- Zunz, Siegfried Rudolf, 57, of H. R. Merton & Co., metal merchant (*Dec. 31, 1899*), £125,391 gross, £115,200 net.

We published in last year's Almanack, a list of some of the bequests for Charitable and other public uses, in the United Kingdom, under Wills proved in 1899. The amount of these bequests, under 43 wills disposing of personalty to the aggregate amount of £8,203,600, was about £1,486,950. Under 466 of those reported during the eight years, 1891-98, disposing of personal estate in the United Kingdom to the aggregate amount of £75,968,905, there were pecuniary bequests for charitable, religious, and educational purposes, amounting to about £10,119,671, in the proportion of not quite 13¼ per cent. of the amount of the estate. The charitable bequests under the wills of 150 ladies were equal to 25¼ per cent. of their personal estate; and those of 316 testators were in the proportion of 11¼ per cent. The annual average of the bequests for charities during the eight years, was altogether about £1,250,000. The amount of "free personalty" charged with the Death Duties since 1888-89, has been as follows:—

	£	£
1888-89 ..	145,610,000	1894-95 .. 141,421,000
1889-90...	155,347,000	1895-96... 162,539,000
1890-91...	165,320,000	1896-97... 153,935,000
1891-92 ..	198,397,000	1897-98... 172,972,000
1892-93 ..	163,577,000	1898-99... 176,672,000
1893-94...	159,688,000	1899-1900 158,971,000
	<u>£979,919,000</u>	<u>£1,005,640,000</u>

The amount of "free personalty" charged with the Death Duties in the first three-quarters of the financial year, 1899-1900, was only slightly more than in the previous year, but owing to the high rate of mortality from influenza and pneu-

monia, the receipt from the Death Duties in the last quarter of the year was the largest of which there is any account, and the total of personalty exceeded by more than 5½ millions, or about three per cent., that of the great influenza year, 1891-2. It must be borne in mind, however, that nearly one-half of the capital of the country is now invested in shares and debentures of companies, and that the valuation of capital for the Death Duties was on the whole at a much higher rate in 1899-1900 than in 1891-92. If the valuation for the six years, 1894-95 to 1899-1900, had been upon the same basis as in the previous six years, the total of over 1,000 millions would probably have been reduced to less than 950 millions. The proportion of charitable bequests to the whole of the personalty disposed of by wills in each year for some years past has apparently been at the rate of about 1½ per cent. In each year bequests of over £100,000 each, under four or five wills, have accounted for one-third or more of the total amount of the charitable bequests of the year, and in each year this small number of very large bequests has been forthcoming. An important bequest of the present year is that of Professor David Edward Hughes, whose residuary estate, subject to annuities for his widow and his sister and brother-in-law, is left in trust for the Middlesex, London, King's College, and Charing Cross Hospitals, which will apparently receive eventually under this bequest about £300,000 or £350,000. Mr. W. R. Sutton, of Golden Lane, carrier, left his residuary estate, which he seemed to expect would be between £20,000 and £25,000, in trust to found "Sutton Model Dwellings," but the whole of his estate has been valued, "so far as can at present be ascertained," at only £8,673.

	Value of Personalty.	Amount of Bequest about.
Professor David Edward Hughes, F.R.S.	£472,704	£300,000
Henry Vaughan, of Cumberland Terrace	229,916	230,000
Manasseh Gledhill, of Manchester	210,982	150,000
Charles William Willock Dawes, of Petworth	112,303	85,000
Siegfried Rudolf Zunz, of the Metal Exchange	115,200	85,000
Miss Emily Frances Dalton, of Leicester	70,475	50,000
Richard Bowerman West, of Exeter	340,256	50,000
Sir Henry Tate, Bart., of Streatham (contingent reversion). ..	1,228,097	50,000
Henry Pershouse Parks, of Malvern, ironmaster	58,320	50,000
Mrs. Emily Dowling, of Bromley, Kent	80,397	40,000
Mrs. Margaret Tyers Weller Poley, of Brandon, Suffolk	34,193	36,000
Mrs. Marian Leigh, of Halifax	88,298	34,000
Jesse John Tustin, of Burstow Hall, Horley	35,044	30,000
Richard Smith, of Marlborough Hill	30,074	25,000

Jacob Feis, of Fell Street, glove merchant	89,560	17,500
James Downing, secretary to Earlswood Asylum	17,369	15,000
Arthur Albright, of Edgbaston	112,305	14,500
William Houldsworth, of Coltness Iron Co.	379,495	15,000
Rev. William Manners Sutton, of Brighton	100,863	13,500
Richard Brooke, of Scarborough	59,463	13,500
William Pryce Michell, of Whitchurch, Devon	124,270	13,000
Miss Louisa Eliza Gilbert Hall	15,205	12,000
Miss Mary Ann Driver, of Tettenhurst	225,200	12,000
Hugh Frederick Hornby, of Liverpool	159,329	11,000
Miss Edith Gertrude Price, of Margate	22,522	10,500
Dr. Daniel John Leech, of Whalley Range	11,915	10,000
George Washington Charters, of Belfast	389,376	10,000
Henry Spencer Ashbee, of Hawkhurst	62,989	10,000
Mrs. Ann Baker, of Wimbledon Park	35,305	10,000
	<u>£5,594,099</u>	<u>£1,532,650</u>

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting the *Institut de France*. The special object of this institution is the composition of the historical Dictionary of the French Language. It was founded in 1635, by Cardinal Richelieu, and re-organized in 1816. The other Academies are as follows:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 members.

ACADÉMIE DES SCIENCES, founded 1666, divided into 11 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6.

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of foreign correspondents.

MEMBERS OF THE ACADEMIE FRANÇAISE.

Legouvé, Ernest Wilfred Gabriel March 1855, *born in Paris, 1807, elected March, 1855, predecessor Ancelet.*

Brogie, Duc de, Jacques Victor Albert, *b. in Paris, 1821, e. 20 Feb., 1862, p. Lacordaire (father).*

Ollivier, Olivier Emile, *b. at Marseilles, ■ July, 1825, e. 7 April, 1870, p. De Lamartine.*

Mézières, Alfred Jean François, *b. in Paris, 1826, e. 29 Jan., 1874, p. St. Marc-Girardin.*

Boissier, Marie Louis Antoine Gaston, *b. at Nîmes, 1823, e. 8 June, 1876, p. Patin.*

Sardou, Victorien, *b. in Paris, 7 Sept., 1831, e. 7 June, 1877, p. Autran.*

Audiffret-Pasquier, le Duc d', Edmond Armand Gaston, *b. in Paris, 1823, e. 24 Dec., 1878, p. Bishop Dupanloup.*

Rousse, Aimé Joseph Edmond, *b. in Paris, 1817, e. 13 May, 1880, p. Jules Favre.*

Sp sales of hunters, May, Aug, and Dec. Bloodstock May and Aug.

PRINCIPAL FAIRS IN SCOTLAND AND IRELAND, AND WELSH HORSE FAIRS.

SCOTLAND.

MANY of the principal Fairs in Scotland have lapsed, and those that are still held have declined in a great measure in recent years, so much so in fact, that in a few more years we may expect to see them become defunct. This decadence is in consequence of the rapid growth of the Auction-mart system, which affords sellers and buyers certain facilities and advantages which formerly, under the old system, did not exist. Our object is to furnish such information as may be useful, particularly to English buyers who intend visiting Scotland for the purpose of purchasing the native cattle or sheep.

WEST HIGHLAND CATTLE.—Important special sales are held in May, June, Sept., Oct. and Nov., at Stirling, Oban, Perth, Inverness, and Fort William.

FAIRS.—Falkirk Trysts (Larbert Station), and Tues. in Aug.; and Tues. and day before in Sept. and Oct. All the best cattle are sold on the first day at each of these fairs.

ABERDEEN POOLED ANGUS CATTLE.—The best quality of this remarkable beef producing breed of cattle is very much in private breeder's hands, and although some excellent stores can be bought in the Aberdeenshire and Forfarshire Auction marts in the Spring and Autumn, it is from the breeders that most English buyers draw their supplies.

GALLOWAY POOLED CATTLE.—Castle Douglas, Newcastle and Lockerbie are the only Auction marts in Scotland where large sales of this class of cattle are held in the Spring and Autumn. Very large sales of pure-bred Galloway, and cross-bred (Blue Grey) cattle are also held on the Border, at the Carlisle Auction marts in the Spring and Autumn.

BLACK-FACE (HORNED) SHEEP.—Practically, all the fairs where this class of sheep was formerly sold are now defunct, except, perhaps, Grantown in the Spring, where young sheep and lambing ewes are sold. For high-class quality, Lanark is the premier mart, and very large sales of young sheep are held in the Spring; for lambs in Aug. and Sept.; and for cast ewes in Oct. Lockerbie, Peebles, Stirling, Perth and Inverness, Ayr, and Thornhill, Dumfriesshire are marts where large numbers of black-face sheep are sold during the Spring and Autumn.

CHEVIOT SHEEP.—Special sales are held, principally in the Autumn, for this class of sheep at Hawick, Newcastle, and on the Border at Rothbury and Bellingham.

NORTH OF SCOTLAND CHEVIOT SHEEP (which are generally a larger kind than the Border sheep), are sold in large numbers in the Autumn at the Perth and Inverness marts.

CROSS-BRED SHEEP (Border, Leicester and Black-face) are mostly sold as

lambs in Aug. and Sept. at all the South of Scotland marts, perhaps the best quality class being at Carlisle Auction marts at the fairs, Aug. 25 and Sept. 9. A good class of Cross-bred lambs, mostly by a Wensleydale (Yorkshire) ram out of a Black-face ewe, can be obtained at the Castle Douglas and Ayr marts. Three-part-bred, and Half-bred (Border, Leicester and Cheviot) lambs are sold in July and Aug. at St. Boswells; also at Hawick, Peebles, Rothbury, Newcastle and Lockerbie marts.

KELSO GREAT RAM SALES, and Fri. in Sept.

CLYDESDALE HORSES.—These horses are sold in great numbers at all the South of Scotland fairs, and although cattle and sheep have gone into the Auction marts, the supply of horses at the fairs shows no appreciable falling off. The principal fairs are: Dumfries, Tues. and Wed. after Castle Douglas (Candelmas fair) in Feb.; Wed. before May 25; Sept. 24 and 25, if Tues. and Wed. if not, Tues. and Wed. after: Wed. before Nov. 22. Castle Douglas: Feb. 11 if Mon., if not, Mon. after (Candelmas fair); Sept. 23 if Mon., if not, Mon. after; Mon. before Nov. 22. Glasgow: 2nd and 4th Wed. in Jan.; every Wed. in Feb. and March; 1st and 2nd Wed. in April; 1st Wed. in May, June, July, Aug., Sept., Oct. and Dec. Rutherglen: Fri. after May 4; Tues. after June 4; Fri. after July 25; Fri. after Aug. 25; Wed. before 1st Fri. in Nov. Edinburgh: Tues. and Wed. after 2nd Mon. (Hallow fair); and Wed. after Hallow Fair (Big Wed.). St. Boswells: July 18. Falkirk Trysts: 2nd Tues. in Sept. and Oct. Clydesdale horses are also sold at the Ayr, Lanark, Edinburgh, Stirling and Perth Auction marts, also at the Border fairs held at Longtown (Cumb.), Carlisle, Stagsbank, Newcastle, Wigton (Cumb.) and Cockermonth, dates of which are shown in the English List.

IRELAND.

DUBLIN HORSE SHOW usually on Tu and three following days in third full week in Aug.

PRINCIPAL HORSEFAIRS.—Armagh (co. Armagh), 1st Thurs. in each month. Athlone (co. Roscommon), 3rd Mon. in Jun. and March. Ballinasloe (co. Galway), 1st Tues. in Oct. and four following days. † This race was established in 1776, but did not receive the name until 1778, when it was named out of compliment to Colonel St. Leger, and run for the first time on Doncaster Town Moor.

The following table gives the winners of the Derby for the last 50 years. In that period Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. The Duke of Portland, Lord Rosebery, and Mr. Bowes have won twice consecutively, and the Prince of Wales, Lord Falmouth, Mr. W. P'Anson, Mr. Merry, and Sir F. Johnstone, have been twice victorious at intervals of four to eight years.

Year.	NAME AND OWNER OR WINNER.	Betting.	Jockey.	Trainer.	Number of Subscriptions.	Value of Stakes.	No. of Runners.	Time.
						£	m. s.	
1851	Sir J. Hawley's Teddington	3 to 1	J. Marson	T. Taylor	192	...	33	2 51

SWIMMING.

CAPTAIN MATTHEW WEBB swam from Dover to Calais in 21 hrs. 45 mins., August 24 and 25, 1875. Fastest 100 yards, J. H. Derbyshire (amateur) 60 1-5 secs., Nov., 1898, Manchester. Longest time under water, Miss E. Wallenda, 4 min. 45 ½ secs., in a tank, Alhambra, London, Dec. 24, 1898. Longest plunge (amateur), 8ft., by Major W. Taylor, Bootle Baths, 1899, without time limit.

The greatest distance walked in 1 hour was 8 m. 270 yds. by W. J. Sturgess in 1895; in 2 hours W. Perkins (1877), 15 m. 824 yds.; in 3 hours H. Thatcher (1882), 25 m. 456 ½ yds. and in 4 hours W. Franks (1882), 27 ½ miles.

Putting the Weight, 16 lbs. G. R. Gray, 47ft., Throwing the Hammer, 16 lbs. J. Flanagan 106ft. 4in. Both in America from 7ft. circles under A.A.U. rules.

¹ These are the only records generally accepted, though it is certain that several professionals have travelled the distances a yard or two yards quicker. Geo. Seward's apocryphal 94 secs. is no longer accepted. M. W. Long in 1900 ran a straight quarter in 47 secs. in America.

² After becoming a professional in a match with Cummings, Aug., 1886, beating previous record by nearly 4 secs.

³ In America F. P. Murray is credited with 1 m in 13 min. 29 3-5th secs., ½ miles in 21 min. 9 1-5th secs. A British amateur records—100 yds., 10 secs., A. Wharton, C. Bradley, A. R. Downer, F. W. Cooper, R. W. Wadsley, and C. R. Thomas; 220 yds., 14 4-5th secs., by C. G. Wood; 300 yds., 12 2-5th secs., by C. G. Wood; quarter, 48 ½ secs., by H. E. L. Tindall and E. C. Bredin; 500 yds., 58 ½ secs., and 600 yds., 1 m. 11 2-5th secs., both by E. C. Bredin. Half-mile, 1 m. 54 3-5th secs., by F. J. K. Cross. Broad Jump, 24ft. 3in., by W. J. M. Newtown. High Jump, 6 ft. 4 ½ in., by P. Leahy. Throwing the Hammer (16 lbs., 9 ft. circle), 163ft. 2in., by J. Flanagan. Putting the Shot (16 lbs., 7ft. sq.), 48ft. 2in., by D. Horgan.

⁶ The pole-jumping record is held by an amateur, R. D. Dickinson, with 12 ft. 6in. at Kidderminster, 1808. ⁷ Made in N. Zealand. ⁸ Made in America. ⁹ Not music-hall exhibitions but all doubtful. ¹⁰ Made in Australia. ¹¹ Balls jammed in mouth of pocket.

N.B.—The following records (amateurs) are authentic: 120 Yards Hurdles in England G. B. Shaw, 15 4-5th secs., on grass. In America, on cinders, A. C. Kraenzlein, 15 5-5th secs. Walk, London to Brighton, 52 ½ miles, E. Knot, 8 h. 56 m. 44 secs., 1897. Throwing the cricket ball, 227yds. 1ft. 3in. by W. H. Game, at Oxford, 1873. Greatest distance in 6 six days professional contest, 623 m. 1,320 yds., by G. Littlewood, New York, 8th December.

1,000	A. E. Walters	Auteuil	1900	23 20 50 1/2

All these records were made with motor pacing.
 † Flying starts.
 On Sept. 17-18, 1899, M. Cordang, at the Hague, Holland, rode 640 miles 196 yards in 24 hours but owing to his suspension at the time by the U.V.F. the record is not recognised. At Madison Square Gardens, New York, December, 1898, Charles Miller rode 2,007 miles 4 laps in 142 hours.
 Demester, at Auteuil, in Nov., 1900, rode a motor tricycle 45 miles 169 yards in 60 minutes.

Cricket.—Highest score, A. E. Stoddard, 485, Hampstead v. Stoics, 1886; A. E. J. Collins (avg 13) 628 in house match at Clifton College, 1899. English Largest gross score, Orleans Club v. Rickling Green, 920. A. W. Warwickshire. In a first-class match, Yorkshire, 887, v. Warwickshire. May 8, 1896. Also in first-class cricket, highest individual score, A. C. MacLaren, 424, for Lancashire v. Somerset, at Taunton, July 1895. Lowest score in innings, 12, by Oxford University (one man absent) v. M.C.C. and Ground, at Oxford, May 1877. Most runs made in a year in England, 3,159, by K. S. Ranjitsinhji, in 1899, in 55 innings (7 times not out) average 57.9. England v. Australia matches, 32 in Australia, 24 in England. England won 26, Australia 20, drawn 10, up to end of 1899. Total 56.

Trotting.—Fastest mile, in America, 2m. 3/4s. by The Abbot, 1900. Fastest pacing mile, 1m 59 1/2s., by Star Pointer, 1897.

Road Records.

24 Hours.—Safety (F. R. Goodwin, 1898), 428 miles paced, ordinary bicycle, 312 miles (J. F. Walsh, 1891); single tricycle (F. T. Bidlake), 356 1/2 miles, 1894; tandem tricycle, 333 miles (Holbein and Bidlake, 1893); tandem safety (M. A. Holbein and J. A. Bennett), 397 1/2 miles, 1895.
 100 Miles.—Safety 4h. 16m. 35s. (A. A. Chase 1897, paced); ordinary bicycle 6h. 22m. 15s. (J. F. Walsh, 1891); tricycle 5h. 15m. 57s. (F. T. Bidlake, 1896); tandem tricycle 5h. 30m. 31s. (S. F. Edge and J. E. L. Bates, 1891). Tandem safety 4h. 45m. 1s. (A. and L. Ilsley), 1898.

The Land's End to John o' Groats record; safety (G. P. Mills), 3 days 5m. 49s., 1894; tricycle (G. P. Mills), 3 days 16m. 47s., 1893. London to Brighton and back; tricycle (J. Parsley), 6h. 18m. 28s.; safety (W. J. Neason), 5h. 6m. 42s., 1897; tandem safety (P. Wheelock and G. Fulford), 4h. 54m. 54s., 1899; London to York (F. R. Goodwin), 10h. 16m.; 1,000 miles (T. A. Edge), 4d. 9h. 19m., 1896; Bath to London and back (F. W. Barnes), 11h. 48m. 42s., 1897. Tricycle, J. G. Gibb's 14h. 3m. 37s., 1897.
 12 Hours' Safety Road Record, 226 1/2 miles, 1900, by H. Green, unpaced.

English 1 Hour Records (Path).

Safety, A. A. Chase, C. P., July, 1900, (37m. 196yds.); ordinary, B. W. Atlee, 1893 (21m. 180yds.); tricycle, R. P. Clarke, 1897 (25m. 1085yds.); tandem tricycle, 23m. 310yds. (L. Stroud and J. E. L. Bates, 1894); tandem safety (S. MacGregor and G. A. Nelson, 1897), 31m. 1,660yds. The amateur tandem safety record is 29m. 1,110yds. (C. Heydon and H. Thackthwaite), 1898.

INTERNATIONAL SKATING RECORDS.

Dist. Meters.	Name.	Place.	Time.	Year.
500	P. Oestlund	Davos	H. M. S. 45 1/2	1900
1,000	P. Oestlund	Davos	0 0 24	1900
1,500	P. Oestlund	Davos Platz	0 0 32	1900
5,000	J. J. Eden	Hamar	0 8 37 1/2	1894
10,000	P. Oestlund	Davos	0 17 50 1/2	1900

Eden and Oestlund must have beaten several of the English measurement times in the above records.

All Foreign Records in miles are doubtful. With a wind, P. Donoghue, in 1887, skated 1 mile straightaway on the Hudson River in 1 min. 12 3/5ths secs. Our champion, Fish Smart, in 1883, skated 1 mile straightaway, with a flying start, in 1 min. dead, no wind; and in 1893, J. E. Aveling, at Lingay Fen, skated a quarter-mile in 38 1/2 secs.

With the wind, or on doubtfully-measured tracks, much faster times than the above are recorded. H. Hagen, of Norway, a professional, on Feb. 28, 1892, skated a half-mile in 1 min. 20 1/2 secs., and is also said to have skated 500 metres in 8 min. 33 secs. in a 10,000 metres race. In England, 1893, Marten Kigma, a Dutch professional, skated a mile with three turns in 3 min. 8secs.

COURSING.—WATERLOO CUP.

Year	NOMINATOR.	WINNER.	RUNNER-UP.

GOLF.

1900. Oxford won by 69 holes to 0. Of the 22 matches played, 11 have been won by Cambridge and 10 by Oxford one (1866) having been halved.

Registration of Births and Deaths, AND OTHER USEFUL INFORMATION.

BIRTHS.

When a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration thereof rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at ■ stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to ■ penalty be avoided, but the registration of ■ birth will be free of charge when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence, or at the house where the child was born, when the Registrar on so attending to register may claim a fee of one shilling. After three months ■ birth cannot be registered except in the presence of the superintendent Registrar, and on payment of fees to him and the Registrar. After twelve months ■ birth can be registered only on the Registrar-General's express authority, and on payment of further fees. It is important to persons of all classes to be able to prove their age and the place of their birth. The only legal proof of these is afforded by the civil registers, which the law now requires to be made as above described. The child's baptismal name, if changed, or not previously given, may be inserted in the register within twelve months after the registration of the birth.

DEATHS.

When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The nearest relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased in the same (Registrar's) sub-district. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by ■ certificate of the cause of death, signed by ■ registered medical practitioner, if any such attended the deceased. The written

notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at ■ stated time and place. Any person failing to attend on this application will be liable to ■ penalty of forty shillings. Whenever the deceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

CORONERS' INQUESTS are held in all ■ of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are supposed by the law to demand inquiry. Still, it often occurs that a medical man quite familiar with the case will give his certificate that the death arose naturally, from heart disease, apoplexy, &c., and in such case a coroner's inquest is dispensed with. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person having been duly summoned ■ ■ witness is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting jurymen being £5. The exemptions of persons from serving on juries contained in Jury Acts also apply to Coroners' inquests. There have

been many instances of Coroners' inquests into the cause of fire, even where there is loss of life, and this is an excellent practice.

VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1893, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth of the child he satisfies two justices or a stipendiary or metropolitan police magistrate that he conscientiously believes that vaccination would be prejudicial to the health of the child and within seven days thereafter delivers to the Vaccination Officer for the district a certificate of such justices or magistrate of such conscientious objection. It will be seen that a conscientious objector to vaccination can thus escape all penalties, but a person who does not obtain this certificate of exemption will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1893, issued under the Vaccination Act, 1893, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions.

MARRIAGE BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. Formerly banns might be proclaimed on Church holidays, but the Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony. If there is morning service the right time for banns is after the Nicene Creed; and if there be afternoon or evening, and no morning service, then the right time is after the 2nd lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the Established church of the parish. In like manner in Scotland the publication takes place in the parish church, even where the parties are married in the

Anglican or Episcopal church. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage. The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage will be null and void (*Misgley v. Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may licence a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on a registrar's certificate without banns.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 419). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two witnesses present, and that these witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may under this Act refuse to marry a divorced person, but he must allow another clergyman of the diocese to perform the service.

Although the presumption of law is in favour of the validity of a marriage, great care should be taken to comply with the directions of the several statutes in every particular. Where it is impossible to comply literally, the parties must do all they can to comply with the law.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 1d. Searches on the register-books may be made on payment of small fees, viz., 1s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knightrider Street, or at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays, 10 to 2), are available for London and all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties; nor will any agent be allowed to interfere, either in procuring or paying for the licence. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to about thirty shillings, in addition to the cost of stamps, 12s. 6d. The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15s. to £2 12s. 6d. By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, an oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, this being the usual mode of obtaining a marriage licence, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury (after application at the Faculty Office, 23 Knightrider St., Doctors' Commons), under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must be such as to meet with His Grace's approval. Fees for licence stamp, &c., average £29 8s.

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

NOTICE AND DECLARATION.—In case of an intended marriage by Certificate at a register office (i.e., the superintendent registrar's office), or in a certified building (i.e., usually a Roman Catholic or Nonconformist church or chapel), it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A.) to the superintendent registrar of the district within which the parties shall have dwelt for the space of seven days then next immediately preceding; or if the parties dwell in different superintendent registrars' districts, a like notice must be given to the superintendent registrar of each district: every form of notice contains solemn declarations that there is no lawful hindrance to such marriage, and that the necessary

residence, the ages of the parties, and consent of parent in case of a minor; such notice and declarations must be signed before a registration officer of the district, namely, a superintendent registrar, or registrar of births and deaths or marriages or the deputy of some such registrar. If the marriage is intended to be had by licence, it is necessary for only one of the parties to give notice to the superintendent registrar, in manner before mentioned, in whose district he or she has resided for the space of fifteen days immediately preceding, and if the other party reside in a different superintendent registrar's district, it is not requisite that notice should be given to such last-mentioned superintendent registrar; but one of the parties must, for the space of fifteen days immediately preceding the giving of the notice, have had his or her usual place of residence within the district of the superintendent registrar to whom such notice is to be given. In case a minister did not happen to attend and the parties wished, they might be married before the registrar without any religious ceremony.

CERTIFICATE.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

LICENCE.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one whole day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the licence.

MARRIAGE CEREMONY.—After the expiration of twenty-one days after the entry of the notice if the marriage is intended to be had without licence, or of one whole day if by licence, the marriage may be contracted at the register office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties is required to declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.;" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." A wedding-ring is usually required. In case a minister does not happen to be present, and the parties wish it, they may be married in any chapel or building certified for marriages, the registrar only being present with the two witnesses. The marriage laws of Scotland are peculiar, and cannot here be set out; but it may be mentioned that "Gretna Green weddings" are obsolete, a period of residence being now required by law. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in all places where the Welsh tongue is commonly used. If both parties are of the Jewish persuasion, they must

give notice to the registration officer, in manner before mentioned, and may marry according to their usages in a synagogue or private dwelling-house, and at any hour of the day; the marriage must be registered by the secretary of the synagogue to which the husband belongs. If both parties are members of the Society of Friends, they must give notice to the registration officer in manner before mentioned, and may be married in a Friends' meeting-house, and the marriage must be registered as soon as conveniently may be after its solemnization by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a registrar of marriages is not requisite at such marriages of Jews or members of the Society of Friends. The provisions as to Notices and Licences given above do not apply to Ireland. [Marriages before Registrar in that country are regulated by 7 & 8 Vict. c. 81, and 26 & 27 Vict. c. 27; the Act regulating marriages in that country in places of Worship is 33 & 34 Vict. c. 110].

Under the Marriage Act, 1893 (which does not apply to Scotland or Ireland or to marriages according to the usages of the Society of Friends or of Jews), marriages may be solemnized in Nonconformist places of worship, provided they are duly registered for the solemnization of marriages without the presence of a Registrar, provided "the authorised person" (which means a person certified as having been duly authorised for the purpose by the trustees or other governing body of the building) is present and no notice has been given to the Superintendent Registrar that the parties to the marriage require the presence of a Registrar.

Where a marriage is solemnized under this Act each of the contracting parties shall in some part of the ceremony make the following Declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D."

And each of the parties shall say to the other:—

"I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband];"

or, in lieu thereof:—

"I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

The Act provides for the registration after marriage by "the authorised person" The Act provides for the payment to the Superintendent-Registrar of the district in which the registered building selected for the marriage is situated, of an additional fee of 6s. 6d. if the marriage is by licence, and otherwise a fee of 4s., but this provision for additional fees is only to remain in force for 10 years from the passing of the Act.

CERTIFICATE OF BIRTH, DEATH, OR MARRIAGE.
—On giving the name and date this can be obtained at Somerset House on payment of 3s. 7d. made up as follows: 2s. 6d. for certificate, 1s. for search, and 1d. for stamp. Enquiries by post from residents in the Metropolis will not be considered; attendance in person or by agent is necessary. Certificates are also obtainable from the superintendent registrar of the district in which the birth, death, or marriage took place at the above rate.

For entering notice of a marriage by licence into the marriage notice-book, 1s.; stamp duty, 2s. 6d.	3 6
For every certificate of notice of a marriage without licence	1 0
For every certificate of notice of a marriage by licence	1 0
For every licence for marriage	30 0
Stamp duty on licence for marriage	10 0
For every marriage solemnized in the presence of the Registrar without licence	5 0
Ditto, by licence	10 0
For every certificate of marriage	2 6
Stamp duty on ditto	0 1

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed 27th June, 1892; came into force 1st Jan., 1893. Order in Council passed 28th Oct., 1892, laying down Regulations for Marriages under the Act.

British subjects desirous of being married at an embassy, legation, or consulate, must give seven days' notice of the intended marriage, but one of the parties at least must have resided for that time in the district immediately preceding the giving of such notice. After the suspension of such notice for fourteen days the marriage may take place, provided one or both parties have resided for three weeks immediately preceding within the consular district. In cases where one of the parties only has dwelt within the district of the officer by whom the marriage is to be solemnized, the non-resident party, if resident abroad, must give notice to the Consular Officer for the district in which he or she resides; or, if resident in place in the United Kingdom, the same notice must be given as if that party were about to be married at that place, and in England or Ireland shall be given to the superintendent registrar, or registrar, and in Scotland shall be given by proclamation of banns. In either case it is necessary that the non-resident party shall have had his or her abode in the marriage district (whether in the United Kingdom or abroad for three consecutive weeks immediately preceding the date of the declaration required before the marriage can take place, and notice of the intended marriage must be given during those weeks. A Consular Officer holding a warrant for a district can only solemnize a marriage at his own official house. He cannot solemnize a marriage at the office of any subordinate consular officer, or elsewhere. No marriages performed at any other place are valid under the Foreign Marriage Act. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present; and an oath, declaration, or affirmation must be made by both parties with reference to their age, and parents' consent, if minors.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of 18th August, 1892, and are payable to Her Majesty's Govt.:—

For receiving notice of an intended marriage	£ s. d. 0 10 0
For receiving notice of a caveat	1 0 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0 10 0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing	

FOR MARRIAGE AT REGISTRY OFFICE.

For entering notice of a marriage without licence into the marriage notice-book ... s. d. 1 0

outside the consular district in which the marriage is to take place £ s. d.
 For attendance by consular officer at marriage solemnized in accordance with the local law and for registration of the same 1 0 0
 Marriages may be solemnized 8 a.m. to 3 p.m.

The ceremony, if a marriage under the Foreign Marriage Act, may be performed by, or in the presence of, any Ambassador, Minister, Chargé d'Affaires, or any of the Secretaries authorised for that purpose, or by any Consul-general, Consul, Vice-consul, Consular agent (or any person duly authorised to discharge their duties), or Pro-consul, provided that such consular officer is furnished with a warrant signed by the Secretary of State for Foreign Affairs. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church. If the service be not that of the Church of England, the contracting parties must make a declaration before the Marriage Officer to the effect that they know not of any lawful impediment why they may not be joined in matrimony, and that they call upon the persons present to witness that they take each other respectively to be lawful wedded husband and wife. In the absence of any religious ceremony, such declaration is sufficient.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of Her Majesty's dominions. In cases where one of the parties is subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited. A consular officer is authorised to register, at the consulate at which he is appointed to reside, marriages solemnized in accordance with the local law between parties of whom one at least is a British subject, provided that he be satisfied by personal attendance that the marriage has been so solemnized; he cannot be required to attend at the solemnization of a *lex loci* marriage beyond the place at which he is appointed to reside.

A marriage which would not be valid if solemnized in England would be equally invalid if solemnized in one of Her Majesty's embassies, legations, consulates abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity (such as deceased wife's sister) would not be valid in England even if valid in the country where the marriage was contracted.

Marriages may also be solemnized under the "Foreign Marriage Act, 1892," before any governor, high commissioner, or resident, who may be duly authorized to that effect, and also before the commanding officers of any of Her Majesty's ships on a foreign station.

BRITISH NATIONALITY AND NATURALIZATION.

NATIONALITY.—The following are, by the law of England, deemed to be British subjects:—

1. All persons born in Her Majesty's dominions, whether of British or of Foreign parents.
2. Children of natural-born British subjects, wherever born.
3. Grandchildren of natural-born British subjects, wherever born.
4. Persons naturalized (a) By Special Act of Parliament, (b) Under the provisions of the "Naturalization Act, 1870."

The above does not apply to married women, who are deemed to be subjects of the state of which their husbands for the time being are subjects.

Natural-born British subjects can only deprive themselves of British nationality, (1) If they happen to be born in the British dominions of foreign parents, in which case they may, if of full age and if under no disability, make a declaration of alienage; (2) If they voluntarily become naturalized in a foreign state.

British subjects born in foreign countries sometimes become, by the law of the country of their birth, subjects or citizens of that country. In such case they may, by the law of England, when of full age, and if under no disability, make a declaration of alienage, and they then cease to be British subjects. Should they retain their British nationality, and continue to reside in the country of their birth, their British nationality will not avail them if claimed as subjects or citizens of the country in question.

NATURALIZATION.—The ordinary way of becoming a British subject is by fulfilling the requirements of the "Naturalization Act, 1870." The applicant must either have resided in the United Kingdom for a term of not less than five years, or have been in the service of the Crown for a similar period. He must also furnish evidence of his intention, when naturalized, either of residing in the United Kingdom, or of serving under the Crown. All applications for certificates of naturalization should be addressed to the Secretary of State for the Home Department.

Privileges of naturalized British subjects:

"An alien to whom a certificate of naturalization is granted shall in the United Kingdom be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, to which a natural-born British subject is entitled or subject in the United Kingdom, with this qualification, that he shall not, when within the limits of the foreign state of which he was a subject previously to obtaining his certificate of naturalization, be deemed to be a British subject unless he has ceased to be subject of that state in pursuance of the laws thereof, or in pursuance of a treaty to that effect."

With reference to the last paragraph of the foregoing extract, it may be mentioned that the only country with which Great Britain has yet concluded a treaty on the subject of naturalization is the United States of America.

A natural-born British subject, who has become naturalized in a foreign country, may obtain a certificate of re-admission to British nationality in fulfilling the conditions required in the case of aliens applying for a certificate of naturalization.

The children of naturalized British subjects, if born in the British dominions, are by the law of England deemed to be British subjects. If born abroad, they are only deemed to be naturalized British subjects provided that their father was naturalized under the Naturalization Act, 1870, and that during infancy they became resident with their father, or mother being ■ widow, in any part of the United Kingdom.

British colonies have power to legislate on the subject of naturalization. Colonial naturalization is, however, only operative within the limits of the particular colony in which the naturalization may have been granted.

The following fees are leviable under the Naturalization Act, 1870:—

On grant of certificate of naturalization...	£	s.	d.
For registration of declaration, with or without oath of allegiance	0	10	0
For certified copy of any declaration or certificate with or without oath	0	10	0

STATUS OF ALIENS.—Real and personal property of every description may be taken, acquired, held, and disposed of by an alien in the same manner in all respects as by a natural-born British subject, but the acquisition of ■ title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any municipal, parliamentary, or other franchise.

Aliens are not entitled to be tried by ■ jury *de medietate lingue*, but are triable in the same manner ■ if they were natural-born subjects.

NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 was extended to the whole of England and Wales on the 1st January, 1899. Every case of infectious disease, ■ defined by the Act, is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family to which the patient belongs, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate concerning the case to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s. fine. No payment is made for the notices required to be given by persons in the house but the medical man gets 2s. 6d. for every case in his private practice and 1s. for every case in ■ public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the fevers known by any of the following names: typhus, typhoid, enteric, relapsing, continued, or puerperal. The local authority may by resolution order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. The Local Government Board have refused to allow consumption or phthisis to be added to the list. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875, it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to ■ penalty of £5. A person suffering from such disorder who enters ■ public conveyance without previously notifying to the owner or driver that ■ ■ so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, room, or part of a house in which any person has been suffering from any dangerous infectious disorder without having the same and all articles liable to retain infection, disinfected to the satisfaction of a legally qualified medical practitioner, as testified by ■ certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. Where the Infectious Disease (Prevention) Act, 1890, is in force, the occupier of a house, or of any part in which there has been ■ case of infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. If the outgoing occupier gives false information to the owner or to an intending tenant as to the occurrence of the infection he is liable to heavy penalties and to an action for damages. Where, on the certificate of the Medical Officer of Health, or of any two medical practitioners, it appears to any District Council that any house, or part thereof, is in such a filthy or unwholesome condition that the health of any person is affected or endangered thereby, or that the whitewashing, cleansing, or purifying of any house, or part thereof, would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, cleanse, or purify the same, and such person is liable to a penalty of 10s. for every day during which he fails to comply with the notice, and the Council may cause the work to be done, and recover the expenses from the person in default. Where any suitable hospital or place for the reception of the sick is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, may, on ■ certificate signed by ■ legally qualified medical practitioner, and with the consent of the superintending body of such hospital or place, be removed by order of any justice to such hospital or place. Similar provisions apply to the Metropolis.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, however remote may seem the probability of death, however confident that his property will pass to those he most wishes to benefit, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by **making** of **his** will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making **his** will until it is too late, their negligence may deprive those for whom they were most anxious of the very benefits which had demanded **his** life-long struggle to provide. Thus **his** widow may find, to her grievous disappointment, that the estate, **his** life policy perhaps, or a few hundreds in Consols, is not all hers, but has to be shared with a distant cousin of her husband's, whose name perhaps she had never before heard. Or it may be the eldest son of an intestate ousting all his brothers and sisters from possession of the real estate, or an improvident or unbusinesslike nearest relative may claim to administer the estate. Instances might be multiplied in which negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is **his** desire on a testator's part to provide for his property being "settled" **his** it is called—*e.g.* the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that **his** lawyer is not employed, **his** person having resolved to make a will must not regard it **his** a light matter, to be got rid of in **his** few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (*i.e.*, the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases **his** entirely out of place. Avoid the use of "legal terms," such **his** "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will **his** mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with **his** pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the **his** manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of

wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, **his** called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be **his** woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold lands and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock **his** public companies, and the like.

RESIDUARY LEGATEES.—It **his** well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates **his** property acquired after it has been made.

TO BEGIN A WILL.—A form **his** which **his** will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended **his** follows:—"And I revoke all former wills and codicils. Dated this tenth day of December, 1890."

EXECUTION OF A WILL.—The testator should sign **his** at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left **his** legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If **his** solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be **his** witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be], **THOMAS SMITH**
 in the presence of us, both present [Signature
 of
 Testator.]
 at the **his** time who in his [or her] presence and in the presence of each other have hereunto set our names **his** witnesses.

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, **his** they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith in the joint presence of

us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London-street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee under the will. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary if it is well known who are the persons intended; but it is desirable, here or elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees."

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood] and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. before. The

words in square brackets will only be used where the widow is to lose her interest if she marries again.

WHO CANNOT MAKE A WILL.—A minor cannot make a will. A woman married before the 1st of January, 1883, can make a will with her husband's consent; but without such consent she can only (under the Married Women's Property Act) bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

REVOCATION.—A will is revoked by a subsequent will (but only so far as subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will; so that after marriage the old will should be re-acknowledged, as a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors, or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1896, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated

briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1804, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through the Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been

appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

NEW ESTATE DUTY.—The Finance Act of 1894 imposes a graduated duty, for which see p. 445.

LEGACY DUTY, varying according to the relationship, is payable excepting where the legatee is the wife or husband of the testator or testatrix, or intestate. (See p. 447).

ILLEGITIMACY.—A ■■■■ may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of such child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *enquete* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enquete* renders the employer liable to an action. A man who is adjudged the father of a bastard child may be peremptorily discharged by his employer. In case any living new-born child is found exposed, it is the duty of any person finding such child, and of any person in whose charge such child may be placed, to inform the Registrar of Births.

Coal Statistics.

The following table gives the amount of coal produced in the United Kingdom during the past sixteen years, and the amount exported to Foreign Countries, with an estimate of the amount and value of Foreign Products:—

Year.	Coal Produced in the United Kingdom.	Estimated value of Coal produced in the U.K.	Coal Product of Foreign Countries.*	Estimated value of Foreign Products.	Exported from U.K.	Remaining for Home Consumption.	Persons Employed in the Mines.	Consumption per head of the Population.
	Tons.	£	Tons.	£	Tons.	Tons.		Tons.
1883	163,737,000	46,054,000	216,999,000	68,902,000	29,442,000	134,306,000	471,679	3'79
1884	160,758,000	43,446,000	216,026,000	64,491,000	30,234,000	130,531,000	478,226	3'65

* Value of Russian Coal not included from 1883 to 1891, nor Swedish coal from 1883 to 1895.

Architects' Fees.

The custom is to charge 5 per cent. on the cost of new work, if exceeding £1,000. Below that sum, an increased scale is usual. An increased charge is also made for alterations to existing buildings, and for designs for decorations, fittings, and furniture. If PLANS, &c., are prepared for works which are never carried out, the charge is one-half the above, with a further half per cent. if tenders have been invited and received. These charges do not include negotiations for purchase of site, &c., nor settlement of difficulties with adjacent owners and public authorities, nor taking out quantities. For repetitions a modified charge is usually arranged. The minimum charge per day is three guineas. In all cases, travelling and other out-of-pocket expenses are paid by the employer in addition to the fees. For furnishing or checking ■ Schedule of Dilapidations and Estimate the usual charge is 5 per cent. on the estimate, but in no case less than two guineas. For valuing and negotiating the settlement of claims under the Lands Clauses and similar Acts the charge is on Ryde's Scale.

Surveyors' Fees.

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2s. per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £200, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1½ on the excess, and out-of-pocket expenses. But it is now usual to make ■ bargain for a fixed and moderate sum.

VALUATION of land—6d. per acre, and out-of-pocket expenses. No fee less than 5 guineas.

Auctioneers' and Estate Agents' Fees.

FOR THE SALE OF FREEHOLD AND COPYHOLD ESTATES AND HOUSES AND GROUND LEASES, BY PRIVATE TREATY.—£5 per cent. on the first £100; £2½ per cent. up to £5,000; and on the residue above that sum £1½ per cent.; and the usual commission of £5 per cent. in addition on the amount paid for fixtures, furniture, and effects, and in addition for any disbursements.

FOR LETTING UNFURNISHED HOUSES, OR DISPOSING OF LEASES OTHER THAN GROUND LEASES BY ASSIGNMENT OR OTHERWISE.—Where the term is for three years or less, £5 per cent. on one year's rent; where for more than three years, £7½ per cent. on one year's rent, and (in either case) upon the premium or consideration, £5 per cent. up to £1,000, and 2½ per cent. on the residue, and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of £5 per cent. up to £500, and 2½ per cent. on the residue.

FOR LETTING FURNISHED HOUSES, IN TOWN OR COUNTRY.—When let for a year or less period, £5 per cent. on the rental. When let for more than ■ year, £5 per cent. on first year's rent, and £2½ per cent. on rent for remainder of term. Where ■ property is let, and the tenant afterwards purchases, the commission for selling will then become chargeable, less the amount pre-

viously paid ■ letting furnished or unfurnished.

FOR VALUATIONS OR SALE OF FURNITURE, FIXTURES, AND OTHER EFFECTS.—£5 per cent. up to £500, and £2½ per cent. on the residue.

FOR VALUATION OF FURNITURE AND EFFECTS, FOR PROBATE OR ADMINISTRATION.—£2½ per cent. on the first £100, and £1½ per cent. on the residue.

FOR VALUATION OF PROPERTIES FOR SALE, PURCHASE OR MORTGAGE.—£1 per cent. up to £1,000, ½ per cent. from £1,000 to £10,000; 5s. per cent. above, ■ full amount of valuation. In valuations for Mortgage, if an advance is not made, one-third of the above scale, the minimum fee to be £3 3s.

FOR VALUATIONS FOR PROBATE OR ADMINISTRATION (UNDER THE FINANCE ACT, 1894) OF FURNITURE AND EFFECTS—£2½ per cent. on the first £100, and £1½ per cent. on the residue; OF FREEHOLD, COPYHOLD, OR LEASEHOLD PROPERTIES—5s. per cent. on amount of valuation. Minimum fee, £3 3s. 0d.

FOR NEGOTIATING THE PURCHASE OF ESTATES-HOUSES, AND GROUND LEASES.—£2½ per cent. up to £500, and £1 per cent. beyond that amount.

FOR NEGOTIATING THE TAKING OF FURNISHED OR UNFURNISHED HOUSES.—Half the scale for letting.

FOR LETTING BUILDING LAND.—Amount of one year's ground rent, or by agreement.

FOR MAKING AND EXAMINING INVENTORIES, and making catalogue for auction sale—From one guinea, according to length, exclusive of expenses.

MAKING schedule of fixtures to attach to lease—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING schedule of dilapidations, and serving notice to repair—From ■ to 5 gs. per day.

FOR SETTLING amount of dilapidations—5 per cent. on amount, and out-of-pocket expenses.

RAILWAY, School Board, Corporation, Board of Works, and other compensations—SCALE:—

If the award be for £1,000 the fee chargeable is 18 s. and for £1,200 19 gs. and so on, each £200 additional earning a further guinea. But no fee less than 7 guineas; and a fee of 3 guineas per day for London valuers, and 5 guineas per day for valuers outside the London area, for attendance in London before jury or arbitrator.

MANAGEMENT of estates, including collection of rents—Tithe-rent charges, ground rents, &c., from 3 to 5 per cent.; cottage property, from 5 to 10 per cent., according to special agreement.

Allowances under Bankruptcy Acts, 1883 and 1890.

The following charges are to be subject to reduction by agreement with the Official Receiver or the trustee, or to increase with the sanction of the Committee of Inspection and the Receiver:—

Brokers.—■ for inventory not exceeding ■ folio, 10s. 6d.; additional per folio to 20 folios, 1s. 6d.; each folio after 20, 1s. For inventory and valuation:—On the first £100, £2 10s.; for the next £400, £1 5s.; above £400 up to £10,000, £1; above £10,000, 10s. Travelling expenses in addition.

Auctioneers.—For sales by private contract half the above charges for inventory and valuation; for sales by auction (in addition to certain out-of-pocket expenses) of chattel property, 5 per cent. on first £500, 4 per cent. on next £500, above £1,000 2½ per cent.; and of estates in land, including prior valuations for determining amount of reserve bids, on first £300 5 per cent., on next £1,600 2½, above up to £5,000 1½, and above £5,000 1 per cent. Cost of surveys, dilapidations and specifications, £2 to £5.

Accountants.—For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, including necessary affidavit, £1 1s. to £5 5s. Chief-clerk's time, 10s. 6d. to £1 11s. 6d. Other clerk's time, per day of seven hours, 7s. 6d. to 16s. These charges to include stationary, except forms used.

MEDICAL FEES.

UNLIKE those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of doctor or patient. A medical man living in the eastern suburbs of London will perhaps charge but half a crown or three-and-sixpence if waited upon by a patient; but, when he removes to the neighbourhood of Cavendish Square, the fee charged for the first visit will be two guineas, and one guinea for the second and every subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

GENERAL PRACTITIONERS.	RENTALS.		
	£20 to £25.	£25 to £50.	£50 to £100.
Ordinary Visit	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.
Night Visit	Double an ordinary visit.		
Mileage beyond two miles from Home..	2s. 6d.	2s.	2s. 6d.
Detention per ¼ hour	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.
Letters of Advice. . . .	Same charges as for an ordinary visit		
Attendance on servants	2s. 6d.	3s. 6d.	3s. 6d. to 5s.
Midwifery	21s.	21s. to 63s.	63s. to 105s.
Adminstrng. Chlfm.	10s. 6d.	21s.	42s.
CONSULTANTS.			
Advice or Visit alone	1s.	21s.	21s.
Advice or Visit with another Practitioner	21s.	11s. to 11s.	11s. to 42s.
Mileage beyond two miles from Home..	10s. 6d.	10s. 6d.	10s. 6d.

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—

“Attendance and medicine,” from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

SOLICITORS' CHARGES.

THESE are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say “usually” because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to “skill, labour, and responsibility” as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase, or mortgage-money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

TRUST FUNDS AND INVESTMENTS.

BY RULE OF THE SUPREME COURT, DATED NOVEMBER, 1888, trustees may invest trust funds in the following securities:—

2½ per Cent. Consols; to be reduced, 5th April, 1903, to 2½ per cent. Consols and Reduced 3 per cent. Annuities. 2½ per Cent. and 2½ per Cent. Annuities. Exchequer Bills. Bank Stock. India 3½ per Cent. and 3 per Cent. Stocks. Indian Guaranteed Railway Securities. Colonial Government Stocks guaranteed by Imperial Government. Mortgage of freehold or copyhold estates in England or Wales. 3 and 3½ per Cent. Metropolitan Consolidated Stock.

Debenture, preference, guaranteed, or rent-charge stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on ordinary stock or shares.

Nominal stocks or nominal debenture stocks issued under the Local Loans Act, 1875, provided in each case that such stocks shall not be liable to be redeemed within a period of fifteen years from the date of investment.

Local Loans Stock under the National Debt and Local Loans Act, 1887.

THE RULE OF COURT OF NOVEMBER, 1888, will be little referred to now that all the foregoing items

in more extensive, and in some cases slightly different, language, are authorized by the Trustee Act, 1893, the more important clauses of which, especially where the Rule of Court is varied, may be summarized as follows:—This Act, which consolidates the enactments relating to trustees, authorizes mortgages on freeholds, or property equivalent to freehold, not only in England and Wales, but also (where not prohibited) in Ireland and Scotland. A very few leaseholds, viz., terms of 200 years, at a nominal rent, are also authorized by the Trustee Act, 1893.

THIS ACT ALSO AUTHORIZES INVESTMENTS by trustees upon any securities guaranteed by Parliament, and these include the following:—Certain Canada Government stocks, the Turkish Loan of 1855, the Egyptian 3 per cent. guaranteed Loan, Jamaica 4 per cent. Loan, and one or two others of small amount. In addition to Metropolitan Stock, any stocks of the London County Council are now authorized; also any Corporation or Municipal stocks of the cities or boroughs (about 60 in number) having at the last census a population exceeding 50,000. Also stocks, &c., under certain conditions, of Waterworks Companies and of Water Commissioners. Another very important addition to the list of trust securities is this: Preference, Debenture, Guaranteed, or Rentcharge Stocks of British Railway Companies which have paid 3 per cent. on their ordinary stocks for ten years. This includes all the great lines in England, Ireland, and Scotland, except a few, e.g., the North British, Great Eastern, and Chatham and Dover, which have not, for the whole period of ten years, paid regular dividends to their ordinary shareholders.

THE ACT FURTHER AUTHORIZES TRUST INVESTMENTS in certain Indian Railways guaranteed by the Indian Government, which can be found on reference to the Stock Exchange official lists. But with regard to the entire list, a trustee cannot invest in anything which is (directly or by implication) prohibited by the terms of his trust. It remains to add (1) that by this Act a trustee may buy at a premium under fixed conditions, but not where the stock is redeemable within 15 years at par, "or some other fixed rate." (2) The last power, as well as every other, is to be used at the "discretion of the trustee"—a phrase which can only be taken in a technical sense, as the Court expects him to show a prudent and cautious discretion, and forbids him, for instance, to favour the tenant for life at the expense of those to follow after.

(3) A trustee must consider what is directed, and what is forbidden, by the terms of his trust, before resorting to any of the securities authorized by the Rule of Court, or by the new Act. (4) The Settled Land Act of 1882 also gives a list of securities on which "capital money" arising from sales of property under that Act may be invested—it does not materially differ from the above. The safest plan for a trustee to adopt is this: after looking to his trust, to see that nothing is prohibited, to turn his attention solely to the Act of 1893, sect. 1, and take his choice of the securities therein mentioned. Nearly all of them are at a high price, and he can hardly make sure of obtaining 2½ per cent. for trust money.

If the deed or will under which he is acting authorizes Colonial or Foreign Government Securities, but not otherwise, he may consult the list of such securities, and select one or more, so as to obtain a slightly higher return on the capital invested.

Regulations for Motor Cars.

APPLICABLE TO ENGLAND AND WALES.

The following is a summary of the regulations issued by the Local Government Board, supplementary to the Locomotives on Highways Act:—

A light locomotive means a vehicle propelled by mechanical power, under three tons in weight unladen; only used for the purpose of drawing one vehicle, such vehicle and its locomotive together not exceeding in weight unladen four tons; not emitting any smoke or visible vapour, except from any temporary or accidental cause.

In calculating the weight of a vehicle unladen, the weight of any water, fuel, or accumulators used for the purpose of propulsion shall not be included. It must be capable of being worked either forwards or backwards if it exceeds in weight unladen 1 cwt. The tyre of each wheel must be smooth, with a breadth varying according to the weight of the vehicle, from four inches to two and a-half inches. There must be two independent brakes, each capable of preventing two wheels on the same axle from revolving. If a vehicle is drawn by the locomotive, it, too, must have an efficient brake, controlled by a competent person; or else, the brakes on the locomotive must be able to control the vehicle. The width of a locomotive must not exceed six and a half feet. A lamp is to be carried during the period between one hour after sunset and one hour before sunrise, exhibiting a white light forwards and a red light in the reverse direction. If drawing another vehicle, it must have the name of its owner and his address conspicuously painted on it, together with its weight on the right or off-side in letters white on black, or black on white, not less than one inch in height. The weight must also be painted on every locomotive weighing unladen a ton and a-half and upwards.

Greatest possible speed is fixed at twelve miles an hour. If the weight be one ton and a-half, and does not exceed two tons, the speed shall be not more than eight miles an hour. If the weight exceeds two tons, the speed shall be not more than five miles an hour. Whatever the weight, if used to draw any vehicle, the speed shall not exceed six miles an hour.

This regulation has effect for six months, from Nov. 9, 1895, and thereafter until the Local Government Board direct otherwise.

GENERAL REGULATIONS.—The Locomotive must not be driven at a speed greater than is reasonable and proper having regard to the traffic on the highway, or so as to endanger the life or limb of any person, or to the common danger of passengers. A bell or other instrument shall give warning of the approach or position of the light locomotive. The ordinary rules of the road shall be observed. The name of owner shall be given whenever demanded by a constable, or on the reasonable request of any other person.

A breach of any regulation may, on summary conviction, be punished by a fine not exceeding ten pounds.

SCOTTISH REGULATIONS.

The limit of speed is fixed at ten miles an hour if the locomotive be under one and a-half tons unladen: if over this but under two tons, the limit is eight miles, and from two tons onwards the maximum is fixed at five miles an hour. Whatever the weight if used to draw any vehicle the maximum speed must not exceed six miles an hour.

FARES BY DISTANCE: If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles 1 0

For every additional mile or part of a mile
If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0

If hired *within* but discharged *outside*, the Four-Mile Circle, whole distance not exceeding one mile, 1s.; exceeding one mile, then for each mile *ended* within the circle, 6d.; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, 2s.; two-wheeled Cabs 2 6

If above one hour, for every quarter hour or part of a quarter of the whole time, four-wheeled Cab, 6d.; if two-wheeled Cab 0 8

If hired *outside* the Circle, wherever discharged, for one hour or less 2 6

If above one hour, then for every quarter hour or part of quarter of the whole time... 0 8

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should be particular in noticing these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE OR BY TIME.

LUGGAGE.—For each package carried outside the carriage 0 2

EXTRA PERSONS: For each above two (two children under 10 years of age count one person) 0 6

WAITING:—By distance: for every 15 minutes completed—if hired within the Four-Mile Circle, four wheels, 6d.; two wheels ... 0 8

If hired without Circle, — or 4 wheels 0 8

GENERAL REGULATIONS.—Fares are according to distance or time, at the option of the hirer, expressed at the commencement of the hiring; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s.

The driver of every hackney carriage shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any hackney carriage shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of the fare; or, having

failed, or refused, to pay the fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40s.

The fares legally demandable by stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before Justice of the Peace, in the same way as fares for hackney carriage.

All property left in any hackney carriage shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries to property left in a hackney or stage carriage should be made at the Lost Property Office, New Scotland Yard.

On the 31st December, 1899, there were licensed public carriages:—Hansoms, 7,569; clarences, 3,634; omnibuses, 3,626; tram-cars, 1,381; total, 16,200. Drivers and conductors:—Hackney drivers, 13,332; stage drivers, 7,896; conductors, 8,874; total, 30,102.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, streets, and public buildings in London. During 1899, of 1,033 men examined, 634 were successful. The annual average number of applicants who passed the examination during the past five years was 811. The proportion of drivers to carriages is 11'91 drivers to 10 carriages: 191 of the drivers are over 70 years of age. In 1870 the accommodation of the Metropolitan public was provided for at the rate of one stage carriage to 2,917 people; in 1892 the proportion was one to 1,724.

Of lost property, 39,551 articles were deposited, of which 19,804 were claimed by the owners, and £2,929 awarded to the drivers and conductors.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

The tithe of produce, the ancient provision for the maintenance of the clergy, a large amount of which is now the property of laymen, was, after various attempts at modification and composition, commuted in 1836 by Act of Parliament to a payment in money. The land was valued, and a modus fixed, based upon the average value of corn for the preceding seven years, and payments, collected half-yearly by the clergy or lay-owners, have since been made on a septennial average. The value fixed amounted in some cases to as much as ten shillings per acre. The better the land for corn-growing, the larger was the sum to be paid, as it was direct charge upon the corn grown. The prices upon which the Act was based being per quarter—wheat at 5s. 2d.; barley, 3s. 8d.; and oats, 2s. Consequently much land, not being worth the tithe, is now out of cultivation, or let at a price which just covers the charge. An Act passed in 1891 makes it compulsory for the owners of the land, instead of the occupiers, to pay the tithe, which amounts in the aggregate to about four millions annually, of which sum £766,334 is paid to 2,096 lay-owners or impropriators. Extraordinary tithes were an additional charge made, when the Commutation Act was passed, upon hop, fruit, and market-garden grounds. These special industries were so affected by the tax, which in some cases amounted to thirty shillings an acre, that serious resistance against the payment ensued, and an Act was passed in 1886 providing that it should not be levied on land brought under such cultivation after the passing of the Act, but land under these crops at the time was permanently burdened with the impost. The tithe map and apportionment for each parish is deposited with the incumbent and churchwarden. Any one interested therein may have access to the same and obtain extracts by paying 2s. 6d. for inspection, and 3d. for every 72 words contained in the extract. Tithe may, upon the joint application of the land-owner and tithe-owner to the Board of Agriculture, be redeemed for a sum not less than 25 times its amount. This is dependent upon the consent of the Board, and sometimes on that of the Bishop and patron. Town property and building land is often redeemed, agricultural land rarely, the cost being too great. Since the Commutation Act of 1836 £26,414 16s. 10d. has been redeemed, the redemption money being £665,574 2s. 2d.

The average Tithe Rent Charge for the first fifty years from 1836 was £102 9s. 9½d., and for the past seven years (1894-1900) £70 8s. 2½d.

INVESTMENT OF DIVIDENDS ON GOVERNMENT STOCKS—2½ CONSOLIDATED STOCK AND LOCAL LOANS STOCK—Holders of amounts of less than £1,000 may instruct the Bank to receive and invest their dividends by filling up forms, to be obtained at the Head Office, at any of the Branches, or at any Money Order Office. A commission is charged of 1d. per £, or part of £, with 3d. additional for each advice of purchase, should such advice be required.

STOCK CERTIFICATES TO BEARER can be obtained in exchange for War Stock, 2½ per Cent. Consolidated Stock, 2½ per Cent. and 2½ per Cent. Annuities, Local Loans 3 per Cent. Stock, and Metropolitan Police Debenture Stock; India 2½, 3, and 3½ per Cent. Stocks; Metropolitan and London County Stocks; New Zealand, New South Wales, and Queensland Stocks; and the various Corporation Stocks. The charge for Issue is 2s. per Cent., and for Reinscription 1s. per Certificate, except Metropolitan and County and War Stocks, where no charge for issue.

DIVIDENDS are paid in one of the following modes:—

I. In person at the head office, or at a country branch, by arrangement with the agents, to stockholders, or to their attorneys, or in Joint account to one of the stockholders.

II. By transmission of dividend warrants by post to stockholders, their attorneys or nominees, at the risk of the stockholder, under the following regulations:—

1. Any stockholder residing within the United Kingdom who desires to have his dividend-warrant sent to his address by post, must fill up a form of application, to be obtained at the Bank, or at any of its branches, and for English Government Stocks at any Money Order Office.
2. In the case of joint accounts, to the first stockholder upon his sole request, provided the Bank have not received any written notice to the contrary from any other of the stockholders.

TRANSFER DAYS, any day but Saturday: Instructions 9.30 to 1 (to 3, fee 2s. 6d.); Executions 11 to 3; Acceptances 9.30 to 4 (Saturdays to 2). Transfers made on Saturdays (between 11 and 1) are charged a fee of 2s. 6d.

GENERAL HOLIDAYS.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and following day, or if that be Sunday, then the Bank is closed on Monday. The Stock Exchange, in addition to the Bank holidays, is also closed on May 1 and November 1. In Scotland: New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

* When the due date of the Dividends falls on Sunday or Bank Holiday, the Dividends are payable on the business-day next ensuing.

ALL founders cast their type nearly to one uniform height, though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ems.

A very minute type, used only occasionally, is:—
Brilliant. A column the size of this in the Almanack if set in Brilliant would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures, on paper

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

Printing is the art of producing impressions, from characters or figures, on paper

Pearl, 95 lines, 4,370 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Ruby, 87 lines, 3,740 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Nonpareil, 75 lines, 3,000 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Minion, 64 lines, 2,360 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Brevier, 58 lines, 1,970 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Bourgeois, 53 lines, 1,590 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Long Primer, 47 lines, 1,360 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Small Pica, 43 lines, 1,120 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Pica, 37 lines, 890 letters—
Printing is the art of producing impressions, from characters or figures, on paper

English, 34 lines, 680 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Great Primer, 27 lines, 430 letters—
Printing is the art of producing impressions, from characters or figures, on paper

Double Pica, 22 lines, 280 letters—
Printing is the art of producing impressions, from characters or figures, on paper

The Imperial Coinage.

The authorised Coinage of the United Kingdom consists of the following pieces, some of which are issued only on special occasions:—

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
GOLD:			
Five Pound	616 37239	612 500	1 00000
Two Pound	246 54895	245 000	0 40000
Sovereign	123 27447	122 500	0 20000
Half-Sovereign ..	61 63723	61 125	0 15000
SILVER:			
Crown	436 36363	—	2 000
Double Florin	349 09090	—	1 678
Half-Crown	218 18181	—	1 264
Florin	174 54545	—	0 997
Shilling	87 27272	—	0 578
Sixpence	43 63636	—	0 346
Groat or 4d.	29 09090	—	0 262
Threepence	21 81818	—	0 212
Twopence	14 54545	—	0 144
Penny	7 27272	—	0 087
BRONZE:			
Penny	145 83333	—	2 91666
Halfpenny	87 50000	—	1 75000
Farthing	43 75000	—	0 87500

STANDARD GOLD contains eleven-twelfths of fine metal and one-twelfth of alloy; fineness, 916.66. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, intrinsically worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11¼d.

STANDARD SILVER consists of thirty-seven fortieths of fine metal and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (95.23), is practically obsolete. It is occasionally used, however, for high-class plate.]

*BRONZE is an alloy of copper 11 parts, tin 4 parts, and zinc 1 part.

THE "REMEDY" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS.—No person is allowed to coin any token to pass for, or representing, bronze or other money, under penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but, under the provisions of the Coinage Act, 1891, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for £100, £50, £20, £10, £5, £1, and £1,000.

BANK POST BILLS are drawn for any sum from £10 to £1,000, and made payable to order at seven days' date, or at sixty days'. No charge is made for bills drawn; they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

OLD MONIES.—Guinea, 21s.; Carolus, 23s.; Moldore, 27s. 6d.; Angel, 10s.; Noble, 6s. 8d.; Tester, 6d.; Groat, 4d.

SCOTS MONEY.—Merk=1s. 1½d.; Pound=1s. 8d.; Shilling=1d.; Plack=2 Bodes=4d. Scots.

It is interesting to note that the weight of a penny is one-third, of the half-penny one-fifth, and of the farthing one-tenth of an ounce avoirdupois, approximately. Further, the half-penny is one inch in diameter.

Principal Monetary Units of Foreign Countries. 433

For some countries not included in this list, ■ note below.

COUNTRY.	Money of Account.	Circulating Value. (See note.)	Number of Coins receivable for £1 at par. (See note.)
Argentine Republic	Peso of 100 centesimos	3s. 11½d.	5'05
Austria-Hungary	Florin or gulden of 100 kreutzer	1 11½	10'2
"	Crown (new unit) of 100 hellers	0 10	24'0
Belgium	Franc of 100 centimes	0 9½	25'2
Brazil	Milreis	2 3	8'9
Bulgaria	Leva of 100 stotinkis	0 9½	25'2
Chile	Peso of 100 centavos	3 11½	5'05
China	Tael of 1,000 cash	6 6¼	3'07
Denmark	Crown of 100 öre	1 1¼	18'2
Egypt	Pound of 100 piastres	20 3¼	0'985
Finland	Markka of 100 penni	0 9½	25'2
France	Franc of 100 centimes	0 9½	25'2
German Empire	Reichsmark or mark of 100 pfennige	0 11¼	20'4
Great Britain and Ireland	Pound or sovereign of 20 shillings	■ 0 0	1'0
Greece	Drachma of 100 lepta	0 9	25'2
Holland and Java	Florin or guilder of 100 cents	1 8	12'0
India	Rupee of 16 annas	1 4	15'0
Indo-China	Piastre	4 2	4'8
Italy	Lira of 100 centesimi	0 9½	25'2
Japan	Yen of 100 sen	2 0½	9'76
Mexico	Peso of 100 centavos	4 3¼	4'64
Norway	Crown of 100 öre	1 1¼	18'2
Persia	Khran of 20 shahis (varies)	0 7	34'0
Portugal	Milreis	4 5¼	4'50
Roumania	Ley of 100 banis	0 9½	25'2
Russia	Rouble of 100 kopecks	3 2	6'30
Servia	Dinar of 100 paras	0 9½	25'2
Siam	Tical	2 5	8'3
Spain	Peseta of 100 centimos	0 9½	25'2
Sweden	Crown of 100 öre	1 1¼	18'2
Tunis	Piastre	0 6	40'3
Turkey	Pound of 100 piastres	18 0¾	1'107
United States	Dollar of 100 cents	4 1¼	4'87

In Belgium, Bulgaria, Greece, Italy, Roumania, Servia, Spain, and Switzerland the money of account is identical with that of France—the franc—the names at times differing. Nearly all the South American States issue standard coins corresponding to the peso of Chile, which is identical with the 5-franc piece of France. The principal circulating medium of Austria-Hungary, Russia, Argentine Republic, and Brazil is paper, but, in the first-named country, the paper is in process of being withdrawn, and the currency placed on a gold basis, with the crown (see above) as a new unit of account. In Russia the gold Imperial is now rated at 15 instead of 10 roubles, and the paper currency is being replaced by silver and bronze. The currency of Japan is now on a gold basis, silver bearing a ratio to that metal of 1 to 32'318. In British Honduras the money of account is the United States gold dollar

of 100 cents, subsidiary coins being specially struck for the Colony. Ceylon and Mauritius also possess special subsidiary currencies on the basis of the rupee. By an Order in Council passed in 1894 a British dollar was authorised to be issued for circulation in the East. It is identical in weight and fineness with the Japanese yen, and has been made legal tender in Hong Kong, the Straits Settlements, and Labuan. The last two columns of the Table are calculated on the supposition that the relation between the values of gold and silver remains fixed at 15½ to 1; in other words, that the price of standard silver is 60½d. per oz. troy. They give therefore the full metallic values on that basis, not the values for purposes of exchange, which are very variable, and depend mainly on the price of silver (see Table, below).

Price of Silver, 1890-99

The Average yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—

1890.	1891.	1892.	1893.	1894.	1895.	1896.	1897.	1898.	1899.
d.									
47¾	45½	39½	35¾	29	29¾	30¾	27½	26½	27½

In the United States the price of silver is quoted in cents per Troy ounce *fine*. In order to convert an English quotation into cents per ounce *fine*, first express the pence as a whole number

and decimal fraction and then multiply by 2'192; to express a United States price on the English system multiply the cents by 0'4562.

POST OFFICE SAVINGS BANKS.

These are established at all Money Order Offices, and are opened for the receipt of deposits during the hours appointed for the sale of stamps, commencing at 11 a.m. Every such office is also open for the payment of withdrawals on week-days during certain hours, which are specified in a notice exhibited at the office.

Deposits can be made from 1s. to £50 in one year, the total never to exceed £200 including interest, which is at 2½ per cent.

ANNUITIES AND LIFE ASSURANCE.—Immediate or deferred annuities from £1 to £100 may be

purchased through the Post Office on the life of any one over 5 years old. These are payable by equal half-yearly instalments.

Life insurances, from £5 to £100, are granted to persons between 14 and 65 years of age. Children between 8 and 14 can be insured for £5.

If the amount of the annuity or insurance purchased is less than £100, further amounts may be bought, until the total sum amounts to £100.

The Post Office Savings Bank is at 144a, Queen Victoria Street, E.C.

Metric Weights and Measures.

THE Metric System is based upon the (assumed) length of the direct distance from the Equator to the North Pole. The ten-millionth part of this distance, as calculated in 1795, was adopted by the French Government as the unit of length, and called a *mètre*. All other measurements are derived from this unit; the cube of the tenth part of the *mètre* is the unit of capacity, called a *litre*, and the weight of a litre of water, at a certain temperature, is the unit of weight, called a *kilogramme*. The unit of land measurement is 10,000 sq. *mètres*, called a *hectare*. The above terms are now used in this country under the English names of meter, liter, kilogram, and hectare. In the designs at the left of the page, the figures refer to inches and centimeters, the former being divided into 16ths, 8ths, 4ths, and the latter into millimeters.

Rough Comparisons.

10 centimeters = 4 inches	8 kilometers = 5 miles.
1 liter = 1 1/2 pints	1 cubic meter = 220 gallons.
1 kilogram = 2 1/4 lbs.	1,000 kilograms = 1 ton.
1 sq. meter = 10 sq. feet	1 hectare = 2 1/2 acres.

Accurate Comparisons.

Time and Watch on Board Ship.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon Watch	noon to 4 p.m.
First Dog	4 p.m. to 6 p.m.
Second Dog	6 p.m. to 8 p.m.
First	1 p.m. to midnight.
Middle	12 a.m. to 4 a.m.
Morning	4 a.m. to 8 a.m.
Forenoon	8 a.m. to noon.

This makes seven **WATCHES**, which enables the crew to keep them alternately, as the *Watch* which is on duty in the forenoon one day has the after-noon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two *Watches*.

TIME.—Time is kept by **BELLS**, although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds; then two more strokes with a second's interval apart, then a rest of two seconds, thus:—

BELL, ONE SECOND; B., TWO SECS.; B. S.; B. B. S.; B. S.S.; B.

- 1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.
- 2 Bells at 1 (struck with an interval of a second between each—B. s, B.), the same again at 5, 7, and 9 p.m.; 1, 5, and 9 a.m.
- 3 Bells at 1.30 (B. s, B. ss, B.), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.
- 4 Bells at 2 (B. s, B. ss, B. s, B.), 6 and 10 p.m.; 2, 6, and 10 a.m.
- 5 Bells at 2.30 (B. s, B. ss, B. s, B. ss, B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.
- 6 Bells at 3 (B. s, B. ss, B. s, B. ss, B. s, B.) and 11 p.m.; 3, 7, and 11 a.m.
- 7 Bells at 3.30 (B. s, B. ss, B. s, B. ss, B. s, B. ss, B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 a.m.
- 8 Bells (B. s, B. s, B. s, B. ss, B. s, B. ss, B. s, B. s, B.) every 1/2 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

26	78	20	49	11	39

Freezing point = 32° F = 0° C = 0° R; Boiling point = 212° F = 100° C = 80° R. To convert degrees Fahrenheit into degrees Réaumur, or vice versa, one of the following formulæ:

Let F = number of degrees Fahrenheit, C = number of degrees Centigrade and R = number of degrees Réaumur, then —

UNIFORMITY.—An edict of King Edgar decreed that there should be but one Standard Measure, that kept at Winchester, and by the 27th section of Magna Charta there was to be one Weight for all England. Nevertheless numerous customary weights and measures have continued in use—custom was stronger than law, especially with regard to land, corn, and wool. In 1824, however, an Act was passed rendering uniformity compulsory from the 1st of January, 1826, since which time the Imperial Statute System of Weights and Measures has been in general use, although some remains of the older form still linger.

Avoirdupois Weight.

- Drachm..... *dr.* = 27½ grains (27 3/375).
- Ounce *oz.* = 16 drachms, 437½ grains.
- Pound *lb.* = 16 *oz.*, 256 *dr.*, 7,000 grains.
- Customary Stone, *st.*, Butcher's Meat = ■ lbs.
- Legal Stone...*st.* = Horseman's weight = 14 lbs.
- Quarter *qr.* = 28 lbs.
- Cental or Quintal, *cent.* = 100 lbs.
- Hundredweight, *cwt.* = 4 *qrs.*, 112 lbs.
- Ton *T.* = 20 *cwt.*, 2,240 lbs.

Avoirdupois weight is used in almost all commercial transactions and common dealings, but in addition to the above there are special weights for various articles, the chief of which are:—

- A Quarter Loaf = 4 lbs.
- A Peck of Flour, 2 Gallons = 14 "
- A Firkin of Butter = 56 "
- A Firkin of Soft Soap..... = 64 "
- A Box of Fish, about = 90 "
- A Barrel of Gunpowder = 100 "
- A Barrel of Raisins = 112 "
- A Seam of Glass, 24 stones of 5 lbs. = 120 "
- A Barrel of Butter—4 firkins = 224 "
- A Barrel (or pack) of Soft Soap = 256 "
- A Faggot of Steel..... = 120 "
- A Pig of Ballast = 56 "
- A Fodder of Lead, London and Hull = 19½ *cwt.*
- A do. Derby = 22½ *cwt.*; Newcastle = 21½ "
- A Cask of Blacklead = 11½ "
- A Sack—Flour, 280 lbs.; Coals, 224 lbs.; a ton of Coals, 10 sacks.

The Metrical System of weights is used in Belgium, France, Germany, Italy, Portugal, Spain, Sweden and Norway, and some other countries, the unit of which is the *Gramme*=15,432 grains; the chief multiple of the *Gramme* is the *Kilogramme*=2,204½ lbs.: in practical use this is found inconvenient for small purchases, and nearly all commodities are sold by the demi or half kilo. The *Centner* of 50 kilos=110¼ lbs., very nearly represents the English *cwt.*; but heavy goods are sold by the *Tonneau* of 2204½ lbs., about 19 *cwt.* 77 lbs., the *Myriagramme* being ignored. See p. 424.

In the United States and in Canada the *cwt.* is generally reckoned as 100 lbs., and the ton of ■ *cwt.*=2,000 lbs.

In Russia the *Pood* of 36 lbs. is the commercial weight: 63 *Poods*=1 English ton.

Indian Weights (Bengal).

- Tola, unit of postage=180 grains.
- Chittak=5 Tolas; 8eer (16 Chittaks)=2½ lbs.
- Imperial or Indian Maund=82½ lbs.

Maunds.

- Viss=309 lbs., Maund=25 lbs., Candy=500 lbs.

Troy Weight.

- Carat = 3·17 grains.
- Pennyweight..... *dwt.* = 24 grains.
- Ounce..... *oz.* = 20 *dwt.*, 480 *grs.*
- Pound *lb.* = 12 *oz.*, 240 *dwt.*, 5,760 *grs.*
- Hundredweight. *cwt.* = 100 lbs.

Troy is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries', and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries; but the carat varies: in France it is 3·18 grains, in Holland, 3·0 *grs.*, and in the U. S. 3·2 *grs.* In the U. K. the jewellery ounce is divided into 151½ carats or 600 pearl grains.

The *oz.* Troy and Apothecaries' = 1·09714 *oz.* avoirdupois; but the *lb.* Troy and *lb.* Apothecaries' = only 0·82286 *lb.* avoirdupois; while 175 *lb.* Troy and Apothecaries' = 144 *lb.* avoirdupois.

Apothecaries' Weight.

- Scruple \mathcal{S} = 20 Grains = 20 *grs.*
- Drachm \mathcal{D} = 3 Scruples = 60 "
- Ounce \mathcal{Z} = ■ Drachms = 480 "
- Pound \mathcal{L} = 12 Ounces = 5760 "

The avoirdupois *oz.* of 437½ grains, and the *lb.* of 7,000 grains are the weights named in the British Pharmacopoeia; drugs are purchased by avoirdupois, but compounded by apothecaries' weight. The apothecaries' *oz.* and *lb.* may now be considered obsolete.

Hay and Straw.

- Truss of Straw, 36 lbs. Truss of Old Hay, 56 lbs.
- Truss of New Hay (to September 1st), 60 lbs.
- Load, 36 Trusses—Straw, 11 *cwt.* ■ *qrs.* 8 lbs.;
- Old Hay, 18 *cwt.*; New Hay, 19 *cwt.* ■ *qr.* 4 lbs.

Wool.

- Clove, *cl.* = ■ lbs.
- Stone, *st.* = 2 Cloves 14 lbs.
- Tod, *td.* = ■ Stones 1 *qr.*
- Wey, *wy.* = 6½ Tod 1 *cwt.* 2 *qrs.* 14 lbs.
- Pack, *pk.* = 240 lbs.
- Sack, *sk.* = ■ Weys 13 *qrs.*
- Last, *la.* = 12 Sacks 39 *cwt.*

Since the advent of *Snoddy*, some of the above weights have become nearly obsolete, although the terms are still in use with different values: thus 16 lbs. = 1 *st.*; 28 lbs. = 1 *tot*; 20 lbs. = 1 *Score*; 12 *Score* or 240 lbs. = ■ *Pack*.

Worsted Yarn.

Wrap, 80 yards; Hank=560 yards=7 Wraps; Counts or Numbers are the number of hanks in a *lb.*

Cotton Wool.

Cotton Wool, Bale variable; U.S.A. average 477 lbs.; Egyptian, 719 lbs.; East Indian, 396 lbs. Brazilian, 220 lbs.

Cotton Yarn.

- Thread = 1½ yards.
- Lea, or Skein, *skn.* = 120 Yards. } Also same
- Hank, *hk.* = 7 Skeins, or Leas. } for silk.
- Spindle, *spdl.* = 18 Hanks.
- Counts = the number of Hanks in 1 *lb.*
- Bundle Hanks, either of 5 lbs. or 10 lbs.
- Reels of Cotton vary from 30 to 1,760 yards, but by the new Act must be marked correctly.
- Bundles of Cotton are chiefly made up for export.

Liquid Measure.

- The Gill contains 8·665 cubic inches.
 - The Pint contains 4 gills or 34·660 inches.
 - Quart = 2 pints = 8 gills.
 - Gallon = 4 quarts = 32 gills.
 - Pin = 4½ Gallons or ½ Barrel.
- | | Gals. | Qts. | Pts. |
|---------------------------------|-------|------|------|
| Firkin or Quarter Barrel | ■ | 36 | 72 |
| Anker (10 gallons) | 10 | 40 | 80 |
| Kilderkin, Rundlet, or ½ Barrel | 18 | 72 | 144 |
| Barrel | 36 | 144 | 288 |
| Tierce (42 gallons) | 42 | 168 | 336 |
| Hogshead of Ale (½ barrel) | 54 | 216 | 432 |
| Punchon | 72 | 288 | 576 |
| Butt of Ale (3 barrels) | 108 | 432 | 864 |

Practically, the only measures in use are gallons, quarts, pints, and gills, the others are merely nominal; e.g., the hoghead of 54 gallons, *old measure*, contains but 52 gallons, 1 quart, 1 pint, and 355 gills imperial measure; and of wine six nominal quart bottles go to the gallon. Of wines imported in casks the following are the usual measurements:—

Pipe of Port or Masden	= 115 gallons.
" Teneriffe	= 100 "
" Marsala	= 93 "
" Madeira and Cape	= 92 "
" Sherry and Tent	= 108 "
Butt of Lisbon and Bucellas	= 117 "
Aum of Hock and Rhenish	= 30 "
Hoghead of Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons.	

In the United States the old British or "Winechester" wine gallon of 231 cubic inches is in use; the names of measures are the same, but the capacity of the gill is only 7'21875 cubic inches.

Apothecaries' Fluid Measure. Marked

60 Minims ℥ (drops) = 1 Fluid Drachm.....	f 5
8 Drachms = 1 Ounce	f 3
20 Ounces = 1 Pint	O
8 Pints = 1 Gallon	C., or Cong.
1 Drachm = 1 Tea-spoonful.	} <i>Prescribing medicine by the spoon, glass, or cupful, is unsafe, as all those vessels vary in size. Graduated glass measures may be purchased for a few pence.</i>
2 Drachms = 1 Dessert-spoonful.	
4 Drachms = 1 Table-spoonful.	
2 Ounces = 1 Wineglassful.	
3 Ounces = 1 Teacupful.	

Dry or Corn Measure.

Quart... = 2 Pints.	Strike ... = 2 Bushels.
Pottle... = 1 Quart.	Coomb... = 1 Bushel.
Gallon = 4 Quarts.	Quarter... = 1 Bushel.
Peck ... = 2 Gallons.	Load ... = 5 Quarters.
Bushel = 4 Pecks.	Last ... = 10 Quarters.

Boll of Meal = 140 lbs.; 3 Bolls = 1 Sack.
 Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—
 Wheat, English, 63 lbs. Foreign, 62 lbs.
 Barley, English, 52 and 56 lbs. French, 52½ lbs. Mediterranean, 50 lbs.
 Oats, English, 40 & 42 lbs. Foreign, 38 & 40 l s.
 Rye and maize, 60 lbs.
 Buckwheat, 52 lbs. to the bushel.

Grain of all kinds is frequently sold by the stone of 14 lbs.

Coals were formerly sold by measure: 3 heaped bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by heaped measures and the sack of three bushels; of coke, four bushels are usual.

Fruit—The Covent Garden bushel basket is 17½ inches in diameter at top, 10 inches at the bottom, and is 10 inches deep. The smaller market baskets are said to vary in size according to the season and the supply.

Cubic Solid Measure.

Cubic Foot	= 1,728 Cubic Inches.
Cubic Yard	= 27 Cubic Feet, 21'033 bushels.
Stack of Wood	= 108 Cubic Feet.
Shipping Ton ...	= 40 Cubic Feet merchandise.
Shipping Ton ...	= 42 Cubic Feet of Timber.
Ton of displacement of a Ship	= 35 Cubic Feet.

Measures of Length.

Mile Geographical, Admiralty Knot, or Nautical Mile, 6,080 Feet = 1013½ fathoms, = 1'15 Mile Statute.
League = 3 Miles.
Degree = 60 Geographical, or 69'121 Statute Miles.

Inch, in.....	= 72 Points, or 12 Lines.
Nail, ¼.....	= 2½ Inches.
Palm	= 3 Inches.
Hand	= 4 Inches.
Link	= 7'92 Inches.
Quarter (or a Span)	= 9 Inches.
Foot	= 12 Inches.
Cubit	= 18 Inches.
Yard	= 36 Inches.
Pace, Military	= 2 Feet 11 Inches.
Pace, Geometrical	= 5 Feet.
Fathom	= 6 Feet.
Rod, Pole, or Perch = 5½ Yards.	
Chain (100 Links)	= 22 Yards (4 Poles).
Cable's Length ...	= 100 Fathoms, 600 Feet.
Furlong	= 40 Rods, 220 Yards.
Mill	= 8 Furlongs, 80 Chains, 320 Rods, 880 Fathoms, 1,760 Yards, 5,280 Feet, 63,360 Inches.

Although no longer sold by that measure, Calicos, &c., are sometimes said to be "Ell wide"—the English Ell being 1½ yard, the Flemish Ell ¾ yard, and the French Ell 1½ yard.

The old *Scottish Mile* was 5,920 feet: ten *Scots Miles* being about equal to 11½ *Statute Miles*. *Irish Mile* is 6,720 feet; eleven *Irish Miles* being equal to 14 *Statute Miles*.

Square, Surface, or Land Measure.

The Square Foot contains 144 Square Inches.
Yard = 9 feet = 1,296 inches.
Rod, Pole, or Perch = 30½ yards = 272¼ feet.
Chain = 16 rods = 484 yards = 4,356 feet.
Rood = 40 rods = 1,210 yards = 10,890 feet.
Acre = 4 roods = 160 rods = 4,840 yards.
Yard of Land = 30 acres = 120 roods.
Hide = 100 acres = 400 roods.
Mile = 640 acres = 2,560 roods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.

An Acre roughly stated has four equal sides of 69½ yards: accurate measurement gives each side 208'71 feet.

The sides of a square half-acre would be 147'581 feet, and of a square quarter-acre, 104'355 feet.

The above Imperial Measure is now employed in the United Kingdom, in Canada, Australia, and the Colonies generally, also in the United States; but occasionally some older measurements are referred to, of these—

The Lancashire and Irish Acre, each of 160 perches, contain 7,840 square yards, equal to 1'619835 Statute. 1 Statute = 0'617347 Lancashire or Irish.

The Cheshire Acre of 160 perches, each containing 64 square yards = 10,240 square yards.

The Cunningham Acre, equal to 1'291322 Statute; or 1 Statute Acre is equal to 0'7744 Cunningham.

The Scottish Acre = 1'261183 Statute (nearly 6,104 square yards).

Measures of Time.

60 Seconds.....	= 1 Minute.
60 Minutes	= 1 Hour.
24 Hours	= 1 Day.
(24h. 56m. 4s. = 1 Sidereal Day.)	
7 Days	= 1 Week.
28 Days	= 1 Lunar Month.
28, 29, 30, or 31 Days.....	= 1 Calendar Month.
12 Calendar Months	= 1 Year.
365½ Days	= 1 Common Year.
366 Days	= 1 Leap Year.
365d. 5h. 48m. 46s.	= 1 Tropical Year.

The Astronomical Day commences at noon, and is computed from 1 to 24 hours.

In 400 years 97 are Leap-years and 303 common, Leap-year being omitted every 100th year, but not omitted every 400th. (1900 is not a Leap year.)

Angular Measure.

- 60 Seconds "..... = 1 Minute.
- 60 Minutes '..... = 1 Degree.
- 30 Degrees °..... = 1 Sign.
- 90 Degrees °..... = 1 Quadrant.
- 4 Quadrants, = 360° ... = 1 Circumference, or Circle.

The Earth rotates at a velocity of 15 degrees an hour (about 17'366 miles a minute at the Equator); 1° is therefore equal to 4 minutes.

Circular Measure.

- Diameter of a Circle × 3'1416 gives Circumference.
- Diameter Squared × '7854 gives Area of Circle.
- Diameter Squared × 3'1416 gives Surface of Sphere.
- Diameter Cubed × '5236 gives Solidity of Sphere.
- One Degree of Circumference × 57'3 gives Radius.
- Diameter of Cylinder × 3'1416, and product by its length, gives the Surface.
- Diameter Squared × '7854, and product by the length, gives Solid Contents.

A Circular Acre is 235'504 feet, a Circular Rod 117'752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either a force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute." To understand the basis of this system requires a great deal of very careful study, and more space than we have at our disposal; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

- VOLT** For the measure of Electromotive force = about 92'6% of that given by one Daniell's battery cell.
- OHM** Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.
- AMPÈRE** Current = the current 1 volt will drive through 1 ohm.
- COULOMB** Quantity = 1 ampère flowing for 1 second of time.
- MICROFARAD** . Capacity = '000,001 coulomb at 1 volt pressure.
- WATT** Power = 44 ft. lbs. per minute.
- Board of Trade Unit = 1,000 watts 1 hour.
- 746 watts = 1 horse-power.

In incandescent lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes.

One Board of Trade unit will keep a 16-candle incandescent lamp alight for about 16 hours.

Fish Measure.

Herrings are sold by the *Oran*, containing 26½ imperial gallons, on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stornoway; but on the West Coast, Isle of Man, and in Ireland, by the *Mass*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200.

Timber and Wood.

- 40 cubic feet rough, 50 cubic feet squared = 1 load.
- 50 cubic feet of planks = 1 load.
- 100 superficial feet = 1 square of flooring.
- 120 Deals = 100.
- Width of Battens, 7 inches; Deals, 11 inches; Planks are 2 to 11 inches thick, and 10 or 11 inches wide. A Cord of Wood is 2½ tons, or 125 cubic feet.

Carpenters', Bricklayers', and Builders' Measurements.

- Stock or kiln bricks 8¾ inches × 4¼ × 2¾
- Welsh fire-bricks 9 " × 4½ × 2¾
- Paving bricks 9 " × 4½ × 1¾
- Square tiles 9¾ " × 9¾ × 1
- " 6 " × 6 × 1
- Dutch clinker bricks 8¾ " × 3 × 1½
- A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11½ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

A Square of Flooring is 100 square feet. Ordinary bricks weigh about 7 lbs. each; a load of 500 weighs over 1½ ton.

Sizes of Slates.

	in. in.	n. in.
Empress	26 × 16	Ladies 16 × 10
" Small	26 × 14	" Small 16 × 8
Princesses	24 × 14	" Large 14 × 12
Duchesses	24 × 12	" 14 × 8
Marchionesses	22 × 12	Plantation 13 × 11
" Small	22 × 11	Doubles 13 × 10
Countesses	20 × 10	" 13 × 7
" Wide	20 × 12	Small 12 × 8
Viscountesses	18 × 10	Ditto 12 × 8
" Small	18 × 8	Ditto 11 × 5½

Water.

- Cubic inch = '0361 lb.
- Gallon = 10'0000 "
- Cubic foot = 62'3210 lbs. or 6'2321 gallons.
- 35'943 cubic feet (224 gallons) = 1 ton.

The gallon is = 277¼ cubic inches, = 0'16 cubic feet, = 10 lbs. distilled water.

Water for Ships: Ton, 210 gals., Butt 110, Puncture 72, Barrel 36, Kilderkin 18.

Cisterns: 1 cubic foot is equal to about 6¼ gallons, or 62'321 lbs. A cistern 4 feet by 2½ and 3 deep will hold about 187 gallons, and weigh nearly 16 cwt. in addition to its own weight.

TON WEIGHT OF THE FOLLOWING WILL

AVERAGE IN CUBIC FEET

Earth	21	Coal, Newcastle	43
Clay	18	Pit Sand	22
Chalk	14	River ditto	19
Thames ballast	20	Marl	18
Coarse gravel	19	Shingle	23
Coal, Welsh	40	Night Soil	18

A cubic foot of pure gold weighs 1,210 lbs., pure silver 655 lbs., cast iron 450 lbs., copper 550 lbs., lead 710 lbs., pure platinum 1,220 lbs., tin 456 lbs., aluminium 163 lbs.

Scottish Measures.

LIQUIDS.

- 4 Gills .. = 1 Mutchkin. | 2 Pints ... = 1 Quart.
- 1 Mutchkins = 1 Chop- | 4 Quarts = 1 Gallon.
- pin. | 8 Gallons = 1 Barrel.
- 2 Choppins = 1 Pint.

CORN MEASURE.

- 1 Lippics ... = 1 Peck. | 4 Firlots = 1 Boll.
- 1 Pecks ... = 1 Firlot. | 16 Bolls = 1 Chalders.

Old Scottish Weights.

- 16 Drops = 1 Ounce, 16 Ounces = 1 Pound, 16 Pounds = 1 Stone.

PRESENT VALUE OF A LEASE, FREEHOLD ESTATE, OR ANNUITY.

Per £100 clear Annual Rental or Value, without any deduction whatever.
In the following Table, compound interest at the rates of 3, 4, 5, 6, and 7 per cent. is reckoned.

Years.	3%	4%	5%	6%	7%	Years.	3%	4%	5%	6%	7%

IN PERPETUITY.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent. ANSWER.—19 1/4 years' purchase or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 4 per cent. How much will he receive? ANSWER.—Looking at the Table of Expectation of Life, it will be seen that the expectation for age 54 is about 17 years; and

from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 11 1/2 years' purchase. The present payment required would therefore be £1,127 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

Compound Interest Tables.

TABLE I.—SHOWING THE SUM TO WHICH AN ANNUITY OF ONE POUND ACCUMULATING AT COMPOUND INTEREST WILL AMOUNT IN FROM ONE TO FIFTY YEARS AT RATES VARYING FROM 2½ TO 5 PER CENT.

Table with 6 columns: Yr., 2½ Per Ct., 3 Per Ct., 3½ Per Ct., 4 Per Ct., 5 Per Ct. Rows 1-50.

TABLE II.—SHOWING THE AMOUNT WHICH ONE POUND ACCUMULATING AT COMPOUND INTEREST WILL REACH IN FROM ONE TO FIFTY YEARS AT RATES VARYING FROM 2½ TO 5 PER CENT.

Table with 6 columns: Yr., 2½ Per Ct., 3 Per Ct., 3½ Per Ct., 4 Per Ct., 5 Per Ct. Rows 1-50.

* When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 51 years, £36·02s, and deduct £1 = £35·02s.

■ the annual amount of principal combined with interest required for the liquidation of ■ debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1858, and examined by the actuary of the National Debt Office. It gives the sums needed

Table with 5 columns: Years, 3 per Ct., 3½ per Ct., 4 per Ct., 4½ per Ct., 5 per Ct. Sub-headers £ s. d. for each column. Rows 20, 30, 40, 50.

If the loan be for £1,000, each annual instalment ■ shown above must be multiplied by 10; if for £2,000, then by 20, and so on.

By reason of the new system of aggregation imposed by the Finance Act 1900, new Rates of duty have in certain circumstances been created, viz. :— $\frac{1}{2}$, $1\frac{1}{2}$, $2\frac{1}{2}$, and $3\frac{1}{2}$ per cent.

In calculating duty the net value of an estate where the death occurred between 2nd August, 1894, and 30th June, 1896, is raised to the next complete £10; on deaths after that date until the 8th April, 1900 any fraction of £100 is ignored, such adjusted value determining both the rate and amount of duty. On deaths on and after 9th of April, 1900, the rate and amount of duty is calculated on the exact net value.

Gifts made by the deceased within a twelvemonth of death are subject to aggregation with the rest of the estate.

In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled by some other disposition passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty is payable at the rate of £1 per cent. on the settled property, but from that payment the *ad val.* stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

Small estates up to £300 and £500 gross, are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30s. and 50s., and are exempt from all other death duties.

Where the net value exceeds £100, but does not exceed £200 the *ad valorem* duty amounts to £1 only, provided that the death occurred on or after 1st July, 1896, and before 9th April, 1900.

Interest at 3 per cent. per annum is also payable on the Estate Duty on Personalty from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly in-

stalments, and that on certain annuities may at option be paid in 4 yearly instalments and 3 per cent. interest is charged on all unpaid portions of duty in these cases from 12 months after death.

FACULTY OR DISPENSATION

In England, in all cases, £30.
In Scotland or Ireland, in some cases £20, in others £25.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

LEGACY AND SUCCESSION DUTIES:—*Also see "Estate Duty."*
If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.—Except in the cases of small estates, see note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100: 15 & 17 Vict. c. 51, s. 18.)

Rates of duties payable on legacies, annuities, and residues (£1 per cent. Legacy Duty practically abolished since 1881), and of Succession Duties where deceased died before 1st July, 1888, or where Estate Duty, Finance Act, 1894, is payable (in which latter case 1 per cent. is also practically abolished).

To Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see above)	£1 per cent.
To Brothers and Sisters of the Deceased, or their Descendants	£3 per cent.
To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants	£5 per cent.
To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants	£6 per cent.
To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased	£10 per cent.
Where deceased died on or after 1 July, 1838, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 11½ respectively.	

The Husband or Wife is chargeable with Estate Duty, but not Legacy or Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same. Persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

ALL applications for allowance must be made within two years from the time of spoilage of unexecuted instruments, or within two years of the date or of the first execution of others.

The hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3; Saturday, 10 to 1. At Telegraph Street, E.C. for the allowance of sea policy and general spoiled stamps, are from 11 to 3 on Monday Wednesday, and Friday.

DEEDS STAMPED AFTER EXECUTION.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution.

WITHOUT PENALTY, ON PAYMENT OF THE DUTY ONLY:—

Agreements under hand only, liable to the duty of 6d. — Agreements for letting furnished houses for less than ■ year.—Appraisements. —Attested copies, within 14 days of first execution.

Life policies, within one month of first execution. Foreign sea policies, within 10 days of arrival in U. K.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where the deed or instrument has been wholly executed abroad, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY ■ ADDITION TO PAYMENT ■ THE DUTY:—

Articles of clerkship. Bills of exchange upon stamps of sufficient amount but of improper denomination. Charter-parties. Receipts, within certain limits of time.—Vide Table of Penalties.

Contract notes. Delivery orders. Letters of allotment. Scrip certificates. Share warrants. Warrants for goods. Policies of insurance liable to fixed duty of 1d.

INSTRUMENTS WHICH CANNOT BE LEGALLY STAMPED AFTER EXECUTION:—

Bills of exchange (except ■ before mentioned). —Bills of lading. Marine policies executed in the United Kingdom. Proxies.—Voting papers

TABLE OF PENALTIES USUALLY ENFORCED:—

Agreements under hand only. At—£ s. d. tested copies or extracts: after the expiration of 14 days from their first execution .. ■ 0 0

Charter-parties, within 7 days from their first execution .. 0 4 6

Charter-parties after the expiration of 7 days, but within one month .. 10 0 0

Receipts, within 14 days after they have been given .. ■ 0 0

Receipts, after 14 days, but within one month (beyond this period receipts cannot be stamped under any conditions) .. 10 0 0

Other instruments not enumerated, excepting those which cannot be legally stamped after execution 10 0 0

In addition to these penalties certain documents are also liable by way of further penalty on stamping to a forfeiture of an amount equal to the stamp duty deficient.

All applications for the remission, mitigation, or return of penalties must be made by memorial, addressed to the Commissioners of Inland Revenue, Somerset House, and supported by statu-

tory declaration, such declaration being exempt from stamp duty.

EXEMPTION FROM ALL STAMP DUTIES:—

Transfers of shares in the Government or Parliamentary Stocks or Funds.

COMPANIES ACT, 1852.

FEES TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; £3,000, £3; £4,000, £4; £5,000, £5.

Five shillings extra per £1,000 above £5,000 up to £100,000; 1s. extra per £1,000 above £100,000: but no fee higher than £50.

Deed stamp 10s. to be put both upon Memorandum and Articles of Association.

Fees on Registration of Mortgage 1sts. up to £200, £1 above £200.

For ad valorem stamp on capital see p. 445.

MONEY LENDERS ACT, 1903.

Fee on Registration £1 0 0

HOURS AT SOMERSET HOUSE.

5 "	0 7	11 "	1 0

Newspapers.

The charge is ½d. for the inland transmission of any daily or weekly registered newspaper, the weight being disregarded. If more than one paper be included in a packet, the charge is as by an insufficiently paid letter, or transferred to the Parcel Post, whichever charge is the lower, with a fine of 1d. in addition to any deficient postage.

GENERAL REGULATIONS.

Letters.

WEIGHT.—The weight is unlimited. Maximum length 8 ft.; width 1 ft.; depth 1 ft., unless sent to or from a Government office.

CONVEYANCE OF SINGLE LETTERS BY RAIL.—On payment of 2d. to a servant of the railway, in addition to the usual 1d. stamp, *Inland* letters not exceeding 10 oz. may be forwarded by the next available train or steamship by those companies in agreement with the Post Office, to be called for at the station to which the letter is addressed, or to be transferred thence to the nearest letter-box for postal delivery. The letter must be taken to a passenger station of the railway company. Railway letters may be handed in at any express delivery post office for immediate conveyance to the railway station by special messenger on payment of the express fee of 3d. per mile.

EXPRESS DELIVERY SERVICE.—Letters and parcels are now forwarded immediately in the London postal area, and at almost all provincial postal-telegraph offices, by special messengers, at the following rates:—Not exceeding 1 lb. in weight, inclusive of railway, omnibus, or tramcar charges, for every mile or part of mile, 3d. If the distance exceeds two miles and a public conveyance is not available, a special conveyance must be paid for. Ordinary postage is not charged. If the packet exceeds 1 lb. in weight, for each lb. or part beyond first lb., 1d., maximum charge, 1s. Maximum weight 20lbs.; or if a public conveyance is not available, 15lbs. Cabs may be used if specially paid for. Fees to be paid in stamps. Express mail letters may not be posted in any letter box, but must be handed in over the counter, and clearly marked *Express Delivery* above the address on the left-hand corner of the cover. No Express Delivery on Sundays, Good Friday (except in Scotland), and Christmas Day. Articles of a dangerous or offensive nature are prohibited.

NOTICE OF REMOVAL and for the re-direction of letters must be given in printed forms, to be obtained from the local postmaster or from postmen. A separate form must be filled in for the re-direction of parcels. The notice holds good for twelve months.

RE-DIRECTION.—Letters re-posted unopened more than a day after delivery, public holidays and Sundays not counted, are charged with postage at the prepaid rate. If re-posted the same day no charge is made, provided they do not appear to have been opened or tampered with.

REGISTRATION.—The fee for registering an inland letter, newspaper, or postal packet (including parcels) is 2d. in addition to the postage. These must be handed to an agent of the Post Office, and a receipt taken. By prepayment of a fee of 2d. in addition to the postage and registration fee, the sender of a registered letter may obtain an acknowledgment of its due delivery. The latest time for registering for the night mails is usually half an hour before the box closes for letters; in the case of parcels, half an hour before the latest time for posting ordinary parcels. If an inland packet marked "Registered" be put in a letter-box it will be liable on delivery to a charge of 4d., less any amount prepaid for registration. The payment of the registration fee effects insurance on the packet against loss or damage up to £120, at the following rates:—Fee 2d., compensation £5; 3d., £10; 4d., £20; 5d., £30; 6d., £40; 7d., £50; 8d., £60; 9d., £70; 10d., £80; 11d., £90; 1s., £100; 1s. 1d., £110; 1s. 2d., £120.

RETURNED AND MISSING LETTERS.—Inland letters undelivered, bearing full name and address of sender, are returned unopened; others are opened and returned if possible to senders, a registration fee of 2d. being charged should anything of value be inside. If without an address, and containing nothing of value, they are at once destroyed. Undelivered foreign letters returned, unopened, to the countries whence received. If senders of ½d. packets place a request for their return, in the upper left hand corner of the outside cover, in case of non-delivery, a second postage is charged the sender on their return, otherwise they are disposed of at the Head Office. Inquiries for missing letters should be made at the Secretary's office, G. P. O. North, St. Martin's-le-Grand, between 10 a.m. and 5 p.m.; Saturdays between 10 a.m. and 1.30 p.m. The Returned Letter Office is at Mount Pleasant, E.C.

SOLDIERS' AND SEAMEN'S LETTERS.—Letters to or from non-commissioned officers, private soldiers and seamen serving abroad, the Cape Mounted Rifles, and enrolled pensioners in Canada, not exceeding ½ oz., are forwarded for 1d. If posted for a place abroad unpaid, or insufficiently paid, or the description of the soldier &c be not given, it will be detained and returned to sender for payment of the postage.

UNPAID AND UNDERPAID LETTERS.—If the postage of letters, books, or newspapers be not paid in advance, *double postage* will be demanded on delivery; and if the postage be insufficient, *double the deficiency* will be charged.

RESTRICTIONS.—No advertisement, decoration or printed matter, beyond the address, is permitted on the right hand half of the address side of envelope or wrapper.

Books.

Packets not exceeding 2 oz. in weight may be sent for ½d.; if exceeding 10 oz. they pass un-

conditionally at the letter rate. The limits of length, width, and depth are the same as those of letters.

Any matter wholly printed on paper (paper sent as stationery not admissible), books and periodicals, manuscript, invoices, deeds and agreements, circulars produced in identical terms by any mechanical process (but not to include typewriting or imitations thereof) prints or photographs (when not on glass, or in cases containing glass, or any like substance), together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication in the nature of a letter.

RE-DIRECTION AND UNDER-PAYMENT—See "Letters."

Newspapers.

WEIGHT.—Not over 1 lb. in weight, 1 ft. in length, or 1 ft. in width or depth. No writing in the nature of a letter is permitted, but the wrapper may bear the name and address of the sender, and a reference to any page of its contents to which it is desired to draw attention.

RE-DIRECTION AND UNDER-PAYMENT—See "Letters."

Parcels.

WEIGHT.—The limit of weight is 11 lbs. The parcel must not be more than 3 ft. 6 ins. in length, or length and girth combined, more than 6 ft. A short parcel may be thicker: thus, if it measure no more than 3 ft. in length, it may measure as much as 3 ft. in girth, *i.e.*, round its thickest part. The parcel should be distinctly marked in the left-hand top corner "Parcel Post," and handed across the counter of the receiving houses or given to a rural postman. It must not be posted in a letter-box, and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Money is received at the District Offices in London, at the offices at Battersea, Bedford St., Charing Cross, Gracechurch Street, Lombard Street, Mark Lane and Ludgate Circus, and at the head offices at Edinburgh and Dublin, and in certain large provincial towns when the postage of a number of parcels amounts to 20s. These parcels must be presented at the offices between a.m. and 3.30 p.m. (Battersea to 3 p.m.), and must be tied up in bundles representing a postage of 5s. each. Money payments as above are also received at the Chief Office till 5 p.m. Parcels will be collected in London and a few large towns when the number reaches 10 at a time, or 50 a week. The name and address of sender should be on the outside of every parcel. A greater weight than 11 lbs. must not be accepted from one person by a rural postman on foot, or 21 lbs. by a mounted postman, unless he shall have received notice on the day previous that a greater weight would be sent, and either of them may refuse parcels if already loaded.

Parcels left "to be called for" are charged 1d. a day after they have lain in the office one clear day, the maximum charge being 1s. 6d.

Parcels addressed to, or sent from the Channel Islands, are liable to customs duty, and the sender must make a declaration of contents at the office of posting. Parcels for the Isle of Man are treated as those for the British Isles generally.

No parcels are received on Sundays, Christmas Day, or (except in Scotland) Good Friday. For Bank Holidays, see page 430.

COMPENSATION.—Compensation to the amount of £2 can be claimed on unregistered parcels for loss or damage. To secure compensation where no insurance fee is paid, a certificate of posting should be filled up and handed in for the signature of the post-office official. The insurance fee in stamps can be paid only at a post office.

(No compensation will be granted for loss or damage of parcels containing money, watches, or jewellery, unless registered, or for damage done to a fragile or perishable article.)

REGISTRATION. See "Letters."

RE-DIRECTION.—Parcels may be re-directed free of charge if the original address and the corrected address are both in a delivery from the same office, otherwise they are charged again at the ordinary prepaid rate.

Poste Restante.

This is intended solely for the accommodation of strangers and travellers who have no permanent abode in the town. Letters and parcels may be addressed to the Poste Restante at every Head Post Office in the United Kingdom and to all Branch Post Offices in London. Letters or parcels to be called for should have the words "Poste Restante" included in the address. No initials, or fictitious names, or Christian name only, will be taken in, but are at once sent to the Returned Letter Office for disposal; and all persons applying for "Poste Restante" letters must prove their identity. Foreigners must produce their passports. Poste Restante letters from abroad are not kept more than two months; at Provincial Post Offices only one month; letters posted in London, for one fortnight. After these intervals they are sent up to the Returned Letter Office. When, however, letters addressed "to be called for" bear a request for their return within a specified time, if not delivered, they are dealt with in accordance with such request.

STAMPS, ENVELOPES, Etc.

Stamps.

POSTAGE STAMPS (used also for receipts, telegrams, and certain inland revenue duties up to 2s. 6d., for list of latter see p. 444) are sold of the respective values of ½d., 1d., 1½d., 2d., 2½d., 3d., 4d., 4½d., 5d., 6d., 9d., 10d., 1s., 2s. 6d., 5s., 10s., 20s., and £5. These may be purchased at most offices between a.m. and 5 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell 1d. stamps and registered letter envelopes.

The perforation of stamps with initials is recommended. The perforation of the stamps on post-cards, newspaper wrappers and embossed envelopes is also not objected to. Stamps perforated otherwise than with initials, embossed stamps, or stamps cut from envelopes, wrappers or post-cards, are not available for postage.

Envelopes.

EMBOSSED ENVELOPES.—Embossed Halfpenny Envelopes are in two sizes, Commercial, in packets of 10 for 5½d., and Foolscap, 10 for 6d.; they are also sold singly. Penny Envelopes of the following sizes are kept in stock:—A, 4¾ × 3¾, in packets of 10 for 1s. 10d.; C, 5¼ × 3, 24 for 2s. 2d.; and a cheaper quality (Commercial), 10 for 1s. 9d.; but all may be had in smaller numbers. Envelopes embossed with a two-pence-halfpenny stamp (sizes L, 5½ × 3¾, and M, 5½ × 4¾ ins.) are sold at the following rates:—L, 10 for 2½d.; M, 10 for 2¾d.; 10 for 2s. 2½d.; M, 1 for 2¾d., 10 for 2s. 3d.

REGISTERED LETTER ENVELOPES, for foreign and inland letters, bearing a twopenny stamp embossed on the flap for the payment of the registration fees, are of five sizes, and are sold : F, 5¼ ins. × ¼ ins.; G, 5 ins. × ¾ ins., 2¼ d. each, or 12 for 2s. 2½ d.; H, 8 ins. × 1 ins., 4s. 9 ins. × 4 ins., 2¾ d. each, or 12 for 2s. 7d.; K, 11½ ins. × 1 ins., 8d. each, or 12 for 2s. 10d.

Letter Cards.

LETTER CARDS are sold thus:—1 for 1¼ d., and 12 for 9d., also in packets of 96 for 9s.

Post Cards.

POST-CARDS impressed with a halfpenny stamp are sold at the rate of 10 for 5½ d., or 11s. per parcel of 240; a thicker quality being 10 for 6d., or 5s. per parcel of 100. They can also be had in sheets of 42 cards at £11 8s. and £12 6s. per quarter ream (120 sheets) respectively. Reply Post-cards are about double the rates for single cards, but are not sold in sheets.

COLONIAL AND FOREIGN POST-CARDS are supplied in packets of 10, price 10d.; singly, 1d.

PRIVATE CARDS bearing an adhesive ½ d. stamp and corresponding as nearly as possible to the size and weight of the official card, may be used. They are also admissible for foreign and colonial post provided they have "Post Card" printed on them and are in conformity with the official cards in size and weight.

Wrappers.

WRAPPERS bearing a halfpenny stamp may be had at ¾ d. each or 7 for 4d.; 6s. 3½ d. per parcel of 120. With a penny stamp the price is, singly 1¼ d., or 12 for every 4¼ d.; 10s. 7½ d. per parcel of 120. Uncut sheets of halfpenny wrappers, 14 on each sheet, may be obtained in quarter reams of 100 sheets for £3 18s.

LONDON POSTAL ARRANGEMENTS.

For the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	South Eastern (S.E.)
Eastern (E. and N.E.)	South Western (S.W.)
Northern (N.)	Western (W.)
North Western (N.W.)	West Central (W.C.)

Of these the E.C.—comprising the whole of the City, the W.C.—the district between Temple Bar and Charing Cross, and the S.W.—containing nearly all the Government Offices, are the most important. In the E.C. or City district there are twelve deliveries daily. By appending the initials the sorting of letters is facilitated, and frequently two or more hours saved in the delivery. In the other districts there are from six to eleven collections and deliveries. Letters properly directed, and properly posted, should be delivered within from two to four hours.

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at Chief District offices, Branch offices, Receiving houses, and Pillar boxes before 6; in suburban places, half an hour to an hour and a half earlier.

LATE INLAND LETTERS.—Inland letters and post-cards bearing an extra ½ d. stamp are forwarded by the night mails if posted at the town Branch offices and Receiving houses before 7 p.m., and at Mount Pleasant before 7.45, or at St. Martin's-le-Grand before 7.30. At certain District offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters having an extra ½ d. stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to

the time of the departure of the train bearing the mails, varying from 5.15 a.m. to 10 p.m.

NIGHT POSTING.—Country letters too late for the ordinary mails, but posted in the London districts before the 9 o'clock collection, are delivered by the first post next morning if for places (about 250) within the range of the supplementary night and midnight despatches. Later collections are made in London and the suburbs—mostly between 11 and 12—the letters, &c., for the provinces being despatched by the early morning trains, and those for London and suburban districts coming within the first morning delivery. For early trains and the same delivery a collection is made from 11 to 3 a.m. on certain main routes; also at many places in the N.W., S.W., W., and W.C. districts; and at 3.15 in the E.C. district. At all the Chief District Offices the boxes are cleared at 6 a.m. for the first delivery in London districts, and at 7 a.m. for local letters.

LATE FOREIGN LETTERS, with an extra 1d. stamp, may be posted till 7 o'clock at Aldermanbury, Barbican, Finsbury Square, Lombard Street, Gracechurch Street, Mark Lane, Eastcheap, Leadenhall Street, Throgmorton Avenue, Threadneedle Street, Fleet Street, Ludgate Circus, Charing Cross, Cannon Street, Bedford Street, W.C. the District Offices, and St. Martin's-le-Grand; with an extra 2d. at the latter office till 7.15, or till 7.30 with an extra 3d.

FOREIGN AND COLONIAL POST.

Letters.

IMPERIAL PENNY POSTAGE.—The charge for letters to nearly all British Colonies and Possessions is 1d the half-ounce.

EXTRA-IMPERIAL AND FOREIGN.—To the Commonwealth of Australia, New Zealand (until 1 Jan., 1901), Bechuanaland, Rhodesia, and to all foreign countries, the charge is 2½ d. the half-ounce.

Post Cards.

The rate to all places to which Post-cards are available is 1d. single, 2d. return.

Inland cards are transmissible abroad if the additional postage be supplied by adhesive stamp, and private cards may be used (see previous col.).

Books, Newspapers, Samples, &c.

NEWSPAPERS, BOOKS, PRINTED PAPERS, &c., ½ d. per 100 lbs.

PATTERNS AND SAMPLES, ½ d. per 100 lbs.; but with 1d. minimum charge of 1d.

COMMERCIAL PAPERS, MSS., &c., ½ d. per 100 lbs.; but with 1d. minimum charge of 2½ d.

The limits of size to British Possessions or non-Union countries* are—length 2 ft., width or depth 1 ft., and must not exceed 5 lbs. in weight. To countries in the Postal Union the length is limited to 18 in.; weight not to exceed 4 lbs. If in the form of 100 roll, the limits of size in either case are 30 in. in length and 10 in. in diameter.

The above-named rates should in all cases be prepaid; no packet can be sent forward wholly unpaid, but, if by inadvertence the postage is insufficiently prepaid, double the deficit will be chargeable on delivery.

Mail Days.

MAILS for Canada are made up every Tuesday evening and Wednesday afternoon, and Saturday morning and afternoon; to the United States every Saturday and Wednesday afternoon, and Satur-

* Abyssinia, Afghanistan, Africa (Native possessions on the West Coast), Arabia, Bechuanaland Protectorate, British Central Africa, China, Friendly Islands, Madagascar, Morocco, Niger Protectorate, Samoan Islands, Sierra Leone Protectorate, Society Islands.

day morning and various other days; and to Newfoundland every Friday evening.

To the West Indies every Wednesday and Saturday.

To Australasia, every Friday evening, and various other days

To India, every Friday evening.

To China, Japan, Hong Kong and Ceylon, Mondays and Fridays, and various other days.

To Portugal, Morocco and Tangier, every morning; to Roumania four times daily; to Greece, Sunday, Monday and Thursday mornings, and every Friday evening.

To Egypt, Sunday, Monday morning, and Monday and Friday evening, and various other days; to Cyprus, Friday evening, and various other days; to Malta, every afternoon.

To the Cape and Rhodesia every Saturday afternoon; Orange River Colony and Transvaal every Saturday afternoon; to West Coast of Africa every Tuesday and Friday evening; to Abyssinia, every Friday evening.

To Buenos Aires, Monte Video, and Rio Janeiro, alternate Friday mornings and Wednesday evenings, and various other days.

To Mexico, every Wednesday and Saturday afternoon; to Chile, alternate Wednesdays, morning and evening, and various other days, with U. S. mails.

To other parts of the world, the places and rates are too numerous for insertion; particulars may be obtained at every Receiving house.

Foreign and Colonial Parcels.

The rules and regulations to be observed are similar to those relating to inland parcels, with the addition that every parcel must have a Customs declaration respecting the contents. This must be on a form obtainable at any Post Office. The sender may arrange to prepay all charges to certain British possessions and foreign countries by paying a fee of 6d., making a deposit of 1s. for each 10s. value of the parcel, and signing an undertaking to pay all Customs and other charges on demand; otherwise they are collected on delivery. Certain articles are prohibited; among them letters nearly everywhere, gold, silver, jewellery, and firearms in many places; opium to Hong Kong, Siam and India; and pork and bacon to some places. The "Triple system" of 3lbs. 1s., 7lbs. 2s., and 11lbs. 3s., is charged to the following Colonies:—Ascension, Bahamas, Barbados, Bermuda, Brit. East Africa, Brit. Guiana, Brit. Honduras, Ceylon, Cyprus, Falkland Islands, Gambia, Gibraltar, Gold Coast, Grenada, Hong Kong, Jamaica, Lagos, Leeward Islands, Malta (via France, 3lbs. 2s., 7lbs. 3s., 11lb. 4s.), Mauritius (via France, 3lb. 2s., 7lbs. 3s., 11lbs. 4s.), Newfoundland, Niger Coast, St. Helena, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Straits Settlements, Trinidad, Tobago, Zanzibar. The charges for India, other Colonies and for Foreign Countries are as follow:—

MONEY AND POSTAL ORDERS.

Inland Money Orders.

The highest amount granted in one order is limited to £10. The commission charged is for sums not exceeding £1, 2d.; £3, 3d.; £10, 4d. No order may contain a fractional part of 1d.

Money orders will under no circumstances be paid on the day of issue. The rules and regulations are on the forms issued.

The Chief Money Order Office in London is at Nos. 18 to 20, Fore Street.

Telegraph Money Orders.

Telegraph Money Orders are issued between all post offices authorised to transact telegraph and money order business. They are limited to £10, and the commission is for sums not exceeding £3, 4d.; above this, to £10, 6d., in addition to the charge for an advice to the postmaster and its repetition, the minimum being 6d. If the order is to be delivered at payee's address any charge for portage must be prepaid.

Postal Orders.

Postal Orders are issued at all offices in the United Kingdom, and at Constantinople, Malta, and Gibraltar; they are issued, but not paid, in

India, Straits Settlements, Hong Kong, and Newfoundland; they are payable at all Money Order Offices in the United Kingdom and Constantinople; also in Malta and Gibraltar, provided they were issued in the U. K. or Constantinople. They are issued for fixed sums; those of 1s. and 1s. 6d., at a charge of ½d.; of 2s., 2s. 6d., 3s., 3s. 6d., 4s., 4s. 6d., 5s., 7s. 6d., 10s., and 10s. 6d., 1d.; those of 15s. and 20s., 1½d. They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Stamps to the amount of 5d., but not fractions of 1d., may be affixed to the face of an order, so that practically any odd sum can be transmitted by means of postal orders. The name of the payee must be inserted by the purchaser before parting with it. Payment may be deferred for a period not exceeding ten days, by writing across the order the words "Payable after — days," and by inserting the name of the office of payment.

Foreign and Colonial Money Orders.

These are issued in the United Kingdom on the undermentioned places, the commission being for sums not exceeding £2, 6d.; £6, 1s.; £10, 1s. 6d.:

† Austrian agencies are Adrianople, Beyrout, Candia, Canca, Chios, Dardanelles, Déle Agatch, Durazzo, Gallipoli, Ineboli, Jaffa, Janina, Jerusalem, Kaifa, Kavala, Kerassonde, Lagos (Turkey), Mitylene Prevesa, Retimo, Rhodes, Salonica, Samsoun, Santi Quarante, Trebizond, Valona, Vathy-Samos.

French Agencies for Parcels only, are Alexandretta, Latakia, Mersina, and San Giovanni de Medina.

TELEGRAMS.

Inland.

Inland telegrams may be sent to all parts of the United Kingdom at the rate of 6d. for the first twelve words, and one halfpenny for every additional word; stamps in payment to be affixed to the form by the sender. The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. Five figures are counted as one word. The charge includes delivery within the town postal limits, or within three miles of a head office—beyond that limit the charge is 3d. per mile from the office door. Portage to be paid by sender. Telegram forms are of two kinds—one issued gratis; the other (A1), embossed with a stamp, may be purchased singly, or interleaved with carbonic paper, in books of 20, price 10s. 2d.

Foreign.

Foreign telegrams are subject to a code of rules, too lengthy to be transcribed. The charges vary from 2d. a word to Belgium, France, Germany, and Holland, 2½d. to Algeria, Luxembourg, and Tunis, 3d. to Denmark, Italy, Switzerland, Austria H. and Norway, 3½d. to Gibraltar, Morocco, Roumania, Servia, Sweden, Portugal and Spain, 4d. to Bosnia-Herzegovina, and Montenegro, 4½d. to Bulgaria, 5d. to Tangier, 5½d. to Russia and Spain *via* France, 6d. to Malta, 6½d. to Turkey, Turkish Islands, Cyprus and Greece, 8½d. to Tripoli, 9d. to the Azores and Canaries, 1s. to 1s. 6d. and 2s. 11d. to Canada, and 1s. to 1s. 6d. to United States, 3s. 8d. upwards to India, 3s. 6d. to South Australia, Tasmania, and West Australia, and 4s. 10d. to Victoria, 4s. 11d. to N.S. Wales, and 5s. 1d. to Queensland; New Zealand 5s. 2d., and 3s. 6d. to 6s. 9d. to South America.

REGISTERED TELEGRAPHIC ADDRESS.—For a fee of £1 1s. 0d. annually any person may register an abbreviated address, which must consist of two words, one of them to be the name of the town or place of delivery, e.g., Hercules, London.

SUNDAY TELEGRAMS.—In most provincial towns the Telegraph Offices are open from 11 to 10 a.m. in England; in Scotland and Ireland from 11 to 10 a.m. In London the following offices are always open:—G.P.O. Central; G.N.R., King's Cross (except from 1.30 to 2.30 p.m. on Sundays); G.C.R., Marylebone (except 11.30 a.m. to 3.30 p.m. on Sundays); G.E.R., Liverpool Street and Stratford; London Bridge (S. E. R.), Paddington, St. Pancras, Victoria (L. C. & D.), Waterloo

and Willesden Stations, and West Strand Post Office, the offices at Birmingham; Bradford (except between midnight Saturday and 11 a.m. Sunday); and Brighton (except between midnight Saturday and 7 a.m. Sunday); Bristol, Cardiff Docks, Derby, Devonport, Dover, Exeter, Falmouth, Holyhead, Hull, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Norwich, Nottingham, Penzance, Plymouth, Portsmouth, Sheffield, and Southampton; as also are those at Aberdeen, Dundee, Edinburgh, and Glasgow, in Scotland; and Belfast, Cork, Dublin, Londonderry, and Queenstown, in Ireland.

London-Paris Telephone.

LONDON-PARIS TELEPHONE.—Public Call Offices, G. P. O., West (Bath Street), West Strand Branch, open always, and Threadneedle Street Branch (week days, 11 a.m. to 11 p.m.). Fee—8s. per conversation of three minutes. Two consecutive conversations are permitted. NOTE.—Paris time is 10 minutes in advance of London time.

SUNDAY AND HOLIDAY ARRANGEMENTS.

At all offices in the PROVINCES which are open on Sunday, postage stamps are sold, and letters may be registered, during the time such offices are open. The same regulation applies to CHRISTMAS DAY and GOOD FRIDAY. In LONDON, letters cannot be registered on Sunday, except at certain railway stations, but on Good Friday and Christmas Day postage stamps are sold and letters may be registered at all offices which are open. The hours at which telegraph business is attended to are, as a rule, from 11 to 10 a.m.; but no Money Order, Savings Bank, Insurance, or Annuity Business is transacted on these days, nor in Scotland on Sacramental Fast Days.

BANK HOLIDAYS AND FAST DAYS.—Where Bank Holidays are observed as public holidays, the counters of the head office and branch offices are closed at 12 noon (in some small places they are not even opened) *except* for telegraph business, the reception of parcels, the sale of postage stamps, and the registration of letters. At no provincial town in England or Ireland is there more than one delivery of letters on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery so far as relates to himself.

In London the holiday arrangements are of an exceptional character, and due notice of them is given by means of bills at the various offices.

DISTRICT MESSENGERS: *Head Office, 100 St. Martin's Lane, W.C.*

Electrical call boxes are supplied by means of which "messengers," "cabs," "police," "fire brigade," and "doctor" can be electrically summoned. Messengers are supplied for almost any purpose, and tickets for theatres can be obtained from any of the Company's offices:—

■ Park St., Mayfair, W.; Torrington Place Lodge, Torrington Sq., W.C.; Sloane Sq., S.W. (4 Holbein Place); 193 Piccadilly, W.; 269 Regent St., Regent Circus, W.; 27 Chancery Lane, E.C.; 85A Brompton Rd., Albert Gate, S.W.; 121 Finchley Rd., Swiss Cottage, N.W.; 17 London St., Paddington, W.; Hotel Cecil, Strand, W.C.; ■ Shorter's Court, Stock Exchange, E.C.; 118 High St., Kensington, W.; Whitehall Court, S.W.; Holborn Restaurant.; Trafalgar Sq., S.W.

(4 Charing Cross): Artillery Mansions, 73A Victoria St., S.W.; 82 Gloucester Rd., S. Kensington, and Charing Cross District, Westminster Bridge, Mansion House, Victoria St., and Earls Court District Railway Stations; Broad St. House, Wormwood St., E.C.; 66 Queen Victoria St., E.C.; 120 Leadenhall St., E.C.

The charges are:—Half a mile and under, 4d.; including reply 6d.; over half a mile to one mile (including reply), 6d.; over one mile to one mile and a half (including reply), 9d.; beyond this distance, special rates. Per hour 8d., exclusive of railway or omnibus fares. The district offices are open day and night, including Sundays and Bank Holidays (except in City).

THE EMPIRE OF INDIA.

THE BRITISH EMPIRE IN INDIA extends over a territory larger than the Continent of Europe without Russia. Afghanistan, Nepal and Bhutan are within the sphere of its influence. Baluchistan (130,000 square miles) and Kashmir with its dependencies of Chitral, Hunza, Nagar, are within its frontier. On the north-west and on the north-east there are also tracts of tribal territory under the political influence though not yet under the administrative rule of the "Indian" government. The political boundary of India marches with Persia from the sea to near Zulfikar on the Harirud; then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab; thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of the Victoria lake by the line demarcated in 1895 up to Chinese territory on the Taghdumbash Pamir. From this point the frontier, in many parts not yet clearly defined, touches the Chinese Empire, mainly along the crests of the Himalayas, till the limits of French control are reached on the Upper Mekong. The Indian frontier leaving the Mekong marches with Siam till it reaches the sea half way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, and the Laccadive Islands, Aden and Perim, and protectorates over Socotra, Bahrein, and various Chiefships along the coast from Aden to the Persian Gulf. The British protectorate over the Somali Coast, opposite Aden, has since October, 1898, formed part of the charge of the Foreign Office. Continental India, including Baluchistan, reaches from the 8th to the 37th degree of north latitude, and from the 61st to the 100th degree of longitude east of Greenwich; Calcutta itself lying in 88° E. long. Its total area may be taken to be 1,700,000 square miles, of which 750,000 square miles are under Native and the remainder under British administration. The population of India, shown by the census in February, 1891, if we include the population (computed or estimated) of Manipur, Sikkim, and the Shan States, but not the protected territory of Baluchistan, was 288,350,000, of which 66,750,000 belonged to the Native States. The increase of the population of the Indian Empire in the decade 1881 to 1891 was 33½ millions, of which 5½ millions were added by the inclusion of tracts, particularly Upper Burma, not enumerated in 1881, while the remainder of the increase being at the rate of over 10 per cent. in the decade, represents the ordinary growth of population. Another census is to be taken in March, 1901, which, notwithstanding famine and pestilence, will, no doubt, show a large increase in the population in the decade. The languages spoken in India, excluding European tongues and those which are spoken by less than 1,000 persons, are 78 in number, grouped in a dozen different families; of which 20 languages belonging to five families are spoken by not less than one million persons each. Other particulars regarding the population will be found on pages 482-483. Excluding the Province of Burma, which lies to the east of the Bay of Bengal and forms no part of the Indian Peninsula, we may broadly divide the country, for geographical purposes, into three sections, viz. :—the Himalayan region, the northern river-plains, and the southern table-land. The first of these includes the mountain-range of the Himalayas and their offshoots to the southward. This region, lying mainly beyond the limit of British administration, must be considered the natural northern boundary of India, and may be described as consisting of two giant mountain-ranges running from north-west to south-east, with a series of great valleys between. The southern range, which rises precipitously from the belt of swampy land lying to the north of the Ganges and parallel to its course, springs up to a height of 20,000 feet above the plain, and culminates in the loftiest peaks yet measured on the globe—Mount Everest, 29,002 feet; Kunchin-Junga, 28,176 feet; and Dwhalagiri, over 27,000 feet, near the centre of the range, and Mount Godwin Austen (K. 2), 28,250 feet, near its junction with the Hindu Kush Moun-

The principal Government publications relating to India, presented to Parliament in 1900, were :—Statistical Abstracts, 1889-90 to 1898-99, Cd. 267; Moral and Material Progress Report, 1898-99, No. 207; Trade of British India, 1898-99, with Tables for 1894-95 to 1898-99, Cd. 25; Sanitary Measures in India, 1898-99, Vol. xxx.; Financial Statement for 1900-01, No. 225; Home Accounts, 1898-99, with Estimates 1899-1900, No. 173; Explanatory Memorandum regarding the Accounts and Estimates of 1900-01, Cd. 260; Return of Net Income and Expenditure for eleven years 1888-89 to 1898-99, No. 203; Administration Report of Railways in India for 1899-1900, Cd. 232; Railways and Irrigation Works—Position as regards capital, &c., No. 146; Purchase of Railways, No. 232; Wars on or beyond the Frontier, No. 13; Government Churches, Cd. 129; Expenditure Commission, Evidence Cd. 130. Report Cd. 131; Plague Commission, 3 Vols., Cd. 139 to 141; Famine, 2 Vols., Cd. 203 and 206.

tains. The Himalayas, however, are not only a rampart of defence, but also serve to collect and store up a supply of water for the tropical plains below them. The sides of the Himalayas afford an admirable simultaneous representation of the various natural belts of the earth's surface, being divided into the tropical, the temperate, and the arctic zones as the upward journey is taken from the plains below. The vegetation of the Himalayan region includes such varied species as the tree-fern, the deodar or native cedar, numerous rhododendrons, the ilex, orchids, barley, oats, millet, and many common vegetables of domestic use. In the way of trade this region produces large quantities of timber, charcoal, barley, millet, and honey. The fauna are no less varied than the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear and ounce, eagles, partridges, and a large number of pheasants. The native tribes afford examples of both the Aryan and the Turanian races, together with an intermingling of the two. The northern river-plains, lying at the foot of the Himalayas, and stretching from sea to sea, comprehend the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from each other, four rivers take their rise in the Himalayas. Of these, two are on the north side of the mountains—the Indus, which flows westward, and the Sang-po or Brahmaputra, which flows eastward. The other two, on the southern slope, are the Sutlej, which, after flowing west and south-west for 900 miles and collecting to itself various other waters, joins the Indus; and the Ganges, which, during a south-east and easterly journey of nearly 1,600 miles, drains almost the whole of the Bengal plain. Meanwhile the Brahmaputra, which runs close along by the mountains on the northern side, having reached the eastern extremity of the Himalayas, turns sharply to the south, then to the west, and finally joins the Ganges, the two rivers discharging themselves together into the Bay of Bengal. The Indus is 1,800 miles long; the Brahmaputra nearly 1,500 miles long. It will be seen from this that the Himalayas send to India the water gathered on both their northern and southern slopes; this result is due to the peculiar *lie* of the land, and this it is which has not only given great abundance and wealth to the country, but has also made it the prey of the spoiler and invader for many centuries. The richest, the most populous, and the most prosperous part of India is to be found in the basins of these three great river-systems, which include in the aggregate an area of 1,125,000 square miles. Each of these rivers is of inestimable value to the country it drains, but particularly is this so with the Ganges. The Ganges is not only the great highway of Bengal, it is also the water-carrier and the fertiliser; without it traffic, where not impossible, would be enormously dear, and the province almost a desert. So rich is the Ganges valley that a wholly agricultural population of nearly 60 millions finds support on the soil at a density of over 700 persons to the square mile (the average density of the population of England and Wales being 500 to the square mile). There are several agricultural districts with a population exceeding 900 to the square mile. There are three harvests in Lower Bengal each year: pease, pulse, and various oil-seeds are reaped in April and May, the early rice crop in September, and the great rice crop two or three months later. The chief vegetable products of N. W. Bengal are the mango, the banyan, the wild cotton-tree, and the tamarind: while the delta region gives rice, the bamboo, and a large variety of palms (cocoanut, date, areca, &c.). In the north, again, we also find wheat, Indian corn, millet, and barley; while to the south, indigo, cotton, sugar-cane, tobacco, and many different dyes, drugs, and spices are also produced. These include the aloe, castor-oil tree, resins, and gums; but there are also grown the melon, pumpkin, tea-plant, yams, the opium poppy, the mulberry, and jute. Just as the Himalayas on the north and the Suleiman Mountains on the north-west form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due east and west from the head of the Gulf of Cambay, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel Coasts, which converge at Cape Comorin, and on the third by the Vindhya Mountains, north of the Nerbudda River. The Eastern and Western Ghauts all but complete the triangle of mountain ranges with which this region is surrounded. As the Western Ghauts lie so close to the coast, and afford no exit for rivers, we find no streams on the Malabar Coast south of the Tapti River: all the rivers—and they are both numerous and of great size—flow eastwards, and passing through gaps or defiles in the Eastern Ghauts, discharge their waters into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N. E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.) at intervals further to the south; in the extreme N. W., too, south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti

flowing westwards. The division line of the basins of these last two rivers is sharply defined by the Satpura Mountains, which lie midway between them. The physical geography of S. India has given it much of its history: the S.W. coast, shut in by the mountains, is very primitive and moves slowly; the S.E., open and easy of access both from within and without, has advanced with rapid strides in commerce and all other civilising influences. The mountain slopes of this region, those of the Western Ghats in particular, are still covered with the splendid vegetation of primeval forests of the tropics: teak, ebony, ironwood, and Indian mahogany abound, so also do the jackwood, blackwood, sandalwood, and the ubiquitous bamboo. Coffee is now largely cultivated there, and tea and cinchona are also grown. The elephant, tiger, bison, leopard, deer, sheep, and various smaller game afford limitless sport to the hunter. In the valleys and on the higher plains many crops are raised in profusion, chiefly the same as those grown in the lower basin of the Ganges. The southern table-land has in past times furnished considerable supplies of different minerals, including gold: those found and worked now are mainly lime, coal, iron and gold: the output of the gold mines of Mysore is steadily increasing. To the west of the peninsula the Indian Empire includes the mountainous, barren, and thinly populated region of Baluchistan; its coal and petroleum have not hitherto repaid working. East of the peninsula is the large province of Burma, watered by the Irawaddi and its tributaries and by the Salween. The delta region is flat; further inland the country is one of hills and rolling downs; and in the north the province loses itself in the mountains. Rice is the chief staple; cotton, sesamum, and tobacco are also extensively grown. The forests, particularly of teak, make a very large contribution to the exports. Among the industries still to be developed in the province is that of tea-cultivation, the tea-plant being indigenous. In the Shan Hills the growth of wheat is being encouraged. Burma is rich in minerals. Rubies, sapphires, and jade are mined. Gold and silver undoubtedly exist; wells for the production of petroleum have long been in operation; coal, copper, tin, lead, are also found. Three-fifths of the Indian Empire are under the direct rule of the British Government, and are divided for administrative purposes into eight principal Provinces—*viz.*, Madras, Bombay, Bengal, the North-West Provinces and Oudh, the Punjab, Burma, the Central Provinces, and Assam, and five minor administrations. The remaining two-fifths are made up of a large number of Native States, whose chiefs are, as it is termed, in subordinate alliance with, or under the suzerainty of, Her Imperial Majesty, KAISAR-I-HIND. Her Majesty's representative is styled the Viceroy and Governor-General, his relations with the Home Government being regulated by Act 21 & 22 Vict. c. 106, which substituted the authority of a Secretary of State for India, aided by a Council of fifteen members, for that of the East India Company and the Board of Control. By an Act of 1889, the Secretary of State is permitted to leave five of the seats on his Council unfilled. For the present members of Council see page 161.

