORNING AND EVENING STARS.

♄ MERCURY is an evening star throughout the month; situated in Aries.

♀ VENUS is an evening star; may be observed after sunset, in the north-west, not far from the Pleiades.

♂ MARS is a morning star near a Aquarii on the 10th.

♃ JUPITER may be observed rising in the early evening, near η Virginis.

♄ SATURN almost stationary, in Scorpio.

APPARENT DECLINATION OF THE ABOVE PLANETS.

At the latter part of April the constellations Draco, Boötes, and Libra will be on the meridian about midnight. An irresolvable double Nebula in Canes Venatici, near γ Ursæ Majoris, can be observed in this month: it is situated in R.A. 13h. 25m. 37s., and in Decl. 47° 43' N. The Southern Nebula is surrounded by a faint ring of nebulous light, and was called by Herschel, in his Catalogue, "the Halo Nebula." Later observations placed it among the "Spiral" Nebulae. That this is not a true incandescent Nebula is shown by the ab-

sence of bright lines in its spectrum. In R.A. 15h. 13m. 16s., Decl. 2° 30' N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel could distinguish over 200 stars in this group in the field of his 40-foot reflector, but found the middle portion so condensed that the individual stars could not be distinguished. Lord Rosse says that the star range from the 12th to 15th mag. The evening about the 20th are the best for observing these objects.

RAINFALL IN MAY, 1897.

In this month rain fell on 11 days. The total fall for the month was 1'24 inch; below the average of fifty years, 1841-90, by 0'76 inch.

MONTHLY NOTES.

May 2. Holiday at Bank Transfer Office and Stock Exchange.

- Bank and general holiday in Scotland.

ENGLISH QUARTER DAYS.—These are—Lady Day, March 25; Midsummer, June 24; Michaelmas, Sept. 29; and Christmas, Dec. 25. Quarterly trade accounts are made up to the end of the months of March, June, Sept., and December.

SCOTTISH QUARTER DAYS OR TERMS.—Candlemas, Feb. 2; Whitsun, May 15; Lammas, Aug. 1; and Martinmas, Nov. 11. The Removal Terms in Scottish Burghs are, May 28; Nov. 28.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2h. 3m. morn., and Twilight ends at 9h. 51m. a/t., the length of the Day being 14h. 48m.

May 1. Mercury in inferior conjunction with the Sun, 10h. morn.

May 3. Mean time of Sun's semidiameter passing the meridian, 1m. 6' 2s.

May 13. Mercury at greatest distance from the Sun, 5h. a/t.

May 18. Mercury in conjunction with the Moon, 9h. a/t. ♀ 8° 33' S.

May 20. Mean time of Sun's semidiameter passing the meridian, 1m. 7' 4s.

May 22. Venus in conjunction with the Moon. 6h. a/t. ♀ 0° 51' S.

May 22. Occultation of Venus. The disappearance takes place at 6h. 54m. a/t., 115° from the vertex; the reappearance at 7h. 32m. a/t. 184° from the vertex.

May 28. Mercury at greatest elongation (25°) West, 5h. a/t.

May 29. Occultation of e Leonis, magnitude 5. The disappearance takes place at 10h. 17m. a/t., 116° from the vertex; the reappearance at 11h. 16m. a/t., 235° from the vertex.

May 30. Saturn in opposition to the Sun, 10h. morn.

May 30. Jupiter in conjunction with the Moon, 5h. a/t. ♃ 7° 1' N.

In this month the Mornings increase 43m., and the Afternoons 43m.

MORNING AND EVENING STARS.

♃ MERCURY is a morning star, in the Constellation Aries.

♀ VENUS is an evening star; very near to the Moon on the evening of the 22nd. May be well observed in this month, after sunset, in the North West.

♁ MARS is a morning star.

♃ JUPITER well placed for observation in this month; not far from γ Virginis.

♄ SATURN, owing to its great southern declination, cannot well be observed in this month. The best time is at the end of the month.

4	West	92	10 9	93	57 9	95	44 30

Towards the end of May we shall find the constellations Draco, Hercules, Ophiuchus, and Scorpio on the meridian about midnight.

Hercules contains a very splendid cluster of stars situated in R. A. 16h. 38m. 3s., and Decl. 36° 39' N. This, like most of the star-clusters, is condensed in the centre, and may be easily seen with moderate telescopic aid; and a few days before and after the 20th of the month, when the Moon is absent, it may, if the opportunity is taken

of a very clear night, be seen with the naked eye, plainly, between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

Uranus can be observed well in this month, southing at oh. 32m. morn. on the 14th.

RAINFALL IN JUNE, 1897.

In this month rain fell on 12 days. The total fall for the month was 1.95 inches; below the average of fifty years, 1841-90, by 0.07 inch.

MONTHLY NOTES.

June 1. Overseers to give notice between this day and the 20th to Voters who have not paid all Poor Rates due on January 5th.

4. King George the Third's Birthday.

15. Last day of the close season for freshwater fish.

19. 61 Victoria.

20. 62 Victoria. On or before this day Overseers to fix on church doors the register of persons qualified to vote for Counties.

24. Midsummer Day. Quarter Day. Sheriffs of City of London to be elected by the citizens.

THE SUN.

Day.	Before Clock.	Hourly Variation of Equa- tion of Time.	Right Ascension at Noon.		Hourly Variation of E. A.		Apparent Declination (Nth.) at Noon.		Hourly Variation of Declination.	Sidereal Time at Noon.

Configurations of Jupiter's Satellites at roh. p.m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

June 1. In this month there is no real night, but either daylight or twilight; the length of the Day being 16h. 16m.

June 4. Occultation of A Ophiuchi, magnitude 4. At the time of disappearance the star will be below the horizon; the reappearance takes place at 9h. 11m. aft., 290° from the vertex.

June 5. Mean time of Sun's semidiameter passing the meridian, 1m. 8.4s.

June 5. Occultation of λ Sagittarii, magnitude 3. The disappearance takes place at 10h. 15m. aft., 105° from the vertex; the reappearance at 11h. 22m. aft., 293° from the vertex.

June 15. Mars in conjunction with the Moon, oh. morn. δ 6° 17' S.

June 17. Mercury in conjunction with the Moon, 10h. aft. ♀ 3° 50' S.

June 20. Mean time of Sun's semidiameter passing the meridian, 1m. 8.7s.

June 21. Sun enters Cancer, 10h. morn. Summer commences.

June 22. Venus in conjunction with the Moon, 4h. morn. ♀ 3° 18' N.

June 26. Mercury at least distance from the Sun, 5h. aft.

June 27. Jupiter in conjunction with the Moon, 3h. morn. ♀ 7° 3' N.

June 30. Mercury in superior conjunction with the Sun, 8h. morn.

In this month the Mornings increase 6m. to the 21st, and then to the 30th, decrease 5m.; and the Afternoons increase 13m.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Sagittarius there is a notable and very extensive Nebula, known as the "Horse-shoe," from its peculiar shape. It will be found in R.A. 184. 14m. 40s., and Decl. 16° 15' S. The spectroscopic shows this Nebula to consist of a mass of incandescent gas. Professor Holden says that one arm of the

Nebula has changed its position since Herschel's time. In shape it somewhat resembles the great Nebula in Andromeda.

In Sagittarius, a little West and North of λ, is a globular cluster of very small stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing this Nebula except when southing. The evenings about the 19th will be the most favourable for observing it.

RAINFALL IN JULY, 1897.

In this month rain fell on 7 days. The total fall for the month was 0.74 inch; below the average of fifty years, 1841-90, by 1.73 inch.

MONTHLY NOTES.

July 1. Special Sessions for Licences to deal Game to be held this month.—Quarter Session held this week.—Workmen's Compensation Act 1897, comes into operation.
5. Dividends due. 9. Fire Insurances to be paid.
16. Glasgow Fair Saturday.
20. Rates and Taxes due January 5th must be paid on or before this day by Voters to prevent disqualification.—Last day for County and Parochial Electors to send in their claims to vote.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

July 1. There is no real night till the 20th of this month; the length of the Day being 16h. 29m.

July 2. Earth at greatest distance from the Sun, 2h. aft.

July 3. Partial eclipse of the Moon, partly visible at Greenwich, see p. 67.

July 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 8.4s.

July 13. Mars in conjunction with the Moon, 9h. aft. δ 4° 56' S.

July 18. Annular Eclipse of the Sun, invisible at Greenwich, see p. 67.

July 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 7.4s.

July 20. Mercury in conjunction with the Moon, 7h. aft. δ 4° 16' N.

July 22. Venus in conjunction with the Moon, 11h. morn. δ 5° 55' N.

July 27. Mercury in conjunction with Regulus, 10h. morn. δ 0° 0' N.

July 28. Saturn in conjunction with the Moon, 10h. aft. δ 5° 18' N.

July 30. Occultation of λ Saggi-tarii, magnitude 3. The disappearance takes place at 7h. 31m. aft., 96° from the vertex; the reappearance at 8h. 41m. aft., 283° from the vertex.

In this month the Mornings decrease 35m., and the Afternoons 30m.

MORNING AND EVENING STARS.

♿ MERCURY is an evening star. May be observed in the North-West soon after sunset. Is in such close conjunction with Regulus on the 27th, at 10h. morn., that both objects will appear in the same telescopic field.

♀ VENUS is an evening star.

♂ MARS in Taurus, not far from the Pleiades. Does not rise till near midnight.

♃ JUPITER in Virgo: position much the same as in last month.

♄ SATURN nearly stationary in Scorpio. Souths between 8h. and 9h. in evening.

APPARENT DECLINATION OF THE ABOVE PLANETS.

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ , is the best example of the Annular Nebulae; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it well: it is in R.A. 18h. 49m. 46s., and Decl. 32° 54' N.

It exhibits a spectrum as if composed of an incandescent gas.

There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyrae and β Cygni: it was formerly considered a Nebula, until resolved into stars by Sir William Herschel in 1784. It is in R.A. 19h. 12m. 35s., Decl. 30° 0' N. The best nights for the observation of these objects are those just before and after the 18th.

RAINFALL IN AUGUST, 1897.

In this month rain fell on 20 days. The total fall for the month was 2.89 inches; above the average of fifty years, 1841-90, by 0.54 inch.

MONTHLY NOTES.

August 1. Borough and County Lists to be affixed to church doors and at Post Offices for two Sundays.—Claims of Lodgers to be sent in between this day and 20th. Lammas—Scottish Quarter Day

— Bank Holiday. 5. Oyster Season commences 20. Last day for service on Overseers of objections to Electors in counties and boroughs.

25. Last day for publishing claims and objections to vote in elections, and for Overseers to deliver lists of Electors.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1h. 31m. morn., and Twilight ends at 10h. 41m. aft., the length of the Day being 15h. 20m.

Aug. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 6os.

Aug. 9. Mercury at greatest elongation (27°) East, 3h. morn.

Aug. 9. Mercury at greatest distance from the Sun, 4h. aft.

Aug. 10. Saturn stationary at 1h. morn.

Aug. 11. Mars in conjunction with the Moon, 5h. aft. δ 3° 45.8.

Aug. 19. Mercury in conjunction with the Moon, 2 aft. ♀ 1° 14' N.

Aug. 19. Venus and Jupiter in conjunction, 6h. aft. ♀ 1° 51' S.

Aug. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 49s.

Aug. 21. Jupiter in conjunction with the Moon, 5h. morn. ♀ 6° 51' N.

Aug. 21. Venus in conjunction with the Moon, 8h. morn. ♀ 5' 3' N.

Aug. 25. Saturn in conjunction with the Moon, 5h. morn. ♀ 5° 4' N.

In this month the Mornings decrease 46m., and the Afternoons 58m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

D.	♃ MERCURY.			♀ VENUS.			♂ MARS.			♃ JUPITER.			♄ SATURN.

MORNING AND EVENING STARS.

♃ MERCURY is an evening star till towards the end of the month.

♀ VENUS is an evening star, in conjunction with Jupiter on the 19th at 6h. aft.

♂ MARS may be observed rising in the North-east between 11h. and 12h. aft.

♃ JUPITER is an evening star.

♄ SATURN, in Scorpio, Souths in the early evening.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

At the beginning of August Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula, nearly 4° due north of γ Sagittæ, is the famous "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed to be some trace of resolvability shown. It is situated in R.A. 19h. 53m. 8s., and Decl. 22° 26' N., and gives a spectrum of bright lines, according to Dr. Huggins.

There is a small bright globular cluster, 4° due south of α Delphini, consisting of a mass of very small stars, not very easy for small telescopes: it is situated in R.A. 20h. 29m. 7s., and Decl. 7° 3' N. This cluster is a good one, according to Sir John Herschel, for testing the space-penetrating power of telescopes. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 17th.

* The Harvest Moon.

RAINFALL IN SEPTEMBER, 1897.

In this month rain fell on 15 days. The total fall for the month was 2.68 inches; above the average of fifty years, 1841-90, by 0.43 inch.

MONTHLY NOTES.

September 1. Declarations as to misdescription or other error in County or Burgees Lists to be delivered to the Town Clerks and Clerks of the Peace.—The lists of objections to County Electors, and claims and objections in Boroughs, to be affixed to church doors till 8th. Lists of Jurors to be affixed to church doors for the first three Sundays. Salmon close-time begins.

8. Last day for inspecting claims of voters.

24. Sheriffs of City of London to be sworn in.

29. Accounts of Overseers to be made up to this date for the past half-year.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 7m. morn., and Twilight ends at 8h. 53m. aft., the length of the Day being 13h. 32m.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 40s.

Sept. 5. Mercury in inferior conjunction with the Sun, 5h. aft.

Sept. 9. Mars in conjunction with the Moon, 1h. aft. δ 0° 54' S.

Sept. 9. Occultation of Mars. The disappearance takes place at 1h. 31m. aft., 95° from the vertex; the reappearance at 2h. 19m. aft., 215° from the vertex.

Sept. 14. Mercury in conjunction with the Moon, 9h. aft. δ 3° 20' N.

Sept. 17. Jupiter in conjunction with the Moon, 9h. aft. λ 6° 39' N.

Sept. 19. Venus in conjunction with the Moon, 7h. aft. ρ 1° 28' N.

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 38s.

Sept. 21. Mercury at greatest elongation (15°) West, 3h. aft.

Sept. 21. Venus at greatest elongation (45°) East, 5h. aft.

Sept. 22. Mercury at least distance from the Sun, 4h. aft.

Sept. 23. Sun enters Libra, 1h. morn., Autumn commences.

Owing to Jupiter's proximity to the Sun the Satellites will not be visible till November 13.

29	East	32	30	15	30	49	10	29	8	30

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus, R.A. 21h. 25m. 1s., and Decl. 11° 43' N., is a fine globular cluster of very small stars, 4½" north-west of α Pegasi, much condensed towards the centre where the stars cannot be resolved; there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true globular form,

consisting of very small stars very much compressed. It is situated in R.A. 21h. 28m. 10s., and Decl. 1° 17' S.

In the early evening, at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21h. 34m. 33s., and Decl. 23° 37' S., can be observed: it is rather bright, with a central condensation, and does not require great telescopic power to see it well. The best evenings for observation are those immediately before and after the 16th.

RAINFALL IN OCTOBER, 1897.

In this month rain fell on 11 days. The total fall for the month was 0.47 inch; below the average of fifty years, 1841-90, by 2.34 inches.

MONTHLY NOTES.

Corrections for next year's Whitaker's Almanack should be sent some time this month.

October 1. Burgess List to be revised some time before the 12th.—Pheasant shooting begins.—Common Lodging-houses to be whitewashed in the first week.

5. Dividends due. 9. Various Licences expire. 11. Quarter Sessions begin in the first whole week after this date.

14. Fire Insurances must be paid.

23. Borough Councillors to be nominated.

THE SUN.

THE MOON.

Table with columns: Day of M., Rise Afternoon, Sets Morning, Souths Mornings, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semi-diameter at Noon, Age at Noon. Rows 1-31.

Configurations of Jupiter's Satellites.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 3m. morn., and Twilight ends at 7h. 32m. aft., the length of the Day being 11h. 34m.

Oct. 3. Mean time of Sun's semi-diameter passing the meridian, 1m. 43s.

Oct. 6. Occultation of 132 Tauri, magnitude 5. The disappearance takes place at 4h. 6m. morn., 90° from the vertex; the reappearance at 5h. 27m. morn., 276° from the vertex.

Oct. 13. Jupiter in conjunction with the Sun, 11h. aft.

Oct. 19. Occultation of B.A.C. 5878, magnitude 6 1/2. The disappearance takes place at 4h. 50m. aft., 73° from the vertex; the reappearance at 6h. 1m. aft., 239° from the vertex.

Oct. 20. Mean time of Sun's Semi-diameter passing the Meridian 1m. 55s.

Oct. 22. Occultation of π Capricorni, magnitude 5 1/2. The disappearance takes place at 3h. 44m. aft., 96° from the vertex; the reappearance at 4h. 57m. aft., 258° from the vertex.

Oct. 22. Occultation of ρ Capricorni, magnitude 5. The disappearance takes place at 5h. 5m. aft., 28° from the vertex; the reappearance at 5h. 51m. aft., 303° from the vertex.

Oct. 27. Venus at greatest brilliancy, 5h. aft.

In this month the Mornings decrease 51m., and the Afternoons 1h. 3m.

Owing to Jupiter's proximity to the Sun, the Satellites will not be visible till November 13.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), Day (D.), H., M., S. Rows 8-28.

MORNING AND EVENING STARS.

♿ MERCURY is a morning star till the middle of the month. In conjunction with the Sun on the 19th.

♀ VENUS is an evening star. At greatest brilliancy towards the end of the month.

♂ MARS may be observed rising in the North-east soon after 10h. aft.

♃ JUPITER is a morning star in the latter portion of the month. In conjunction with the Sun on the 13th.

♄ SATURN is an evening star. May be seen soon after sunset low down in the South-west.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: Planet, Day (D.), °, ' (double), '' (triple), °, ' (double), '' (triple). Rows 8-28.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: Planet (☉, ☿, ♀, ♂, ♃, ♄), D., H., M., S. Rows 5, 15, 25.

SEMI-DIAMETER OF SUN AND PLANETS.

Table with columns: Planet (☉, ☿, ♀, ♂, ♃, ♄), D., H., M., S. Rows 5, 15, 25.

Mean Longitude of Moon's Ascending Node, October 1, 283° 19' W.

On the 1st of October, Cassiopeia, Andromeda, Pisces, and Cetus are on the meridian at midnight; while Cancer and Orion are rising, and Hercules and Capricornus setting.

In Andromeda, near to the 4th mag. star ν , is a large and irresolvable Nebula in the form of an elongated spindle. It is situated in R.A. α . 37m. 13s., and Decl. $40^\circ 43' N$. In Sept., 1883, a decided stellar nucleus was observed in R.A. α . 36m. 31s., Decl. $40^\circ 38' N$., probably unconnected with the Nebula.

A splendid double group of stars may be observed in this month, situated midway on a line joining α Persei and γ Cassiopeia: the northern cluster is a magnificent collection of stars, much condensed towards the centre, and on a fine night, without moonlight, such as the nights about the 15th, affords one of the most brilliant telescopic objects in the heavens. One of the stars near the middle of the group is of a fine ruby colour.

PHASES OF THE MOON.

(Last Quarter 6d. 2h. 23m. Afternoon.
 ● New Moon 14 0 21 Morning.
) First Quarter 20 5 5 Afternoon.
 ○ Full Moon 28 4 39 Morning.
 Apogee 47.1h. A. 251,500 | Perigee 163.8h. M. 226,000

RAINFALL IN NOVEMBER, 1896.

In this month rain fell on 9 days. The total fall for the month was 1'18 inch; below the average of fifty years, 1841-90, by 1'09 inch.

An "Inch of Rain" means a gallon of water spread over a surface of nearly two square feet, or 3,630 cubic feet=100 tons upon an acre.

MONTHLY NOTES.

November 1. Latest day for receiving corrections for Whitaker's Almanack.

— Salmon-fishing with rod and line ends.— Ordinary day of election of Borough Councillors.— Holiday at Bank Transfer Office and Stock Exchange.— Fox-hunting begins.

9. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.

11. Martinmas: Scottish Quarter Day.

12. County Sheriffs for next year nominated.
 13. Solicitors', notaries', proctors', and sworn clerks' certificates expire. See Note, Dec. 15.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 1m. morn., and Twilight ends at 6h. 27m. aft., the length of the Day being 9h. 36m.

Nov. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 7.2s.

Nov. 5. Mercury at greatest distance from the Sun, 3h. aft.

Nov. 11. Venus stationary, 10h. morn.

Nov. 12. Mercury in conjunction with Uranus, 3h. morn. ♀ 1° 53' S.

Nov. 15. Mercury in conjunction with the Moon, 3h. morn. ♀ 0° 44' N.

Nov. 15. Venus in conjunction with the Moon, 5h. aft. ♀ 2° 19' S.

Nov. 16. Vesta in conjunction with the Moon, 7h. aft. Vesta 0° 10' N.

Nov. 20. Mercury and Venus in conjunction, 8h. morn. ♀ 1° 18' N.

Nov. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 9.0s.

Nov. 22. Occultation of 19 Piscium, magnitude 5½. The disappearance takes place at 7h. 9m. aft., 30° from the vertex; the re-appearance at 8h. 13m. aft., 260° from the vertex.

In this month the Mornings decrease 48m., and the Afternoons 38m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

MORNING AND EVENING STARS.

♿ MERCURY is an evening star. Too great Southern Declination for easy observation.

♀ VENUS is an evening star. Not easy to observe owing to its great Southern Declination.

♂ MARS may be observed rising in the North-east, in the late evening, in Cancer.

♃ JUPITER is a morning star.

♄ SATURN is an evening star; low down in the South-west.

On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula 2 1/2° to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches in focal length. It is a very elongated Nebula, 15' long by 3' broad, with a cleft, dark in the middle,

and suggests the idea of a flat ring seen v. obliquely. It is in R.A. 2h. 16m., and Dec. 41° 49' N. The best evenings for observing it are those immediately before and after the 14th.

Neptune can be well observed in this month on the 22nd it passes the meridian, or souths, 1h. 30m., *morn.*

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, Souths Morning, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semi-diameter at Noon, Age at Noon. Rows 1-31.

Configurations of Jupiter's Satellites at 6h. A.M.

Table with columns: D., H., M., S. Rows 1-31.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 41m. morn., and Twilight ends at 5h. 57m. aft., the length of the Day being 8h. 8m.
Dec. 4. Mercury at greatest elongation (21°) East, 1h. morn.
Dec. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 10' 4s.
Dec. 7. Occultation of e Leonis, magnitude 5. The disappearance takes place at 6h. 54m. morn., 215° from the vertex; the reappearance at 1h. 24m. morn., 273° from the vertex.
Dec. 13. Partial eclipse of the Sun, invisible at Greenwich, see p. 67.
Dec. 14. Mercury in conjunction with the Moon, 1h. aft. ♄ 0° 3' 8.
Dec. 19. Occultation of a Piscium, magnitude 5. The disappearance takes place at 3h. 0m. aft., 37° from the vertex; the reappearance at 3h. 45m. aft., 305° from the vertex.
Dec. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 11' 0s.
Dec. 21. Sun enters Capricornus, 7h. aft., Winter commences.
Dec. 27. Total eclipse of the Moon, visible at Greenwich, see p. 67.
Dec. 29. Occultation of z Canori, magnitude 5. The disappearance takes place at 10h. 1m. aft., 130° from the vertex; the reappearance at 11h. 16m. aft., 334° from the vertex.

In this month the Mornings increase 22m., and the Afternoons increase 5m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: ♄ MERCURY, ♀ VENUS, ♂ MARS, ♃ JUPITER, ♄ SATURN. Rows D. 2, 7, 12, 17, 22, 27.

MORNING AND EVENING STARS.

♄ MERCURY is an evening star in the first part of the month.

♀ VENUS is a morning star after the first few days of the month.

♂ MARS may be observed rising between δ and γ Canori, soon after 8h. aft., in the beginning of the month.

♃ JUPITER is a morning star.

♄ SATURN in conjunction with the Sun on the 6th; afterwards, a morning star.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: D., ♄, ♀, ♂, ♃, ♄. Rows 2, 7, 12, 17, 22, 27.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: D., ☉, ♀, ♂, ♃, ♄. Rows 5, 15, 25.

SEMI-DIAMETER OF SUN AND PLANETS.

Table with columns: ☉, ♀, ♂, ♃, ♄. Rows 5, 15, 25.

Mean Longitude of Moon's Ascending Node, December 1, 280° 6' W.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine resolvable Nebula of a pearly white colour $1\frac{1}{2}''$ North-west of ζ Tauri, in R.A. 5h. 28m. 21s., and Decl. 21° 57' N. This Nebula is the one known as the "Crab."

About the middle of the month Orion souths at midnight, and can be best observed in this month,

although favourably situated in both November and January. This magnificent constellation contains the grandest of all the Nebulae, situated in the Sword-Scabbard. A line drawn from an Orion through ζ, the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye. Evenings before and after the 13th of the month are the best for observing it.

Tidal Constants,

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.

NOTE.—The time thus found will be Greenwich Time for British, Belgian and Dutch Ports; Dublin Time for Irish Ports, and Paris Time for French Ports.

Hartlepool	add 1 35	15	11½	Ymuiden (pt. for Amst'dm)	add 0 42	5½					

EXAMPLE 1.—Required the time of high water at Aberdeen on January 12th:—

Time of high water at London Bridge 4h. 37m. Morn.
Subtract tide interval 0 50

Time of high water at Aberdeen..... 3 47 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on January 21st:—

Time of high water at London Bridge 0h. 36m. Morn.
Add tide interval 2 15

Time of high water at Scarborough .. 2 51 Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be

taken, in which case its hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 24 hours; in this case, the excess will be the time of high water after the noon or midnight following, according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, January 26th:—

Time of high water at London Bridge
on January 21st + 24 HOURS 2h. 36m. Morn.
Subtract tide interval 0 50

Time of high water at Aberdeen, Jan. 0h. 22 46 After.

Previous to 1752 the above dates are computed from the Old Style. Those printed in heavier type are leap-years. 1752 had E D up to September 2, but A from September 14 to December 31, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. Until then also the years were considered to begin on March 25; but that, as it did

not affect the date of Easter, is not noticed in this Table. The Table of Moveable Feasts in the Prayer-Book gives all the others after finding Easter in this. The Sunday Letters in the Calendar then enable any one to count the days of the week from Sunday. The tables in modern Prayer-Books are calculated for the New Style only.

The French Republican Calendar.

THIS, although reckoned from the 22nd September, 1792, was not introduced until the 22nd November, 1793. It remained in use only till the 31st December, 1805. The Gregorian Calendar was restored January 1st, 1806 (Nivôse 10, Year XIV.). The months varied in different years, thus Nivôse 1 commenced December 21st in 1793, December 22nd in 1795, December 21st in 1796, December 22nd in 1799, December 23rd in 1803, and December 22nd in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire (<i>Vintage</i>), 23 Sept. to Oct. 22	Germinal (<i>Budding</i>), 22 Mar. to Apr. 21
Brumaire (<i>Foggy</i>), 23 Oct. to Nov. 22	Floral (<i>Flowers</i>), 21 April to May 20
Frimaire (<i>Sleety</i>), 22 Nov. to Dec. 21	Prairial (<i>Pasture</i>), 21 May to June 20
Nivôse (<i>Snowy</i>), 22 Dec. to Jan. 21	Messidor (<i>Harvest</i>), 20 June to July 19
Pluviôse (<i>Rainy</i>), 21 Jan. to Feb. 20	Thermidor (<i>Hot</i>), 20 July to Aug. 19
Ventôse (<i>Windy</i>), 20 Feb. to Mar. 21	Fructidor (<i>Fruit</i>), 19 Aug. to Sept. 18

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Primidi*), dedicated to Virtue; (*Duodi*) to Genius; (*Tridi*) to Labour; (*Quartidi*) to Opinion; and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, a sixth day, the 22nd or 23rd September (*Septidi*), "Jour de la Révolution," was added. This variation of dates has led to considerable confusion, but those who may wish to trace the fourteen years will find some very elaborate tables in the English edition of Bourrienne's "Life of Napoleon": Bentley.

The Athanasian Creed to be read on the days marked *		MORNING PRAYER.		EVENING PRAYER.	
		First Lesson.	Second Lesson.	First Lesson.	Second Lesson.
Jan.	1 Circumcision	Genesis 22, v. 9	Romans 2, v. 17	Deuteron. 20, v. 12	Col. 2, v. 8 to 12
	2 II. S. after Xmas.	Isaiah 42	Matthew 1, v. 18	Or Isaiah 43	Act. 1.
	6 *Epiphany	Isaiah 60	Luke 3, v. 15 to 23	Isa. 49, v. 13 to 24	John 2, v. 12
	9 I. S. after Epiph.	Isaiah 51	Matt. 5, v. 33	Or Isaiah 54	Act. 5, v. 17
	16 II. S. aft. Epiph.	Isaiah 55	Matt. 9, v. 18	Or Isaiah 57	Act. 9, v. 23
	23 III. S. aft. Epiph.	Isaiah 62	Matt. 23, v. 24 to 33	Or Isaiah 61	Act. 12, v. 17

* Peculiar to Russia.

The Days of the Roman Month.

In the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year—which, with the Romans, began with March—were called Quintilis and Sextilis; afterwards they were named in honour of the emperors Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undevicesimum Kal. Jan.*), Dec. 13th being *Idibus Decembris*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

In the year 1898 there will be six Eclipses; three of the Sun, and three of the Moon.

I. A partial Eclipse of the Moon, January 7-8, visible at Greenwich.

First contact with the Shadow	7d. 11h. 47m. aft.	} Mean Time at Greenwich.
Middle of the Eclipse	8 0 35 morn.	
Last contact with the Shadow	8 1 22 morn.	

The first contact with the shadow takes place at 169° from the most northern point of the Moon's limb, counting towards the East; the last contact at 143° from the same point, towards the West. Taking the Moon's diameter=1, the magnitude of the Eclipse will be 0.16.

II. A total Eclipse of the Sun, January 22, invisible at Greenwich. Begins on the Earth generally at 4h. 46m. morn., in longitude 22° East of Greenwich, and latitude 0° North. Central Eclipse begins generally at 5h. 49m. morn., in longitude 10° East of Greenwich, and latitude 11° North. Central Eclipse ends generally at 8h. 50m. morn., in longitude 110° East of Greenwich, and latitude 46° North. Eclipse ends on the Earth generally at 9h. 53m. morn., in longitude 110° East of Greenwich, and latitude 36° North. The line of Central Eclipse extends from the Housea Country, in Africa, across the continent (passing near Gondokoro) to the East Coast, between Somaliland and Zanzibar. Crossing the Indian Ocean it reaches Goa, on the West Coast of India, thence passing, in a north-easterly direction, over the Himalaya Mountains, through Tibet to Mongolia, ends near lake Baikal in Southern Siberia.

III. A partial Eclipse of the Moon, July 3, partly visible at Greenwich.

First contact with the Shadow	7h. 46m. aft.	} Mean Time at Greenwich.
Middle of the Eclipse	9 17 aft.	
Last contact with the Shadow	10 49 aft.	

The first contact takes place at 49° from the most northern point of the Moon's limb, counting towards the East; and the last contact 70° from the same point, towards the West.

Taking the Moon's diameter=1, the magnitude of the Eclipse will be represented by 0.93.

The Moon does not rise at Greenwich till 32 minutes after the first contact.

IV. An annular Eclipse of the Sun, July 18, invisible at Greenwich. Begins on the Earth generally at 5h. 2m. aft., in longitude 158° West of Greenwich, and latitude 16° South. Central Eclipse begins generally at 6h. 36m. aft., in longitude 169° West of Greenwich, and latitude 39° South. Central Eclipse ends generally at 8h. 38m. aft.,

in longitude 92° West of Greenwich, and latitude 65° South. Ends on the Earth generally at 10h. 11m. aft., in longitude 84° West of Greenwich, and latitude 46° South.

V. A partial Eclipse of the Sun, December 13, invisible at Greenwich. Begins on the Earth generally at 11h. 37m. morn., in longitude 161° West of Greenwich, and latitude 65° South. Greatest Eclipse at 11h. 58m. morn., in longitude 175° East of Greenwich, and latitude 67° South. Ends on the Earth generally at 0h. 19m. aft., in longitude 151° East of Greenwich, and latitude 65° South. This is a very small Eclipse. If we take the diameter of the Sun=1, the magnitude of Eclipse will be represented by 0.02.

VI. A total eclipse of the Moon, December 27-28, visible at Greenwich.

First contact with the Shadow	27d. 9h. 43m. aft.	} Mean Time at Greenwich.
Beginning of Total Phase	27 10 57 aft.	
Middle of the Eclipse	27 11 42 aft.	
End of Total Phase	28 0 27 morn.	
Last contact with the Shadow	28 1 36 morn.	

The first contact with the Shadow takes place at 112° from the most northern point of the Moon's limb, counting towards the East; and the last contact at 95° from the same point, towards the West. Taking the Moon's diameter =1, the magnitude of the Eclipse will be 1.38.

VII. ECLIPSES OF JUPITER'S SATELLITES.

The following table contains all the Eclipses of the first Satellite, and those only which are visible at Greenwich of the second, third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D and B signifying respectively, Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D or R in the second column.

Till March 25 the disappearances and reappearances will take place on the Western side of the Planet; from March 25 to October 13 on the Eastern side, and from October 13 to the end of the year on the Western side. If the phenomena are observed with an astronomical telescope (which inverts the image in the field of view), the Western limb of the planet will be on the observer's left hand, and the Eastern limb on the right, when looking south.

The mean time of Eclipse for any other place than Greenwich may be found by applying to the times given in the Table the difference of longitude, adding the difference if the longitude of the place is East of Greenwich, and subtracting if West.

JANUARY.

MEAN RIGHT ASCENSION AND DECLINATION OF ONE HUNDRED FUNDAMENTAL STARS, VISIBLE AT GREENWICH, FOR JANUARY 1, 1898.