For the knowledge we possess of the period that preceded the commencement of connected history in India we are chiefly indebted to the sacred books of the Hindus, the accounts of Greek and Chinese writers, the records of inscriptions and coins, and the evidences of race and language. The existence of various races in India speaking languages not cognate, proves that the country has been subject to successive invasions in remote ages. The first of which we possess direct evidence is that of the ARYANS, who, coming from north of the Hindu Kush, over-spread Persia in one direction and Northern India in the other. The *Vedas*, which are the most ancient and venerated of the sacred writings of the Indian Aryans, and are written in Sanskrit of the earliest type, are supposed to date from 1400 B.C. In the early Vedas all classification and ranking of the gods is absolutely wanting; something of the kind, however, is done in the Upanishads, which form a kind of commentary on the Vedas, and make some attempt to solve the problems of creation, the nature of the Deity, and the human soul. The Upanishads, in fact, founded admittedly on the Vedas, contain the germs of those great systems of Hindu philosophy which, in their later development, brought about the separation of the creed of the

vulgar from that of the educated. The *Mahābhārata* and *Rāmāyana* are epic poems of later date, abounding in extravagant myths, from which, however, the learned have succeeded in gaining a general knowledge of the habits and condition of the people and of the course of events during the dark period of Aryan conquest. Themselves a branch of the Indo-European race, by whom Europe had already been colonised, the Aryans are believed to have entered India some 2,000 years B.C. They were then a pastoral and agricultural people; their form of government was patriarchal, and the offices of prince and priest were united in the same person. Their conquest seems to have been confined at first to the country south of the Himalayas on the west of the Jumna, where they long remained, before they began their advance southwards and eastwards down the Gangetic valley. The enemies they met, who had preceded them in the occupation of the country, were a yellow-skinned, serpent-worshipping race in the Himalayan districts, and in the south a dark-skinned population, short in stature, treacherous, and degraded. The condition of the people, as well as the progress of their wars with the older inhabitants of the country, can be clearly traced in the sacred poems. It appears that when Oudh and Bengal had

been subdued, the deified hero Rāma effected the conquest of Southern India, and afterwards that of Ceylon. By this time a great change had come over the Aryan invaders. Their primitive simplicity had disappeared. Patriarchs had become luxurious princes, whose priestly duties were deputed to the sect of Brahmans; and by the fifth century, when, it is supposed, the *Laws of Manu*, a digest of the current customary laws, were compiled, this caste had succeeded in establishing its superiority over the Kshetriya, or military caste, to whom it had been at first subordinate. The *Laws of Manu* give a good idea of what the priestly caste wished Indian society to be at the period when they were composed. In them we find mention made of the existence of caste and village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Sākyā Muni, or Gautāma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died at a great age in 543 B.C. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood; and within three centuries from the death of its founder it had been accepted as the national religion. For more than a thousand years it existed in India side by side with Brahmanism, which it never succeeded in ousting. But either from internal dissensions of its own, or from persecution without, Buddhism became practically extinct in India before the twelfth century, though it still flourishes not only in China and Japan, but also in Nipal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. One branch of it, however, survived in the distinct sect of the Jains, whose religion was a combination of Buddhism and Brahmanism. The followers of this creed, of which the antiquity and relations with Buddhism are much disputed, are still very numerous in Guzerat, and may be found in many parts of India.

With Alexander's invasion (327 B.C.) we reach the first landmark in the political history of India. Herodotus tells us that the twentieth satrapy of Persia had previously included part of the north-west of India. Alexander himself did not penetrate beyond the tributaries of the Indus, though he sailed down the river; his Indian possessions fell to Seleucus, whose ambassador, Megasthenes, has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village-communities of the Punjab, and speaks of the peoples as brave and truthful, and averse to litigation, and of the women as chaste; and he notes the absence of slavery. Asoka (B.C. 260-220), the grandson of Chandragupta, whose edicts throw light upon this period, was the great patron of Buddhism, which became for a time the State religion throughout the greater part of India. Our last contributors to a knowledge of India before the period of authentic history are the Buddhist pilgrims from China, who visited the country between the fifth and tenth centuries.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between 126 B.C. and 544 A.D., over Northern India. Their inroads, as well as the existence of ancient aboriginal tribes in India, left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus.

So early as A.D. 664 Arabs began to make predatory expeditions against Guzerat and Sind. The conquest of Persia, towards the middle of the seventh century, at length brought the successors of Mohammed to the Indus, and in the N. W. of India they made some temporary acquisitions during the ensuing hundred years. However, two centuries more were to pass before the foundations of a durable Mohammedan empire were laid. It was in the year 990 that Mahmud declared the independence of the kingdom of Ghazni in Afghanistan—a proceeding which he followed up by at least twelve expeditions into India, one of which carried him beyond the Jumna, and another ended in the occupation of Guzerat. Later, in 1024, he conquered and annexed to his kingdom the provinces of Lahore and Mooltan. The succeeding dynasties of Afghan kings held power in India for 500 years; but the advance of their power was gradual, for it was not till 1206 that Delhi was taken, and the greater part of Hindustan annexed by Kutb-ud-din, with whose memory is connected the Kutb Minar, near Delhi; and the first Mohammedan invasion of the Deccan took place in 1294.

From this time onward the history of India is the history of invasion, dynasty following dynasty, while the Mongol hordes again and again swept into the country. At length, during the reign of the last monarch of the Toghlaq line, the famous Tamerlane burst into India at the head of a mighty host, and captured and sacked Delhi in 1398; he left behind him Khizr Khan, who thenceforward held the reins of power. A period of misrule, tyranny, and anarchy ensued, and fittingly paved the way for the total conquest of the country by the Mogul emperors.

THE MOGUL EMPIRE.—The Mongols, or Moguls, Mohammedan Power, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, and, as has been stated, again and again invaded that country. In 1398, during the invasion of Tamerlane, or Teimur, a great part of Hindustan was laid waste. In 1526 *Sultan Baber*, a descendant of both these Tartar chiefs, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE. *Humayoon* (1530-56) lost the whole of the territory conquered by Baber, but recovered a portion of it shortly before his death. *Akbar*, his son (1556-1605), being a minor, the Government was for five years under a regency, but it was much longer time before Akbar's many opponents were subdued and his Empire firmly established, embracing Cabul, Candahar, all Hindustan, and a portion of the Deccan. The Mogul Empire thus absorbed not only the Afghan kingdom in Hindustan, but also the independent Mohammedan kingdoms of Bijapur, Golconda, Ahmednagar, Berar, and Bidar, in the Deccan. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men whom he drew around him were Raja Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet; nor should we overlook Bairam Khan, Akbar's faithful guardian in his youth. The revenue of Akbar's empire is estimated to have been 19 millions sterling; and this gradually increased till under Aurangzeb, at the close of the 17th century, the imperial revenue amounted to £43,500,000. *Jehangir* (1605-28) received in 1615 an embassy despatched by James I., under the conduct of Sir Thomas Roe. His empress was the famous Nur Mehal. Under *Shah Jehan*

(1628-58) the Mogul Empire reached its zenith. Many public works and grand buildings testify to his magnificence and taste, amongst others the Taj Mahal at Agra, which is said to have been the work of a French architect—Austin of Bordeaux. The close of *Shah Jehan's* reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658-1707) defeated his brothers and put them to death; his father he kept prisoner for the rest of his life. *Aurangzeb* had great ability and courage, and was a master of dissimulation; but bigotry and distrust were the bane of his policy, and the decline of the Mogul Empire dates from his reign. Four sons disputed the right of succession: at last *Bahadur Shah* gained the coveted crown, but only for five years. Dying in 1712 he was succeeded by his son, *Jehundar Shah*, who was cruelly murdered by one Farokshir, a great-grandson of the famous *Aurangzeb*, who seized on the crown. He in turn was himself put to death six years later, and *Muhammad Shah*, grandson of *Bahadur*, came to the throne. The viceroys of his own appointment grew uneasy and rebellious, and all unconsciously aided in the growth of the Mahratta power. One of them refused his aid to his sovereign, and the Mahrattas in consequence subdued the Deccan. In 1738, to avenge an alleged insult, *Nadir Shah* of Persia invaded India, captured Delhi, and gave the city over to the mercy of his terrible followers, who are said to have slain more than 100,000 of the inhabitants, and to have levied as contribution and carried off as plunder, treasure equal to more than £50,000,000 sterling. In spite of this enormous sacrifice, peace was only obtained by giving up to the conqueror all the country west of the Indus. On the death of *Muhammad*, in 1748, the country was fast going to decay—it was, in fact, only waiting for a fresh conqueror. The Mahrattas were there ready for the work to be done. About 1724 the Deccan, Oudh, and Bengal became practically independent under *Nizam-ul-Mulk* (ancestor of the present *Nizam*), *Sadat Khan*, and *Aliverdi Khan* respectively.

THE MAHRATTAS.—Simultaneously with the decline of the Moguls rose the power of the Mahrattas. They were Hindus, and the country from which they came may be roughly described by drawing two lines from Nagpur to Surat and Goa on the west coast. The founder of their power was *Sivaji* (1627-1680), a chieftain of the family of *Bhonslah*. *Balaji Vishwanath* (1712-1720), *Peishwa*, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, *Sivaji's* descendants thenceforth holding a merely nominal position as *Rajas* of *Satara*. Under the *Peishwas*, aided by *Scindia*, *Holkar*, and the *Gaekwar*, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence. In 1760 Delhi was in their hands, and though they suffered a disastrous defeat at *Panipat* in 1761, at the hands of *Ahmed Shah*, the Afghan invader, they remained for some time the first Power in India, and were the most dangerous opponents of the English. Too often their government degenerated into a system of organised plunder. Like the *Pindaris*, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both *Pindaris* and Mahrattas were finally overthrown in 1818, that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of European adventurers, who, either from love of

adventure or thoughts of gain, had been attracted in increasing numbers to the shores of India.

EUROPEAN ADVENTURE.—From time immemorial the trade of Europe with India and the farther East has been the most lucrative branch of the world's commerce, and has enormously enriched in turn each nation that has carried it. In the 15th century it was mainly possessed by the Venetians at its European end, and by the Arabs, the successors of the old Phœnicians, in its Eastern portion; the chief centres of the trade of the Arabs were *Calicut*, *Ormuz*, *Aden* and *Malacca*. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by *Vasco da Gama*, who anchored before *Calicut* on 20th May, 1498. From that time until they lost their naval supremacy the Portuguese may be considered to have enjoyed the monopoly of Indian trade. The first Portuguese viceroy, *Francis of Almeida* (1505-1509), established numerous factories and fortresses, and took possession of *Ceylon* and the *Maldive Islands*; while his successor, *Alfonso de Albuquerque*, captured *Goa* (1510), and extended the Portuguese dominion in various places, but notably on the *Malabar* and *Malacca* coasts. This dominion had, in 1542, practically amounted to an entire regulation of the Asiatic coast trade with Europe from the *Persian Gulf* to *Japan*, and for nearly sixty years afterwards the *King of Portugal* was the virtual suzerain of the southern coast of *Asia*. When the Portuguese crown fell into weak hands its power in the Eastern seas began to decline: and it was almost annulled in 1580, when the crowns of *Spain* and *Portugal* were united under *Philip II.*, and the Asiatic interests of *Portugal* were subordinated to the European interests of *Spain*. The Portuguese were content to bring the exports of *India* to *Lisbon*; they left it to the *Dutch* to carry them thence to the other ports of *Europe*. But when *Philip II.*, on account of the revolt of the *United Provinces*, shut the harbour of *Lisbon* against them, the *Dutch* (1580) were driven either to forego the trade or seek it in the East themselves. The enterprise of the nation decided the question, especially as the Spanish naval supremacy had been shattered by the defeat of the "Invincible Armada" in 1588. In 1602 "The Dutch East India Company" was formed by the amalgamation of the previously existing trading societies, and between 1602 and 1620 the principal Portuguese settlements in the East were captured. In 1661 the Portuguese possessed only those remnants of their Indian possessions which they still hold. The Dutch Eastern Empire, situated mainly in the *Malayan Peninsula* and contiguous islands, passed with the Mother Country under the dominion of the French in 1810. Attacked in consequence and conquered by the English in 1812, it was surrendered again to the Dutch in 1816, since which date it has remained in Dutch hands.

ENGLISH DOMINION.—At the close of the 16th century the English also began to feel the necessity of freeing themselves from dependence on others for the supply of Indian produce, and to desire a share in the profits of Indian commerce. After the success of some smaller ventures, the English East India Company was incorporated by *Queen Elizabeth* by royal charter on the 31st December 1600; there were 125 shareholders, the capital was £70,000, and the official title was "The Governor

and Company of Merchants of London trading to the East Indies." When voyages to India—and almost profitless voyages they proved to be—were first undertaken on the joint-stock account, the company's capital was raised to £400,000. Quarrels with the Portuguese ensued; and no footing of any kind was obtained until the year 1615, when Captain Best, with four English ships, won a great victory over the Portuguese squadron off Surat, where a settlement was established, and a satisfactory treaty concluded with the Emperor Jehangir. Under the terms of this treaty, King James I. sent out as ambassador Sir Thomas Roe, who was not only granted various trading concessions, but was also permitted to reside at the Court of the Great Mogul. When Charles I. was in need of money he granted a second charter to a new Company. Confusion was the result; and piratical and other acts dishonourable to Europeans followed. The Protector Cromwell, however, was equal to the crisis; the rival companies were merged into one, the famous Navigation Act was passed, a reign of order was established, and the English traders gained a reputation for general honesty which—in spite of individuals and solitary cases—they have ever since maintained. In 1639 the English, who had acquired a narrow strip of land, six miles in length and one mile inland, on the coast just below Masulipatam, built a factory there and having surrounded it with a wall, mounted it with guns, and named it Fort St. George; fourteen years later (1653) this settlement of Madras became an independent Presidency. When, in 1661, Charles II. was married to Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay: five years afterwards it was formally made over to the English monarch, who in his turn, in 1668, transferred all his rights over it, together with the responsibilities connected with it, to the East India Company for an annual payment of £10. In 1687 the factory at Surat was given up by the Company, and Bombay was made the seat of the Western Presidency. Although in 1634 the Company had obtained certain treaty rights concerning Bengal from the Mogul, and six years afterwards a factory had been established at Hooghly, near the mouth of the Ganges, yet in that part of the country they held no territorial possessions as in Bombay and Madras. In 1688 the exactions of the Mohammedan authorities forced them to abandon their settlement. They were, however, invited to return, and in 1689 were laid, amid swamp and jungle, the foundations of Fort William, afterwards destined to develop into the modern city of Calcutta. In 1698 a rival company called "The English East India Company," to distinguish it from the old "London Company," was started with a capital of two millions. The competition resulted in over-trading; the home markets were glutted with all kinds of Indian produce, and the English manufacturers were loud in their complaints. In 1702 the two rival companies were united, and in 1708, thanks to the prudence and tact of Lord Godolphin, the whole of the English companies were at last amalgamated under the charter granted by Queen Anne to "The United Company of Merchants Trading to the East Indies." England having entered upon the war of the Austrian succession in 1744, the rival companies of England and France first came into collision in 1746, the immediate result being the capture of Madras in that year. Had Duplex received continuous support from home, he might have succeeded in founding

a French Empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army at Wandewash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French. The territory retained by the French in India since that date is insignificant; and in these possessions they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and the victory of Plassey in the following year made British influence predominant in Bengal. Clive was appointed first Governor of Bengal in 1758. In 1763, in his absence, the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). As a result of this battle, they received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Behar, and Orissa, and the jurisdiction over the Northern Circars. Clive returned a second time to Bengal as Governor, and before he left finally in 1767, he succeeded in reforming the services, in which great abuses existed. After an interval of misrule Warren Hastings (1772-85) was appointed President of Calcutta, and then Governor-General in 1774, on the creation of that office under the Regulating Act of 1773. He not only greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council, of which Sir Philip Francis, the reputed author of *Junius*, was a member, but was also the first great administrative organiser of the British possessions in India. He repelled Hyder Ali's memorable invasion of the Carnatic (1780), and defeated the triple alliance of the Nizam, the Mahrattas, and Hyder Ali. In so doing he probably saved British India. The first reign of Lord Cornwallis (1785-93) was marked by the complete reform he effected in the Company's Civil Service, by the introduction of the Permanent Settlement of the Land Revenue in Bengal, and by the Second Mysore War. After the uneventful rule of Sir John Shore, afterwards Lord Teignmouth (1793-98), came the administration of the Marquess Wellesley (1798-1805), of which the events were numerous and important. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. His son and successor, Tippoo, equally courageous and equally hostile to the English, was in 1798 in secret correspondence with the French, who had then the predominant influence in the military councils of the Nizam and of Scindia, were strongly established in the islands of Mauritius and Bourbon, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta Confederacy. The campaigns of Lord Lake and Sir Arthur Wellesley, in the Second and Third Mahratta Wars, curtailed the power of Scindia and Holkar, and added to the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not establish, a system of subsidiary alliances with Native States, which promised to give greater security than the

balance of power attempted by Lord Wellesley's predecessors. Lord Minto (1807-13) established peaceful relations with the Sikhs, Cabul, and Persia, through the mediation of Metcalfe, Mountstuart Elphinstone, and Malcolm respectively, occupied the Mauritius, and extended British influence in the Eastern Seas. Under the Marquess of Hastings (1814-23) the Bombay Presidency, hitherto the smallest of the three, attained its present dimensions on the annexation, in 1818, of the territory of the Peishwa, whose power had lasted a little over 100 years. By his wars in Central India, Lord Hastings also delivered the country from the ravages of the *Pindaris*, freebooters who organised bands, sometimes many thousands strong, and devastated the country in all directions; and he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. A war with Nepal also occurred during Lord Hastings' régime. In 1823 Lord Amherst succeeded the Marquess of Hastings, and marked his period of office by a conquest in another direction. The King of Ava had been not only guilty of great insolence to the Governor-General, but was ever making encroachments on British territory. The result was the First Burmese War, which cost us 20,000 lives and nearly £14,000,000, but gave us the fertile provinces of Aracan and Tenasserim, and, practically, Assam. While Lord William Bentinck was Governor-General (1828-35), steam communication with India was introduced, Suttee (or widow-burning) was abolished, educated natives were admitted more largely into the service of the Company, and various measures were passed affecting education, economy, and justice. The Charter of the East India Company was in 1833 renewed for twenty years, on condition that the Company should altogether abandon its trading, and allow of the settlement of Europeans in the country. Lord Auckland's resolution to support Shah Shuja against Dost Mohammed brought on the First Afghan Expedition (1839-42), and the serious disaster attendant on the fatal Retreat from Cabul. This was atoned for in the administration of Lord Ellenborough (1842-44), which also saw the Conquest of Sind by Sir Charles Napier. Lord Hardinge (1844-48) conducted in person the First Sikh War, and fought a series of severely-contested battles, ending with Sobraon (1846). Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted in the submission of the Sikhs, who at Chillianwallah and Goojerat gave further proof of their bravery. The annexation of their country was followed by that of Tanjore; and the Second Burmese War (1852) deprived the King of Burma of his sea-board provinces. Lord Dalhousie promoted the introduction of Railways and the Telegraph. He established cheap postage; promoted steam navigation with England *via* the Red Sea; and opened the Ganges Canal, still the largest irrigation work in India. His annexation policy was much criticised at home: it proceeded on the principle that British being preferable to Native rule in the interest of the subject populations, gross misrule or a break in the natural succession justified the transfer of a Native State to the British Government. In 1849 Satara, and in 1853 Jhansi, thus became British territory; and after the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after long and painful hesitation on the part of the Direc-

torate, and after repeated warnings to the Government of Oudh—a Government marked by tyranny and oppression—that kingdom was also added to the list of annexations. The proclamation was made on February 13, 1856, and the transfer took place without the shedding of blood or the striking of a single blow. Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace. It was, however, his fate to meet the greatest crisis that has threatened the British Empire in India. A Mutiny of the Native troops broke out on the 10th of May, 1857, at the station of Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of 40,000 of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign of Sir Hugh Rose (Lord Strathnairn), and all the heroism displayed during that momentous time, will never be forgotten. The Great Mutiny proved the deathblow to the East India Company, whose glorious annals were brought to a close by the transfer of its entire authority and administration to the Crown.

THE BRITISH INDIAN EMPIRE.—The Act for the better government of India established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st of November, 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died November 20th, 1863. The attention of Sir John (Lord) Lawrence (1864-69) was directed to the necessity for financial retrenchment, which arose chiefly from increased military expenditure. His rule was also marked by the Bhutan War and by the terrible Orissa Famine of 1866. Lord Mayo (1869-72) succeeded in carrying out a number of measures for the reform of the administration and for the development of the resources of the country, of which perhaps the chief was the introduction of the system of provincial finance, a large measure of decentralisation since extended. He was assassinated on the 8th of Feb., 1872, while on a visit to the convict settlement at Port Blair, in the Andamans. During the time of Lord Northbrook (1872-76), H.R.H. the Prince of Wales visited India, and received a loyal welcome from all classes. In the same period occurred a famine in the Lower Provinces of Bengal, and the deposition of the Gaekwar of Baroda for misrule and disloyalty. Lord Lytton's Viceroyalty (1876-80) was made eventful by the terrible Famine in Southern India, by the Second Afghan War, and by the Queen's assumption of the title of EMPRESS OF INDIA. He was succeeded by the Marquess of Ripon (1880-84), whose peaceful rule was marked by the extension of local self-government. He, in his turn, gave place to the Marquess of Dufferin (1884-88), whose régime was remarkable for the Third Burmese War, by which Upper Burma and its dependent Shan States were added to the Empire. In this Administration, too, the north-western frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased; and the Jubilee of Her Majesty's reign (1887) was enthusiastically celebrated by all classes and races throughout India. The Marquess of Lansdowne (1888-93) succeeded Lord Dufferin. He continued his predecessor's policy of strengthening the army and extending and consolidating

British influence on the frontier. Hunza and Nagar, feudatories of Kashmir, were brought under more direct control: an arrangement was made with the Amir relative to the boundary of Afghanistan: and an outbreak in Manipur, where British officers were murdered, was suppressed. In domestic policy he took the first step in currency reform by closing the Indian mints to the free coinage of silver, thus cutting away the rupee currency from its silver basis. He also reconstituted the Legislative Councils by the introduction of a more popular element. The viceroyalty of the *Earl of Elgin and Kincardine* (1894-98) was full of events: an earthquake, which devastated Assam; military operations on a larger scale than any since the Afghan war; and a great famine and the outbreak of plague. In 1895, an outbreak in Chital made necessary a military expedition to relieve the garrison. The operations were rapidly and successfully conducted. At first it was decided to abandon Chital, but the decision was reversed on a change of Ministry. British control was strengthened, and peace for the time established. In 1897, the tribes along the whole border from Chital to Baluchistan rose against the British garrisons. In the military expeditions against these tribes more than 60,000 troops were employed. In addition to war, there was a devastating earthquake in 1897; plague broke out in 1896 and has raged more or less severely ever since; and in 1897 an area of 570,000 square miles, with a population of 130 millions, was visited by a grievous famine, at the height of which $4\frac{1}{2}$ millions were at one time in receipt of State relief. Many boundaries were settled or demarcated in Lord Elgin's term of office, notably those with Russia on the Pamirs and with France on the Mekong; the frontiers of Afghanistan, Persia and China were also dealt with. The Somali coast protectorate was in 1898 transferred from Indian control to the charge of the Foreign Office. In internal administration Lord Elgin's régime was marked by a number of prosecutions for sedition and the modification of the law of sedition, by the abolition of the Presidential army system, the imposition of the cotton duties, the elevation of Burma to a Lieutenant-Governorship, the creation of Legislative Councils for Punjab and Burma, and by the celebration of the Queen-Empress's Diamond Jubilee. Lord Elgin was succeeded as Governor-General by the *Right Hon. Lord Curzon of Kedleston* in January, 1899. Adopting the recommendation of the Currency Committee, he established the gold sovereign as the standard of currency in India, making it legal tender in India concurrently with rupees at the exchange of 15 rupees to the sovereign (1s. 4d. the rupee). He has twice in two years been called on to assist in the maintenance of Imperial interests by the despatch of troops from India, first when between 7,000 and 8,000 British troops were sent to South Africa in 1899, and then more recently when four Brigades, consisting of about 20,000 Native troops, were sent to China to assist in the relief of the Legations besieged at Peking and subsequent operations. He has had to face the continued epidemic of plague, and another famine on even a larger scale than that which confronted Lord Elgin's government. In 1900, the tracts affected by famine contained a population of 85

millions, of whom half were in Native States. At the time of severest pressure more than six millions were on relief works or in receipt of gratuitous relief. Bombay, with its Native States, the Central Provinces and Berar, and the Native States of Hyderabad, Baroda, and Rajputana were the chief sufferers. It is noticeable that the famine area includes Guzerat, Kathiawar and Baroda, the richest and most fertile tracts of Western India, which had not previously suffered from famine for about a century. The prolonged droughts which accompanied or rather produced the famine of 1900 have caused a great loss of cattle, which is calculated to hinder the recuperation of the country. It is fortunate that the monsoon of 1900, though late, has been generally ample, except in parts of Western India and the Deccan. Questions of frontier defence have also occupied the attention of Lord Curzon's government. The aim of the new arrangements is to concentrate the regular troops, keeping moveable forces ready for any urgent operation while the semi-independent tracts on the frontier are to be guarded and policed, as far as possible, by tribal militia and local levies. At the same time, the means of communication between the military centres and the important frontier posts are being steadily improved.

IMPERIAL LEGISLATION.—The original charter of the East India Company was granted by Queen Elizabeth at the end of the year 1600. *The Regulating Act* (1773), which created the first Governor-General, created also his Council, and was the first that recognised the East India Company as a ruling body. It was followed, in 1784, by *Pitt's India Bill*, which, while leaving the Government of India nominally to the Court of Directors, in reality transferred it to a *Board of Control*, whose President represented Indian affairs in the House of Commons; and in 1789 by the *Declaratory Act*, which expressly affirmed this important fact. The Act of 1784 also established the supremacy of the Presidency of Bengal, authorising the historic phrase "The Governor-General in Council." In 1793 the Company's Charter was renewed for 20 years, and its exclusive privileges were continued. In 1813 an Ecclesiastical Establishment was formed, and the trade to India was thrown open; in 1833 the China monopoly was likewise abandoned; a legal member was at the same time added to the Governor-General's Council, and the North-West Provinces were made a separate Administration. In 1853 the Company's Charter was renewed for the last time. Bengal was put under a Lieutenant-Governor, and the Indian Civil Service was thrown open to competition. Act 21 & 22 Vict. c. 106, "An Act for the Better Government of India," received the Royal Assent on the 2nd of August, 1858. By it all the territories heretofore under the Government of the East India Company were transferred to Her Majesty the Queen, who in 1877 (Act 39 & 40 Vict. c. 10) formally assumed the title of Empress of India; and all the powers hitherto exercised by the East India Company, or by the Board of Control, were vested in the Secretary of State for India, assisted by a Council. The number of members of this Council, who are appointed by the Secretary of State, may not fall short of 10 or exceed 15.

The Government of India.

THE expenditure of the revenues of India is subject to the control of the Secretary of State for India in Council, who also conducts Indian business transacted in England. In matters requiring secrecy (e.g., foreign policy) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. In all matters the Secretary of State, as the representative of Her Majesty's Government, can impose his orders on the Government of India. The Crown or the Secretary of State appoints the Viceroy and Governor-General, the Governors of Madras and Bombay, the Commander-in-Chief, the Ordinary Members of the Councils of the Governor-General and of the Governors of Madras and Bombay, and the Judges of the Presidency High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the approval of the Secretary of State. The term of these appointments, except judgeships, is usually for five years. The four Lieutenant-Generals commanding the forces are appointed, two from the British and two from the Indian service, on the recommendation of the Commander-in-Chief at home. Subject to the Secretary of State's control, the Supreme Executive Authority in India is the Governor-General in Council. The Governor-General's Executive Council consists of seven members, including the Commander-in-Chief, who is an Extraordinary Member, and the Public Works Member, whose post may be left vacant at the option of the Crown. Governors and Lieut.-Governors also become Extraordinary Members when the Council meets within their Province. All acts of the SUPREME GOVERNMENT IN INDIA run in the name of "The Governor-General in Council"; but the Governor-General himself has the power of overruling the opinions of the majority of his Council. The Viceroy's Council, when it meets for purposes of Legislation, consists of the above members and of "Additional Members for making Laws and Regulations." There are similar Legislative Councils in Madras, Bombay, Bengal, the North-West Provinces (with Oudh), the Punjab and Burma. The business of the Government of India is divided into the Departments of Finance and Commerce, Home Affairs, Revenue and Agriculture, Military Administration, Legislation, Public Works, and Foreign Affairs. Each Department is under the charge of a Secretary, and is also the special care of a Member of the Supreme Council, who has authority to deal with affairs of routine and minor importance, and to select what is worthy of the consideration of the Governor-General and his collective Council. The Governor-General specially superintends the political business of the Foreign Office. The *Department of Finance and Commerce* looks to questions of Finance, to Stamps, Excise, the Post Office, and anything involving a permanent charge on the State; also to questions bearing on the commerce of the country. The most important subjects coming under the attention of the *Department of Revenue and Agriculture* are the Land Revenue,

Forests, and the Agricultural development of the country. The *Home Department* deals with the Educational, Medical, Sanitary, Ecclesiastical, and Judicial affairs, Municipalities, Local Government Boards, Police, and other matters, and has charge of the penal settlement of Port Blair. The *Foreign Department* conducts our relations with Afghanistan, Nepal, and other conterminous countries, and through its Political Residents and Agents in the various Native States supervises their administration and directs their relations with the paramount power. The *Public Works Department* deals with matters connected with Railways, Telegraphs, Roads, Canals, Buildings, &c. The Marine Service, as well as the Army, is under the *Military Department*. The Legal Member takes charge of Government Bills in the *Legislative Council*.

Separate *High Courts* have been established for the Presidencies of Madras and Bombay and for the Lieutenant-Governorship of Bengal (with jurisdiction also over Assam), and of the North-West Provinces. The Punjab has a Chief Court; the Central Provinces, Oudh, and Mysore have each a Judicial Commissioner, and Burma has two Judicial Commissioners (for Upper and Lower Burma respectively) and a Recorder of Rangoon. A proposal to give Burma a Chief Court is now under consideration.

The division of India into Presidencies is now misleading. The expression is a relic of the time when the three settlements of Fort William, Fort St. George, and Bombay, each under the management of a President and Council, comprised, or were supposed to comprise, the whole of British India. British India is now really divided into *thirteen Local Governments and Administrations*, viz.:—Under Governors, Madras and Bombay, also termed Presidencies; under Lieutenant-Governors, Bengal, North-West Provinces with Oudh (of which the Lieutenant-Governor is Chief Commissioner), the Punjab, and Burma; under Chief Commissioners, Assam, Central Provinces, Berar (of which the Resident at Hyderabad is Chief Commissioner), Ajmere Merwara (the Governor-General's Agent in Rajputana being Chief Commissioner), Coorg (of which the Resident at Mysore is Chief Commissioner), British Baluchistan (of which the Governor-General's Agent in Baluchistan is Chief Commissioner), and the Andaman Islands. These several Local Governments and Administrations enjoy a large measure of financial and administrative independence. The Governors of Madras and Bombay have greater independence than the others, being alone permitted to communicate on certain minor matters direct with the Secretary of State.

The unit of administration throughout British India is the District, at the head of which is an executive officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination (in most Provinces) to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are 250 Districts in British India.

For India Office Establishment, see p. 161.

THE SUPREME GOVERNMENT, CALCUTTA.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees per mensem.]

Viceroy and Governor-General (Rs. 20,833 per mensem), His Excellency the Right Honourable the Lord Curzon of Kedleston, P.O., G.M.S.I., G.M.L.E., b. 1859, m. Mary Victoria Leiter. (6 January, 1899.)

Private Secretary, Walter Roper Lawrence, C.I.E. Rs. 2,000

Assistant Private Secretary, F. W. Latimer.

Military Secretary, Bt.-Maj. Hon. E. Baring, 10th Hussars Rs. 1,500

Aides-de-Camp, Capt. R. G. T. Baker-Carr, Rifle Brigade; Capt. W. McL. Campbell, B. Highlrs.; Capt. H. B. Des V. Wilkinson, Durham L.I.; Capt. G. E. Tyrrell, R.G.A. (Offy.)

Extra Aides-de-Camp, Lieut. Earl of Ronaldshay; Lieut. H. N. Holden, 5 B.C.

Native Aides-de-Camp, Risaldar Wali Muhammad, Sardar Bahadur, Gov.-Genl.'s Bodyguard, and Risaldar-Maj. Hukam Singh, Sardar Bahadur, 16th B.L.

Surgeon, Lieut.-Col. E. H. Fenn, C.I.E., R.A.M.C. Rs. 1,200

COUNCIL OF THE GOVERNOR-GENERAL.

Extraordinary Member, H.E. General Sir Arthur Power Palmer, K.C.B., Provisional Commander-in-Chief in India (1900) Rs. 8,333

Ordinary Members (5), Maj.-Gen. Sir E. H. H. Collen, K.C.I.E.; Sir Arthur Charles Trevor, K.C.S.I.; C.S.M. Rivaz, C.S.I.; Thomas Raleigh; Sir Ed. FitzGerald Law, K.C.M.G.

each Rs. 6,666

Extraordinary Members, the Governors of the other Presidencies when the Council shall assemble within their territory.

Additional Members for Making Laws and Regulations:—Official, G. Toynbee; D. M. Smeaton, C.S.I.; H. F. Evans, C.S.I.; C. L. Tupper, C.S.I.; H. C. Fanshawe, C.S.I.; Sir A. Wingate, K.C.I.E. Non-Official, Maharaja of Durbhanga; M. R. Ry. P. Ananda Charlu Vidia Vinodha Avargal, C.I.E.; Kunwar Sir Harnam Singh, K.C.I.E.; J. Buckingham, C.I.E.; Rai Bahadur B. K. Bose, C.I.E.; Sir Allan Arthur, Kt.; Nawab Muhammad Hayat Khan, C.S.I.; Phirozeshah Mervanji Mehta, C.I.E.

Sec. to Council and Sec. to Government Legislative Department, J. M. Macpherson, C.S.I. Rs. 3,500

SECRETARIES TO THE GOVERNMENT OF INDIA.

HOME.—John P. Hewett, C.I.E. Rs. 4,000

REVENUE AND AGRICULTURE.—T. W. Holderness, C.S.I. Rs. 4,000

FINANCE AND COMMERCE.—James Fairbairn Finlay, C.S.I. Rs. 4,000

FOREIGN.—H. S. Barnes, C.S.I. Rs. 4,000

MILITARY.—Maj.-Gen. P. J. Matland, C.B.

PUBLIC WORKS.—F. R. Upcott.

Advocate-General, Sir Gregory C. Paul, K.C.I.E.

Agents to Gov.-Gen. (Rs. 4,000): Central India, C. S. Bayley (Rs. 4,250); Rajputana, A. H. T. Martindale, C.S.I. (Rs. 4,250); Baluchistan, Lieut.-Col. E. C. Yate, C.S.I. (Rs. 4,750).

Residents: Hyderabad (Rs. 5,000), Lieut.-Col. D. W. K. Barr, C.S.I.; Mysore (Rs. 4,500), Lt.-Col. Donald Robertson, C.S.I.; Cashmere (Rs. 2,750), Lt.-Col. Sir A. C. Talbot, K.C.I.E.; Baroda (Rs. 2,500), Lt.-Col. C. V. Ravenshaw; Nepal, Col. H. Wylie, C.S.I. (Rs. 2,250); Gwalior, Lieut.-Col. J. H. Newell (Rs. 2,150).

Political Residents: Persian Gulf, Lieut.-Col. M. J. Meade (Rs. 2,750); Aden, Brigadier-Gen. O'M. Creagh, V.C. Rs. 3,500

Political Agent and Consul-General, Bagdad, Major P. J. Melvill Rs. 2,500

MILITARY DEPARTMENT, GOVERNMENT OF INDIA.

Director-General of Ordnance in India, Maj.-Gen. R. Wace, R.A., C.B.

Director-General of Military Works, Maj.-Gen. S. C. Turner, R.E.

Commissary General-in-Chief, Maj.-Gen. G. L. Christopher, C.B.

Director-General Indian Medical Service, Surg.-Gen. R. Harvey, C.B.

HEADQUARTERS STAFF OF ARMY OF INDIA.

COMMANDER-IN-CHIEF IN INDIA, Provisional, H.E. Gen. Arthur Power Palmer, K.C.B.; 1900.

Rs. 8,333

Milit. Sec., Major J. M. Burt, R.A.

Adjutant-General, Maj.-Gen. Sir W. G. Nicholson, K.C.B.

Quartermaster-General, Col. Sir A. Gaselee, K.C.B. (Lieut.-Gen. with China Exp. Force).

Principal Medical Officer, H.M.'s Forces in India, Surg.-Gen. W. Taylor, C.B.

Judge Advocate-General in India, Bt.-Col. E. Balfe.

Principal Veterinary Officer in India, Vety.-Col. H. Thomson, C.B.

Director of Military Education in India, Col. H. D. Hutchinson.

Lieutenant-Generals Commanding the Forces (4).

Lt.-Gen. Sir G. B. Wolseley, K.C.B., Madras Commd.

Lt.-Gen. Sir R. C. Low, G.C.B., Bombay Commd.

Lt.-Gen. Sir G. Luck, K.C.B., Bengal Commd.

Col. (Local Lt.-Gen.) C. C. Egerton, A.D.C., C.B. (Officiating), Punjab Commd.

First Class District Commanders (10).

Maj.-Gen. C. Tucker, C.B., Secunderabad.

Maj.-Gen. R. M. Jennings, C.B., Oudh.

Maj.-Gen. Sir B. Blood, K.C.B., Meerut.

Maj.-Gen. Sir G. de C. Morton, K.C.I.E., Lahore.

Maj.-Gen. C. J. Burnett, C.B., Poona.

Maj.-Gen. M. Protheroe, C.B., Burma.

Maj.-Gen. C. C. Egerton, C.B., Punjab Frontier Force.

Maj.-Gen. Sir A. Hunter, K.C.B., Quetta (temporarily in S. Africa).

Maj.-Gen. B. A. Combe, C.B., Rawal Pindi.

Maj.-Gen. Sir R. Westmacott, K.C.B., Mhow.

Second Class District Commanders (20).

Brigdr.-Gen. Sir E. R. Elles, K.C.B., Peshawar.

Brigdr.-Gen. J. T. Cummins, D.S.O., Madras.

Brigdr.-Gen. Sir R. C. Hart, V.C., K.C.B., Belgaum.

Brigdr.-Gen. J. H. Barnard, C.B., A.B.C., Southern.

Brigdr.-Gen. F. Ventris, Bombay.

Maj.-Gen. J. H. Wodhouse, C.B., Sind.

Brigdr.-Gen. F. D. Jeffrey, C.B., Narbudda.

Maj.-Gen. Sir W. H. Meiklejohn, K.C.B., Allahabad.

Brigdr.-Gen. A. J. F. Reid, C.B., Assam.

Brigdr.-Gen. O'M. Creagh, V.C., Nagpore (with China Exp. Force).

Brigdr.-Gen. St. J. M. Faneourt, Rohilkhand.

Brigdr.-Gen. Sir N. R. Stewart, Bart., Hyderabad Contgt. (with China Expedition).

Brigdr.-Gen. H. A. MacDonald, C.B., A.D.C., Sirhind.
 Brigdr.-Gen. W. C. Black, Deesa.
 Brigdr.-Gen. H. P. Leach, C.B., Presidency.
 Brigdr.-Gen. W. Hill, C.B., Derajat.
 Brigdr.-Gen. H. E. Penton, Aden.
 Brigdr.-Gen. G. Simpson, C.B., Mandalay.
 Brigdr.-Gen. G. H. More-Molyneux, C.B., Bundelkhand.
 Brigdr.-Gen. H. B. MacCall, C.B., Bangalore.
Colonels on the Staff Commanding Stations (12).
 Col. E. B. Anderson, Southern Ehan States.
 Col. R. A. Gilchrist, Bellary.
 Col. W. J. Vousden, F.C. C.B., Sialkot.
 Col. N. F. Fitzg. Chamberlain, Delhi (*S. Africa*).
 Col. C. R. Macgregor, C.B., Ferozepore.
 Col. G. H. C. Dyce, C.B., Cawnpore.
 Col. L. R. H. D. Campbell, Mooltan (*China Exp.*).
 Col. W. Hailes, Fyzabad.
 Lt.-Col. H. Dela M. Hervey, Kohat Kurram Force.
 Bt.-Col. F. Abbott, Nusseerabad.
 Col. G. L. R. Richardson, C.B., Rawal Pindi.

ECCLIASTICAL.

Bp. of Calcutta, Metropolitan of India and Ceylon,
 Most Rev. Jas. Edward Cowell Welldon, D.D.
Archdeacon and Commissary, Ven. A. E. Stone.
Bp.'s Commissary in England, Rev. Brook
 Deedes, Hawkhurst, Kent.
Bp. of Madras, Rt. Rev. Henry Whitehead, D.D.
Archdeacon and Commissary, Ven. W. W. Elwes.

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.

(1) MADRAS (area,* 141,189 sq. miles; pop.* 35,630,440), was the scene of our struggle with the French, whose principal settlement, Pondicherry, is 90 miles south of the city of Madras. Though the most important of the three Presidencies until Clive's conquest of Bengal, it was small in extent till 1801, when the annexation of the Carnatic raised it to nearly its present dimensions. It is larger than Great Britain and Ireland together, and has a population equal to that of Italy. With a coast-line of 1,730 miles the province has not one good natural harbour; a large artificial harbour has been completed at Madras at great expense. The province is not naturally fertile, and manganese is the only mineral produced on a considerable scale. The irrigation systems in the river deltas of this province have enormously increased the produce of the soil, and have yielded a large profit to the State. Its trade is served by South Indian, Madras, and East Coast railways, while the Great Indian Peninsula and Southern Mahratta lines connect it with the Bombay Presidency. The Governor of Madras is assisted by a Council ordinarily of twomembers, to whom are added, for legislative business, other members not to exceed 21 (including the Advocate-General *ex officio*), of whom the first seven have been appointed on the recommendations of the Madras Corporation (1), of other Municipal Councils (2), of District Boards (2), of the Chamber of Commerce (1), and of the University (1); the rest are selected by the Government.

CHIEF CITY, Madras. Population, 452,518.

Governor, Lord Ampthill (December, 1900)
 Rs. 10,000
 Priv. Sec., H. A. Sim Rs. 1,500
 Mil. Sec., Capt. W. McL. Campbell, Black Watch

 manya Aiyar, K.C.I.E.; J. A. Davies; R. S.
 Benson; Hungerford T. Boddam Rs. 4,000
Advocate-Gen. J. E. P. Wallis Rs. 1,800

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1661), and was made over by Charles II. to the East India Company in 1668. The Province (ex-

* The areas and populations of the separate provinces are for British territory only, and do not include the Native States subordinate to the provinces in question: the populations are taken from the census returns of 1891.

clusive of Native States, but including *Sind, Aden, and Perim* contains 125,144 sq. miles (nearly equal in size to Prussia), with a population of 18,901,123; it is 1,050 miles in length, and has many fine natural harbours, Bombay and Karachi being by far the most important. Native States occupy about one-third of the Presidency; *Sind*, conquered in 1843, a non-regulation province, one-fourth; and Bombay proper the remaining 82,000 square miles. The greater portion of the people (76 per cent.) are Hindus, and 17 per cent. are Mohammedans. The greater part of the territory was obtained by annexations from the Mahratta powers, and by the lapse of the Satara State. *Sind* was conquered by Sir Charles Napier in 1843. Its administration is in some respects separate from that of the rest of the Presidency. *Aden*, occupied in 1839, and *Perim* (1857), having together an area of 85 square miles and a population of 41,912, belong to the Government of Bombay. Cotton is largely produced for export and for manufacture in the constantly growing cotton mills of Bombay itself. The chief railway systems of Bombay are the Bombay Baroda and the lines worked by it to the north, and the Great Indian Peninsula (now combined with the Indian Midland System), eastwards; south-eastwards is the Southern Mahratta system; while Karachi is the outlet for the North Western railway, the old *Seinde* Punjab and Delhi line. The Governor is assisted by a Council similar to that in Madras, already described, except that the first eight of the additional members are appointed on the recommendation of Bombay Corporation (1), of other Municipal Corporations (1), of District Boards (1), of Sardars of the Deccan (1), of Jaghirdars and Zamindars of *Sind* (1), of Bombay and Karachi Chambers of Commerce (1 each), and of Bombay University (1).

CHIEF CITY, Bombay. Population, 821,764.

Governor, Lord Northcote, G.C.I.E. (17th Feb., 1900)	Rs. 10,000
Private Sec., C. H. A. Hill	Rs. 1,500
Military Sec., Capt. Hon. C. B. F. Greville, 7th Hussars.	
<i>Aides-de-Camp</i> , Lt. J. G. Greig, 28 Bo. Inf.; Lt. M. D. Wood, W. Yorks. Regt.; Capt. J. W. Ferguson, 20th Hussars (17th)	
(Native <i>A-de-C.</i>), Risaldar Shaikh Abdul Karim, Govr's Body Guard.	
Medical Officer, Lt.-Col. A. E. J. Croly, R.A.M.C.	Rs. 1,000

COUNCIL OF THE GOVERNOR.

Sir E. C. K. Ollivant, K.C.I.E.; Jas. Monteath, C.S.I.	Rs. 5,333
<i>Additional Members for Making Laws and Regulations.</i> The Hons. Basil Lang (<i>Advocate-General</i>); Achyut Bhaskar Desai; F. S. P. Lely; Shripat Anant Chatre; Mir Allahbakhshkan walad Mir Alibakhshkan Shahvani Talpur; Narayan Ganesh Chandavakar; J. Tate; H. F. Aston; J. W. P. Muir-Mackenzie; Bamaaji Dinshaw Petit; Meherban Narayanrao Govind; Ibrahim Rahimtulla; Gopal Krishna Gokhale; H. Batty; Phirozeshah M. Mehta, C.I.E.; S. M. Moses; Wm. Greaves; D. McIver; Rao Bahadur Chunnil Venilal, C.I.E.; A. F. Woodburn; R. J. C. Lord, Secy.	

SECRETARIES TO GOVERNMENT.

Chief Secretary, Revenue, Financial, and Separate Departments, J. W. P. Muir-Mackenzie	Rs. 3,750
Legal, Judicial, Legislative, Steyning W. Edger-Poley, C.I.E.	Rs. 3,125

Educational, General, &c., J. DeC. Atkins	Rs. 2,500
Public Works, John Tate	Rs. 2,500

HIGH COURT OF JUDICATURE.

Chief Justice, Sir Lawrence Hugh Jenkins, Kt.,	Rs. 5,000
Judges, Hons. Edward Townshend Candy; R. B. Mahadeo Govind Ranade, C.I.E.; Badrudin Tyabji; Edmund McG. H. Fulton; L. P. Ru-sell; W. H. Crowe	each Rs. 4,000
Commissioner in <i>Sind</i> , Henry E. M. James, C.S.I.	Rs. 4,000
Political Resident at <i>Aden</i> , Brig.-Gen. H. E. Penton	Rs. 3,500

(3) BENGAL (area 151,543 sq. miles; pop. 71,346,987) was placed under a Lieutenant-Governor in 1854, having previously been part of the charge of the Governor-General. With a population nine millions in excess of that of the United States of America, it is spread over an area 1-23rd of that country. It occupies the Valley of the Ganges eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur, to the west and south-west, are ill-watered and liable to drought. The chief products, besides rice, are opium, indigo, and jute. In the hills bordering the great alluvial plain, coal measures are also being largely worked. The East Indian line is the great railway artery of the Ganges Valley. The Eastern Bengal railway also terminates in Calcutta. Other important systems are the Bengal and North-Western in the north and the Bengal Nagpur in the south of the province. The Assam Bengal line, which will make Chittagong the port of Assam, is under construction. The Lieutenant-Governor is assisted by a Council for the purposes of making Laws and Regulations, of not more than 20 members. Of the following list seven members have been appointed on the recommendations of the following bodies:—Calcutta Corporation (1), other Municipal Corporations (2), District Bodies (2), Bengal Chamber of Commerce (1), and Calcutta University (1).

Chief City, CALCUTTA (pop., including suburbs, 978,370).	
Lieutenant-Governor (Rs. 8,333), Hon. Sir John Woodburn, K.C.S.I. (7 April, 1898).	
Private Secretary, Maj. J. Strachey	Rs. 990
<i>Aide-de-Camp</i> ,	Rs. 452

COUNCIL OF THE LIEUT.-GOVERNOR FOR MAKING LAWS AND REGULATIONS.

The Lieut.-Governor (<i>President</i>), W. B. Oldham, C.I.E.; J. T. Woodroffe, (<i>Adv. Gen.</i>); C. E. Buckland, C.I.E.; J. A. Bourdillon, C.S.I.; R. B. Buckley; F. A. Slack, E. N. Baker, C.S.I.; Behari Lal Gupta; Maulive Syd Mahomed; Durga Gati Banerjee, C.I.E.; Raja Ranjit Sinha Bahadur of Nashipur; Sahibzada Mahomed Bakhtyar Shah, C.I.E.; J. G. Apar; Dr. Asutosh Mukhopadhyaya; Babu Boikanta Nath Sen; Surendranath Banerjee; H. Elworthy; G. H. Sutherland.

SECRETARIES TO GOVERNMENT.

Chief Secretary, C. W. Bolton, C.S.I.	Rs. 3,333
General, Revenue, and Statistical, M. Finucane, C.S.I.	Rs. 2,916
Financial and Municipal, E. N. Baker, C.S.I.	Rs. 2,916
Public Works, R. B. Buckley	Rs. 2,500

HIGH COURT OF JUDICATURE.

Chief Justice, Hon. Sir Francis W. Maclean, Kt.,
K.C.I.E. Rs. 6,000
Puisne Judges, The Hons. Sir Henry Thoby Prinsep
(Rs. 4,166); Chunder Madhub Ghose; Dr.
Gooroo Das Banerjee; Amir Ali, C.I.E.; Charles
H. Hill; Robert F. Rampini; Stephen George
Sale; John Foster Stevens; John Stanley;
Richard Harrington. each Rs. 4,000
Adv.-Gen., Jas. Tisdall Woodroffe Rs. 3,135

(4) THE NORTH-WEST PROVINCES AND OUDH (area, 107,503 sq. miles; pop. 46,905,085), with a population as large as that of the German Empire on less than one-half its area, form the upper part of the great plain of the Ganges to the west of Bengal, lying between the Himalayan Mountains and the hilly border of the central plateau. Originally the North-West Provinces formed part of the Bengal Presidency. In 1833 it was intended (Act 3 & 4 Will. IV. cap. 85) to establish a separate Presidency of Agra. The idea was dropped in 1835 (Act 5 & 6 Will. IV. c. 52), when, however, a Lieutenant-Governor was appointed for the separate administration of these provinces. OUDH, equal in size to Holland and Belgium, was annexed in 1856 and placed under a Chief Commissioner, but since 1877 the offices of Lieutenant-Governor of the North-West Provinces and Chief Commissioner of Oudh have been combined in the same person. In 1887 a Council was established for making Laws and Regulations for the combined Provinces. Of the following list six members have been appointed on the recommendations of the following bodies:—Municipal Corporations (2), District Bodies (2), Chamber of Commerce of Upper India (1), and Allahabad University (1). The maximum number on the Council is 15. The character of the province resembles that of Bengal. The chief staple is wheat, and indigo, cotton, sugar, opium, and oilseeds are sown largely for commerce. Tea is also cultivated in the sub-Himalayan districts. The province is well served with railways, belonging to the East Indian, Oudh and Rohilkhand, and Rohilkhand-Kumaon systems. The *Chief City* of the North-West Provinces is ALLAHABAD (pop. 175,246); that of Oudh is LUCKNOW (pop. 273,028).

Lieut.-Gov., Sir Antony P. MacDonnell, C.C.S.I. (6 Nov. 1895) Rs. 8,333
Priv. Sec., Capt. E. C. Bayley, I.S.C. Rs. 725
Aide-de-Camp, Maj. H. L. Pennall Rs. 890
Chief Sec. to Govt., J. O. Miller Rs. 3,000
2nd Sec. to Govt., L. M. Thornton Rs. 2,250
3rd Sec. to Govt., J. S. Meston Rs. 2,250

COUNCIL OF THE LIEUT.-GOVERNOR AND CHIEF COMMISSIONER FOR MAKING LAWS AND REGULATIONS.

The Lieutenant-Governor (*President*). The Hons. Raja Rampal Singh; Babu Sri Ram. Rai Bahadur; Lt.-Col. W. E. Cooper, C.I.E.; J. O. Miller; C. W. Odling, C.S.I.; J. Hooper; Pandit Bishambar Nath; T. Conlan; Raja Balwant Singh, C.I.E.; Nawab Muntaz-ud-Daula Mahammad Faiyaz Ali Khan; Maharaja Sir Partab Narayan Singh, K.C.I.E.; R. H. Macleod; J. S. Meston; D. T. Roberts, R. G. Hardy, C.S.I.

HIGH COURT OF JUDICATURE (WITH JURISDICTION IN THE NORTH-WEST PROVINCES ONLY).

Chief Justice, Hon. Sir Arthur Strachey . . . Rs. 5,000
Puisne Judges, The Hons. George Edward Knox, Harrison F. Blair, Babu Pramoda Charan

Banarji, William Robert Burkitt, Robert Smith Aikman each Rs. 4,000
Judicial Commissioner of Oudh, Joseph Deas

Rs. 3,500
Add. Judl. Commr., George T. Spankie; Rs. 3,333
(5) THE PUNJAB (area, 110,667 sq. miles; pop. 20,866,847), with a larger population than Spain and Portugal together, occupies the north-western angle of the great northern plain of India, and receives its name from "Five Rivers" which, descending from the Himalayas, cross the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was administered by a Board of Administration. This Board was then superseded by a Chief Commissioner, who in 1859 was raised to the rank of Lieutenant-Governor. The division of Uelhi was at the same time transferred to the Province from the North-West Provinces. In April 1897 the Indian Councils Act was extended by proclamation to the Punjab and a Legislative Council for the Province constituted, to consist of 9 nominated members, 5 being officials and 4 non-officials. Besides the territory under British Administration, which is about as large as the Kingdom of Italy, there is an area of one-third that size belonging to 34 Feudatory Native States, with a population of more than 4¼ millions. Thirdly, there are the frontier tribes, split up into numerous clans with divergent interests, whose fighting strength is estimated at 130,000 men. The province is mainly agricultural, and depends largely for its harvests on artificial irrigation works which in the Punjab are on a vast scale, are still being extended largely, and are highly remunerative. It possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form its principal exports. The various branches of the North Western system of railways serve the Punjab.

CHIEF CITY, Lahore. Population, 176,854.
Lieut.-Governor, Sir W. Mackworth Young, K.C.S.I. Rs. 8,333
Private Sec. & A.-de-C., Capt. G. W. Rawlins, Rs. 724
Council of the Lieutenant-Governor for making Laws and Regulations, J. S. Beresford; C. L. Tupper, C.S.I.; H. C. Fanshawe, C.S.I.; Rai Bahadur Madan Gopal; Sir Nawab Ahmad Khan Amir-ud-din, K.C.I.E.; Sardar Bhagal Singh, C.I.E.; Nawab Muhammad Hayat Khan, C.S.I.; A. F. D. Cunningham, C.I.E.; Jas. Wilson; and A. Turner, *Secretary*.
Chief Sec. to Govt., L. W. Dane Rs. 2,500
Revenue and Financial Sec. to Govt., A. H. Diack, Rs. 2,250
Judl. and Genl. Sec., H. A. Casson Rs. 1800
Secs. Public Wks. Dept., Bgs. and Rds. Br., Col. S. L. Jacob, C.I.E. Rs. 2,743
Irrig. Br., S. Preston Rs. 2,500
Financial Commissioner, C. L. Tupper, C.S.I.

Rs. 3,500
Settlement Commissioner, J. Wilson Rs. 3,000
Chief Court—*Chief Judge*, W. O. Clark Rs. 3,750
Judges, A. H. S. Reid; Protul Chunder Chatterji, Rai Bahadur; T. G. Walker; J. A. Anderson each Rs. 3,500

(6) THE PROVINCE OF BURMA is bounded by China and by Chinese subordinate tribes, by Siam, by our provinces of Bengal and Assam, and by the sea. The area of Lower Burma is 87,957 square miles; that of Upper Burma, 83,473 square miles. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States

after the third war of 1835. The province is thinly peopled. The population of Lower Burma was 4,658,627 in 1891; that of Upper Burma (excluding the Shan States) 2,946,933. The delta country of Lower Burma is flat, but above Prome it is an upland, hilly country. Rice is the main product of the delta region, and is very largely exported. The principal export besides rice is teak, which comes from the forests of both Upper and Lower Burma, and from the Shan States and Siam. The Upper Province is also rich in minerals, including rubies, jade, iron, lead, tin, coal, and petroleum; gold and silver are also known to exist. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, supply important navigable waterways. The main river is itself navigable beyond the town of Bhamo, 900 miles from its mouth. Manufactured goods are exported by land to the Shan States and to China. There is a large traffic by river and by the Burma railway, which has reached Myitkina on the upper Irrawaddy while a branch is being built to the Kunlon Ferry on the Salween. The inhabitants—of the common Indo-Chinese stock—belong to numerous different tribes, who are distinguished by a variety of manners, languages, and religions. The most general religion is some form of Buddhism. The Lieutenant-Governor of Burma has a Local Legislative Council of 9 nominated members (5 official and 4 non-official).

CHIEF TOWN OF LOWER BURMA, Rangoon.
Pop. 180,324.

CHIEF TOWN OF UPPER BURMA, Mandalay.
Pop. 188,815.

Lieut.-Governor, Sir Frederic William Richards
Fryer, K.C.S.I. Rs. 8,333
Private Sec., R. H. Greenstreet, C.I.E. (acting).
A.-de-C., Lt. J. S. S. Dunlop, S. Staff. Regt.

COUNCIL OF THE LIEUT.-GOVERNOR FOR MAKING
RULES AND REGULATIONS.

The Lieut.-Governor (*President*); C. G. Bayne;
A. Pennycook, C.I.E.; J. Macgregor; U Gaung,
C.S.I., Ex-Kinwun Mingyi; Hkun Saing, C.I.E.,
Sawbwa of Hsipaw; D. Norton, C.S.I.
Chief Sec., Sir Edward Spence Symes, K.C.I.E.

Revenue Sec., H. M. S. Mathews Rs. 3,000
Sec., J. B. Wingate.

Sec. P. W. Dept., A. B. Gatherer.
Financial Commissioner, Donald Mackenzie
Smeaton, C.S.I. Rs. 3,000

CHIEF COURT OF LOWER BURMA.

Chief Judge, F. S. Copleston Rs. 3,750
Judges, C. E. Fox; Wm. Bigge; A. R. Birks
Rs. 3,500 each

Judicial Commissioner (Upper Burma),
H. Thirkwell White, C.I.E. Rs. 3,000
Rangoon by the mail route is 7,663 miles from
London; transit 18 to 21 days.

Mandalay is 386 miles from Rangoon by rail-
way; transit 18 hours.

Telegrams to Burma, per word by Eastern or
Indo-European Cos., 4s. 2d.; *via* Turkey, 3s. 10d.
Post and parcel rates same as India.

(7) THE CENTRAL PROVINCES (area, 86,501 sq. miles; pop. 10,784,294), containing a population equal to that of Holland and Belgium combined on an area $3\frac{1}{2}$ times that of those countries, were formed in 1861, out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta King-

dom of Nagpur. These provinces contain a large population of aboriginal tribes. Much has been done, by constructing railways (belonging to the Indian Midland and Great Indian Peninsula systems—now combined—and the Bengal Nagpur line) and roads, to open up the country, which possesses large coal-fields, as well as excellent iron ores, and is an important producer of rice, wheat, and cotton for export.

CHIEF CITY, Nagpur. Population, 117,910.

Chief Comm., Denzil C. J. Ibbetson, C.S.I. Rs. 4,656

Chief Sec. to Chief Com., R. H. Craddock Rs. 2,500

Judicial Commissioner, S. Ismay Rs. 3,165

(8) ASSAM (area, 49,004 sq. miles; pop. 5,476,833), was constituted a separate administration in 1874, out of Bengal districts, most of which had been ceded by Burma in 1825. A range of mountains divides the province into the Surma and Brahmaputra Valleys. The chief City of the Brahmaputra Valley is GAUHATI (pop., in 1891, 10,817), and of the Surma Valley SYLHET (pop., in 1891, 14,027). The revenue is comparatively small. The staple crop is rice. But Cachar, Sylhet, Sibsagar, and Lakhimpur are the most important tea-growing districts in India. The mineral resources, consisting mainly of coal, petroleum, iron, and limestone, have only begun to be utilised. The construction of an important system of railways (the Assam-Bengal line) for the development of Assam is in progress.

SEAT OF GOVERNMENT, Shillong. Pop., 2,185.
Chief Comm. (Rs. 4,166), Hy. J. Stedman Cotton, C.S.I.
Sec. to Ch. Comm. (Rs. 2,000), Francis John Monahan.

(9) BERAR, also termed the *Hyderabad Assigned Districts* (area, 17,718 sq. miles; pop. 2,897,491), which lies to the north of Hyderabad, was placed in our hands by the Nizam in 1853, in payment of arrears due to the British Government and to meet for the future the cost of the Hyderabad contingent. The laws of British India do not run as such in Berar; they are, however, generally in force as regulations which the Governor-General has directed shall be followed in those districts. The province is fertile, and yields the finest cotton grown in India. It forms part of the charge of the British Resident at Hyderabad. The revenue and expenditure of the Hyderabad Assigned Districts, amounting respectively to £709,000 and £598,000 in 1893-99, are excluded from the Accounts of the Government of India. The surplus revenues, after defraying the cost of administration and the charges for the Hyderabad Contingent, go to the Nizam's Government. A sum of £3,487 was paid over as surplus to the Nizam in 1898-99; the amounts so paid since the transfer of the province to British administration make up a total of nearly 34 million rupees. Chief City, ELLICHPUR (pop., in 1891, 36,240). The administration is under the Resident at Hyderabad, Lt.-Col. D. W. K. Barr, C.S.I. (Rs. 4,000).

(10) AJMERE-MERWARA (area, 2,711 sq. miles pop. 542,358), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmere-Merwara and the chief executive and judicial authority. Agent to the Governor-General in Rajputana and Chief Commissioner of Ajmere-Merwara, A. H. T. Martindale, C.S.I. (Rs. 4,000).

(11) COORG (area, 1,583 sq. miles, pop. 173,055), annexed in 1834. The Resident at Mysore is

ex officio Chief Commissioner and the chief executive and judicial authority.

Resident at Mysore and Chief Commissioner of Coorg, Lt.-Col. Donald Robertson, c.s.i. (Rs. 4,000).

(12) BRITISH BALUCHISTAN was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan as *ex officio* Chief Commissioner. The districts comprised in this administration were partly acquired from Afghanistan by the treaty of Gundamuck, partly by arrangement with the Khan of Kalat. The Governor-General's Agent also supervises and controls the affairs of the rest of Baluchistan to the Persian frontier. A new trade route between India and Persia along the north of Baluchistan has been recently opened, and is prospering. The area and population of the Agency are not known. The population of British Baluchistan is 145,417. *Agent to the Governor-General for Baluchistan and Chief Commissioner of British Baluchistan, Lt.-Col. C. E. Yate, c.s.i. (Rs. 4,750).*

(13) THE ANDAMANS (area, 2,508 square miles), a chain of islands in the eastern part of the Bay of Bengal, divided into two groups known as the Great and Little Andamans, are of tertiary formation, covered with a luxuriant vegetation, and inhabited by a tribe of Nigritos. The race is dying out. Since 1858 these islands have been used as a penal settlement by the British Government of India: Port Blair, with its safe and spacious harbour, on South Andaman, constituting the civilised portion. Much valuable timber is obtained from the jungles. Tea, rice, Indian corn, manioc, Otaheite potatoes, and artichokes are successfully cultivated, and experiments in Liberian coffee, cacao, and indigo are being persevered in. Of the entire population (about 15,000) four-fifths comprise the convict element. Convict labour is at present mainly devoted to the construction of cellular jails for future newly-arrived convicts and bad characters.

The Nicobar Islands (635 sq. miles) lie almost due south of the Andamans and to the north-west of Sumatra. They formerly belonged to Denmark, but were first occupied by the British in 1869, since when they have been affiliated to the Chief Commissionership of the Andamans. They consist of twelve inhabited and seven uninhabited islands, of which the most important is the northernmost (Car Nicobar), containing half the entire population of the group, and supplying more than half the export trade; while the southernmost island (Great Nicobar) contains more than half the entire area, and presents a rich field for colonial enterprise. The principal products are coconuts. The inhabitants, numbering about 7,000, are strong, thickly-built men of the Malay type. Their chief characteristic is laziness. Their race in the central and southern islands is dying out. Attempts at colonisation made by the Danes in 1734 and 1831 failed. *Chief Com. & Superintendent, Lt.-Col. R. C. Temple, C.I.E. (Rs. 3,000).*

Portuguese India.—The city of *Nova Goa*, capital of the territory of the same name, and indeed of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast, about 265 miles S.S.E. of Bombay. Old Goa, five or six miles inland, is fast falling to decay, and New Goa, or Panjim, at the head of the harbour, a walled and strongly-fortified city, is now the centre of trade and government. It is connected by the Portuguese

West of India railway (51 miles) with British territory to the East. The principal imports are piece-goods, ivory, raw silk, sugar, woollens, &c.; the principal exports are hemp, cowries, betelnut, toys, &c. The whole territory of *Goa*, 60 miles long by 30 miles broad, contains an area of 1,080 square miles, and a population of 561,384 (1891). The other Portuguese possessions in Western India are *Damaun* (pop. of town, 26,964; pop. of territory, 63,284, area 384 square miles), to the north of Bombay; and *Diu*, ■ town and fort on an island off the Guzerat coast (pop. 12,758, area 52 square miles). The revenue of the Portuguese possessions falls rather short of, and the expenditure exceeds, £200,000. The trade of Goa may be valued at about £400,000, mainly imports.

Governor-General, Duke of Oporto.

French India.—*Pondicherry*, the capital of the French possessions in Hindustan, is on the Coromandel Coast, 85 miles S. by W. from Madras. The fortifications were once strong, but in the war with England they were destroyed, and a clause in the Treaty of Paris forbids their being rebuilt or the place being garrisoned by a French force beyond what is required for police purposes. Rice, indigo, tobacco, betelnut, and cotton are cultivated. The chief exports are oilseeds; the imports consist of lace, fancy goods, furniture, and jewellery. There is no harbour to the place, though the roadstead is as good as any along this coast. The area of the French possessions in India is 205 square miles; the population is increasing. In 1891 it numbered 282,923. The chief settlement is Pondicherry, with an area of 115 square miles, and a population of 172,941. The other settlements are *Ohanderanagore*, on the banks of the Hooghly, 17 miles north of Calcutta (area 4 square miles, population 24,281); *Kurikal*, in the Cauvery delta (area 53 square miles, population 70,526); *Yanaon*, in the Godavery delta (area 5 square miles, pop. 5,327); and *Mahee*, ■ small town on the opposite coast of India (area 26 square miles, pop. 9,978). There are 22 miles of railway. The trade of French India amounted to 3½ million francs in value in 1886; it had fallen to 1½ millions in 1895; and in 1893 it was less than 5 millions, of which exports were 3½ millions. The expenditure of France in 1900 was estimated at 30,000 francs, and from local revenues 1,160,000 francs.

NATIVE STATES OF INDIA.

The administration of the Native or Feudatory States of India, with few temporary or unimportant exceptions, is not under the direct control of British officials. But it is subject to the control of the Supreme Government, which is exercised in varying degrees. The chiefs have no power of making war and peace, or of sending ambassadors to each other or to external States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction, and in case of misgovernment the Supreme Government can dethrone the Chief or temporarily suspend him from the exercise of his powers. Some pay tribute, some do not. Generally speaking, the States are governed by their native Princes, Ministers, or Councils, with the help and under the advice of a political officer of the Supreme Government. A common characteristic of all Native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-

General or of the Provincial Governments cannot legislate; and over them the High Courts and Chief Courts of the Provinces have no jurisdiction. The Assigned Districts of Hyderabad (Berar), Mysore (Bangalore), of Kalat (Quetta and Pishin), are still technically foreign, or Native States territory. The Shan States are on the other hand technically part of British India, though they are administered by their local Sawbwas or petty chiefs.

Afghanistan, Nepal, and Bhutan are considered as independent States, though within the British sphere of influence. For these States, however, see pages 486, 497.

Excluding these countries and that of the trans-Salween Shan States, of which the area is not defined, the Native States of India may be said to cover an area of 750,000 square miles, and to contain a population of over 70 millions. The gross revenues of the chiefs come to about £15,000,000, out of which an annual tribute of about £600,000 is paid to the British Government, and they maintain troops to the aggregate number of 80,000 men in addition to their Imperial Service troops. The States vary greatly in size and importance. Hyderabad, for instance, is as large as the kingdom of Italy, and the Nizam enjoys a gross revenue of £2,600,000. On the other hand, in Kattywar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of a single village. In the case of such petty estates, it is not correct to speak of Native rule; the nominal chief may have some very limited magisterial powers, though this is not always the case, but the administration is regulated and carried on by the British Government in its executive capacity. The amount of control exercised by the British Government over a Native State in its internal affairs depends upon a number of considerations, and varies from State to State. Although the number of Native States, large and small, amounts to as many as 650, only about 200 are of any real importance. Most of these States are of more recent origin than the British power in India. They may be classed under fifteen heads: 1. The Indo-Chinese group of States, and the numerous hill tribes of the North-East Frontier. 2. The aboriginal Gond and Kole tribes, under petty princes of aboriginal or Rajput blood, in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 3. The Himalayan Hill States, west of Nepal (including Cashmere). 4. The numerous Afghan and Baluch tribes of the North-West Frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. 5. Kalat, with the other Baluch Chiefships which are more or less subordinate to Kalat. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. 7. The three Northern Mohammedan States of Khairpur in Sind, Bahawalpur to the north-east of it, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 8. The ancient sovereignties of Rajputana, lying to the south of the Punjab, and between Sind and the North-West Provinces. 9. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 10. Guzerat, including Kutch and the numerous petty chiefships of Kattywar. 11. The Southern Mahratta States. 12. Baroda. 13. Hyderabad. 14. Mysore. 15. The Malayalam States of Travancore and Cochin, lying together in the far south.

Hyderabad is the premier State in India. The present Nizam was installed in 1884. Kashmir

was granted to Gholab Sing by Lord Hardinge, after the First Punjab War. The present Maharaja came to the throne in 1885, since which date the administration of the State has been much improved under the advice of the British Resident. Kashmir is important as a frontier State. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chief-ship of Chitral is also occupied by British troops, depending for their support on the Peshawar border. Of the Sikh States the most important is Patiala. Rajputana measures some 460 miles from north to south, and 530 miles in breadth; it has a population of twelve millions. Of its nineteen principalities, the most important are Jodhpur (Marwar), Udaipur (Meywar), and Jaipur. The Rajput dynasties are very ancient, and resemble feudal monarchies. A large part of the area of Jodhpur, Bikaner, and Jaisalmer is desert. The Governor-General's Agent's headquarters are at Ajmir; he has under him a staff of twenty officers, distributed among the States to overlook the administration, and give advice when it is needed or asked for. The Central India States, which are one-third less in extent than Rajputana, are split up into nearly four times as many States. The two most important are Gwalior and Indore, which include between them one-half of the whole area. The opium grown in Malwa is valuable, though diminishing, source of revenue to the Maharaja of Indore and to the Indian Government. Bhopal, one of the principal Mohammedan States in India, has for three generations prospered under female rule. In 1875 the reigning Gaekwar of Baroda was deposed, but the Native administration was continued under an adopted heir. In 1881 the province of Mysore, which had been administered by the British Government since 1834, was restored to Native rule. The present Maharaja is a minor and the State is under a regency.

The salutes enjoyed by the Native Princes may be taken to indicate their relative importance. Those with eleven guns or more are addressed with the title of His Highness. Some of the chiefs who by their enlightened administration or for other causes have earned the special approbation of Government have had their salutes increased; but such increase is personal and lapses on the death of the particular chief. On the next page is a list of the Chiefs having salutes of thirteen guns or more, with some particulars as to their States. In each group the States are given in alphabetical order. In addition to the list given below there are 35 Chiefs having salutes of eleven guns, of whom six have two additional guns in their salutes personal to the present ruler, and there are 26 Chiefs with salutes of nine guns; in one of these cases the present ruler has a personal addition of two guns to his salute.

INDIA IN PARLIAMENT, AND INDIAN LEGISLATION IN 1899-1900.

There was no legislation in Parliament relating particularly to India: the debate on the Indian Budget dealt largely with questions connected with the Famine, and a proposal to make a grant in aid to India from British revenues.

The Parliamentary Commission on Indian Expenditure appointed in 1895 reported during 1900, and its views and suggestions (see page 482) formed the subject of some discussion.

Of the legislation in India towards the close of 1899 and in 1900 the most important Acts were:—

The Punjab and Lower Burma Courts Acts (XXV. of 1899 and VI. of 1900); The Prisoners Act (III. of 1900) which consolidated the law on the subject; The Court of Wards Central Provinces Act (XXIV. of 1899), a consolidating and amending enactment; Act XXIII. of 1899 which incorporated the Kirk Sessions of the Church of

Scotland in British India; Act XXII. of 1899, amending the Indian Coinage Act, 1870, and the Indian Paper Currency Act 1882, making gold coins a legal tender and allowing the Currency Reserve to be kept in gold; Act II. of 1900, to amend the Transfer of Property Act, 1882; and Act V., amending the Whipping Act. The Indian Articles

TABLE OF PRINCIPAL INDIAN CHIEFS, SHOWING SALUTES TO WHICH THEY ARE ENTITLED, AND AREA, POPULATION, AND REVENUE OF THEIR STATES.

SALUTE AND TITLE OF CHIEF.	Area in sq. miles.	Population in 1897.	Revenue actual for last year recorded or approximate.	Date of Succession.
Salutes of 21 Guns.				
Baroda, The Maharaja of (Gaekwar)	8,226	2,415,396	£ 1,020,000	27 May, 1875.
Hyderabad, The Nizam of	82,698	11,537,040	2,546,000	26 Feb., 1869.
Mysore, The Maharaja of	27,936	4,843,523	1,230,000	1 Feb., 1895.
Salutes of 19 Guns.				
*Bhopal, The Begum (or Nawab) of	6,784	954,901	270,000	31 Oct., 1868.
*Gwalior, The Maharaja (Sindhia) of	29,047	3,378,774	937,000	3 July, 1886.
*Indore, The Maharaja (Holkar) of	8,400	1,091,689	570,000	12 July, 1886.
*Jammu and Kashmir, The Maharaja of	80,900	2,543,952	450,000	12 Sept., 1885.
Kalat, The Khan of	106,000	220,500	51,000	15 Aug., 1893.
Kolhapur, The Raja of	2,855	913,131	273,000	17 Mar., 1884.
Meywar (Udaipur), The Maharana of	12,753	1,863,126	247,000	21 Dec., 1884.
+Travancore, The Maharaja of	6,730	2,557,736	589,000	19 Aug., 1885.
Salutes of 17 Guns.				
Bahawalpur, The Nawab of	17,285	650,042	107,000	25 Mar., 1866.
Bharatpur, The Maharaja of	1,982	640,303	183,000	1900.
Bikanir, The Maharaja of	23,173	831,955	143,000	19 Aug., 1887.
Bundi, The Maharao Raja of	2,220	295,675	48,000	28 Mar., 1889.
Cochin, the Raja of	1,362	722,906	128,000	23 Oct., 1895.
+Jaipur, The Maharaja of	15,579	2,823,966	455,000	18 Sept., 1830.
Karauli, The Maharaja of	1,242	156,587	34,000	14 Aug., 1886.
Kotah, The Maharao of	3,784	526,267	168,000	11 June, 1889.
Kutch, The Rao of	6,500	558,415	175,000	1 Jan., 1876.
Marwar (Jodhpur), The Maharaja of	34,963	2,582,178	343,000	11 Oct., 1895.
Patiala, The Maharaja of	5,951	1,583,521	438,000	1900.
Rewah, The Maharaja of	13,000	1,503,176	107,000	4 Feb., 1880.
Tonk, The Nawab of	2,552	380,069	82,000	30 Dec., 1867.
Salutes of 15 Guns.				
Alwar, The Maharaja of	3,144	767,786	191,000	5 June, 1892.
Banswara, The Maharawal of	1,946	211,641	18,000	1842.
Datia, The Maharaja of	836	185,728	67,000	10 Dec., 1880.
Dewas, The Senior Raja of	155	77,922	23,000	1861.
Dewas, The Junior Raja of	134	65,723	24,000	23 May, 1892.
+Dhar, The Raja of	1,739	167,504	53,000	May, 1860.
Dholpur, The Maharaj Rana of	1,154	279,890	83,000	9 Feb., 1873.
Dungarpur, The Maharawal of	1,447	165,400	16,000	28 Sept., 1846.
Idar, The Maharaja of	1,900	302,134	42,000	26 Dec., 1868.
Jaisalmir, The Maharawal of	16,062	115,701	8,000	12 April, 1891.
Khairpur, The Mir of	6,109	131,937	80,000	April, 1894.
Kishengarh, The Maharaja of	858	125,516	41,000	1900.
+Orchha, The Maharaja of	1,933	333,389	60,000	15 Mar., 1874.
Partabgarh, The Maharawal of	886	87,975	28,000	18 Feb., 1890.
Sikkim, The Maharaja of	2,702	30,500	4,000	April, 1874.
Sirohi, The Maharao of	1,964	190,836	27,000	16 Sept., 1875.
Salutes of 13 Guns.				
+Benares, The Raja of (not a Ruling Chief)	581	117,650	64,000	30 April, 1865.
Jaora, The Nawab of	1,307	578,054	157,000	Aug., 1863.
Kuch Behar, The Maharaja of	945	551,249	215,000	27 Feb., 1889.
Rampur, The Nawab of	985	137,442	47,000	31 July, 1862.
+Tipperah, The Raja of	4,086			

■ Within their own territories these chiefs have salutes of 21 guns permanently.
 + The present chief has a salute with two additional guns as a personal salute, or, in the case of Jaipur, of four additional guns.
 † The present chief enjoys the title of Maharaja as a personal distinction.
 ‡ The Maharani Regent of Mysore enjoys also a personal salute of 19 guns.

of War were amended by Act I. of 1900; and the rate of conversion of currency in the Army Acts was laid down by Act XIX of 1899, which has become an Annual Act. Indian Companies were empowered to establish branch registers of their members in the United Kingdom by Act IV. of 1900. The last passed was the Punjab Land Alienation Act (XIII of 1900) had long been under discussion and is designed to check the permanent transfer of agricultural land from the hands of agriculturists to those of the money-lending and commercial classes.

In the Provincial Legislatures in 1899 and 1900 there were:—The Calcutta and Darjeeling Municipal Acts in Bengal; Bombay Civil Courts Act Amendment Act in Bombay; Madras Acts providing for the registration of births and deaths in rural districts, securing compensation for improvements to tenants in the Malabar district, and reforming the law relating to the management of the property of incapacitated persons. In the North-West Provinces there was a Court of Wards Act and a Municipalities Act; and in Burma the Acts passed dealt with Gambling, Ferries, the Military Police and the Rangoon Police.

INDIAN APPOINTMENTS.

The civil administration of British India is recruited from four sources—1. Competitive examination in England; 2. The Indian Staff Corps; 3. The patronage of the Secretary of State; 4. The patronage of the local Governments. The next examination of candidates for appointments in the *Covenanted Civil Service* of India will commence in London on 1st August, 1901, the number of appointments varying with the requirements of the local Governments. Inquiry on the subject at the India Office or the Civil Service Commission. The appointments are distributed between (1) Upper Provinces, &c.; (2) Lower Provinces and Assam; (3) Madras; (4) Bombay; (5) Burma, according to their requirements. The number of appointments to be offered in 1901 will probably be about 50. Successful candidates may express their preference for the provinces in which they wish to serve. But their allotment will depend upon a consideration of all the circumstances, especially the requirements of the public service. The candidates for this examination must be over 21 and under 23 on 1st January preceding. The selected candidates will be on probation in England for one year only, and will receive an allowance of £100 if they pass their probation at one of the Universities or Colleges approved by the Secretary of State for India, and show due diligence. Application for admission to the examination must be made on or before the 1st July, on forms that can be obtained at any time after 1st December preceding, from "The Secretary, Civil Service Commission, London, S.W." Examination fee is £6. Seniority in the service depends on the order of the list resulting from the combined marks of the competitive and final examinations. Within a certain time of the candidate's arrival in India, he must elect to serve in the executive or the judicial branch of the administration, the summit of the profession in one branch being the Lieutenant-Governorship of a Province, in the other a Judgeship of the High Court. The salary of a covenanted civil servant commences at Rs. 4,800 a year. The number of covenanted civilians at present in the Indian Service is about 1,000. The Native Army absorbs the larger proportion of the *Indian Staff Corps*; but out of

total of about 2,500 officers some 380 are attached to the Police or the Public Works Department, or are in Civil or Political departments. Thirty-five appointments in the *Indian Staff Corps* are offered to successful candidates for admission to the Royal Military College, Sandhurst, at each competitive examination, viz. in June and November. Upon receiving his commission a successful candidate is provided with a passage to India, and is attached for a year to a British regiment, and then transferred to a Native regiment. Till he has passed certain language and professional tests, which must be passed before the end of the third year from appointment to the *Indian Staff Corps*, he is practically on probation. Nominations to Indian cadetships and Honorary Indian cadetships, giving special facilities for entrance into the army, with choice of appointment to the *Indian Staff Corps*, are also given by the Secretary of State for India. Applications should be made to the Military Department of the India Office. Any officers who may from time to time be required to supplement the direct supply from Sandhurst will be drawn from E. A. or Line regiments serving in India, subject to certain conditions. A Lieutenant's *Staff Corps* pay commences at Rs. 2,700 a year.

The *Public Works Department* is recruited from the Royal Indian Engineering College at Coopers Hill (President Col. J. W. Otley, C.I.E., B.E.; for staff see page 263) from the corps of Royal Engineers, and, in respect of Natives, from the Civil Engineering colleges in India. About 50 students are admitted yearly to Coopers Hill College. Candidates must be between 17 and 21 on 1st July of the year of admission. The course begins in September. Applications for admission should be made not later than 15 June. After three years, during which the annual charge is £183, the students undergo a competitive examination, and the highest obtain appointments in India (commencing at Rs. 4,200 a year), the number of these being generally twelve each year. For students in the College in 1901 the number will be 19, and one appointment in the Accounts Branch *Indian Public Works Department* (commencing salary Rs. 3,600 a year) will also be offered.

Candidates for the *Telegraph Department* enter the college in the same manner, but are nominated for appointment at the end of the first year, and undergo a special course during the second year. The number of appointments to be made in 1901 will probably be five. The commencing salary is Rs. 3,600 a year. The *Forest Department* of India is recruited from this country; an examination will be held on 25 June, 1901, conjointly with that for the *Indian Police Department*, though the qualifying subjects are not identical. In 1901, eight appointments will be offered for competition, the limits of age being 17 and 20 on the 1st of June, 1901. Applications should be made to the Revenue Department of the India Office before 1st May, 1901. In the entrance examination good sight, good hearing, and good powers of physical endurance are insisted on. The course of study extends over about three years, divided into seven terms, to be passed mainly at Coopers Hill, and a period of study under supervision in continental forests. The charge for each of the seven terms spent at the college is £61, and for the period of foreign study is £150. Probationers who acquit themselves creditably during their college course will begin on arrival

in India as Assistant Conservators of Forests, on a salary of Rs. 3,000 a year. On 25th June, 1901, an examination, combined with that for Forest appointments (see above), is to be held in England for 17 appointments to the Indian Police, for Madras, Bombay, and North-West Provinces and Oudh four each, Bengal and Punjab two each, and Central Provinces one. Candidates must be between 19 and 21 on 1st June, 1901, and applications must be sent before 1st May, 1901, to the Secretary, Judicial and Public Department, India Office, to whom also any inquiries should be addressed. Selected candidates will be allotted as probationers to provinces "upon a consideration of all the circumstances, including their wishes." Initial salary of a probationer is Rs. 3,000 a year. On passing the necessary examinations, which must be done within two years of arrival in India, the probationer will be appointed an Assistant-Superintendent on Rs. 300 a month. Examinations for the *Indian Medical Service* take place generally in February and August. The number of appointments made after each examination has usually been about 12. The examination will be conducted together with that for admission to the Army Medical Staff. Candidates must be between the ages of 21 and 28 at the date of examination, and must possess a diploma or diplomas entitling them under the Medical Acts to practise both medicine and surgery. No candidate may compete more than three times. Successful candidates are required to attend a course for not less than four months at the Army Medical School at Netley, during which period they receive an allowance of 8s. a day, to cover cost of maintenance. The commencing salary in India is Rs. 4,200 a year; the highest medical appointment in India carries a salary of Rs. 32,400. The greater part of the medical service is in civil employ, but liable to be recalled to medical duty. The patronage of the Secretary of State for India is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Ecclesiastical, Judicial, or Educational Departments. *Chaplains*, on appointment, will, for the first three years, be on probation only. Applications for appointment should be made to the Secretary of State. Appointments, usually of distinguished graduates of the Universities of the United Kingdom, are made to the Indian *Educational Service* by the Secretary of State. No limits of age are fixed. Appointments are in the first instance usually for five years, the salary beginning at Rs. 500 a month, with annual increments of Rs. 50 a month. The number of appointments varies year by year and is not large. The Local Governments have many appointments in their gift, but no one who is not a Native, a covenanted civilian, or an officer of the Staff Corps can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: *Opium, Salt, Customs, Survey, Mint, Public Works Department, Police*. Appointments are also made by the India Office to the Royal Indian Marine (limits of age 17 and 22), the Bengal Pilot Service (age 18 to 22), and the Indian Nursing Service.

The *Ecclesiastical Establishment* in India, which forms a Civil, not a Military department, consists of three Bishops (others whose names will be found at page 457 are not Bishops on the Establishment),

and 160 Chaplains. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when ministering to British regiments.

Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a partial summary will be found in the India List, published by Messrs. Harrison, 59 Pall Mall, S. W.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31st MARCH, 1898 AND 1899.

The notation *Rx.* has now been abandoned in Indian finance. The figures below are given in £, rupees being converted at 1s. 4d. the rupee, or 15 rupees to the £.

Total in India	£67,353,254	£48,651,745
England	£242,561	£16,393,197
Total	£67,595,815	£64,954,942

The following is a Table of Revenue and Expenditure for 1842-43, and for each tenth year since, and for 1898-9, together with the totals of 57 years between 1842-3 and 1898-9, the values being stated in millions of tens of rupees. It should be borne in mind that the area of British territory in India has risen since 1842 from 626,000 to 965,000 square miles:—

REVENUE.

	Land.	Opium.	Taxes.	Public Works.	Tribute & other.	Total.
	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.
1842-43	13'56	2'09	5'75	—	1'20	22'60
1852-53	16'19	5'09	5'82	—	1'51	28'61
1862-63	19'57	8'06	13'55	'44	3'52	45'14
1872-73	21'37	8'69	16'25	3'90	6'34	56'55
1882-83	21'87	9'50	17'66	13'05	8'19	70'27
1892-93	24'90	7'99	25'36	22'15	9'77	90'17
1898-99	27'46	5'73	30'29	26'91	11'04	101'43
Total	1148'4	396'72	852'24	428'65	332'15	3158'19

EXPENDITURE.

	Collection.	Civil Adminn.	Interest.	Army.	Public Works.	Famine, Rel.&Ins.	Miscellaneous.	Total.
	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.	M. Rs.	Mil. Rs.	Mil. Rs.
1842-43	5'28	5'22	2'47	10'61	19	—	'00	23'87
1852-53	6'56	6'48	3'39	11'09	'55	—	—	27'98
1862-63	8'49	7'38	5'47	14'89	5'97	—	1'11	43'32
1872-73	7'34	9'57	5'86	15'50	10'33	—	6'18	54'78
1882-83	8'49	11'04	4'77	18'36	20'31	1'50	5'13	69'66
1892-93	9'46	14'26	4'37	23'42	32'08	1'50	5'97	91'00
1898-99	10'65	15'73	3'03	24'01	32'75	1'19	10'11	97'47
Total	456'11	560'46	244'96	935'21	708'21	40'94	210'05	3205'97

During these 57 years there have been 25 years of surplus and 32 of deficit, the net deficit amounting to 47'78 millions of tens of rupees. During the 15 years previous to the Mutiny there had been 11 years of deficit and 4 years of surplus, the net deficit amounting to 11'42 millions. The Mutiny years 1857 to 1862 added 36'23 millions to the total of deficits. Since 1862, there have been 21 years of surplus and 16 of deficit, yielding a net deficit of only £100,000, or a net surplus of over £3,000,000 if we count as surplus what has been charged against the revenues but not spent otherwise than in reduction of debt, under the head of Famine Insurance. Under this head has also been charged about £8,000,000 spent on construction of railways and irrigation works designed to protect the country against famine. The year 1899-1900 also yielded a surplus of £2,552,800

(revised estimate). The budget for 1900-01 was made for a small surplus, but the forecast has been completely upset by the great famine. The annual burden of taxation in India is calculated to be less than 1s. 8½d. per head of population, if the land revenue demand which is of the nature of rent be excluded. Including land revenue it would slightly exceed 3s. 3½d.

THE INDIAN DEBT.—The following table shows the assets and liabilities on 31 March, 1900:

Assets.	£
Railways constructed by the State	70,468,000
" purchased " "	59,236,000
Irrigation Works	22,829,000
Loans to Corporations, &c.	8,714,000
Advances to Railway Companies...	9,543,000
Cash Balances in India	8,821,000
" " England	2,224,000
	£181,835,000

Liabilities.	£
Debt in India	74,983,000
" England	124,144,000
Other Obligations	12,969,000
Total	212,096,000
Deduct Assets	181,835,000
Excess of Liabilities over Assets, in India and in England	£30,261,000

The charge for Interest and its distribution is shown in the table of Expenditure on the preceding page.

In 1899-1900 there was a slight reduction of debt, both in India and England: and £6,500,000 of India sterling bills, which fell due, were replaced by similar bills, at average rates varying from £2 10s 2d. to £4 2s. 11d. per cent.

In 1900-1901 a Loan in India of £2,000,000 has been raised at 3½ per cent., at an average price of about 94 per cent., and a loan of £3,000,000 (at 3 per cent.) has been raised in England at £95 10s.: India sterling bills were re-issued at £3 6s 2d and £3 16s. 7d., and additional bills to the amount of £500,000 were also issued. The purchase of the Great Indian Peninsula Railway also resulted in a large addition equally to the assets and liabilities of the State.

CURRENCY AND EXCHANGE: The principal coin in use in India is the silver rupee, which contains 165 grains of fine silver and 15 grains alloy. With silver at 60 pence the oz. the value of the rupee used to be 1'858s. With silver at about 28½. the oz. (as in 1900) and the rupee at 1s. 4d. rupees are valued at 50 per cent. beyond the value of the silver of which they consist. Previously to June 1893, when the Indian Mints were open by law to the free public coinage of silver into rupees, the rupee circulated at its intrinsic value. The legislation of that date closed the mints, with a view to eventually fixing the exchange. For a time, however, the rupee continued to fall, going in 1894 even as low as 1s. 1d., with silver at 23½d. per oz. It subsequently rose, and since January 1898 has been practically stable at 16½. This rate has now a legal sanction, since an Act passed in 1899 makes the British

sovereign legal tender in India at the ratio of 15 rupees to the sovereign (=1s. 4d. the rupee); the rupee, however, remaining also legal tender to any amount.

Consequently, in Returns to Parliament, Indian financial figures are now given in £ sterling, the rupee amounts being converted at the above rate. As a result "Loss by Exchange" ceases to be a prominent and disturbing feature of Indian Budgets.

THE OPIUM REVENUE.—Poppy is grown in parts of Bengal and of the North-West Provinces and Oudh and in the Central India Native States. The area of opium cultivation in the Ganges Valley in 1898-99 was 564,000 acres. The manufacture is a Government monopoly. The price paid to the cultivators for their produce is Rs. 6 for seer, or 2 lbs. At the Government Agencies at Ghazipur and Patna, the juice which has been sent in, is dried to a certain consistency, and packed in chests containing about 140 lbs. each. It is then sent down to Calcutta, disposed of by auction at monthly sales, and exported to China and the Straits Settlements. In the year ending 31st March, 1899, 39,450 chests were thus sold for export, at a rate of Rs. 1,055 per chest. The sales realised £2,776,000. In addition £839,000 was derived from the duty (Rs. 500 a chest) on opium grown in the Native States of Central India on its entry into the Bombay Presidency. This opium is called Malwa opium, and is also exported for the most part to China. There was also a revenue of £152,000 in respect of opium issued to the Excise department for consumption in India. The total opium receipts thus amounted to £3,817,000, the expenditure, almost wholly in Bengal, amounting to £1,582,000.

SALT.—The duty on salt is Rs. 2, 8 annas a maund (82½ lbs.) in the whole of India, excepting Burma, where it is 1 rupee a maund. The total consumption of salt in British India in 1898-99 is stated at 35,777,000 maunds, yielding a net revenue of £5,756,000. The consumption was more than in any previous year.

RAILWAYS, &c.—Excluding the 73 miles of lines in French and Portuguese territory, the number of miles open for traffic on 31st March, 1900, was

23,690; 13,670 miles on the standard (5 ft. 6 in.) gauge, 9,495 on the metre gauge, and 597 miles on other gauges. In addition to the open lines there were 3,027 miles of line then under construction, or already sanctioned for construction. Of these 733 miles were sanctioned in 1895-1900. The total amount of capital expended on the open Railways (including steamboat service and ferries, but excluding lines in French and Portuguese territory) up to 31st December, 1899, was £199,685,000 (converting the rupee at 1s. 4d.) of which £143,781,000 represented the cost of standard gauge lines and £45,793,000 lines on the metre gauge; the percentage of working expenses on gross earnings averaged 46½ on standard gauge lines and 50 on the metre gauge lines, and the percentage of net earnings on total capital outlay on open lines 5¼ and 5¾ respectively. The year's net receipts on the Indian railways in 1899 were £10,138,000, or a return of 5·36 per cent. on the capital against £9,607,000, or a return of 5·37 per cent. in 1898; the number of passengers increased 6·79 per cent. to 163 millions, and the goods traffic by 11·68 per cent. to 40½ million tons. The apparent net loss to the State on the working of the railways in India is calculated at £620,000 in 1898-99, and at £8,000 in 1899-1900. The loss accrues owing chiefly to payments to Companies at contract rates of exchange above the actual rate. Moreover this result is arrived at after charging as part of the year's expenditure sums of £213,000 in 1898-9 and £222,000 in 1899-1900 on account of the redemption of capital, and after charging the railway account with interest at the rate of 4 per cent., though the Indian Government raises money in England at 3 per cent. or less; and after charging interest on the cost of lines still under construction and not yet open. The total capital expenditure on railways in India was £6,945,000 in 1898-99, and £6,854,000 in 1899-1900. In 1900 the Great Indian Peninsula Railway was purchased by the State by the issue of annuities. On Irrigation works the Government up to 31 March, 1899, have laid out a capital of £25,830,000, which, apart from the advantages to cultivators and protection against famine, gave a return to the State in 1898-99 of about 6¼ per cent.

GROSS AMOUNT OF THE REVENUE AND EXPENDITURE (excluding Capital Expenditure on Public Works not charged to Revenue) IN INDIA AND IN ENGLAND, SHOWING SURPLUS OR DEFICIENCY IN EACH OF THE TEN UNDERMENTIONED OFFICIAL YEARS.
(Throughout this statement Rr. represents ten Rupees, or their equivalent, whether the transactions have taken place in England or in India.)

In this year over 12 million acres were irrigated from Government canals.

There are more than 80,000 square miles of Forests reserved and scientifically worked by the State in British India, besides about 30,000 square miles of forests managed by the State which may hereafter be reserved. The forests yielded in 1898-99 a net revenue of £492,000. The length of Telegraph lines in India on 31st March, 1899, was 51,769 miles, on which the number of messages was nearly 5½ millions. They yielded in 1898-99 a revenue of 377 per cent. on their capital cost of £4,348,000. In addition the Indo-European Telegraph Department gave a profit of 6·03 per cent. on its capital of £770,264. The Post Office, which conveyed 477 millions of letters, post-cards, and newspapers, &c., was worked at a net profit to Government of £125.

ARMY.—The actual strength of the Army of India on the 1st April, 1899, is shewn in the statement below.

For police duties and frontier service the regular military is supplemented by frontier militia and local levies, including such corps as the Khyber Rifles, and by about 170,000 Native Police, officered mainly by Europeans. In addition, the Native Army Reserves numbered 17,000 men (infantry), and the Imperial Service Troops furnished by Native States contributed nearly 18,000, of whom 8,000 were cavalry, besides transport corps and sappers. Further, there were European and Eurasian volunteers to the number of 31,000, of whom 28,000 were declared efficient. There were no military operations on the part of the Indian Army in 1898-9. In the autumn of 1899 a force of British troops was despatched from India to South Africa, and nearly a year later Indian troops were sent to China to co-operate in the relief of the Peking legations.

The Indian army is now under a single Commander-in-Chief, and is divided, as is shown below, into four Lieutenant-Generals' commands:—

ACTUAL STRENGTH OF THE ARMY OF INDIA.

PUNJAB COMMAND.			
<i>British.</i>			
Cavalry (3 regiments)	1,875		
Artillery (22 batteries and companies)	3,172		
Infantry (14 battalions)	14,743	19,790

	{ Miscellaneous Officers	788	
	{ Native Troops	145,627	

The ROYAL INDIAN MARINE consists of four troopships of 1500 to 4000 tons each, three other steamers of about 1000 tons each, and a number of smaller craft for harbour and river navigation. Another ship of large tonnage was ordered in 1899, to replace the "Warren Hastings," wrecked three years ago. The troopship service between England and India is carried out by hired steamers. The principal officers and ships of the R.I.M. are as follows:—

Director of the Royal Indian Marine and Resident Transport Officer, Bombay, Capt. W. S. Goodridge, B.N., A.D.C.
Assist. ditto, Capt. W. Chandler.
Deputy ditto (Calcutta), Capt. G. Wilson.

The business of the Indian Troop Service is under the superintendence of the Director of Transports at the Admiralty.

[The R.I.M. Troopships carry no armament: the figures below denote tonnage and indicated horsepower].

Canning, 2246 (1077), troopship, Bombay. Comm. A. J. G. Piffard.
Olive, 2722 (2304), troopship, Bombay. Comm. G. T. Baugh.
Dalhousie, 1524 (2202), troopship, Rangoon. Comm.

Lawrence, 4 guns (6 pdr.) 902 (1277), despatch vessel, Persian Gulf. 1st Lieut. W. G. Beauchamp (in command).
Mayo, 1125 (2157), Port Blair. Commander, C. F. Fletcher.
Minto, 960 (2028), Bombay. Lieut. A. W. McArthur (in command).

BOMBAY DOCKYARD (7 docks).—Staff-Officer, Comm. G. E. Holland; Constructor, R. Watson; Inspector of Machinery, F. O. Gadsden.
CALCUTTA DOCKYARD (9 docks).—Staff-Officer, Comm. T. A. L. de Berry; Constructor, T. Avery; Inspector of Machinery, C. Fuller.

EDUCATION suffered in 1897-98 owing to the famine and plague, but recovered partially in 1898-99. when the institutions numbered 150,000 and the scholars 4,338,000, of which only 402,000 were females. Of the institutions, about three-quarters are maintained by the State, or aided by grants; the remainder being private and unaided. There are five Universities in India, founded on the model of the University of London, viz., those of Calcutta, Madras, Bombay, and Allahabad, and the Punjab University. Of the total expenditure on education of £2,407,000 £739,000 came from fees, and £1,103,000 from provincial revenues or local and municipal funds.

The INDIAN MUNICIPALITIES in 1898-99 were 757 in number, with a total population of 15,833,000, and an income from taxation of over £2,037,000, and from other sources of £2,401,000. In almost all districts in British India there are local district boards, partly representative, for the management of local interests. Half of their expenditure of £2,108,000 in the year was devoted to Civil works, and the remainder largely to sanitation and hospitals.

MAILS for India are made up and despatched from London *via* Brindisi, every Friday evening. Letters reach Bombay in 17, Madras in 19, Calcutta in 20, and Rangoon in 23 to 25 days. The postage rate for letters to any part of India or Burma is 1d., and for cards 1d.; news-

papers, not exceeding 4 oz. 1d.; books, magazines, &c., every 2 oz. ½d.

The PARCEL POST (to Aden and Burma also) is made up every Wednesday morning, the limit is 11 lbs., and the charge—first lb. 1s., and every subsequent lb. 8d.

TELEGRAPHS.—Two lines of telegraphic communication are open. The charges by the Indo-European Company or by the Eastern Company per word are—to India, 4s.; Burma, 4s. 2d. *Via* Turkey the rates are—for India, 3s. 8d., and for Burma, 3s. 10d.

The P. and O. Company convey parcels to India at the rate of 1s. per lb. (limit 50 lbs.) for any post-town or district in British India; books at the rate of 6d. per lb. There are various regulations and restrictions, which may be learnt from the notice issued from the P. and O. Company's offices, 122 Leadenhall Street, and 25 Cockspur Street.

For Indian Weights and Measures see Index.

N.B. A lac (lakh) is 100,000; a crore is 100 lacs.

FRONTIER LAND TRADE.

The registration of the trade which crosses the land frontier of British India is defective, but constant efforts are made to render it more complete and accurate.

The following is a table showing the land trade of India with the neighbouring regions, some of which, such as Kashmir and the Shan States, are not, politically, foreign countries; Zimmé (Chieng-mai) is a province of Siam:—

	1898-99.		1899-1900.	
	Imports.	Exports.	Imports.	Exports.
Lus Bela	Rx. 60,759	Rx. 26,338	Rx. 64,044	Rx. 16,139

Total (including other countries)	6,092,943	5,289,725	7,058,707	5,640,278

The total for this trade has increased 27 per cent. in four years.

SEA-BORNE TRADE OF INDIA.*

The course of trade with India is shown by the fact that in the last 50 years Indian exports of merchandise have exceeded the imports by 1,137 million Rx., while in the same period the net imports of treasure have amounted to 530 millions.

The trade of 1899-1900 was prosperous for the first half of the year till the failure of the mon-

* Aden is not a part of India for purposes of trade statistics. The trade of Aden in 1898-99 was valued at \$5,622,000, of which over 3 millions were imports. Aden is a great emporium for the commerce of the Arabian and African coasts.

soon brought on famine, and as a further consequence due to disbursements for famine relief, a stringent money market. Trade in these conditions was larger than might have been anticipated.

The balance of trade for the past 3 years is shown above.

By the Tariff Act of 1896, goods imported pay generally a duty of 5 per cent., but cotton yarn and cotton sewing thread are exempted from duty; the tax on other cotton goods is 3½ per cent. There are special import duties on arms and ammunition which are taxed mainly for police purposes. Liquors pay duty, generally at Rs. 6 a gallon L.P.; and salt pays Re. 1 a maund (82 lbs.) in Burma, and Rs. 2·8 annas in the rest of India. Iron and steel goods, pay 1 per cent. and machinery, coal, raw cotton, jute and wool, grain and pulse, oilcake, manures, living animals, unmanufactured tobacco, quinine, gold, precious stones and pearls, and a few other unimportant items are free from duty. Under Act XIV. of 1899, bounty-fed sugars pay on import into India countervailing duties calculated according to the amount of the bounty given. Opium grown in the Native States pays duty on crossing the land frontier into British Indian territory; and opium not covered by Government pass pays Rs. 24 per seer of 80 tolas.

In 1899-1900 the number of vessels entering from and clearing to foreign countries, was 8,528, of 8,627,486 tons. Of this tonnage, approximately 65 per cent. was from or to the United Kingdom, and British possessions; and 83 per cent. of the total was under the British flag.

The value of the coasting trade, imports and exports being added together, amounted to

£54,000,000, or 18 per cent. more than in 1898-99. The increase was due to the great demand of the famine districts for grain.

The following statement exhibits the principal articles of the foreign trade of India in 1899-1900, Government transactions being excluded:

IMPORTS.	£	EXPORTS, (excluding re-exports, amounting to £2,195,000)	£

Austria-Hungary	2,733	
Italy	2,335	
Mauritius	1,787	
Russia	1,683	

For the five months April to August 1900 the foreign trade of India shows the following diminutions compared with 1899-1900:—

Imports of merchandise, decrease £28,000, or 1 per cent.; treasure, decrease £1,530,000, or 29 per cent.

Exports of merchandise, decrease £3,517,000, or 12 per cent.; treasure, decrease £157,000, or 7 per cent.

The output of the 147 collieries in India in 1898 was 4,605,000 tons. The 176 cotton mills at work, representing a capital of £10,000,000,

contained 4,456,177 spindles, and produced 502,617,000 lbs. of yarn (mostly of two counts) and 98,658,000 lbs. of woven goods; the 33 jute mills contained 253,858 spindles. There were also 4 woollen and 8 paper mills, and 27 breweries. With regard to other industries particulars are not so precise.

The *Home Charges* amounted in 1898-99 to £16,050,636, thus:—Railway Revenue Account, including Railway Debt, £5,873,689; Interest and Management of Debt, other than that for Railways, £2,826,068; Stores, £873,612, of which £57,142 were Marine, and £503,012 Military; Army Effective charges at home, including troop-ing service, amounted to £1,067,745, and non-effective charges to £3,095,117; Civil and Marine non-effective charges aggregated £1,251,567; Furlough payments amounted to £625,699 of which £302,549 were under the head of Military. The cost of the India Office was £180,424. The Home charges for 1899-1900 are estimated at £16,249,700 and for 1900-01 at £17,071,500.

The *ROYAL COMMISSION* on Indian expenditure, appointed in 1895, at length reported in 1900 (*Cd.* 131). The first chapter of the report deals with the financial machinery of the Indian Government, and passes reflections on the system of control and audit, and suggests some changes. The second chapter reviews the growth of Indian expenditure during 33 years, making criticisms and suggestions in matters of detail. The third chapter is concerned with the apportionment of expenditure on common interests between England and India. The Report of the majority of the Commission recommends generally a liberal treatment of India in such matters; and, in particular, proposes grants to be made by the Imperial Government to the amount of £293,000

Note.—The populations of Aden and Andaman Islands are not included in these columns.

FRENCH and Portuguese possessions in India are described on page 471. The Native States in India which enjoy almost complete independence are Nepal and Bhutan, both of which have slight political relations with China, but with no other foreign Power. In Nepal there is a British Resident, but he does not interfere in matters of internal government.

Outside India there remain to be described; (1) within the sphere of influence of India, Baluchistan, Afghanistan and parts of Arabia and north-east Africa; (2) the independent States of Persia and Siam; (3) the dependencies of Russia, of China, of France, and of Turkey, so far as these come within the purview of the British Government in India.

NEPAL.

Sovereign, His Highness Maharaja Dhiraj, Pirthivi Bir Bikram Shamsher Jang Bahadur, Sah Bahadur Shamsher Jang, b. 8 August, 1875; *suc.* 17 May, 1881; *m.* a daughter of the Prime Minister.

Prime Minister, His Excellency Maharaja Sir Bir Shamsher Jang Rana Bahadur, G.C.S.I., appointed 22 November, 1885.

The Kingdom of Nepal lies between British India on the south and Tibet on the north, and occupies the southern ranges of the Himalayas for a distance of about 500 miles, extending about 20 miles beyond the base of the mountains into the plains. It has an area of about 54,000 square miles, a population of about 2,000,000, and for administrative purposes it is divided into four provinces, and these into fifteen districts. Nepal may generally be described as a wild, mountainous country, containing, amongst others, Mount Everest. Between the sterile ranges, however, lie many beautiful valleys, the soil of which is extremely fertile; their elevations are from 2,000 to 6,000 feet above the sea level. The lower hills are covered with jungles of sal, pine, spruce, mimosa, oak, &c., in which wild animals abound. The chief minerals are copper, iron, sulphur, jasper, marble, and rock crystal. Nepal has commercial relations with Tibet and British India, and the value of its exports to the latter in 1899-1900 was Rs. 24,747,541; the imports amounting to Rs. 15,373,245. The revenue, realised chiefly from land rent, and from export and import duties levied at the frontier, amounts to about Rs. 1,50,00,000. The trade routes are numerous, the most important being that connecting Katmandu with Motihari and Segowli, in Bengal. Nepal exports rice and other grains, oilseeds, *ghi*, ponies and cattle, opium, musk, madder, borax, jute, hides and furs, ginger, cardamoms, and yaks' tails. It receives in exchange raw and manufactured cotton and twist, woollen cloth, shawls, rugs, flannel, silk brocade, embroidery, sugar, spices, indigo, tobacco, salt, &c. The manufactures are coarse woollen cloth, iron, copper and brass vessels, and bell-metal. The aborigines are of the Mongolian type, and the religion is Hinduism among the upper, and a form of Buddhism among the lower classes. The country was conquered by the Gurkhas in 1767. The frequent aggressions of these people brought on a war with the British, in 1814, which was concluded by the Treaty of Segowli in 1815, but it is only within the last forty years that our relations with the country have become friendly. The policy of seclusion is, however, consistently fol-

lowed by the native rulers. A Resident of the Indian Government resides at the capital, but does not interfere in internal affairs. Representatives of Nepal greet each new Viceroy with messages and presents. Complimentary missions are also sent periodically to China. On occasions when friction arises between Nepal and Tibet, Chinese authorities intervene in the interests of peace. Under arrangements with the State, recruits in large numbers are obtained from the hill tribes of Nepal for our Gurkha regiments. The army of Nepal numbers about 35,000 with 1,000 guns. The sovereign is the nominal chief; but the real power rests with the Prime Minister. The chief receives a salute of 21 guns in British India.

Khatmandu (Pop. 51,000)—*British Resident*, Lt.-Col. W. LochRs. 2,500
Transit, 20 days.

BHUTAN.

This is another outlying State on the southern slopes of the Himalayas with physical features and productions somewhat similar to those of Nepal. In 1863 the Government of India engaged in war with it in consequence of certain outrages to British subjects and representatives. There is no British agent now residing in the State. The Government of Bhutan is dual in form, with a spiritual chief, the Dherma Raja—who is an incarnation of the founder of the State—and a temporal chief, the Deb Raja, who governs. Bhutan has closer relations with Tibet than with India; its commerce with the latter is insignificant. Such relations as there are between Tibet and India are friendly. There is no knowledge of the area (about 20,000 square miles), population, or revenue of the State.

BALUCHISTAN.

Khan of Kalat, His Highness Mir Mahmud Khan, G.C.I.E., 1893. Salute in British territory 19 guns.

Baluchistan is a term of political geography. Its northern and western boundaries were finally laid down by agreements with Afghanistan and Persia in 1896. It comprises, (1) "British Baluchistan," which includes the assigned districts of Pishin and Thal Chotiali and is a province of British India; (2) the country inhabited by the Marri and Bugti tribes; (3) the Bori and Zhob valleys and the Khan of Kalat's assigned districts of Quetta, Nushki (assigned in 1899), and the Bolan, which are directly under the British Political Agent; (4) the Native State, including Kalat proper which is under the immediate rule of the Khan, Sarawan and Jhalawan, or the tracts belonging to the two leading Brahui clans and their chiefs, the Chiefships of Las Bela, and Kharan, and Makran. The area of division (4) is given at 106,000 square miles, with a population of 220,500. It has a sea-coast 600 miles in length, with harbours at Summiani, Kalmat, and Gwadur; its other boundaries march with India, Afghanistan, and Persia. The country is mountainous, the rivers deficient, and cultivation confined to narrow valleys. The summer heat is intense, and in the higher altitudes the winter cold is no less severe. Camels, horses, kine, buffaloes, sheep, and goats form the live-stock of the country; wheat, barley, millet, dates, and fruit are largely grown. Lead, copper, and petroleum are the principal mineral products. The most numerous tribe is that of the Brahuis, who, as well as the Baluchis, are Sunni Mohammedans. The Khan

of Kalat is the head of a rather loose confederacy; and till his treaty with the British Government in 1876, he received a rather spasmodic obedience from his feudal inferiors. The principal feudatories are the Jam of Las Bela and the Khan of Karan. Mir Khudadad Khan, G.C.S.I., who was Khan of Kalat from 1857 to 1895, was deposed in the latter year. The influence of the British Political Agent is extensive though undefined, and the State cannot be considered as independent, even in regard to internal administration. It has no relations with other foreign Powers, and British troops occupy the strong fortress of Quetta commanding the Bolan Pass, and have the treaty-right to occupy any other position in the State. A trade route from Quetta to Persian Seistan along the north of Baluchistan has recently been opened up, and traffic along it shows a steady growth.

Khan's Capital, Kalat. Head-Quarters of the British Administration, Quetta.

Agent to the Governor-General in Baluchistan and Chief Commissioner of British Baluchistan, Col. C. E. Yate, C.S.I.Rs. 4,750 per mensem.

AFGHANISTAN.

Amir, His Highness Abdur Rahman Khan, Zia-ul-Millat-wad-Din, G.C.B., G.C.S.I., s. 1880, b. 1845; has four sons, of whom Sardar Habibulla Khan, G.C.M.G., is the eldest, and Sardar Nasrullah Khan, G.C.M.G., the second, and Umar Jan the youngest, but born of a mother of higher rank than his half brothers. Salute in British territory 21 guns.

By agreement with the Amir, Afghanistan has no foreign relations with other Powers except the Government of India. In all other respects Afghanistan is independent, and the rule of the Amir despotic.

The country lies on the north-west frontier of India, between the parallels of 60° 40' and 74° 30' E. longitude, and 30° and 38° 20' N. latitude, bounded on the west and south by Persia and Baluchistan, and north by the Russian provinces and dependencies in Central Asia. The whole northern boundary from Persia to China has been settled in agreement with Russia and demarcated, the Oxus from Lake Victoria (Wood's Lake) to Khaniab forming part of this frontier. Within these limits Afghanistan has a breadth from north to south of about 500 miles, and a length from east to west of about 600 miles. The area may be estimated at 270,000 sq. miles. Geographically its three divisions are the Oxus basin, the Kabul (or Indus) basin, and the Helmand basin. The country is divided into five provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan with Kafiristan and Wakhan. The country is generally rugged and mountainous, the elevation being, with few exceptions, more than 4,000 feet above the sea; the climate is severe, cold in winter, hot in summer. The population is estimated to number 4 or 5 millions, who are divided into a number of tribes,—Ghilzais, Tajiks, Duranis, Hazarachs, Aimaks, Uzbeks, &c. All are Sunni Mohammedans except the Hazarachs and Kizilbashs, who belong to the Shiite sect, and the Kafirs, who are idolators, except in so far as the Amir has recently succeeded in converting them to Islam. The Amir has by degrees reduced all the tribes to subordination. In the cultivable parts of the country there are generally two crops in the year, one of

wheat, barley, or lentils, the other of rice, millet, &c.; wheat, however, being the staple food. Afghanistan is also rich in fruits of many kinds. The mineral wealth of the country is reputed considerable, but few mines are worked. The roads are generally unsuitable for wheeled traffic, but lately the Amir has been improving the means of communication in his country, particularly where they may serve military purposes. Goods are conveyed by beasts of burden, mostly by camels. In the 11th and 13th centuries the Afghan empires of the Sultans of Ghazni and Ghor, and in the last century that of Ahmed Shah, extended over the Punjab. In 1838 the country was occupied by British troops, but three years later a national revolt broke out at Kabul, which resulted in the destruction of an English army, and the abandonment of the country to its Native rulers. A second invasion by the English in 1879 led to the temporary occupation of Kabul and Kandahar. In 1881 they passed into the hands of the present Amir, only the chief passes between Afghanistan and India being retained under British control. The boundaries between the territories under the Amir and those under British influence were finally settled in 1895. The trade of Afghanistan with India is valued at about £800,000. It is restricted by the Amir's oppressive trade policy. The Amir's revenue is unknown, and consists largely of payments in kind. It may amount to one crore (10 million) rupees. He receives a subsidy of £120,000 a year from the Government of India, and has received from the same source considerable quantities of arms. The Amir has a large army; his regular troops numbering perhaps 60,000 men; with the help of English engineers he has started factories for the manufacture of guns, rifles, and cartridges. He also engages in other industrial and commercial enterprises. The Amir has an agent with the Government of India, an agent at Peshawar, and a business agent.

Persia, called by the natives Iran, is situate between 25° 10'—39° 50' N. lat. and 44° 15'—53° E. long., extending about 700 miles from north to south, and about 900 miles from east

to west, and comprising an area of 630,000 square miles. The Caspian Sea, which bounds it on the north, is wholly under Russian influence; the Persian Gulf on the south is dominated and policed by the British Government. The northern frontiers of Persia are in contact with Russian provinces; its eastern with Afghanistan and Baluchistan, which are within the British sphere of influence; and its western with Turkey. The population was estimated in 1881 at 7,653,600, possibly increased to 9,000,000. The greater part of the country is an elevated table-land, encircled, except on the east, by mountains. The northern mountain ranges rise to 12,000 feet above the sea, and the peak of Demavend to over 18,000 feet. The central and eastern portion of the plateau is a vast salt desert. With the exception of the Karun it has scarcely a river that can be termed navigable, though some of the rivers are several hundred miles in length, and possess great volume of water. The Karun from Mohamerah to Ahwaz has been thrown open to foreign navigation. Messrs. Lynch Bros. run a fortnightly steamer to Ahwaz. The Upper Karun from Ahwaz to Schuster is also navigable, but its navigation is reserved to the Persian flag. Railways are practically non-existent, and the Shah has bound himself not to allow the construction of railways in Persia for several years to come. Cart-roads have been made or are in progress from Tehran, Tabriz, to Resht on the Caspian, to Ahwaz on the Karun, and to Kum; also between Meshed and Askhabad in Russian territory. Travelling is mostly done by post-horses and caravans, and transport by pack-animals. The whole country is divided into provinces, of which the chief are Azarbijan, Ghilan, Mazanderan, Astrabad, Ardelan, Kermanshah, Irak-Ajemi, Khorassan, Fars, Luristan, Kerman, and Laristan, which are under Governors-General. The chief products are wheat, barley, and other cereals, cotton, sugar, rice, tobacco, and opium. Its minerals are salt, iron, and coal; copper, lead, antimony, sulphur, &c., also turquoises and some other precious stones are found. The most important manufacture is that of silks, of the richest and most gorgeous kind. The Persians excel in their dyes, also in brocade and embroidery. Arms, carpets, shawls, felts, cotton and woollen fabrics are among the manufactures. The royal treasury is reputed to contain immense wealth in jewels and other valuables, but the administration of the state is corrupt, and suffers frequently from a want of means. The commerce of Persia with Russia is chiefly through ports on the Caspian Sea, or by the Trans-Caspian railway, and with British India by way of the Persian Gulf. European goods also reach Persia from the Black Sea, *via* Trebizond and Tabriz; the imports of Great Britain by this route were valued at £297,000 in 1899. The trade through Afghanistan between Persia and India has been quite ruined by the Amir's fiscal policy, but a new route has been recently opened up from Quetta through Bauchistan to Persian Seistan, which avoids Afghan territory and the exactions of the Amir's officials. Of the foreign trade of Persia half passes north through Russia and Turkey, half south by the Persian Gulf. The Persian Gulf trade, exclusive of what passes up the Shat-ul-Arab to Basra, is mainly with India and the United Kingdom. In 1899 it amounted to nearly 5¼ millions sterling in value, of which nearly 3 millions represented the share of India and the

United Kingdom, most of the remainder being local. The exports consist of silk, tobacco, wool, carpets, opium, gums, hides, dates, &c. The Imperial Bank of Persia is an English Company, which has its head office at Tehran and branches in the chief cities. These are, with their populations, Tehran (210,000), Tabriz (180,000), Ispahan (60,000), Meshed (60,000), &c. The regular army numbers about 80,500 (of whom 24,000 with the colours), with 200 field guns; the militia 70,000 men. There are 4,150 miles of telegraph, the greater part managed by the Indo-European telegraph department of the Government of India. The Persians are mostly Mohammedans of the Shiah sect. There are also a considerable number of Armenian Christians. The Government is an absolute despotism; the laws are based on the precepts of the Koran; the dispensation of justice is summary. For several years past Persian trade and revenues have suffered from a series of bad harvests. The total revenue has been calculated at 55,369,516 krans (= £1,652,820), and the expenditure at 42,233,472 krans (= £1,260,700) for the year 1888. The sea customs of the southern ports have lately been taken over by Belgian officials under the Persian Government. The estimated receipts are £400,000. The foreign debt of Persia consists of about £2,300,000 at 6 p. c., borrowed in 1900 from the Russian Banque de Prêts, under the guarantee of the Russian Government, and secured on the customs. There is a proposal to revise the tariff of import duties. The kran is a silver coin weighing 71 grains, and has depreciated relatively to gold with the fall in silver. In 1899 the exchange was about 53 krans to the £1. 10 krans = 1 tuman. The weights and measures in use in the country are not uniform. Direct imports from U. Kingdom, 1899.. £368,165
Direct exports to ditto, 1899 143,027

Interpreter, Edward H. Loftus.

Attache,

Consul-Gen., Ja. Riches, 6 Gt. Winchester St., E.C.

The Kingdom of Siam lies between the British Indian province of Burma and its dependencies on one side, and the territory of French Indo-China on the other. By the Anglo-French agreement of May, 1895, the main central part of Siam, including the basins of the Rivers Menam, Petcha Buri, and Petru, was neutralised, the two governments agreeing not to send troops into it or to obtain any exclusive advantages in it. Freedom of action was retained by the two powers in regard to the portions of Siam west and east of the neutralised zone. The western portion includes the Malay States dependent on Siam which are adjacent to the British protected Malay States under the Governor of the Straits Settlements. The eastern portion, including the provinces of Battambang and Angkor, are in close connection with the French protected State of Cambodia and the territories acquired by France by the treaty with Siam of 1893. By this treaty France also acquired a certain right of interference with the Siamese administration west of the Mekong to a distance of 25 kilometres from that river. The area of Siam may be taken at 220,000 square miles, with a population variously estimated between 7½ and 38 millions, but probably numbering about 12 millions, of whom about 4 millions are Siamese, the rest being Chinese, Shans, Laos, Malays, Burmese, and hill tribesmen. Bangkok is the only much-frequented port; Chantaboon, which was occupied by the French as a guarantee for the fulfilment of the treaty to which Siam assented in 1893, is still in their occupation. Siamese trade, which centres at Bangkok, is very largely in the hands of British firms, or of Chinese trading from Singapore and Hongkong. The chief products are rice, teak, sandalwood, rosewood, and fruits and garden products. Of merchandise the

chief export is rice; teak and other woods, marine products, pepper and cattle, and hides are also exported in considerable quantities. Among imports are cotton and piece goods and yarn, silks, gunny bags, kerosine, sugar, opium, hardware and cutlery, steel and iron goods, machinery, &c. The Government is monarchical; the King appoints the successor. There is a new Legislative Council of State consisting of the ministers, six Royal Princes, and from 10 to 20 members appointed by the King. A number of Europeans, principally English, Belgians, Danes, and Germans, are employed in the service of the Siamese State. There is an army of 8,000 men, and a few small gunboats. A telegraph connects Bangkok with Saigon (Cochin-China), Singapore, and with Burma. Bangkok is connected with Paknam by rail; an important line to Korat is completed, and a line westwards to Petchaburi has been commenced, while one northwards to Chiengmai is under contemplation.

The currency is the tical, which the value in 1900 was about 1s. 2d. In the north-west of Siam the Indian rupee is current.

Revenue and expenditures	each about £2,000,000
Imports from United Kingdom, 1899	196,411
Exports to United Kingdom, 1899	18,055
Total Imports at Bangkok, 1899	2,532,137
Total Exports at Bangkok, 1899	3,123,775

Nearly 85 per cent. of this trade is with Great Britain, Singapore, Hong Kong, and India.

Indian land trade with Siam was valued in 1899-1900 at £530,000.

RUSSIA IN CENTRAL ASIA.

THE Russian provinces of Central Asia are Trans-Caspia, with an area of 383,618 square miles, and a population of 352,000; and Turkestan, with an area of 409,414, and a population of 3,341,913. The population of 1897 gave a total for both provinces of 4,175,100. The Trans-Caspian Railway, starting from Krasnovodsk on the Caspian, goes through Merv, crosses the Oxus at Charju, and passes through Bokhara to Samar-cand. Since 1895 it has been continued to Andijan and Tashkent. A branch from Merv on the Trans-Caspian line to Kushk on the Afghan frontier (180 miles in length) was also opened in 1899. It brings the Russian system of railways within 80 miles of Herat, and about 450 miles from the Chaman terminus of the Indian railway system. The connection of Tashkent with the main Russian system by a line to Orenburg or one to Omsk is under contemplation. The Central Asian railway has been the means of greatly increasing the Russian trade and has led to an immense increase of cotton cultivation in Central Asia for export to Russia. Trans-Caspia

is in contact with Persia and Afghanistan, while Turkestan stretches into the Pamir region. Its southern boundary was fixed by the Pamir agreement between Russia and England. The Russian forces in Turkestan and Trans-Caspia number about 45,000 men, besides a few native irregulars. The provinces do not pay the charges of occupation and administration.

Governor-General of Turkestan, Baron Vrevsky. Besides these provinces directly administered by Russian officials, the Russian Empire in Central Asia includes the two vassal States of Bokhara and Khiva.

BOKHARA.

Amir, Syed Abdul Ahad, succeeded Nov. 12, 1885.

Once the most famous State in all Central Asia, but since the capture of Samarkand by the Russians, in May, 1868, a vassal State of Russia. By the treaty of 1873 no foreigner may be admitted into Bokhara without a Russian passport. Steps have been taken to incorporate the Bokhara customs administration with that of the Russian

provinces. Bokhara, with Karategin, has an area of 92,300 square miles, and a population of 2,130,000. The Amir retains an ill-trained native army of about 10,000 men. The Uzbegs, of Turkish extraction, are the dominant race, but the Aryan Tajiks or Sarts are the aboriginal inhabitants of the country. The people are fanatical Mohammedans of the Sunni sect. Slavery has been abolished through the influence of Russia. The country produces corn and fruit, cotton, silk, wine, tobacco, and hemp. Sheep, horses, goats, and camels are numerous; gold, salt, alum, sulphur, and coal are among the mineral productions. The foreign trade is valued at 32,000,000 roubles, imports slightly exceeding the exports. The Amu-Darya, or Oxus, which forms the southern frontier of the country, is now navigated by Russian steamers. The Russian paper rouble is current. The capital, Bokhara, has 70,000 inhabitants.

Telegrams, per word, 1s. 11d.

Russian Political Resident, Major Ignatieff.

KHIVA.

Khan, Syed Mohamed Rahim Khan, *suc.* 1865.

A Russian vassal State in Western Turkestan, on the western side of the Lower Amu-Darya, or Oxus, which here flows into Lake Aral. The Russians captured Khiva on May 20th, 1873, abolished slavery, and compelled the Khan to acknowledge himself a vassal of the Czar. The area is 22,320 square miles, with about 700,000 inhabitants, dominant among whom are the Uzbegs. The people are Mohammedan of the Sunni sect. The fields and gardens are irrigated by canals, derived from the Oxus; all the surrounding country being a barren wilderness, affording but little pasturage. Wheat, melons and other fruits, silk, cotton, and wool are among the productions. The State has no external relations except with Russia. The Khan's military force is limited by treaty with Russia to 2,000 men, and he pays tribute to Russia to the amount of 150,000 roubles a year, out of a yearly revenue of 500,000 roubles.

CAPITAL, Khiva. Population, 6,000.

CHINA IN CENTRAL ASIA.

YUNNAN, TIBET, CHINESE TURKESTAN.

India is in contact with three provinces of China. On the north-east of Burma is the province of Yunnan (area 107,969 square miles, population 11,721,576). In 1897 an agreement was made between Great Britain and China, supplementing the frontier Convention of March, 1894, which laid down a boundary between Burma with its dependencies and Yunnan, and made arrangements for trade, extradition, &c. The question of access to Yunnan and Szechuen is one of great importance to the commercial nations of Europe. The shortest route to Yunnan-fu is through French territory by the Red River. Commencement has been made with the construction of a railway from Laokai in French territory, where the Red River first becomes navigable, to Yunnan-fu; and a line to Laokai from Haiphong, the chief port of Tonkin, is in contemplation. The disturbances in China in 1900 have caused obstruction to the progress of the Yunnan-fu railway. There are competing routes through Burma. A part of Yunnan is most easily reached from Bhamo. The Indian railway system is being extended to Kunlong Ferry, on the Salween, from which a route to Yunnan-fu and thence into Szechuen, with a branch to Talifu, is said to be practicable. Another route for a railway has been suggested through Chiengmai and Northern Siam. More important routes at present are by river up the Canton or West River, or by the Yang-tze-kiang. By the agreement of 15 January, 1896, Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in the provinces of Yunnan and Szechuen. Both provinces are reputed to be rich in minerals, and the latter has a large and busy population. The chief imports into Yunnan are raw cotton, cotton yarn and piece goods. British Consuls have been lately appointed to Ssumao and Momein (Teng-yueh) in Yunnan. Opium and tin are the chief exports. Next to Yunnan is Chinese Tibet, or Bodyul, as it is named by its inhabitants,

which may perhaps be called a province of China, though it is in internal matters practically independent. Tibet forms the northern frontier of India, from Burma to Kashmir; but, separated by the gigantic range of the Himalayas, the intercourse between the two countries is of the slenderest description. It contains the sources of almost all the great rivers of India and China. It is itself a plateau of extraordinary altitude, seldom lower than 10,000 feet, and protected by the vast mountain ranges of the Kuenlun in the north and the Himalayas on the south. The capital, Lhassa, is the religious centre of a special form of Buddhism, contains a large population with a great number of Buddhist monasteries, and continues to be out of the reach of European travellers. The country is, no doubt, very rich in minerals, but these are little worked; cultivation is carried on under extreme climatic difficulties; and the whole country is still shrouded in mystery. Steps are being taken to improve the Indian trade with Tibet, which is valued at nearly £350,000. There are as yet no British representatives in Tibet, but a treaty port has been opened at Yatung, beyond the Sikkim frontier. Chinese Turkestan, including Yarkand and Kashgar, was re-occupied by China in 1878, on the suppression of the revolt of Yakub Beg. Little is known of its area and population. Russia has special treaty rights in the north, and a Russian consul is at Kashgar. A representative of the Indian Government also resides at that place, but without the title of consul. Trade between India and Chinese Turkestan has to pass by the lofty pass of Karakoram (18,500 feet), or by the very difficult routes through Kashmir and Hunza, and by almost as lofty passes across the Hindu Kush. Leh is the centre in Kashmir through which this trade passes.

Consuls: Teng-yueh (Momein): P. F. Hauser £800
Ssumao: E. F. Bennett, £800.
Special Assistant to Resident in Kashmir:
Kashgar: Mr. G. Macartney.

FRENCH POSSESSIONS.

French India. See page 455.

French Indo-China.—These possessions, which have three times the area of France, consist of Cochin-China, Cambodia, Tonquin, Annam, and the Laos country. The administration is in the hands of a civil governor-general, assisted by a lieutenant-governor for Cochin-China, and residents for Tonquin, Annam, Cambodia, and Laos. Affairs are directed by a permanent Commission consisting of the governor-general, the general commanding, the lieutenant-governor, the director of finance, the procureur-general, and the directors of customs and of commerce and agriculture. The first cession of Cochin-China was in 1862; its western provinces were occupied in 1867. Cambodia recognised the French protectorate in 1863; its present status is, however, regulated by a convention of 17 June, 1834; the effective protectorate over Annam dates from 1874, but present relations are determined by a convention of 6 June, 1884. Tonquin may be said to have been finally conquered when peace had been concluded with China in 1885. The Lao country up to the Mekong was added to the French protectorate as a result of the dispute with Siam in 1893, and the Mekong was finally fixed as a boundary between French and British dominions in 1896. In 1900 the territory of Kwang-Chi-Wan, acquired from China, was added to the French possessions under the Governor-General of Indo-China. Cochin-China is wholly annexed and directly administered by French officials. Annam is a protected Native State. The administration, of the Chinese mandarin type, is in the hands of the King and his officials. The Court is at Hué, where also the French Resident supervises the government. The customs are under the management of French officers. In Cambodia the French Resident presides over the State Council, and French interference in internal administration is greater than it is in Annam: but government is carried on in the name of the King of Cambodia. In Tonquin, which is also described as a protectorate, the direction of affairs is in the hands of the French Resident and his subordinate officials. The French possessions extend northwards to 25° 20', and march with China as far west as the Mekong, which river forms the western boundary along almost the whole length of the French Colony. The area and population are estimated as below:—

	Area. Square miles.	Pop.
Cochin-China	23,082	2,252,034
Cambodia	38,600	1,500,000
Annam and Laos ...	100,000	6,000,000
Tonquin	34,740	12,000,000
Total	196,422	21,752,034

The deltas of Cochin-China and Tonquin are fertile; Annam, connecting them, is a long mountainous tract, with a narrow littoral on one side, and a wild sparsely populated hill tract stretching to the Mekong on the other. Rice, cotton, sugar, seeds, tobacco, spices, and fish, are the principal productions of the alluvial districts. The principal mineral production is coal, which is largely mined at Tourane, on the coast of Annam, and at Hongay and Kebao on the Tonquin coast. Other minerals, including gold, silver, tin, copper, lead, &c., are said to exist in the protectorate. The

principal harbours are Haiphong in Tonquin, Tourane and Thuanan (for Hué) in Annam, and Saigon. The Saigon river is navigable to the capital, and small craft can reach Hué by the Hué river. But the chief routes of inland navigation are the Mekong, which, notwithstanding obstructions and rapids, has been navigated as far as Chinese territory; but it is not likely to develop into an important commercial route; the Red River, which is ascended by steamers as far as Laokai on the Chinese frontier, and which carries an increasing trade with Yunnan and the Black River. Much has been done towards improving the canal and road communications in the deltas, and lines of railway are in process of construction between Hanoi and the Chinese frontier, Hanoi and Haiphong, and Hanoi and Ninh Dinh. Others from Saigon to Khanhoa, Tourane to Hué, and Ninh Binh to Vinh are about to be commenced. A railway from Yunnan City to the navigable portion of the Red River is also being undertaken by a French company in Chinese territory; and will no doubt be supplemented by a French line from Haiphong to Laokai. The export trade of Indo-China has increased 50 per cent. in three years. Far the largest export is that of rice. The trade in 1899 was valued at—Imports, 111,250,000 francs; and Exports, 128,500,000, in addition to a land trade with Yunnan of 12,604,000 francs. The share of France is about one-half the imports and one-fifth exports. French imports into Indo-China have increased 20 to 44 million francs since the introduction of the protective tariff in 1894. The French army of occupation numbers about 8,000, in addition to 12,000 native troops.