NAME OF STAR.	Mag.	Right Ascension.		Annual Precess.	Declination.	Ann. Prec.	EXPLANATION OF THE ASTRONOMICAL TABLES.
		H. M. S.	"				
α Andromedæ	2	0	3 6' 8"	+ 3' 08"	+ 28 31 39"	+ 20' 1"	<p><i>Mean Right Ascension.</i></p> <p>The Mean Right Ascension and Declination for any other year may be found from this table by multiplying the annual precession by the number of years elapsed, and applying the result to the quantities given in this table. If the required date be earlier than 1898, the signs of the annual variations must be changed. In applying the corrections, to reduce to any other date, to the Declinations, it must be borne in mind that N. Declination means +, and S. Declination —, and that the corrections must be added algebraically.</p> <p><i>Configuration of Jupiter's Satellites.</i></p> <p>This column exhibits, at the particular hour mentioned, the respective position of Jupiter and his Satellites as seen in an inverting telescope. The white circles represent the Planet, and the numerals 1, 2, 3, and 4 the respective Satellites: a black circle is intended to show, either that the Satellite whose numeral it stands in the place of is in the shadow of the Planet (eclipsed), or else is behind the disc of Jupiter (occulted); the sign ♃ indicates that the Satellite in question is on the disc of the Planet.</p> <p><i>Sidereal Time at Mean Noon.</i></p> <p>This column indicates the Sidereal Time at Mean Noon on each day of the year, and is the time which the Observatory or Astronomical clock should show when the Mean Time clock points to Noon.</p> <p>At the bottom of the pages containing the Tide Tables for each month, and immediately underneath the Right Ascension and Declination of the Pole-Star, &c., are given the places of a few of the more conspicuous Nebulæ and Star Clusters. Most of these may be seen pretty well with a telescope of</p>

70 Mean Right Ascension and Declination of 100 Fundamental Stars.

NAME OF STAR.	Mag.	Right Ascension.			Annual Precess.	Declination.			Ann. Prec.	from three to four inches aperture.
		H.	M.	S.		"	'	"		
κ Ophiuchi.....	3½	16	52	50.3	+ 2.86	+ 9	32	1	- 5.8	Following the Phases of the Moon on the first page of each month there will be found as well as the times of Apogee and Perigee the corresponding distances from the Earth in miles. The mean distance of the Moon from the Earth is 238,840 miles. Under the head "Eclipses, Occultations, and other Celestial Phenomena," in each month, will be found the "Mean Time of the Sun's Semidiameter passing the Meridian" for the 5th and 20th days. This will be useful in determining time by the Diploscope or similar instrument, when, from the interference of clouds, &c., only one limb of the Sun is observed. From the values on the 5th and 20th, that for any other day can be easily inferred with sufficient accuracy, the change in the apparent diameter being very slow.

MEAN RIGHT ASCENSION AND DECLINATION OF SOME OF THE PRINCIPAL FUNDAMENTAL STARS VISIBLE IN THE SOUTHERN HEMISPHERE, FOR JANUARY 1, 1898.

NAME OF STAR.	Mag.	Right Ascension.			Annual Precess.	Declination.			Ann. Prec.	α CENTAURI.
		H.	M.	S.		"	'	"		
β Hydri.....	2½	0	20	23.8	+ 2.53	- 77	49	43	+ 20.0	It is supposed that this star, one of the brightest in the Southern Hemisphere, is the nearest of the fixed stars to the Earth. Dr. Gill gives to it a parallax of 0.75", which would make its distance from the Earth 275,000 times that of the Sun. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

THE ASTEROIDS, OR SMALL PLANETS.

Besides the Planets which have been already alluded to in this Almanack, there are a large number of small bodies revolving round the Sun in the space between the orbits of Mars and Jupiter.

The distances of the Planets from the Sun are observed to increase, outwards, in a certain progression, except in the case of Jupiter, which is farther away than, if this law was absolutely true, he should be. It was suggested by Kepler that there might be another Planet, then undiscovered, between the orbits of Mars and Jupiter. The suggestion was acted upon by astronomers, and a search instituted for the suspected Planet. The Planet Ceres was very soon found by the Italian astronomer Piazzi,

answering very well, as far as its position in space was concerned, to the place of the predicted Planet. About a year later Pallas was discovered by Olbers. Two years later, while constructing Star Charts, Harding, of Lilienthal, discovered the third of the series, to which he gave the name of Juno. In 1807 Olbers discovered the fourth of the series, which was named Vesta by Gauss. No more were discovered till 1845, when Hencke found Astræa, since which time many new members have annually been added. It will be remembered that several of these small bodies had been lost sight of since the date of their discovery. Within the last few years the substitution of the photographic plate for the human retina in astronomical observation has been instrumental in recovering nearly all of them.

RIISING, SETTING, RIGHT ASCENSION, AND DECLINATION OF THE PLANETS URANUS, NEPTUNE, CERES, JUNO, AND VESTA, 1898, ABOUT THE TIMES OF OPPOSITION AT MEAN NOON OF THE RESPECTIVE DAYS.

In opposition May 6.

The above Risings and Settings, &c., are given for the days near about the time of opposition of the respective planets—the times, generally speaking, most suitable for their observation. The times of Southing may be obtained, approximately, by taking a mean between that of Rising and Setting.

Astronomical and other Notes.

The time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time as shown by the Sun.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds: the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction;

and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, south about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from a spectator on the Earth, certain of the Fixed Stars and occasionally one or other of the Planets; these occurrences are called *Occultations*. Among the "Celestial Phenomena" are given the times at which certain of these Occultations take place, as

well as the exact point on the Moon's limb where the observer is to look for the phenomenon; this point is reckoned from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from 0° to 360° . The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versa* when viewed through an inverting or astronomical telescope. Stars to the fifth magnitude only have been included in this summary, excepting that, in one or two cases, a star of the 6th magnitude has been inserted, where the occultation takes place with the Moon in the first or fourth quarter; the times of disappearance or reappearance at the dark limb of the Moon only being noted.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

TIDES AND TIDAL WAVES.

The great cause of our ocean tides is the Moon's nearness as compared with the Sun's distance. The Sun is $25\frac{1}{2}$ million times heavier than the Moon, but his attractive power acts upon our planet mainly as a whole; whereas the Moon, being in our immediate neighbourhood and much smaller in size, acts specially and more intensely upon that limited area of the Earth's surface which is nearest her and directly under her. Wherever the Moon may be in her course, if a great ocean lies immediately beneath, its waters are heaped up by what is termed her "lifting power," and the crest of that bulging and liquid mass constitutes *high water* for that part of the world.

In 24 hours and 50 minutes, owing to the Earth's rotation, plus the Moon's orbital motion, that same part of the world is exactly under the Moon again, and thus another similar tide must always occur after that interval of time. These, the primary tides, being accounted for, to what cause are the secondary tides due, which occur exactly half way between in point of time? Suppose Ocean A is exactly under the Moon, as in the case just discussed, and that Ocean B is on the opposite side of our planet, how is the latter affected by our satellite? Very slightly: because not only has she to lift up the waters of Ocean A, causing the primary tide there, but she has to exercise her attractive power on the great solid mass of the planet itself which separates the two oceans. Thus the Earth as a whole is drawn away from Ocean B, because the latter is so remote, and its waters, being left behind, bulge up at a point diametrically opposite to the primary tides of Ocean A, and form the secondary tides. It is manifest, therefore, that at every moment of the day and night two tides are being formed, on opposite sides of our planet, one directly under the Moon, the other at the point furthest from the Moon.

When a primary and the corresponding secondary tides are thus heaped up at two opposite points of the Earth's equator, then two other points half way between (*i.e.*, 90° distant in longitude) must be deprived of their waters, which have been ebbing either East or West to make up the primary and secondary. In other words, at any moment *low water* occurs 90° East or West of high water: or, since the Moon revolves in $24\frac{1}{2}$ hours, any particular meridian must not only have its

secondary tide $12\frac{1}{2}$ hours after the primary, but must have low water $6\frac{1}{2}$ hours after high water.

According to mathematicians, some of the greatest of whom have bestowed much attention on the theory of the tides, the lifting power of the Sun on our oceans is only from 33 to 44 per cent. of that of the Moon. Three points are notable as to the influence of the Sun during each lunar month:—(1) At New Moon he acts with the Moon upon the primary tide at that meridian; (2) at Full Moon he pulls against the Moon, and therefore helps to heap up the secondary tide; and (3) when the Moon is in her quarters, the influence of the Sun is at right angles to that of the Moon, counteracting it, and therefore both primary and secondary tides are lowered. The first and second cases constitute *Spring Tides*; the third, *Neap Tides*. Thus, the solar tides are practically of no account except for their modifying influence on the lunar or true tides.

If our planet had no land on its surface, and the shoreless ocean were of uniform depth, the tidal wave-crests, both primary and secondary, would travel in regular succession from East to West, following the Moon's course. With our actual geography many local complications arise: seas like the Mediterranean, Baltic, or Euxine offer so small an area that the Moon can only act upon each as a whole, and there is practically no tide. The disturbing action requires a very wide expanse of deep water, such as the great Southern Ocean, or the S. Pacific; and there accordingly is assigned the birthplace of our great tidal wave, to which many tides in distant seas are referred. One mighty pulse enters the Pacific in a N.W. direction, and another the Atlantic, both to be modified by the depth of water and the form of the coasts; and both extending to the bottom of the ocean. Owing to the islands of the Pacific the tides there become small, as the impulse travels north; but in the long deep trough of the Atlantic the tidal force attains a velocity of from 600 to 650 miles an hour. The western impulse across the S. Pacific reaches Tasmania in 12 hours, and in 12 hours more dashes against Hindostan and S. Africa. Another 12 hours and the tidal wave has reached Newfoundland on the West, and the African Cape Blanco on the East. Turning eastward across the N. Atlantic, the tide in four hours is split into two waves at Land's End, one of which goes slowly up the shallow English Channel, while the main branch is borne round the North of Scotland—to bring high water to Aberdeen and the coasts of Norway and Denmark—and finally reaches the mouth of the Thames in 48 hours after leaving the Antarctic Ocean. The Atlantic, being deep and free of islands, produces an independent tide, which helps to modify the tidal impulse from the South, one result being the famous high tides of the Bay of Fundy.

The tides are locally affected by the configuration of the coasts, and also to a slight extent by the changes of atmospheric pressure. Where the tidal wave enters gulfs or estuaries which open in its direction the difference between high and low water is much increased—*e.g.*, Bristol Channel, 40–60 ft.; St. Malo in the English Channel, 50 ft.; Chepstow, 60 ft.; Bay of Fundy, 70 ft. up to 100 ft. in the highest spring-tides. The "bore" or "eagre" on certain rivers occurs when the advanced portion of the tidal wave moves so slowly, owing to shallowness or other circumstances, that the succeeding waters gather in a heap—*e.g.*, Severn, "head" 3 feet high; Hoogly, 5 ft.; Ama-

sons, 12 to 15 ft.—that on the Tsien Tang in China has been estimated to flow up the river with a velocity of 25 miles an hour. Another curious local modification of the tides is seen at Southampton, Poole, Weymouth, &c., where two tides occur in 12 hours; a similar anomaly near Clackmannan on the Firth of Forth is known as the "leaky tides."

The following heights of tides on the Thames, with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxliii. 204):—

	Height.	Distance.
	ft. in.	m.
London Docks	18 10	60
Putney.....	10 2	67½
Kew	7 1	73
Richmond	3 10	79
Teddington	1 ¾	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of the year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at 23½°; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of summer and winter: giving long days and Summer to the Northern hemisphere when the Sun is North of the Equator, and short days and winter when South of it.

This inclination of the two planes will cause the Sun to cross the Equator twice in the year, viz., once in the Spring, and again in the Autumn, at which times the Days and Nights are equal all over the world; and we experience for a day or two what would be the constant state of our climate if the Sun moved in the plane of the Equator.

From Spring, through Summer to Autumn the Sun traverses exactly one half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit, and the Law of Areas, as it is called by Astronomers—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. To do this, the Earth when nearer to the Sun, as at the Winter Solstice, must move more quickly than when farther away, at the Summer

Solstice; because then the line joining the two bodies is shorter than in the latter case; the effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's atmosphere is generally supposed to extend some forty miles in height, probably very much farther, but becoming, at only a few miles from the surface, of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and when laden with clouds, hindering the Earth from radiating its acquired heat into space. The amount of heat absorbed in its passage through the atmosphere will depend upon the thickness of the stratum which the rays have to penetrate, and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, and consisted entirely of land or water, the mean temperature of our Seasons would depend solely on our geographical latitude, and we should then find that all places on the same parallel would enjoy the same temperatures; but being, as it is, made up of water and land very unequally distributed, the former occupying two-thirds of the entire surface of the Globe, the temperature of the Seasons at places on the same parallel of latitude is modified by the surrounding masses of land and water. The great capacity of water for heat, and its low power of radiation, make the great Ocean, extending from Pole to Pole, the reservoir which stores up for us the heat it has received from the Sun; while the land, radiating again its heat very quickly, would soon grow cold. The principal medium by which this heat is conveyed to the land is that of the Winds, which, receiving their warmth and moisture from the water, pass over the land, and compensate for the loss of heat which the latter suffers from radiation. From this cause it is that islands enjoy more equable Seasons than inland countries, being neither so cold in Winter nor so hot in Summer; since the same clouded skies that retard the cooling of the land by radiation also shield it from the rays of the Sun in Summer. But in the interior of continents, where the winds have lost their moisture on their passage from the coast, great extremes are known to prevail between the Summer and Winter temperatures. Moscow has a difference between its Summer heat and Winter cold of 82°, London of 57°, while in the Shetland Islands, and at Penzance, in Cornwall, the differences are only 46° and 48° respectively. Beyond the fact of the presence of water, we must not forget that the oceans and seas are traversed by currents of warm water from the Equatorial regions, which greatly promote the distribution of heat. The chief of these prevail in the North Atlantic Ocean, and it is to one of them—the Gulf Stream—that we probably owe the mildness of the western coasts of Europe. This remarkable current, issuing from the Gulf of Mexico, flows in a north-easterly direction along the shores of America, and on encountering the Banks of Newfoundland splits into two branches, one of which proceeds to the Azores, and the other to the British Isles.

VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst

this class of Stars, is one situated in the constellation Cetus, and known by the name of α Ceti, or Mira Ceti. It has a period of nearly 331 $\frac{2}{3}$ days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. It will be found in R. A. 2h. 14m. 12s. and South Declination 3° 26'.

Another remarkable Variable Star is Algol, β Persei. This has a very short period, not quite three days—and ranges from the second to the fourth magnitude. It continues at its maximum for two days and a half, then begins to decrease very suddenly, and in rather more than three hours is reduced to a Star of the fourth magnitude; after remaining at this magnitude for a quarter of an hour, it again attains to its maximum in the same time that it took in passing from it to the minimum. This Star will be found in Right Ascension 3h. 1m. 32s. and North Declination 40° 34'. It can be well observed in October and November.

ψ Ophiuchi varies from the 6th to the 6 $\frac{1}{2}$ magnitude, with a period of 20h. 8m. It may be observed in June; southing about midnight on the 9th. Will be found in R. A. 17h. 11m. 21s. and North Declination 1° 19'.

The Variable Star β Lyre is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R. A. 18h. 45m. 19s. and North Declination 33° 15'. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this star.

The Star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5 $\frac{1}{2}$ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R. A. 22h. 25m. 23s. and North Declination 57° 54'. August and September are the best months in which to observe it.

There are two hypotheses suggested to explain the phenomena exhibited by the variable or periodical Stars; one of which endeavours to account for the variations in magnitude by supposing that opaque bodies are revolving around these particular Stars, and that at certain times they are interposed between the Earth and the Star, and so cut off from us a portion of the luminous rays of the latter. The other hypothesis suggests that the Stars themselves may have portions of their surface of unequal reflecting power, and that in their rotations they present to us in turns these more or less bright parts, and so cause the variations that we observe. This theory fails to explain the changes observed in the stars of the Algol type, and is only applicable to such as are quite regular in their fluctuations. Professor Pickering has shown that none of the theories put

forward to account for the variability of the light of such stars as Algol will satisfy the observed changes, except that of an opaque satellite. Adopting this theory (which is now generally accepted) he finds theoretically such a satellite whose position and movements would agree with the observed facts.

The above-mentioned "variables" are but a very small portion of the Stars which are known to experience fluctuations of magnitude, but they are the most celebrated examples of their class. It is very likely that our knowledge concerning variable Stars and their distribution in space will be greatly increased when the examination of the photographic plates taken for the chart of the Heavens shall have been completed.

TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by certain bars of steel, called Magnets, of attracting pieces of iron and also other magnets: beyond this idea very little, if any, meaning is popularly attached to the term Magnetism.

Every magnet has two poles, each pole having, as the term implies, exactly opposite properties, such that if we suspend one magnet by a thread free to move in any direction it will be found that on bringing another magnet, held in the hand, near to one end of the suspended magnet, if the opposing poles of each are of like properties, they will repel each other, but if of unlike, they will be attracted towards each other. By placing the magnet held in the hand in the proper position, the moveable magnet may be made to take up any required direction, as long as the magnetism in the magnets and their relative positions remain the same. In the Mariner's Compass we have a case of this kind, where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic South Pole of the Earth, differing from the true or Astronomical North by a quantity called the "Variation." The Variation of the compass is not only different for different places on the Earth, but is moreover liable to slow variation from year to year, causing it in the course of centuries to oscillate from East to West of the Astronomical meridian. In 1530, at London, the needle had an Eastern variation of about 11 $\frac{1}{2}$ °; between 1657 and 1662 its direction coincided with the plane of the Astronomical meridian; that is to say, the variation, or declination as it is generally called, was zero; since then it travelled westwards, and reached the maximum Western declination in 1815, and is at the present time (1898) approaching the zero, previously to again becoming Easterly.

The compass-needle being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis placed in the magnetic meridian, and been left free to move in a vertical plane, it would have been found to *Dip*, as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this inclination or *dip* varies also in different places on the globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situate in 97° West longitude and 70° North latitude. The South Magnetic Pole is situated about 168° East longitude and 76° South latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which Observatories have been established all over the world, and elaborate series of observations made on the motions of variously suspended magnets (their movements in most Observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or pleasure, depend so much upon the weather that we can imagine mankind to have taken an interest in its study from very early times; and, as a matter of fact, the popular ideas about weather prognostics are much the same as those which were in vogue in the earliest ages. Aristotle, in his book on Meteors (which, in his time, were supposed to have an atmospheric origin), collected all the then known prognostics of the weather, but in this work no serious attempt is made to explain the phenomena observed. In the cases where the attempt is made, the explanations offered are often very absurd, and show entire ignorance of the principles of physical science.

The observation of the state of the sky taught the meteorologists of early times when to expect good or bad weather, and the result of these observations, formulated into short and pithy sayings, made up, until quite recent times, the science of weather prognostics.

Birds and beasts are all more or less sensitive to coming changes in the weather, and by observation of their movements, sure warning of changes in the weather may be obtained. Among other instances it is observed that sea birds, as stormy weather comes on, fly inland in search of food; wild fowl leave the marshy grounds for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees.

It was not until the discovery of the barometer, in 1643, that the first great step was made towards a knowledge of the nature of our atmosphere. We were then, by its help, enabled to ascertain the weight and pressure of the great aerial ocean which surrounds us, and to learn when and where it was in a state of calm or storm. The invention of the thermometer, shortly afterwards, gave the means of determining its temperature. The hygrometer for showing the amount of moisture in the atmosphere, and the anemometer for giving the direction and force of the wind, are also instruments of great importance to the meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a room warmed artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become limp and sticky, indicating a probable change of weather in the shape of rain.

Since the time of Admiral FitzRoy the science of weather forecasting has made much progress in its details, but, for the individual observer, the method remains much the same now as then. The principal rules in use for forecasting the weather at present may be briefly stated as follows:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been about its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west: a fall of the barometer, with low thermometer, foretells snow.

With the barometer below its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind *veers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to raise the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is when the first signs of the dawn appear on the horizon) all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions: soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from as many stations as he desires the height of the barometer, direction and force of wind, &c., data which will inform him of the condition and movements of the aerial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through all the places where the quicksilver stands at the same height, at any convenient interval he obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the height or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts (as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the area from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the change going on, and enable the meteorologist to predict, to a certain extent, what will be the immediately coming weather. This is a general description of the way in which the forecasts of weather, printed in the daily papers, are made. The interpretation of these synoptic charts may not appear to the reader to be a very difficult operation, but it must be remembered that meteorology is purely a science of observation, and, as such, will be most successfully handled by the observer of the greatest experience. From want of knowledge concerning the laws which govern the fluctuations of the weather, failures in the forecasts must happen now and again, and no reason can be given why certain states of the atmosphere, which previous observation would lead us to believe should be stable, suddenly break up without any apparent warning.

Attempts have been frequently made to connect the state of the weather with the aspects of the planets, the changes of the Moon, or some other astronomical occurrences. The idea that the weather is dependent on the Moon's phases still finds favour with the vulgar, although any appreciable connection has been repeatedly disproved.

It is perfectly reasonable to suppose that the Moon produces some sort of tide in the atmosphere surrounding our globe, as it does on the waters of the ocean; but then, whatever effect this tide may have upon the weather would appear gradually according to regular laws, and would not account for the sudden and apparently capricious changes of which the weather forecaster most desires to be warned.

Dr. Samuel Clarke published a table, founded upon this theory, for the prediction of weather

changes, which he says was the result of a long series of observations. It amounts to this:—If the new or full Moon takes place between noon and 2 p.m., or between 4 and 6 a.m., rain may be predicted. Fair weather may be expected when either new or full moon takes place between 4 and 6 p.m., or between 10 p.m. and 2 a.m.

It has also been held that weather of a like character will return in the same order after every revolution of the Moon's nodes—that is, after every nineteen years.

As, notwithstanding what has been said above, many persons still hold to the belief that the Moon's changes have something to do with the weather, it has been thought well to give Dr. Samuel Clarke's extended Weather Table, in order that any one who cares to do so may compare the predictions therein with his own experience, and prove for himself how much truth there is in the theory.

If the Moon change betw'n	Summer.	Winter.
12 and 2 P.M.	Very rainy	Snow and rain.
2 — 4 "	Changeable ...	Fair and mild.
4 — 6 "	Fair	Fair.
6 — 8 "	{ Fair, if wind at N.W. ...	Frosty, if wind N. or N.E.
6 — 8 "	{ Rainy, if at S. or S.W..	Rain or snow, if S. or S.W.
8 — 10 "	{ Rainy, if at S. or S.W..	Rain or snow, if S. or S.W.
10 — 12 "	Fair	Fair and Frosty.
12 — 2 A.M.	Fair	Hard frost, unless S. or S.W.
2 — 4 "	Cold & showery	Snow and stormy.
4 — 6 "	Rain	Snow and stormy.
6 — 8 "	Wind and rain.	Stormy weather.
8 — 10 "	Changeable...	Rain if wind W., snow if E.
10 — 12 "	Freq. showers..	Cold, with high wind.

Besides the meteorological instruments mentioned above, there is one often used to indicate weather changes which is known as the chemical weather-glass, camphor-glass, or storm-glass.

Though sold in London more than a hundred years ago, no scientific explanation of its indications seems to have been attempted till the late Admiral FitzRoy took it in hand. Up to the year 1825 these storm-glasses had been considered rather as curiosities than otherwise; nothing certain could be made of their variations; but lately, says the Admiral, writing in 1862, it was fairly demonstrated that if fixed undisturbed in free air—not exposed to radiation from fire or sun—but in the ordinary light of a well-ventilated room, or, preferably, in the outer air, the chemical mixture in the storm-glass varies in character with the direction of the wind—not its force, specially (though it may so vary in appearance only)—from another cause, electrical tension.

Admiral FitzRoy considered that these instruments had a scientific value, used in conjunction with the barometer and thermometer, in predicting local storms. Some other writers are at variance with the Admiral on this point—one affirming that the weather indications of the storm-glass are not to be relied on; another, that light and temperature are the agents that bring about the changes observed.

The instrument itself consists of a mixture of camphor, nitrate of potassium, and muriate of

ammonia, partly dissolved in alcohol, with a little water. This solution is placed in a long glass vial or tube, with some air, and hermetically sealed. Some authorities say that a small hole should be left in the top to admit the external air.

At one time the upper part of the liquid in the tube will appear quite clear, the bottom portion being occupied by a shapeless mass like melting white sugar. Again, the liquid portion will be more or less filled with crystallizations like fern-leaves or hoar-frost, and under some circumstances like stars.

The general rules given for interpreting the readings of the storm-glass are as follow :—

(a) If the undissolved substance lies low and smooth at the bottom of the tube—fine weather.

(b) If it rises gradually in the shape of fern or feather-like crystallizations—rain.

(c) If it rises much higher than in (b), and if the liquid portion is less clear, with star-like crystals in motion, high wind or storm will follow.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is its angular distance measured along the Equator from that point of intersection of the Equator and Ecliptic known as the Vernal Equinox. In the time of the ancient astronomers this point was situated in the constellation of Aries, and called by them the "First Point of Aries," but it has since then retrograded considerably behind that constellation, and is at present in the sign Pisces. Modern astronomers, however, still speak of this zero point, whence Right Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longitudes, while the astronomer reckons his from the meridian of the First Point of Aries.

Since a well-regulated astronomical clock should show *oh. om. os.* when the First Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon, printed on the second page of each month. The rule may be thus stated :—*From the given Right Ascension subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of 10 secs. an hour.* If the Right Ascension should be smaller than the Sidereal time to be subtracted, then 24 hours must be added to it. As an example :—*At what time will Regulus South on March 15 ?*

R. A. of Regulus + 24h. 34h. 2m. 56s.
Sidereal Time at Mean Noon (sub.) 23h. 32m. 27s.

Diminish by the Acceleration for 10h. 29m. 30s. at 10s. per hour } 1m. 35s.

Approximate mean time of Southing, March 15 } 10h. 28m. 44s.

In a similar manner the Sidereal time corresponding to any mean time may be found. Suppose, for instance, that we wish to know approximately what the Sidereal time would be at 9.30 p.m. on November 5, we have merely to add Greenwich time to the time given in the column headed Sidereal Time at Mean Noon of that date, increasing the result by the amount of the acceleration in *gh. 30m.* :—

Sidereal time at mean noon 14h. 58m. 57s.
Greenwich time (add) 9h. 30m. —

Add for acceleration for *gh. 30m.* at 10s. per hour } 1m. 35s.

Sidereal time November 5 at *gh. 30m. P.M.* } 0h. 30m. 32s.

To observers who are not furnished with a Sidereal Clock the Sidereal times at Mean Noon will be found very useful for readily finding the approximate mean times of Southing of the Stars.

APPARENT DIMENSIONS OF SATURN'S RING, 1898.

Date.	Major Axis.	Minor Axis.
Jan. 20	36°42	16°01
Feb. 9	37'45	16'51
Mar. 21	39°59	17'63
April 10	41°23	18'14
May 20	42°76	18'69
June 9	42°76	18'62
July 19	41°25	17'89
Aug. 8	40°02	17'37
Sept. 17	37'48	16'43
Oct. 7	36°44	16°09
Nov. 16	35°16	15°74
Dec. 26	35°15	15°84

ILLUMINATED PORTIONS OF THE DISCS OF VENUS AND MARS, 1898.

Date.	VENUS.	MARS.
Jan. 15	0'992	0'992
Feb. 14	1'000	0'981
Mar. 15	0'993	0'968
April 15	0'968	0'953
May 15	0'923	0'936
June 15	0'853	0'919
July 15	0'765	0'904
Aug. 15	0'655	0'889
Sept. 15	0'521	0'880
Oct. 15	0'344	0'880
Nov. 15	0'082	1'900
Dec. 15	0'063	0'951

The figures in the second and third columns of the above Table give the apparent dimensions of Saturn's ring as seen from the Earth, and refer to the outer limit of the outer ring. In 1898 the northern surface will be visible. The ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the ring.

The figures in the fifth and sixth columns represent respectively the *versed sines* of the illuminated portions of the discs of Venus and Mars.

GREENWICH OBSERVATORY.

Founded 10th August, 1675.

ASTRONOMERS ROYAL.

* The figures in parentheses refer to the Appendix, where a descriptive account of each country will be found. The eleven self-governing colonies have an asterisk prefixed.

THE STUART family traces its origin to Walter FitzAlan, Lord of Oswestry, Co. Salop, who entered the service of David I., King of Scotland, and became Hereditary High Steward, and whose descendant, in the year 1371, ascended the throne of Scotland as Robert II. The first of the race who succeeded to the throne of England was JAMES THE FIRST, who had reigned in Scotland as James VI.: he was the only son of the unfortunate Queen Mary, by her cousin Lord Darnley, grandson of the Princess Margaret, daughter of Henry VII. After the death of Queen Elizabeth in 1603, JAMES was not only legal heir to the throne, but was expressly designated as her successor by the deceased queen. He succeeded to the throne 24th March, 1603, and after an inglorious reign of 22 years, died in 1625; he was succeeded by his son, CHARLES I., whose unhappy reign was closed by his execution in 1649. CROMWELL and the Commonwealth followed, but the country tired of them, and the eldest son of Charles was restored in 1660. CHARLES II. died 6 February, 1685, leaving no issue by his queen, Katharine of Braganza. But that "most religious Sovereign" had had, by various mistresses, no fewer than twelve illegitimate children, among whom were Henry FitzRoy, Duke of Grafton, Charles Lennox, Duke of Richmond, and Charles Beauclerk, Duke of St. Albans. On each of these three sons were conferred enormous perpetual pensions. Charles was succeeded by his brother, JAMES II., whose attacks on English liberties only served to deepen the feeling of aversion with which the House of Stuart had come to be regarded by a Protestant nation. The expulsion of James having been effected with little difficulty, 11 Dec. 1688, the usual course of descent was necessarily set aside, and the Crown was offered, by a National Convention sitting in form of Parliament, to William, Prince of Orange (grandson of Charles I.), and his wife Mary, who was the eldest daughter of James by his first wife, Anne Hyde, daughter of the Earl of Clarendon, and they accordingly ascended the throne as WILLIAM III. and MARY II., 13 February, 1689. Mary died in 1694, and William in 1702. By the Act of Settlement he was succeeded by ANNE, second daughter of King James, sister of Queen Mary, and wife of George, Prince of Denmark. By her husband Queen Anne had seventeen children, who all died young; William, created Duke of Gloucester, who lived the longest, died aged eleven. Queen ANNE died in 1714, and with her the Stuart dynasty ended. In order to secure the Protestant Succession the Act of Settlement (12 & 13 Will. III. c. 2) was passed, by which the Crown, after the death of Queen ANNE, was settled upon the Princess Sophia, Electress and Duchess Dowager of Hanover, the youngest daughter of Elizabeth, daughter of James I. of England, and the heirs of her body being Protestants. Sophia dying about seven weeks before Queen Anne, her eldest son, George Louis, Elector of Hanover, succeeded to the British throne, 1 August, 1714, as GEORGE I.

JAMES II. died in France in 1701: he left one son, James Francis Edward, known as the "Old Pretender," who married in 1719 the granddaughter of John Sobieski, King of Poland, and by her had two sons, Charles Edward, the "Young Pretender," who died in 1788, and Henry Benedict, Cardinal York, who died in 1807, aged 82.

The advent of the House of Hanover was

not popular: the new king had no personal friends, while the adherents of the Stuarts were numerous and powerful. In 1715 they broke out in open rebellion, and again in 1745; both revolts were suppressed only after a great deal of vindictive bloodshed.

GEORGE I. came amongst us with little knowledge of English politics, and but little interest in English legislation. He was entirely ignorant of the language, and for literature and art he had the utmost contempt; but he was an excellent man of business, and while accepting our loyalty for what it was worth, filled his own pockets, the pockets of his German attendants, and of his German mistresses, got away from England as often as possible, and used the strength of this country for the advantage of his beloved Hanover. He married Sophia Dorothea, Princess of Celle, and by her had two children. Notwithstanding his own licentiousness he charged his wife with an intrigue with Count Koningsmark, whom he caused to be assassinated, and although her guilt was never proved, he confined her for life. He died while on his road to Hanover, and his only son succeeded him on the throne.

GEORGE II. was born at Hanover, 30 October, 1683, and came to England with his father in 1714. He married Carolina Wilhelmina Dorothea, daughter of the Margrave of Brandenburg-Anspach, and by her had a numerous family:—1, Frederick Lewis, Prince of Wales; 2, George, died in infancy; 3, William Augustus, Duke of Cumberland; 4, Anne, married to William, Prince of Orange, who died in 1751; 5, Amelia Sophia, born in 1711, died unmarried in 1786; 6, Elizabeth, who also died unmarried; 7, Mary, married to Frederick, Prince of Hesse-Cassel; and 8, Louisa, married to Frederick, afterwards King of Denmark. George II. died 25 Oct., 1760. Frederick Lewis, Prince of Wales, eldest son of George II., like his father and his grandfather, was born at Hanover, 20 Jan., 1707: in 1736 he was married to the Princess Augusta of Saxe-Coburg, shortly after which he quarrelled with his father, with whom he remained on bad terms all the rest of his life. He had a family of nine children; sons—1, George William Frederick, afterwards King GEORGE III.; 2, Edward Augustus, created Duke of York and Albany; 3, William Henry, created Duke of Gloucester; 4, Henry Frederick, created Duke of Cumberland; 5, Frederick William, who died young; daughters—1, Augusta, married to Charles, Duke of Brunswick; 2, Elizabeth Caroline, died young; 3, Louisa Anne, also died young; 4, Caroline Matilda, who at the age of fifteen was married to her cousin, Christian VII., King of Denmark; a most unhappy marriage. Prince Frederick died in 1751, nine years before his father, who lived till 1760, and was succeeded by his grandson, who ascended the throne as GEORGE III., and made it his boast that he was a true-born Englishman. GEORGE III. was succeeded by his son, who became GEORGE IV.; he died in 1830, and was succeeded by his brother, who reigned as WILLIAM IV. On the accession of Queen VICTORIA, in 1837, the Crown of Hanover passed, under the provisions of the Salic Law, to her uncle, Ernest, Duke of Cumberland. In 1866 the Prussians, who had long coveted that country, found a pretext for seizing it and extinguishing the Monarchy.

GEORGE WILLIAM FREDERICK, eldest son of Frederick Lewis, Prince of Wales (eldest son of George II., born January 20, 1707; died March 20, 1751), by Augusta (born Nov. 30, 1719; died Feb. 8, 1772), youngest daughter of Frederick, Duke of Saxe-Gotha, was born at Norfolk House, St. James's Square, June 4, 1738. He succeeded to the throne as George III. on the death of his grandfather, Oct. 25, 1760. On Sept. 8, 1761, he married SOPHIA CHARLOTTE (born May 19, 1744; died Nov. 17, 1818), daughter of Charles, Duke of Mecklenburg-Strelitz, and was crowned with her on Sept. 22 following: he had by her a family of nine sons and six daughters. Early in his reign he showed symptoms of insanity, and after recovering from two serious attacks (1788, 1804) his mind entirely gave way; many of his latter years were consequently passed in seclusion, and the government was carried on, from Feb. 5, 1811, until his death, by his eldest son George, under the title of "Prince Regent." George III. died at Windsor, Jan. 29, 1820. His family were as follow:—

I. GEORGE AUGUSTUS FREDERICK, Prince of Wales, born August 12, 1762. On April 8, 1795, he married his cousin Caroline (born May 17, 1768; died Aug. 7, 1821), daughter of Charles, Duke of Brunswick-Wolfenbüttel, by whom he had a daughter, the Princess Charlotte of Wales (born Jan. 7, 1796; died in childbirth, Nov. 6, 1817, having married, May 2, 1816, Prince Leopold of Saxe-Coburg, afterwards King of the Belgians). The Prince succeeded to the throne as George IV., Jan. 29, 1820. He died at Windsor, June 26, 1830.