Imports from the United Kingdom in 1899, £81,258; Exports to ditto, £166,836.

CAPITAL of Cochin-China, Saigon. Pop., 17,235.
Gov.-Gen. of Indo-China—M. Paul Doumer.
Lieut.-Gov. of Cochin-China—M. Picanon.

Other French possessions with which India is in contact are: (1) *Jibuti* on the Somali coast, and the adjoining protectorate which includes the old headquarters, now almost deserted, of Obok. The coast line of the protectorate extends for 200 miles; the limits inland at a distance of about 25 miles have been recently fixed by an agreement with King Menelek of Ethiopia. This agreement also included a concession for a railway from Jibuti to Harrar and on to Adis Ababa.

This railway is now under rapid construction. The population of the protectorate is perhaps 50,000. There is an Anglo-French agreement which determines the boundary of the French and English spheres of influence in the direction of Harrar, which place neither party is at liberty to annex. (2) *Réunion*, in which there is a large number of Indian coolie immigrants; area, 700

square miles, population, 167,847; and (3) *Madagascar*, for which see France.

Jibuti: Gouverneur—M. Bon'houre; Envoy to the Court of the Emperor Menelik of Ethiopia, M. Lagarde.

Réunion: Gouverneur—M. Samary.

British Consul—J. T. Piat (acting) £1,500

ARABIA AND TURKISH DEPENDENCIES.

THE whole peninsula of *Arabia* may be considered to have an area of 1,220,000 square miles, and a population of five or six millions, of which perhaps three are in the Turkish province of Yemen. A large portion is desert, but in the interior, which is elevated, are many extensive tracts affording good pasturage. The inhabitants are Bedouins (Bedawi) and Muhammadans, with the exception of a small Jewish population; their wealth consists largely of horses, camels, asses and mules, for which Arabia is famous. Millet is cultivated for home consumption. Dates and coffee are largely exported. The climate is healthy; but the insanitary condition of the holy cities is a source of contamination, and in some years, of the spread of cholera or plague among Muhammadan pilgrims. The European Governments are accordingly interested in the improvement of the sanitary condition of the pilgrimage.

British Possessions. ADEN, PERIM, and protected chiefships.—Of old time Aden has been an important trade centre, lying on the Red Sea trade route between Europe and the East. Its scanty rainfall required a special system of water supply; its water reservoirs date from B.C. 1730. Aden trade flourished before the Portuguese discovery of the Cape route. Its greatest decadence was before the British occupation in 1839. With the opening of the Suez Canal it has acquired more than its old importance; it is now a great coaling station, a great emporium for the whole trade of Southern Arabia, its imports and exports being valued at 5½ to 6 million sterling a year, and one of the strongest fortified naval stations commanding the Red Sea route. Aden and Perim—a small island in the narrow strait leading into the Red Sea, which was occupied in 1857—are legally part of British India (see page 441). Aden is the centre of a British protectorate over the neighbouring Arab tribes from Perim to Muscat territory at Ras Sair, which are in subordinate treaty alliance with the Government of India. In this sphere of protectorate are also the *Kooria Nooria* Islands—valuable for their guano—and the island of *Sokotra*, with an area of 1,000 square miles and a population of 5,000. In the Persian Gulf is the Island of BAHREIN, which is under British protection. It is the chief centre of the pearl fisheries of the Gulf. The independent tribes on the coast itself are bound together under treaties with the Indian Government to maintain a maritime truce for the prevention of piracy and the slave trade and for the cessation of hostilities at sea. Their chiefs are in consequence sometimes referred to as the "Trucial" chiefs. The British Political Resident in the Persian Gulf, who resides ordinarily at Bushire, is the recognised arbiter in the quarrels of these tribes, and the peace of the Gulf is maintained by the British flag. Between Ras Sair and the Persian Gulf lies the territory of the Sultan of *Muscat* (*Oman*), who is in treaty relations with the Government of India, and has a political agent of that Government at his court.

Muscat, with its commercial suburb of Muttra, a town of 60,000 inhabitants, is the centre of a considerable trade, mostly British and British Indian, valued at 5½ million dollars. Behind Muscat territory and the semi-independent Arab tribes on the littoral of the Gulf lie the districts of El Hasa and Nejd, which form part of the *Turkish Pashalik of Basra*, with detached garrisons at El Bidaa and some other ports. This Turkish province extends northwestwards as far as Ali Garbi on the Tigris and Kalat-al-Daraj on the Euphrates. The higher basins of these rivers form the *Pashalik of Baghdad*, which extends to Syria and Kurdistan. Not far from Baghdad itself is the town of Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Shat-el-Arab and its branches is considerable; much of it is carried by the vessels of the Euphrates and Tigris Steam Navigation Company. The trade of Baghdad with Europe and America in 1899 was valued at £618,000 for exports and £1,253,000 for imports. Imports from India were valued at £193,000 in addition. At Bussorah the imports are declared at £1,190,000, and the exports at £1,135,000 in 1899. The Pashaliks of Basra and Baghdad were incorporated together previously to 1871; then they were separated for four years, again incorporated, and again in 1884 separated. In the Pashalik of Basra are now included the districts of Amara, Muntafik, and Hasa, each under a subordinate Mutasarrif. The province extends over Central Arabia, as far as the Nefud and Syrian deserts. Beyond these deserts are the Turkish provinces of *H'iaz*, in which are included the sacred cities of Mecca and Medinah, the home of Muhammad, with the port of Jeddah, and Yemen, with its chief port at Hodeida, and towns at Sanaa, Assir, and Taiz. The Sinai peninsula and the old land of Midian belong to Egypt. The Jeddah trade, almost wholly imports, was valued at £666,000 in 1897, that of Hodeida at £1,418,000.

Aden: Political Resident—Brig.-Gen. H. E. Penton, per mensem Rs. 3,000

Muscat: Political Agent & Consul—Capt. P. Z. Cox. Rs. 1,267 per mensem + £80 per annum.

Greater Britain in the East.

(Other than the Empire of India.)

THE following accounts of the different British Colonies and Possessions have been revised by the Local Governments, to whom the Editor begs to return his warmest thanks. He is also indebted to the "Colonial Office List," which contains information upon every subject connected with Greater Britain.

Postage.—Except to the Dominion of Australia and Rhodesia, the rate is *1d.* the half-ounce to almost all of the British Colonies and Possessions.

Parcels.—Full particulars of the rates are given on pp. 454.

Imports and Exports.—In the statistics denoting the value of the trade from the home country, the term "Domestic Imports," means Produce and Manufactures of the United Kingdom, and is exclusive of Foreign and Colonial merchandise re-exported.

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 53'—9° 51' N. lat. and 76° 42'—81° 55' E. long. Its area is about 25,365 square miles, or more than three-fourths of that of Ireland. Its greatest length is, from north to south, 266 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, although tropical, it is healthy, except in the low-lying jungle. There are no great extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature at Colombo being nearly 81° F. The coolest months are December and January; the hottest are April and May.

The population of Ceylon numbers (est. 1896) 3,298,342, the most important element being the Singhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. According to the 1891 census, the population then consisted of Singhalese, 2,041,158; the Tamils, a race of Southern India, 723,853; the Moormen and other races, 216,156; the Burghers or Eurasians, 21,231; and the Europeans, 6,068. There is also a sprinkling of Veddahs, who are perhaps the aboriginal race of the island; and of Afghans and of Malays. In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1795 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of padi and dry grain. Of the exports, coffee is still important, but tea has in the last few years entirely usurped the place held by the former as the principal export. Other products are cinchona, cocoa, cardamoms, vanilla, and cinnamon, which was in Dutch times a Government monopoly and the most important product of the island. In 1899, the chief exports were coffee 2,337,400 lbs., tea 129,661,908 lbs., cinchona 633,228 lbs., and cinnamon 4,399,423 lbs.

About one-fifth of the island is under cultivation, and the leading areas in 1893, in acres, were rice, 647,910; other grain, 105,962; tea, 424,856; coffee, 19,023; cocoanuts, 864,296; cinchona, 749; cinnamon, 46,119. Among the more important native industries are gold, silver, ivory and tortoise-shell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Manaar, off the N.W. of the island, is in some years a valuable source of revenue. The manufacture of salt is a Government monopoly, and yielded in 1899 a revenue of Rs. 1,091,798.

There are 298 miles of railway open, and in 1899 the post and telegraph offices numbered 364; there being 1,727 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 5 members, and a Legislative Council of 18 members including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island.

For administrative purposes the island is divided into nine provinces, at the head of each of which is a government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVIVE ARCHIPELAGO lies to the S.W. of Ceylon, ■ few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Mohamedans. The islands are poor and unhealthy, and the main exports are dried fish, cowry shells, cocoanut oil, and tortoiseshell.

Colombo, distant 6,300 miles; transit, 20 days. Telegrams per word, by Eastern Co., 4s. 1d.; vid Turkey, 3s. 9d.

STRAITS SETTLEMENTS.

This is the name given to the British possessions on the west coast of the Malay Peninsula, of which the wholesouthern portion, comprising with Johore about 40,000 square miles, is now under the protection, and a large portion under the direct control, of the British Government in Singapore. The importance of this portion of H.M.'s dominions has rapidly increased of late years, and it is now, in point of trade, revenue, and general prosperity, in the front rank among the Crown Colonies.

The name is derived from the Straits of Malacca, on which the Settlements are situated. The settlements forming what is known as the Colony of the Straits Settlements are Singapore; Penang, or Prince of Wales's Island, with Province Wellesley and the Dindings; and Malacca. The Cocos or Keeling Islands, a coral group in the Indian Ocean, on the route from Ceylon to Australia, have since 1886 been a dependency of the Straits Settlements. Christmas Island, also in the Indian Ocean, was formally annexed to the Settlement of Singapore in 1900. The colony has an entire area of about 1,500 square miles. The population in 1891 was 512,342 (Singapore, 184,554; Penang, Prov. Wellesley and Dindings, 235,618; Malacca, 92,170). The great bulk of the population consists of Chinese and Malays.

The climate of the colony is almost uniform

throughout the year, and foliage is perennial. The rainfall in 1899 amounted in Singapore to 108·60 inches, and in Penang to 131·22 inches.

	1898.	1899.
Public revenue	\$5,071,282	\$5,200,025
Public expenditure ..	4,587,357	5,060,614

*Total imports	248,110,547	283,939,452
*Total exports	212,308,029	239,054,727
Imports from U. K. ...	31,904,164	29,389,082
Exports to U. K.	28,385,028	47,015,143

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, sugar, rice, sago, tapioca, spices, dye-stuffs, tea, coffee, tobacco, gums, tin, &c.

The Government consists of a Governor, assisted by an Executive Council of 8 members, and ■ Legislative Council of 8 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang. The Resident Councillors of Penang and Malacca have seats in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and three puisne judges, and constitutes also ■ court of appeal from which there is yet another appeal in certain cases, viz. to the Privy Council. There is also in Singapore and Penang a Vice-Admiralty Court; and in each settlement there are ordinary magistrates' courts, together with Courts of Requests.

SINGAPORE is an island situated off the southern extremity of the Malay peninsula, from which it is separated by ■ narrow strait about three-quarters of ■ mile in width: its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 206 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government, for all the settlements, is the town of Singapore,

■ Exclusive of coasting traffic.

situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E., with 162,547 inhabitants in 1891. The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a point of call for vessels trading between Europe or India and the far East, the North of Australia, and the Netherlands Indies. For its defence several batteries to carry heavy guns have been constructed, at a cost of nearly £100,000, paid by the colony, for which the Imperial Government has furnished guns. The trade returns for 1899 (including inter-settlement trade), amounted to \$407,579,302, the value of exported tin being \$31,463,830.

The number of merchant vessels entered and cleared in 1899, exclusive of native craft, was 9,480 with a tonnage of 8,825,173. The total for the whole colony was 17,259, with a tonnage of 13,187,010. The total native craft entered at all three ports during the same year was 15,466 (tonnage, 593,195). The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. There are excellent docks. It is free port; no duties are levied upon anything except opium, spirits, wines and beer consumed in the colony; the opium and spirit trades are farmed out to Chinese, and the Chinese element is conspicuous among the trading classes.

PENANG is the northernmost of the Settlements. It includes Pulo Penang or Prince of Wales's Island (on the eastern side of which is Georgetown, the port and capital, population 1891, 84,948), and the strip of mainland opposite, known as Province Wellesley (population 1891, 108,117). The DINDINGS, 80 miles to the South of Penang, have also been included in the Settlement for administrative purposes under the Resident Councillor, who also has Consular authority over the Siamese Tributary States on the west coast of the peninsula between Province Wellesley and British Burma. Penang island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 107 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1899 (including inter-settlement trade), amounted to \$130,502,479; the export of tin from the port being \$24,764,658 in 1899. Population (1891), 235,618.

PROVINCE WELLESLEY is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kédah in 1798, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices, and tapioca plantations.

The Dindings are at present little developed; but they contain what is considered the best port on the western side of the peninsula, named Lumut, where a District Officer is stationed, and steamers call regularly at Pulo Pangkor. They comprise a group of islands (of which Pulo Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula cut out of the State of Pérak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between

Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the English, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, 17th March, 1824, being exchanged for the British settlements in Sumatra.

THE FEDERATED MALAY STATES

are closely connected with the Straits Settlements; they are the States of Pérak, Sélángor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government administered under the advice of a British Resident-General, who controls the Residents subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements.

The first two States extend from the border of Province Wellesley to that of Negri Sembilan, Pahang is on the East Coast, and Negri Sembilan inland near Malacca. All are governed by their native rulers under the above-mentioned control. Under the Colonial Loans Act, 1899, the sum of £500,000 was advanced for the purpose of railway construction in these states.

High Commissioner, Col. Sir Frederick Cardew, K.O.M.G. (Singapore).
 British Resident-General, Sir Frank Athelstane Swettenham, K.O.M.G. (Selangor) .. \$15,000
 Judicial Commissioner, Laurence C. Jackson, Q.C. \$9,600

(1) Pérak has an area of 10,000 square miles, and in 1891 the population numbered 214,254. The chief industry is tin-mining; but rice, sugar, and coffee have been largely cultivated. Revenue, 1898, \$4,575,842. The chief town is Taiping, in the district of Larut. Railways are in operation: Port Weld to Taiping 8 miles; Taiping to Ulu Sapetang 9 miles, and from Teluk Anson via Ipoh to Enggor 68 miles, with an extension partly completed to Taiping and Prai, about 70 miles; with a further extension of 50 miles to join the system of Pérak and Selangor. Imports (1898) \$10,759,095; Exports \$16,702,278.

British Resident, W. H. Treacher, C.M.G. ... \$10,800

(2) Selangor, with an area of 3,500 square miles, and a population of over 150,000, lies immediately south of Pérak, and, like that State, depends largely for its prosperity upon its tin-mining. Liberian coffee, coconuts and pepper are being planted with success. The revenue in 1898 was \$3,862,439. A railway 22 miles long from the capital Kwala Lumpur to the port of Klang was opened in July, 1886, and this has since been extended inland to Kwala Kubu a distance of 38¼ miles, with a branch line from Kwala Lumpur to Kajang 16 miles long. Fresh sections to connect Klang with Kwala Klang, and from Kuala Kubu to Tapah in Pérak (65 miles) are under construction. Imports (1898), \$13,045,127, exports, \$13,779,941.

British Resident, John Pickersgill Rodger, C.M.G. \$8,400

(3) *Negri Sembilan* is the name of a confederacy of small States in the interior of the peninsula, the affairs of which have been placed under a British Resident residing at Seramban. The confederacy comprises Sri Menanti, Rembau, Johol, Tampin, Sungei Ujong, Jelébu, and other small States, comprising about 3,360 square miles, with a population of 41,617 in 1891. Revenue (1893), \$701,334. Twenty-three miles of railway connect Seramban, the administrative centre of the confederation, with Port Dickson on the Malacca coast, and 24 miles are building to connect with the Selangor system. The cultivation of Liberian coffee is attracting considerable attention. Imports, 1898, \$2,165,169; Exports, \$3,199,435.

British Resident, E. W. Birch, C.M.G. \$7,200

(4) *Pahang* is a large State on the east coast, to which, in 1888, a British Resident was sent at the request of the Sultan. The country is of great extent, exceeding 12,000 square miles, and is already full of tin-mining and gold-mining enterprise. Pop., 1891, 57,542. Rev., 1898, \$224,852; Imports, \$1,147,054; Exports, \$1,559,349.

British Resident, Arthur Bulter \$6,000

HONG KONG.

The Crown Colony of Hong Kong consists of an island situate off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10'—22° 17' N. lat. and 114° 6'—114° 18' E. long, and of a portion of the mainland of China leased by the British Government for 99 years, the lease dating from June 9, 1898. The island is about eleven miles long and from two to five miles wide, with an area of 30½ square miles, the whole colony comprises an area of about 252½ square miles. The island lies close to the mainland, being separated at one point by a narrow strait (the Li-ū Mun Pass) not more than ¼ of a mile wide. The city of Victoria lies along its northern shore, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some ten square miles. The port is free. It possesses excellent docks, capable of holding the largest vessels, and is fortified.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is over 1,800 feet high. This peak is a favourite place of residence in the hot season, which lasts from March to October. During the winter months, from November to February, the climate is cooler and invigorating. The thermometer ranges from a minimum of 32° in February to a maximum of 93° in August. The average annual rainfall is 85 in., of which not less than 70 in. are received between May and September, when the S.W. monsoon prevails.

Hong Kong was first taken possession of by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842, British Kaulung being subsequently acquired by the Peking Convention of 1860; and the Kwanzai g peninsula, being the southern part of the province of that name, by a lease signed June 9, 1838. It is a military and naval station for the protection of British commerce, and it is the centre of a vast trade in many kinds of produce—chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

It is calculated that, exclusive of the traffic which merely passes through the harbour without breaking bulk, the actual trade of the colony

amounts to over £20,000,000 sterling per annum. In the year 1898 shipping to the extent of 8,453,983 tons entered the port.

The population of the island in 1898 was estimated at 254,500, of whom about 240,000 were Chinese. The white residents, including the garrison, numbered about 14,000.

Much encouragement is given by the Government to education in the colony, and the Chinese are fully alive to the advantages arising therefrom. In 1898 there were 109 schools subject to Government supervision, attended by 8,522 pupils. There were also many private schools, attended by about 2,900 pupils.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members including himself.

WEI-HAI-WEI.

Owing to the occupation by the Russian Government of Port Arthur, Great Britain obtained the lease (for so long a period as this Russian occupation should last) of a port in the Shangtung province named Wei-hai-Wei, situated in about 37° N. and 122° E. This port is opposite Port Arthur in the gulf of Pechili, and included in the lease is the island of Liu Kuntao and a strip of land round the mouth of the harbour ten miles in breadth. An infantry regiment of Chinese, with British officers, is being raised to assist in the defence of the port.

BORNEO.

Next to Australia and New Guinea, this is supposed to be the largest island in the world. It was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S., and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consist-

ing chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, and Bugis (the aboriginal Celebes). Formerly the greater part of the island was independent under a Sultan of Borneo now represented by the dependent Sultan of Brunei. British intercourse with the Sultan was marked in 1848 by a treaty ceding to Great Britain the island of Labuan, which at that time formed part of his dominions. In 1842 a British subject, obtained the concession of a tract on the west coast round the town of Sarawak, and various extensions were obtained in after years. About 1830, the Dutch East India Company, which had previously established trading settlements in the island, commenced to extend its territory, and rather more than two-thirds of the island is now included within the Dutch possessions in the East Indies. Over the remainder of the island a British Protectorate has been established; the whole of the northernmost corner forms the territories of the British North Borneo Company; on the north-west is the dependent kingdom of Brunei, and the western and south-western portion forms the dependent kingdom of Sarawak. The mineral kingdom includes gold, silver, diamonds, antimony, quicksilver, iron, tin, and coal, the latter abundant. The principal imports are opium, tea, cottons, cloths, hardware, brass, iron, &c.; exports, sago, beeswax, edible birds-nests, camphor, hides, rattans, tortoiseshell, trepang, cinnabar, antimony, coal, diamonds, and gold. The principal towns of Dutch Borneo are Banjarmassin in the south and eastern administrative districts and Pontianak in the western.

Imports from the U. K.	1898. £20,750	1899. £24,953
Exports to the U. K.	1,501	1,251

THE BRITISH NORTH BORNEO COMPANY.

The territories of the British North Borneo Company extend over the northern part of the island, from the Sipitong River on the west to 4° 10' on the east coast, together with all the islands within three leagues. By an arrangement with the British Government, dated 1 Jan, 1890, the administration of the neighbouring British island, Labuan, was transferred from the Colonial Office to the Company. The total area of the Company's territories is about 30,000 square miles, and the population is estimated at 150,000. The inhabitants are Mohammedan Malays with an infusion of Chinese and Arab blood on the coast, and various aboriginal tribes resembling Dyaks in the interior. The original concession was made to a company by the Sultans of Brunei and Sulu in 1877-8, and was subsequently transferred to the British North Borneo Company, to whom a royal charter was granted 1st November, 1881. The territory ceded has a coast-line of some 987 miles, with many excellent harbours. The soil is rich, producing rice, sago, sugar-cane, coffee, cocoa, gambier, pepper, tea, tobacco (1899, \$1,862,434), hemp, cinchona, gutta-percha, india-rubber, beeswax, edible birds' nests, camphor, gum, and timber. About 700,000 acres of land have at present been taken up by agricultural companies on cultivation leases. Gold, copper, coal, and other minerals have been found. The company does not itself engage in trade. The revenue is derived from opium and other farms, sales of land, royalties on exports, and duties. The principal places are Sandakan, the headquarters of the administration, Gaya on the west coast, Kudat

in the north, Silam on the east, and Mempakol in Brunei Bay.

The government is administered by a Governor, assisted by a Council and by Residents of districts. The mode of government adopted is similar to that of a British colony, with modifications to meet native customs and local circumstances. A metre gauge railway (52 miles) is constructing from the west coast to the interior.

CAPITAL, Sandakan; population of Sandakan Bay, 6,319.

The Sarawak territory lies on the west coast of Borneo, with a seaboard of 400 miles, an area of about 50,000 square miles, and a population of about 500,000, composed of various races. The government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained, the transfer being approved by H.M. Government, August, 1891. The country

produces sago, gutta-percha, india-rubber, bees-wax, birds' nests, gold, silver, diamonds, anti-mony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper.

Revenue, 1899, \$851,438; Expenditure.. \$843,230

CHIEF TOWN, Kuching. Distance from London 8,700 miles; transit 30 to 35 days. Telegrams sent by post from Labuan.

LABUAN

is an island of the Malayan Archipelago, situated about six miles off the north-west coast of Borneo, in 5° 16' N. lat. and 115° 15' E. long. Its area is about 31 square miles; and its population is 5,853. It was ceded to Great Britain by the Sultan of Borneo in 1846, being at that time uninhabited. A British settlement was established in 1848, the first Governor being the late Sir James Brooke. The island has a fine harbour, and possesses extensive coal-measures, which are now being developed, the annual export being about 50,000 tons. The trade consists in the exchange of cloth, rice, crockery, ironware, &c., for the produce of Borneo and the neighbouring islands

(gutta-percha, india-rubber, birds' nests, canes, béche-de-mer, wax, sago, &c.). There are four manufactories in the island where the raw sago imported from the coast of Borneo is converted into flour, and then exported to Singapore. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage; a rifle range is often utilized by passing ships of the Royal Navy.

The government is administered by the Governor of the British North Borneo Company's territory.

CHIEF CITY, Victoria. Population, 5,853.

THE British Possessions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97° , forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:— (1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to is divided into two divisions, equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54° , is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second division, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The country possesses great mineral wealth, and coal, gold, silver, copper, nickel, lead, petroleum and asbestos are produced, while iron, phosphates, salt, graphite, &c., occur; the total value of the minerals produced in 1898 was about \$38,000,000. The soil is generally fertile, and all the products of the temperate zone are cultivated.

THE DOMINION OF CANADA.

THE Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the extensive regions long under the quasi-government of the Hudson Bay Company, now styled Manitoba, the North-West Territories, and the Yukon Territories; in fact, the whole of British North America except Newfoundland and Labrador. This territory, nearly as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,315,647 square miles, exclusive of the great lakes and rivers. The total population of the Dominion is about 5,250,000, a number which is rapidly increasing, and notwithstanding its diversity of origin, is fast being welded into one harmonious and homogeneous whole. The descendants of the French Colonists reside chiefly in the Province of Quebec, where out of a total population of 1,400,000 above 1,000,000 are Roman Catholics, the majority of whom still very generally use the French language. A Religious Census of Canada was taken in 1891, and the numbers were:— Roman Catholics 1,992,017, Methodists 839,815, Presbyterians 754,193, Church of England 646,059, Baptists 302,565, Congregationalists 28,157, and Lutherans 63,982. Canada possesses an Active Militia numbering 38,000 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000. During the military operations in South Africa 1899 a Canadian Contingent, 1,000 strong, was sent by the Dominion Government, and a special corps fitted out and dispatched by Lord Stratheona to fight for the Mother Country in line with contingents from the Australasian and other Colonies.

Few possessions of Great Britain have made greater strides of late years in wealth, trade, and general advancement than the Dominion of Canada. The population has increased very rapidly: in 1841 it was about 1,538,500; in 1851, 2,380,988; in 1861 it was 3,182,418; in 1871, 3,635,024; in 1881, 4,324,810; and in 1891, 4,833,239. In 1881 there were 35 cities and towns of 5,000 inhabitants and upwards, having a total population of 660,040;

In 1891 there were 47 of such cities and towns, and their total population was 1,030,250. Montreal, the largest city in the Dominion, has a population of nearly 300,000 (or with suburbs 350,000), and Toronto, the capital of Ontario, has over 200,000 inhabitants. Ottawa, the political capital, has doubled its population in the last 15 years and now has 60,000 inhabitants; Winnipeg, in Manitoba, from 241 in 1871 has grown to 39,000 in 1898, and Vancouver, in British Columbia, which had no existence in 1885, numbers over 20,000. The city of Dawson, the "business centre" of the Klondyke gold region, was a barren waste in 1897 and in 1899 had a population of 4,500. The general rate of increase throughout the Dominion in the last decade was 11'74 per cent.

Canada was originally discovered by Sebastian Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, now called the North-West Territories, admitted into the Dominion. British Columbia followed in 1871, and Prince Edward Island in 1873, Newfoundland alone remaining a separate colony.

OTTAWA is 3,540 miles from London; letters are nine to eleven days in transit. Telegraph charges from 1s. to 1s. 6d. per word.

POLITICAL CAPITAL and Seat of Government, Ottawa. Pop. (1899), 58,000 (with suburbs 70,000).

CIVIL ESTABLISHMENT.

- Governor-General, Right Hon. the Earl of Minto, G.C.M.G. (appointed 1898 for five years) ... £10,000
- Governor-General's Secretary and Military Secretary, Major F. S. Maude, Coldstream Guards ... 750
- Comptroller of the Household, Arthur Guise.
- Private Secretary, Arthur F. Sladen.
- Aides-de-Camp, Capt. J. H. C. Graham, Coldstream Gds.; Capt. A. C. Bell, Scots Gds. ... each 205
- Commanding the Forces (Halifax), (Vacant).
- Commanding the Militia, Major-General Richard Hebdon O'Grady Holy.

The Executive Government and authority are vested in the Queen, and exercised in her name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of ■ Upper House, styled the Senate, and a House of Commons. The Senate consists at present of 31 members, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 4 for Manitoba, and ■ for the North-West Territories. The members of the Senate are appointed for life by the Crown on the nomination of the Ministry for the time being; each nominee must be thirty years old, ■ resident in the province for which he is appointed, a natural-born or naturalised subject of the Queen, and the owner of a property qualification amounting to \$4,000. The House of Commons is chosen every five years at longest, and consists at present of 213 members; 92 being elected for Ontario, 65 for Quebec, 20 for Nova Scotia, 14 for New Brunswick, 7 for Manitoba, 5 for British Columbia, 5 for Prince Edward Island, and ■ for the North-West Territories. The House of Commons is also com-

posed of natural-born or naturalised subjects of the Queen, no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province ■ divided into districts, each of which returns ■ member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also ■ separate Legislature and Administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered as in England by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of Queen's Bench, Court of

Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure; and trial by jury prevails everywhere throughout the Dominion. The Queen's Privy Council is at present composed of 14 Ministers and two Members without portfolio.

The number of industrial establishments in 1891 was 75,968, with an invested capital of \$354,620,750, employing 370,256 hands (273,424 men, 70,280 women, 19,476 boys, and 7,706 girls under 16 years of age), and producing goods to the value of \$476,258,886. The amount paid in wages amounted to \$100,653,650. \$31,456,324 were invested in land, \$50,303,043 in buildings, \$81,401,247 in machinery and tools, and \$181,450,136 other than fixed.

The principal articles of trade between Canada and the home country in 1893 were as follows:—
Exports from Dominion to United Kingdom.

Animals	£1,826,405	Fish	£646,226
Bacon	761,861	Fruit (Apples) ..	474,993
Butter	1,113,956	Hams	301,212
Cheese	3,014,211	Leather	189,864
Corn: Wheat	1,801,953	Lined	70,605
Oats	371,329	Pulp for Paper ..	130,948
Pease	240,650	Skins & Furs ...	356,801
Maize	1,085,621	Wheatmeal	1,154,246
Eggs	233,693	Wood & Timber ..	4,887,762

Domestic Imports from United Kingdom.

Apparel, &c.	£284,732	Linens	£258,553
Chemicals	123,577	Machinery	183,080
Cottons	918,419	Spirits	174,500
Earth & Chinaware	138,249	Telegraph Wire, &c.	90,425

ONTARIO AND QUEBEC.

The area of these provinces is 568,928 (Ontario, 222,000, Quebec, 346,928) square miles (including the portions of the great lakes within the boundary), comprising all the basin of the St. Lawrence on the north side of that river and the great lakes, and on the south side N. of the parallel of 45°, and extends from 42° to 55° N. lat. and 57° to 90° W. long. The Province of Ontario, formerly called Upper Canada, and the Province of Quebec, formerly Lower Canada, are separated from each other by the River Ottawa. Quebec also comprises the Isle of Anticosti and the Magdalen Islands, in the Gulf of St. Lawrence. Nearly 80 per cent. of the inhabitants of Quebec are of French descent, preserving their original language, religion, and customs; 95 per cent. of those of Ontario are British.

The timber trade, the original occupation of the people, is still of great commercial value, although fast yielding to those of agriculture, dairy-farming, and cattle-raising. The fisheries are increasing in importance, and yield a considerable annual revenue; a recent decision of the Privy Council has given the control to the Provinces of the confederation, it having been formerly administered by the Dominion Government. The mineral resources of the country are scarcely yet developed. Great part, however, especially the regions north of Lakes Huron and Superior and around Lake of the Woods and Rainy Lake, are valuable for their mineral products, such as iron, zinc, lead, copper, nickel (deposits of nickel ore in the Sudbury district of Ontario are found over an area of about 3,000 sq. miles, and mining and smelting operations are actively carried on), silver, cobalt, &c., and in the eastern, northern, and western districts of Ontario gold has been discovered in quartz veins over extensive areas; in 1897 a number of mills were completed, and these are now working. Phosphate of lime, corundum, and asbestos are abundant, and sandstone, limestone, slate, and marbles of every colour are also found in many parts. Petroleum and salt are produced in large quantities. During the last thirty years agriculture has made vast progress, both in Ontario and Quebec. The land is generally very fertile, and produces all the varieties of cereals, fruits, roots, &c. Cattle-raising and dairy-farming are also very important industries, and at present large exports are principally from these provinces—Montreal, Toronto, and Quebec being the great centres of distribution. These provinces, doing 82 per cent. of all the manufacturing of the Dominion, contain the chief manufacturing centres of Canada, which are becoming very important, employing considerable capital and labour. Montreal and Toronto command a vast overland system of communication, by canal and railway, both with Canada and the Eastern and Western parts of the United States. The educational system in force in these provinces, and in fact throughout the Dominion, provides practically free instruction, and gives successful pupils the chance of acquiring the highest education at a moderate cost.

The returns collected by the Bureau of Industries in Ontario, show that in that province in 1899 the total area of cleared land was 13,111,292 acres, of which 8,733,926 acres were under crop, the total value of the land being \$563,271,777. The total area under pasture was 2,710,268 acres, with 338,073 acres of orchards and gardens. The average production of the principal field crops in Ontario in 1899 was, in bushels per acre: fall wheat, 13'8; spring wheat, 17'7; barley, 30'2; oats, 38'0; rye, 16'6; peas, 20'4; corn, 65'0; buckwheat, 16'7; beans, 16'1; potatoes, 11'9; mangolds, 391'0; carrots, 399'0; turnips, 379'0; hay (tons), 1'40. The total wool clip amounted to 5,525,122 lbs., the average weight of the fleeces being 5'95 lbs. The total quantity of cheese made in 1,203 factories (in 1899) was estimated at 123,313,923 lbs., valued at \$12,123,837. There were 323 creameries in operation, which made 9,113,954 lbs. of butter, valued at \$1,746,362. The returns of live stock show that there were 5,524 horses, 2,318,355 cattle, 1,772,604 sheep, 1,971,070 pigs, and 9,344,024 poultry in the province in 1899. Fruit growing is here engaged in on a very extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph is the best place of its kind in Canada, and supplies a general education together with a technical training in agriculture. The students meet part of their expenses by the labour they perform on the Experimental Farm attached to the College, the annual balance of cost for board, washing, and tuition (payable by the students' guardians) being from £10 to £15 for natives of Ontario and from £20 to £30 for students from other parts. A central experimental farm has been established by the Dominion Government at Ottawa, and branch farms in connection with it have been established in the several provinces, and in the North West Territories. Free grants of land are obtainable in this province, and improved farms can also be bought at advantageous rates.

In the Province of Quebec the lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to establish two great national parks (Laurentides National Park, containing about 1,600,000 acres, and the Trembling Mountain Park) to favour the planting of trees along highways and on farms, and to organize an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of 62,000,000 acres, of which 32,000,000 are under licence to cut timber. The wood pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only \$300,000 at the last census, is now, probably, ten times that amount. Improved farms may often be obtained in the Eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purposes of settlement unsold on 30 June, 1896, was 6,931,978 acres. In 1899 there were 1,192 cheese factories, 404 butter factories, and 307 butter and cheese combined factories, forming a total of 1,903.

ONTARIO. Population (Census 1891), 2,114,321. The Government is vested in ■ Lieutenant-Governor and Legislative Assembly composed of 92 members elected for four years (no property qualification being necessary), representing 91 electoral districts into which the province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of eight members, acting ■ the Ministry of the province; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 200,000); Hamilton, the Birmingham of Canada (48,980); Ottawa, the Federal Capital, with ■ large lumber trade and woodenware manufactories (60,000); London (31,977), Kingston (19,264), Belleville (9,914), Chatham (9,000), Stratford (9,501), Guelph (10,539), St. Catharines (9,170), Brantford (15,000), St. Thomas (10,370), Windsor (10,000).

QUEBEC. Population (Census 1891), 1,488,535. The Government of this province is vested in ■ Lieut.-Governor and an Executive Council, consisting of 24 members appointed for life, and a Legislative Assembly of 74 members elected for five years to represent the same number of electoral districts in the province. The principal cities

are Quebec (population, 63,090), the capital of the province, with a large export timber trade and the great seaport town of Canada; and Montreal (population, Census 1891, 216,650), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence rivers. Other important towns are Three Rivers (8,334), Levis (7,301), Hull (11,265), Sherbrooke (10,110), St. Hyacinthe (10,016). Ocean-going steamers ascend the St. Lawrence as far as Montreal. The tonnage of sea-going vessels that arrived at and departed from the ports of Montreal and Quebec in 1892 was 1,440,481 tons and 945,403 tons respectively.

Quebec is 2,634 nautical miles from London.

NOVA SCOTIA, a province of the Dominion, is

a peninsula between 43° 30'—46° N. lat. and 61°

—66° 15' W. long., and is connected with New

Brunswick by a low fertile isthmus about sixteen

miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles,

one-fifth part of which consists of lakes, rivers,

and inlets of the sea; of the whole, about

5,000,000 acres are fit for tillage, that is, nearly

half the entire area, and the soil in the western

half of the province, particularly in the Annapolis

Valley and around the Basin of Minas, is

unsurpassed for fertility, owing to the rich

marine deposits left on the shore-land by the

tides of the Bay of Fundy. The climate is

delightful, and the winter is not so cold as in

other parts of the Dominion. The population

of the entire Province in 1891 was 450,395.

In 1891 there were 6,080,695 acres of land occu-

pied (1,993,697 improved), of which 969,548

acres were under crop, 994,113 acres in pasture,

and 30,036 acres in gardens and orchards, the

remainder being woodland. Hay is the most

important crop of the Province, occupying one-

fourth of all the improved land, and yielding

600,000 to 700,000 tons. Fruit cultivation is

making wonderful progress; apples especially are

claimed to be the best in the world; in 1893 the

product was about 2,000,000 bushels, and many new

orchards are coming into bearing. Halifax, the capital of the province, has a magnificent harbour covering 10 square miles. It is the principal winter port of Canada, and is the *entrepôt* of a large trade with the West Indies and South America. It is the principal naval station of North America, and the British Government have an extensive dockyard there. The Dry Dock can accommodate the largest vessels afloat for repairs. The coal deposits are extensive and of good quality, 2,642,333 tons being the output in 1899; iron-ores are plentiful, and preparations are being made for extensive manufactures of iron and steel at Sydney, Cape Breton. Gold mines are now being profitably worked, £2,612,400 representing the product of the past 38 years. The principal fisheries are upon the eastern coast. In 1893 the total value of their produce was \$6,407,279. The fish of which the largest catches in value are made are cod, halibut, haddock, mackerel, herring, salmon, and lobsters. The manufacturing interest is also a growing one. In order to give an impetus to farming, the Government have established an agricultural college and experimental farm near Truro, where both men and women can receive a good practical education in agriculture and domestic economy. The Annapolis Valley is one of the greatest apple-growing regions in the Dominion. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at £8 16s. per 100 acres, and 1s. 10d. per acre for any additional quantity. Hunting, shooting, and fishing abound; among wild animals there are bears, foxes, moose deer, otter, mink, sable, musquash, hares, racoons, and squirrels; and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, and curlew.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 38 members.

CAPITAL, Halifax. Population, about 47,000.

Principal towns, Dartmouth (6,249), Truro (5,102), Windsor (2,838), Sydney (2,426), Annapolis Royal (2,832), Yarmouth (6,089), Amherst (3,781), Pictou, New Glasgow, Lunenburg.

Agent-General for Nova Scotia in London, John Howard, 143, Cannon Street, E.C.

Halifax is 2,463 miles from Liverpool. Telegrams, 1s. per word.

CAPE BRETON ISLAND, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 86,794 inhabitants. The chief town is Sydney, on the eastern coast, having valuable fisheries in the neighbourhood, and other towns being North Sydney, Sydney Mines, and Port Hawkesbury.

NEW BRUNSWICK is situated between 45°-48° N. lat. and 63° 47'-69° W. long., and comprises an area of 28,200 square miles, with a population in 1891 of 321,263. It was first colonised by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests and the fisheries. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. According to the Census of 1891 the occupied land amounted to 4,471,250 acres, of which 1,509,790 acres were improved, 1,018,704 acres being under crop, 479,607 acres in pasture, and 11,479 acres devoted to gardens and orchards. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1895 of the value of \$4,403,158, ranking second in importance to those of Nova Scotia. St. John is the principal winter port of Canada, and is connected by rail with Montreal.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 46 members elected by the people.

CAPITAL, Fredericton. Pop. (1891), 6,502; chief cities, St. John (39,179), and Moncton (8,765).

Fredericton is 2,748 miles from Liverpool *via* Cape Race, or 2,535 miles *via* Belleisle and Chatham, N.B.

MANITOBA, formerly the Red River Settlement, was formed into a distinct Province in 1870, and admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49°-53° N. lat. and 90°-101° W. long. (these parallels and meridians forming its boundaries), and the Canadian Pacific Railway connecting the Atlantic and Pacific coasts, entirely through British territory, is sure to give an important impetus to the rapid development of this Province. Its area is 116,021

square miles, somewhat smaller than Great Britain and Ireland. Its population, census 1891, was 152,506, being an increase of 145 per cent. since 1881, and in 1899 was estimated at about 250,000. The Red River intersects the province, which appears destined to become a great agricultural country. The soil is fertile and productive, emigration is invited and encouraged, and liberal grants of land are made to settlers. According to the census returns of 1891, there were 6,000,000 acres of land occupied, 2,612,134 being cultivated (1900). The acreage under wheat in 1900 was 1,806,215. The crop of 1899 was 33,504,766 bushels of wheat, 23,003,126 oats, 5,532,972 barley, and 388,468 flax, rye and peas. The main line of the Canadian Pacific Railway traverses Manitoba, and there are several other lines in operation. The Red and Assiniboine rivers are also navigable for a considerable course in the Province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an Executive Council of 5 members and a Legislative Assembly of 40 members.

CAPITAL, Winnipeg. Population (1899), 54,778. Other towns, Portage la Prairie, pop. 4,000; and Brandon, pop. 5,500; Neepawa, Minnedosa, Morden, Deloraine, Virden and Carberry.

<i>Without Portfolio</i> , Hons. C. H. Campbell and J. Johnson	
<i>Chief Justice</i> , Hon. Albert Clements Killam	1,000
<i>Puisne Judges</i> , Hons. Joseph Dubuc, J. F. Bain, and Albert Elswood Richards	each 800

NORTH-WEST TERRITORIES.—These Territories comprise that portion of British North America from the boundary of the United States (lat. 49° N.) to the most northerly part of the continent, and from the western shores of Hudson's Bay to the Rocky Mountains, and have a total area of about 2,497,427 square miles—until recently very sparsely populated. During the last decade immigration considerably augmented the number of settlers.

Out of this vast territory, the Dominion Government formed in 1882, for the convenience of settlers in the southern part of the Territories and for postal purposes, four provisional districts, named Assiniboia (89,535 square miles), Saskatchewan (107,092 square miles), Alberta (106,100 square miles), and Athabasca (104,500 square miles). In October, 1885, the unorganized and unnamed part of the Territories to the north was divided into four similar districts, named Ungava, Franklin, Yukon, and Mackenzie, while the district of Athabasca was enlarged to an area of 265,000 square miles. Three of these districts are now represented in the Dominion Parliament; Assiniboia returning two members, and Alberta and Saskatchewan one each.

Over 150,000 square miles have been reported favourable for stock-raising and agriculture, the former being largely followed in Alberta, where the climate is milder, owing to the influence of the Chinook winds from the Pacific. Both Assiniboia and Alberta are traversed by the Canadian Pacific Railway, and settlement

is thereby favoured; local railways are also being developed.

There are large deposits of iron, coal, and gold; the most notable discovery of gold was made in 1897 on the tributaries of the Klondyke river in the Yukon district, almost within the Arctic circle, and the beds of all rivers on the eastern slope of the Rockies are being successfully examined; coal is abundant in Alberta, where mines are now being largely worked.

The territories are watered by some of the finest rivers on the American continent, and it is estimated that there are about 10,000 miles navigable. The fur trade was till recently almost the sole commercial occupation of the inhabitants, but agriculture is being developed and grants of 160 acres of land are given to settlers free of cost, and other lands can be bought at prices from 12s. 6d. per acre upwards, according to location.

On the ranches in the districts of Alberta, Assiniboia, and Saskatchewan, there were 231,222 cattle, 60,639 horses, and 64,920 sheep. The southern half of the district of Alberta is specially adapted for stock-raising of all kinds, animals being able to graze at large during the winter; and it is estimated that there are now over 145,000 head of cattle in this district alone. Assiniboia, Saskatchewan and the northern part of Alberta are more particularly adapted to mixed farming, but some districts are altogether confined to agriculture, in which case wheat is generally the only crop grown.

A large tract of land, enclosing hot mineral springs of remarkable curative powers, has been reserved by the Dominion Government at Banff, in the Rocky Mountains, as a national park, and the grounds are being laid out under Government superintendence.

A census of the three Provisional districts of Assiniboia, Alberta, and Saskatchewan, was taken in August, 1894, by the North-West Mounted Police, when the population was found to be 86,351, of whom 13,345 were Indians. The population of the other portions of the Territories, not included in the above census, in 1891 was 32,168, making a total population of 99,967. According to the census returns of 1891 there were in the three districts 2,910,144 acres occupied, and 194,773 acres cultivated, and in the nine years 1891-1900 the population has increased very rapidly, about 50,000 immigrants settling in the provinces in the one year 1899.

In 1870 the Territories were included in the Dominion, previous to which they had been held by the Hudson's Bay Company.

The Government consists of a Lieut.-Governor and a Legislative Assembly of 31 elected Members, advised by an Executive Council of 3 members of the Assembly. The three provisional districts of Alberta, Assiniboia, and Saskatchewan are now divided into 31 electoral district thereby securing an entire representation to population.

 pool, Montreal, and Canadian Pacific Railway.

PRINCE EDWARD ISLAND, the last admitted province, lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,000 square miles (about equal to that of the English county of Norfolk), and its population (census 1891), 109,078. The history of the island is somewhat strange: it was discovered simultaneously with the neighbouring countries, and was first settled by the French, who held it for many years, but only as a fishing station. The English took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763), and compelled the greater part of its French inhabitants to leave. From that time it has remained, without intermission, in the hands of the English. By an Act passed in 1798, which came into operation 1st February, 1799, the island received its present name from Prince Edward, Duke of Kent, having been previously known as St. John's Island. The island is divided into three counties (King's, Queen's, and Prince), each of which elects to representatives. The freehold of the island was originally held by a number of absentee landlords, who were finally bought out under the Land Purchase Act of 1875. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. There were (1891) 718,092 acres of improved land, of which 536,175 acres are under crop, 178,072 acres of pasture land, and 3,845 acres of gardens and orchards. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. The rivers, too, contain extensive deposits of what is known as mussel mud, which is raised in the winter by a dredging machine worked on the ice, and afterwards used on the land as a fertiliser, where it helps largely in producing excellent crops of hay. The conditions obtaining on the island are favourable for the rearing of live stock, of which a large number are exported to other parts of the Dominion and the New England States of America. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour, is distant from Liverpool 2,630 miles, transit about 8 days. Population, 11,373. Summerside (pop. 2,882) and Georgetown (pop. 1,060), on the east coast, are also ports of considerable size, and the centres of shipbuilding trade.

BRITISH COLUMBIA occupies the western frontier of the Dominion of Canada extending from the summit of the Rocky Mountains and the 120th meridian of longitude, west by the 60th parallel of north latitude to the boundary of Alaska; thence southward and along the Pacific coast (including QUEEN CHARLOTTE ISLANDS and VANCOUVER ISLAND) to the Strait of Fuca; thence easterly along the 49th parallel of latitude to the summit of the Rockies. The area of the mainland is calculated at 383,300 square miles; Queen Charlotte Islands at 6,000 sq. miles; and Vancouver Island at 14,000. Coal (output 1899, 1,306,324 tons) is obtained from the latter; in the Queen Charlotte group of islands on the north-west coast; and in the south-eastern parts of Kootenay district near the Crow's Nest Pass, through which a railway runs. In addition to the main line of the Canadian Pacific Railway which enters the Province through the Kicking Horse Pass and penetrates it to the coast at Burrard Inlet upon the outlet of which Vancouver City is built, and the Esquimalt and Nanaimo Railway from Victoria to Wellington on Vancouver Island, four branch lines of the former have been constructed. Communication is afforded from the termini of the Nakusp and Robson branches with the main line by steamboats. The Nelson and Fort Sheppard, an independent line of railway, runs south from Nelson, connecting on the American side of the line with the Spokane Northern; the Kaslo and Slocan Railway connects the mines of the Slocan district with Kaslo on Kootenay Lake, on which steamboats ply from Nelson southward, calling at Pilot Bay, Ainsworth and Kaslo, connecting with the Great Northern at Bonner's Ferry. The Columbia and Western Railway has been built from Trail to Rossland in the Trail Creek mining district, and thence to Midway, in the Yale district. A short line of railway runs from Victoria to Sidney on Haro Strait; the Westminster Southern from New Westminster connects with the Great Northern at Seattle, *via* Blaine; Vancouver and New Westminster cities are connected by an electric tramway. A line is proposed to run from Vancouver *via* New Westminster, the Fraser Valley, and Hope, direct to the mines of southern Kootenay, with an ultimate outlet at Crow's Nest Pass, and a British Pacific Railway is projected from Victoria along the east coast of Vancouver Island to Seymour Narrows, where it is proposed to cross the mainland and to run from Bute Inlet

through the interior to Yellow Head Pass. The entire area of the Province is supposed to be highly mineralised and is interspersed with fertile valleys, which are capable of sustaining a large farming population. The climate of the coast is mild, while the interior is subject to great extremes of temperature. The southern end of Vancouver Island, the New Westminster district, the north and south Thompson valleys, and the valleys of the Okanagan are already partially settled, and all the land capable of cultivation is adapted for the growth of the products of the temperate zone. There is a very extensive reserve of timber on the coast, consisting of Douglas fir, spruce, red and yellow cedar, and hemlock, the present available supply of which is variously estimated at from 40,000,000,000 to 100,000,000,000 feet. Some 60 mills are in operation, with an annual capacity of about 550,000,000 feet. The mines and fisheries are the chief sources of wealth, the principal centres of the former being Trail, Slocan, and Toad Mountain in Kootenay Boundary in Yale, Alberni, and Clayoquot on Vancouver and Texada Islands, and the old placer diggings in Cariboo. The output of the fisheries is valued at about \$4,000,000 per annum, and give employment to between 8,000 and 10,000 persons, salmon canning (total pack 1898, 496,529 cases) on the Fraser River and the coast inlets is the principal branch of the fishing industry, but deep-sea fishing is rapidly growing in importance.

The history of British Columbia is comparatively recent. From about 1810 to 1846 the Caledonia and Oregon territory was occupied by the Hudson Bay Co. as a fur preserve. Vancouver Island was exclusively the possession of that company from 1849 to 1859, with a Governor dating from 1850 and a Parliament from 1856. The Mainland, British Columbia, and Vancouver Island each became independent Crown Colonies in 1858, when the gold excitement began, and continued so until 1866, when they were united under one government. In 1871 British Columbia entered the Confederation.

The population of the Province (estimated at 175,000 in 1900) in 1891 was classified as follows:—Whites, 65,266; Indians, 23,257; Half-Breeds, 214; Chinese, 9,091; Japanese, 306; Negro, 36; total 98,170. Four lines of steamships ply to and from the Orient and one to Australia. There are a number of coast lines to San Francisco and Alaska.

Capital of the province, VICTORIA, population (1899) 25,000. VANCOUVER CITY, 80 miles from Victoria; population (1899) about 30,000. NEW WESTMINSTER, 8,000; NANAIMO, 5,000; ROSSLAND, 8,000; and NELSON, 6,000.

CANADIAN RAILWAYS.

The CANADIAN PACIFIC stretches across the entire continent, from Montreal to Vancouver on the coast of British Columbia, a total distance of 2,906 miles. Starting from the seaports of Quebec and St. John's, N.B., the lines run to Montreal (the headquarters of the Company), where the trans-continental line proper begins, passing through Ottawa, Carleton Junction, Renfrew, North Bay, Sudbury Junction, Port Arthur, Fort William, Rat Portage, Keewatin, Ignace, Winnipeg, Carberry, Brandon, Moosomin, Qu'Appelle, Regina, Moose Jaw, Swift Current, Maple Creek, Medicine Hat, Crowfoot, Calgary, and Stephen—the last-named on the summit of the Rocky Mountains—and then through the Selkirk Range to Vancouver, on the Pacific coast. The share capital amounts to \$146,028,082. *Chairman*, Sir William C. Van Horne. *President*, Thos. G. Shaughnessy. *Secretary*, Charles Drinkwater. The total length of the Canadian Pacific Railway system is 7,250 miles, 300 of which are cut through the solid rock. The last spike was driven on the 7th November, 1885, and the road was opened for general traffic on 28th June, 1886, since which time there has been a daily mail service between the Atlantic and Pacific coasts. The time occupied in making the road was four years six months, an average of 2·6 miles per day. The distance from China, Japan, and the Pacific coast generally to Liverpool is from 1,000 to 1,200 miles less by the Canadian Pacific Railway than by other routes.

The Imperial and Dominion Governments having granted the Canadian Pacific Railway annual subsidies of £45,000 and £15,000 respectively, a mail service has been established between England and China over this line, the distance being shortened by several days, and the overland journey being entirely through British territory. Steamers have been built in England specially for this service,* and mails have been landed in London within twenty-one days from leaving Yokohama.

THE GRAND TRUNK was originally formed in 1853 by an Act of the Legislature, and in 1893 the following lines were consolidated, viz.—Grand Trunk, Great Western, Midland, Georgian Bay, London, Huron and Bruce, Wellington, Hamilton, Northern and North-Western, North Simcoe, Montreal and Champlain, Beauharnois, Jacques Cartier, Waterloo Junction, and Cobourg, Blairton and Marmora, thus forming a continuous line through the provinces of Quebec and Ontario. The total loan and share capital of the company amounts to over £67,000,000 sterling. The mileage of the lines owned and leased is 3,512 miles, in addition to which the company controls 674 miles in the States of Michigan, Indiana and Illinois, making the mileage of the entire system 4,186 miles.

* See article "Our Ocean Mail."

The eastern extremities of the line are Quebec and Portland, Maine, and it extends westward to Detroit, Chicago, Grand Haven and Muskegon, supplying the means of communication with Montreal, Toronto, Hamilton, Niagara, Buffalo, Detroit, and all the principal cities and towns in the provinces of Quebec and Ontario.

President, Sir Charles Rivers Wilson, G.C.M.G., C.B. ; *Vice-President*, Joseph Price ; *Secretary*, Walter Lindley. *London office*, Dashwood House, New Broad Street, E.C.

NEWFOUNDLAND.

This island, the twelfth largest island in the world, is situated between 46° 37'—51° 39' N. lat. and 52° 35'—59° 25' W. long., on the north-east side of the Gulf of St. Lawrence. It is about 317 miles long, and 316 miles broad, and contains about 40,200 square miles, and at the end of 1891 it had a population of 197,934, not including those resident in the portion of Labrador (4,106) within the jurisdiction of Newfoundland. Of these 72,342 are Roman Catholics, 68,075 Church of England, 52,672 Methodists, 1,447 Presbyterians, and 3,398 various. This is the oldest English Colony. It was discovered by John Cabot in 1497 ; the first land seen was hailed as *Prima Vista*—the present Cape Bona Vista. The inhabitants are chiefly located on the coast-line of the shore and bays, and the greater part are engaged in fishing—for cod in summer, and seal fishing in winter and spring ; these are the two main industries of the island. Lakes and rivers abound ; it is estimated that about one-third of the surface is covered with water. The interior is practically in a state of nature ; but a railway has opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. There are about 633 miles of railway ; the Government has completed a trans-insular line to Port-aux-Basques, *via* Exploits River and Bay of Islands, with branch connections to Placentia (the principal settlement in Conception Bay), and to Burnt Bay (in Notre Dame Bay). The Colonial Government have entered into an agreement with a railway contractor whereby the railways, docks, telegraphs, and steam service of the entire colony were transferred to him and extensive grants of public lands made in return for the immediate commencement and future development of public works, and railway, dock, and telegraph extension. A steamer runs from the terminus at Port-aux-Basques to Cape Breton, the nearest point of the mainland, making the passage in six hours. The climate is salubrious, and the people are strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

The principal exports of the Colony are codfish, value \$4,445,031 ; cod and seal oil, value \$54,254 ; sealskins, \$136,563 ; tinned lobsters, \$565,362 ; copper, copper ore, iron pyrites and other minerals, \$622,002 ; besides which there is a prospect of a coal-mining industry being developed.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon in the Straits of Belleisle on the south to Cape Chudleigh at the entrance of Hudson's Straits on the north ; it possesses valuable cod, herring, trout, and salmon fisheries. There are a few Moravian missionary settlements on the coast, and also some posts of the Hudson Bay Company.

The Government is a responsible one, administered by a Governor, appointed by the Crown; a responsible executive of seven, a legislative council of not over fifteen, appointed for life, and a House of Assembly of thirty-six, elected by the people every four years. The first general election, under the "ballot system" and "Manhood Suffrage Acts," passed in the 1899 session of the Legislature, and in 1890 the franchise was given to all males of 21 years and over.

BRITISH GUIANA,

which includes the settlements of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America, and comprises a vast area. The boundaries of which were definitely determined by the award of the Arbitrators in the Venezuela-British Guiana boundary question (1899). The definite settlement of this long-standing difficulty should give a great impetus to the development of the colony. It has a seaboard of more than 300 miles. The Essequibo River intersects the country in its entire length; the Corentyne River separates it from Dutch Guiana; the Cuyuni is the great waterway on the west. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The two towns are Georgetown, population 53,176, and New Amsterdam, population 8,903. The climate is hot, but not generally unhealthy; the country is now almost free from the epidemics of yellow fever which were once prevalent. The cultivated portion of the country, amounting to 83,000 acres (of which 70,873 acres are in sugar-cane), is confined to the sea-coast and to a short distance from the rivers. It

is very like Holland, being below the level of the sea and intersected with canals constructed by its former Dutch owners. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The chief product is sugar, which forms 82 per cent. of the export trade. Good coffee and cocoa are also produced. The other principal products are rum, molasses, rubber, timber, and gold. The returns of the leading exports for the year 1899-1900 were as follow:—Sugar, value £1,101,254; rum, £208,397; molasses, £20,092; timber, 170,632 cubic feet, value £11,234; gold, 113,367 oz., valued at £416,630. The population, April, 1891, was 278,328 (1898, est. 285,484), of whom about one-third were Indian immigrants. There are about 10,000 aboriginal Indians, belonging chiefly to Arawak, Acawai, Carib, and Warau tribes; they are occupied largely in fishing, hunting, and raising crops of cassava. The territory now forming the Colony of British Guiana was first partially settled by the Dutch West India Company in 1580, and was from time to time held by Holland and France; it was finally surrendered to this country at the Peace of 1814. It was stipulated that the Dutch laws and institutions should be maintained.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected by the direct vote of the people—in which the Governor has an original and a casting vote, and a veto on any measure at any stage. The Court of Policy discharges the functions of a Legislative Council, except as to levying taxes, which is the prerogative of what is called the Combined Court, composed of the Court of Policy and of 6 Financial Representatives elected directly by the people. There is, besides, the Executive Council, consisting of the Governor, 6 official and 3 unofficial members nominated by the Crown, which exercises all the executive and administrative functions of government other than those before mentioned. There are 1,567 miles of Post Office telegraph and telephone lines, with 89½ miles of cable, and 71 post-offices; also Post-office Telephone Exchanges in Georgetown and New Amsterdam, with over 600 subscribers. There is a line of Railway along the east sea coast from Georgetown to Rosignol, Berbice, 40½ miles in length, owned by the Demerara Railway Company, and another line has been opened along the west coast of Demerara, extending from Vreed-en-Hoop to Greenwich Park, 15 miles in length. There is another line connecting the Essequibo and Demerara rivers 19 miles in length. The cultivation of the sugar-cane remains the chief industry, but attention is being given to other industries, such as farming and rice-growing, and there is good prospect of a development of gold mining in the interior, for which purpose railways are being projected to the richer districts, and roads have been constructed.

Georgetown, 3,963 miles; transit, 13½ days by R. Mail steamer on alternate Wednesdays from Southampton. Telegrams, per word, 7s. 2d.

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 29' 5" to 15° 53' 55" N. latitude, and from 89° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west and south by Guatemala, and on the east by the Caribbean Sea. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 56° to 96°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The Census (1891) gives the population at 31,471 (males, 16,268; females, 15,203).

The staple products are the natural woods of the colony, principally mahogany and logwood; the export of mahogany, of which the cost ready for shipment, is \$40 to \$50 per 1,000 ft., amounted in the year 1899 to 6,493,168 ft., that of logwood (\$10 to \$15 per ton) being 24,038 tons in 1899. There are some sugar estates, and coffee plantations have been started. Fruits, including bananas, plantains, coconuts, pineapples, oranges, and mangoes, grow well, while inland there are extensive regions of good pasturage, and there are indications that gold and other minerals exist. Other exports are: Sugar, rum, cedarwood,

india-rubber and bananas. The latest returns show that about 15,000 acres are under cultivation. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at \$1 per acre, or leased at an annual rental of 10c. to 30c. per acre.

On the 15th October, 1894, the gold dollar of the United States was made the standard coin, with a subsidiary silver coinage, and a paper currency. The sovereign and half-sovereign are legal tender at \$4.86 and \$2.43 respectively.

There are forty-nine schools in the colony, all but one of which are denominational, and in receipt of Government aid.

British Honduras is governed as a Crown colony. The Executive Council consists of the Colonial Secretary, the Treasurer, the Attorney-General, and two unofficial members appointed by the Sovereign. The Legislative Council includes the following members:—the Colonial Secretary, the Treasurer, the Attorney-General, and not less than five unofficial members appointed by the Sovereign.

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., comprising an area of about 19 square miles, and containing (1899) an estimated population of 16,423, of whom 6,282 are white, exclusive of army and navy. These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly-fortified dockyard, where the British North-American squadron refits.

These islands have become a favourite winter resort for visitors from the neighbouring States of America and the Dominion of Canada. Num-

bers repair thither from November until April to escape the cold of the North American Continent; large hotels have been erected for their accommodation. The climate during this period is most salubrious, the range of thermometer being 60° to 70°, and invalids derive great benefit from the mildness of the winter.

The soil is, on the whole, poor. The products of the island chiefly consist of onions and potatoes, which are grown in large quantities for the spring supply of the New York market, a few melons and pumpkins, and arrowroot of a very fine quality. Lily bulbs, especially the Bermuda Easter Lily, are grown for export, chiefly to the United States. The sea abounds with fish; a few turtles are taken.

The Government is administered by a Governor, who is also Commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,112 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton, on the coast of Long Island, is the chief town and the seat of government: population (1891), 1,854. The churches and chapels are all endowed under a temporary Act: the sum of £10 is paid for every hundred of the denomination.

AUSTRALASIA, that is, Austral or Southern Asia, comprises the great island-continent of Australia, the islands of New Zealand and Tasmania, and a vast number of smaller islands, chiefly in the Southern Hemisphere, between the Pacific and Indian Oceans, together with a portion of the island of Papua or New Guinea.

The British Possessions in Australasia (1) are the Commonwealth of Australia, which includes all the continental provinces (New South Wales, Victoria, Queensland, South Australia and Western Australia), and the island of Tasmania (2), New Zealand (3), Fiji and part of New Guinea (4), certain outlying islands. These possessions are estimated to contain 3,173,882 square miles, and a population of 4,975,000.

AUSTRALIA is the largest island on the face of the globe, extending from $10^{\circ} 39'$ to $39^{\circ} 11\frac{1}{2}'$ S. lat., and from $113^{\circ} 55'$ to $153^{\circ} 16'$ E. long, with a coast line of 8,850 miles. Its boundaries on the N. are Torres Straits, the Sea of Timor, and the islands of New Guinea (Papua), Timor, Flores, &c.; on the E., the South Pacific Ocean; on the S., Bass's Strait, Tasmania, and the South Pacific Ocean; and on the W., the Indian Ocean. Its nearest point to Asia is situate at a distance of 1,600 miles S.E. of Singapore, the extremity of the continent in this direction; the intervening space being occupied by the East Indian Archipelago, chiefly in the possession of Holland. The area of this vast island-continent is estimated at 2,944,628 square miles. The greatest dimensions are in length from E. to W. 2,400 miles, and in breadth from N. to S. 1,971 miles. There are many excellent and spacious harbours and, at an average distance of sixty miles, a range of steep mountains runs along the E. coast, but the greater part of the shore on the N., the W., and S. is low and sandy. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray rivers. Nearly all round the coast, however, and in the eastern portion of the island, is a rich grazing country, admirably adapted to the rearing of sheep, of which there were (1899) in New South Wales, 41,241,004; Victoria (1894), 13,180,943; Queensland (1899), 17,552,608; South Australia, 5,076,696; Western Australia, 2,244,888. Sheep-farming is the pre-eminent branch of industry, and it is chiefly as a wool-producing country that Australia has risen into importance. Years of drought occasionally occur, constituting the greatest impediment to the progress of the colonies, often followed by years of flood. The commencement of the seasons is as follows: Autumn, about March 21; Winter, June 21; Spring, September 23; and Summer, December 22. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hunter, Hawkesbury, Clarence, Richmond, Macleay, Brisbane, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, the Fortescue, De Grey, and Fitzroy; and the Victoria, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria, on the north; but they are of little service in facilitating internal traffic. The most extensive mountain system on the Australian continent takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland, the highest point being Mount Kosciusko (7,328 ft.), 327 miles from Sydney, N.S.W. In 1898 there were 11,285 miles of Government railways in operation and 728 miles of private lines.

There are few rivers of any considerable size along the whole coast-line; indeed, for 1,500 miles along the S. coast there is not a single watercourse. Lakes are numerous, but nearly all are salt, and they depend for their supplies of water upon the rivers and floods, and alternating from immense reedy swamps to areas of submerged levels, with broad mud banks for shores that render the water absolutely unapproachable. But the scarcity of the natural water supply has been, to a great measure, mitigated by successful borings, of which there are 350 in Queensland alone, yielding upwards of 180,000,000 gallons daily. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c. The settled portions are intersected by railways, already extending to 12,013 miles, as shown above, and with about 49,992 miles (excluding telephone lines) of telegraphic lines, connecting together all the principal towns on the continent. Direct steam communication is established with England and the

Continent by means of the Peninsular and Oriental, the Orient, Messageries Maritimes, the North German Lloyd, and other lines; there is a weekly mail from London. (See p. 454). "The Great South Land" is believed to have been first seen by De Gonneville a French navigator, in 1503, and was inserted in a map constructed by Le Testu of Dieppe about the year 1542. Portions of the coast on the north-west and south were sighted by the Dutch and English at different times, but practically speaking, the Island Continent was made known to the world by Captain Cook in 1770, when he saw the land to the west of Cape Howe, and explored the whole eastern coast to Torres Strait. Subsequently Flinders sailed round it, in 1802, and gave it the name of "Australia." Following the favourable report of Cook, the first British settlement was formed at Port Jackson (Sydney) in 1788. The aborigines are rapidly becoming extinct; the present number being under 200,000.

POSTAGE.—The Australasian Colonies joined the Postal Union on the first of October, 1891, and the postal rate is $2\frac{1}{2}d.$ the half-ounce. The Colony of New Zealand enters the Imperial Penny Postage Scheme on Jan. 1, 1901, and letters will be interchangeable on and after that date at $1d.$ the half-ounce.

TELEGRAMS.—New South Wales 4s. $11d.$ per word; Victoria 4s. $10d.$; Queensland 5s. $1d.$; South Australia 3s. $6d.$; Tasmania 3s. $6d.$; Western Australia 3s. $6d.$; New Zealand 5s. $2d.$ per word.

THE AUSTRALIAN NAVY.

NEW SOUTH WALES.—Acheron and Avernus, torpedo steam launches. Captain commanding *Naval Forces*, Francis Hixson (late master R.N.); *Paymaster*, F. Rule; *Engineer*, W. Ames; *Commanders*, G. S. Lindeman, R.N.; E. R. Connor, R.N.

QUEENSLAND.—Gayundah, twin-screw steel ship, 4 guns, 360 tons, 400 h.p.—Otter, gunboat, steel, 3 guns, 220 tons, 460 h.p.—Paluma, twin-screw iron ship, 3 guns, 360 tons, 400 h.p.; with one torpedo-boat. *Naval Commandant*, Q. D. F., Capt. W. R. Creswell, R.N., C.M.G.

SOUTH AUSTRALIA.—Protector, cruiser, 17 guns, 920 tons, 1641 h.p. *Commander and Naval Commandant*, C. J. Clare; *Ch. Eng. and Eng.-in-Charge of Submarine Mine Defences and Torpedo Corps*, W. Clarkson.

VICTORIA.—Cerberus, double-screw iron armoured turret ship; with two first-class and three

second-class torpedo-boats. *Comm.* F. Tickell, R.N., £600; *Fleet Eng.* J. L. Breaks, £450; *Staff-Surg.* C. A. Stewart, £150.

TASMANIA.—One torpedo boat.

Australian Auxiliary Squadron.—

(The ships of the Royal Navy, given in the following list, were constructed by the Home Government under an agreement with the seven colonies, and when in commission are stationed in Australian waters, the cost of maintenance and interest on cost of construction being borne by the seven Colonies, and paid in the form of an annuity to the Home Government. For further particulars concerning the vessels, see pp. 221-233).

Boomerang (735 tons), Karrakatta (735), Katoomba (2,575), Mildura (2,575), Ringarooma (2,575), Tauranga (2,575), Wallaroo (2,575).

THE COMMONWEALTH OF AUSTRALIA.

A scheme for the federation of the Australasian Colonies has been adopted by a plebiscite in the several Colonies. The five continental Colonies and Tasmania have joined the federation as original States, but New Zealand, on account of its distance from the continent, will remain separated as before. The *Commonwealth of Australia* will come into being on 1 Jan. 1901. The constitution will be similar to that of the Dominion of Canada, with the Queen (represented by a Governor-General) and two Houses of Parliament as a governing body; but the powers of the Central Parliament will be limited by the Provincial bodies, and not *vice versa*, as in the Dominion Constitution. Each State contributes the same number of Senators to the Upper House, but membership of the House of Representatives is dependent on population, the ratio being fixed at one member for every 50,000, with a minimum of five members from each State.

First Governor-General, The Rt. Hon. John Adrian Louis, 7th Earl of Hopetoun, K.T., G.C.M.G., G.C.V.O.

GENERAL STATISTICS OF THE FEDERATING COLONIES, 1899.

For the following figures the Editor is indebted to the Hon. Allan McLean, M.L.A., Premier and Chief Secretary of the State of Victoria in 1900.

State.	Popu- lation.	Net Im- migrati on.	Revenue.	Expendi- ture.	Debt.	Gold produced.	Imports.	Exports.
			£	£	£	ozs.	£	£

I. NEW SOUTH WALES.

The whole of the eastern part of Australia, including the several colonies of New South Wales, Victoria, and Queensland, received the name of NEW SOUTH WALES from Captain James Cook, in 1770. The present colony of New South Wales originated in a penal settlement formed by the British Government, when Captain Arthur Phillip, R.N., its first Governor, arrived at Botany Bay, in H.M.S. *Sirius*, in January, 1788, with an armed tender, six transports and three store-ships, where they anchored, but subsequently proceeded to Port Jackson, which was found to be more suitable than Botany Bay for the new settlement: he there landed the 756 "persons" under his charge, and the British ensign was for the first time hoisted on the shores of Sydney Cove, now the capital and seat of government.

The colony is situated between the 29th and 36th parallels of S. lat. and 141st and 153rd meridians of E. long., and comprises an area of 310,700 square miles—*i.e.*, more than six times the area of England, and nearly three times the size of Great Britain and Ireland—with a population, Census 1891, of 1,132,234, and 1,357,030 on June 30, 1899; made up (1891) of 512,562 males and 519,672 females. The estimated number of aborigines is 6,891, of whom 2,137 are adult males, 1,675 adult females, and 3,029 children. The first Governor, Capt. Phillip, remained from Jan. 26, 1788, to Dec. 10, 1792, and was succeeded by Capt. Grose, Dec. 11, 1792, to Dec. 12, 1794; Capt. Paterson, Dec. 13, 1794, to Sept. 1, 1795, when a duly appointed Governor, Capt. Hunter, R.N., arrived, and remained from Sept. 7, 1795, to Sept. 27, 1800. Capt. P. G. King followed, Sept. 28, 1800, to August 12, 1806, when he was followed by the unfortunate Capt. Bligh, whose rule came to an abrupt termination by a general revolt; and after an interregnum of nearly two years, Major-General L. Macquarie arrived, and, Jan. 1, 1810, assumed the governorship, which he retained for nearly eleven years, since which time there has been a regular succession of governors. In 1813 the interior of the country was explored, and the great plains being found admirably adapted for sheep-farming, several breeds of sheep, including the celebrated merino, were introduced. In 1792 there were but 23 head of cattle, 11 horses, 105 sheep, and 43 pigs. On the 31st December, 1898, there were 491,533 horses, 2,029,516 cattle, 41,241,004 sheep, and 247,061 pigs. In 1898, 271,864,306 lbs. of wool, valued at £8,361,721, were produced.

Minerals.—The gold fields were discovered in 1851. Copper, silver, tin, iron, antimony, asbestos, cinnabar, and kerosene shale are also found; and in small quantities, diamonds, rubies, opals, and other precious stones. The total value of minerals raised up to the end of 1898 was £119,853,429, coal accounting for £34,321,205; £4,794,928 was added in 1897.

Agriculture is one of the principal industries of the colony. About 2,204,500 acres are under cultivation (excluding 348,829 under permanent artificial grasses), producing during the year ended 31st March, 1899, 15,728,496 bushels of wheat, maize, and other kinds of grain, with 61,900 tons of potatoes, and 12,706 cwt. of tobacco. Sugar-cane to the extent of 289,206 tons was produced; also 845,232 gallons of wine, and 7,839,216 dozens of oranges, and almost every kind of fruit and vegetable may be grown. The total extent of land alienated or in process of alienation at the end of 1898 was 46,388,590 acres, while the area of

land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 127,609,593 acres. At Sydney the mean temperature in the shade for 99 years averaged 63°; the mean temperature in the shade for the Table Lands is 55°—the Coastal District 64°—and the Western Plains 65°.

The western portion of the country is not well watered, the Darling and the Murrumbidgee, both tributaries of the Murray, which divides the colony from Victoria, are only navigable for part of the year; the coastal districts are watered by the Richmond, Clarence, Macleay, Manning, Hunter, Hawkesbury, and Shoalhaven, which empty their waters into the Tasman Sea.

Religion.—All religions are free, there is no establishment, and all payments are voluntary, with the exception of such as remain due by the State, under former arrangements. About two-thirds of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1891, numbering 502,980. There were (1891) 286,911 Roman Catholics. Presbyterians and Methodists come next, and almost every sect is represented. The number of places of worship in the colony was 5,004 in 1899.

Education.—Education is compulsory, the total enrolment in 1898, in 2,602 State schools, being 227,561, and the average daily attendance 141,723; the State expenditure was £764,841, including £15,556 received from Government by university affiliated colleges, and Sydney Grammar School. The University of Sydney was incorporated in 1851. In addition to the State schools there are 956 colleges and schools with 53,179 scholars.

"Responsible government" was established by the Constitution Act, 18 & 19 Vict. c. 54, and is vested in a Governor appointed by the Crown, and a Legislative Council consisting of not less than 21 members; the Council at present consists of 58 members. The Legislative Assembly consists of 125 members, representing 125 electoral districts, elected under an Act assented to on June 13, 1893, and receiving a salary of £300 per annum. With few exceptions all natural-born or naturalised males, 21 years of age, who have resided 12 months in the Colony and three months in the district, are entitled to the franchise.

Communications.—Railways, roads, and bridges have their several departments. There were open on June 30, 1899, 2,707 miles of Government railway, upon the construction of which £37,992,276 have been spent; and 84½ miles of private railway lines; there are also 66 miles of Government tramways (upon which £1,516,343 were spent), and 7 miles of private tramways. There were (Dec. 31, 1898) 35,637 miles of telegraph-wire with 916 stations.

Postal.—The Post Offices and receiving offices numbered 2,098, the number of letters conveyed being 75,119,595; newspapers, 42,570,850; packets and book parcels, 16,497,334; and parcels, 596,433.

Shipping.—In 1898 the number of vessels entered and cleared was 6,579, with a total tonnage of 6,919,928.

Banking, &c.—There were (31 Dec., 1898) 13 banks of issue, with a paid-up capital of £18,092,428; assets £42,638,224, and liabilities £31,311,293. The savings bank deposits amounted to £4,454,975, in addition to 514 Post Office savings banks with deposits amounting to £5,026,069. The Public Debt was mostly incurred for public works.

Defences.—In December, 1898, there were enrolled in the permanent and volunteer naval and military service of the colony 9,288 men: 1,283

artillerymen, 116 engineers, 128 submarine miners, 74 electricians, 4,357 infantry, 737 mounted rifles, 388 lancers, 50 army service corps, 142 medical staff corps, 1,500 rifle club reservists, and 111 staff, &c. The naval brigade and naval artillery volunteers comprise 579 officers and men. The "Soudan contingent" and the "South African contingent" were chiefly selected from these forces. The cost of defence for the year ended 30th June, 1899, was £298,651, and the expenditure up to end of June, 1899, from Consolidated Revenue, £5,053,625; from Loans, £1,326,571; volunteer land orders, £168,045; total, £6,548,241 (which is exclusive of the cost of the Soudan contingent, £121,630).

SYDNEY, the chief city and Capital, stands on the shore of Port Jackson, surrounded by scenery of surpassing beauty. It extends four miles north and south by three miles east and west; and contains 117 miles of streets with 23,185 houses, and a population of about 98,250, or, including suburbs, 1,533 miles of streets, 90,935 houses, and 3,100 acres of park, &c., with a population of 426,950. In addition to the Government buildings, there are the Royal Mint, the University, National Art Gallery, Free Public Library, Observatory, two cathedrals, and numerous churches. Other towns are Newcastle, 16,070; Broken Hill, 22,570; Bathurst, 9,450; Goulburn, 10,560; Parramatta, 13,000; Maitland, E. & W., 11,000; Wickham, 6,500; Grafton, and South Grafton, 5,930; Albury, 5,750; Hamilton, 5,510; and Tamworth, 5,740.

Secretary, Samuel Yardley, C.M.G., J.P. 830

[NORFOLK ISLAND, the residence of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn Island, is attached to New South Wales, and was given a constitution with a resident magistrate and elective council in 1896. Pop. about 850. *Resident Magistrate*, C. McA. King.]

Lord Howe Island (450 miles north-east of Sydney), (pop. 55) and Pitcairn Islands are also dependencies.

Sydney, *via* Suez Canal, is 12,043 miles from London; transit from 30 to 43 days. Telegrams, 4s. 9d. and 4s. 11d. per word.

II. VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), from which it was severed, and erected into a separate colony in the year 1851. It comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes: it lies between the 34th and

39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 490 miles, its greatest breadth is about 300 miles, and its extent of coast line nearly 700 miles. The entire area comprises 87,884 square miles, or 55,245,760 acres, of which 3,820,505 were under cultivation in 1900.

Population.—Its population on the 30th June, 1900, was 1,168,136, including about 9,500 Chinese and aborigines. At the census of 1891 the native Victorians numbered about 713,000; natives of other Australian colonies about 80,000; English, 163,000; Irish, 85,000; Scottish, 51,000; Chinese, 8,000; and other nationalities about 40,000. The Victorian aborigines at the time of the first colonisation of the district were about 15,000 in number; in 1851 the official return gave 2,693; in 1891 only 565 (325 males and 240 females). The birth-rate of Victoria for 1899 was 26·71 per 1,000; the death-rate was 14·28 per 1,000.

Religion.—Nearly four-fifths of the population are Protestants, while the Roman Catholics number about 250,000.

Minerals.—Victoria is the principal gold-producing colony of Australia, to which it owes its very rapid progress: from the discovery of gold in 1851 to the end of the year 1899, the quantity raised—63,539,205 ozs., estimated at £4 per oz.—amounted in value to £254,156,820, the amount produced in 1899 being 854,500 ozs. The value of other minerals raised to the end of 1899, consisting principally of tin, copper, coal, and antimony, is estimated at about £2,034,054.

Communications.—There were 3,143 miles of railway completed at the end of June, 1899, all of which belonged to the Government, the capital cost amounting to £38,974,410, or an average of about £12,400 per mile. Of this amount £2,803,740 was paid from general revenue, the remainder being raised by loans. The net income was £1,076,003, or 2½ per cent. There were 830 stations for electric telegraphs, extending over 6,747 miles (poles), which produced a revenue of £102,591 in 1899, the total mileage of wire being 15,125, and the telegrams transmitted numbering 1,889,488. There were also 13,794 miles of telephone wire.

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit and butter are the staple productions of the colony. In 1899 the chief exports were, wool, £5,701,410; gold (including specie), £4,361,864; butter, £1,404,830; wheat, flour, and biscuit, £502,461; leather, £314,425; skins and hides, £505,167; and live stock, £352,137. A trade is also springing up in preserved and frozen meats, the value of the exports (excluding bacon and hams) being £429,703 in 1899. The principal imports of the colony in 1899 were wool (from across the border), £2,351,059; live stock, £767,216; sugar and molasses, £683,717; gold (including specie), £2,805,875; cottons, £1,007,291; woollens, £681,903; and timber, £441,286.

The estimated number of sheep in 1894-95 was 13,180,943. Agriculture has of late years much improved, wheat and oats being chiefly cultivated; the dairy industry has also made marked progress. Of the 3,820,505 acres under cultivation in 1899-1900, 2,165,693 were wheat crops, and 271,280 oats. In 1898-99, 1,882,209 gallons of wine were produced (1,919,389 in 1897-8). There were (1898) 413,278 milk cows producing over 35,000,000 lbs. of butter and 4,397,369 lbs. of cheese. In 1899 there were 3,027 manufactories, employing 60,000 hands.

Shipping.—The shipping statistics of the colony furnish abundant evidence of the magnitude and

value of its trade. In 1899, 4,055 vessels, 5,341,455 tons, with 185,593 men, entered and cleared.

	1898-99.	1899-1900.
Public revenue	£7,378,842	£7,463,117

MELBOURNE, the chief city and seat of government, is an episcopal see, and is distinguished for its University, Museum, Mint, Public Gardens, Observatory, Public Library, Hospital, its churches and other institutions; with its suburbs it contained on 31 December, 1899, an estimated population of 477,790 inhabitants, being the most populous city in Australasia. Other towns are Ballarat, 46,410; Bendigo (Sandhurst), 43,112; Geelong, 23,440; Castlemaine, 7,990; Warrnambool, 6,600; and Stawell, 5,400.

The Government is vested in a Governor appointed by the Crown, aided by an Executive Ministry consisting of 10 members, and a Parliament consisting of a Legislative Council of 48 members elected for 14 provinces, and a Legislative Assembly of 95 members for 84 districts.

Governor and Commander-in-Chief, (*actg.*)

III. SOUTH AUSTRALIA.

South Australia was established as a British Province by 4 & 5 Will. IV., cap. 95, but not proclaimed until 28th Dec., 1836, so that its history falls within Queen Victoria's reign. Originally it comprised 300,000 square miles, but with the addition of the Northern Territory in 1853, and by other extensions, the area is now 903,690 square miles, or twice that of Germany and France combined, and fifteen times greater than England and Wales. The Province is situated between 11° and 37° S. lat. and 129° and 141° E. long., and covers 12° of longitude and 27° of latitude. The total length is 1,850 miles, the extreme breadth 650 miles, with about 2,000 miles of seaboard.

Population.—The population at the 1891 census was 320,431, and on 31 Dec. 1899, 365,755 (190,043 males and 175,712 females). birth rate 24'98, death rate 13'06, and marriage rate 6'18 per 1,000.

Meteorology.—The mean temperature of the original colony is 74°, with a mean rainfall of 16 inches on the plains and 42 inches in the hills, the 60 years' average at Adelaide being 21 inches. The winter temperature averages 53°, with 100° for summer, but the climate is so dry that the inconvenience is comparatively slight. The

settled portions may not unfairly be compared to Southern France and Italy in respect of climate.

Water Supply.—The source of the Torrens and Onkaparinga rivers provides the capital with an abundant water supply; the reservoirs have a total capacity of 4,000,000,000 gallons.

Government.—The Government is administered by a Governor, the Legislative Council with 24 members, and the House of Assembly with 54 members. There are 6 Cabinet Ministers, members of the Legislative and *ex officio* members of the Executive Council, of which the Governor is president. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects male and female; there is a small property qualification for electors to the Legislative Council, who numbered 48,194 (9,846 women) in 1899, those for the Assembly numbering 151,124 (67,963 women).

Local Government.—There are 33 Municipalities and 140 District Councils, the aggregate assessment of property within their boundaries being £2,553,414 and the revenue (1899) £254,588, and expenditure, (1898) chiefly on roads, £272,735.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and two Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 103 annually, which is at the rate of 1 in every 3,523 of the population. The Real Property Act (1858) simplifies the transfer of land, and since the passing of the Act, land to the value of £15,316,967 has been dealt with.

Religion.—About 85 per cent. are Members of the Church of England and Protestants, the remainder being Roman Catholics.

Education.—There is an endowed university at Adelaide, founded in 1831 with 301 undergraduates; all classes are open to women. A State school of mines and industries has also been established. Primary education is provided by the State, and controlled by a responsible minister: it is secular, compulsory, and free; there are 677 State schools with 1,283 teachers and 62,316 scholars; the expenditure in 1899 was £139,682, the total outlay on school buildings amounting to £469,838. The Public Library, Museum, Art Gallery and local Institutes are supported or assisted by the State at an annual cost of £9,954.

Finance and Banking.—There are 8 Banking Institutions in Adelaide with 133 branches, having a total liability of £6,283,735 and assets £6,752,722 in 1899; their note issue amounted to £397,616. The Government Savings Bank has 134 agencies with 106,122 depositors (£3,489,082 bearing interest at 3 per cent.). The Public Debt is at the rate of £68 per head, and bears an average interest of 4 per cent.

Commerce in 1899.—Total value £15,272,754, or £42 per head of the population:—

	Imports from.	Exports to.
United Kingdom	£2,040,030	£2,805,787
British Colonies	4,056,385	4,153,701
Foreign Countries	787,543	1,426,908

£6,883,958 £8,388,396

Shipping.—The total tonnage inwards and outwards in 1899 was 3,429,366 tons; 2,834,967 tons were British, and 594,399 tons Foreign.

Railways.—The length of Government lines open in 1899 was 1,766 miles. The total cost to 31 Dec. 1899, was £13,070,087 or £7,530 per mile: the working expenses in 1899 were £657,841 and the

receipts £1,166,987 the net revenue being 3'91 per cent. on the cost.

Posts and Telegraphs.—The Adelaide and Port Darwin line, total length 1,975 miles, was laid in 1872, the whole cost (£515,005) being borne by the colony; this completed intercommunication with the outside world, and the wire has been duplicated at the cost of £50,000. There are 5,738 miles of local lines and 269 stations, the number of messages being 1,327,005, (of which 147,249 were international) in 1899. Postal and Telegraph receipts (1898-9) £271,011.

Agriculture.—Of the total area about two-thirds are farmed or grazed, and 3,081,846 acres cultivated, under wheat 1,821,137 acres, hay 311,440, oats, barley, and potatoes, with 822,013 acres lying fallow. The quantity of wheat produced in 1899-1900 was 8,453,135 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable.

In 1899 there were 19,438 acres of vines, the export of wine being 496,610 gallons in 1899. Brandy and other spirits are also produced.

Sheep and Cattle.—There were 5,667,283 sheep in 1899, and 37,386,313 lbs. of wool (valued at £1,511,693) were exported; cattle number 275,794, and horses 168,695.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron and coal are found.

Defences.—The cavalry, artillery, and infantry, number 1,391. Land batteries, at Glanville and at Largs Bay, have been constructed to resist attacks by sea; and there is one gun-boat (17 guns).

	1898.	1899.
Revenue	£2,612,730	£2,714,050
Expenditure	2,590,390	2,650,900
Public Debt, 30 June	24,369,935	24,916,310
Total imports	6,184,805	6,884,358

IV.—QUEENSLAND.

This colony, situated in lat. 10° 40'—29° S., and long. 138°—153° 30' E., comprises the whole north-eastern portion of the Australian continent. Its eastern seaboard was discovered by Captain Cook in 1770; some years afterwards its coast was visited by Capt. Flinders; but the first attempt to explore and settle any portion of the interior was made by Oxley, the Surveyor-General of New South Wales, who, in 1823, entered the River Brisbane, and selected the site of its future capital city of that name on a spot about 20 miles from its mouth, in Moreton Bay.

Queensland proper possesses an area of 668,497 square miles (i.e., equal to more than 5½ times the area of the United Kingdom), of which the Government have parted with the fee simple of 13,164,767 acres; under a system of deferred payment, 2,476,875 more are in process of alienation out of the total of 427,838,080 acres, but an additional area of 280,715,289 acres has been leased out for sheep and cattle runs and grazing-farms, and 86,250 acres under gold-mining and mineral lease. The population, Dec. 31, 1899, numbered 512,604, of whom 287,512 were males, and 225,092 females. Wheat, oats, and barley flourish on the downs; while a still larger area is devoted to maize, which yields an average crop of about 25 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, and various English fruits. In the year 1899, 123,289 tons of sugar were produced. The chief articles of export, the produce of the Colony, in 1899, were:—Wool, £3,381,637; gold, £2,582,830; silver, £46,552; tin, £80,959; pearl and tortoise-shell, £140,043; meat, £1,278,720; extract of meat, £215,309; green fruit, £93,187; oysters, £13,406; béche-de-mer, £3,348; sugar, £1,163,010; timber, £6,763; hides and skins, £699,553; tallow, £463,430; live stock, £927,384. At Brisbane the average temperature for 1899 was 67°9; the maximum in the shade was 100°1° and the minimum 37°5°. Wool is at present the staple production; rich gold, copper, tin, lead, quicksilver, antimony, and coal deposits are found in several districts; timber also of fine quality for cabinet manufacture, the Moreton Bay pine and the *Dammara robusta*, together with the cedar of Queensland, forming valuable products for export. At the end of 1899 the horses numbered 479,127, cattle, 5,053,836, sheep, 15,226,479, and pigs 139,118.

At the end of 1899 there were 2,800 miles of railway open; the length of telegraph wires being 18,968 miles, and the number of post-

offices 1,239. In 1899 there were 888 State schools in operation, with 2,012 teachers and an average daily attendance of 63,133 children; and 176 private schools, with an average attendance of 12,118.

The banking deposits on the 31st Dec. 1899 were £12,819,332, apart from the £3,374,126 in the hands of the Government savings bank.

The number of sea-going vessels entered inwards during 1899 was 662 (tonnage, 730,450), and the number outwards 630 (tonnage, 733,613). An Act of Parliament was passed in 1884, under which a force of about 3,750 men are at present enrolled. These comprise 3 classes, "Permanent Defence," numbering about 260; "Defence" (paid for each day's drill) some 2,000 strong, the rest being "Volunteers." Besides these, however, every male above 18 and under 60 helps to form one of four lines of "Reserves." The marine defences include a battery at Lytton commanding the entrance to the Brisbane River, and at Thursday Island commanding the Torres Straits, and some torpedo works carried out under the advice of Sir W. Jervoise. The colony possesses a torpedo boat, two gun-boats, and a picket-boat; also four Naval Brigade corps.

	1898.	1899.
Public revenue	£3,891,767	£4,431,470
Public expenditure	3,802,795	4,205,779
Public Debt, 31st Dec.	33,598,414	34,348,414
Total output	ozs. 920,048	9,6,894
Gold imports	£6,007,265	6,764,097
Total exports	10,856,127	11,942,858

Domestic Imports from U. K. 1899:—

Apparel, &c.	£177,763	Machinery ..	£95,827
Cottons	372,932	Iron	429,363
Woolens	125,011	Spirits	107,802
2,457,244			

Exports to the United Kingdom, 1899:—

Beef, Fresh	£774,347	Tallow and	
Meat, Preserved	216,370	Stearine ..	£167,505
Shells	131,310	Wool	1,470,395
3,014,718			

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane (pop. 121,262), Rockhampton (19,650), Maryborough (14,000), Townsville (16,500), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Other places of importance are Ipswich (14,500), Toowoomba (15,000), Charters Towers (26,000) and Gympie (15,000).

The Constitution was slightly altered by an Act of 1869, but is now very similar to that of the other Australian colonies, and comprises a Governor, Legislative Council, and Assembly—the former consisting of 42 members, nominated for life by the Crown, and the latter of 72 members elected by the colonists. There is a Supreme Court, with a Chief Justice, and four puisne judges; and inferior courts, in New South Wales.

V. TASMANIA

is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, in which are situated the Furneaux Group and King Island, included within the colony. It lies between 40° 33'–43° 39' S. lat. and 144° 45'–148° 30' E. long., and contains an area of 26,215 square miles, or 16,778,000 acres of land, of which, on 1st March, 1900, 225,125 acres were under crop, and 288,777 under artificially-sown grass; wheat 64,328; 976,457 acres were leased from the Crown principally for pastoral purposes, in 1899; the terms of purchase are £1 an acre for cash, or a £1 6s. 8d. in 14 yearly instalments. The estimated population, 30th June, 1900, was 182,375, half of whom belong to the Church of England, and about one fifth to the Roman Catholic Church. The aboriginals have become quite extinct, the last, a female, "Truganini," having died in 1876. The island was first discovered by Tasman, in December, 1642, and named by him "Van Diemen's Land," in honour of his patron, the then governor of the

Dutch possessions in India. It was subsequently partially explored by Captain Cook, and in 1803 Lieut. Bowen, despatched from Sydney with a few soldiers and convicts to form a penal settlement, fixed upon the spot where Hobart now stands. In 1825 it was severed from New South Wales and formed into a distinct colony. Transportation of criminals was abolished in 1853, and the name officially changed from Van Diemen's Land to Tasmania. The climate is fine and salubrious, and well suited to European constitutions, and the hot winds of Australia do not reach the island. At Hobart in 1899 the mean annual temperature was 54°, the mean summer temperature being 62·3°, and that of winter 46·76°; the average rainfall was 20·68 inches. The surface of the country is generally undulating forest land with mountains from 1,500 to 5,000 feet in height, and wide expanses of level, open plains. The chief products of the colony are wool, gold, silver, copper, timber, tin, and fruit, and sheep farming is the principal industry. The amount of stock on 1st March, 1900, was, sheep (and lambs), 1,672,068; cattle, 160,204; horses, 31,189; and pigs, 74,451. The forests of Tasmania abound in the most beautiful cabinet woods and the largest-size timbers, adapted for every variety of purpose. The fauna include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. There are silver fields on the west coast; over 63,000 acres have been taken on mineral leases, and mines of both lode and stream tin, are being worked in the north; the value of tin exported in 1899 was £281,947, of silver £203,869, and of copper £761,880. Iron-ore exists and gold has been found, the amount exported in 1899 being £205,936. Coal, of a good quality, and in easily-accessible positions, is very generally distributed over the island. There are in all 547 miles of railway open, including the main line running from Hobart to Launceston, through the island; and 275 telegraph stations, with 3,630 miles of wire, including a submarine cable (428 miles) communicating with the Universal Telegraph System; 815 miles of telephone; 355 post-stations, and 2,775 miles of post roads. On Dec. 31, 1899, the total registered shipping for the year was 44 steamers and 156 sailing vessels, with a total tonnage of 15,379 tons. The inward entries during 1899 were 797 (tonnage, 662,757); and the outward entries 755 (tonnage, 555,358). The present military defence is mainly composed of volunteers, who number 1,834. On the Derwent and the Tamar, batteries have been constructed, and the colony possesses a torpedo-boat.

A Department of Agriculture was formed in 1892. Primary education is administered by a Department, and there are 309 State schools.

	1898	1899
Public revenue	£908,223	£943,970
Public expenditure	830,168	871,453
Public debt, 31 December ...	8,412,904	8,395,638
Total imports	1,650,018	1,769,324
Total exports	1,503,369	2,577,475
Imports from U. K.	465,544	501,120
Exports to U. K.	431,518	439,640

The Constitution of Tasmania was settled by Local Act (18 Vict., No. 17). By this Act the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 19 members, elected for six years; and the latter of 38 members, elected for 3 years.

The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. For local purposes the island is divided into municipal, police, and road districts, which elect their own councillors and trustees.

CAPITAL, City of Hobart. Population, with suburbs, 41,585. Other towns are Launceston, pop. 26,525, Zeehan, Ulverstone, E. Devonport, Latrobe, Waratah, Westbury, Longford, and Queenstown.

Secy., Herbert W. Ely.

Hobart, 13.250 miles; transit, 36 to 40 days. Telegrams, 3s. 6d. a word.

VI.—WESTERN AUSTRALIA

includes all that portion of the continent west of 129° E. long., the most westerly point being in 12° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is, from north to south, 1,480 miles, and 1,000 from east to west, and its total area 975,920 square miles. The jarrah (*Eucalyptus marginata*), sometimes erroneously called mahogany, covers immense tracts of land in the S.W. portion of the colony: its timber is extraordinarily durable, and as it resists the white ant and the "Teredo navalis," it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandalwood (*Santalum cygnorum*) has long been an article of export; the tuart (*Eucalyptus gomphocephala*) and karri (*Eucalyptus diversicolor*), eucalypti of enormous size, are valuable timber trees. The occupied portion of the colony extends along the western coast for about

1,200 miles, while the mining population has penetrated over 500 miles into the interior, and the population, June 30th, 1900, was 178,195. The average temperature of Perth (lat. 32° S.), for the past twenty-four years, was 65°, while the mean for the barometer for fifteen years was 30.05 inches. The climate is one of the healthiest and most enjoyable in the world. There are two seasons, the wet and the dry, the former lasting from May to October. The total rainfall at Perth during 1899 was 32.40, the average for the past 24 years being 32.93. The chief products are gold, wool, timber, pearls and pearl-shells, lead, copper, tin, coal, sandal wood, cereals, fruit, wine, horses, and cattle. Cultivation has in the past been retarded by want of sufficient labour and means of transport; large tracts of fertile soil, in the south-western districts, where sandal-wood and other trees grow abundantly, are suitable for the culture of the vine, olive, and fig. The climate and soil are admirably adapted for silk-growing and for vintage purposes, and there are at present 3,251 acres of vineyards in the colony. Good wheat-growing soils also exist in the southern division, and 84.56 acres were under cultivation in 1899. Magnetic iron, lead, copper, and tin ores exist in large quantities.

Gold Statistics.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being rapidly developed, the production of gold being 231,512 ozs. in 1895, 281,265 ozs. in 1896, 674,994 ozs. in 1897, 1,059,184 ozs. in 1898, 1,643,877 ozs. in 1899; and 871,907 ozs. in the first seven months of 1900. The largest amounts have been obtained from the East Coolgardie field, Coolgardie being next in productiveness; gold is also found in the Kimberley, Pilbara, Ashburton, Murchison, Dundas, Donnybrook, and Peak Hill districts. The total amount exported from the colony from 1886 to 31 December, 1893, is 4,127,374 ozs.: 299,306 ozs. were received at the Royal Mint, Perth, in 1899.

There are 1,850 miles of railway open, the Great Southern Railway connects Perth, the capital of the colony, with Albany (King George's Sound), and the Eastern connects the capital with Fremantle and Kalgoorlie, and also with Kanowna and other towns on the goldfields. The Midland and Northern lines join Perth to Cue. There is direct telegraphic communication with England by the Eastern Extension Telegraph Co.'s cable from Roebuck Bay on the N.-W. coast, in addition to the line through Eucla to Adelaide. The two principal ports are Albany and Fremantle. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The exports are of wool, gold, jarrah and karri timber, tin, copper ore, guano, sandal-wood, pearls and pearl-shells, kangaroo skins, &c. The estimated value of the exports for 1899 was:—Wool, £423,296; timber, £553,198; sandal-wood, £29,719; pearls, £20,000; pearl-shells, £90,667; gold, £5,451,368. The stock returns of the colony are as follows:—Horses, 65,817; cattle, 296,267; sheep, 2,273,246; and pigs, 55,950. In 1899 the vessels entered inwards numbered 685 (tonnage, 1,333,052); and those outwards 668 (tonnage, 1,305,596).

	1898-99	1899-1900
Revenue	£2,478,811	£2,875,396
Expenditure	2,539,358	2,615,675
Public Debt, 30 June	10,488,363	11,804,178

Imports	£5,241,965	£4,473,532
Exports	4,960,006	6,985,642
Gold exports	ozs 1,050,184	1,434,570
Imports from U.K. ...	£2,051,872	1,559,029
Exports to U.K.	2,293,652	3,774,247

Under an Act of the Imperial Parliament, 53 & 54 Vict. c. 26, the colony is ruled by a Governor appointed by the Crown, a Legislative Council, and a Legislative Assembly. This Act was proclaimed and came into operation 21st Oct. 1890. Of the population one-half belong to the Church of England, one-fourth are Roman Catholics, and the remaining fourth belong to various other denominations. The Bishop of Perth is assisted by a Synod (established in 1872), in which the lay element forms a prominent feature. The educational system is compulsory, numerous elementary schools are under the control of the Minister of Education. There is a school in Perth for the higher education of boys. The total amount expended on education during the year ended 30th June, 1900, was £63,979.

The principal towns in the colony are:—Perth (pop. about 35,000), on the right bank of the Swan River estuary, 12 m. from Fremantle; Fremantle (16,000); Albany (3,250), and Geraldton (2,500); Coolgardie (4,500), Kalgoorlie (6,000), Boulder (3,500), Kanowna, Southern Cross, York, and Menzies. Northam, Bunbury, Broad Arrow, Claremont, and Guildford (from 1,000 to 3,000 each). There are, also, numerous smaller townships scattered throughout the colony, e.g., Busselton, Bridgetown, Pinjarra, Newcastle, Marble Bar, Cossack, Roebourne, Cue, Esperance, Norseman, &c.

New Zealand,

a colony in the South Pacific Ocean, consisting of three islands, known as the North, Middle (or South), and Stewart Islands, situate about 1,200 miles E. of New South Wales, between 33°—50° S. lat. and 162° E. long.—173° W. long. Portions of them were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1814, but no colonisation took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area (inclusive of the Auckland and Kermadec Islands) is stated at 104,471 square miles, or 66,710,320 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 44,468 sq. miles; Middle Island, 58,525; Stewart Island, 665, with only 252 inhabitants; and an adjacent group, named the Chatham Islands, contain 375 sq. miles.

The European population on 12th April, 1896, was 703,360 (371,415 males and 331,945 females). The native population (Maoris) in February, 1896, was 39,854 (21,673 males and 18,181 females), chiefly in the North Island, making the total population of the colony, including Maoris, 743,214 persons. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., the right of pre-emption being reserved to the Crown if they wished to alienate any portion. This right was abolished by legislation in 1862, when the Crown relinquished its right of pre-emption, whilst at the same time the purchase of native lands for the Crown did not abate, but continued side by side with the private purchases until 1894, when the right of private purchase was withdrawn. The seat of government was at first fixed at Auckland, but was removed to Wellington in 1865.

New Zealand in many parts is very mountainous; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The extremes of daily temperature vary throughout the year only by an average of 20°: London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole colony for the different seasons is:—Spring, 55°; Summer, 63°; Autumn, 57°; and Winter, 48°; and the climate is admirably adapted for raising every fruit, flower, and edible

that flourishes in Great Britain. Amongst the productions are the Kauri pine (found only at the northern extremity of the islands), much valued for ship building, and for its resin (Kauri gum); and the native flax, which is used for the manufacture of ropes and twine. The principal exports in 1899 were wool (£4,324,627), frozen meat (£2,088,856), gold (£1,513,180). Agricultural products, tallow, Kauri gum, and timber. Gold mining, both alluvial and quartz, is an important industry in many districts, and a rich iron ore, in the form of ironsand, has been found in Taranaki. Coal and copper are also found.

The total extent of land under all kinds of crop (excluding lands in artificial grasses), and of land broken up but not under crop, is (1900) 1,542,453 acres, while there are 10,853,302 acres of land in sown grass of which 6,515,708 acres had not been previously ploughed. In 1899, the number of sheep was 19,348,505; horned cattle, 1,210,439, and horses, 261,931. In March, 1900, there were 2,104 miles of Government railway lines in working order, and 111 under construction; and 167 miles of private lines (of which 97 miles have, since that date, been taken over by the Government), together with an excellent coaching system. The shipping trade is considerable, and regular lines of steamers run between the numerous ports, besides direct steam communication with England. During 1899 the vessels entered inwards numbered 609 (tonnage, 811,183); and those entered outwards 604 (tonnage, 807,856).

	1898-99	1899-1900

Mutton	2,491,404		
			9,699,391

The General Government consists of a Governor aided by a Ministry, a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for seven years only), at present consisting of 45 members, and a House of Representatives, consisting of 74 members elected for three years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election, nor for appointment to the Legislative Council.

The State system of education is free, secular, and compulsory. There were (December, 1899) 1,645 public primary schools, with 3,613 teachers and 131,315 scholars; there are also 397 private schools, with 15,295 scholars, and, in addition, 82 village schools for the Maoris. The higher education of boys and girls in the cities and large

towns is carried on in 25 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation of the colony was (1899), 40,127,422 letters and post-cards, 15,717,388 newspapers, and 17,883,208 books and packets, and the work is effected by 1,620 post-offices. There are 6,910 miles of telegraph line carrying 19,228 miles of wire. The administration of the law is carried out by a Supreme Court, consisting of a Chief Justice and four puisne judges, and by district judges, stipendiary magistrates, and justices of the peace.

Defences.—New Zealand has 4 torpedo-boats; the Calliope Dock, capable of docking two warships, was subsidised by the Imperial Government in 1898.

CAPITAL, Wellington, in the North Island.

The population of the chief cities and towns on 31st Dec., 1899, was as follows:—Wellington (and suburbs), 47,862; Auckland (and suburbs), 66,501; Dunedin (and suburbs), 49,791; Christchurch (and suburbs), 55,441; Invercargill (and suburbs), 10,295; Napier, 9,486; Nelson, 7,120; and Oamaru, 5,411.

Governor and Commander-in-Chief, Rt. Hon. the Earl of Ranfurly, K.C.M.G. £7,200
Private Sec. and A. de-C., Capt. Dudley Alexander.
Assist. Sec., Hon. C. E. Hill-Trevor

Wellington, 16,000 miles; transit, 38 days. Telegrams, 5s. and 5s. 2d. a word.	

(1) *The Cook Islands Federation*, a group of 6 islands, with a few islets, situate in the Eastern Pacific between 18° 15' to 21° 47' S. lat. and 157° to 160° W. long. The population numbers about 8,000 Natives, and 150 to 200 of European and other nationalities. The chief island is Raratonga, about 23 miles in circumference, with a population of 2,500. The chief products are coffee, copra, and lime-juice, oranges and other tropical fruits. The Exports in 1896 were £23,709—the Imports £23,068. The Chief of the Foreign Government is Makea Takau—Ariki Vaine (Queen) of Avarua in Raratonga. *British Res., Col. Gudgeon (Raratonga).*

Fiji.

This is a group of 200 to 250 islands in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,451 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji), and Vanua Levu (Great Land). The area of Viti Levu is 4,112 square miles, and that of Vanua Levu 2,432 square miles. The island of Rotumah (pop. 2,143) was annexed in 1881. The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the breadfruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), cocconut, sugar-cane, tea, cotton, maize, tobacco, and arrowroot. Sugar, pearl-shells, maize, bêche-de-mer, copra and cocconut oil, were for some time the chief exports, but the cultivation of fruit, especially bananas and pine-apples, for export to Australia and New Zealand, has extended rapidly of late years, and the value of this export has of late been second only to that of sugar. Fiji was ceded by its chiefs to the British

Crown, and the islands were formally annexed by Sir Hercules Robinson, on Oct. 10, 1874. Sir Arthur Gordon (now Lord Stanmore), the first Governor, landed in the colony in June, 1875. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of three official members. Laws are passed by a Legislative Council, of which the Governor is president, and which contains six official and six unofficial members, all nominated by the Crown. Native administration is carried on through the chiefs under the Governor's supervision. The population (31 Dec., 1898) was 122,673; comprising 98,478 native Fijians, 13,282 Indian immigrants, 4,373 Europeans, and some Polynesians, half-castes, and Chinese.

In 1899 a European battalion of volunteers was raised, armed with the Martini-Enfield rifle.

BRITISH NEW GUINEA.

Papua or New Guinea, the largest island in the world after Australia, extends for 1,490 miles from N.W. to S.E. between the equator and lat. 12° S. and between E. long. 130° 50' and 154° 30'. Its greatest breadth is 430 miles, and its area about 306,000 sq. miles. The N.W. half, to the W. of 141° E. long., belongs to Holland, which annexed it in the 16th century. The E. portion was independent until 1884, when it was divided between Great Britain and Germany. The colony of British New Guinea comprises the southern and south-eastern shores of the island, from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of inter-

section of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between the 8th and the 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland; and furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude.

The extent of territory is about 90,000 square miles, about half as large again as England, with a small population, the number of which is at present unascertained, but is probably not over 150,000. All tropical trees and fruit grow abundantly. The most important export is beche-de-mer—pearl-shell, copra, gum, rubber, gold, and sandal-wood are also exported. Alluvial gold has been found, but reef mining has not yet been developed to any extent.

The territory was at first taken over as a Protectorate under the management of a Special Commissioner; but on the Colonies of Queensland, New South Wales, and Victoria undertaking to guarantee £15,000 a year for the cost of administration, which was further secured by a Queensland Act, the Queen's sovereignty was formally proclaimed on the 4th Sept. 1888, and the territory was constituted as a colony under the name of British New Guinea. It is governed by a Lieutenant-Governor, with a nominated Legislative Council consisting of not less than two other persons.

The ports of entry are Samarai, Port Moresby, and Daru.

CAPITAL, Port Moresby. Pop., about 1,500.

PACIFIC ISLANDS.

(1) The British Solomon Islands, protected since 1893, and consisting of Guadalcanar, Malaita, and other islands situated in about 8° S. and 120° W., with a total area of about 8,500 sq. miles. The Santa Cruz Group and several other islands were incorporated in the Protectorate in 1898 and 1899. The revenue in 1899-1900 was £1,448 and the expenditure £955; the exports in 1898-9 were valued at £16,818. The seat of government is Tulagi. Under the Anglo-German Agreement of 1899 respecting Samoa those of the German Solomon Islands east and south-east of Bougainville were ceded to the United Kingdom. This acquisition consists of the islands of Choiseul and Isabel, Lord Howe's Group, and many smaller islands.

Resident Commissioner, Charles M. Woodford £500

(2) *The Gilbert and Ellice Islands Protectorate*, situated round the Equator between 172½° and 180° E. The Gilbert Group consists of 16 islands, (Arorai, Tarnana, Omotoa, Beru, Nukunau, Tabateua, Nonouti, Aranaka, Kuria, Abamana, Marana, Tarawa, Butaritari, Makin, Abaian, and Mafakei), and the Ellice Group of nine islands (Nukulatai, Funafuti, Mukufelau, Nui, Nuŕte, Nanomaga, Nanomea, Oitapu and Nurakita). The total area of the Protectorate is about 166 sq. miles, with a population of about 35,000, and 80 Europeans. Revenue, 1899 £2,600; expenditure, £2,204; imports, £22,614; exports (chiefly copra), £55,000.

Resident Commissioner, W. Telfer Campbell. £400

(3) *The Tonga or Friendly Islands*. By the Anglo-German Agreement of 1899, the claims of Germany on this Group and of Great Britain on the Samoan Archipelago were withdrawn and a protectorate over the Tonga I-land and also over *Niue*, or *Savage Island*, was proclaimed 19 May, 1900.

These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and 20,000 inhabitants. The limits of the group are between 15° and 23° 30' south, and 173° and 177° west, and it consists of three divisions, called Tongatabu, Haapai, and Vavau. At the former is the seat of government, the king being Jioaji Tubou II., who was born 18 June, 1874. Soil gene-

rally is fertile; the principal exports are copra, green fruit, kava, and whale oil. Most of the imports come from British ports, whilst the majority of the export trade is shipped in foreign bottoms.

The imports in 1899 amounted to £35,175, and the exports to £39,464 the share of British Colonies being £29,000 and £13,182 respectively.

Deputy Commissioner & V.-Cons., R. B. Lefeé £440

(4) *The Phoenix Islands*, seven in number (Wilkes, Gardner, Birnie, Hull, Enderbury, Phoenix, and Sidney) between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *The Union, or Tokelau, Group* of six islands and some islets (Quiros, Fakaafo (3), Nukunono, and Atafu).

(6) There are also a large number of scattered groups and isolated islands.

The functions of the High Commissioner, in addition to the government of the Protected Islands, are to carry out the provisions of certain Acts of the Imperial Parliament and the Pacific Order in Council, 1893. The New Hebrides and various other small groups come under his jurisdiction.

Totals ...	£240,389,000	£55,976,000	£283,034,000	£588,054,000	£523,425,000	£644,030,000

The figures given in the above table are based mainly on Returns prepared by the Director of the United States Mint and published in his annual Reports. Under "British Empire" are included Australasia, Great Britain, Canada, British Guiana, British India, and Africa. The mines of the Transvaal Colony from 1889 to 1898 produced about £69,000,000 or 18·7 per cent. of the total

gold output of the world, and the increase under "British Empire" in recent years is mainly attributable to those mines.

Gold has been valued in the table at the legal rate of £3 17s. 10½d. per troy ounce standard, and silver at its coining value in this country, namely 5s. 6d. per troy ounce standard.

Greater Britain: The West Indian Colonies. 523

THE West Indies are an immense number of islands and islets, some of them mere rocks, extending from 10° to 27° North, and from 59° 30' to 85° West. They are divided by geographers into (1) the Bahamas, (2) the Greater Antilles, and (3) the Lesser Antilles, of which the last named are subdivided into the Leeward and Windward Islands. The islands lying off the coasts of South America and Central America respectively form two separate groups in addition to those already mentioned. The total area of the West Indies is probably about 95,000 square miles, of which the Greater Antilles occupy not less than 83,000 square miles. The prevalent character of the islands is bold and mountainous. The highest points are about 8,000 feet above the sea-level, and several of the islands contain active volcanoes, while nearly all of them show signs of volcanic action. The mean yearly temperature of the islands is about 78°, but that of the higher lands is often much less. The seasons alternate from drought to moisture, and in most parts of the archipelago there are two wet and two dry seasons. On the whole it may be said that the climate is generally healthy, and between the months of November and May in many of the islands it is delightful. The vegetable productions are both varied and abundant, the principal articles of commerce including sugar, bananas, oranges, coffee, cocoa, cotton, pimento, nutmegs, indigo, tobacco, maize, guava, ginger, cocoa-nuts, annatto, aloes, sassafras, the castor-oil tree, cabbage-tree, and medicinal drugs. Of the more common fruits there are the pine-apple, pomegranate, cocoa-nut, oranges, lemons, limes, citrons, the mango, shaddock, papaw, banana, and plantain. Yams, sweet potatoes, and manioc also grow freely. The mountains in the greater islands furnish a varied abundance of timber, including mahogany, cedar, lignum-vitæ, iron-wood, Indian-fig, well adapted for cabinet-work, shipbuilding, and other arts. Indian corn yields abundant crops almost everywhere, and rice in the island of Trinidad. The total population is nearly 4,000,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The islands at the time of their discovery, were inhabited partly by the Caribs, a fierce and warlike race, and partly by a less savage race known as the Arrowauks; but both these native Indian races are now practically extinct. By far the largest of the West Indies are the magnificent islands of Cuba and Hispaniola.

The first spot on which Columbus landed in the New World in 1492 was San Salvador, one of the Bahamas. On the same voyage Cuba and Hispaniola were discovered, and the other islands very shortly afterwards. For some time the West Indies remained in the undisputed possession of Spain, subject only to occasional visits from French and English ships. At the commencement of the 17th century, however, the English, French, and Dutch began to form settlements, and to import negroes from West Africa to work the plantations; and whenever war broke out in Europe it spread to the West Indies. They are now divided as follows:—*British*: Jamaica, Turks and Caicos Is.; all the Bahamas; Antigua, Montserrat, Nevis, St. Christopher, Dominica, the Virgin and the Cayman Islands, Grenada, St. Vincent, St. Lucia, Barbados, Trinidad, Tobago (which is now a ward of Trinidad); and the islands off the coast of British Honduras. *Spanish*: Isle de Pinos, Bieque, and Culebra. *French*: Martinique, Guadeloupe, Deseada, Marie Galanta, Les Saintes, St. Bartholomew, and St. Martin (the last partly Dutch). *Dutch*: St. Eustatius, Saba, Bonaire, Curaçao, Aruba. *Danish*: Santa Cruz, St. Thomas, St. John. *U.S.A.*: Cuba and Puerto Rico. *Venezuelan*: Coche Cuagua, Tortuga, and Margarita. *Independent*: Hispaniola, divided into Hayti and San Domingo. The British Islands have an area of about 13,750 square miles, and a population of 1,350,000. In 1898 a most disastrous hurricane swept over the group of islands, almost all of which were affected, while St. Vincent, Barbados, St. Lucia, and Trinidad were practically devastated. On August 7th, 1899, a further hurricane devastated the island of Montserrat, doing damage also to St. Kitts, Nevis, and Antigua. The island of Puerto Rico (U.S.A.), Guadeloupe (French), and Santa Cruz (Danish) also suffered severely. Relief Funds were opened at the Mansion House, London, in 1898 and 1899, and sums of money were also received from parts of Greater Britain. A Parliamentary Grant-in-aid, to the amount of £65,000, was made in the Supplementary Estimates for the Civil Services, and under the Colonial Loans Act, 1899, certain sums were advanced to cope with the depression which the distress following upon the hurricanes had so greatly increased.

Domestic imports from United Kingdom, 1899:

Apparel, &c.	£213,403	Machinery	£51,879
Cottons	492,929	Metals	110,593
Leather	96,634	Woollens	78,927
			£1,922,755

Total exports to United Kingdom, 1899:

Cocoa	£442,366	Rum	£138,963
Coffee	75,071	Suices	135,376
Dye-Woods	23,672	Sugar	419,958
			£1,517,331

JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 32' North lat. and 76° 11'—78° 21' W. long. It is the largest and the most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,193 square miles, and a population, in April, 1891, of 639,491, showing an increase during the previous decade of 58,687; in 1891 the whites numbered 14,692; coloured, 121,955; blacks, 488,624, and there were a number of Coolies and Chinese. The estimated population on March 31, 1900, was 745,104.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Western Peak of the Blue Mountains, an elevation of 7,350 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 185 miles of railway open. Telegraph stations and post-offices are established in every town and in very many villages; the number of accounts open in the savings banks was 32,850 (1900). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the United States. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the senior military officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex-officio*), and of such other persons, not exceeding 10, as the Queen or the Governor may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, with Port Royal, the naval station, pop. 46,542; the next in importance are Spanish Town, pop. about 5,000, and Montego Bay, 4,803.

Under the Colonial Loans Act the sum of £453,000 was allocated to the Colony; of this amount £190,000 was advanced in aid of revenue;

£190,000 for railway purposes; £40,000 for waterworks, and £65,000 for public works.

TURKS AND CAICOS (Cayos or Keys).

These islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1874 they were annexed to Jamaica, from the north-west of which they are distant about 430 miles. They have an area of about 223 square miles. The population in 1891 was 4,744, of which the principal island, Grand Turk, contains 2,500.

A Commissioner administers the affairs of the Settlement, assisted by a Legislative Board. This Board has sole control of local finance, and passes local ordinances; but the supreme legislative body is the Legislative Council of Jamaica.

THE BAHAMAS,

a chain of islands lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long. The group consists of about twenty inhabited islands, and an

* The Government of Jamaica publishes annually a Handbook of the island, full of information respecting the history and personnel of the island.

immense number of islets and rocks, comprising an area of about 5,794 square miles, and a population in 1895 of 50,599, the most part being whites, and the rest descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Mayaguana, Harbour Island, Great Inagua, and Andros Islands. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the Peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1899 were valued at £84,003. The fruit trade, principally with the United States, is also important, the total value of pineapples exported in 1899 being £28,315; bananas, coconuts, tomatoes, and other fruit and vegetables are also exported. Mahogany, lignum-vitæ, mastie, iron-wood, ebony, logwood, and satinwood are found throughout the islands; tobacco, castor-oil plants, and cotton flourish, but enterprise is lacking to encourage these industries. The fibre industry may now be considered as fairly established, the estimated land under cultivation of the fibre plant being about 20,000 acres. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a Legislative Council of 9 members, and a Representative Assembly of 29 members.

THE LEEWARD ISLANDS.

The Leeward Islands under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis; with Anguilla; (3) Dominica under Administrators; (4) Montserrat; and (5) the Virgin Islands, each having their own local legislature. These five presidencies make up the colony of the Leeward Islands, which is administered by a Governor, to whom the Administrators and Commissioners are subordinate, and which has also a general Legislative Council possessing concurrent legislative powers with the local Legislatures on certain subjects. The federal colony in 1891 contained 127,723 inhabitants (58,780 males and 68,943 females). The General Legislative Council consists of 8 *ex-officio* and 8 elective members with the Governor as President.

(1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6' N. lat. and 61° 45' W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 20,000 are under cultivation. The population (with Barbuda) in 1891 was 36,699, including 17,124 males and 19,575 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands. It is almost entirely given up to the cultivation of sugar, the export amounting to £101,106 in 1897; but it also exports rum, molasses, tamarinds, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

	1898.	1899.
Public revenue	£39,663	£42,821
Expenditure	55,586	51,479
Public debt	137,471	137,271
Imports	43,829	109,036
Exports	79,178	128,095

CAPITAL, St. John's, population 10,000.

President & Island Sec. (the Col. Sec. of the Leeward Islands), Sir George Melville, K.C.M.G. ...	£50
Treasurer, W. D. Auchinleck	500
Magistrate, W. H. Whyham	400
Do., G. C. Evelyn	400

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 45' W. Area, 75 square miles. Population, 580. The island is flat and fertile, producing corn, pepper, and tobacco. It was formerly a possession of the Codrington family.

Magistrate, (vacant) £150
 Redonda, ■ small island with a phosphate industry, has ■ population (1891) of 120.

(2) ST. CHRISTOPHER (ST. KITTS) AND NEVIS (WITH ANGUILLA).

These two islands, with their dependency of Anguilla, were severely visited by the hurricane of 1899. They were united in 1882 to form one presidency, and taken together they had a population (1891), of 47,662. St. Christopher, popularly called St. Kitts, is situated in lat. 17° 18' N. and long. 62° 48' W., about 46 miles to the west

of Antigua: it comprises an area of ■ square miles, its greatest length being 28 miles, and greatest breadth about five and a half miles. It is one of the most effectively cultivated sugar islands in the West Indies, ■ continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to ■ height of nearly 4,000 feet. Sulphur is found in the mountains, but is not made an article of commerce.

CAPITAL, Basseterre, population (1891), 9,097 (males 4,110, females 4,987).

Nevis (separated from St. Kitts by a strait some 3 miles wide) is but ■ single mountain rising 3,200 feet above the sea, and has an area of 50 square miles, with a population in 1891 of 13,087. Sugar, rum, and molasses are the only exports, but some proprietors have extensive plantations of the lime, and coffee is being grown. Chief town, Charlestown. Population (1891) 838.

Anguilla (or *Little Snake*) is about 60 miles N. W. of St. Kitts, 16 miles in length, and varies in breadth from 3 to 1½ miles, containing an area of 35 square miles. Population, 1891, 3,699, of whom hardly any are white. Salt, obtained from a small lake in the centre of the island, and phosphate of lime are the principal productions, besides cattle and garden stock.

(3) DOMINICA,

The largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 16 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 55,000 acres are cultivated, the major part being difficult of access. It is of volcanic origin and very mountainous and picturesque, abounding in rivulets well stocked with fish. Sulphur, thrown out of the *soufrières*, is very plentiful; and good game is abundant. Land may be purchased at about 10s. an acre. Population (1891), 25,841 (males 12,059, females 14,782). The natives still speak ■ French patois, resulting from their former connection with France. The soil is good and the principal productions are cocoa, sugar, coffee, molasses, rum, lime-juice, fruit, spices, and cabinet woods. The climate varies greatly according to the altitude: on the high lands it is excellent, but in the lowlands and the coast districts the mass of vegetable matter of various kinds keeps it unduly moist. There is a Legislative Council, consisting of 6 official and 6 non-official members nominated by the Governor. The principal town is Roseau, on the south-west coast; population (1891) 5,186.

(4) MONTSERRAT.

which was almost entirely devastated by the hurricane of Aug. 7, 1899, is situated in 16° 45' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, and in 1891 a population of 11,762 (5,331 males, 6,431 females). It was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles: it contains an active *soufrière* and several hot springs. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown, the Montserrat company having the principal plantation. Sugar is the crop of greatest importance, the export in 1897 reaching £5,087, but there are no first class sugar estates. The chief town is Plymouth, with a population (1891) of 1,475.

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and Denmark, form a connecting link between the Greater and Lesser Antilles. They form a thickly studded archipelago of islands and rocks, the majority of which are mountainous. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1891 was 4,639. There is good pasturage for cows, sheep, and goats. Sugar and cotton are raised in small quantities, and fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Roadtown, on the south side of Tortola; population (1891) 403.

	1898.	1899.	1898.	1899.
Revenue.....	£1,715	£2,984;	Expend. £1,783	£2,220

Commissioner & Treasurer, N. G. Cookman.....	300			

THE WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian islands includes Barbados, St. Lucia, St. Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. There is one governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. There is a Court of Appeal, consisting of the judges of the three colonies and of Barbados, a common

Audit, and a common Lunatic Asylum; but, with this exception, each island retains its own institutions, and in the governor's absence is governed by an Administrator subordinate to him. The aggregate population (1891) was 135,976; and the total area 508 sq. miles.

Governor and Commander-in-Ch., Sir Robert Baxter Llewellyn, K.C.M.G. £2,500
Private Secretary, E. H. M. Drury 275
Aide-de-Camp (vacant).

Transit, about 14 days. Telegrams, per word, Grenada, 4s. 8d.; St. Lucia, 4s. 6d.; St. Vincent, 4s. 7d.

GRENADA (AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30'—11° 58' N. lat. and 61° 20'—61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 58 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. It contains about 85,120 acres, of which about 20,418 are cultivated, and population (including some of the Grenadines) of 53,209 (1891). The country is mountainous and very picturesque, and the climate is healthy. The Grand Etang, a lake on the summit of a mountain ridge about 1,740 feet above the level of the sea, and Lake Antoine, are the most remarkable natural curiosities; near the former is sanatorium, under Government auspices, has been established. Grenada was discovered by Columbus in 1498, and named Conception. The colony was founded by the French in 1650, and surrendered to the British in 1762; in 1779 it was retaken by the French but in 1783 it was ceded by the Treaty of Versailles to Great Britain, in whose possession it has since remained. The soil is very fertile, and cocoa, spices, sugar, rum, cotton, coffee, and large quantities of fruit are grown. The export of cocoa (or cacao) was 79,472 cwts. (value £234,611) in 1899, and of nutmeg 4,329 cwts. (value £18,382) with 675 cwts. of other spices (value £3,379). The forests are rich in many valuable timbers, particularly bullet wood, locust, mahogany, white cedar, and galba; and vanilla and several varieties of gum-yielding trees are indigenous. Turtle are caught and exported, and whales are met with, especially among the Grenadines. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1898.	1899.
Public revenue	£62,875	£68,757
Expenditure	57,612	59,359
Public debt	127,670	127,570
Total imports	210,783	226,829
Total exports	257,274	267,738

Colonial Secretary, Edward Rawle Drayton ... £600
Treasurer and Postmaster, C. Falconer Anton 450
Chief Justice, Charles James Tarring 1,000
Attorney-General, Leslie Probyn 700
Registrar, John S. Martin 400

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1891) 6,031.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58'

W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent and 21 miles S.E. of Martinique, is 24 miles in length with an extreme breadth of 12 miles; it comprises an area of 233 square miles, with population (in 1899) of 48,650. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are—Sugar (8,935,624 lbs. in 1899), molasses, cocoa—which is now being extensively cultivated—fuel and sticks. St. Lucia at present stands alone amongst British sugar islands in having inaugurated the Central Factory system of sugar-growing. The chief places are Castries, the capital (pop. 1891, 8,000), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W. I., is the second naval station of the empire in these parts, and a coaling depot. In 1899, 477 steamers (tonnage, 626,274) entered Port Castries, and many British and foreign war ships coaled.

Administrator & Col. Sec., Sir Harry Langhorne Thompson, K.C.M.G. (and allowance £200)..... £800
Treasurer, (vacant) 500
Chief Justice, Arthur Child 700
Attorney-General, E. G. Bennett..... 400

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 37' W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 square miles, and a population (in 1891), including dependencies, of 41,054. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are sugar, molasses, rum, arrowroot, cassava, cocoa, coffee, cotton, and spices. The St. Vincent arrowroot has a specially good name in London. Its chief imports are linen, cotton, and woollen manufactures, American flour, fish, &c. The upset price of Crown lands is 20s. per acre, cash, or £2 if spread over 5 years, and steps are being taken to settle the labouring classes on lands specially acquired for the purpose. CAPITAL, Kingstown (pop. 1891, 4,547). Under the Colonial Loans Act (1899) the sum of £50,000 was advanced to aid in the development of the resources of the island; a free grant of £25,000 was also made in the same year.

	1897.	1898.
Public revenue	£25,396	£27,361
Expenditure	26,520	27,674
Total imports	70,824	95,551

Chief Justice & Vice-Chan., and Police Magistrate of Kingstown, J. B. Walker 800
Attorney-Gen., C. Ormond Hazel

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4' N., and longitude 59° 37' W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population in 1899 was estimated at 192,000, being about 1,150 to the square mile. The principal exports are sugar, molasses, and rum, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. The island is the headquarters of H.M. forces in the West Indies, and a station of the West India and Panama Telegraph Company; there is a railway across the island, a tramway through town and suburbs, and telephonic communication throughout the island. The deposits in the savings bank on Dec. 31, 1899, were £223,417. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members elected yearly on the basis of a moderate franchise. The CAPITAL and port is Bridgetown (pop., 1891, about 21,000), on the shores of an open roadstead known as Carlisle Bay.

TRINIDAD AND TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3'—10° 50' N. lat. and 61° 39'—62° W. long., and is about 55 miles in length by 40 in breadth, with

an area of 1,750 square miles (200,000 acres cultivated), and an estimated population (1900) of 269,000. The island was discovered by Columbus in 1498. The island was colonized in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, "Port of Spain," is one of the finest towns in the West Indies. Other towns of importance are San Fernando (pop. 6,570), about 30 miles south of the capital; Princetown (pop. 4,197), and Arima (pop. 3,653). A remarkable phenomenon is the pitch lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1899, 140,000 tons (£153,000) were exported. The soil is rich and productive, its most important products being sugar, cocoa, molasses, rum, and coco-nuts, and various kinds of timber and fruits. The chief exports (1899) were:—Sugar, 52,000 tons; rum, 140,000 gals.; molasses, 1,591,408 gals.; bitters, 38,843 gals.; and cocoa, 33,942,048 lbs. Coal is found in Manzanilla, and is indicated in other parts of the island. There are 81 miles of railway open, and harbour improvements, water-works and sewage operations are being undertaken. The island is crossed by the telegraph wire of the West India and Panama Company, and by Government telegraph and telephone wires. Thirty-two steamers from Europe arrive every month, and four from the United States and Canada. The Government is vested in a Governor, Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899 it was constituted a ward of that island. It is between 11° 9' N. lat. and 60° 43' W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long and from 6 to 7½ broad, and has an area of 114 square miles, with a population (31st Dec. 1891) of 18,692. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°.

There are two towns in the island, viz., Scarborough (population, 1,370) and Plymouth.

Insp. of Schools, R. G. Eushe, M.A. 700

CAPITAL, Port of Spain, pop. 45,000. Transit, 31 days. Telegrams, per word, 5s. 3d.

THERE are two leading groups of British Colonies in Africa:—the South African colonies, which occupy the southern extremity of the continent, and are generally healthy and well adapted for European settlement; and the West African colonies, situated upon the tropical, fever-stricken coast to the north of the Equator. There are also the island of Mauritius and its dependencies, which are usually regarded as belonging to Africa, and the islands of Ascension and St. Helena in the Atlantic. And, besides the colonies, there are now large portions of the continent under British protection, viz., the Protectorates of Northern and Southern Nigeria, the Lagos Protectorate, and the Sierra Leone Protectorate on the West Coast; those of the East Africa Protectorate upon the East Coast; the British Central Africa Protectorate; the Uganda Protectorate, the Zanzibar Protectorate; the Witu Protectorate; the Bechuanaland Protectorate; and the territories of the British South Africa Company generally known as “Rhodesia.” A portion of the Somali coast is a British Protectorate, and is administered by the Foreign Office; while the Port of Aden in Arabia and the Island of Socotra, also British, are comprehended in the Empire of India (see p. 490).

SOUTH AFRICA.

The South African Colonies are the Cape Colony, Natal, Basutoland, the Orange River Colony, and the Transvaal Colony; and Her Majesty exercises a Protectorate over part of Bechuanaland, and the territories of the British South Africa Company. The first among the colonies in wealth and importance is the great self-governing colony of the Cape. Further along the coast to the north-east is the self-governing colony of Natal, which, since Dec. 30, 1897, includes the former Crown Colony of Zululand and the territory of Amatongaland, which extends to the Portuguese territory of Delagoa Bay. To the west of Zululand, extending for some 400 miles from north to south and about the same distance from east to west, is the Transvaal Colony, annexed in 1900, and between it and the Cape Colony are the Orange River Colony and the small colony of Basutoland. Upon the west and north, is a British Protectorate, extending westward to the boundary of the German Protectorate. Upon the north, the interior as far as the Lakes Moero, Tanganyika, and Nyasa is also under British protection. To the west of the 20th meridian the whole country from the Orange River to the Cunene River, with the exception of the Walfisch Bay territory, which forms part of the Cape Colony, is under the protection of the German Empire. The eastern coast from Delagoa Bay northwards to Cape Delgado belongs to Portugal.

The total area of the British Colonies, excluding territory which is only protected, is more than 475,000 square miles. The white population as at the 1891 census was, Cape Colony, 376,987; Natal, 46,788; Bechuanaland, 5,211; Basutoland, 578; and the total white population of the British South African Colonies in 1900 was nearly 1,000,000.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Dutch East India Company took possession of the shores of Table Bay, established a fort, and occupied the lands adjacent, in order to be always ready with supplies for their passing ships. Until 1796 the Cape remained in the hands of the Dutch, when it was captured by an English force; but in 1803 it was restored to the Batavian Government. In 1806 it was for the second time occupied by a British force, and at the general peace of 1814 it was formally ceded to the British Crown.

The history of the subsequent expansion of the Colony, and the formation of the various States and Colonies which have grown out of it, will be found under the separate headings.

The long and patient efforts of Her Majesty's Government to secure by negotiation with the Government of the South African Republic the equitable treatment of the very large population of “Outlanders,” principally British, resident within the South African Republic, came to an unsuccessful conclusion in October 1899. Earlier in the year it had been found necessary to provide for possible eventualities by strengthening the British forces at the Cape and in Natal. On October 7th the Reserves were called out; on the 10th an Ultimatum was received from the Transvaal Government demanding the recall of the British troops stationed near their frontiers, and also of any that were at that date on the way to South Africa. The period fixed for the acceptance of the terms of this

communication having expired, a state of war began at 5 P.M., Transvaal time, on October 11th. On the following day Natal was invaded by the South African Republic Boers, acting in co-operation with the Boers of the Orange Free State, the Government of which had a short time previously notified their intention of throwing in their lot with their neighbours on the North. Very shortly after the opening of hostilities an Army Corps, under the command of General Sir Redvers Buller, F.C., was despatched to the scene of action, and at the close of December, 1899, the operations had assumed such extensive proportions that Field Marshal Lord Roberts of Kandahar, F.C. was sent out in chief command of the considerably enlarged forces which eventually exceeded 200,000. The Commander-in-Chief despatched General French to the relief of Kimberley, which had been closely invested. The relief was effected on 15th February, 1900, almost the whole of the investing force being captured. General Buller relieved Ladysmith, sorely pressed by a siege of 120 days, on 28th February; and on 17th May, a flying column under Col. Mahon, D.S.O., broke through the cordon surrounding Mafeking where Col. Baden-Powell with a small mixed garrison had defied all hostile efforts since 15th December, 1899.