II. FREDERICK, born Aug. 16, 1763, was at the age of six months declared Prince-Bishop of Osnaburg. On Nov. 27, 1784, he was created Duke of York and Albany, and Earl of Ulster. On Sept. 29, 1791, he married Frederica (born May 7, 1767; died, without issue, Aug. 9, 1820), daughter of Frederick William II. of Prussia. The Duke, who was for many years Commander-in-Chief of the Army, died Jan. 5, 1827.

III. WILLIAM, born Aug. 21, 1765, was, on May 20, 1789, created Duke of Clarence and St. Andrews, and Earl of Munster. He for many years lived with Mrs. Jordan, an actress, and had by her a numerous family, who took the name of FitzClarence. On July 11, 1818, he married Adelaide (born Aug. 13, 1792; died Dec. 2, 1849), daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters—Charlotte Augusta Louisa (born and died March 27, 1819), and Elizabeth Georgina Adelaide (born December 20, 1820; died March 4, 1821). The Duke, who had entered the Royal Navy in 1779, held the office of Lord High Admiral in 1827-28, and succeeded to the throne as William IV., June 26, 1830. He died at Windsor, July 20, 1837.

IV. CHARLOTTE, Princess Royal, born September 29, 1766; married, May 18, 1797, Frederick, Prince (afterwards King) of Württemberg (born Nov. 6, 1754; died Oct. 30, 1816). She died, without issue, Oct. 5, 1822.

V. EDWARD, born Nov. 2, 1767, was on April 23, 1793, created Duke of Kent and Strathearn, and Earl of Dublin. He married at Coburg, May 29, 1818 (and again at Kew Palace, July 12), Victoria (born Aug. 17, 1786; died March 6, 1861), daughter of Francis, Duke of Saxe-

Coburg, sister of King Leopold, and widow of Charles, Prince of Leiningen, by whom he had an only child, Her Majesty QUEEN VICTORIA. The Duke died Jan. 23, 1820.

VI. AUGUSTA, born Nov. 8, 1768. She died unmarried, Sept. 22, 1840.

VII. ELIZABETH, born May 22, 1770. She married, April 7, 1818, Frederick, Landgrave of Hesse-Homburg (born July 30, 1769; died April 2, 1829), and died, without issue, Jan. 10, 1840.

VIII. ERNEST, born June 5, 1771, was, on April 24, 1799, created Duke of Cumberland and Earl of Armagh. He married, May 29, 1815, Frederica (born March 2, 1778; died June 21, 1841), third daughter of Frederick V., Grand-Duke of Mecklenburg-Strelitz, widow, 1st, of Prince Frederick of Prussia, and 2nd, of Frederick, Prince of Salms-Braunfels, by whom he had issue George, ex-King of Hanover, born May 27, 1819; mar. Feb. 18, 1843. Alexandrina Mary, eldest daughter of the Duke of Saxe-Altenburg, by whom he had issue one son and two daughters; he died June 12, 1878. The Duke became King of Hanover on the decease of his brother William IV., and died Nov. 18, 1851.

IX. AUGUSTUS, born Jan. 27, 1773, created Duke of Sussex Nov. 27, 1801. He married at Rome, April 4, 1793, and at St. George's, Hanover Square, Dec. 5 following, Lady Augusta Murray, daughter of John, Earl of Dunmore; but this being contrary to the provisions of the Royal Marriage Act (12 Geo. III. c. 11), the union was pronounced invalid in Aug. 1794. By Lady Augusta—who afterwards took by Royal licence the name of D'Ameland—he had a son and a daughter: Augustus, known afterwards as Sir Augustus Frederick D'Este (born Jan. 13, 1794; died, unmarried, Dec. 21, 1848), and Augusta (born Aug. 11, 1801; married Aug. 13, 1845, Lord Truro; died May 21, 1866). Lady Augusta D'Ameland died March 5, 1830, and the Duke shortly after contracted a morganatic marriage with Lady Cecilia Underwood, created Duchess of Inverness, who died August 1, 1873. He died April 21, 1843, and was buried in Kensal Green Cemetery.

X. ADOLPHUS, born Feb. 24, 1774, was, on Nov. 27, 1801, created Duke of Cambridge, Earl of Tipperary, and Baron Culloden. He married at Hesse-Cassel, May 1, 1818 (and again at the Queen's Palace, June 1), Augusta (born July 25, 1797; died April 6, 1889), daughter of Frederick, Landgrave of Hesse, by whom he had issue, George, Duke of Cambridge; Augusta, Duchess of Mecklenburg-Strelitz; and Mary, Duchess of Teck (born Nov. 27, 1833; died Oct. 27, 1897). The Duke, who acted as Viceroy of Hanover until the death of William IV., died at Kew, July 8, 1850, leaving issue.

XI. MARY, born April 25, 1776. She married, July 22, 1816, her cousin William Frederick Duke of Gloucester (born May 15, 1776; died Nov. 30, 1834), and died without issue, April 30, 1857.

XII. SOPHIA, born Nov. 3, 1777; died unmarried, May 27, 1848.

XIII. OCTAVIUS, born Feb. 23, 1779; died May 3, 1783.

XIV. ALFRED, born Sept. 22, 1780; died August 26, 1782.

XV. ANELLA, born August 7, 1783; died unmarried, Nov. 2, 1810.

HER MAJESTY VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, Empress of India (in India, Kaisar-i-Hind), *born at Kensington Palace, 24th May, 1819; succeeded to the Throne 20th June, 1837, on the death of her uncle, King William IV.; crowned 28th June, 1838; and married, 10th February, 1840, to his late Royal Highness Francis ALBERT Augustus Charles Emmanuel, PRINCE CONSORT, Duke of Saxony, Prince of Coburg and Gotha, who was born 26th August, 1819, and died 14th December, 1851. Clerk of the Council, James B. Dougherty (Dublin Castle).

Members of the Privy Council of Ireland, like those of England, are addressed as The Right Honourable.

Table of Precedency.

The Sovereign.
The Prince of Wales.
The Queen's younger Sons.
Grandsons of the Sovereign.
The Archbishop of Canterbury.
The Lord High Chancellor.
The Archbishop of York.
The Lord President of the Council.
The Lord Privy Seal.
The Lord Great Chamberlain.
The Earl Marshal.
The Lord Steward of Her Majesty's Household.
The Lord Chamberlain.
The last four rank above all Peers of their own degree.
Dukes, according to their Patents of Creation.
1. Of England; 2. Of Scotland; 3. Of Great Britain; 4. Of Ireland.
5. Those created since the Union.
Marquesses according to their Patents, in the same order as Dukes.
Dukes' eldest Sons.
Earls, according to their Patents, in the same order as Dukes.
Marquesses' eldest Sons.
Dukes' younger Sons.
Viscounts, according to their Patents, in the same order as Dukes.
Earls' eldest Sons.
Marquesses' younger Sons.
Bishops of London, Durham, and Winchester.
All other English Bishops, according to their seniority of Consecration.
Bishops of the Irish Church, created before 1860, according to seniority.
Secretaries of State, if of the degree of a Baron.
Barons, according to their Patents in the same order as Dukes.
Speaker of the House of Commons.
Treasurer of H.M.'s Household.
Comptroller of H.M.'s Household.
Master of the Horse.
Vice-Chamberlain of Household.
Secretaries of State under the degree of Barons.
Viscounts' eldest Sons.
Earls' younger Sons.

Barons' eldest Sons.
Knights of the Garter.
Privy Councillors.
Chancellor of the Exchequer.
Chancellor of the Duchy of Lancaster.
Lord Chief Justice Queen's Bench.
Master of the Rolls.
The Lords Justices of Appeal.
Lords of Appeal.
Judges according to seniority.
Viscounts' younger Sons.
Barons' younger Sons.
Sons of Life Peers.
Baronets of England, Scotland, Ireland, and United Kingdom, according to date of Patents.
Knights of the Thistle.
Knights of St. Patrick.
Knights Grand Cross of the Bath.
Knights Grand Commanders of the Star of India.
Knights Grand Cross of St. Michael and St. George.
Knights Grand Commanders of the Indian Empire.
Knights Grand Cross of the Royal Victorian Order.
Knights Commanders of the Bath.
Knights Commanders of the Star of India.
Knights Commanders of St. Michael and St. George.
Knights Commanders of the Indian Empire.
Knights Commanders of the Royal Victorian Order.
Commanders of the Royal Victorian Order.
Knights Bachelors.
Judges of County Courts.
Companions of the Bath.
Companions of the Star of India.
Companions of St. Michael and St. George.
Companions of the Indian Empire.
Members 4th Class of the Royal Victorian Order.
Companions of the Distinguished Service Order.
Members 5th Class of the Royal Victorian Order.

Eldest Sons of younger Sons of Peers.
Baronets' eldest Sons.
Eldest Sons of Knights — 1. Garter; 2. Thistle; 3. St. Patrick; 4. The Bath; 5. Star of India; 6. St. Michael and St. George; 7. Indian Empire; 8. Royal Victorian Order; 9. Knights Bachelors.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as eldest Sons.
Gentlemen entitled to bear arms.
Women take the same rank as their husbands or as their brothers; but the daughter of a peer marrying a Commoner retains her Title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.
There are three Orders confined to Ladies: the Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.
LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Sheriff, Aldermen, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

Orders of Knighthood.

KNIGHTS OF THE MOST NOBLE ORDER OF THE GARTER (1349)—K.G.

118 The Houses of Parliament.—i. The House of Lords,

the *Magnum Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and, in addition, 16 Hereditary Peers of Scotland elected to each Parliament, and 28 Hereditary or created Peers of Ireland elected for life. A large number of Scottish and Irish Peers have English titles, by virtue of which they are entitled to a seat, and 2 of the elected Peers of Ireland (viz. the Lords De Montalt and Powerscourt) have, since their election, been created Peers of the United Kingdom. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The full Assembly would consist of 5 Princes of the Blood, 2 Archbishops, 22 Dukes, 22 Marquesses, 121 Earls, 30 Viscounts, 24 Bishops, 37 Barons, 16 Scottish and 28 (26 besides the 2 above) Irish Representative Peers. There are also 10 Ladies who are Peeresses in their own right (8 of England and the United Kingdom, and 2 of Scotland), whose titles and names are given at pages 127, 130.

b. signifies born; *s.*, succeeded; *m.*, married; *w.*, widower or widow; *div.*, divorced; *M.*, minor.
SPEAKER.—Hardinge Stanley, Lord Halsbury, Lord High Chancellor of England £4,000
Chairman of Committees.—The Earl of Morley £2,500
Deputy Speakers.—The Earl of Cork and Orrery, K.P., the Earl of Lathom, G.C.B., the Earl De Montalt, Viscount Oxenbridge, and Lord Herschell, G.C.B.

1601 Kinloss	Mary Morgan-Grenville, c.1., b. 1852, s. 1889, w.	Master of Kinloss, c. 1887

Peerage of Ireland.

Irish Peers have an advantage over those of Scotland inasmuch as (if not peers of Parliament) they are eligible for seats in the House of Commons, for constituencies in Great Britain (e.g., Viscount Valentia for Oxford City). Those marked * are also Peers of Great Britain or of the United Kingdom; † are Representative Peers.

DUKES (2).

1868 *Abercorn	James Hamilton, K.G., C.B., <i>E.M., S.E.</i> , b. '38, s. '85, m.	Marq. of Hamilton, b. 1860

The Houses of Parliament.—ii. The House of Commons.

THE constitution of Parliament, as it now exists, dates back almost eight centuries to the time of King John and Magna Charta. In this document there is a provision that "no scutage or aid shall be imposed in our realm save by the Commune Concilium of the realm," and to this Council were to be summoned the Prelates and Greater Barons individually, and the Lesser Barons and Tenants-in-chief collectively. From this groundwork the National Assembly has grown up through the reigns of the various Sovereigns until it has assumed its present shape. The principal landmarks of this growth are, the summons of citizens from Boroughs by Simon de Montfort, the assumption of the maxim "Grievances precede supply" under the Tudors and Stuarts; and the appearance of the office of Prime Minister, and the abolition of the custom of the Sovereign presiding at meetings of the Ministers, under the House of Hanover.

The representation in the Commons varied considerably until 1885, since which date it has stood at 670:—465 members from England, 30 from Wales, 72 from Scotland, and 103 from Ireland. Previous to the Union with Scotland, in 1707, the House consisted of only 513 members; in that year 45 were added for the new Kingdom. In 1801, when Ireland became part of the Kingdom, 100 members were added, and in 1832 the Reform Act raised the representation of Ireland to 105, and that of Scotland to 53. Between this date and 1885 only one change was made, 7 members being added to Scotland in 1867. Many of the old abuses have been swept away by the different Acts of Reform, but much confusion still remains in the nomenclature of the various divisions and sub-divisions of the constituencies, in consequence of which the members for Shoreditch, for instance, must be sought under the headings Haggerston and Hoxton.

The allotment of members to the great divisions of the Kingdom is shown in the following table, which also presents a view of the balance of parties as returned by each division at the General Election of 1895:—

	DISTRIBUTION OF MEMBERS.				* POSITION AS TO PARTIES (1895).		
	Counties.	Boroughs.	Univer- sities.	Total Members.	Ministerial.	Opposition.	Majority.
England	234	226	5	465	349	116	233 <i>Min.</i>
Wales	19	11	—	30	8	22	14 <i>Opp.</i>
Scotland	39	31	2	72	33	39	6 <i>Opp.</i>
Ireland	85	16	2	103	21	82	61 <i>Opp.</i>
United Kingdom	377	284	9	670	411	259	152 <i>Min.</i>

More precisely, the parties stood as follows: Ministerialists, 411 (Conservatives 340, Liberal Unionists 71); Opposition, 259 (Liberals 177, Anti-Parnellites 71, Parnellites 11); and the Labour Party being represented by 10 Liberals and 2 Anti-Parnellites.

The letters after the names are—*C.* Conservative, *U.* Liberal-Unionist, *L.* Liberal, *P.* Parnellite, *A.-P.* Anti-Parnellite, *S.* Socialist, *Ind.* Independent, *Lab.* Labour, and *Temp.* Temperance. Former Members who lost their seats at the General Election are denoted by an asterisk*, while those who contested or won constituencies other than they formerly represented are marked thus †.

The figures placed after the names of constituencies give the number of electors on the register in the year 1897; the figures after the names of candidates represent the votes polled at the General Election (unless otherwise stated); members are printed in italics.

The total number of Electors upon the register in 1897 is given below, together with the Registrar-General's estimate of the Population in the middle of the year:—

	ENGLAND AND WALES.		SCOTLAND.		IRELAND.		UNITED KINGDOM.	
	Total.	Per Member.	Total.	Per Member.	Total.	Per Member.	Total.	Per Member.
Electors	5,078,394	10,259	653,573	9,077	728,107	7,069	6,460,074	9,641
Estmd. Population	31,055,355	62,738	4,218,279	58,597	4,553,172	44,205	39,826,806	59,443

In 1897, there were 16 bye elections (Barnsley Division of Yorks, Brightside Division of Sheffield, Cleveland Division of Yorks, Chertsey Division of Surrey, Deptford, East Denbighshire, Exchange Division of Liverpool, Halifax, Middleton Division of Lancs., Petersfield Division of Hants, Romford Division of Essex, Salisbury, Walthamstow Division of Essex, in England and Wales; Bridgeton Division of Glasgow, and Forfarshire in Scotland; and South Roscommon, in Ireland).

At the time of going to press there were no vacancies.

* The figures now (Dec. 1, 1897) stand at MINISTERIALISTS 406 (England 345, Wales 8, Scotland 32, Ireland 21), OPPOSITION 264 (England 120, Wales 22, Scotland 40, Ireland 82), MINISTERIAL MAJORITY, 142 (Labour Members, 12).

Speaker, The Right Hon. William Court Gully, M.P. for the City of Carlisle £5,000.
 Chairman of Committees, James William Lowther, M.P. for Penrith Div. of Cumberland £2,500.
 Temporary Chairmen, Arthur O'Connor; John Edward Ellis; Rt. Hon. C. B. Stuart-Wortley, &c.;
 J. Grant Lawson; and Edmond R. Wodehouse.

England.

Raised by the Renewal of Bills, &c.—		Bills and Bonds paid off—	
For Supply Purposes	8,133,000	For Supply Purposes	8,133,600
Raised by the Creation of Debt—		Temporary Advances Repaid	3,500,000
(1) Under Telegraph Act (1892)	547,114	Surplus Revenue 1895-96 applied under Naval Works Act (1896)	1,765,090
(2) Under Uganda Railway Act (1896) ..	147,000	Balance at Banks of England and Ireland, 31 March, 1897	9,867,134
Amounts temporarily borrowed	3,500,000		
Casual Receipts (Suez Canal shares paid off)	3,468		
Total Receipts	£126,471,492	Total Issues	£126,471,492

THE NATIONAL INCOME

is mainly derived from the following sources :- (I.) EXCISE, (II.) CUSTOMS, (III.) PROPERTY AND INCOME TAX, (IV.) ESTATE DUTY, (V.) THE POST OFFICE, and (VI.) STAMPS, and of these the two first-named account for nearly half the total amount received; considering this, and the additional fact that the contribution from the Post Office swells this amount to almost three-fifths of the whole, it will be readily seen that the majority of the National Income is derived from Voluntary Contributions and Indirect Taxation.

NATIONAL INCOME FOR THE LAST TWO YEARS.

	1895-96.	1896-97.
Excise	£26,800,000	£27,450,000
Customs	20,756,000	21,254,000
Property & Income Tax	16,100,000	16,650,000
Estate Duty	11,600,000	11,830,000
Post Office	11,380,000	11,850,000
Telegraph Service	2,840,000	2,910,000
Stamps (excluding Fee, &c., Stamps)	7,350,000	7,350,000
Land Tax	1,015,000	920,000
House Duty	1,495,000	1,510,000
Crown Lands (net)	415,000	415,000
Interest on Suez Shares	689,524	694,076
Miscellaneous	1,533,305	2,096,809
Total National Income	£101,973,829	£103,949,885

Of the sources of Income mentioned in the above Table -

(I.) EXCISE is derived mainly from Intoxicants, which account for £26,914,506 (Spirits £16,013,412, and Beer £10,901,094), the remainder accruing from Licences (£240,868) exclusive of the amounts derived therefrom which are payable to the Local Taxation accounts; and Railway Duty (£272,183).

(II.) CUSTOMS: The contributory articles are

Beer (£16,487), Chicory (£56,277), Cocoa (£144,478) Coffee (£172,436), Currants (£117,265), Dried Fruits (£18,710), Figs (£43,879), Prunes (£7,300), Raisins (£214,089), Spirits (£4,527,037), Tea (£3,805,935), Tobacco and Snuff (£11,036,878), Wine (£1,298,380), and all other articles (£7,582).

(III.) PROPERTY AND INCOME TAX: To this PROPERTY contributes £4,998,000, which is made up of £4,843,000 from Lands and Tenements, and £155,000 from the Occupation of Land; the share from INCOME TAX (at 8d. in the £) is £11,903,341, being £1,281,000 from Annuities and Dividends; £9,384,341 from Trades and Professions, and £1,238,000 from Public Offices, Annuities from Public Revenues, &c.

(IV.) ESTATE DUTY: This total is made up of £7,159,581 from the estates of persons dying after August 1, 1894; and £63,922 from those who died before that date; £2,546,497 from Legacy, £823,683 from Succession, and £40,189 from Corporation Duty.

(V.) THE POST OFFICE contribution is made up of £12,600,681 from the Sale of Postage Stamps, £191,734 collected in cash for Postage of Letters, &c., and £422,275 poundage on Money and Postal Orders, while £3,287,611 was received for transmission of Telegrams, of which £365,162 was refunded to Cable Companies.

(VI.) STAMPS: Under this heading are included Deeds £3,905,787, Bills of Exchange £668,436, and Receipts, Drafts, and other *id.* stamps £1,305,324.

The remaining items are comparatively small, but one of them, the interest on SUEZ CANAL SHARES (£684,913, interest and dividend on 173,502 ordinary shares, and £9,162 on 3,100 Actions de Jouissance), is worthy of mention; it is not until 1898 that the full rate of interest will be paid, but the estimated market value of these shares (for which £4,080,000 was paid) on March 31, 1897, was £22,299,000.

THE REVENUE AS CONTRIBUTED.

The following table shows the amount contributed to the Exchequer and Local Taxation Accounts by each of the three kingdoms in the financial year 1896-97. Excise, Death Duties, Stamps, Property and Income Tax, and Inhabited House Duty, and Land Tax alone are given, Customs being omitted, since the importation of goods takes place at Scottish or Irish ports for transfer to England and Wales, and *vice versa* :—

NET RECEIPT OF DUTY UNDER EACH HEAD OF INLAND REVENUE IN ENGLAND AND WALES, SCOTLAND, AND IRELAND, IN 1896-97, AND THE AMOUNT PER HEAD CALCULATED ACCORDING TO THE ESTIMATED POPULATION IN THE MIDDLE OF 1897.

	ENGLAND AND WALES.	SCOTLAND.	IRELAND.	UNITED KINGDOM.
Excise	£19,822,347*	£7,101,647*	£5,362,187	£32,286,181
Death Duties	11,799,046	1,361,977	717,251	13,878,274
Stamps	6,538,907	504,463	268,076	7,311,446
Income and Property Tax	14,715,755	1,519,636	665,950	16,901,341
House Duty and Land Tax	2,298,144	133,735	nil.	2,429,879
	£55,172,199	£10,621,458	£7,013,464	£72,807,121
Estimated Pop. (J ^{ne} , '97)	31,055,355	4,218,279	4,553,172	39,826,806
Amount per Head	£1 15s. 6½d.	£2 10s. 4¼d.	£1 10s. 9¼d.	£1 16s. 6¾d.

* Excluding £6,721 in England and Wales, and £220 in Scotland, fines and penalties recovered in connection with Licences assigned to the Local Taxation Account.

THE NATIONAL EXPENDITURE.

The main headings under which the Expenditure is accounted for are as follow :—

I.—CONSOLIDATED FUND SERVICES :

	1895-96.	1896-97.
A The National Debt (see pp. 182-83)	£25,000,000	£25,000,000
B Civil List	408,022	407,579
Annuities to the Royal Family (p. 184)	173,000	173,000
Annuities and Pensions, various	132,312	123,261
Salaries and Allowances	81,277	73,941
Courts of Justice	515,713	512,650
Miscellaneous Services	291,033	346,436

II.—*SUPPLY SERVICES :

	1895-96.	1896-97.
Navy	£19,724,000	£22,170,000
Army (including Ordnance Factories)	18,460,000	18,270,000
Misc. Civil Services	19,800,000	20,045,000
Customs and Inland Rev.	2,702,000	2,716,000
Post Office	7,018,000	7,152,000
Telegraph Service	2,744,000	2,961,000
Post Office Packet Service	715,000	723,000
Egyptian Government, Grant-in-Aid (1897)	798,802

£71,163,000 £74,833,802

£26,601,357 £26,642,867

Total Expenditure... £97,764,337 £101,476,669

* Full particulars of the way in which the sums accounted for above are to be expended by the various departments in the financial year 1897-8 will be found under the Navy Estimates, pp. 234-236; the Army Estimates, pp. 215-217; and those of the Civil Service and Revenue Departments on pp. 185-187; the National Debt being fully treated on pp. 182-183.

LOCAL TAXATION ACCOUNTS.

The following table shows the Payments to the Local Taxation Accounts which consist of sums, in reality part of the National Income, but never actually reaching the Exchequer. The amounts mentioned are collected for local authorities by the Imperial officers in accordance with certain Acts of Parliament, and are as follow : (1) Duties on Local Taxation Licences, and Penalties in connection therewith, the proceeds of which are distributed to the different counties of Great Britain in accordance with the amount certified to have been collected in each. (2) One-half of the Estate (Probate) Duties, which is shared by England and Wales (½ths), Scotland (½ths), and Ireland (½ths); and (3) Certain Additional Beer and Spirit Duties, the amount derived therefrom being paid to the three accounts in the same proportion as the Estate Duties.

PAYMENTS TO THE LOCAL TAXATION ACCOUNTS, IN THE YEAR ENDED 31ST MARCH, 1897.

	England.	Scotland.	Ireland.	Total.
LOCAL TAXATION (Customs and Excise) DUTIES :	£	£	£	£
Additional Beer Duty (CUSTOMS)	400	53	47	500
Additional Spirit Duty	166,453	22,887	18,726	208,071
Additional Beer Duty (EXCISE)	335,703	47,335	3,492	420,535
Additional Spirit Duty	6,6164	92,410	72,831	81,455
LICENCES (including Penalties)	3,317,727	347,153	...	3,684,880
SHARE OF ESTATE DUTY, &c.	2,514,483	346,866	271,871	3,134,220
	6,990,940	8,56,705	491,016	8,218,661

NATIONAL Debts are of comparatively recent origin. In the unsettled state of the Middle Ages they were impossible; but as nations settled down and showed something like a feeling of responsibility, patriotism, or more frequently speculation, prevailed, and every country now has a National Debt. The example of England, which has always paid its way and promptly met the demand for interest, has exercised an influence upon the borrowing power of other nations.

The British Debt took many years to reach the gigantic proportions it assumed under the Regency of George IV., and any serious reduction was regarded as almost hopeless; but it has been so vigorously and so successfully attacked during the past twenty-five years that it bids fair to be all but extinguished within a reasonable limit of time. Even so lately as 1883 the Funded Debt stood at 713 millions; it is now under £590,000,000, and within the next twenty years, at the present rate of shrinkage, will be nearly 200 millions less.

In January, 1816, after the great Continental wars, our indebtedness was over nine hundred millions sterling. Within a few years this was reduced by one hundred millions, and after that by a comparatively small sum nearly every year. Additions were made when slavery was abolished in 1833, and at the time of the Crimean War. In 1816 the debt amounted to £45 a head of the population; it at present amounts to between £14 and £15 a head.

The nominal amount of debt in January, 1816, was £885,186,323; but by adopting the present method of capitalizing the Annuities then outstanding as three per cent. stock, the following figures will represent the actual state of the Debt on that date. Reckoned in this manner it stood as follows:—

Funded Debt	£816,312,000
Unfunded Debt	44,727,000
Terminable Annuities capitalized... ..	39,397,000
	£900,436,000

This large amount of Debt was the growth of many years, and nearly all had been raised for foreign wars. There was a trifling sum (£664,263) due when the "glorious revolution" of 1688 brought over the Dutch King William to save the country from Popery, arbitrary government, and other evils, but in carrying out these projects he succeeded in adding to the Debt nearly sixteen millions during the twelve years of his reign. Under Queen Anne, Marlborough added to the glories of the country, and helped to swell the Debt, which at the time of the Queen's death had increased by nearly thirty-eight millions. Under the first George the Debt decreased slightly; but George the Second in 33 years left the country nearly eighty-seven millions worse off than he found it. During the first twelve years of George III. the Debt was again reduced by about ten millions, and at the time of the revolt of the American Colonies it was under one hundred and thirty millions, an amount which frightened all the political economists of that day. Undismayed at this, the obstinate king and his weak ministers pressed on the war, "entirely regardless of expense." The bill was a heavy one, and added one hundred and twenty-one millions more to the permanent Debt. On the conclusion of the disastrous war, which had all along been unpopular, there was a considerable outcry at the waste: some efforts were made to reduce the amount, and in the nine years from 1784 to 1793, ten and a half millions were paid off, no less than £2,421,681 of this sum disappearing in one year—1792.

The French revolutionary war began in 1793, and with a short interval of exhaustion, called "Peace," lasted till 1815, when Bonaparte was sent to St. Helena, and the forty years' real peace commenced. During these twenty-three years of war, money was borrowed in the most extravagant manner. From 1793 to 1801 the average price of £100 three per cent. Stock was £57 17s. 6d., and from 1803 to the conclusion of the War, £60 17s. 6d. Had the Government adopted an opposite plan, and for every hundred pounds borrowed received the whole amount, paying five or six, or even seven, per cent., the gross indebtedness of the country on the termination of the War would have been several hundred millions less, and the high rate of interest could have been gradually reduced. In 1815 a loan of £36,000,000 was negotiated, every subscriber receiving £174 three per cent. Stock, and £10 four per cent. The following loans were raised from 1793 to 1816:—

Year.	£	Year.	£	Year.	£
1793...	4,877,956	1801...	27,305,271	1809...	12,298,375
1794...	6,998,389	1802...	14,638,254	1810...	7,792,444
1795...	30,464,831	1803...	8,752,761	1811...	19,143,953
1796...	22,244,982	1804...	14,570,763	1812...	24,790,697
1797...	30,356,873	1805...	16,649,801	1813...	39,649,282
1798...	16,858,503	1806...	13,035,344	1814...	34,563,603
1799...	21,714,863	1807...	10,432,934	1815...	20,241,807
1800...	23,030,529	1808...	12,095,044	1816...	514,059

With the return of peace efforts were made to reduce the Debt; but this was no easy matter. In 1813, the national expenditure had reached the unprecedented amount of £108,397,645, of which £68,748,363 was raised by taxation, and £39,640,282 by loans. In 1815, the Waterloo year, the amount raised by taxation had increased to £72,210,512; but in 1817, the War being finished, taxation was reduced to £52,055,913, and out of this the sum of £1,826,814 was applied to the reduction of Debt. The following amounts were paid off from 1817-37:

Year.	£	Year.	£	Year.	£
1817...	1,826,814	1824...	7,456,559	1831...	2,673,858
1818...	1,624,606	1825...	9,900,725	1832...	5,696
1819...	3,163,130	1826...	1,195,531	1833...	1,023,784
1820...	1,918,019	1827...	2,023,628	1834...	1,776,378
1821...	4,104,457	1828...	4,667,965	1835...	1,270,050
1822...	2,962,564	1829...	2,760,003	1836...	1,590,727
1823...	5,261,725	1830...	1,935,465	1837...	1,985,885

At the accession of Queen Victoria the gross amount of the debt was £761,422,570, and in the 61 years since that date this amount has decreased by £116,512,723.

The gross Liabilities of the State on March 31, 1897, were as follows:—

I. THE FUNDED DEBT:—	
(A) Permanent	£537,6 P. 733
(B) Annuities	44,941,447
II. The Unfunded Debt	8,133,000
III. Other Capital Liabilities	4,136,160

Total Debt..... £644,909,847
 From this total must be deducted the following assets:—
 Value of Suez Canal Shares £22,269,000
 Unrepaid Loans..... 850,528
 Present value of Annuity from Australasian Colonies..... 120,377
 Total Assets £23,269,905
 leaving the net Liabilities at £621,639,942.

The Debt is of three descriptions:—I. Funded (A) Permanent, (B) Terminable; II. Unfunded; III. Certain other Liabilities.

I. FUNDED DEBT.—A. PERMANENT.

That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on March 31, 1897:—

2½ per cent. Consols	£524,101,052
2½ per cent. 1905	4,647,222
2½ per cent.	31,837,288
Exchequer Bonds 2½ per cent. ...	417,300
Bank of England Debt	11,015,100
Bank of Ireland do.	2,630,769
Book Debt 2½ per cent.	13,000,000
	<u>£587,698,732</u>

B. TERMINABLE ANNUITIES.

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off every year, and after a certain time the capitalized sum entirely extinguished. It may be shortly explained that the Treasury is empowered to give an Annuity for a certain number of years in exchange for permanent stock. Thus A transfers to the Treasury £1,000 of 2½ per cent. stock on which he is receiving £27 10s. a year; the Treasury in return undertakes to pay A £55 a year for twenty years or thereabouts. The Treasury cancels the £1,000 stock, and thus reduces, say, Consols by that amount; but during twenty years it pays a much larger sum than it would have paid if it had left matters alone.

The following is a list of these terminable annuities with the dates when they expire:—

(1) Annuities for Life and Terms of years	£11,826,894
(2) Red Sea and India Telegraph Companies (1908)	331,984
(3) Converted Annuities (1904)	4,024,282
(4) Chancery Funds (1904)	18,282,752
(5) Savings Banks (1901-2)	9,481,843
(6) Trustee Savings Banks (1908) ...	782,056
(7) Annuity of 1884 (1903)	209,135
	<u>£44,911,947</u>

II. UNFUNDED DEBT.

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government

is bound to pay off at certain dates, and is represented by certain loans having currency for periods varying from a few months to five or more years. On March 31, 1897, these consisted of three-five-and twelve-months Treasury Bills (for supply purposes) to the amount of £8,133,000.

III. OTHER CAPITAL LIABILITIES.

These sums are not included in the Capital on which Interest is arranged for in the Permanent charge.

On March 31, 1897, these sums stood as follows:—

Imperial Defence Act (1888) Annuities	£365,000
Russian Dutch Loan Annuity	379,672
Under Barracks Act, 1890	2,267,054
„ Telegraph Act, 1892	975,132
„ Uganda Railway Act, 1896 ...	149,310
	<u>Total.....£4,136,168</u>

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On March 31, 1897, these amounted to the following sums:—

Liability to Suitors (Chancery)	£2,334,502
„ „ Bankrupts' Estates	1,114,277
„ „ Suitors (Ireland)	259,150
Fee and other Funds „	163,285
Court of Bankruptcy „	35,042
Unclaimed Dividends (B. of England) ..	213,184
„ South Sea Annuities, &c. „ ..	39,788
„ Dividends (Bank of Ireland) ...	1,459
Life Annuities, &c. (Nat. Debt Office) ..	20,000
Uncl. Dividend acct. „ „ ..	133,692
	<u>Total.....£4,324,379</u>

The Permanent Charge of the Debt for the last two years is detailed below:—

DEBT:	1895-6.	1896-7.
Funded Debt (Interest)	£16,110,274	£16,108,037
Terminable Annuities ...	6,422,138	7,149,743
Unfunded (Interest) ...	118,367	112,534
Cost of management ...	176,447	175,692
New Sinking Fund	2,152,774	1,453,994
	<u>Total Charge for Debt £25,000,000</u>	<u>£25,000,000</u>

GROSS AMOUNT AND FIXED ANNUAL CHARGE OF THE DEBT (1885-1897).

Year.	GROSS AMOUNT OF THE DEBT.				COST OF INTEREST AND MANAGEMENT.

CIVIL SERVICE, GROSS, £21,590,686; REVENUE DEPARTMENTS, £14,543,166. TOTAL, £36,133,852.