On 14th March, 1900, Bloemfontein was occupied, the Orange Free State being annexed by Proclamation, 28th May, 1900, under the title of the Orange River Colony; and on 31st May and 5th June, Lord Roberts entered Johannesburg and Pretoria in the South African Republic, which territory was formally annexed as the Transvaal Colony on 25th October, 1900. The ex-Presidents of the two Republics have each left their country, Ex-President Kruger of the South African Republic having found an asylum in Europe, and ex-President Steyn of the Orange Free State leading a nomadic life in the South African Republic. At the time of writing military operations were still in progress against isolated bands of the enemy, and Lord Roberts was still present as Commander-in-Chief.

The main geographical feature of South Africa is the great mountain range which begins near the Orange River, and stretches for more than 1,000 miles, right through the Cape Colony and Natal, towards the north-east. Its direction coincides with that of the sea-coast, from which it is never more than from 100 to 150 miles distant. Viewed from the seaward side it is a veritable mountain range, rising in places to the height of 10,000 ft.; but when surmounted it is seen to be properly but the broken edge of the great table-land, between 3,000 and 4,000 ft. high, which occupies the whole of the interior of South Africa. From the mountains to the sea the ground descends, not regularly, but by a series of terraces or steps; and, as the British possessions also extend for some miles from south to north, the differences of elevation and latitude produce in them many varieties of climate. As a general rule, South Africa is dry and well suited to Europeans. It is also suitable to the members of the great Bantu family, to which the Kafirs, Zulus, Bechuanas, Hereros, and other tribes now inhabiting South Africa belong. These tribes have been gradually coming down by land from the north-east, while Europeans have been coming in by sea from the south; and between the two invading streams the aboriginal Hottentots and Bushmen have been almost crushed out of existence. The Bantus have shown no signs of dying out from contact with civilization; and in comparing South Africa with Canada or Australia as a field for colonization, it must always be borne in mind that in South Africa there are three distinct elements in the population—the Dutch, the British, and the Kafir or (as it is usually, though not quite correctly, termed) Native, element. To reconcile the divergent interests of these separate elements, and to secure that the whole population shall live peacefully together, is the great problem of South African administration.

POSTAGE.—The Cape Colony and Natal entered the Postal Union on Jan. 1, 1895, and the postal rate is 2½d. the half ounce to and from all countries outside the British Empire. To and from the United Kingdom, and British Colonies, the rate is 1d. the half-ounce.

CAPE COLONY.

The CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S.W. extremity of the continent of Africa; but the extensive colony of that name, in which are now included the Diamond Fields, the Transkei territories, Bechuanaland, and Pondoland, is washed by the Atlantic and Indian Oceans on the west and south and south-east, while upon the north and north-east it is bounded by the German Protectorate and each of the other colonies and states of South Africa. It reaches

in S. lat. from 26° to 34° 50', and in E. long. from 16° 25' to 30°. Its extreme length from E. to W. is nearly 600 miles, and its breadth 450 miles, with a coast-line of nearly 1,200 miles, and an area of 277,151 square miles, or 177,376,666 acres, according to the latest estimate (1899), of which 48,695,897 acres were not disposed of in 1899. The territory of Walfisch Bay on the west coast is also a portion of the colony. The principal events in the history of the colony since it came under British rule have been the following:—Introduction of

British settlers into the eastern districts as a barrier against the Kafirs, 1820; first Kafir war, 1834; commencement of the trekking of the Dutch Boers, which resulted eventually in the colonization of Natal and the Free States, 1836; second Kafir war, ending in the extension of the boundary to the Kei River, 1847; introduction of representative government, 1853; first diamond discovered, 1867; Griqualand West proclaimed a colony, 1871; introduction of responsible government, 1872; Gaika and Gcaleka rebellion, 1877-8; Basuto war, 1879-81; amalgamation of Griqualand West with the Colony, 1880; separation of Basutoland from the Colony, 1883; establishment of German Protectorate on the west coast to the north of the Orange River, 1884; incorporation of all the Transkeian territories, except part of Pondoland, with the Colony completed, 1885, annexation of Pondoland, 1894, and Bechuanaland, 1895. In 1899 a fresh crisis in the history of the Colony was reached by the declaration of war by the Presidents of the Transvaal and Orange Free State against British rule in South Africa.

The Colony is divided, geographically, into two parts by the main range of mountains, which, as already mentioned, follows the line of the South African coast at a distance of 100 to 150 miles from the sea; and the southern portion is divided again by two other ranges which run across from W. to E., and are not quite so high as the first. Between the mountains and the sea, in the south-western portion of the Colony, are the chief grain and wine producing districts; in the south there are extensive forests; and along the south-eastern coast, where there are summer rains, tobacco and maize are successfully cultivated. Between the two upper ranges of mountains is an elevated tract known as the Great Karroo, which extends from W. to E. for 300 miles, and has a breadth of 70 miles. During a great portion of the year the Karroo is, as its name implies, a dry and barren district, but after rain it is covered with luxuriant vegetation, and supports countless flocks of sheep and many cattle and horses. It is here also that the important industry of ostrich-farming is carried on. The country to the north of the mountains is still more elevated, forming part of the great South African table-land. It supports, like the rest of the Colony, large numbers of sheep, and contains the chief mineral districts. The rivers of South Africa are numerous, but practically useless for either irrigation or navigation. Most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are mere shallow torrents, even the largest having only sufficient water for the smallest craft, or bars at their mouths which render entrance both difficult and dangerous. The climate is healthy, and its peculiar dryness and the uniformity of the temperature cause it to be much favoured by Europeans suffering from pulmonary complaints. The vegetation of South Africa has a peculiar and distinctive character; flowers of great variety abound everywhere. The principal native flora are heaths, proteas, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which are several species of aloe. The native animals are either disappearing altogether or retreating northward owing to the rapid spread of civilization. But elephants and buffaloes are still found on the south coast, and springboks abound.

The Population of the whole Colony (Census of 1894) was 1,527,224, of whom the Europeans or whites were 376,987 (not including the population

of Pondoland, *circ.* 200,000, and Bechuanaland, *circ.* 76,000, 1897). The birth-rate of the Colony Proper (*i.e.*, excluding Native Territories) was 34'13 per 1,000, and the death-rate 2'73 per 1,000 in 1899. The Dutch preponderate in the western, and the English in the eastern, districts.

Education.—The number of schools in operation (1899) was 2,450, attended by about 105,972 children. The expenditure under the Education Vote in 1899 was £270,758.

Commerce and Industry.—The principal industries are the production of wool and wine, and the rearing of horses, cattle, and ostriches, but great attention is paid to the culture of wheat, barley, and oats. The external trade amounted in 1899 to £15,370,971 for imports (textiles, £3,941,038; food stuffs, £3,704,745; and building materials, £1,876,459) and £2,247,253 for exports (animal and vegetable substances, £4,299,915; minerals and metals, £14,463,735; and diamonds, £4,135,583).

Minerals, &c.—There are important mines of copper in Namaqualand, the ores being of the richest kind, and yielding a percentage of from 32 to 36. Gold is found in the Knysna and Prince Albert divisions, and manganese in the Paar. Coal is also raised of considerable value, the output in 1899 being 208,655 tons. But by far the most valuable export is that of diamonds, which are chiefly found at Kimberley. This town was besieged by the Boers in 1899-1900 and bravely defended by the garrison under Lt.-Col. Kekewich (Loyal N. Lanc. R.) from October, 1899, until relieved by Gen. French on 15 Feb., 1900.

Railways.—The railways are mostly the property of the Government, which on Dec. 31, 1899, owned and worked 1,990 miles. There are also 653 miles of privately owned railways worked by Government, and 224 miles privately owned and worked; in addition to which 289 miles are under construction for private companies. The Cape to Cairo Railway scheme places Capetown in communication with Buluwayo, the commercial centre of Rhodesia. To the 31st Dec., 1899, the capital expended by Government was £20,930,573, in which amount is included the money expended upon the Kimberley line. The returns for 1899 show a profit of £4 12s. 7d. per cent. per annum on the capital expended. There are 7,360 miles of telegraph open, carrying 22,083 miles of wire.

Defence.—The Colonial Forces in December, 1898, consisted of Cape Mounted Riflemen (1,003 officers and men); and horse and foot volunteers (6,953 officers and men). There is also a body of Mounted Police with about 1,900 officers and men. In cases of emergency every able-bodied man between 18 and 50 years of age may be called upon to defend the Colony, and there is a large Imperial garrison stationed at Capetown. For external purposes a Cape and West African Squadron is stationed in these waters, having a naval depot in the Colony at Simon's Bay.

Extensive harbour works are being constructed at Table Bay (Capetown), Port Elizabeth, and East London. On the works at Table Bay alone no less than £2,800,716 has been spent up to 31st December, 1899, and further works are in progress. There are electric tramways in Capetown, Port Elizabeth and East London.

The Colony is under responsible government. There is a Governor appointed by the Crown, a Legislative Council of 23 elected members, and a House of Assembly of 95 elected members. The Ministers comprised in the Cabinet, who are responsible to the Colonial Legislature, are the Colonial Secretary, the Secretary for Agriculture, the Commissioner of Public Works, the Treasurer (Premier), and the Attorney-General.

BASUTOLAND.

Basutoland is an inland colony, being completely hemmed in by the Cape Colony, the Orange River Colony and Natal. It lies between 28° 45' and 30° 40' South latitude and 27° and 29° 30' East longitude, and has a computed area of 10,293 square miles. The population in 1891 was 218,324 natives and 578 Europeans; the latter are not allowed to settle without special permits (estimated pop. 1896, 250,000).

The territory is well watered, and enjoys a delicious climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basutos to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakersberg chain, occupy most of the country, which is elevated, broken, and rugged. The Basutos were first formed into a single tribe by a chief named Moshesh, about 1818. In 1852 they fought against the British Government and were defeated, but their country was not annexed. In 1856 disputes, resulting in hostilities, arose between Moshesh and the Orange Free State. In 1868, the Basutos, being hard pressed by the Free State, were saved from destruction by being taken under British protection. In 1871 their country was annexed to the Cape, but was not made subject to the general law of the Colony. Nine years later, owing to the extension to Basutoland of a Cape Act providing for a general disarmament, the whole tribe rebelled, and, after much negotiation, it was arranged that the Imperial Government should take over the country, receiving a subsidy of £20,000 (reduced to £18,000) from the Cape Government towards the cost of the administration. This arrangement was carried out in 1884, and Basutoland thus became a separate Colony. Basutoland entered the customs union in 1891, and a share of the dues is paid over to the Cape as a set-off against their contribution.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The Revenue arises from the Cape contribution, the Post-

office, native hut-tax, and the sale of licences. Telegraph offices have been opened at Leribe, Teyateyaneng, Maseru, Merija, Mafeteng, Mohales' Hoek and Quthing in connection with the Cape Colonial system. There are 177 schools, with 11,124 scholars, nine-tenths being in the schools of the French Protestant Mission. There are two small Government schools, and grants-in-aid to the extent of £4,338 were made in 1899-1900.

The chief articles of export are grain, wool and cattle, the imports being chiefly blankets, hardware and groceries.

THE BECHUANALAND PROTECTORATE.

The Protectorate is bounded on the east by the Transvaal Colony and Matabeleland, on the south by Cape Colony, on the west by German South-West Africa, and extends northwards to the northern boundaries of the Bamangwato territory. It is about 400 miles long and 450 miles broad, and its area is about 400,000 square miles.

The climate is healthy, but there is a great scarcity of water, and much of the country is thick bush. The natives have suffered much from the rinderpest and a bad harvest, and cattle-raising, the chief industry, has been almost entirely checked in consequence. The exports consist mainly of maize or mealies, wool, hides, cattle, and wood, for the Kimberley market. The local revenue is derived chiefly from customs, and the greater part of the expenditure will be met by a special grant-in-aid.

The High Commissioner (Cape) has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner and two Assistant Commissioners. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakathla), of Sebele (Bakweni), of Bathoen (Bangwaketsi), and of Ikaneng (Bamalete).

The railway from Kimberley to Vryburg and Mafeking has been opened for traffic as far as Buluwayo, Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *via* Gaborones, Palapye, Tati and Macloutsie to Buluwayo and Salisbury.

The chief European centres are Gaborones, Palapye and Tati.

Governor, Sir Alfred Milner, G.C.M.G. (Governor of Cape Colony).

THE TRANSVAAL COLONY.

This Colony, formerly known as the "South African Republic" or "The Transvaal," was annexed by Royal Proclamation of 23th October, 1900. The Transvaal was founded in 1840 by Boers who, dissatisfied with British rule, had migrated from Cape Colony, and its independence was recognised by the British Crown in 1852. In 1877, when Sekukuni had defeated the Boers, and it was feared that the whole of South Africa might become involved in a disastrous native war, Sir Theophilus Shepstone was despatched to the Transvaal. He found the public treasury empty, and the country in a state of anarchy; to save it from further disaster he proclaimed it British territory, but on Dec. 16, 1880, at Heidelberg, the Boers rose in revolt, and the flag of the Republic was once more hoisted, a provisional government or triumvirate (Krüger, Joubert and Pretorius) being formed, and after the battle of Majuba Hill (Feb. 27, 1881) the United Kingdom once more recognised its practical independence in a Convention, which was modified in 1884. Owing to the rupture in October, 1899, the country reverted to the status it held previous to the Convention of 1881.

The larger portion lies to the west of the Drakenberge (Mt. Mauch 8,725 feet) and slopes down to the Limpopo river and Bechuanaland; a smaller section lies to the east of that range towards the Indian Ocean, and along the greater part of its eastern frontier is closed in by Portuguese territory from having direct access to the sea. The area (including Swaziland, 5,560 sq. miles) amounts to 119,200 sq. miles; the population before the war was about 750,000, of whom only 150,000 were whites. The latter included 63,000 Transvaal Boers and 87,000 Uitlanders, 80 per cent. of whom are probably British subjects. In 1896, 451,801 natives paid the hut-tax.

Steppes and bush predominate and favour pastoral industries, whilst agriculture labours under many drawbacks. Gold, first discovered in 1871, constitutes the wealth of the country, coal and silver are also found, whilst iron ores and other metals are known to exist. Railways connect the Colony with Delagoa Bay, Durban and the Cape; the total length open for traffic in 1896 was 890 miles, with about 200 miles under construction. Of the commerce 70 per cent. is with Cape Colony.

Swaziland was placed under the administration of the S. A. R. in 1894 and now forms part of the Colony, the rights of the natives (who retain their King) being safeguarded.

In 1882 the revenue only amounted to £177,407; in 1893 this had increased to £1,702,685, and in 1897 to £4,480,218, owing to the increased prosperity of the gold-bearing districts; the expenditure was £4,394,066 in 1897, and the debt £2,675,690 in 1893. The trade of the country amounted in 1897 to about £24,500,000, of which £13,563,827 represented the value of imports. The output of gold in the year 1897 was valued at £11,653,727.

The Capital is PRETORIA, pop. (1899) about 125,000, and the present seat of Government and principal town and commercial centre is JOHANNESBURG, which had a population in 1899 of over 105,000, of whom about 60,000 were whites.

THE ORANGE RIVER COLONY.

The Orange River Colony, formerly known as "The Orange Free State," was annexed by Royal Proclamation on 28th May, 1900. It is bounded on the East by British Basutoland and Natal, N. by the Transvaal Colony, and W. by Cape Colony; it has an area of 48,326 square miles, with a population (1890) of 207,503, of whom 77,716 are whites. It was founded by Dutch emigrants from the Cape Colony in 1836 and was proclaimed British territory by Sir Harry Smith in 1848, but, by the convention entered into on the 23rd of February, 1854, between Sir George Clerk, Her Majesty's special commissioner, and the representatives of the people, the inhabitants were declared "to all intents and purposes a free and independent people, and their Government to be treated thenceforth as a free and independent Government." Until quite recently there has been but little immigration and the territory has remained suited to its ancient and patriarchal institutions.

It is essentially a pastoral country, but the eastern part is also admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal mines exist, while there are indications of gold. The chief exports are wool, ostrich feathers, hides, diamonds, grain, &c.

In 1898 the revenue was £799,757, and the expenditure £956,752. The debt, incurred mainly for railway purposes, amounted in that year to £1,830,000. The trade was represented by £1,923,425 for exports, and £1,100,932 for imports, the amount to and from the United Kingdom not being ascertainable.

BLOEMFONTEIN, the Capital, and seat of Government, had a population of about 4,000 in 1898.

NATAL.

The colony of Natal, which played so important a part in the South African War of 1899-1900, derives its name from the fact of its discovery by the celebrated Portuguese navigator Vasco da Gama, on Christmas Day, 1497. The Portuguese did not attempt to make any settlement, and two attempts made by the Dutch, in 1688 and 1721, were both unsuccessful. The country was occupied solely by natives until 1824, when the first European settlement was formed by a small party of Englishmen, who came by sea and established themselves on the

coast where Durban now stands. Natal was then a part of the great Zulu Kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony, and settled in the northern districts, where to this day the Boers preponderate, although the bulk of the whole white population of the Colony is British. The Boers attempted to set up an independent government at Pietermaritzburg; but the Governor of the Cape took military possession of the district, and in 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government. It lies on the south-east coast of Africa, Durban or Port Natal being about 800 miles from Capetown. Speaking roughly, it is in 30° E. long. and 30° S. lat. It comprises an area of 29,434 square miles (including 10,521 square miles for Zululand), with a seaboard of 376 miles (including 210 for Zululand). The population in 1898 was estimated at 902,355, consisting of Europeans, 53,688; natives (Zulu-Kafirs), 787,574; Indian Coolies, 61,103. The scenery is in parts picturesque in the extreme. The country is well watered, no less than 35 distinct rivers running through it into the Indian Ocean, but not one of them is navigable. On the N.W., Natal is bounded by the Drakensberge Mountains, a portion of the great range extending from Capetown; and, as in the Cape Colony, the country rises from the sea to the mountains by a series of terraces. The coast region, extending about 15 miles inland, is highly fertile, and has a tropical climate. Sugar, coffee, indigo, arrowroot, ginger, tobacco, rice, and pepper thrive there, and the pine-apple ripens in the open air. Tea is also grown. The midland district is more adapted for cereals and other European crops. The upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The coalfields of the colony are of large extent, and are now connected by rail with the seaport of Durban; the output for the year ended 31 Dec., 1898, was 387,811 tons. The advantages accruing to the colony from this industry are considerable, but they depend in great measure on the export trade, which is rapidly being developed. Some attempts have been made to utilize the rich beds of iron ore which have been found in many parts of the colony. Large forests of valuable timber abound in the kloofs of all the mountain ranges, and many tracts along the coast are also well wooded. The chief exports in 1899 were wool, £608,711; sugar, £147,499; hides and skins, £65,157; angora hair, £39,964; bark, £57,885; coal, £124,523.

In Durban, or Port Natal, the Colony has the only harbour of any importance on the south-east coast. The bar, which hitherto has prevented large vessels from entering, is now in course of removal. *Railways*.—There are 591½ miles of railway open (1900), all of which, except the North Coast Extension from Verulam to Tugela (50 miles), were constructed by the Government, and the whole system is Government worked. The main line runs from Durban through Pietermaritzburg (the capital), and *via* Ladysmith and Glencoe Junction to Charlestown (309 miles inland), where it connects, by means of a tunnel passing under the Drakensberg mountains, at Laing's Nek, with the Netherlands South Africa

Company's line to Johannesburg and Pretoria. A branch runs from Ladysmith (on the main line at the 190 mile post) to the western border at Van Reenen's Pass (36 miles), and thence over the Drakensberge to Harri-smith (23½ miles) in the Orange River Colony. At Glencoe Junction a short line connects with Dundee. From Durban a branch runs northwards along the coast to Tugela (70 miles), and from Durban there is a coast line southwards to Umtwalumi (56 miles), which is to be extended to Port Shepstone to open up a part of the colony, with large natural resources and valuable deposits of marble. Another extension leads from Pietermaritzburg to Greytown (65 miles), and one is contemplated from Coalfields (Dundee) to Buffalo river, and across the northern border to Vryheid. A branch runs from Thornville Junction (60 miles from the port) to Richmond (17 miles). The total amount expended on railway construction up to 31 December, 1899, was £7,267,588, the revenue in 1899 being £940,100, a return of £45s. 7½d. on the capital expended on lines now open. There is a weekly mail service with England; and a telegraph cable to Zanzibar, Aden, and Europe, besides land lines to all parts of South Africa. There are Government High Schools at Pietermaritzburg and Durban; and 22 elementary schools; there are also 493 private aided, government aided, European, native, and Indian schools. The climate of the middle and upper districts is singularly beneficial to those suffering from pulmonary complaints. That of the coast district is, as already stated, tropical.

Under letters patent passed by Royal warrant 1 Dec., 1897, and in accordance with an Act of the Natal Parliament (No. 37 of 1897), the Province of Zululand was proclaimed annexed to, and forming part of, the Colony of Natal from 31 Dec., 1897. The Province comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela river; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the S. A. R. and Swaziland. By the Zululand Laws Consolidation Act (No. 17 of 1898), all the laws of Natal, which were applied to Zululand by proclamation of 21 June, 1897, and all the subsequent proclamations declaring the law of Zululand, which were made before its annexation to Natal, were extended to the Province of Zululand, with the exceptions and limitations specified in the schedules of that Act, and the Province is now administered as an integral part of the Colony of Natal. The Amaputaland Protectorate, created by proclamation of 22 Nov., 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province.

In October, 1899, the neighbouring Boer States of the Transvaal and Orange Free State declared war against Great Britain, and invaded the Colony by way of Laing's Nek and Van Reenen's Pass. Actions were fought, at Glencoe Junction, by a British force under Sir W. P. Symons (who was mortally wounded, and died on October 23), and on October 21 and 23, near Ladysmith, by Sir George White's force; but the military operations were thenceforward confined to resisting the opposing forces from within the entrenchments at Ladysmith, which Sir George White's force heroically defended from the commencement of November 1899, until relieved by General Buller's force on February 28, 1900, after a siege of 120 days.

The Government of the Colony consists of a Governor, a Legislative Council, and a Legislative Assembly. The former consists of 12 members, nominated by the Governor in Council, one half of whom retire every 5 years. The latter consists of 39 members elected by popular vote. There are 11,115 electors on the register, and there is a property qualification.

PIETERMARITZBURG, the capital and seat of government, is situated about 54 miles inland from Port Natal. Population (1898), 24,595.

	1898	1899.
Public revenue	£2,121,036	£2,065,251
Expenditure	1,923,977	1,914,724
Public debt, 31st Dec.	8,019,143	9,019,143
Imports (1843, £11,712)	5,323,216	5,359,259
Exports (1843, £1,348)	1,263,354	1,325,197

Domestic imports from U.K., 1899:—

RHODESIA.

THE BRITISH SOUTH AFRICA COMPANY

(Incorporated by Royal Charter, 29th October, 1889).

Directors: The Duke of Abercorn, K.G. (*President*); Earl Grey (*Vice-President*); the Rt. Hon. Cecil John Rhodes; Lord Gifford, F.C.; Sir Sidney Shippard, K.C.M.G.; Rochfort Maguire; P. Lyttelton Gell.

Head Office, 15, St. Swinith's Lane, E.C.

Manager, H. Wilson Fox; *Secretary,* J. F. Jones; *Assistant Secretary and Registrar,* E. C. Clegg.

Senior Administrator of Rhodesia, W. H. Milton (Salisbury).

Administrator of Matabeleland, Captain Hon. Arthur Lawley (Bulawayo).

Administrator of North Eastern Rhodesia, R. Codrington (Fort Jameson).

Administrator of North Western Rhodesia, Major R. T. Coryndon (Lialui).

Resident Commissioner, Lt.-Col. Sir Marshall J. Clarke, K.C.M.G. (Salisbury).

Commandant-General, Col. J. S. Nicholson, D.S.O. (Salisbury).

Cape Town Agency, J. A. Stevens, *Secretary.*

RHODESIA, so called after the Right Honourable Cecil Rhodes, whose policy secured this vast and important inland territory to the British Empire, has an area of about 750,000 square miles, thus exceeding the whole of Central Europe between the Pyrenees, the North Sea and the Russian frontier. By the Royal Charter of 1889, the British South Africa Company was entrusted with the administration and development of this Province, which established an uninterrupted British dominion from the Cape to Lake Tanganyika and British Central Africa. It is bounded on the south by Bechuanaland and the Transvaal Colony, from which it is separated by the Limpopo or Crocodile River; on the east by the Portuguese dominions and British Central Africa (see p. 544); on the north-east by German East Africa; and on the north and north-west by the Congo Free State. The eastern boundary of Rhodesia follows generally the north-easterly trend of the African seaboard, from which it is separated by a wide belt of Portuguese territory falling rapidly to the Indian Ocean. The western frontiers are still somewhat undefined. The River Zambesi divides the territory into Northern and Southern Rhodesia.

NORTHERN RHODESIA.

This territory, first opened to British influence by Dr. Livingstone, is divided into North-Eastern and North-Western Rhodesia, which are still occupied by the native tribes living under their own Chiefs. Of these, Lewanika, Emperor of the Barotsi, whose territory is continuous with North-Western Rhodesia, is far the most important. Barotsiland is administered by the Chartered Company under the North-Eastern Rhodesia and North-Western Rhodesia Orders in Council of 1899. Now that the tyranny of the Arab slave raiders has been suppressed, and the territory has been opened up from south to north by the African Transcontinental Telegraph, the steady development of its resources may be anticipated. Extensive mineral deposits, copper in particular, have been discovered in the extreme

North. Indigenous india-rubber is found in large areas. Timber, cattle, and all agricultural produce abound. Missions of various denominations are at work, and are generally successful when associated with the industrial education of the natives.

SOUTHERN RHODESIA.

The political and industrial development of Southern Rhodesia has been far more rapid. In latitude it is sub-tropical, but being situated upon the plateau which constitutes the watershed between the Limpopo and the Zambesi, 3,000 ft. to 5,000 ft. above the sea level, it is well suited for British occupation, and the high, bracing air is especially invigorating in the dry winter months. It is traversed by public roads, of which about 3,000 miles have been opened, by about 2,000 miles of telegraph, and a telephone system which connects the chief townships and stations of the police.

Railways.—The main arteries of communication are the Mashonaland and the Rhodesian Railways. The finished portion of the latter (originally constructed as the Bechuanaland Railway) represents the first section of Mr. Rhodes' gigantic "Cape to Cairo" project, and runs almost due north-east from Mafeking at the northern extremity of Cape Colony, entering Rhodesia at Ramaquabane, more than 1,200 miles from Capetown. Bulawayo, the chief town of Matabeleland, 1,350 miles from Capetown, is the terminus for the moment. The Mashonaland Railway runs westward from the Portuguese frontier near Umtali. It reached Salisbury in 1899 connecting the Mashonaland goldfields with the excellent harbour of Beira, 380 miles distant on the Indian Ocean. The Beira Railway through the Portuguese territory, has been widened to the general "Cape to Cairo" gauge (3 ft. 6 in.), which has been adopted alike in Egypt and South Africa. The Railway system is now being extended from Bulawayo in various directions, to the Gwanda goldfields on the south-east, to the Wankie district on the north-west, and above all, it is progressing northwards (taking the Gwelo goldfields and coal deposits on the road), towards the Zambesi. Simultaneously, the line from Beira through Salisbury will be pushed on to meet this northern extension, thus connecting the two systems which start respectively from Capetown and Beira. All the chief Rhodesian centres will thus be brought within three weeks of England. An Agreement between Germany and the Chartered Company was signed in 1899 providing also for the future construction of a westward extension to the Atlantic coast, which would still further reduce the journey.

The *Telegraph System* of Southern and Northern Rhodesia similarly forms a link in Mr. Rhodes' line from the Cape to Cairo which is being rapidly constructed by the African Transcontinental Telegraph Company. That line has reached Lake Tanganyika 2,800 miles from the Cape, and 2,170 miles from the Egyptian terminus, serving Southern and Northern Rhodesia on its way, so that British settlers in every township can now communicate with England within a few hours.

Rivers.—With the exception of the Zambesi, there are no streams of any value for purposes of transit, though it is known that the River Sabi was formerly used as a means of access to

Mashonaland. The marked alternation of the rainy and dry seasons renders the smaller rivers unreliable. There is, however, an adequate rainfall for all purposes of cultivation, and schemes for water storage and irrigation have been taken in hand.

The *Natives*, estimated at 509,000, have now settled down, apparently content with their unwon prosperity and immunity from tyranny and pillage, while others are flocking in from the borders of Portuguese territory and from the Transvaal Colony. Throughout the Transvaal war their steadiness and loyalty were remarkable. Matabeleland is divided into fifteen Native Districts, Mashonaland into fourteen, and for each District there is a Native Commissioner, whose duty it is to protect and control the natives through their own *Indunas*. The most trusted of the latter receive small salaries from the Company. The B.S.A. Mounted Police, about 1,200 strong, have posts throughout the territory. They are maintained by the Company at an annual cost of nearly £300,000, their Commandant being nominated by the Crown.

Industrial Progress.—Southern Rhodesia is rich in mineral deposits (its identity with the ancient land of Ophir is practically established), and it abounds in traces of the ancient goldworkers. Though the climate is sub-tropical, the average altitude makes it well suited to European fruit-trees, cereals, and vegetables, in addition to the indigenous products of the country, *e.g.*, tobacco, india-rubber, indigo, cotton, and all kinds of grain.

The extraordinary series of misfortunes which has overtaken the whole of South Africa during the last ten years has delayed the development of the well-ascertained resources of the territory. Rinderpest and locusts devastated the country in 1896. The Natives impoverished, starved, and only half subdued, broke out into rebellions which, with no railway and no transport cattle, were not extinguished without heroic efforts.

The South African War of 1899-1900 and the Boer irruptions into Natal, Cape Colony, Bechuanaland, and Rhodesia again checked the returning flood of development. The railway and telegraph communications were broken, and men and capital alike diverted from the work in hand. The heroic defence of Mafeking, when left exposed to the Boers by Cape Colony, was largely due to B.S.A. Police and Rhodesian Volunteers under Colonel, now Major-General Baden-Powell.

In spite, however, of these crises, extensive progress has been accomplished in the first decade of the Chartered Company's history. A territory which, but eleven years ago was barbarous, inaccessible, and to most men all but mythical, has been settled, pacified, and opened up for rapid development. The country is being restocked, and inoculation upon a large scale is stamping out various descriptions of veterinary disease. Native cultivation is extending, and in the vicinity of the towns and mining centres, there is a steady demand for market and dairy produce at very remunerative prices. The wages of all skilled artisans are high.

Among the mineral products of Rhodesia, gold,

silver, copper, iron, coal, tin, plumbago, and kieselguhr have already been localised. So far, it is only the goldfields which have received much attention; nor have they as yet been adequately explored outside the lines of ancient workings.

The first regular crushing returns began with 2,346 ozs. from three mines in September, 1898, and by August 31st, 1900, about 118,332 ozs. had been recovered from 256 1/4 tons of quartz, valued at about £428,952. The goldfields at present actually producing are those of Gwanda, Selukwe, and Buluwayo; but development work is in full progress in the gold belts of Sebakwe, Belingwe, Msiza, Hartley, Lo Maghonda, Mazoe, Abercorn, Manica, Victoria, and elsewhere. The present scarcity and inadequacy of Native labour are the sole impediments to a much larger output.

Constitution.—Southern Rhodesia is administered by the Company under the Charter of 1889, as amended by the Orders in Council of 1894 and 1898. The Senior Administrator is now advised by an Administrative Council of seven, and a Legislative Council of eleven members, the latter comprising two elected representatives from each Province.

The proceedings and enactments of both Councils are subject to the sanction of the High Commissioner, as representing the Crown, and his Deputy, the "Resident Commissioner," is present (without a vote) at their sittings. The laws in force in the Cape Colony up to June 10th, 1891, have continued in force in Southern Rhodesia so far as they are applicable; whilst from 1891 to 1899, when the Legislative Council was first convened, laws were amended or enacted by the ordinances of the Directors, the regulations of the Administrator in Council, and the proclamations of the High Commissioner. Municipal self-government has been established for Buluwayo and Salisbury under mayors and town councils. Justice is administered by resident magistrates and judges, the sanction of the Crown, as represented by the High Commissioner, being required for all judicial appointments of every rank. Trial by jury was established in 1899. There is an appeal to the High Court at Capetown and thence to the Privy Council.

The political capital is SALISBURY, 4,700 ft. above sea level, the chief town of Mashonaland, and the residence of the Senior Administrator. It has a white population of 2,000. BULUWAYO, 4,400 ft. above the sea level, the chief town of Matabeleland and, until 1893, the Kraal of Lobengula, is the commercial centre, with a white population of 7,500. These towns are 280 m. les apart. Both possess daily newspapers, clubs, hotels, theatres, parks, and public hospitals, together with schools and churches of the Church of England under the diocese of Mashonaland, and many other Religious bodies. Townships are also growing up at Umtali, Selukwe, Tuli, Melsitter, Gwanda, Gwelo, Victoria, Filabusi, Hartley, and Abercorn.

WEST AFRICA.

(See also Geographical Progress.)

The West African Colonies are the Gambia, Sierra Leone, the Gold Coast, and Lagos, which are all situated upon the coast of North-Western Africa between the mouths of the rivers Senegal and Niger. These were not originally colonies in the strict sense of the word, but merely trading settlements, in which the products of the neighbouring countries were collected and exchanged for European goods with as little outlay as possible; but of late years a great part of the revenue has been expended on the advancement of the scholastic and technical education of the native and on the encouragement of the cultivation of natural produce instead of its spoliation. The climate is such that Europeans cannot live there permanently, and even the negro inhabitants suffer greatly from malarial fever. The West Coast of Africa has, however, been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they used to supply slaves to their plantations in the West Indies and on the mainland of America. The importance of the coast was much diminished when these same nations agreed, at the commencement of the present century, to join in putting down the slave trade. The Dutch and the Danes relinquished their possessions; and although the French and the Portuguese maintained their positions, the English were practically without any serious rivalry in the development of a legitimate trade in tropical products, of which palm oil was the most important, to take the place of the trade in slaves. Within the last few years, however, the French have been spending large sums, and making strenuous efforts, with the avowed intention of founding a great French Empire in North-Western Africa. The Germans possess the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions; and, more to the south, the Congo Free State has been founded by the King of the Belgians. British authority has been extended, not only by means of the Colonies, but also by means of Protectorates over the Niger Coast and over territory adjacent to the Colonies of Sierra Leone, the Gold Coast and Lagos, and through the Royal Niger Company, which exercised under a charter from the British Crown all the functions of government ceded to it by various rulers and peoples. The Company's Charter was revoked on January 1st, 1900, and the administration of the territories under their control undertaken by the Foreign Office. By agreement with Germany (November 14, 1899), the greater portion of the territory previously known as "The Neutral Zone," in the rear of the Gold Coast, was allotted to Great Britain, this being part of the arrangement whereby this country abandoned in favour of Germany and the United States any claim over the Samoan Islands, and the partition of West Africa among the various European Powers is now complete.

GAMBIA.

The river Gambia rises in the mountains at the back of Sierra Leone; it flows first towards the north, and then turning towards the west, empties itself into the Atlantic about 100 miles south of Cape Verde. The chief town, Bathurst, is situated on an island at the mouth of the river in 13° 24' N. lat. and 16° 36' W. longitude. The Gambia is the only West African river which is navigable by ocean-going steamers, having 26 feet of water on the bar at low tide. Vessels drawing 10 feet can go up it for 250 miles. It was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the Treaty of Versailles, as British. It had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was

created in 1843, and was constituted a separate government in 1893.

The Colony now consists of the Island of St. Mary, British Combo Albreda, the Ceded Mile, McCarthy's Island, and various other islands and territories on the banks of the river. The estimated population on December 31, 1898, was 14,266. The climate is as unhealthy as that of any other part of West Africa during the rainy season, viz., from June to October; but during the rest of the year it is fairly healthy. The chief export is ground-nuts, which forms nearly nine-tenths of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purposes as olive oil. Beeswax, rubber, and hides are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The chief imports are cotton goods, kola nuts, rice and tobacco. The colony has no debt, but, on the contrary, an amount of money invested. There is an armed police force in the settlement (numbering about 100 men), which performs both civil and military duties. The government, which is that of a Crown Colony,

is now vested in an Administrator, assisted by an Executive Council, and by a Legislative Council consisting of 3 official members (besides the Administrator) and 4 unofficial members, nominated by the Crown.

THE GOLD COAST COLONY.

This colony comprises the coast of the Gulf of Guinea from about 3° W. to 1° 10' E. of Greenwich, with a protectorate extending inland to an average distance of 300 miles, bounded on the West and North by the French colonies of the Ivory Coast and French Soudan, and on the East by the German Colony of Togoland. The population of the Colony is estimated at 1,500,000 (exclusive of Ashanti and the Northern Territories), of whom 200 are Europeans. The natives are almost all Pagans; but the number of Mohammedans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Cormantyne, and subsequently many forts and factories were established, not only by the English and Dutch, but also by the French, the Danes, and the Germans, for the purpose of supplying slaves to their West Indian and American possessions. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the Coast, and also built forts at Dixcove, Secondee, Commendah, Anamaboe, Winnebah, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the Government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1867, when an exchange was effected which gave all those on the West of the Swat River to Holland and those on the East to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the Ashanti war of 1873-4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea.

The result of the war was that the Ashanti power was completely shattered, and the British possessions were left free for development without fear of native aggression or hindrance from European rivalry. In 1894, however, Prempeh, the King of Ashanti, having successfully fought against the Nkoranzas who had revolted against his rule, threatened to attack the Attabubus, who had been given protection in 1890. This attack was averted by the despatch of an armed force, and an ultimatum was then sent to Prempeh warning him not to enter British territory, and suggesting that he should acquiesce in the establishment of a Residency at Kumasi. An expedition entered Kumasi without resistance, January, 1896, and Prempeh made submission, but, failing to comply with the terms dictated, was brought to the coast as a political prisoner and now lives in banishment in the Seychelles. A Resident was at the same time installed at Kumasi, and thus has commenced an entirely new departure in the relations of the Gold Coast Colony with Ashanti.

In April 1900, the Ashantis, who had been steadily preparing for some months, rose whilst the Governor and Lady Hodgson were at Kumasi, the garrison being at a minimum. After enduring much privation for nearly four months, and loss of life from starvation (the garrison having been reinforced in the meanwhile), the Governor, with those of his staff who had been shut up in Kumasi, left the town escorted by 600 constabulary under Major A. H. Morris, p.s.o., and cut their way through the enemy's lines to safety, the Fort being held by a garrison of 100 Hausas under Capt. F. E. Bishop. A few days later Col. Willcocks, to whom the command of the consequent operations in Ashanti was entrusted, relieved the beleaguered party. The rising is now being rapidly subdued. The boundaries of the Colony and of the Northern Territories have been settled by Treaties with France and Germany, 1898-99.

The produce of the Gold Coast is chiefly sent to Great Britain. Gold is found in considerable quantities, and rubber, ivory, gum-copal, monkey-skins, cotton, camwood, Guinea grains, and oil, are also exported to England. The principal exports, and their value in 1899, are rubber £555,731, palm oil £183,204, timber £87,076, and palm kernels £106,156. The chief imports are textiles, alcohol, and hardware. The climate is damp, hot, malarious, and unhealthy. Very little was done for the natives for 400 years, but the Government is now assisting the Roman Catholic, Methodist, and German missionaries in educational matters, and great efforts are being made to improve the sanitary condition of the Coast towns. The Government has established schools of its own; the towns are lighted and policed, 700 miles of telegraphs have been established in the colony, and a considerable mileage recently constructed in the Northern Territories. A government railway from the coast to Tarkwa, the centre of the gold-mining industry, is now in course of construction, and will be pushed on to Kumasi as soon as practicable.

Under the Colonial Loans Act, 1899, the sum of £578,000 was advanced for the purpose of railway development, and £98,000 for harbour works at Accra.

The seat of Government is Accra (population 16,276). The other principal towns are Cape Coast (11,614), Elmina (10,530), Addah (7,530), Saltpond, and Quitta. The Legislative Council consists of 6 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone (Lion Mountain) was ceded to Great Britain in 1787 by the native chiefs, to be used as an asylum for the many destitute negroes then in England; and great numbers of liberated Africans from North America and the West Indies, besides those taken in slavers on the coast, have from time to time been settled there. In this respect Sierra Leone is really a colony and so differs from the other Colonies on the West African coast (which were all formed as merely trading stations), while it is also of commercial importance. The route from Freetown to the great central African plateau is shorter and easier than that from the navigable head of the Gambia, and there is an excellent harbour strongly fortified as a coaling-station for the Royal Navy on the Cape route to India. In addition to the peninsula, the colony now comprises Sherbro Island, and various other territories extending along the coast from the French Colony known as the "Guinée Française" upon the North to the Republic of Liberia on the South. The extreme length is about 185 miles, with an estimated area of 4,000 sq. miles. The population in 1893 amounted to 136,000, of whom 210 were resident Europeans. Of the rest, more than half were liberated Africans and their descendants, while the remainder belonged to the neighbouring tribes. The liberated Africans were freed from all parts of Africa, and as the result no less than 60 different languages are said to be spoken in Freetown. Almost every Christian denomination is represented in Freetown, and there are also many Pagans and Mohammedans. Education, though not compulsory, is in an advanced state. The climate is humid and enervating to Europeans, and malarial fevers are prevalent, especially at the beginning and end of the rains, which last from May to October. The peninsula itself produces hardly anything. The inhabitants are almost all employed in exchanging the products of the interior for European goods. The exports consist chiefly

of palm-kernels and kola nuts; but benni-seed, coco-nuts, ginger, ground-nuts, india-rubber, gum-copal, hides, beeswax, and rice are also exported. The principal imports are cotton goods, coats, apparel, hardware, provisions and tobacco. The taxation consists of specific duties on wine, spirits, ale and porter, tobacco, gunpowder, guns, kerosine oil, lumber, hardware, salt, and sugar; and of a 10 per cent. *ad valorem* duty on other goods. Under the Colonial Loans Act, 1899, the sum of £310,000 was advanced for railway construction in the Colony.

THE SIERRA LEONE PROTECTORATE.

A Protectorate was proclaimed over the territories adjacent to the Colony of Sierra Leone on August 31, 1895. The region has long been recognised as within the British sphere of influence, and lies between 7° and 10° N., and 11° and 13° W., being bounded on the N. and N.E. by French Guinea, and on the S. and S.E. by Liberia. It has an area of about 30,000 square miles and a population roughly estimated at 500,000.

For administrative purposes the Protectorate is divided into 5 districts under District Commissioners, the principal peoples being the Limbas and Kurankos in the North, the Timmenis and Susus in the centre, and the Mendis in the South. The principal products are rubber, gum, and palm trees, benni-seed, rice, ground and kola nuts, while sheep and cattle thrive.

Freetown, 3,078 miles from Liverpool; transit, 14 days. Telegrams, 5s. 5d. per word.

LAGOS.

The Colony and Protectorate of Lagos, formerly one of the great centres of the African slave trade, is situated on the Bight of Benin between Dahomey and the Niger Coast Protectorate (Southern Nigeria). Its sphere of influence extends northwards over the Yoruba country, a

large and fertile region and one of the most successful fields of missionary enterprise. Lagos Island was permanently occupied by Great Britain in 1861. Until 1885 it formed a dependency first of Sierra Leone and later of the Gold Coast, but is now a separate Crown Colony and Protectorate. The Protectorate comprises the kingdoms of Pokra, Okeodan, Ilaro, Addo, Igbessa, Awori, Jebu Remo, Mahin, Ogbo, and Jakri. Lagos island has an area of 3¼ square miles, and the whole Colony and Protectorate includes 1,500 square miles, with perhaps 2,000,000 inhabitants, of whom about 200 are of European birth. A railway has been completed as far as Ibadan, 90 miles inland, and Lagos is now connected by telegraph with Jebba on the Niger.

Rubber, palm-oil and palm-kernels constitute the most important natural products of the Colony. A flourishing trade in timber has recently sprung up. The value of the palm-oil exported in 1899 was £168,457, kernels £412,817, rubber, £160,314, and timber £34,737. The imports are chiefly cotton-goods, spirits, and kola nuts, and amounted to £915,934 in 1899.

	1897.	1898.
Public revenue	£177,421	£206,444
Public expenditure	182,669	203,802
Total imports	770,510	908,355
Total exports	8.0,975	882,329
Imports from U. K.	574,938	723,650
Exports to U. K.	400,114	1,129,533

LAGOS, the capital and seat of government, has about 33,000 inhabitants.

Governor, Sir W. MacGregor, K.C.M.G., C.B. £2,500 (and entertainment allowance £1,000).

Prisone Judge, M. R. M-nendez..... £750 to 900

Attorney-General, J. Winkfield..... £600 to 800

Principal Medical Officer, R. Allman £1,000 Agents, London, Crown Agents for the Colonies.

This Protectorate, formerly called the "Oil Rivers Protectorate," includes the whole of the maritime region lying between Lagos and the Rio del Rey. The coast region was secured by treaties with the native chiefs, concluded by E. H. Hewett, C.M.G., in 1884, and was placed, in 1891, under an Imperial Commissioner, appointed by the Secretary of State for Foreign Affairs. The Protectorate was announced in the *London Gazette* of June 5, 1885, Oct. 18, 1887, and May 16, 1893. Centres of trade are Old Calabar, the capital (pop. about 15,000). Opobo, Bonny, New Calabar, Brass, Benin, Warri and Sapele and Akassa, the last named being situated at the Nun mouth of the Niger, which, with the rest of the territories south of Idah on the Niger, passed on January 1st 1900 from the Administrative control of the Royal Niger Company to that of "Southern Nigeria," as the Protectorate is now called.

The leading exports are palm-oil, palm-kernels, rubber, ebony, and ivory. The leading imports are cotton-goods, cooper's stores, hardware and cutlery, and spirits.

	1898-99.	1899-1900.
Revenue	£169,567	£164,108
Total Imports	732,629	725,793
Total Exports	774,647	838,954
Imports from U.K.	583,067	597,998
Exports to U.K.	500,357	531,088

Steamers of the "British and African" and "African" lines run regularly between Liverpool and the principal ports. Headquarters, Old Calabar. Transit about 22 days.

NORTHERN NIGERIA.

High Commissioner, Brig.-Gen. F. D. Lugard, C.B., D.S.O. £3,000

First-Class Resident, W. Wallace

Resident, W. P. Hewby

Assistant Residents

Commandant, Sir J. Willcocks, K.C.M.G., D.S.O.

Secretary to Administration, M. Kerr .. £600 to 700

Treasurer, S. T. Harrison

Chief Justice, A. Davidson

Attorney-General, H. C. Gollan

Marine Superintendent, Capt. Paget-Jones

Director of Public Works, J. E. Eaglesome

Director of Public Works, J. E. Eaglesome

This Protectorate was established on January 1, 1900, and includes the northern portion of the territories formerly administered by the Royal Niger Company. It is bounded on the south by Southern Nigeria and Lagos, to the west and north by the French possessions in the hinterland of Dahomey and the Sudan, and on the east by Lake Chad and the German territory of the Cameroons. The boundary to the west of the Niger has been demarcated by a joint British and French Commission, whose conclusions have still to be ratified by the respective Governments. Administrative control is, as yet, established in only a portion of the Protectorate, which includes the empire of the Sultan of Sokoto and an area of about 310,000 square miles. The population of the Hausa States alone has been estimated at 30,000,000. The principal centres of administration are Lokoja, at the junction of the Niger and Benue, some 250 miles from the mouth of the

Niger; and Jebba, some 220 miles further up the river. The imports are much the same as in Southern Nigeria, and the principal exports are palm-oil and palm-kernels. The importation of spirits is prohibited. There is telegraphic com-

munication from Lagos to Jebba and Lakoja, and the line is being continued along the Benue. Steam communication with England via Forcados.

Telegrams, 2s. 3d. to 8s. 3d. per word.

FAST AND CENTRAL AFRICA.

THERE are no British Colonies on the East Coast of Africa to the north of Natal (already treated of under the head of "South Africa"). But a large portion of the Continent, both on the coast and inland, is under British protection and is administered directly by the Imperial Government, through the Foreign Office. Just as on the West Coast, the rivalry of European Powers has resulted in the division of the territory on the East into "spheres of influence," the definition of whose boundaries has given rise to much diplomatic negotiation, and is not yet finally completed. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*; from Cape Delgado to the river Umba is *German East Africa*; the islands of Zanzibar and Pemba form a British Protectorate; and the East Africa Protectorate (together with the little Witu Protectorate) extends from the Umba to the river Juba, which forms the southern boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their recent annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. The history of the European occupation of East Africa may be briefly stated thus:—the Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognized their Protectorate over Usagara, and in the same year the Germans declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. The boundaries of the *Italian Sphere* were agreed upon in 1891. The Imperial British East Africa Company transferred the administration of their territories to the Imperial Government in 1895, having done much to promote the advance of civilization in the large tract of country now known as the "East Africa Protectorate."

The term "British Central Africa" is rather misleading to the unofficial mind. It must be understood as not applying to Uganda, although that country is, properly speaking, the most "Central" of the British Colonies or Protectorates in the Continent, but as the name given to a territory of more than 500,000 square miles in extent, north of the Zambesi, the greater part of which is under the administration of the British South African Company; the rest, which is under direct Imperial control, being called the "British Central Africa Protectorate." (See page 544.) The respective limits of British and Portuguese possessions or protectorates in East Africa were determined by the Treaty signed at Lisbon on June 11, 1891.

THE SOMALILAND PROTECTORATE.

In 1884 a Protectorate was declared over part of Somaliland, a country now subject (except where reserved by Great Britain and Italy) to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 90,000 sq. miles. The population, mainly consisting of Somalis, a Mohammedan tribe, has not yet been estimated. The boundaries are defined by treaty with Abyssinia and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south.

The PRINCIPAL TOWNS are Berbera, Bulhar, and Zeyla.

The protectorate was transferred in 1893 from the administration of the India Office to that of the Foreign Office.

Consul-General, Lt.-Col. J. Hayes Sadler, £1500
 Consul at Zeyla, Arthur L. Keyser ... 650
 Vice-Consul Berbera, Lieut. C. F. Harold 500

Commandant of Forces, Colonel G. P. Hatch.	900
Principal Med. Off., W. H. B. Macdonald.	550

The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3, 1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased to it by the Sultan of Zanzibar, or acquired by treaties entered into with native Chiefs. A British Protectorate was announced over these territories on June 18, 1895, and the Company handed over the administration on July 1, 1895.

These territories are now comprised under the name of "The East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, granted on a 50 years' lease by the Sultan of Zanzibar, as also the vast territories in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the Juba) and north-east, by an agreement with Italy (1891). On the west the Protectorate adjoins that of Uganda. The administration of the Protectorate is carried on under the Foreign Office, and the Commissioner is also H.M. Agent and Consul-General at Zanzibar.

A great portion of this vast region consists of pasture lands, or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into four districts: (1) The Coast Province; (2) Ukamba; (3) Tanaland; and (4) Jubaland, of which the centres of administration are respectively Mombasa, Machakos, Lamu, and Kismayu. Of the four districts Ukamba is the only one which, generally speaking, is suitable to colonization by Europeans. There is also a considerable region within the boundaries of the Protectorate which is still undeveloped and has not yet been included in any administrative district.

Mombasa, which is connected with Europe by telegraph, is the capital of the Protectorate, and possesses, perhaps, the finest harbour on the east coast of Africa (population, about 24,000). There is also telegraphic communication along the coast between Mombasa and Lamu. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length.

The principal exports are ivory, rubber, grain, live stock, gums, orchella weed, sesame, ebony, borities (poles and rafters), rhinoceros horn, hippopotamus teeth, &c.; the principal imports, on which is charged an *ad valorem* duty of 5 per cent. are piece goods, rice, grain and flour, building materials, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

CAPITAL, Mombasa; transit about 21 days. Telegrams, Mombasa, 5s. per word, other places, 5s. 5d.

THE WITU PROTECTORATE.

Sultan, Omari bin Hamed, succeeded 1895.
British Resident, A. S. Rogers. (See East Africa Protectorate.)

This Protectorate is a small tract of country extending about 66 miles along the coast, and 30

miles at furthest inland, at the mouth of the river Tana. The Germans proclaimed a protectorate over it in 1885, which they resigned to Great Britain by the agreement of 1890. (See introductory note.) The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31, 1893. Witu is now regarded, for administrative purposes, as part of *Tanaland*, one of the districts into which the British East Africa Protectorate is divided.

Parcels, same as E. Africa Protectorate.

THE UGANDA PROTECTORATE.

Special Commissioner and Consul-General, Sir H. H. Johnston, K.C.B.....	£2,800
Vice-Cons., F. J. Jackson, C.B., R. Macallister	650
Legal Vice-Consul, E. de L. Collinson.....	600
Senior Medical Officer, Dr. R. U. Moffat, C.M.G.	650
Director of Transport, D. J. Wilson	600
Commandant of Uganda Rifles, Lt.-Col. A. H. Coles, D.S.O.	
Chief Accountant, G. D. Smith	600
Agents in London, The Crown Agents for the Colonies, Downing Street, S.W.	

A British Protectorate over the territory of Uganda was proclaimed in the "London Gazette" of June 19, 1894, and included only the country subject to King Mwanga, known as Uganda proper, bounded by the territories known as Usoga, Unyoro, Ankoli and Koki. This Protectorate has since been extended over Unyoro and Usoga—(see notice in "London Gazette," July 3, 1896). *Uganda proper* lies on the N.W. shore of Lake Victoria, between 500 and 600 miles in a direct line from the nearest point on the East Coast of Africa. It is situated on, and to the N. of the Equator. *Usoga* lies further to the East, on the N. shore of the Lake. *Unyoro* is to the N.W. of Uganda and extends to Lake Albert. *Koki* is to the S.W. of Uganda. The total population of the Protectorate may be roughly estimated at between 2 and 3 millions.

The capital town of Uganda is Kampala, but the centre of the Protectorate Administration is the neighbouring settlement of Kampala. The population of Uganda is estimated at over 300,000. The exports are at present almost confined to ivory. Principal imports are cotton cloths, prints, beads, &c.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son was declared King of Uganda, with a native council of regency. In Sept. 1897, a mutiny broke out among the Sudanese troops in the Protectorate, which was only suppressed after several months' fighting, in circumstances of great difficulty and danger in which several British Officers lost their lives (Parly. Paper, Africa, No. 10, 1898). The military forces have since been completely reorganized.

The Uganda Railway.—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1895 H.M. Government decided to proceed with the construction of the railway, and in September of that year a Committee was formed with the late Sir Percy Anderson, Assistant Under-Secretary of

State for Foreign Affairs, as Chairman, to supervise the undertaking and organise details, under the authority of the Secretary of State for Foreign Affairs. The Committee meets regularly at the Foreign Office, and since the death of Sir Percy Anderson, the chair has been taken by the Hon. Francis Bertie, Assistant Under-Secretary of State. The Managing Member of the Committee is Mr. F. L. O'Callaghan, C.S.I., C.I.E.

The gauge adopted for the railway is one metre. The chief engineer, Mr. G. Whitehouse, and staff arrived at Mombasa in December, 1895, and a large number of labourers have been imported from India for the work of construction, in addition to such local labour as can be engaged. The total length of the line to be constructed is about 560 miles, and about 460 miles were completed in November, 1900.

CAPITAL, Kampala. Parcels must be sent to care of an agent at Mombasa.

THE ZANZIBAR PROTECTORATE.

Sultan, Hamud bin Muhamad bin Said, C.C.S.I., succeeded his cousin, Hamed bin Thwain, 27th Aug., 1896.

- H. B. M. Agent and Consul-General*, Sir C. N. E. Elliot, K.C.M.G. £1,800
- Consul*, Basil S. Cave, C.B. 700
- Judge of H. B. M. Court*, W. B. Cracknall, C.M.G. 1,000
- Assistant Judge*, F. J. Collins, Esq. 700
- Vic-Consuls*, V. K. Kestell-Cornish. £500; D. Mackenann, £500; J. H. Sinclair, £400.

President of Ministry, General Sir Lloyd William Mathews, K.C.M.G. (October, 1891).

Officer in Command of Native Troops, Brigadier-General A. E. Raikes.

The Zanzibar Dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far South as Tughhi Bay and North as Warsheikh; but since the cession of the coast line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, they are now confined to the islands of Zanzibar and Pemba (985 sq. m., and 165,000 inhabitants), and a ten-mile coast line from Wanga to Kipini, together with the islands of Lamu, Manda, and Patta, and the ports of Kismayu, Brava, Merka, Magdisho, each with a radius of 10 miles, and the port of Warsheikh, with a radius of 5 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Commissioner and Consul-General in the East Africa Protectorate (see p. 542), and the remainder, known as Benadir, is leased to the Italian Government. Zanzibar has been a British Protectorate since November, 1890.

On the sudden death of the late Sultan, Hamed bin Thwain, in August, 1896, Said Khaled, a member of the reigning family, seized the palace and held it with a large number of armed followers, in defiance of the protecting power. He proclaimed himself Sultan, but was not recognized as such by any of the foreign Consular representatives. Khaled having refused to quit the palace, it was found necessary to resort to force to compel his submission. After a bombardment of half-an-hour from the British warships in the harbour, Khaled fled to the German Consulate, whence he

was eventually deported to German East Africa, and remains there under German supervision.

By a decree of Sultan Hamud (1897) the legal status of slavery ceased to be recognized in the islands of Zanzibar and Pemba.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar is about 250,000.

The principal imports are piece-goods, ivory, cloves, rice and coal; the exports are piece-goods, ivory, cloves, copra, rubber, gum-copal, and many minor articles. The largest proportion of imports (£491,548) comes from British India, £95,833 from Germany, £24,978 from France, and £145,143 from Great Britain. The largest exports are made to German East Africa, which in 1899 accounted for £457,238, the principal other participants being British East Africa (£190,641), British India (£129,896), and Great Britain (£116,964). These figures refer to the port of Zanzibar, and not to the trade of the Zanzibar dominions. The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. There is no direct steam communication with the United Kingdom, passengers, mails, and goods having to tranship at Aden. There are through steamers of French and German Companies.

The number of ocean-going vessels which entered the port in 1899 was—British 69, German 98, French 26, other nationalities 5, the total tonnage being 324,561. This does not include the coasting and dhow traffic, which is a very large one, extending to Bombay, Arabia, the Comoro Islands, and Madagascar.

	1898.	1899.
Imports	£1,555,070	£1,596,606

BRITISH CENTRAL AFRICA PROTECTORATE.

- H.M. Commissioner and Consul-General*, Alfred Sharpe, C.B. £1,400
 - Deputy Commissioner, Consul, and Commandant of British Cent. Africa Rifles*, Lieut.-Col. W. H. Manning 800
 - Assist. Dep. Commr.*, Major F. B. Pearce ... 700
 - Vic-Consul and Agent at Chinde*, E. Mac-Donell £450 to 600
 - Comm. Naval Forces*, P. Cullen £520 to 700
 - Chief Judicial Officer and Vice-Consul*, J. J. Nunan £600 to 700
 - Senior Medical Officer*, Dr. G. D. Gray £400 to 500
- Agents in London, The Crown Agents for the Colonies, Downing Street, S.W.

This country, which was formerly termed *Nyasaland*, was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern portion of British Central Africa, and is

administered directly by the Imperial Government through the Foreign Office. The remainder of the territory is administered by the British South Africa Company.

The population of the Protectorate is estimated at 845,000, of whom about 450 are Europeans.

The principal exports are coffee, ivory, and rubber; the export of tobacco is increasing. The cultivation of coffee is largely on the increase, and there are prospects of a steady development of this industry. Rice, cotton, and tea are grown. The principal imports are soft goods, provisions and hardware. On Lake Nyassa there are seven British steamers (two of which are gunboats) and one German Government steamer. There are also gunboats and other steamers on the upper and lower Shiré river. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a piece of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

Chief towns:—Blantyre (population about 100 Europeans and 6,000 natives) and Zomba, the headquarters of the administration. Communication is maintained between Chiromo (at the junction of the rivers Ruo and Shiré), and Chinde by the African Lakes Company's steamers, the Zambesi Traffic Co., and the African International Flotilla Company.

Between Chinde and Europe, the means of communication are Messrs. Rennie's line via Natal, the Union Steam Ship Co., the German East Africa S.S. Co., and the Portuguese Royal Mail steamers.

The construction of a railway to connect Chiromo with Blantyre is under consideration. The Protectorate is connected by telegraph overland with the Cape, via Fort Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Lake Tanganyika.

Imports, 1899-1900.....£176,034

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 500 miles east of Madagascar, between 57° 18'—57° 49' E. long. and S. lat. 19° 58'—20° 32', and comprising an area of 705 square miles. The resident population on the 31st December, 1899, was 379,659 of whom 261,739 were Indians (the majority originally Coolies imported for working the sugar estates), and the remainder mainly of French or mixed descent. The whole island is practically given up to producing sugar for export, and the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

Mauritius was discovered in 1505 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Count Maurice

of Nassau. In 1644 they established a small colony on the shore, but in 1712 they abandoned the island, and in 1715 the French took possession of it. Under the French it became a great centre of trade, and in 1789 the seat of French Government in the East was removed to it from Pondicherry. In the war between England and France it was a base for privateering expeditions, which inflicted serious damage on British trade, until it was taken by a British force in 1810. The French called it the Isle of France, and the French language and French law have been preserved under British rule. Its past greatness, and much of its present value, are due to the excellent harbour on the N.W. coast, on which the capital, Port Louis, stands. In 1899 there were 105 miles of railway and 60 post-offices in the island, with 135 miles of telegraph. A cable to Zanzibar was opened in 1893, bringing Mauritius and the Seychelles into telegraphic touch with the world. The annual trade of the island passes almost entirely through Port Louis.

The Government is more representative than that of an ordinary Crown Colony, being administered by a Governor, aided by an Executive Council of five officials, and two elected members of the Council of Government, and a Legislative Council of twenty-seven members, of whom eight are ex-officio, nine nominated by the governor, and ten elected for the various districts into which the island is divided. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. The system of education has been remodelled by an Ordinance which came into force Aug. 31, 1900, and a Department of Instruction has been created with two branches. (1) *Superior or Secondary Instruction*, to which is attached the Government Royal College with its two Schools; (2) *Primary Instruction*, consisting of the Government schools and the Grant-in-aid schools. The Government schools are supported wholly by the State, the Grant-schools only partially so. The total expenditure on education in 1899 amounted to Rs. 478,496. Of the pupils in the Government and aided schools 69·66 per cent. are Roman Catholics, 3·11 per cent. belong to the Church of England, and 1·05 per cent. to other Christian denominations; 26·17 per cent. are Hindoos and Mohammedans, to whom no assistance is given. The troops in the Colony on 31 December, 1899, numbered 2,547.

Under the Colonial Loans Act (1899) the sum of £32,820 was advanced for public works in the colony.

DEPENDENCIES OF MAURITIUS.

(1.) RODRIGUES, 350 miles almost due east of Mauritius. Population in 1899 estimated at 3,000. Area, between 80 and 90 square miles. Cattle, beans, salt fish and goats are the principal exports. The island suffers much from hurricanes; and the revenue usually has to be supplemented by a grant from Mauritius. *Magistrate*, B. H. Colin, Rs. 5,120.

(2.) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by a magistrate, whose duty it is to enquire into the condition of the labourers, and settle any disputes which may be referred to him. The chief product is cocoa-nut oil. The most important is Diego Garcia, one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station.

Transit: Mauritius, 27 days.
Telegrams, 5s. per word.

THE SEYCHELLES ISLANDS.

These islands, which are about 55 in number, were practically made independent of Mauritius by the letters patent of 21st July, 1897. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and Ladigue, and its total area, with dependencies, is estimated at about 150 square miles, of which, according to a recent survey, Mahé occupies nearly 56 square miles; there are 64 miles of roads in the latter island. The seat of Government is at Victoria, the capital, on the N.E. side of Mahé, which has an excellent harbour, and is constantly visited by men-of-war of all nations and steamers of the British India Company. The Admiralty have recently made Victoria a coaling station; quarantine regulations are on a reasonable footing, and the harbour dues light. The Seychelles Islands were originally discovered by the Portuguese, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1899 being but 14 per 1,000, and the decennial average 1890-99, about 15 per 1,000. The estimated population of all the islands on December 31, 1899, was 19,638 (Mahé 14,000, Praslin 1,300, and

Ladigue 1,200), an increase since the census of 1891 of over 3,000. There are 28 Roman Catholic and Church of England Primary Schools, and a grant-in-aid of Rs.10,000 (Roman Catholics Rs.8,450, Church of England Rs.1,549) was made in 1899. In addition there is a Government School, maintained at an annual cost of Rs.4,364, where an education of a higher class is provided. This School is affiliated to the Royal College of Mauritius.

The principal exports are vanilla, cocoa-nuts, cocoa-nut oil, tortoise-shell, cacao, soap and guano. The production of vanilla has greatly increased in late years, the export in 1899 being valued at Rs.1,338,721. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double cocoa-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a large valley thickly planted. Mahé is in telegraphic communication with all important parts of the world *via* Mauritius and Zanzibar. The British India Steam Navigation Company runs a monthly service of steamers, subsidised by the Imperial, Mauritius, and Seychelles Governments, between Colombo, Mauritius and Seychelles, and steamers of the same company run between Bombay, Seychelles and Zanzibar. The Government, which is that of a Crown Colony, is vested in an Administrator, assisted by an Executive Council, composed of three *ex-officio* members in addition to the Administrator, and by a Legislative Council, consisting of three officials, besides the Administrator, and three unofficial members. The Administrator is President of both Councils.

ASCENSION,

an isolated Island in the South Atlantic (3,417 miles from Plymouth, 690 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat., and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 4 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious. It remained uninhabited till 1815, when the English took possession of it. It now possesses a steam factory, naval and victualling yards, and a coaling dépôt. There are also excellent hospitals. Rabbits guinea-fowl, partridges, and goats, are being preserved for sporting purposes. The island is visited by the sea-turtle from January to May, which lay their eggs in the sand; as many as 275 being "turned" during the season of 1897, their weight being from 500 to 800 lbs., and their average price £2 15s.; the sooty tern, or "wide awake," use the island as a nesting-place about every eighth month, their eggs being collected in vast quantities, and much appreciated by the inhabitants. In 1896 there were about 16 acres of ground under cultivation, producing vegetables and bananas. The island is under the Board of Admiralty, by whom a naval officer is appointed as Captain in charge. There are no inhabitants except officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being 380 with about 60 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is of importance as a coaling station, and as a health resort for crews of vessels serving on the west coast division of the Cape station; it has recently been strongly fortified, and is connected by the Eastern Telegraph Co. with the Cape, St. Helena, and Sierra Leone.

TRISTAN D'ACUNHA

is the chief of a group of islands lying in lat. 37° 6' S. and long. 12° 2' W. These islands are of volcanic origin, and were discovered in 1506 by a Portuguese admiral, after whom they are named, and are very healthy. The population numbers about 100, and the inhabitants are said to be very long lived.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length: the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,103 ft. above the sea-level respectively. The smaller islands, Stollenhoff and Middle Isle, are little more than huge rocks. These islands are visited by large numbers of seals and sea-elephants.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'—53° S. lat. and 57° 40'—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1897 of about 2,050. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonized, and from that time to the present have so continued, being, as a whole, the most southerly organized colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy; and the temperature is on the whole equable, the thermometer ranging in winter from 30° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved very suitable for sheep; kitchen-gardens occupy the only cultivated part. The population is entirely British, and is engaged mainly in sheep-farming and seafaring industries. The chief exports in 1899 were wool £118,961, sheep-skins and tallow. The total tonnage of vessels entered and cleared in 1899 was 145,932. There are three places of worship (one Church of England, one Roman Catholic, and one Baptist). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

There is a volunteer force of about 100 men.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, and several other small uninhabited islands, are comprised within this colony.

CHIEF TOWN, Port Stanley.

Port Stanley is distant about 8,130 miles; transit, 27 days, monthly from Liverpool. Telegrams sent by post from Monte Video or Valparaiso.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, and 1,800 from the coast of S. America, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population in 1891 of 4,116, including 1,986 males and 2,130 females. It is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 51°, and the total rainfall (1899) 47 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21st May, 1501 (St. Helena's Day), and remained unknown to other European nations until 1588, when it was visited by Captain Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch colonized it *circa* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch by Capt. Munden, of the English Navy, and was held by the East India Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there 5th May, 1821), when

it was ceded by them to the Crown. In 1500 the Island was used as a place of internment for prisoners of war from South Africa, the first detachment (consisting of General Cronje and 2,000 officers and men) arriving in April of that year. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the East Indies. The tonnage dues on calling ships was abolished in 1832, and the port is now free to all ships except when bringing or taking cargo to and from the port: the number which called in 1899, excluding 142 boarded by island boatmen when passing, was 158. It is of strategical importance as a coaling station, and has recently been fortified by the Imperial Government. St. James's Bay, on the north-west of the island, possesses a good anchorage.

The government is administered by a Governor, with the aid of an Executive Council of 3 members, the Governor alone making all ordinances.

Greater Britain: In the Mediterranean.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 30' and 35° 41', and E. long. 32° 15' and 34° 35'. It is about 60 miles distant from the nearest point of Asia Minor; and 41 miles from Latakia on the Syrian coast, with which it is connected by a submarine telegraph cable. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is about 3,584 square miles. The population in 1891 was 209,286 persons (the latest estimate 1899 being 223,000), of whom about 23 per cent. were Mohammedans, and the remainder mostly members of the Orthodox Greek Church. The principal productions are grain of various kinds, sesame, linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, aniseed, sponges, sunnac leaves and terra umbra. The fertility of the soil has for centuries been proverbial. In 1899 the wine export was 1,207,134 gals., and that of spirits 94,141 gals., the bulk going to Turkey and Egypt. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered severely when first

stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus still forms part of the Ottoman Empire; but by virtue of a treaty made between England and the Porte, dated 4th June, 1878, the government is administered by England for so long a time as Batoum and Kars may be kept by Russia. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of eighteen members, six being official and twelve elected. The island is divided into three electoral districts, each returning one Mohammedan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English barrister, who is assisted by two native judges, one being a Christian and the other a Mohammedan. There is also a Supreme Court for the whole island, consisting of two English judges.

The amount payable to the Sublime Porte yearly is £87,800 for revenue, £5,000 in compensation for State lands, and 4,166,220 okes of salt in kind (an oke=2·3 lbs.). This sum is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855.

Under the Colonial Loans Act 1899 the sum of £314,000 was advanced for Harbour and Railway works and for the purposes of irrigation.

The capital is Nicosia (Lefkosa), near the centre of the island, with a population of 12,515 in 1891; the other principal towns are Larnaca (population 7,593), Limassol (7,388), Famagusta, Kyrenia, and Papho.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24¾ square miles; COMINO—the site of the Sultan's disaster in 1889, and several islets. The population of the whole group, 31 Dec., 1899, was 181,648, exclusive of the British troops, who numbered 12,011. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants from families who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe, and usually speak Italian. There is a native order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are cotton, corn, oranges, melons, grapes, cumin seed, and early potatoes for the London market; figs and honey are plentiful. It was estimated that in 1891 the area under cultivation in the three islands was about 37,896 tumuli. From 4,000 to 5,000 women and children, chiefly in Gozo, are employed in making lace. The principal occupation of the people is, however, in connection with the shipping. In 1899 there were 60,763 persons living in Valletta, Floriana, and the "Three Cities" on the other side of the harbour, and many persons from the neighbouring villages come in daily to work at the Port. The harbour is one of the finest in the world, with such a depth that the largest vessels can anchor alongside the

very shore. It is a most important port of call for the many vessels passing to and from the East and Australasia by the Suez Canal, being just half-way between Gibraltar and Port Said. There is also an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet; and an additional graving dock was opened on Feb. 12, 1892. The island is strongly fortified, and has a garrison of 12,011 (including 843 Royal Malta Artillery and a Maltese regiment of militia 1,782 strong). The climate, although not actually tropical, is very hot in summer. In the two hottest months (July and August) the average daily range of temperature is from 71° to 87° F., with an occasional rise to 96° or fall to 65°. In winter the range is from 48° to 58°, with an occasional fall to 41° or rise to 64°. Citta Vecchia, the former capital of the island, is a handsome old town of 8,150 inhabitants, and contains the ancient palace of the courts of justice, the Cathedral, and the Seminary. It has, however, been entirely eclipsed in importance by the modern fortified capital of Valletta, which was founded in 1566. Malta is well provided with an educational system. It possesses a University and Lyceum at Valletta; and 112 elementary schools, 2 secondary schools, and 31 night schools for boys, are maintained by Government at a cost of £22,683 in 1899; in addition to which there are Garrison schools and a Dockyard school, while 116 private schools attended by 3,720 pupils in Malta and Gozo, receive no aid from the Government.

In ancient times, Malta was occupied in succession by Phœnicians, Greeks, Carthaginians, Romans, and Byzantine Greeks, as each nation secured the command of the Mediterranean Sea. It attained to a high degree of commercial prosperity, being especially noted in Roman times for its textile fabrics. It is said to have been converted to Christianity on the occasion of St. Paul's shipwreck in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger, of Sicily. For the next 440 years it followed the fortunes of that kingdom; but in 1530 it was handed over to the Knights of St. John, who proceeded at once to make it a stronghold of Christianity against the Turks. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by the Grand Master La Vallette. The Knights freely expended their vast revenues in fortifying the island and carrying out many useful and magnificent works, until, in 1798, they were expelled by Napoleon. The Maltese, however, rose against the French garrison, and with some help from British and Neapolitan forces, compelled it, in 1800, to capitulate. They then ceded the islands to Great Britain, and the cession was confirmed by the Treaty of Paris in 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 7 official and 3 unofficial members, and by a Legislative Council, called the Council of Government—6 official and 13 elected members. The Governor is President in both.

In 1899 the port of Valletta was entered by 3,550 vessels (tonnage, 3,297,712).

GIBRALTAR,

a rocky promontory, 3 miles in length and $\frac{3}{4}$ of a mile in breadth, and 1,439 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British.

Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1899 3,955 vessels entered, with a total tonnage of 4,328,857. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. An enclosed harbour with three graving docks, capable of accommodating the largest battleships in the British Navy, is being built at an estimated cost of about £4,000,000; the works include a commercial and coaling mole. The estimated resident civilian population 31 Dec., 1899, was 19,408. The actual strength of the troops at that date was 5,653.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation; there being no executive or legislative council.

See also Indian Section, and Geographical Progress and Territorial Change

A list of the Principal Foreign Countries, giving the Name of their Sovereign or Ruler and Statistics of their Area, Population, Products, Railway and Telegraph system, Navies and Armies and Commerce, distinguishing the Amount of Trade with this Country; the Names of Her Majesty's Ambassadors, Ministers, and Consuls are also given, together with their actual Salaries, and the names of the Foreign Ambassadors and Consuls resident in London.

To many Countries their distance from this country is given and, to nearly all, the time occupied in transit, and the cost of Telegrams.

POSTAGE.—There is a uniform rate to all countries of the world which do not form part of the British Empire; the charge for letters is $2\frac{1}{2}d.$ the half-ounce; for newspapers and books $\frac{1}{2}d.$ the two ounces; patterns and samples $\frac{1}{2}d.$ the two ounces, but with a minimum charge of $1d.$; and commercial papers the same, but with a minimum charge of $2\frac{1}{2}d.$

PARCEL RATES will be found on pp. 454.

TELEGRAPHIC RATES are given at the end of each article.

Many of the following Statistics have been revised specially for the Almanack by direction of the various Governments. The Editor is also indebted to Her Majesty's Representatives at Foreign Courts, and to the British Consuls; he has also to thank several of the Foreign Ministers and Consuls in London for many particulars. In statistics of trade the term "Domestic" Imports signifies the produce and manufactures of the country in question whence they come, and does not include articles re-exported after having been already received there from abroad.

ABYSSINIA OR ETHIOPIA.

Emperor (Negus Negusti or King of Kings) Menelek of Shoa, a.c.m.g., b. 1843, procl. 12th March, 1889.

King of Godjam and Dependencies, Negus Tekla Haimanot.

Governor of Harrar and Dependencies and of Tigré, Ras Makunan.

Governor of Wollo, &c., Ras Michael.

Governor of Kaffa, &c., Ras Walda Georgis.

Abyssinia proper consists of four provinces, Tigré, Amhara, Godjam, and Shoa. The area of these provinces, lying between 8° and $15^{\circ} 30'$ N. lat. and 36° and 40° E. long. may be reckoned at 100,000 square miles with a population of 3 or 4 millions. But the boundaries of the empire are indefinite except on the east where they touch the Italian colony of Massowah (Eretria) which is a narrow coast strip, the French colony of Obok or Djibuti, and the British Somali Coast Protectorate. Northwards the boundary is about $15^{\circ} 30'$ N. lat., falling just south of Kassala. The arrangement between England and Italy in 1891, when Italy claimed a protectorate over Abyssinia, by virtue of their treaty of 1889 with Menelek, drew the westerly limit of Abyssinia along the 35° of longitude and the southerly limit along the 6° of N. lat. as far as the Shebeli river. Recent travellers have found Abyssinians in the neighbourhood of Lake Rudolf and in the Borana country, and Abyssinian expeditions have been as far south as Bardera.

In 1891 the Emperor Menelek notified the Powers that his empire extended roughly from the 14th to the 2nd degree N., including the country between the Sobat and the Blue Nile up to the White Nile. The British advance from the north prevented Russian and French expeditions from establishing an anti-British dominion across the Nile from Djibuti through Abyssinia to the French Congo. M. Leontieff, a Russian, has been appointed Governor of "the Equatorial Provinces," which lie on the east of the Omo River and north of Lake Stephanie.

Abyssinia proper is volcanic and mountainous. It contains little mineral wealth, though iron

and coal are not uncommon, gold is washed in various streams, and salt, saltpetre, sulphur, copper, silver, are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered and have a genial climate. In the hotter regions, sugar cane, cotton, coffee, indigo, banana, &c. flourish; in the middle zone the vine, palm, maize, wheat, barley, orange, peach and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 9,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, camels, oxen, goats and sheep, form a large portion of the wealth of the people, the wild game consists of elephant, rhinoceros, hippopotamus, zebra, giraffe, antelope, buffalo, hyena, lynx, &c. To the north-east the people are more akin to the Caucasian and the Semitic, to the south-east more akin to the negro; on the west are the plain dwellers who talk Amharac; on the east the mountaineers speaking Tigré, which is akin to ancient Arabic. Of the Galla tribes to the south, some are Pagan, some Mahomedan, and some Christian; the Somalis are Mahomedan, but the Abyssinians are Christian and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. They themselves were converted to Christianity probably about 600 A.D. by monks from Egypt, but have long been isolated from the rest of the Christian world. At the end of the 15th century an attempt was made by the Jesuits under the Portuguese power to bring the Abyssinian Church under the Papacy. For a time this event seemed likely; but, before the middle of the 17th century, the Jesuit influence was overthrown and expelled, and the Abyssinian Church reverted to its eastern forms, and no trace of Jesuit influence remained. There is no popular literature, and no education; there is a legal code said to be derived from Constantine, but practically government is autocratic, qualified by the power of revolt. There is no standing army, but all are

soldiers, and in the struggle against Italy, the Emperor's army probably numbered 100,000, there being certainly that number of modern rifles in the country. The principal pursuits are war, agriculture, cattle breeding and hunting; industry is looked down upon; the chief exports are coffee, honey, civet, wax, gums, musk, vegetable oils, spices, hides, ivory, gold, mules, cattle, and horses. The currency is the Maria Theresa (Austrian) dollar but Indian rupees also find some circulation in Harrar. There is a demand for imported cloth, cotton and woollen goods, cheap hardware, and cutlery, beads and matches. The import duty on all goods at Harrar is ■ per cent. *ad valorem*; in the interior the duty is variable. There is a large trade between the British port of Zaila and Harrar. England came into conflict with Abyssinia in 1867-68, when the then capital, Magdala, was occupied by a British Army under Gen. Napier (Lord Napier of Magdala). In 1889 the Italians made a treaty with King Menelek, under which they claimed a protectorate over Abyssinia; this was repudiated by Menelek in 1893 and finally given up after the Italian defeat at Adowa (1st March, 1896). The subsequent treaty with Italy confined the Italian protectorate to a mere strip, 180 miles wide, along the coast, with possession of, and access to, the Italian Settlement of Lugh, on the Juba River. Since that date Russian, French, and English missions have visited King Menelek at his new capital Antoto or Adis Abbaba; the French mission under M. Lagarde, and the English mission under Mr. Rennell Rodd. A concession has been given for the construction of a railway under French auspices from Djibuti to the capital, with a branch to Harrar; this has been opened for engines to the 5th kilometre, while the line is picketed for 100 kilometres, and surveyed ■ far as Harrar. When completed this will probably take the trade which now mainly passes through the British port of Zaila, from which the road to Harrar is easier and shorter and more secure than that from Jjibuti. The principal towns of Abyssinia, besides Adis Abbaba, are Adowa, the capital of Tigré, Gondar, Basso, Aksum, Ankober, and Harrar, which is a dependency of Shoa. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

Imports from the United Kingdom, 1899 £14,048
Exports to the United Kingdom, 1899 760

CAPITAL, Adis Abbaba (population fluctuates, but is ordinarily about 10,000).

Public Works, Dr Emilio Civit.

Minister in London, Florencio L. Dominguez,
16 Kensington Palace Gardens, W.

1st Sec. of Legation, Vicente S. Dominguez.

2nd Secretary, Luis H. Dominguez.

Consul-Gen., Sergio Garcia Uriburu, 3, Budge Row, Cannon Street, E.C.

Consul, A. Lumb

Vice-Consul, F. Torromé.

Consul-General at Glasgow, T. F. Agar.

There are also Consulates at Liverpool, Southampton, Cardiff, Manchester, Falmouth, Newcastle, Birmingham, Newport, Edinburgh, Dundee, Belfast, and Dublin, with Vice-Consulates at Dover, Liverpool, Nottingham, Manchester, Swansea, and Aberdeen.

The Republic is composed of 14 provinces and 9 territories, with a large seaboard on the east coast of South America. It is estimated to contain 1,212,000 square miles, with ■ population estimated at 4,500,000. By the treaty of 23rd July, 1881, with Chile, Terra del Fuego has been divided between these two Republics. The country was discovered in 1517, and settled by the Spaniards in 1535. The principal productions are wool, hides, linseed, sugar, maize, wheat, and tobacco. In 1898 3,200,000 hectares were under wheat the produce amounting to 2,400,000 tons, of which about 1,800,000 tons were available for export. The other products are tallow, Paraguay tea, and excellent European and indigenous fruits. The mineral products are copper, silver, coal, and salt. The export of frozen sheep to Europe is becoming of great importance: there are at present 5 factories in working operation. The chief articles of export in the year 1897 were pastoral, or agricultural and forest products, and minerals.

The principal imports from the United Kingdom are machinery, hardware, and cotton, woollen, and linen goods. The total trade was distributed in 1899 as follows: with the U. K. £13,080,000; France £10,500,000; Belgium £6,717,770; Germany £8,500,000.

In 1899 there were about 1,026 miles of railways in working order, connecting the principal cities of the Republic with the capital. Telegraphs, 21,000 miles, mostly government lines. Immigration is encouraged, the arrivals in 1889 reaching the unprecedented number of 218,744, mostly Italians, and in 1899 the total number was about 86,000; the language in ordinary use is Spanish. The Buenos Aires port works and the new port at the Ensenada have been opened for traffic, while two graving docks have been constructed at Buenos Aires and a naval port at Bahia Blanca; 841 British ships (1,421,302 tons) entered Buenos Aires port in 1899.

The Argentine Republic is connected by cable with all the cities in the world. The Army consists of 749 officers and 10,906 men, in addition to

the National Guard of about 400,000. The military school has 150 cadets, and the school for non-commissioned officers, 120. Navy (1897): 30 vessels, including 6 armoured vessels, 4 cruisers, 8 gunboats, 4 destroyers, 3 transports, 26 torpedo boats, and 2 vessels under construction. The naval school has 60 cadets, and the school of gunners, 80. Public instruction is much developed: there are 2 universities, 3 schools of engineering, 2 colleges of agriculture, 27 training colleges, 3,751 public schools, and a school for deaf-mutes; with 9,035 teachers and 330,961 pupils in 1896. The climate of the Argentine Republic is temperate and healthy.

AUSTRIA-HUNGARY.

I.—THE JOINT MONARCHY.

Reigning Sovereign, Francis Joseph, Emperor of Austria, &c., and Apostolic King of Hungary, born 18 August, 1830; succeeded (as Emperor of Austria) 2 Dec., 1848; crowned King of Hungary at Ofen, June 8, 1867; married April 24, 1854, Elizabeth, daughter of Maximilian Joseph, Duke in Bavaria (born 24 Dec. 1837, assassinated in Geneva 10 Sept., 1898), and has issue 2 daughters.

Heir Presumptive, his nephew (son of the late Archduke Charles Louis), Archduke Francis Ferdinand of Este, born 18 Dec., 1863.

Minister of Foreign Affairs and of the Imperial and Royal House, Count A. Goluchowski.

Minister of Finance, M. Benjamin de Kállay.

Minister of War, Edler von Krieghammer.

Navy. (Department of War Office), Commander, Vice-Admiral Baron von Spaun.

Ambassador to Germany, L. de Szögyény-Marich; Italy, Freiherr von Pasetti Friedenburg; France, Graf Wolkenstein Trostburg; Russia, Baron d'Arenthal; Turkey, Freiherr von Calice; U.S.A., Ladislaus Hengelmüller von Hengervar.

Ambassador in London, Count Franz Deym, 18 Belgrave Square, S.W.

Councillor and 1st Sec., Count Albert Mensdorff-Pouilly-Dietrichstein.

Nine months to 30 Sept., 1899.

Secs., Count Berchtold; Count K. Trauttmansdorff. Attachés, Count Constantin Deym; Count Ludwig Badeni.

Chancellor, Eduard K. von Rüti.

Naval Attaché, Capt. Ladislaus von Sztranyavszky.

Military Attaché, Lieut.-Gen. H.S.H. Prince Louis Esterhazy.

Consul-General, Baron Alfred de Rothschild; F. Stockinger, acting.

Vice-Consul, A. Steiger Ritter von Danöcz.

Secretary, J. Kohn. Office, 11 Queen Victoria Street, E.C.

The largest State, next to Russia, on the continent of Europe, situated between 42°—51° N. lat. and 9° 30'—26° 20' E. long. It embraces an area of 261,649 English square miles, and a population (1896) of 44,901,036. Among the population (43,310,000 without Bosnia and Herzegovina) there were in 1896 about 19,145,000 Slavs, 10,592,000 Germans, 7,456,000 Magyars, 2,813,000 Roumanians and 696,000 Italians. According to religion (1890), nearly 32,312,000 Roman Catholics, 3,888,000 Protestants, 3,190,000 Greeks and Armenians, and 1,872,000 Jews.

The head of the Austro-Hungarian Monarchy is the Emperor of Austria and Apostolic King of Hungary who has three Imperial advisers in the Ministers of Foreign Affairs, Finance and War. The control of the official actions of these ministers and the voting of the common budget is exercised by Delegations consisting of 60 members chosen from the Upper House of Austria (Herrenhaus) and Hungary (Fürendihaz) and from each Lower House (Abgeordnetenhaus and Kepviselőház). The union between the two states is personal through the Emperor and also constitutional and commercial by reason of the Ausgleich or Agreement (literally "compromise") entered into by the Reichsrath of Austria and the Parliament of Hungary. This agreement is renewable every ten years, and was so renewed in 1877—1887, but not in 1897, so that the monarchy is at present held together by the personal tie alone.

The State is divided into the Austrian State and the Hungarian State, each having its own Parliament, Ministry, and Administration, the official denomination being Oesterreichisch-Ungarische Monarchie (the Austro-Hungarian Monarchy).

The soil produces grain of all kinds, potatoes, beetroot, and wine. Austria-Hungary ranks next to France, Italy, and Spain as a wine-growing country, but from its inland position and other causes the wines are not well known in England. 797,138 tons of beet-sugar were manufactured in 1895-96. Industry is almost wholly confined to Austria, and more especially to Vienna, Bohemia, Moravia, Silesia, and Styria, the great centre of the iron trade. Brünn is famed for its woollens, Reichenberg for woollens and cottons, Trautenu for linen, Bohemia for glass, and Vienna and Pilsen for lager beer. The mineral riches are great, comprising gold, silver, copper, iron, quicksilver, lead, tin, zinc, and coal; petroleum is also found in Galicia.

The Joint Monarchy possesses a powerful army, amounting, on the peace footing, to 382,659 men, with 14,657 officers, and the war establishment, exclusive of the Landsturm, consists of 1,240,000 officers and men, with 2,192 field guns. Military service is compulsory on all. The navy consists of 142 vessels, of which 13 are line-of-battle ships, 18 cruisers, 2 hochseeboote, and 62 torpedo boats. Pola is the naval arsenal.

The principal articles exported from Austria-Hungary in 1898 were cereals, animals, and mill produce £12,300,000; sugar £5,587,000; raw material for agricultural and industrial purposes, £16,600,000; manufactured goods, £28,500,000; semi-manufactured goods, £10,000,000. Commerce is carried on principally with Germany, Italy, Roumania, and Russia, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1897 20,536 miles of railway were open for traffic. The commercial marine consisted in 1897 of 266 vessels (exclusive of coasting and fishing vessels), burthen 431,430 tons.

Duality extends to the annual budgets. Towards the common expenses contained in the Imperial Budget, Austria contributes 68·6 per cent. and Hungary, 31·4 per cent. These common expenses, which are mainly those incurred for the maintenance of the Army, Navy, and Foreign Office, were estimated for 1897 at £13,666,000.

II.—AUSTRIA.

President of the Council and Minister of the Interior,
Ernest von Koerber.

Defence, Count Welsch von Welsersheimb.

Railways, Dr. Chevalier de Wittek.

Justice, Chevalier de Kindinger.

Public Worship and Instruction, Chevalier de Hartel.

Finance, Chevalier de Kniazolucki.

Commerce, Dr. Franz Stibral.

Without Portfolio, Dr. Chevalier de Chledowski.

Austria contains an area of 115,914 sq. miles, and a population of 24,972,056, giving a density of population of 215 to the square mile. The Central Government of the Kingdom is conducted by the Reichsrath, consisting of an Upper (Herrenhaus) and Lower House (Abgeordnetenhaus). There are 17 provinces, viz.:—Lower Austria, Upper Austria, Salzburg, Styria or Steiermark, Carinthia or Kärnten, Carniola or Krain, Coast Districts (Gürtz, Gradisca-Trieste, and Istria), Tyrol, Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukovina, and Dalmatia, each possessing a separate Diet (Landtage) and also sending representatives to the Reichsrath. Of the inhabitants about 8,500,000 are Germans,

3,400,000 Bohemians, Moravians and Slovates, 3,750,000 Poles, and 3,000,000 Ruthenians with about 1,000,000 Slovenes. In addition to Vienna there are four cities with over 100,000 inhabitants and six in addition with over 50,000. There are about 19,000,000 Roman Catholics, 2,750,000 Orthodox, and over 1,000,000 Jews in the country.

Education is compulsory, and in 1896 there were 19,441 elementary schools with about 72,000 teachers and 4,000,000 children in attendance; the secondary schools, colleges, and technical schools numbered 190, with over 5,000 teachers and about 90,000 pupils. There are also universities at Vienna, Prague, Gratz, Cracow, Lemberg, Innsbruck and Czernowitz.

The principal industry is agriculture, in which nearly 14,000,000 were employed in 1891; trade and manufactures accounting for about 6,000,000, while mining occupied nearly 1,250,000. The chief products are grain, cereals, wine (76,704,068 gallons in 1896), and minerals (coal, iron, lead, zinc, silver, quicksilver, and copper); the manufactures being woollens, cottons, and glass. The exports of Austria amount to about one-third, and the imports to a little less than one-fourth, of the total for the monarchy.

III.—HUNGARY.

President of the Ministry, Coloman de Széll.

Minister a latere, Count Manó Szechenyi.

Interior, Coloman de Széll.

Finance, M. Ladislaus Lukács.

Instruction and Religion, M. Julius Wlassics.

Commerce, Sandor Hegedús.

Agriculture, Ignatius Darányi.

Justice, Sandor Plósz.

National Defence, Gen. Baron Géza Fejérváry.

Minister for Croatia, Erwin Cseh.

Hungary, with its dependent states, has an area of 322,310 sq. kilometres, about 124,448 sq. miles, that is, rather larger than the United Kingdom, with a population of 17,463,791 at the census of 1890: to this Fiume contributes 30,337, and Croatia and Slavonia 2,201,927. The country is divided into 72 counties, with 474 districts for those of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia form an annexe of the Crown of Hungary, with autonomy in home affairs, justice and public instruction. At the head of the Croatian Government is the *Banus* (Viceroy) Khuen Héderváry, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister. The Croatian Diet sends 40 members to the Hungarian Parliament, and the Hungarian Ministry contains a Croatian member. Parliament consists of a Lower House of 453 members, elected for five years; of these Croatia sends 40, but they have no vote on matters connected with justice, education, and home affairs. There is also an Upper House, consisting of the *Barones regni*, prelates, such members

the magnate families who contribute more than 100 florins to the landtax, the Banus, with three members of Croatia sent by the Diet, and fifty members nominated by the Crown.

Of the inhabitants about 8,000,000 are Magyars, 1,600,000 Roumanians, and 2,000,000 Saxons. In addition to Buda Pest, which has about 600,000 inhabitants, there are six cities, with over 50,000 inhabitants.

All the great plains produce grain of excellent quality. The returns for 1895 (excluding Croatia and Slavonia) give 52,843,883 hectolitres of wheat, 1,065,120 of rye, 20,383,461 of barley, 24,543,183 of oats, and 45,412,645 of Indian corn. The cattle number 5,829,018, sheep 7,526,686, horses 1,972,448, and swine 6,446,573. The exports are chiefly cereals, live stock, and raw materials; wheat averages for £4,223,000, barley £2,966,000, rye £1,463,000, and wheaten flour £6,800,000. The exports are chiefly manufactured goods, textile fabrics alone being valued at £13,650,000. The chief mineral products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, and sulphur. The mines, however, are not well worked, and might be made a much greater source of income. Salt, which is a Government monopoly, produced £1,377,000 in 1895.

In the expenditure of the Kingdom of Hungary the sum of £2,525,076 is set aside annually as a contribution to the service of the Special Debt of Austria contracted there 1867.

IV.—CROWN LANDS.

Austria is charged with the administration of the Turkish Provinces of Bosnia and Herzegovina. These are situated between 42° 40' to 40° 15' N. lat. and 33° 22' to 38° 45' E. long. The Austrian garrison consists of 22,944 men, with a native army of 3,528, and a gendarmerie of 2,359. An entirely Austrian administration has been established. The local Revenue (1894: £1,047,310) goes for the cost of administration, but not for the maintenance of the army of occupation.

Consul at Dover, Sir Wm. H. Crundall.

Vice-Consul at Harwich, William Groom.

A Kingdom of Central Europe, anciently inhabited by the Belgæ (a Celtic-speaking German tribe), and part of the Gallia Belgica of the Romans. In 1815 the country was joined to the Kingdom of the Netherlands, an arrangement which was upset by the Revolution of 1830. On Oct. 4, 1830, a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Saxe-Coburg was chosen hereditary King.

Belgium has a frontier of 831 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (381 miles), on the east by Germany (60 miles), and the Grand Duchy of Luxembourg (80 miles), with a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The total area is 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial entrepôt is Antwerp, a strongly fortified city on the Schelde. The other harbours are Ostend, Nieuport, and Blankenberg.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 6,744,532 on 31 Dec., 1899, or 593 to the square mile; it is consequently one of the most densely peopled countries of the world. The decennial increase is about 10 per cent, and since 1861 there has been an annual excess of immigrants over emigrants, the totals in 1896 being emigrants 21,830; immigrants 26,878. There are 3,381,096 females to 3,363,436 males; and annually 29 births and 20 deaths to every 1,000 inhabitants. There are nine provinces, Antwerp, Brabant, Flanders (E. and W.), Hainaut, Liège, Limburg, Luxembourg, and Namur. BRUSSELS (with suburbs, 531,011 inhabitants), is the capital. Other towns with over 100,000 inhabitants are Ant-

werp, the chief port (267,902 exclusive of suburbs), Ghent (159,218), and Liège (165,404).

French is the chief official language and that of the upper classes, but Flemish is spoken by the majority, preponderating in Flanders and Brabant, including Antwerp. In 1890, 45 per cent. spoke Flemish, 41 per cent. French, and only 11 per cent. both tongues. Nearly all the inhabitants are at least nominally Roman Catholics, and in 1890 there existed 1,775 convents, inhabited by 4,120 monks and 21,242 nuns. Education is backward, for in 1890 29 out of every hundred inhabitants of 5 years of age and upwards were unable to read; and of the recruits levied in 1890, 13'45 per cent. were in a similar condition. There are four universities—Ghent (with 427 students), Liège (979), Brussels (1,265), and Louvain (1,179)—3,850 students in the academic year 1895-96, besides a famous Academy of Art at Antwerp, a Conservatoire of Music at Brussels, Ghent, Liège and Antwerp, and numerous technical schools.

Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The soil was divided (1889) among 1,173,169 proprietors. Of the total area 58 per cent. is under cultivation, 23 per cent. consists of meadows and pastures, 17 per cent. of forest. The mineral kingdom yields coal (1898, 22,088,335 tons), iron, zinc, lead, and copper. The leading manufactures are fire-arms (Liège), machinery (Seraing), iron and steel, glass (Charleroy), woollens (Verviers), cottons and linen (Ghent), lace (Brussels, Mechlin, and Bruges), hosiery (Tournaï), beet-sugar (Hainaut), paper, and beer. The exports include, in addition to manufactures, corn, butter, eggs, vegetables, coal, building-stone, hides, tallow, and rabbits: they are taken principally by the United Kingdom, Germany, and France. The exports to the United Kingdom in 1899 were:—

Boots and Shoes ..	£225,672	Linen yarn	£760,551
Cloaks & watches ..	886,373	Oil seed	213,149
Cotton manufactures ..	1,872,774	Silk manufactures ..	2,066,170
Eggs	759,250	Sugar Refined	285,316
Embroidery & Lace ..	518,581	" Unrefined	903,594
Flax	1,800,909	Wool	449,892
Glass	1,366,710	Woolen manufs.	340,838
Gloves	485,411	Do. yarn	1,014,867
Hides	283,793	Zinc	442,956
Iron manufactures ..	1,292,285		

The imports of British produce and manufacture included—

Animals (horses) ..	£250,084	Leather	£217,747
Beer and Ale	110,838	Linen yarn & mfs.	256,810
Banouchou	139,011	Machinery	879,565
Chemicals	102,738	Manure	122,993
Coals, &c.	563,839	Metals & hardware ..	1,105,319
Cotton yarn & mfs. ..	1,905,432	Ships & Machinery ..	252,060
Fish	209,981	Woolen yarn & mf ..	1,018,675

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1898) of 66 vessels, in addition to which there were about 600 fishing boats. In 1898 there were 2,830 miles of railway (2,057 being the property of the State, with a net revenue of about £1,320 per mile); the telegraphs had a length of 3,953 miles, and the post-office carried 404,956,118 letters, post-cards, &c., in 1897. The navigable rivers and canals have a length of 1,370 miles.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 102 senators (with the exception of 26 elected by the provincial councils), and 172 representatives are elected by the people, the former for 8, the latter

for 4 years. Universal male suffrage, with plural voting up to 3 votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. And the united constituencies numbered 1,452,232 voters, with 2,239,621 votes in 1900. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise. On Jan. 1, 1900, an Old Age Pension scheme came into force whereby the state contributes to Pension Societies and provides pensions of its own to all Belgian working men of 65 years and upwards who may be in want.

The army, on a peace footing, numbers 47,361 men with the colours (1896), the total war strength being about 140,000. It is recruited by conscription, from which exemption can be purchased for 1,600 francs, the term of service being thirteen years, of which from 28 months to four years are passed with the colours. There is also a *Garde civique* of 43,647 men. Antwerp is the principal fortress, and new forts are being constructed on the Meuse: from the designs of Gen. Brialmont. Belgium has neither a navy nor colonies; but the King of the Belgians is at the same time "Sovereign" of the Congo Free State.

This and Paraguay are the only States of South

America without a seaboard, Antofagasta, its

former port, having been ceded to Chile in 1854.

It was formerly comprised in the Spanish Vice-

royalty of Colombia under the name of "Peru,"

and derives its present name from its great liberator, Simon Bolivar. It extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is said to be 570,000 square miles. Its population is estimated at about 2,000,000. In the war against Chile, 1879, it equipped an army of about 6,000 men. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible, while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: copper, lead, tin, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with gold, silver and copper are its principal exports; its chief imports being iron, hardware, and silks. There are about 500 miles of railway and 150 miles of telegraph.

Public revenue, 1898 (estimate)	£432,812
Public expenditure, 1898	476,158
Total exports, 1897, over	2,127,000
Total imports, 1897, about	2,038,000
Interior debt, 1898, about	300,000
Exterior debt, 1898, about	90,379

In the above statistics the *boliviano* is reckoned at 12 to the £.

The Republic of the United States of Brazil was founded on the 15th of November, 1889, by a bloodless revolution which drove Dom Pedro from the throne. A provisional government was immediately formed, upon the model of that of the United States of America, under the presidency of Marshal Deodoro da Fonseca, and on February 24, 1891, a new Constitution was voted by the Constituent Assembly by which the President's term of office was fixed at four years. Everything went on much as usual; but the Church and the State were separated, civil marriages only made valid, and education secularised. A second revolution broke out in 1891 by which President Fonseca was unseated.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay,

and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4° 22' N. and 33° 45' S. and long. 34° 40' and 73° 15' W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,218,166 square miles, and contained a population of 17,000,000 in 1891, the greater part of mixed blood. In 1871 there were 1,800,000 slaves, but in that year the work of emancipation was commenced; children were born free, but under certain regulations were compelled to serve with their mother until they reached the age of 21. On the 13th of May, 1888, a bill was passed for the immediate and unconditional manumission of all slaves, and now not one is to be found throughout the States. There are about 1,000,000 "wild" Indians, and other uncivilised tribes; 100,547 immigrants, mostly Italians, Portuguese, and Spanish arrived at Rio in 1896. In 1846 the army consisted of 28,000 men, and the navy of 3 iron-clads, 5 cruisers, 3 torpedo boats, and 1 torpedo-catcher; in 1893 the Republic sold their 3 ironclads to the U.S.A. for £470,000, and in the Budget of 1899 the naval expenditure is reduced from £1,286,339 (1896) to £74,365. Brazil contains 20 states, 16 of which lie along the coast, and 4 in the interior. There are 42 ports along the coast, of which the principal is Rio with a shore line of 123 miles. It is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries; and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods, adapted for dyeing, cabinet-work, or ship-building; among these are mahogany, logwood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea, and in those regions European fruits and grain are reared in abundance, while the intermediate valleys are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, india-rubber, tobacco, and tropical products. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cotton also is being largely cultivated for export. Sugar-cane is grown in large and increasing quantities in the northern provinces. Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially Pará; and coffee, though also grown in the north, comes chiefly from the central portions of the country, Rio de Janeiro, Minas, and Sao Paulo. Tobacco is grown largely, especially in Bahia. The exports consist solely of the raw produce of the soil, and owing to the vast extent of the country, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. The imports consist of every description of manufactured articles, but there are 149 cotton-mills, giving employment to 30,000 hands, and representing an invested capital of 200,000 of contos of reis. The enormous protective duties were again increased in 1887, 1893, and 1896. In 1897 there were 9,072 miles of railway open, and about 3,500 miles in course of construction. Length

of telegraph wires in 1897 about 11,376 miles; number of post offices, 2,862.

BULGARIA.

Prince, H. R. H. Prince Ferdinand of Saxe-Coburg, born 26 Feb., 1861; elected 7 July, 1887; m., 20 April, 1893, Princess Marie Louise of Bourbon, d. of Robert, Duke of Parma; (born 17 Jan. 1870, died 31 Jan. 1899); and has issue—Heir Apparent, Boris, Prince of Tirnovo, b. 30 Jan., 1894 (Prince Cyril, b. 17 Nov., 1895; Princess Eudoxie, b. 17 Jan., 1893; Princess Nadejda, b. 30 Jan., 1899).

President of the Council, Minister of Foreign Affairs and Public Worship, Ivãntchof.

Minister of Finance, Ténéf.

Minister of Interior, Radoslávof.

Minister of War, Col. Páprkof.

Minister of Public Works, Ways and Communications, Tóntchev.

Minister of Public Instruction, Vãtchev.

Minister of Commerce & Agriculture, Titorof.

Minister of Justice, Péshef.

The Principality of Bulgaria is under the

*Average exchange, 1898, one milreis=7½d.

suzerainty of Turkey. It was created by the Treaty of Berlin, 13th of July, 1878, and is governed by a Prince elected by the National Assembly or Sobranic, with a popular legislature and constitutional government.

Eastern Roumelia, likewise a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, and 998,431 inhabitants; it was intended to form an autonomous province, but since the successful revolution at Philippopolis, of September 18th, 1885, it has been incorporated with the principality, under the name of Southern Bulgaria, and the accomplished fact was recognised by the arrangement of April 5th, 1886, at Constantinople, whereby the Prince of Bulgaria was appointed at the same time Governor-General of Eastern Roumelia.

This Province, under the name of South Bulgaria, now forms an integral portion of the Principality, with the same rulers, laws, and mode of administration.

By modification of the Constitution 1893, there is now one deputy to each 20,000 inhabitants, 115 for the northern, and 51 for the southern province. Prince Ferdinand was elected on July 7, 1887, and is now recognised by the Six Great Powers as ruler.

United Bulgaria is bounded on the north by Roumania, from which it is separated by the Danube; on the west by Serbia and Macedonia; on the east by the Black Sea; and on the south by the Turkish province of Adrianople. It has a regular army of about 40,000 officers and men on a peace footing, and about 250,000, with 350 guns, in time of war. The navy consists of a torpedo gunboat and a few small steamers. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. The great ports are Varna (546 vessels of 424,819 tons in 1899) and Bourgas (1,228 vessels of 405,050 tons). There are (1900) 909 miles of railway open and 130 under construction; 3,270 miles of telegraph and 1,228 miles of telephone wires. North Bulgaria has an area of 24,237 square miles, and South Bulgaria an area of 12,706 square miles. The estimated population (1895) was 3,376,467. Population according to language or nationality and religion (census of August of January 1st, 1893).

Envoy Extr. and Min. Plen., Domingo Gana, 29 Queen's Gate Terrace, S. W.

Consul, A. G. Kendall, 148 Leadenhall St., E. C.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 18° 28' and 56° 35' S., and long. 66° 30' and 75° 40' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 290,741 square miles, with a population (1896) of about 3,300,000, exclusive of Araucanians, Bolivian and American Indians, numbering about 50,000. The boundary with Argentina has been determined by a treaty concluded at Buenos Aires on July 23rd, 1881, and recently revised and confirmed, but the actual boundary line has still to be marked. The population increases but slowly, and immigration, although to some extent encouraged, is inconsiderable. The number of tribal Indians is small. The Araucanians on the mainland voluntarily submitted to government in 1833, but several tribes on the islands and in the densely-wooded territory of Magellanes are still virtually independent. More has been done for education than in any other State of South America. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile-pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The mineral wealth is considerable; some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both

being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 40 days. There are 1,801 miles of railway open, 8,346 miles of telegraph, 484 post offices, and 5,250 miles of telephone, the last worked by an English Company. Contracts have been entered into for 600 additional miles in order to extend the trunk line through Araucania, and open up some of the mineral districts in the north as far as Huasco and Vallenar. These lines will be all Government property. A Civil War broke out in January, 1891, between the Congressionalists and the Presidential party, terminating, on August 28th, in the capture of Valparaiso by the former. The commercial marine numbers 191 vessels (40 steamers) of 90,738 tons. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 40 per cent. of the foreign trade is carried on with England. The regular army annually authorised by Congress consists of 5,000 men and 600 officers; the navy consists of about 12 large and 10 small ships of war. In 1896, at the request of the governments of Chile and Argentina, Queen Victoria consented to act as arbitrator in the boundary contentions of these two countries. The paper currency was worth about 17½% in 1900, and is redeemable at 18d. (gold) in 1901.

CHINA.

Emperor, Kuang Hsi, born 15 August, 1871; suc. 12 January, 1875; married 26th Feb., 1889.

Ruling Queen, His aunt, widow of the Emperor Hien-Feng, who died in 1875; the Queen was born in 1834.

Head of Tsungli Yamên, Prince Chung.

Inspector-General of Customs & Posts, Sir Robert Hart, Bart., G.C.M.G.

Envoy Extr. & Min. Plen. in London, H. E. Sir Chihehen Lotfengluh, K.C.V.O., 49 Portland Place, W.

Councillor of Legation, Sir Halliday Macartney, K.C.M.G., 3 Harley Place, Regent's Park, W.

Secretaries, Chang Tek-ye; Lo Tsung-yao.

China Proper (or the Eighteen Provinces) contains an area of 1,534,953 square miles, its length from north to south being 1,860 miles by 1,520 in breadth. It is bounded on the north by Mongolia and Manchuria; on the west by Turkestan, Tibet, and Burma; on the south by Burma, Tongking and the China Sea; and on the east by the Pacific Ocean, the Yellow Sea, and Corea. The northernmost part of this area is in lat. 44° 50' N., and the southernmost point, Yulin Bay, in the Island of Hainan, in 18° 10' N. On the east it extends to long. 126° 10' E., on the W. to 97° 30' E. But the possessions of China extend far beyond these limits, and include Manchuria, Mongolia, and Dzungaria in the north, and Eastern Turkestan and Tibet in the west. To the area of China Proper must be added those of her dependent territories, the whole extending to about 4,468,750 square miles, or rather more than one-twelfth part of the entire land surface of the globe. To this should perhaps be added Manchuria, Mongolia, and Tibet, and some other dependencies more or less closely connected with the empire. Within these limits are four great mountain ranges, whence proceed some of the largest rivers in the world, and these, with their tributaries, furnish an unrivalled internal water-communication. The Yangtze Kiang is about 3,200 miles in length, and is navigable to Ping-shan, 1,800 miles from its mouth, while its numerous affluents afford water communication throughout one-half the area of China proper; the West River is navigable by boats as far as Posé on the Yunnan frontier, but the Suowho or Yellow River, aptly called "Ch'na's Hwang," is of little value as a waterway, while the devastation wrought by the periodical overflow is one of the scourges of the country. The Amur River in Manchuria is navigated by light draught (Russian) steamers up to the town of Chita in Trans-baikal (Siberia). The most extravagant estimates of the population of this empire have been made at various times; it is generally thought that the so-called census returns of Chinese officials are untrustworthy, and that the population does not exceed a total of over 300,000,000, a recent official Yellow Book giving the number of people as 303,241,969. The density of population in some

parts is very great, but the statements regarding this require to be treated with caution. Of the 10,855 foreign residents in 1896, 4,362 were British, 1,439 Americans, 933 French, 870 Germans, 871 Portuguese, and 852 Japanese; and of the 672 foreign firms in China, 363 were British, 99 German, and 87 Japanese.

The chief imports are opium, cotton and woollen stuffs, kerosene, ginseng, and rice, whilst tea, silk, and silk manufactures, camphor, and sugar constitute the bulk of the exports. Thirty-one "Treaty" ports and two towns in Yunnan are thrown open to foreign commerce, and the customs are managed by European officials.

The NAVY: Four new cruisers, and a few vessels of no fighting value, are now in the possession of China. The ARMY at its full strength would number about 1,200,000 men, but of these only about 100,000 can be described as soldiers in the European sense of the word.

A war broke out in 1894 between China and Japan, in which the latter were completely victorious, and Formosa island with an indemnity of \$30,000,000 were the immediate fruits of their victory.

SHIPPING.—The mercantile marine (1897) consisted of 184 steam and 95 sailing vessels, with a total tonnage of 62,945; in 1899 the total tonnage of vessels entered and cleared at the treaty ports was 29,263,000; of these 61 per cent. were British, 13 per cent. Japanese, and 8 per cent. German.

COMMERCE.—The total foreign trade of China in 1899 amounted to 450,533,288 *Haikwan taels (£59,079,993), and in 1903 to 338,616,483 Haikwan taels. It was shared by the nations of the world as under in 1895:—

Country.	Millions.	Country.	Millions.
Great Britain	55.8	U. S. A.	27.0
Hong Kong	145.4	Europe, except Russia	27.5
India	25.2	Russia	17.1
Singapore	4.9	Japan	28.7
Australasia	1.2	Macao	6.2
Mauritius	3	Cochin China	1.4
Brit. America	2.5	Turkey in Asia	1.7
Great & Greater Brit. .	235.3	Foreign Countries ..	20.3

The principal exports to this country from China in 1899 were tea (£925,762), silk (£856,311), skins and furs of all kinds (£410,402), straw for plaiting purposes (£245,895), and bristles (£168,119); while the chief articles exported to China from the United Kingdom were cottons and cotton yarn (£4,267,801), woollens and worsteds (£400,552), machinery and mill work (£240,068), and metals (£704,640).

EDUCATION.—Nearly all the inhabitants are able to read more or less, with the exception of the women, of whom about 90 per cent. are absolute illiterates. In Peking, Tientsin, and Canton there are schools where a moderate education on western lines may be obtained, but these are not much frequented. The national universities have a unique syllabus and confine themselves to the Chinese classics. The pioneer of advance in educational and all other matters is Li Hung Chang, G.C.V.O., and the western-style schools are under the direction of Sir Robert Hart, G.C.M.G.

RAILWAYS.—310 miles, from Tientsin to Kin-Chow, are open and this line will shortly be

* The average exchange value of the Haikwan tael was (1887) 4s. 10d.; (1896) 3s. 4d.; (1897) 2s. 11d.; (1899) 2s. 0d.

completed as far as Newchwang, whence a line is projected; a line from Tientsin to Peking has been opened, another line, 80 miles long, connects Peking with Paotingfu to Ta-lien-wan, the capital of Chi-li province, being the first section of the great trunk line which is to connect Peking with Hankow on the Yangtse, and several other lines are authorised. An important agreement was signed by the United Kingdom and Russia on 28 April, 1899, in which the British Ambassador at St. Petersburg undertook not to seek for railway concessions north of the Great Wall, and not to oppose any concessions to Russia in that region; in return for this, the Russian Foreign Minister undertook not to oppose public or private concessions to Great Britain in the Yangtse Kiang basin. There are about 3,000 miles of telegraph.

CUSTOMS.—The Imperial Maritime Customs is the controlling board; this body consists of 854 Europeans, a large proportion of them British subjects, all under the control of Sir Robert Hart, C.C.M.G. In addition to the collection of dues at the Treaty Ports the board manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations.

FINANCES.—Consul General Jamieson, C.M.G., estimates the annual revenue as follows: land tax, 25,088,000 taels; grain tax, 6,562,000 taels; salt gabel, 13,659,000; likin, 12,952,000; customs (foreign), 21,989,000, (native) 1,000,000; duty and likin on native opium, 2,229,000; miscellaneous, 5,500,000; total, 88,979,000 taels, or about £14,829,000.

Consul at Southampton, Daniel Gutierrez.

Formerly New Granada—a Republic with Constitution, 5 August, 1886—consisting of 9 Departments—Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander, and Tolima—in the most N.W. part of South America, and includes the isthmus connecting the two continents, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 83° W. long., comprising an area of 502,000 square miles, and possessing an estimated population (1895) of about 5,000,000, of whom more than one-half are whites and half-castes. It has been subjected to several revolutionary changes and civil wars. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the latter is by far the largest, consisting of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold, silver, platinum, copper, iron, lead, coal, and precious stones. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The plains yield large quantities of hides, and jerked beef is obtained from the cattle feeding there. The chief exports are coffee, precious metals, and india-rubber. All religions are tolerated. The standing army consists of about 6,000 men, and the navy of 3 small gunboats and one cruiser. Railroads are in their infancy, only 346 miles being open in 1895, including the Panama line (47 miles), with about 6,500 (1894) miles of telegraph. The currency is paper, of which £2,571,863 was in circulation in 1895; rate of exchange \$12 to the £.

PANAMA

is one of the nine Departments of Colombia; its area is 31,890 square miles, the population (1895) about 311,000. There are 92 primary schools, at which about 4,006 children attend; and 8 public and private colleges, with about 500 pupils. The once famous pearl-fisheries in the Gulf of Panama yield now but little, but other beds are being worked near the Chiriqui Islands. The prosperity of the State depends upon its favourable geographical position, which facilitates transit from the Atlantic to the Pacific. The distance from Limon Bay to Panama on the latter is only 35 miles, and the highest elevation of the watershed does not exceed 278 feet. Until 1896 Panama and Colon were free ports, and from Jan. 1 1889 = general import duty = leviable of 10 per cent. silver on the gold value of all imports except liquors, which are provided for separately. A railway 47½ miles in length (fare first class, \$5, second class \$10 silver) joins the two oceans. The imports in 1898 were valued at £722,468 (one third from the United Kingdom), and the exports (principally bananas, indiarubber, live stock, cabinet woods, and medicinal plants) at £212,220.

The Panama Canal.—A ship canal was commenced in 1879 by Ferdinand de Lesseps, the diggings being begun in 1881, but in March, 1889, work ceased owing to lack of funds. An eight-lock canal has been decided upon and, with the work already done, the latest technical commission estimate it can be completed in 10 years, at an additional outlay of £20,000,000. Up to the date of stoppage nearly £60,000,000 had been spent, and, if this be added to the capital of the present working company, and to the amount estimated to be necessary for completion, the canal will eventually cost at least £83,000,000. The total length will be 46½ miles; depth, 30 feet; width at bottom, 72 feet, and at surface of water, 124 feet.

A new company (Compagnie Nouvelle du Canal de Panamá) was formed in Paris with a capital of 65,000,000 fr., and work commenced at Culebra on 1st Oct., 1894, and is still proceeding with about 3,000 workmen. A large amount of this capital has been spent upon the wharf at La Boca, the Pacific terminus, which is now complete. The company's concession expires on Oct. 31, 1904.

CONGO FREE STATE.

Sovereign, Leopold II., King of the Belgians.

Governor-General, Colonel Wahis.

Vice-Governor of Boma, M. Waugermée.

Secretary of State, Baron van Eetvelde.

Consul-General in London, M. Houdret, 13, London Wall, E.C.

Consul, J. T. Grein, 21 Mincing Lane, E.C.

The Congo Free State has sprung out of the discoveries of Sir H. M. Stanley, and the explorations carried on subsequently by an International Association founded at Brussels under the presidency of the King of the Belgians in 1876. The territory of this State includes the right bank of the Congo to within = few miles below Shonzo; both banks of the river thence to Manyanga; the left bank only = far as the Equator, and thenceforth both banks. In the east it extends to Lake Tanganyika. The total area included within its limits amounts to 802,000 square miles, with a population of probably not over 8,000,000. The mighty Congo, with its numerous navigable tributaries, constitutes the leading feature of this so-called State. It is navigable for large vessels from its mouth at Banana to Matodi (95 miles), where the European steamers discharge and re-charge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls, which it has been proposed to avoid by a railroad 300 miles in length. The railway was opened for traffic in July, 1893, to Stanley Pool, the first-class fare from Matadi being £20, and freight 10d. per kilo; = line of telegraph is being taken from Stanley Pool to Stanley Falls, and thence to Lake Tanganyika and Redjaf, the two branches being expected to reach their destinations in 1900. Above Leopoldville the river is navigable as far as the Stanley Falls, a distance of over 900 miles. The population of this vast territory consists of numerous negro tribes, of whom none have as yet attained a superior degree of civilization, whilst some still practise cannibalism. There are undoubtedly many fertile tracts, more especially along the rivers; but the barren mountain-land, which shuts out the coast from the more productive interior, necessitating as it does considerable expenses for the transportation of articles of commerce ill able to bear them, must always present a difficulty in developing the resources of the country. The exports consist mainly of rubber (three-fifths of whole), palm-kernels, palm-oil, ground-nuts, ivory, hides, and a few minor articles. The coffee plant, sugar-cane, and cotton grow wild, and tobacco has been planted with success. Iron, copper, and other minerals have been found. The King of the Belgians has endowed this State out of his private fortune to the extent of £40,000 annually. There is = special import duty on spirits; 10 per cent.

ad valorem is charged on salt and arms and ammunition, and 6 per cent. on other goods.

COREA.

Emperor, Li Hsi (King, 1864, proclaimed himself Emperor, 1897).

Chief Comm. of Customs, M'Leavy Brown, C.M.G. Consul Gen. in London, Wm. Pritchard Morgan, 1, Queen Victoria Street, E.C.

Corea, the bone of contention in the war between Japan and China (1894-5), is an Asiatic Kingdom consisting mainly of a peninsula lying to the north-east of China, between 34° and 43° N. lat. and 125° and 130° E. long., 600 miles from north to south, and 135 miles from east to west, with an area of about 80,000 square miles, and a population, according to the "last government census," of 10,528,937. Corea has only three neighbours, China, Japan, and Russia. It possesses several good natural harbours. Off its southern coast is the island of Port Hamilton, which was occupied by Great Britain in 1885, but subsequently evacuated, China at the time guaranteeing that it should not be occupied by any other power, and Russia undertaking not to occupy Corean territory under any circumstances whatsoever. The name Corea is derived through the Portuguese from *Ko-ri* (Chinese *Kao-li*), the title of the previous dynasty from 920-1392 A.D.; to the inhabitants themselves the country was known as *Cho-sen* until the autumn of 1897, when it was changed by Imperial edict to *DAIHAN*. Buddhism grafted on spirit and ancestor worship may be said to be the religion of the country. The people are tall, robust and good-looking, and belong to the Mongolian stock, their language being Turanian with the addition of many Chinese words; they are idle and unprogressive, so that the commerce of the country is falling into the hands of the Japanese and Chinese. The soil is very fertile, but only partially cultivated: rice, beans, and all kinds of grain are raised, as also tobacco, hemp, pea-cotton, &c.; ginseng, a medicinal root much affected by Chinese, is an important article of cultivation and revenue under Government monopoly. Gold, copper, coal, iron, and galena abound. An American syndicate is working the gold mines in the District of Wonsan, in Ping-an Province; a British Syndicate those in the District of Unsan (Gwendoline), North of the City of Ping-Yang; a German syndicate those at Tang-go-Kai, near Kim Song, in Kang-won Province. Native manufactures are in a very primitive condition; an excellent quality of paper is made from the bark of *Broussonetia papyrifera*. The country was by the Treaty of Shimonoseki declared independent of China. The finances of the country are in a state of great disorder. The army has recently been reorganized under Russian superintendence, and consists of about 5,000 men. By recent Treaties of Commerce, the capital, Séoul, and the ports of Chemulpo (Jen-chuan or Jinsen), Fusan, Wonsan (Yuen-san or Gen-san), Mokpo, Chinnampo, Kunsan, Masampo, and Songchia, are open to foreign trade; and a free trade mart is to be opened in Ping-Yang. The seaborne trade is almost wholly carried on in Japanese bottoms,

the number of Japanese vessels entered in 1899 being 2,448, with a tonnage of 656,950, out of a total of 3,715, with a tonnage of 814,344. In 1899 the trade of Chemulpo amounted to £792,277, exclusive of the value of gold exported.

A railway from Chemulpo to Séoul, 26 miles 7 chains in length, was opened during the year 1900; other lines are contemplated from Fusan to Séoul, and (narrow gauge) from Songdo to Séoul. There are one or two lines of telegraph and an inland postal system. Chemulpo contains four banks.

	1898.	1899.

COSTA RICA, REPUBLIC OF.

President, Rafael Iglesias, re-elected 8 May, 1898. Minister of Foreign Affairs, Justo A. Facio. Commerce and Finance, Juan B. Quiros. War and Marine, José A. Aguilar. Interior, Ricardo Pacheco. Consul-Gen. in London, John A. Le Lacheur, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1892) of 243,205. The chief exports are coffee (368,040 bags, 16,164,043 kilogram. 1899-1900), sugar, cacao-chouc, metals, sarsaparilla, dye-woods, hides, cedarwood, tortoise-shell, and fruits. In 1899, 2,962,771 bunches of bananas were exported, valued at £234,631. The chief ports are Punta-Arenas, on the Pacific, and Port Limon, on the Atlantic. The imports are dry goods, hardware, provisions, and machinery for drying and cleaning coffee from the United States, Germany, and England. A railway from Limon, on the Atlantic, to San José, the capital, 118 miles, and from thence to Alajuela, a further distance of 13 miles, is now open, and the chief imports and exports of the Republic are now made at Port Limon. There is a further line of railway, about 12 miles, from Punta-Arenas to Esparta on the Pacific, and a small line (4 miles) from Limon to Rio Banano. A considerable amount of English capital is embarked in the Republic.

CRETE (OR CANDIA).

Suzerain, H.M. the Sultan of Turkey.
High Commissioner, H.R.H. Prince George of Greece, appointed 26 Nov., 1898, for 3 years.

Crete (or Candia) is an island in the Mediterranean, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles; the population is 301,577, of whom 267,572 are Christians, the remainder being Mussulmans, speaking the Greek tongue. The island formed part of the early and later Roman Empire, and in 1669 was captured by the Turks, from whose rule it has been almost perpetually in revolt, there having been seven insurrections of note in 1821, 1865, 1868, 1877, 1889, and 1896.

A blockade was instituted by the Powers in 1897, and in November, 1898, vigorous action was taken by Great Britain, Italy, France and Russia, who remain responsible for the island. All Turkish troops have been withdrawn and the island has the prospect of impartial administration under the high suzerainty of Turkey, but independent of its suzerain under the High Commissioner appointed by the Powers. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are wheat and fruit; and wool, soap, olive oil, and cheese are the principal exports.

The chief towns are Candia (pop. 22,331), Canea, the capital (pop. 20,972), and Retimo (pop. 9,308).

Canea—Consul-General, R. W. Graves, C.M.G. £900

Vice-Consul, P. Wilkinson 300

Candia—Vice-Consul, W. E. Lawson.

Retimo—Vice-Consul, Teodoro A. Triffilli.

A Kingdom of Northern Europe, and the smallest of the Northern States, with a Constitution dated 28 July, 1866; consisting of the islands of Zealand, Funen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,789 square miles, with a population in 1890 (including Faroë Islands) 2,185,335, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter; the value of the latter exported to the United Kingdom in 1898 being £7,329,831. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. Its chief exports are those of agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle, the latter principally to Great Britain. Denmark possesses an army of 50,522 men on the war footing; a navy consisting of 37 steam-vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men; and a mercantile marine of 3,696 vessels, with a tonnage of 356,108. There are (1897-8) 1,530 miles of railway and 3,564 miles of telegraph line. There is a free harbour (Fris-havn) at Copenhagen, opened 9th November, 1894.

 San Domingo, formerly the Spanish portion of the island of Hayti, is the oldest settlement of European origin in America, having been founded in 1494 by Bartolomeo Columbus. The capital city contains the Cathedral and Columbus's residence. It comprises an area of about 29,596 square miles, with an estimated population of nearly 500,000. The chief products are tobacco, coffee, sugar, cocoa, mahogany, and a great variety of other furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, and divi-divi. Sugar, the most recent industry, is now the most important. The minerals are gold, copper, and iron. There are about 100 miles of railway, and telegraphic communication has been established throughout the Republic, which is connected by cable with North and South America.

CAPITAL, San Domingo. Population, 18,000.

A State of South America, on its western side, being that portion of the original Republic of Colombia which lies on each side of the Equator, extending from lat. 1° 38' N. to 6° 26' S. (according to

the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70° and 81° W. long., comprising an area of 120,000 English sq. miles. It has a population of about 1,270,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 16 provinces and one territory. In 1891 there were 57 miles of railway open. An arrangement was recently made with the bondholders for the conversion of the Debt, but the Dictator, in 1895, suspended payment pending a further and less onerous arrangement; meanwhile a 10 per cent. surtax upon import dues is being collected and deposited in a Guayaquil bank. Guayaquil is the chief port: population, 1896, about 50,000. In 1890 the customs duties amounted to £450,162.

The population of the other chief towns is approximately as follows: Quito, 40,000; Cuenca, 25,000; Riobamba, 12,000; Ambato, Loja, and Latacunga, 10,000.

The GALAPAGOS ISLANDS (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

(A)—EGYPT PROPER.

Khedive or King of Soudan, Abbas Pasha, G.C.B., G.C.M.G., b. 14 July, 1874; suc. 7 Jan., 1892.
Heir apparent, Abdul Mounem Bey, only son of the Khedive, born 20 Feb., 1899.
President of Council and Minister of Interior, Mustapha Fehmy Pasha, G.C.M.G.
Foreign Affairs, Boutros Pasha Ghaly, K.C.M.G.
Minister of Justice, Ibrahim Fuad Pasha.
War and Navy, Abani Pasha.
Public Works and Instruction, Fakhry Pasha.
Minister of Finance, Mazloum Pasha.
Financial Adviser to the Khedive, J. L. Gorst, G.B.
Sirdar of the Egyptian Army, Major-General Sir Reginald Wingate, K.C.B., K.C.M.G., D.S.O., R.A., A.D.C.

Judicial Adviser to the Khedive, M. McLlwraith. Commanding British Troops, Maj.-Gen. Hon. R. A. J. Talbot, C.B.

President, Government Railways, Lt.-Col. E. P. C. Girouard, R.E., D.S.O.

Director-General of Customs, A. Chitty.

British Controller-General, Daira Sanieh Administration, Harry Crookshank Pasha, F.R.C.S.

Controller, Port of Alexandria, Sir George Morice Pasha, K.C.M.G.

A country in the north-east corner of the Continent of Africa, was made part of the Turkish Empire in the latter part of the 12th century. Its history became interwoven with that of Europe when the army of Napoleon the Great entered into possession in 1801. British successes drove out the invaders, and in 1803 the newcomers also evacuated the country, which they endeavoured to restore to the control of the Sultan of Turkey; but after the abandonment by Great Britain a struggle arose between two Turkish parties, the Albanians and the Ghuzz, the former being completely victorious under their leader *Mehemet Ali*, who in 1811, in spite of the attempted intervention of Great Britain, obtained the supreme power, and ruled the country. This ruler was sometimes the ally, sometimes the enemy, of his suzerain the Sultan, until in 1833, after a succession of victories by land and sea, he obtained from the Sultan the title of *Vali* or Governor, and was confirmed in his rule in return for the payment of an annual tribute to the Porte. His reign was marked by the grant of a constitution, and by a more or less just administration until his mind gave way in 1848, when his son *Ibrahim* succeeded. The new ruler only lived for two months after his accession, dying a short time before his father in 1849. *Abbas* (1848-1854), son of *Mehemet's* third child *Toussou*, succeeded, but entirely neglected the affairs of government, being followed by *Said* (1854-1863), *Mehemet's* fourth son. This ruler attempted to restore the Government to the state of efficiency which had marked his father's rule, and carried out many reforms, his reign being marked by the concession for the Suez Canal. He was succeeded by *Ismail* (1863-1879), who by a firman of the Sultan (14th May, 1867) was granted the title of *KHEDIV MIRR*, or Ruler of Egypt, the previous rulers having had the title of *Vali* or Governor. In the early years of his reign the government was most successfully administered, and the Egyptian dominions very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 square miles, with a population of about 16,000,000. But on the heels of annexation and conquest followed misgovernment and financial embarrassment, until in 1879 the expenditure (£10,500,000) exceeded the revenue (£8,500,000) by £2,000,000, the service of the debt (£80,500,000) accounting for more than three-fifths of the total expenditure. At this point the Governments of France and Great Britain intervened, and forced *Ismail* to abdicate, appointing his son *Mohamed Tewfik* (1879-1892) to succeed him. By a decree of 10th Nov. 1879 a *Controller-General* was appointed by each Power, the late M. de Blignières being nominated by France, and Major Evelyn Baring, C.S.I. (now Viscount Cromer, C.C.B., &c.) by Great Britain, their principal duty being the supervision of the finances, towards which unsuccessful efforts had already been made under British advisers after 1875. In 1882, however, the work of reform was interrupted by a military

revolt, headed by an officer of the Egyptian army (*Arabi Pasha*), and, the French Government declining to co-operate, a British expedition was despatched to re-establish the authority of the Khedive. The port of Alexandria was bombarded by Sir Beauchamp Seymour (July 11th), and the rebel army routed at Kassassin (Aug. 28th), to be completely annihilated at Tel-el-Kebir (Sept. 23rd) by Sir Garnet Wolseley. The Dual Control was abolished by a decree of the Khedive (18th Jan., 1883), and a British financial adviser appointed as a member of the Khedivial Government.

Immediate steps were taken to re-establish the Khedive's authority, and a force raised to replace the army which had been disbanded; but during the disturbances in the north a revolt had broken out in the southern provinces, headed by Sheikh Mohamed Ahmed of Dongola, who proclaimed himself a Mahdi, or prophet, foretold by the Moslems. This revolt was at first unchecked, and the victorious Sheikh advanced northward and threatened the security of the Khedivial Government. Col. Hicks, who had been appointed to command the newly formed and undisciplined Egyptian army, was defeated and killed near El Ubeid (3rd Nov., 1883) when advancing to meet the rebels, and, upon receipt of this intelligence, part of the British troops, which were about to be sent home, were retained in the country. General Gordon, the hero of the Chinese rebellion, was despatched to Khartoum (Jan., 1884) as Governor-General of the Soudan, but this step was not followed by immediate movements of troops against the rebels, and in 1885 General Gordon fell at the capture of Khartoum (26th Jan.) before a relief expedition, sent down the Nile, reached him. From this point the rebels gained a complete hold on the southern Soudan, and, although checked by repeated defeats in their advance northward, no definite steps were taken at that time to recover the lost provinces.

Meanwhile the work of internal reform was being carried on, and in accordance with a decree of 1880 an International Commission investigated the financial affairs of the country, until in 1890, with the consent of the European Powers, a scheme of conversion and unification was carried out by which the annual charge of the Egyptian debt was reduced to nearly one-half its former proportions, the balance being freed to meet internal expenditure, while the revenue was increased by the efforts of successive financial advisers.

In 1883 the Khedive created a Legislative Council of 30 members, and a General Assembly, consisting of the Legislative Council, the six Ministers of State, and 46 members elected by the people. These bodies, however, were, and still are, mainly consultative, the real legislative power resting with the Khedive and his Ministers.

In addition to the reforms in the civil administration the Egyptian army was taken in hand. In 1883 Sir Evelyn Wood, F.C., was appointed *Sirdar*, or Commander-in-Chief, and, with a staff of British officers, the whole body was reorganised and trained. Sir Francis Grenfell became *Sirdar* in 1885, to be succeeded in 1892 by Brigadier-General Herbert Horatio Kitchener, C.B., C.M.G. (now Lord Kitchener of Khartoum). In Dec., 1899, Lord Kitchener was succeeded by Col. Sir F. R. Wingate, K.C.B., K.C.M.G., D.S.O., A.D.C., who had been Chief Intelligence Officer during the campaign of 1896-99, and afterwards

Adjutant-General of the Egyptian Army. The command of the army is made by Khedivial decree with the consent of the British Government.

In 1892 (7th Jan.), the Khedive Mohamed Tewfik died, and was succeeded by his elder son *Abbas*, the present ruler.

The position of Egypt is, therefore, as follows:—nominally a province of the Ottoman Empire it is actually autonomous under the Khedive, subject to the annual tribute (£682,092) payable to the Sultan; it is at the same time dependent for its existence as a sovereign State upon the will of stronger Powers, Great Britain being the dominant factor since the abolition of the Dual Control in 1883.

For the purposes of local government the country is divided into governorships and provinces, the latter being sub-divided into districts. Justice is administered by (1) Religious Courts; (2) the Mixed Tribunals established in 1875, to deal with questions arising between foreign inhabitants of different nationality and civil suits between natives and foreign subjects; (3) the Consular Courts, by which criminal charges against foreign subjects are investigated; and (4) the Native Tribunals containing Egyptian and foreign judges, dealing with cases of first instance, and also with appeals from their own lesser courts. A British Judicial Adviser to the Khedive watches the proceedings of the latter.

The population in 1882 was 6,814,000, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,716 French, 8,022 Austrians, 6,118 English, &c.), and by the census of 1897, Egypt Proper (*i.e.* up to Wadi Halfa) contains 9,734,000 inhabitants, of whom 112,500 were foreigners (38,000 Greeks, 24,500 Italians, 14,000 British subjects, 5,000 British army, 14,000 French subjects, 7,000 Austrians, 3,200 Russians, and 1,300 Germans).

The cultivated portion of Egypt is confined to the country annually inundated by the Nile, or capable of being irrigated by canals. The great irrigation works, to which Egypt may be said to owe its existence, are being further extended by the construction of two dams across the Nile at Assuan and Assiut for the storage of water. These works will cost £2,000,000, and £1,180,000 will be spent upon subsidiary canals and drains.

Agriculture, &c.—Its products consist of cotton, millet, maize, wheat, rice, melons, gourds, sugar, hemp, &c. No metals have been worked within recent times in any considerable quantity; but salt, petroleum, nitre, marble, red granite, Oriental alabaster, turquoises, and limestone are found.

Trade.—The chief imports are cotton stuffs, coals, provisions, woollens, coffee, tobacco, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cottonseed (85 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, cigarettes, ivory, and ostrich-feathers. Of the entire trade over 53 per cent. is carried on with the United Kingdom, 11 per cent. with Turkey, 8 per cent. with France and Austria.

Railways and Telegraphs.—There is a railway from Alexandria to Assuan, just below the first cataract, and an extension from Wadi Halfa, below the second cataract, to Khartoum was completed in 1899. An extension from Berber to Suakim is contemplated. The total length of these lines was 1,216 miles on 31 Dec. 1899, and 11,284,284 passengers and 3,055,897 tons of goods were carried in 1899, the total receipts being £E2,112,065 and the working expenses £E950,429. From the ter-

minus to Luxor the standard gauge is used, but thence the gauge is 3ft. 6in. as in the extensions from Wadi Halfa to Kerma and Wadi Halfa to Khartoum. There are (1899) 2,058 miles of telegraph with 9,324 miles of wire, over which 2,994,332 messages were transmitted in 1899.

Defence.—The British army of occupation numbers about 5,000 men, but in the battle of Omdurman 8,000 British troops were used. The Egyptian forces at that time were 17,000 strong.

Finance.—Under the able administration of Sir Elwin Palmer, until lately financial adviser to the Khedive, the finances of the country have assumed a thoroughly sound aspect, and since the year 1891 there has been a large net surplus of revenue over expenditure, that for 1899 amounting to £E1,161,559. The debt was converted in a very economical fashion in 1890, and reserve funds have been established. These funds are as follows: (1) Formed by the Conversion of the Debt, and only available for payments with the consent of the Powers; (2) The General Reserve Fund, which may be applied to certain specified objects by consent of the *Caisse de la Dette*; (3) the Special Reserve Fund which is at the free disposal of the Egyptian Government. The last named showed, at the end of 1897, a deficit of £E570,847, whereas, at the end of 1899 there was an available balance of £E299,509, chiefly owing to the abandonment of all claim to the advance of £E778,832, made to the Egyptian Government by the House of Commons which, until 1893, was regarded as repayable.

THE SUEZ CANAL.

The Suez Canal was opened in 1869, the British Government acquiring by purchase, 25 Nov., 1875, shares to the amount of £4,000,000 (the present value being £26,451,000). The total length of the canal is 99 miles, with a width of 327 feet for 77, and 196 for the remaining 22 miles; the depth is 26 feet throughout. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war.

Kordofan, Capt. J. R. O'Connell (actg.).
Administrators of Second-class Provinces:—
Wadi Halfa, Capt. Hon. C. James.
Suakin, Major H. I. Godden, D.S.O.
Fashoda, Capt. R. M. Saunders (actg.).

The history of the conquest of the Soudan Provinces, and of part of Equatorial Africa, has

been related in the above article, as also their abandonment by the British Government in face of the strong resistance offered by the religious fanatics under the Mahdi Mohamed Ahmed, a rebellious Sheikh from Dongola, at whose death Abdullah al Taishi was appointed to succeed, with the title of Khalifa. The rule of both was a military despotism, marked by horrible excesses, and the country, which had been brought into a fair state of cultivation, was laid waste. The headquarters of the despotism was Omdurman, a city built opposite the city of Khartoum, razed to the ground after its capture in 1885. The Egyptian Army had, in the years since its reorganisation (1883-6) been brought to a very high state of perfection by its successive Sirdars and their staffs, and in 1896 Sir Herbert Kitchener, who had been appointed Sirdar in 1892 (after a series of victories over the rebels when Governor of the Red Sea Littoral 1886-9), advanced from Assuan with an Anglo-Egyptian force, and after defeating the enemy in numerous engagements principally at Firket and Hafir recovered the province of Dongola. In 1897 the province of Berber was recovered and the desert railway from Halfa to Abu Hamed completed. On the 8th April, 1898, General Kitchener defeated and captured the Emir Mahmoud one of the Khalifa's principal generals, at the battle of the Atbara river. After this reverse the Khalifa retired to Omdurman, before which town General Kitchener gained a decisive victory (2nd September, 1893) against a force more than twice as numerous as his own. The city of Khartoum was immediately occupied, and a religious service held in memory of General Gordon on the spot where he had fallen, the British and Egyptian flags being hoisted side by side on the walls. The Sirdar subsequently carried the flags up the Blue and White Niles, encountering on the former, Abyssinian posts near Roseires, and on the latter, a French force at Fashoda, whither the commandant (Major Marchand) had penetrated from the west coast of Africa. After short negotiations, arrangements for delimitating the frontiers were made with the Emperor Menelik, and the French evacuated Fashoda, a convention being signed by Great Britain and France, delimitating the respective spheres of influence. On 24 Nov., 1899, about 14 months after the victory at Omdurman, Col. Sir F. R. Wingate overtook the fugitive Khalifa and his remaining Emirs at Om Debrikat and entirely annihilated the Dervish army; among the slain were Abdullah and the principal Emirs. Osman Digna, who escaped on that occasion was afterwards captured near Suakin, and is now in captivity.

During the period of abandonment, 1885-1896, certain portions of Egypt's former dependencies had been recovered from the Dervishes by other countries. The Italian Government proclaimed a protectorate over the kingdom of Ethiopia, and placed a garrison in the Egyptian town of Kassala, but a vigorous campaign was carried on against the new comers by Menelek of Shoa, who had established himself as king of all Ethiopia. The result of the campaign was unfavourable to Italian arms, and the protectorate was withdrawn and a treaty of peace concluded with Menelek. A treaty was also signed by Great Britain and the ruler of Ethiopia, defining and enlarging the boundaries of the latter kingdom. The Italian Government handed over the town and district of Kassala to an Anglo-Egyptian representative, and are now consolidating their

colony of Eritrea, and have recently defined their frontier with Abyssinia.

The extent of the Soudan Provinces is defined in a convention signed, on 19th Jan., 1899, by Viscount Cromer and the Egyptian Minister for Foreign Affairs, laying down the principles which are to underlie the administration. The territories affected are all those lying south of the 22nd parallel of latitude, which have never been evacuated by Egyptian troops since 1832, and those which, if evacuated and temporarily lost, have since been, or shall henceforth be, reconquered by the two Governments acting in concert. The Government is to be administered by a Governor-General in supreme civil and military command, appointed and removable by Khedivial decree with the consent of the British Government. The Governor-General may legislate by proclamation with the consent of the Governments, and the territories do not fall under the jurisdiction of the Mixed Tribunals. The British and Egyptian flags together are used in the Soudan.

The seat of Government is Khartoum, where a palace for the Governor-General, Government offices and barracks are being built or completed. On 5 Jan., 1899 the foundation stone was laid of the Gordon Memorial College, for the establishment of which Lord Kitchener obtained, by public subscription in the United Kingdom and Greater Britain, the necessary funds. One of the largest and finest of modern mosques is being built at Khartoum, as that city will be the centre of Mohammedan religion in the Egyptian Sudan. Hotels are being built and in 1901 *wagon* *ais* will run on the Soudan Railway.

The territories are divided at present into six first-class provinces, Dongola, Berber, Khartoum, Sennar, Kassala, and Kordofan, and there are three second-class provinces, Wady Halfa, Suakin, and Fashoda. Communication is effected by means of the railway, which reached Khartoum in 1899; and at the close of the military operations navigation was found possible of the river Sobat, a tributary of the White Nile. During 1900 expeditions were made up the White Nile to discover the navigable channel to the Lakes, and, after tedious work under Major M. Peake, the *su d* obstructions (fourteen in all) of the Bahr el Jebel were cut through and communication established by steamer with Uganda and the Congo Free State stations on the Nile, and such communication will be possible at all seasons of the year.

The cost of military operations in the Soudan in the years 1883-86 amounted to £7,031,310, and on the expedition by which these territories were recovered, the sum of £798,802 only was expended, excluding the sum of £215,000 provided in 1897-8 by the Egyptian Government.

The territories are not expected to provide an income equivalent to their cost for some time; long periods of war, famine, and disease have caused great ravages amongst the population, and some years must elapse before a substantial revenue may be expected, the cost of administration being meanwhile borne by the Egyptian Government.

CAPITAL, Khartoum. Population, about 6,750, consisting of workmen, &c., and the garrison. The population of Omdurman, with the garrison, is about 29,000. Distant from London via Cairo, 4,196 miles. Telegrams, 1s. 10d. to 2s. 3d. per word.

FRANCE.

President of the Republic, Emile Loubet, born at Marsanne (Drôme), 31 December, 1833; elected 18th February, 1899 (in place of Felix Faure, deposed). Formerly President of the Senate £24,000

Premier & Min. of Interior, M. Waldeck-Rousseau.

Minister of Finance, M. Caillaux.

Minister of Public Instruction, M. Georges Leygues.

Minister of Justice, M. Monis.

Barrière; *Turkey*, M. Constans; *U.S.A.*, M. Jules Cambon.

Ambassador in London, M. Paul Cambon, Albert Gate House, Hyde Park.

Minister Plenipotentiary, M. Leon Geoffroy.

1st Secretary, M. Emile Daeschner.

2nd Secretaries, Vicomte H. de Manneville; M. de Seynes.

3rd ditto, M. A. de Fleurian.

Attachés, M. Henri Cambon; Comte de Montholon.

Military Attaché, Col. Le Comte du Pontavice de Heussey, c.v.o.

Naval Attaché, Captain Fiéron.

Secretary Archiviste, M. Joseph Knecht.

Consulate-General, 4, Christopher Street, Finsbury, E.C.

Consul-General, M. André Lequeux.

Consul, M. C. Perier.

Chancellor, M. Barthélemy.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 204,146 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhone; the principal forests, Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent (1,053,978,000 gallons of wine were produced in 1899), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider making is also an important industry (458,382,495 gallons in 1899). The chief agricultural products are wheat,* barley, rye, maize, oats, potatoes, beetroot for the manu-

* France is the largest wheat-growing country in Europe, the average crop for the last six years amounting to 316,803,623 bushels (1895, 329,911,299; 1896, 329,292,644; 1897, 238,975,242; 1898, 352,264,410; 1899, 354,765,140; 1900 (estimated), 293,625,000.

facture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1893, 29,624,000 French tons), pig iron (1893, 2,328,000 French tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. Its oyster fisheries are an important industrial feature. The increase of population is very slow, as will be seen from the following table:

Year.	Population.	Year.	Population.
1700	19,660,320	1881	37,672,048
1801	27,349,003	1886	38,218,903
1821	30,461,873	1891	38,313,192
1856	36,039,304	1895	38,133,385
1866	38,007,064	1896	38,517,975
1872	36,102,922		

France has always been attractive to foreigners, of whom (1900) 1,051,907 were resident there, or 2.73 per cent. of the legal population; this number included 395,498 Belgians, 291,886 Italians, 90,746 Germans, 36,249 English, and 14,230 of the latter residing in the Department of the Seine. There are about 517,000 Frenchmen in the Colonies and in various parts of the world, and a colonial population of (according to the estimates of the French Ministry of Commerce) 31,953,774; but with French protectorates 77,139,000, including France. Even the comparatively small increase of the population now shown is largely due to immigration from other countries, but, as the figures below show, there is a slight preponderance of births over deaths for 1898:—

	Births.	Deaths.	Births.	Deaths.
1889	886,579	794,933	1895	834,173
1890	838,019	876,000	1896	865,586
1893	874,000	867,000	1897	859,107
1894	855,000	815,000	1898	843,933
				810,073

In 1881 there were 650,000 Protestants and at present there are about 50,000 Jews in Paris.

The effective strength of the Army under the colours in 1898 was 589,541 (excluding a gendarmerie of about 25,913 men), with 141,999 horses and 3,200 field guns. On war footing the army could be raised to over 3,000,000 men. The NAVY consisted in 1900 of 33 battleships (5 *building*), 4 first-class cruisers (10 *building*), 22 protected cruisers (1 *building*), 12 unprotected cruisers, 16 coast defence, 21 torpedo gunboats, 2 T.-B.-D. (20 *building*), 136 first-class torpedo boats (92 *building*), including 11 and 10 submergable vessels, with 1,889 officers and 44,344 men. The educational system is governmental, and presided over by a Minister of Instruction, part of the expense being defrayed by the State. In addition to the faculties of Theology, Law, and Medicine, the Lycées, the Colleges, the Naval and Military Schools, and the Ecole Polytechnique, the State supports numerous establishments for instruction in special branches of knowledge. The system of railways in France is very extensive; they are almost entirely *concedées*, and become State property after the expiration of the concession. The length open for traffic in 1899 was 26,038 miles, the total receipts for 1899 from passenger and goods traffic, &c., being £55,960,000, and the number of passengers carried 410,000,000. The length of telegraphs is 62,862 miles. There is a mercantile marine (1898) of 15,615 vessels, of 900,288 tons (of which 14,406 are sailing ships, representing 414,673 tons; 12,339 being under 30 tons).

The principal imports are wool, silks, wines (the imports of which exceed the exports), coal,

cottons, timber, and cereals. The exports rank thus:—Silk tissues, woollen tissues, wines, woollen yarn, cotton tissues, silk, toys, and hide.

The trade in 1899 was shared thus:—

Exports to (1899, 3,899,142,000 francs)—

Great Britain	£47,224,960	U.S.A.	£9,451,800
Belgium	22,214,880	Algeria	
Germany	17,137,660		

Imports from (1899, 4,217,150,000 francs)—

Great Britain	£21,357,280	Belgium	£12,426,880
U.S.A.	15,989,360	Algeria (not yet published)	
Germany	13,785,640		

The chief articles exported to the United Kingdom in 1899 were valued in francs at:—

Silk tissues	126,893,000	Wool	29,497,000
Woollen "	121,747,000	Toys, &c.	20,612,000
Wines	65,732,000	Feathers	30,053,000
Raw Sugar	53,570,000	Fruit (Table)	14,213,320
Refined "	18,175,000	Eggs	12,793,000
Butter	49,879,000	Cotton Tissues	17,310,000
Milinery	80,746,000	Vegetables	11,443,000
Leather Goods	39,931,000	Meat & Poultry	9,958,000
Copper	39,974,000	Parisian Articles	10,918,000
Dressed Skins	50,489,000	Clocks & Watches	3,702,000

Brandy, Liqueurs		Biscuits, &c.	2,219,000
&c.	22,443,000	Cereals & Flour	3,647,000
Raw Hides, &c.	17,435,000		

The chief articles imported from the United Kingdom in 1899 were valued in francs at:—

Coal	113,750,000	Leather goods & Hides	5,522,000
Woollen Goods	25,403,000	Steel, Iron, Cast	
Cotton Goods	13,002,000	Chemical product	21,697,000
Cotton Yarn	3,853,000	Linen Tissues	8,676,000
Linen made up		Tools & Hardware	6,802,000
Garments	1,937,000		
Machinery	31,995,000		

The National Debt is stupendous, the nominal capital of the Funded Debt amounting in 1899 to £1,197,933,252 (the total of the Floating Debt being £40,619,709 in 1899), the heaviest debt ever yet incurred by any nation in the world.

The Interest on the Funded Debt in 1898 and 1899 was as follows:—

	1898.	1899.
Perpetual 3 per Cents.	£18,255,638	£18,241,636
Perpetual 3½ per Cents.	9,595,536	9,505,536
Redeemable 3 per Cents.	4,663,994	4,634,097

Total.....£32,425,168

1898. 1899.

Revenue (Budget) * * * * *	£136,944,379	£138,709,382
Expenditure (Budget)	136,182,520	138,018,861
Total imports	178,880,000	168,686,000
Total exports	140,440,000	155,525,680
Imports from U.K.	20,225,209	21,257,280

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 2½° W. and 8½° E. longitude and between 37° and 32° N. latitude, covering an area of about 180,000 sq. miles, with a population, in 1896, of 4,429,421, of whom 318,317 were French and 446,343 other Europeans. The revenue in 1900 was estimated at £2,216,000 and the expenditure at £2,858,000, the imports for home consumption being valued at £1,160,388 and the domestic exports at £10,621,728. The exports consist mainly of wheat and other cereals, wine, esparto grass, olive oil, fruit, vegetables and tobacco. Iron, copper, quicksilver, zinc and lead mines are being worked, and deposits of phosphates have been discovered in the department of Constantine. On

* Budget figures for 1899, and † for 1900.

31st Dec., 1896, there were 2,925 miles of railway open for traffic, and in 1893 the number of sailing vessels entered and cleared at Algerian ports was 1,834 of 1,101,668 tons. The principal town is Algiers, the capital (population, 1897, 150,000), ■ most important coaling station and much frequented ■ a health resort; other large towns are Oran, Constantine, Bône, and Tlemçen.

CAPITAL, Paris. Population (1899), 2,511,629.

Honfleur—Vice-Cons., J. R. D. Charlesson
Treport—Vice-Consul,
Trowville—V.-Cons., Alex. G. B. Bax
La Rochelle—Consul, R. S. Warburton	500
V.-Cons., C. J. Hans Hamilton
Sables d'Olonne—V.-C., T. Selièvre

St. Nazaire and Nantes—Vice-Consul, Harry Elford Dickie
Tonnay-Charente—Vice-Consul, E. Rizat
Marseilles—Consul, M. C. Gurney	£800
Vice-Consul, N. C. Haag
Chaplain, Rev. W. F. C. Gurney, B.A.
Cette—Vice-Consul, Gustave Espitalier
Hyères—Vice-Consul, G. Corbett
Lyons—Vice-Consul, W. L. Nott
Toulon—Vice-Consul,	50
Martinique—Consul, James Japp
Guadaloupe—Vice-Consul, J. E. Devaux
New Caledonia—Cons., John G. Haggard	800
Vice-Consul, Robert Erskine
Nice—Consul, Sir James C. Harris, K.C.V.O.	500
Vice-Consul, L. Wookey
Cannes—Vice-Consul, John Taylor
Menton—Vice-Consul, Hector H. Hill
Pondicherry and Karikal—Consular Agent, R. G. de Vismes
Réunion—Consul, E. G. B. Maxse, C.M.G.	900
Rouen—Consul, Roger Gage	300
Vice-Consul, M. T. Langdon
Saigon—Consul, Charles F. Tremlett
Tahiti—Consul, R. T. Simons	600
Tamatave—Consul, Anatole Sauzier	800

Paris is distant from London 267 miles; transit, 8 to 9 hours. Telegrams, per word, 2d.

FRENCH COLONIES AND DEPENDENCIES.

The Colonial possessions are divided politically and administratively into three distinct groups, as—I. Colonies under the *Senatus Consultum* of 1866; II. Colonies under the régime of Decrees; and III. Protectorates and Colonies under French Suzerainty. In Group I. are included Martinique, Guadaloupe, and Réunion; in Group II. Senegal, French Guiana, French possessions in India, St. Pierre and Miquelon, Cochinchina, New Caledonia, and Tahiti. The French possessions in India return a Senator and a Deputy to the Parliament of the Republic, and Senegal, French Guinea, and Cochinchina each return a Deputy. In Group III. are included French Sudan, French Guinea, Ivory Coast, Dahomey, French Congo, French Somaliland, Mayotte, Madagascar, Tonkin, and Cambodia. The government of all three groups is centralised, but ■ certain amount of local self-government is allowed to almost all the above possessions.

Until the year 1853 all the Colonies were under the charge of the Minister of Marine, but in that year a "Department for Algeria and the Colonies" was inaugurated. In 1860 they reverted to the Ministry of Marine, and in 1881 ■ Under-Secretary for Commerce was appointed in charge of the Colonial possessions. After further vicissitudes, the Department again reverted in 1893 to the Ministry of Marine, but in 1894 a distinct Ministry of Colonies was organised.

The government estimate of the area in 1897 was 2,981,300 square kilometers, and the population was estimated at 32,683,273.

French Colonial Expenditure.			
1891	£2,843,627	1896	£3,117,052
1892	3,423,112	1897	3,629,051
1893	3,221,630	1898	3,866,065
1894	3,413,940	1899	3,595,833
1895	3,434,414	1900	3,555,178
Trade of the Colonies.			
		1888.	1897.
Imports	£7,837,176	£10,147,000	
Exports	8,238,976	9,900,000	
Total	£16,075,252	£20,047,000	

Trade with the United Kingdom.

	1898.	1899.
Imports	£612,824	£1,511,283
Exports	662,569	1,404,302
Total.....	£1,275,393	£2,915,585

Geographically, the French Colonies are divisible into four main groups, according to their situation in *Asia, Africa, America, and Oceania*.

I. African: The French African Empire consists of the colony of Algeria and the protectorate of Tunis in the north; in the north-west of an immense tract of country, in four main divisions, on the coast line (French Guinea, Dahomey, Ivory Coast, and Senegambia), penetrating inwards to meet a fifth division (French Soudan), which forms a hinterland for all the colonies on the coast. In West Central Africa the French Congo and Gaboon join, through protected territory, the French protectorate of the Sahara, which meets the common hinterland of the north-western possessions. This common hinterland also stretches northwards, and stands in the same relation to the colony and protectorate in the north (Algeria and Tunis), so that the whole north-western portion of the vast continent, except where occupied by Morocco and Tripoli, and Spanish, Portuguese, British, and German possessions, is claimed by France. In the east France possesses a portion of Somaliland and the island of Madagascar in the Indian Ocean with certain dependencies. In 1899 a convention was signed by Great Britain and France delimitating the boundaries of co-terminous territory in the west, and, owing to the British advance in the Nile region, delimitating their respective spheres in East and Central Africa.

On the East Coast is FRENCH SOMALILAND (capital Djibouti), with the two ports OBOCK and DJIBOUTI, and extending round the GULF OF TAJOURAH; with its dependencies the colony contains about 45,000 square miles and about 250,000 inhabitants. This territory gives France intercourse with the kingdom of Ethiopia, to a town of which country (Harrar) a railway from Djibouti is being built. At Djibouti a jetty 300 meters in length is being constructed. The United Kingdom exported goods into the colony to the value of £30,000 in 1898.

Off the East Coast, in the Indian Ocean, is the vast island of MADAGASCAR, the fourth largest island in the world, being 975 miles long and 350 miles broad at its greatest width. The total area is about 230,000 square miles, and the population 5,000,000 to 6,000,000, the Hova being the dominant tribe. Christian missions have been active in the island, and about 450,000 of the natives are Protestants, and about 50,000 Roman Catholics. A French colonial station was planted, under the protection of Richelieu, in 1662, since when the island has been almost continuously claimed by the French. Active steps were taken in 1855 to make their influence felt, and in 1894 a military expedition captured the capital and deposed the queen, the island being declared a French possession in 1896. A railway between Tamatave on the coast and the capital (Antananarivo or Tananarive) is projected, and a bill has been laid before Parliament for a loan of £2,400,000 for the construction of railways, roads, and telegraphs, &c. Minerals are found in large quantities, and in the lowlands rice, manioc, arrowroot, sugarcane, tobacco, hemp, cotton, vanilla, tea and coffee are successfully grown; caoutchouc and

gum-copal are indigenous, and there is a wealth of timber. The local revenue in 1898 was £499,000, and the local expenditure £31,000. The exports (estimated at £196,435 in 1898) are cattle, hides, indiarubber, gum-copal, wax, sugar, vanilla, coffee, rice, and lamba manufactures; the imports, largely reduced since the high protective tariff of 1897, are mainly cotton goods, and were estimated in 1898 at £857,059. The trade with the United Kingdom was valued at £37,641 for imports into the island, and at £1,059 for exports in 1899. The capital Tananarive (called by the natives Antananarivo), has about 100,000 inhabitants; Tamatave is the chief port, others being Majunga, Tolia, Faradofay, Mananjura, Mahanoro, and Vatomandry. Madagascar has immediate dependencies in the islands of NOSSI BÉ and SAINTE MARIE, while further east 420 miles from Madagascar) is the island of RÉUNION (capital St. Denis, area about 970 square miles, population estimated at 170,000), with the COMORO Islands, halfway between Madagascar and the coast, and the islands of St. PAUL and AMSTERDAM and KERGUELEN to the south-east.

Gov. Gen. of Madagascar, General Gallieni.

In the western half of Africa are (1) the FRENCH CONGO and GABOON with the Congo Free State on the south and east, and the German Cameroons on the north and west, but undefined to the north-east. The area of this colony is about 280,000 to 290,000 square miles, and its population between 4,000,000 and 6,000,000 (Revenue, 1898, £90,000, expenditure £330,000); the principal exports are cocoa, coffee, ebony and other wood, gum copal, palm oil and rubber, the chief town and trading station being LOANGO on the coast. To the north is (2) DAHOMEY, between the British colony of Lagos and German Togoland (Revenue, 1898, £69,713, expenditure £74,053, imports £395,840, exports £298,564); it consists of about 95 miles of the Benin coast, where are the settlements of KORONOU and GRAND PORO with the hinterland, and contains an area of about 4,000 or 5,000 square miles inclusive of the Protectorates. The capital of the colony is Abomey and the chief port Whydah. Between the British colony of the Gold Coast and the republic of Liberia is (3) the FRENCH IVORY COAST (Revenue and expenditure, 1898, £51,881, imports £221,732, exports, 1897, £186,876), comprising the settlements of GRAND BASSAM and ASSINIE and the KROO country with the hinterland; and next in order comes (4) FRENCH GUINEA (Revenue, 1898, £70,763, expenditure £53,800, imports £360,795, exports, 1897, £263,347), comprising the settlements of RIVIERES DU SUD (capital, Konakri) and FUTA A'ALON, and extending up the whole of the north west coast (save where intercepted by Portuguese Guinea and the British colony of the Gambia) to join the colony of (5) SENEGAL (capital, St. Louis, pop. about 22,000), the principal exports of which are gold, ground nuts, gum, palm nuts and oil, and rubber. The total area of French Guinea and Senegal is about 60,000 square miles with a population of over 1,000,000. The exports from Senegal in 1898 were valued at £1,154,336, and the imports at £1,313,019; 1,011 ships (tonnage 1,372,885) entered and cleared at Senegalese ports in 1898. A railway has been constructed from Dakar to Rufisque, and thence north-west to St. Louis, at the mouth of the Senegal River, and from Kayes, on the same river, a line is being

constructed to Bamako, on the Niger, and about one-third was open for traffic in 1899. The territory watered by the rivers Senegal and Gambia forms the district known as SENEGAMBIA. The hinterland of the Senegal and Guinea colonies forms the vast tract of territory known as (6) the FRENCH SOUDAN, which embraces an area of about 300,000 square miles, and contains an estimated population of between 3,000,000 and 4,000,000. The local revenue and expenditure in 1893 balanced at £149,739, the imports being valued at £318,024, and the exports at £143,627. In addition to the foregoing the greater part of (7) the SAHARA is a French Protectorate on the southern verge of which is the town of TIMBUCTOO (pop. about 25,000). The area of this vast district is variously estimated but probably contains over 1,000,000 square miles; the population may number anything between 50,000 and 500,000.

II. American: France possesses two small groups of islands off the south-east coast of Newfoundland of which ST. PIERRE and MIQUELON are the largest respectively; their combined area is about 95 square miles, with a total population of about 12,000, and they form an excellent basis for the French cod fishery. In the *West Indies* two of the most fertile of the Lesser Antilles belong to France, viz., MARTINIQUE (capital Port de France), area about 391 square miles, estimated population 190,000 (Local revenue, 1893, £100,100, expenditure £286,000, total imports, 1897, £851,042, exports, £765,013); and GUADALOUPE and BASSE TERRE (capital Pointe-à-Pitre), area about 712 square miles, estimated population 170,000 (Local revenue, 1893, £202,720, expenditure £270,000; total imports, 1897, £676,486, exports, £445,851). They have six dependencies; MARIE GALANTE and ILE DES SAINTES to the south and south-east, and PETITE TERRE on the east (part of the administrative island), with ST. BARTHOLOMEW and the northern half of ST. MARTIN, about 150 miles north-west and almost due south of Anguilla (British). In *South America*, CAYENNE or FRENCH GUIANA has an area of about 43,565 square miles, and an estimated population of about 25,000, the net cost of the colony is about £57,514 (Imports, 1897, £373,356, exports, £286,427).

III. Asiatic: France retains only PONDICHERRY, CHANDERNAGORE, KARIKAL, YANAON and MATREE (see p. 471), of her former Indian Empire, but FRENCH INDO-CHINA consisting of Cochin-China, Tonquin, Annam, and Cambodia (see p. 489), extends over about 20,000 square miles with a population of about 22,000,000.

IV. In Oceania: France possesses the penal colony of NEW CALEDONIA (capital Noumea), a large island containing an area of 5,000 to 6,000 square miles, with its dependencies, Ile of Pines, Loyalty Islands, Huon Islands, Chesterfield Islands, and the Wallis Archipelago annexed in 1836 (Total imports, 1897, £343,731, exports, £279,010); and the SOCIETY ISLANDS, Tahiti, Moorea, &c. (imports, 1893, £118,698; exports, £117,240), the LOW ARCHIPELAGO or Tuamotu, the MARQUESSAS, and the AUSTRAL ISLES or Tubuai, and the GAMBIER ISLANDS, altogether amounting to about 1,400 square miles with about 20,000 inhabitants. CLIPPERTON in the N. Pacific is an isolated and desolate possession of about 1 square mile. By a convention with Great Britain, of 24 Oct., 1887, it was agreed that the protection of persons and property in the NEW HEBRIDES (5,105 square

miles, population 70,000) should be secured by means of a mixed commission of naval officers belonging to the French and British naval stations in the Pacific.

See also FRENCH INDIA, p. 471; FRENCH ASIA, p. 489; Map of W. Africa, and TUNIS.

THE GERMAN EMPIRE.

Emperor, William II. (King of Prussia), son of the Emperor Frederick and the Empress Victoria, Princess Royal of Great Britain. Born 27th January, 1859; succeeded his father 15th June, 1888; married 27th February, 1881, Princess Auguste Victoria of Schleswig-Holstein, b. 22nd Oct., 1858 (issue, 6 sons and a daughter).
Heir Apparent, Crown Prince William, born 4th May, 1882.

Imperial Chancellor and Prussian Premier, Count von Bülow.

Foreign Affairs, Baron von Richthofen.

Interior, Count von Posadowsky Wehner.

Navy, Vice-Admiral Tirpitz.

Justice, Herr Nieberding.

Finance, Baron von Thielmann.

Posts, General von Podbielski.

German Ambassador to Austria, Count Eulenburg;

Italy, Count von Wedel; *France*, Count Münster;

Russia, Prince Radolin; *Turkey*, Baron Marschall

von Bieberstein; *U.S.A.*, Baron von Holleben.

Ambassador in London, Graf von Hatzfeldt-Wildenburg, 9 Carlton House Terrace, S.W.

Councillor of Embassy, Baron von Eckhardstein.

2nd Secretary, Count H. Hatzfeldt.

3rd ditto, Baron von Mirbach.

Attachés, Dr. Scheller-Steinwartz; Prince Lynar.

Military Attaché, Major Count von Bredow.

Naval do., Capt. Coerper.

Technical do., Herr H. Muthesius.

Agricultural do., Dr. H. Gerlich.

Physician, Sir Herman Weber, M.D.

Consul-Gen., Baron G. von Lindenfels, 49 Finsbury Square.

Vice-Consul, Herr Reimer.

Councillor and Director of the Chancery of the

Embassy, (vacant).

Chanciers, F. R. Moebius, F. Spies, V. von Bojanowski.

The Empire, according to the Constitution of 16th April, 1871, is confederate, under the presidency of the King of Prussia, who bears the hereditary title of German Emperor. He has the right and the duty of representing the Empire for all purposes of international law, of declaring war, making peace and treaties, &c. He is the commander-in-chief of the whole army and navy in peace as well as in war, except the military forces of Saxony, Bavaria and Württemberg, which form — but in peace time only — separate corps under the command of their respective kings. He names and dismisses the officers and functionaries of the Empire. His edicts, made in the name of the Empire, must be countersigned by the Chancellor, who, as the First Minister of the Empire, is by his signature responsible for them. The third factor of Government is the *Bundesrath*, formed of delegates of the confederated governments, and the *Reichstag*, or legislative parliament, consisting of one deputy to about every hundred thousand inhabitants of the Empire.

The departments especially belonging to the legislation, administration, or control of the Empire and its government are — all matters con-

nected with the navy, post, and telegraphy, passports, emigration, colonization, political laws of the citizens, the whole civil law, coinage, banking, commerce, navigation, the railways, &c. The bills promulgated by the *Bundesrath* and the *Reichstag* in accordance, and sanctioned by the Emperor, are compulsory on all Governments of the Empire, and annul *eo ipso* all possible regulations contradictory to them in the different States.

This large Empire of Central Europe, situate in lat. 47° 18'—55° 52' N. and long. 5° 50'—22° 50' E., comprises the following 25 States, and a Reichsland (see p. 576):—

	English sq. miles.	Pop. 1895.	Increase upon 1885-90 per cent.
1. Prussia	134,531	31,849,795	6·3
Heligoland.....	¾	2,086	
2. Bavaria	29,634	5,797,414	3·6
3. Saxony	5,856	3,783,014	8·0

21. Schaumburg-Lippe	133	41,224	5·3
22. Lippe	475	134,617	4·8
23. Lübeck	116	83,324	8·9
24. Bremen	100	196,278	8·8
25. Hamburg	160	681,632	9·5
26. Alsace-Lorraine ...	5,601	1,640,986	2·4
Total German Empire 211,168	52,246,589	5·7	

According to religious confessions there were (1890) 31,026,810 Protestants (62·8 per cent.), 17,671,929 Catholics (35·8 per cent.), 567,884 Jews (1·1 per cent.).

German is spoken by the bulk of the inhabitants, but there reside within the limits of the Empire over 3,240,000 persons of other nationalities, viz. 2,922,411 Poles and 121,345 Lithuanians in the eastern parts of Prussia; 117,883 Wends in Lusatia, 50,000 Czechians on the Bohemian frontier, 140,000 Danes in Schleswig, and 280,000 Wallones and French to the west of the Rhine. On the other hand, about 13,500,000 Germans live in Austria-Hungary, Switzerland, and Russia.

There are in Germany 26 towns of over 100,000 inhabitants—viz., Berlin (1,677,135), Munich (350,594), Breslau (355,186), Hamburg (568,666), Leipzig (385,308), Cologne (281,681), Dresden (322,953), Magdeburg (202,234), Frankfurt-on-the-Main (180,130), Hanover (174,455), Königsberg (161,666), Düsseldorf (144,662), Altona (143,249), Nuremberg (142,590), Stuttgart (139,817), Chemnitz (138,954), Elberfeld (125,899), Bremen

(125,684), Strassburg (123,500), Dantzic (120,338), Barmen (116,144), Stettin (116,228), Crefeld (105,376), Aix la Chapelle (103,470), Halle (101,401), Brunswick (101,047).

EMIGRATION.—Between 1871-91 1,992,188 Germans emigrated, of whom 1,896,963 went to the United States. In 1881 the number of emigrants reached the exceptional figure of 210,547; in 1886 it was 79,875; in subsequent years it was 99,712; (1890) 91,925, (1891) 115,392, (1892) 112,203, (1893) 84,458, (1894) 40,954, (1895) 37,498, (1896) 33,824, (1897) 24,631, (1898) 22,221, (1899) 23,740.

EDUCATION.—There are (1895) 21 universities in the Empire, with 2,430 professors and teachers, attended by about 31,556 matriculated students. Education is general and compulsory.

Germany is becoming more and more a manufacturing country. In 1895, 36 per cent. of the population were supported by agriculture, 39 per cent. by mining and industries, 11 per cent. by commerce and transportation. Of the total area in 1883 48·7 per cent. are cultivated, 20·3 per cent. consist of meadows and pastures, 25·7 per cent. are covered with forest. The agricultural produce no longer suffices to support the population. The mineral produce was valued in 1889 at £27,790,000, and in 1898 at £46,945,000, including 96,309,000 tons of coal, 31,648,000 tons of lignite, 15,901,000 tons of iron ore, 2,282,280 tons of mineral salts, besides copper, lead, zinc, &c. The Lower Rhine (Crefeld, Elberfeld-Barmen), Alsace (Mülhausen), Saxony (Chemnitz), Westphalia, and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1899 were the following:—

Butter	£186,573	Hides & leather	£1,003,935
Caoutchouc	546,113	Iron manufactures	790,035
China, &c.	310,127	Musical instruments	677,621
Chemical manufs.	290,168	Oil-seed cake	402,185
Coffee (Raw)	307,671	Paper	478,329
Corn of all kinds	668,391	Seeds of all kinds	232,299
Cotton mfs. & yarn	833,510	Sugar, refined	7,359,141
Eggs	966,641	" unrefined	2,544,712
Farinaceous	333,549	Wood & timber	1,292,892
Glass	1,001,284	Wool & manufs.	1,714,701
Hemp	309,007	Zinc	597,985

During the same period the chief articles of import from the United Kingdom were:—

Chemical products.....	£264,832	Leather	£409,122
Coal, &c.	2,586,605	Linon (yarn, &c.)	411,435
Copper	491,176	Machinery	2,188,323
Cotton yarn	1,894,124	Manure	329,769
Cotton manufs.	1,770,251	Wool & yarn	4,292,551
Herrings	1,526,262	Woolen manufs.	976,327
Iron	2,761,444	Yarn, Alpaca, &c.	1,108,623

The MERCANTILE MARINE in 1898 consisted of 3,713 vessels, with a tonnage of 1,639,553, manned by about 40,000 men; of these 1,223 were steamers, with a tonnage of 1,038,391.

The total length of the RAILWAYS in the Empire on 31 March, 1898, extended to 29,226 miles, of which about 90 per cent. belong to the State; the total cost of construction was £20,280 per mile; the expenses in 1897-8 being £47,582,000, and the receipts £38,860,000, making the net receipts 2·9½d. per train mile. At the same date the length of telegraph lines was 91,759, the number of telegraph offices being 22,914, and 44,835,733 telegrams being transmitted. In 1896 there were 31,497 post-offices, with about 168,000 employés, and 2,253,000,000 letters, &c., were conveyed.

The NATIONAL DEBT, 1898, was £115,244,000, bearing interest at 3½ per cent.; the total charge was estimated at £3,780,660 for 1899-1900.

The strength of the GERMAN ARMY on the peace footing amounted in the year 1899 to 585,265

(including the Bavarian Army), made up of 23,230 officers, and 562,265 non-commissioned officers and men, with 98,038 horses, and 2,000 guns. On a war footing the total can be raised to 3,975,000.

The IMPERIAL NAVY in Dec. 1900 consisted of 12 battleships (and 1 building; 19 coast defence ships; 1 1st class (and 2 building), 1 2nd class, and 10 3rd class (and 7 building) cruisers; 4 torpedo gun-boats 1 t.-b. d. building), and 116 1st class torpedo boats (9 building), with 22,774 men in 1898.

	1898-99.	1899-1900.

PRUSSIA.

King, William II., German Emperor, born 27 Jan., 1859; suc. 15 June, 1888; married, 27 Feb., 1881, Augusta Victoria (born 22 Oct., 1858), daughter of the late Frederick, Duke of Schleswig-Holstein (issue, 6 sons and a daughter).

Heir Apparent, Prince Royal, William (German Crown Prince), born 6 May, 1882.

Premier & Minister for Foreign Affairs, Prince Clovis von Hohenlohe-Schillingsfürst.

Minis. of State and Intr., Freiherr von Rheinbaben.

Vice-President and Finance, Dr. von Miquel.

War, General von Gossler.

Public Works, Herr von Thielen.

Agric., Woods, & Forests, Freiherr von Hammerstein-Loxten.

Commerce and Mines, Herr Brefeld.

Justice, Herr C. Schönstedt.

Instruction and Worship, Dr. Studt.

Prussia is an extensive Kingdom of Central Europe, comprising the larger portion of Germany, situate in lat. 49° 7'—55° 52' N. and long. 5° 50'—22° 50' E. On the 14th June, 1895, the population was as follows:—

Provinces.	Sq. miles, English.	Population.
1. East Prussia	14,281	1,979,387
2. West Prussia	9,851	1,469,932
3. Brandenburg	15,405	4,410,829
4. Pomerania	11,626	1,574,950
5. Posen	11,182	1,773,036
6. Silesia	15,562	4,357,555
7. Saxony	9,746	2,704,539
8. Schleswig-Holstein ...	7,299	1,298,192
Heligoland	3/4	...
9. Hanover	14,855	2,406,546
10. Westphalia	7,802	2,669,415
11. Hesse-Nassau	6,050	1,736,961
12. Rhenish Province	10,421	5,043,979
13. Hohenzollern	441	65,888

Total..... 134,531 1/4 31,349,795
Of the above 35:1 lived by agriculture and fishery.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. Its principal mountains are the Harz and the Riesen-gebirge, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 10,000,000 acres, chiefly consisting of fir. Its minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle constitute the principal sources of employment and wealth of the rural population of the entire monarchy. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated and largely exported. The western division is noted for its excellent fruits and vegetables, and the Rhenish provinces stand pre-eminent for their wines. Prussia has upwards of 100 mineral springs, possessing various properties and qualities. Its manufactures consist chiefly of linens, for which Silesia, Saxony, and Westphalia have long been noted. The cotton works are extensive. Besides these there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c.; woollens are made in almost

every town and large village. Next in importance are leather, earthenware, glass, paper, and tobacco manufactures, and working in metals. Brewing is a business of great importance. The principal imports comprise coffee, tea, cotton, and other produce of the colonies; wines, silk, fruit, manufactured goods, tin, furs, and dyes-stuffs. The principal exports comprise linens, woollens, hardware, corn, wool, timber, pitch, linseed, tobacco, mineral waters; to which may be added horses, horned cattle, hams, salt meat, &c.; and from the Rhenish provinces, wine.

For the work of education there are about 34,000 elementary schools, attended by about 4,900,000 scholars. There are also 547 high schools, in addition to numerous technical schools.

There are ten celebrated universities in Prussia, attended by about 14,635 matriculated students in 1892; and the whole of the educational establishments are under the immediate control of the "Minister of Public Instruction and Ecclesiastical Affairs." The Royal Family belong to the Evangelical Church ("Evangelical" is a sort of compromise between Lutheran and Calvinist); and the majority of the population consists of Evangelicals (Protestants), who numbered 19,232,449 in 1890; of Catholics there were 10,252,818, and of Jews 372,059.

From the 1st July, 1877, to the 31st December, 1899, the Imperial German Patent Office received 263,447 applications for patents, but only 109,190 were definitely granted. Of this number 469 were subsequently withdrawn or cancelled, and 85,604 became void in consequence of expiration of time (15 years) and non-payment of the annual taxes. Out of 140,622 applications for designs registrations (according to the Imperial Law of 1st Jan., 1891), 127,580 were accepted and registered at the end of 1899, and from the 1st October, 1894, to the 31st December, 1899, there were 41,551 registrations of trade marks.

ALSACE-LORRAINE.

Statthalter, Prince Hermann Ernst von Hohenlohe-Langenburg (1894), b. Aug. 31, 1832.

Minister of State, Herr von Puttkamer.

Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, was restored to Germany, after a sanguinary war with France, by the Treaty of Frankfurt in 1871. It embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco, and hops, iron, and coal are among its leading productions, and the cotton industry is most flourishing.

The new province is called a "Reichsland," or imperial territory, and is governed by a "Statthalter," appointed by the Emperor. There is an elective Provincial Committee of 58 members. The area is 5,601 square miles. The population in 1895 was 1,640,986. French was spoken by about 210,000 persons.

The principal towns are Strassburg (135,608), Mülhausen (82,986), and Metz (59,794).

Revenue and Expenditure (1898-99) ..	£2,988,289
Debt (1897-98)	(Rentes £35,764) 1,205,750

ANHALT, Duchy of.

Duke, Frederick, born 29 April, 1831; *suc.* 22 May, 1871; *married*, 22 April, 1854, Princess Antoinette of Saxe-Altenburg, born, 17 April, 1838.

Heir Apparent, Prince Friedrich, born 19 August, 1856; *married*, 11 July, 1889, Princess Marie of Baden; born, 26 July, 1865.

Prime Minister, Herr von Koseritz.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 906 square miles and a population of 293,238. Budget, 1900-1901, £768,450; Credit (1899), £375,794.

CAPITAL, Dessau. Population, 51,301.

BADEN, Grand Duchy of.

Grand Duke, Frederick, born 9 Sept., 1826; *Regent*, 24 April, 1852; *Grand Duke*, 5 Sept., 1856; *mar.* 20 Sept., 1856, Louise, born 3 Dec., 1838, daughter of Emperor William I. of Germany.

Heir Apparent, Frederick, born 9 July, 1857; *m.* 20 Sept., 1885, Princess Hilda of Nassau, born 5 Nov., 1864.

President of Ministry, Dr. W. Nokk.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It is divided into eleven districts (Kreise), viz., Konstanz, Villingen, Waldshut, Lörrach, Freiburg, Offenburg, Baden, Karlsruhe, Mannheim, Heidelberg, and Mosbach, and comprises an area of 5,893 square miles, 3,330 of which are under cultivation—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce. The population in 1895 was 1,725,464, nearly two-thirds of whom were Catholics, and more than one-third Protestants (Jews 25,903). One-half of the people are engaged in agriculture, the other half mostly in manufactures. The principal manufactures are cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery. Elementary instruction is compulsory. There are 1,625 elementary schools, 94 colleges, a technical academy, and two universities, in addition to several technical, agricultural, normal, and other schools, including 3 State establishments for art. There are 963 miles of railway, almost entirely belonging to the State, constructed at a cost of over £24,000,000.

Budget, 1898

Debt Jan. 1, 1898 (only railways)

CAPITAL, Karlsruhe. Population, (1895) 84,030.

British Chargé d'Aff., Hon. Alan Johnstone (Darmstadt).

Mannheim—Consul, Dr. Paul Ladenburg.

BAVARIA.

King, Otto, born 27 April, 1848; succeeded his late brother, Louis II., 13 June, 1886.

Regent and Heir Presumptive, Prince Luitpold, born 12 March, 1821, uncle of the late and present Kings; appointed Regent, 10 June, 1886; *mar.* 15 April, 1844, Archduchess Augusta of Austria-Tuscany, who died 26 April, 1854.

Ministers of State—President and Minister of Foreign Affairs, Baron von Crailsheim. Dr. Baron von Riedel (*Finance*), Baron von Feilitzsch (*Interior*), Baron von Leonrod (*Justice*), Lt.-Gen. Baron von Asch (*War*), Ritter von Landmann (*Instruction*).

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising

eleven-twelfths of the whole, is situated between 47° 16'—50° 33' N. lat. and 9°—13° 48' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,632 square miles, and a population (in 1897) of 5,818,544 (4,112,623 were Roman Catholics, 1,640,133 Protestants, and 53,750 Jews). Bavaria contributes two *corps d'armés* to the forces of the German Empire, and a division at Metz, and a third *corps* is to be raised in 1900; their strength is fixed at 66,356 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly $\frac{1}{3}$ of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in Lower Franconia and in the Palatinate. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. There are three Universities, viz., Munich, Würzburg, and Erlangen.

Budget, 1900 and 1901 £21,645,999
Public debt 1899 (including railway debt

£5,768,740) 72,911,762

CAPITAL, Munich. Population (1899), 445,000.

British Minister Res., Victor Drummond, C.B. £1,500

2nd Secretary, Hon. R. Acton 300

Consul, Jacob Krapp

BRUNSWICK, Duchy of.

Regent, Prince Albrecht of Prussia, born 8 May, 1837; elected 21 Oct., 1885.

Minister of State, Dr. von Otto.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,441 English square miles, and a population (1895) of 434,213, of whom 411,377 are Protestants; 19,508 Roman Catholics, and 1,836 Jews. Budget, 1888-99, Income, £722,188; Expenditure, £737,250; debt, £3,052,119.

CAPITAL, Brunswick. Population, 115,138.

HESSE, Grand Duchy of.

Grand Duke, Ernest Louis, born 25 Nov., 1858; suc. 13 Mar., 1892; m. 19 April, 1894, Princess Victoria Melita of Coburg, b. 25 Nov., 1876.

President of Ministry, K. Rothe.

A central State in the west of Germany, comprising two disconnected territories, nearly equal in size, containing an area of 2,966 square miles, and a population (in 1895) of 1,039,020, of whom two-thirds were Protestants. The southern portion is traversed by the Rhine, and the Main forms part of its boundary. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Giessen has a university, and there is a technical university at Darmstadt.

Budget, 1900-1901 £2,563,000

Public debt, 1900 (mostly for railways) 13,410,800

CAPITAL, Darmstadt. Population (1893), 67,800.

stone (Darmstadt) £500

Consul-Gen., Francis Oppenheimer (at Frankfurt).

MECKLENBURG-SCHWERIN, Grand Duchy of.

Grand Duke, Frederick Francis, b. 9 April, 1882; suc. 10 April, 1897.

Regent, John Albrecht, b. 1857.

Minister of State, A. von Bülow.

A maritime State of Northern Germany, on the Baltic, comprising an area of 5,197 square miles, with a population of 597,436. The Legislative power is vested in representatives of the towns, and of the Knights' estates Revenue, 1899-1900, £1,844,835; debt (1900), £5,643,350.

CAPITAL, Schwerin. Population, 36,363.

MECKLENBURG-STRELITZ, Grand Duchy of.

Grand Duke, Frederick William, born 17 Oct., 1819; suc. 6 Sept., 1860; mar. 28 June, 1843, Princess Augusta of Cambridge, b. 19 July, 1822.

Heir Apparent, Adolphus Fred., b. 22 July, 1848; married, 17 April, 1877, the Princess Elizabeth of Anhalt, born 7 Sept., 1857.

A State of Northern Germany, consisting of two detached pieces, separated by Mecklenburg-Schwerin. Area, 1,144 square miles; population, 121,540. No proper budget. Finances in good condition.

CAPITAL, Neu-Strelitz. Population, 10,343.

OLDENBURG, Grand Duchy of.

Grand Duke, Peter, born 11 July, 1827; suc. 27 February, 1853; married, 10 February, 1852, Elizabeth (daughter of the late Prince Joseph of Saxe-Altenburg), born 26 March, 1826, died 11 Feb., 186.

Heir Apparent, Frederic Augustus, b. 16 Nov., 1852; married, first y. Feb. 18, 1878, to the late Princess Elizabeth (second daughter of the late Prince Frederick Charles of Prussia), who died 28 August, 1895; and secondly to Princess Elizabeth of Mecklenburg-Schwerin, born 10 August, 1859.

A maritime State of North Germany, situate on the North Sea and the Weser, with an area of 2,508 square miles and a population of 373,739. Revenue, 1898, £361,589; expenditure, £417,741; debt, 1898, £2,520,402.

CAPITAL, Oldenburg. Population, 23,118.

SAXE-COBURG AND GOTHA, Duchies of.

Duke, Charles Edward (H.R.H. Duke of Albany) born 19 July, 1884; suc. 30 July, 1900.

Regent, H. S. H. Ernest, Hereditary Prince of Hohenlohe-Langenburg, b. 13 Sept., 1863; mar. 22 April, 1896, H.R.H. Princess Alexandra, 3rd daughter of the late Duke Alfred of Saxe-Coburg of Gotha (Duke of Edinburgh).

Heir Presumptive, H.R.H. Prince Arthur of Connaught, born 13 Jan., 1883;

Minister of State, Herr von Streng.

A State consisting of two principal and several smaller detached portions, with an area of 765 English sq. miles, and a population (1895) of 216,603, of whom 212,514 are Protestants. The country is distinguished by beautiful forests and castles of the Duke (Reinhardtsbrunn and Rosenau, favourite retreat of Queen Victoria). The capital, Gotha (population 31,670), is the seat of the oldest life assurance company in Germany; also of the famous Geographical Institute of Justus Perthes. Coburg (the other capital) has 18,688 inhabitants. The domain revenue for Coburg and Gotha was estimated for the period of 1897-1901 at £21,580 and £96,501 respectively, and the expenditure at £12,780 and £54,667.

British Minister Resident, Sir Alexander

Condie Stephen, K.C.M.G., K.C.V.O., C.B. £950

SAXE-WEIMAR.

Grand Duke, Charles Alexander, b. 24 June, 1818; suc. 8 July, 1853; married 11 Oct., 1842, Princess Sofia of the Netherlands, born 8 April, 1824.
Heir Apparent, William, born 10 June, 1876.
 Area, 1,388 sq. miles. Population (1895), 339,217. Income and expenditure, 1898-1901 £523,054.

CAPITAL, Weimar. Population, 1895, 26,670.

SAXONY.

King, Albert, born 23 April, 1828; suc. 29 Oct.; 1873; mar. 18 June, 1853, Caroline, dau. of the late Prince Gustave de Wasa, b. 5 Aug., 1833.
Heir Presumptive, his brother, Field-Marshal Prince George, b. 8 Aug., 1832; mar. 11 May, 1859, Maria Anna Infanta of Portugal, who d. 5 Feb., 1884.

Ministers of State, Dr. Schurig, Herr von Metzsch, Herr von der Planitz, Herr von Seydewitz, Herr von Watzdorf.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population of 3,787,688 (1895 census), among whom are 140,255 Roman Catholics, and 9,902 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation; its agricultural products consist of the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits of all kinds suited to the climate. The potato harvest in the year 1892 yielded 28,316,465 lbs. The forests supply timber of excellent quality, and in such abundance as to render them a great source of industry and wealth. The minerals are another great source of wealth, the ores being both rich and abundant. The mines consist of silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides coal, marble, porcelain-earth, and various gems—as topazes, chrysolites, amethysts, cornelians, &c. The smelting is centralized in large establishments belonging to the State. Manufacturing industry has been greatly developed, and in some branches carried to a high degree of perfection. The special manufactures of Saxony are: Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, and bottle glass; to these may be added musical instruments, chocolates, sweets, and cigars. The government factory at Meissen continues to produce the famous Meissen porcelain. The great fairs of Leipzig, although well attended, have lost much of their former importance. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden, Leipzig, the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 3,270 matriculated students in 1899); Freiberg, in the mining district; Zwickau, and Chemnitz, the Manchester of Saxony.

Saxony furnishes the 12th and 19th Army Corps of 42,938 officers and men.
 Revenue and expenditure, Budget, 1898-9 £8,240,995
 Amount of public debt (chiefly for railways), January, 1898 37,623,247

CAPITAL, Dresden. Pop. (1895), 336,440.

Brit. Minister Resident, Sir A. Condie Stephen, K.C.M.G., K.C.V.O., C.B. (see Saxe-Coburg).
Consul, H. Palmié.

Vicé-Consul, H. J. Stanley.

Leipzig—Cons.-Gen., Baron C. C. B. von Tauchnitz.

Leipzig—Vice-Consul, Dr. Curt Otto.
 Transit, 32 hours.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hoheneck and Geroldseck, Waszigen, &c., born 20 Jan., 1865; suc. 12 May, 1893. His sisters are:—Pauline, b. 19 Oct., 1855; m. 7 May, 1881, to the Prince of Bentheim-Steinfurt; Emma, b. 2 Aug., 1858, m. 7 Jan., 1879, to the late King (and until 1898 Queen-Regent) of the Netherlands; Helena F. Augusta, b. 17 Feb., 1861, married 27 April, 1882, the late Duke of Albany; Elizabeth, born 6 Sept., 1873, married 3 May, 1900, the Count of Erberth-Schonberg; and a half-brother Wolrad, b. 26 June, 1892.

A Principality in the north-west of Germany, with an area of 438 square miles, and 57,766 inhabitants. The Budget for 1897 gives an income and expenditure of £70,021 each. There is also a Debt of £101,850.

CAPITAL, Arolsen. Population, 2,768.

Brit. Chargé d'Affaires, Sir Alexander Condie Stephen, K.C.M.G., K.C.V.O., C.B. (Coburg).

WÜRTEMBERG.

King, William II., born 25 Feb., 1848; succeeded 6 October, 1891; mar. 15 Feb., 1877, Princess Marie of Waldeck, who died 30 April, 1882; remar. 11 April, 1886, Princess Charlotte of Schaumburg-Lippe.

Heir Presumptive, Duke Nicolaus of Würtemberg, born 1 March, 1833.

President of Ministry, Baron Dr. von Mittnacht.

A Kingdom of South Germany, with an area of 7,528 English square miles, and a population (in 1898) of 2,081,151, of whom 30 per cent. are Roman Catholics. Würtemberg furnishes the 13th Corps to the German Army, consisting of 23,925 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pastureland being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wool, gunpowder, fire-arms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, staves, beer, wine, &c.

THE FREE AND HANSE TOWNS.

The Free Hanse Towns comprise the three Cities of Hamburg, Bremen, and Lübeck, each with a small rural territory, and are situated in the North of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway. Bremen is much smaller, but very prosperous, and only second in commercial importance

to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situated near the Baltic and is connected with the Elbe by the Elbe-Trave Canal; its commerce is principally with Denmark, Norway, Sweden, and Russia.

The commerce between the Hanse Towns and Great Britain is very large; the imports from the United Kingdom to Hamburg alone in 1899 (excluding bullion) amounting to £21,042,356. In October, 1888, Hamburg and Bremen, following the example set by Lübeck several years previously, joined the German Customs Union. They retain, however, their sovereignty and local self-government, like the other States of the Empire.

HAMBURG possesses an area of 160 square miles, and had a total population in 1899 of 751,329.

Burgomaster, 1900-1901, Dr. Nachmann.

GERMAN COLONIES AND DEPENDENCIES.

The German colonies and dependencies have a total area of about 1,021,575 square miles, and a population (1899) of about 9,800,000. In 1896 there were 6,095 Europeans resident in the African Colonies, of whom 962 were German officers, 3,913 non-Germans, and the remaining 1,220 German officials and colonists.

I. THE AFRICAN POSSESSIONS: (a) TOGOLAND and the CAMEROONS. Togoland (33,160 square miles, pop. 2,000,000 to 3,000,000), capital Little Popo, had a revenue of £27,500 and expenditure of £41,000 in 1900; the total imports were £151,479, and the exports, principally rubber and ivory, £100,785 in 1898-99; the CAMEROONS (191,074 square miles, pop. 4,500,000), capital Cameroon, in the west, had a revenue of £80,650 and expenditure of £145,500 in 1900; the total imports were £531,947 and the exports £257,291 in 1898-99.

(b) GERMAN SOUTH WEST AFRICA consisting of DAMARALAND with GREAT NAMAQUALAND, capital Great Windhoek, in the south-west (326,117 sq. miles, pop. 250,000); the revenue in 1900 was £373,950, of which about £359,650 was contributed

by the Imperial Government; the imports amounted to £293,414, and the exports to £45,739 in 1898-99; a railway is being constructed from the newly made harbour Swakop-mund towards the capital. (c) GERMAN EAST AFRICA (area 383,079 square miles, pop. 3,750,000) a large tract of country between Lake Nyassa and the Victoria Nyanza bounded on the east by the African coast between Cape Delgado and the (British) East Africa Protectorate; the revenue in 1900 was £429,750, of which 299,250 was contributed by the Imperial Government, the imports amounted to £842,632, and the exports to £299,796 in 1898-99. A line of railway has been laid from Tanga southwards, and others are projected from Tanga to Kilima-Njaro, and from Bagamoyo right across the territory; the capital is Dar es-Salaam on the coast.

II. IN THE PACIFIC the northern portion of the eastern half of New Guinea called KAISER WILHELMSLAND was declared a German Protectorate in 1884; with its dependencies, Long Island, Dampier Island, and Rook Island, its area is about 69,000 square miles, with a population of about 115,000; capital Stephansort. In 1884 a protectorate was also declared over the New Britain Archipelago, now called the BISMARCK ARCHIPELAGO, which contains about 19,200 square miles and nearly 200,000 inhabitants in the various islands. The island of BOUGAINVILLE, in the Solomon Group (see also p. 521), is administered from Kaiser Wilhelmsland. To the north-east are the MARSHALL ISLANDS (capital, Jabwor), occupied in 1885; the total area of the 24 islands is 154 square miles, with a population of 16,000. In 1899, the government purchased from Spain the CAROLINE, PELEW and LADRONE (or Marienne) ISLANDS; the area of the new acquisitions is about 950 square miles, and their population about 46,000. By treaty with the United Kingdom in 1899, Germany acquired the islands of Upolu and Savaii in the SAMOAN ARCHIPELAGO, the island of Upolu containing the harbour and town of Apia. The trade of this island amounts to about £90,000 annually, the exports going mainly to Germany, while about half the imports are from the United Kingdom.

III. CHINESE POSSESSIONS: In 1897, consequent upon the murder of missionaries, an armed force was sent to Kiao Chao Bay, which was in 1898 granted in usufruct by the Chinese government with mining and railway concessions in the Province of Shan Tung; the bay covers an area of 212 square miles, and the leased territory 143 square miles, the "sphere of influence" extending over 2,740 square miles. There is a German garrison in Kiao Chao of 1,500 officers and men.

	1898.	1899.
Imports from U.K.	£136,538	£150,174
Exports to U.K.	35,203	48,736

GREECE.

King, George, second son of the present King of Denmark, born 24 Dec., 1845; elected King of the Hellenes, 30 (18) March, 1863; married 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, born 3 Sept., 1851, issue 5 sons and 1 daughter.

Heir Apparent, Prince Constantinos, Duke of Sparta, born 11 Aug., 1868; married 27 Oct., 1889, to the Princess Sophia, sister of the German Emperor, born 14 June, 1870.

Prime Minister, and Interior (14 April, 1899), M. Theotoki.

 31 Marloes Road, Cromwell Road, S.W.
Cons.-Gen., M. L. Messinisis, Eastcheap Bdgs, E.C.
Consul and Secretary, J. M. Joannides.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40'—40° 10' N. and long. 18° 20'—25° 50' E., comprising an area of 24,977 square miles (inclusive of the territory lost by the rectification of the Thessalian frontier after the war with Turkey in 1897), with a population (in 1896) of 2,433,806. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into twenty-six provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, magnesium, emery, marble, and sponges. The Army in 1900 consisted of 25,180 officers and men. The navy consisted in 1900 of 5 armoured vessels, 14 steam schooners, 9 gun boats, 1 training ship, 22 torpedo vessels, and 4,012 officers and men. There are 582 miles of railway open for traffic. There is a ship canal, cutting through the Isthmus of Corinth. Telegraphs, 4,569 miles. The mercantile marine consists of 1,255 sailing vessels above 30 tons capacity, and 132 steamers, tonnage 89,688.

Finance.—The Public Debt amounted Sept. 1899 to 701,374,530 drachmai gold (£28,054,990) and 93,775,974 drachmai paper (average exchange '899 being 39, and in 1900 38 drachmai to £); the charge in 1899 was 14,657,535 drachmai gold, and 5,083,485 drachmai paper. The Debt Service is in the hands of an International Commission sitting at Athens, and to them the salt, matches, petroleum, playing card, cigarette paper and emery monopolies, and tobacco and stamps have been handed over, as well as the Piræus Customs House, as a supplementary guarantee. The gross income from all these sources (except the salt, is divided into the three sums of 28,900,000 drachmai; a sum equivalent to 18 per cent. for the expenses of administration and the residue; the latter being apportioned thus—30 per cent. for improvement of interest, 30 per cent. to sinking fund, and 40 per cent. to the Hellenic Government.

GUATEMALA, REPUBLIC OF.

President, Manuel Estrada Cabrera 2 Oct., 1898).
Min. of Foreign Affairs, Juan Barrios.
Consul-Gen., Señor Machado, 20 Bucklersbury E.C.

Guatemala, the most northerly of the Republican States of Central America, is situate in N. lat. from 13° 40' to 17° 40', and in W. long. from 88° 15' to 92° 30', and comprises an area of 46,774 square miles, and a population in 1892 of 1,510,000. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. There are about 350 miles of railway open, and the Interoceanic Railway connecting San José (Pacific) with Port Barrios (Atlantic) was commenced in September, 1892; when completed the capital, Guatemala, will be within 290 hours of London. There were 2,643 miles of telegraph working in 1895. The chief ports are San José de Guatemala, Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, valued at £ 478,096 in 1899; the other articles are sugar, rubber, hides and bananas.

Revenue, 1899 (£1 = \$33)	£234,511
Expenditure, 1896	1,743,745

HAWAIIAN (OR SANDWICH) ISLANDS.

HAYTI, REPUBLIC OF.

President, Tirésias Augustin Simon Sam, *elect.*
31 March, 1896 £4,800
Minister of Foreign Affairs, Brutus St. Victor.

Minister in London, Louis Joseph Janvier, *Chargé
d'Affaires*, 5 Albany Court Yard, W.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Hayti is the western or French
portion of the island of San Domingo, which, next
to Cuba, is the largest of the West India Islands.
It contains 29,830 square miles, of which 22
square miles belong to Hayti. It lies in N. lat.
between 17° 37'—20°, and in W. longitude between
68° 20'—74° 28'; and belongs to the group of the
Greater Antilles. The portion belonging to Hayti
contains a population of about 1,244,650. The
mountains are richly and heavily timbered, and
susceptible of cultivation nearly to their summits;
it is probably the most fertile spot in the West
Indies, whilst its harbours, especially Port-au-
Prince, offer considerable facilities to foreign
trade. The principal productions are coffee, log-
wood, cocoa, cotton, hides, sugar, honey, gums,
these being the chief exports. It is said to con-
tain mines of gold, silver, copper, tin, and iron.
Its commercial prosperity has been almost anni-
hilated by repeated revolutions. The principal
foreign trade is carried on with the United States,
Great and Greater Britain, France and Germany.

HONDURAS, REPUBLIC OF.

President, Terencio Sierra, 11 Feb., 1899.
Consul-General in London, M. J. Kelly, 8 Idol
Lane, E.C.

The Middle State of Central America, stretch-
ing in N. lat. between 13° 10' and 16°, and W.
long. between 83° 10' and 88° 40'; containing
42,658 English square miles, including a small
portion of the Mosquito Territory, and the Bay
Islands in the Gulf of Honduras. The popula-
tion in 1897 was 398,877, mostly of aboriginal
blood. It has a coast-line of nearly 400 miles on
the Caribbean Sea, chief ports, Truxillo, Puerto
Cortez, Omoa, Roatan, and La Ceiba; but only
about 40 miles on the Gulf of Fonseca, on the
Pacific side, chief port, Amapala. The country is
mountainous, being traversed by the Cordilleras.
The products are mahogany, fruit, cattle, cotton,
sugar, tobacco, coffee, indigo, sarsaparilla, hides
and skins, india-rubber, cedar, fustic, rose and
Lima wood. Its mineral wealth is great. The only
railway (42-inch gauge) runs from Puerto Cortez
to Pimienta, 60 miles, which it is intended

to develop into an inter-oceanic railway connecting
the Atlantic with the Pacific.

HUNGARY (see p. 554).

ICELAND (Danish Dependency).

Governor, Magnus Stephensen.

Danish Minister for Iceland, A. H. F. C. Goos.

Iceland is a large, volcanic, and treeless island
in the North Atlantic Ocean, extending from 53°
23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W.
long., with an estimated area of 40,497 square
miles, or greater than that of Ireland. The
population was estimated in 1898 at 76,237.

The present constitution was granted in 1874,
and the assembly (Al-thing) is more or less con-
trolled by the Government at Copenhagen. The
principal products of the island are sheep, cattle,
ponies, and fish, and the imports consist of almost
all the necessaries of life, the chief items being
grain and meal, sugar, coffee, salt, cotton goods,
tobacco, spirits, hardware, and timber.

A Kingdom in the South of Europe, consisting of ■ peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. 36° 38' 30"—46° 40' 30" N. and long. 6° 30'—18° 30' E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with a population (31 Dec., 1897) of 31,479,217. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, and the Duchies of Parma and Modena. In 1870 the unity of the country was finally effected, and Rome became again the capital of Italy, which is now divided for administration into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389 miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines: the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. The total mineral produce was valued at £2,576,813 (1897), of which raw sulphur absorbed £1,392,410. The railway system is making rapid progress throughout the kingdom: in 1897 there were 9,592 miles open for traffic, and 23,665 miles of telegraph wire. The commercial marine (1897) consists of 6,238 vessels (366 steamers), of 786,644 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienne earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc, and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such ■ mosaics, pottery, Venetian glass, alabaster ornaments), &c. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists,

and others. The army in 1898 numbered 185,000 on a peace footing, which would be raised to nearly 2,200,000 in time of war. The NAVY in 1898 consisted of 13 battleships (and 2 building), 3 armoured cruisers (and 2 building), 15 protected cruisers (and 3 building), 1 unprotected cruiser, 15 torpedo vessels, 1 destroyer (building), 142 torpedo boats (and 2 building), and 2 special vessels. Spezia, the chief naval and military port of the kingdom, is securely fortified.

	1893-1899.	1899-1900.

COLONIES.—Italy possesses the colony of Eritrea, a protectorate over part of the Somali coast, and an isolated station on the Juba river in North East Africa. The commencement of Italian influence was made in 1880, when the district of Assab was transferred from a trading company to the Government; in 1885, the town of Kassala, which had been abandoned by the Egyptian Government, was occupied, and shortly afterwards the tract of land now known as Eritrea was taken over. ERITREA ("Red Sea") consists of a triangular portion of barren and sandy lowland between 12° and 18° N., containing in all a coast line along the Red Sea of about 700 miles, with a total area of 85,000 to 90,000 sq. miles, and a population of about 400,000. The capital is Massowa, where there is a good harbour, and the principal product, salt, of great value as being the monetary currency of Southern Abyssinia. In 1889, protectorate was declared over the neighbouring kingdom of Abyssinia, which was repudiated in 1893 by the Negus, Menelek II.; after a campaign which ended in disaster, the Italian Government concluded a treaty (1896) withdrawing the protectorate from all parts, except from a portion of the Somali coast, now known as Italian Somaliland, a strip of the coast, 180 miles wide, between 8° 3' N. and the river Juba, which is the northern boundary of British E. Africa. The isolated station of LUCH 400 miles inland on the Juba river, was also reserved to Italy. The total area is about 130,000 square miles, and the population about 300,000, Itala, a newly formed settlement, being the seat of government. In 1897, the town of Kassala was restored to Egypt, and the Italian possessions are now confined to the colony, protectorate, and town above mentioned.

Rome—Sovereign Pontiff, Leo XIII., born 3 March, 1810; elected 20 February, 1878.

Secretary of State to His Holiness, The Cardinal Rampolla del Tindaro, appointed 1887.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Hondō (the name of the Empire being Nihon), Shikoku, Kiū-shū, and Hokkaidō or Yéso, situate to the north of the main island, from which it is separated by the Tsuguro Straits, and Formosa. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yéso. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire comprises an area of 162,655 square miles, with a population of 43,759,577, according to the last census, there being 22,071,487 men and 21,688,090 women.

Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C., the present Emperor being the 121st of his race; but the authentic history begins about 400 A.D. Within the last few years Japan has made unparalleled progress in civilisation and the adoption of Western manners and customs. The feudal system, under which the country was governed by numerous lords, has been abolished, and the Mikado is now absolutely the Sovereign of the State, and since the revolution of 1868 she has shown a most remarkable power of adopting Western knowledge and experience. A wise and enlightened ruler is at the head of the nation, and the first national Parliament, the outcome of the constitution granted to the people by the Emperor, promulgated 11th Feb., 1889, met for the first time in November, 1890. The feudal lords, who have lost all their powers of government, still retain their high social positions, and a new aristocracy with these as its basis has been formed; it consists of five grades, corresponding to the European titles of Prince (not imperial), Marquis, Count, Viscount, and Baron. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tôkiô, is 12,370 ft. high, dormant since 1707. Japan is liable to frequent and disastrous earthquakes. On October 28, 1891, an earthquake occurred by which 9,960 persons were killed, 20,000 injured, and 130,000 houses destroyed; again in 1895 a tidal wave destroyed 7,475 houses, and killed 26,990 people, in addition to 25,137 injured. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound, whilst agate, cornelian, and rock crystal are also found. Gold was discovered in 1899 in considerable quantities in the northern island, and silver mining is prosecuted on a small scale, while there

is a fair supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat, and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied. The fruits are abundant, but for the most part of inferior quality. The chief industries are conducted in factories for silk and cotton, cotton yarn, matches, paper, glass, japanned ware, porcelain, and bronze, and ship-building in the yards. The chief imports are raw cotton from China and India, and piece goods, metals, woollens, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from China, Formosa, and Germany. The chief exports are silk, rice, tea, fish, copper, and matches. There were 2,652 miles of private railway and 768 miles of Government lines open in 1899. The Tōkaidō, Shinano, and Echigo, and Oshiu and Dewa lines are the property of the Government, with a total length of 661 miles, and the work of duplicating Tōkaidō (East Coast route) is progressing. The net profit on these lines was estimated at £590,284 in the budget for 1898-99.

The Army consisted of 273,268 officers and men at the end of 1893. The Navy (1900) consisted of 11 first-class battleships (and 1 building); 1 third-class battleship; 1 coast defence ship; 1 first-class cruiser (5 building); 9 second-class cruisers (and 1 building), 4 third-class cruisers (and 1 building); 11 first-class gunboat (and 1 building); 1 torpedo gunboat (and 1 building), 12 T.B.D. (and 1 building); 25 first-class torpedo boats (and 32 building). It was manned by 14,852 officers and men.

The mercantile marine of registered ships above 100 tons consisted (1900) of 411 steamers 1031 sailing vessels, with a total gross tonnage of 630,942.

Of the 5,883 vessels (tonnage 8,295,530) that entered Japanese ports (1899) 1,457 were British (tonnage 3,321,245). From Oct. 1, 1897, the currency was placed upon a gold basis, the unit being the gold $\$$ of 8,333 gr. containing 75 grammes of fine gold; but there is no smaller gold coin than the 5-yen piece. The local exchange value of the yen was (June 1900) 2s. 0 $\frac{1}{2}$ d.

Under treaties with Great Britain and several other powers, Yedo (Tōkiō), Kanagawa (Yokohama), Hiogo (Kobé), and Osaka (on the Inland Sea), Hakodate (in Yezo), Niigata, and 23 additional ports are open to trade. The trade of Japan in 1899 was distributed thus:—

British Empire (incl. Australia, Canada, India, Hong Kong) £15,831,963	United States £10,425,297
	China..... 7,038,114
	France..... 3,671,635
	Germany..... 185,610

The principal articles imported by the United Kingdom from Japan in 1899 were:—

China, &c. £28,447	Silk £83,921
Cop er..... 419,481	Do., manufactures 286,353
Drugs..... 39,481	Straw plaits..... 176,254
Jute..... 29,151	

And the principal articles exported to Japan from this country in 1899 were:—

Alka i..... £73,143	Machinery..... £362,831
Arms..... 288,992	Metals, &c..... 874,162
Carriages, Railway..... 47,590	Ships; and ship
Chemicals &c..... 110,486	na-hinery..... 3,413,112
Cotton Yarn..... 579,604	Woollens..... 451,452
Cotton Manufs..... 1,035,488	

CAPITAL, Tōkiō, formerly called Yedo, the residence of the Emperor; population (1900) 1,507,557. Other cities are—Osaka, 1,311,763; Kiōto, the ancient capital, 931,568; Nagoya, Kobe, and Yokohama.

The total cost of the war with China was about \$225,000,000, of which \$80,000,000 was repaid by indemnity.

JERUSALEM—PALESTINE.

Turkish Governor, Tewfik Bey, appointed 26 October, 1897.

Palestine, which occupies so prominent a place in the history of human kind, and in the affections of the Christian world, is a country capable of considerable development, and, although her ancient glories are departed, still produces wine and olives, corn and the most varied fruits. Its population is not far short of 700,000, of whom 80,000 to 100,000 are Jews. In and about Jerusalem, the Jews number from 45,000 to 50,000.

Geographically Palestine consists of a maritime lowland, the mountain region of Judah, which forms its backbone, the remarkable depression through which the Jordan winds its course towards the Dead Sea, and the elevated region lying to the east of the Jordan. The popular notion that Palestine is a barren country, not capable of yielding rich harvests, is a mistaken one. Its appearance is barren only during the dry season, when the grasses which cover the greater part of it are dried up, and the herdsmen retire with their flocks of sheep and goats to the loftier mountains. The alluvial lowland to the south of Mount Carmel is as fruitful as ever, and it only needs an honest and vigorous administration to restore Palestine to its former fruitful condition. The entire area is computed to be about 11,000 square miles.

Palestine comprises the independent Mutessariflick of Jerusalem (el Kuds), together with districts belonging to two other provinces, viz.: the vilayets of Beyrut and Damascus. The stream Nahr el Auja, which enters the sea a few miles north of Jaffa, forms the boundary between the district of Jerusalem and the first-named vilayet, the country to the east of the Jordan and the Dead Sea being subordinate to the vilayet of Damascus. Arabic is the language commonly spoken, and 80 per cent. of the population are Mohammedans. There are, however, many Greeks, Jews, and Franks of all nations and denominations. A railway was opened connecting Jaffa (Joppa) and Jerusalem in 1892.

The principal ports of Palestine are Acre, Haifa, and Jaffa, and their exports amount annually to over £600,000, consisting principally of sesame, oranges, fruits, barley, olive oil, maize, and articles of Christian veneration, these latter weighing 2,700 cwts. The imports were valued at £650,000. Austria takes the lead in this commerce.

Jerusalem—Consul, John Dickson £800
Jaffa—Consular Agent, Haim Amzalak

Distant by overland route about 2,500 miles; transit, 8 days.

LIBERIA.

President, William David Coleman, 13 Nov. 1896.

Vice-President, Hon. J. J. Ross.

Secretary of State, Hon. G. W. Gibson.

Secretary of Treasury, Hon. A. Barclay.

Attorney-General, Hon. J. C. Stevens.

Postmaster-General, Hon. H. R. Johnson.

Consul-General and Chargé d'Affaires in London, H. Hayman, 3 Coleman St., E.C.

Consul, Sigismund Sinauer De Stein.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., ■ distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a distance of 250 miles from the seaboard. The population consists of 25,000 emigrants from America and their descendants, and aborigines, numbering in all nearly 1,500,000. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, prassava, rubber, and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass, and earthenware, rum, gin, timber and beads. Liberia was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European Powers since 1847 as an independent State. The executive power is vested in ■ President elected for two years, assisted by ■ ministry; there are two houses of Legislature, the Senate, with eight members elected for four years, and the House of Representatives with 13 members elected for two years. There is no army, but there are two small revenue gunboats. Foreigners are only allowed to trade at the ports of entry, of which there are nine along the 350 miles of coast, viz.: Cape Mount, Monrovia, Junk, Grand Bassa and Edina, River Cess, Sinoe, Manue Kroo, Cape Palmas, and Half Cavalry.

Revenue, 1894... £33,096. Expenditure... £31,661
CHIEF TOWN, Monrovia. Population, 6,000.

British Consul, Col. Sir Frederick Cardew, K.C.M.G. (Sierra Leone).

Monrovia—Vice-Cons., William A. Ring.

Monrovia, 3,650 miles distant; transit, 21 days.
Telegrams forwarded by post from Sier ra Leone.

LIECHTENSTEIN.

Prince, Johann II., born 5 Oct., 1840; suc. 12 Nov., 1858.

A Principality on the Upper Rhine, between the Tyrol and Switzerland. It has an area of 61 square miles, with (1896) 9,434 inhabitants, who are not liable to conscription.

Revenue (1896), £10,794; expenditure (1896), £9,976. There is no debt.

LUXEMBURG.

Grand Duke, Adolphus, Duke of Nassau, b. 24 July, 1817; suc., 23 November, 1890; mar. (2ndly) 23 April, 1851, Adelaide Marie, daughter of Prince Frederick of Anhalt-Dessau, born 25 Dec., 1833.

Heir, William Alexander, b. 22 April, 1852; m. 21 June, 1893, Princess Maria Anna of Braganza.

Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1895) 217,583, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1898 was £577,656, expenditure £417,484; debt (Jan. 1, 1900) £462,424. There are 473 kilometers of railway. The army numbers about 325 men. The capital, Luxemburg (pop. 19,909), is a dismantled fortress.

British Envoy, Sir H. Howard, K.C.M.G. (The Hague).

Telegrams, per word, 2½d.

MADAGASCAR

(French Possession, see p. 572.)

MALACCA.

Malacca, or the Malay Peninsula, has a southerly extension of about 900 miles, an area of 81,800 square miles, and about 1,250,000 inhabitants, including large numbers of Chinese. The country is hilly, densely wooded, abounding in game, and famous for its tin mines. The Isthmus of Kra, in about 11° N. lat., has been examined with ■ view to the construction of a ship-canal, which would much shorten the passage between India and China; but competent authorities have declared the scheme to be impracticable. The greater portion of the peninsula owns allegiance to Siam. Along its western coast are the British "Straits Settlements," and the Federated Malay States (see p. 493). The independent portion of the Malay Peninsula is occupied by a number of Mohammedan Malay States.

Telegrams, per word, 4s. 3d. and 4s. 6d.

MEXICO, FEDERAL REPUBLIC OF.

President of the Republic, Porfirio Diaz, acceded

1 Dec., 1884 (re-elected 6th time 1900 until 1904)

Minister of Foreign Affairs, Don Ignacio Mariscal

Minister in England, Sebastian B. de Mier, 87 Cromwell Road, S.W.

Chargé d'Affaires, Don Cayetano Romer

Financial Agent, Don Luis Camacho, Bloomfield House, London Wall, E.C.

Consul, Don Adolfo Bulle, Broad St. House, F.C.

Liverpool—Consul-General, Don J. Garcia Conde

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, situated between 15°–32' N. lat. and 87°–117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 2 territories (Lower California, almost separated from the main portion by the Gulf of California); and the federal district of Mexico, making in all 30 political divisions, comprehending an area of 767,005 square miles, with an estimated population of (1895) 12,619,959, of whom "only about 3,500,000 are taxable." The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Vera Cruz, Progreso, and Tampico are the chief seaports on the Gulf of Mexico, Acapulco, Mazatlan, Salina Cruz and Guaymas on the Pacific; and Vera Cruz, Tampico, Progreso and Coatzacoalcos on the Atlantic. There were 7,700 miles of railway open in 1898, and 42,150 miles of telegraph. The railways have in a large measure been built by American and English companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can travel in five days from New York without change of carriage. The National Railway *vid* Laredo takes 4½ days to New York, and there is a third route *vid* Eagle Pass (International Railway). The principal crops are maize, wheat, barley, pulse, Chile-pepper, sugar, potatoes, coffee, cotton, tobacco, vanilla, flax, indigo, grapes, and all kinds of fruit. The maguery, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 70 per cent. consist of silver and gold; flax and hemp, coffee, hides and skins, timber, logwood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance. The army in 1898 was composed of about 32,000 men. The navy is limited to 7 small vessels, of about 200 to 300 tons, used for the prevention of smuggling. The following figures have been officially supplied, the value of the Mexican \$ being 23d. to 24d. (Aug. 1900)

	1899-1900.	1900-1901.
Estimated revenue	\$54,913,000	\$53,234,000
Estimated expenditure	54,886,756	58,009,033
Exports (1897-8 & '99-1900)	128,972,749	154,184,498
Imports (1897-8 & '99-1900)	43,603,492	61,304,914
Public debt, Internal	£11,454,265	
External		22,700,000
Imports from U. K. (1898-9)	1,917,672	2,196,568
Exports to U. K. (1898-9)	261,092	511,160

MONACO.

Sovereign Prince, Albert, born 13 November, 1848; suc. 10 Sept., 1889; mar. 1869, Lady Mary Douglas-Hamilton, daughter of 11th Duke of Hamilton (the Pope declared the marriage a nullity, 1880); 2ndly, Oct. 1889, the Duchesse de Richelieu, born 10 February, 1858.
Heir, Prince Louis, born 12 July, 1870.
Governor-General, Olivier de Ritt.

Consul-General in London, Theodore Lumley, 37 Conduit Street, Bond Street, W.

Vice-Consul, Paul Crémien-Javal, J.P., 43 Hill St., Berkeley Sq., W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the gambling establishment, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1886) 12,548 inhabitants. The whole available ground is built over, so that there is no cultivation. There is an army of 125 men.
British Consul, Sir James Charles Harris (Nice).

" *Vice-Consul*, J. W. Keogh (Monaco).
English Chaplain (1895), Rev. F. Stewart.

MONTENEGRO.

Prince, Nicholas, born 7 October, 1841; succeeded his uncle, Prince Danilo, 14 Aug. 1860; m. 1860, Milena, daughter of Vovoyed Peter Vukotich, b. 4 May, 1847; issue 3 sons, 1 daughter.

Heir Apparent, Danilo Alexander, b. 29 June, 1871; m. 1899 Princess Jutta of Mecklenburg-Strelitz.
Pres. of State Council, Voivode Bozo Petrovitch.

Foreign Affairs, Vovoyed Gavro Vukotich.

A small Principality, which has always claimed to be independent, and recognised to be so by the Treaty of Berlin. It has an area of 3,486 square miles, and a population of about 227,000, of whom 13,000 are Mussulmans, 14,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, sardines, cattle, castradina (smoked mutton), hides, and tobacco. The only manufactures are coarse woollens. Agriculture is the principal occupation.

For military purposes the principality is divided into 8 brigade districts, furnishing 48 battalions, or 36,000 men; one battalion is always in barracks at Cetinje, and supplies the

palace guard &c. The two ports, Antivari and Dulcigno, have about 130 coasting vessels.
 Revenue, 1899 about £100,000
 Public Debt, 1900 nil
 Total Imports, 1893 about 60,000
 Total Exports, 1893 " 30,000

CAPITAL, Cetinje. Population (1897) 2,300 (exclusive of permanent garrison of 800 men).

MOROCCO, EMPIRE OF.

Sultan, Muley Abdul Aziz, b. 1879, s. June, 1894.
 Grand Vizier, Hadj Moktar ben Abdallah.
 Minister of Foreign Affairs, Sid Abdelkrim Ben Sliman.
 Commissioner for Foreign Affairs at Tangier, Sid Hadji Mohammed Torres.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°—36° N. lat. and 1°—11° 40' W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sûs, Drâ, Wadi Tafilet, Tuat, and others to the south, which are again subdivided into 33 districts, each under the superintendence of a "Kaid"; but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 314,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contains 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population variously estimated at from 4,500,000 to 8,000,000. Some modifications of these statistics have recently been rendered necessary by the occupation by Algeria of Tuat and other oases on the eastern boundary of Morocco. The Jews number about 300,000, and reside chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. It is a country of great natural resources, which only need developing. The chief ports are Tetuan, Tangier (where the Representatives of fourteen nations reside), El Araish (Laraiche), Rabat, Casa Blanca (or Dar-al-baida) Magazan, Saffi, and Mogador. There are no railways, and telegraphic communication from Tangier is by submarine cable of Eastern Telegraph Company to Gibraltar, and by Spanish Government telegraph to Tarifa. The exports are almonds (£52,655 in 1897), maize, beans (£27,897 in 1897), peas (£71,063 in 1897), oil, wool (£156,109 in 1897), dates, oxen, fowls, eggs, carpets, slippers, goat-skins, leather, grain, ostrich-feathers, gums, esparto; and the imports, cotton, linen, muslin, and woollen goods, tea, coffee, sugar, candles, cloth, silk, iron, brass, hardware, &c. The army consists of between 15,000 and 20,000, one-half of whom are negroes, Sultan's bodyguard, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *Al Moghreb-al-Aksa*, a French paper, *Le Réveil du Maroc*, and three newspapers in Spanish are published at Tangier. There are three capitals, of which Fez, population 120,000, is the principal; Morocco, 50,000; and Mequinez, 56,000.

Consul-Gen., H. S. J. Maas, 4 Coleman Street, E. C.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'—53° 34' N. and long. 3° 22'—7° 14' E., consisting of 11 provinces, and containing a total area of 12,582 square miles, with a population, on Jan. 1, 1900, of 5,103,431. The majority, about three-fifths, belong to the Dutch Reformed Church; and the remainder are Roman Catholics, and a small number of Jews, mainly in large towns, such as Amsterdam, where there are about 70,000. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of watercourses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. There are 2,770 kilometers of railway open (1899), and 20,945 kilometers of telegraph. The chief native products are cattle, horses, swine, sheep, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and

dairy produce. The principal manufactures are shipping, bricks, buterine, cocoa, chocolate, linen, rich damasks, cottons, woollens, and "geneva." Diamond-cutting employs numerous hands in Amsterdam. The chief exports consist of refined sugar, margarine, straw-board, cotton goods, butter, cheese, flax, meat (mutton and pork), cattle, and geneva. The royal navy consisted, on July 1, 1899, of 129 men-of-war (32 of them iron-clads); and the army, on peace footing, of 1,943 officers and 25,753 men, with a militia (Schutterij) numbering 43,690 more. The mercantile marine, on the 31st Dec., 1899, consisted of 176 steamers, tonnage 605,000 cubic meters, and 429 sailing vessels (250,000 cubic meters), employing 19,637 men.

Holland's figures largely in the trade returns of this country, a quarter of the value of which is represented by agricultural produce, but much of the merchandise sent to Holland was for distribution in Germany and other parts. The following are the chief articles imported from the United Kingdom in the year 1899:—

Chemical products	£171,515	Leather	£143,246
Coal, &c.	703,988	Linen	136,798
Cotton yarn	786,334	Machinery	631,530

DEPENDENCIES.—The Dutch possessions in the

EAST INDIES are very considerable, comprising

the whole of the SUNDA ISLANDS, with the excep-

tion of a small portion of Borneo and Eastern

Timor, together with WESTERN NEW GUINEA,

with an area of 733,000 square miles, and a popu-

lation (1896) of 35,206,000, of whom as many as

25,125,000 live in the islands of Java and Madura.

Included in this estimate are many districts in

the interior of SUMATRA, BORNEO, CELEBES, and

other islands, in which Dutch sovereignty is

merely nominal. JAVA and MADURA (custom

receipts, 1899, £838,666) produces a sufficient

supply of food for a dense population, besides

furnishing coffee and other products for exporta-

tion to Europe. The "outlying" islands are

frequently administered by their own princes,

subject to the directions of a Dutch Resident.

There is a colonial army of 1,345 officers and

39,333 men. The colonial revenue for 1900 is

estimated at £11,827,584, and is largely derived

from the sale of coffee, salt, sugar, bark, and

tin; whilst the estimated expenditure is

£12,104,270. The exports, in addition to the

above, include also tobacco, indigo, gums, and

spices, and amounted in 1898, for Java,

Madura, and the other outlying islands, to

£18,146,174, while the imports for the same year

amounted to £14,993,452.

In South America the colony of SURINAM, or

Dutch Guiana, embraces 46,072 square miles and

contains 68,972 inhabitants; and in the West

Indies, CURAÇAO (Imports 1898, £162,505) and five

other small islands belong to Holland, having an

area of 436 square miles, with a population of

51,534.

	1898.	1899.
Exports to U.K.	£476,213	£341,766
Imports from U.K.	2,256,615	3,503,891

NICARAGUA, REPUBLIC OF.

President, José Santos Zelaya, June, 1893.

The largest State of Central America, with a

long seaboard on both the Atlantic and Pacific

Oceans, situate between 9° 45'—15° N. lat. and

83° 40'—87° 38' W. long., containing an area of

51,660 English square miles, including a large

portion of the Mosquito Territory, and a popu-

lation of 310,000, of whom about three-quarters

are mixed blood, and the rest Indians, besides

the Mosquitos, who are mostly in a savage state.

In 1891 there were 93 miles of railway open, and

several lines projected, with 1,591 miles of tele-

graph, connected with the Pacific cable from

Mexico to Peru. A Ship Canal to connect the

Pacific with the Atlantic was commenced in

Oct., 1890, but the company collapsed in 1899;

in 1899 a new company obtained the concession,

but failed to comply with the terms obtained and

the concession was revoked in August 1900. The canal, which had been begun in 1890, is now almost entirely filled up, the machinery lying scattered about in all directions.

The interest on the foreign loan has been reduced to 4 per cent.

NORWAY. (See pp. 598-599.)

OMAN.

Sultan, or Sovereign, Seyyid Feysal bin Turkee, suc. 4 June, 1888.

Omān is a Mohammedan State in S.E. Arabia with a coast-line of about 1,500 miles along the Gulf of Persia, the Gulf of Omān, and the Arabian Sea, an area of 81,000 square miles, and a population of 1,600,000. The small territory of Gwadar on the Mekran coast also belongs to it. Zanzibar, on the African coast, was a dependency of Omān until 1856. The country rises from a bare and burning coast until in Jebel Akhdar it attains an elevation of 10,000 feet. In the interior, however, among the Bedouins, the authority of the Sultan is hardly even nominal.

The population of Omān is chiefly Arab, but there is besides a considerable foreign element, consisting of Banians and Khojas from Western India, Persians, East Africans, and Nubians. The chief productions are dates, grain, fruit, and sugar; and the fisheries are very productive. The revenue is about 225,000 dollars. The exports consist of dates, cloth, salt, fruits, pearls, dried fish, and matting. The imports are—sugar, rice, piece-goods, coffee, wheat, raw silk, cotton, &c. Omān has no independent coinage except copper pice, coined in England, and introduced in 1898; the East India rupee and (Austrian) Maria Theresa dollar are the current coins, the latter being the most used. The rainfall is very scanty, averaging about 6 inches annually.

Muscat, the capital, has with the suburban port of Matra, about 60,000 inhabitants. The trade is chiefly with Bombay, a certain amount being with the Persian Gulf, Batavia, Zanzibar, and Yemen, direct exports of dates being made to the U.K. and U.S.A. There is a regular monthly service from London direct to Muscat.

	1898-99.	1899-1900.
Total exports	\$1,697,400	\$1,533,300
„ imports	2,592,200	2,600,720

Foreign Secretary, Fabio Queirolo.

Minister Plenipotentiary to London and Paris, Señor Eusebio Machain.

Consul-General in London, Alfred James, 18, Eldon Street, E.C.

Consul in London, A. F. Baillie.

One of the most rising States of South America, and, except Bolivia, styled by some as the "Garden of South America," the only one without any sea-board, situate between 22° 4'—27° 30' S. lat. and 54° 32'—61° 20' W. long. Its area is computed at 145,400 square miles, or about one-fifth larger than the United Kingdom, enclosed within the rivers Parana and Paraguay; and contains a population of about 600,000. Now that it has a settled government, Paraguay may be considered one of the most promising countries of South America; its capabilities are practically exhaustless, and the climate favourable to Europeans; the average of the thermometer for 1887 was 73°. The chief crops are maize, rice, coffee, manioc, tobacco, sugar-cane, and oranges. Among its principal trees are several species of dye-wood, and many yielding juices or gums, the caoutchouc or india-rubber; there is also the valuable tree Quebracho, used for tanning, and the valuable shrub called "Yerba Mate," or Paraguay tea-plant—one of its principal articles of commerce; there are an immense number of hardwood and other timber trees; medicinal plants also are very numerous. Stock-raising is the chief industry, and, there being excellent pasturage, it is capable of great development. The chief articles of export are oranges, hides, tobacco, yerbamaté, and timber. The army, 60,000 men strong in the war of 1865-72, has been reduced to 30,000 men; there is no navy. A railway, 155 miles in length, belongs to an English Company; the total cost was £1,455,832, and the earnings in 1896-7 amounted to \$87,556.

	1895.	1897.

Peru is a maritime Republic of South America, situated between 1° 31' 29" and 19° 13' S. latitude and between 68° and 81° 20' 45" longitude W. On the west it is washed by the Pacific Ocean, having a coast-line of 1,500 miles. It is bounded on the north by the Republics of Ecuador and Colombia, on the east by the Brazils and Bolivia, and on the south by Bolivia and Chile.

The boundaries between Peru and Bolivia are not definitely fixed, and there are also boundary questions with Columbia and Ecuador, while the provinces of Talna and Arica are still occupied by Chile. The total area of Peru is about 455,000 sq. m., being as large as England, France, Spain, and Portugal together; and its population, of which no census has been taken since 1876, is about 3,000,000, including 350,000 Indians. The country is traversed throughout its length by the Andes, running parallel to and about 60 miles distant from the Pacific coast. The region between is sandy desert, except where watered by transverse mountain-streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper and coal are conspicuous; while in some of the departments along the coast, there are important beds of petroleum. The interior provinces, i.e., those on the eastern side of the Andes, are of vast extent and fertility, with a climate ranging from temperate to tropical. The medicinal productions are of great value, comprising cinchona or Peruvian bark, sarsaparilla, copaiba, &c. Coffee, cocoa, india-rubber, &c., are indigenous to the country. Important mines of gold, silver, and copper exist, some of which are now being worked, and the Lobos and other islands on the Pacific coast provide the Peruvian guano.

The total length of the railways open (1893) was 849 miles. There is also water communication on Lake Titicaca with Bolivia; the navigation of the lake and of the river Desaguadero has been improved.

The army on a peace footing consists of about 2,800 men, with a police force of about 2,400, and there are 4 war-ships. The principal imports are cotton manufactures, ironware and cutlery, woollen goods, and machinery. The chief exports are guano, cotton, hides, goat-skins, sheep, and alpaca-wool, sugar, silver, coffee, cocoa, vanilla, rubbers, and cinchona.

An arrangement was concluded in January, 1890, by the Peruvian Government for the cancelling of its external debt, in pursuance of which the State railways, the guano, the large silver mines of Cerro de Pasco, and vast tracts of land are vested in the Peruvian Corporation.

The most westerly Kingdom of Europe, and a part of the great Iberian Peninsula; it lies in 37°—42° 8' N. lat. and 6° 15'—9° 30' W. long., being 360 miles in length from N to S, and averaging about 100 in breadth from E to W. Continental Portugal contains an area of 34,606 square miles, with a population in 1890 of 4,660,095, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 389,634) form part of the kingdom, which thus has a population of 5,049,729. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnuts, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last from its hardness and purity is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. There is a commercial marine of 36 steamers and 433 sailing vessels, about 110,000 tonnage. Railways, 1,338 miles in extent, were open for traffic in 1896, and there are 8,079 miles of telegraph wire. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt, which now amounts to about £31 a head of the population.

The army in 1896 consisted of about 30,000 men, on a peace footing, and of 125,057 men with 264 guns on a war footing; and the navy of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 4,898 sailors.

THE AZORES and MADEIRA (imports 1897 £239,531; exports, £272,222) are an integral part of Portugal Proper; the CAPE VERDE ISLANDS off the Cape of that name in Senegambia consist of St. Antonio, St. Nicolas, Fogo, Santiago, Boavista, Sal, and some smaller islands, having a total area of 1,490 square miles, and a population of about 111,000, the capital is St. Vincent. In West Africa a portion of the GUINEA Coast, with the BISSAÇOS ISLANDS, was acquired in 1885; the capital is Cacheo, and the territory has an area of 14,370 square miles with about 1,500,000 inhabitants. In the Gulf of Guinea the two islands of St. THOMAS and PRINCIPE were obtained in 1879; these islands are extremely fertile and have an area of 420 sq. miles population about 2,000). Between the French Congo and the Free State are the territories of LANDANA and CABENDA, area about 2,030 sq miles (population 30,000); and extending from the left bank of the Congo river to the right bank of the Cumene river is the vast kingdom of ANGOLA, with about 1,350 miles of coast line and an area of 510,670 sq miles, population about 3,750,000. The capital of Angola is St. Paul de Loanda, other important places being Benguela and Mossamedes; there are about 300 miles of railway open, and about 250 miles of telegraph wires. In South East Africa are the important colonies of LORENZO MARQUES and MOZAMBIQUE, together constituting PORTUGUESE EAST AFRICA, which extends from Tongaland (British Colony) to the British Central Africa Protectorate in the North West, and German East Africa in the North East, and is bounded on the West by the Transvaal Colony and Rhodesia; and on the East by the Mozambique Channel; the total area is about 297,750 sq. miles, and the population 1,500,000. In the southern province are the ports of Lorenzo Marques (Delagoa Bay) and Beira, and in the northern, Quilimane, Mozambique, and Ibo: the trade of Beira (pop. 31 Dec. 1897, 4,055) in 1897 was £578,500 for imports and £35,400 for exports, that of Lorenzo Marques being £754,416 for imports and £37,856 for exports, and for Mozambique exports £160,571; imports £151,823. Part of Mozambique is leased to the Mozambique Company, who administer the Manica and Sofala territories. The railways in operation are the Delagoa Bay Railway from Lorenzo Marques north-west to join the Transvaal system on the frontier, about 60 miles, and the Beira Railway, from Beira to Umali on the borders of Rhodesia, about 180 miles. In Asia, Portugal possesses GOA, DAMAUN, and DIU (see p. 471), and TIMOR in the East Indian Archipelago, and MACAO, an island near the mouth of the Canton river, having a total area of 7,811 sq. miles, and an estimated population of 1,004,456.

Imports from U.K.	£1,894,573	£2,075,657
Exports to U.K.	358,228	299,915

ROUMANIA.

King, Charles, second son of Prince Charles Antoine of Hohenzollern-Sigmaringen, born 20 April, 1839; elected Hereditary Prince 26 March, 1866; confirmed 24 Oct. 1866; proclaimed King by vote of both Chambers, 26 March; crowned 22 May, 1881; mar. 15 Nov. 1869, Elizabeth (Carmen-Sylvia), daughter of the late Prince Hermann von Wied, born 29 Dec., 1843.

Heir Presumptive (Nephew), Prince Ferdinand von Hohenzollern, born 24 August, 1865; proclaimed

Heir Presumptive 26 Mar., 1889; mar. 10 Jan. '93 to Princess Marie of Edinburgh, and has issue Carol, born 15 Oct. 1893, and Elizabeth, b. 1894.

Consul-General in London, Capt. James Inman, Basinghall Street, E.C.

The Kingdom of Roumania consists of the Moldo-Wallachian provinces formerly belonging to Turkey, but which by the Treaty of Berlin, 13 July, 1878, were recognised as an independent State, and the territory of the Dobruja added to them. On the 26th March, 1881, Roumania was raised to a Kingdom. The entire area is 46,314 square miles, with a population of about 5,500,500. The dominating religion is that of the Greek Church (4,529,000); Roman Catholics, 114,200; Protestants, 13,800; Jews, 400,000. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle, sheep, and horses, of which immense numbers are reared on its far-stretching pastures. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, rock-salt, spirits, hides, wood, and cattle. The total length of railways is nearly 1,700 miles, and there are 223 telegraph offices with 9,915 miles of wire.

An International Commission, created by the Treaty of Paris, 1856, and whose powers were enlarged by the Treaty of Berlin, 1878, has its seat at Galatz, and exercises sovereign powers over the navigation of the Danube: the British representative is Lieutenant-Colonel Trotter, Consul-General. Its income, principally derived from shipping dues, amounts to about £60,000 per annum. On November 10, 1892, a large dock was opened at Ibraila (Brahilov), and in 1896 a canal through the "Iron Gates" rendered the hitherto dangerous part perfectly navigable.

The field army consists, on the peace footing, of about 46,000 men, but in time of war this can be raised to 153,000, and there is a militia in addition. There is also a small navy of 12 steamers.

Agent of Ministry of Finances, M. de Tatischeff.
Assist. do., Gregory Wilenkin.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28'—76° 33' N. and 17° 40'—64° 30' E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until 1867 included also a large section of North America. The empire comprises:

<i>European Russia</i> :—	English Square Miles.	Population in 1897.
Russia Proper (50 Provs.)	1,187,043	94,188,750
Poland (10 Provs.)	49,143	9,442,590
Finland (Grand Duchy)	144,211	2,527,801
<i>Asiatic Russia</i> :—		
Caucasia (11 Provs.) ...	182,449	9,723,553
Siberia (8 Provs. and Regions)	4,823,112	5,731,732
Central Asia (10 Provs. and Regions)	1,364,124	7,590,275
Russian subjects in } Khiva and Bokhara }	6,412
	8,450,081	129,211,113

Of the total population 64,616,280 are men and 64,594,883 women.

In the European parts of Russia alone the

population increases annually at the rate of nearly a million and a half. The largest towns are St. Petersburg (1,267,023), Moscow (988,610), Warsaw (614,752), Odessa (404,651), Lodz (314,780), Riga (284,943), Kieff (248,750), Kharkoff (170,682), Vilna (160,000), Saratov (133,000), Kazan (131,000), Ekaterinoslav (121,000), Rostoff (119,000), Astrakhan (113,000), Tula (111,000), and Kishineff (103,000); whilst Nijni Novgorod, Nikolaieff, Samara and Minsk have populations between 90,000 and 95,000. In Asiatic Russia the Caucasus contains two towns with over 100,000 inhabitants, Tiflis (160,000), and Baku (112,000); Turkestan contains five large towns, Tashkend (156,000), Namangan, Samarcand and Andijan; in Siberia, Tomsk, Iskutsk, and Ekaterinburg have each about 50,000 inhabitants. Nijni Novgorod, though small, is a station on the Trans-Siberian Railway, and has annually the largest fair in the world. The various nationalities in 1882 were represented about as follows:—Russ, 69,770,000; Poles, 6,010,000; Lithuanians, 2,910,000; Germans, 1,120,000; Swedes, 270,000; Tajiks (Persians), &c., 1,125,000; Armenians, 800,000; Jews, 2,954,000; Caucasians, 2,850,000; Finns, 2,000,000; Turks and Tartars, 7,700,000; Mongols, 530,000; various, 584,000. The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there are:—Greek Catholics (including Dissenters), 72,990,000; Roman Catholics, 8,910,000; Protestants, 4,766,000; Jews, 2,954,000 (a very competent authority gives the number of Jews as being nearer four millions); Mohammedans, 11,814,000; and Pagans, 450,000. European Russia consists mainly of an immense plain; the Valdai hills in the west rise only to about 1,000 ft., and the Lublin hills in the south-west to about 1,500 ft., on the right bank of lake Imandra, in the Kola peninsula, is an elevation of 3,300 ft., the Timanski range in the province of Archangel to about 3,000 ft., and Mount Lujaur-Ort in Finland rises to about 3,400 ft. In the Crimea and Caucasus various heights are over 4,500 ft., and the Obdorsk and Ural mountains, which form the border-land between Europe and Asia, rise in many places to between 4,000 and 5,000 ft. In Siberia the principal ranges are the Altai, Sayansk, Baikal, Yablonoi and Verkhoiansk mountains, with a volcanic chain in Kamchatka. In Russian Turkestan are portions of the Thian Shan range, and in Bokhara are the Pamirs, the "Roof of the World," and in all these ranges are heights of over 5,000 ft. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries. The river Amur, dividing Manchuria from Eastern Siberia, is navigable from its mouth to Chita, in the Trans-baikal province by shallow draught steamers, and is of importance, together with the Trans-Siberian Railway, in spreading Russian influence in the outlying portions of the Chinese Empire.

A great portion of Russian territory is unfit for cultivation; in the north the tundras are almost constantly frozen, but in a short summer provide good pasture, and certain berries fit for human food; in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst some of the interior provinces (to the extent of about 460,000,000 acres), and nearly

the whole of Siberia are clothed with forests, in which the fir, pine, birch, oak, lime, maple and ash predominate. The country between the Baltic and Black Sea, however, is eminently fertile, producing abundance of grain. The chief cereal raised is wheat, of which Russia is the second largest grower in Europe, the triennial average harvest in the period 1896-8 being about 200,250,000 bushels; other cereals are barley, oats, buckwheat, millet, and especially rye, the staple food of the inhabitants. Hemp and flax are extensively cultivated, and of late years potatoes and tobacco: The Obdorsk and Ural Mountains (forming the boundary land between Europe and Asia), contain very great mineral riches, and, with the Altai range, are the principal seat of mining and metallic industry, producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. The naphtha springs on the Caspian are annually increasing in importance, and already flood certain European markets with petroleum. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper).

The principal ports are Petersburg, the naval depot and fortress Kronstadt, Narva, Riga, Libau, Pernau and Windau (Baltic), Uleaborg (gulf of Bothnia), Revel, Helsingfors and Wiborg (gulf of Finland), Archangel and Onega (White Sea), Odessa, Nicolaieff, Sevastopol and Batoum (Black Sea), Taganrog, Mariupol, Rostoff and Kerch (Sea of Azov), Astrakhan, Derbent and Baku (Caspian Sea), and Okhotsk, Nicolaieffsk, Vladivostok, and Petrapaulovsk in Kamtchetka (Pacific); whilst the Chinese possessions of Port Arthur and Talienwan (gulf of Pechili) have been occupied by the Russian government in accordance with the Russo-Chinese treaty of 17 March, 1893.

With metallurgical and engineering factories, Russia possesses many extensive manufacturing establishments for weaving, tanning, fur-dressing, &c. Linen is largely manufactured by hand-looms, the chief operations consisting in spinning and weaving flax and hemp. Woollen and worsted stuffs, fine cloths, and mixed fabrics are also produced. The industrial production increased in the 21 years 1877-1897 from 541,000,000 roubles to 1,816,000,000 roubles; the output of coal from 1,774,193 tons in 1877 to 12,032,238 tons in 1898; pig-iron from 370,957 tons (1877) to 2,161,291 tons (1898); steel from 43,387 tons (1877) to 1,451,612 tons (1893). The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow, and bristles.

The exports in 1899 to the United Kingdom amounted to £18,711,168, the chief articles being:—

Butter.....	£685,493	Flax and tow....	£1,912,551
Corn, wheat.....	840,789	Hemp.....	228,754
" oats.....	1,261,856	Oil-seed cake....	628,576
" barley....	3,161,347	Petroleum.....	1,038,986
" maize.....	575,480	Seeds linseed, &c.)	716,573

The chief articles of import into Russia from the United Kingdom in 1899 were:—

Coals, &c.	£1,951,269	Implements & tools	£199,517
Chemical products	129,370	Machinery	3,564,667
Cotton yarn and manufactures ..	391,525	Metals, all kinds ..	3,223,200
Herrings	347,959	Wool, yarn and manufactures ..	744,620

The ARMY contains on a peace footing over 860,000 men, with 3,400 guns; on a war footing it is capable of being raised to about 3,400,000 men with 3,500 guns, not including the last reserves.

The NAVY (for which an estimated expenditure of £9,303,749 was allowed for 1900 consisted in December 1900 of 6 first-class battleships (with 7 *building*), 10 second-class and 1 third-class battleships, 16 coast defence ships, 5 first-class cruisers (with 10 *building*), 7 second-class and 2 third-class cruisers (with 1 *building*), 9 torpedo gunboats, 21 T. B. D. (with 22 *building*), and 81 first-class torpedo boats (with 4 *building*).

RAILWAYS, &c.—The total length of lines open for traffic in May, 1900, was about 41,400 miles, with about 8,000 miles under construction. In Asiatic Russia *The Siberian Railway* was commenced in 1891 to connect Vladivostok with the Russo-Siberian frontier (Ekaterinberg), a distance of about 4,000 miles; Irkutsk, on the west of Lake Baikal (and about 3,830 miles from St. Petersburg), was reached in March 1899, and the line was opened as far as Chita in December, 1899, whence it will proceed through the Transbaikalian province (Zabaikalskaya) and the maritime province of Amur to its final destination, Peking, *v.d. Vladivostok*. A section from Vladivostok to Khabarovka is complete, thus shortening the distance to be traversed by over 500 miles. A line is projected, but not yet officially sanctioned, from Omsk to join at Taskend with *The Trans-Caspian Railway* from Peti to Baku, on the western side of the lake, and on the eastern side from Krasnovodsk, *via* Merv and Bokhara to Taskend, whence branches run to Khokand and Andijan, another branch running from Merv to Kushk, or about 80 miles east of Herat. With the idea of further opening up communications in Southern Russia, a scheme has been projected for a canal between the Baltic and Black Sea. In the budget for 1899, the whole of the extraordinary expenditure of 109,973,433 roubles (£12,825,820) was devoted to railway development.

There were (1895) 7,887 post-offices, carrying 30,667,422 letters, &c. Of telegraphs there were (1897) 5,063 offices, with 90,383 miles of line.

The sea-going commercial marine consisted in 1898 of 2,143 sailing vessels and 657 steamers, with a total tonnage of 554,141: the ocean shipping of the Russian Empire is comparatively insignificant, but the internal (lake and river) shipping is considerable.

THE GRAND DUCHY OF FINLAND.

Grand Duke, The Emperor of Russia.

Governor General, Lt.-Gen., N. Bobrikov.

Secretary of State, Actual Privy Councillor, V. de Plehve (acting).

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808. The area is 144,254 square miles, with a population of about 2,595,000 in 1898, of whom about 2,230,000 are Finns, 350,000 Swedes, 12,000 Russians, 2,000 Germans and 1,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,400 students. Swedish is the language of the upper classes. The leading crops are rye, barley, oats, potatoes; but there are not sufficient cereals for home consumption, and large quantities are imported from Russia and Germany. The live stock, in addition to horses, cattle, sheep, pigs, and goats, includes also the reindeer in the extreme north. Iron, lake and bog-ore, copper, lead, and graphite are found, but no salt. The iron industry is of importance, and spinning and weaving of cotton, flax, and wool, distilling, the making of matches, sugar-refining, ship-building, saw mills, and other branches of industry are carried on with success. The forests are a great source of wealth, and immense quantities of timber are prepared for export. The exports include timber, wood-pulp, butter, textile fabrics, paper, and iron. There are 1,652 miles of railway; and (1898) a marine of 2,298 vessels, of 324,344 tons.

Finland is a constitutional monarchy of a somewhat antiquated type. The Diet consists of four estates:—nobles, clergy, burgesses, and peasants, and is convoked triennially, and the country is chiefly governed by the Imperial Finnish Senate, of 22 members. There are 9 battalions of Finnish Rifles, mustering 5,600 men, and one regiment of dragoons 900 strong, with a reserve of 30,000. The revenue in 1898 was £4,209,097, and the expenditure £3,665,916: the debt amounts to £4,508,000 (1899). The imports in 1898 were £9,481,740, and the exports £7,200,626. The capital is Helsingfors, population 86,000 (including Russian garrison).

CAPITAL OF THE RUSSIAN EMPIRE, St. Petersburg. Population, 1,267,023.

SALVADOR (REPUBLIC OF).

President, Gen. Tomas Regalado, 14 Nov., 1898
 Foreign Affairs, Dr. Francisco A. Reyes.
 Public Instruction, Dr. José Presentacion Trigueros.
 War and Marine, Gen. Fernando Figuero.
 Finance, Dr. Fidel A. Norroa.
 Interior, Dr. Tomas G. Palomo.

Consul-General, M. J. Kelly, 8 Idol Lane, E.C.
 Consul, Manuel de Montis.

Salvador extends along the Pacific coast for 170 miles, with a general breadth of 43 miles and contains an area of about 7,228 English square miles, with a population estimated at 800,000. It has four ports, Acajutla, La Libertad, La Union, and El Triunfo. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. *A railway 34½ miles in length connects Acajutla with Ateos, 21 miles from the capital, and has been extended to Sta. Ana, the coffee centre. Another line is approaching completion from the port of La Union to San Miguel. The only river of importance is the Lempa, over which a bridge was constructed in 1897 at the cost of £28,600; only to be destroyed by a hurricane at the end of the year. Earthquakes are frequent and the capital (now rebuilt) was entirely destroyed by one in 1873; but the building-construction is being modified to resist destruction.

Revenue, 1897	£584,613
Expenditure, 1897	690,875
Imports, 1897	349,654
Exports, 1897	753,850
Internal Public Debt, 1899	\$8,650,000
*External Public Debt, 1900	nil.
Imports from U.K., 1899, £188,579; exports,	97,650

SAMOA (NAVIGATOR'S ISLANDS).

[See U.S.A. (p. 606) and Germany (p. 579).]

SAN MARINO.

A small "Republic" in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60 (20 nobles, 20 townsmen, and 20 peasants), of whom two act jointly as Regents. The area is 33 square miles, the population 8,000. There is an "army" commanded by several "generals," and honorary ranks and titles are bestowed on foreigners for a consideration. The village of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has a castle, fortified by King Berengar of Lombardy, a fine church, and a theatre. Agriculture and viticulture flourish. By a treaty concluded in 1872 the Republic has placed itself under the protection of Italy.

British Consul, Maj. W. P. Chapman (Florence).

SERVIA.

King, Alexander (Obrenovitch), b. (2) 14 August, 1876; succeeded his father, King Milan (who abdicated), 6 March, 1889. Took royal authority into his own hands (1st) 13th April, 1893; (2nd) 23 July, 1900, Madame Draga, *née* Lougnevica.

Premier & Foreign Affairs, Alexa S. Tovanovitch (July, 1900).

Interior, Lasa Popovitch.

Public Works, Andra Tovanovitch.

Finance, Dr. Mika Popovitch.

Justice, Nastas A. tonovitch.

Public Instruction, Paole Marinkovitch.

War, Miloch Vassitch.

Envoy Ext. and Min. Plen. in London, M. S. M. Losnitch, 7 Phillimore Gardens, W
 Consul-General in London, H. W. Christmas, 9 Southampton Street, W.C.
 Consul in Manchester, Otto Baerlein.

A Kingdom of Eastern Europe, governed by an hereditary sovereign. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people. This constitution was suspended 21 May, 1894, by Royal decree and that of 1869 provisionally restored. It is separated from Hungary by the Danube and Save. By the Berlin Treaty, 1878, it received a large accession of territory, and now has an area estimated at 18,757 square miles, with a population in 1895 of 2,314,153. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive

* The external debt was extinguished in 1899 by a Financial Syndicate who also purchased the railway and obtained a concession to complete it as far as the capital.

fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The production of wine has suffered severely from Phylloxera and bad seasons, and of late the country has been compelled to import grapes and wine from Macedonia. The cultivation of prunes is very extensive, and these are sent chiefly to Austria-Hungary, Germany, and the United States. The live stock (1899) included 169,928 horses, 915,428 cattle, 3,620,197 sheep and goats, and 904,446 pigs. Lead, zinc, quicksilver, antimony, copper, iron, and coal are found. Carpet-weaving and embroidery, and the making of jewellery and filigree work, are of some importance. The imports consist in the main of cottons, sugar, and colonial goods, hardware, woollens, &c.; the exports of dried prunes (11'6 per cent.), pigs and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. The direct trade of Servia with the United Kingdom is small (imports, 1897, £259,259; exports nil). There were (1894) 624 kilometres of railway, and 3,174 kilometres of telegraph, with 111 post offices and 392 kils. of telephone. The army, on a peace footing, numbers 19,000 men, with 186 field guns. On a war footing it includes a *field force* of 73,000 rifles and 4,000 sabres with 276 field guns; a first *ban* of 55,000 rifles and 1,000 sabres, a second *ban* of 35,000 rifles and 500 sabres and *deposits* with 2,000 rifles, 500 sabres, and 32 field guns: the total of the war footing is therefore 165,000 rifles, 6,000 sabres and 308 field guns. Every man between 18 and 50 years of age can be called to arms. Education is compulsory and free, and has been making rapid strides of late years.

Revenue, 1899 (estimated)	£2,752,980
Expenditure, 1899	2,752,902
Public debt, 1899	16,676,512

Naval Attaché, Captain Jon M. Diaz.

Consul-Gen., Don Ernesti Merlé, 20 Mark Lane.

Financial Delegate, Nicasio E. Jauralde, 37 New Broad Street, E.C.

A Kingdom situate in the south-west of Europe, between 36°–43° 45' N. lat. and 4° 25' E.—9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the ancient Provinces, still best understood, are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary and Balearic Isles, comprising an area of 196,173 English square miles, and a population in 1887 of 17,550,216. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated table-land, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain is rich in minerals, especially iron, copper, and lead, and as capital is attracted its resources will be developed. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante; these are the best known, but there are many others which only require to be brought before the English public in order to secure a market. Now that the country is in a more settled condition, there is little doubt that it will attract travellers, and then become better known. Most of the principal towns now possess very fair hotel accommodation. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery, and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c.; trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home trade is rigidly protected by high customs duties. The principal exports to the United Kingdom in 1899 were:—

Copper	£1,240,542	Olive Oil	£143,644
Cork	110,820	Quicksilver	369,296
Oranges	1,919,035	Esparto, &c.	290,192
Iron ore	4,598,635	Others	288,563
Lead	1,452,174	Silver ore	125,652
Raisins	459,241	Wine	773,138

And the chief imports from the United Kingdom:—

Coal and coke	£1,090,945	Manure	£540,894
Cotton manufactures	234,539	Metals, all sorts	373,493
Machinery, all sorts	496,454	Wool, &c.	359,014

The army is raised by conscription, but exemption may be purchased; and the terms of service are three years with the colours, 3 years with the first and 6 years with the second reserve. On peace footing it consists of 3 annual contingents of 40,000 or 120,000 men in all. On a war footing it consists of 12 annual contingents or 480,000 men. The colonial forces, which, including militia, numbered about 250,000, have been almost entirely disbanded. The Navy was almost entirely destroyed during the war of 1897 with the U.S.A., and there now remain one battleship, the *Pelayo* (built in 1887), and a few small craft.

During 1899, 18,926 vessels (tonnage 14,630,115) entered, and 17,418 (tonnage 15,265,103) cleared at Spanish ports.

Nearly all the 49 Provinces are now connected by railways, of which about 6,070 miles have been completed, and there are 17,628 miles of telegraph.

Finance.—Owing to the Estimates for the financial year 1899-1900 failing to be voted within the legal time, the Estimates for 1898-99, with certain modifications, were decreed to remain in force for a further year or until a new law should be passed. By law of 28 Nov., 1899, the financial year was fixed to begin on 1 Jan., ending on 31 Dec. The budget for the financial year 1900 was passed on 31 March, 1900, and came into force on the following day.

	1899-1900.	1900.

SPANISH OVER-SEA POSSESSIONS.
(See also p. 616)

The over-sea possessions now consist of the following, which are administered as if part of Continental Spain, the head quarters of the local administration being Teneriffe, in the Canary islands:

In the Gulf of Guinea, the island of FERNANDO PO, and ANNOBOW, CORISO and ELOYB islands off the coast of French Congo. In 1891 Spain relinquished her claim to Coriso Bay, retaining, however, CAPE SAN JUAN and the right of navigation over the rivers Benito and Muni. In 1900, by a treaty concluded with France and Spain, the district bounded on the north by the German colony of the Cameroons, on the east by the Muni river, was recognised as Spanish. In the same year the Spanish Protectorate was recognised over the district between Capes Bojador and Blanco. To the north-west are the CANARY ISLES (area about 3,000 square miles, population 300,000), the capital being Teneriffe. In Morocco are several "Presidios"; IFRA near

Cape Non, TERUAN and CEUTA (30 square miles, population 16,000) opposite Gibraltar, and the coast towns of Gomera, Alhucemas, Melilla, and the Zaffarin Islands. The total area of these possessions is about 244,000 sq. miles, with a population of about 135,000.

SWEDEN AND NORWAY.

King of Sweden and Norway, Oscar II., born 21 January, 1819; *suc.* 18 September, 1872; *married* 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, born 9 July, 1836 (and has issue, 4 sons).

His Apparent, Oscar Gustaf Adolf, Duke of Wermland, Crown Prince, b. 16 June, 1858; *m.* 20 Sept., 1881, Victoria, d. u. of Grand Duke of Baden, born 7 August, 1862.

Envoy Ext. and Minister Plenipotentiary in London, Count Carl Lewenhaupt, 52 Pont Street, S. W.

Secretary of Legation, Baron Ch. E. Ramel.

Consul-General, D. Danielsson, 24 Great Winchester-Street, E. C.

The Kingdoms of Sweden and Norway, now united under one sovereign, embrace between them the entire north-western peninsula of Europe, situate between lat. 55° 20'—70° 12' N. and long. 4° 37'—31° E., bounded by the Baltic Sea and Gulf of Bothnia on the east, and the Atlantic on the west. The total area is 299,377 square miles, and the population numbered 7,290,402 in December, 1899. (Sweden, 5,097,402; Norway, 2,193,000.)

British Minister, Hon. Sir Francis J. Pakenham, K. O. M. G. (Stockholm)..... £3,000

Sec. of Legation, H. G. O. Bax-Inneside... 500

2nd Secretary (acting) Lord Clandeboye.

Chaplain, Rev. Edward Shepherd, M. A....

I. SWEDEN.

Prime Minister, Baron F. W. von Otter.

Foreign Affairs, C. H. T. A. Lagerheim.

Justice, P. S. L. Annerstedt.

Navy, G. Dyrssen.

Interior, J. E. von Krusenstjerna.

Instruction, N. C. A. Claesson.

Finance, Count H. H. Wachtmeister.

War, J. J. Crusebjörn.

Ministers sans portefeuille, S. H. Wikblad | K. S. Husberg.

Sweden comprises the eastern half of the peninsula, and, except the capital, is divided into 24 governments, "Län," with an area of 172,877 square miles, and a population, 31 Dec. 1899, of 5,097,402, nearly all of whom are Protestants, and for the most part well educated. About 57 per cent. of the population are devoted to agriculture, about 277,000 being owners, and 49,000 tenants of the land they cultivate. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kilen Mountains, which separate Sweden from Norway, and may be divided into three separate districts; the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-twelfth of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes; a large quantity of oats are annually exported. The forests are very extensive, covering nearly one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, as supplying not only pitch and tar, but also the chief fuel. The mineral products are

extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare, to Lulea, *i.e.*, about 130 English miles. Considerable mines of coal are being worked in Scania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coals, cloth, yarn, wool, cotton, hides, salt; oils, wheat, rye, pork, and machinery. The chief articles of export are timber, oats, cattle, butter, iron, steel, paper, matches, iron and zinc ores, &c. The chief domestic exports to Great Britain in 1897 were butter, iron, paper and paper-making materials, and timber; and the chief domestic imports from Great Britain in 1897 were coal, metals, wool and woollen manufactures.

Commercial travellers in Sweden are compelled to take out a licence costing 100 crowns a month, or they incur the risk of being fined.

Railways 6,705 miles in length (of which 2,288 are the property of the State) were open at the end of 1899; and 5,470 miles of telegraph (exclusive of 3,579 railway telegraph), 178 stations, and 1,204 railway telegraph stations. There were at the same date 89,109 miles of telephone wires.

The field army of Sweden numbers 40,412 officers and men, with 240 guns and 6,891 horses; the militia and Landsturm, 450,000 more. The navy consists of 65 steamers (314 guns), 19 being ironclads, with 6 sailing vessels. The officers and men of the navy number about 5,000, with a reserve of 173 officers, and about 20,000 men.

 Justice and Police, Ole Anton Qvam.
 Finance and Customs, Sören Tobias Aarstad.
 State Secretary, H. Lehmann.

Delegation of the Council at Stockholm.
 Minister of State, Otto Albert Blehr; Ministers,
 Elias Sunder, Captain-Commodore Christian
 Sparre.
 General Secretary, H. Schlytter.

Norway, an independent kingdom, since 1814
 united with Sweden under the same King of the
 House of Bernadotte (the fundamental law of the
 17th of May (4th of November), 1814, the Act of
 Union with Sweden of the 6th of August, 1815).
 The Parliament of 114 members is called the "Stor-
 thing," which is divided into two sections, chosen
 by itself to discuss projected Bills, called "Odels-
 thing" and "Lagthing." The western and northern
 portion of the peninsula is about 1,100 miles in
 length, its greatest width about 250 miles. It is
 divided into 20 provinces, oramts, and comprises an
 area of 124,500 sq. miles, with a population (1899)
 of 2,193,000. The coast-line is extensive, deeply in-
 dented with numerous fiords, and fringed with an
 immense number of rocky islands. The surface
 is mountainous, consisting of elevated and barren
 table-lands, separated by deep and narrow valleys.
 The cultivated area is about one-thirtieth part of
 the country; forests cover nearly one-fourth; the
 rest consists of highland pastures or uninhabitable
 mountains. Agriculture, though pursued with
 some vigour of late, is unable to furnish sufficient
 produce for home consumption; hence it has been
 necessary to import considerable quantities of
 corn, meat, and pork. The fisheries give em-
 ployment to a large part of the population
 throughout the year. The most important are
 cod and herring; the exports of these with other
 sea-products and fish-oil were valued at £2,588,711
 in 1899. The mineral products are similar
 to, but far less valuable than, those of Sweden.
 Timber-dressing, mechanical engineering, textile
 manufactures, ship-building, and pulp-making
 are the principal departments of Norwegian
 industry. The exports of produce of the forests
 were valued at £3,264,703 in 1899, the value of wood-
 pulp alone being £1,007,550. The imports consist
 chiefly of the necessary articles of consumption.
 The chief exports consist of timber, fish, oil and
 other products of the fisheries, pulp, skins and
 furs, nails, minerals, ice, condensed milk, mar-
 garine, butter, cattle, &c. The principal domestic
 exports from Norway to the United Kingdom in

1899 were paper and paper-making materials and
 timber; and the principal domestic imports from
 the United Kingdom in 1899 were coal, steam-
 ships, Manchester goods, metals, and woollens.

The navy consists of 4 ironclads, 4 coast defence
 ships, 3 cruisers, 33 torpedo vessels, and 11 gun-
 boats, with 5,150 officers and men. The mercantile
 marine, 31 Dec., 1899, consisted of 6,825 vessels, of
 1,534,934 tons. The army by law consists of 18,000
 men of the line, and cannot be increased without
 the consent of the Storting, but the number of
 trained men and officers under different names is
 about 3,000, with a Landvaern and Landsturm
 of 50,800. Military service is obligatory and per-
 sonal after the completion of the twenty-third
 year. The period of service is six years in the line,
 six years in the "landvaern," and four years in
 the "landsturm." The debt was incurred chiefly
 in the construction of railways (1,119 miles open).
 The length of telegraphs belonging to the State in
 January, 1900, was 7,033 miles.

Minister in London, Charles Daniel Bourcart, 52,
 Lexham Gardens, W.

The Helvetia of the Romans, ■ Federal Republic
 of Central Europe, situated between 45° 50'—47°
 84' N. lat. and 5° 58'—10° 30' E. long. It is
 composed of 22 Cantons, of very dissimilar size,
 united under a Constitution dated 29 May, 1874,
 and comprises a total area of 15,469 square miles,
 with a population of 2,933,334 in 1888, who are
 divided between Roman Catholics, 41 per cent.,
 and Protestants, 59 per cent., Jews numbering
 7,400, and others 11,000. The population is formed
 by three nationalities, distinct by their language,
 as German 71 per cent., French 21 per cent.,
 Italian 6 per cent., and Romanshe (in the Grisons),
 1½ per cent. The most important cities are
 Zürich, pop. (1896) 147,877, Geneva, 80,778, and
 Basle, 88,853. It is the most mountainous country
 in Europe, having the Alps, covered with perennial
 snow and glaciers, rising from 5,000 to 15,213 feet
 in height, not only along the whole of its southern
 and eastern frontiers, but throughout the chief
 part of its interior; and the Jura mountains in
 the north-west. Agriculture is followed chiefly
 in the valleys, where wheat, oats, maize, barley,
 flax, hemp, and tobacco are produced, and nearly
 all English fruits and vegetables are grown. The
 forests cover about one-sixth of the whole surface.
 The manufactures consist chiefly of silks, cottons,
 linen, lace, thread, woollens, &c.; clocks and
 watches have long been the staple products of
 Geneva and Neuchâtel, while leather, gloves,
 pottery, tobacco, and snuff, cheese, &c., are made.
 Being an inland country, the direct trade with
 the United Kingdom is comparatively small. In
 1894 there were 2,407 miles of railway in working
 order, and 4,693 miles of telegraph.

The military establishment on ■ war footing,
 including landwehr, consists of 209,603 men—
 staff 1,035, infantry 160,966, cavalry 6,048, artil-
 lery 29,597, engineers 7,357, others 4,600. To
 this number must be added the landsturm, or
 final reserve, of 276,161 more.

The legislative power is vested in a Parliament,
 consisting of two Chambers, ■ National Council
 of 147 members, and a Council of States of 44
 members; both Chambers united are called the
 Federal Assembly, and the members of the
 National Council are elected for three years, an
 election taking place in October. The executive
 power is in the hands of a Federal Council of 7
 members, elected by the Federal Assembly, pre-
 sided over by the President of the Confederation.
 The President has ■ salary of £540; the Vice-
 President and other members of the Federal
 Council £480 each. The members of the Federal
 Council are elected for three years; each year the
 Federal Assembly elects from this council the
 President and the Vice-President; they are elected

for one year, the five other members for three
 years. Not more than one of the ■ canton
 may be elected member of the Federal Council.

TIBET (see p. 483).

TONQUIN (see p. 489).

TRIPOLI.

Governor-Gen., Hafiz Mehmet Pasha, appoint d
 July, 1900.

A Vilayet, or province of the Ottoman Empire,
 on the northern coast of Africa, and the most
 easterly of the Barbary States, extending from the
 frontiers of Tunis to those of Egypt, a distance
 of about 900 miles, and inland to the south a distance
 of about 800 miles. Formerly (1713-1835) it was
 under a native (Karamanly) dynasty, and passed
 under direct Turkish control in 1835. It com-
 prises the four sub-provinces or Mutessarificks
 of Tripoli, Khoms, Jabel-el-Sharb, Fezzan, and
 Benghazi or Cyrenaica, the latter being under the
 direct government of Constantinople since 1875.
 It has an area of 410,000 square miles, and a
 population of 800,000. There are no rivers in the
 country, and the rainfall being precarious, a good
 harvest can only be reckoned on every four or five
 years. The military force of the country now
 numbers about 10,000 men. The revenue is chiefly
 raised by ■ poll-tax, regulated according to the
 wealth of each individual, and by tithes. Barley,
 dates, olives, oranges, lemons and vegetables are
 produced, and the principal imports are metals,
 British and other European manufactures, tea,
 beads, wines and spirits, besides a number of
 articles for barter in Wadai, Bornu, and the
 Western Soudan, whither caravans proceed
 regularly from Tripoli. The principal articles
 of export are ostrich feathers, ivory, skins,
 sponges, hides, esparto grass, cattle and horses.
 The ancient ruins in Cyrenaica, *i.e.*, at Cyrene,
 Ptolemais, and Apollonia are interesting to ex-
 plorers as well as those at Leptis Magna, which is
 close to Khoms, or 70 miles from the city of Tripoli;
 agricultural colonies of Cretan Moslem refugees
 are being formed in the neighbourhood. The
 town of Benghazi has a population of about
 15,000, consisting of Arabs, Greeks, Maltese, and
 ■ few Levantines. The commerce in cereals, wool,
 cattle for Malta, and other agricultural produce,

is considerable, when a sufficient rainfall causes good harvests.

TUNIS.

(French Protectorate.)

Bey, H.H. Sidi Ali Pasha; born, 1817; suc. 23 October, 1882.

Heir Presumptive,

French Resident General, M. Millet (14th Nov. 1894).

The Regency of Tunis, formerly a tributary dependency of the Ottoman Empire, may now be considered an informally annexed dependency of France, nominally under the dominion of the Bey, but in reality under the control of a French Resident. By treaty, 12 May, 1881, "the occupation is to cease when the French and Tunisian authorities recognize by common accord that the local government is capable of maintaining order." By a convention signed 10 July, 1882, France administers the country and collects the taxes in the name of the Bey, who is granted a civil list of £37,500, and the princess a sum of £30,000. It is in the north of Africa, situated on the Mediterranean, east of Algeria, between lat. 32° 20'—37° 25' N. and long. 7° 40'—11° 15' E. It comprises an area of 44,920 square miles, and has about 1,500,000 inhabitants, of which there are about 250,000 Europeans.