THE Estimates for the Civil Service as submitted annually to Parliament are in two sections—one, divided into seven classes, shows the amounts required for the Civil Departments of the Government; the other, under the head of Revenue Departments, deals with the Customs, Inland Revenue, and the Post Office. This latter section

does not include the cost of buildings, that being shown under Class I. of the first section; neither does it include rents payable, except in the case of the Post Office.

The following table exhibits the cost of the two sections for three years, and brings out the growth of the expenditure:—

Year.	Gross Estimate.	Supplementary Estimate.	Estimated Receipts, &c.	Appropriations in Aid.	Net Estimate.	Actual Expenditure.	Revenue Departments.
	£	£	£	£	£	£	£
1895-96	20,647,410	86,000	1,142,016	1,349,666	19,297,744	18,155,728	13,761,322
1896-97	21,214,703	551,266	1,120,312	1,419,563	19,795,040	20,045,000	14,152,246
1897-98	21,590,686		1,313,572	1,422,718	20,167,968		14,543,166

The gross total of the several classes is exhibited below:—

1. Public Works and Buildings	£1,861,818
2. Salaries and Expenses	2,185,933
3. Law and Justice	3,755,460
4. Education, Science, and Art	10,777,537
5. Foreign and Colonial Services ...	817,329
6. Non-effective & Charitable Services	707,697
7. Miscellaneous	62,202
Total.....	£20,167,968

The following are the leading details, together with the principal variations between 1897-98 and the preceding year (the items for which in many cases underwent alteration):—

CLASS I.—*Public Works and Buildings*.—The sum-total required is £1,861,810, a decrease from the preceding year of £35,972. The heads are: Royal Palaces and Marlborough House £34,000; Royal Parks £102,000; Public Buildings, Great Britain, £228,000; Houses of Parliament £35,000; Admiralty Extension £40,000—making £302,300 towards an estimated cost, as amended, of £304,000; miscellaneous Legal Buildings (Great Britain) £63,000; Science and Art Department £26,000; Diplomatic and Consular Buildings £24,000; Inland Revenue Buildings £358,000; Surveys £12,291; Harbours under Board of Trade £19,087; Peterhead Harbour £24,000; Rates on Government property (Great Britain and Ireland) £399,367. *Ireland*: Public Works and Buildings £207,137; Railways £89,928.

CLASS II.—*Salaries and Expenses of Civil Departments*.—Total £2,185,933, an increase of £39,527. The following are the items of expenditure: House of Lords Offices £14,485; House of Commons £28,576; Treasury and subordinate departments £60,672; Home Office and subordinate departments £123,566; Foreign Office £71,705; Colonial Office £42,900; Privy Council £12,074; Board of Trade and subordinate departments £169,859; ditto, Bankruptcy Department £11 (actual cost £141,446, which, except £11, is met by a payment from the Bankruptcy Fees Account); Board of Agriculture £109,291; Charity Commission £42,090; Civil Service Commission £40,373; Exchequer and Audit Department £60,810; Friendly Societies Registry £7,607; Local Government Board £181,659; Lunacy Commission £14,225; Mercantile Marine Fund (grant) £44,215; Mint (including coinage) £52 (gross total £74,852, of which £74,800 is met by seigniorage on silver coinage, profit on bronze coinage, &c.); National Debt Office £14,139; Public Record Office £22,464; Public Works Loan Commission

£7,091; Registrar-General's Office £40,167; Stationery and Printing £590,830; Woods and Forests £20,904; Works and Public Buildings £55,200; Secret Service £30,000. *Scotland*: Secretary for Scotland £12,111; Fishery Board £35,323; Lunacy Commission £5,412; Registrar-General's Office £5,129; Local Government Board £11,951. *Ireland*: Household of the Lord Lieutenant £4,771; Chief Secretary's Offices, London and Dublin £42,246; Charitable Donations Office £1,943; Local Government Board £139,389; Public Record Office £5,880; Public Works Office £38,247; Registrar-General's Office £15,907; Valuation and Boundary Survey £12,649.

CLASS III.—*Law and Justice*.—Total £3,755,460, an increase of £19,237. The items are:—Law Charges £98,182; Miscellaneous Expenses (including Sheriffs' expenses, County of London Sessions, compensation to Clerks of the Peace, Extradition expenses, Railway and Canal Commission, Wreck Commission, and Revising Barristers) £40,300; Supreme Court of Judicature £324,451; Land Registry £7,877; County Courts £28,071; London and Sherrness Police Courts £4,900; Police, England and Wales £55,107; Prisons (England and Colonies) £600,851; Reformatory and Industrial Schools (Great Britain) £266,130; Broadmoor Criminal Lunatic Asylum £31,954. *Scotland*: Lord Advocate and Law Charges (gross £65,479) with Courts of Law and Justice (gross £62,091), net £92,630; Register House £41,961; Crofters' Commission £5,350; Prisons £82,277. *Ireland*: Law Charges and Criminal Prosecutions £64,229; Supreme Court of Judicature and other legal departments £112,758; Land Commission £107,431; County Court Officers £116,866; Dublin Police and Police Courts £93,491 (gross amount £145,107, reduced by various items formerly paid into the Exchequer); Constabulary £1,365,017 (gross total £1,396,576, appropriations in aid £31,559); Prisons £114,066; Reformatory and Industrial Schools £110,087; Criminal Lunatics (Dundrum) £6,446.

CLASS IV.—*Education, Science, and Art*.—Total, £10,777,537, an increase of £274,788. The details of some of the following heads will be found in other portions of the Almanack:—Public Education £7,306,910; Science and Art Department £809,992; British Museum and Natural History Museum £162,439; National Gallery £13,434; National Portrait Gallery £5,613; Scientific Investigation (grants to Learned Societies) £27,984; Universities and Colleges (Great Britain) £104,059; London University £10 (gross total £17,080, of which all but £10 is covered by fees).

Scotland: Public Education £1,154,933; National Gallery £3,400. Ireland: Public Education £1,180,291—increase £33,895; Endowed Schools Commission £1,025; National Gallery £2,497; Queen's Colleges £4,950 (gross total £11,190, reduced by £6,240, students' fees).

CLASS V.—*Foreign and Colonial Services.*—Total £817,329—increase £53,473. The items are:—Diplomatic and Consular Services £438,212 (gross for Diplomatic £245,038, General Consular £217,812); Services in China £54,835; in Japan and Siam £24,438; Slave Trade Services £2,629; Colonial Services including South Africa and St. Helena £85,936 (£70,000 of which is a grant in aid to Bechuanaland); Grant in aid to Cyprus £40,000; Subsidies to Telegraph Companies £67,100.

CLASS VI.—*Non-effective and Charitable Services.*—Total £707,697, a decrease of £22,488. The following are the items:—Superannuation and Retired Allowances £543,781; Merchant Seamen's Fund Pensions £6,350; Miscellaneous Allowances £1,813. Ireland: Pauper Lunatics £138,113; Hospitals and Charities £17,640. The chief items for superannuation allowances to 3,505 pensioners are:—Bankruptcy Department £2,955; British Museum £10,164; Charity Commission, £3,386; Colonial Offices £6,340; Colonial Governors £11,910; Consular Services £44,895; Diplomatic Services £32,265; Education Department (Eng. & W.) £22,924; Exchequer and Audit Department £14,110; Foreign Office £11,158; Home Office £7,794; House of Commons £4,562; Public Offices in Ireland £81,104; Local Government Board £16,264; Mint £5,499; National Debt Office £5,258; Paymaster General's Office £6,702; Police Courts (London and Sheerness) £7,033; Prisons (England and Colonies) £60,401; Record Office £3,158; Registrar-General's Office £6,120; Royal Parks £3,092; Science and Art Department £11,782; Public Offices in Scotland £13,050; Stationery Office £2,924; Supreme Court of Judicature £46,448; Surveys £15,142; Board of Trade £15,355; Treasury £10,364; Woods and Forests £5,298; Office of Works £4,123. There is a further provision of £1,676,270 for pensions or compensation allowances included in the Consolidated Fund and in the Estimates of the several departments.

CLASS VII.—*Miscellaneous.*—The total in this class is £62,202 against £66,491, a decrease of £4,289. The heads are—Temporary Commissions £31,923. Miscellaneous Expenses £4,779. Highlands and Islands of Scotland Public Works £25,500. The Commissions chargeable in 1897-98 are those on Historical MSS. Scottish Universities, Colonization Board, Congested Districts Board (Ireland), Administration of the Expenditure of India £327, Liquor Licensing Laws, Tuberculosis, Local Taxation, West Indian, Horse Breeding (Ireland), Old Age Pensions, Manual and Practical Instruction in Primary Schools (Ireland), and others not specifically provided for, but for which £7,500 is charged. The payments to the Historical Manuscripts Commission include remuneration to inspectors employed in visiting collections at Hatfield and other noble houses, calendaring House of Lords papers, &c.—total £1,450. The Congested Districts Board (Ireland) Commission takes £5,828; the Commission on the Liquor Licensing Laws; and that on Irish Primary Schools £2,500.

REVENUE DEPARTMENTS.

CUSTOMS, INLAND REVENUE, POST OFFICE, PACKET SERVICE, AND TELEGRAPHS.—The total under this head is £14,128,004, against £13,712,756, the amended estimate for last year, an increase of £415,248. The following table shows the cost of each department, with the net variations from the previous year:—

SERVICE.	1897-98.	Increase	Decr.
	£	£	£
Customs	861,100	—	2,712
Inland Revenue	1,501,272	30,235	—
Post Office	7,466,460	224,340	—
Packet Service	750,147	23,510	23,540
Telegraphs	3,149,115	139,844	—
Total	14,128,004	417,960	2,712

In the *Customs* the cost of the Superintending Establishment is £64,670. Port Establishments £638,476; Purchase and Maintenance of Vessels and Boats £6,250; Instruments and Materials for Revenue Purposes £2,200; Law Charges, &c. £9,128; Fine Fund £100; Superannuations £185,092; Commutation Annuities £584. Appropriations in aid reduce these gross items by £45,500.

Inland Revenue.—In this department the Salaries amount to £1,219,737—increase £25,840; Travelling Allowances £96,250; Salaries and Poundage to Distributors of Stamps £14,400; Commuted Allowances to Clerks to Local Commissioners of Taxes £90,300. Commuted Allowances to Collectors and Assessors of Taxes £207,604; Charges on Remittances £650; Police, £2,110; Gauging and other Instruments £2,600; New Machinery £3,100; Postage, &c. £5,860; Laboratory Expenses £1,790; Paper for Stamps and Licences £7,185; Copies of Poor Rates £2,500; Solicitors' Offices £23,175; Expenses of Prosecutions £11,500; Rewards for Detections £9,500; Losses by Fraud £200; Incidental Expenses £550; Superannuations £216,765; and for Annuity for Commutation of Pensions £1,499. Appropriations in aid, £16,000.

Post Office.—The total expenses of the Chief Offices in London, Dublin, and Edinburgh are £2,138,670—increase £72,090. In the Surveyors' Department the total is £67,170; for Provincial Establishments £3,413,880; Establishments in the Colonies £5,125; for Savings Banks £467,906 (£467,891 of the sum required will be met by the Post Office Savings Bank Fund, leaving a balance of £15 to be paid by the vote); Government Annuities £3,157 (of which £2,877 will be paid out of the Fund for Deferred Annuities and the Fund for Payments on Death)—leaving £280 as the net total. The cost for Conveyance of mails in England, Scotland, Ireland, and abroad is £1,512,390; Purchase of Sites and Buildings £47,500; Superannuations £217,810; and Manufacture of Postage Stamps £177,500. The cost of Railway Conveyance in England and Wales is £661,770; in Ireland £169,060 and in Scotland £208,710. Road Carriage in England is £317,500, in Ireland £38,900, and in Scotland £19,750.

Post Office Packet Service.—The chief items are: Contracts in the United Kingdom £170,440—increase £17,510; that between Holyhead and Kingstown being £98,000; between England and the Continent £25,000; to America £222,250; Africa (West Coast) £16,500; Zanzibar £9,000; Asia

and Australia £435,000; while the charge for Foreign and Colonial Parcels is £8,000.

Post Office Telegraphs.—The disbursements under this head are:—Secretary's Offices £51,375; Account Departments £92,185; Maintenance of Telegraphs £399,440; Railway Companies for work £61,000; Central Station, London £414,370; other London Offices £243,530; Provincial £1,349,890; Manufacture of Stamps £2,600; Clothing £46,420; Stores £6,810; Superannuations £52,800; Purchase of Sites £40,500; Telegraph Works £224,875. Appropriations in aid, £39,070.

In the Account departments a number of women are employed, one superintendent receiving £308, another £239, seven principal clerks £140 to £190, twenty-seven others from £105 to £130, and 162 from £65 to £100.

In the Telegraph department of the Central Station a matron receives £300, three supervisors £160 to £250, and six ditto £160 to £200, eighteen assistants £120 to £160, and forty others £100 to £120; while of the general body of telegraphists, 246 receive from 30s. to 38s. per week, and 555 from 10s. to 30s.

DUCHY OF CORNWALL.

The accounts of this Duchy, brought up to 31st December, 1896, give the following results for the year:—Balance from last year, £4,521; rents and profits of courts accruing to the Prince of Wales, £66,004; tithe rent-charges, recoverable, £2,179; royalties of coal-mines in Somerset, £1,199; royalties and reservations of dues, &c. £991; annuity from the Consolidated Fund in lieu of tin coinage dues, £16,217; dividends on stock, £5,767; giving (with smaller items) total income of £98,517; the arrears have again increased, and now amount to £31,985. The payments were—£55,671 to the Prince; outlay for the benefit of the estate, £13,149; deductions under various Acts of Parliament, £12,842; superannuations, &c. £1,766; expenses of management, £8,420; leaving a balance in favour of 1897 of £6,005. The capital account stood in December, 1896, at £7,698 in cash, and £250,225 in various securities.

DUCHY OF LANCASTER.

The accounts of this Duchy are brought up to 21st December, 1896. The balance in hand at the commencement of the year was £13,059. The net rents and profits accruing to Her Majesty were £49,809; royalties, rents, &c. £20,331; dividends of stocks, £600; escheats and forfeitures, £2,453; repayment on account of sums advanced £6,503, producing with various items of minor importance, a total gross income of £95,489, but of this only £89,976 was paid: the arrears on the 21st December amounted to £6,513. On the disbursement side £60,000 was paid to Her Majesty; in various payments, £35,489, including a payment of £2,000 to the Chancellor, leaving a balance of £13,267. The capital account stood in December, 1896, at £2,928 in cash, and £21,819 in securities. The revenues of the Duchy have increased from £29,000 in 1847 to £82,302 net in 1894.

WOODS, FORESTS, AND LAND REVENUES.

The accounts of this department for the year ending March 31st, 1896, are divided under the heads of "Capital" and "Income." Under the

head "Capital," commencing with a balance in cash of £46,001, and of stock of £184,533, there was received £84,324 from sales of estates, and of detached and outlying properties, from enfranchisements of copyholds, proceeds from mines, repayments of advances, dividends on stocks, &c. A total sum of £2,180 was expended in the purchase of estates; £861 in redemption of land tax; £13,724 in permanent improvements; miscellaneous, £87; leaving a balance of £55,718 in cash and of £227,164 in stock. The expenditure from income included expenses of collection, surveys, repairs, rates, taxes, donations, &c., £62,479; Windsor Park, £21,220; Royal forests and woodlands, £18,477. The gross income was £529,134.

Queen Anne's Bounty.

A PERPETUAL fund, established in 1703 to increase the incomes of the poorer clergy. It consists of the *first fruits*, that is, the whole of the first year's profits of all spiritual preferments, and the *tithes*, being one-tenth of their annual profit, after the first year, which formed originally part of the revenue paid by the clergy to the Pope, and annexed to the Crown in 1535 by Henry VIII. The Governors consist of the archbishops and bishops and chief Government officers.

The Annual Report brought up to the 31st December, 1896, gives the following results for the year, divided under the heads of "Capital" and "Income." The chief items are:—Balance from last year, £113,223; Benefactions (exclusive of the value of Houses, Land, Tithe Rent Charges, Securities, &c., transferred to the Governors for the Augmentation of Livings), £32,143; Bounty Lands sold, £9,093; Dilapidations, £60,160; Endowments (exclusive of the value of Securities transferred to the Governors), £16,636; Glebe Houses, &c., sold, £17,228; Instalments on Mortgages—under Dilapidation Acts, £2,305; under Gilbert's Acts, £48,809; Loans on Mortgages, £16,103; Miscellaneous Fund, £1,946; Securities realised, £202,000; Tithe Redemptions, £36,085; making, with smaller items, a total of £451,862.

Under the head of "Income" the chief amounts are:—First Fruits and Tithes and Fees, £16,637; Ground Rents, £22,118; Interest and Dividends received, £119,027; Interest on Mortgages—On Freeholds, £13,638; under Gilbert's Acts, £21,956; making, with smaller items, a total of £197,591. The total of both Capital and Income amounts to £762,676.

The Expenditure from "Capital" includes Augmented Livings—purchase, building and improving residences, &c., redemption of Tithe Rent Charge and Land Tax, and Enfranchisement of Copyholds, £28,650; Bounty Lands sold, £2,469; Building Fund for Parsonages, £3,260; Dilapidations, £65,040; Glebe Houses, &c., sold, for the purchase and improvement of Residence Houses, &c., £20,194; Ground Rents, £367,082; Loans, on Mortgages, £16,564; Miscellaneous Fund, £4,300; Purchase of Securities, £57,000, making, with smaller items, a total of £568,737.

The chief items of expenditure from "Income" are:—Charges of Management, £10,691; Interest and Dividends paid to the Clergy, £156,439, making, with smaller sums expended, a total of £170,207. The total expenditure stands at £738,943, leaving a balance in hand of £23,733.

ARMY AGENTS.

1. Cox & Co., 16 Charing Cross.
2. Holt & Co., 17 Whitehall Place.

3. Hopkinson (Charles) & Sons, 3 Regent Street.
4. M'Grigor, Sir Charles R., Bart., & Co., 25 Charles Street, St. James's Square.

THE PERSONNEL OF THE ARMY.

THE REGULAR ARMY consists of 31 regiments of Cavalry, with 18,894 officers, non-commissioned officers, and men, and 12,833 horses and mules; 119 batteries of Artillery with 718 field guns, and 93 companies of Garrison Artillery, the whole containing 37,624 officers and men with 11,947 horses and mules; 62 companies of Royal Engineers with 7,932 officers and men and 426 horses and mules; 149 battalions of infantry with 147,417 officers and men, and 718 horses and mules. Total 211,687 officers and men, 25,924 horses and mules, and 718 field guns. The Colonial Corps consist of 5,764 officers and men. The Departmental Corps (Army Service, Medical Staff, Ordnance, and Pay) consist of 69 companies with 8,426 officers and men, and 1,311 horses and mules.

16. Superannuation, &c. Allowances	172,971	172,800	175,471	173,300
Total	20,940,778	18,056,600	21,162,422	18,140,500

ORDNANCE FACTORIES.

The gross amount of the estimate is £2,963,500, against £2,288,000 in 1896-97, and the items are:—Establishment pay £27,781; wages and police £1,516,577; materials and stores £1,267,000; machinery obtained by contract £50,000; buildings £64,546; miscellaneous £28,896; non-effective charges £8,700. Of the gross total £1,195,000 is chargeable to the Army for stores, £1,292,000 to the Navy, £300,000 to India, £100,000 to other repayments (Army and Navy), £50,000 is covered by sale of old stores, and £12,000 by miscellaneous receipts. This leaves £100 as the net amount of the vote, as in 1896-97. The establishment consists of a director-general receiving £2,500, 3 assistants £2,075, 7 superinten-

dents £6,650, 9 other officers £3,905, 22 clerical staff £8,217, 1 mechanical and 2 works staff £1,330. The medical establishment costs £2,273, schools and library £70, and chaplains £611. Wages and police at Woolwich amount to £1,190,193, at Enfield £196,465, at Waltham Abbey £76,633, and at Birmingham £53,286. Materials and stores for Woolwich cost £1,050,000, for Enfield £72,000, for Waltham Abbey £138,000, and for Birmingham £7,000. The machinery obtained by contract is in addition to that made by the factory and valued at £50,000. Buildings include the cost of new works £34,546, the maintenance and repairs being £30,000. Among miscellaneous items are £4,500 for stationery, and £14,421 in lieu of rates.

NAVY AND PRIZE AGENTS.

Banton, Mackrell, & Co., 26 Budge Row, Cannon Street.
Burnett & Co., 123 Pall Mall.

Stilwell & Sons, 21 Great George Street.
Woodhead & Co., 44 Charing Cross.

A List of the Vessels of the Royal Navy,

221

WITH THEIR GUNS, TONNAGE, RATE OF SPEED, AND (WITHIN BRACKETS) THEIR YEAR OF COMPLETION AND HORSE-POWER.

Armoured vessels have their names printed in CAPITALS; those ships in commission on Nov. 1, 1897, have an asterisk * prefixed, and the names of their principal officers attached; those marked † are sailing vessels, and those with a ‡ are paddle steamers.

- * **ABYSSINIA** (1870), 4, 2900 tons (900), Coast Defence ship, 9 kts., for India's naval defence. Bombay. *Lieut. in command*, Lawrence Hill Richardson; *Fleet-Eng.* Henry Eggleton Wingfield; *Assist.-Paym.* Frederick W. F. Vining.
- ACHILLES** (1854), 16, 9820 (4000), 1st cl. cruiser, 12.7 kts., Portsmouth. *Fleet-Eng.* Thomas F. Brown.
- Acorn** (1834), 8, 970 (1200), screw sloop, 12.2 kts., Sheerness.
- * **Active** (1869), 12, 3080 (2400), 2nd cl. cruiser, 15.10 kts., Training Squadron. *Commodore*, Edmund Samuel Poë, M.V.O.; *Comm.* Claud A. W. Hamilton; *Chaplain*, Rev. Henry Blackwell; *Staff-Surg.* J. B. Bowden Triggs; *Fleet-Paym.* Chas. James Pawsey; *Fleet-Eng.* William H. White.
- Æolus** (1822), 8, 3600 (9000), 2nd cl. cruiser, 19½ kts., Devonport. *Chief Eng.* Frank R. Stuttaford.
- AGAMEMNON** (1883), 6, 8660 (4500), 2nd cl. battleship, 12.1 kts., Devonport. *Lieut.* John Innes Pocock; *Fleet-Eng.* Richard Henry Tregenna.
- AGINCOURT** (1863), 17, 10600 (4000), 1st cl. cruiser, 12 kts., Chatham. *Comm.* James Montgomery Caulfield; *First Lt.* Charles R. Curtis; *Fleet-Eng.* Matthew R. Miller.
- AJAX** (1823), 6, 8660 (4500), 2nd cl. battleship, 12.1 kts., Chatham. *Lieut.* Thomas F. C. Dundas; *Fleet-Eng.* Thos. Burnes.
- * **Alacrity** (1885), 4, 1700 (3000), despatch vessel, 17 kts., China. *Comm.* Arthur H. Smith-Dorrien; *Surg.* John H. Pead; *Chief Eng.* James Ryan; *Assist.-Paym.* John E. Jones.
- Alarm** (1832), 2, 810 (3500), 1st cl. torpedo gunboat, 15½ kts., Hull. *Lieut. & Comm.* Richard H. Story; *Eng.* Frank D. Thomsett.
- * **Albacore** (1883), 4, 560 (500), 2nd cl. gunboat, 11 kts., particular service. *Lieut. and Comm.* George S. Shuckburgh; *Surg.* John C. Rowan, M.B.
- † **Alberta**, 370 (1000), Royal yacht, Portsmouth. *Staff-Capt.* Geo. A. Broad; *Eng.* Joseph H. H. Ireland.
- * **Alecto**, 2, 620 (350), special service, Cape and West Africa. *Lieut.-Comm.* Arthur Fosberry Holmes; *Surg.* Alfred H. L. Cox; *Assist.-Paym.* William H. Campion; *Eng.* Charles F. Dunn.
- Alert** (1894), 6, 960 (1400), sloop, 13½ kts., Chatham. *Lieut.* Cecil Eustace Rooke; *Eng.*, Herbt. John Leader; *Paym.* Charles D. M. Horne.
- * **ALEXANDRA** (1877), 18, 9490 (7000), 2nd cl. battleship, 14.3 kts., Coastguard, Portland. *Vice-Adm.* Compton Edward Domville (Naval Reserve); *Capt.* Charles James Barlow, D.S.O.; *Comm.* Francis A. A. G. Tate; *Chap.* Rev. Samuel St. A. Bayles; *Staff-Surg.* Wm. George Jack; *Fleet-Paym.* Archibald Court; *Fleet-Eng.* Henry Chas. Goldsmith; *First Lieut.* Cresswell John Eyres.
- * **Algerine** (1895), 6, 1050 (1400), sloop, 13 kts., China. *Comm.* Ewen Francis Domville; *First Lieut.* Charles P. R. Coode; *Surg.* John Hutton Stenhouse; *Assist.-Paym.* Ralph B. H. Moore; *Eng.* Alfred W. Littlewood.
- * **Algiers** (late *Anson*), 3260 tons, flag-ship, Chatham Dockyard. *Rear-Adm.* Hilary Gustavus Andoe, C.B.; *Capt.* Albert Baldwin Jenkins; *Assist.-Paym. in charge*, John Kinnaird Watson.

Ships building for the Royal Navy (November 1, 1896), 233

With their guns, tonnage, and (within brackets) their indicated horse-power under forced draught, except in the case of the *Albion*, where the H.P. under natural draught is given. Armoured vessels have their names printed in CAPITALS, and vessels building in the Government Dockyards have an asterisk * prefixed, the rest being constructed in private yards.

- Albatross*, 6 (7500), torpedo-boat destroyer, Chiswick. *Chief Engineer*, Edouard Gaudin.
- ALBION**, 16, 12950 (13500), first-class battleship, Blackwall. *Fleet Engineer*, William L. Wishart.
- Amphitrite*, 16, 11000 (18000), 1st cl. cr., 20½ kts., Barrow-in-Furness. *Staff-Eng.* Jas. Armstrong.
- Angler*, t.b.d., Chiswick. *Eng.*, Jasper W.A. Parrott.
- Arab*, torpedo-boat destroyer, Glasgow.
- Argonaut*, 16, 11000 (18000), 1st cl. cr., 20½ kts., Glasgow.
- Ariadne*, 16, 11000 (18000), first-class cruiser, Glasgow. *Staff Engineer*, William Milton.
- Ariel*, t.b.d., Chiswick (Launched March 5, 1897).
- Avon*, t.b.d., Barrow. *Eng.* Henry T. Knapman.
- Buttern*, torpedo-boat destroyer, Barrow-in-Furness. *Engineer*, James A. Roye.
- Bramble*, first-class gunboat, Liverpool.
- Britomart*, first-class gunboat, Liverpool.
- Bullfinch*, 6 (5800), torpedo-boat destroyer, Hull. *Engineer*, Charles Laughton.
- Cheerful*, 6 (5300), t.b.d., Newcastle O. T. *Eng.*, Robert S. Jennings.
- * *Cmdor*, 10, 960 (1400), sloop, Sheerness.
- Coquette*, 6 (5400), t.b.d., Chiswick.
- Cygnets*, 6 (5400), t.b.d., Chiswick. *Eng.*, Henry T. Yeats.
- Cynthia*, 6 (5400), t.b.d., Chiswick.
- Dove*, 6 (5800), torpedo-boat destroyer, Hull.
- Dwarf*, first-class gunboat, Glasgow.
- Electra*, 6, torpedo-boat destroyer, Glasgow.
- Express*, torpedo-boat destroyer, Birkenhead.
- Fairy*, 6 (6000), torpedo-boat destroyer, Glasgow.
- Fawn*, 6 (5900), t.b.d., Jarrow-on-Tyne (Launched April 13, 1897). *Engineer*, James R. Roifey.
- Fervent*, 6 (3850), t.b.d., Paisley.
- Flirt*, 6 (5900), t.b.d., Jarrow-on-Tyne.
- Flying Fish*, t.b.d., Jarrow. *Eng.* Wm. S. Frowd.
- Gipsy*, 6 (6000), torpedo-boat destroyer, Glasgow.
- GLORY**, 16, 12950 (13500), first-class battleship, 18½ kts., Birkenhead.
- * **GOLIATH**, 16, 12950 (13500), 1st cl. batt., Chatham.
- Hermes*, 11, 5600 (10000), 2nd cl. cr., 20 kts., Glasgow.
- Highflyer*, 11, 5600 (10000), 2nd cl. cr., 20 kts., Glasgow.
- Hyacinth*, 11, 5600 (10000), 2nd cl. cr., 20 kts., Glasgow.
- Kestrel*, 6 (5800), torpedo-boat destroyer, Glasgow.
- Lee*, torpedo-boat destroyer, Sunderland.
- Leopard*, 6 (6000), t.b.d., Barrow, completing for sea.
- Locust*, t.b.d., Birkenhead, completing for sea. *Engineer*, Sidney J. Drake.
- Mermad*, 6 (5800), t.b.d., Newcastle-on-Tyne.
- Nightingale*, shallow-draught steamer for river service, Isle of Dogs, Poplar.
- Niobe*, 16, 11000 (16500), 1st cl. cr., 20½ kts., Barrow (Launched 1897). *Staff-Eng.* Arthur J. Johns.
- * **OCEAN**, 16, 12950 (13500), first-class battleship, 18½ kts., Devonport Dockyard.
- Orwell*, torpedo-boat destroyer, Birkenhead.
- Osprey*, 6 (6000), torpedo-boat destroyer, Glasgow.
- Otter*, 6 (6000), torpedo-boat destroyer, Barrow-in-Furness. *Engineer*, Marrack Sennett.
- Pactolus*, 8, 2135 (7000), 3rd cl. cr., 20 kts., Newcastle-on-Tyne. *Chief Eng.* Wm. F. Turner.
- Pandora*, first-class cruiser, Portsmouth.
- Panther*, torpedo-boat destroyer, Birkenhead.
- Pegasus*, 8, 2135 (7000), 3rd cl. cruiser, 20 kts., Jarrow. *Chief Eng.* William Whittingham.

* The title and rank of officers of the Royal Indian Marine are similar to those of the Royal Naval Reserves, but senior to those officers in their respective ranks.

THE FIGHTING SHIPS OF THE ROYAL NAVY, 1897-98 (Nov., 1897).

Note. In the following table "Modern Ships" are ships which have been built since the year 1880, and which are, for the most part, steel vessels, with twin screws and breech-loading guns. "Obsolete Ships" are ships which were launched in or before 1880. Vessels, such as yachts and surveying ships, which have no fighting value, are, of course, not included below.

CLASS.	MODERN SHIPS.			OBSOLETE SHIPS.			TOTAL SHIPS.

THE CHURCH OF ENGLAND.

THE CHURCH OF ENGLAND is "established" in its recognition as the national organisation for the maintenance of Christian belief and practice, and its clergy are an estate of the realm; the Sovereign is one of its members, and its supreme governor on earth; the free exercise of its inherent rights as a Church is guaranteed, and its authority, when lawfully exercised, is enforced. The Church has taken a large share in the promotion of civilisation, education, and philanthropic enterprise, and has exercised a powerful moral influence towards order, peace, and national progress.

The Church of England took its rise in 597, when Ethelbert, the pagan King of Kent, was baptized by missionaries sent by Gregory, the Bishop of Rome. The Italians only converted, permanently, the small kingdom of Kent; but they made the first beginning of the Church of England. East Anglia and Wessex were converted by other foreigners. The great impetus to the spread of the faith was given by two English Northumbrian Kings, who had been taught by the Scotie (Celtic) Church from its centre at Iona. By their influence the new faith was established in by far the largest part of the country.

The Church of the Britons, whom the pagan English had driven away to the West, continued a separate existence in its mountainous retreats, and took no part in the conversion of the English. It had merged its organization in that of the English Church as early as the Norman times. The Church of England and Wales is one.

About the years 660 to 680, the principal Kings of the English Heptarchy learned to take united action in Church matters, and that was the beginning of the unity of England. It was not till 150 years later that England became in any sense one kingdom. At that time, A.D. 828, the Archbishoprics of Canterbury and York had long been in existence, and the Bishoprics of London, Rochester, Winchester, Lichfield, Worcester, Hereford, and the originals of the Sees now called Chester, Lincoln, Salisbury, Norwich, Chichester, Durham, as also four Bishoprics since merged in others. Thus, to speak generally, the present organization and geographical arrangement of the Church of England is older by a century and a half, in some parts by two centuries and more, than the Kingdom of England.

The Church of England passed unbroken through the Norman Conquest. Lanfranc was consecrated the first Norman Archbishop of Canterbury by nine English Bishops. The Reformation under Henry VIII. is the most important landmark in its existence, and at the Reformation the Bishoprics of Chester, Oxford, Peterborough, Bristol, and Gloucester were formed. In the present century, to meet

the wants of the growing populations, the sees of Ripon, Manchester, St. Albans, Liverpool, Wakefield, Truro, Newcastle and Southwell have been created. There are now two Archbishoprics, 33 diocesan Bishoprics (of whom 24 have seats in the House of Lords), and 17 Bishops Suffragan. The Anglican Episcopate has spread far and wide. There are 90 colonial and missionary bishoprics, the first being that of Nova Scotia in 1787; and 80 American bishoprics, the first in 1784. The growth in modern times may be seen from the invitations to the Lambeth Conference of Bishops in communion with the Church of England: in 1867, 144; 1878, 173; 1888, 211; in 1897, 247.

The Convocations of Canterbury and York are the deliberative bodies of the Church of the Southern province and the Northern province respectively. The archbishops and bishops, the deans and archdeacons, sit in Convocation *ex officio*, and there are elected representatives of the Cathedral Chapters and the beneficed clergy. In accordance with ancient custom, Convocation cannot make ecclesiastical laws or canons without the permission of the Sovereign.

There are about 14,000 parishes, and in half of these the income of the incumbent is less than £130 a year. The estates of the Bishoprics and Cathedral are in the main managed by the Ecclesiastical Commissioners, who pay the incomes of the bishops, &c., and spend the balance in improving the endowments and buildings of parishes, providing funds for additional clergy, and endowing new parishes. The whole number of clergy, beneficed and not beneficed, is about 23,000; the Archdeacons (90 in number) and Rural Deans (810) are the officers through whom the bishop of the diocese regulates their proceedings. Each diocesan bishop has a Court with legal officials, for the trial of cases that arise.

The sums raised by voluntary contribution during the year 1895, or the alternate period from Easter 1895 to Easter 1896, as given in the "Church Year Book" for 1897, amounted to nearly £5,750,000, exclusive of offerings by Churchmen made direct to societies and independently of the parochial clergy (or for the general maintenance of hospitals and similar institutions). In the 25 years from 1860 to 1884, £35,000,000 was given for Church building and work of that kind; £7,000,000 for Home Mission work, £10,000,000 for Foreign Missions, £22,000,000 for Elementary Education, £4,000,000 for Charitable Work, and £2,000,000 for Clergy Charities; with a total of £81,000,000. In the ten years from 1884 to 1893, £13,500,000 was given for church building, &c. Some of the most important items are exclusive of the action of Societies, and a vast amount of charity is never put on record.