The chief town, Tunis, is the largest and most commercial city of Barbary, with a population of 145,000, of whom 45,000 are Jews and 28,000 Christians (8,000 Italians, 7,000 Maltese, and 3,000 French). It possesses considerable manufactures of silk and woollen stuffs, shawls, carpets, mantles, fez caps, burnouses, also otto of roses and jessamin. The chief exports are grain, oil, wool, and esparto grass. N.E. of Tunis is the site of the ancient city of Carthage. There are 258 miles of railway and 1,245 of telegraph.

2nd do., Abdul Hak Hussein Bey.

3rd do., Raghib Raif Bey.

Imam, Mehmed Redjaj Effendi.

Consul-General, Emin Effendi Ferédjullah, 29

Mincing Lane, E.C.

This Empire, consists of the following districts:—

I. TURKEY IN EUROPE, formerly very extensive, is now reduced to 66,500 square miles, with a population of 4,668,000. (This, however, does not include Bulgaria, Eastern Roumelia, and Bosnia, which jointly have an area of 58,739 square miles, and a population of 4,320,110.) The total population includes about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,000,000 are Mohammedans. A great part of the surface is covered with mountains of moderate elevation. Since the Balkans no longer lie within the limits of the empire (although Turkey is entitled to occupy their passes in case of war), the loftiest mountains are those of the Rhodope or Despoto Dagh (7,454 ft.) in the east, and the mountain-ranges of Albania in the west. To the latter belongs the Skhar Dagh (10,007 ft.), the culminating point of the whole Balkan peninsula. Rivers are numerous, the principal of which are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, cotton, barley, millet, sesame and other oil-seeds, and tobacco; the natural products are the pine, beech, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing

works. In Europe, 838 miles of railway are being worked, and 1,136 in Asia, and about 1,000 miles are being constructed in Europe and Asia.

II. **TURKEY IN ASIA**, the larger of the two divisions, comprises Asia Minor, Syria, including Palestine, the greater part of Armenia (where the recent massacres and reprisals originated), and Kurdistan, Mesopotamia (the valley of the Euphrates and Tigris), and the western portion of Arabia, bordering the Red Sea, with the district of El Hasa on the eastern side of the Persian Gulf; having a total area of 680,000 square miles, and an estimated population of 16,333,000 inhabitants. To this number must be added the autonomous island of Samos (180 sq. miles, pop. 40,513), and Cyprus (see p. 548), which pays an annual tribute. Of the total population about 6,800,000 are Turks, 5,300,000 Syrians and Arabs, 1,000,000 Greeks, and 12,000,000 Mohammedans.

In **AFRICA**, Turkey rules Tripoli and Barka (399,000 sq. miles, pop. 1,010,000), and levies a heavy tribute upon Egypt.

Nominally, therefore, the Turkish Empire has an area of 1,710,000 square miles, with about 39,500,000 inhabitants, but of the vast territories only 1,145,500 square miles, with 22,011,000 inhabitants, are under the direct rule of the Turks, the rest paying a tribute or merely acknowledging the suzerainty of the Porte.

It was arranged by the Berlin Treaty that Bulgaria, Servia, Montenegro, and Greece should take upon themselves a portion of the Turkish debt, but little appears to have been received from these emancipated or agrandized States. The tribute from Eastern Roumelia, fixed by Organic Statute at £218,180, but since reduced to £138,200, is, as a rule, punctually paid by Bulgaria.

The **TURKISH ARMY** on a peace footing numbers (actually) 10,000 officers and 170,000 non-commissioned officers and men and is composed of 292 battalions of infantry, 202 squadrons of cavalry, 165 field batteries, 46 mountain batteries, 15 horse batteries, 39 companies of engineers, and 1,356 guns, besides 132 companies of garrison artillery. They are formed into seven army corps, with headquarters at Constantinople, Adrianople, Monastir, Erzingan, Damascus, Baghdad, and Sana (Turkish Arabia), an independent division at Tripoli, and another in the Hedjaz. In time of war these can be supplemented by twelve army corps of redifs, and an indefinite quantity of *mushakfiz*. It is also proposed to form 100 regiments of local militia (Hamidieh cavalry), of which 60 are already enrolled, and in case of emergency it is probable that over 1,000,000 men of all categories could be called to arms.

The **NAVY** consists of 102 steamers, all of a more or less obsolete type (including 18 ironclads), and 25 torpedo boats, with a total peace strength of about 15,000 men.

The commercial marine of Turkey consists of 106 steamers, 49,500 tons, and 169 sailing vessels, 44,471 tons (Oct. 14, 1897).

Commerce.—The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. Since the establishment of the Anatolian railway, by German

enterprise, the export of cereals, chiefly malting barley, has largely increased. The British Chamber of Commerce was established at Stamboul, Constantinople, in 1887, with branches at Smyrna and Salonica, and in the north of Ergand (Manchester); *Pres.*, Sir Wm. Whitthall; *S.c.* H. E. Mountain.

There are British Post-offices at Constantinople, Salouca, Smyrna, Beyrut, Baghdad, and Damascus.

The principal domestic exports to the United Kingdom in 1897 were corn, fruit, wool and woollens, and the chief domestic imports from the United Kingdom in 1897 were coal, Manchester goods, metals and woollens.

Navigation.—The total shipping in 1896-7 was 38,288,639 tons, of which 12,820,050, or one third, was British. Number of vessels 188,961.

Finance.—Sir Edgar Vincent's report of December, 1895, estimates an annual deficit of £1,253,070, but points out certain reforms by which this can be avoided. The total amount of the loans negotiated since the year 1854, and still outstanding, is £131,500,000, and additional debts bringing the total to £163,050,000 (Russian war indemnity outstanding £31,225,000, out of a total of £32,100,000 originally owed; indemnity to Russian subjects £50,000 out of a total of £318,180, and £275,000 due to the Damascus Railway).

Revenue, 1897-98 (estimated)	£16,050,270
Expenditure, 1897-98 "	16,578,360
Turkish Debt (Loans), 1895	131,500,000
Indemnities owed, 1895	31,550,000
Total Imports, 1893-4	20,157,355
Total Exports, 1893-4	11,727,787
Total imports from U. K., 1899	8,169,135
Total exports to U. K., 1899	4,916,899

Despatch Agent, B. F. Stevens, 4 Trafalgar Sq., W.C.

A Federal Republic, consisting of 45 partially independent States, 5 organized and 1 unorganized Territory, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25°—49° N. and long. 67°—124° 30' W. The area is estimated at 3,581,885 square miles, of which rivers and lakes cover 38,400 square miles. This area includes the vast district of Alaska, in the extreme north-west of the continent, purchased from Russia, 18th October, 1867, comprising 577,390 square miles. About one-third of the country is estimated to be in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1890, was 62,622,250. In 1892 the Indians on reservation numbered 133,382; off reservation, 115,891 (not including 58,806 civilized Indians); Chinese, 107,475; Japanese, 2,039; and Alaska, 31,795 (23,274 Indians); in addition to which figures no official data will be given before the census of 1900. The increase in the ten years, 1880—1890, was 12,466,467.

Its coast-line on both oceans is reckoned to have length of about 13,200 miles, excluding the numerous bays and sounds, besides 3,620 miles on the great lakes. The principal river is the mighty Mississippi-Missouri, formed by the confluence of these two noble streams, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary

with Mexico. The areas of the water-basins have been estimated as follows:—rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward, the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt, and lead, which in Missouri, Colorado, and Idaho appear inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in large quantities.

The financial condition of the United States of America exerts a great influence on that of other nations. The following is a statement of the debt on the 1st October, 1902:—

Two per cent. bonds	\$335,250,600
Three per cent. bonds	121,848,840
Four per cent. bonds and certificates	503,699,470
Five per cent. bonds	49,700,350
Debt on which interest has ceased ...	5,516,220
Bonds issued to Pacific Railroads and not yet presented	14,000
Debt bearing no interest	397,346,069
Certificates and Treasury notes, offset by cash	734,513,679
Total debt	2,128,889,228
Less cash and reserve in Treasury	1,022,718,557

Actual indebtedness

On Oct. 1, 1899, the actual indebtedness was \$1,156,682,581.

The total decrease in the debt since August 31, 1865, when, after deducting the cash in the Treasury, it amounted to \$2,756,431,571, to Oct. 1, 1900, has been \$1,650,260,900.

Balance Sheet for Year ending June 30.

The Navy of the United States on the 1st November, 1900, consisted of the *Regular Navy*:—First-class battleships, 14; first-class battleships (sheathed), 3; second-class battleship, 1; armoured cruisers, 5; armoured cruisers (sheathed), 3; armoured ram, 1; steel single-turret monitors, 4; double-turreted monitors, 6; iron single-turreted monitors, 8; protected cruisers, 15; protected cruisers (sheathed), 8; unprotected cruisers, 4; gun-boats, 12; light-draft gun-boats, 3; composite gun-boats, 6; training-ship (Naval Academy), 1; special class, 2; gun-boats under 500 tons, 22; torpedo-boat destroyers, 16; steel torpedo-boats, 36; submarine torpedo-boat, 7; wooden torpedo-boat, 1; iron cruising vessels, 5; wooden cruising vessels, 7; sailing vessels (wooden), 6; tugs, 41; wooden steam vessels unfit for sea service, 11; wooden sailing vessels unfit for sea service, 6; total, 254; and of the *Auxiliary Navy*:—Merchant vessels converted into auxiliary cruisers, 5; converted gun-boats, 23; colliers, 15; special supply vessels, 12; total, 55. Enlisted men (active list), 16,913; commissioned officers (active list), 1,302; warrant officers (active list), 384.

Marine Corps: Commiss. officers (active list), 211; privates & non-comm. officers (do.), 6,662.

The REGULAR ARMY at present consists of 2,511 officers and 68,221 enlisted men, and the *Volunteer Army* of 1,548 officers and 31,079 enlisted men, making a total of 4,079 officers and 99,300 enlisted men and an aggregate of 113,379.

The Government of the United States is, by the Constitution, intrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the legislature thereof directs, a number of electors, equal to the whole number of Senators and representatives to which the State may be entitled in the Congress; but no Senator or representative, or any one holding office under Government shall be appointed an elector. The Electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex-officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, and others, so that the State can never be without a Head or Ruler.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population, at present 1 for 173,901. The Senate consists of 90 members, and the House of Representatives, of 357 representatives and territorial delegates.

The Supreme Judicial Authority is vested in a Chief Justice and eight Justices, who are appointed by the President by and with the advice and consent of the Senate, to hold their offices during good behaviour.

TRADE WITH THE UNITED KINGDOM.—The chief exports to the United Kingdom in 1899 were:—

Animals, living	£6,519,298	Iron & steel mfs.	£3,907,311
Bacon	6,552,180	Lard	2,009,122
(Hams)	3,781,007	Leather	3,362,599
Beef (fresh)	5,711,525	Meat (fresh and salt)	1,055,380
Cheese	1,380,609	Oil, &c.	1,254,927
Copper, &c.	2,086,691	Oil seed cake	1,930,245
Corn, wheat	11,811,700	Barley	495,995
" Barley	572,321	Paraffin	909,644
" Oats	1,841,347	Petroleum	3,437,937
" Maize	8,105,167	Pork	753,206
" Wheatmeal & flour	8,563,884	Skins and Furs	510,429
Cotton, raw	19,164,130	Sugar	1,022,348
Fish	666,334	Tallow & Stearine	600,128
Fruit	854,847	Tobacco	4,552,275
Hops	587,356	Wood, all kinds	3,870,161

And the chief imports of domestic produce from the United Kingdom in 1899 were:—

Books	£313,104	Linen, &c.	£2,530,994
Chemical products	567,728	Machinery	462,993
Cotton manufactures	2,750,648	Metals, all kinds	2,137,672
Earth & chinaware	656,017	Silk and manufactures	417,593
Fish	282,074	Skins and furs	910,844
Jute manufactures	890,945	Woolen manufactures	322,754

POSTAL.—The number of Post Offices in the United States, June 30, 1900, was 76,688. The postal revenue was \$102,354,579. The number of inland money orders issued was 32,050,983, and the amount \$238,921,009. Of international money orders the number issued was 1,102,067, and the value \$16,749,018. The postal expenditure was \$107,740,268.

RAILWAYS.—The total mileage of railways in the U. S. on June 30, 1899, was 189,294, being an increase during the year of 2,893 miles; there are also 22 miles in Alaska.

MERCANTILE MARINE.—On July 1, 1900, it consisted of 23,333 vessels, of which 7,053 were steamers, and 16,280 other than steamers, the total tonnage being 5,164,839.

MINES.—Amount of Gold and Silver in fine ounces produced 1899:—

	Gold.	Silver.		Gold.	Silver.
Alabama	208	100	North	1,669	300
Alaska	264,104	140,100	Car'lna	69,152	134,300
Arizona	124,133	1,578,300	Oregon	7,745	400

TERRITORIAL EXPANSION.

In the year 1898 the U.S.A. became involved in war with Spain on account of the unsettled state of affairs in the neighbouring island of Cuba. The result of the war was the freedom of that island from Spanish control and the cession of the Philippine Islands and the Island of Guam, the island of Puerto Rico, which was captured during the war, being retained; these conditions were confirmed by a Treaty of Peace signed at Paris (10 Dec., 1898). During the year the independent islands of the Hawaiian group were annexed by a resolution of Congress, and in 1899

under the provisions of the Samoan Convention, those islands of the Samoan Archipelago not annexed by Germany fell to the share of the U.S.A.

In a few months, therefore, the U.S.A. assumed the responsibility of a considerable overseas dominion, with between 9,000,000 and 10,000,000 inhabitants.

The *Hawaiian, or Sandwich, Islands* consist of thirteen islands in the North Pacific Ocean in lat. 19° to 22° 15' N. and long. 154° 48' to 166° 20' W. Of these eight are inhabited (Hawaii, Maui, Oahu, Kauai, Molokai, Lanai, Niihau, and Kaloolawe), the area of the entire group being 6,587 square miles, with a population in 1896 of 147,000, of whom 75,000 were Hawaiians, 24,000 Japanese, 15,000 Chinese, 9,000 Portuguese, and about 14,000 of mixed and European descent.

The Capital and seat of administration is Honolulu, in the island of Oahu, the population in 1896 of this town being 28,061. The trade of the islands was valued at \$13,813,923 in 1896.

The *Samoan Islands*.—By the Anglo-German agreement of 14 Nov. 1899 the island of Tutuila and all other islands in the Archipelago east of 171° E. long. were reserved to the U.S.A.

In the *West Indies*: The Island of CUBA, the "Queen of the Antilles," was discovered by Christopher Columbus on 28th October, 1492 and first colonized by his son Diego, who founded Santiago and Trinidad in 1514, and Havana in 1519. In shape Cuba is long and narrow, lying at the entrance of the Gulf of Mexico (making with Yucatan and Florida the Yucatan and Florida channels on the south and north), between 74° and 85° W. long., and 19° and 23° N. lat., with a total length of about 750 miles, and an average breadth of 60 or 70 miles, the area being nearly 42,000 square miles. The population is composed of Spaniards, Creoles, and Mulattoes and Negroes.

The imports in 1892 amounted to £11,400,000, the exports being valued at £18,000,000. The principal products are sugar, coffee, tobacco (1,250,000 bales exported in 1892), cigars and cigarettes, and mahogany and other woods; the principal imports are rice, beef, and flour. The capital, Havana, has about 200,000 inhabitants; other important towns, Santiago de Cuba (70,000) which was captured during the war; Puerto Principe (45,000), Holguin (35,000), Sancti Spiritu (30,000), Cienfuegos (28,000), and Cardenas (24,000).

Further to the east is the island of PUERTO RICO, captured during the war, which has an area of about 5,300 square miles, and about 800,000 inhabitants; the capital, San Juan, has a population of 23,000, Ponce (38,000), and San German (31,000), being also towns of importance. The products are sugar, coffee, and tobacco.

In the *East Indies*: The PHILIPPINE ISLANDS have an area of about 114,400 square miles, with 5,500,000 inhabitants. The capital is Manila, in the island of Luzon (population about 160,000), other large towns being Lauag (31,000), Lipa (42,000), Banang (36,000), Batangas (34,000). The principal products are hemp, sugar, coffee, indigo, and copra, in addition to the tobacco plant, which is extensively grown in the island of Luzon. The total trade in 1896 was £2,150,000 for imports, and £7,550,000 for exports. The native population of these islands has not yet been brought under control. To the south-east of the Philippines is the Sulu Archipelago (area about 1,000 square miles, population about 60,000) which form part of the concession.

Guam, the largest island of the Ladrones (or Marianne) group, is situated in 145° E. and 14° N., and has an area of about 850 square miles, with about 10,000 inhabitants. The capital is Agaña.

FEDERAL CAPITAL, Washington (3,850 miles from London). Pop (1890, including the District of Columbia) 230,392.

A Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W., containing an area of 72,172 square miles, and an estimated population of 787,053 (1894); was formerly a dependency of Spain. United to the Argentine Confederation early in the present century, it was afterwards annexed by Portugal, and became later a province of Brazil; but through the bravery of the patriotic "thirty-three" it succeeded in throwing off the Brazilian yoke and declared its independence 25th of August, 1825. A war in consequence ensuing between Brazil and the Argentine Confederation, both the Powers agreed, through the mediation of Great Britain, to recognize Uruguay as a sovereign and independent State. The imports from the U. K. are numerous, the principal being woollen and cotton goods, hardware, and coals. The chief exports are wool, hides, horn, hair, tallow, and jerked beef. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (5,205,272 in 1895), and sheep (12,820,736 in 1895), the wool of which is of excellent quality. Gold mines exist at Cufiapirú. The principal river is the Uruguay and its affluents, of which the Rio Negro is the chief

There are 1,002 miles of railway open, and 4,025 miles of telegraph in 1891.

APPLICATIONS for Foreign Office Passports must be made in the form printed on the back of the Regulations issued by the Foreign Office, and enclosed in a cover addressed to "The Passport Department, Foreign Office, London."

The charge for a Passport, whatever number of persons may be named in it, is 2s. Passports are issued at the Foreign Office between the hours of 11 and 4 on the day following that on which the application for the Passport has been received, except on Sundays and Public Holidays, when the Passport Office is closed. If the applicant does not reside in London the Passport may be sent by post, and a Postal order for 2s. should in that case accompany the application. *Postage stamps will not be received in payment.*

Foreign Office Passports are granted only (1) to natural born British subjects, *viz.*, persons born within Her Majesty's Dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within Her Majesty's Dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 13 George III., cap. 21, are to be adjudged and taken to be natural born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

Passports are granted to such persons as are known to the Secretary of State, or recommended to him by some person who is known to him; or upon the production of a certificate of identity and recommendation signed by any *Banking firm* established in the United Kingdom, or by any Mayor, Magistrate, Justice of the Peace, Minister of Religion, Physician, Surgeon, Solicitor or Notary resident in the United Kingdom; the applicant's Certificate of Birth may also be required, especially when his name is of foreign origin, in addition to the certificate of identity and recommendation.

If the applicant for a Passport be a NATURALISED BRITISH SUBJECT, his certificate of naturalisation must be forwarded to the Foreign Office *with* the certificate of identity and recommendation. Naturalised British subjects, if resident in London, or in the suburbs, must apply *personally* for their Passports at the Foreign Office; if resident in the country, the Passport will be sent and the certificate of Naturalisation returned to the person who may have granted the certificate of identity and recommendation, in order that he may cause the applicant to sign the Passport in his presence.

Naturalised British subjects will be described

as such in their Passports, which will be issued subject to the necessary qualifications.

Foreign Office Passports are not limited in point of time, and are available for any number of journeys abroad. They may be renewed at the Foreign Office on personal application, or, if the applicant does not reside in London, on the receipt of a letter signed by him, returning the Passport previously issued to him, and enclosing a Postal Order for 2s.

A Passport cannot be issued by the Foreign Office, or by an Agent at an outpost, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate; a Passport cannot be issued abroad to a Colonial Naturalised British Subject, except for a direct journey to the United Kingdom or to the Colony in which he has been naturalised.

The bearer of every Passport granted by the Foreign Office *must* sign his Passport as soon as he receives it; without such signature either the *visa* may be refused, or the validity of the Passport questioned abroad.

Travellers who intend to visit the Russian Empire, the Turkish Dominions, the Kingdom of Roumania, Persia, or Hayti, in the course of their travels, must not leave the United Kingdom without having had their Passports *visés* either at the Russian Consulate-General, 17 Great Winchester Street, E.C., the Consulate-General of the Sublime Porte, 29 Mincing Lane, E.C., the Roumanian Consulate-General, 68 Basinghall Street, E.C., the Persian Consulate-General, 165 Fenchurch Street, E.C., or the Haytian Consulate, 32 Fenchurch Street, E.C., respectively, or at one of the other Consulates of Russia, Turkey, Roumania, Persia, or Hayti in the United Kingdom. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country, except as an additional precaution, which is recommended in the case of Passports of old date.

Although British subjects are now permitted to enter most Foreign Countries without Passports, and the rules respecting Passports have been generally relaxed, nevertheless, British subjects travelling abroad are recommended to furnish themselves with Passports, for even in those countries where they are no longer obligatory, they are found to be useful as affording a ready means of identification, *e.g.*, in claiming letters at *poste restante*. British subjects intending to *reside* in Germany or in Switzerland should provide themselves with Passports.

A statement of the requirements of Foreign Countries with regard to Passports may be obtained upon application to "The Passport Department, Foreign Office, London, S. W."

EXCLUSIVE OF BULLION, INTO AND FROM THE UNITED KINGDOM, 1898 AND 1899.

The total amount of the year's Trade for 1899 was £814,570,241, against £764,558,560 for the year preceding, and £748,944,115 in 1890, which was the largest amount ever previously known. The exports of British produce amounted to £284,492,211, our chief customers being the United States £18,119,380, France £16,696,093, Holland, &c., £11,898,507, Germany £26,134,291, Belgium £9,838,65, India £31,314,412, Australasia £22,526,194, British North America £7,347,142, Cape Colony and Natal £8,380,547.

The Imports amounted to £11 19s. 2d. per head of the population, and the Domestic Exports to £6 10s. 5d. per head.

Imports by Parcel Post in 1899 were £1,139,500, and the Exports £2,467,343, a total increase of £153,577.

The totals for the years 1898-99 were:—

Total Imports (1898).....	£470,544,702
" " (1899).....	485,035,583
Increase in 1899	£14,490,881

It will be observed that as regards nearly all the articles included in this table the greater bulk comes from foreign countries. The following figures show the quantity of certain of these articles imported from the United States of America and Russia respectively:—

	From the U.S.	From Russia.
Bacon	Cwts. 4,088,446	Cwts.
Fresh beef	2,756,458	
Lard	2,771,557	
Eggs	Nos. 518,232,120	Nos.
Wheat	Cwts. 34,650,648	Cwts. 2,518,200
Barley	1,946,070	7,801,937
Oats	7,072,000	4,722,500
Maize	39,406,490	2,640,700
Wheat n Flour.....	28,465,796	

11,368,000 cwts. of wheat came from the Argentine Republic, 5,858,000 cwts. from Bombay, and 5,256,000 cwts. from Canada.

* Subject to duty.

The last year of the nineteenth century has brought explorers a step nearer both the North and the South Poles. The previous "records" were surpassed by only a few miles in each case, and no new principles were involved in either, so that the interest excited by the achievements is rather sentimental than scientific. Exploration in other parts of the world has been retarded by the war in South Africa and the troubles in China; the fact that most of the younger British

officers have been on active service has materially reduced the number of travellers in little known regions. The following record closes on November 1.

officers have been on active service has materially reduced the number of travellers in little known regions. The following record closes on November 1.

ANTARCTIC REGIONS.

Sir George Newnes' Antarctic Expedition has met with very considerable success. Mr. Borchgrevink and his companions passed a year in their camp near Cape Adare. Efforts to scale the mountains and reach the plateau, which was supposed to lie beyond them, were unavailing, and the interior of the Antarctic land remains an absolute blank. Surveys were made of Robertson Bay and for a short distance along the shore to

rocks, and made a valuable series of meteorological observations. These showed a much colder climate than that found by the *Belgica* in the ice-floes in the same latitude on the other side of the area. January, 1900, was the only month the mean temperature of which was above the freezing point, and that only by one degree. The maximum temperatures recorded never exceeded 32° except in the three summer months—November, December, and January. From May to October inclusive the average temperature was below zero, Fahrenheit, and the absolute minimum was -43.1 deg. The climate was thus not so extreme as in similar latitudes in the north, but much colder on the average, especially in the summer

months. Mr. Hanson, the zoologist, unfortunately succumbed to the hardships of camp-life, and was buried at Cape Adare his work being carried on by his assistant, Mr. Hugh Evans. The *Southern Cross* returned from the North on January 23, and Mr. Borchgrevink and his companions made an easy voyage along the coast of Victoria Land to the neighbourhood of Mount Erebus, landing at several points. They coasted the great ice-barrier eastwards, and found it on the whole further south than when Ross fixed its position in 1842. The furthest point reached by the *Southern Cross* was $78^{\circ} 34' S.$ in $164^{\circ} 10' W.$, and here Mr. Borchgrevink landed at a break in the barrier and travelled with dogs for sixteen miles over smooth ice, reaching the farthest South of $78^{\circ} 50'$ on February 17. No obstacles to a further advance were recorded.

The British National Antarctic Expedition, which is planned to start in August, 1901, has made good progress in its preparations. The ship, to be named *Discovery*, is nearing completion at Dundee. The command has been given to Commander R. F. Scott, R.N.; Lieutenant C. Roys, R.N., and Lieutenant Armitage, R.N.E., will be the other executive officers; Professor J. W. Gregory will be the head of the scientific staff, and his assistants have also been selected. The ship will be provisioned for three years. The German Expedition is in an equally forward condition, and a third expedition has been talked of to sail at the same time from Scotland, under the charge of Mr. W. S. Bruce.

ARCTIC REGIONS.

H.E.H. the Duke of the Abruzzi's expedition has succeeded in approaching to within 241 miles of the North Pole ($86^{\circ} 33' N.$), about 22 miles north of Dr. Nansen's farthest, and about 100 miles farther west. The *Sie de Polare*, on reaching the Franz Josef Land Archipelago in June, 1899, forced her way through the British Channel to Teplitz Bay on Crown Prince Rudolf Land, where she wintered in $81^{\circ} 53' N.$ The ship was driven ashore by the pressure of the ice and badly damaged in September, so that the party had to spend most of the winter in a tent on shore. The Prince having been severely frost-bitten was unable to take part in the sledge expedition to the north which set out under Captain Cagni on March 11, 1900. Thirteen men started with dog sledges; they first travelled in the direction where Petermann Land is marked on the maps, but found no sign of it. It was impossible to establish food depôts on the ice for the return journey, so in order to economise loads three parties of three men each were sent back to the ship at intervals of ten days, and Captain Cagni went on with three men to $86^{\circ} 33'$ in longitude $65^{\circ} E.$, which was reached on April 25. The return took place only when the provisions were nearly exhausted, and for fifteen days the explorers had to live on dog-flesh. They were absent 104 days altogether, and the icy wilderness over which they had passed was entirely devoid of life. Of the forty-five dogs that went out only seven returned. The *Stella Polare* got out of the ice on August 8, and reached Tromsø on September 8. One of the parties of three men sent back on the advance failed to reach the ship, and search for them was fruitless. The expedition proved that no land exists to the north of Franz Josef Land, and that with suffi-

cient food a still higher latitude may be attained by sledging over the sea-ice early in the season.

The *Windward*, sailing under the American flag, left Sydney, Nova Scotia, on July 20, 1900, with Mrs. Peary on board, and proceeded towards Smith Sound to communicate with Mr. Peary. She was reported from Godhavn on her way north on August 10. The absence of further news makes it probable that she has been beset in the ice. The Dundee whaler *Eclipse* brought home Dr. Robert Stein's expedition from Ellesmere Land, concerning which much anxiety was felt. They had made important explorations in the interior, and reported that Peary had passed northward in August, 1899, determined to make a dash for the Pole.

The Danish Expedition to East Greenland under Lieut. Amstrup returned to Copenhagen early in October after a most successful season. The *Antarctic* reached the Greenland coast at Cape Dalton in $65^{\circ} 28' N.$, and a stretch of entirely unknown land was mapped for about 150 miles to the south, the work terminating in $67^{\circ} 22'$, where the surveys met those completed last year. Valuable natural history collections were brought home. A Norwegian whaler, Captain Næø, succeeded in reaching the east coast of Greenland in $75^{\circ} 30' N.$, an unusually high latitude; he brought several living musk oxen to Norway. Professor Kolthoff, of Upsala, also paid a visit to East Greenland and brought back live musk oxen from Franz Josef Fjord with the view of acclimatizing them in the north of Sweden. He visited the depôt of provisions established last year by Professor Nathorst on Pendulum Island as a reserve for Captain Sverdrup, but the store was untouched; hence it may be assumed that the *Fram* has not succeeded this year in working round the north of Greenland.

In Spitzbergen the work of the Russo-Swedish geodetic commission has been carried on to some extent during the summer, but both parties have returned without completing the task on account of the unfavourable ice-conditions. In connection with it, parties of the Russian and Swedish observers were left in Spitzbergen during the winter of 1899-1900. The former at Hornsund in $77^{\circ} N.$, the latter at Treurenberg Bay in $80^{\circ} N.$, kept records of climate and auroral displays which cannot fail to be of value. The length of the arc of the meridian to be measured is $4\frac{1}{2}^{\circ}$. A peak was observed from Treurenberg Bay about 30 miles to the south with a height of 5,570 feet, which exceeds by over 1000 feet the height of Hornsundtind, hitherto believed to be the culminating point of Spitzbergen. It is reported that the coal-seams in Ieffjord have been found to be of economic value, and that a Norwegian company has been formed to work them. In case of the success of this enterprise the question of the political ownership of Spitzbergen may become urgent. At present the island appears to belong to no nationality, although claims have now and again been put forward by most of the northern countries of Europe, that of Russia having perhaps been the most persistent.

Baron Toll started in August on his voyage through the Kara Sea in the hope of reaching the New Siberian Islands, where a sledging party, which set out by land in October, hoped to meet him.

EUROPE.

As a measure of recent progress in exact surveying, a paper published by Colonel Sir John Farquharson in the *Geographical Journal* for June may be specially referred to. It deals with the twelve years' work of the Ordnance Survey of the British Islands from 1837 to 1839. Little in the way of survey work is left for private individuals to do, but Mr. J. Norman Heathcote made a survey of the remote island of St. Kilda in 1899, and published his map in the *Geographical Journal* for February, 1900. The lakes and tarns of the Snowdon district in Wales have been studied in considerable detail by Mr. J. R. Dakyns. The surveys of the lakes of Scotland initiated by Sir John Murray have been further extended by Mr. F. P. Pullar, who is steadily filling up, at his own expense the most serious gap in the official surveys of the British Islands. An attempt has been made by Dr. H. R. Mill to show, in the case of a portion of south-west Sussex, how the Ordnance, Geological and Hydrographic Surveys, the Agricultural Returns, Board of Trade Reports, Registrar-General's Reports, Meteorological Records and Census Returns (all of which are compiled at the public expense) may be put together in such a way as to present a complete account of the geography of a district. A plan for extending such a description to the whole country has been prepared, but, although supported by the Royal Geographical Society, it has failed to excite public interest or the support of the Government Departments, the work of which it was proposed to co-ordinate and render of direct utility.

On the Continent almost every country is proceeding with the extension of exact survey operations, and the island of Malta has been brought into the geodetic network of Europe by triangulation from Sicily, the sides of the triangles observed from Etna and other mountains measuring about 125 miles. The researches of Dr. Johan Cvijic during 1898 and 1899 in the rarely visited regions of Macedonia and Albania have resulted in much valuable information respecting those parts of Turkey, and he succeeded in surveying and sounding several of the picturesque mountain lakes, some of which were found to be of great depth.

Colonel J. de Shokalsky has been investigating the depth and temperature of Lake Ladoga, the largest sheet of fresh water in Europe.

ASIA.

Several expeditions which had been planned for the exploration of scarcely known districts in Mongolia and Northern China have had to be abandoned on account of the "Boxer" rebellion and the subsequent military operations by the foreign Powers. It is scarcely probable that the Chinese Government can obtain terms of peace from the Allies without territorial concessions, although an Anglo-German agreement has been arrived at expressing the resolve of both countries to abstain from annexation unless the actions of other Powers make it advisable to reconsider the matter.

Dr. Sven Hedin is continuing his work in the regions he formerly explored. At the end of June he was at Lob-nor where he had extended and confirmed his previous discoveries as to the variable position of the lake, and he has also discovered numerous ruins in the vicinity of the changeable river-beds, which throw fresh light on

the fertile and populous character of the desert within historic times. His programme for the rest of the year included a trip into Northern Tibet to connect his recent routes with that of his previous expedition, then from his head-quarters at Chamen Tagh he hoped to cross Northern Tsaidam to Sachu and thence turn westward to the old bed of Lob-nor, and finally he expected to fix the altitudes along the route to Karakoshun and Chaslik, where, if all went well, he should arrive at the end of the year.

Another Scandinavian traveller in Asia, Lieut. Olufsen, returned to Denmark at the end of 1899, after two years spent in the neighbourhood of the Pamirs where he had collected much information as to ancient inscriptions and primitive mountain tribes.

The eminent Russian explorer Kozloff, with a number of assistants, has been studying the southern slopes of the Altai mountains in Northern Mongolia, and exploring the Gobi desert, trying routes not hitherto attempted by Europeans. M. Bonin has crossed from China into the Lob-nor district, where he met Dr. Hedin, and on the way along the Altyn Tagh discovered ruins of walls and cities previously unknown. The imperturbable seclusion of Tibet and its hitherto unflinching subservience to China in foreign affairs have been broken by the formal reception in October of an envoy from the Dalai Lama by the Russian Emperor. So unprecedented an occurrence can hardly fail to be a precursor of change, or, at least, of stress in the affairs of the heart of Asia.

Two members of the Jesup North Pacific expedition, Messrs Jochelson and Bogoras, have entered on a two years' ethnographic exploration of the coast district of Asia north-east of the River Amur with the object of determining the relationships of the aboriginal people in Asia and America.

In Asia-Minor Dr. Franz Schaffer carried out some geological explorations in Cilicia in the spring of 1900 and returned in autumn to continue his researches and extend them to Northern Syria.

The boundaries between Siam and the British Malay States were fixed by an agreement dated November 23rd, 1899.

Mr. W. W. Skeat's biological expedition to the Malay Peninsula has returned to Cambridge after visiting some very little known country in the south of Siam, including the Lebir River and Gunung Tahan, which is probably the highest mountain in the peninsula.

The Indian Survey department has made the important announcement that a new map of the Indian Empire and its borderlands is to be produced on the scale of 1 : 1,000,000 (nearly 16 miles to the inch) very much on the lines suggested by Professor Penck in his scheme for a uniform map of the world on that scale. It will take in the whole area from the west of Persia (where surveys are being rapidly carried out) to the east of Burma (44° to 104° E.), and from the Oxus to Ceylon (40° to 4° N.). It will occupy 106 sheets, each taking in an area of 4° of latitude and 4° of longitude, the boundaries of the sheets being meridians and parallels.

Russian railways in Asia are being steadily pushed on. The trans-Siberian line now goes from Irkutsk to Lake Baikal where trains are carried over by ferry-boats, capable of acting as ice-breakers, to Mysovskaya on the eastern side, whence the railway is running to Svyetensk on

the navigable Shilka, from which steamers can descend the Amur.

AFRICA.

The map of Africa has suffered a transformation, which has no precedent in the civilised world since the Napoleonic wars—the deletion of two self-governing countries. Under their new names of the Transvaal and the Orange River Colony there can be no doubt that the former republics will enter on a period of unexampled prosperity as integral parts of British South Africa and of the British Empire.

Various undefined boundaries have been decided during the year. France and Spain have come to an agreement as to the limits of their West African territories, and the last of the Spanish colonial possessions are now defined as follows; The Rio d'Oro territory between Morocco and Senegal extends north of the parallel 21° 15' N. from Cape Blanco to the borders of Adrar, which is left on the French side, while north of the tropic the boundary is the meridian of 12° W. The smaller territory on the coast of the Gulf of Guinea between Kamerun and French Congo is limited to a strip of land between the parallels of 1° and 2° 15' N., terminated inland by the meridian of 11° 20' E. The internal divisions of French West Africa which were reconstituted in October, 1899, are shown in the accompanying map, together with the international boundaries as they now stand. Boundary negotiations are also being carried on regarding the frontiers between Kamerun and French Congo, and between Kamerun and Nigeria on the Cross River, also between German East Africa and the Congo State in the Lake Kivu district.

An International Conference of all the European Powers with African possessions met in London in June, and agreed to adopt stringent measures to prevent the extinction of the native animals in tropical Africa, the protected area extending from 20° N. to the Zambezi River and the northern boundary of German South West Africa.

Among the travels of the year which appeal to popular interest is the first "Cape to Cairo" journey. It covered a very long distance, and it is a striking proof of the way in which Africa has been opened up recently that its record reveals little that is geographically new. Mr Ewart S. Grogan and Mr A. H. Sharp left the Zambezi in October, 1898, and, travelling north by the great lakes, spent some time in the neighbourhood of Lake Kivu, where several active volcanoes were visited, and the Nile was reached *via* the Albert Nyanza. Mr Sharp returned by Uganda and Mombasa, while Mr Grogan continued along the Nile, and reached Cairo in February, 1900. A second expedition, subsidised by the *Daily Telegraph* and placed under the charge of Mr Lionel Deele, left the Cape towards the end of 1899, and was in North-eastern Rhodesia on the Nyasa-Tanganyika plateau in the middle of 1900. The object of the expedition is to study the actual conditions of the parts of Africa still awaiting development throughout the whole length of the continent.

Mr Moore's expedition for the study of the great African lakes spent about a month (September to October, 1899) in the examination of Lake Tanganyika. The surveyor of the party, Mr Malcolm Fergusson, was able to fix the longitude of a number of points, and found that the northern part of the lake has hitherto been shown

too far to the west, sometimes as much as half a degree. From the lake the expedition went north past Lake Kivu to the Ruwenzori mountains, which Mr. Moore looks on rather as a range than an isolated mountain block. An ascent of one of the peaks, believed to be the highest, was made, and the height found to be about 16,500 feet, the snow-line being found at 13,000 feet. The expedition reached Mombasa in May, 1900, and returned to England.

The German explorer, Dr Kandt, who has been at work since 1897, on the borders of German East Africa and the Congo State, has completed detailed surveys of Lake Kivu, the position of which he has rectified, and of the volcanic country lying to the north. Dr. Kohl-schütter has also completed a year's work in German East Africa, where he has been determining the force of gravity as well as surveying some of the outlying districts.

Major Gibbons succeeded in making his way along the Zambezi to the source of that river towards the close of 1899. He explored the watershed between the headwaters of the Congo and the Zambezi, and met the Belgian expedition under Lieutenant Lemaire, which had ascended the Kasai and one of its tributaries to Lake Dilolo. Together they found that the watershed was much better defined than had been previously believed, and no indication was found of a connection by water between the two river-systems. Major Gibbons was at Lake Mweru in January, 1900, meeting Mr. Poulett Weatherley, who was still engaged in exploration in that neighbourhood, and finally, travelling by Lake Tanganyika and the Nile, he reached Omdurman in August, the distance he had travelled amounting by that time to 13,000 miles. The region between the Zambezi and Congo sources was until this year one of the least known in Africa, and the importance of Major Gibbons's achievement is not to be estimated by mileage alone.

A protectorate has been declared over Barotseland under the title of North Western Rhodesia, the area being bounded by the Zambezi on the south, German South-West Africa, and Portuguese West Africa on the west, and the Congo State on the north. The territory is to be administered by officials appointed by the British South Africa Company.

The various travellers who have emerged from Central Africa by way of the Nile and Omdurman owe much to the exertions of Major Peake, who, acting for the Government of the Sudan, cleared the river of sudd between Khartum and Fort Berkeley, and made it possible to navigate the upper reaches, which have been completely blocked for many years.

Dr. Donaldson Smith, who has made his reputation as a traveller and geographer by previous journeys in that region, landed at Barbera on August 1st, 1899, and proceeded by Hargeisa and Milmil to the Shebali river, from which he struck south-westward to the south end of Lake Stefanie, where some fine mountainous country was explored for the first time. The great bend of the Omo was next visited, and then the route ran westwards, with deviations to north or south, according to the mountain ranges. Mr. C. Fraser accompanied Dr. Smith as surveyor, and carried an unbroken chain of triangulations from Lake Rudolf to the town of Taransole, where the work was connected with Colonel Macdonald's survey. Thence the journey was continued to Fort

Berkeley, on the Nile, which was reached on March 15th, 1900, and Dr. Donaldson Smith returned by Major Peake's steamer, while Mr. Fraser took the men of the caravan back to Mombasa. *via* Uganda. Apart from the important surveys, the expedition made natural history collections of great value, including, it is believed, good many species which are new to science.

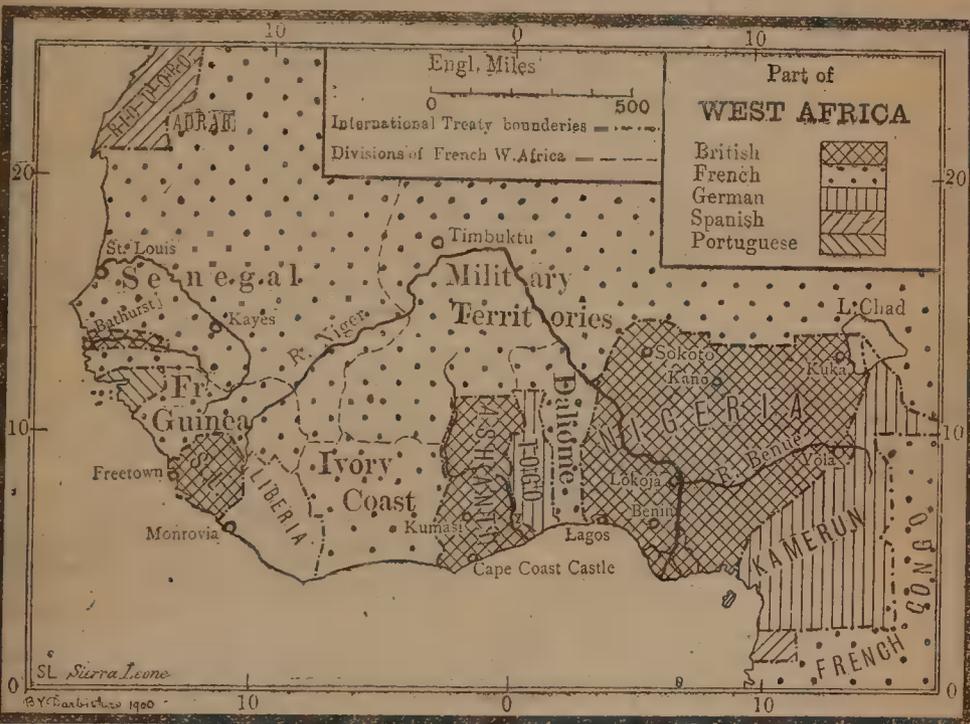

A sporting expedition, led by Mes-srs. Harrison and Whitehouse, proceeded south to Lake Rudolf early in 1900 intending, to proceed thence to the Sobat river; but the aridity of the country and its uninhabited character compelled the expedition to make its way to Mombasa *via* Baringo.

The well-known Russian adventurer in the Abyssinian service, Count Leontieff, made a

ward through swamps that proved very trying to the baggage animals, and ultimately he was compelled to return to the Sobat, by which he reached Egypt in October.

In British West Africa, except for trouble in Ashanti necessitating military operations against Kumasi, there is little to report. Bishop Tugwell made an interesting journey through the Hausa States, and succeeded in entering Kano, from which, however, the unfriendliness of the Sultan compelled him to retire. The Sultan appears to fear the advent of white men greatly, and while offering no violence, his orders for the missionaries to withdraw were very peremptory.

French West Africa has been the scene of great activity, and, in contrast with the previous year,

journey southwards in 1899 with the object of establishing Abyssinian influence over the whole country as far as Lake Rudolf, and several important towns are said to have accepted Abyssinian rule. The western shore of Lake Rudolf was explored, and reported to be thickly peopled.

Colonel Sir F. R. Wingate, having slain the Khalifa and scattered his army beyond the possibility of further resistance, the whole Sudan became practicable for travellers in December, 1899, although civilians were not allowed to proceed far above Kharum. Major H. H. Austin went up from Omdurman in December, 1899 on a Government mission. After three weeks on the Nile and Sobat in a gumbat, he landed with a large caravan and proceeded to the Abyssinian highlands, where he spent some months engaged in surveying, and afterwards proceeded south-

of notable successes. The expedition of M. Foureau and Captain Lamy across the Sahara from Algeria reached Zinder on November 2nd, 1899. It was found to be a large walled town, a great emporium of the caravan trade with the north and likely to become of much economic importance. On December 29th the journey was continued eastward to Lake Chad, and the middle of the west coast of the lake was reached on January 20, 1900. The site of Kuka was visited, and the town found deserted and in ruins. The journey was resumed round the north and east coasts of the lake, the outline of which was found not to correspond with that shown on existing maps. On February 22nd M. Foureau reached the lower Shari not far from its entrance to Lake Chad, and soon afterwards his expedition joined those of M. Gentil, who had come from the south, and of Lieutenant Joalland, who had previously

come from the west, round the north-east of Lake Chad, with the force formerly under the command of Voulet and Chanoine. The combined forces gave battle to the redoubtable Sultan Rabah, who was defeated and slain; his sons escaped, but were subsequently either taken or rendered powerless, and the great empire which a year ago dominated the central Sudan was effectually shattered. Major Lamy unfortunately fell in the hour of victory, and M. Foureau, travelling by the Shari and Ubangi, reached Brazzaville on July 11th, and returned to Europe.

The exploration of the Sahara and the visits of French travellers to oases which remain practically independent goes on without intermission. During the winter of 1899-1900 valuable scientific studies were made by M. Flamand on the various scattered oases which are known collectively as the Tuat archipelago, the resemblance to a group of islands in the desert sea almost compels the bold metaphor in nomenclature which French geographers have introduced.

The Paris journal, *Mutin*, equipped an expedition under an able young French geographer, M. Paul Blanchet, to explore the territory of Adrar, which had been excluded by treaty from the Spanish protectorate of Rio d'Oro. Setting out from Senegal with two French companions, he reached the oasis of Atar in June; but the Moorish tribe occupying the region were very unfriendly, and most reluctant to have their long seclusion from the outer world broken in upon. They took the French party prisoners, after a struggle, and kept them in captivity for several months, doubtless regarding white men as objects of intrinsic interest, as no European has succeeded in reaching Adrar for nearly half a century. M. Blanchet was finally released, and reached St. Louis on September 24th.

The above are only representative cases of the activity of the French in opening up their vast sphere of influence in West Africa, and much is also doing in the way of exploring and exploiting the resources of the British and German colonies on the Gulf of Guinea.

AMERICA.

The officers of the United States and Canadian Geological Surveys have continued their journeys in the outlying and still unmapped parts of North America. Dr. Norman Collie has made an excursion amongst the eastern mountains of British Columbia, and has been able to rectify the existing maps to a considerable extent. Thanks to the work of many hands the upper Yukon country has been effectively explored, and its general structure seen to be a comparatively low plateau deeply cut into by river valleys. The vast area of the United States Territory of Alaska has been the scene of three distinct exploring parties sent out by the U. S. Geological Survey. One of these was at work in the Cape Nome district, where, it may be noted, the high hopes of miners as to the richness of the beach diggings seem to have been considerably disappointed. A second expedition explored the Copper River valley, and a third devoted its attention to the Seward peninsula.

In South America the perennial boundary questions have made but little progress. The controversy between Argentina and Chile as to the boundary in Patagonia is at a standstill, pending the decision of the British Government. The Argentine case has been published in four

volumes of great geographical interest. The President of the French Republic gave his decision as to the boundary between Costa Rica and Colombia on September 15th. This has more than local importance, because it practically defines the boundary between Central and South America, although the new Z-shaped line drawn from ocean to ocean does not look a very natural division.

Mr. Herketh Prichard made a journey through the nearly unknown island of Haiti, and bears witness to its great natural resources and the absolute apathy and uselessness of its black inhabitants. He set out again shortly after his return in charge of an expedition on behalf of the *Daily Express* to search in Patagonia for the curious archaic animal type, *Neomylodon*, the discovery of comparatively fresh remains of which suggest the idea that it may not yet be extinct.

The well-known French explorer, M. Coudreau, has made his last journey. He died in November, 1899, while engaged in exploring the Trombetas, one of the northern tributaries of the lower Amazon.

A French Commission was sent out to Ecuador in July, 1899, to examine the ground on the high plateau with a view to the re-measurement of the arc of the meridian, originally determined by La Condamine in 1735-43. The result of several months' work was to select a series of stations for geodetic observations, and to estimate the cost of measuring an arc of 6° in length, or, as an alternative, one of 4½°, equal to that now being measured in Spitsbergen. The matter is under the consideration of the French Government. The true figure of the Earth can only be determined by the exact measurement of the actual distance between points on the same meridian, the position of which is fixed in latitude by astronomical observations, and the nearer to the pole or the equator that these measurements can be made the greater is their value.

AUSTRALASIA.

The capital fact of the year, and a fitting monument for the close of the century, is the accomplishment of the long-worked-for federation of the Australian colonies as the Commonwealth of Australia. The constitution of the new Commonwealth resembles those of the Dominion of Canada and the United States, but is not identical with either. In becoming states the five colonies of the mainland, together with Tasmania, retain their own legislatures for local affairs, but become subject, for matters concerning the Commonwealth as a whole, to a Federal Parliament, which will meet in a capital to be selected in some part of New South Wales, but not in Sydney. The Earl of Hutton has been appointed the first Governor-general, and the first session of the Federal Parliament will be opened early in 1901 by the Duke of York as the representative of the Queen.

New Zealand, while too remote and too dissimilar in its conditions to become at once part of the Commonwealth, is striving after expansion in the great island-world of which it forms the natural trade centre. The New Zealand Parliament decided in September, 1900, to incorporate with the colony the Cook or Hervey Islands, the Penrhyn group, and a few other Polynesian Islands already under British protection, and the annexation of Fiji is also eagerly desired. This proposed action is strongly objected to by Australia, and it

would seem that the Home Government might also have something to say in the matter.

Exploration has been going on in New Guinea and in the neighbouring Melanesian Islands by the officials of the British and German colonies, but no journeys of great importance seem to have taken place during the year.

THE OCEANS.

It is announced that the deep soundings obtained by H.M.S. *Penquin* in the South Pacific have been exceeded by the United States telegraph ship *Nero* in the North Pacific while surveying for a cable between Hawaii and the Philippines. Between Midway Island and Guam, where great depths were known to exist, two soundings were made in 5,160 and 5,269 fathoms respectively. The last-named depth, equivalent to 31,614 ft. or six miles below sea-level, is the greatest yet found in any ocean, the average depth of the oceans being about two miles.

Professor Agassiz's expedition in the United States Fish Commission steamer *Albatross* left San Francisco in August, 1899, visited the Marquesas Islands, and then, with Tahiti as headquarters, made a thorough exploration of the Paumotu or Low Archipelago. Leaving Tahiti in November, the *Albatross* visited the Cook Islands and Tonga, reaching Fiji in the same month, and, sailing again in December, spent several months in investigating the seas round the Ellice, Caroline, and Marshall Islands. She reached Yokohama in March, 1900, and returned thence to San Francisco. A great number of soundings were taken in deep water in parts of the ocean not likely to be investigated by telegraph ships. The deepest sounding obtained was 4,813 fathoms, 100 miles south-east of Guam. As a general result, all the coral islands of the Western Pacific were found to occupy the summits of submarine peaks or ridges rising abruptly from water of an average depth of from 1,500 to 2,500 fathoms, and after a very careful study of the coral formations, which was one of the main objects of the expedition, Professor Agassiz concluded that the evidence all tended to show that subsidence was not the cause of the growth of atolls, thus contradicting the well-known theory of Charles Darwin; The dredgings in deep water confirmed the view previously held that there is little variety or abundance in the life found on the bottom in the greatest depths far from land.

The *Siboga* expedition in the seas of the Malay Archipelago, which started on March 7th, 1893, completed its work on February 27th, 1900, after a cruise of 12,000 miles, under the command of Captain Tydeman and the scientific direction of Professor Weber. Amongst the important geographical results were the discovery that the south coast of the Island of Timor is wrongly shown on existing charts, the island being several miles narrower and of much smaller area than was formerly supposed. The depths of the seas between the islands has been tested, and the 4,000 fathoms with which the Panda Sea was credited could nowhere be found, 3,650 fathoms being the maximum obtained from the *Siboga*. Many changes have been made in the chart of depths and the connection of the deep basins with the Pacific and not with the Indian Ocean has been demonstrated.

In pursuance of the policy laid down at the International Conference for oceanographical

research in relation to fisheries held at Stockholm in 1899, the Norwegian Government has built a steamer, the *Richard Sors*, specially equipped for conducting such researches both physical and biological. She made her first trip in the North Atlantic, between Norway and Iceland, in August, 1900, under the charge of Prof. Nansen and Dr. Hjort. A short trip was also made for biological work in the Bay of Biscay by H.M.S. *Research* under the direction of Dr. G. H. Fowler.

GENERAL.

THE Paris Exhibition afforded a unique opportunity for distant countries to exhibit their resources, and in view of the occasion, a considerable number of them prepared elaborate monographs setting forth their present conditions and future prospects in volumes which served as guides to the exhibits, but remain as standard books on the countries themselves. An international congress on Commercial and Economic Geography was held in Paris, but the papers read at it dealt prevalently with French national interests.

Great activity has been shown in some geographical societies; the National Geographical Society in Washington has succeeded in doubling its already large membership in a single year—1899-1900. The Paris Geographical Society, the oldest in the world, has, since the beginning of 1900, issued its much improved publication monthly under the title "La Géographie."

The retirement of Mr. John Coles from the post of Instructor to intending travellers at the Royal Geographical Society, after twenty years of office, makes it permissible to refer to the remarkable results of his tuition, of which almost all British travellers and many foreigners have taken advantage. Maps of real service to the cartographer have been produced of many remote and inaccessible countries in consequence of this instruction by men whose main object in travelling was sport or pleasure, and the officials of various colonial and foreign government surveys have shared in the benefit.

GEOGRAPHICAL PUBLICATIONS.

The most important geographical publication of the year is the first volume of the *Report* of the Norwegian North Polar Expedition, edited by Professor Fridtjof Nansen. The complete work will contain the full discussion of all the scientific observations which were made during the famous expedition of the *Fram*, all written and published (in Norway) in the English language only. Dr. Sven Hedin's complete scientific results may fairly claim the second place. They are published in German as a separate part of *Petermanns Mitteilungen*. Next in order may be placed Professor Hermann Wagner's "Lehrbuch der Geographie," which gives in brief compass a masterly treatise on the principles of geography, a work for the full appreciation of which unfortunately few students in this country are ripe.

In the forefront of the travel-books of the year we must place Mr. and Mrs. A. P. Maudslays' "A Glimpse at Guatemala" a sumptuous work, intrinsically worthy of its splendid setting; and next to it comes the second and concluding volume of the English translation of Prince Oskhtomski's courtier-like record of the Eastern journey of the present Tsar while Cesarevitch. The first volume of the "Victoria County History

of England," edited by Mr. H. Doubleday, is the beginning of a gigantic undertaking, which possesses no little interest for geographers.

Two biographies stand out from the ordinary run of the lives of travellers because each contains facts hitherto unpublished regarding very important journeys. In Prince Kropotkin's autobiography, "Memoirs of a Revolutionist," we have for the first time in a Western language an account of the travels in Eastern Siberia and Northern Manchuria in 1864, which enabled him to formulate the accepted theory of the Asiatic mountain systems. The life of William Cotton Oswell, written by his son, lets the public know at last how largely the early travels of Dr. Livingstone in the Kalahari Desert and other parts of South Africa were aided and supported by the large-hearted hunter, who always effaced himself to promote the welfare of his friend.

The question of Antarctic exploration now so much to the front, has been enriched by the publication of an English translation of Fricker's "Antarctic Regions," and the first account of the expedition of the *Béglar* in Dr. F. A. Cook's "Through the First Antarctic Night." Nothing of importance has appeared on the Arctic regions proper, but the fringe of the North Polar area is touched on in Mr. H. J. Pearson's "Beyond Pezora Eastward," a naturalist's journey, and in Dr. de Filippi's account of the Duke of Abruzzi's ascent of Mt. St. Elias, published both in Italian and English. Other mountaineering works which have something of interest to more than climbers are Dr. Hans Meyer's "Der Kilimandjaro," Mr. Wilcox's "Canadian Rockies," and Dr. and Mrs. Workman's "In the Ice-World of Himalaya."

Amongst works on Physical Geography the most remarkable is perhaps Professor de Lapparent's "Traité de Géologie," in which he treats the past history of the crust of the Earth on the lines of its geographical evolution. Of almost equal importance is the translation into French of the second volume of Suess' standard work under the title of "La Face de la Terre." Mr. J. E. Marr has produced an attractive little volume on "The Scientific Study of Scenery."

The colonial enthusiasm of Germany and the interest awakened in America in the new island possessions of the United States account for or give special value to several books, such as Krieger's "New Guinea," F. W. Christian's "The Caroline Islands," H. Dinwiddie's "Puerto Rico, its Conditions and Possibilities," and A. Ireland's "Tropical Colonization," a volume of hints to American colonists, drawn from experience in the British tropical possessions. H. R. Mill's "New Lands," on the other hand, indicates those parts of the temperate zones still available for settlement by English-speaking people.

Two great works of detailed geography have been published in Germany setting forth scientific data in their application to practical matters. "Der Elbstrom" and "Die Memel, Pregel- und Weichselstrom." These, with the volume previously issued on the Oder, form a unique applied physical geography of the North German Plain.

A new work on Arabia, summarising our existing knowledge of the whole great peninsula has been written by the Rev. S. M. Zwemer, an American missionary, and entitled "Arabia: the Cradle of Islam." Mrs. Theodore Bent in "Southern Arabia" describes the travels she undertook with her husband. Baron von Oppenheim treats in two volumes with a large-scale original map of another part of Asiatic Turkey in his "Vom Mittelmeer zum Persischen Golf." His work enriched with a series of singularly valuable photographs. Mr. Ralph P. Cobbald gives a lively account of sport and travel in "Innermost Asia," and Prince Davidoff describes an interesting journey in the Altai Mountains in his "After Wild Sheep in the Altai and Mongolia."

Books on Africa have proved more numerous than ever, but most of them deal with incidents of the war and are outside the scope of this notice. E. S. Grogan's and A. H. Sharp's "From the Cape to Cairo," and the translation of Paul Kollmann's "The Victoria Nyanza" may be mentioned; but it would be impossible to refer to the many books on the Congo Free State, the German colonies, and Madagascar, most of them written in the hope of stimulating the enterprise of the respective home countries in their African dependencies. Mr. J. Drexel Biddle has produced a comprehensive work on "The Madeira Islands."

Apart from official publications the literature of American geography has been enriched by the work of the Maudslays already referred to and by Cecillie Selser's "Auf alten Wegen in Mexiko und Guatemala"; but perhaps the most important book is a summary of the chief points which still require to be investigated and cleared up, as stated by M. De-iré Pector in "Notes sur l'Américanisme: Quelques-unes de ses Lacunes en 1900."

Amongst publications referring to Australia attention may be drawn to Mr. A. S. Murray's "Tasmanian Rivers, Lakes, and Flowers," illustrated by reproductions of original paintings.

Antiquarian geography has a prize in A. Schulten's "Die Mosaikkarte von Madaba," an account of the oldest extant map of any kind, representing the Holy Land, and dating from the sixth century. It is worked in mosaic on the wall of a church in Palestine.

HUGH ROBERT MILL.

THE WEATHER IN THE BRITISH ISLANDS DURING THE YEAR ENDING 31ST OCTOBER, 1900.

THIS summary of the weather experienced in the British Islands during the year commencing November 1st, 1899, and ending October 31st, 1900, has been mainly compiled from data contained in the Daily and Weekly Reports issued by the Meteorological Office. It is hoped that the remarks

on each month will be useful for purposes of reference and for comparison with current weather, especially when considered in relation to the daily results of the Greenwich observations given for each month in the Calendar of the Almanack.

November, 1899.—The weather was warm, fine but murky, with frequent drizzling rains and violent winds, though the latter part was dry with a fair duration of sunshine and slight frost in the early mornings. Rainfall exceeded the average in the north of Scotland. The highest temperature was reported at Dublin on the 3rd, 65°, the lowest at Stamford on the 21st, 27°. On the 18th, while the temperature at Roche's Point was 52°, at Oxford it was only 28°; 19th, Sumburgh Head 51°, Oxford 25°; 30th Blacksood Point 52°, London and Oxford, 30°. The least barometrical pressure occurred on the 3rd, 28.8 inches; the greatest on the 17th, 30.7. On the morning of the 3rd 1.65 inch of rain was measured at Valentia; 4th, Portland 1.12 London 1.14, Southampton 1.75, Braemar, Glenlee and Newton Reigny 1.7. Haslemere 2.1; 6th Jersey 1.34, Portland 1.29, London 1.44, Cranley 1.64, Southampton 1.35, Westbourne 1.56; 8th, Holyhead 1.19, Braemar 2.1, Glenlee 2.0, Ochtertyre 1.9; 14th, Stornoway 1.03. Mist was prevalent on three days, fog on three in the east district. Bright sunshine, estimated in percentage of its possible duration, ranged between 27 in south Ireland and 10 in north Scotland.

At Greenwich, the week ending 25th was without rain, wind sunshine or fog; the weather was dull and mild. Notwithstanding, the solar thermometer on the ground read every day higher than the maximum at four feet in the shade, while the temperature at three feet below the surface was about the same as in the shade. On the 29th and 30th the solar and shade were alike.

The Autumn.—This may be said to have been a fine season, the rainfall was rather scanty, sunshine moderate, and winds quiet.

December, 1899.—The mean temperature was normal, with frost in mid-month and towards the end, snow on three or four days, mostly in Ireland. The weather from bright, mild, balmy days, changed to rains, fogs, gales, snow and cold, then dismal, gloomy, chilly, sunless, damp, no evaporation, slight wind gave no drying, latter part wet, mild, very variable, much rough, boisterous and

some keenly strong winds. Snow fell in most parts of the kingdom, in places to considerable depth. Fog or mist was prevalent, though a fair duration of sunshine; bracing and healthy conditions were experienced. Winds from the S.E. quarter prevailed on sixteen days. The rainfall was excessive in Ireland, less than normal on the east of England, where fog was reported on six days, only on two in the central district. The highest temperature was reported at Dublin on the 4th, 61°; the lowest at Hereford on the 14th, 5°. At 8 a.m., 3rd, while the temperature at Valentia was 52°, Loughborough and Oxford had only 25°; 5th, Valentia 54°, Wick 31°; 10th, Valentia 48°, Liverpool 26°; 11th, Roche's Point 48°, Dungeness 27°; 13th, Roche's Point 47°, Nairn 27°; 14th, Scilly 43°, Loughborough 9°; 15th, Scilly 44°, Loughborough 18°; 16th, Blacksood Point 52°, Yarmouth 26°; 17th, Valentia 49°, London 26°; 23rd, Roche's Point 49°, Shields 29°; 26th, Dungeness 45°, Wick 24°. On the morning of the 12th, 1.10 inch of rain was measured at Blacksood Point; 14th, Roche's Point 1.75; 17th, Blacksood Point 3.27, Valentia 1.92; 20th, Valentia 1.89, Roche's Point 1.05; 22nd, Roche's Point 1.50; 29th, Roche's Point 1.58, Pembroke 1.00. Atmospheric pressure was greatest on the 3rd and 21st, 30.5 inches; least on 29th, 28.2. During 29th and 30th a cyclonic disturbance passed from the Lizard up the Irish Sea and northward through Scotland. Bright sunshine varied between 17 per cent. in south and east England and 8 in east Scotland.

January, 1900.—The weather was exceedingly wet and very mild, extremely changeable, frequent heavy rains, occasional snow, much strong wind, several electrical storms in the west and north of Scotland, and aurora was seen on the 9th. The highest temperature was reported at Dublin on the 24th, 56°; the lowest at Rothampstead on the 21st, 23°. The consistently dull weather favoured uniformity of temperature, except at 8 a.m. 17th, when Scilly reported 52° in contrast to Aberdeen, 32°; 21st, Valentia 53°, Oxford 27°. The rainfall at Valentia was normal, at Scilly nearly double. On the morning of the 2nd 1.8 inch of rain was

measured at Kilkenny, Parsonstown 1'4; 3rd, Ochtertyre 1'5; 6th, Valentia 1'27; 7th, Loughborough 1'25, Scilly 2'75. The greatest atmospheric pressure occurred on the 11th and 25th, 30'5 inches; the least on the 15th, 29'0. Bright sunshine varied between 29 per cent. in north Ireland and 13 in north Scotland.

February, 1900.—The weather was cold, stormy and very variable, continuous fluctuations of atmospheric pressure prove the month to have been unusually unsettled. Easterly winds prevailed on eleven days. Fog was reported on five days, snow on six in the east of England, less in other districts. Clear skies were attended by low temperatures and sharp frosts, and bright sunshine, bracing and healthy air, thawing during daylight, freezing at night. London had 4 inches of snow on the 10th. By the 17th snow had fallen heavily in most districts, 13 inches at Newton Reigny, 3 feet at Keswick, and snow fell on several subsequent days in various districts, but not to much amount. The highest temperature was reported at Geldeston on the 24th, 60°; the lowest at Braemar on the 12th, minus 3°. At 8 a.m., 5th, while the temperature at Scilly was 41°, Parsonstown had only 21°; 6th, Scilly 43°, Parsonstown 23°; 7th, Scilly 39°, Parsonstown 18°; 8th, Roche's Point 40°, Loughborough 14°; 9th, Scilly 40°, Oxford 15°; 10th, Pembroke 40°, Aberdeen 20°; 11th, Scilly 40°, Sumburgh 31°, Wick 11°; 12th, Scilly 43°, Loughborough 14°; 13th, Scilly 44°, Loughborough 14°, Parsonstown 18°; 14th, Scilly 45°, Parsonstown 21°. Rainfall was large, except in north Scotland; on the 9th 1'36 inch was measured at Valentia; 11th, 1'37 at Holyhead; 15th, 1'26 at Scilly. Atmospheric pressure was greatest on the 15th, 30'1 inches; least on the 16th, 28'4. Bright sunshine varied between 32 per cent. in south Ireland and 22 in north-east England. On the 13th a fierce snow-storm swept over the country, attaining the violence of a blizzard in the southern shires. On the 15th a tremendous storm raged with much rain in the southern parts, snow in the northern parts. Afterwards temperature rose and the weather became mild and damp.

The *Winter* was very wet, numerous rainy days and much rain throughout; the middle part was mild, the latter part cold.

March, 1900.—The weather was cold with prevalent north-easterly winds, small rainfall and moderate number of rainy days. Till the 7th dry, cold, north-easterly winds prevailed, with slight frosts and little sunshine. The 12th was a brilliant, genial day. Thence to the 17th brisk, dry, north-west winds prevailed with much sunshine, several night-frosts. A falling barometer brought on snow, rain, rough winds, till the 21st, then cold north-east winds not without rain, till the end of the month. Mist or fog was reported in east England on 9 days, in the central and south districts 6, in Ireland 3. Ireland had snow on about 4 days. The highest temperature was reported at Newton Reigny on the 11th, 59°; the lowest at Braemar on the 18th, 4°. At 8 a.m., 12th, while the temperature at Scilly was 48°, at Loughborough it was only 28°; 18th, Valentia 4°. Aberdeen 17°; 31st, Valentia 45°, Loughborough 28°. The greatest atmospheric pressure occurred on the 14th, 30'9 inches; the least on the 19th, 29'0. The meandering of a storm's centre were curious; on the 18th, 8 a.m., off Valentia; 6 p.m. in lat. 50, long. 9 W.; 19th, 8 a.m., off Land's End; 6 p.m., middle of Devon; 20th,

8 a.m., in Cardigan Bay; 6 p.m., going south; 21st, 8 a.m., near Bayonne. Surely the explanation of the cause for such erratic movements ought to be forthcoming. Bright sunshine varied between 31 per cent. in east England and 22 in central England.

April, 1900.—The weather was seasonable, though rainfall was scanty in England. The lowest temperature was reported at Rothamstead on the 2nd, 22°; the highest at London on the 16th, 78°. An electrical storm over Kent on the 15th caused damage and the loss of some lives. From the 15th to 16th boisterous winds prevailed. Magnificent weather was generally experienced from the 18th to 21st. On the 22nd fog or mist was prevalent. Fog was reported on 5 days in south-west England, mist on 5 in east England. Atmospheric pressure was least on the 3rd, 28'5 inches; greatest on the 20th, 30'55. Bright sunshine varied between 46 per cent. in south and in east England, and 29 in north Scotland.

May, 1900.—Proverbially May is "the merry month," but it is prone to furnish samples of weather. The opening week was tolerably fair; then two weeks of cold, dry, harsh winds, with wintry conditions, snow in Lancashire and some other parts of the kingdom; latterly south-west winds, warm and rainy, with an ending of cold, rough wind and gloomy skies. Altogether the month was inclement, cold with much wind from eastward, gales from south-west, excessive rainfall in west Ireland, defective in east England. The highest temperature was reported at Cambridge on the 5th, 72°; the lowest at Newton Reigny on the 14th, 23°. An electrical storm occurred over Kent on the 6th, and another over east England on the 24th. Atmospheric pressure was least on the 3rd, 28'8 inches, 29'1 on 22nd; 30'3; on 16th and greatest 30'45 on 29th. Bright sunshine varied between 45 per cent. in south-west England and 25 in north-east England.

The *Spring* temperature and rainfall were less than their normal values, though the weather varied much. Strong winds were prevalent and often from eastward. "The oak has been in leaf before the ash, indicative of a dry summer and a bountiful harvest," said the *Daily Mail* on May 24th.

June, 1900.—The weather underwent surprising changes; gloomy, cold, with keen northerly winds, a short heat wave, 10th to 13th, came and left suddenly, followed by heavy rain on 14th, thence unsettled, but for the most part excessively dull, ending cold and drily. The lowest temperature was reported at Glenlee on the 7th, 35°; the highest at Greenwich on the 11th 89° 4, solar thermometer 155°. Rainfall was large in west Ireland, deficient in north Scotland, elsewhere, more than normal. On the 5th, 1'48 inch of rain was measured at Pembroke; 10th, 1'01 at Valentia, 1'05 at Roche's Point. London experienced darkness dispelled by an electrical storm 10 to 11 a.m., 12th. Electrical storms occurred on the 7th in east England and in north Ireland; 8th in Norfolk; 10th in the Irish Sea; 11th in several localities; 12th in these islands generally; 13th and 25th in south-east England; 14th in Lincolnshire; 15th in north England; 19 h in Ireland; 21st in Scotland; 22nd over Great Britain; 23rd in north-east England; 24th in north Scotland; they were numerous and scattered. The wind was from eastward on 10 days. Fog was reported at north Scotland on

7 days, mist in south-east England on 5, east England on 4. Atmospheric pressure was greatest on the 1st, 30.45 inches, least on the 30th, 29.35. Bright sunshine varied between 44 per cent. in south England and 24 in north Scotland; the last week had very little anywhere.

July, 1900.—Great heat prevailed on days of prolonged sunshine, with much fine dry weather. The lowest temperature was reported at Llandovery on the 8th 36°; the highest at Cambridge on the 20th, 95°. A shade temperature so high has not been known in these islands since July 15th, 1881, when at Greenwich, 67°; and above 80 on 12 days, were recorded in Whitaker's A manack. This month above 90° on 4 days, and above 80 on 14 days, were recorded at Greenwich, where on the 16th were observed in sunshine 156°, highest in shade 94°, lowest 62° on ground 51°; sunshine exceeded 11 hours daily on 15 days; the 10th had 15.3 hours; winds from S.E. on six days. Rain was generally deficient. The largest falls were registered on the 21st, 1.05 at Loughborough, 1.7 at East Dereham; 2.8th, 2.1; at Dublin; 2.9th, 2.23 at Killarney. Electrical storms of a severe description occurred in south and south-east England on the 3rd; on 6th over east and south-east England; 11th in Scotland; 12th in central England; 16th, 27th, 29th in England generally; 19th in south England; 20th in England and Ireland; 27th in England and south Ireland; 28th in Ireland. At London on the 2nd there was rain nearly all daylight, but very little light, a high fog or stagnant smoke made gloom and darkness. Atmospheric pressure was least on the 1st, 29.35; greatest on the 7th, 30.35. Bright sunshine varied between 60 per cent. in east and south England, and 22 in North Scotland. The week ending 14th gave 75 per cent. to the Channel Isles.

August, 1900. The weather was extremely variable, temperature 5° below normal in north Scotland, a heat-spell from 12—20th, a cold-snap 25—29th. The winds were very variable in direction and force; from the eastward on 11 days. Rain was very deficient in the north, and excessive in the east. Rainy days were 20 in west Ireland. Mist was reported on seven days in south-west England; three in other districts; fog on two in the north and east. The first decade was wet, depressing, with the most violent storm known in the season, some days cold enough for household fires. The period, 11th—16th, was fine, dry, hot, with abundant sunshine, light winds. Thence to the 25th was rainy and, though subsequently dryness prevailed, the second half of the month was decidedly cold, stormy, with little sunshine, except the two last days, which were warm and very fine. A very cold snap, 26th—29th, was overcast weather. The lowest temperature was reported at Braemar on the 8th, 34°; the highest at Llandovery on the 15th, 86°. At Greenwich the maximum temperature was above 80° on four days, the highest in sunshine 144 on 21st; the 12th—16th had each more than 12 hours' sunshine; on 3rd wind reached 27lbs. on the square foot, 6th 24lbs. In the early morning, 23rd, London experienced an electrical storm, and in the forenoon the rain was described as "delugious." On the 3rd 1.73 inch of rain was measured at Parsonstown; 4th 2.43 at Shields, 1.26 at Liverpool; 7th, 2.0 at Edinburgh, 1.32 at Leith, 1.03 at Holthead, 1.18 at Donaghadee, 1.56 at Parsonstown; 9th, 1.01 at Valentia; 22nd, 1.40 at Parsonstown. Electrical storms

occurred in England on the 5th; north England, 6th, 21st, 22nd; south Ireland, 7th; north Scotland and south-east England, 17th; east England, 18th, 25th; south-west England, 19th; south-east England 20th; in all districts, 23rd: England and Ireland, 24th. The least atmospheric pressure occurred on the 2nd and 22nd, 29.3; the greatest on the 13th and 30th, 30.4 inches. Bright sunshine varied between 51 per cent. in south-west England, and 27 in north-east England; during the week ending 18th, the United Kingdom had 63, the south-west district 85.

The *Summer* had normal values for the measurable elements of weather, but was characterised by abnormalities of heat and cold, dryness and wetness, calm and storm, numerous electrical storms; taumaturgical operations of the most imposing description.

September, 1900.—The weather was of the best description, bright, warm, dry, winds moderate. Mist in the early mornings indicated cold, starlit nights, compensated by genial heat and brilliant sunshine. The highest temperature was reported at Laing on the 14th, 84°; the lowest at Braemar on the 3rd, 30°. Atmospheric pressure was greatest on the 12th, 30.5; least on the 27th, 29 inches. Very light airs prevailed from S.E., 14th to 17th. Mist was reported on seven days in Ireland, five in England, fog also on five days in east England, four in south-west England. Rain fell on 24 days in the north, and the quantity was excessive; elsewhere it was very deficient, and occurred only on seven days in the east. On the 27th, 1.48-inch of rain was measured at Stornoway, 1.80 on the 30th. Bright sunshine varied between 58 per cent. in south England, and 26 in north Scotland; for the week ending 8th south-west England had 72, the next week Ireland had 71, for these two weeks the Channel Isles had 75 per cent.

October, 1900.—The closing days of the remarkably fine September were rainy and stormy, and these conditions continued into October. The weather became warmer on the 6th, but temperature fell on the 10th, and was decidedly cold on the 14th. On the 15th snow or hail, with rain, fell on the north-west portion of the kingdom. From 16th to 23rd, very little rain fell, subsequently much. On the 26th snow to the depth of six inches was reported on the lower hills of Scotland, hail and snow fell in Lincolnshire and in Wales. On the 1st, 1.1 inch of rain was measured at Stornoway; 4th, 1.6 at Roche's Point; 8th, 1.95 at Blacksod Point; 25th, 1.13 at Stornoway; 27th, 3.67 at Alnwick, 3.29 Seaham, 3.07 Morpeth, 1.97 Durham, 1.61 Blarncormick; 30th, 1.0 at Dungeness; 31st, 1.31 at Valentia. The extremely heavy rain in the north of England brought about there a gale of exceptional severity. Electrical storms occurred on the 2nd in north-west England; 4th, locally in England and Ireland; 5th, on the Irish Sea; 26th, at Liverpool. Aurora was seen in north Scotland on the 25th. Atmospheric pressure was least on 5th and 13th, 29 inches; greatest on 22nd, 30.7. The highest temperature was reported at London on 8th, 75°, the lowest at Nairn on the 14th, 24°. West and north of the Kingdom, rainfall exceeded the average. South and east it was much below. Bright sunshine varied between 39 per cent. in east England, and 23 in north Scotland.

The Year's Weather and the Crops, 1899-1900.—The fine weather of October was favourable for sowing wheat, the soil was in good workable

condition. Some mild open weather in November favoured tillage and was beneficial to the young crops. December 8th to 18th were frosty for the most part over the Kingdom. Daylight being brief, inconvenience was not felt. Autumn cultivation was generally forward, and furrows were well crumbled by frost. Check to the growth of wheat was needed. It had got so good a hold of the soil, it was not likely to become "winter-proud" later on. Excessive moisture stopped fieldwork during the rest of the month. January was wild, with frequent rain. Tillage operations were consequently backward, and much snow in February rendered them impossible. The land being soddened and the seed-beds cold, the prospect was inauspicious for farmers. By the vernal equinox tillage-work was in arrears, and, except wheat, young crops were backward. Brilliant sunshine, high temperature and genial moisture in April helped the crops, and rendered work easy on arable land. The 17th to 21st was magnificent weather. About mid-May a wintry cold-snap and searching, strong, dry N.W. wind caused havoc in fruit-gardens. Rains with warm nights in the early days of June were advantageous to vegetation. The cereal crops advanced appreciably. The strong winds, or rather gales, in July were attended by local heavy rains—even snow at Ipswich—so that conditions were injurious to strawberry crops, and damaged wheat. Subsequently intense heat and much brilliant sunshine, many days receiving over 12 hours brought on the cereal crops rapidly. August 3rd to 6th, storms did mischief among the standing crops, though green crops were benefited by the rain, and much damage was done to hops and fruits. Rain, wind and cold delayed harvest. During August root-crops and grass-lands fared well, but corn-crops lost condition, as did potatoes

and hops under the influence of abnormal weather. At the end of the fine September, the average condition of the crops of Great Britain, according to the *T. M.*s estimate, placed them all below average; hops the worst, next potatoes and wheat, the best roots, next grass, beans, oats, barley, peas; the principal depression being assigned to the effect of the extraordinary weather in August. During September many parts of the country had no rain for three weeks. The middle days of October served admirably for sowing wheat.

As regards hay, the cold spring provided a scanty crop in June, however, showers in that month improved the grass, and spells of dry, hot weather following brought on a luxuriant crop in July.

The death rate in the metropolitan district, which is almost the same as the average for the thirty-three large towns of England, was, as registered for the week ending November 16th, 17.3; maximum, 37.1, January 6th; minimum, 13.3, June 23rd; 20.5, August 11th; 14.8, October 13th. Deaths due to diseases of the respiratory organs were 324 in the week ending November 18th, and rose to 1,221, January 6th, then fell to 378, May 10th. The large mortality was due to cold, dull and depressing weather. Cold increases the death-rate, so does heat. Temperature rising above 80° with moist air causes immense discomfort and many fatal results especially if the heat-wave comes suddenly and has short duration. June 11th and 12th were very oppressive. The deaths from diarrhoea were 20, July 7th, and rose rapidly to 359, August 4th, declining slowly to 43, October 27th. The deaths due to enteric were 55, November 18th, and 23, September 15th, confirming the opinion that this disease is most frequent in Autumn.

Earthquakes and Volcanic Eruptions in 1899-1900.

On September 15, 1899, an earthquake lasting several seconds was experienced in Cape Colony. At mid-day two distinct shocks were felt in Capetown, but no damage was done. The motion was due south, with a tendency to east, and the vibration was throughout the western part of Cape Colony. Almost contemporary with this a sharp shock of earthquake occurred in Wellington, New Zealand. Glasses and chairs were upset, and clocks were stopped. Many of the inhabitants fled from their houses in alarm. The shock was also felt at Tauranga. On the morning of September 20 a disastrous earthquake affected the district of Adin, in the Meander Valley, Turkey. The movement was the most violent experienced in recent years in Asia Minor, and it wrought appalling effects. It extended to Smyrna and was slightly felt at Constantinople. It was estimated that nearly 1500 persons were killed and a large number wounded. Several small towns were wrecked and practically ceased to exist. Shocks continued on several following days, and terrified the surviving inhabitants, who were encamped for safety in the open. The level of the country in many places sank six feet, and numerous springs appeared in certain parts. On September 23 a number of earthquake shocks took place at Darjeeling, and resulted in a considerable loss of life and immense damage to property. About 100 persons perished, including

nine European children. At Phool 200 people were killed, and the bazaar was completely wrecked. At the hamlet of Tamsong 21 bodies were recovered, but about 40 persons were killed. Great landslips occurred between Darjeeling and Sonaga, and the railways were seriously damaged. An extraordinary rainfall accompanied the earthquake. Twenty inches of rain is stated to have fallen in one day, and twenty-eight inches in thirty-eight hours. On November 11 a severe shock of earthquake occurred at Liphern at 9 p.m. Though little damage resulted, the inhabitants were much alarmed and congregated in open situations.

On January 1, 1900, a serious earthquake visited the province of Tiflis. Great damage was done in the district of Achaltalak, in which six villages were completely destroyed, and in seven others many of the houses were ruined. 800 bodies were recovered from the ruins. On January 6 a violent shock of earthquake lasting thirty-five seconds was experienced at Adana and Jarsus, but no damage resulted. An Algiers dispatch from Behzane states that a shock occurred there on Wednesday night, May 2. A house collapsed, and a woman who was in bed at the time, was thrown into the cellar. Her husband was seriously injured. Much damage was done to property, but few persons were hurt. On May 3 Mount Vesuvius exhibited increased activity,

and the eruption soon assumed magnificent proportions. Explosions took place from the crater of the volcano, and large stones and molten lava were ejected to great heights. A heavy and continuous rumbling heralded the eruption, and on later days large fragments of igneous rocks, many of them weighing several tons, were thrown several miles. From Naples, which is situated at a safe distance, the burning mountain, with its incessant discharges of fiery material, formed a splendid spectacle. On May 8 four venturesome Englishmen approached nearer the volcano than was prudent, and they were struck by fragments of incandescent stone, from which they received

serious injuries. At Portici and places near loud detonations were heard from time to time, and earthquake shocks were experienced. Early in July the volcano Mount Azuma, near Bandai Lan, Yokohama, which caused great loss of life in 1888, broke out into great activity. The eruption was so violent and sudden that 200 of the inhabitants in the vicinity lost their lives. Reports from Tiflis, dated July 12 state that five villages in the territory of Kari, and some churches and houses in the district of Cagyswan, were destroyed by an earthquake. Six people were killed and nine injured. The shocks continued over several days.

Storms and Floods in 1899-1900.

DURING the year commencing November 1st, 1899, and ending October 31st, 1900, storms and floods which occurred in any part of the world were not so carefully reported as in former years. This was probably due to the absorbing interest taken in the war, which fixed the attention of the chroniclers to the exclusion of natural phenomena. A gale over Ireland, Wales, and South England, on November 3rd, produced a large amount of destruction, especially on railways. Floods in South Scotland drowned large numbers of sheep. From Cork to Dublin and onward to Dover, damage of all kinds occurred. A sewer burst at Colchester, wrecking two houses. On the 18th, the lower parts of Athens and the Piræus were flooded by heavy rain. Some lives were lost, several houses fell, goods and cattle were swept away, railway were blocked, some of the factories between Palerum and the Piræus were seriously damaged; all the casualties indicate inadequate drainage.

During the week of December 5th, a violent storm droned with rain and flooded Mafeking while the bombardment by the Boers was going on with more or less activity. The earthworks were swept away. Within an hour the river rose 8 feet.

The "Natal Advertiser," February 3rd, records floods in the Pungwe river which did considerable damage at Beira. The sea-wall was broken and a large piece of the shore washed away. At the Point many houses were swept away or damaged. The railway traffic was interrupted, mails and telegrams were delayed. On the 12th, the Douro was reported in flood, owing to the melting of snow in the up-country. The occurrence being sudden, numerous casualties resulted. In Spain, the town of Leon was flooded by the Orbgo river on the 14th. A landslide occurred at Ponterrada, just as a train was passing. The driver was killed, and some passengers were injured. Astorga and Bane a were also flooded. In Great Britain, about this date, farmers sustained heavy losses by extensive floodings as the result of rain and snow followed by rapid thaw. Telegraphs were broken; delays and accidents occurred on railways. Blizzard-like conditions produced disastrous effects upon persons and property. Large numbers of sheep were drowned. The Avon at Bath invaded the city. The flow of the Dart, checked by spring tides, gave the highest floods within memory, involving large losses of live stock. By the 23rd the floods in the valley of the Thames were about 6 feet above high water-mark, and floating craft had to be used for locomotion all about the upper

river. By the 28th North Yorkshire was visited with the most extensive flood that had happened for twenty years. At 8 p.m., the Derwent at Malden reached a height of 12 feet 9 inches, inundating a part of the town. In Ryedale the roads were 3 or 4 feet under water, and the North Eastern Railway was covered.

A report arrived, March 25th, from Cape Colony, that at Van Wyks Vlie heavy rains had caused floods in the rivers and overflowing of the dams, rendering the road quite impassable, and the troops remained in camp in very disagreeable circumstances.

On April 18th the country about Maseru had a deluge of rain, which filled the trenches and flooded the rivers.

On May 6th a wind of extraordinary suddenness and violence occurred at night in East Kent, uprooting trees, damaging buildings, and throwing down many persons. On the 29th a hurricane swept over Bosnia. At Serajevo ten houses were demolished and many cattle killed. The bridge over the Zepica, 70 feet long, built of stone, was swept away by the flood like a straw, and communication by railway was interrupted.

On June 2nd violent storms passed over parts of Austria and Hungary. At Baden-bei-Wien heavy rains caused the river to overflow, flooding houses and turning the streets into river beds. Lightning struck an electric tram-car, making a hole in the roof and in the floor, setting it on fire. At Machrisch the dams burst, causing enormous damage. At Budapest a workman was killed by lightning and several persons were drowned. All through Hungary hail and rain did much damage.

June was specialised by electrical storms, in the British Islands. On the 11th Major Hayward was killed by lightning at Harrogate. Hailstones were uncommonly large in places, and much damage was done by them in the Midland counties. These storms were "very general"; globular lightnings, immense hailstones, floods, darkness, buildings struck, glasses smashed, men killed, were events widely experienced. On the 13th North Wales was visited by electrical storms. Part of Wiltchurch, Salop, were flooded, the sewers being inadequate to carry off the vast volume of water. On the 15th an electrical storm in Lincolnshire gave a torrential rainfall for about an hour, causing floods. On the 25th an electrical storm passed over London, washing it with drenching rain. In Kent the late rains spoiled the crop of strawberries. Early in June heavy rains in the southern districts of Argentina inundated vast tracts where seven millions of

sheep were in danger. At night, 23rd, near Atlanta, in Georgia, 35 lives were lost by a train plunging into a small river, the bridge having been carried away by flood. A terrible electrical storm added to the horror of the scene. On the 26th, owing to tremendous rains, the Prah river, Ashanti, was unprecedentedly high. The bridge over the Fum was completely washed away, delaying the movement of troops. On July 3rd the road between Prahus and Fumsu was in some places 5 feet under water. By the 6th the Prah had fallen 15 feet during the previous six days.

On July 3rd, at night, South Lincolnshire was visited by a severe electrical storm. Tremendous rain flattened the corn. Hailstones as large as acorns, and some snow, fell. New York reported, on the 7th, three days of intense heat, 95° in shade, with great humidity, causing the air to be sweltering. A violent electrical storm and a furious wind caused wide-spread destruction. The heat wave was experienced over the eastern and middle states of the Union. There were many deaths and injuries. On the 11th floods were reported in New South Wales, owing to terrific gales on the coast and heavy rains throughout the colony. The Hawkesbury Valley was submerged, and great floods formed about Gouldburn. Families were rescued from trees and house-tops by boats. Two trains were snowed up and the traffic blocked in consequence of unparalleled snowstorms in the Blue Mountains. On the 12th, during an electrical storm over northern England, rain in torrents caused flooding of houses, damage to railways and telegraphs, loss of lives and personal injuries. In the evening of the 20th, during an electrical storm at Northampton, hailstones fell weighing as much as 8 ounces, measuring 6 or 7 inches in circumference. They broke street-lamps, glass-roofing, killed many animals, and did damage estimated at six to seven thousand pounds. The following night an electrical storm over the eastern counties fired stacks and buildings; lightning or hailstones killed animals. From 8 a.m. till midnight violent electrical storms raged over southern England, with rapid fall of temperature and lumping showers. Numerous cattle were killed, many buildings struck, and several persons killed by lightning.

On August 3rd, in the afternoon, a swift and sudden cloud-burst occurred over the hills of Derbyshire, which, in the course of a few minutes, produced huge torrents of water, sweeping along trees and masses of earth. Two miles of railway were covered with the debris to a depth of 10 feet. A train was caught in it, and had to remain till noon of the 4th.

On the 6th, Bank Holiday, a cyclonic storm of the severest type raged over the British Islands with extraordinary violence. For the summer-time it was exceptional. Wide-spread damage and the break-up of holiday arrangements resulted. At 8 a.m. it struck the south-west of Ireland. By 6 p.m. the centre was at Holyhead. Through the night it travelled eastward over England. Heavy rain caused much destruction, a landslip in the Snowdon range, and flooded rivers. On the 7th tremendous rain in the Alps or the Franco-Italian frontier made a mountain torrent overflow. A deluge of water and mud came down upon the villages St. Ours and Meyrounes, half filling the houses with mud. Two companies of infantry helped to clear the houses. On the 8th, in Wales, flooded mountain streams caused much damage to property and crops. Many acres of hay and corn were submerged. The

great storm damaged shipping along the coast. The crops in Lincolnshire and adjacent counties were much damaged by storms. Fruits were stripped from trees in all parts of England. News from the United States on the 13th reported an intense heat-wave, which lasted six days, had passed over the country east of the Mississippi river. At Chicago 2,000 horses died in the streets. Several thunderstorms were reported from Toronto on the 11th, and from New York on 12th. Heat and lightning were fatal to numbers of people. About the same date a heat-spell prevailed in England, and in Spain Seville reported 117° in shade, Madrid 109°. On the 13th floods in Assam drowned thousands of rats in the Ranganuddee river, hundreds of cattle, ten people, and destroyed many granaries. On the 16th serious floods in various parts of Japan killed two hundred persons. During an electrical storm on the 21st over north England a water-spout, evolved in the estuary of the Ribble, burst over Preston. Hailstones as large as marbles fell at Hartlepool: part of the town was flooded, and crops destroyed. Three tons of gun cotton were exploded by lightning at Stevenston in Ayrshire. Enormous damage was done by flooding to a wire-works at Halifax. On the 23rd a spate, which followed the heavy rainfall of the previous twelve hours, caused a reservoir eight acres in extent to burst its embankment at Forres in Elginshire. The adjoining meadows were converted into an immense lake, and the water, rushing impetuously to the town, wrecked an iron bridge, flour mills, and residences. On the 25th, owing to the overflow of the Godavery, serious floods occurred in Madras. Many persons were drowned, and much damage was done to railways, crops, and other property. On the 29th, for two hours in the evening, a hurricane raged at Mafeking, accompanied by intensely vivid lightning, and thunder which seemed to cause a tremor of the ground. Rain inundated the town. The force of the wind was terrific. Trees were uprooted, and scarcely a building escaped damage. There were general suffering and numerous injuries. The troops fared badly. The hospital was destroyed, the rescue of the patients being effected with difficulty. At the end of August a terrible hurricane swept over eastern Manchuria. Torrents of rain undermined the railroad from Khabarovsk to Vladivostok. Bridges were washed away and telegraphs broken.

On September 8th, from 10 a.m. to 11 p.m., a hurricane which raged in the Gulf of Mexico caused a most appalling disaster to Galveston, and continued its destructiveness into Texas. The sea was driven over the town and almost completely destroyed it, drowning upwards of 4,000 persons. Bridges, elevators, sheds, wharves, warehouses, waterworks, gas and electric plant, and dwellings were destroyed. Seven large steamers and 150 other vessels were wrecked or stranded. Sabine Pass was destroyed. At Bolivar Point a train was wrecked and 85 passengers drowned. High Island, a seaside resort of about 1,000 houses, full of visitors, had not a house left, but 400 corpses were found. The cotton belt of Texas was entirely ruined. The wind attained 84 miles an hour. The storm was not anticipated. The casualties due to this storm have been estimated at 12,000 deaths, besides the thousands injured and rendered homeless. The loss of property cannot be less, it is said, than two millions sterling. On the 20th, a hurricane in Orford, Iceland, wind 120 miles an hour, drove

smacks ashore, blew down houses, killed several people, caused great loss of hay. On the 29th, recent floods in Calcutta rendered the country for miles round a lake. Boats plied in the streets. A tram-car was stopped in the heart of the city by a large fish, which was swimming in the flooded street and got caught in the wheels.

October 7th, torrential rains led to flooding of the Annan, in Scotland, and a mill was crushed by the gale. On the 9th, in the afternoon, at Lough, in Clare, a bog began to move, yielding to the effects of the recent rains. Gathering

velocity, the semi-fluid mass overwhelmed a house, killing two women. On the 27th, a severe storm of wind and rain left floods in North England. Between Newcastle and Shields some parts of the railway were 9 feet under water. In South Shields boats were used in the streets. At Blyth a man swam down the main thoroughfare. Lakes were formed inland, sewers burst, telephone wires blown down. At Darlington water rose 2 feet higher than has been known for a quarter of a century.

Progress of Astronomical Science, 1900.

THE ASTEROIDS AND PLANETS.

The number of Asteroids have, in the past year, been brought up to nearly 460. Names have been given to the following: (315) Gabriella, (397) Aquitania, (449) Theodora, (444) Gypsis, and (445) Edna.

About four hours before the total Solar Eclipse on May 28, 1900, Professor Howe, of Denver, obtained an observation of the planet Eros, which, by comparison with the Ephemeris by Millosevich, showed that a correction of $+4''$ was required in R. A., and $+33'$ in declination. At the meeting of the Astro-Photographic Congress held in Paris in July of last year, a committee was formed to make arrangements to obtain the co-operation of such observatories as possessed the necessary means, and were willing to undertake observations of Eros at the opposition in November and December, 1900. The planet will be nearest to the earth on December 25. The committee recommend that the positions of the planet should be determined by heliometric, photographic, and micrometric measures, by the Observatories of Europe and North America, and those in the Northern and Southern Hemispheres. The observations of the planet at the European Observatories, it is suggested, should be made at as great an hour angle east and west of the Meridian as possible, with a supplementary series of observations about two hours before the second or western series. In North American observatories, the supplementary series should be made the same time after the first or eastern series. In this manner it will be possible to obtain the equivalent of simultaneous observations in Europe and America, and to find the motion of the planet. The great northern declination of Eros, at this particular opposition, will make it difficult for southern observatories to fully co-operate in the work. The discussion of all the different observations thus obtained will furnish a nearer approximation to the value of the solar parallax than has been obtained by any previous determinations, and will be definitive till the next favourable opposition, which will no doubt take us another step towards the truth.

THE SUN. The Sun has now apparently passed the minimum spot period. The chief matter of general interest to report in the past year in connection with the Sun is the total eclipse on May 28. It appears from the various accounts which have come to hand that all the observers were fortunate in having fine weather, not only in Europe but in America and Africa also. The Greenwich party, with the Astronomer Royal, stationed themselves at Ovar, in Portugal. Here,

although the sky was a little hazy, the corona was plainly visible, and resembled that of 1893—the form it usually presents at the time of the minimum Sun-spot period; the equatorial streamers being comparatively short, with polar plumes. Dr. D. P. Todd, who was in charge of the Expedition sent by the Lowell University to Tripoli, confirms this account of the appearance of the corona. The light at the time of totality was considered as great as that noted by the observers of the Eclipse in 1898, in India, when it was stated that a newspaper could be read without artificial aid. Of the Stars, Sirius only was conspicuous, and the two planets Venus and Mercury. In Algiers it was also remarked that the corona was of the minimum Sun-spot type, and that several large prominences were seen. In America and Europe it was noticed that the time of totality predicted in the Nautical Almanac was somewhat longer than the observed time of duration. In the neighbourhood of London, where the Eclipse was partially visible, observation was interfered with by clouds, but at frequent intervals the eclipsed Sun could be well observed. The results obtained from a full discussion of the observations, and comparison with the equally successful observations made in 1898, should increase our knowledge of the constitution of the corona, and go far to clear up some hitherto unexplained phenomena exhibited by that marvellous appendage to the Sun.

This corona, it will be remembered, has an irregular outer border extending, in some directions, far beyond the limit of the Sun, and interrupted by certain dark rifts, which appear to be due to the background of the sky seen through spaces free from the light-giving matter of the corona. Recent examination of the Eclipse photographs taken in 1895 show curious dark markings on the corona, which it is thought cannot be attributed to inter-spaces. It is suggested that these rifts are really black rays, not the effect of contrast, or spaces between the bright rays, but are due to absorption by some medium interposed between the observer and the bright corona. The dark markings shown on the photos taken by the English observers on May 28, 1900, can be clearly seen on the negatives taken in America. This explanation of the rifts is rather startling, and before it can be generally accepted must await further confirmation.

JUPITER. Professor E. C. Barnard obtained an important series of measures of the fifth satellite with the great Yerkes refractor at the oppositions in 1898 and 1899. In a little less than two hours the satellite had changed its position $10''$ as measured from the limb of the planet.

VENUS. The vexed question of the period of rotation of Venus still engages the attention of astronomers, and it is reported that Belopolsky has been enabled, from spectrograms, to confirm the short period of about twenty-four hours found by some other observers. Opinion, however, is still divided, and other observers of good authority maintain that the period cannot be less than 223 days.

The comet Tempel II. (c) 1899, discovered on return by Perrine on May 6, was well observed at the Lick Observatory up to the end of the year 1899. In the middle of the year it was an easy object in small telescopes, and Major Eddie, observing at Graham's town on August 15, notes that the head was sharply defined, with a central condensation. A tail could be traced for 16'. The nucleus was 6' in diameter, and surrounded by a large diffused coma. At the beginning of December it had become very faint. A very successful set of observations was obtained by Mr John Tebbutt at Windsor, N S W, commencing on July 2, and continued till the comet became too faint for further observation. It was also observed on the meridian at the Cape Observatory on twenty nights between July and September.

Holmes' comet was observed several times by Professor Barnard at the end of October and beginning of November.

(a) 1900. A new comet discovered by M. Giacobini at Nice on January 31, described as very faint at time of discovery, with a diameter of about 2' and a hardly perceptible nucleus. On emerging from the Sun's rays, after passing perihelion, it was again observed.

(b) 1900. A bright comet discovered by Brooks at Geneva on July 24, in R.A. 21.44^h. and decl. 12° 30' N. It was also independently discovered by Borely. In the 10 $\frac{1}{2}$ -inch telescope the comet appeared a very beautiful object, with stellar and bright nucleus at times appearing separable like an unequal double star, though the separation was not quite clear. At the end of July it was just visible to the naked eye. Early in August a large number of observations were obtained. It showed a tail half a degree in length.

Professor Keeler points out that the spiral form of Nebulae seems rather to be the rule than the exception, if we make use of the question of the great extended diffuse Nebulae, such as that in Orion, or the great nebulous clouds scattered about the Milky Way. The number of new Nebulae found on the photograph taken with the Crossley reflector is simply enormous.

As regards the Astrophysical Chart, we learn from the reports sent in from 15 out of the 18 Observatories engaged, that their work was well advanced. Their maining three had, from various causes, failed in their share of the undertaking. This gap in the scheme is likely to be filled up by the Cordoba Observatory, in the Argentine Republic. The Government of Monte Video has promised to build an observatory to help on the work, and it is probable that the Perth Observatory, in Western Australia, will also contribute its help.

THE MOON.—Professor W. H. Pickering, in the *Annals of the Harvard College Observatory*, has a paper on visual and photographic observations of the lunar surface, and discourses them in relation to the probability of the existence of a lunar atmosphere. From various theoretical considerations and observed phenomena, the Professor thinks that we may be justified in concluding

that the Moon is surrounded by an atmosphere, though of much less density than that of our Earth, seeing that the force of gravitation at the Moon's surface is but one-sixth that at the surface of the Earth. On the floors of many of the craters variable spots have been observed, which are darkest just after full moon. As at full moon no shadows are possible these spots cannot thus be accounted for, and being invisible when the sun is lowest, and the shadows strongest, it seems certain that a real change is produced in the nature of the reflecting surface. It was early suggested that these spots might be due to some process of vegetation; only it is hard to imagine this possible without air and moisture. Observations on other features of the Moon's surface, such as the *trilys* and *maria*, but more particularly those made on Plato through the different conditions of illumination, as the rises, souths, and sets on the crater, give a fair presumption that moisture and carbonic acid are found, though in very small quantities, on the Moon's surface; and in conclusion Professor Pickering says: It seems to me, therefore, that we should hereafter cease referring to our satellite as a cold dead world, but rather as a live and very active one. While on account of its small mass and the small corresponding value of the force of gravity at its surface, it can never retain a dense atmosphere like our own, and can therefore presumably never support similar forms of life, there seems to be no reason why we should in consequence assume that it is already dead, or that it is at any more advanced stage of its existence than we ourselves. If we may judge from what we at present know about Plato and the facts gleaned from the observations on various lunar craters, it would appear that as far as volcanic activity is concerned the moon is at present at least as youthful as the earth, if not more so.

At the Potsdam Astrophysical Observatory a large photographic refractor has been installed, with an aperture of 31 inches, carrying a guiding telescope of 19 $\frac{1}{2}$ inches. The work on the Astrophysical chart is rapidly progressing, the Potsdam zone, from 3° to 40° of North declination, being nearly complete.

The new observatory at Odessa, which is a branch of the old observatory at Pulkova, is furnished with instruments similar to those at the older observatory, the instruments being used alternately night by night, not both together. At Paris the revision of Lalande's zones by observation with meridian instruments, which was begun some years ago, is nearly completed, only a comparatively few stars remaining to be observed. The chronographic registration of transits is about to be introduced for the meridian work.

The Director of the Perth Observatory, Western Australia, has, in conjunction with Sir Charles Todd at Adelaide, determined the position of his Observatory. The latitude, from a meridian zenith distances of circumpolar stars, is given as 31° 57' 10" South; and the longitude, by exchange of clock signals with Adelaide, 7^h. 43^m. 21^s. East of Greenwich.

Obituary.—Mr. Nathaniel E. Green, a well-known amateur astronomer, died at St. Albans. Trained as an artist, his drawings of the planets were executed with great detail and fidelity, and consequently afford most valuable help to the student in studying the physical peculiarities of each. In this particular department he was

rarely equalled and probably never surpassed. He constructed a telescope in 1859, and began the long series of drawings and observations which terminated only very shortly before his death. Among other papers, an important Memoir on Jupiter, including the results of his observations between 1853 and 1883, was published in Vol. 49 of the Royal Astronomical Society's publications, prettily illustrated with drawings of the planet. Mr. Green was elected a Fellow of the R.A.S. in 1875, and was at one time a member of the Council. He was also one of the founders of the British Astronomical Association, subsequently becoming President.

Professor G. F. W. Rümker, Director of the Hamburg Observatory, died in March last. Professor Rümker was born toward the end of 1832, and from an early age took part in astronomical calculations. At the age of 20 he studied under Encke at Berlin. From 1853, to 1855, he had charge of the Durham Observatory, and on his father's death was appointed Director of the Hamburg Observatory.

The Rev. E. L. Berthon, an amateur astronomer, died in the past year at the age of 86. Born in 1814, he went to Cambridge in 1841, and taking holy orders on leaving college, was presented to the living of the abbey Church at Romsey, with the restoration of which he had

much to do. Besides his favourite hobby of astronomy, he was fond of mechanical constructions, and is better known generally by his invention of the Berthon collapsible boat. He also did much in the construction of astronomical instruments and appliances. On his election to Fellowship of the Royal Astronomical Society in 1899, he showed a new form of Equatorial telescope.

Dr. C. F. R. Luther, for many years in charge of the Düsseldorf Observatory, died in the early part of last year. He devoted himself to the search for minor planets, of which he discovered many. On several occasions the Paris Academy awarded him the Lalande prize. Dr. Luther was a foreign Associate of the Royal Astronomical Society, and Doctor of Philosophy of the Bonn University.

Emmanuel Liais.—M. Emmanuel Liais, Mayor of Cherbourg, died at the age of 74. For many years he held various appointments at the Paris Observatory, and organised telegraphic meteorology in France; also introduced the use of the chronograph in the determination of longitudes by telegraphic signals. M. Liais bequeathed his property to the Municipality of Cherbourg, in trust for scientific purposes.

Miss Catharine Bruce, who, it will be remembered, had on several occasions made many handsome money gifts for the furtherance of astronomy in the United States, died in April last.

The Variable Star Algol (*Beta Persei*).

This is one of the most conspicuous and noteworthy variable stars in the heavens. Its remarkable fluctuations of light were probably known to the ancient observers, but the first definite record of its discovery is by Montanari, in 1669, and the accurate determination of its period was not effected until 1782 by Goodricke. At that time the star passed through all its gradations of brilliancy in 2d. 20h. 48m. 59s., but the period seems decreasing, for Chandler has recently found it 8½ seconds less. The star is usually a little fainter than 2nd mag., and remains so for

about 2d. 11h., when it rapidly declines in lustre, and in about 4½ hours arrives at a minimum of 3½ mag. There is then a revival of its brilliancy, and in 5½ hours it reaches its normal magnitude of 2½. The following are the computed times of minima in 1901. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight on the northern horizon, but in the autumn and winter months it may be viewed with advantage.

630 Table for Finding the Times of Sunrise and Sunset.

To use this Table, take the Sun's declination in the left-hand column, and under the required latitude on the horizontal line will be found the apparent time of Sunset. Subtract the quantity found as above from 12h., and the remainder will be the apparent time of Sunrise.

This Table is arranged for Northern latitudes, but will serve equally well for Southern by changing the declination from North to South, and vice versâ.

The local mean time of the observed altitude, when reduced to the corresponding Greenwich mean time, may be converted into sidereal time by means of the table on the next page. It will be observed that the sign on the left-hand side of the correction in Table I. is to be used when the argument is on the left, and *vice versa*; + means that the correction is to be added to the reduced altitude, and - that it is to be subtracted. The corrections derived from the double-entry Tables II. and III. are always added. In order to make the quantities taken out from Table III. additive they have been increased by 1'; this quantity must therefore be taken away from the final result.

TABLE III. (1901.)

To obtain the Sidereal Time corresponding to any given Mean Time, by means of the above tables, all that is required is to take the Sidereal Time at the preceding Mean Noon (which will be found on the second page of each month) and add to it the Sidereal Equivalents opposite to the hours, minutes, and seconds of the given Mean Time. If the sum of these numbers comes out more than twenty-four hours, twenty-four hours must be subtracted from it. For example:—

Let it be required to find the Sidereal Time corresponding to the Mean Time 8h. 6m. 0s. on September 23:—

Sidereal Time at Noon on September 23	H. M. S.	■	6 33
Mean Time intervals and equivalents from table	}	8h. =	■ 1 18-85
above		6m. =	6 0-99
		0s. =	0 0

Corresponding Sidereal Time = 20 13 52-84

This table may also be used to show the acceleration of Sidereal on Mean Solar intervals, by subtracting the Mean Time arguments from their Sidereal Equivalents.

TO CHANGE INTERVALS OF SIDEREAL TIME INTO THE EQUIVALENT INTERVALS OF MEAN SOLAR TIME.

To obtain the Mean Time corresponding to any given Sidereal Time by means of the above tables, take the Mean Time at the preceding Sidereal Noon (which will be found on the second page of each month) and add to it the Mean Time Equivalents of the given Sidereal Time.

Let it be required to find the Mean Time corresponding to the Sidereal Time 20h. 13m. 53s. on September 23:—

Mean Time at Sidereal Noon September 22	H.	M.	S.
	11	55	26
Sidereal intervals and Mean Time equivalents	{	20h. =	19 56 43.41
from table above.....	{	13m. =	12 57.87
	{	53s. =	52.85
Corresponding Mean Time September 23 ... =	8	0	14 Aft.

* The periods of rotation of Mercury and Venus have not been accurately ascertained.
 N.B.—The numbers in the third column refer to the mean distances at inferior conjunctions for the inferior planets; at opposition, for the superior planets.

Summary of Celestial Objects and Phenomena for Observation, 1901.

The following is a description of the most interesting and conspicuous astronomical occurrences and of the positions and configurations of the planets in 1901. The information is presented in a popular form so that it may be readily comprehended by those who do not possess a technical knowledge of astronomy. It is intended, in fact, for that numerous class of amateurs who make a "hobby" of the science and find a pleasure in the contemplation of the heavenly bodies and in witnessing some of their curious changes and attractive appearances. We have necessarily confined our references to these particular events and objects which are capable of being definitely predicted. There are several others which are irregular and occasional in their apparitions; amongst these may be included new Comets, Temporary Stars, displays of Auroræ Boreales, and brilliant Meteors or Fireballs. Examples of some, if not of all, of these phenomena will be sure to offer themselves for observation in 1901, but it is not possible to specify the exact times and positions of their appearances. Those persons who are most vigilant in observing the sky are likely to be the most successful in detecting objects of the kind alluded to. We make reference to them in the hope that amateur astronomers will maintain a diligent watch of the firmament, and record and publish anything they may notice of special interest. New comets are usually announced in the newspapers a few days after they have been discovered, and such references are often accompanied with information which will enable any one to detect them; but a telescope is generally necessary in the observation of comets. Transitory objects, such as large meteors, confine their apparitions to a few moments of time; Auroræ are more lasting, and are sometimes displayed for several hours without intermission under a series of changeful aspects. It is obvious that spectacles of this character cannot be announced beforehand, as they are irregular in their occurrence; they are therefore usually witnessed by such persons only as are favourably situated for such observations and maintain a frequent look-out for them.

Eclipses.—In 1901 the eclipse phenomena will be meagre and not of special interest. There will occur four eclipses, two of the Sun and two of the Moon. On May 3, in the afternoon the moon will pass through the penumbra of the earth's shadow and suffer a feeble eclipse, but it will be scarcely perceptible in this country as the Moon does not rise at Greenwich until 7h. 28m., when the best part of the phenomenon will be over.

On May 18 there will occur a total eclipse of the Sun, but it is quite invisible in England.

On October 27 there will be a partial eclipse of the Moon, of which something may possibly be observed, but only under very unfavourable circumstances, for the moon rises after the last contact with the shadow, so that the visible part of the eclipse will be only a penumbral one, as on May 3. Our satellite will rise at 4h. 37m. P.M., and the last contact with the penumbra occurs at 5h. 26m. P.M. This eclipse, similarly to that of May 3, will only be perceptible soon after moon-rise if the sky is very clear in the region of the horizon.

On November 11 there will be an annular eclipse of the Sun, but it is altogether invisible at Greenwich.

Occultations.—There will be no occultations of bright planets or stars in 1901. On September 5 the Moon will pass over ϵ Tauri (mag. 2.7) 4h. 2m. A.M. to 4h. 58m. A.M., and on December 14 β Capricorni (mag. 3.4) will be hidden from 6h. 43m. to 7h. 39m. P.M. On December 23 ϵ Tauri will be a second time occulted between 5h. 53m. and 6h. 12m. P.M. These will form the most conspicuous examples of this class of phenomena which occur during 1901. The Moon will often pass near some of the principal planets and stars during the year, but will not actually occult them. Our satellite will be in conjunction with Mercury on February 20 and June 18, and as the latter object is near his eastern elongations at those times, he may be picked up in the neighbourhood of the lunar crescent. The Moon will be in conjunction with Venus on January 18, February 17, March 19, April 18, November 15, and December 15. Her conjunctions with Mars, Jupiter and Saturn will occur on following dates:—

With Mars.	With Jupiter.	With Saturn.
Jan. 9	Jan. 18	Jan. 19
Feb. 5	Feb. 15	Feb. 15
Mar. 4	Mar. 14	Mar. 15
Mar. 31	April 11	April 11
April 27	May 8	May 9
May 25	June 4	June 5
June 23	July 1	July 2
July 21	July 28	July 29
Aug. 19	Aug. 25	Aug. 25
Sept. 17	Sept. 21	Sept. 22

Occultations of one planet by another are exceedingly rare phenomena, though near approaches of these bodies are of comparatively frequent occurrence and often peculiarly attractive as spectacles for the naked eye. Thus, on January 15, Venus will be only 22' N. of Jupiter, on November 18 these planets will again be in conjunction, the distance separating them being 2° 45'. There will be other occurrences of this kind which will be particularly referred to in dealing with the individual planets.

Jupiter's Satellites.—To those amateur astronomers whose telescopes are of moderate dimensions, four of the satellites of Jupiter offer a most attractive group of objects for study. They can be distinctly perceived in any small glass, and the circumstance which, more than any other, renders them so interesting is that their relative places vary from hour to hour. The different configurations they successively assume are so entertaining that the observer experiences none of the monotony that would result from a stationary aspect. And the satellites not only change their positions at short intervals, but frequently become eclipsed in the shadow of Jupiter or occulted by the large globe of the planet. They also make transits across the disc, and it is then they become visible as circular, dark spots projected on the bright surface of Jupiter. The shadows of the satellites are also to be seen on the face of the planet at such times, and a telescope will sometimes reveal the gratifying spectacle of two or three black spots coursing along the line of the Jovian belts and imparting quite an abnormal appearance to the planet's scenery. The satellites are not generally known by distinguishing names, it being customary to refer to them by the Roman numerals I., II., III., IV., and V., but of

late the idea of employing names has been more favourably received. Satellite V. is the one nearest to Jupiter, and it is extremely faint and small as compared with the other four. It was discovered on September 9, 1892, and is the most important addition to our knowledge with which the great 36-inch telescope at the Lick Observatory in California has supplied us. The satellites III. and IV. are the two outermost from Jupiter, and they are frequently seen transformed into dark spots when in transit. Under such circumstances they are fairly conspicuous objects even in small instruments. Appended are a few dates when satellites III. and IV. may be observed in transit:—

SATELLITE III.

Date, 1901.	Ingress.		Egress.		Duration of Transit.
	H. M.	H. M.	H. M.	H. M.	
January 19	18 37	21 21	2 44		
February 24	16 20	19 13	2 53		
April 1	12 56	15 56	3 0		
May 14	11 30	14 34	3 4		
July 3	11 2	14 6	3 4		
August 15	7 21	10 26	3 5		
September 27	6 5	9 13	3 8		
November 2	2 55	6 8	3 13		

SATELLITE IV.

May 9	13 3	14 59	1 56
June 28	9 47	11 54	2 7
August 17	6 12	8 32	20

In this and the following table astronomical time counting from noon to noon is employed. The transits of satellites III. and IV. across the disc of Jupiter may be watched with a good telescope of about three inches' aperture as the satellites are then transformed into dark spots which are very obvious on the bright surface of the planet. But unless the observer is careful the shadows of the satellites, which also transit the disc, are liable to be mistaken for the satellites themselves. The times of occurrence as given in the foregoing table will, however, prevent errors of identification, for except at the time of opposition (June 30), the satellites and their shadows differ considerably in their times of transit. Before opposition the shadows precede the satellites, but after opposition the order is reversed, the satellites being in advance or their shadows. Thus, on May 9, the shadow of satellite IV. enters on the disc of Jupiter at 3h. 39m., while the satellite itself enters at 13h. 3m. or 9h. 24m. afterwards. On October 23 the shadow of satellite IV. enters on the planet about 11 hours after the satellite. On the day of opposition (June 30) there will be a transit of satellite I., and its shadow occurring at simultaneous times, the ingress being at 10h. 4m. and egress at 12h. 21m.

The third satellite of Jupiter is so bright that it has been occasionally glimpsed with the naked eye, but the fifth satellite is exceedingly faint and so near to its primary, that it can only be glimpsed in the most powerful telescopes. Its period of revolution is 11h. 57m. 22.5s., or very slightly less than half a terrestrial day. Four of the moons of Jupiter are usually visible in a field glass, and any small telescope will exhibit them distinctly; but the instrument must be either

mounted on a stand or rested upon a wall or post to ensure the necessary steadiness. The satellites are commonly seen to be ranged nearly in a line parallel with the belts and with the planet's equator, but there are notable exceptions. Sometimes they are symmetrically placed, two being on one side and two on the other. At certain periods they are grouped three on one side and one on the other, while occasionally they are all clustered on one and the same side of the planet. The following are some of the dates when they may be observed in the latter position.

On occasions which happen somewhat rarely Jupiter is apparently attended by one satellite only. Thus, on March 23, from 6h. 2m. to 5h. 35m. a.m. only satellite IV. will be visible, while on the same morning from 7h. 0m. to 8h. 22m. only satellite I. will be perceptible; but these phenomena occur after Jupiter has set in England. An event of this kind will, however, be well visible in the early evening of November 2. For three of the moons of Jupiter will either be in transit or occulted and only the fourth will be seen between 3h. 48m. and 6h. 8m. p.m. A small refracting or reflecting telescope mounted on a convenient stand will afford excellent views of the satellites and all the attendant effects produced by their differences of motion. Observations of this character must be made from a window or some position commanding a good southern aspect, as the planet is very low and liable to be hidden behind trees or buildings. The observer may pass some hours of agreeable recreation in watching these satellites and in delineating their positions on successive nights in a series of diagrams. It often happens that two of the satellites approach each other very closely and are scarcely separable with moderate powers, the appearance being similar to that of a difficult double star. Sometimes there is a conjunction of three of these bodies, and the observation of appearances of this kind never fails to prove entertaining to the possessors of small telescopes.

The Sun being the great central source of light and heat and the mainstay of planetary life, it is natural that every fact connected with so important an orb should receive marked attention. Many people have heard something about the "spots on the Sun," but comparatively few persons have ever seen these curious formations or learnt anything relating to their actual character. That an object so dazzlingly luminous as the Sun should exhibit dark markings is a circumstance which often excites surprise, and when

it is stated that these markings are frequently of enormous size, and that they undergo exceedingly rapid changes, sometimes appearing or disappearing in a few hours, the attention becomes riveted on phenomena so strange. The spots are often sufficiently large to be detected with the unaided eye; indeed, they were occasionally seen many centuries prior to the invention of the telescope. When this instrument is directed to the Sun it becomes necessary to employ deeply-tinted glass in front of the eye-piece to limit the intense light and heat of the image, for unless a precaution of this kind is taken serious damage may result to the observer's eye. A very convenient plan of effecting solar observations is to detach the coloured glass from the instrument and to allow the Sun's image formed by the telescope to fall upon a piece of white cardboard. The details of the spots may be readily perceived in this manner, and the speckled appearance of the whole disc is brought out most satisfactorily. There is also no danger of injury to the eye. For critical examination of Sun-spot structure and variations we must, however, resort to the method of direct vision as the most effective in its results. The present is not a favourable epoch for watching solar phenomena, as the spots are likely to prove comparatively infrequent in 1901. They are displayed very abundantly at intervals of about eleven years, with intervening periods of minima when the solar surface is rarely variegated with conspicuous spots. We are now near a minimum of these phenomena, and may justly anticipate that during the few ensuing years the Sun-spots generally will be few and of small dimensions. There will, however, probably occur some notable exceptions. Though the last minimum of Sun-spot activity occurred in 1839 there were visible some fine and interesting specimens of the objects alluded to. In 1900 a few fine groups presented themselves, though there were a considerable number of days during the year when no spots were visible on the sun. In June 1900, several prominent spots appeared and excited general remark. They were not of very exceptional dimensions, but they were sufficiently large to be distinguished by the naked eye. Various theories have been advanced to account for these solar outbursts, and there is no doubt that they represent extensive disturbances in the luminous atmosphere which surrounds the solid and probably dark body of the Sun. The spots indicate shallow depressions in the solar envelope, though this idea has been objected to in the light of some recent observations which are, however, indecisive, and much further evidence is required to settle this, and some other questions relating to the visible aspect of the Sun. Though the Sun forms a splendid and ever-varying object, it has been insufficiently studied and very few new and interesting facts in regard to its physical phenomena have been brought to light in recent years.

The Moon may be said without exaggeration to be the most varied, distinct and attractive object in the firmament. Her permanent features present a marked contrast to the evanescent formations in the luminous envelope of the Sun. The lunar landscape shows many apparent changes, it is true, but these are due to the constantly varying angle at which the sunshine falls upon them. We know that the manifold objects upon the Moon are permanent markings on her surface, and are liable to no rapid alterations of shape, though possibly

undergoing slight modifications in a gradual way. Evidences of great activity in ages long past are scattered broadcast over the lunar orb, but the features as they are now displayed appear to be perfectly immutable. The most suitable period at which to view the craters and mountainous regions of the Moon is when her disc is only partly illuminated, and she is either in a crescent form, near first-quarter, or slightly gibbous. At such times the shadows of the inequalities of landscape near the terminator are strikingly manifested, and the diversified character of the formations is pleasingly portrayed. This is far from being the case at the period of full Moon, for her features are then displayed under a high Sun and their shadows have disappeared, so that the inequalities of the landscape have lost their distinctive and varied character. The great refulgence of the full Moon is also an impediment to successful observation. Let the observer avail himself therefore of the period near the first quarter for our satellite is then very conveniently presented in the evening sky, and other conditions are favourable. The Moon's surface has already been surveyed by several competent astronomers, but there remains much to be done in the re-examination and drawing of details in reference to which our knowledge is far from perfect. Observers should also search for evidences of active change, and compare reliable charts of the Moon with the actual objects as revealed in their telescopes. Indications of physical change have previously been discovered, but absolute proofs that any part of the lunar landscape has suffered material alteration have not yet been obtained. Our best charts of lunar scenery contain errors, and when a new observation proves discordant with features previously mapped it is usually indicative that the chart is wrong, and not that physical alterations have occurred on the lunar disc. This question of possible real changes on the surface of the Moon is a very attractive one, and may receive settlement by renewed application on the part of a really capable selenographer.

Planets.—*Mercury.* This planet will be favourably presented for observation in the evening sky during the second and third week of February. He will reach his greatest elongation (18° 6' E.) on February 19, and at about that time will set about 1½ h. after the Sun. On the evening of February 20, at 5½ p.m., the planet will be situated some 5 degrees to the S W of the narrow crescent of the new Moon. If the sky is clear on this occasion a very excellent opportunity will be afforded of finding the planet. The times of his setting, &c., will be as follows:—

Date 1901.	Mercury sets.	Sun sets.	Interval.
	H. M.	H. M.	H. M.
February 11	6 26	5 5	1 21
" 12	6 33	5 7	1 26
" 13	6 39	5 9	1 30
" 14	6 45	5 11	1 34
" 15	6 50	5 13	1 37
" 16	6 54	5 14	1 40
" 17	6 58	5 16	1 42
" 18	7 2	5 18	1 44
" 19	7 6	5 20	1 46
" 20	7 7	5 22	1 45
" 21	7 8	5 23	1 45
" 22	7 9	5 25	1 44

At this period the planet will occupy a position in Pisces and will not be near any conspicuous stars or planets. But the proximity of the crescent Moon on February 20 should prove an interesting event. Intending observers of Mercury should look for the planet at a very low altitude above the western horizon at about 6 P.M., when they will probably detect a ruddy scintillating star setting amidst the vapours there. This will be the most convenient time during the year for catching a glimpse of Mercury, though he will be visible again in June as an evening star. At the latter period, however, the strong twilight will interfere with successful observation, though it will not entirely obliterate the planet. He will reach his greatest elongation (24° 39' E.) on the morning of June 16 and the time of his setting at about this period will be as follows: -

Date, 1901.	Mercury sets.	Sun sets.		Interval.
	H. M.	H. M.	H. M.	
June 10	10 7	8 13	1 54	
" 11	10 7	8 14	1 53	
" 12	10 7	8 14	1 53	
" 13	10 6	8 15	1 51	
" 14	10 5	8 15	1 50	
" 15	10 4	8 16	1 48	
" 16	10 2	8 16	1 46	
" 17	9 59	8 17	1 42	
" 18	9 55	8 17	1 38	

Apart from the twilight, other conditions for viewing Mercury at the above period are favourable for the planet will set nearly two hours after the sun, and the weather at midsummer is often very clear. On June 7 Mercury will approach within 1' of one of the 3rd mag. stars in Gemini and a telescope will exhibit the planet and star in close proximity. The bright stars Castor and Pollux will be situated a few degrees to the N.E. and will possibly be visible to the naked eye just above the horizon in W.N.W., but the sky must be very clear and free from obscuring vapours. As a morning star, Mercury should be looked for about an hour before sunrise during the first week of August, for he will be at his greatest elongation (10° 23' W.) on August 2, and rises about 1h. 35m. before the sun. The circumstances are not, however, altogether favourable and the best presentation of the planet in the morning sky takes place in November, when he arrives at his maximum elongation (19° 42' W.) on the morning of the 2nd. For about a week at this period he will rise about two hours before the sun and may be easily detected near the E.S.E. point of the horizon about an hour preceding sunrise. But in England November mornings are seldom clear and it is not likely that many opportunities will be afforded in this month of obtaining good views of Mercury. However, no one can foresee the vagaries of our climate, and it is quite possible that some favourable occasions may occur for making observations, as in November, 1883, when the planet was beautifully visible on several successive mornings. In November, 1901, when Mercury is presented to the best effect, he will be situated in Libra, a few degrees N.W. of the star alpha. His times of rising, &c. will be as follows: -

Date, 1901.	Mercury rises.	Sun rises.		Interval.
	H. M.	H. M.	H. M.	
Nov. 17	5 26	7 23	1 57	
" 18	5 26	7 25	1 59	
" 19	5 27	7 25	1 59	
" 20	5 23	7 28	2 0	
" 21	5 30	7 29	1 59	
" 22	5 32	7 31	1 59	
" 23	5 35	7 33	1 58	
" 24	5 38	7 31	1 57	
" 25	5 41	7 35	1 55	
" 26	5 44	7 38	1 54	

Should the observer fail to distinguish the planet with the naked eye, a field-glass should be brought into requisition, when he may soon be picked up, but care must be exercised that the object is sought for in the right direction. In our text-books on astronomy the planets are stated to shine with a steady light, in contradistinction to the fluctuating light of the fixed stars; but Mercury furnishes a notable exception to the rule, for he shines with a fitful, flashing lustre. The ancient Greeks recognised this feature and called him "The strongly sparkling one." He is to be observed with difficulty, as he is only visible for a few days near the times of his greatest elongations. Some well-known astronomers have never personally observed Mercury. Indeed, it is stated on good authority of Copernicus, one of the most famous astronomers of the 16th century, that though he had often endeavoured to obtain a view of the planet he had never succeeded in his desire. It is alleged, in explanation, that he lived at Thorn, on the river Vistula, where the fogs were so frequent as to hide objects at low altitudes. But whether this story about Copernicus is true or not it is certain that amateur "star gazers" attach a romantic interest to Mercury and his fugitive appearances. It is reckoned a feat of importance to catch a glimpse of the planet and it forms one of the first endeavours of the astronomical student. In some climates there is no difficulty in viewing Mercury several times in a year, but in England cloudy skies may hide the planet for a long period. The telescopic examination of Mercury is rendered unsatisfactory by the planet's constant proximity to the Sun but it appears that his disc exhibits irregular spots like those apparent on Mars, though they have never been fully and sufficiently studied. Hence the rotation period of Mercury is still a somewhat open question, though it is highly probable that it does not differ greatly from 25 hours. It is to be hoped that a renewed attempt will be made in 1901 to clear up some of the uncertainties regarding the physical aspect of this rapidly moving planet, and that we shall soon acquire the materials for the satisfactory determination of his rotation period. An Italian observer has concluded that the planet rotates on his axis in the same time that he occupies in revolving around the Sun, but this is a theory founded on insufficient evidence and is certainly not final. It may be useful to remind observers that this object appears in his greatest lustre a few evenings before his easterly elongations in the first half of the year, and on a few mornings after his westerly elongation in the last half of the year.

Venus.—This brilliant orb will be morning star at the opening of the year, rising at 5.48 A.M.,

or 2h. 20m. before the Sun. But she gradually draws nearer to the Sun and rises later each morning, so that at the end of January she will be practically lost to view and will remain so for a lengthened period. At the close of October, however, the planet will assume a conspicuous position and aspect in the evening sky, and during the ensuing months of November and December will be the most brilliant object visible after Sunset in the absence of the Moon. On December 5 she arrives at her greatest elongation ($47^{\circ} 15'$ E.) and sets more than 3 hours after Sunset. This interval will go on increasing until at the close of the year Venus will set 4 hours after the Sun. Her path in the heavens during the period when she will be observable will be as follows:—On January 5 she will be about 10° N.E. of Antares in Scorpio, and, travelling rapidly eastwards, will be in Sagittarius at the end of that month. In November and December she moves from the western extremity of Sagittarius through Capricornus, and at the close of the year will be found on the western borders of Aquarius and about 3 degrees N.N.E. of the star δ Capricorni. On January 3, at 9h., she will be in conjunction with Uranus and $1^{\circ} 10'$ north of that planet. This should prove an interesting spectacle if the firmament is sufficiently clear to admit of its being witnessed. On January 15 another singularly attractive event may be seen in the morning sky, for Venus will be in conjunction with Jupiter. On January 24 the former planet will be in conjunction with Saturn, but the two objects will rise only about 1h. 20m. before the Sun, so that they must be looked for near the E.S.E. horizon about an hour or less before Sunrise. On October 10 Venus will be placed only $55'$ south of Mars, and three evenings later may be seen $10'$ north of the star δ Scorpii. On October 25 the planet will approach Uranus to within $2' 21''$, the latter being situated to the north, and on the evenings of November 17 and 18 will be near Jupiter. On November 19 she will be in the same region as Saturn. Venus exhibits all the various phases of the Moon, and these form very interesting features when observed in a good telescope. In November the planet will appear gibbous or more than half illuminated, and the phase becomes less as time advances, so that in December the disc will appear under a crescented shape. On the whole Venus will not be favourably placed for observation in 1901, but at the close of the year comes into a very prominent place, and may be very successfully examined in a telescope a short time after Sunset. There are, however, no very definite markings on the surface of Venus; though faint, cloudy spots of indeterminate outline are so often glimpsed on the planet. They apparently represent slight differences in the reflective capacity of the planet's atmosphere, and it may be safely asserted that we know nothing of her actual surface markings. In recent years some remarkable drawings of Venus have been published, from which it would appear that the planet exhibited dark canals and very conspicuous streaks, but these owe their origin rather to the exercise of the imagination than to the powers of the eye or telescope. This object should be submitted to much further attentive examination, for it is certain that the dazzling brightness of the disc and the difficulty of obtaining really good views of it have brought about many erroneous opinions as to what is actually visible. The most reliable observers can see nothing where others discern a wealth of

detail, and observational astronomy will be highly benefited when the origin of the singular discrepancies is fully explained.

Mars will be splendidly visible during the first three months of the year, arriving at opposition to the Sun on the morning of February 22. At about that period he will be visible during the whole night, showing as a bright red star in Leo. On January 1 he will rise at 9h. 17m. P.M., or more than 5 hours after the Sun. On February 1 this interval will have decreased to $2\frac{1}{4}$ hours, while on March 1 he will rise $1\frac{1}{2}$ hours before the Sun. This planet will be visible in the evening sky throughout the Spring and Summer months, but with decreasing brilliancy, for after the end of February his distance from the Earth becomes greater from day to day and his diameter will show a constantly accumulating decrease. Thus, at the time of his opposition his disc will subtend an angle of $13''\cdot 8$, whereas on June 30 it will be only $6''\cdot 2$ and so small that it will be useless to prolong critical observation of the surface markings. The path of the planet among the constellations during the first 6 months of the year will be as follows:—Early in January he will be in the eastern region of Leo and will remain almost stationary until towards the close of the month. Then, moving westwards, he approaches a Leonis (Regulus), and early in March will be about 4 degrees N. of that star. Afterwards he may be found within a few degrees of the same position. He will be in conjunction with the Moon on January 9, February 5, March 4 and 31, April 27, May 25 and June 22, but his distance from that luminary will be considerable and varying between 10 degrees in February to nearly 6 degrees in June. Mars will be obviously gibbous at the beginning of the year, but apparently circular in February. Thereafter the planet will assume an increasingly gibbous phase until about the middle of June, when the illuminated portion of his disc will amount to $0\cdot 89$, or nearly 9-10ths. The opposition of Mars in February will be favourable in certain respects, but not in others. The planet will be placed in N. declination 14° and will therefore have an altitude of $52\frac{1}{2}^{\circ}$ when passing the meridian at Greenwich. In this respect observers will find a great advantage; but, on the other hand, his distance from the Earth will be considerable, and this will confine his apparent diameter to small limits and render the more minute details of his appearance invisible. But observers will not be deterred by this drawback from studying the surface phenomena of one of the most interesting planets of our system. He displays a system of markings of different type to the belted aspect of Jupiter and Saturn. In fact, Mars appears to have a far less dense atmosphere than either of the large planets named, and the dark, winding spots or "canals" which abound on his surface appear to represent the permanent lineaments of his sphere. The most conspicuous of them were visible to Hooke, Huygens and Cassini two and a half centuries ago. It is true that some of the details undergo changes, but they appear to be of temporary character and the markings now visible are the identical objects which were discovered by the earliest telescopic observers of the planet. Some observers see the "canals" of Mars double, but this is a mere idiosyncrasy of vision, and the best drawings show no such anomalies. No orb of the solar system, except perhaps Jupiter, has incited more interest with regard to his surface

configuration than Mars, and the serious discordances among the results of different observers have sometimes given rise to ardent discussions, without, however, clearing up the disputed points. During the first three months of 1901, and especially during the last half of February, the planet should be re-examined with great care and with a view to ascertain the truth in reference to the actual appearance of his more delicate and detailed markings.

Minor Planets or Planetoids. *Eros.*—This small object, discovered by Witt in August, 1898, is a most important one, as it is the only minor planet yet discovered which revolves in an orbit, the mean position of which lies between the Earth and Mars. It will materially assist in the determination of the Sun's distance with a degree of accuracy not to be attained by any other means. The perihelion passage of this planet occurs in 1901, February 7^h 8^d and made its nearest approach to the earth on December 26, 1900. The following is an ephemeris for Berlin midnight, by Millosevich of Rome:—

Date.	R. A.		N. Dec.	
1901	H. M. A.	°	'	"
January 7 ...	2 20 16	...	33	21 36
" 17 ...	2 51 16	...	31	5 34
" 27 ...	3 25 52	...	26	51 45
February 6 ...	4 2 32	...	22	51 57
" 16 ...	4 39 50	...	19	0 11

At the end of January the planet will be closely N. of the Pleiades, and will be of about the ninth magnitude. Being so faint a pretty good telescope must be employed in observing this object. If, however, the observer points an instrument of this character to the exact position of *Eros*, and a diagram is then made of the small stars in the field, the identity of the planet may be easily discovered by his motion, which ought to become apparent within an hour. This little orb is intensely interesting to astronomical observers, for though more than 450 minor planets are known this one occupies a special position in the solar system.

Ceres will be in opposition to the Sun on October 28, when his magnitude will be 7½, and therefore quite invisible to the unaided eye. On October 13 the planet will be very close to the 3rd mag. star γ Ceti, the relative places of the star and planet being as under:—

	R. A.		Dec.	
	H. M. S.	°	'	"
γ Ceti ...	2 38 13	+	2 49	10
Ceres ...	2 38 5	+	2 42	3

Ceres will be only ½ of a degree south of the star and thus will afford a splendid opportunity for picking up the planet with a small telescope. During the last three months of 1901 *Ceres* moves slowly westwards in the head of *Cetus* and may be followed from night to night with a good field-glass or any small telescope. The important point is knowing where to look for him. After he is once seen there will be no difficulty in following him afterwards. *Falax* will come to opposition on September 7 and will be visible as an eighth magnitude star in the extreme western boundary of *Pisces*. He will move more slowly south-westward until October 18, when he begins to retrace his steps in an easterly direction. At the end of September he enters *Aquarius* and will remain in the easterly region of that constellation during the remaining part of the year. *Juno* will not be very favourably visible in 1901. She is a faint object at all times, and may be seen in the evenings of January and February as a

star of about 8½ magnitude. In the months named she will move eastwards along the southern borders of *Pisces*. *Juno* will be 1¼° S. of the Moon on September 10 and ¾° S. on October 8, but these conjunctions occur before the rising of the objects named in England. Towards the end of the year *Juno* will be visible as a morning star situated in *Virgo*. On December 16 the planet will be placed 4¼° S. of the star β *Virginis* (mag. 3.7). *Vesta* will be in opposition on February 1 and visible to the naked eye when the sky is very clear as an extremely small star just on the limits of vision. She will be situated in the eastern region of *Cancer* early in February and moves westwards until the end of the third week in March. *Vesta* is much brighter than any other of the minor planets, and is, in fact, the only one of the numerous class of bodies visible to the naked eye. By ordinary observers these objects are generally disregarded, and the more brilliant planets, such as *Venus* and *Jupiter*, monopolise attention. But it is interesting to identify the fainter and smaller members of our system, and the identification of a minor planet from the stars surrounding it can be readily effected. The best method is to direct the telescope towards the point in which the object is situated, and then to make a diagram of the various stars in the field. On the next night, or on the first ensuing clear night, the diagram should be compared with the sky, and the planet sought for will be identified by its change of place relatively to the others.

Jupiter will be a morning star at the opening of the year, but he will scarcely be visible until the middle of January, when he rises at 6h. 25m. or 1h. 37m. before the sun. This interval will increase daily, and early in May the planet will rise at midnight. On June 30 he rises at about the time of sunset and will be visible all night. At this time he will be discernible at his best, being at opposition to the Sun and at his nearest point to the Earth with a polar diameter of 43" 4. But one circumstance will detract from the successful observation of the planet, and that is his low southern declination. His altitude at Greenwich will be only 15½° when he is passing the meridian, so that the definition of his surface markings is not likely to be good except when the air is exceptionally favourable. The following figures give the variation in his declination and diameter during the past five oppositions and the ensuing one in June next:—

Opposition.	Declination of Jupiter.		Apparent Polar diameter.
	°	'	"
1896, Jan. 24 ...	19	53 north	42.4
1897, Feb. 23 ...	10	45 "	41.2
1898, Mar. 25 ...	0	42 south	40.8
1899, Apl. 25 ...	11	57 "	41.2
1900, May 27 ...	20	27 "	42.0
1901, June 30 ...	23	10 "	43.4

It will be remarked from the figures that if *Jupiter's* position will be low in the sky his apparent diameter will be somewhat greater than it has been during the past few years. His expansive disc of more than 43" will enable his principal belts and spots to be discerned with distinctness even in comparatively small instruments. The varying position of the planet relatively to the stars will be as under. In January he enters the bow forming the western limits of *Sagittarius* and moves slowly eastwards during ensuing months, passing near several stars in that

constellation. On January 27 he will be 2° S. of μ Sagittarii (May 4'), on February 13 2½° N. of α Sagittarii (May 3'), on April 3 1½° S. of ϵ^2 Sagittarii (mag. 3½). It will be interesting to observe these conjunctions: they will be readily visible to the unaided eye. On April 30 the planet will be stationary, and then commences to move slowly westwards until August 30, after which he will begin to travel eastwards. He will be in conjunction with the moon on the mornings of Jan 18, Feb. 15, and on the nights of May 8, June 4, July 1, 28, Aug 24, and Sept. 21 he will also be observed near our satellite. On Nov. 18 Jupiter will approach within 2¾° of Venus, and the two planets may be observed near together in the S.W. sky soon after sunset. On this date Jupiter will set nearly three hours after the Sun, and will be situated to the north of Venus. On Nov. 28 he will be within half a degree of Saturn, and on Dec. 17 close to Mars; but the latter event happens at a time when the two bodies will be too near to the Sun to be observed. As an object for telescopic study Jupiter is the most interesting of all the planets, from the facility with which his surface markings may be distinguished and their very diversified and changeable character. The belts and spots on the disc of this planet are very distinctly visible in moderately powerful telescopes. One spot has, during the last 20 years, by its durability and definite oval outline attracted a large amount of attention, and will doubtless continue to do so for a long period in the future. It first came under general observation in July, 1831, when it was of an intensely red colour. This particular feature is now exceedingly faint, though there seems no reason to suppose that it is on the point of disappearance. It is probable that this object has been visible for a large number of years. Drawings by Schwabe between 1831 and 1856 show the hollow in the dark belt north of the spot, and subsequently to 1856 either the spot or its accompanying features has been figured by Dawes, Harendell, Huggins, Gledhill, Lord Rosse, Copeland, Russell, and others. The comparison of a great number of these observations proves that during the 68 years from 1831 to 1899 the motion of the spot has varied from about 9h 55m. 33s. to 9h 55m. 42s. During the whole period from September 5, 1831, to September 16, 1899, the planet performed 60,074 rotations, and the mean period was 9h. 55m. 36.4". The present rate of velocity is greater than this, for in 1899 and 900 the red spot gave a mean period of about 9h. 55m. 41.8s. For the guidance of those observers who may feel desirous of examining this extraordinary spot or its peculiar surroundings, we give a list of a few of the times when it may be expected to present itself on or very near the central meridian of the planet. The observer may readily compute for himself the times of transit for other nights if he requires to know them by adopting the rotation period of 9h. 55m. 42s., which is equivalent to the interval elapsing between successive transits of the same spot:—

TRANSIT TIMES OF RED SPOT ON JUPITER.

1901.	H.	M.	1901.	H.	M.
June 19	11	47	July 18	10	44
" 24	10	55	" 23	9	52
" 29	10	3	" 28	11	31
July 1	11	41	" 30	10	40
" 6	10	49	Aug. 4	9	47
" 11	9	57	" 6	11	26
" 13	11	35	" 11	10	35

It is also useful to remember that every twelve days (which include twenty-nine rotations) the spot becomes central on Jupiter at nearly the same times as before. These remarks only have a special reference to the red spot, for it is found that different features furnish different periods of rotation. Some of the markings have exhibited a proper motion so rapid that they complete a circuit of Jupiter in 7¾ minutes less time than others. These features are doubtless of an atmospheric character, and are certainly influenced by currents of different velocity operating far above the sphere of Jupiter. As to the red spot, it is desirable that it should continue to be watched and its further changes of tint and motion duly recorded. Though it cannot be a formation cohering with the actual surface of Jupiter, it must be a feature possessing elements of remarkable permanency. Notwithstanding the large amount of observation which in past years has been given to the planet, there still remain a great number of interesting facts to be gleaned respecting his atmospheric currents and the many curious light and dark spots carried along at different velocities in them.

Saturn forms another splendid object for the telescope and presents a perfectly unique picture. His luminous rings are now widely open, and may be observed with excellent effect even in a 2-inch telescope. This planet is exhibited to view under nearly similar circumstances in any two succeeding years, as there is a difference of about twelve days only in the dates of his oppositions to the sun. Thus in 1900 he reached opposition on June 23 while in 1901 he will arrive at the same aspect on July 5. Towards the close of January the planet will become conspicuously visible as a morning star, and on February 1 will rise 1h. 36m. before the Sun. This interval will increase about 3¼ minutes per day, so that on May 9 the planet rises at midnight. On July 5 he will be in opposition to the sun and rise at about sunset. Thereafter he will be a fairly conspicuous object in the evening sky until the early days of December. During the whole of 1901 the planets Jupiter and Saturn will be near each other, and will afford some opportunities to those who will find it interesting to watch their ever-varying positions. Saturn will be much the fainter of the two, and it may be useful to append a table of the relative positions of the two orbs.

March 1 ...	Saturn 6½° E. of Jupiter.
April 1 ...	" 4½° "
May 1 ...	" 3½° "
June 1 ...	" 4° "
July 1 ...	" 5½° "
Aug. 1 ...	" 7° "
Sept. 1 ...	" 7° "
Oct. 1 ...	" 5½° "
Nov. 1 ...	" 3° "

When the two planets emerge from the Sun's rays and appear as morning stars in January, 1902, Saturn will then be west of Jupiter. Their nearest approach will occur on November 28, when Saturn will be 27' N. of Jupiter. In 1901 the motion of the former planet will be confined to about 11' in Sagittarius. The following interesting conjunctions with stars in that constellation may be observed:—

Date.	Star.	Position of Saturn.
Feb. 7	ϵ^2 Sagittarii	Saturn 1° S.
March 11	π Sagittarii	" 1° "
July 21	ϵ^2 Sagittarii	" 1½° "
Nov. 5	"	" 1½° "
Dec. 5	π Sagittarii	" 1½° "

These phenomena will be easily perceived by the naked eye, as the stars are between the 3rd and 4th mag. The proximity of Jupiter will make them more attractive and form a novel spectacle, of which all observers should obtain a view. To show the variation in the declination of the planet, and also in the angle subtended by the outer minor axis of the ring and in the diameter of the globe of Saturn at the last four oppositions, and that of the coming opposition of 1901, the following figures may be quoted:—

Opposition.	Declination South.	Planet's minor axis, outer ring.	Diam. of globe.
1897 May 18	17 23	17 48	17 2
1898 May 30	19 55	18 66	17 0
1899 June 11	21 37	19 12	17 0
1900 June 23	22 27	18 89	17 0
1901 July 5	22 20	17 95	17 0

Like Jupiter, Saturn will be very low in the heavens and not at all well placed for telescopic study by observers in the Northern Hemisphere. He will be in conjunction with the Moon at following times:—

Jan. 19	4 A.M.	June 5	5 A.M.
Feb. 15	7 P.M.	July 2	7 A.M.
Mar. 15	9 A.M.	" 29	noon
April 11	7 P.M.	Aug. 25	6 P.M.
May 9	1 A.M.	Sep. 23	2 A.M.

The distances of the two bodies will vary between 23 and 4 degrees. Saturn undoubtedly forms a more picturesque object for study than Jupiter, but there is a sameness in the image of the former which is apt to induce monotony. If there are irregular markings, such as breaks in the belts and dark and bright spots similar to those shown by Jupiter, they are beyond the powers of our most powerful instruments and of our most reliable observers. Yet many confident statements have been made as to the existence of a vast amount of detail on the disc of Saturn by certain observers using small telescopes. All such descriptions may be put aside as illusory and entirely lacking satisfactory corroboration. This planet has eight satellites, but all of them cannot be seen, except in telescopes of the very largest kind. The brightest satellite, appropriately designated Titan, is visible in any small glass, and Iapetus is sometimes to be glimpsed with very small instruments, but Mimas and Hyperion require far greater power. Instances are recorded where these fainter satellites have been detected with telescopes apparently quite inadequate for the purpose; but such cases may be generally dismissed as indicating errors of the imagination. All observers of the phenomena of Jupiter and Saturn and of their satellites will find the ephemerides published annually in the *Monthly Notices* of the Royal Astronomical Society of the greatest utility to them in their studies. Saturn will approach to within one-third of a degree from Venus on January 24 and may be observed to advantage near that brilliant planet on the mornings of January 24 and 25.

Uranus will be in opposition to the Sun on the morning of June 6, and will be favourably visible during the summer months. This planet is, however, but faintly perceptible to the naked eye as a 5½ magnitude star, and seldom comes under the notice of anyone but a regular astronomical observer. The vast distance of Uranus causes him to move very slowly, so that his apparent position from one year's end to another varies very slightly. In 1901 his change of place

amounts to about 6', in the eastern region of Scorpio. On Oct. 25 he will be 2° 21' N. of the brilliant planet Venus. In a telescope the planet may be easily identified from the surrounding stars by his disc, but if the telescope is a small one the planet may be more certainly recognised by his motion. His position should be found from an ephemeris and then the telescope turned upon it and a diagram of the stars made. Comparisons on subsequent nights will enable the planet to be singled out by his change of place relatively to the other objects in the immediate neighbourhood. The most suitable time for observations of this character will be in July and August, in June the strong twilight will interfere with satisfactory views of a faint planet like this. His four small satellites do not come within the reach of ordinary telescopes, but the two outermost, Titania and Oberon have occasionally been glimpsed with moderate appliances. The planet shines with a pale blue light and shows a belted aspect, but irregularities have not been discerned to give an idea of the rotation period, which is probably a short one.

Neptune, the outermost planet of the solar system, will arrive at opposition to the sun on the afternoon of Dec. 22. The most suitable time for effecting observations of this minute orb will be during the first and last quarters of the year; but a pretty good telescope must be employed, as he is quite invisible to the naked eye. His apparent lustre is not greater than that of a star of the 8th mag. The planet will be situated in the extreme western region of Gemini during the year, and will be less than a degree distant from the variable star γ Geminorum in September and October. This star will afford an excellent guide to those who may desire to pick up the planet. Below are the relative positions of Neptune and the star on seven nights:—

Date.	Neptune.		γ Geminorum (mag. 3-4)	
	H.	M. S.	Dec.	R.A. Dec.
Sept. 26	6	6 21	+ 22	16
" 30	6	6 25	+ 23	16
Oct. 4	6	6 27	+ 23	16
" 8	6	6 27	+ 23	16
" 12	6	6 23	+ 23	16
" 16	6	6 18	+ 22	16

H. M. S. 6 8 58 + 22 32

Neptune will therefore be about ½° West and ¼° S. of the star. At this period, however, he will rise rather late and will be best observed in the morning hours.

Periodical comets.—These objects form an interesting class, and our knowledge of them has increased rapidly in recent times. There is not a single year that passes but what is marked by the return of a periodical comet. The diligence of modern observers has enriched this branch with some important discoveries, but it appears that though new comets of short duration are being introduced by means of planetary perturbations (for which Jupiter is mainly responsible), there are others which encounter vicissitudes sufficiently forcible to endanger, if not to terminate, their visible existence. Biela's double comet appears to have been dissipated into a stream of shooting stars, and it is very probable that Brorsen's comet has disappeared, as it has not been redetected at its last few returns. The materials of which these presumably lost comets were formed probably still exists, though in a more scattered condition than formerly, and continue to obey the laws of gravitation; but under true cometary aspects they will never be recognisable again. The

following is a table of the approximate dates of return of the chief periodical comets:—

Returns to Perihelion.	Period in Years.	Name of Comet.
1901. Aug. ...	7'477	Denning (1894).
Sept. ...	3'303	Encke.
1902. Jan.	5'595	Brooks (1886).
Nov. ...	7'220	Swift (1851).
Dec.	5'534	Tempel—Swift.
1903. Apl.—May	6.441	Perrine (1896).
July.....	6'381	Spitaler (1890).
Oct.....	7'566	Faye.
Dec.....	7'073	Brooks (1889).
1904. Jan.....	5'818	Pons—Ninnecke.
Feb.....	6'691	D'Arrest.
Sept. ..	3'303	Encke.
Oct....	5'211	Tempel (1873).

A few of these must be regarded as rather uncertain, as they have only been observed at a single apparition. In two or three cases the circumstances will be unfavourable (as in that of the return of Denning's comet in August, 1901), and the objects will probably escape observation. The majority of those included in the list will, doubtless, return at the computed times, and be suitably observed. It forms a most entertaining branch of astronomical work to trace a small comet threading its way amongst the neighbouring stars from night to night. Large comets appear promiscuously and with more or less suddenness, and in the present state of our knowledge it is impossible to definitely predict the times of their apparitions. The only intimation of their approach is that given by diligent observers who regularly sweep the firmament in quest of such objects, and are sometimes fortunate enough to sight them before they have visibly developed the conspicuous features which belong to comets of the largest class.

Meteorite Showers visible during the year.—*Meteors*, shooting stars, or falling stars, as they are variously called, are visible on every clear night of the year, and at certain epochs are presented in such numbers as to form abundant and imposing showers. The year 1901, on November 15 before sunrise, will probably offer a special phenomenon of this kind, for a brilliant exhibition of meteors, witnessed in 1799, 1833, and 1866, is due to return on the date mentioned. They are termed *Leonids*, as their flights are uniformly directed from a common centre amongst the stars forming the "sickle of Leo." The "shower" should not be looked for in the evening, as the point from which the meteors emanate does not rise above the horizon until 10.15 P.M., and the most favourable time at which to watch for the display will be after midnight on the night following November 14, or morning hours of November 15. It will also be advisable to watch for the display on the mornings of Nov. 14 and 16, as there is a little uncertainty as to the exact time of its recurrence. The Moon will unfortunately be about half full, and exercise a detrimental influence upon the phenomenon. In regard to unusually large meteors or fireballs, which occasionally appear with brilliant and startling effects, and are often isolated, their paths amongst the stars should always be recorded with as much accuracy as circumstances permit. When this feature has been carefully noted at two or more stations, it affords the data for computing the heights, distances, and radiant point. Fireballs often approach much nearer to the earth than the ordinary shooting stars, which usually descend from a height of

eighty to fifty miles. The majority of the known meteoric systems are probably annual in their recurrences, but others are periodical, and are only displayed in their richest intensity after long intervals of time. The following is a list of the principal meteoric showers:—

No.	Epoch.	Radiant Point. R. A. Dec.	Name of Shower.
1	Jan. 2—3	230 + 52	Quadrantids.
2	Jan. 14—20	295 + 53	γ Cygnids.
3	Jan. 18—28	233 + 31	α Coronids.
4	Feb. 5—16	74 + 43	1 Aurigids.
5	Feb. 15—20	236 + 11	2 Serpentids.
6	March 1—4	166 + 5	γ Leonids.
7	March 11—28	308 + 78	α Cepheids.
8	March 24	161 + 58	3 Ursids.
9	April 17—25	231 + 17	β Serpentids.
10	April 17—23	270 + 32	Lyrids.
11	April 29—May 6	337 —	γ Aquarids.
12	May 5—June 17	251—21	α Scorpids.
13	May 7—18	231 + 17	α Coronids.
14	May 29—June 4	333 + 27	γ Pegasids.
15	June 10—28	335 + 57	β Cepheids.
16	June 13—July 7	302 + 24	Vulpeculids
17	July 11—19	314 + 48	α Cygnids.
18	July 15—28	302 + 12	α Capricornids.
19	July 15—30	24 + 43	γ Andromedids.
20	July 23—Aug. 4	47 + 43	α—β Perseids.
21	July 27—29	339—12	δ Aquarids.
22	August 9—11	45 + 57	Perseids.
23	August 5—16	292 + 53	κ Cygnids.
24	August 21—25	291 + 60	δ Draconids.
25	Aug. 21—Sep. 21	62 + 37	ε Perseids.
26	Aug. 25—Sep. 22	5 + 10	γ Pegasids.
27	Sept. 7—24	64 + 22	ε Taurids.
28	Sept. 21—22	74 + 41	α Aurigids.
29	Sept. 27	73 + 15	α Taurids.
30	October 11—24	40 + 20	ε Arietids.
31	October 17—20	92 + 15	Orionids.
32	October	106 + 23	δ Geminids.
33	Nov. 2—3	55 + 9	ε Taurids.
34	Nov. 10—23	133 + 31	ν Cancerids.
35	Nov. 13—15	150 + 23	Leonids.
36	Nov. 13—28	155 + 40	Leo Minorids.
37	Nov. 20—28	63 + 22	Taurids.
38	Nov. 23—24	25 + 43	Andromedids.
39	Dec. 1—14	108 + 33	Geminids.
40	Dec. 7—10	119 + 29	α Geminids.
41	Dec. 22—29	194 + 32	Canis Veneticids.

The Perseids, No. 22 in the foregoing list, display some singular characteristics, for they are probably visible for more than a month, during which period their radiant point is in constant motion to the eastward. The place of the radiant on alternate days during about four weeks of the chief activity of the shower is as follows:—

DATES AND RADIANTS OF PERSEIDS.

Date.	Radiant R. A. Dec.	Date.	Radiant R. A. Dec.
July 19	19°7 + 50°9	Aug. 4	37°9 + 55°3
" 21	21°8 + 51°6	" 6	40°2 + 56°0
" 23	24°0 + 52°2	" 8	42°6 + 56°5
" 25	26°2 + 52°8	" 10	45°0 + 57°0
" 27	28°5 + 53°3	" 12	47°5 + 57°5
" 29	30°8 + 53°8	" 14	50°1 + 58°0
" 31	33°2 + 54°4	" 16	52°6 + 58°5
Aug. 2	35°5 + 55°0	" 18	55°2 + 58°9

TELESCOPIC POWERS NECESSARY FOR OBSERVING CELESTIAL OBJECTS.

COMETS, and large nebulae, such as those in Orion and Andromeda, require very low powers and an extensive field of view, so that the objects may be presented in their entirety, and their light sufficiently concentrated to display the fainter portions. If it is desired to critically examine the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers 60 and 100, reveals the spots in great variety of form and grouping. The craters, mountains, and plains of the Moon are satisfactorily seen with about 75 and 100, though for very minute features powers of 300 and 400 are necessary on a 12-in. glass. Solar and lunar eclipses are best visible under powers of 50 and 75.

The phases of Mercury may be discerned with 75; those of Venus are plain with far less power. To see these planets well, observe them near the times of sunrise or sunset.

The chief spots on Mars, such as the Kaiser Sea, may be distinguished with 90 on a 2-in. refractor, but powers of 300 and 350, and an 8-in. refractor or 10-in. reflector, are desirable to exhibit the outlines of the fainter markings, many of which are delicate, intersecting lines known as "canals."

Jupiter's belts are visible in a 1½-in. telescope, power 40, but for studying their variable appearances and the different motions of the bright and dark spots 250 and 300 are requisite. The four bright satellites are visible in an opera-glass. Transits of satellites III. and IV. may be observed with a 3-in. refractor and power of 150.

The division in Saturn's ring and his principal dark belt are to be readily glimpsed with a 2½-in. glass, power 120. But magnifiers of 300 and 350, and a much larger aperture, are essential to reach the delicate features of the planet. A good 4½-in. refractor will occasionally show Encke's division in the ring, also the interior crape ring and five of the satellites, but the night must be good. Titan, the largest of the Saturnian moons, is visible in any small telescope; and Iapetus is also an easy object, though sometimes unduly faint; but Tethys, Rhea, and Dione are much more difficult, requiring care and attention.

Occultations of stars by the Moon may be well observed with a 3-in. glass, power 75, unless in the case of very small stars, which will be quite overpowered if a much larger telescope is not employed.

For double stars the magnifiers required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as a Lyrae, then a moderate power, such as 100, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars, a comet eyepiece, power 30 and field of 1½", will be best.

It should always be remembered that on nights of good seeing, when the air is tranquil and planetary features very sharply defined, tele-

scopes will bear much higher powers than on less favourable occasions when the images are more or less blurred and unsatisfactory. The most advantageous power to be employed depends also upon the aperture of the telescope and the nature of the object to be examined. The observer by careful trial should ascertain what power is most suitable under the circumstances and employ it. There is no advantage gained by using very high powers when low ones will suffice.

TABLE OF MEAN REFRACTIONS.

Apparent Altitude.	Mean Refraction.	Apparent Altitude.	Mean Refraction.
0 0	34 55	15 0	3 32
0 10	32 49	16 0	3 19
0 20	30 52	17 0	3 7
0 30	29 4	18 0	2 56

13 0	4 5	80 0	0 10
14 0	3 47	85 0	0 5
15 0	3 32	90 0	0

This Table of Mean Refractions is derived from that by the late Professor Bessel. With the argument 'apparent altitude' it gives the correction to be applied to observed altitudes in order to free them from the effect of atmospheric refraction. As refraction causes all bodies to appear more elevated above the horizon than they really are, the quantities in the table must be subtracted from the observed altitudes.

For an altitude not in the Table, the value of the mean refraction may easily be obtained by interpolation. For example, let the mean refraction be required for 6° 35'; here opposite to 6° 30' we have 7' 50", and opposite to the next argument, 7° 0', 7' 20" for the mean refraction, and we see that for an increase of 30' in the altitude, the refraction has decreased 30'; therefore a simple proportion shows us that we must decrease the value corresponding to 6° 30' by 5", which will give 7' 45" as the mean refraction corresponding to 6° 35' of apparent altitude.

COMMANDERS-IN-CHIEF, 1690-1900.

Duke of Marlborough	1690-1691
Duke of Schomberg, K.G.	1691-1711
Duke of Ormond	1711-1715
Earl of Stair, K.T.	1744-1745
F.-M. George Wade	1745-1748
F.-M. Lord Ligonier	1747-1766
Marquess of Granby	1766-1799
Lord Amherst	1778-82 and 1793-95
F.-M. Hon. H. S. Conway	1782-1793
Duke of York	1795-1809 and 1811-17
Sir David Dundas, Bt.	1809-1811
Duke of Wellington, K.G.	1827-8 and 1842-52
Viscount Hill, G.C.B.	1828-1842
Viscount Hardinge	1852-1856
Duke of Cambridge, K.G.	1855-1895
F.-M. Lord Wolseley	1895-1900
F.-M. Lord Roberts, F.R.S.	1900

"Dulce et decorum est pro patria mori."

* * * Very great care has been exercised in the compilation of this list, and the most responsible authorities personally consulted before publication. The list, however, which contains all ascertainable names of Commissioned Officers of the Navy and Army, and of members of the Army Nursing Service, is not quite equal in point of numbers to the latest numerical return. If any names are omitted the Editor herein expresses his sincere regret.

- Acton, Ball-, 2nd Lieut Vere Annesley, *Oxf. L. I.* (Paardeberg), 17 Feb., aged 20.
- Adam-, Lt. William Frederick, *Imp. Light Horse* (Ladysmith), 6 Jan.
- Airie, Lt.-Col. Earl of, *Comdg. 12th Lrs.* (near Pretoria), 11 June, aged 44.
- Alderson, Capt. James Beaumont Standly, 1st *R. I. C.* (Bethlehem), 7 July, aged 31.
- Aldworth, Lt.-Col. William, *D.S.O., D. of Corn.* Lt. I. (Paardeberg), 18 Feb., aged 44.
- Al., Lt. W. B. L., *C. I. V.* (Diamond Hill), 11 June.
- Amedroz, 2nd Lieut. William Henry, *S. Wales Borneo* (Boshof), 25 May, aged 18.
- Andrew, Lt. W. Harry, *Imperial Yeomanry* (Rhodesia), 9 July.
- Angell, Lt. John Charles *Welsh R.* (Paardeberg), 18 Feb., aged 25.
- Anat, Lt. J. W., *Queensland M. I.* (Elands River), 4 Aug.
- Arbuthnot, Capt. Reginald Ramsay, *R. Ir. Regt.* (Mafeking), 3 Sept., aged 31.
- Arkwright, Lt. Col. Cyril, *5th Lrs.* (Ladysmith), 9 Mar., aged 25.
- Arnold, Captain H. M., *R. Canadian Regt.* (Paardeberg), — Feb.
- Attfield, Lieut. Harry Kerr, *Derby R.* (Ventersburg Road), 14 Oct., aged 24.
- Awdry, Lieut. Vere Henry Ambrose, *Lanc. Fus.* (Spion Kop, Natal), 24 Jan., aged 24.
- Bacon, Capt. Arthur Henry, *R. Dub. Fus.* (Colenso), 15 Dec., 1899, aged 37.
- Baillie, Capt. Wm. Lyon Dennistoun, *R. Scots Fus.* (nr. Fredericksstad), 25 Oct., aged 38.
- Barclay, 2nd Lieut. Charles Roger, *North'd. Fus.* (Rodesburg), 4 April, aged 22.
- Barker, Lieut. F. O., *5th Lanc. Fus.* (Ladysmith), 2 Feb.
- Barnett, Lt. Richard Charles, *K.R.R.C.* (Glencoe), 10 Oct., 1899, aged 24.
- Barrow, Lieut. Stephen Douglas, *R.E.* (Modder River), 8 Mar., aged 23.
- Barttelot, Capt. (Hon. Major) Sir Walter George, *Bat., R. Suss. R. Vols.* (Retief's Nek), 23 July, aged 45.
- Basche, Lieut. C. O., *N. S. W. Mtd. Inf.* (Bloemfontein), 16 Apr.
- Belcher, 2nd Lt. William Greaves, *R.F.A.* (Pleisirfontein), 7 July, aged 21.
- Bell, Lieut. Reginald William *R.E.* (De Aar Hospital), 11 Feb., aged 25.
- Bennet, Capt. Arthur Buckley, *R. Warw. B.* (Bloemfontein), 21 Apr., aged 33.
- Beason, Capt. Richard Arthur Starling, *Coldst. Gds.* (Wynberg Hospital), 19 Feb., aged 30.
- Berney, Capt. Thomas Hugh, *W. York R.* (Colenso), 18 Feb., aged 33.
- Berry, Lieut. W. J., *New Zealand M. I.* (in hospital, Johannesburg), 10 June.
- Berthon, Lt. Col. Herbert Cecil Willoughby, 2nd *Buck Watch* (Wynberg, from wounds at Magerfontein), 15 Dec. 1899, aged 34.
- Biddulph, Capt. Charles Thomas, 3rd *Leins. R.* (Queenstown), 26 April.
- Birch, Capt. Charles Grant Francis Grey, *Lanc. S. R.* (Spion Kop, Natal), 24 Jan., aged 32.
- Bird, Lieut. Hubert Bertram Drought, *R.F.A.* (Wynberg) 28 July, aged 21.
- Blackburn, Capt. Leslie Dewing, 2nd *Sec. Rif.* (Crocodile Poort), 22 Oct., 1899, aged 24.
- Blair, Capt. Hugh Maxwell, *Seaf. Highrs.* (Koo-donsberg), 7 Feb., aged 27.
- Blanchard, Lieut. M. G. B., *Can. R. of Inf.*
- Blount, Maj. Charles Hubert, *R.F.A.* (Wynberg), 23 Feb., aged 45.
- Blundell, Blundell-Hollinshead, Lt. Wilfred Astley, 3rd *Gen. Gds.* (Belmont), 23 Nov., 1899, aged 28.
- Booth, Maj. Arthur W. C., *North'd. Fus.* (Bloemfontein), 31 Mar., aged 33.
- Booth, Gore-2nd Lieut. Douglas Bloomfield, *Imset R.*, 19 Jan., aged 24.
- Borden, Lieut. H. L., *Canadian Mtd. Inf.* (Reit Vlei), 16 July.
- Bowen, Maj. Robert Scarlett, *K.R.R.C.* (Ladysmith), 5 Jan., aged 37.
- Boyd, Nursing Sister M. E., *Edinbro' Hospital*, Naauwpoort, 15 May.
- Boyle, Capt. Cecil W., *Imperial Yeomanry* (Boshof), 5 Apr.
- Braba t, Lieut. Arthur Edward, *Imp. L. Horse* (Ladysmith), 5 Nov. 1899.
- Bradbourn, Lieut. Henry H., *New Zealand M. I.* (from wounds, Crocodile Drift), 20 Aug.
- Bradbury, Lieut. Lewis Balfour, *4th. High s.* (Mlandslaagte), 21 Oct., 1899, aged 22.
- Bradshaw, Capt. Wm. Edmond John, *Vk. & Lanc. R.* (Zantspan Drift), 13 Dec., 1899, aged 31.
- Brancher, Lieut. G. L. D., 1st *S. Staff. R.* (Ficksburg), 25 June, aged 23.
- Brassey, 2nd Lieut. Pery Frederick, *9th Lancers* (Relief of Kitaberley), 16 Feb., aged 23.
- Bree, Lieut. R. S. R. S., *Victoria Mtd. Inf.* (Bloemfontein), 26 May.
- Brewster, French-2nd Lieut. Henry Gerald, *K.R.R.C.* (Spion Kop, Natal), 24 Jan., aged 21.
- Bright, Lieut. Ashley Rowland, *Oxf. L. I.* (Paardeberg), 17 Feb., aged 27.
- Brine, Lt. Robert Walter Maxwell, *North'd. Fus.* (Belmont), 23 Nov., 1899, aged 24.
- Broadley, Capt. Thomas Stephen Charles William, *R. Scots* (terkstroem), 18 Feb., aged 32.
- Bronic, Capt. Alastair Wm. Mathew, *Seaf. Highrs.* (Magersfontein), 11 Dec., 1899, aged 28.
- Brooks, Lt. S. F., *E. Surrey Vols.* (Natal) 9 June.
- Brown, Capt. Arthur W., *Suff. R.* (Colesberg), 7 Jan., aged 32.
- Brown, Lieut. A. Wilde, *Natal Carabiniers* (Pietermaritzburg), 28 May.
- Brown Russell, Lt. Col. Frank, *R. Muns. Fus.* (Reedsburg), 4 Apr., aged 27.
- Browne, Maj. Henry Montague, 1st *E. Lanc. R.* (Bloemfontein Hospital), 23 May, aged 42.
- Browne, Lieut. James Cavendish, *Imperial Yec.* (Vred.), 23rd October.
- Bruce, Cumming-, Capt. Hon. Jas. Fredk. Howell Thurlow, 2nd *Buck Watch* (Magersfontein), 11 Dec., 1899, aged 32.
- Buchan, Fordyce-, Capt. George Charles, *R.F.A.* (Bloemfontein Hospital), 21 May, aged 22.
- Buchanan, Lieut. Daniel, *Kitchener's Horse*, 18 Feb.

- Bunbtry, McClintock-2nd Lieut. Hon. William, 2nd Dns. (Relief of Kimberley), 17 Feb., aged 21.
- Burch, Lieut. G. E., *Canaanian Mtd. Inf.* (Reit Vies), 16 July.
- Burton, 2d Lt. Arthur Collingwood, *Coldst. Gds.* (Belmont), 25 Nov., 89, aged 21.
- Byrne, Lieut. A., 3rd Bdy. *Mil.*, 11 June.
- Caldclough, Sister J., *A.N.S.* (Maritzburg), 11 Oct.
- Calvert, 2nd Lt. Noel Leonard, 6th *D.V.* (Carnaburg), near Heidelberg, 19 Oct., aged 22.
- Cameron, Lieut. Patrick, *Kitchener's Horse*, 6 May.
- Cambell, Lieut. Ernest W., *Rif. Brig.* (Bergendal), 29 Aug., aged 26.
- Campbell, Lieut. Ian Alastair, 2nd *Gord. Highrs.* (Elandslaagte), 23 Oct., 1899, aged 23.
- Campbell, 2d Lt. Jas. Ronald McOrian, *Gord. Highrs.* (Magersfontein), 11 Dec., 1899, aged 19.
- Carbutt, Lieut. Edward, *R.H.A.* (Relief of Kimberley), 15 Feb., age 28.
- Carey, Lieut. Seymour J., *Suff. R.* (Rensburg), 6th Jan., aged 25.
- Carstens, L. u. J. F., *Kitchener's Horse*, 18 Feb.
- Casson, Cap. Ferdinand George, *Northumberland Fus.* (Reddersburg), 3 Apr., aged 35.
- Cathcart, Lieut. Hon. Reginald, *K.R.R.C.* (Relief of Ladysmith), 2d Feb., aged 29.
- Cavendish, Lt. Hon. Charles William Hugh, 17th *Lrs.* (near Pretoria), 11 June, aged 22.
- Chalmers, Capt. T. W., *Canadian Mtd. Rifles* (near Beaufort), 11 Nov.
- Chamier, Lieut. Edward Harold St. Leger, *R.F.A.* (Bloemfontein), 7 May, aged 23.
- Chandler, Lieut. Leonard Heath, *Brabant's Horse*, (Birds River), 16 Feb.
- Chapman, Lieut. W., *Natal Mtd. Rifles* (Farquhar's Farm), 30 Oct.
- Charley, Maj. John Fras. Wm., 1st *R. Innis. Fus.* (Colenso), 15 Dec. 1899, aged 42.
- Chase, Quartermaster (Hon. Lieut.) J., *Scots Gds.* (Madder River), 3 Feb., aged 41.
- Childe, Major Charles B., *S. Afr. Light Horse* (Natal), 20 Jan., aged 46.
- Chisholme, Col. John Jas. Scott, *H.-P.*, *Comdt. Natal Light Horse* (Elandslaagte), 21 Oct., 1899, aged 48.
- Chown, Nursing Sister, *Army Nursing Reserve*, 23 March.
- Church, Capt. B. E., *Res. of Off.*, late 7th *Dn. Gds.* (Pretoria Hospital), 19 July.
- Clapham, Lieut. William, *Natal Mtd. Regt.*, 30 Oct. 1899.
- Clark, Capt. James Rutherford, *Scotforth Highrs.* (Magersfontein), 11 Dec., 1899, aged 37.
- Clarke, Capt. W. S., *Imp. Yeomanry* (Brandwater Brand), 26 Aug.
- Coddington, 2d Lieut. Astur Bertrand, *Essex R.* (Aasvogel Kop), 10 Mar., aged 22.
- Coë, Lieut. Robert H. C., *R. Lanc. R.* (Pieters, Natal), 22 Feb., aged 23.
- Cole, Capt. H. C. L., *Camps R.* (S. Africa), 6 Mar., aged 37.
- Collins, C. W., *Natal P. Lic.*, 21 May.
- Coningham, Lieut.-Col. Charles, *Worc. R.* (Worcester Kopje, Slingersfontein), 12 Feb., aged 48.
- Connor, Capt. Fieda, Henry Burns, *R. Ir. Fus.* (Glencoe), 20 Oct., 1899, aged 37.
- Conolly, Lieut. Thomas, 2nd *Dns.* (Uitval's Nek), 11 July, aged 29.
- Coode, Lt.-Col. John Hy. Collier, 2nd *Black Watch* (Magersfontein), 11 Dec., 1899, aged 43.
- Cooper, Maj. Francis Edward, *R.F.A.* (Mooi River), 26 May, aged 44.
- Cotton, Lieut. Francis G. S., *R.E.* (Pienaars River Camp), 6 Oct., aged 22.
- Cotton, Stapleton, Lieut. Wellington Robert Paul, 19th *Cns.* (Ladysmith), 29 Jan., aged 27.
- Courtenay, Lt. George Edward, *A. G. and Sukh'd. Highrs.* (Paardeberg), 16 Feb., aged 25.
- Cowan, Capt. Jas. Wm Albon, 11th *High. L.I.* (Magersfontein), 11 Dec., 1899, aged 39.
- Cowie, 2nd Lieut. William Russell, *Scots Highrs.* (Magersfontein), 11 Dec., 1899, aged 21.
- Cox, Lieut. Ernest, *Scots Highrs.* (Magersfontein), 11 Dec., 1899, aged 31.
- Craig, Gibson, 2nd Lieut. R. J., 3rd *R. Sc's* (Naaupoort), 23 April.
- Crallan, Capt., *Brabant's Horse* (Birds River), 16 Feb.
- Crawford, V.-Maj. Frank F., *A. V. D.* (Pietermaritzburg), 16 Jan., aged 48.
- Creagh, Brasier, Captain George Percy, *I. S. C.* (Elandslaagte), 27 April, aged 35.
- Creagh, Surgeon-Major, James, 9th *K. R. R. C.* (Roosstad), 6 July.
- Crealock, Capt. Stradling L. Y., *Som. L.I.* (Tugela), 21 Feb., aged 39.
- Crew, Capt. F., *Roadesia Regt.*, died whilst prisoner.
- Crowle, Lt. U. P., *Robert's Horse* (Bloemfontein), 31 March.
- Cuming, 2nd Lieut. H. W., 1st *Devon Regt.* (killed at Kruger's Post), 11 Oct., aged 23.
- Cummings, Lieut. Basil Eric, *R. G. A.* (Dealfontein), 9 May, aged 20.
- McCuningham, Lieut.-Col. William Henry, 10th *Highs* (Ladysmith), 8 Jan., aged 48.
- Currie, Capt. William Michael, *Imperial Light Horse* (Rietfontein), 7 July.
- Curtis, Capt. Arthur William, *R.F.A.* (Ladysmith), 9 Mar., aged 30.
- Dalbaic, Maj. Henry Shelley, *Imperial Yeomanry* (Senekal), 24 May, aged 49.

Space will not permit, interesting though it would be to do so, of giving even the shortest digest of this campaign which would be in any way satisfying; but certain portions of the Imperial Army which won the campaign took part then for the first time in a great war side by side with British Regulars, while new, improved, and powerful weapons—both rifles and artillery—were employed by our troops and by those of the enemy, which seriously affected the war itself and the tactics employed in it: it is these factors only in the campaign which are briefly treated of.

THE MILITARY FORCES OF OUR COLONIES.

Although the Colonies, wholly or partly under direct Crown government, have forces of their own, and in some cases sent small contingents of white men (as did our great dependency of India) to the war, we will only refer to the military forces of the three great groups of self-governing Colonies—South Africa, the Dominion of Canada, and Australasia (*i.e.* the Australian Colonies, soon to form one commonwealth, and New Zealand). These great regions of the parent stock have for a long period possessed military forces on an organised basis, supported out of their own revenues.

The conditions prevailing as to these forces in South Africa itself differed, however, very much from those of Canada and Australasia. Cape Colony was originally occupied by Dutch emigrants, with a large subsequent addition of Huguenot refugees from France, all since classed under the generic name of "Boer"; and although Great Britain purchased the colony from Holland in the early part of this century (for six million pounds), the greater portion of its white population is not of British extraction, and even yet speaks a corrupt dialect of Dutch, termed the "Tael." Natal is much more British, though in parts, especially towards the north, there are a large number of farmers, and even whole districts, of Dutch descent. To the north of these two Colonies lay the semi-independent states, the Orange Free State and the Transvaal, the first settlers in which were entirely Boer from the older provinces, but into which of late years, especially into the latter, a very large British immigration has taken place. To the west of these States was British Bechuanaland, with its adjoining protectorate, and to the north of them again, the new colony of Rhodesia (British). Enclosed between Cape Colony, what is now the Orange River Colony, and Natal is the native state of Basutoland, under British protection. The forces of British Bechuanaland and Rhodesia consisted of a limited number of Mounted Police and Volunteers, who did very good service in regard to Mafeking and in protecting the British border north of the Transvaal.

With respect to Cape Colony and Natal, from both of which we drew such splendid loyalist contingents to aid us in the war, it should be noted that in most parts of the former the majority of the settlers on the land itself (Burghers) are of Boer extraction, and connected not only by descent, but often by blood relationship, with the Boers of the Orange River and Transvaal Colonies. In the towns, particularly in the larger ones, the majority are often of British origin. In Natal, a much greater proportion of the farmers (except perhaps in the north) are of British blood. In both Colonies, however, the

coloured population, principally black, far outnumber the white; the employment of any but white troops by either side in the war would in consequence have been considered an outrage, even by the loyalists of South Africa.

Cape Colony possesses permanent forces in the way of the Mounted Rifles, a fine corps about 1,000 strong, and Mounted Police, nearly 2,000: these were originally intended as a protection against native tribes, or risings, and for preserving order in the more outlying portions of the Colony. The old burgher law was in force (as in the Boer states), under which each burgher was expected to turn out mounted, armed, and equipped, when called upon, rolls of the burghers being kept, officers termed field cornets, etc., were elected by the men, and a certain crude organisation maintained; there was hardly, however, a semblance of military training or discipline, but the burghers were, as a rule, excellent horsemen, good shots, hardy and bold. As already mentioned, a large number of the members of this force were allied by descent and blood with the Boers beyond our borders, and though perfectly satisfied with the freedom they enjoyed under our rule, they had for many years been tampered with by the propagandists of a Boer predominance over the whole of South Africa. Rifle-shooting was much encouraged amongst the burghers, who took a great interest in it, and continually held country meetings where prizes were shot for, and so on. There were also Volunteer Corps very similar to our own, numbering about 1,400 mounted men, some Artillery, with a battery of mountain guns; and about 5,000 Infantry—all told, some 7,000 men. The members of this force were recruited mainly in the towns and their neighbourhood, or amongst well-affected farmers; they were to a great extent of British descent, and, as a whole, loyal to the backbone. The "Bond" party (which conducted the Boer propaganda before mentioned) had captured political power in the Colony for many years, and had, it is understood, discouraged as much as possible any expenditure for the arms, ammunition, equipment, or training of the Volunteers, while doing as much as they could for the Burgher force. Even when it seemed certain that war must take place, the Bond Ministry, though strongly urged to do so, took no steps towards mobilising the Volunteers; when war had, however, actually been declared by the Boer oligarchy, about 5,000 Volunteers and members of Mounted Rifle Clubs were reluctantly mobilised by the Government; but they were not employed in the front, as they were most anxious to be, the Ministry objecting to their active employment against the enemy until the latter forced their hand by their impudent invasion and annexation of portions of the Colony. Our military authorities on the spot and at home seemed also at first to be hardly aware of the magnificent material which lay ready to their hand; but when Lord Roberts arrived on the scene on the 10th of January, vigorous steps were at once set on foot by him to utilise the Cape Volunteers to the full, to increase their numbers and to improve their organisation. Many new corps of mounted men were raised, the names of which (as, *e.g.*, Brabant's and Roberts' Horse) are now so well known to the public, a Colonial division, under the Colonial veteran General Brabant, was formed, and England became aware of the strength of her loyal

subjects in Cape Colony itself. Later on, four regiments of South African Light Horse were raised in this Colony and Natal (to a great extent from the Uitlander refugees driven from the Transvaal): how nobly they have distinguished themselves in the war we all well know. In March 1900, at least 15,000 men raised in the Colony (almost all mounted) were fighting for our cause. After that date their numbers were increased so that before the war came to an end the number must have been more nearly 20,000.

In Natal the conditions were very different from those existing at the Cape, the Government there, like the Colony as a whole, was proof against the Boer propaganda and thoroughly loyal to the Empire. Its forces consisted of a permanent body of 550 Mounted Police (there were also 85 coloured Mounted Police, but it is believed that they did not take an active part in the fighting), and of a species of Militia force, "partially-paid Volunteers," numbering about 1,500 of all arms, the larger proportion being mounted. There also existed many rifle clubs, affording good material, who were called out for the local defence of their homes. The whole of these Natal forces, as well as special corps raised in the Colony from her rifle clubs, etc., were employed from the very commencement in the front; and when the enemy invaded the country at least 3,000 of them were in the field. Under Sir G. White their services were conspicuous, and several corps were shut up with his column in Ladysmith. As was the case in Cape Colony, further bodies of mounted troops were raised after the arrival of Lord Roberts, and Natal contributed, before the middle of March, more than 7,000 men to our armies in the field, men naturally far superior in their knowledge of the country and of the enemy to our Regulars, equal to them in bravery, and constituting a contingent of immense value, thoroughly appreciated both by their comrades and their commanders.

The six Australian Colonies (including Tasmania) and the Colony of New Zealand had each a small "permanent" force—like our Regulars, making soldiering a profession for a time—a large number of Militia (or "partially-paid" Volunteers, which come to much the same thing), and a certain proportion of Volunteer Corps proper on a somewhat similar footing to our own. Before the war their permanent forces numbered about 1,200 (including three batteries of Field Artillery), their Militia 12,000 to 15,000, and their Volunteers about 10,000, while New Zealand had 400 in her permanent Force and 3,000 "partially-paid" Volunteers. The above show a total for Australasia of about 35,000 officers and men, armed, equipped, and more or less completely organised and trained. Of these by far the greatest number were Infantry and Garrison Artillery (these Colonies having provided their principal ports with important coast defences); not more than 4,000 to 5,000 were included in the Mounted Corps—Cavalry, Mounted Rifles, or Mounted Infantry—much too small a proportion. Besides the forces mentioned there existed a large number of rifle clubs and of cadet corps in Australasia, where, as a rule, great interest is taken in rifle-shooting. Elementary military training in drill, etc., was usual in the State schools, and in some Colonies all State schoolmasters had to pass and hold a certificate in such drill.

The laws governing the several forces mentioned are laid down in the local Defence Acts, passed by the Legislatures of the Colonies, and in

Regulations framed under their provisions. The exact terms under which officers and men served vary a good deal, but were usually quite stringent enough to allow of good discipline being enforced. When called out by proclamation for actual service, officers and men came generally (but with certain reservations) under the provisions of the British Army Act. As a rule, the terms of their enlistment did not necessitate the men serving, under any circumstances, out of their own colonies; but in Australia, particularly since federation in the near future had become so probable, most recent Acts made the terms of enlistment such that the forces were bound to serve in any part of Australia. In Canada, the military forces being federal, though furnished by quota by the several States, they can, of course, be employed anywhere in the Dominion.

The military forces of the Dominion of Canada have one very important advantage—they are entirely administered by the central Government, and not by those of the several States. The Dominion possessed a permanent force, of all arms, of about 1,000, including three batteries of Field Artillery, a splendid body of 1,000 Mounted Police for her half-wild N. W. Provinces, and a Militia Army of nearly 40,000 men, in which were embraced 2,000 Mounted Troops and 2,000 Field Artillerymen manning 17 batteries of field guns. The Canadian Militia was organised so far back as 1855 all able-bodied men between certain ages (with certain legal exceptions) being liable to serve and to be drawn by ballot for the active Militia: but, practically speaking, there are sufficient volunteers for the force to render it unnecessary to enforce the law. The military organisation is much more complete than that of the other Colonies; there is an excellent Military College at Kingston for training officers for the forces—more than 100 cadets from the College have from time to time been granted commissions in our Regular Army—there are also factories for the making of Field Artillery and Rifle ammunition.

With regard to the two great groups last mentioned (Canada and Australasia), their permanent forces constitute the staff for schools of instruction for the Militia and Volunteers, officers and men. As a rule, an officer of high rank has been borrowed for a term of years from England by the Colony to act as commandant of their forces, annual camps of exercise and training are established at Easter time or other fitting occasions, while on general holidays or on Saturdays comparatively large bodies of troops are got together for minor manoeuvres, field days, etc. It will be clear that before the South African war broke out the military forces of these two groups—comprising, as they did, nearly 80,000 men—were by no means to be despised (even though their organisation was not very complete, and in some respects indeed defective), the physique of the men was admirable, and they were zealous and full of enthusiasm.

As under the local Defence Acts the Colonial forces were not usually engaged to serve abroad, when the Colonies provided contingents for that purpose, as in South Africa, it has so far been necessary to pass a special Act for the occasion and to call for volunteers from the forces to the numbers required, though it was understood that, as is now the case with our Militia, whole units might volunteer. But many units have had to be built up entirely anew on such an occasion. Modifications to obviate this will be advisable in

the new organisation, which will no doubt be undertaken when the lessons taught by the war have been digested, and the Colonial forces, or portions of them, will be worked more thoroughly into some general scheme of joint Imperial Defence. Though the greater portion of the Colonial troops employed in the war were thus specially raised, the advantages of having had large numbers of officers and men trained in their military forces in previous times of peace, were important, a nucleus of trained soldiers of every rank already existing. The officers and men of the Colonial forces have always had the very strongest feelings of fraternity with those of the Imperial Army, and had always been yearning for a closer union and for an opportunity of proving their value as soldiers, fighting side by side with them for the Empire they were so proud of belonging to.

The whole population of the Colonies took the keenest interest in affairs in South Africa and in the substantial grievances of the Uitlanders, amongst whom many of their own friends and relatives were included. When war broke out their Ministers hastened, with the warmest acclamation of the people, to offer military aid in the struggle for the freedom of the individual citizen which was forced upon us by the presumptuous oligarchy governing the Transvaal. These offers were accepted only to a limited extent, and the curious mistake was made of asking that infantry might be sent, and not mounted troops—no doubt on account of the greater expense the latter would involve.

The figures already given show, indeed, that the proportion of mounted troops normally maintained by the Colonies was but a small proportion of their total forces—in Canada 2,000 out of 40,000, and in Australasia about 4,000 to 5,000 out of nearly 35,000. This, however, was not due to any lack of men or of horses admirably adapted for mounted work, but to the fact that mounted corps are much more expensive than infantry, and, further, because where those most fitted for it were to be found they were, as regards the men, sparsely distributed over the vast areas of the back country, and difficulties almost insuperable existed as to bringing them together for any organised military training. Considerable portions, then, of the contingents first sent were infantry; but as the war progressed, and it proved that our great want was mounted troops, and that no men were better fitted for such work than our Colonial soldiers, most of the infantry so sent were supplied with horses and turned into mounted corps.

After our first reverses the Colonies patriotically pressed our Government to be allowed to send further help, and, the value of their mounted corps being now fully recognised, all further contingents sent from them consisted of mounted men. In order to obtain these, special corps were raised both in Canada and Australasia, principally from ranchers and cowboys in the former, and from bushmen (2,000 in the latter, with a strengthening of Mounted Police and Cavalry in the case of Canada, and in both of many officers and men who had had previous training in the mounted units of their forces. It must, however, by no means be supposed that the men enlisting in these special corps were really all rough cowboys or bushmen (excellent fellows these are). There was the keenest competition to be included in the ranks, and, although each candidate had to pass a very severe practical test,

both in horsemanship and shooting, men of every rank and class eagerly joined if they could do so, anxious to bear their share in the Imperial struggle. If popular enthusiasm was great in England, we may safely say that the enthusiasm in the lands where her children live and build up the empires of the future far surpassed it.

In March, 1900, the approximate number of the Colonial forces serving in the field in South Africa were: Cap Colony 15,000, Natal 7,000, Australia 4,000, New Zealand 750, Canada 3,000, as well as about 400 from India and Ceylon—a total of about 30,000. Further contingents were, however, raised; the zeal of the Colonists was without bounds. At a public meeting at Toronto it was carried that 10,000 Canadian soldiers should be sent. Australia increased her numbers to 5,000, and New Zealand to 1,500. Funds were raised without difficulty for equipping and sending off their troops. All, without exception, determined that the Empire should win, and gladly concealed their tears when their nearest and dearest left them to fight for that cause. Amongst many other similar examples, the Premier of New Zealand, like our own Prime Minister, sent a son to the war. By July, Canada and Australia had each contributed 5,000 men, and New Zealand 1,500, so that, with the further troops raised in the South African Colonies, the total number of Colonial forces fighting in the field must have been nearly 40,000 men—a magnificent proof of the solidarity of the Empire.

It may be pointed out that life in the Colonies, especially in the less populated parts, is very different from life in England. The conditions of that life, from boyhood up, endow men with many of the requisites for a soldier in the field, particularly for the mounted soldier—endurance, individuality, adaptability, a keen eye for country, good horsemanship, and usually the attributes of a good rifle shot. Riches consist mostly in land, in horses, cattle, and sheep; actual money and luxuries are scarce. All classes live, in many ways, a more simple, a harder, rougher, and more healthy life; sedentary occupations are few, and men live much more in the open; they have to struggle hard, too, against vicissitudes of nature in these very young countries—fire, floods, droughts, and so on. Horses are plentiful and cheap, and cost a mere trifle in the country to keep; every man rides of necessity, so great are the distances, and this not only in the agricultural and pastoral, but in mining districts as well. Wages are high and living cheap, and the labouring classes, though they work hard enough, take their own leisure more when it suits them. As division of labour is not so complete, men learn to turn their hands to many things. A large part of the population is more or less nomadic, particularly in the back country—backwood- and bush-men, shearers, etc.—accustomed to be in the saddle for long periods by day and night, and, with a bag of flour, some tea and sugar, to ride hundreds of miles, often through country quite new to them, camping out at night, “doing for themselves” and caring for their horse; often, too, on horseback half a night through, doing sentry over a mob of cattle or otherwise. Such a mode of life makes men hardy, independent, and well able to take care of themselves under most circumstances. Squatters, farmers, surveyors, doctors—all classes, in fact, away from the towns have to do the same sort of thing, to a certain extent, in a country where a horse is often almost the only mode of conveyance; and they

benefit in the same way. Not only are they excellent horsemen, but they acquire a good eye for country and many a wrinkle as to taking care of Number One.

As to the work done in the field by these gallant Colonial soldiers, no praise can be too high—even from the necessarily meagre Press reports from the seat of war all the world has gathered how well they have acquitted themselves. That work is now over, and their losses, alas! have been considerable; but the Colonies will not grudge, however much they may naturally mourn, the blood of their sons shed in a noble cause, for that individual liberty which they value above all possessions, and in the defence of our common Empire. Field-Marshal Lord Roberts, bidding farewell to the Royal Canadian Regiment, when they left for their homes in the North, told them that they had seen many an engagement, and that during their service they had proved themselves "soldierly, efficient, and of perfect behaviour"—high words of praise indeed from such a chief! We may be sure that an equal encomium applies to all—South African, Australian, and Canadian. Warm indeed will be their welcome home, and well deserved; the bonds knitting together the mother-country with those to which they belong have been wonderfully strengthened by their splendid conduct and gallantry in the field, and they have nobly won their spurs.

These Colonies, the mighty progeny of Britain, are rapidly increasing in wealth and population, and should the Empire be compelled in the future to fight for its life against foes more formidable than the brave Boer, we may count, not upon 40,000 men only, but upon a far more formidable host from Greater Britain, to fight under the banner of our common Empire—the emblem, wherever it waves, of a perfect freedom.

OUR YEOMANRY AND VOLUNTEERS.

When it became evident that the regular troops would not be sufficient to furnish the army required for the field and to keep up the garrisons necessary at home and abroad, our *Militia* answered nobly to their country's call; some 40,000 were permanently embodied, and a great number of battalions, both Infantry and Garrison Artillery, volunteered as complete units for service in the field. Over 15,000 were sent out, and have done as excellent work in South Africa as their forbears did in the Peninsula and the Crimea. The so-called *Militia Reserve* (in reality *Army Reserve* men embodied in the *Militia* in peace time) was also drawn upon very largely for filling up the Regular battalions. Limits of space unfortunately do not allow of our going into the invaluable services of the *Militia* in this war, but only of thus drawing attention to the gratitude the country owes to this grand constitutional force.

YEOMANRY.

Our *Yeomanry*, though a force of very old standing, has never before taken part as such in campaigns abroad; its members are, indeed, not enlisted for service abroad. It is difficult to trace its exact origin. Troops of horse, termed *Volunteer* or *Fencible Cavalry*, and subsequently *Volunteer Yeomanry Cavalry*, were raised in the 18th century; but any such corps then existing were disbanded in 1830. Independent Troops were, however, still maintained by voluntary effort, and in 1813 these were organised by regiments,

with county titles. Up to 1828 there were 500 Troops, counting some 24,000 men.

The force has, since that date, undergone many vicissitudes at the hands of the authorities, being at times supported and increased, and at others reduced in numbers and given the cold shoulder. When the South African war broke out its total strength was about 12,000, divided into 33 corps, and costing the country about £70,000 per annum. The work required of them as compulsory is not heavy—six mounted parades, six dismounted drills, and 10 days' permanent duty during the period of training. Each Yeoman has to provide himself with a horse, for parades and training, and is paid a yearly sum of £3 10s. for expenses (while the corps receives a contingent allowance of £3 for each efficient); he is provided by Government with horse equipment and uniform, and armed with a *Martini-Enfield* (or *Martini-Metford*) carbine (this weapon has the *Martini* block action, but takes the same cartridge as the *Lee-Enfield* rifle, with which our Infantry is armed), which is about 2lb. lighter than the infantry rifle, but has no magazine. *Themusketry* training given is not nearly sufficient, and certainly should be revised. Some of the defects mentioned have already been recognised by the authorities, and this year the Yeomanry were invited to go into camps of instruction in lieu of the ordinary training (but for 28 days), the allowance to each yeoman being raised to £5, and the corps contingent (if certain conditions were fulfilled) also raised to £5 per efficient.

The Yeomanry is an arm eminently suited to the Englishman, and could be enlarged to any reasonable extent if the money allowance to the men was increased, the officers' uniform made less costly, and if the unnecessary expenditure upon their corps expected from them was done away with. There are a large number of retired officers of the Regular Army in the force, and altogether the material of which it is composed is most excellent. The training so far has been of a description to fit it for Cavalry work, not as Mounted Infantry, and it is as yet doubtful how far a change in this respect may be considered necessary after the experiences of the war.

When a series of serious reverses had befallen our armies in South Africa, the Government wisely determined, in December, 1899, upon taking heroic measures, and, amongst others, to utilise the magnificent war material of our Yeomanry by calling for volunteers from the force itself and by recruiting afresh, the whole to be formed into a body to be called the "*Imperial Yeomanry*." It was decided that every man should be able to ride and to shoot well, and each candidate had, therefore, to pass a severe test in both qualifications; that the new force should act as Mounted Infantry, and that they should consequently be armed with the service .303 rifle and bayonet, carrying their cartridges in a bandolier, and that the several counties should supply the funds for saddlery, clothing, etc.—a call they most munificently complied with. The War Office provided rifles and pay for officers and men, and, further, an allowance of £60— for purchase of horse, £40; for expense of outfit, £20—as well as a bounty to be paid when the men were discharged. The organisation was by battalions about 500 strong, each containing (besides the staff) 4 companies of 121 rank and file as well as machine-gun sections. As a rule the battalions took out with them two Colt automatic guns on the Dunderdall galloping carriage. The companies were named

after the counties or regiments from which they were raised, with the exception of a certain number specially raised under the auspices of patriotic noblemen and gentlemen—*e.c.*, "The Duke of Cambridge's Own" (1 company), under the patronage of H.R.H. the Duke; the "Sharpshooters" (4 companies), by Lord Dunraven and a committee of gentlemen interested in rifle shooting, the active promoter and Hon. Sec. being Mr Seton-Kerr, M.P.; Members of the Sharpshooters had to pass a higher standard of shooting than that required by the usual Yeomanry test, and were ensured an extra outfit—pistol, field-glass and a policy of life insurance—over and above the Government allowance; "Paget's Horse" (4 companies), under Mr. A. Paget and an influential committee, the members being gentlemen who engaged to provide out of their own pockets all expenses of outfit, purchase of horse, etc., up to the date of their being landed in South Africa; and the "Rough Riders," who had to pass a special standard in equitation.

Although first initiated in the previous December, the whole of the Imperial Yeomanry had been raised, equipped, and organised before the end of March, 1900, consisting of 20 battalions, with a total of over 10,000 men. More than 8,000 had by the 24th of the month already embarked, and some companies (see below) had even by that date found their way to the front. The majority of the companies took their horses with them, or, at any rate, the greater proportion of the horses, and the remainder were horsed at the remount *depôts* in South Africa on arrival there.

The Force has, indeed, done "yeoman's service" in the field. It is yet too soon to enter into detailed description, but we know that they have shown themselves brave as the bravest, and of an intelligence which has been invaluable. They were, it is understood, first "blooded" on the 5th April, in Lord Methuen's successful action at Tweifontein, near Boshoff, when he killed or captured the whole of a Boer raiding party—mostly Frenchmen. As to this action we are told by the Press that "it was a sporting affair from the first . . . the men from the Aylesbury country made a hunting business of it, and went ahead to be in at the death." The Yeomanry battalions engaged were the 10th, Lord Chesham's Bucks, Berks, and Oxfordshire; and the 2nd, Colonel Youngusband's Yorkshire (2), Notts and Sherwood Foresters. The force has won the confidence of all—as an enthusiastic officer wrote home in a private letter published: "You should hear the praise we get from the Regulars. The Infantry swear by us, and so do the Gunners—in fact, we do all the cavalry work." This last may be a somewhat exaggerated estimate; but the Imperial Yeomanry certainly have even more than come up to the high expectations formed of them ere they left for the war.

VOLUNTEERS.

The history of our *Volunteer force*, like that of the Yeomanry, shows a checkered career, both as to its treatment by the authorities and its estimation by the public. When the horizon was threatening or war in progress, the Volunteers were made much of and their numbers largely increased. Under an old Act (long ago repealed) they were 380,000 strong in the year 1803; but in piping times of peace retrenchment has always become the order of the day, and their value in the eyes of the public has quickly deteriorated.

The Force began a new existence, in its present form, in 1859-60, and has since then gradually but steadily increased in efficiency. Volunteers draw no pay from the Government, but a corps receives a capitation grant for each member "efficient" up to a certain standard, and further grants are also drawn by it which depend upon a standard of "extra efficiency" being reached by individual officers or men. The detailed conditions under which the Force serves are well known generally, and have been much before the public of late, it would, therefore, be superfluous to reiterate them here.

When the South African war broke out the Volunteer force was about 230,000 strong; so great, however, has been the military ardour provoked by the war that, including the number required to replace those members of the Force who have gone to South Africa, the increase to its numbers between November, 1899, and March, 1900, was about 30,000: since the latter date, no doubt, a further increase has taken place. The Act under which Volunteers had enlisted prior to the war made them only liable to serve within the limits of the United Kingdom, and that only after proclamation had been made that invasion was apprehended. When, therefore, it was decided (in December 1899) that the Force should be asked to furnish a quota of fighting men for the British armies in South Africa, it was necessary to call for Volunteers. The authorities determined to ask for 10,000 men, to form a body to be termed the "Imperial Volunteers." It was decided that, as a rule, they should be organised by companies only, each company to be attached to a battalion of the Regular Army to which the corps was affiliated, or which bore the title of the county from which the Volunteers were drawn. There were, however, exceptions, the "City Imperial Volunteers" ("C.I.V."), for instance, which constituted a body by itself, consisting of a battalion of infantry, some mounted infantry, and a battery of 4 field guns, manned by volunteers from the Honourable Artillery Company. Its total strength was eventually 1,600. The initiation of the corps took place on the 15th of December, when the Lord Mayor first proposed its formation to the military authorities; five days later the Common Council of the City voted £25,000 for completely equipping a corps of 1,000 men within 21 days, and its formation was sanctioned by the War Office. The competition to be included in its ranks was very keen, and the result was the selection of a body of men of exceptional physique and great intelligence. So quickly was it raised and equipped that on the 13th January the first contingent sailed for South Africa, and by the 11th February the whole 1,600 had left England for the scene of war.

Equally expeditious was the raising, equipping, and sending out of the other portions of the Imperial Volunteers, men and money were forthcoming without stint, and, as with the "C.I.V.," there was much competition for a place in the ranks. As, however, the greatest part of the force existed only in 66 separate companies, the fortunes of which, as soon as landed, became merged for the time being in those of the battalion of Regulars to which each was attached (and of which each formed, temporarily, an integral part), but little mention of them has been made, since they arrived in Africa, in the Press or otherwise. This, no doubt, has been rather hard on them for the present; but when, in the near future,

the story of the fighting of the Regular battalions to which they have been attached becomes better known, the gallant companies of the Imperial Volunteers which fought with them will, we may be sure, get the same meed of high praise as already given to their comrades of the "C.I.V.," and we shall see how nobly they have performed their duty and what honour they have done to themselves and to the force to which they belong.

The "C.I.V." had the good fortune—certainly well merited—of being pushed forward to the front at once, and of being brought, as a separate entity, much before the public by Press correspondents, they have thus taken a prominent place as representatives of the Imperial Volunteer Force, and have shown that they are worthy such a distinction. Though the raising of the corps began just before Christmas, 1899, the "C.I.V." were engaged at Jacobsdal—7,000 miles from London—on the 16th of February, 1900. After that date they took part in more than 30 engagements, showing in all a conspicuous gallantry of which the City may well be proud. Their powers of endurance were well exemplified on one occasion, when, in pursuit of De Wet, the infantry battalion marched 224 miles in 14 days—including one day's halt—or an average of about 17 miles a day.

The total number of the Imperial Volunteer Force which took part in the campaign in South Africa was between 11,000 and 12,000—but a tithe of those who would gladly have shared in it. It will be seen what a source of strength lies ready to hand—especially when an improved organisation has made it more readily available—for upholding, when necessary, the prestige or in struggling for the safety of the Empire.

A new Volunteer Act has been passed in 1900, under which power is given to deal with Volunteers who desire it, so that the latter shall be liable to serve outside as well as within the United Kingdom, and without the special proclamation of apprehended invasion being necessary. This modification is an important one, for it allows the Government to enter into an agreement with such Volunteers (within limits) as may wish it that they shall be liable for war service abroad. It allows, in fact, of a species of reserve of Volunteers being formed, available for any serious emergency, and undoubtedly adds by so much to the strength of the country. It must not be supposed that if engaged in hostilities with an unfriendly Power we could afford to sit at home waiting to be invaded by its troops. The best defence is usually an active offensive operation against the enemy at his weakest point.

The campaign in South Africa has indeed opened our eyes to many things. It has proved the latent strength of the Empire, and shown us that, with the marvellous extension of that Empire which has taken place in the last 100 years, we must be better prepared for our increased responsibilities. We see that, in addition to our regular army in the field, we had not only 15,000 British Militia in the field, but beyond them a force of some 60,000 fighting men of the best material, drawn from sources which have never before supplied us with soldiers in war—Colonial troops, nearly 40,000; Imperial Yeomanry and Volunteers, about 22,000! this latter is an astounding fact, for the figures are but an indication of what would be available under certain contingencies.

The war, too, has shown us some of our weaknesses, and how absolutely necessary it is, by a

new and improved Army organisation, to make the best of such magnificent material, and to ensure that we shall at all times be actually prepared for the more serious struggle which it cannot be expected will be for ever postponed.

ARTILLERY AND RIFLES OF MOST MODERN TYPE EMPLOYED DURING THE CAMPAIGN.

Nearly 50 years had elapsed since we had encountered on the field of battle men of white race like our-elves, and during that period improvements in arms of precision had kept pace with the great mechanical progress which has resulted in the marvels we see all round us in our everyday life. Numberless predictions had indeed been made that wars must soon cease, so deadly had become these arms, because the combatants on either side would be killed off with such completeness that the sad tale of the "Kilkenay cats" would be enacted in earnest in the field. It is hardly necessary to say that these predictions have been quite falsified by the occurrences of the campaign.

It is not intended here to describe all the various natures of guns or of rifles employed; for a certain number of both of these weapons used by Boer or Briton were of a comparatively obsolete description—the Boers, for instance, had a number of Martini-Henry rifles (large bore and magazineless rifles), while at Mafeking, Kimberley, and elsewhere in Cape Colony, as well as in Natal, many old guns, rifled muzzle-loaders, belonging to the Colonies, were pressed into the service. We will only take the weapons of most modern type used by ourselves or the enemy, with which, indeed, for all intents and purposes, the war was fought, the employment of the older types being exceptional.

MODERN RIFLES.

Regarding the rifle, a muzzle-loading rifle (the Enfield) had been introduced into our service—in lieu of the old smooth-bore musket with which our troops fought in the Peninsula—at the period of the Crimean War; a breech-loading rifle (the "Snider") replaced it in 1867; and that again gave way to an improved breech-loader, the "Martini-Henry." Immense improvements in rifles and ammunition had, however, rapidly succeeded one another since the last-mentioned arm was adopted; and these improvements had been combined in the "Lee-Enfield," which superseded it not long ago, and which is our present Service arm.

The improvements have always been in the direction of:—1. *Accuracy*—by increasing the muzzle velocity, altering the shape of the bullet and its head, and the position of its centre of gravity, improving sights, etc. 2. *Greater range and penetration*—by giving a higher muzzle velocity, decreasing the diameter of the bullet in proportion to its weight, etc. 3. *Flatness of trajectory*—i.e., that the path of the bullet through the air should be near the ground (so as to strike a man) for as great a length of its flight as possible—ensured by the same means as for (2) above. *Rapidity of fire*—by making the ammunition "fixed," i.e., the explosive, the exploding cap, the bullet, and the case to be handled all together in one article, by improved breech mechanism, by adding a magazine, so that on emergency the number of rounds the magazine holds can be fired without loading the rifle in the ordinary manner, and by arranging that by one motion this magazine can be completely

refilled, instead of having to refill it by putting in one cartridge after another. 4. *Use of an explosive (for propelling the bullet) which gives out no smoke on explosion*—for smoke not only obscures the object you wish to fire at, but also shows the enemy where you are, and enables him to make you his target. 5. Then *the rifle and its breech mechanism must be such as will stand rough usage, rust (within limits), dust, sand, and wet, without material damage.* 6. *The cartridge must be strong enough to be carried (in pouch or bandolier) without becoming unserviceable, it must withstand wet, and be not liable to be exploded accidentally; and so on.*

The problem of making a perfect rifle, including its ammunition, is an empirical problem requiring much give and take in different directions for the obtaining of what we require. Roughly speaking, the necessary recent advances have been made by decreasing the bore of the rifle (and consequently the diameter of the bullet, which was the real object), by lessening the weight of the bullet, making the charge more powerful, the rifling more "rapid," by adding the magazine, and by arranging for the most rapid method of reloading it. Though the weight of the bullet has become less, its diameter has been still more decreased in proportion, and it is therefore of great length—so long that it has been absolutely necessary to enfold the soft lead in a thin casing of a harder metal—"cupro-nickel," in the case of our Service bullet.

Almost all the above-mentioned improvements have been combined in our Service rifle, as well as in the two modern-type rifles employed by the Boers, the German and the Spanish "Mausers." The principal data as to them are given below:

TABLE I.

Weapon.	Nature.	Calibre of Rifle, Inches.	Weight of Bullet, Grs.	Approximate Muzzle Velocity (feet-seconds).	Weight of Rifle.
British .	Lee-Enfield	303	215	2,000	9'25
Boer ...	German Mauser	311	219	2,025	?
Boer ..	Spanish Mauser	276	173	2,0	8'60

[N.B.—The "Lee-Metford" was the original rifle, with bolt action, which superseded the Martin Henri in the British service. It has seven grooves, whereas the "Lee-Enfield" has five grooves; the latter has also many small improvements; but for practical purposes the two rifles are very much the same; they have the same calibre and use the same cartridge. It is very likely that some of the troops fighting under British colours were armed with the "Lee-Metford."]

The smokeless explosive employed in our cartridge is cordite, and that used by the Boers is of an analogous nature. As by the use of a more powerful explosive than gunpowder we can employ a smaller charge, and as the weight has been much lessened, the cartridge, as a whole, is lighter than formerly, and more can be carried by the soldier. Our Infantryman carries on his person in action 150 rounds. There is a large reserve with each battalion (in light ammunition

carts), and further reserves are with the Ammunition Columns.

Looking at the table, it will be seen that the Spanish Mauser, with which the Boers were principally armed, is farther advanced than our own—of course there are limits, so that by going too far we may overshoot what we wish to arrive at, but it can hardly be said that these limits have been exceeded in the Spanish Mauser—both the rifle itself and the bullet are considerably lighter than our own, and the velocity higher, giving greater range and penetration to the bullet, and a trajectory a good deal lower. This rifle is essentially a more modern-type weapon than the British; certain defects were, moreover, found to exist as to our rifle which handicapped it to some extent as compared with both of the Mausers. As to accuracy, the sights in some cases were not sufficiently true, the trigger pull was not a good one (affecting the accuracy injuriously to a certain extent), and the "bolt" is rather too weak. As to rapidity of fire, when the magazine of the British rifle is emptied the rifle becomes again for the time a single loader, for there is no arrangement by which the magazine can be refilled except by putting in a single cartridge at a time. The Boers, on the other hand, employed what is known as a "clip" (adopted, it is believed, by all the Powers except ourselves for their magazine rifles), containing five cartridges, which can be loaded together by one single motion into the magazine, or, as it were, "on to it," practically becoming the magazine, so that the Boers could refill five times as rapidly as the British soldier—a very important advantage at critical moments.

As to the comparative shooting powers of our men and of the Boers, it is probable that the latter shot considerably the better. They certainly ought to have done so, being thoroughly accustomed to the clear air, the local colouring, and the vast distances of their native South African land; all these were new and strange to our troops, excepting to part of the Colonial forces. It is as yet impossible, from want of data, to do more than conjecture. The Boers, it should be borne in mind, were generally on the defensive, in carefully prepared positions, ensconced in gullies or posted on rocky, broken kopjes covered with boulders, affording admirable cover, and with his usual practical "slimness" the enemy had carefully measured the ranges to prominent objects in front of his position, so that when our men attacked, the actual ranges for which to sight their rifles were well known to the Boers. The British soldier, as he boldly advanced to the attack, had none of these advantages; but when on the same footing as the enemy as to existing conditions, or on the very few occasions on which the Boers actually attacked our troops entrenched, it would seem as though our shooting was as good as theirs under similar circumstances; anyhow, we invariably repulsed them. In "sniping"—i.e., firing with high elevations at very long ranges—the Boer probably beat our men easily; but such fire, though annoying, does not in reality cause much loss.

Though the accuracy and range of the rifles used were so great, and their rapidity of fire immensely greater than those of the arms of old, it is very doubtful whether the actual number of men killed and wounded for every hundred thousand bullets fired was nearly as great as formerly—probably quite the contrary. It is certain, however, that of those wounded a far

greater proportion recovered than had ever been the case in wars fought with the arms of old, using heavier bullets of larger diameter, flying with much less velocity. The effect of the present long, small diameter, pointed bullet, with a high velocity, in passing through a limb or the body, has been to drill, as it were, a clean hole through, without anything like such serious damage to the neighbouring parts, as with larger, slow-moving bullets*—just as one can make a clean hole through a glass window by firing a tallow candle with a high velocity out of a fowling-piece; while if the candle is fired with a certain lower velocity it will break the window-pane to fragments as it goes through. The matter was, however, quite different when soft-nosed, or "expanding," bullets were used (from erroneous notions concerning them, these bullets have constantly been styled, in the Press and elsewhere, "explosive" bullets). It has already been mentioned why it is necessary to encase the present long bullet in a thin cover of harder metal, which encases the point as well as the body. This covering effectually prevents the bullet breaking up or expanding on striking a soft body. It, however, the tip of the bullet is filed or scraped, so as to remove a part of the hard metal covering, and to expose the soft lead, the bullet will expand almost into a mushroom shape if it strike even flesh with a high velocity, and will probably cause a wound of a very serious nature.

The "Dum-Dum" bullet, invented and made in India, was of this nature, expanding on impact, as was also a particular pattern, the so-called "Mark IV," cartridge, for the Lee-Enfield rifle. The Peace Conference at the Hague condemned the employment of expanding bullets in war; but even previous to that date, in the Khartoum expedition of 1898, we would not employ the "Dum-Dum." All cartridges with such bullets have long been withdrawn from our reserves for active service; they will never be used by our soldiers in war; nor was a single expanding bullet fired by them in the campaign. Our commanders were, however, compelled time after time to protest against the use of such bullets by the Boers. Not that there was apparently any organised issue of them by the enemy's authorities to their burghers, but probably the latter at times scraped off the hard metal tip, and so, as before explained, made the bullet an expanding bullet; or ammunition formerly altered for purposes of wild game shooting may have been brought down to the front by individual burghers, or even obsolete cartridges employed. The use of such expanding bullets by the enemy was in any case quite local and exceptional (as proved by the very large proportion of our wounded who rapidly recovered), and had no practical effect of any consequence on the war.

MODERN-TYPE ARTILLERY.

The modern-type Artillery employed we may divide into three categories:—1. *Nondescript light pieces*, on wheeled carriages, as the Maxim, Colt and Vickers-Maxim, guns with arrangements for "automatic" fire, and using rifle ammunition or very small projectiles fired with great rapidity, there being no recoil of the piece when fired; 2. *Field guns* proper, on wheeled carriages, with means of draught sufficiently rapid to allow of

their keeping pace and manœuvring with mounted troops and infantry respectively; 3. *Guns of position*—light and heavy—for service in the field, but not expected necessarily to keep pace or to be able to manœuvre with infantry. Included in these at times are naval or fortress guns, not originally designed for the purpose, but used for special reasons as guns of position.

In Table II. are given data as to the more modern-type British Artillery, and in Table III. a list of some modern-type Boer guns; but, unfortunately, very few exact details to the latter are yet available.

The classification given above is only approximate, there is no hard-and-fast line separating one class from another; e.g., by increasing the "mobility" of a battery of guns of position it might be given the attributes which we require for field artillery.

Improvements in the power of guns, and in the varied material, ammunition, carriages, &c., used with them, have been as marked as in the case of the rifle, and, as regards the gun itself and its ammunition, they have been made on much the same line of advance—viz.: *Increase in range and striking energy*, and the obtaining of a *flatter (or lower) "trajectory"*—by using a larger charge or a more powerful explosive for it, and by decreasing the diameter of the projectile.

The projectiles ordinarily fired from Artillery in the field are not solid (like a rifle bullet), but are hollow "shells," the value of which greatly depends upon their interior capacity for the bullets and powder or higher explosive with which they are filled. Limits as to the decrease of diameter are therefore soon reached. *Increase in accuracy*—by the above means, by improvements in rifling and in sighting, and by employment of telescopic sights. *Increase in velocity of fire*—by improvements in breech mechanism, use of a metal cartridge case containing both the charge and means of firing it, or of "fixed" ammunition (in which projectile, gun charge, and the means of firing it were all in one piece)—by means of stopping or checking the recoil of the gun and carriage, when the piece was fired. The importance of this as affecting rapidity is self-evident. If a gun laid on a target, such as a body of men or an enemy's gun, did not move when fired it would still be "on" that target when reloaded, and no time would be wasted, as must be the case when it recoils, in relaying it upon the target after each round fired. *The use of a smothering explosive* for the charge of the gun, so that the position of the latter might be concealed from the enemy, instead of being exhibited to him as a target by the smoke of a discharge. The chance of the gun's range being obscured by smoke was also done away with. Then an improvement has been made, as to the ammunition of the heavier pieces, by charging the shells with a more powerful explosive than gunpowder, such as the "lyddite" employed in our own service; and other minor improvements principally bearing on the above which cannot be entered into here, though the important point of limit of *effective range*, in some cases depending on the length of fuse available, will be touched upon further.

Regarding the first class of Artillery in the table, the "automatic" guns, firing, like the Maxim, rifle ammunition, or like the 37 cent. Vickers-Maxim, small shells; though very useful weapons in their way, very mobile, requiring few men to man them, and throwing a stream of projectiles with very great rapidity to a range

* There are limits, however, to the truth of this statement—with a very great velocity even a small diameter bullet striking wet substance makes a large cavity; such cases were probably quite exceptional in this war.

* Whether Vickers-Maxim or otherwise; so-called "Pom-Poms." † So-called "Long Toms."

the same as the rifle, or a little beyond that, they hardly come under the head of Artillery proper, which should, with a much greater range than the Infantry rifle, be able to beat down Infantry fire from a distance without being exposed to its effects. The "Maxim" we have frequently employed before, and many Colt automatic guns were taken out by the Imperial Yeomanry, and have proved most useful. The Boers had a moderate number of Maxim guns, and we know that some time prior to the war they had at least 24 of the Vickers-Maxim 37 cent. They may have obtained others later on. But though these latter pieces—the so-called "Pom-Poms"—had been tried by our authorities at Shoeburyness some years previously, it was not thought advisable to adopt them as a service weapon until the effects obtained with them by the Boers—especially against our Field Artillery at short ranges, at Farquhar's Farm, Colenso, and other places, as well as against our Infantry—proved that they had their value in the field. Our Government then purchased a number (somewhat late in the day), and sent them out hastily, with officers and men taken from the Garrison Artillery and otherwise. They were principally attached, by sections of four guns, to the Mounted Infantry division formed by Lord Roberts, and have been found very useful; but some time must elapse before it will be possible to judge their exact value.

We had also some Mountain Artillery—not entered in the tables—but the guns were of comparatively old type and not up to date. We require an improvement in the armament for mountain work, looking to the great improvement in rifle fire.

Before remarking further upon the other classes of Artillery, it may be well to describe some points as to the ammunition, etc., employed with them.

A piece of Artillery is loaded with a "charge" of powder or other explosive and a "projectile." The charge after ignition produces an expansive gas, which propels the projectile from the muzzle of the piece with a certain velocity—termed, technically, the "muzzle velocity" (m.v.). The velocity of the projectile at any point of its flight is measured by the number of feet per second it is then travelling—technically "feet seconds" (f.s.). The charge is contained in a bag or case, and the whole called the "cartridge." There are also some means (an explosive cap or tube, and often a "primer" or detonator) for igniting the charge after it is loaded into the gun, and the breech of the latter securely closed.

If the charge is in a bag, as with our field guns, the means of ignition are quite separate from it. If it is in a metal cartridge case, however the igniting cap is usually in the base of the case itself, and is a part of the cartridge. If the metal cartridge case is further secured to the projectile (as with the bullet in a rifle cartridge) the ammunition is termed "fixed" ammunition. It is evident that—other things being equal—the loading of a gun with fixed ammunition, if not too heavy for one man, will be more rapid than with the other descriptions. It has not, however, been as yet adopted for our service field guns.

Case shot, for use at very close quarters, are usually supplied in small proportions to guns. They consist of bullets, in a tin casing or otherwise, which are released by the breaking up of the case as it leaves the muzzle. But the ordinary artillery projectiles are hollow shell, termed respectively "shrapnel" and "common."

A Shrapnel Shell is meant solely as a man-killing projectile. It contains a number of bullets and (in a separate part) a small charge of powder—termed the "bursting charge"—just sufficient to open the shell out and so release the bullets, which fly forward (to commence with) with the velocity of the shell at the moment of their release. The bullets spread out as they go forward so as to form a sort of cone, the original apex of which was the point of their release.

The bursting charge is ignited at any required point in the trajectory of the shell (i.e. in its path of flight through the air) by means of a "time" fuse, secured in the shell and "set," before the latter is loaded into the gun, for that required point or "range". To act with effect, as a man killing projectile, a shrapnel shell must be burst at a certain distance in front of the target, and at a proportional height above the ground, to allow of due dispersion of the bullets.

The maximum "effective" range of a gun firing shrapnel is the range at which the bullets have still sufficient velocity and "energy" to kill or disable a man, say 5,100 yds. If, however, the "time fuses" supplied for the shrapnel cannot be "set" to that maximum range, but only to some shorter range, say 4,100 yds., it is evident that the real "effective" range is by so much reduced. The figures given apply to our Service 15-pr. field gun (see Table II.), in which the "time fuse" only answers up to 4,100 yds., so that the real longest "effective" range of the gun with shrapnel is only 4,100 yds., though with common shell it would be 5,100 yds. It will be seen that this is a very important point to note.

A "Common" Shell is entirely filled with some form of explosive, and should, on striking its target, or immediately after doing so, burst into fragments or "splinters." It may act as a man-killing projectile by means of these splinters, which are hurled with great force in every direction on the shell exploding, or, when a high explosive such as "lyddite" is employed, by means of the severity of the explosion itself. A common shell is also meant to destroy or damage the enemy's guns or material, for breaking down shelter or cover, such as field works, entrenchments, houses, walls, woods, etc., against which shrapnel, from its small bursting charge, is comparatively powerless. The charge of the common shell is ignited by a fuse (usually some form of the so-called "percussion" fuse) ensuring the bursting of the shell when it strikes, but with very high explosives the shock of impact is often sufficient in itself to explode the charge. The maximum "effective" range of common shell is that at which the shell still retains sufficient velocity or "energy" to ensure the necessary penetration or damage to men and material when it strikes and explodes (e.g., with our 15-pr. field guns, if common shell were used they would be quite effective at 5,100 yds.).

When a gun is fired the shock forces it backwards, as well as the carriage from which it is fired. This runback or "recoil" makes it necessary, after each round, to run the gun up again into its former position, and to re-lay it upon the target, much time and labour being thus thrown away. If we can check this recoil so that the gun remains laid on the target as before, after each round, being returned automatically to its position after recoil, as in the so-called "automatic" guns, the waste of time and labour mentioned will not be necessary, and it is evident that possible rapidity of fire will become the

greater, as we are more nearly approximate to such conditions.

A *quick-firing* (q.f.) gun of the most perfect description will, in fact, be a gun with breech mechanism workable with rapidity, firing "fixed" ammunition, and which, after each round fired, returns automatically to the exact position it was in before.

With our service field guns (15-pr. and 12-pr.) a hinged spade attached to the tail of the gun-carriage partially checks the recoil. The French are supposed, with their new-type field gun, to have in addition to this a much more perfect means, in the shape of a hydro-pneumatic buffer. It was the secret of this buffer (still religiously kept) which played so important a part in the celebrated "Dreyfus" case. Until we employ some analogous means we shall still be at a serious disadvantage as to speed of fire. Some, at least, of the Boer field guns—see below as to the "Creusot"—were furnished with some such means.

Artillery fire is termed "*direct*" when the target is visible when looking along the gun-sights, and the gun can so be laid directly upon it. This is the normal nature of fire required from field guns, and was that for which our own and those of the Boers were intended, and for which they were employed.

When the target cannot be seen along the gun-sights, and the latter cannot therefore be used for giving the direction, other means have to be adopted for that purpose, and the fire is termed "*indirect*." Such a target, e.g. would be: troops in a valley hidden from the guns by the intervening rise or hill, infantry hidden in deep entrenchments, etc.—for indirect fire it is difficult to use shrapnel effectively, so common shell is usually employed, and the larger such a shell the more effective it should be. The best description of gun for indirect fire is a comparatively short piece of large calibre, throwing (with a small charge) big shells at high angles of elevation, so as to drop them over the intervening cover. Such a gun is technically termed a *howitzer*. Until the introduction of rifled guns a certain proportion of howitzers always formed part of our Field Artillery, and the advisability of having rifled field howitzers has been recently recognised. Within the last few years we have introduced into our service as a field artillery weapon a 5-in. rifled howitzer, throwing a 50-lb. shell charged with "lyddite," but although a few batteries had been equipped with this howitzer, and we had employed a battery in 1893 at Omdurman, it was still regarded as more or less an experiment.

In determining the basis upon which a piece of artillery of improved type, for any purpose, is to be built, we have a very complicated problem, much more so than in the case of a rifle. While trying, in the construction of the gun itself, to take advantage of all improvements—in material, in mechanism, etc.—we have to consider improvements in explosives, fuses, and ammunition generally, and also those in the carriages or mountings, from which the gun is to be fired, the means of checking recoil, and of transporting the gun, carriage, etc., and its ammunition, when on service, and so on; many desirable improvements necessitate complications and possible sources of weakening, and it has to be considered how far these are allowable for rough work on service. For instance, as regards a field artillery piece (gun or howitzer), it should be as powerful

as we can make it as to range and shell, but the whole—gun, carriage, limber, and ammunition—must be sufficiently mobile for the rapidity of movement which may be required of it in the field. The gun-carriage must be strong enough to stand the rough work of such movement in the worst country, and also the shock to it when the gun is fired, and yet be as light as possible. Then the shock of discharge depends upon the weight of the gun, the amount and nature of the charge, the weight of the shell, etc., and on the limit we set (and the means of doing so), to the recoil of the gun and carriage on firing, and so on. Many of the conditions we may wish to improve are, as it were, contradictory to one another, and continual compromises must be made.

FIELD ARTILLERY.

When war broke out, our Field Artillery—including under that head the Horse Artillery meant to move with Cavalry—were armed with the so-called 15-pr. and 12-pr. guns respectively, and there existed a few batteries of the new-type 5-in. rifled howitzer.

The guns (intended for direct fire) were equipped with Shrapnel shell only, it having been decided, years before, that, under most circumstances, it was the best projectile against Infantry, and that even the enemy's Artillery would more probably be silenced by killing off the gunners and horses than by damaging the material. Our Field Artillery, on the whole, was of very good quality, admirably organised, splendidly disciplined and trained and very mobile, but quite insufficient in numbers. The guns and their ammunition were excellent in their way, but in many points not up to modern mark, as will have already been noted. Our Field Artillery material was, in fact (the 5-in. howitzers excepted), somewhat *passé*, having been adopted many years before. Since that date the other great Powers—mostly within the last two or three years—have provided themselves with a new and improved field armament. We had lagged behind—perhaps wisely so if we could have ensured a general peace for years to come—for to provide a new, improved Field Artillery is a very big business, involving immense expenditure—in our case heavier, perhaps, than with other Powers, for our material must endure, without damage, the great heat and cold normal in one portion or another of our world-wide Empire. Great Britain has always dallied long ere taking such a plunge, fearing especially lest, just after it had been made, some new invention or improvement might cause our brand new armament to be itself behind the times. Improvements are for ever going on, and the right moment for establishing a new armament and discarding the old one is merely a matter of limit, looking also to the expense and to the probable immediate necessity or otherwise. Our system of Government always renders the Party in power for the time extremely unwilling to go to such a capital expenditure unless absolutely forced to do so.

With the Boer Republics the case was quite different: their Governments were practically irresponsible, especially that of the Transvaal, and in the latter Republic sudden access of wealth (due to the "Uitlanders") had given ready means of purchase. They had not to replace a great existing field armament, but to supply themselves practically *ab initio*; and naturally they did so by buying guns of the newest types as far as possible.

As to their field guns, we have, as yet, few exact data, and have principally to judge of their value by their actual effects against our Infantry and Artillery as reported by Press correspondents and otherwise. Prior to the war it was known officially by us that—besides the Maxim and "Pom-Pom" automatic pieces—the Boers had, amongst others, the following new-type field guns—viz., 75 cent. Krupp, 75 cent. Nordenfolt, and 75 cent. Schneider (or Creusot-Schneider), all of about 3 inches calibre, and throwing, it is believed, both common and Shrapnel shell of about 14 lb.; they also had a field howitzer, described further on.

The enemy had six "Schneider" field guns before the war, and it is supposed that they obtained more from France during its progress. The following data were given in the Press as to two of these captured late in the war—viz., weight of gun, 6 cwt.; of carriage, 14½ cwt.; shell, 14 lb.; muzzle velocity, 1850 f.s. Though this gun is lighter than our 15-pr., it has a much higher velocity and much longer range. It is a quick-firer, with hydro-pneumatic brake action, having a very rapid rate of fire—up to a maximum, it is said, of 20 rounds per minute. It is not likely that the maximum rate of firing Shrapnel from our Service 15-pr. exceeded about 1½ rounds per minute. It has been stated by Press correspondents that the Boers rarely used these Schneider field guns in groups, but by single guns posted in different positions, a single gun being difficult to locate, while it could deliver a fire more rapid than the six guns of a British battery altogether.

The remainder of the enemy's field guns were probably not of so perfect a type, but they all apparently had "fixed" ammunition, a higher muzzle velocity, and Shrapnel fuses which could be "set" for the maximum effective range of the gun; their effective ranges with Shrapnel were consequently much greater than our own, and their fire more rapid. They also were furnished—in some cases, at least—with a certain number of common shell.

It may be mentioned here that the battery 4 guns of Vickers-Maxim 12½-pr., taken out by the C.I.V., were furnished with some common shell, and had fuzes for their Shrapnel which could be set to 5,000 yards; they also had "fixed" ammunition, so that both in rapidity of fire and in effective Shrapnel range they were much more on a par with the Boer Field Artillery. It is understood that the Canadian Field Batteries had the same weapon.

So far as can be judged, the ammunition of the Boer field guns was in many cases defective—fortunately for us—and their shooting was often inferior to ours as to finding and keeping the proper ranges; but on the whole they frequently had the best of our field guns until the latter were so much increased—largely to overpower them in numbers.

HOWITZERS AND GUNS OF POSITION.

It was known that the enemy had, prior to the war, besides the field guns mentioned, a certain number of 12 cent. (about 4.7 inch) field howitzers, Krupp and Creusot, with a high velocity, up to a range of at least 6,000 yards. In the very earliest phases of the campaign they brought these pieces into the field with great effect, and until our 5-in. field howitzers arrived we had, until the Navy stepped in, no pieces in the field which could in any way cope with them, though even

then they had probably a greater effective range than our howitzers. We had a few batteries of these latter howitzers organised and equipped, three of which were told off to the Army Corps originally sent out; but unfortunately, as they were technically "Corps Artillery," they were sent out after the remainder of the Field Artillery. Their value seems still to have been doubtful in the eyes of our authorities, and they arrived late in the first phase of the war. As soon, however, as they got to the front their great value was recognised, and further howitzer field batteries were rapidly organised and sent into the field. Their services proved of the greatest importance in the later portions of the campaign. These new-type pieces were equipped with Shrapnel and common shell (charged with lyddite); the latter, however, was the projectile they were intended mainly to employ. The Boer howitzers were not supplied with lyddite shell.

On the part of critics, both in the field and at home, there has been some confusion as to the outranging of our field guns by the enemy's artillery, particularly at the commencement of the campaign. No doubt the Boer field guns proper had the best of our own, at times, for the reasons already given; but what we suffered from especially was the fact of the enemy having the heavy 40-pr. field howitzers (mentioned) available at once, before the arrival of our 5-ins., and also of their having still heavier pieces in the field early in the war with none of which our field guns could for a moment be expected to cope, and which put our field artillery to such serious disadvantage until we, too, brought guns of position to the front. The term "position" artillery (or "guns of position") is rather vague, but it implies generally that the pieces so designated are heavier and more powerful than ordinary field guns, that although they are equipped with wheeled transport the latter is not capable of sufficiently rapid movement for the guns to manoeuvre with infantry, but that it allows of their being moved, in the rear of the troops, to positions from which, at long range, they can exercise, by the power of their fire, considerable tactical effect in battle. The term is a comparative term only, though sufficiently well understood. *Siege train pieces* are of much the same description and often identical with position guns, so far as the lighter natures are concerned, but as they are intended for siege work, when they would be comparatively stationary for a time, they usually have an equipment which renders them less mobile even than guns of position.

We had in England and elsewhere, when the war began, an ample supply of good guns of the above descriptions—some of them of really modern type—more than capable of coping with the Boer 40-pr. howitzers as to range and everything else, and firing lyddite shell; but strange to say none were available in South Africa, nor were any sent out until months afterwards. Had such guns been on the spot at once available for the field for the defence of Ladysmith and other strategic points it was expected we should hold in case of war, matters might have been very different. There were certainly two old-type muzzle-loading howitzers, at least (perhaps more), in South Africa, but they were not the weapons we ought to have had.

A *Siege Train*—embracing new-type 6-inch and 5-inch howitzers and 4.7-inch q.f. guns—was indeed sent out in December, 1899, arriving at

Capetown about the end of the month; and later on a number of 5-inch B.L. and 4.7-inch Q.F. guns were sent, equipped as *guns of position* and manned by R.G. Artillerymen. A few of these arrived in time to take part in Buller's final advance and relief of Ladysmith on the 28th February, 1900. Both there and elsewhere they have proved invaluable, and have in all cases, when available, speedily silenced all the Boer long-range fire, excepting that of the "Long Toms," and even those guns they have kept at a respectful distance. It is very unfortunate for the well-trained Garrison Artillery who man them that the Press has usually confused them with the Naval Brigade.

But they were not available at the commencement of the war, when they might have warded off many catastrophes. Had it not been, indeed, for the ingenuity of the accomplished Naval Artillerist, Captain Percy Scott, C.B., who improvised (and made in a few days) mountings which allowed of 4.7-inch Naval guns and long Naval 12-pr. Q.F. (see Table II.) being used as guns of position, and for the zeal and energy of our Naval officers and men, the case of Sir G. White and our Field Army in Natal when shut up in Ladysmith would have been twenty times worse than it was.

These gallant fellows filled, partially at least, the painful void, on our part, in the way of position guns, and, by the greatest exertions, managed to get into Ladysmith on the 24th October (less than three weeks after war was declared), two 4.7-inch and four 12-pr. Q.F. guns (see Table II.) with a certain proportion of ammunition. They came into action the same afternoon, silenced the Boer 40-pr. howitzers, which were firing at a range of 6,000 yds., and aided the retirement of our troops at the battle of Faquahar's Farm.

As Ladysmith became completely isolated on the 2nd November, these guns, and the gallant Naval Brigade which manned them, arrived just in the nick of time to do magnificent work, and by the power of their long-range fire with lyddite shell, to prevent the Boer guns of position being advanced to closer ranges, where their fire would have been so much more deadly. There certainly were two old-type muzzle-loading 6.3-inch howitzers of the Land Service at Ladysmith (where or whence arrived from not known by us), which did very good work with their 119 lb. shell charged with gunpowder, but it undoubtedly was the naval guns which largely saved the situation here by the moral and material effect of their fire. Further Naval Brigades, with similar Naval guns, accompanied Buller's relieving army, that of Methuen advancing on Kimberley, and subsequently that of Lord Roberts in his advance upon and capture of Pretoria. In every case their services were of the highest importance, and in the earlier phases their guns supplied the astonishing want of new-type guns of position, manned by the Royal Garrison Artillery, which should have been with our Army in the Field.

The Boers had, in the armament of their Forts at Pretoria, etc., a certain number of modern-type 15.5-cent. (about 6-inch calibre) guns, weighing some tons, with a high muzzle velocity, throwing a shell of about 96 lb. to a range of over 10,000 yds. This fact we were well aware of. But, although pieces of that weight were recognised as applicable for siege work, we certainly were not prepared for the Boers taking them out of their Forts into the field and using

them there so successfully — they did as heavy guns of position.

The ease and comparative rapidity with which they brought them up, moved them in the field, and subsequently withdrew them — they retired, was — revelation to us. The reputation which these so-called "Long Toms" achieved showed of what service they were to the enemy.

It is understood that we eventually followed their example and sent up somewhat similar guns to the front, but this was late in the war. Four powerful 9.6-inch howitzers, throwing 283 lb. shell to a range of 9,000 yds., were also bought by our Authorities abroad, taken to Pretoria, and mounted in the Forts there. The Boers, on the other hand, brought these heavy pieces to the front at the very beginning of the war, and employed them with vigour in the field up to the very last. They had, of course, immense advantages, working — they did near their base on interior lines in a friendly country, while our guns of position had to be conveyed 6,000 miles by water and then, in the western war sphere, over 1,000 miles by land, along single lines of rail, through a hostile land. In Natal the land transport necessary was much less, and it was there that our actual deficiency, to begin with, in howitzers and position guns told so heavily against us till the Royal Navy partially made up, as described, the serious gap in our land equipment.

LESSONS TAUGHT.

Very serious are the lessons taught by the Campaign as to Artillery.

It has been shown that we cannot, with impunity, neglect light automatic guns, which have a definite place and value of their own in the field. It has shown that our conservatism, as to Artillery material, has always been too great, and our adoption of improvements too tardy. All this must be changed: our material must be kept abreast of the times, and we must always be prepared to alter at once, if necessary, our old ideas and training to meet new conditions as they arise. The value of field howitzers has been very distinctly proved; but, in the light of our experience, their efficiency will have to be further increased in many details. The vital necessity of having long range new-type guns of position organised in definite units manned by trained officers and men of the Royal Garrison Artillery, and ready at a moment's notice to be put into the field, has been painfully enforced. It has been seen how great are the advantages gained by that side which can earliest bring into the field pieces of that nature as powerful as possible. We must never again be in the fix of having to drain our ships of men and guns which, in a future war, it might be most perilous, if not impossible, to rob them of, and so to lessen the effectiveness of even a single ship of war for its fighting work at sea.

The British Artillery, of every branch, nobly sustained in South Africa its splendid reputation of old. It is for the Nation to see that this magnificent Arm shall not be put to serious disadvantage in the future by being supplied with guns, ammunition and material in any way inferior to those of a possible enemy, and that its numbers shall be equal to all emergencies. And our Artillery armaments for the field must be — formidable in shell power, in really effective range, in accuracy and rapidity of fire, as any with which we may have to contend.

On 21st Oct., 1900, there were 3 Colonels, 1 Lt.-Col., 25 Majors, 109 Captains, and 106 Subalterns, who had risen from the ranks. In addition there were (A) 67 District Officers R.A., (B) 14 Officers of the Coast Battalion R.E., (C) 64 Riding Masters, (D) 597 Quartermasters, (E) 25 Inspectors of Army Schools, (F) 84 Commissioners of Ordnance, whose names are not included, as such officers are always appointed from the ranks. Four Bandmasters are also and Lieutenants in the Army. Commissions in the Army have also been given during the present Campaign in South Africa to 85 of the rank and file of the various Colonial Forces, 23 of the Imperial Yeomanry, 9 of the City of London Imperial Volunteers, and 1 of a Volunteer Company at the front. There are also many distinguished officers on the retired list (e.g., Major-General Luke O'Connor, VC, late Royal Welch Fusiliers, and Col. E. B. McInnis, C.M.G., late 9th Lancers), who began their military careers in the ranks.

Youngusband, 2nd Lt. H. Bedford R.

RECENT events in South Africa having drawn considerable attention to the Dutch Colonial Empire, we propose in this article to offer a brief account of its rise and development and of its past relations with Great Britain. These relations have been neither few nor unimportant. The rise of the Empire owes not a little to the strong, anti-Spanish feeling of the English people and the general trend of Elizabethan policy; its establishment in the Far Eastern seas is associated with one of the most characteristic instances of Dutch cruelty and Stuart incompetence—the massacre of Amboyna; its present existence is due to the generosity of Great Britain, for twice over British arms have occupied the whole of the Dutch colonies, and twice again we have restored them.

Spanish oppression, English sympathy, Portuguese misfortune—these were the forces which created the situation from which the Dutch empire was evolved. Spanish tyranny welded the loosely-knit republics of the Low Countries into a distinct national whole, and turned the stubborn loyalty of the Dutchman into an equally stubborn rebellion. English sympathy, sometimes tacit, more often active, guaranteed the success of the new national movement, while the absorption of the Portuguese dominions by Spain in 1580 offered the necessary field for Dutch enterprise and expansion. The scope of Portuguese colonial enterprise had been defined by Bulls of Pope Alexander VI. (1494 and 1502), and of Leo X. (1514), as well as by the Treaty of Tordesillas (1514). These proceedings exhibit the normal course of international law and diplomacy as then practised in Europe, and were not seriously disputed by any power. Under the terms of this settlement all non-Christian countries to the west of an imaginary line drawn 370 leagues west of the Cape Verde Islands might be occupied by Spain, those to the east by Portugal, while to Portugal fell also the exclusive right of discovery throughout the rest of the globe. History records few achievements of the same brilliance as the consequent Portuguese conquest of the east. Five years (1500 to 1505) made them dominant among the armed merchants of the Malabar coast. The following four years, under Almeida, gave them control of the ocean from the Zanzibar to the shores of India; while the years 1509-1515, under the great but ill-appreciated Alfonso de Albuquerque, established their power in India itself. Thus the single reign of Emanuel the Fortunate saw the Indian Ocean turned into a Portuguese lake, Portuguese fortresses dominating the trade routes from the gates of the Red Sea to the farthest Spice Islands, and Portugal the chief Power in India and the Malay Peninsula alike. "The name of Albuquerque," says Machado, "inscribed upon the stones of the fortresses of Malacca, Ormuz, Calicut, Cochin, and Cannanore is handed down to posterity under the glorious title of Founder of the Portuguese Empire in the East." It would be almost equally true to describe him as the founder of the British India of to day.

This was the inheritance upon which Holland, in large measure, entered. Portugal had been dragged by Spain into her quarrel with the Protestant sea powers, and now became their prey. Between 1595 and 1601 no fewer than fifteen Dutch expeditions sailed for India. England was hardly less active, but, on the whole, it may be said that the more speculative enterprises

directed by the Spanish dominions proper generally fell to England, while the more business-like Dutch attacked the former possessions of Portugal. To some extent this was, no doubt, due to the fact that Portugal had made Antwerp the *entrepôt* for Indian trade with Northern Europe. The progress of the Dutch can only be related in the briefest of terms. By 1602 the various companies of adventurers were reorganised by the States-General into the United East India Company, open to all inhabitants of the Low Countries, endowed for a term of twenty-one years with the exclusive right of navigation to the East of the Cape of Good Hope and the West of the Straits of Magellan, and possessed of sovereign rights in the eastern seas. In the same year the fleet of the Dutch Company routed the Portuguese near Bantam; in the following year they threatened Goa: in 1605 they blockaded Lisbon itself, while in the farthest East they seized the best of the Moluccas, and even captured the Portuguese trade with Japan.

The exclusive possession of the trade with the Moluccas, Amboyna, and Banda now became the dominant note of Dutch colonial policy, a policy which naturally brought them into conflict with England. It is not uncommonly said that their colonial history contains no great name, but that this is untrue will be readily believed by anyone who examines the career of Jan Pieterszoon Coen, who first arrived in Dutch India in 1607. Whether one regards his sagacious internal administration, his development of foreign commerce, or his success in excluding other European powers, it must be admitted that Coen's establishment of the island empire of Holland stamp him as fully the equal of Albuquerque in the sixteenth and Dupleix or Warren Hastings in the eighteenth century. That the massacre of Amboyna in 1623 (for which satisfaction was at length extorted by Cromwell in 1634) was typical of his policy, that he was absolutely without regard for the interests of the natives over whom he ruled, that the dividends of the Dutch Company were secured by the most ruthless exploitation of slave labour, we must admit. Coen did not rise above the morals of his age. He carried into the Farthest East that disregard for human suffering which characterised the Thirty Years' War.

The Dutch Empire thus formed consisted at its height of Java, Malacca, the Moluccas, and the Celebes, with Goree, the Cape, and Ceylon as ports of call. New Amsterdam and small settlements in Southern America marked rather the anti-Spanish feeling of the nation than any determined policy, and the capture of the former by England in 1664 practically terminates Dutch influence in America. The loss of Goree, captured first by England and then by France, was more serious, for the first link of the chain which bound the Eastern Archipelago to the mother-country was thus broken, and the highly lucrative slave trade was taken from Dutch hands. Still, conquest for conquest's sake was not a Dutch maxim, and to this circumstance was due the fact that the Dutch colonial empire remained undisturbed for more than a century after the fall of New Amsterdam.

In 1795 Holland felt the effects of the French Revolution. The Stadtholderate was abolished, the Batavian Republic was proclaimed, and the reigning Prince of Orange fled to Hampton Court. For all practical purposes the Empire of Holland was absorbed in the dominions of France.

England was at war with France, and her action was prompt. In August Malacca was conquered, in September the Cape fell after a slight resistance. In February, 1795, Guyana passed into our hands, the Moluccas, Dutch Guiana, and Curaçao followed in quick succession, and of the great Dutch empire Java alone remained. It, too, was blockaded, and must have fallen but for the conclusion of the Peace of Amiens (1802). Under the terms of this treaty, the whole of her Empire was restored to Holland with the single exception of Ceylon. This treaty, however, did not represent a genuine desire for peace, and war was quickly resumed upon the question of Malta. The fortune of the earlier war repeated itself, and by 1811 the whole of the Dutch colonies were in English hands. Holland had seized the Portuguese possessions in the Far East when Portugal was conquered by Spain. England adopted the same process when Holland was conquered by France. Yet, once more, upon the conclusion of peace the whole of the Dutch possessions were restored, with the one exception of the Cape of Good Hope.

That the retention of Ceylon and the Cape by Great Britain was justified can hardly be doubted. Not the smallest motive of French

ambition had been to secure the routes from Europe to the East. Holland herself was powerless to resist French aggression, and the only policy thus open to Great Britain was to secure the most vital points. Moreover, to the native populations the rule of Holland had not been an unmixed blessing. In Ceylon, for instance, the Dutch administrators had uniformly neglected irrigation works in order to provide a better market for the rice crop of Java. By concentrating the cinnamon trade in Ceylon and the rice trade in Java, Dutch houses made vast fortunes, while the sufferings of the native went for nothing.

What the ultimate issues of our recent war in South Africa will be it is at present impossible to say. This, at least, is clear. In enforcing the clear recognition of her supremacy in South Africa, England is continuing her policy of the Great War, the security of this route to more distant possessions. That Dutch sympathy should be on the side of their fellow-countrymen is not unnatural, but still history certainly shows that England in the past has dealt with Holland in the most generous fashion, while to the native her rule has been a very distinct advantage.

Voters' Qualifications.

I. PARLIAMENTARY ELECTIONS.

1. PROPERTY.

A. England.

i. Freehold Estate of clear yearly value of forty shillings, if owned in fee simple or fee tail, or in occupation, or acquired by marriage, marriage settlement, devise or promotion to a benefice or office.

ii. Lands of any tenure, of £5 clear yearly value, held for life.

iii. Leasehold,

a. of £5 clear yearly value, original term being not less than sixty years.

b. of £50 clear yearly value, original term being not less than twenty years.

B. Scotland.

i. Lands and heritages in proprietorship of £5 yearly value as appearing in the valuation roll.

ii. Leasehold,

a. of £10 clear yearly value, original term being not less than fifty-seven years or for life.

b. of £50 clear yearly value, original term being not less than nineteen years.

C. Ireland.

i. Freehold of £5 net annual value.

ii. Rent charges or leases for life or lives of £10 clear yearly value.

iii. Leasehold,

a. of £10 clear yearly value, original term being not less than sixty years.

b. of £20 clear yearly value, original term being not less than fourteen years.

N.B.—The Property Qualification is confined to Counties and to Boroughs which are Counties Corporations.

MISCELLANEOUS.

Mortgagee. A mortgagee in possession is entitled to vote, but the mortgagee becomes entitled on taking possession.

Trusts. The beneficiary, not the trustee, has the vote.

Joint Owners. Only one may now vote, unless they were all entitled to vote in 1884, or their interests were derived by succession, or they are partners in business on the land owned by them.

Freeholds. Two or more freeholds may be joined to make up the requisite value.

Property in Boroughs. Property situate in a borough, such as would give a vote for the borough, will not give one for the county unless the freeholder be disqualified for the borough vote by non occupation.

Leaseholds. A lessee who has sublet does not lose his right to vote; aliter a lessee who has assigned. To be entitled to a vote, a sublessee or assignee of a sublease must be in actual occupation.

2. OCCUPATION

for twelve months, before registration of lands or tenements within a county or borough entitled the occupier to a vote. This qualification is uniform throughout the United Kingdom.

"Occupier" means one who uses the premises either as a dwelling house or place of business. Continuous occupation is unnecessary, provided the occupier has the exclusive right to occupy. He or some other person must have been during twelve months rated to the poor in respect of the premises, and all poor rates made and allowed during the twelve months preceding January 5th paid on or before July 20th.

Residence required. In English and Scotch counties, and in Ireland, none, but in English boroughs there must be residence during six months of the qualifying year (four months being allowed for absence on duty or employment); in Scotch Boroughs during the whole year in or within seven miles of the borough.

£50 Rental Franchise. This qualification, resting on the occupation of land in counties at a yearly rent of not less than £50, is now virtually obsolete, but persons registered in 1884 with this qualification are entitled to be re-registered from time to time, so long as they retain it.

Service Franchise. Lodgers, licencees and servants do not enjoy the occupation Franchise, as they are neither owners nor tenants, but a servant if allowed to occupy land (only in counties) as a reward for service may be a tenant and therefore entitled.

N.B.—Occupation Qualification extends to any part of a house separately occupied.

3. RESIDENCE.

This Household Qualification is given to the "inhabitant occupier" throughout the United Kingdom (whether he occupies as owner, as tenant, or in virtue of any office, &c.) of a dwelling house (including flats and residential chambers), or any part of a house occupied as a separate dwelling, which has been rated, and for which rates have been paid by a certain date. There need not be actual inhabitaney, but there must be an intention of returning after a temporary absence, and a power of doing so without breach of a legal obligation. So an undergraduate occupying college rooms from which he is excluded during vacation is not entitled to vote, nor a soldier occupying rooms from which he is required to be absent from time to time on duty.

In calculating the twelve months, a period not exceeding four months may be counted during which the house has been occupied and furnished by some one else, or during which the inhabitant occupier has been absent on duty in connection with any office employment, etc.

Occupation in immediate succession of different premises in the same parliamentary county or borough, is equivalent to continued occupation of the same premises during the qualifying period.

N.B.—This rule applies both to Occupation and Residence.

4. LODGERS.

This qualification belongs to anyone in the United Kingdom who has resided in the same lodgings for twelve months next preceding July 15th, such lodgings being of the clear yearly value, unfurnished, of £10. The Lodger is not disqualified because he has occupied different lodgings of the requisite value in the same house, nor because he occupies them jointly with another lodger, if the aggregate value is sufficient.

5. FREEMEN.

Reform Act, 1832, left the franchise to freemen of towns in which, prior to 1832, such qualification gave a right to vote, but only to those who have acquired freedom by birth or servitude, and who, during the year preceding claim, have resided in or within seven miles of the town.

In the City of London a freeman, to obtain a vote, must also be a Liveryman of one of the City Companies. He may also acquire freedom by purchase, and may reside within 25 miles of the place of poll.

6. THE UNIVERSITIES.

Graduates on electoral roll of Oxford, Cambridge, Dublin, and London, the Chancellor, the Professors, the members of the University Court and General Council of Edinburgh, Glasgow, St. Andrew's, and Aberdeen, are qualified to vote for their respective Universities.

Registration.

i. Property Voter must claim in order to get on to the Register, but once there he need not make a fresh claim. He must have been in possession, or receipt of rents, in case of freeholds for six, leaseholds for twelve calendar months prior to July 15th in the year in which they claim to be registered. This is not necessary where the qualifying property is freehold, and has been acquired by marriage, marriage settlement, etc.

ii. Occupiers need not claim at all, unless omitted by the Overseers, whose duty it is to register their names.

iii. The Lodger Voter has to claim afresh every year.

Claims for the Old Lodgers' List must be sent

in by July 25th, all other new claims by August 20th. The Register, when made up, comes into force on the ensuing January 1st, unless accelerated by special legislation.

Disqualifications.

Aliens, idiots, lunatics (except during lucid interval), infants, peers (except Irish actually elected and serving in the House of Commons), convicted felons (until freed by pardon or otherwise), persons convicted of corrupt practices, either at Parliamentary or Municipal Elections (seven years from date of conviction), and School Board Elections (six years from date of election), persons convicted of illegal practices at Parliamentary and Municipal Elections (five years from date of conviction), persons employed at elections, or within six months before, for pay or reward, bankrupts, persons in receipt of parochial or other relief, persons with fictitious or collusive qualifications (e.g., ragot voters), corporations, returning officers (unless the votes are equal), corporations, and women.

II. MUNICIPAL AND COUNTY COUNCIL ELECTIONS (ENGLAND AND WALES).

A. CITY OF LONDON.

1. Election of Lord Mayor, Sheriffs, and Chamberlain.

The Electors are (a) Freemen and (b) Liverymen.

2. Election of Aldermen, Common Councilmen, and Ward Officers.

The Electors are (a) Freemen occupying premises in the city, and rated in that respect at not less than £10 per annum. (b) Male persons who have occupied for twelve months premises in the city, and are similarly rated. (c) Persons registered as Parliamentary Electors for the city by virtue of the borough occupation Franchise. (d) Persons otherwise entitled to be registered as Parliamentary Electors for the city, but disqualified by non residence.

B. OTHER BOROUGHS AND COUNTIES.

1. Election of Mayor or Chairman.

The Electors are the Aldermen.

2. Election of Aldermen or County Aldermen.

The Electors are the Councillors or County Councillors.

3. Election of Elective Auditors.

The Electors are the Burgesses. This, however, does not apply to County Councils, whose accounts are audited by district auditors appointed by the Local Government Board.

4. Election of Councillors or County Councillors.

The County Electors, together with the burgesses of every borough within the county form the Electorate for the County Council. A qualification which in a Municipal Borough would entitle a person to be a Burgess will, if held in a county, entitle him to be a County Elector.

The Municipal Franchise differs from the Parliamentary Borough Franchise in two important particulars—

a. The Franchise is, except in case of land, irrespective of the value of premises occupied.

b. Women may vote

The qualification are—

i. Occupation in the borough of a building of any value, or of land of the clear yearly value of £10.

ii. Residence in or within seven miles of the borough.

iii. Being rated and paying rates.

There are two additional qualifications for the County Franchise—

- i. Being a peer owning property in the county.
- ii. Being registered as an ownership voter for Parliament in a county.

Disqualifications.—These are the same as in the case of Parliamentary Electors, except that peers, women, bankrupts, and persons with fictitious qualifications are not disentitled. Women may not vote in the City of London.

III. PARISH COUNCILS ELECTIONS (ENGLAND AND WALES).

The Electors are the "Parochial Electors," i.e., those persons registered in such portion, either of the Local Government Register (*see* II.), or the Parliamentary Register (*see* I.) of Electors, ■ relates to the parish.

N.B.—A woman is not disqualified by marriage from being on any Local Government Register of Electors, but husband and wife cannot both be qualified in respect of the same property.

IV. DISTRICT COUNTY ELECTIONS, URBAN AND RURAL (ENGLAND AND WALES).

The Electors are the "Parochial Electors" of the parishes in the district.

V. LONDON BOROUGH COUNCILS.

The Mayor is elected by the Aldermen, the Aldermen by the Councillors, and the Councillors by the "Parochial Electors."

VI. SCHOOL BOARD (ENGLAND AND WALES).

1. Boroughs outside the metropolis.

The Electors are the same as those in II. B., 4. (Boroughs).

(N.B.—Wenlock and Oxford are not included, the former being treated as ■ parish, the latter having a specially elected Board.)

2. Parishes outside the metropolis and boroughs.

The Electors are the ratepayers (actual or constructive).

3. In the metropolis.

a. In the city.

The Electors are the same as in II. A (2).

b. In the other divisions.

The Electors are the ratepayers, or in certain places, *viz.*, the close of the Collegiate Church of St. Peter, the Charter House, Inner Temple, Middle Temple, Lincoln's Inn, Gray's Inn, and Staple Inn, persons assessed to the last rate or contribution in the value of a rate in respect of such place.

Disqualifications.—Persons guilty of corrupt and illegal practices, to the same extent ■ Parliamentary Electors, the persons mentioned as disqualified in II. B., and married women. Unmarried women may vote, except in the City of London.

CANDIDATES' QUALIFICATIONS.

I. PARLIAMENTARY ELECTIONS.

The following are not eligible: Aliens, women, minors, lunatics, English and Scotch peers, Irish representative peers, judges, the holders of various offices, clergy of the Established Church, and of the Roman Catholic Church, and ministers of the Church of Scotland, Government contractors, persons holding pensions of the Crown (other than diplomatic and civil service), convicted felons, and bankrupts.

II. MUNICIPAL AND COUNTY COUNCIL ELECTIONS.

1. Mayor or Chairman must be chosen from the Aldermen or Councillors, or persons qualified to be such.

2. Aldermen must be Councillors or persons qualified to be such.

3. Elective Auditors must be qualified to be Councillors, but not members of the Council, town clerk, or treasurer.

4. Councillors must be, and entitled to be, burgesses, resident within seven miles of the borough, or within fifteen miles, if they possess a property qualification of £1,000, or the persons qualified to elect to the office of Councillor.

Disqualifications.—Officers on the active list, bankrupts, persons convicted of crime or corrupt or illegal practices, and women are disqualified for all corporate office. A person is disqualified for election as Councillor if and while he is an elective auditor, or revising assessor, or holds any office of profit other than that of Mayor or Sheriff under the Council, or is directly or indirectly interested in any contract or employment with or on behalf of the Council.

N.B.—Clerks in holy orders, and other ministers of religion, are qualified for election as County (but not Borough) Councillors or Aldermen.

III. PARISH COUNCIL ELECTIONS.

Persons eligible are: "Parochial electors," or persons who have resided during the whole twelve months preceding the election in or within three miles of the parish. Persons may be disqualified by receipt of parochial relief, bankruptcy, crime, tenure of ■ paid office under the Council, or pecuniary interest. Women, married and unmarried, are eligible.

IV. DISTRICT COUNCIL ELECTIONS. (URBAN AND RURAL.)

1. *Urban.*—In urban districts, which are boroughs, the Municipal Council is the District Council. Elsewhere, the Urban District Councillors must be either "parochial electors" of some parish within the district, or persons who have, during the whole twelve months preceding the election, resided in the district.

2. *Rural.*—The District Councillors must be either "parochial electors" of some parish with a union comprising the district, or persons who have, during the whole twelve months preceding the election, resided in the union, or, if the parish be wholly or partly situate within the area of a county borough or other borough, is qualified to be elected as ■ Councillor for that borough.

Disqualifications are the same as in III.

V.—LONDON BOROUGH COUNCIL ELECTIONS.

A person is not qualified to be elected a Borough Councillor unless he—

1. is a Borough Elector of the borough;
2. has, during the whole twelve calendar months preceding the elections, resided in the borough.

The qualifications for Mayor and Borough Alderman are the same as those given in II., 1 and 2.

Women are ineligible for office. Otherwise the disqualifications are the same as in III.

VI. SCHOOL BOARD ELECTIONS.

No qualifications necessary, but aliens, etc., are disqualified. So, too, are women, but they are sometimes elected without objection. Any member absenting himself, except for illness or other cause approved by the Board, for six months from all meetings of the Board, vacates his seat.

N.B.—A similar provision applies to London Borough Councillors.

HISTORY.

THE XIXth Century, which commenced Jan. 1, 1801, saw Ireland legislatively united to England, the Act of Union coming into operation the first day of the New Year. Gt. Britain was still at war with France, opposed by Napoleon, the First Consul. The struggle had already continued for eight years, and at the beginning of the new century England was fighting single-handed against her Gallic foe. Austria had opened negotiations with Napoleon since the defeat of Hohenlinden (Dec. 1800), and made the Peace of Lunéville (Feb. 1801), the Czar of Russia had formed the League of the Baltic, and Sweden, Denmark, and Prussia had declared an "Armed Neutrality." It was a period of great strain, but the true grit of the English nation manifested itself in spite of all difficulties. The harvest of 1800 had been a bad one, wheat, which in 1793 (the first year of the war) was 49s. per quarter, rose in 1800 to 113s. (in 1801 it was 103s., in 1812, 122s.), wages were falling rapidly, the prices of all commodities had greatly risen, especially those of bread and meat, causing riot and discontent amongst the poor; taxes were oppressive, and the expenses of the war had added enormously to the National Debt.* Consols in 1801 had fallen to 62. Trade was much depressed. The Irish Rebellion of 1798, although repressed, had left behind a feeling of hostility to England, the Act of Union was unpopular, and disappointment was occasioned by the non-fulfilment of Pitt's far-seeing and statesmanlike policy of granting emancipation to Roman Catholics—an act of justice not conceded until 1829. To his honour, on George III.'s refusal to sanction his policy of justice and reconciliation, Pitt resigned office, and a new ministry under Lord Addington was formed, by whom the short-lived peace of Amiens (1802) was concluded between Great Britain, France, Holland and Spain. The news of Napoleon's projected invasion of our coasts aroused a spirit of patriotism throughout all the country, and a number of volunteers were enrolled for its defence. War was again renewed with France (1803 to 1814), and, during the administration of Pitt, the French and Spanish Fleets were defeated by Nelson at Trafalgar (1805). On the death of Pitt (1805) Fox became Premier of the "Ministry of All the Talents," which during its year of office passed a resolution condemning the Slave Trade, embodied in an Act the next year (1807) for its abolition. Foiled in their attempt, by the prejudice of the King, to pass a measure to permit Roman Catholics to hold higher commissions in the Army, the Ministry resigned and were succeeded by that of the Duke of Portland (1807). In 1806 Napoleon crushed the Prussians at Jena, and issued the Berlin Decrees, which declared the British Islands to be in a state of blockade, and ordered all Englishmen found in countries occupied by French troops to be treated as prisoners of war. In reprisal the British Government, by "Orders in Council," declared all vessels trading with France to be liable to seizure, and that such vessels clearing from a hostile port must touch at a British port to pay Custom dues. Napoleon, by his "Milan Decree" (1807), prohibited neutrals to trade in any article imported from any part of the British dominions. The enforcement of the "Orders in Council," and the claim of the British

Government to impress British seamen serving on board American ships, led to war with the United States (1812). It was brought to a close by the Treaty of Ghent (1814). The year 1812 was a memorable one, for it witnessed the disastrous retreat of Napoleon from Moscow. In 1813 he was defeated at Leipzig. Wellington was victorious at Salamanca (1812) and Victoria (1813). In 1814 Napoleon was exiled to Elba, and on his escape and collecting a fresh army, suffered his final overthrow at Waterloo (1815) and ended his days on the Island of St. Helena (1821). A period of great depression set in after the conclusion of the war, during which, on the whole, trade had been prosperous, due to the virtual monopoly of English traders and agriculturists, but the working classes had suffered greatly from the high prices of commodities and the introduction of machinery, and the agricultural industrial poor were on the verge of starvation. Mobs, driven to desperation, burnt ricks and destroyed machines, and many excesses were committed by the "Luddites." To prevent foreign competition with the farmer, in 1815 a Corn Law was passed prohibiting the importation of corn until the price of wheat had risen to 80s. per quarter. The influence of the principles of the French Revolution, and discontent that the grievances of the people were unrepresented in Parliament, occasioned the Spa Fields Riots, which led to the suspension of the Habeas Corpus Act, and the issue by the Home Secretary, Lord Sidmouth, of a circular to the Lords-Lieutenant of Counties "authorizing magistrates to apprehend persons accused of libellous publications." Agitation for Parliamentary reform was advocated in the House of Commons by Sir Francis Burdett, M.P. for Westminster, and out of it by William Cobbett, in his "Weekly Political Register," advocating universal suffrage and annual parliaments. Prior to the first Reform Bill, large manufacturing towns, as Liverpool, Manchester, Birmingham, and Leeds, had no representation, while a "rotten borough" like Old Sarum sent members to Parliament. Great meetings of working men were held all over the country, and were sought to be repressed by the Government, and proclamations were issued against seditious meetings. A meeting at St Peter's Field, Manchester, to petition Parliament for reform was dispersed by soldiery, and several persons killed and many injured (1819). Parliament supported the Ministry (that of the Earl of Liverpool), and passed the "Six Acts" (1819-20) to suppress seditious meetings and publications. The following year (1820) occurred the Cato Street Conspiracy, the death of George III., and the accession of George IV. Our beloved Queen Victoria was born the previous year (May 24, 1819).

During the reign of George IV. agitation for the reform of the House of Commons continued, and was taken up by the Whig party (the Tory party had been in office 1807-1830), under its leaders, Lord Grey and Lord John Russell, but unsuccessfully. Several useful measures were, however, passed. The old Navigation Laws, which prohibited trading with England and her colonies except in British ships, were practically repealed by Huskisson, President of the Board of Trade; reciprocity treaties favourable to our commerce were concluded with foreign countries, and taxes on articles imported into England were reduced, thus placing trade on a sounder and more prosperous basis. The year 1825 had been marked by great commercial depression, and

*The total cost of the war with France was £330,000,000, adding £600,000,000 to the National Debt.

a commercial panic took place. By the efforts of Lord Romilly punishment by death for many slight offences, under the old Criminal Law, was abolished. The repeal of the Test and Corporation Acts passed in the reign of Charles II., gave relief to Nonconformists; while the Catholic Emancipation Acts (1829) forced upon the Government by the agitation of O'Connell, who in 1823 formed the Catholic Association for political equality, admitted Roman Catholics to sit in Parliament. The unhappy divorce dispute between the King and Queen Caroline occasioned much excitement, and made the Ministry very unpopular by its introduction of a Bill of Pains and Penalties, which, however, proceeded no further than the House of Lords, where it passed by a small majority.

The reign of William IV. (1830-37) is memorable for the passing of the first Reform Bill (1832) in Earl Grey's Ministry, after much opposition and agitation. By it 143 members were taken away from the small boroughs; of these 65 were given to the counties, 2 members each to Birmingham, Manchester, Leeds, Sheffield, and eighteen other large towns. The number of voters in the counties was increased, and occupiers of a house of the annual value of £10 became qualified to vote for borough members. The Reform Bill practically invested the middle class with the control of the representation of the House of Commons. Other important measures passed (1833) were the Act for the Abolition of Slavery, granting the planters of the West Indies £2,000,000 as compensation; the Factory Act, introduced (1833) by Lord Ashley (afterwards Earl of Shaftesbury), prohibiting the employment of children under the age of nine; the Poor Law Amendment Act (1834) by which administration of out-door relief, which had been much abused, was reformed, workhouses provided for the destitute, and parishes arranged in unions; an Act for the Reform of the Irish Church (1833); the founding of a system of National Education in Ireland (1834); the Tithe Commutation Act (1836), commuting the tithes in a rent-charge based on the average price of corn for the seven preceding years; the Municipal Act (1835) in Lord Melbourne's second Ministry, which gave to the boroughs a uniform system of government under a mayor and town council by election of councillors by the ratepayers, the governing bodies of towns having previously been close bodies filling up vacancies in their own ranks (the Corporation of London was exempt from the provisions of the Act). In 1835 the duty on newspapers was reduced to *id.*, thus largely increasing their circulation, and the same year the House of Commons began the publication of its debates. In foreign affairs the Canning Administration, in alliance with the Czar Nicholas I. of Russia, supported the Greeks in their revolt against Turkey, and at the Battle of Navarino (1827) the combined fleets of England, Russia and France, under Admiral Codrington, defeated the Turkish and Egyptian fleets, thus giving independence to the Greeks, which was secured by the Treaty of London (1827). The year 1830 was notable for revolutionary movements in Europe. The French drove out Charles X., and elected Louis Philippe, Duke of Orleans, the Poles rose unsuccessfully against Russia, and Belgium withdrew from Holland. Lord Palmerston Foreign Secretary pursued a liberal policy, and with Portugal, Spain and France formed a Quadruple Alliance to counteract

the absolutism of Russia, Prussia, and Austria. In 1836 South Australia was first colonised, its capital taking its name from Adelaide, Queen of William IV. In 1837 Natal was founded.

In 1837, Queen Victoria came to the throne; her long reign of 63 years is one of the longest on record, excepting that of Louis XIV. of France. By the Salic law, which prohibits a woman reigning, the connection between England and Hanover, which had existed since 1714, ceased, and the Duke of Cumberland, uncle of the Queen, became King of Hanover. In 1840, the marriage of the young Queen with Prince Albert of Saxe-Coburg, her cousin, took place; and the same year the Penny Post was instituted by Sir Rowland Hill, Postmaster-General. Pitt's Act of 1791 had divided Canada into two parts, Lower Canada, occupied chiefly by descendants of the French, and Upper Canada, colonised by English and Scotch settlers and loyal Americans. Each of these States was governed by a separate legislature, presided over by a Governor. Friction continually occurred between the legislative and executive governments, the latter being supported by the Crown. In 1837 Lower Canada revolted, but the rebellion was easily suppressed. The colonists were appeased by the legislative union of the two Canadas, whose loyalty has recently been displayed by the conspicuous bravery of its sons in the present Boer War. The weakness of Lord Melbourne's Administration gave rise to agitation of a twofold kind: that of the manufacturers, who wished to abolish the corn laws, and the Radicals who desired the extension of parliamentary representation and reform. Feargus O'Connor, M.P., Hetherington, Vincent, and Lovett, working men, led the movement (1838) for reform; from the embodiment of their views in a Charter they were named "Chartists." They demanded universal suffrage, vote by ballot, annual Parliaments, payment of members, abolition of the property qualification, and equal electoral districts. The movement continued more or less active with popular assemblies, presentations of monster petitions, and occasional tumults, including an attempt at rebellion (1839) at Newport, S. Wales, until 1843, when it was suppressed. On the defeat of Lord Melbourne's Ministry (1841) and the return of a majority of 85 Conservatives, as the Tories now began to be called, at the General Election, Sir Robert Peel became Premier, the Cabinet including the Duke of Wellington, who led the Lords; Lord Lyndhurst, Lord Chancellor; Lord Aberdeen, Foreign Secretary; Lord Stanley, Secretary for War and Colonial Secretary; Sir John Graham, Home Secretary, Mr. W. E. Gladstone, Vice-President of the Board of Trade, and subsequently President of the Board of Trade. In this year the Prince of Wales was born (Nov. 9). The principal events of Sir R. Peel's Administration are the first Afghan War, in which our troops were treacherously massacred at Cabul (1842); the war and annexation of Scinde; the first Sikh war, in which at Aliwal and Sohraon (1846) the Sikhs were defeated; on the renewal of hostilities (1849) they were overcome at the battles of Chillianwallah and Goojerat, and the Punjab was annexed by the East India Company. During 1843 the secession from the Established Church of Scotland took place, and the Free Church founded. The Maynooth grant, made since 1795, to aid the maintenance of the Roman Catholic College, was (1844) increased by Sir Robert Peel. On account of his opposition to this measure Mr.