POPULATION OF THE WORLD ACCORDING TO RELIGIONS.*

Protestants	137,000,000
Roman Catholics	216,000,000

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.—Dean and Ordinary, Very Rev. Henry Jellett, D.D.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).
Honorary Secretaries, Ven. J. George Scott, D.D.; J. C. Meredith, LL.D.; Gordon E. Tombe, J.P.
Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870),
 Thomas Greene, M.A., 52 St. Stephen's Green East, Dublin.

THE CHURCH OF IRELAND, founded by St. Patrick in nearly 1300 years. From 1152 to 1560 she was in alliance with the Church of Rome. This ceased

when, only two Bishops dissenting, she accepted the Reformation. By the Act of Union, 1800, she was united with the Church of England. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her ancient position. The Act of 1869 not only disestablished the Irish Church, but also took away her property, nothing being left but the right to the life services of the Annuitant Bishops and Clergy, the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage) built by the clergy at their own cost, and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually. Subject to the General Synod are 43 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the bench of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and three parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the

REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 1300-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital now amounts only to £1,614,848, charged with annuities to 272 annuitants, £51,507. The funds, however, in the custody of the Representative Body amount in all to £7,947,335, made up of Commutation £1,614,848, Parochial Sustentation £4,247,731, Episcopal Sustentation £560,302, Glebes purchase £331,756, Miscellaneous purposes £1,140,376.

Since 1871, members of the Church have paid in to the Representative Body a total sum of £4,847,320. The interest of the Parochial Sustentation Fund is £169,909. The total amount of assessment for stipend paid by parishes, 1896, was £132,934, and the total amount paid for stipends under Diocesan Schemes was £235,390.

The number of members of the Church of Ireland by the Census of 1891 was 602,300.

THE ESTABLISHED CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), and the Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 for his services. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are about 1,757 ministers and licentiates engaged in ministerial work. The Church population exceeds that of all the other Presbyterian bodies united, and is estimated at about half the whole population of Scotland; the number of communicants in 1896 was 633,408. The sum of £466,138 was raised in 1896 for home and missionary purposes. Within the last 50 years 404 chapels, at a cost of £1,477,833, have been endowed and erected into parishes *quoad sacra*. The original parishes were 924, in addition to which there were in 1897, 404 new and 42 Parliamentary parishes, also 203 new endowed churches and 184 mission stations; a total of 1,757. The Presbyterian form of Church government as first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688, Presbyterianism regained the legal establishment, which it still preserves. In consequence of the action of the civil courts in certain cases of disputed settlements, confirmed by a decision of the

House of Lords in 1842, about 289 parish ministers resigned their preferments and in 1843 founded the Free Church. LORD HIGH COMMISSIONER, The Marquess of Tweeddale. MODERATOR, the Right Rev. William Mair, D.D.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.
(1) *The Free Church of Scotland*, founded in 1843, is based on the great principle of the independence of the Church in its spiritual action, and holds as a consequence the right of each congregation to elect its own minister. The circumstances that led to the formation of this Church have been already mentioned. The sum of £367,000 was raised in the first year of the disruption, and by 1853 850 congregations had been formed. At the present day the Free Church is a fully organised body, consisting of a General Assembly, 16 synods, and 75 presbyteries. There are 1,165 ministers, with 1,094 congregations meeting in well-appointed churches built for them, of which about 50 are preaching stations. The General Assembly meets every year at the same time as that of the Established Church. Having no endowments, the clergy are mainly supported by the Sustentation Fund, which along with congregational supplements gives on an average £245 to each minister, three-fourths of whom are also provided with manes. The sum of £673,883 was raised in 1896-97 for the various purposes of the Church, including Missions. MODERATOR for 1897-8 is the Rev. Hugh Macmillan, D.D., LL.D., of the Free West Church, Greenock.

(2) *The United Presbyterian Church*, which has 29 presbyteries, 577 churches, 613 ministers, and 191,881 members in Scotland and Ireland, who raised

£410,853 in 1896 for its purposes. It has 873 missionaries, evangelists, and teachers in the East and West Indies, in Africa, China, and Japan. MODERATOR, 1897-98, the Rev. John Hutchinson, D.D., Bonnington, Edinburgh.

(3) *The Presbyterian Church in Ireland.*—According to the Census of 1891, the members of the various Presbyterian churches in Ireland were 446,687. The largest of these, under the superintendence of the General Assembly, consists of 36 home presbyteries, 652 ministers, 566 congregations, with 106,104 communicants, 83,467 families, 9,131 Sabbath-school teachers, and 103,816 scholars. During the year 1896-97 this branch contributed by congregational effort £193,308 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £256,216. It possesses two Colleges, with a staff of 14 professors, and has 28 ordained with 4 medical missionaries in foreign parts. MODERATOR, 1897-98, Rev. Matthew Leitch, D.D., Belfast. Clerk, Rev. W. J. Lowe, M.A., Londonderry.

(4) *The Presbyterian Church of England* has 12 presbyteries, 305 congregations, 13 preaching stations, and 70,639 communicants. It has a Theological College in London, and supports 59 missionaries abroad, including 22 women. In 1896 the amount raised for various purposes was £261,571. MODERATOR of Synod for 1897-98, Rev. H. L. Mackenzie, M.A., Swatow, China.

(5) The less numerous divisions are: the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

OTHER RELIGIOUS DENOMINATIONS.

THE ROMAN CATHOLIC CHURCH. (See page 250.)

WESLEYAN-METHODISTS. (See page 252.)

THE INDEPENDENTS, OR CONGREGATIONALISTS, in England come next to the Methodists; they are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. They first appeared in the time of Elizabeth, under whom they were very harshly treated; in consequence, great numbers repaired to North America; but their principles triumphed under the Commonwealth. In 1831 the majority of their churches were formed into the Congregational Union. There are 51 county and other Associations in England and Wales, with 4,607 churches and preaching stations containing 1,621,764 sittings; the number of ministers is stated as 2,867. Of these 254 are temporarily without pastoral charge, 63 are engaged in collegiate and tutorial duties, 41 are occupied in secretarial work, and 321 by reason of age or ill-health have retired from pastoral duty. CHAIRMAN, 1898, Rev. Alfred Rowland, LL.B., Crouch End, N. Sec., Rev. W. J. Woods, B.A. (Memorial Hall, Earrington St.).

The *Counsell of Huntingdon's Connexion*, with 36 chapels. Its tenets are expressed in XV articles, founded on the XXXIX articles and Westminster Confession, but in some chapels the prayers of the Church of England are read.

The BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in Associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In Great Britain and Ireland there were, in 1896, 3,822 chapels and 1,955 pastors.

The members numbered 350,112, and Sunday scholars 519,226. In addition to the members in this country, the Baptists have numerous chapels and several hundred ministers in the Colonies. In the United States they form one of the most numerous religious bodies there, the "members" alone numbering somewhere about 4,000,000. Their missionaries are employed in India, Ceylon, China, Palestine, the West Indies, Africa, Brittany, and Italy. PRESIDENT, 1898, Rev. S. Vincent, of Plymouth.

THE WELSH CALVINISTIC METHODIST CONNEXION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is presbyterian. At the present time the body numbers—chapels and places of worship, 1,536; ministers and preachers, 1,166; deacons, 5,434; communicants, 150,442; on probation, 2,706; Sunday-school teachers, 25,139; scholars and teachers, 199,059; number belonging to the congregations (including communicants), 308,307. A sum amounting to £228,417 was collected for various religious purposes in 1896. One of the features of the Welsh churches is the Sunday school, which is attended by adults as well as children; the vernacular is the language generally used in these schools. There are 251 English congregations with 16,499 communicants; all the rest are Welsh. MODERATOR of General Assembly, 1897-8, Rev. John Morgan Jones. Moderator elect, Rev. Principal Roberts, D.D.

THE SALVATION ARMY is one of the most recent religious denominations, and one of the most successful. In Aug. 1897, the number of *Officers* was 12,769, of *Corps* and *Outposts* 5,818, of *Junior Soldiers Corps* 2,935, *Local Officers* 30,646. The number of countries occupied was 44, and of languages used 28. Connected with the Salvation Army are numerous philanthropic institutions under various denominations, including 27 Homes of Rest, 76 Rescue Homes for Fallen Women, 99 Slum Posts, 16 Prison Gate Homes, 93 Shelters and Cheap Food Depôts for the Homeless, 54 Workshops and Factories, 34 Labour Bureaux, 9 Farms, &c. "GENERAL," William Booth.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels, and other places of worship. The Society of Friends, which consists of 16,674 members in Great Britain and 2,609 in Ireland, has 374 recorded ministers, including 148 women; their places of worship in 1896 numbered 366. *Central Office*, 12 Bishopsgate St. Without, E.C. The Moravians have about 50 congregations and preaching stations. The Catholic Apostolic Church have above 80 churches; the New Jerusalem Church (Swedenborgians), 75 societies, with 6,063 registered members; the Latter-Day Saints (Mormons) have 82 churches. Among the inhabitants of the United Kingdom are about 120,000 Jews, mainly in London and other large towns, who possess 80 synagogues, with about 100 ministers and readers (*Chief Rabbi*, Dr. Hermann Adler). The Jews support their own poor, and raise about £150,000 annually for religious and benevolent purposes. Their number throughout the world is computed at various totals, ranging between 8 and 9 millions. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. The Greeks have churches in London, Manchester, and Liverpool. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and a mosque has been opened for Moslems.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy; there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the Province of Canterbury, and by every archdeaconry in the Province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop. The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Chichester; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwell; St. Albans; St. Asaph; St. Davids; Truro; Worcester.

Lower House.

Prolocutor. The Rt. Rev. Bishop Sumner, D.D. The Very Rev. the Deans. The Venerable the Archdeacons.

Also the following Proctors:

BANGOR.—*Chapter,* Canon Thomas. *Clergy.*—T. Edwards; E. Hughes.
BATH & WELLS.—*Chapter,* Canon Buckle. *Clergy,* W. Michell; Edwin A. Salmon.
BRISTOL.—*Chapter,* Canon Tetley. *Clergy,* H. Procter.
CANTERBURY.—*Chapter,* Canon Rawlinson. *Clergy,* A. Whitehead; F. H. Murray.
CHICHESTER.—*Chapter,* Canon Sanderson, D.D. *Clergy,* A. H. S. Barwell; J. J. Hannah.
ELY.—*Chapter,* Canon E. C. Lowe, D.D. *Clergy,* J. H. Macaulay; W. Cunningham.
EXETER.—*Chapter,* Canon Edmonds. *Clergy,* H. Tudor; R. Martin.
GLOUCESTER.—*Chapter,* Canon St. John. *Clergy,* F. V. Mather.
HEREFORD.—*Chapter,* W. Poole. *Clergy,* E. F. Clayton; C. S. Palmer.
LICHFIELD.—*Chapter,* Rt. Rev. Sir L. T. Stamer, Bt. *Clergy,* C. N. Bolton; E. Phillips.
LINCOLN.—*Chapter,* Sub-Dean Clements. *Clergy,* J. H. Overton; G. W. Jeudwine.
LLANDAFF.—*Chapter,* Prebendary C. J. Thompson. *Clergy,* John T. Harding; S. F. H. Nicholl.
LONDON.—*Chapter* (vacant); Canon Duckworth (Westminster). *Clergy,* Preb. A. J. Ingram; H. W. Villiers.
NORWICH.—*Chapter,* Canon C. K. Robinson. *Clergy,* Constantine Erere; T. P. Garnier.
OXFORD.—*Chapter,* Canon William Bright. *Clergy,* Edmund Savory; W. F. Norris.
PETERBOROUGH.—*Chapter,* Canon L. Clayton. *Clergy,* W. Yates; H. L. Watson.
ROCHESTER.—*Chapter,* Canon Jelf. *Clergy,* Canons Clarke and Bristow.
ST. ALBANS.—*Chapter* (none). *Clergy,* J. W. Irvine; J. M. Procter.
ST. ASAPH.—*Chapter,* Canon W. H. Fletcher. *Clergy,* David Evans; W. Ll. Nicholas.
ST. DAVID'S.—*Chapter,* Canon Lewis. *Clergy,* T. R. Walters; D. Jones.
SALISBURY.—*Chapter,* Canon T. L. Kingsbury. *Clergy,* R. S. Hutchings; Canon E. S. Bankes.
SOUTHWELL.—*Chapter* (none). *Clergy,* Charles Gray; C. J. Hamilton.
TRURO.—*Chapter,* A. J. Worledge. *Clergy,* A. C. Thynne; J. S. Tyacke.
WINCHESTER.—*Chapter,* Canon W. P. Warburton. *Clergy,* Vernon Musgrave; W. Durst.

WINDSOR.—*Chapter,* Rt. Rev. Bishop Barry.

WORCESTER.—*Chapter,* Canon Knox Little.

Clergy (vacant); E. A. Waller.

Vicar-Gen., The Rt. Hon. Sir Jas. Parker Deane,

Registrar, Sir John Hassard, K.C.B. [D.C.L., Q.O.

Actuary, Francis Cobb.

Apparitor-General, Sir John A. Hanham, Bart.

Clerk, Arthur Ryder.

PROVINCE OF YORK.—Upper House.

President.—The Most Rev. the Lord Archbishop. The Right Rev. the Lords Bishops of Durham; Ripon; Chester; Carlisle; Manchester; Liverpool; Newcastle; Wakefield; Sodor and Man.

Lower House.

Prolocutor. T. E. Espin, D.D.

The Very Reverend the Deans of the Province.

The Venerable the Archdeacons.

And the following Proctors:

YORK.—*Chapter,* Chancellor Randolph; Bishop Blunt. *Clergy,* Canon Faber; Canon Argles. *Clergy of Cleveland,* Rev. C. N. Gray; Canon H. Temple. *Of E. Riding,* Canon Watson; Canon Stanbridge. *Of Sheffield,* J. Gilmore; W. R. Pym.
CARLISLE.—*Chapter,* Bishop Ware. *Clergy,* Canon Mathews; Canon Bower. *Clergy of Westmorland,* Canon Stock; Canon Sherwen. *Clergy of Furness,* Canon Ayre; Canon Bell.
CHESTER.—*Chapter,* Canon Feilden. *Clergy,* Canon Wood; W. E. Torr. *Clergy of Macclesfield,* Canon Gore; S. A. Boyd.
DURHAM.—*Chapter,* Canon Tristram. *Clergy,* Canon J. Baily; Canon H. E. Savage. *Clergy of Auckland,* Chancellor T. E. Espin; Canon D. R. Falconer.
LIVERPOOL.—*Chapter* (none). *Clergy,* Canons Jones and Blundell. *Clergy of Warrington,* Canons O. H. L. Penrhyn and G. H. Spooner.
MANCHESTER.—*Chapter,* Canon Crane. *Clergy,* Canon Birley; Hon. A. T. Lyttelton. *Lancaster,* Canon Hawkins; S. Hastings. *Blackburn,* Bishop Cramer-Roberts; Canon Rogers.
NEWCASTLE.—*Chap.* (none). *Clergy of Northumberland,* Canons J. M. Lister; P. Rogers. *Clergy of Lindisfarne,* Canons J. Waite and H. F. Long.
RIPON.—*Chapter,* Canon Wynter-Gibbon. *Clergy of Richmond,* R. P. Daniell-Bainbridge; V. J. Ryan. *Of Craven,* Canon Eddowes; A. J. G. Nash. *Of Ripon,* Canons Owen and Wood.
SODOR AND MAN.—*Clergy,* Canon B. P. Clarke.
WAKEFIELD.—*Clergy of Halifax,* Canons Ivens and Grensie. *Clergy of Huddersfield,* Canons J. W. Bardaley and W. F. Norris.
Archbishop's Commissioners.—Bishop of Beverley; the Dean and Canons Residentiary of York.
Synodal Secretary.—Rev. Canon Wright, Rector, Stokesley, Yorkshire.
Registrar.—Hen. A. Hudson, Minster Yard, York.

BRITISH MISSIONARY CONTRIBUTIONS.
 THE 25th annual summary of British contributions to Foreign Missions was compiled by the late Rev. Canon Scott Robertson, of the Dane John, Canterbury, and exhibits the amount collected in the United Kingdom by Missionary Societies. These amounts do not include balances brought forward, contributions from abroad, or sums derived from invested capital:—

Church of England Societies	£544,232
Unsectarian Societies, Bible, Tract, &c. ...	184,219
Nonconformist Societies in England	445,847
Scottish & Irish Presbyterian Societies ...	200,455
Societies of the Roman Catholic Church	12,912
Total for Foreign Missions in 1895 ..	£1,387,665
Total in 1893, £1,228,257—in 1894, £1,375,571.	

In *England*, from 1623 to 1850, Catholics were under Bishops, as Vicars-Apostolic, with first 1, then 4, and afterwards 8 Districts or Vicariates; in 1850 the Hierarchy was restored, by the erection of one Archiepiscopal and 12 Episcopal Sees, now increased to 14. In *Scotland*, Catholics were under Bishops, as Vicars Apostolic, from 1694 to 1878, with first 1, then 2, and afterwards 3 Districts or Vicariates; in 1878 the Hierarchy was restored, by the erection of 2 Archiepiscopal and 4 Episcopal Sees. In *Ireland*, the ancient Hierarchy has continued to this day. In *Wales*, there is now a Vicariate.— Besides the United Kingdom, Hierarchies are established in British America, India, and Australasia.

There are now in the British Empire 28 Archiepiscopal and 102 Episcopal Sees; and 29 Vicariates and 11 Prefectures Apostolic. Including 10 Coadjutors and 5 Bishops Auxiliary, the number of Archbishops and Bishops now holding office in the British Empire is 166, distributed as follows:—

ENGLAND AND WALES.

The Methodist Churches.

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revs. John and Charles Wesley. The most numerous and influential of them are—

Wesleyan Methodists, the original body founded in 1739 by these two brothers. While students at Oxford, in 1729, they gathered a number of young men together for purposes of study and devotion, who were nicknamed, first, "The Holy Club," and afterwards "The Methodists." In 1739 John Wesley founded the "Religious Societies," in which the first beginnings of Methodism are to be found. The number of members rapidly increased, until a more definite and extensive organisation than Wesley at first gave them was imperatively demanded. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. The Conference is now composed in its Representative Session of 240 ministers and 240 laymen with a ministerial president and secretary at its head, elected year by year; by semi-annual meetings of the ministers in each district, over which a chairman is appointed by the Conference; and by quarterly meeting of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. When Wesley died the number of members was 76,968, and since then the increase has been so great that above 18,000,000 people are now receiving Methodist instruction in various parts of the world. At Washington in October, 1891, it was reported that there were more than 30,000,000 Methodists, but this has been proved incorrect. *Pres. Rev. W. L. Watkinson, D.D.; Sec. Rev. M. Hartley*. Various distinct bodies of Methodists have been formed, the most important being—

1. *The Methodist New Connexion*, which was

formed in 1797 by the Rev. Alexander Kilham, the original difference between it and the parent body being the different degrees of power allowed to the laity.—*President, Rev. J. Innocent*.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne. Next to the Wesleyans they are the most numerous of all the denominations which have arisen out of the Methodist movement.—*President, Rev. W. Jones*.

3. *The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.—*President, Rev. A. Trengrove*.

4. *The United Methodist Free Churches*, which are an amalgamation of three different secessions—the Protestant Methodist, formed in 1828; the Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers; and the Wesleyan Reform Association, founded in 1849, during a great agitation in the Wesleyan societies. The union was effected in 1857. *President, Rev. R. Swallow, M.D.*

Finances.—The amount raised for sustentation by the Methodist bodies can only be approximately estimated. The Wesleyans raised in 1896-97 £128,858 to sustain their very extensive missionary operations. At the same time their Home missionary income was £36,000; £29,040 were expended on the education of ministers' children at the Connexional schools; £230,928 were contributed in Great Britain for chapel-building; and £8,500 for the training of candidates for the ministry, of whom there are 153 in the four theological colleges. By the *Methodist New Connexion* the following sums were raised: For chapel fund, £943; for missions, £6,006. *The Primitive Methodists* raised £25,834 for new chapels, and the *United Methodist Free Churches* £14,028 for their missions.

In the Middle Ages the term "University" could be applied to any organised body of men. There could thus be a "university" of persons engaged in any particular occupation. The term came, however, to be appropriated exclusively to bodies of persons engaged in the occupation of teaching and study. Such Universities or guilds of teachers and students, when they had attained some definite organisation, naturally secured the right of granting licences to teach. As time went on it became the custom to grant these licences not only to persons who actually wished to teach, but to all who demanded them and who fulfilled certain requirements, and thus they became what we now understand by the term "degrees."

The earlier Universities grew so imperceptibly from small beginnings, that it is impossible to say who were their founders or in what year they were founded. Bologna (the earliest) and Paris (the most important) first rose into notice in the twelfth century, Oxford and Cambridge in the thirteenth. The system of degrees and the names of the chief officers of the University were introduced into England, as well as into other countries, from Paris. The distinguishing characteristic of the Universities of Oxford and Cambridge undoubtedly is the existence of a number of separate corporations, or Colleges, of which the names are given below.

There have been and are Colleges at many Universities, but nowhere have they reached anything like the same influence and importance as at Oxford and Cambridge. The origin of the Colleges was due to benevolent persons who desired to relieve a certain number of poor scholars from some of the hardships of their life at the mediæval Universities, and in order to do this provided a building in which such scholars could live a common life, and also an endowment for their maintenance. University and Balliol Colleges at Oxford were established in a somewhat rudimentary form in the middle of the thirteenth century; but the establishment of Merton College at Oxford, in 1274, by Walter de Merton, was the real beginning of the English college system. In the foundation of Peterhouse, the first Cambridge college, ten years later, "the rule of Merton" was closely followed.

The early College consisted of a Head and scholars, endowed with board and lodging by means of the buildings and revenues provided by the founder. The scholars were divided into senior scholars engaged in giving instruction, and junior scholars engaged in receiving it; the senior scholars were each other's "fellows;" and gradually the term "Fellow" became appropriated to the senior or governing members of the College, while the term "Scholar" was restricted to the junior members. It was not till long after the establishment of Colleges that it became the custom for them to take in paying boarders—"commoners" at Oxford, "pensioners" at Cambridge. At first the class which corresponds to the commoners and pensioners of the present time continued to live (as the whole University did before the establishment of Colleges) in lodgings kept by townsmen or graduates. One of the old lodging-houses, or "Halls" kept by graduates still remains at Oxford; but under the regulations of the Commission of 1832, it will disappear on the next vacancy in the office of Principal. But a statute of the same year provided for the existence of Private Halls: of these there are present are three, with 45 undergraduates. Twenty years ago the pre-college era was to some

small extent restored by the admission of "non-collegiate students" to Oxford and Cambridge.

THE UNIVERSITY OF OXFORD at present numbers upwards of 12,000 members. Of these about 3,000 are in residence in Oxford; the remainder, with a few exceptions, have finished their academic course, taken a degree, and are scattered over the country following various professions. The resident members of the University consist of undergraduates going through a course of instruction and study, and of graduates giving instruction or engaged in research. The resident graduates are 400 or 500 in number, and the undergraduates in residence are about 2,500.

The government of the University is in the hands of three bodies:—1. Convocation, which consists of all Masters of Arts and Doctors of Civil Law, Medicine, or Divinity, who remain members of the University, whether resident or non-resident; 2. Congregation of the University, which consists of resident members of Convocation; 3. The Hebdomadal Council, which consists of certain officers and 18 members elected by Congregation. The Hebdomadal Council alone has the power of initiation; Congregation can amend, confirm, or reject its proposals; Convocation can only confirm or reject them; it may, however, amend certain proposals relating to money. The election of the University representatives in Parliament is vested in the members of Convocation. The Ancient House of Congregation, which must not be confounded with the Congregation of the University, has now nothing to do with legislation in any form, but confines itself to granting degrees and electing examiners. In order to "matriculate," or become a member of the University, it is necessary to be admitted into one of the Colleges or Halls, or into the body called Non-Collegiate Students. A candidate may be admitted into a College as a scholar, as an exhibitor, or as a commoner. Most of the scholarships are now open to competition for youths under 19, and are chiefly of the value of £30 per annum for (practically) four years. Some of the exhibitions are scarcely distinguishable in any important respect from open scholarships, but election to an exhibition is, as a rule, subject to the satisfaction of the electors that the candidate is in necessitous circumstances. Besides the open scholarships and exhibitions, there are still a few "close" ones confined to particular localities, or particular schools. To be admitted into a College as a commoner, or to become a member of a Hall, or a non-collegiate student, it is necessary to pass an examination held by the College or Hall, or by the delegates of non-collegiate students, or to have passed some test accepted in lieu of this examination. The degree of Bachelor of Arts, the ordinary University degree, cannot be obtained in less than 2 years and 8 months from matriculation, nor without residing in Oxford for twelve terms, which need not be continuous; there are 4 terms in each year. Members of the University who wish to proceed to a degree must first pass Responsions or one of the examinations accepted as equivalent. The path of undergraduates then divides: those aiming at Honours in Natural Science take the science preliminary, and then the final schools; to the rest three courses are open, (a) to read Pass Moderations and Pass Finals; (b) to read Pass Moderations (or, what is reckoned as the equivalent for the schools of Law and Modern History, the Law Prelim.), and one

of the final honour schools of Litt. Hum., Mathematics, Natural Science, Law, Modern History, Theology, Oriental Studies, and English Literature; (c) to read Honour Moderations in Classics or Mathematics, and any one of the above-mentioned Honour Schools or the Pass final School. After passing these examinations the under-graduate is entitled to take the degree of Bachelor of Arts (or Medicine). For a musical degree a special course is prescribed. For the higher degrees of Bachelor or Doctor in Civil Law, Medicine, and Divinity no more residence is necessary, but for the baccalaureate in Civil Law and Medicine there is an examination prescribed. For the degree of B.Litt. or B.Sc., a special course of study is prescribed by the statutes of the University; for the baccalaureate in Divinity a thesis is at present required. For the M.A. degree the only requirement is that the candidate should have taken the B.A. degree and had his name on the books for twenty-six terms since his matriculation. The bulk of the instruction at Oxford is given by the college tutors and lecturers under a system which allows members of one College to attend lectures given in another. The remainder of the instruction is given by the University Professors and Readers. The chief University institutions are the Bodleian Library, the second library in the Kingdom; and the Museum, which is furnished with all that is necessary for teaching natural science and medicine.

In 1880 a statute was passed by which "any College or Institution within the United Kingdom, or in any part of the British dominions, being a place of education in which the majority of the students are of the age of 17 at least, may, under certain conditions, be admitted to the privilege of affiliated Colleges." St. David's College, Lampeter, in 1880, University College, Nottingham, in 1882, and Firth College, Sheffield, in 1886; and in the British Colonies, Sydney and the Cape of Good Hope availed themselves of this in 1888, Calcutta and the Punjab in 1839, Bombay in 1890, Adelaide in 1891, Madras, Melbourne, Allahabad, and New Zealand in 1894, and Toronto in 1895.

In 1834 a statute was passed allowing the delegates of local examinations to use the several honour schools of the University for the purpose of the examination of women. Semerville College, Lady Margaret Hall, St. Hugh's Hall, and St. Hilda's Hall, are now established in Oxford for the higher education of women, and some of the members avail themselves of this statute, and are also admitted to the lectures of some of the University professors, and to certain of the College lectures.

The semi-official guide to the University is the "Student's Handbook to the University of Oxford."

THE UNIVERSITY OF CAMBRIDGE is an incorporation of students in all and every of the liberal arts and sciences. It consists of seventeen Colleges, one public, and one private, hostel, founded "for the study of learning and knowledge, and for the better service of Church and State." These are maintained by the endowments of their several founders and benefactors; each of them is a corporate body, and is bound by its own statutes, but is likewise controlled by the paramount laws of the University. A new Code of Statutes for the University was approved by the Queen in Council in 1882. In each of the Colleges there are eight separate orders: these are—(1) Head; (2) Fellows; (3) Noblemen graduates, doctors in the several faculties, bachelors of divinity, masters of arts and masters of law, who are not upon the foun-

dateion; (4) Bachelors of Arts, Physic, and Law; (5) Fellow-commoners; (6) Scholars; (7) Pensioners, forming the great bulk of the students; and (8) Sizar, students of narrow means, and in receipt of various emoluments. The head of each College has supreme disciplinary authority in educational matters; and he, together with the foundation fellows, or a council elected by them, form the governing body. The great legislative assembly of the University is called the Senate: it is composed of all those who have obtained the degree of Doctor or Master, and whose names are still on the register. There is a Council of the Senate (consisting of the Vice-Chancellor and sixteen members of the Senate, of whom eight vacate their office every second year, the office being held for two years), by whom every University "grace" or decree must be approved before it is offered to the Senate. A residence of nine terms is required from each student before taking the B.A. degree, and "honours" may be obtained in any of the following:—Mathematics, Classics, Moral Sciences, Natural Sciences, Mechanical Sciences, Law, History, Theology, Semitic, Indian, and Modern Languages. The University possesses a library of more than 200,000 printed volumes, besides MSS., the Fitzwilliam Museum, the Observatory, the Botanical Garden, the Museum of Biological and Physical Science, and the Divinity School. James I. granted to the University the privilege of sending two Members to Parliament, which it has ever since enjoyed. In 1865-67, the number of students who matriculated was 887, while the members on the boards amounted in 1897 to 13,079. The University has powers with regard to the admission of affiliated students similar to those possessed by the University of Oxford. Privileges of affiliation are also granted under certain conditions to students and local lecture centres. The following Colleges and Institutions have been admitted to the privileges of affiliation:—University College, Nottingham; Firth College, Sheffield; St. David's College, Lampeter; University College of Wales, Aberystwith; University of Adelaide; University of New Zealand; University of the Cape of Good Hope; St. Edmund's College, Old Hall, Ware; Universities of Calcutta, Allahabad, Bombay, Punjab, Toronto. The University also admits persons as Advanced Students. Each applicant must submit (1) a diploma or other certificate of graduation; (2) a statement as to the course or courses of (a) advanced study or (b) research which he desires to pursue, with such evidence of qualification, attainments, and previous study as he may be able to submit; (3) a certificate or declaration that he has attained the age of 21 years. When the application has been approved by the Special Board connected with the applicant's studies, he must be admitted a member of a College or a Non-Collegiate Student. An Advanced Student who has kept by residence at least six terms, and has obeyed the regulations as to examinations, &c., may proceed to the degree of B.A., as also may an Advanced Student who has obtained a certificate of research.

DUBLIN UNIVERSITY, which is, for most purposes, identical with Trinity College, Dublin, was incorporated by Royal Charter in 1591. Oxford and Cambridge recognise each other's degrees, and those granted by Dublin University, but no others. There are schools of Divinity, Law, Medicine and Surgery, and Engineering. It is represented in Parliament by two members.

SCOTLAND possesses four Universities, namely, those of St. Andrews, Aberdeen, Edinburgh, and Glasgow, and the general regulations as to graduation are common to all. THE UNIVERSITY OF EDINBURGH was founded in 1582 by a charter granted by James VI. of Scotland, and in 1621 the Scottish Parliament granted to it all the privileges enjoyed by other Universities in the kingdom. This grant was confirmed in the Treaty of Union between England and Scotland, and again in the Act of Security. The constitution was, however, modified by the Act (1858) relating to the Scottish Universities, and again by the Universities Act of 1889, with numerous ordinances issued by the Commissioners appointed under the latter Act. The University of Edinburgh is a Corporation consisting of a chancellor, rector, principal, 39 professors, and 100 lecturers, &c., 8,200 registered graduates, and about 3,000 matriculated students. The essential qualification for graduation at this, as at other Scottish Universities, is attendance at certain series of lectures or classes and passing of the required examinations. There are now six faculties in the University, viz., Arts, Science, Divinity, Law, Medicine, and Music. The University confers the following degrees after examination, viz.:—M.A., D.Litt., D.Phil., B.Sc. D.Sc., B.D., B.L., LL.B., M.B., Ch.B., M.D., Ch.M., Mus. Bz. and Mus. Doc. It also confers the honorary degrees of D.D., LL.D., and Mus. Doc. The buildings have been more than doubled in extent within the last 20 years, and the magnificent McEwan hall is now completed. The library contains about 200,000 volumes and 700 MSS., and there is also a theological library of 10,000 volumes. In the various faculties there are bursaries, prizes, scholarships, and fellowships, tenable from one to four years, and ranging in value from £10 to £160, their total value being upwards of £16,000 per annum.

THE UNIVERSITY OF ST. ANDREWS was founded by Henry Wardlaw, Bishop of the diocese, in 1411, and was confirmed by a Bull of Pope Benedict XIII. in 1413. During the 15th and 16th centuries three Colleges were established in connection with it, viz., St. Salvator (1450), St. Leonard (1512), and St. Mary (1537). All the Colleges had originally teachers both in philosophy (or arts) and in theology, but in 1579 the two older of them were confined to philosophy, and that of St. Mary to theology. In the year 1747, the Colleges of St. Leonard and St. Salvator were united by Act of Parliament. The Universities of Edinburgh and St. Andrews unite in sending a representative to Parliament.

THE UNIVERSITY OF GLASGOW was founded by a Bull of Pope Nicholas V. (1450-51), with the power of creating doctors and masters, and enrolling readers and students, the whole of whom were to enjoy the same rights and privileges as the University of Bologna. At first it had neither property nor endowment, but in 1460, James, Lord Hamilton, bequeathed to the then Regent and his successors a tenement in the High Street, with four acres of land adjoining, for the "use of the College of Arts." Between 1577—when a new charter was issued—and the Restoration, the University flourished in every way, but the re-establishment of episcopacy detached from it a large part of its revenues, and many of its professorships were abandoned. In 1864 the old buildings were sold for £100,000, and a Government grant of £120,000 was obtained; these amounts, together with public subscriptions and college funds, were laid out in the new buildings

now to be seen at the west end of the city. The University of Glasgow includes five faculties, viz., Arts, Theology, Law, Medicine, and Science: it was reconstituted and received further endowments under the Acts of 1838 and 1889. Conjointly with the University of Aberdeen, it sends one member to Parliament.

The present UNIVERSITY OF ABERDEEN derives its origin from two distinct foundations, viz., University and King's College of Aberdeen, founded in 1494 by William Elphinstone, Bishop of Aberdeen, under the authority of a Papal Bull; and Marischal College and University of Aberdeen, founded (1593) by George Keith, 5th Earl Marischal, under a charter afterwards ratified by Act of Parliament. In 1860, by another Act of Parliament, the two foundations were united and incorporated into one University and College, under the title of the University of Aberdeen. The five faculties are Arts, Science, Divinity, Law, and Medicine; and at the end of the Arts curriculum scholarships and prizes are given of the annual value of about £1,300. The University Library contains upwards of 100,000 volumes.

Of the modern Universities of the United Kingdom the most important is the UNIVERSITY OF LONDON, which was first incorporated by Royal Letters Patent dated November 28, 1836. The present Charter was issued in 1863; and a supplemental charter, opening all degrees to women, was granted in 1878. This University is simply an examining body which, by reason of its unquestionable integrity and its severely high standard, has gained an excellent reputation. The fees are moderate, ranging from £2 to £10. The various faculties are Arts, Science, Law, Medicine, and Music, and all faculties (except Medicine) are open to candidates irrespective of the place or manner of their education. The matriculation, the Pass examinations in Arts and some in Science, are held at a large number of provincial Colleges, while the matriculation B.A. and LL.B. examinations may be held at colonial centres. The corporate body of the University includes the Chancellor, Vice-Chancellor, fellows, and graduates. In 1895 the total number of candidates at all the examinations was 6,000.

The remaining modern Universities are DUBHAM, established by the Dean and Chapter of Durham under the authority of an Act of Parliament passed in 1831; the VICTORIA UNIVERSITY, which received a Royal Charter in 1880, and combines Owens College, Manchester, University College, Liverpool, and the Yorkshire College, Leeds; the ROYAL AND CATHOLIC UNIVERSITIES OF IRELAND; and the UNIVERSITY OF WALES.

Of late years much has been done in the way of extending University teaching and advantages. Both Oxford and Cambridge now hold what are called "Local" Examinations, senior and junior, in many parts of the country, and the certificates granted to the successful candidates are accepted as evidence of competency from an educational point of view. They have also organised "University Extension Lectures," which are given in all parts of the kingdom by arrangement with local committees, who apply for a course of lectures and guarantee the small expenses.

The University of London, too, has arranged a definite scheme, which is now in full working, for the inspection and examination of schools other than primary, conducted under the direction of the Senate.

Chancellor, Most Hon. the Marquess of Salisbury, K.G., D.C.L., *All Souls* 1869

Arabic, H. Anthony Salmoné.
Public Reading, Rev. C. R. Taylor, M.A.
Sanskrit and Persian, G. F. Nicoll, M.A.
Indian Jurisprudence, Almaric Rumsey.
Chinese, Robert K. Douglas.
French, V. Spiers, M.A. *Spanish*, R. Ramirez.
German, A. C. Buchheim, PH.D. *Italian*, N. Perini.
Vocal Music, J. E. Vernahm, H. Robinson.
Geometrical Drawing, E. J. Hulme; W. H. Webb.
Mechanical Engineering and Workshops, D. S. Capper, M.A.; H. M. Waynforth.

Metallurgy, A. K. Huntington; R. P. Davison.
Civil Engineering, H. Robinson, M.INST.C.E.
Electrical Engineering, J. Hopkinson, D.S.C.; E. Wilson.

Geography, H. G. Seeley, F.R.S.
Fine Art, A. E. Holden.

Commerce, James Gault.

PROFESSORS; Medical School.

Dean, Sir Hush Beever, M.D.
Anatomy, A. W. Hughes, M.B.; A. W. Cadman, M.B.
Aural Surgery, G. Fritchard, M.D.
Bacteriology, E. M. Crookshank, M.B.; G. Newman, M.D.

Botany, W. B. Bottomley, B.A.
Chemist, J. M. Thomson, F.R.S.; H. Jackson, F.I.C.
Ophthalmic Surgery, W. Rose, F.R.C.S.
Materia Medica, N. I. C. Tirard, M.D.
Medicine, Burney Yeo, M.D.

Medicine, Forensic, & Pub. Health, W. R. Smith, M.D.
do. Clinical, John Curnow, M.D.
Midwifery, W. Playfair, M.D.; T. C. Hayes, M.D.
Neuro-Pathology, D. Ferrier, M.D.; W. A. Turner, D.S.C.

Ophthalmology, M. M. McHardy, F.R.C.S.
Pathological Anatomy, N. Dalton, M.D.
Physiology, Dr. W. D. Halliburton, F.R.S.; P. T. B. Beale, F.R.C.S.; H. W. Lyle, M.B.
Surgery, W. W. Cheyne, F.R.C.S.

Dean, Civil Service Dept., W. Braginton.

University of Durham, 1831.

TERMS (1898).—*Epiphany*, Jan. 18 to March 21.
Easter, April 23 to June 21. *Mich.*, Oct. 11 to Dec. 13.

Governors, The Dean and Chapter of Durham.
Warden, Very Rev. the Dean of Durham.
Sub-Warden, Rev. A. Plummer, D.D.

PROFESSORS.

Divinity & Eccles. Hist., Rev. A. S. Farrar, D.D.
Greek and Classical Lit., Rev. H. Kynaston, D.D.
Mathematics, E. A. Sampson, M.A.
Hebrew, Ven. H. W. Watkins, D.D.
Medicine, G. H. Phillipson, M.D.
Surgery, W. C. Arnison, M.D.
Physiology, T. Oliver, M.D.
Anatomy, R. Howden, M.B.
Comparative Pathology, G. R. Murray, M.B.
Music, P. Armes, M.US.D.
Tutors, Rev. A. Plummer, D.D.; F. B. Jevons, D.LITT.; Rev. H. A. White, M.A.
Registrar, W. K. Hilton, M.A.

(*Affiliated Colleges*—Coddington, Barbados; Fourah Bay, Sierra Leone.)

UNIVERSITY COLLEGE.

Master, Rev. A. Plummer, D.D.

HATFIELD HALL.

Principal, F. B. JEVONS, D.LITT.

COLLEGE OF MEDICINE.

Newcastle, 1832.

Anatomy, R. Howden, M.B. (*Secretary*).
Medicine, G. H. Phillipson, M.D. (*President*).
Surgery, W. C. Arnison, M.D.; F. Page, M.D.
Biology, M. C. Potter, M.A.
Chemistry, P. P. Bedson, D.S.C.
Public Health, H. E. Armstrong, D.HY.
Midwifery, and Diseases of Women and Children, T. C. Nesham, M.D.
Medical Jurisprudence, J. Murphy, M.D.
Materia Medica & Therapeutics, S. McBean, M.D.
Pathology, D. Drummond, M.A., M.D.
Comparative do. and Bacteriology, G. B. Murray, M.A.
Operative Surg., W. C. Arnison, M.D.; F. Page, M.D.

Physiology and Practical Physiology, T. Oliver, M.D.; G. E. Williamson, F.R.C.S.
Do., Physics and Chemistry, R. A. Bolam, M.D.
Psychological Medicine, T. W. McDowall, M.D.
Physics, H. Stroud, D.S.C.
Natural History, G. S. Brady, LL.D.

DURHAM COLLEGE OF SCIENCE,
 Newcastle, 1871.

Principal, H. P. Gurney, D.C.L.
Mathematics, The Principal; C. M. Jessop, M.A.; G. W. Caunt, B.A.; J. W. Bullerwell, B.S.C.
Physics, H. Stroud, D.S.C.; R. J. Patterson, M.S.C.; J. E. Myers, Ph.D.

Chemistry, P. P. Bedson, D.S.C.; S. Shaw, M.S.C.; R. G. Smith, B.S.C.; S. C. Garrett, M.S.C.
Geology, G. A. Lebour, M.A.
Crystallography & Mineralogy, The Principal; M. Fletcher, M.A.

Natural History, G. S. Brady, LL.D., F.R.S.
Mining, Henry Louis, M.A.
Classics and Literature, J. W. Duff, M.A.
Agriculture, W. Somerville, D.S.C.; F. O. Solomon, F.H.A.S.

Veterinary Anatomy, A. Meek, M.S.C.
Engineering and Naval Architecture, R. L. Weighton, M.A.; R. M. Ferrier, M.S.C.; T. H. Watson.
Botany, M. C. Potter, M.A.

Metallurgy and Assaying, S. Shaw, M.S.C.
Modern Languages, A. G. Latham, M.A.
Logic and Philosophy, W. E. Urwick, M.A.
Normal Education, M. R. Wright, M.A.; M. I. Spivey.
History, C. S. Terry, M.A.

Law, H. B. Mundahl, B.A.
School of Art, R. G. Hatton; G. Rushton; R. Bullock.
Secretary, H. F. Stockdale.

The Victoria University.

Manchester, 1880.

TERMS (1897).—*Mich.*, Oct. 5 to Dec. 22.
 (1898).—*Lent*, Jan. 11 to March 29.
Easter, April 19 to July 2.

Chancellor, Earl Spencer, K.G., LL.D.
Vice-Chancellor, N. Bodington, M.A.
Treasurer, Alfred Neild.
Registrar, Alfred Hughes, M.A.
Chairm. of Board of Studies, Arthur Schuster, F.R.S.
Deputy Chairman, T. F. Tout, M.A.
Chairman of Convocation, A. Smithells, B.S.C.
Clerk of Convocation, A. H. Worthington, B.A.

COLLEGES OF THE UNIVERSITY—Owens College, Manchester; University College, Liverpool; Yorkshire College, Leeds.

OWENS COLLEGE, Manchester. 1851.

President, The Duke of Devonshire, K.G., LL.D.
Principal, A. W. Ward, LITT.D.
Registrar, Sydney Chaffers.

PROFESSORS, &c.

I.—Arts, Science, and Law Department.
Greek & Comp. Phil., J. Strachan, M.A.
Latin & Greek Test., A. S. Wilkins, LL.D.
English Language, T. N. Toller, M.A.
English Literature, Oliver Elton, B.A.
Hebrew and Arabic, Rev. L. M. Simmons, LL.B.
French, Victor Kastner, B.-ès-L.
German, Arwid Johannson, M.A.
History, T. F. Tout, M.A.; A. W. Ward, LITT.D.
Ancient History, James Tait, M.A.
Logic & Moral Philosophy, S. Alexander, M.A.
Political Economy, A. W. Flux, M.A.
Law, W. A. Copinger, LL.D.; J. S. Seaton, M.A.; T. F. Byrne, B.A.; Alexander Grant, B.O.L.
Mathematics, Horace Lamb, M.A., F.R.S.

Physics, A. Schuster, Ph.D., F.R.S.; T. H. Core, M.A.
Engineering, O. Reynolds, LL.D., F.R.S.
Chemistry & Metallurgy, H. B. Dixon, M.A., F.R.S.
Organic Chemistry, W. H. Perkin, Ph.D., F.R.S.
Mineralogy, C. A. Burghardt, Ph.D.
Zoology, S. J. Hickson, D.Sc., F.R.S.
Botany, F. E. Weiss, B.Sc.
Geology, W. B. Dawkins, M.A., F.R.S.
Physiology, W. Stirling, M.D.
Harmony and Musical Comp., Henry Hiles, Mus.D.
DAY TRAINING COLLEGE (for Men and Women).
Master of Method, W. T. Goode, M.A.
Mistress of Method, Miss C. I. Dodd.

II.—Medical Department.

Anatomy, A. H. Young, M.B., F.R.C.S., Dean.
Physiology, W. Stirling, M.D., D.Sc.
Biology and Zoology, S. J. Hickson, D.Sc., F.R.S.
Chemistry, H. B. Dixon, F.R.S.
Organic Chemistry, W. H. Perkin, Ph.D., F.R.S.
Botany, F. E. Weiss, B.Sc.
Medicine, J. Dreschfeld, M.D.
Clinical Medicine, D. J. Leech, M.D.; J. Dreschfeld, M.D.; Graham Steell, M.D.
Surgery (Systematic), T. Jones, F.R.C.S.
 " (Clinical), W. Whitehead, F.R.C.S.M.
 " (Practical), G. A. Wright, F.R.C.S.
 " (Operative), F. A. Southam, F.R.C.S.
Pathology, A. Sheridan Delapine, M.B.
Obstetrics, W. J. Sinclair, M.D.
Clinical Obstetrics, D. Lloyd Roberts, M.D.
Diseases of Children, Henry Ashby, M.D.
Mental Diseases, G. W. Mould, M.B.C.S.
Materia Medica and Pharmacy, D. J. Leech, M.D.
Pharmacognosy, Wm. Kirkby.
Medical Jurispr., J. Dixon Mann, M.D.
Public Health, C. E. Paget, M.B.C.S.
Ophthalmology, David Little, M.D.
Clinical Ophthalmology, D. Little, M.D.; C. E. Glascock, M.D.
Skin Diseases, H. A. G. Brooke, M.B.
Diseases of Heart, G. Steell, M.D.
Diseases of Ear, W. Milligan, M.D.
Diseases of Larynx, A. Hodgkinson, M.B.
Diseases of Respiratory Organs, Thomas Harris, M.D.
Dental Surgery, G. G. Campion, L.D.S.
 " *Anat. & Phys.*, W. A. Hooton, L.D.S.
 " *Mechanics*, T. Tanner, L.D.S.
 " *Metallurgy*, C. A. Burghardt, Ph.D.
Practical Operative Dentistry, G. O. Whittaker, L.D.S.
Dental Histology, David Headridge, L.D.S.

III.—Department for Women.

(29A Dover Street.)

The Professors and Lecturers of the College.
Tutor, Miss Edith C. Wilson
Assistant *do.*, Miss Alice M. Cooke, M.A.

IV.—Department of Evening Classes.

The Professors and Lecturers of the College, and some additional Lecturers.

LEEDS—THE YORKSHIRE COLLEGE. 1874.

President, The Marquess of Ripon, K.G.
Principal, N. Bodington, Litt.D.
Dean of Dept. of Medicine, T. Scattergood, M.B.C.S.
Registrar and Secretary, W. F. Husband, LL.B.

Department of Science, Technology and Arts.

PROFESSORS.

Mathematics, L. J. Rogers, M.A.
Physics, W. Stroud, D.Sc.
Chemistry, Arthur Smithells, B.Sc.
Geology, P. F. Kendall, F.G.S.
Coal Mining, Arnold Lupton, M.I.C.E.
Biology, L. C. Miall, F.R.S.
Engineering, John Goodman, M.I.M.E.
Greek, N. Bodington, Litt.D.

Latin & Ancient History, B. M. Connal, M.A.
Philosophy, C. M. Gillespie, M.A.
French, P. H. M. du Gillon.
Teutonic Lang. and Lit., A. W. Schüddekopf, Ph.D.
Hebrew, Joseph Strauss, Ph.D.
Textile Industries, Roberts Beaumont.
Dyeing, J. J. Hummel, F.I.C.
Education, J. W. Hutton, M.A.; Miss J. A. Emmerson
Fine Arts, F. Suddards.
Leather Industries, H. R. Procter, F.I.C.
Agriculture, James Clark, Ph.D.
Sanitary Engineering, W. Spinks, M.I.C.E.
 And thirty others.

Medical Department.

Medicine, J. E. Eddison, M.D.; T. Churton, M.D.
Surgery, A. W. Mayo Robson, F.R.C.S.
Practical Surgery, E. Ward, M.B.
Descript. & Appl. Anat., T. Wardrop Griffith, M.D.
Osteology, Edmund Robinson, M.B.C.S.
Physiology and Histology, De Burgh Birch, M.D.
Pathology and Morb. Hist., E. F. Trevelyan, M.D.
Midwifery, Charles J. Wright, M.B.C.S.
Diseases Women and Children, J. B. Hellier, M.D.
Forensic Medicine, Thomas Scattergood, M.B.C.S.
 C. M. Chadwick, M.D.
Materia Med., Pharm., Therap., A. G. Barrs, M.D.
Operative Surgery, E. Ward, M.B.
Ophthalmology, H. Secker Walker, F.R.C.S.
Mental Diseases, W. Bevan Lewis, L.R.C.P.
Public Health, R. N. Hartley, M.B.
Practical Pharmacy, F. W. Branson, F.I.C.
 And seven others.

LIVERPOOL—UNIVERSITY COLLEGE. 1881.

President, Rt. Hon. the Earl of Derby, K.G.
Principal, Gerald Henry Rendall, D.Litt.
Dean of the Medical Faculty, A. M. Paterson, M.D.
Registrar, Chevalier E. Londini, D.C.L.

PROFESSORS.

Greek, G. H. Rendall, M.A.
Latin, Herbert A. Strong, LL.D.
French, V. A. Friedel, Ph.D.
German, Kuno Meyer, Ph.D.
Italian, Eugenio Londini, D.C.L.
Modern Literature, Walter Alex. Raleigh, M.A.
History, J. M. Mackay, M.A.
Philosophy, John MacCunn, LL.D.
Political Economy, E. C. K. Gonner, M.A.
Mathematics, F. S. Carey, M.A.
Physics, Prof. O. J. Lodge, D.Sc., F.R.S.
Engineering, H. S. Hele Shaw, M.Inst.C.E.
Law, J. H. Emmott, LL.D.
Architecture, F. M. Simpson.
Chemistry, James Campbell Brown, D.Sc.
Natural History, William A. Herdman, D.Sc., F.R.S.
Botany, R. J. Harvey Gibson, M.A.

Medical Department.

Medicine, T. Robinson Glynn, M.D.
Surgery, Rushton Parker, F.R.C.S.
Anatomy, A. Melville Paterson, M.D. (Dean).
Pathology, Robert Boyce, M.B.
Physiology, C. S. Sherrington, F.R.S.
Ophthalmology, Edgar A. Browne, F.R.C.S.
Midwifery and Gynecology, J. Wallace, M.D.
Clinical Medicine, T. R. Glynn, M.D.; J. Barr, M.D.; Richard Caton, M.D.; W. Carter, M.D.
Clinical Surgery, Rushton Parker, F.R.C.S.; F. T. Paul, F.R.C.S.; W. Mitchell Banks, F.R.C.S.
Diseases of Children, P. Davidson, M.B.
Materia Medica, W. Carter, LL.B., M.D.
Medical Jurisprudence, F. T. Paul, F.R.C.S.
Mental Diseases, J. W. Wiglesworth, M.D.
Hygiene, E. W. Hope, M.D.

GRESHAM COLLEGE, Basinghall St., E.C.

LECTURERS.

Physic, Symes Thompson, M.D.
Rhetoric, J. E. Nixon, M.A.
Divinity, Rev. Henry E. J. Bevan, M.A.
Astronomy, Rev. E. Ledger, M.A.
Law, George Holmes Blakesley, M.A.
Geometry, W. H. Wagstaff, M.A.
Music, Sir J. Frederick Bridge, MUS.D.
Work to the Joint Gresham Committee, Mercers'
 Hall, London, E.C., John Watney.

Provincial Colleges.

BIRMINGHAM—MASON UNIVERSITY COLLEGE 1875.

President of Council, Alderman F. C. Clayton, J.P.
Principal, R. S. Heath, D.Sc.

Faculties of Arts and Science.

Mathematics, The Principal.

Physics, J. H. Poynting, D.Sc., F.R.S.
Chemistry, P. F. Frankland, PH.D., F.R.S.
Metallurgy (vacant).
Zoology, T. W. Bridge, D.Sc.
Botany, W. Hillhouse, M.A.
Physiology, Frank James Allen, M.D.
Geology & Physiography, C. Lapworth, LL.D., F.R.S.
Civil & Mech. Engineering, F. W. Burstall, M.A.
Greek and Latin, E. A. Sonnenschein, M.A.
English Lang. and Lit., W. Macneile Dixon, LITT.D.
Mental and Moral Philosophy, and Political Economy,
 J. H. Muirhead, M.A.
French and Italian, Clovis Bévenot, M.A.
German, G. Fiedler, PH.D.

Queen's Faculty of Medicine.

Dean, B. C. A. Windle, M.D.
Sub-Dean, G. Barling, F.R.C.S.
Medicine (vacant); R. Saundry, M.D.
Surgery, Bennett May, F.R.C.S.; Gilbert Barling,
 F.R.C.S.
Anatomy, B. C. A. Windle, D.Sc.
Physiology, F. J. Allen, M.D.
Chemistry, P. F. Frankland, PH.D., F.R.S.
Physics, J. H. POYNTING, D.Sc., F.R.S.
Elementary Biology, T. W. BRIDGE, SC.D.
Therapeutics, A. H. Carter, M.D.
Forensic Medicine, Robert M. Simon, M.D.
Hygiene and Public Health, A. Bostock Hill, M.D.
Midwifery, Edward Malins, M.D.
Gynecology, Thos. Savage, F.R.C.S., F.R.S., ED.
Pathology, O. J. Kauffmann, M.D.
Lunacy and Mental Diseases, E. B. Whitcomb, M.R.C.S.
Operative Surgery, Jordan Lloyd, F.R.C.S.
Ophthalmology, Priestley Smith, M.R.C.S.
Dental Department, J. Humphreys, L.D.S.I. Hon. Sec.
Day Training Dept. (men), C. O. Tunstall, B.A.
 ,, (women), Miss Joyce.

Librarian, W. H. Cope.

Secretary and Registrar, G. H. Morley.

BRISTOL—UNIVERSITY COLLEGE. 1876.

President, The Lord Bishop of Hereford.
Principal, C. Lloyd Morgan, F.C.S.
Secretary, James Rafter.

Arts and Sciences.

Chemistry, S. Young, D.Sc.; F. E. Francis, PH.D.;
 D. H. Jackson, PH.D.
Mathematics, F. R. Barrell, M.A.
Experimental Physiology, A. P. Chattock; L. N.
 Tyack; J. D. Fry.
Engineering, J. Ryan, D.Sc.; W. M. Thornton, B.Sc.;
 W. Osborne; G. D. Harding.

Geology and Zoology, C. Lloyd Morgan, F.C.S.;
 S. H. Reynolds, M.A.; G. Brebner.
Botany, G. Brebner; S. H. Reynolds, M.A.
Mod. Hist. & Eng. Lit., J. Rowley, M.A.; C. Ord, M.A.
International Law, Sir C. M. Kennedy, K.C.M.G.
Greek & Latin, R. Fanshawe, M.A.; F. Brooks, M.A.
Hebrew, Rev. J. Polack, B.A.
French, C. le V. Hastings, B.A.; A. d'Oursy, B.A.
German, C. Ord, M.A.—*Italian*, Signorina Gualtieri.
Harmony, &c., C. Bucknall, MUS.B.
Orient. Lang. and Lit., E. Sibree, M.A.
Librarian, J. Rowley, M.A.

Medicine.

Dean, E. M. Skerrett, M.D. (with 30 Professors, &c.).
Librarian, L. M. Griffiths, M.R.C.S.
Day Training Coll. for Women (*Mistress of Method*)
 Miss M. F. Pease.

NEWCASTLE-ON-TYNE—RUTHERFORD COLLEGE. 1878.

Principal, A. M. Ellis.
Mathematics & Physics, R. H. Jude, D.Sc.
Applied Mathematics, &c., C. H. Innes, M.A.
Chemistry & Metallurgy, Geo. Smith, B.Sc.
Geology, J. Middleton, B.Sc.
Mining, F. C. Swallow, M.E.
Building Construction, D. Campbell.
Classics & English, J. Greenfield, C. Menmuir, M.A.
School of Art, Jos. Moore. *Sec.*, H. Crawford Smith.

NOTTINGHAM—UNIVERSITY COLL. 1880.

Principal, Rev. J. E. Symes, M.A.
History, Lit., and Pol. Econ., J. E. Symes, M.A.
Latin, Greek, and Philosophy, F. S. Granger, LITT.D.
Anglo S. Middle Eng. & Spanish, F. E. Bumby.
German and Italian, Herr Freund.
French, E. Weekley, M.A.
Elocution, Miss M. Anderson.
Chemistry and Metallurgy, Frank Clowes, D.Sc.
Natural Sciences, J. W. Carr, M.A.
Mathematics & Physics, W. H. Heaton, M.A.
Engineering, William Robinson, M.E.
Agriculture, M. J. R. Dunstan, M.A., F.R.S.E.
Mining, Charles Latham, M.E.
Secretary, P. H. Stevenson, F.S.A.

DAY TRAINING DEPARTMENT.

Principal, Rev. J. E. Symes, M.A.
Normal Master, A. Henderson, B.A.
Normal Mistress, Miss Bird, LL.A.

SHEFFIELD—UNIVERSITY COLLEGE.

(INCORPORATED 1897.)

Principal, W. M. Hicks, D.Sc.
Registrar, Ensor Drury.

PROFESSORS.

Mathematics, A. H. Leahy, M.A.
Physics, The Principal.
Chemistry, W. C. Williams, B.Sc.
Latin and Greek, W. C. F. Anderson, M.A.
History, H. W. Appleton, M.A.
English Lang. and Lit., G. C. Moore Smith, M.A.
Biology, A. Denny, F.L.S.

Technical Department.

Civil and Mech. Engineering, W. Ripper, M.INST.C.E.
Mining do., F. W. Hardwick, M.A.
Metallurgy, J. O. Arnold.

Medical Department.

Anatomy, C. Addison, F.R.C.S.
Physiology, Practical Physiology, and Histology,
 Arthur J. Hall, M.B.

Medicine, W. Dyson, M.D.
Practical do., W. T. Cocking, M.D.
 Surgery, R. J. Fye Smith, F.R.C.S.
 Pathology, Duncan Bargees, M.B.
Practical Bacteriology, Andrew Walker, M.D.
Diseases of Women, J. H. Keeling, M.D.
Materia Medica, &c., W. T. Cocking, M.D.
Ophthalmology, Simeon Snell, F.R.C.S.E.
 Public Health, John Robertson, M.D.

SOUTHAMPTON—HARTLEY COLLEGE.

Physics, R. Wallace Stewart, D.Sc. (*Principal*).
Biology & Geology, E. T. Mellor, B.Sc.
 Chemistry, D. R. Boyd, Ph.D.
Classics & English Lit., W. F. Masom, M.A.
 Engineering, J. Eustice, A.B.S.M.
French and German, E. du Bois, Ph.D.
Fine Art, C. Tatterhall Dodd (*Principal*).
Mathematics, C. E. Cullis, Ph.D.
Modelling and Wood Carving, E. Crompton.
Normal Subjects, C. E. Chapple.
 Clerk, D. Kiddle.

The University of Wales, 1893.

"PRIFYSGOL CYMRU."

Chancellor, H.R.H. The Prince of Wales, K.G.
 Vice-Chancellor, Principal T. F. Roberts, M.A.
 Registrar, Ivor James.
 Temporary Offices, Townhall Chambers, Newport,
 Monmouth.

ABERYSTWYTH—

UNIVERSITY COLLEGE OF WALES (1872).

Principal & Professor of Greek, T. F. Roberts, M.A.
 Assistant Professor, J. W. Marshall, M.A.
Latin & Comparative Philology, J. M. Angus, M.A.
Oriental, German, & Italian Languages, H. Ethé, Ph.D.
English Lang. and Lit., C. H. Herford, Litt.D.
History and Pol. Econ., Edward Edwards, M.A.
Math., Nat. Philos., & Astron., R. W. Genese, M.A.
Logic and Philosophy, J. Brough, LL.D.
Chemistry, H. Lloyd Snape, D.Sc.
 Physics, D. M. Lewis, M.A.
Biology and Geology, J. B. A. Davis, B.A.
 Botany, J. H. Salter, D.Sc.
 Welsh, Edward Anwyl, M.A.
 French, W. Borsdorf, Ph.D.
 Agriculture, T. Parry; T. H. Middleton, B.Sc., M.A.
 Agricultural Chemistry, J. Alan Murray, B.Sc.
 Education, Foster Watson, M.A.
 Registrar, T. Mortimer Green.
 Librarian, E. P. Jones, M.A.

HALL OF RESIDENCE FOR WOMEN.—*Lady Principal*, Miss E. A. Carpenter.

BANGOR—

UNIVERSITY COLLEGE OF NORTH WALES (1884).

Principal, Henry R. Reichel, M.A. (*Prof., History*).
 Greek, W. Rhys Roberts, M.A.
 Latin, Edward V. Arnold, M.A.
French & German, Frederic Spencer, M.A.
English Language & Literature, W. L. Jones, M.A.
Logic and Philosophy, James Gibson, M.A.
 Mathematics, G. H. Bryan, Sc.D., F.R.S.
 Physics, Andrew Gray, M.A., F.R.S.E.
Chemistry and Geology, James J. Dobbie, D.Sc.
 Botany, R. W. Phillips, M.A. *Welsh*, J. M. Jones, M.A.
 Agriculture, T. Winter, M.A.
 Education, J. A. Green, B.A.
 Zoology, Philip J. White, M.B.
 Secretary and Registrar, J. E. Lloyd, M.A.

WOMEN'S HOSTEL.—*Principal*, Miss Mary Maude.

CARDIFF—

UNIVERSITY COLLEGE OF SOUTH WALES AND
 MONMOUTHSHIRE (1883).

Principal, J. Viriamu Jones, M.A., F.R.S.
 Greek, G. C. Richards, M.A.
 Latin, R. S. Conway, M.A.
Logic and Philosophy, J. S. Mackenzie, M.A.
English Lang. & Literature, C. E. Vaughan, M.A.
Eng. History & Pol. Econ., A. G. Little, M.A.
Mathematics and Astron., H. W. Lloyd Tanner, M.A.
 Physics, The Principal and A. L. Selby, M.A.
 Chemistry, C. M. Thompson, D.Sc.
 Metallurgy, A. A. Read, F.I.C.
 Engineering, A. C. Elliott, D.Sc.
Biology, W. N. Parker, Ph.D. *Celtic*, T. Powel, M.A.
 Mining, W. Galloway, M.E.
Geography & Geology, W. S. Boulton, F.G.S.
French Language & Literature, P. Barbier.
 German *do.*, F. Arnold, M.A.
 Hebrew, Rev. D. T. Evans, M.A. *Bot.*, A. H. Trow, B.Sc.
 Music, J. L. Parry, Mus.D.
 Anatomy, A. F. Dixon, M.B.
 Physiology, J. B. Haycraft, M.D.
Master of Method, Normal Dept., T. Raymont, M.A.
 Registrar and Sec., J. Austin Jenkins, B.A.

ABERDARE HALL.—*Principal*, Miss Hurlbutt.
LAMPETER—ST. DAVID'S COLLEGE. 1828.
Principal and Professor of Greek and Theology,
 Rev. G. W. Gent, M.A.
 Hebrew and Theology, Rev. E. T. Green, M.A.
 Mathemat. and Physical Science, A. W. Scott, M.A.
 Latin, Rev. G. W. Wade, M.A.
 English Literature and Logic, H. Walker, M.A.
 Welsh and History, Rev. R. Williams, M.A.

[Lampeter possesses the exceptional privilege of conferring degrees, B.A. and B.D., and has been affiliated to Oxford and Cambridge.]

SCOTLAND.

University of St. Andrews, 1411
 (£10,800).

Chancellor, Duke of Argyll, K.G., K.T., LL.D.
 Vice-Chancellor, Principal Donaldson, LL.D.
 Rector, Marquess of Bute, K.T., LL.D.
 Principal, James Donaldson, LL.D.
 Dean of Faculty of Medicine, Professor Pettigrew.
 Dean of Fac. of Theology, Principal Stewart, D.D.
 Dean of Faculty of Arts, Professor Lang.
 Representative in Parliament, Sir William Overend
 Priestley, LL.D.

Librarian, Registrar & Sec., J. M. Anderson.

UNITED COLLEGE OF ST. SALVATOR AND
 ST. LEONARD.

Principal, James Donaldson, LL.D.£900
 PROFESSORS.
 Humanity, Rev. Alexander Roberts, D.D.£690
 Logic & Metaphysics, D. G. Ritchie, M.A. 598
 Greek, John Burnet, M.A. 690
 Mathematics, P. B. Scott Lang, M.A. 690
 Moral Philosophy, Wm. A. Knight, LL.D. 598
 Nat. Philosophy, Arthur Stanley Butler, M.A. 690
 Natural History, W. C. McIntosh, M.D. 598
 Medicine, J. Bell Pettigrew, M.D. 574
 Chemistry, Thos. Purdie, B.Sc. 598
 Education, John M. D. Meiklejohn, M.A. 507
 Clerk and Factor, Stuart Grace.

COLLEGE OF ST. MARY.

Principal, Very Rev. Alexander Stewart, D.D.

PROFESSORS.

Primarius Prof. of Divinity, The Principal ...£643
 Biblical Criticism, Rev. Allan Menzies, D.D. ... 552
 Ecclesiastical History, Rev. John Herkless ... 552
 Oriental Languages, Rev. John Birrell, D.D. ... 538
 Secretary and Factor, Stuart Grace.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss Louisa Innes Lumsden.

Students in 1896-97, 222. Winter Session commences 1st week of Oct., and ends 3rd week of March. Summer Session, and week of April to 4th week of June.

University of Glasgow, 1450 (£10,432).

Chancellor, Earl of Stair, &c.

Vice-Chancellor, The Principal.

Rector, Rt. Hon. Joseph Chamberlain, M.P., 1896.

Principal, Very Rev. John Caird, D.D., £1,100

Represent. in Parl., James A. Campbell, LL.D.

PROFESSORS.

Humanity, George G. Ramsay, LL.D.	£1,430
Greek, George G. A. Murray, M.A.	1,350
Civil Eng. & Mech., Archibald Barr, D.Sc.	900
Logic and Rhetoric, Robert Adamson, LL.D.	800
Moral Philosophy, Henry Jones, LL.D.	800
Natural Philosophy, Lord Kelvin, G.C.V.O.	*1,252
Mathematics, William Jack, LL.D.	*1,440
English Lang. & Lit., A. C. Bradley, M.A.	900
History, Richard Lodge, M.A.	*900
Astronomy, Ludwig Becker, Ph.D.	600
Naval Architecture, J. Harvard Biles	800
Divinity, William Hastie, D.D.	*596
Church History, Robert H. Story, D.D.	*483
Biblical Criticism, William Stewart, D.D.	669
Hebrew & Semitic Lang., Jas. Robertson, D.D.	*700
Law, Alexander Moody Stuart, LL.D.	800
Conveyancing, James Moir	600
Materia Medica, Ralph Stockman, M.D., F.R.S.	780
Chemistry, John Ferguson, LL.D.	1,300
Surgery, William Macewen, M.D., F.R.S.	800
Prac. of Med., W. T. Gairdner, M.D., F.R.S.	*800
Midwifery, Murdoch Cameron, M.D.	700
Anatomy, John Cleland, M.D., F.R.S.	*1,645
Natural History, John Young, M.D.	806
Botany, Frederick O. Bower, D.Sc., F.R.S.	830
Physiology, J. G. Kendrick, M.D., F.R.S.	1,100
Forensic Medicine, Pierce A. Simpson, M.D.	600
Clinical Surgery, Geo. Buchanan, M.D.	320
Clinical Medicine, T. McCall Anderson, M.D.	432
Pathology, Joseph Coats, M.D.	1,100
Clerk of Senatus, Professor W. Stewart, D.D.	
Assistant do., W. Innes Addison.	
Keeper of Hunterian Mus., Prof. Young, M.D.	
Curator of the Library, Prof. Dickson, D.D.	
Librarian, James Lymburn.	
Registrar of Gen. Council, Jas. Coutts, M.A.	
Clerk to Gen. Council, Archibald Craig, LL.B.	
Sec. to Univ. Court, A. E. Clapperton, B.L.	

QUEEN MARGARET COLLEGE, GLASGOW.

Women's Department of University.

Hon. Sec., Miss Galloway.

Women are now admitted to degrees in Arts, Science, and Medicine in the University of Glasgow on the same conditions as men; and courses for their instruction are conducted partly by Professors and Lecturers appointed by the University.

University of Aberdeen, 1494.

Chancellor, Duke of Richmond and Gordon, K.G. 1861

Rector, Marquess of Huntly, 1896

Vice-Chancellor and Principal, Sir William Duguid

Geddes, LL.D., £800

Representative in Parliament, J. A. Campbell, LL.D.

Registrar and Sec. of Univ. Court, R. Walker, M.A.

Secretary of the Senatus, Donaldson R. Thom, M.A.

Librarian, P. J. Anderson, M.A.

PROFESSOR.

Greek, John Harrower, M.A.	£770
Humanity, Wm. M. Ramsay, D.O.L.	*775
English, H. J. C. Grierson, M.A.	606
Logic & Metaphysics, Rev. W. L. Davidson, LL.D.	627
Mathematics, Rev. G. Pirie, LL.D.	*725
Moral Philosophy, W. Ritchie Sorley, M.A.	627
Natural Philosophy, Charles Niven, M.A., F.R.S.	912
Systematic Theol., Rev. W. P. Paterson, D.D.	*387
Church History, Rev. Henry Cowan, D.D.	*475
Biblical Criticism, Rev. David Johnston, D.D.	*475
Heb. & Sem. Lang., Rev. James Gilroy, B.D.	537
Law, John Dove Wilson, LL.D.	537
Physiology, John Alex. McWilliam, M.D.	1806
Medicine, David White Finlay, M.D.	537
Chemistry, Eras. R. Japp, LL.D., F.R.S.	1806
Anatomy, Robert William Reid, M.D.	*1,300
Surgery, Alexander Ogston, C.M.	600
Materia Medica, John Theod. Cash, M.D., F.R.S.	627
Midwifery, William Stephenson, M.D.	537
Forensic Medicine, Matthew Hay, M.D.	537
Botany, James W. H. Trail, M.D., F.R.S.	1825
Pathology, D. J. Hamilton, M.D., F.R.C.S.E.	1806
Natural History, H. A. Nicholson, M.A.	1977

University of Edinburgh, 1582.

(£15,222.)

Chancellor, Rt. Hon. Arthur J. Balfour, M.P., D.C.L.

Rector, Rt. Hon. Lord Balfour of Burleigh, LL.D.

Vice-Chancellor and Principal, Sir William Muir,

K.C.S.T., D.C.L.

Representative in Parliament, Sir William Overend

Priestley, LL.D.

Sec. of Univ. Court, Rev. Professor Taylor, D.D.

Secretary of Senatus, Sir J. L. Grant, Bart., B.A.

Clerk to the Senatus and Secretary and Registrar of

the General Council, Thomas Gilbert.

Librarian, Hugh A. Webster.

PROFESSORS.

Humanity, W. R. Hardie, M.A.	£1,100
Greek, Samuel Henry Butcher, LL.D.	1,176
Mathematics, George Chrystal, LL.D.	1,270
Logic & Metaphysics, Andrew Seth, LL.D.	900
Moral Philos., Henry Calderwood, LL.D.	780
Natural Philos., Peter Guthrie Tait, D.Sc.	1,028
Rhetoric & Eng. Lit., Geo. Saintsbury, M.A.	833
History, G. W. Prothero, D.LITT.	
Astronomy, Astronomer Royal (Scotland) ...	400
Agriculture & Rural Economy, Robt. Wallace.	580
Music, Frederick Niecks	
Sanskrit & Comp. Philology, Julius Eggeling,	
PH.D.	600
Engineering, G. F. Armstrong, M.A.	800
Geology, James Geikie, LL.D.	800
Commercial and Political Economy and Mercantile Law, Joseph S. Nicholson, D.Sc.	800
Education, Simon S. Laurie, LL.D.	700
Fine Art, G. Baldwin Brown, M.A.	600
Celtic Languages & Lit., D. Mackinnon, M.A.	572
Divinity, Robert Flint, D.D.	
Ecclesiast. History, Malcolm C. Taylor, D.D.	
Hebrew & Orient. Lang., Rev. A. S. Kennedy	800
Bib. Criticism, A. Hamilton Charteris, D.D.	
Public Law, Sir Ludovic Grant, Bart.	600
Civil Law, James Mackintosh, B.A.	700
Constitut. Law & Hist., J. Kirkpatrick, LL.D.	900
Scots Law, John Rankine, LL.D.	955
Conveyancing, John Philp Wood, W.S.	700
Materia Medica, Thomas R. Fraser, M.D.	1,290
Forensic Med., Sir Hen. D. Littlejohn, M.P.	736

† These salaries are fixed on the understanding that the professors do not engage in private practice

* The sums appended to the various Chairs are the net amounts received in the year 1895-96; each of those marked with an asterisk * has an official residence in addition.

<i>Chemistry</i> , Alexander Crum Brown, M.D.	£1,828
<i>Surgery</i> , John Chiene, M.D.	1,209
<i>Medicine</i> , Sir T. Grainger Stewart, M.D.	1,058
<i>Anatomy</i> , Sir William Turner, M.D.	2,012
<i>Pathology</i> , William Smith Greenfield, M.D.	1,482
<i>Midwifery</i> , Alexander R. Simpson, M.D.	875
<i>Clinical Medicine</i> , Drs. Sir T. G. Stewart, Thomas B. Fraser, W. S. Greenfield, A. Alexander R. Simpson.	
<i>Clinical Surgery</i> , Thomas Annandale, M.D.	823
<i>Botany</i> , Isaac Bayley Balfour, M.D.	1,515
<i>Physiology</i> , Wm. Rutherford, M.D.	1,734
<i>Zoology</i> , James Cossar Ewart, M.D.	1,615

Terms are from about middle of October to beginning of April, and from beginning of May to end of July.

DUNDEE—UNIVERSITY COLLEGE, 1880.

<i>Mathematics</i> , J. E. A. Steggall, M.A.	£456
<i>Natural Philosophy</i> , J. P. Kuenen, Ph.D.	432
<i>Chemistry</i> , James Walker, D.Sc.	450
<i>Natural History</i> , D'Arcy W. Thompson, B.A.	401
<i>Botany (White's)</i> , Patrick Geddes, F.R.S.E.	227
<i>Anatomy (Coz's)</i> , J. Yule Mackay, M.D.	385
<i>Physiology</i> , E. Waymouth Reid, B.A.	355
<i>Engin. and Drawing</i> , T. C. Fidler, M.I.C.E.	444
<i>English Literature</i> , Wm. S. McCormick, M.A.	407
<i>Modern Languages</i> , H. Durlac.	59
<i>Surgery</i> , D. MacEwan, M.D.	34
<i>Secretary</i> , R. N. Kerr.	

IRELAND.

University of Dublin, 1591.

<i>Chancellor</i> , Earl of Rosse, K.P., F.R.S.	Elected 1885
<i>Vice-Chancellor</i> , Rt. Hon. D. H. Madden ...	1885

<i>Law</i> , J. Donaldson, M.A.; Rev. W. F. Kane, LL.D.
<i>In the Faculty of Medicine</i>
<i>Anatomy</i> , Joseph P. Pye, M.D.; Joseph Symington, M.D.; A. E. I. Birmingham, M.B.
<i>Physiology</i> , J. J. Charles, M.D.; D. J. Coffey, M.B.
<i>Medicine</i> , J. I. Lynham, M.D.; J. F. O'Carroll, M.D.

Surgery, Patrick J. Hayes, M.D.; Sir W. Thornley Stoker, M.D.
Midwifery, J. W. Byers, M.D.; A. J. Smith, M.B.
Medical Jurisprudence, A. Roche, F.R.C.S.I.; C. Y. Pearson, M.D.
Materia Medica, F. J. B. Quinlan, M.D.; William Whitley, M.D.
Sanitary Science, Sir Charles Cameron, M.D.
Pathology, E. J. McWeeney, M.D.; J. Lorrain-Smith, M.D.
 (This is the only University in Ireland in which all Degrees are open to Women.)

BELFAST—QUEEN'S COLLEGE, 1845.

President, Rev. Thomas Hamilton, D.D.
Greek Language, Samuel Dill, M.A.
Latin Language, Thomas Wilson Dougan, M.A.
Mathematics, John Purser, LL.D.
Natural Philosophy, William Blair Morton, M.A.
Hist. and English Lit., Samuel J. MacMullan, M.A.
Logic and Metaphysics, John Park, D.LIT.
Chemistry, Edmund A. Letts, D.S.O., F.R.S.E.
Natural History & Geol., R. O. Cunningham, M.D.
Modern Languages, Albert L. Meissner, Ph.D.
Jurisprudence and Political Economy, W. Graham, M.A.
English Law, James A. Strahan, LL.B.
Anatomy, Johnson Symington, M.D.
Physiology (Dunville), W. H. Thompson, M.D.
Medicine, James Cuming, M.D.
Surgery, Thomas Sinclair, M.D.
Materia Medica, William Whitley, M.D.
Midwifery, John W. Byers, M.D.
Medical Jurisprudence, John P. Hodges, M.D.
Pathology, J. Lorrain Smith, M.D.
Ophthalmology and Otolaryngology, Wm. A. McKeown, M.D.
Sanitary Science, E. A. Letts, Ph.D.; H. Whitaker, M.D.
Practical Pharmacy, Victor G. L. Fielden, M.B.
Civil Engineering, Maurice F. Fitzgerald, B.A.
Agriculture, John F. Hodges, M.D.
Registrar, John Purser, LL.D.
Bursar, William Wylie.

CORK—QUEEN'S COLLEGE, 1845.

President, Sir Rowland Blennerhasset, Bart.
Bursar, Lt.-Col. Jenney (retired).
Greek Language, Charles Haynes Keene, M.A.
Latin Language, Bunnell Lewis, M.A., F.S.A.
Mathematics, Arthur H. Anglin, M.A.
Natural Philosophy, William Bergin, M.A.
History & English Literature, G. F. Savage-Armstrong, LLT.D.
Mental and Social Science, Geo. J. Stokes, M.A.
Chemistry, A. E. Dixon, M.D.
Natural History, Marcus M. Hartog, D.S.C.
Modern Languages, W. F. T. Butler, M.A. (*Libr.*)
English Law, R. W. Brereton Barry, B.A.
Anatomy and Physiology, J. J. Charles, M.D.
Medicine, W. E. Ashley Cummins, M.D.
Surgery, Stephen O'Sullivan, F.R.C.S.I.
Materia Medica, C. Yelverton Pearson, F.R.C.S.E.
Midwifery, Henry Corby, M.D.
Engineering, Alexander Jack, M.A. (*Registrar*).
Medical Jurisprudence, C. Y. Pearson, M.D.
Pathology, Jeremiah Cotter, M.D.
Ophthalmology and Otolaryngology, A. W. Sandford, M.D.
Hygiene, D. D. Donovan, L.R.C.P.
Architecture, Arthur Hill, B.A.

GALWAY—QUEEN'S COLLEGE, 1845.

History, English Literature & Mental Science, Sir Thomas W. Moffett, LL.D. (*President*).
Greek Language, D'Arroy W. Thompson, M.A.
Latin Language, Philip G. Sandford, M.A.
Mathematics, Alfred Cardew Dixon, sc.D.

Natural Philosophy, Alexander Anderson, M.A.
Chemistry, Alfred Senier, Ph.D.
Natur. Hist., &c., R. J. Anderson, M.A., M.D.
Modern Langs., Valentine Steinberger, M.A.
Jurisprud. & Polit. Econ., C. F. Bastable, LL.D.
English Law, Wm. B. Campion, B.A.
Anatomy & Physiology, Joseph P. Pye, M.D.
Medicine, John I. Lynham, M.D. (*Bursar*).
Surgery, W. Westropp Brereton, L.R.C.S.I.
Materia Medica, Nicholas W. Colahan, M.D.
Midwifery, Richard John Kinkead, M.D.
Civil Eng., Edward Townsend, D.S.C. (*Registrar*)

Catholic University of Ireland.

Dublin, 1854.

Supreme Governing Body, the Catholic Archbishops and Bishops: with a *Rectorial Council*, consisting of the Rector, and Heads of Colleges.
Rector, Right Rev. Monsignor Molloy, D.D.
 The University now consists of the following six colleges:
ST. PATRICK'S COLLEGE (Maynooth).—*President*, Right Rev. Monsignor Gargan, D.D.
UNIVERSITY COLLEGE (St. Stephen's Green, Dublin).—*President*, Very Rev. Robt. Carbery, S.J.
UNIVERSITY COLLEGE (Blackrock).—*Superior*, Very Rev. Jules Botrel.
ST. PATRICK'S COLLEGE (Carlow).—*President*, Very Rev. J. Foley, D.D.
HOLY CROSS COLLEGE (Clonliffe).—*President*, Very Rev. Michael Walsh.
MEDICAL SCHOOL (Ceilia Street, Dublin).—*Dean of the Faculty*, Sir C. J. Nixon, M.D.

Professional Education.**AGRICULTURE.**

ASPATRIA AGRICULT. COLL., near Carlisle.
President, Sir Wilfrid Lawson, Bart., M.P.
Vice-President, H. Howard.
Principal, J. Smith Hill, B.A. (*Botany & Zoology*).
Practical Agric. and Agric. Eng., H. F. Hill.
Chemistry and Bookkeeping, D. D. Williams.
Mathematics, J. P. Wilton, P.A.S.I.
Agricultural Law, The Principal.
Practical Surv., D. Burns, c.s.; J. P. Wilton, P.A.S.I.
Veterinary Science, H. Thompson, M.R.C.V.S.
CIRENCESTER ROYAL AGRICULT. COLL.
President, Duke of Richmond and Gordon, K.G.
Principal, Rev. John B. McClellan, M.A.
Agriculture, E. Blundell.
Dairy Farming, E. Blundell; T. Nuttall.
Estate Management & Forestry, R. Anderson, F.S.I.
Chemistry, E. Kinch, F.C.S., F.I.C.
Geology, Botany, & Natural Hist., T. T. Groom, D.S.C.
Mathematics and Physics, H. Ohr, M.A.
Land Surv. & Prac. Engineering, G. Paton, c.s.
Veterinary Science, &c., W. T. Wilson, F.R.C.V.S.
Building, F. W. Waller, F.R.I.B.A.
Agricultural Law, E. B. Haygarth.
Bookkeeping, G. Paton, c.s.
Architectural Drawing, C. Stolle.

COLONIAL COLLEGE, Hollesley Bay, Suffolk.

Resident Director, Robert Johnson.
Agricultural Science, &c., C. G. F. Thonger, M.B.A.C.
Practical Agriculture, George J. Goodwyn.
Nat. Hist. & Laboratory, F. Seymour Pile, M.A.
Hygiene, Ambulance, &c., R. J. Roche, M.R.C.S.
Engineering, Surveying, &c., J. J. Hodges, M.B.S.E.
Veterinary Science, &c., R. St. Clair Houston, B.A.
Horticulture, J. Wolton.

DOWNTON—COLLEGE OF AGRICULTURE.

President, Prof. Wrightson, F.C.S.
Agriculture, The *President*.
Botany and Practical Agric., R. S. Seton, B.Sc.
Chemistry, J. M. H. Munro, D.Sc.
Veterinary Science, W. A. Edgar, *Vice-Pres.* M.C.V.S.
Estate Management Survey., C. E. Curtis.
Mathematics, Bookkeeping, and Building Construction, C. E. Curtis, F.S.I.

SOUTH EASTERN AGRIC. COLL., Wye, Kent.
 (Under the County Councils of Kent and Surrey.)

Chairman, T. J. Halsey.
Clerk to the Governors, J. T. Welland, Ashford, Kent.
Principal, A. D. Hall, M.A.
Agriculture & Estate Management, F. B. Smith, F.S.I.
Chemistry, The *Principal*; H. H. Cousins, M.A.
Botany, J. Percival, M.A.
Zoology & Economic Entomology, F. V. Theobald, M.A.
Surveying, Building, &c., T. J. Young, P.A.S.I.
Veterinary Science, J. Wortley Axe, M.B.C.V.S.

UCKFIELD AGRICULTURAL COLLEGE.
 (East Sussex County Council.)

President, W. J. Macam.

ENGINEERING.

ROYAL INDIAN ENGINEERING COLLEGE,
 COOPERS HILL, STAINES, 1871.

President, Col. John Pennycook, C.S.I., R.M.
Engineering Construction, The *President*.
Hydraulic Engineering, T. A. Hearson, M.I.C.E.
Assist., A. H. Heath, A.M.I.C.E.
Surveying, Maj.-Gen. E. H. Courtney, R.E.
Instructor in Surveying, R. J. Woods.
Drawing, Geometrical, A. Hicks.
Assist. do., and Instructor in Freehand Drawing,
 C. B. McElwee.

Mathematics (Applied), G. M. Minchin, M.A., F.R.S.
Pure Mathematics, A. Lodge, M.A.
Chemistry, H. McLeod, F.R.S.; F.E. Matthews, Ph.D.
Do. Organic, A. H. Church, M.A., F.R.S.
Analytical Chemist, F. W. Harbord, F.I.C.
Physics, W. N. Stocker, M.A.

Do. and Electrical Engineering, T. Shields, M.A.
Geology and Mineralogy, Prof. H. G. Seely, F.R.S.
Forestry, W. Schlich, Ph.D., C.I.E.; W. R. Fisher, B.A.
Botany, C. A. Barber, M.A.
French, J. A. Perret. *German*, T. H. Dittel.

Entomology, W. H. Blandford, M.A.
Secretary, Lt.-Col. W. J. Boyes.
Bursar, J. P. Pasco, B.A.
Chaplain, Rev. H. Bowden Smith, M.A.
Medical Officer, H. E. Giffard.

CRYSTAL PALACE COMPANY'S SCHOOL OF PRACTICAL ENGINEERING.—*Principal*, J. W. Wilson, M.I.N.S.T.C.E.; *Sup. of Educ. Dep.*, R. G. Hodson.

ELECTRICAL AND GENERAL ENGINEERING COLLEGE,
 2, Penywern Road, Earl's Court. *President*,
 G. W. de Tunzelmann.

ELECTRICAL STANDARDIZING, TESTING AND TRAINING INSTITUTION, Faraday Ho., Charing Cross Rd., W.C. *Principal*, H. E. Harrison, B.Sc.

POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Mining, Civil, Marine, and Mechanical), 307, Regent St., W. *Director*, Henry Spooner, F.G.S.

LEGAL.

INNS OF COURT.

[Joint Board of Examiners appointed by the Four Inns of Court for conducting the Examination of Students previous to Admission at an Inn of Court.]

Middle Temple.—Edmd. Macrory, q.c.; George Pitt-Lewis; Charles Grey Wotherspoon; Edmund Russell Roberts.

Inner Temple.—Robt. Henville Simonds; James Edward Aldous; Arthur Llewelyn Davies; Herbert Chitty.

Lincoln's Inn.—Richard Marrack, M.A.; Harry Johnson; Sir Sherston Baker, Bart.; James Williams, D.C.L.; J. Samuel Green.

Gray's Inn.—Ivor Bowen; E. W. S. Coxey; James Richard Aakiney; Richd. Story Denney. *Secretary to the Board*, Thomas Purdue, Oak of Honour Hill, S.E.

COUNCIL OF LEGAL EDUCATION.

(Lincoln's Inn Hall, W.C.)

[Established by the four Inns of Court to superintend the Education and Examination of Students for the Bar.]

Chairman, Rt. Hon. Lord Macnaghten.
Vice-Chairman, J. Napier Higgins, q.o.
Clerk of the Council, Frederick Dapp.
Chairman of the Board of Studies, His Hon. Judge Sir Alfred G. Marten, q.o.

READERS.

Jurisprudence, &c., J. Fawley Bate.

Assistant, S. H. Leonard.

Equity, A. Hopkinson, q.o., M.P.

Assistant, O. A. Saunders.

Real and Personal Property, A. Underhill.

Assistant, John Gent.

Constitutional Law, J. P. Wallis.

Procedure, Civil and Criminal, A. Henry.

Common Law, Edmund Robertson, q.c., M.P.

Assistant, J. A. Hamilton.

GENERAL COUNCIL OF THE BAR.

2, Hare Court, E.C.
 [The Council is the accredited representative of the Bar, and its duty is to deal with all matters affecting the profession, and to take such action thereon as may be deemed expedient.]

Chairman, H. H. Cozens-Hardy, q.c., M.P.

Vice-Chairman, The Hon. Sir Arthur M. Channell.

Secretary, H. C. A. Bingley.

INNS OF COURT BAR LIBRARY.

(Royal Courts of Justice.)

Secretary & Librarian, R. Riches.

INCORPORATED LAW SOCIETY

(of the United Kingdom), Chancery Lane, W.C.

[The Society controls the examination of article clerks, the admission of solicitors, and the discipline of the profession. Number of members, 7,725.]

President, 1897-98, William Godden.

Vice-President, Charles B. Margetts.

Secretary, Edward Walter Williamson.

Assist. Secretary, S. P. B. Bucknill.

Clerk to Committees, Harry F. Brown.

Librarian, F. Boase.

MEDICAL.

MEDICAL AND DENTAL REGISTRATION.

GENERAL MEDICAL COUNCIL, 299 Oxford Street, W.—*President*, Sir Richard Quain, Bart., M.D.;

Registrar of General Medical Council and Branch Council for England, H. E. Allen, LL.B.;

Registrar of Branch Council for Scotland, James Robertson, 1 George Square, Edinburgh;

Registrar for Ireland, S. Wesley Wilson, 35 Dawson Street, Dublin.

Any person falsely assuming the title of Physician, Surgeon, Doctor, or Apothecary, is liable to a heavy penalty under the Medical Act; and to a further fine under the Apothecaries Act.

There is a similar penalty for Dentists.

CHARING CROSS HOSPITAL MEDICAL COLLEGE.—Entrance fee for *General* students, 110 guineas, or 121 guineas in five instalments. For *Dental* students, 54 guineas, or 60 guineas in two equal instalments. Number of beds, 180. *Dean*, Montague Murray, M.D.

GUY'S HOSPITAL.—Average number of beds in daily occupation 416. The various appointments and offices are filled by students, selected according to merit. Some of the scholarships are of the value of £150. *Composition* fee, £157 10s. in one sum, or £163 in four instalments. *Dean*, Dr. Shaw.

KING'S COLLEGE HOSPITAL.—Fees, £135. Number of beds, 217. *Dean*, Sir Hugh Beavor, Bart., M.D.

LONDON HOSPITAL AND MEDICAL COLLEGE.—This is the largest general hospital in Great Britain, and contains nearly 800 beds. 60 resident appointments are made annually, as well as numerous clinical clerkships, dresserships, &c. Holders of resident appointments are provided with rooms and board entirely free of expense. Fee £126 or by instalments; 15 guineas less to sons of medical men; 24 prizes and scholarships were awarded in 1895. *Warden of the College*, Munro Scott, Turner Street, Mile End.

MIDDLESEX HOSPITAL.—Entrance fee, £126. Number of beds 321. Two scholarships, value £100 and £60, and one of £60 for students of Oxford or Cambridge, are awarded annually. *Dean*, W. Pasteur, M.D.

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE.—The clinical practice of this hospital comprises a service of 678 beds, besides 70 beds for convalescent patients at Swanley, in Kent. The resident appointments, 34 in number, as well as all the students' appointments—clinical clerkships, dresserships, &c.—are chosen from the most diligent students, without fee. Scholarships and prizes to the value of nearly £900 are awarded annually. A college is attached, where students may reside. Number of patients, 1896—in, 6,840; out, 148,587. Entrance fee, for lectures and hospital practice, 150 guineas, *perpetual*.—*Warden of the College*, Dr. T. W. Shore.

ST. GEORGE'S HOSPITAL.—Entrance fee £145, *perpetual*, or £150 in four instalments. Number of beds 355. *Dean*, Isambard Owen, M.D.

ST. MARY'S HOSPITAL.—*Perpetual* fee, £138; or by instalments, £144. Number of beds 381.—*Dean*, Geo. P. Field. *Sec.*, Frederic H. Madden.

ST. THOMAS'S HOSPITAL. (Founded 1228).—In this hospital, which contains 572 beds, the prizes and scholarships are numerous. More than 20 house appointments are open to students who have obtained their diplomas. Clinical clerkships and dresserships may be held without extra fees. The School buildings are among the most complete in London. *Composition* fee, £150.—*Medical Secretary*, G. Rendle, M.R.C.S.

UNIVERSITY COLLEGE HOSPITAL.—Entrance fees varying from £57 15s. to £141 15s.; or by instalments £142. Number of beds, 210. *Dean*, R. J. Godlee, F.R.C.S.

WESTMINSTER HOSPITAL.—Entrance fee, £105; or by instalments, £105 to £126. Number of beds, 212. *Dean*, Dr. Hobb.

All the above Hospitals have Schools of Medicine attached to them. Application in every instance to be made to the *Medical Secretary*.

LONDON SCHOOL OF MEDICINE FOR WOMEN, 30, Handel Street, Brunswick Sq., W.C. (Associated

with Royal Free Hospital).—*Dean*, Mrs. Garrett-Anderson, M.D. *Sec.*, Miss Dobie, M.A.

TECHNICAL.

CITY AND GUILDS OF LONDON INSTITUTE.—Gresham College, E.C.

President, H.R.H. the Prince of Wales, K.G.
Hon. Secretary, John Watney.
Assistant Secretary, A. L. Soper.
Superintendent of Technological Examinations throughout the Country, Sir Philip Magnus.

The following Technical Schools and Colleges are maintained and managed by the Institute:—

CENTRAL TECHNICAL COLLEGE,
Exhibition Road, S.W.

Mechanics & Mathematics, O. Henrich, F.R.S.; H. Klugh, B.A.; G. C. Turner, B.Sc.
Civil & Mechanical Engineering, W. C. Unwin, F.R.S.; A. Sharp, B.Sc.; G. A. Burls; A. S. E. Ackerman, A.C.G.I.
Physics and Electrical Engineering, W. E. Ayrtton, F.R.S. (Dean); T. Mather; A. H. Allen; E. D. Phillips; J. Severs, A.C.G.I.; F. W. Carter, B.A.
Chemistry, Henry E. Armstrong, Ph.D., F.R.S.; F. S. Kipping, Ph.D., F.R.S.; G. T. Moody, D.Sc.; W. J. Pope, A.C.G.I.

TECHNICAL COLLEGE, Leonard St., Finsbury, E.C.
Applied Mathematics and Mechanical Engineering, W. E. Dalby, M.A.; R. G. Blaine, M.E.; J. Graham.

Applied Physics and Electric Engineering, Prof. Silvanus P. Thompson, D.Sc., F.R.S. (Princ.); E. A. O'Keefe, B.E.; F. R. Flew; A. C. Eborall; E. Rousseau.

Applied Chemistry, Prof. R. Meldola, F.R.S.; J. Castell-Evans, F.I.C.; F. W. Streetfield, F.I.C.
Applied Art, A. F. Brophy, T. Adams, A. Fisher, W. Fourniss, W. R. Wright, J. Whitty.
Registrar, K. Dove.

SOUTH LONDON TECHNICAL ART SCHOOL,
122 & 124 Kennington Park Road, S.E.

Superintendent of Studies, J. C. L. Sparkes.
Modelling, W. Frith; T. Tyrell.
Drawing and Painting, J. Frupp.
House Decoration, W. K. Stevens.

LEATHER TRADES SCHOOL, 42 Bethnal Green Road, E.

Head Master, F. Y. Golding.

BRADFORD TECHNICAL COLLEGE.

Head Master of Day-School, James Spencer, B.Sc.
Art Department, Charles Stephenson.
Textile Department, A. F. Barker.
Chemistry and Dyeing, W. M. Gardner, F.O.S.
Mechanical & Engineering, G. F. Charnock, A.M.I.C.E.
Secretary, John Nutter.

BRISTOL MERCHANT VENTURERS' TECHNICAL COLLEGE.

Principal, Prof. J. Wertheimer, B.Sc. (Chemistry).
Mechan. Engineering, Prof. John Munro, M.I.MECH.E.
Electrical Engineering, Prof. A. Philip, B.Sc.
Mixed Math., T. Dobson, B.A.
Biology, G. P. Darnell-Smith, B.Sc.
Metallurgy, James Leicester, Ph.D.
Pure Mathematics, E. S. Boulton, M.A.
Classics, G. Brace, M.A.
English, H. A. Webb, B.A.
French, C. A. L. Dirac, B.Sc.; *German*, C. C. Hennig, M.A.; *Applied Art*, J. Shields, G. R. Curthoys, and 31 teachers of handicrafts and commercial subjects.
Treas., G. H. Pope, M.A. *Reg.* J. W. Jubb.

GLASGOW AND WEST OF SCOTLAND TECHNICAL COLLEGE, 1887.

Andersonian Buildings—204 George Street.
Science and Arts Buildings—38 Bath Street.
Young Laboratory Buildings—60 John Street.
Industrial Art Rooms—4 West Regent Street.
Allan Glen's School—68 North Hanover Street.
Secretary, John Young, M.A.; 38 Bath St., Glasgow.

PROFESSORS.

Natural Philosophy, James Blyth, M.A.
Mathematics, George A. Gibson, M.A.
Applied Mechanics, William T. Rowden, B.Sc.
Metallurgy, A. H. Sexton, F.O.S.
Steam and Steam Engines, W. H. Watkinson.
Agriculture, R. P. Wright, F.H.A.S.
Architecture, Charles Gourlay, A.R.I.B.A.
Chemistry, G. G. Henderson, D.Sc.
Electrical Engineering, Andrew Jamieson, M.I.C.E.
Machins Design, Alex. MacLay, B.Sc.
Technical Chemistry, Edmd. J. Mills, D.Sc., F.R.S.

Huddersfield Technical College.

Principal and Prof. of Chem., S. G. Rawson, D.Sc.
Textile Department, Edward Armitage.
Organic Chemistry and Dyeing, Edward Lodge.
Engineering and Building, T. Kershaw, A.M.I.M.E.
Mathematics and Geology, W. H. Hirst, B.A.
Physical Science, W. R. Bower, A.B.C.S.
Modern Languages & Literature, A. Ludwig, B.A.
English and Latin, W. E. Haigh.
Art Master (vacant).
Commercial Classes, Arthur Fieldhouse, F.N.P.S.
Secretary, Thomas Thorp.

MUNICIPAL TECHNICAL SCHOOL,
MANCHESTER, 1883.

Mechanical Engineering, H. G. Jordan; F. C. Forth; J. Barnes, M.A.; W. H. Davies; W. H. Cummins; R. M. Anderson; T. Jones, M.I.M.E.; A. R. Edmonson, A.M.I.M.E.; J. H. Melloy.
Electrical Engineering, W. W. H. Gee, B.Sc.; S. Joyce; J. Henderson, B.Sc.; A. Adamson, A.R.C.S.
Sanitary Engineering and Plumbing, J. Radcliffe; R. Bardsley.
Chemistry, E. Knecht, Ph.D.; J. Grant, F.I.C.; E. L. Rhead; R. L. Taylor, F.I.C.; L. G. Radcliffe; J. Allan, F.C.S.; P. M. Davies, A.R.C.S.; F. H. Crewe; J. H. Wolfenden, B.Sc.
Textile Fabrics, T. W. Fox; J. Morris.
Mathematics, J. P. Wrapson, B.A.; J. E. Holden; W. H. Madden; R. Lunt.
Descriptive Geometry and Building Construction, J. Wilson; J. Mattinson; J. Dottans.
Practical Joinery, Slodj, &c., R. Trainor.
Telegr. & Telephony, J. F. Taylor; T. E. Herbert.
Painters' and Decorators' Work, W. J. Pearce; W. Barber.

And 40 others.

Director and Secretary, J. H. Reynolds.

MUNICIPAL SCHOOL OF ART, MANCHESTER.

Director and Secretary, J. H. Reynolds.
Head Master, R. Glazier, A.R.I.B.A.

LEATHER COMPANY'S TANNING SCHOOL, Herold's Institute, Drummond Road.

Director, J. G. Parker, Ph.D.

SHEFFIELD TECHNICAL SCHOOL (see p.).
S. W. LONDON POLYTECHNIC, Manresa Rd., Chelsea.
Principal, H. Tomlinson, B.A., F.R.S.

[There are also Technical Schools at Bideford (see p. 274), Chester (College School, see p. 274), Coventry, Leamington, Mansfield, Plymouth, Seafield (Hants), Swansea (see p. 278), and Tenby (see p. 278).]

Edinburgh. *Principal*, Professor Dewar.

NEW VET. COLL., Leith Walk, Edinburgh.

VETERINARY COLLEGE, Buccleuch St., Glasgow.

Principal, Prof. McCall, F.R.C.V.S.

UNIVERSITY EXTENSION.

EXTRA-MURAL WORK OF THE UNIVERSITIES OF
OXFORD AND CAMBRIDGE.—This work falls under
three heads: (1) Local Examinations; (2) The
Examination of Schools; (3) University Exten-
sion. The purpose of the latter is to provide the
higher education of persons of all ranks and of
both sexes. The Extension authorities receive
proposals for the establishment of lectures and
teaching in England and Wales, and are autho-
rised to appoint lecturers and examiners for the
purpose. Each lecture is preceded or followed by
a class for more detailed instruction, and the usual
charge for a series of twelve lectures and classes is
£42 12s. exclusive of travelling expenses. Further
particulars may be obtained from J. A. R.
Marriott, M.A. (Oxford), and R. D. Roberts, M.A.
(Cambridge). A feature of this educational work
is that, for each course, the authorities issue a
loan travelling library, containing the principal
books recommended by the lecturer.

The VICTORIA UNIVERSITY, Manchester, also
provides lecturers in the same way as the above;
full particulars may be obtained from P. J.
Hartog, B.Sc., the Victoria University, Man-
chester. A fourth authority is the "London
Society for the Extension of University teaching."
Secretary, Dr. Kimmins, The Charterhouse, E.C.

UNIVERSITY EXTENSION AND TECHNICAL
COLLEGE, EXETER. 1893.

Principal, A. W. Clayden, M.A.

Mathematics, Rev. J. Eaves, M.A.

Chemistry, W. H. Lewis, B.A.

School of Art, J. Birkenmyer; J. Shapland.

AMBULANCE SERVICE FOR LONDON.

Office, 28 Southampton Street, Strand, W.C.
Hon. Sec., Thos. Ryan.

Hospital Funds.**THE METROPOLITAN HOSPITAL SUNDAY FUND.**

This excellent charity was started, under the presidency of the LORD MAYOR, in 1873, the total receipts in that year amounting to £27,700. They have since risen as high as £60,361 in the year of greatest prosperity, 1895, dropping in 1896 to £46,025, and in 1897, partially owing, no doubt, to the various Jubilee and other special charities co-existing, to £43,485.

THE BALANCE SHEET for the year ending 30th October, 1897, shows the following results:—
RECEIPTS.—Balance at bank at commencement of year, £1,665; in hands of Secretary, £7; collections made at various places of worship, £37,374; collections at schools £22; donations (including £16 14s. for surgical appliances), £2 36s; dividend on £45,346, invested in 2½ Consols., per executors to the will of the late W. A. Guesdon, £1,247; balance—excess of payments over receipts, £831; in hands of Secretary (30th October, 1897), £21.

EXPENDITURE.—Awards to one hundred and twenty hospitals (including 26 General Hospitals, 5 Chest Diseases, 14 Children's, 6 Lying-In, 6 Hospitals for Women, 26 other special hospitals, 23 Convalescent, and 12 Cottage Hospitals), £37,263; seven Institutions, £595; fifty-six Dispensaries, £1,720; Surgical Appliances £2,248; office expenses, printing and stationery, advertising, postage, &c., £1,625. **SPECIAL EXPENSES**—Special Church and Chapel Appeals, £35

COLLECTIONS.—The number of collections in 1896 (Hospital Sunday) in the London District was as follows:—Church of England, 1,110; Baptist, 105; Catholic Apostolic, 10; Congregational, 123; Free Church of England, 1; Society

of Friends, 17; German Lutheran, 7; Greek Church, 1; Jews, 43; Methodist New Connexion, 1; Primitive Methodist, 22; United Free Church (Methodist), 12; Welsh Calvinistic, 5; Moravian, 1; New Jerusalem (Swedenborgian), 6; Presbyterian, 46; Protestant (Foreign), 3; Reformed Episcopal Church, 4; Roman Catholic, 109; Church of Scotland, 3; Unitarian, 14; Wesleyan, 135; and various (not distinguished), 112. Collections at Schools, 53.

THE HOSPITAL SATURDAY FUND.

THE twenty-third Annual Report (1896) shows a very distinct improvement on its immediate predecessor, the receipts being £1,075 in excess of those for 1895. THE BALANCE SHEET for the year ending 9th January, 1897, is as follows:—
RECEIPTS.—Balance brought forward, £24; Street and Workshop Collections, £21,221; Special Donations, £185 10s.; Ambulance Committee, Donations, Sales and Fees, £105; interest on deposits £102, making a total of £21,638.

EXPENDITURE.—General expenses (including rent, salaries, printing, postage, local committees, and refreshments to lady collectors), £2,554; awards to Hospitals, Dispensaries, &c. £16,059; grants to Distribution Committee, £950; to Surgical Appliance Committee, £1,010; Ambulance £91, leaving a balance at bank and in hand of £974.

THE PRINCE OF WALES'S HOSPITAL FUND.

The total sum received by the Fund to the 19th November, 1897, was £185,048 11s. 9d. Of this amount, £20,852 10s. 5d. consists of Annual Subscriptions, the remainder being Donations, a large proportion of which, it is believed, will be subscribed yearly. These figures do not include the proceeds from the sale of Hospital Stamps.

BANK OF ENGLAND, FOUNDED 1694.

Capital, £14,553,000.

Rest, or Reserve, on 6th October, 1897, £3,134,723.

The Total Dividends for the year ending 31st August, 1897, were at the rate of £9 5s. per cent. The Price of Bank Stock, 6th October, 1897, was £328.

NOTES in circulation, 6th Oct., 1897, £28,413,280. Notes unemployed, £19,358,640.

GOLD and SILVER Coin and Bullion, Head Office and all Branches, £33,196,109.

THE GOVERNOR, DEPUTY GOVERNOR, AND OTHER OFFICERS FOR THE YEAR 1897-98.

LIST OF COUNTRY BANKS IN ENGLAND AND WALES, WITH THEIR LONDON AGENTS.

The Numbers refer to the London Agents in List, pages 293-96.

An Asterisk applied to a Bank implies that it is open on Fair Days.

THE BANKERS' CLEARING HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. Instead of presenting their cheques at each Banking House, and receiving cash and notes in payment, Clearing Bankers settle the whole amount delivered during the day at this establishment by receiving or paying the difference in their amount by a single cheque on the Bank of England. As every Bank in London and the Country is represented by Clearing Bankers, who, as agents, send through the Clearing House all drafts payable in the City and in the Country, the amount passing through this channel is enormous. The total for the year ending December 31st, 1896, was £7,574,853,000, a decrease of £18,033,000 as compared with the year 1895. On Stock Exchange days the payments were £1,162,866,000, a decrease of £141,813,000 on the year 1895. The payments on Consols account days for the same period have amounted to £380,354,000, an increase of £34,908,000 as compared with 1895; and on the 4ths of the months the payments for 1896 amounted to £290,681,000, an increase of £7,071,000 as compared with 1895. The establishment is managed by a Committee, the officers of which are—*Chairman*, Lord Hillingdon; *Deputy Chairman*, Rt. Hon. Sir John Lubbock, Bart., M.P.; *Hon. Sec.*, J. Herbert Tritton; *Acting Managers*, John C. Pocock (*Chief Inspector*); Philip W. Matthews (*Deputy Inspector*).

Average Price of Consols for the Past Hundred and Seven Years,
WITH THE AMOUNT OF INTEREST PRODUCED.

For the rate of Discount and price of Consols in 1896-97 see pages 363 to 368.

THE British Isles consist of Great Britain (England and Wales, and Scotland) and Ireland, and lie between the 40th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 121,115 sq. miles, with a population in 1891 of 37,740,283, an increase of 2,855,435 in ten years, in addition to the 604,182 who had emigrated.

ENGLAND,

which may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the Rivers Tweed and Solway, and from Wales by the Severn and Dee, has an area of nearly 51,000 square miles, and a population (census, 1891) of 27,501,362. Except in the west and the north, England is for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, including iron, tin, lead, zinc, slate, and coal, which make abundant amends for the poverty of their surface.

Many learned men have taken pains to ascertain the various human races that have in succession occupied parts of the British Islands. The most approved conclusions seem to be, that the southern and eastern parts of England have a population mainly derived from Belgic Gaul, whilst the western districts and Wales have been peopled from the West of France and the North of Spain. Ireland and Scotland are believed to have been peopled by a race originally Belgic, but which country received its population from the other is a point that has been acrimoniously discussed, and probably admits of no positive solution. This alone is certain, that when the Romans first came to our shores the inhabitants might have been roughly divided into two sections: those who lived inland, and who may with some reason be called Celtic colonists, were a race of hunters and shepherds, dressed in the skins of beasts, and inhabiting huts made of rude wicker-work and covered with rushes; whereas the coast-dwellers were, probably, of Gallic origin, with some approach towards civilisation, and holding intercourse, for purpose of trade, with foreign merchants visiting the island. These conclusions, however, only apply to very early times, and we know from history how very mixed the populations of our islands have now become. Neglecting the Romans, who were no more than mere military garrisons, and mingled little with the natives—much like Europeans in the East at the present day—we have the Saxons and Jutes established from Kent to Devonshire, and the Angles (and subsequently the Norsemen) from the Thames to the Tweed. The Norman Conquest brought in a mixed multitude from the Continent; the wars of Stephen introduced a numerous body of Flemings, who were settled by Henry II. in Wales; and the commercial views of Edward III. led to the establishment of a still larger body of the same people as clothworkers in Kent. Political and religious dissensions have had a great share in bringing in new races, for Dutch, French, and other refugees and their descendants exist among us in such numbers as perceptibly to modify the national character. The western part of England was known to the Phœnicians, and was resorted to by them for its tin, four centuries or more *s.c.*; hence the whole country received the name of the *Cassiterides*, or Tin Islands. When invaded by Cæsar (*s.c.* 55) it was called Britain (perhaps derived from *Prydain*, the name of an early chief of great power), or sometimes Albion, that is, the *White Land*, from the white cliffs on the S. E. coast.

The Romans subdued all England, and parts of Scotland and Wales, but did not reach Ireland, though its existence was known to them. About *A.D.* 410, the Romans abandoned the island after a rule of about 350 years, traces of which still remain in every quarter. These may best be observed in the names of many of our most ancient towns, in the great roads that reach from end to end of the country, and in the remains of Roman buildings and architecture from time to time unearthed in different places. For example, every town whose name consists wholly, or in part, of *caester*, *caster*, or *chester* (derived from Latin *castra*, a camp) marks the site of one of those wonderful entrenched camps for which the Roman armies were famous. Thus, we have Lancaster, Chester, Manchester, Cirencester, Gloucester, Tadcaster, Worcester, Doncaster, Colchester, Dorchester. Then the military roads, straight, broad, and splendidly made, are still to be traced. There were four of these, *vis.*, Watling Street, from the coast of Kent by way of London, to Carnarvon; the Foss—or Fostylke—from Cornwall to Lincoln; Ikenild Street, from the mouth of the Tyne, through York and Derby, to St. David's; and Irmin Street, from the last-named spot to Southampton. The Britons, being divided into as many hostile States as they had cities, were unable to resist the fresh hordes (now called Saxons and Angles) that poured into the island, and about *A.D.* 457 the kingdom of Kent was founded. The Britons still fought stubbornly, but were gradually driven westward, and by the year 584 the kingdom of Mercia (meaning the march-land, or frontier State) was established, being the last of the seven kingdoms founded by the invaders—whence the whole is usually styled the Heptarchy. The kings of the Heptarchy made war on each other, but at last, in 827, Egbert of Wessex obtained the supremacy of the whole, and styled himself King of England. His descendants, of whom Alfred the Great was the most illustrious, held the throne for more than 200 years, but the country suffered greatly during the time from the ravages of the Danes, who, under Canute and his sons, became its rulers for 25 years (1017-1042). The Saxon line was restored in the person of Edward the Confessor, to whom Harold succeeded; but his death in the Battle of Hastings, on the 14th October, 1066, gave England into the hands of the Norman kings, who reigned from 1066 to 1154. Then came the Plantagenets (1154-1483), the Tudors (1483-1603), and the Stuarts (1603-1714), to whom the House of Hanover succeeded on the death of Queen Anne. Her present Majesty is the sixth sovereign of that line, and on June 22, 1897, celebrated the completion of the 60th year of her reign.

THE SCILLY ISLES (the *Cassiterides* of the Phœnicians) are part of the County of Cornwall; they consist of St. Mary's, Trecoo, St. Martin's, St. Agnes, and Bryher, with about 35 other islands, and have a total area of about 55 sq. miles, with a population (1891) of 2,044. The principal town is Hugh Town in St. Mary's.

The entire population of England and Wales is here given for 1891 (29,002,523), with the gross estimated rental as settled by the Assessment Committees in the Valuation Lists in 1893, the amount collected for the Poor Rate for the year ending Lady-Day, 1896, and the number of paupers who were actually in receipt of relief on Jan. 1st, 1897. The total number of persons in England and Wales receiving relief on Jan. 1st, 1897, was 836,674 as against 840,456 on Jan. 1st, 1896, a decrease of 3,782. The total cost of Relief to the Poor for the year ended Lady-Day, 1896 (the last information published), was £10,215,974, as against £9,866,605 for the year ended Lady-Day, 1895, £9,673,505 for the year ended Lady-Day, 1894, £9,217,514 for the year ended Lady-Day, 1893, and £8,847,678 for the year ended Lady-Day, 1892.

The sum raised by Poor Rates in England and Wales during the year ended Lady-Day, 1896, was £21,236,297; the receipts in aid, inclusive of grants from County and Borough Councils, amounted to £2,563,908, forming a total receipt of £23,800,205; considerably over one-half of this amount was expended for other purposes than the relief of the Poor; the payments towards the County, Borough, and Police Rate, for instance, amounted to £8,571,895; to Rural District Councils, £1,433,452; to School Boards, £1,308,156; and to other authorities £578,696. The actual relief to the poor for the year ended Lady-Day, 1896, amounted to 6s. 9d. per head of the estimated population, while the sum levied as Poor Rate during the same period was equal to a rate of 14s. 0d. per head, being an increase in the former case of 2s., and in the latter case of 1s. 4d. as compared with the corresponding amounts in previous year. (For statistics and other particulars as to Wales, see next page.)

* POPULATION OF COUNTIES.—The county population is that given in the Census of 1891, as the population of each Registration County. The Registration Counties do not precisely correspond with the area of ordinary counties, but with Poor Law areas to which the figures in this table relate. In 1861 the amount levied for poor rate was at the rate of 7s. 1½d. per head; in 1891 the amount levied was at the rate of 10s. 9½d. In 1861 the officials employed received but £660,370 in 1891 this had increased to £1,452,810.

THE Principality of Wales, with an extreme length of 135 miles, and a breadth varying from 35 miles to 95 miles, lies in the S.W. of Great Britain, and has an area of 7,378 square miles, or about 4,720,000 acres. The Principality is rich in minerals; slate, coal, and iron being among the more important; while of its manufactures, flannel, cloth, and hosiery alone are worthy of mention. The native inhabitants are almost wholly of the Cymric stock of the Celtic race, and a large number of them belong to the religious body known as the Calvinistic Methodists.

At what time Christianity was introduced it is impossible to tell, but certainly not later than A.D. 400. When the British Christians were driven from their homes, such of them as did not seek refuge beyond the seas, found in the rocky fastnesses of the Welsh mountains a secure retreat from their enemies. There they immediately set about dividing the country into ecclesiastical divisions for administrative purposes, and the present sees of Wales represent those leading centres of religious thought that became famous in the sixth century.

The four bishoprics still remain as of old, and the numbers of beneficed clergy now to be found in them are as follows: St. David's, 360; Llandaff, 246; St. Asaph, 206; and Bangor, 147. The sees of St. David's and Llandaff were united with the Southern province in the year 1107, and those of Bangor and St. Asaph in the years 1092 and 1143 respectively.

When the Saxon pirates began to visit and ravage the eastern shores of Britain, the Celtic inhabitants were gradually pressed westward by the invading hordes, and finally found secure shelter in the wilds of Wales, Devon, and Cornwall. The border-lands, or marches, between England and Wales were long in a state of at least guerilla warfare; and it was not until about 850 A.D. that one Roderick (Rhodi Mawr) contrived to unite the whole country into one Principality, dividing it afterwards among his sons into three smaller ones, named, severally, Gwynedd, Dyfed and Ceredigion, and Powis. This was followed by the incursions of the Danes, after which Howel once more (in the 10th century) succeeded in re-uniting the country. Later, when England was tending in the same direction of unity, Athelstane received a tribute from the Welsh in recognition of his nominal sovereignty over them. William I. and his son Rufus both tried the plan of granting fiefs to their more

adventurous Norman knights, on condition of their conquering the land, while Henry I. introduced into the Principality a colony of Flemish wool-workers. Henry II., too, and John, endeavoured, with doubtful success, to effect a final subjugation of the troublesome province. A combination of fortuitous circumstances led to its lasting conquest. Llewellyn, who succeeded David, had been implicated in the Montfort rebellion, but, on the accession of Edward I., managed to get included in the general amnesty granted to those who had joined the Leicester faction. In 1276, however, Edward, having been repeatedly refused the homage due to him from Llewellyn, raised an army to enforce his commands. Internal dissensions among the Welsh greatly aided the English, and Llewellyn, at length cooped up and almost starved to death among the Snowdon mountains, was forced to submit at discretion, and accept the terms offered by the victor (1277). By the grace of Edward the Welsh prince was allowed to return to the Principality; but trouble arising again, in which both Llewellyn and his brother David were concerned, a war arose, and the independence of Wales was for ever shattered. Llewellyn was slain in battle in 1282, with two thousand of his followers; and in the following year David, being betrayed to the English, was sent in chains to Shrewsbury, and at last put to a painful and ignominious death as a traitor. The Welsh nobility then submitted in a body, and King Edward invested his son Edward (who had been born at Carnarvon) with the Principality, which very soon afterwards was fully annexed to the Crown. In later days the history of Wales has been almost identical with the history of England, the Principality and country marching side by side in sure and steady progress.

In education the Principality has made great strides of recent years, and possesses a University (Prifysgol Cymru) consisting of the three university colleges of Aberystwyth, Bangor, and Cardiff, in addition to St. David's College at Lampeter.

The following table of statistics contains some interesting information with reference to the various individual counties of Wales. In addition to those named, Monmouth is, not without good reason, claimed as a Welsh county; if admitted, it would add another quarter of a million to the population of the Principality, thus making it larger than that of Scotland in the early part of the century. The Welsh is a distinct nationality, with a language and literature of its own.

The most northerly part of the island, divided from the south by the River Tweed, the Cheviot Hills, and the Solway Firth, is the ancient Caledonia or modern Scotland, a mountainous country, and to a great extent bleak and barren, but inhabited by a race of men who have made the country productive, wealthy, and prosperous. It contains nearly 30,000 square miles, or 19,084,659 acres, of which not quite 4,500,000 are in a state of cultivation, with a population in 1881 of 3,735,573, and of 4,025,647 in 1891.

After the Union with England in the year 1707, and the suppression of the Rebellion of 1745, the Scottish people generally awoke to the fact that the loss of their separate nationality was a gain; and being united to a wealthy neighbour, they with one accord determined to derive all possible benefit from the change. By means of an admirable

banking system, capital was utilised. With wonderful ingenuity and perseverance a great commercial port, Glasgow, was opened in the west, Scottish citizens flocked south and into the British colonies, everywhere carrying with them their habits of industry and thrift. India especially became the scene of their operations, and notwithstanding any narrow feelings of national jealousy, it was seen that they were creators of commerce and producers of wealth. Education was widely diffused throughout the masses, while the Calvinistic religion, even if it did not in all instances produce piety, helped to promote thought and mental activity. At the Union the Scottish Church and Judiciary were left intact, and so, with slight modifications, have remained to the present day; both England and Scotland borrowing something from each other and gradually assimilating.

POPULATION, AREA, VALUATION AND PAUPERS OF COUNTIES.

* * * The valuation of lands and heritages is only approximate: it is that furnished by the Inspectors of the Poor to the Local Government Board for Scotland. The number of Paupers is that chargeable on May 14, 1896.

The Sheriff-Principal of Lanark resides in Glasgow, all the others reside in Edinburgh.

IRELAND is an island lying between 51° 26' and 55° 23' N. lat. and 5° 20' and 10° 26' W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,759 square miles, or 20,326,209 acres. The greater part of the surface is a plain, interspersed with low hills, the highest mountain being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world. The climate is temperate, and many plants which can only be grown in hot-houses in England flourish in the open air in Ireland; while the great moisture which generally prevails is so favourable to vegetation that the country early received the name of the Green or Emerald Isle.

The population of Ireland on April 3, 1891, was 4,704,750, a decrease of 470,086—equal to 9.1 per cent. since the preceding Census of 1881. It was not till 1821 that the first complete census was taken, and the numbers were then found to be 6,801,827; in 1831 they had increased to 7,767,401, and in 1841 to 8,175,124. The highest point was reached in 1845, when the entire population was estimated at 8,295,061. The potato crop, upon which all the agricultural and many of the manufacturing poor depended for their subsistence, having failed for two successive years, produced famine and disease, which carried off large numbers, and

gave a great impulse to emigration, so that from 1845 the population rapidly decreased.

The conquest of Ireland was begun in the year 1170, but can hardly be regarded as completed until the surrender of Limerick in 1691, and was declared a kingdom in 1542; and this kingdom was united to that of Great Britain by the Act of Union, on Jan. 1st, 1801, the empty title of "King of France," which the English kings had borne since the time of Edward III., being abandoned.

The government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, exercises almost regal sway. He has a salary of £20,000, but being usually a nobleman of large private fortune, his expenditure is frequently much more than the amount received. The peerage consists of 176 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The prevailing religion is Roman Catholic, 75 per cent. of the population professing that form of faith. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 12 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Ireland is well supplied with educational establishments, having two universities, a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of Primary Schools.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

THE LORD LIEUTENANT.

His Excellency the Right Honourable George Henry, 5th Earl Cadogan, K.G., G.M.P., born 12th May, 1840; succeeded his father 8th June, 1873; married, 16th May, 1865, Lady Beatrice, 4th daughter of 2nd Earl of Craven; Lord Lieutenant General and General Governor of Ireland; sworn in 8th July, 1895

Chief Secretary and Keeper of Privy Seal—Right Hon. Gerald William Balfour, M.P. ... £4,425
Private Secretary, Laurence C. Dowdall.

Perm. Under Sec., Sir David Harrel, K.C.B. ... £2,000
Private Secretary, W. P. J. Connolly.
Assistant Under Secretary, J. B. Dougherty.

LORD LIEUTENANT'S

Private Sec., Sir William Squire Barker Kaye, Q.C., G.B. £829
Additional Private Sec., Algernon Robert Peel.
Asst. Private Secs., Victor Seymour Corkran; J. McCraw (Financial).
Ulster King of Arms, Sir Arthur E. Vicars ... 500
State Steward, Lord Lurgan 506
Comptroller, Lord Langford 414

ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3'—54° 25' N. and long. 4° 18'—4° 47' W., nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 145,325 acres, with a population of 55,598. Curiously enough the history of the island is intimately linked with that of the Hebrides and the kingdoms of Scotland and Norway. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition, conquered the Orkneys and the Shetlands, the Western Isles, and Man, and added them to the kingdom already beneath his sway. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the Battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1736 James, 10th Earl of Derby, died without issue male; the earldom went to his next male heir, but the sovereignty of the island went, with the Barony of Strange, to his heir general, James, Duke of Athole, on whose death the island descended to his daughter Charlotte, from whom, in 1765, Parliament purchased the sovereignty for £70,000. In 1827 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. Bills after having passed both Houses are signed by the Members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the members of the Court.

CAPITAL: Douglas, pop. 19,525 (Castletown, pop. 2,178, is the ancient capital); the other towns are Peel, pop. 3,631, and Ramsey, pop. 4,866.

THE CHANNEL ISLANDS

comprise the bailiwicks of Jersey and Guernsey (in the latter of which are comprehended the small islands of Alderney, Sark, and Herm, and the Minquiers and Ecréhou Rocks), situated off the north-west coast of France, at distances of from ten to thirty miles. They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles; and the population in 1891 was 92,272—Jersey, 54,518, Guernsey with Herm and Jérou 35,243, Alderney, 1,857, and Sark, 570. The land under cultivation in Jersey amounts to 20,000 acres, under about 2,500 proprietors, and more than 700 varieties of flowering plants and ferns, including many species not to be found among British flora, may be obtained there. The principal officer is the Lieut.-Governor, who represents Her Majesty. French is the official language of the local legislature, called the States, and of the Royal Court, but the old Norman dialect is still spoken by the people. The Bailiff, appointed by the Crown, presides over the States and over the Royal Court. The royal court is the judicial body, and is composed of twelve jurats elected by the people. The States consist of fifty members (excluding the president), viz., the twelve jurats, twelve rectors, twelve constables, and fourteen deputies, three for St. Helier and one for each of the eleven country parishes. The climate of these islands is mild, and the soil exceptionally productive. An abundance of early potatoes are grown for the London markets, 64,583 tons (value £435,192) being exported in 1896, and the famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The islands being all but exempt from taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre, on the east coast. In 1896 an act was passed removing certain impediments to marriage with a deceased wife's sister.

LONDON was a place of importance under the Romans, and was famed for its vast confux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1189, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality, four times, A.D. 1397, 1398, 1406, 1409); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1861, 1862; and Alderman Sir R. N. Fowler, 1883, 1885. The title of Lord Mayor was first bestowed in 1354 on Sir Thomas Legge, by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually

until 1394, when a charter of Richard II. directed them to be chosen for life. The Common Council was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than 4. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but it is commonly placed in A.D. 1189. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but Edward IV., whose cause was favoured by the citizens of London, gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected. He is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is mentioned as a royal officer in 1195; when he became a civic official is not known; but the Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as "ancient" officers in the Charter of Edward II. (A.D. 1319).

The Lord Mayor, Aldermen, and Principal Officers of the City of London.

<i>Lord Mayor.</i> £10,000.			
Lieut.-Col. the Rt. Hon. Horatio David Davies, M.P., V.D.	{ <i>Bishopsgate</i>	1889	1887 1897

Office—Victoria Embankment, E.C. Hours 10 to 5 (Sat. 10—1). Board Meetings Thursday, at 3 p.m. Was instituted (in accordance with Mr. Forster's Elementary Education Act) in 1870, and the first election took place on Nov. 29, 1870. From that date to Lady Day, 1897, accommodation in permanent schools had been provided for 492,357 children, and schools with accommodation for 54,762 are in process of erection. At Lady Day last there were upon the rolls of the Board Schools (including certain schools transferred, and temporary schools), 520,877 children. The staff of teachers comprised 9,470 adult, and 1,535 pupil-teachers and probationers.

When the census of all efficient and non-efficient schools in London was taken in 1871, the number of children on the roll was 320,143; the number upon the roll of efficient schools was (1896) 738,930; the number sent to industrial schools at the instance of the Board, up to Lady Day, 1897, being 23,845. In addition, 21,577 other cases had been referred to various voluntary agencies, &c., to be dealt with. The precepts for the year 1897-98 amount to £1,854,381, which is at the rate of 12'35d. in the pound.

MEMBERS (elected Nov. 25, 1897, for 3 years).

Chairman (vacant).

Priv. Sec.,

Vice-Chairman (vacant).

City of London.—*G. G. Leveson-Gower (P.); Miss E. McKee (P.); W. H. Key (M.); Canon Ingram (M.).

Chelsea.—Frederick Davies (M.); Thomas Huggett (M.); *Mrs. Emma Knox Maitland (P.); *Viscount. Morpeth (P.); William W. Thompson (M.).

Finsbury.—Miss Margaret Anne Eve (P.); *Chas. Bowden (P.); *Mrs. R. W. Dibdin (M.); *Earl Beauchamp (P.); *Rev. Jno. E. Rose (M.); Jas. Wilson Sharp (I.M.).

Greenwich.—George S. Warlington (P.); Rev. John Wilson (P.); *Rev. F. Storor Clark (M.); *Mrs. Bridges Adams (Lab.).

Hackney.—*Miss V. H. Morten (P.); Rev. Stewart D. Headlam, B.A. (P.); Graham Wallas (P.); *W. C. Bridgeman (M.); *John Lobb (I.P.).

OFFICERS OF

Clerk of the Board—George H. Croad, B.A. £1,400

Office, Spring Gardens, S. W. ; Hours 9.30 to 5 ; (Saturday 9.30 to 2).—Meets on Tuesday at 3 p.m.

The London County Council was constituted, in common with county councils throughout England and Wales, under the Local Government Act of 1888. The main principle of the Act is that it adapts to counties that form of municipal government which had previously pertained only to English boroughs.

London is an administrative county, covering an area of 121 square miles, with boundaries conforming with those of the area over which the late Metropolitan Board of Works exercised its jurisdiction under the Metropolis Management Act of 1855; so that it has absorbed, so far as rateable value is concerned, about seven-eighths of Middlesex, about two-thirds of Surrey, and nearly one-third of Kent; and in it the City takes its place as an electoral division.

The City of London was not much affected by the Act. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties. Such matters as necessitate the consideration of both the administrative county and the non-administrative county are referred to "The Standing Joint Committee" of the London County Council and the London Quarter Sessions.

The Administrative County of London has no jurisdiction over the police, in that respect differing from other counties.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman (as at present), 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, and will all retire in March, 1898, the third council having been elected in March, 1895. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same except as to the term of office. The first meeting of the London County Council was held on the 21st March, 1889, under the presidency of Lord Rosebery. The present Chairman is Dr. W. J. Collins.

The powers, duties, and liabilities of the Council are: *First*, those formerly belonging to the Metropolitan Board of Works in connection with the raising and loaning of money; main-drainage, and the sanctioning of new sewers constructed by vestries; fire brigade; parks and open spaces; works for prevention of floods by the Thames; bridges over the Thames within the county (and outside the City), and other Thames crossings, including the new tunnel under the Thames at Blackwall and the free ferry at Woolwich; street improvements; controlling the width of new streets, the building line, and the naming and numbering and temporary closing of streets; maintaining subways under streets for gas and water mains, &c.; supervising buildings and district surveyors; dangerous structures; buildings unfit for habitation; structure of theatres and music-halls; artisans' dwellings; cattle diseases; offensive businesses; dairies and cowsheds; explosive substances and petroleum storage; infant life protection; tramways; locomotives for roads; gas, gas-meter, and electric-meter testing; and constant supply of water. *Secondly*, those transferred from former county justices in connection with the granting of music

and dancing licences in the Metropolis, including the City; asylums for pauper lunatics; reformatory and industrial schools; testing weights and measures; county buildings; coroners; and other minor matters. *Thirdly*, powers transferred from various authorities with regard to highways; licensing of houses or places for the performance of stage-plays beyond the limits of the Lord Chamberlain's authority; licensing of slaughter-houses and of cow-houses; and the supervision of common lodging-houses. *Fourthly*, new powers conferred by recent Acts with respect to technical education; Bills in Parliament, and actions at law; registration of electors; medical officers of health; inspection of factories to secure means of escape from fire; suppression of nuisances and regulation of overhead wires and sky-signs; and the appointment of inspectors under the Shop Hours Act, 1892. As the central representative body in London, the Council also interests itself in the thousand and one things affecting the welfare of the people of London as a whole, and has delegates on the Thames and Lea Conservancy Boards, and numerous other boards, charities, &c.

The Council meets weekly, and receives reports from its 26 standing committees. During the year ended March 31, 1897, upwards of 1,500 meetings of committees and sub-committees were held. The Finance Committee has important statutory powers, and its duties are of a very responsible nature. The Council is the principal money-raising body for all the local authorities of the Metropolis, and has a gross debt of £37,300,000, a Sinking Fund of £18,200,000, and an annual maintenance expenditure of £3,500,000. The Asylums Committee has special powers under the Lunacy Acts, and manages Hanwell, Colney Hatch, Banstead, Cane-hill, and Claybury Asylums. The last-named was opened during 1893, and the Committee is actively engaged upon providing two further asylums, each for 2,000 patients, one at Bexley and one near Epsom. The Industrial Schools are under the care of another Committee: the schools at Feltham and Mayford accommodate 1,000 boys. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts; they have in hand the clearance of insanitary areas at Somers Town, St. Pancras, and Clare Market, Drury Lane, and of numerous smaller areas, and the building of working-class dwellings. The Council has established a model municipal lodging-house capable of accommodating 324 men, at Parker Street, Drury Lane. The most important work which has engaged the attention of the Bridges Committee for some years past is the tunnel under the Thames at Blackwall. The tunnel was opened in May, 1897, the opening ceremony being performed by H.R.H. the Prince of Wales on behalf of Her Majesty the Queen. The tunnelling work was done in compressed air, the bed of the river here being of a very treacherous character, and the whole undertaking has been remarkably free from serious accidents. The tunnel is 6,200 feet in length, and has an internal diameter of 24 feet 3 inches. The total cost amounts to about £1,400,000. The contract price for the engineering work (Messrs. S. Pearson & Son) was £371,000. The Woolwich Free Ferry is used by more than 4,400,000 passengers and 380,000 vehicles per annum. The rebuilding of Vauxhall Bridge is proceeding; and a foot-tunnel under the Thames at Greenwich was authorised by an Act of last

session. The formation of new approaches to the Tower Bridge is under the care of the Improvements Committee, also the widening of the Strand at Holywell Street. Several smaller but important improvements are also being carried out. The Fire Brigade, directed by the Fire Brigade Committee, has been much increased since the Council came into existence: the authorised staff now numbers nearly 1,000 men, and several new stations are being built, while old stations are being improved and enlarged.

The Council having resolved to exercise its powers of purchase under section 43 of the Tramways Act, 1870, a length of $4\frac{1}{4}$ miles was purchased from the London Street Tramways Co. in 1895, and notice of purchase was given in respect of other sections which had come under the purchase clause. A proposal was thereupon made by the North Metropolitan Company that with regard to the tramways of that Company and of the London Street Company, instead of a piecemeal purchase extending up to 1910 under compulsory powers with costly legal proceedings, the whole system should be handed over to the Council forthwith at a stated price, on the condition that the company should have a lease of the lines for the next 14 years. Lengthy negotiations were entered into, and in October last the purchase of the lines of these two companies within the county of London, and the depots, stables, &c., connected therewith, was completed, the purchase price being £690,581. The cost of the $4\frac{1}{4}$ miles purchased in 1895, with one depot, was £101,798, settled by arbitration. Thus a system extending over about 50 miles has become vested in the Council as representing the ratepayers, and, up to Midsummer, 1910, they will receive rents amounting to nearly £60,000 a year, together with 12½ per cent. upon the increase in gross receipts over the year 1895. These rents will suffice to pay interest on the debt and a sinking fund for its redemption, and then leave a profit equal to nearly a farthing rate. Proceedings are also being taken with regard to the tramways on the south side of the river.

Perhaps the most popular work of the Council is that connected with its parks and open spaces: 2,656 acres were taken over from the late Board, and over 1,000 acres have since been added. Bands are employed by the Council to play during the summer months.

The disposal of sewage is the work of the Main Drainage Committee. All the sewage of London is conveyed by 82 miles of main intercepting sewers to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, the harmless effluent being allowed to flow into the river, and the sludge, amounting to upwards of two million tons in a year, being carried out to sea by a fleet of six specially-constructed vessels. The improved condition of the river is a highly satisfactory result. The engineering experts who advise the Committee are, however, of opinion that extensive works are still needed to prevent the discharge of crude sewage into the river at the storm overflows in times of heavy rain, and this matter is receiving attention.

In 1893 a "Works Department" was formed for the purpose of carrying out building, painting, sewer construction, paving, and other works, without the intervention of contractors. A special committee, appointed at the end of 1896 to inquire into the constitution and working of the Department, reported early in 1897, recommending the appointment of a Works Board constituted of

members drawn from the various spending committees, but the Council on the 28th June, after a prolonged discussion, resolved that works should in future be carried out by the Manager of the Department, who should be responsible to the Spending Committees in the same way as a contractor would be; the finances of the department were placed under the control of the Finance Committee.

The question of water supply is still engaging serious attention. Bills were promoted in Parliament in 1895, 1896, and 1897 to empower the Council to purchase the undertakings of the eight London Water Companies, but were defeated; a Royal Commission has been appointed to inquire into the whole question of the London watersupply.

Twenty members of the Council, together with fifteen representatives (nominated by the Council) of other bodies or interests, constitute the Technical Education Board, charged with the performance of duties under the Technical Instruction Acts.