Gladstone left the Ministry. In 1842 Sir Robert Peel took the duty of a large number of small articles (at this period there were no less than 1,200 dutiable articles), and introduced in their place an income-tax for a limited period. The Anti-Corn Law League, formed (1838) by John Bright and Richard Cobden for the abolition of all duties on corn, carried on an active propaganda for this repeal. Sir Robert Peel, who in 1842 and 1843 had arranged a sliding scale of duties, was convinced by the succession of bad harvests, and the Irish Famine of 1845 (during which grants amounting to £10,000,000 were voted by Parliament for the sufferers (1847), that the Corn Laws must be repealed, and in spite of the opposition of his own party carried the measure (1846). The opposition of the agricultural interest, under the leadership of Lord George Bentinck and Mr. Disraeli, joined the Whigs in voting against the re-enactment of the Arms Act, caused by the disturbed state of Ireland, and Lord John Russell, on the resignation of Sir Robert Peel, became Premier, with Lord Palmerston as Foreign Secretary. Reference has been made to the Chartist agitation and its suppression in 1848. This year was marked by revolutions in France, Germany, Austria, and Italy, and by the Young Ireland movement, leading to the arrest of Mitchell, editor of the *United Irishman*, and others for felonious writings, speeches, &c. The Habeas Corpus Act was suspended, and Smith O'Brien's rebellion suppressed and its ringleaders transported. In 1849, Parliamentary institutions were granted to the Australian colonies, and the Navigation Laws, modified by Huskisson, were repealed. The Papal brief (1850), establishing a Roman Catholic hierarchy in England in place of the previous vicariates, occasioned great excitement, and led to the passing of the Ecclesiastical Titles Act, 1851 (repealed 1871). The opening of the first "Exhibition" in Hyde Park, and the arrival the same year (1851) of gold from Australia, are landmarks in the industrial and commercial history of the country. The successful *coup d'état* of Louis Napoleon, and his assumption of the title of Emperor of the French, occasioned the fear that the Napoleonic "idea" might be revived, and led to the introduction by Lord John Russell of a Bill to reorganise the militia. On the defeat of the Government by Lord Palmerston, who had resigned office, the Earl of Derby became Premier, with Mr. Disraeli as Chancellor of the Exchequer (1852). The short-lived administration of Earl Derby was succeeded by the coalition Ministry of the Earl of Aberdeen, with Mr. Gladstone as Chancellor of the Exchequer, Lord John Russell as Foreign Secretary (afterwards 1853 by Earl Clarendon), and Lord Palmerston as Home Secretary. In 1854 England entered into an alliance with France in defence of Turkey against Russia, and the Crimean War began 1854. The principal engagements were the battles of the Alma (Sept. 20), Balaklava (Oct. 25), Inkerman (Nov. 5), fall of Sebastopol (Sept. 8, 1855). A motion for inquiry into the mismanagement of the war, brought forward by Mr. Roebuck, led to the resignation of the Aberdeen Ministry, and the accession as Premier of Lord Palmerston (1851). Peace was proclaimed with Russia 1856. War occurred with China (1856-58) in consequence of an outrage to the British flag. The same year war (1856-57) began with Persia, the Persians having taken Herat. The Indian Mutiny which broke out (1857) was stringently and heroically suppressed,

and in 1858 a Bill was passed transferring the powers of the East India Company to the Crown. In 1877 the Queen took the title of Empress of India. Except for a short interval in 1855, when the Earl of Derby became Premier but was defeated on the Reform Bill introduced by the Government, Lord Palmerston held office until 1865, his domestic policy being characterised by inaction, and his foreign policy by non-intervention. In 1855 Cobden negotiated a commercial treaty with France for the lowering of the Customs duties. The following year the duty on paper was abolished. During the Palmerston Administration the rising in Italy under Garibaldi took place; and France joined Sardinia against Austria, defeating the latter in the battles of Montebello, Magenta, and Solferino. In 1861 Victor Emmanuel was proclaimed King of Italy. The Civil War in America broke out the same year, and strained relations between the British Government resulted from the forcible seizure by Capt. Wilkes, of the U.S. Navy, of Messrs. Slidell and Mason, commissioners sent by the Confederate Government to England, from the Royal British Mail steamer *Trent*. The Prince Consort died December 14th amidst the universal regret of the nation. In 1862 the second International Exhibition was opened at South Kensington, and owing to the Civil War great distress was felt in the cotton manufacturing districts, and special relief funds were raised for the sufferers. In 1863 the Prince of Wales was married (March 10th) to the Princess Alexandra of Denmark. War broke out between Austria and Prussia in 1865. The growing demand emphasised by large meetings and demonstrations of trade unions on the part of workmen in the large manufacturing towns for the extension of the franchise, led to the passing of the second Reform Bill of 1867 in the third Derby Administration, which largely extended the Franchise. The following year, a Redistribution of Seats Act was passed, as were also the Scotch Reform Bill and the Irish Bill. The year 1868 was also marked by the publication in December, for the ensuing year, of the first number of WHITAKER'S ALMANACK, which immediately gained the premier place amongst books of reference. The third Reform Bill of 1884, introduced by Mr. Gladstone, then Premier, extended household and lodger suffrage to counties uniform with boroughs, and added some 2,000,000 additional voters. By the Redistribution of Seats Act (1885) boroughs with less than 15,000 inhabitants ceased to return members, the 160 seats obtained by disenfranchisement were divided among counties and boroughs unrepresented, constituencies under 50,000 inhabitants to return one member; over 50,000 two members. Certain counties and boroughs were formed into new sub-divisions returning one member. The total number of members was raised from 652 to 670. War with Abyssinia arose (1867), arising out of the ill-treatment of Dr. Stern, a missionary, and the imprisonment of Captain Cameron, the Consul, and others, by King Theodore. In 1873 the Ashanti War was successfully conducted by Sir Garnet (now Lord) Wolseley against the King, Koffie Kalcalli. The Gladstone Government, which came into office 1868, passed a Bill for Abolishing Compulsory Church Rates, and carried the Bill for the Disestablishment of the Irish Church (1869); and the following year the first of a series of Acts was passed having for their object to secure to tenants the value of their improve-

ments on their lands, to prevent eviction, and to aid them in purchasing their farms. The increase of Fenianism, or the Irish Republican Brotherhood, a secret society which arose in 1863 in Ireland and among the Irish Americans, under Stephens, caused disorder and outrages among the Irish peasantry. The attempted invasion of Canada from the United States, 1856, proved abortive, as were also some outbreaks in England in 1857, but the increase of agrarian crimes in Ireland led to the passing of a series of Coercion Acts, which invested the Government with great powers. Among the Acts passed by the Government were the important Education Act (1870) introduced by Mr. Forster for the election of School Boards; the University Test Act (1871) which permits Roman Catholics to take degrees at Oxford and Cambridge (1871), the Ballot Act (1872), and the Supreme Court of Judicature Act (1873). Purchase of Commissions in the Army was abolished by Royal Warrant (1871). During the second Administration (1874-80) of Mr. Disraeli (created Earl of Beaconsfield 1876) the Public Worship Regulation Act was passed (1874); the Khedive's shares in the Suez Canal were bought by the British Government (1875), the Queen was proclaimed "Empress of India" (1877). The same year the Turkish atrocities in Bulgaria excited much indignation, accentuated by the publication of Mr. Gladstone's "Horror in Bulgaria" and speech at Greenwich. In the Russo-Turkish War the Ministry exhibited a firm and warlike policy, a fleet was sent to the Dardanelles, the reserves were called out, and Indian troops sent to Malta as a counter movement to the Russian advance on Constantinople. Lord Salisbury's circular indicting the Treaty of San Stefano led to a Congress of the European Powers at Berlin (1878), England being represented by the Earl of Beaconsfield and the Marquis of Salisbury. By the Berlin Treaty the Eastern Question was settled for a time, the Great Powers guaranteeing the safety of the Christian subjects of the Sultan, and Cyprus became a British possession. Among other events about this period may be noticed the visit of the Prince of Wales to India, 1875; the marriage of the Duke of Edinburgh to the Grand Duchess Maria of Russia (1874); the death of the Grand Duchess of Hesse (Princess Alice) by diphtheria, and the announcement by Mr. Gladstone of his contemplated retirement from the Liberal leadership, to which Lord Hartington succeeded (1874). The Refusal of the Amir to receive Sir Louis Cavagnari, sent as British envoy to Cabul, and his subsequent murder, occasioned the second Afghan war (1839), successfully carried out by General Sir F. (now Lord) Roberts. In 1879 war with the Zulus broke out. The years 1878-79 were characterised by great commercial depression. The General Election, 1880, gave the Liberals a large majority. Mr. Gladstone for the second time became Premier. The revolt of the Boers against the annexation of the Transvaal and the defeat of our troops at Majuba Hill, led Mr. Gladstone to rescind the annexation (1881), reserving only the suzerainty of England in foreign affairs.

The chief measures carried by the Government in 1880 were the Burials Bill, the Ground Game Bill, the Employers' Liability Bill, and the Relief of Distress Bill (Ireland). The rejection by the Lords of the Compensation for Disturbance increased agrarian agitation, characterised by "boycotting" and outrages. Mr. Forster, Secretary for Ireland, introduced, in 1881, a stringent

Coercion Bill. Mr. Parnell, leader of the Irish Home Rule Party, opposed the Bill vigorously, and, with his followers, pursued a policy of "obstruction" in the House. Attempts were made by Fenians to blow up the Mansion House, London, Liverpool Town Hall, and Salford Barracks by dynamite. Mr. Parnell was arrested for sedition later in the year, but was released from Kilmainham Prison the following year. Concurrently with the passing of the Coercion Bill, an Irish Land Bill, by which rents were fixed by a Land Court, was carried by the Government. The year was also marked by the death of the Earl of Beaconsfield, and the assassinations of the Czar, Alexander II., and President Garfield. The murder, by "Invincibles," of Lord Frederick Cavendish, who had become Chief Secretary for Ireland on the resignation of Mr. Forster, and Mr. T. H. Burke, in Phoenix Park, Dublin (1882), led to the passing of a stringent measure, the Prevention of Crimes Bill. The Land League, which was suppressed, was succeeded by the National League. The "Fourth Party," led by Lord Randolph Churchill, harassed the Government. The same year the intervention of Great Britain in the affairs of Egypt, in which country England and France had exercised a dual control, led to the bombardment of Alexandria by the British fleet, and the sending of an army into Egypt to suppress an insurrection headed by Arabi Pasha. Arabi was defeated at Tel-el-Kebir by Gen. Wolsley, but another insurrection under the Mahdi breaking out in the Soudan caused British troops to be sent to Suakim, and another force despatched by way of the Nile to relieve Gen. Gordon, whom the Government had sent to withdraw the garrisons on its determination to abandon the Soudan. Gen. Gordon was besieged by the Mahdi at Khartoum, an expedition was sent (1884) to relieve, but owing to delay it failed to reach Khartoum in time, and Gen. Gordon was killed (1885). Great indignation was excited in England, and a vote of censure on the Government respecting Egypt was passed by the Lords but rejected in the Lower House. Mr. Gladstone's Ministry was (1885) defeated on the Budget, and Lord Salisbury took office. The Duke of Albany (Prince Leopold) died, 1884. The return of a large number of Irish Home Rulers at the General Election, 1885, giving them the balance of power (Liberals 332, Conservatives 250, Home Rulers 86), Mr. Gladstone, who came into office again for the third time (1886), introduced a Home Rule Bill for Ireland, which proposed to alter the Act of Union, and, among other things, to establish a Parliament at Dublin for the transaction of all Irish affairs, the Irish peers and members ceasing to sit at Westminster except when the constitution of the Irish Government was under consideration. A Land Purchase Bill was also proposed to advance a sum of money to enable tenants to purchase the estates of Irish landlords at a value based on the judicial rents of the Land Act of 1881. The determined opposition of many of his more influential followers, including Lord Hartington, Mr. Joseph Chamberlain, Mr. Goschen, and others, who supported the Conservatives against the Home Rule Bill, caused the rejection of the Bill by a majority of 30 on its second reading. The Liberals who withdrew from Mr. Gladstone formed themselves into the Liberal-Unionist party. The election (1886) gave the opponents of Home Rule a majority of 100. Lord Salisbury, for the second time, became

Premier, with Lord Randolph Churchill as Chancellor of the Exchequer, and on his sudden resignation Mr. Goschen succeeded him with Mr. W. H. Smith as leader of the House of Commons. The Liberal-Unionist party, under Lord Hartington, co-operated with the Conservatives. Violent agitation, amounting almost to a civil war, took place in Ireland. The enforcement of the Crimes Act (1837) which Mr. A. J. Balfour, as Chief Secretary for Ireland, administered with energy, counteracted the operations of the Land League in its "Rent War" and "Plan of Campaign." The same year a conference in London, summoned by the Government, of delegates from the self-governing Colonies took place; the Colonial and Indian Exhibition had been held the previous year. The principal measures passed during the Salisbury Administration were in addition to the Crimes Bill and other measures for the pacification of Ireland, the Local Government Act, which abolished the Metropolitan Board of Works and made London a county, and also created County Councils (1888), Employers' Liability Bill (1838), Tithes Bill (1839), and a new Elementary Education Act (1891), the effect of which is practically to abolish school fees. In 1889 the Parnellite Commission sat. In 1891 the death of Mr. W. H. Smith occurred, and Mr. A. J. Balfour succeeded him as Leader of the House. Defeated at the general election (1892), the Conservative Government resigned, and Mr. Gladstone again took office for the fourth time. Among other events should be mentioned a riot in Trafalgar Square (1886); the annexation of British Beluchistan to India, and East Zululand to Natal (1887); the Socialist demonstration; the Crofter agitation (1887); the death of the aged German Emperor William I. and of his son Frederick II., both in 1888; the Centenary International Exhibition at Paris (1889); the death of Mr. John Bright, and the visit of the German Emperor to the Queen, 1889; the commercial crisis in the City and dock labour strikes, and the "Lincoln Judgment" in 1890; and the death, in 1892, of the Duke of Clarence. The year 1887 was memorable for the Jubilee of our Queen, which evoked the strongest expressions of loyalty to the Throne from all classes of Her Majesty's subjects, renewed with the same enthusiasm on the occasion of the Queen's "Diamond" Jubilee in 1897. Mr. Gladstone's attempt (1893) to pass his second Home Rule Bill, although successful in the Commons, was rejected by a very large majority in the Lords. A Suspensory Bill preparatory to the Disestablishment of the Church in Wales was introduced but not proceeded with; the Parish Councils Bill (1894) extending local self-government to parishes, was passed. On the resignation of Mr. Gladstone and his retirement from public life in 1894, Lord Rosebery became Premier, but held office only for a short time, the Government being defeated on a vote in Supply, and was succeeded by Lord Salisbury as Prime Minister and Foreign Secretary, with Mr. A. J. Balfour as First Lord of the Treasury and Leader of the House, and Mr. Joseph Chamberlain as Colonial Secretary. On appeal to the country, the Conservatives were returned (1895) by a majority of 152. In 1893 the Duke of York was married to the Princess "May" of Teck. The principal measures passed by the Government since it has held office are the Agricultural Rating Bill, Land Law (Ireland) Bill, Naval Works Bill, 1896, the Voluntary Schools Grant Bill, 1897, the Church Benefices Bill, Irish

Local Government Bill, Vaccination Bill, Habitual Inebriates Bill, 1893, and the London Government Bill, 1899. In 1896 (Jan. 1) Dr. Jameson and the Chartered troops were defeated at Krügersdorp by the Boers. A strong feeling of indignation was aroused in England by the news of a telegraphic congratulation sent to Mr. Krüger by the German Emperor. Considerable excitement was also caused by the publication of certain cipher telegrams in connection with the Raid. The British expedition sent to Ashanti occupied Kumasi, and received King Prempeh's submission; Prince Henry of Battenberg, who accompanied the forces, died from fever. Dr. Jameson and his officers were tried and convicted for infringement of the Foreign Enlistment Act. 1893 witnessed the death of two of the most remarkable men of the 19th century, Prince Bismarck, the founder of German unity (July 30), and Mr. W. E. Gladstone, who died at Hawarden (May 19) amidst the universal regret of the Nation. His remains were honoured by a public funeral in Westminster Abbey. The same year the assassination of the Empress of Austria caused universal horror throughout Europe. The Fashoda difficulty was settled by its evacuation by the French Government.

Sir W. V. Harcourt resigned the leadership of the Liberal Party, and was succeeded by Sir H. Campbell-Bannerman. The Imperial Penny Post came into operation on Christmas Day. In 1899 the Duke and Duchess of Saxe-Coburg celebrated their silver wedding. The Great Central Railway was opened for traffic. The Duke and Duchess of York visited Ireland. The Peace Conference, convened by the Czar of Russia, met at The Hague and established a permanent Court of Arbitration. Much excitement was occasioned in England by the details of the Dreyfus trial. The difficulty respecting the grievances of the Uitlanders in the Transvaal assumed an acute form in September and October. (For detailed particulars of the dispute see 1900 edition of the Almanack, p. 593.) On October 7 a proclamation was issued convening Parliament and calling out the Army Reserves for active service. On October 9 an ultimatum was presented by the Transvaal Executive. War began, the first serious engagement taking place at Glencoe (October 20), where Gen. Sir W. Penn Symons was mortally wounded. (See 1901 edition for chronicle of the campaign.) In 1900 the war, in spite of reverses, was prosecuted with energy, many gallant deeds of heroism were performed alike by officers and men; a wave of patriotic feeling spread all over the country, the Colonies, and India. Contingents of Volunteers from Canada and Australia joined the forces in South Africa, and a regiment was enrolled by the Corporation of London, the City Imperial Volunteers, to welcome whose return (October 29), London turned out *en masse*, manifesting by enthusiastic greetings the deepest Imperial feeling of loyalty to our Queen. The Orange Free State and the Transvaal were annexed (28 May and 25 Oct.) by Great Britain, President Krüger fled to Europe, and the war virtually ended. Guerilla warfare is still being carried on by bands of the Boers, under De Wet and other leaders. Government having decided to appeal to the country for confirmation of their policy in South Africa, Parliament was dissolved, and a General Election took place in October, the result being a majority for the

Government of 133. In July King Humbert of Italy was assassinated, and the same month (27th) our beloved Queen, with the sympathy of all her subjects, mourned for the loss of her son the Duke of Saxe-Coburg-Gotha. Later, in October, the Royal Household received the sad intelligence of the death of her grandson Prince Christian Victor of Schilswig-Holstein.

The elections under the London Government Act (1899) for the 28 new London Boroughs took place Nov. 1, and resulted in the return of 1362 councillors constituting the new bodies, composed as follows:—Moderates, 785; Progressives, 460, Labour, 11; Independents, 106. With singular appropriateness the first day of the 20th century will inaugurate the establishment of the Commonwealth of Australia, a happy omen of a yet closer union between the Colonies and the Mother Country, and of a yet further development of the patriotic spirit which they have exhibited in so marked a manner during the war in S. Africa. The events connected with the massacre of the missionaries, the murder of the German Ambassador, and the siege of the British Embassy at Peking (1900) are first in the public mind.

In concluding this brief survey of the 19th century we would express the sincere wish that our Queen, under whose wise and beneficent rule the country has made so remarkable progress, may be spared yet many years to her subjects, to whom she has so greatly endeared herself.

POPULATION AND INCREASE OF EMPIRE.

In 1801 the first census of England and Wales and Scotland was taken, that of Ireland was not taken until 1813. In the first year of the 19th century the population of England and Wales was 8,892,536, Scotland, 1,599,068. In 1821 it was respectively 12,000,236 and 2,091,521, Ireland, 6,801,827. In 1831 England, 17,927,609, Scotland, 2,838,742, Ireland, 6,552,385. In 1871 England, 22,712,266, Scotland, 3,360,018, Ireland, 5,412,377. In 1891 England, 29,002,525, Scotland, 4,023,647, Ireland, 4,704,750. It is noticeable that while the population of England and Wales and Scotland have *increased* nearly 21,000,000 and 3,000,000 respectively, Ireland has *decreased* over 2,000,000.

During the past 100 years our Empire has increased in a remarkable manner, to so great an extent that it is impossible within our limits to give in detail all the possessions acquired or colonised during the period under review. In Europe we obtained during the war Malta (acquired 1880), formally ceded 1814, and Cyprus, administered by Great Britain since 1878, Ceylon 1801, Hong Kong 1842 (Kwangtung Peninsula 1838), Mauritius 1810, Straits Settlements 1821, Singapore 1819, Labuan 1846, Aden 1838. By the British North America Act (1867) the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of the Dominion of Canada. The Province of Manitoba was added 1871, as was also British Columbia, Prince Edward Island 1873. Newfoundland remains a separate colony. In Australasia, Victoria, originally part of New South Wales, became a separate colony 1851. South Australia 1836, Queensland 1859, Western Australia 1890, New Zealand 1841, Tasmania 1825. Although previously existing as a colony, New South Wales received its present constitution 1855, Fiji 1874, British New Guinea 1888, Sarawak (Protectorate) 1888. In India the East India Company had acquired, prior to the direct sovereignty being vested in the Crown (1858),

during the century, Kumaon, Poona, Aracan, Tenasserim, Scind, the Punjab, Pegu, Tanjore, the seaboard provinces of Burma, Saitara, Jhansi, Nagpur, and Oude.

Since 1858 Upper Burma and the Shan states have been annexed (1884-88), Manipur, 1891, and Chitral, 1896. In Africa, in the south, Cape Colony, 1836; Griqualand West, 1871 (united with Cape Colony 1880); Basutoland, 1884; Bechuanaland, 1885; Natal, 1843; Orange Free State, 1838 (given up 1854, re-annexed 1900); Transvaal, 1877 (in 1881 became the S. African Republic with British suzerainty, re-annexed 1900); Kaffirland, 1853 (joined to Cape Colony 1865); Pondoland, 1894. Zululand, 1897. In 1891 the Imperial British South African Company received an extension of its sphere conferred by its charter of 1889, and now includes the whole of British South Africa from Mafeking to Tanganyika, comprising an area of 750,000 sq. miles. In the West, the coast between Lagos and the Rio del Rey is under the Niger Coast Protectorate, controlled by an Imperial Commissioner (1891). In 1900 the territory previously administered by the Royal Niger Company became the Protectorate of Northern Nigeria. In other parts of the West Coast, the settlements of the Gold Coast, Lagos and Gambia, were respectively separated from the government of Sierra Leone in 1874, 1886, and 1888. In the East, a large portion of the continent, both on the coast and inland, is under British protection. Zanzibar, since 1830, has been a British Protectorate. Nyassaland, in 1891, was proclaimed a Protectorate as British Central Africa. By agreement with France, Germany, Italy and Portugal, the sphere of Great Britain in these countries in Africa was defined and agreed upon, 1890. The evacuation of Fashoda by Major Marchand, 1898, led to a new Anglo-French agreement (1899) as to their respective spheres of influence in the Soudan.

In China England obtained (1898) the Port of Wei-hai-Wei on the Gulf of Pe-chi-li, at the conclusion of the War between China and Japan. (For Statistics of the British Empire—area, population, indebtedness, annual trade, see p. 326).

Not only has our population greatly increased, and our Empire extended during the past hundred years but, as might naturally be expected, our trade has correspondingly developed. In 1810 our exports amounted to £45,869,839; 1830, £66,735,445; 1850, £175,126,766; 1899, £349,534,658. Imports: 1810, £41,136,135; 1820, £46,245,241; 1850, £95,252,684. The total trade of the country in 1900 was: exports and imports, £814,570,241. The introduction of steam, the development of factories, the expansion of trade, the growing importance of our Colonies, and the opening up of new markets in Africa and China have brought about an enormous increase in our British trade. Free trade has cheapened the necessaries of life, and the material prosperity of the people marks a surprising change as compared with the earlier years of the past century.

RELIGIOUS AND SOCIAL MOVEMENTS.

It now remains to notice in brief the more important religious, social and industrial movements which have characterised the past century. In the Church, the opening and earlier part of the 19th century was marked by the Evangelicalism which had its rise under Newton, Romane, Simeon, Venn and others. It maintained its ground for many years, and was the chief vital

religious force in the country, not only in the Church of England, but in the various Methodist sects that sprang up after the death of Wesley. Among its members were many influential laymen, as William Wilberforce, the Gurneys, Buxtons, &c. With the movement there was also connected philanthropy, especially seen in the social work of Mrs. Fry (1816-17), and the movement for the abolition of slavery, the passing of the Factory Acts, the promotion of literature, and missions to foreign lands by Joshua Watson, in connection with the Society for the Propagation of the Gospel in Foreign Parts, and the Church Missionary Society, the London Missionary Society, and the Society for Promoting Christian Knowledge. The general rise in the tone of society, 1801-1830, was largely due to the Evangelicism of that period. With the Evangelical Party in the Church there also existed a considerable number of the type of the earlier Georgian clergy characterised by more or less spiritual apathy. In 1832 a Royal Commission was appointed to inquire into the revenues and patronage of the Church. It reported 1835, and four years later the Ecclesiastical Commission was incorporated by Act. During 1818-1828 200 new churches were built in the London diocese under Bishop Blomfield. In 1833-34 the "Oxford Movement," so called from the place of its origination, arose under J. H. Newman (afterwards Cardinal), John Keble, R. A. Froude, W. Palmer, H. J. Rose, and subsequently Dr. Pusey, Archdeacon (afterwards Cardinal) Manning and others. From the series of tracts setting forth the views of the new High Church Party it was also named the "Tractarian Movement." The publication (1841) of Tract No. 90, written by J. H. Newman, in which it was sought to show that the barrier between the Roman and Anglican communion was not insurmountable, and that the XXXIX. Articles were capable of a Catholic interpretation, gave rise to a wide-spread controversy, and occasioned much excitement both in the Church and the country. This and Newman's sermon on the Eucharist, preached before the University, led to Newman's going over to the Roman Church (1845). Growing out of the High Church movement there arose a more ornate ritual, the introduction of altar and other ornaments, Eucharistic vestments, incense, and other revivals of earlier Church worship. The adoration of the sacraments, the priestly office, the authority of the Church and its historical continuity were the leading principles of the "High" party. In 1853 Convocation, which had been practically non-existent, was revived. In 1885 the House of Laymen was constituted as a consultative body to assist Convocation. The issue of a Papal brief (1850) constituting an Archbishopric of Westminster and dividing England into 12 Roman Catholic dioceses, caused great excitement, in sympathy with which Lord John Russell brought forward an Ecclesiastical Titles Bill. It was opposed by Mr. Gladstone and considerably modified in its passage in Parliament, giving rise to the famous cartoon of John Leech in *Punch*, representing the Premier as "A boy who chalked up 'No Popery' and then ran away." The growth of ritual in the English Church, and the stubbornness of the "extreme" members of the High Church party led to the prosecution of various clergymen for alleged practices contrary to the rubrics of the Prayer Book and the doctrines of the XXXIX. Articles, especially the teaching of the doctrine of the Real Presence,

reservation of the Sacrament, altar lights, the use of incense, the eastward position, and auricular confession, culminating (1890) in the prosecution of the Bishop of Lincoln. The "Public Worship Regulation Act," 1874, introduced by Mr. Disraeli, had for its object the suppression of ritualistic practices, but has significantly failed in its operation. In 1899 the Archbishop of Canterbury, holding his Court at Lambeth, gave a decision against the ceremonial use of incense and processional lights. The decision on "Reservation" has not yet been given. The Broad Church Party originated in a reaction from the Tractarian Movement, influenced by German rationalism and modern science. These views became prominent about 1836 through the lectures of Dr. Hampden, and found further expression in Professor F. D. Maurice's "Theological Essays" (1853), and Professor Jowett's essays appended to his edition of St. Paul's Epistles (1856). The publication of "Essays and Reviews" (1860), written by Dr. Temple (now Archbishop of Canterbury), Professor Jowett, Dr. Rowland Williams, Mark Pattison, Baden-Powell, H. B. Wilson, and a layman, C. H. Godwin, raised a storm of protest from many of the clergy and the censure of the bishops, the Essays (with the exception of Dr. Temple's on the "Education of the World") being of a destructive "unorthodox" character. Later, in 1862, Bishop Colenso's works on the Pentateuch caused considerable excitement for a similar reason. Included among Broad Churchmen are the names of Dean Stanley, Dr. Arnold, Canon Kingsley, &c. In Mission enterprise the close of the 19th century presents a striking contrast to the work of the Church at the earlier part of that period. In 1801 only two Colonial Bishoprics existed, that of Nova Scotia, founded 1787, and Quebec, 1793. Now (1900) there are 52 Colonial and Missionary Bishoprics. Not only in missionary enterprise but in every branch of Christian and philanthropic work the Church of England has made remarkable advances during the century. And at the present time the activity of its clergy, its organisations, the brightness and reverence of its services present a contrast to its position in 1831. The Church of Ireland, disestablished 1869, is governed by a General Synod, with 23 Diocesan Synods, and Diocesan Councils. The Nonconformist bodies have also manifested a similar activity. The repeal of the Test and Corporation Acts (1828), the right to solemnise marriages in chapels (1836), the Burials Act (1880), and the Act of 1898, permitting marriages at Nonconformist places of worship without the attendance of the Registrar, have removed the disabilities under which they suffered. (For statistics of the various religious bodies, see current issue of *WHITAKER'S ALMANACK*.) In 1900 the proposal to unite the Free Church of Scotland (which seceded from the Established Church of Scotland, 1843) with the United Presbyterian Church took practical effect. The 19th century has witnessed the removal not only of the political but also the religious disabilities of the Roman Catholics. The Emancipation Bill was passed 1829. In 1840 St. George's Cathedral, Southwark, was erected. Cardinal Wiseman was appointed Archbishop of Westminster 1850. The "Catholic Truth Society" 1868, and the "Catholic Union of Great Britain," under the presidency of the Duke of Norfolk, were constituted 1871. The same year the Ecclesiastical Titles Act was repealed. In 1878 the Roman Catholic hierarchy was re-established in Scotland. Mention should

be made of the Salvation Army, started by "General" Booth, 1865, and of the Church Army, founded 1833 by Rev. W. Carlile, under the episcopal sanction. The 19th century has been characterised by its numerous religious, philanthropic, and social movements having for their object the amelioration of the condition of the poorer classes, the encouragement of thrift, care of the sick and aged, the housing of the working classes in London and populous towns, improved sanitation, prison reform, kindness to animals, and many other movements too numerous to enumerate in our space.

Socialism, in the form of Christian Socialism, has exerted in the latter part of the century considerable influence on the social questions of the day. It had its origin in the practical interest in matters of social reform evoked by the evils of the factory system, the reforming efforts of the working classes through their Trades Unions, and the political ideals and aims of the Chartists. Certain Christians felt they were part of the corporate whole forming society; that all the evils that affected any member of the society affected also the society as a whole, and all its members; that the loss of one must be the loss of all, and the gain of one the gain of all. They therefore felt themselves called to take an interest in and attempt to understand the conflicts which were just then emerging in industrial matters owing to their growing complexity; and to work whole-heartedly for the redress of whatever wrongs they might discover. The men who took the lead in this movement were Frederick Denison Maurice, Charles Kingsley, Tom Hughes (of "Tom Brown's Schooldays" fame), Vansittart Neale, and W. J. M. Ludlow, who still survives to connect the present form of the Christian Social Movement with its predecessor of 1843. Christian Socialism is now represented by the Guild of St. Matthew, whose Warden is the Rev. Stewart Headlam, and by the Christian Social Union presided over by the Bishop of Durham. The Christian Social Union, which has, perhaps, more immediately practical aims, has already a very large membership, and has become a power both in fixing the ideal of Christian duty and in increasing the quantity and improving the quality of Christian influence upon Social legislation and administration. In connection with social progress mention must be made of the marked advancement made by women in higher education, in public as well as in social life, during the latter part of the century.

EDUCATION.

At the beginning of the 19th century, systematised elementary education was practically non-existent. Instruction was given by the Parochial Charity Schools, of which in London, with a population in 1801 of 864,845, there were 237, educating some 9,000 children, and 3,730 private schools. The great majority of the poorer classes could neither write nor read, and in the agricultural and manufacturing districts the lack of education was even more appalling. In 1835, the British and Foreign School Society was founded with the name of the Royal Lancasterian Institute by the exertions of Joseph Lancaster, a young Quaker, who began to instruct the children of the poor in 1796, and to provide teachers, inventing the monitorial system. The National Society for Educating the Poor, under the auspices of the Church of England, was instituted in 1811. In 1836 the Home and

Colonial School Society was founded. Sunday Schools, first started by Robert Raikes about 1781, taught the children who attended them writing and reading, and a large part of the population owed to these schools not only their religious instruction but what little knowledge they possessed. In 1833 there were in existence 16,828 Sunday Schools with 1,548,890 scholars — the outcome of Raikes' movement. Organised by Archbishop Whately and Archbishop Murray (R.C.), the Irish National School System for the instruction of both Protestant and Roman Catholic children was instituted. The first serious effort on the part of the Government to deal with the question of education was the appointment in 1833 of a special Committee "to consider the best means of providing useful education for the children of the poorer classes throughout England and Wales." Sir Robert Peel and Mr. Gladstone were among the members of this Committee. The extent of ignorance its investigations revealed was appalling. On an average in the 17 large towns of the country, one child only in twelve was under instruction. In Leeds, 1 in 41; Birmingham, 1 in 38; Manchester, 1 in 35; and London, 1 in 27. The schools, such as they were, were often held in damp, unwholesome rooms, and for the most part their teachers were very incompetent. A Committee of Council on Education was appointed in 1839, consisting of the Lord President, and four others of Her Majesty's Ministers. This Committee superintended the application of the annual grant first made by the Government in 1834, for the promotion of public education. It also affirmed, as a condition of its grant, the right of inspection, and appointed inspectors. This was the beginning of our Department of Public Education. To Sir James Kay-Shuttleworth (then Dr. Kay) belongs the honour of urging popular education upon the Government. Dr. Kay subsequently became Permanent Secretary to the Education Department. From 1839 onwards, progress was gradually made in the work of elementary education, and in 1851, out of a population of 17,977,609 (England and Wales), there were 2,466,481 day scholars. Inspectors of schools were appointed 1840, the methods of grant payments were systematised, the training of teachers encouraged, and public money granted (1846) for augmenting their salaries. The system of "payment by results" came into existence (1853), and grants were made to schools according to the number of pupils in attendance. Grants were not, however, given to any schools not in connection with the National Society or the British and Foreign School Society; and no school was admitted to connection with these Societies unless its scholars received religious instruction. In 1862, as the outcome of a Royal Commission on Popular Education, appointed 1858, a Revised Code of Regulations was issued decreasing regular examination of pupils, payment by results and other changes. A "Conscience Clause," founded upon the Endowed Schools Act, 1850, was introduced by the Committee of Council on Education for parishes requiring only one school. By it the children of Nonconformists were admitted to such schools, and were exempted from religious teaching; and compulsory attendance at church. This clause occasioned considerable controversy. Public opinion was steadily growing in respect to the establishment of compulsory secular education by the State. Earl Russell moved resolutions in the House of Lords (1867) asserting the right of every child to

education. The resolutions were, however, withdrawn, as was also the Public Elementary Education Bill introduced into the Upper House by the Duke of Marlborough (1868). A Royal Commission to enquire into the state of education in Scotland had been appointed in 1864. The National Education League, advocating compulsory State education, was started in Birmingham, 1869, and about the same time the National Education Union, for supplementing the denominational system, met at Manchester. In 1870 Mr. W. E. Forster's Elementary Education Bill passed after much discussion and opposition, affirming the principle of a school place for every child, of public elected local authorities for education, the collection of a compulsory local school-tax, and compulsory school attendance. Mr. Forster's Act has since 1870 been several times amended. Lord Sandown's Act (1876) provided for school attendance committees where there is no Board. The first election for Metropolitan School Board took place November 29th, 1870, Lord Lawrence becoming its first chairman. In 1872 the Education (Scotland) Act was passed requiring the election of School Boards in every burgh and parish and making attendance at school compulsory. A new code, rationalising the education code, initiated by Sir W. Hart-Dyke, and carried on by Sir John Gorst and Sir G. Kekewich came into operation 1890. The Assisted Education Act 1891, practically abolished school fees, and an Act making education free in Ireland was passed 1892. Sir John Gorst's Education (England and Wales) Bill introduced in 1896 was withdrawn owing to Nonconformist opposition. The claims of the Voluntary Schools were recognised by the Voluntary Schools Aid Grant Bill passed 1897, and the same year Voluntary Schools Associations were formed. The Board of Education Bill was passed in 1899. Normal schools for training teachers were first started in 1842, when one was established by Sir Kay-Shuttleworth and his friend Mr. E. C. Tufnell, at Battersea, and made over to the National Society. The British and Foreign School Society also founded a Normal school in Borough Road. These have been followed by other training colleges. In connection with the Board Schools, domestic economy, hygiene, cookery, &c., are taught, and the evening continuation classes supply additional instruction in various subjects. Technical education during the latter half of the 19th century has received considerable attention. Mr. (afterwards Sir) Joseph Whitworth in 1868 founded thirty scholarships of £100 (annual) for the instruction of young men in the mechanical arts. In 1878 the City and Guilds of London Institute was founded, and the Central Institution of City and Guilds Institute established at South Kensington (1881). A Royal Commission to inquire into technical education in Great Britain and foreign countries presented a favourable report (1884). Technical Instruction Acts, authorising local authorities to provide funds for classes, &c., were passed 1889 and 1891. Technical instruction is also given in various polytechnic institutions, as that of the S.W. Polytechnic, Manresa Road, Chelsea. The Science and Art Department, which began as the Normal School of Design, 1837, with a grant of £1,500, has control over the numerous schools of science and art throughout the country, which receive payments on results, grants in aid, &c. Secondary education for the greater part of the century was left to private enterprise. The Charity Commissioners in 1837 ended their

inquiries into the Charitable Trusts of England and Wales, begun 1818, and in 1842 published a digest of their report. From this it appeared that there were 705 endowed schools, and nearly 2,200 other endowed schools, designated by the Commissioners as "non-classical." No information given respecting their standard of education. In 1854 the College of Preceptors granted certificates on examination. Oxford and Cambridge Universities began their Local Examinations 1853, and (1864) the College and Public School Commission made its report of its inquiries into nine of the endowed schools. The Public Schools Act, passed 1868, with Amendment Acts 1859, 1870, and 1873, modified the government of Eton Harrow, Rugby, Winchester, Charterhouse, and Shrewsbury Schools, and provided for the re-settlement of educational trusts by a commission which has since been merged into the Charity Commission. High schools were started in London 1866, and have proved very successful. In 1879 Sir (now Lord) Lyon Playfair introduced a Bill for registering teachers engaged in intermediate education, by the provisions of which all teachers must qualify themselves by an examination. The Bill was, however, dropped. The question of Secondary Education is rapidly coming to the front, and will take concrete shape ere long in legislative enactment. The Head Masters' Conference, has been composed of the Head Masters of the Secondary Schools of the U.K. Higher education during the past century has been gradually developing. The University of London (an examining body) was started in 1836; University College (London), was founded 1825; King's College, Strand, 1828; the University of Durham, 1831; Owens College, Manchester 1851; Yorkshire College, Leeds, 1874; University College, Liverpool, 1881 (these last three are incorporated with Victoria University, Manchester, founded 1880); Mason University College, Birmingham, 1875; University College, Bristol, 1876; Rutherford College, Newcastle-on-Tyne, 1878; and University College, 1897. In Wales the University of Wales was founded 1893 and with it are connected the University College of Wales, Aberystwyth, 1872; the University College of North Wales, Bangor, 1884; the University of South Wales, Cardiff, 1883; and St. David's College, Lampeter, 1828. The Royal University of Ireland, founded 1880, is an examining body, and associated with it are Queen's College, Belfast, 1845; Queen's College, Galway, 1845. There are also six Roman Catholic colleges in Ireland, under the Archbishops and Bishops as the Supreme Governing Body, with a Rectorial Council. For special professional education there are the Royal Indian Engineering College, Coopers Hill, Staines, 1871, and six Agricultural Colleges in England, and one in Scotland, besides Legal, Theological, and Medical Colleges, providing for the special education of their students. The claims of Music were recognised in the early part of the century, when, in 1822, the Royal Academy of Music was founded by Lord Burghersh (afterwards Earl of Westmorland). This has been succeeded by others, as the Royal College of Music, 1852, previously existing as the National School for Music, founded by the late Duke of Edinburgh, 1873; the Guildhall School of Music, instituted by the Corporation of London, 1880. In 1872 a Royal Commission was appointed to inquire into the income and

property of the Universities of Oxford and Cambridge. By the University Act of 1877, (Commissioners were appointed to make statutes; and other provisions. Religious tests for admission to a degree at Oxford and Cambridge were abolished by the Act of 1871, and thus admitted Nonconformists and others to the privileges of the older Universities; the admission of non-collegiate students has given many the opportunity of studying at the older Universities. Oxford and Cambridge have also organised "University Extension Lectures," which are given in all parts of the Kingdom. Dublin and London and other Universities have also arranged similar lectures. London University first admitted women to degrees 1878, and Oxford and Cambridge admit women to honours examination, but not to degrees. Miss Scott obtained the Wranglership at Cambridge, 1885, and Miss A. F. Ramsay and Miss B. A. M. Hervey, high honours, 1887. Girton College, at Cambridge (1875), and Lady Margaret Hall and Somerville College (1824) at Oxford, provide for the higher education of women.

A few of the most prominent poets, authors, and artists of the 19th century are given below:

Poets.—Byron, Wordsworth, Coleridge, Southey, Blomfield, Rogers, Sir Walter Scott, Crabbe, Campbell, James Montgomery, Mrs. Hemans, Coventry Patmore Procter ("Barry Cornwall"), Joanna Baillie, Robert Montgomery, Shelley, Keats, Thomas Moore, Landor, Tennyson, Browning, Elizabeth B. Browning, Matthew Arnold, Dante G. Rossetti, William Morris, Jean Ingelow, Algernon Swinburne, Rudyard Kipling.

Novelists.—Scott, Thackeray, Chas. Dickens, Lytton, Marryat, Ainsworth, Chas. Kingsley, Charlotte Brontë, Wilkie Collins, George Eliot, Lever, Meredith, Miss Braddon, George MacDonald, Hardy, R. D. Blackmore, Marie Corelli.

Historians, Essayists, &c.—Macaulay, Alison, Grote, Merivale, Buckle, Carlyle, Froude, Lecky, S. R. Gardiner, John Richard Green, E. A. Freeman, Stubbs, Dean Stanley, Matton, Leslie Stephen, John Morley, Lord Rosebery, Justin MacCarthy.

Theological Writers.—Whately, Newman, Trench, Stanley, Maurice, F. W. Robertson, Alford, Liddon, James Martineau, Caird, Tulloch, Hamilton, Church.

Scientists and Philosophers.—Whewell, Sir Wm. Hamilton, Mansel, John Stuart Mill, Bain, Faraday, Darwin, Tyndal, Huxley, Wallace, Foster, Max Müller, Herbert Spencer, Caird.

Artists.—Sir David Wilkie, Collias, Mulready, Turner, Constable, Cooper, Caldecott, Eastlake, Ward, Eddy, Maclise, McWhirter, Landseer, Leighton, Alma Tadema, Ho-man Hunt, Noel Paton, Burn-Jones, Frith, Madox Brown, Fildes, Millais, Herkomer, Fielding, Prout, Vicat Cole, Hage, Oules, Keeley, Halswelle, Whistler.

SCIENCE.

The past century will in future time be characterised as the period during which science has made her most remarkable researches and discoveries. The space at disposal will permit only the merest outline of some of the more notable discoveries, their relation to various departments of knowledge and their practical application in daily life. Of such discoveries, steam and electricity in their varied applications are, perhaps, the most important. Each of these was known in the preceding century, but the perfecting of the methods of their application to industrial uses may be said to belong to the

19th century. Watt, indeed, by his invention of parallel motion, and the transformation of reciprocating motion into rotatory motion in his engines, and also by the "eccentric" and "fly wheel," led the way to many subsequent improvements in the construction of steam-engines of various types and uses, but it is during the past century that the engineer's skill has brought the steam-engine to so high a degree of perfection. In 1801 the first iron railway sanctioned by Parliament, and worked by horses, was run between Wandsworth and Croydon; the following year Trevethick and Vivian took out a patent for a high-pressure locomotive engine, and George Stephenson's "Rocket" obtained the prize of £500 offered by the directors of the Liverpool and Manchester Railway, opened 1825. From the "Rocket" the two modern types of locomotive engines, differentiated by the position of the cylinder, have been developed. The first railway opened (1825) for passenger traffic was the Stockton and Darlington Railway, constructed by Edward Pease and George Stephenson. The G.W.R. was opened to Slough 1838, and extended to Bristol 1841. During the forties many lines were projected and constructed, 272 Railway Acts being passed in 1846, the year of the "railway mania and panic." In 1849 there were in the United Kingdom 6,031 miles of railways open, carrying 63,841,539 passengers, with total receipts £11,805,498. In 1899 (latest return) there were 21,700 miles open, 1,106,691,991 passengers, with total receipts £95,851,393. The use of steel rails, the block system of signalling, absolute and interlocking, the improvement in the construction of the rolling-stock—the 3rd-class carriage on a corridor train of the present contrasting markedly with the old "cattle trucks" in which the ill-fated passengers of a similar class travelled in earlier days—all indicate the vast development of this important factor in national life and commerce, although even yet on some lines the ideal standard of punctuality has not yet been attained in the departure and arrival of trains. The first steamboat in Great Britain was the *Comet*, which sailed (1812) from Glasgow to Greenock three times weekly. In 1818 the *Rising Sun*, a steam vessel, crossed the Atlantic, the pioneer of the magnificent fleets which now run between Liverpool and New York in about six days. Steamboats were established between Dover and Calais 1821, and the first steam voyage was made to India by the *Enterprise* (1825). In 1837 the screw steamer *Francis Bagnon* was constructed by Briesson. In 1838 regular steamboat communication was established across the Atlantic, the *Sirius* steaming to New York in 17 days. The first Cunard steamer, *Britannia*, made her voyage across the Atlantic, 1840. The first ironclad built by the Government and propelled by steam was launched 1860. Double screws were used in the *Far East* (1863). Improvements in the construction and size of the vessels and their engines have made our naval and mercantile marine the finest in the world. Steam is rapidly displacing sailing vessels: the total number of steam vessels belonging to the United Kingdom in 1899 was 9,029, with a gross tonnage of 11,341,622; sailing vessels 11,167, tonnage 2,404,594. In 1886 the figures were:—*steam*, 6,653 (T. 6,321,504); *sail*, 16,179 (T. 3,512,783). Vessels of novel design, as the twinship *Castalia*, a steamer with two hulls, and the *Nautilus*, and the *Waterwitch* (a gun vessel) driven

by hydraulic propellers, have also been constructed. Steam power works our looms, our printing presses (first applied to printing in the *Times* office, 1814), drives our traction engines and the machinery of our factories, and in ways too numerous to mention has contributed to the material prosperity of the country. The developments and application of electricity are intimately connected with the 19th century. Galvani and Volta had discovered galvanism at the close of the 18th century, and so long ago as 1747 Watson had devised a method for the transmission of electricity by an insulated wire. CErsted's discovery of electro-magnetism (1819) was followed by attempts to apply it to the production of signals at a distance. The first who succeeded in giving a practical character to the electric telegraph was Professor Wheatstone (1837), who took out a patent with W. F. Cooke. In 1838 the telegraph line from Paddington to West Drayton was set up, followed by that on the Blackwall line (1840). Morse's system was adopted on a large scale between Baltimore and Washington (1844), and the ingenuity and simplicity of his method, the alternate magnetising and unmagnetising of a bar, which causes a point to mark dots and scores on a travelling piece of paper, caused it to become universal in the States, and it was introduced into Germany in 1851 and other countries of Europe. Morse also invented the transmitting key. There have since been many improvements; the Morse recording telegraph used by the G. P. O. printed the signals in ink. Recently Marconi's system of wireless telegraphy has been successfully worked at long distances. It has great possibilities for extended use and development. Duplex and Quadruplex telegraphy has been successfully used. The first submarine line was laid between Dover and Cape Grisnez, near Calais, 1851. In 1857 the laying of a cable between Valentia, Ireland, and Newfoundland was commenced, and after various failures it was successfully laid in 1866 by the *Great Eastern* steamship, which also laid the sixth Anglo-American cable in 1874. In 1876 a direct line between London and New Zealand was established. By the Telegraph Act of 1868 the Post Office acquired the inland telegraphs; in 1872 the Act came into operation. In 1885 the 64. telegram was introduced. An electric launch, the *Volta* (1886), crossed from Dover to Calais, and an electric omnibus ran in London 1889. Motor-cars, propelled by electricity, have more recently come into vogue. An electric light had been obtained by Humphry Davy with carbon points (1800), and various apparatus for regulating electric light were subsequently patented. In 1856 Jules Duboscq's electric lamp was used by Professor Tyndall at the Royal Institution. Faraday's discovery of magneto-electricity (1830) was followed by the invention of dynamo-magneto-electric machines by Wilde (1863); Siemens (1867), Gramme (1875), Clarke, Serrin, Brush, Thompson, Carré, Houston, Edison, and others, gave an impetus to electric lighting. Serrin's lamp and Jablochhoff's electric candle improved upon by Rapiéff (1878), came into use, and the Gaiety Theatre was lit by Lontin's and Jablochhoff's system. Edison patented plans for subdividing lights, and other lights, as the Wallace, Siemen, Jamin, Brush, &c, came into notice. In 1880 the electric light was placed on the Thames Embankment, and Swan's incandescent lamps were used in the Savoy Theatre (1881), the Fisheries and Health Exhibitions (1883 and 1884) were lighted

by the electric system, and (1891) Queen Victoria Street from the Mansion House to Blackfriars was permanently lighted by electric lamps. Electricity stored in secondary batteries or accumulators as the motive power for tramscars, was tried successfully at Leytonstone (1882), and extended in use. The City and South London Electric Railway was opened 1891, the City and Waterloo Electric Railway in 1893, and the Central London Electric Railway, opened 1900. For light railways the Telpherage system has come into notice. Electricity has been successfully applied to electro-metallurgy, and also to a variety of contrivances and apparatus, as the electric chronograph, for measuring the velocity of projectiles, the telephone, microphone, &c. Among the many discoveries of scientists during the Century, spectrum analysis is one of the most important to the astronomer as well as to the chemist. Fraunhofer, a German optician, in 1814 made the discovery of the lines, called "Fraunhofer's Lines," in the spectrum, and distinguished them by letters of the alphabet. Sir David Brewster (1832) discovered that the vapour of certain gases was represented in the spectrum by characteristic dark lines. Professor Miller subsequently examined and described the spectra of coloured flames, but the invention of the spectroscope is due to Professor Kirchhoff and Bunsen. The spectroscope has received many improvements and modifications, but its essential features are the same. By its use not only new metals, but gases, as argon, have been discovered, and the constitution of the sun, planets, stars, nebulae, and comets has been determined, the velocity with which the stars of our system are increasing or diminishing in their approach or recession from the earth, pointing to the common constitution of the earth and stellar system, and their obedience to the same physical and chemical laws, and holding out the prospect of obtaining definite evidence as to the nature of our so-called elementary bodies. Photography, established 1816 by Joseph Nicéphore Niepce, the first to obtain a permanent sun-picture, and advanced upon by Fox-Talbot and Daguerre, and still further improved by the dry plate gelatine-bromide process, in place of the wet collodion process, has proved a valuable ally to the astronomer, enabling him to map out the heavens, to discern thousands of stars invisible even by means of the most powerful telescope, to record phenomena presented in an eclipse of the sun, and also to obtain correct representations of the moon and planets. Comets, meteorites, and the aurora borealis have been photographed. In microscopy, medicine, surgery, anthropology, commerce, the arts, in the Army and Navy its use has proved all important. The attempt to obtain photographs in colours appears to have met with success, M. Lippman having (1890) succeeded in photographing the solar spectrum in its natural colours. The discovery (1895) by Dr. W. R. Röntgen of the X rays, has been utilised in surgery, and skiagraphs produced. In connection with astronomy mention should be made of the discovery of the planet Neptune (1846), and of the two satellite of Mars (1877), of many new asteroids and several comets, the increased size and power of telescopes, as the "Lick" and "Yerk." The theory of the precession of the equinoxes, causing corresponding modifications in the climate of the two hemispheres of our earth, has brought astronomy into intimate relation with geology, which science, by the researches of

Murchison, Sedgwick, De la Beche, Agassiz, Lyell, Darwin, Huxley, Tyndall, Geikie, Ramsay, and a number of other distinguished men, has made great progress during the past century. The establishment of the Museum of Geology and the publication of the valuable maps of England, Scotland and Ireland in connection with the Geological Survey, deserve notice. The doctrine of evolution, enunciated in Mr. Charles Darwin's "Origin of Species" (1859) and "Descent of Man" (1871), Mr. Alfred Wallace's "Natural Selection," Mr. Herbert Spencer's "Synthetic Philosophy," Haeckel's "History of Creation," and the writings and researches of eminent scientific men, as Dr. Huxley and others, had produced not only a revolution in the study of biology, botany, and allied sciences, but has influenced philosophy, history, and almost every department of knowledge. The investigation of the correlation of the physical forces, or the conservation of energy, which has been carried on by Sir William Grove, Balfour Stewart, Tyndall, Helmholtz, Clausius, Sir Wm. Thompson (Lord Kelvin), &c., has established the mutual dependence and convertibility into each other of all the natural forces. In medicine the modern school is characterised by its adoption of the methods of research of physical science, theory being used as a means of research rather than as an ultimate conclusion—"rational empiricism." During the past century great advances have been made by physiological experiment and clinical observation. About 1835 Dr. Thos. Davies introduced the use of the stethoscope. In 1821 Sir Charles Bell demonstrated the nature and functions of the spinal cord. Dr. Bright investigated diabetes. Dr. W. B. Carpenter devoted himself to the physiology of the nervous system, and many other eminent specialists have contributed

their knowledge to special diseases. Preventive inoculation against disease; the investigation of specific bacteria, with which the names of Pasteur and Koch, Burdon Sanderson, Cohn, and others are associated; the study by Budd of typhoid, have all greatly contributed to the correct diagnosis of disease. The use of anaesthetics, introduced by Sir James Simpson, has facilitated the labours of the surgeon and rendered possible operations before impracticable. Mention should be made of antiseptic surgery, introduced by Lord Lister. Sanitation in the earlier part of the century was greatly neglected: the first step towards reform was by the Poor Law Commission, 1838-39, which presented reports to Government on preventable diseases in the Metropolis. This inquiry was extended to England and Wales, and in 1840 to Scotland. A Report, drawn up by Mr. Edwin Chadwick, was presented to Parliament 1842, and led to the passing of Acts (1848), which form the basis of all modern sanitary legislation. The Act empowered local authorities in certain places to appoint medical officers of health, the City of London being the first to appoint its officer. In 1857 the National Association for the promotion of social science was founded. By the Medical Act of 1858, and subsequently amended by other Acts, a council for the United Kingdom and Ireland was established to register properly-qualified persons to practise medicine.

Our review of the development of science would be incomplete did we not refer to the great engineering works which have been executed during the last hundred years. Works such as the Tay and Forth Bridges, the Thames Embankment, the Manchester Ship Canal, will remain as memorials to our successors of the engineering skill which has been so characteristic a feature of the 19th century.

Relief (War) Funds in 1900.

The Royal Patriotic Fund was inaugurated in 1854, under the presidency of H.R.H. the late Prince Consort, to provide relief to the widows and orphans of soldiers killed in the Crimean War, and it soon reached very considerable proportions. Since that time, various other philanthropic funds have been placed in the hands of the Royal Commissioners, such as the "Victoria Relief Fund," the "Captain Fund," and many others, until in 1895 the total capitalised amount was over £1,000,000.

Among other Funds are "Lloyd's Patriotic Fund" (founded in 1803 and amounting in 1895 to £162,000); the "Imperial War Fund," formed in 1882; the "Soldiers' and Sailors' Families Association," the "Royal Naval Fund" (1893), formed with a surplus of £47,658 from the Naval Exhibition of 1893; the "Indian Military Relief Fund" (£46,000), and the "Military Tournament Fund," which obtains a yearly income from the tournament held at the Agricultural Hall.

The Funds opened at the Mansion House in connection with the War in South Africa, are:—

1. For the widows, orphans and other dependants of soldiers killed during the Campaign.
2. For sick and wounded soldiers, sailors and marines.
3. For soldiers, sailors and marines who may have to leave the Service disabled by wounds.

4. For the benefit of wives, children and dependants left at home during the Campaign.

At the time of going to press, the amount raised stood as follows:—

Fund 1, £432,600; Fund 2, £96,500; Fund 3, £110,000; Fund 4, £189,000. Total received, £1,020,000.

Fund No. 1 is to be administered by the Commissioners of the Royal Patriotic Fund, who have stated their intention not to invest the money, but to divide it as required; No. 2 comes under the management of the Red Cross Society; No. 3 will be distributed by Lloyd's Patriotic Fund; No. 4 will be administered by the Soldiers' and Sailors' Families Association.

The Lord Mayor's Discretionary Fund, to be applied to above or other purposes connected with the war, amounted to £192,000.

The Transvaal Refugees Fund, also subscribed at the Mansion House, amounted to nearly £180,000.

Another very successful Fund is that inaugurated by the proprietors of the *Daily Telegraph*, and managed by themselves. This Shilling Fund (formed for the benefit of soldiers' relatives), at the time of going to press, amounted to over 4,500,000 shillings, which is immediately distributed through skilful agencies to the beneficiaries.

AMATEUR ATHLETICS.

AMATEUR Athletics in 1900 were chiefly noticeable for the unprecedented success of the A. A. A. Championships and the International Meeting in connection with the Paris Exhibition, otherwise the Sports of the year and the performances accomplished by English athletes were not very remarkable. The various winter cross-country events and championships resulted as follow:— Cambridge defeated Oxford at Rochester, Dec. 1st. 1899, scoring a highest possible—15 points to 40—five men to count, C. E. Pumphrey, Christ's, being first man home in 45 min. 49½ secs. The Highgate Harriers won the Southern Championship, C. Bennett (F. H.) being first man; and the Salford H. won the North-run, J. D. Marsh (S. H.) leading the field. The Birchfield H. took the Midland, S. J. Robinson, Northampton, coming in first. The Finchley H. carried off the National, C. Bennett of that club taking first place. Both at Oxford and Cambridge the University Sports failed to produce very good performances, but at Cambridge, Paget Tomlinson won the Hurdles easily in 16½ sec. H. W. Workman won the Half in 1 min. 58 secs. F. G. Cockshot took the One Mile in 4 min. 26½ secs., and A. E. Hind, of Trinity Hall, finished first in the Hundred in 9½ secs., which time, however, has been seriously questioned. All these performances were better than anything done at Oxford. The Inter-Varsity Sports took place at the Queen's Club as usual on March 30th, Oxford winning with six events to four; G. C. Davison, A. E. Hinde, and A. Hunter, three brilliant Cantabs, being unable to assist the Light Blues. Oxford won the Hundred, A. M. Hollins and C. R. Thomas a dead heat, time 10½ secs.; Quarter, A. M. Hollins, time 50½ secs.; Long Jump, G. W. F. Kelly, 21 ft. 8 in.; High Jump, E. B. Henderson, 5 ft. 9½ in.; Putting the Weight, E. E. B. May, 36 ft. 8 in.; Hammer, J. D. Greenshields, 115 ft. 2 in., a record for the A. A. A. Regulations at these sports. Cambridge won the Hurdles, W. G. Paget Tomlinson, time 16½ secs.; the Half, H. E. Graham, time 1 min. 58½ secs., a record for the Sports; the Mile, F. G. Cockshot, time 4 min. 28½; and the Three Miles, H. W. Workman, time 15 min. 1½ secs. The day was chilly, and not particularly favourable for fast times. The A. A. A. Ten Mile took place on the following Saturday at Stamford Bridge, S. J. Robinson (in the absence of the holder, C. Bennett) winning by ten yards from J. T. Rimmer in 53 min. 14½ secs. The winners at the Public Schools Meeting at Stamford Bridge, April 21st were:—Hundred, time 10½ secs., and Quarter, 53½ secs., both won by H. S. F. Collier, of Great Yarmouth Grammar School; Hurdles, S. F. Hawley Edwards, of Sherborne, 18½ secs.; Half Mile, E. S. Kemp, St. Paul's, 2 min. 9½ secs.; One Mile, H. W. Hegson, Oundle, 4 min. 32½ secs.; Three Quarter Mile Steeple Chase, Torrens, St. Paul's; High Jump, G. H. W. Mortimer, Rossall, and N. C. Vidal, Framingham, tied at 5 ft. 3½ in.; Long Jump, J. H. Pattison, Aldenham, 19 ft. ½ in. The A. A. A. Championships were held at Stamford Bridge, on July 7th, in bright but rather cold weather, with a north-westerly wind against fast time except in the Hurdles and Sprint, in which the breeze was favourable. Some two dozen of the American champions had entered, and the attendance of spectators, about 6000, was

a record for the ground. The winners were:—Hundred, A. F. Duffy, of Georgetown University, U.S.A., time 10 secs.; Quarter, M. W. Long, New York A. C., time 49½ secs.; Half Mile, A. E. Tysoe, Salford H., time 1 min. 57½ secs.; One Mile, C. Bennett, Finchley H., time 4 min. 28½ secs.; Four Miles, J. T. Rimmer, Southport H., time 20 min. 11 secs.; Four Miles Walk, W. I. Sturgess, Polytechnic H., time 30 min. 20½ secs.; Two Miles Steeplechase, S. J. Robinson, Northampton, time 11 min. 8½ secs.; High Jump, J. K. Baxter, Pennsylvania University, 6 ft. 2 in.; Long Jump, A. C. Kraenzlein, Penn. Univ., 22 ft. 10½ in.; Pole Jump, B. Johnson, New York A.C., 11 ft. 4 in.; Throwing the Hammer, J. J. Flanagan, New York A.C., 163 ft. 1 in.; Putting the Weight, R. Sheldon, New York A.C., 45 ft 10½ in.; Hurdles, A. C. Kraenzlein, time 15½ secs. a world's grass record, but made with strong wind behind the men. Altogether the Championships were the most interesting and successful ever held in England. All the English Championship winners, except Sturgess, went over to Paris to take part in the Exhibition International Athletic Meeting on the Racing Club's grass track in the Bois de Boulogne on July 14th, 15th, 16th, 19th, and 22nd. The weather all through the Meeting was intensely hot, and most of the previous world's metres grass records were beaten. The Sports were badly managed, the prizes poor, and the attendances of spectators small. The winners (World's Champions) were:—Hundred Metres, F. W. Jarvis, Princeton Univ., U.S.A., time 11 secs., after he had made a world's record of 10½ secs. in a trial heat (A. F. Duffy competed, but broke down in the final); 110 Metres Hurdles, 10 flights 3 ft. 6 in. hurdles, A. C. Kraenzlein, U.S.A., time 15½ secs.; 400 Metres, M. W. Long, New York A.C., time 49½ secs.; 800 Metres, A. E. Tysoe, England, time 2 min. 1½ secs. (he subsequently did 1 min. 57½ secs. in a handicap from scratch); 1500 Metres, C. Bennett, England, time 4 min. 6 secs.—a world's record; 60 Metres, A. C. Kraenzlein, America, time 7 secs.; 200 Metres, W. B. Tewkesbury, America, time 2½ secs.; 400 Metres, Hurdles, W. B. Tewkesbury, America, time 57½ secs.; Standing High Jump, Ray Ewry, New York A.C., 5 ft. 4½ in. (world's record); Standing Long Jump, Ray Ewry, 10 ft. 10 in.; High Jump, J. K. Baxter, America, 6 ft. 2½ in.; Broad Jump, A. C. Kraenzlein, America, 23 ft. 5½ in.; Pole Jump, J. K. Baxter, America, 13 ft. 9½ in.; Putting the Weight, 16 lb., R. Sheldon, 45 ft. 11 in.; Throwing the Hammer, 16 lb. with handles, 157 ft. 4½ in.; Throwing the Discos, R. Bauer, Budapest 117 ft. 10½ in.; 2500 Metres Steeplechase, G. W. Orton, America, time 7 min. 34½ secs.; 4000 Metres Steeplechase, J. T. Rimmer, England, time 12 min. 6½ secs. The Marathon Race, about 25 miles round the walls of Paris, was won by M. Theato, of Paris, in 3 hours 59 min. 45 secs. The Nations Team Race (5 to run in each team) was won by England. The distance was 5000 metres; C. Bennett was first man home, and the time, 15 min. 20 secs., a world's record.

During the year, C. H. Jupp, of the L. A. C., ran One Hundred Yards at Stamford Bridge in 10 secs., and C. Bennett won a Three Quarter Mile Race, at the Paddington Grounds, in 3 min. 10½ secs. (an English record). In America, in September, M. W. Long ran a Quarter Mile, on

a circular track at Traver's Island, in 47½ secs., and in the following week he ran the distance on a straight track in 47 secs.; also, J. J. Flanagan threw the 16-lbs. hammer 169 ft. 4 in. All these three performances are world's records. In October, Dennis Horgan, the Irishman, went to America, and on October 21st, at Celtic Park, New York, he "put" the 16-lbs. shot 47 ft. 4½ in., a record, afterwards disallowed.

BILLIARDS.

EXHIBITION billiards last season failed to attract to any very great extent, and the big gates of a few years ago were not to be obtained in 1900, even when the incomparable Roberts or C. Dawson were in evidence and in form. Of course the ad-absorbing incidents of the South African War, in the closing months of 1899, took away public interest from almost everything else, and a very large proportion of the usual habitués of scientific billiards were either at the front or, at any rate, on duty out of London. Another cause also, perhaps, helped to curb public interest in our national indoor winter game: All, or nearly all, the matches were played under the Billiard Association rules, and huge breaks and record scores could not be expected on the none too easy "Standard" tables passed and certified by the B.A. executive, and with the players not quite perfect in all the details of the new rules. In London, Messrs. Wright's, Argyll Hall, Messrs. Burroughes and Watts's rooms, Dean Street, Soho, and the Egyptian Hall, Piccadilly, were still the only places devoted to billiard entertainments. John Roberts, although he stood aloof from the Billiard Association and made no attempt to dispute C. Dawson's title of Champion, was still undoubtedly the best player we have at English billiards. He confined his attention solely to exhibition matches of a week or a fortnight's duration, giving big starts to Stevenson, Mitchell, Harverson, Diggle, F. Bateman, W. Cook, and others. Roberts, although his average breaks were as high as ever, did not compile any exceptionally large aggregate; indeed, 555 against J. Duncan was about his biggest of the season in London; but against Mitchell, and with benzoline balls, in a break of 364 he made no fewer than 357 off the red ball alone, and only one of these was a winning hazard. No better proof than this is required to show that Roberts still retains, when over fifty years of age, his unequalled power of cue and knowledge of strength. Roberts's allowances to the leading players were as follows: Diggle and Stevenson, 5,500; Mitchell, 6,000; Harverson, 8,000; J. Duncan, 9,000 out of 21,000, Roberts generally winning. Roberts also gave the improving young player I. Inman 6,000 in 12,000, and beat him. Roberts was touring in the country for the first six weeks of the new year, and then, after three more matches in London, went to Australia, with the intention of subsequently visiting India and Africa. His absence from England will probably last two years. Taylor, Peall, and North were at seldom seen at public matches, and Stevenson and Diggle, with Mitchell, are undoubtedly the nearest opponents to Dawson. Stevenson made distinct improvement in his play. Before the end of 1899 he placed two Standard table breaks to his credit of 520 and 591, and then in April and Diggle challenged Dawson for the Championship. In playing off who should meet Dawson 9,000 up at the Argyll Hall, Stevenson

d-feated Diggle rather easily by 2,900, the winner on the very first day of the match placing to his credit a break of 648, his record performance. In Easter week Stevenson and Dawson met for the Billiard Association £100 per annum and the Championship. After the first day Dawson led and finally won rather easily by 2,225. Some of the best breaks of the match were: Dawson 316, 230, 207, 205, &c.; Stevenson 354. The most important genuine money match of the season took place at the end of January at the Egyptian Hall, W. Mitchell accepting the short start of 1,000 in 13,000 from C. Dawson for £100 a-side, B.A. rules. Mitchell played well for the first week, but Dawson led by 634 after six days' play, and finally won by 1,931. The best breaks were: Dawson 421 (unfinished), 403, 341, 251, &c.; Mitchell 225, 224, 212, &c. M. Inman, the winner of Messrs. Wright's Billiard-markers' Tournament, subsequently played several small genuine money matches, defeating Courtney, H. Barr, and others easily. Inman appears likely to take a prominent place amongst the best professionals in the near future. W. Osborne defeated F. Bateman for the Championship of the Midlands after a very close game, Osborne winning by 16 points. Bateman made a break of 431 in March, when Dawson tried to give him 6,000 in 13,000 and failed. C. Dawson (scratch) won Messrs. Burroughes and Watts's 3,000-up heat Tournament. W. S. Large (owes 100) won the Licensed Victuallers' Handicap from a huge entry at the Gaiety Restaurant; but Large, the holder, was defeated for the L.V. Championship by A. W. T. Good, who won at 1,000 to 799. Good made a record break for the Championship, viz., 103. Oxford won both the Single and the Doubles matches with Cambridge. B. J. Bosanquet (Oriol) and E. B. Dixon (Ch. Ch.) represented Oxford, and G. G. Heslop (Clare) and E. P. Ward (St. Catherine's), Cambridge. Oxford won the Doubles by 127. Ward made the best break, 43. In the Singles, Bosanquet (best breaks 47 and 48) beat Heslop by 103. All the games were 500 up. A. R. Wisdom, the Amateur Champion, was challenged for his Cup, and the contest was decided at the National Sporting Club, March 12-16. The challenger's heats resulted: S. H. Fry (best breaks 105, 81, 80) defeated W. A. Lovegrove by 588; S. S. Christey (best break 73) beat A. Jordan by 354; Fry, with a best break of 69, beat F. A. Lindner by 272. Fry then defeated Christey by 119, and finally met A. R. Wisdom for the title. The points were 1,500 up. After a very even game all through, Fry won by 72. The best breaks were: Fry, 91, 80, and 65; Wisdom, 71, 67, 66, 65, &c.

With Roberts in Australia, and no one but H. W. Stevenson to dispute C. Dawson's Championship honours, the 1900-1 should be a very quiet one. H. W. Stevenson will meet Dawson for the Championship the first week of the new year. The only Tournament running through the season will be Messrs. Burroughes and Watts's for one hundred guineas, arranged on the same lines as before, three games per week of 3,000 up each. The handicap is as follows:—Dawson owes 500; Diggle and Stevenson scratch; Spiller, F. Bateman, and Harverson 600; Reece 950; W. Cook 1,000. Notwithstanding his heavy handicap, Dawson, up to the end of November, had won several games, and had placed the best break of the Tournament—381—to his credit.

BOXING AND FENCING.

The first important fixture of the year was the fourth meeting between Oxford and Cambridge, which took place in the Gymnasium at Oxford. As always before, the Dark Blues proved victorious. The results were—Fencing, R. Montgomerie, Oxford, beat B. H. Seaward, Cambridge, 5 hits to 1; and C. M. H. Howell, Oxford, beat J. B. Leach, Cambridge, 5 hits to 1. Sabres: H. B. Salaman, Cambridge, beat W. Astor, Oxford, 5 hits to 3. Boxing: Feather Weights, L. H. Carlyle, Cambridge, beat R. D. Hodson, Oxford. Light Weights, W. L. Ambrose, Cambridge, beat A. C. Sim, Oxford. Middle Weights, H. C. Squires, Oxford, beat H. C. Bentinck, Cambridge. Heavies, J. Knight, Oxford, beat C. M. Bell, Cambridge. About this time, the Leith Club won the Scottish A.G.A. Club Championship, and W. P. Alexander, of Glasgow, won the individual and all-round championships. The Amateur Boxing Association Championships, at St. James's Hall, on March 30th, were a great improvement on the previous season. The winners were: Bantams (8 st. 4 lb. and under), J. Freeman, Lynn A.C.; Feather (9 st. and under), R. Lee, Stanhope B.C.; Light Weights (10 st. and under), G. W. Humphries, Lynn A.C.; Middle Weights (11 st. 4 lb. and under), E. Mann, Lynn A.C.; Heavy Weights, W. Dees, Goldsmith's Institute. The Army and Navy Boxing Championships at Aldershot, in September, were very successful. In the Officers' Competitions, Lt. H. Peel Ritchie (R.N.) won the Light Weights (10 st. and under), and Lt. F. G. Tanqueray-Willauve, Royal Marine Artillery, won the Middle Weights (11 st. 4 lb. and under). The Heavies did not fill. In the Non-Com., &c., Competitions, Corp. McFadden (R.M.A.) won the Heavies; Seaman Skinner (H.M.S. Pembroke), the Middles; Lance-Corporal Saunders (South Wales Borderers), the Light Weights; and Private Wheeler (6th Royal Fusiliers), the Feather Weights. The Amateur Fencing Championships were won: Foils, by T. P. Hobbins (Civil Service R.V.), and Sabres, by Capt. W. Edgeworth Johnston (Royal Irish Regt.). The Public Schools' Boxing, &c., Championships, at Aldershot, April 6th, were won:—Boxing: Feathers, H. A. Ward (St. Paul's); Light Weights, H. B. Smith (St. Paul's); Middle Weights, S. A. MacMillan (St. Paul's); Heavies, R. H. Edmondson (Rugby). Gymnastics, Cheltenham (R. Haines and G. M. Clark). Silver Medal, F. G. Skeiton (Felsted). Fencing: Foils, K. Fisher (Charterhouse). Sabres, J. C. Boys (Epsom College).

CRICKET.

ALTHOUGH there was no Australian visit to give International interest to the Cricket Season of 1900, it is doubtful whether the National summer game of England has ever been followed with more close attention and keenness by the general public. With the exception of a wet spell in August, the weather during the summer was exceptionally fine and dry, so that the attendances at the various grounds were always large, and the scoring and run-getting something seldom before witnessed in the history of the game. Statistics prove that the bat has well maintained its superiority over the ball, and although a few bowlers have brilliant records, the averages of the

majority are not quite what they should be. The fielding, however, has been distinctly bad, and many competent judges contend that a large number of matches have been lost entirely owing to this want of capacity amongst our best players, who dropped catch after catch when the ball should have been held, with disastrous effects to the defaulting side. County Cricket and the Championship demand attention before dealing with the general averages. The entire programme of the counties was a little longer than last season, 166 matches being played instead of 150. Of these, 96 had a definite result, whilst the remaining 70 were left unfinished. This gives the same proportion as in 1899—viz., three finished games out of five, so that the alterations in the laws effected in the previous year have not been very successful in preventing draws. The wet weather in August, however, sadly interfered with a large number of games, which otherwise would most certainly have been either won or lost. Although 1900 was most decidedly not a bowler's year, Yorkshire and Lancashire may be said to owe their position as premier county and runner-up, more to their attacking powers and good bowling than to the skill of their batsmen. Both the two counties most thoroughly deserve their position; but Kent, Sussex, and Notts can be well satisfied with the results of their programme. Surrey dropped from first place to the middle of the list, possibly owing to not being quite up to their previous form as regards bowling; but on a perfect Oval wicket they often performed in a most brilliant fashion. The following tables give the complete

DETAILS OF THE COUNTY CHAMPIONSHIP COMPETITION, 1900.

County.	Derbyshire.	Essex.	Gloucester.	Hampshire.	Kent.	Lancashire.	Leicester.	Middlesex.	Notts.	Somerset.	Surrey.	Sussex.	Warwick.	Worcester.	Yorkshire.
Derbyshire	D	D	D	D	D	D	D	D	D	D	D	D	D	D	D
Essex	D	D	D	D	D	D	D	D	D	D	D	D	D	D	D
Gloucestershire	D	D	D	D	D	D	D	D	D	D	D	D	D	D	D
Hampshire	D	D	D	D	D	D	D	D	D	D	D	D	D	D	D
Kent	D	D	D	D	D	D	D	D	D	D	D	D	D	D	D
Lancashire	D	D	D	D	D	D	D	D	D	D	D	D	D	D	D

According to the rule laid down by the M.C.C., "one point shall be reckoned for each win, one deducted for each loss. Unfinished games shall not be reckoned. The county which during the season shall have, in finished matches, obtained the greatest proportionate number of points shall be reckoned the Champion County."

This arbitrary system of reckoning is by no means considered perfect, and at the end of the year the M.C.C. appear to be taking steps to arrive at some plan or method by which the value of drawn games may be equitably estimated. It is, however, a most difficult and awkward subject to deal with. The highest total of the season was the 685 for 8 wickets of Sussex against Leicestershire. The 37 by Hampshire against Lancashire was the lowest. The highest individual score in county cricket was 275 by Ranjitsinhji for Sussex against Leicestershire. C. B. Fry, B. J. T. Bosanquet, and G. L. Jessop have each added their names to the list of those credited with two separate hundreds in a match, the first-named having the additional honour of securing over 200 in one of the contributions.

For Yorkshire, Whitehead heads the batting averages with 70'00 in 7 innings, and Tunncliffe the bowling averages with 12 from 8 overs, Rhodes' averages 12'29 from 1,165'1 overs. For Lancashire, Ward in batting has an average of 37'77 in 45 innings, and Hallam heads the bowling averages with 13'80 from 78 overs, Briggs doing most of the work viz., 1,116'3 overs, average 17'45. For Kent, J. R. Mason tops the batsmen with 33 innings and an average of 53'61; Blythe's 84'1 overs giving him an average of 18'47. For Sussex, Ranjitsinhji's 34 innings and 2,563 runs give the magnificent average of 83'43, C. B. Fry's average of 63'10 coming next; K. O. Goldie 57 overs, average 19'25, and Tate 903'2 overs, average 21'74, head the bowlers. For Notts, Shrewsbury, 28 innings, average 32'03, and Atkinson, 30'1 overs, average 12'28, head the lists. Warwick-hire's best averages are—batting, W. G. Quaife, 26 innings, 58'00, bowling, Santall, 287'5 overs, 18'97; Middlesex, batting, A. E. Stoddart, 3 innings, average 73, bowling, C. M. Wells, 212 overs, average 13'00; Gloucestershire, batting, G. L. Jessop, 41 innings, average 44'43, bowling, F. C. Weaver, 42 overs, average 16'75; Surrey, batting, Abel, 34 innings, average 58'75, bowling, Lockwood, 754'1 overs, average 19'84; Essex, batting, Carpenter, 36 innings, average 41'94, bowling, Mead, 887 overs, average 15'45; Somerset, batting, L. C. H. Palaret, 27 innings, average 35'07, bowling, Cranfield, 490'1 overs, average 24'61; Worcester-

shire, batting, R. E. Foster, 17 innings, average 32'70, bowling, Banister, 536'4 overs, average 19'51; Derbyshire, batting, Storer, 30 innings, average 34'00; Leicestershire, batting, C. J. B. Wood, 40 innings, average 39'32; Hampshire, batting, Capt. Wynyard, innings 5, average 45'00, bowling, Soar, 199'3 overs, average 23'12. The averages in all first-class matches of the season give some interesting facts; K. S. Ranjitsinhji's is a marvellous performance. Although he has fallen 94 short of his aggregate of 1899, viz., 3,159, the record, his 3,065 runs in 1900 give an average of 87'57 against 63'18 in the previous year. His exact figures read 40 innings, 3,065 runs, highest 275, not out 5, average 87'57. After a close struggle the record which he shared with "W. G." of ten centuries in a season has gone, although for a few hours he held the new record of 11, and then shared the distinction with Abel, until the latter eclipsed this by putting on his twelfth century at Hastings. Also Ranjitsinhji's figures include no less than five scores of 200 and upwards. C. B. Fry comes second on the list with 41 innings, 2,325 runs, highest 229, not out 3, average 61'18. His aggregate includes no less than 9 centuries. The old Oxonian has certainly never been seen in such brilliant form. Abel comes next with 49 innings, 2,592 runs, 221 highest, 3 not out, average 56'34. Considering his years, Abel's 1900 performance is indeed a marvel. Hayward (T.) is again close up with his fellow Surreyite. His record reads 57 innings, 2,693 runs, 193 highest, 7 not out, average 53'86. Ten centuries stand to his credit this season, J. R. Mason comes fifth, innings 36, runs 1,828, highest 147, not out 2, average 53'76. Whitehead (Lees) and R. E. Foster's averages are 53'50 and 51'62 respectively. W. G. Quaife has averaged 47'75 with 38 innings, and P. F. Warner 45'44 with 39 innings. G. L. Jessop also comes out very well indeed with 58 innings, 2,210 runs, 179 highest, 3 not out, average 40'18. Jessop in addition secured 100 wickets, a double event hitherto only credited to W. G. Grace in 1876. The veteran W. G. Grace is well up in the averages with 31 innings, 1,277 runs, 126 highest, 1 not out, average 42'56, a really magnificent performance for a man over fifty years of age.

In the bowling averages for the season Rhodes and Haigh stand out by themselves as the successes of the year. Mead and Mold have also proved very deadly with the ball. Trott, perhaps the most formidable bowler of 1899, has gone very low down on the list—fortieth; although with 1,547'1 overs he took 211 wickets, his average being 23'33, but with the boundary net in use at Lords he was very expensive. At the actual head of the list stands Sladen, 44'1 overs, 127 runs, wickets 10, average 12'70. C. M. Wells is second, 212 overs, 468 runs, wickets 36, average 13. Hallam comes third, 78 overs, 138 runs, wickets 10, average 13'80. Rhodes is fourth on the list, but he bowled more overs than any other player. His complete average reads 1,553 overs, maidens 455, runs 3,605, wickets 261, average 13'81. Mold, the next, reads 560'3 overs, runs 1,359, wickets 97, average 14'01. Haigh, overs 958'3, maidens 259, runs 2,416, wickets 163, average 14'82. Mead's average was 17'45 and 131 wickets. Briggs, 17'74 and 127 wickets. J. T. Hearne, with 1,116'2 overs, took 133 wickets per average of 21'15. As regards the other important matches of the year, the Oxford and Cambridge contest ended in a draw for the second year in succession. Oxford began with 503 (H. L.

Pilkington 87, R. E. Foster 171). Cambridge made 392 (L. J. Moon 58, T. L. Taylor 74, E. M. Dowson 65). Oxford at 219 declared (Pilkington 45, Foster 42); Cambridge playing out time with 186 for the loss of two wickets (Moon 60 and J. Stanning 60). Oxford's 503, Foster's 171 and his aggregate of 213, and the total aggregate of 1,300 runs, were all records for the match. The Eton and Harrow scores were: Harrow 388 and 128 (G. Cookson 88 and F. B. Wilson 79); Eton 294 and 218 (Lord Dalmeny 52 and A. A. Tod 96). Harrow won by 1 wicket, and 388 is a record innings for the match. The Players won the Oval match against the Gentlemen by 37 runs. Totals: Players 302 and 253 (Abel not out 153, Hayward 94); Gentlemen 205 and 313 (C. J. Burnup 123, C. McGahey 63). The Lords match was won by the Players with 3 wickets to fall. Players 136 and 502 (Abel 98, Hayward 111, Brown, Senr., 163); Gentlemen 297 and 339 (R. E. Foster 102 and 136, C. B. Fry 68 and 72, Ranjitsinhji did not play in either match. The Cricket Obituary of the year included Richard Daft, E. Peate, and W. Bates. A West Indian team of cricketers visited England during the season.

CROQUET.

PROBABLY in no previous year has Croquet been so popular and so well supported all round as in 1900, not even in the old days when golf and lawn tennis were almost unknown except to a very few enthusiasts. Ireland opened the ball with its first Championship Tournament in Dublin on April 16th. Mr. K. N. Roper won the Gentlemen's Championship, and Mrs. H. Stewart won the Ladies' Championship. Also England beat Ireland in a match two a side. The Northern Championship was held at Old Trafford on May 7th, when Mr. A. E. Beddow won the Gentlemen's, and Mrs. O. Henry the Ladies'. Then followed the London Championships at the Queen's Club, May 14th, in which Mr. B. Carter won the Gentlemen's, and Mrs. Brigstocke the Ladies'. The Championships at Wimbledon on May 28th produced some splendid play. Mr. J. E. Austen won the Gentlemen's Championship, the holder, Mr. Blacter, being beaten in the third round. Mr. R. N. Roper and Miss Cowie won the Mixed Doubles Championship. Miss Gower, the holder, won the Ladies' Championship, Mrs. Blackett being unable to play off the final owing to illness. After this, tournaments were held all over the country, winding up at Devonshire Park, Eastbourne, September 24-29th, when 478 matches were played; and Mr. C. E. Wills and Mrs. Tuckett respectively won the Gentlemen's and the Ladies' Singles.

CYCLING.

It cannot be said that either amateur or professional cycle racing flourished under the auspices of the National Cyclists' Union in 1900. The professionals declined to be dictated to by a body from which nothing could be gained except harassing regulations, and the best of them went abroad to compete for the valuable prizes offered on the Continent. It is not easy to say why amateur cycle racing failed to draw the public, but it certainly did not, except at country meetings and on a Bank Holiday. Perhaps the miserable loafing and waiting tactics adopted by some of the best riders, which rendered nearly all races a last-lap rush and the rest a crawl, are answerable for the lack of public interest in this once most

popular sport. Notwithstanding, the N.C.U., if not successful as a racing organiser, certainly did a good deal for cycling as a means of locomotion and touring, and as a proof of the governing body's vitality and prosperity their income for the year ending 1899 amounted to no less than £2,307. The N.C.U. held their Annual Championship Meetings at Middlesbrough on June 23rd, and at Worlington July 14th. Both attracted big gates, and the expenses being small the profits were large. At Middlesbrough, A. S. Ingram, Polytechnic C.C., won the Amateur Quarter-Mile in 33 secs., and W. A. Edmonds, of Bristol, the One Mile in 2 mins. 43½ secs., the final being the slowest of all the heats. The three professional events were not at all well supported, and the defeat of Platt Betts in two of them was rather unexpected. J. Camp, of London, won the Quarter-Mile in 32 mins. ¾ secs., and W. Chinn, of Birmingham, took the One Mile in 2 mins. 28¾ secs., the slowest heat of the lot, Platt Betts being second. The Five Miles went to H. B. Howard, of Putney, in 13 mins. ½ sec, Platt Betts being again second, Howard slipping away in the last lap. At Worlington the Five Miles Amateur Championship, with a time limit of 15 mins. and a standard of 13 mins. 30 secs. fell to A. S. Ingram, of the Polytechnic, in 14 mins. ¾ secs., the final heat again being the slowest. The Twenty - Five Miles Amateur Championship, with a time standard of 1 hour 10 mins., and eight starters, was won by W. S. Ramsay, of Barrow, who defeated the holder, H. W. Payne, of the West Roads C.C. by inches, in 1 hr. 4 mins. 33¾ secs. The Fifty Miles Amateur Championship, paced, was held at the Crystal Palace on September 15th; twelve competed, and the holder, H. W. Payne, won brilliantly by 100 yards in the new record amateur paced time of 1 hr. 44 min. 15½ secs., indeed, H. W. Chinn, of Birmingham, and Payne, between them beat all the records for paced amateur racing from 11 miles to the finish, Chinn making a new 1-Hour amateur record of 29 miles 465 yards. The standard time for the championship was 1 hr. 50 mins., good pacing and a high standard certainly answering here. Another record made on the same day during the meeting was 2 mins. 7¾ secs. by G. A. Olley, Anerley B.C., for the unpaced amateur 1 Mile standing start. With improved motor pacing and the tracks altered to suit the requirements of the motors, 1900 saw nearly all the world records considerably improved. The 1-Hour record was the one generally attacked. H. Elkes, with 36 miles 747 yds., held the honour, but during last year Bouhours and Bauge at the Parc des Princes-Auteuil, Paris, gradually increased the distance to 63 kilometres 779 metres. Bauge holding these figures in September. On October 25, however, on the wood track at Brockton (Mass.), W. Stinson the American crack, admirably paced, became the first rider to cover 40 miles inside the hour, his full record being 40 miles 327 yards. He beat world's records from 12 miles, inclusive, and his 20 miles' time, 29 mins. 55 secs., is the first performance of 20 miles inside 30 mins. On Nov. 4th, Bauge, at Auteuil, went for this record; he beat all world's records from 20 kilometres to 160. His 1 hour = 64 kilometres 333 metres, or some 300 yards less than Stinson's performance. Bauge, however, went on and placed the following world's records to his credit: 2 hours, 128 kilometres 470 metres; 50 miles, 1 hr. 14 mins. 55½ secs.; and 100 miles, 2 hrs. 33 mins.

All these figures are simply marvellous, and entirely put in the shade anything in the way of record breaking done in England.

With the exception of the Champ'ionships none of the English Cycle Meetings attracted anything of a gate. Indeed, chiefly owing to want of support, both the Catford and the Wood Green tracks were sold and ceased to exist at the end of the season. During the year E. Hale, the professional, completed his ride of 100 miles per diem, not including Sundays, over the roads of England. The Bordeaux to Paris race, 594 kilometres, about 372 miles, this year, without motor pacing, was won by J. Fischer, of Munich, from M. Garin, of Roubaix, in 21 hrs. 57 mins. 57 $\frac{1}{2}$ secs., as against C. Huret's 1899 win with motor pacing in 16 hrs. 35 mins. 47 secs. In the Paris World's Championships, the professional World's Champion, Jacquelin, beat the Amateur World's Champion, Didier Nauts easily. The Road records—which must now be unpaced—of the year have not been numerous. The following, however, have been passed: 50 Miles Tricycle, J. Van Hooydonk, 2 hrs. 35 mins. 10 secs.; London to Portsmouth and back bicycle, H. Green, 8 hrs. 13 mins. 20 secs.; 100 Miles bicycle, H. Green, 5 hrs. 3 mins. 43 secs.; 12 hour bicycle H. Green, 226 $\frac{1}{2}$ miles; ditto, tandem, D. K. Hall and H. Charles, 201 $\frac{1}{2}$ miles; London to York, bicycle, H. Green, 10 hrs. 19 mins. The Automobile Club, Offices, 4, Whitehall Court, S.W., is now a very flourishing organisation, and the Cyclist Touring Club Offices, 47, Victoria Street, S.W., now numbers 56,000 members. The Offices of the National Cyclists' Union are at 27, Chancery Lane, E.C.

FOOTBALL.

Football was certainly quite as popular a pastime in 1900 as in any former year; but it is doubtful whether the various abuses which had gradually crept into its general management and methods were not more prominent and pronounced than before. The Association game decidedly increased the numbers of its votaries and clubs at the expense of the Rugby code, the professional rules and regulations of the former enabling more money to be made under its laws than even with the Northern Union, and, of course, the Rugby Union still steadily refused to recognise professionalism in any shape or form. It may or may not be to the best interests of the Rugby game to allow Association professionalism to attract so many players to its standard, but it is perfectly certain that unless the R.F.U. somewhat alter their present hostile attitude to the paid player under their rules, the Rugby game in England will, in the near future, be entirely confined to a few Varsity and Public School teams and the Northern Union.

ASSOCIATION.

Notwithstanding the modern mania for the League tournament and even the venerable glamour surrounding the F.A. Cup ties, the International matches are still able to attract immense gates and excite universal interest. In the two previous years the English eleven had won a triple crown, but 1900 saw the Rose in a very different position. The English team began against Ireland and just managed to win, but not at all on the same lines as in previous years. With Wales England came off rather worse, as they only managed a draw. In the meantime Scotland had won both their matches against

Wales and Ireland with a good margin, and when the final test, England v. Scotland, came off at Glasgow on April 7, public form was amply vindicated, Scotland proving themselves the better side all round, and fairly winning rather easily a most interesting match. Over 68,000 spectators paid gate, and the receipts amounted to over £4,000, both records for an International Association contest. The following table gives exactly the results of the International Competition, there being very little to choose between Wales and England.

	Plyd.	W.	D.	L.	Pts.	Goals.	
						For	Agst.
1. Scotland	3	3	0	0	6	12	3
2. Wales.....	3	1	1	1	3	5	6
3. England	3	1	1	1	3	4	5
4. Ireland	3	0	0	3	0	0	7

The Scottish team were: Reenie, goal; N. Smith and Drummond, backs; Gibson, Raisbeck and Robertson (capt.) half-backs; Bell, Walker, R. S. Mc Gill, Campbell, and A. Smith, forwards. England: Robinson, goal; Crabtree and W. J. Oakley, backs; Johnson, Chadwick and Needham half-backs; Athersmith, Bloomer, G. O. Smith (capt.), G. P. Wilson and Plant, forwards. The Football Association Challenge Cup was left to be fought out in the final tie at the Crystal Palace by Bury, a club very low down in the League, and Southampton, the latter being the first Southern club to reach the final since 1833. As a first-class exhibition of the game the match tie was not a very grand display, but Bury won easily by 4 to 0. For the second year in succession Aston Villa headed the First Division of the League with 50 points out of 34 matches played, the highest score yet totalled in this competition. In the Second Division Sheffield Wednesday came out top, with the Bolton Wanderers second. Sheffield United were second in the First Division with 48 points. The Scottish and English Leagues managed to make a draw for the League International Competition. In the Southern League Competition Tottenham Hotspur and Portsmouth both headed Southampton, the points being 44, 41, and 35, the 'Spurs being the champions. Oxford won the Inter-Varsity match by 2 goals to nil, a justification of previous relative form. Owing to the war the Army Football Cup fell through for the season. The F.A. sent a team to Germany and Austria in the spring, playing matches at Berlin, Carlsruhe, and Prague.

RUGBY.

The Rugby season of 1900 was a curious one as regards the Union International matches. England led off by losing badly to Wales at Gloucester on January 6 by 3 goals to a try, and Wales followed this up by beating Scotland by 4 tries to 1. England, after a series of changes in their team, met Ireland, the champions of the previous year, and beat them by 2 goals and 2 tries to 1 goal. Ireland followed this up by drawing with Scotland a pointless game, and the chances of England v. Scotland looked well for the wearers of the Rose, but after an excellent struggle at Edinburgh on March 10, not a point was scored on either side the play being of a very high order as regards the forwards. Wales finished up the International series by beating Ireland at Belfast by one try to nil on March 17. Possibly the war interfered with both England and Scotland putting their very best teams in the field.

The table of the matches is as below, Wales most thoroughly deserving their victory.

	Plyd.	W.	D.	L.	Pts.	Points.			
						For.	Agst.		
						G. T.	G. T.		
1 Wales	3	3	0	0	6	3	5 = 28	0	2 = 6
2 England	3	1	1	1	3	3	18	4	0 = 17
3 Scotland	3	0	2	1	2	0	1 = 3	0	4 = 12
4 Ireland	3	0	1	2	1	1	0 = 4	2	3 = 18

The English team against Scotland was H. T. Gamlin, back; R. Forest, W. L. Bunting, G. Gordon-Smith, and G. C. Robinson, three-quarter backs; G. H. Maisden and G. C. Marquis, half-backs; J. Daniel, A. H. Luxmore, E. W. Bell, S. Reynolds, A. F. Todd, H. Alexander, J. Baxter, and J. P. Shorter, forwards.

The Welsh fifteen against Scotland was W. J. Bancroft, back; W. Llewellyn, E. G. Nicholls, G. Davies, and W. Trew, three-quarter backs; G. L. Lloyd and L. A. Phillips, half-backs; A. Brice, F. Millar, G. Boots, J. I. Hodges, J. Blake, W. H. Williams, R. Thomas, and G. Dobson, forwards. The County Championship fell to Durham, who rather unexpectedly defeated Devon by 11 pts. to 3. Of the two North and South matches North just one the first, but the South easily gained the second by 2 goals and 4 tries to 3 tries. In the Inter-Varsity match Cambridge outplayed the Oxonians completely, and won with a record score of 22 pts. to nil, this being exactly in accordance with their relative performances during the term. The Metropolitan Club honours rested with London Scottish and Blackheath Clubs in the order named. St. Mary's won the Inter-Hospital Challenge Cup, beating London; and the Yorkshire Challenge Cup fell to Mytholmroyd. The Northern Union did not make any very great strides during 1900, the expenses and wear and tear of a Rugby fifteen being very heavy even under their stringent professional rules. Runcorn finished top of their Lancashire competition, and Bradford headed the Yorkshire list of clubs. For the Northern Union Cup final tie Swinton beat Salford by 2 goals and 4 tries to 1 goal and 1 try.

GOLF.

THERE appears to be no end to the increasing popularity of Golf. New clubs are being started everywhere, and all the old-established fixtures receive more and more support from all parts of the country, and also from abroad. The Royal and Ancient Golf Club of St. Andrews, by means of the rules of the Golf Committee, have now arranged a code by which, as a notable and capable writer recently remarked, "we end our old and begin our new century of Golf." The average standard of Golf throughout the world has greatly improved in the last three or four years, medal play is largely in vogue, and team matches are becoming more numerous than formerly. In America, where the game has made gigantic strides, it is estimated that now there are 1,200 regularly organised clubs, with a membership of 20,000, of whom 50,000 are women. The following are some of the most noticeable results of the year. The Amateur Championship of India and the East, under the management of the Calcutta Golf Club, on the Tollygunge Club links, was won by G. Maitland Heriot, North Cachar, with a total of 178 points. On March 27, the annual Oxford and Cambridge match was played at Sandwich, the Dark Blues winning the 22nd match by no less than 69 holes to none. The

Oxonians have now won 10 matches to the Cantabs' 11. The Amateur Championship took place in the second week in May on the Sandwich links. The entry was a large one, and thoroughly representative. Mr. Harold H. Hilton, of the Royal Liverpool Club, won the Championship, beating Mr. James R. bb, St. Andrews' Club, by 8 up and 7 to play. The eighth Ladies' Championship, held at the Westward Ho links, May 18, was won by Miss Rhona Adair, Royal Portrush the Irish lady champion beating Miss Neville, Worcester-shire, by 7 holes up and 5 to play. The Open Championship was held on the St. Andrews' links, June 6 and 7; J. H. Taylor (Richmond) won the Championship Vase, the Gold Medal, and £50, with a total score of 309. H. Vardon (Scarborough) was second with 317. Mr. Robert Maxwell, of Tantallon, was the leading amateur—viz. seventh with 329. H. Vardon subsequently went to America and greatly distinguished himself in the States. Mr. F. G. Tait, of the Black Watch, was killed in South Africa, near the Modder River. He was amateur champion 1896 and 1898.

HOCKEY.

As year by year Football becomes more and more impossible to the genuine amateur, the Public School boy, or the University man, Hockey, under a governing association and proper rules, is rapidly adding to its votaries and clubs. International and county matches are regular fixtures, the best clubs have a long list of engagements each season, and gradually the game is forcing its way into the Schools' sports programme. Cambridge defeated Oxford for the fifth year in succession at Richmond by 3 goals to 2, after rather an uninteresting game. For the first time the North defeated the South, also at Richmond, by 2 goals to nil. At Belfast, England beat Ireland by 2 goals to 1. Ireland has not yet won this match; and at Kersal, Manchester, England, inflicted a crushing defeat on Wales by 10 goals to nil. At Llandudno, Ireland beat Wales 5 goals to 1. Amongst the county matches, Middlesex beat Lancashire and Surrey, and Lancashire beat Yorkshire very easily. These would appear to be the leading county teams.

PEDESTRIANISM.

PROFESSIONAL pedestrianism did not produce any very grand results in 1900. The same old "stair" were still in evidence, and there were no recruits from the amateur ranks to add interest to any money matches that might be arranged. Downer and Bredin, Cullum, Bacon, Watkins, and O'Neil had all met one another at every possible distance, and there could be no question as to their relative abilities over any given number of yards. At one time, early in the season, it was expected an A.A.A. champion would go over to the professional ranks, when several matches might have been arranged for him, but time went on and he still remained an amateur, without any very satisfactory results to himself. Downer had proved his pace to be too fast to be tackled by any of the Sheffield sprinters, and Bredin, between a quarter and half-a-mile, was still a dangerous man to meet, although the ex-amateur is now by no means in his first youth. Watkins, up to ten miles, remained unchallenged, as Bacon was at last virtually on the shelf. The few matches that were decided failed to produce anything in the way of time. H. Cullum led off his professional match-making by defeating a very indifferent runner named Fielding at a

Quarter of Mile, and having beaten Bredin earlier in the season at a Half, ran G. B. Tindler for the Half-Mile Championship of the World, at Rochdale. In a slow run race, Tindler won easily, in very poor time. This encouraged Bredin to make another match with Cullum, and on April 28th the pair met at Cardiff at 700 yards. The gate was small, considering Cullum was a local and popular pedestrian. Cullum made the running until close home, when Bredin went by and won easily, in 1 min. 31secs. A. R. Downer then ran Johnson (otherwise Maybury, of America, 100 yards, and beat him; also Bacon beat Len Hurst, in slow time, for ten miles, at Southampton, at the end of July. Downer and Bredin went to Paris for the World's International Meeting for Professionals the first week in July; Bredin won 100, 400, and 1,500 metres, the prize money amounting to about 900 francs. Downer ran in the Hurdles in Paris, but injured a sinew in his leg and failed to win anything, and also caused him to forfeit to Bredin for a match the pair had arranged at a Quarter of a Mile. In August, at Rochdale, O'Neil, the Irishman, ran H. Watkins a match over three miles. Watkins was by no means fit, and O'Neil won in slow time. In all these matches the gates were miserably small, and as the £50 or £100 stakes were generally fictitious the amounts to be divided between the competitors must have barely paid training expenses. Decidedly the most noticeable event of the year took place at Wood Green on October 6th, when for a £25 prize Len Hurst tried to run 19½ miles in 1hr. 51min. 5secs. The day was very windy and cold, but he accomplished the distance in 1hr. 50min. 58sec. and, going on, covered the 20 miles in 1hr. 53min. 42½secs., which replaces the previous doubtful record of Bryne, viz., 1hr. 54secs. Bredin also in October ran Keane of America two matches at 400 Yards and 350 Yards, at Northampton. Bredin won the first in 46½secs., but lost the second.

RACKETS AND TENNIS.

Although some of our best players were otherwise engaged in Africa, the majority of the long-established competitions took place. Early in the year, Mr. E. H. Miles, the English Amateur Champion, took up his residence at the Tuxedo Court, not far from New York, and a series of most interesting International matches were played both at Tuxedo and Boston. Miles beat L. M. Stockton, the American Amateur Champion, 3 sets to 0; and Latham beat Stockton (rec. halt :o) by 3 sets to 0. Pettitt beat Miles (rec. 15 and a begin) by 3 sets to 1; Pettitt and Stockton beat Latham and Miles by 3 sets to 1 at Boston; but the English pair, in a return match at Tuxedo, won easily by 3 sets to 0. Subsequently, Latham and Miles played racket's. Miles beat Q. A. Shaw, the American Amateur Champion, 3 games to 2 at Boston, and Latham once out of three times gave Standing 3 aces and beat him 3 games to nil, in the Philadelphia fast court. Latham and Miles beat Standing and Shaw, 4 games to 1, at New York; and Latham and Miles beat Standing and Pettitt, 4 games to 3, at Philadelphia. Subsequently, on February 11, Miles beat Q. A. Shaw for the Amateur Racket Championship of America at Boston, by 3 games to 1. In April, at the Queen's Club, West Kensington, the most important matches of the year took place. P. Ashworth, the best of the challengers, was easily defeated by the holder, H. K. Foster, for the

Amateur Rackets Championship, by 3 games to nil, and 45 aces to 25. In the Double Rackets Championship, H. K. Foster, and P. Ashworth, the holder, defeated the challengers, two Old Cartusians, F. Dames Longworth and W. G. K. Price, by 4 games to 1. Oxford (L. F. Andrewes and S. J. G. Hoare) defeated (E. B. Noel and W. K. French) Cambridge in the Double inter-Varsity match, by 4 games to 1, and in the Single, the Oxonian, Andrewes, won again against Noel, after a most interesting match, by 3 games to 2. The play in the Public Schools' Racket Cup was of a decidedly high standard, the final going to Malvern (B. S. Foster and W. H. B. Evans); Rugby (H. C. Blackwood and O. S. Fleischmann) losing by 4 games to love, at 15-5, 15-4, 15-2, 15-3. The Military Racket Competitions fell through owing to the war. At Tennis, J. B. Gribble beat all the challengers for the Amateur Championship at the Queen's Club, early in May, and then met the holder, E. H. Miles, who came from America to defend his title. Mr. Miles won easily by 3 sets to nil, 18 games to 7, and 96 strokes to 52. On July 5 and 6, the Cantabs, E. M. Baerlein and E. B. Noel, beat the Oxonians, E. A. Biedermann and H. E. Underdown, 3 sets to nil, for the Four-handed Match, and Baerlein also won the Singles against Biedermann, by 3 sets to love. Mr. J. B. Gribble won the M.C.C. Gold Prize, Mr. E. H. Miles not defending his title.

ROWING.

THE amateur rowing season of 1900 was perhaps rather more successful than that of the previous year owing to the brilliant weather which prevailed during the regatta month—July. Skiff-racing decidedly advanced in popularity, and the minor up-river regattas were capitally attended and proved very fashionable functions. The racing of the year, as usual, began at the Universities in February. At Oxford, the Torpids resulted as follows: First division, head bat, New College; Second division, Hertford; third, Queen's. At Cambridge, "the Lents" finished with Magdalene head of the third division, Caius II. of the second, and First Trinity of the first division. The Clinker Fours at Oxford fell to New College, stroked by R. Culme-Seymour, who subsequently gained his Blue, and a similar contest at Cambridge was won by Peterhouse from a large entry. The Oxford and Cambridge Boat Race took place on March 31st over the usual course. Cambridge had five of their old Blues rowing, Goldie and Chapman being prevented from competing again. The Oxonians, from various causes, lost the services of Hale, Warre, Steel, and Thornhill, their No. 7, the last-mentioned, after their arrival at Putney. The day was fine the water smooth, and Oxford won the toss. Cambridge led all the way and won by quite 20 lengths in 18mins. 47secs., equaling the record. The winners were perhaps the best eight ever sent up by either University. Messrs. D. H. McLean (Oxford) and S. D. Muttelbury (Cambridge) were the coaches. The Cambridge times to Hammersmith, 7mins. 10secs., Chiswick, 11 mins. 23secs., and Barnes Bridge, 15 mins. 34secs., were all records for the race. The crews were: Cambridge—S. P. Cockerell (bow), 11 st. 10 lb.; C. J. M. Adie, 12 st. 3 lb.; B. W. D. Brooke, 11 st. 10½ lb.; J. E. Payne, 13 st.; R. B. Etherington-Smith, 12 st. 11½ lb.; R. H. Sanderson, 12 st. 13½ lb.; W. Dudley Ward, 12 st. 9 lb.; J. H. Gibbon (stroke) 11 st. 8 lb.; G. A. Lloyd (cox), 9 st. Oxford—H. H. Dutton,

10 st. 9½ lb.; R. Culme-Seymour, 11 st. 7½ lb.; C. E. Johnston, 12 st. 12 lb.; C. W. Tomkinson, 11 st. 13 lb.; Lord Grimston, 13 st. 10½ lb.; H. B. Kittermaster, 14 st. 6 lb.; T. B. Etherington-Smith, 11 st. 5½ lb.; C. P. Rowley (stroke), 11 st. 12½ lb.; G. S. Madagan (cox), 8 st. 5 lb. Both crews rowed in boats built by Sims of Putney. Previous to Henley Regatta, at Cambridge, C. H. Taylor and C. J. D. Goldie, both Etonians, won the C.U.B.C. Pairs, and R. H. Sanderson and C. J. M. Adie won the Lowe Double Sculls. The June Eights on the Cam left the following crews heads of the two divisions. First Trinity retained their pride of place in the first division, although pressed by "Third," and Pembroke II. gained the top of the second division in the last night. At Oxford the "Mays" gave Magdalen the headship of the river, the Varsity stroke, H. G. Gold, rowing stroke for them; Lincoln leaving off head of the second division. The O.U.B.C. Sculls were won by W. W. Field, of Exeter, and the O.U.B.C. pairs by T. B. Etherington-Smith and F. W. Warre (stroke). Henley Regatta took place on Wednesday, Thursday, and Friday, July 4th, 5th, and 6th, in splendid weather, except on the last day, when the wind was too much off the Bucks shore, and all in favour of the crews on that side of the river; indeed, all the finals were won from that station except one. The entries numbered 46 as against the record of 58 in 1895. The winners were—Grand Challenge Cup, Leander, stroked by F. O. Huntley; Ladies' Plate, New College, Oxford; Thames Cup, Trinity College, Cambridge (second crew); Stewards' Cup, Leander, stroked by J. E. Payne; Wyfold, Trinity Hall, Cambridge; Visitors' Cup, Trinity College, Cambridge (second crew); Silver Goblets, Goldie and Maitland (stroke), Trinity College, Cambridge; Diamond Sculls, E. G. Hemmerde, University College, Oxford. A Belgian eight from Gand made a big fight with Leander in a heat of the Grand, and Howell, in the final of the Diamonds, fell out of his boat after passing the post. There was not a very large attendance on either of the three days. After Henley, the London Rowing Club defeated the Thames R.C. in all the Senior Eights at the Metropolitan, Kingston, Molesey, Staines, and Goring. They also won the Senior Fours at the Metropolitan, Kingston, and Staines. Blackstaffe, Fox, and St. G. Ashe won the chief senior sculling races. The Wingfield Sculls—Amateur Championship of the Thames—was won on July 20th by C. V. Fox of the Guards Club. He defeated B. H. Howell of the Thames, the holder, very easily in 22 mins. 54 secs., a best on record for the race. Howell was far from well both here and at Henley. The two chief provincial prizes of the year, the Victoria Gold Vase at Nottingham, and the West of England Cup at Tewkesbury, were both won by the Burton R. C. four. H. M. Cohen is Amateur Punting Champion of the Upper Thames, but C. R. Mullins defeated him for the Amateur Punting Championship. G. Haines, of Old Windsor, is the Professional Punting Champion. Two Cambridge blues, A. W. Swanston and N. L. Calvert, were killed in South Africa during the year.

At the Paris International Regatta on the Seine, in August, the Vesper R.C., U.S.A., won the eights, beating the Gand crew from Belgium, and Barrelet, of d'Enghien, won the sculls. In the same month, L. Prevel, of Nice, won the European Amateur Sculling Championship at Courbevoie on the Seine. With the exception

of St. G. Ashe, no Englishman competed at the Paris International Regatta.

Professional rowing remained at a very low ebb during 1900; although on September 10th two Australians, G. Towns (the holder) and J. Wray, sculled for the Championship of England and £200 aside from Putney to Mortlake. Towns led after the Crab Tree, and won easily by 2½ lengths in 22 mins. 40 secs. On September 24th, G. Bubear (aged 42) and S. Emmett (aged 36) sculled for £50 aside from Putney to Mortlake, Emmett winning easily in 23 mins. 8 secs. A match in open boats on the Tyne, in August, for £100, between J. Gibson and G. Brown, won by Gibson, was the only other professional event worth recording.

SKATING.

In the matter of records, Skating in 1900 was most important, as the great champion, Peder Oestlund of Trondhjem, Norway, placed no less than four world's records to his credit, and all the big International fixtures were brought to a definite conclusion. Yet the great Norwegian skater lost the World's Championship at Christiania, under the International Skating Union, although he must be considered very unlucky to have done so.

The Amateur Skating Association of England, owing to its admirable organisation, managed to hold three important events on the only three days that ice was available in England—viz, February 10th, 12th and 13th. This body, early in January, very wisely decided that in future speed tests must be skated in Great Britain alone, Engadine skaters possessing superior advantages over those of Great Britain in the matter of ice and other conditions. On February 10th, at Littleport, Cambridgeshire, the N.S.A. Amateur Championship was decided on good ice over the usual distance but with 5 turns. A. E. Tebbit, of Milton, the holder, again won in 5 min. 30½ secs., H. A. Palmer, of Kettering, being second. There were 18 entries. It was five years since Tebbit had had to race for his title. On the following Monday, Feb. 12th, the Professional Championship was held over the same course. James Smart, of Welney, retired, and F. Ward, of Sutton St. Edmund's, won easily in 5 min. 33½ secs., the ice being rough. On Feb. 13th, at the Welsh Harp, S. Markham of Dalston won the A.S.A. Baker 220 Challenge Cup—a straight course—Markham did 21 secs. in a heat, but his opponent, A. E. Tebbit, fell in the final. The pair raced again subsequently for an extra prize, and Tebbit won by six inches in 20½ secs. On Feb. 22nd, at the Niagara Rink, London, Herr Salchow, of Stockholm, won an A.S.A. International Figure Skating Contest. The Foreign Competitions resulted as follow:—On Jan. 21st Herr Salchow won the Figure Skating Championship of Europe at Berlin, Herr G. Riegel, of Vienna, being a close second. On Feb. 3rd and 4th the Speed Skating Championship of Europe at Csorba, in the Carpathians—an altitude of 4,400 feet—were all won by Peder Oestlund, of Trondhjem, 500 metres, time 47½ secs.; 5,000 metres, time 9 min. 15½ secs.; 1,500 metres, time 2 min. 39½ secs.; 10,000 metres, time 22 min. 45 secs.; G. Wathén, a Finn, and J. C. Greve, of Amsterdam, were his most dangerous opponents. On Feb. 10th and 11th, at the big Davos meeting, on good ice, Oestlund again won all the four Speed events for the Davos Cup. His times were as follow:—500 metres, 45½ secs., 1,000 metres, 1 min. 34 secs.,

1,500 metres, 2 min. 22½ secs.; 5,000 metres, 8 min. 51½ secs.; 10,000 metres, 17 min. 50½ secs. All these were world's records, except the 5,000 metres. At the same meeting the Figure Skating Championship of the World was won by Herr G. Hügel, of Vienna, although in points there was nothing to choose between the Austrian and Herr Salchow, of Stockholm. The World's Speed Championships came off on Feb. 25th at Christiania, Norway, on the Frogner Kilen. Wind, snow and thaw spoilt all the times. Oestlund, after all his previous training and an eight days' journey from Davos to Norway, was palpably stale. Edv. Engelsaas, also of Trondhjem, the Norwegian champion of the year, defeating him in three out of the four events. The results were:—500 metres, P. Oestlund, time 46½ secs.; A. Naess, second, 47½ secs. 1,500 metres, Edv. Engelsaas, time 2 min. 38½ secs.; A. Naess, second, 2 min. 42 secs.; Oestlund retired. 5,000 metres, Engelsaas, time 9 min. 34½ secs.; Oestlund, second, 9 min. 43 secs.; 10,000 metres, Engelsaas, time 20 min. 9½ secs.; C. Frantzen, second, 20 min. 12½ secs.

SWIMMING.

LAST season the Amateur Swimming Association contented itself with comparatively little legislation, and, consequently, the sport, unharassed by its ruling body, had a successful if rather uneventful year. An agitation, however, is on foot to enlarge the A.S.A. from three to five divisions, which seems likely to be successful. The wisdom of the move, however, is doubtful, and may ultimately tend to the disruption of the Association. The racing of the year resulted in J. A. Jarvis, of Leicester, winning all the A.S.A. Championships, from the Quarter-Mile upwards, a feat he had never done before, although he only placed one record to his credit, viz., the Bath Quarter-Mile, he swimming the distance at Leicester, in his club championship, in 5 mins. 52 secs., as against Tyers's Swindon record of 5 mins. 53½ secs. Jarvis began with the One Mile Championship at Highgate Ponds on June 30th, which he won for the fourth year in succession in 25 mins. 26 secs. easily, G. E. Sharp, of Leicester, being second. On July 21st he won the Half-Mile Championship at Southport in 12 mins. 35 secs. for the third year, Sharp again being second. The Long Distance Championship from Strand-on-the-Green to Putney July 14th, he also won for the third time in 1 hr. 4 mins. 17 secs., a best time for the race, Sharp again being second. At Skegness, September 1, he took the Salt-water Quarter-Mile in 12 mins. 55 secs., J. Wildgoose, of Hyde, being second, and in the same month he carried off the 500 yards Championship in 6 mins. 49½ secs., and the Ulph 1000 Yards Challenge Cup at Great Yarmouth in 11 mins. 59½ secs. F. C. V. Lane and J. H. Derbyshire swam a dead-heat for the A.S.A. 500 Yards Championship in 2 mins. 34½ secs., a record, and Derbyshire won the Hundred Yards Championship very easily in 61 secs. at the end of the season. W. Taylor, of Bootle, for the third year took the Plunging Championship with 75 ft. 11 in. In the Oxford and Cambridge match at the Bath Club, June 22nd, Oxford won the 50 yards and 100 yards with D. Milburn, Cambridge, taking the Quarter with D. V. Cow. Cambridge, however, won the Team race, and also the Water Polo by 3 to 2. An A.S.A. team visited Paris for the International races at Asnières, Jarvis winning the 1000 Mètres in

13 mins. 40½ secs.; F. C. Lane the 200 Mètres in 2 mins. 25½ secs., and also the 200 Mètres Obstacle race; Jarvis won the 4000 Mètres easily, and Gresley took the Professional 4000 Mètres; the Osborne S.C. also beat the Brussels Club at Water Polo by 7 to 2. The chief Water Polo matches were won as follow:—North beat South 6 o; England b at Ireland 5-0, Wales 7-3, and Scotland 5-0—Jarvis and Derbyshire being in the English team; Scotland beat Wales 1-0, and Ireland 6-1; and Wales beat Ireland 3-1; Lancashire beat Middlesex for the County Championship 3-1; and the Amateur S.C. defeated Otter 6-0 for the Southern Counties Championship.

TURF.

"THE Prince's Year," as 1900 is sure to be called, owing to the triple victory of Diamond Jubilee in the three classic races of the year, was chiefly noticeable for the bold bid made by the American jockeys and trainers to wrest racing honours from their English rivals, and the regular introduction of the starting gate into all the two-year-old races. The death of the Duke of Westminster prevented the hero of 1899, Flying Fox, by Orme—Vampire, proving his powers as a four-year-old, and setting the seal to his fame in the more important events of 1900. On the death of his owner, Flying Fox and the rest of the racing stud of the Duke were sold at Kingsclere, on March 8th, the sale producing the wonderful average of 3,797gs., Flying Fox reaching the record world's price of £37,500, Mons. E. Blanc being his purchaser. Although entered for the Ascot Cup, his new owner decided to withdraw Flying Fox from all his engagements, and he was not seen again on a racecourse, to the general regret of all English sportsmen. Forfarshire, by Royal Hampton—St. Elizabeth was, very early in the year, installed first favourite for the Derby, the colt not being engaged in the Two Thousand, for which several horses were heavily supported. Eventually, on the day of the Newmarket race, May 2nd, Elopement at 15 to 8, started first favourite; but the Prince of Wales's horse, Diamond Jubilee, by St. Simon—Perdita II., won rather easily, at 11 to 4, the third favourite, Bonarosa, being second, and Sidus third; value of the Stakes, £4,700. This victory, of course, at once placed Diamond Jubilee at the head of the Derby betting, and as he won the Newmarket Stakes of £3,425 a fortnight after the Two Thousand, his Derby victory was almost a foregone conclusion. On May 30th, at Epsom, he started a hot favourite at 6 to 4, and won rather easily from Simon Dale, Forfarshire, the second favourite, at 100 to 30, running badly, although ridden by S. Loaves. Diamond Jubilee, at the First Newmarket July Meeting, with 5 to 4 on his chance, signally failed to give 1st. 6lb. to Merry Gal, 7st. 13lb., in the Princess of Wales Stakes, value £7,150, but with 9st. 4lb. on his back he won the richest prize of the year, the Eclipse Stakes, value £9,285, at Sandown Park, on July 20th. After this victory, he started for the St. Leger, value £5,125, at 3½ to 1 on, and the opposition being rather weak, he won easily by a length from Elopement, second. The Prince's horse only made one more appearance in public after the St. Leger, when he started for the Jockey Club Stakes at the Newmarket, 1st October, value £7,150. He was first favourite at 7 to 4 against, but, in the worst of tempers, he was beaten out of place, Disguise II., by Domino, receiving 12lb. from

the Derby hero, winning easily. Out of his seven attempts, Diamond Jubilee won five times, and was second once, his total winnings during the season amounting to £27,985. Merry Gal, 3 years, by Galopin, accounted for the £7,150 Princess of Wales Stakes, one of the "Ten Thousand pounders," as they are termed. The Cup races of the year were quite spoilt by the absence of Flying Fox. Merman, by Grand Etanleur, Sloan riding, made his solitary appearance for the year in the Ascot Cup, value £3,300, which he won, defeating a tremendous favourite in the French horse, Perth II., who started at 4 to 1 on, and Mazajan, by Martagon, accounted for the Goodwood Cup. King's Courier, by Kingston, won the Doncaster Cup from an excellent field of good horses. Osbeck, by Common, took the Jockey Club Cup, after running most consistently from the very first week of the season. Gaddy, by Hampton, by winning the Alexandra Plate at Ascot (£1,400), and that ancient trophy "the Whip," at Newmarket, proved herself one of the best stayers of the year. The big handicaps of 1900 were all well supported, beginning with Sir Geoffrey's Lincolnshire (£145) win—his only appearance during the year. King's Messenger, 5 years, with the top weight at 8 st. 8 lb., took the Metropolitan at 8 to 1, and Grafter, aged, 8 st. 10 lbs., at 7 to 1, carried off the City and Suburban. Theold Chester Cup (£2,050), went to Roughside, aged, 7 st. 5 lb., ridden by loan, at 7 to 1. The Kempton Park Jubilee (£2,655), was won by a 33 to 1 chance, Sirenia, 5 yrs. 8 st. 6 lb.

Osbeck, 8 st. 10 lb., only just lost the Ascot Stakes (£1,655) to Baldur, 4 years, 7 st. 2 lb., both starting at 4 to 1, and Royal Flush, J. Reiff up, won the Royal Hunt Cup, of £2,450 at 100 to 7. Eager, 6 years, 10 st. 2 lb., the crack sprinter of the year, won the Queen's Stand Plate (£950), at the same Meeting.

Joe Chamberlain, 3 years, 8 st. 2 lb., won the Northumberland Plate (£925). In the Stewards' Cup at Goodwood (£632), Royal Flush, 7 st. 13 lb., won easily, Eager, 9 st. 13 lb., being nowhere. At the end of the season these two met in a match at Hurst Park, at 9 st., for a £1,000 Gold Cup, Eager, at 7 to 4 on, winning easily. Clarehaven, at 6 to 1, won the Cesarewitch (£1,065) in a canter, Berrill, well backed, being nowhere; but in the Cambridge-shire (£1,685), Berrill, 7 st. 4 lb., at 20 to 1, won easily. Winifreda won the One Thousand (£4,110), and La Roche, both by St. Simon, won the Oaks (£4,550), Merry Gal being second. Winifreda beat both these fillies in the Ore Flou-and, but she was nowhere in the Oaks. The two-year-old form is very confusing. Orchid, by Orme—Musley Maid, winner of the Champagne (£1,580), Seaton Delaval (£1,080), &c., not only defeated Star Shoot, by Isinglass, the winner of the National Breeders' Produce Stakes (£4,779) and other big races, but also in the Middle Park Plate (£2,415), with 9 st. 3 lb., was only beaten a neck by Floriform, by Florizell II—Maid of Athol, with 8 st. 10 lb. Lord Bobs, 8 st. 9 lb., by Bend Or—Silver Seas, won the Dewhurst Plate (£1,532), Orchid being nowhere. Bay Melton—the Limosa colt—and Princess Melton also ran remarkably well during the season.

Owing to the big wins of Diamond Jubilee, La Roche, and Winifreda, St. Simon took Orme's place, and easily headed the 1900 list of winning stallions with over £54,000. Galopin with Merry Gal &c., Galinade with Sirenia, Good Morning

&c., Melton with Princess Melton, Isinglass with Star Shoot, as their chief winners, have all been credited with upwards of £13,000. Common's total of over £12,000 was mainly owing to Osbeck's victory in the New Century Stakes of £8,950 at Sandown in April. Orme but for Orchid would have been very low on the list.

The struggle for the Jockey premiership has been most interesting. S. Loates, after being well in front at the mid-season, eventually being just beaten by the American, L. Reiff. Sloan was away in America for a long time in the summer, or he would have been almost first. The figures of the leading jockeys were: L. Reiff, mounts 553, wins 143; S. Loates, mounts 810, wins 137; J. Reiff, mounts 604, wins 124; O. Madden, mounts 661, wins 96; F. Rickaby, mounts 476, wins 84; J. F. Sloan, mounts 311, wins 82; M. Cannon, mounts 490, wins 82; K. Cannon, mounts 600, wins 75; B. Rigby, mounts 447, wins 68; J. H. Marten, mounts 327, wins 52.

YACHTING.

ONE noticeable feature of a very dull and uneventful season owing to so many owners being on active service in South Africa—was the increasing popularity of the yawl rig, more particularly for the larger class racers.

The Mediterranean season was wholly devoid of interest so far as big class racing was concerned, and when the English regattas commenced in May there were but two bona fide racers on the water—*Senga* and *Penitent*, 52-ra'ers—the other contests being entirely filled by cruisers, and with but slight variation this was the case at all the remaining regattas. The building programme of the previous winter gave promise of excellent sport, but some of the new boats were eventually not fitted out. *Distant shore*, a big cutter, was built on the Clyde from Mr. G. L. Watson's designs, but her owner, Mr. C. D. Rose, did not put her in commission owing to the death of his two sons at the "front" *Sybilite*, yawl, likewise a Watson design, was built on the Clyde for Mr. Whitaker Wright. She made her debut at the Kiel Regatta, gaining a great reputation as a fair-weather boat, which she fully maintained on her return to England, although unfortunately she had no opportunity of racing in this country against *Victor*, the German Emperor withdrawing his flyer from all matches excepting that for the Queen's Cup at the Royal Yacht Squadron Regatta in consequence of the death of the Duke of Saxe-Coburg. *Khoma*, a 65-feet cutter, was also built on the Clyde for Mr. Kenneth M. Clark from designs by Mr. W. Fife. A Hogarth, who commanded *Shamrock* in the America Cup contest, was her skipper, but with no other boat of her class in commission she had to sail in cruiser handicaps all the season. Mr. Andrew Coats had a 52-footer built at Southampton from Mr. A. E. Payne's designs, but he did not fit her out owing to being on active service.

The Queen's Cups were won as follows: Royal Yacht Squadron Regatta, *Satonio*, Sir Maurice Fitzgerald; Royal Torbay Y.C., *Creole*, Colonel V. S. Bagot; Bourne End Regattas, *Ulva* Mr. T. Foster Knowles.

The fourth annual handicap race, from Dover to Heligoland, for the German Emperor's Cup was won by Mr. Rait's cutter *Fiona*, a Fife boat built in 1865.

The Emperor's Cup at Cowes Regatta was won by Mr. A. F. Fynn's yawl *Columina*. *Sybarita*

won four races in six starts at German regattas, and in England took six firsts in eight starts, losing the others by time allowance *Benedict*, yawl, Mr. S. W. Calverley, won 13 handicaps; *Maia Marion*, cutter Mr. M. B. Kennedy, 8; *Creole*, cutter, Colonel Bagot, 6; *Khamr*, cutter, 3; *Irene*, *Columbine*, *Clara*, *Nereus*, *Gertrude*, and *Heartsease*, 2 each; *St. Agnes*, *Cicely*, *Sidonara*, 1 each. *Senga* and *Penitent* sailed 43 matches, the former winning 27 and the latter 16.

Another challenge was received for the Coupe de France (20-tonners). The Duc Decazes was the challenger his yacht *Quind Mém* being specially built. The races were sailed at Ramsgate, under the auspices of the Royal Temple Y. C., when the Payne-designed boat, *Lucrea*, the successful defender of 1899, again won.

Mr. Lorne C. Currie challenged through the Island Sailing Club for the Coupe Internationale des Un-Tonneaux of the Cercle de la Voile de Paris. The races were sailed at Meulan, when the English boat, *Scoti*, was unsuccessful,

although she afterwards won the prix d'honneur and La Coupe Internationale in the Paris Exhibition matches.

Sir Thomas Lipton again competes for the America Cup, probably late in August, and Mr G. L. Watson will design his new boat. *Shamrock* will be fitted out for trial races.

The Kiel Regattas, encouraged by the German Emperor, are rapidly increasing in popularity. Many German yachtsmen are favouring schooners, Mr. Max Guillaume having a fine one built at Southampton from Mr. J. M. Soper's design.

In America a class of one-design 70-footer has been started, and provided excellent sport during the season. A noticeable feature was the number of British skippers in command of American yachts, and in at least one case near the whole crew was English.

The Yacht Racing Association has now adopted a new rating rule, to be in force for five years.

National Rifle Association.

CLOSESEASON FOR GAME, WILD BIRDS &c.
 THE following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive:—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11th Dec. & 19th Aug., 11th Dec. & 31st Aug., in Somerset, Devon, and New Forest.	11th Dec. & 19th Aug.	11th Dec. and 19th Aug.
Bustard.....	2nd Mar. & 31st Aug.	None.	11th Jan. & 31st Aug.
Deer, Male.	None.	None.	1st Jan. & 9th June.
" Fallow Male	None.	None.	Michaels. & 9th Jne.
Grouse or Red Game	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.
Hare*.....	None.	None.	21st Apr. & 11th Aug.
Heath or Moor Game	None.	As "Muir-fowl."	11th Dec. & 11th Aug.
Landrail ...	As "Wild Birds."	As "Wild Birds."	11th Jan. & 19th Sep.
Muirfowl, or Ptarmigan	None.	11th Dec. & 11th Aug.	11th Dec. & 19th Aug.
Partridge ...	2nd Feb. & 31st Aug.	2nd Feb. & 31st Aug.	2nd Feb. & 31st Aug.
Pheasant ...	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11th Jan. & 19th Sep.

It is unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day. Sand Grouse may not be killed at any time.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880, 1881, and 1894, from 2nd March to 31st July, both inclusive, throughout the United Kingdom, except the Island of St. Kilda. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence. In the case, however, of the undermentioned birds, the penalty is £1 for each bird for each offence:—
 American quail. Colin. Dotteder.
 Auk. Cornish chough. Dunbird.
 Avocet. Coulterneb. Dunlin.
 Bee-eater. Cuckoo. Eider-duck.
 Bittern. Curlew. Fern-owl.
 Bonxie. Diver. Fulmar.

- Woodcock.
- Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Act does not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order, providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

SEASONS FOR HUNTING AND GROUND GAME SHOOTING.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognized date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about Aug. 12 to Oct. 12 for stags, and from Nov. 10 to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to foreign hares. The statutory close season for hares in Ireland has been varied for some counties by order of the Lord Lieutenant, and it is now mostly from April 1st to August 12th.

CLOSE-TIME FOR SALMON.
 I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon—the word "Salmon" includes all migratory salmonidae—are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for salmon is pro-

hibited. The close-time for nets begins on 1st September, and ends on 1st February; and for rods it begins on 2nd November, and ends on 1st February. The commencement and termination of the close season may be varied by a bye-law by the local boards of conservators (see p. 698), but it must never begin for nets later than 1st Nov., nor be less than 154 days. For rod and line the minimum close-time is 92 days, which must commence not later than 1st December. For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law. The following are the cases in which these dates have been varied:—

Close-time for	Nets.	Rods.
Adur	1 Sept. to 2 Feb.	1 Oct. to 2 Feb.
Avon & Stour	31 July to 1 Feb.	2 Oct. to 1 Feb.

Camel	31 Sep. to 4 Apr.	1 Dec. to 30 Apr.
Fowey	1 Nov.	" "

No fresh salmon may be sold between 3rd September and 1st Feb., except such as can be proved to come from parts beyond the seas, or to have been taken, if in the United Kingdom, in legal netting season and in legal manner. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st February and 3rd November may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3rd September and 30th April, unless it can be proved

that the salmon exported or entered for exportation was caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The capture and sale of "unclean" salmon, i.e., salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the Local Conservancy Boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

II. SCOTLAND.

In Scotland the annual close-time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and, for rods, from 1st November to 10th February, except as follows:—

Close-time for	Nets.	Rods.
Add. Aray, Eckraig, N. & S. Esk, Fyne, Ruel, Shira.	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Beauy, Dunbeath, Lossie, Ness, Spey.	—	16 Oct. to 10 Feb.
Halladale, Strathly, Naver, Borgia, Helmsdale.	—	1 Oct. to 10 Jan.
Earn	—	1 Nov. to 31 Jan.
Bervie, Carradale, Fleet, Garnock, Girvan, Howmore, Inner, Iorsa, Irvine, Laggan, Luce, Sorn, Ugie, Ythan, and rivers of Orkney, Harris, & Uist.	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Nith	ditto	15 Nov. to 24 Feb.
Annan, Stinchar ...	ditto	16 Nov. to 24 Feb.
Rivers of Shetland.	ditto	16 Nov. to 31 Jan.
Urr	ditto	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tay	—	16 Oct. to 14 Jan.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. IRELAND.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts, in parts of some of

† In Borough of Shrewsbury only.

Dundalk...	Donaghadee ...	16 Sept. to 31 Mar.	1 Oct. to 2 Feb.
Drogheda .	Clogher Head..	5 Aug. to 11 Feb.	16 Sept. to 11 Feb.

In Ireland the weekly close-time is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday.

Salmon and trout must not be sold in Ireland in the close season.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2nd October and 1st February, except (1) in Norfolk and Suffolk, where, under a local Act (the Norfolk and Suffolk Fisheries Act, 1877), the conservators have fixed the close-time for trout, for nets only, at from 10th September to 25th January; (2) in the Thames, where the close season is from 11th Sept. to 31st March; and (3) in the cases noted below, where, under an Act passed in 1876, the trout and char close-time has been varied by bye-law by local boards of conservators. In the districts marked " the close-time, as altered, applies only

to trout. The sale of trout and char, however, is absolutely prohibited throughout England and Wales from 2nd October to 1st February:—

*Eben ...	2 Sept. (rods 2 Oct.) to 28 Feb.	
Tyne.....	1 Oct. to 21 Mar. (for rods and nets).	
*Severn ...	2 Oct. to 1 Mar. (ditto)

*Dee	{ 14 Oct. to 14 Feb. (for rod & line only).	
*Coquet ..	{ 1 Nov. to 3 Mar. (for rod & line only).	

In Scotland there is no close-time for trout and char. In Ireland the close-time for trout is the same as for salmon. This may be altered, but not shortened, by the Inspectors. For pollen, however, the close-time is fixed by the Pollen Fishery (Ireland) Act, 1881, from 1st Nov. to 31st Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char" as the case may be

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15th March to 15th June, both inclusive, for all parts of England and Wales except parts of Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first and £5 for a subsequent conviction. The close-season, however, does not

† 15 Oct. above Amesbury.

‡ Rivers Braint and Cefni, 15th Oct. to 1st March.

§ 2 Oct. to 1 April for R. Duddon; and 2 Sep. to 6 Feb. for R. Bela.

§§ April 30 between Lostwithiel and St. Winnow.

apply to eels taken otherwise than by angling or to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Trade, and the Avon and Stour, Avon and Erne, Wye, Eden, and Towy fishery districts have been so exempted; also the Kent and Leven, Severn and Yorkshire districts, as regards pike; the Usk as regards eels; and certain parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. For eels a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from January 1 to June 24; in Ireland, with one or two exceptions, from January 11 to June 30. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4¼ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat.

CLOSE-TIME FOR OYSTERS.

By the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters

—except oysters taken in the waters of a foreign state—from 14th May to 4th August. By a recent decision foreign oysters temporarily deposited on English oyster layings for purposes of storage only do not come within this close season. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to 31st August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till June 16 in each year. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied by the Inspectors of Fisheries in the following cases:—

Tralee Bay	11th Mar. to 31st Oct.
Galway Bay	1st Jan. to 30th Nov.
Strangford Lough	1st Mar. to 31st Aug.
Achill Sound, Clew Bay Sligo, Ballisodare and Drumcliffe Bays ...	2nd April to 30th Sept. 30th April to 1st June.

Taking oysters from licensed beds is made larceny.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence, and soldiers, sailors, volunteers, or constables on duty, or at practice, or occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence, need not take out a gun licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 446.

SALMON LICENCES.—It is not so generally known that in salmon fishery districts in England and Wales, and in Ireland, it is necessary to take out a licence to fish for salmon, and, in most rivers, for trout or char. In Scotland no such licence is needed. A licence is available only in the district,

and for the season, in which it is issued, except that in Ireland one rod licence is available in all parts of that country. The rates on nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from about £5 to £2. The licence duty on a rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Derwent	*West Cumberland... 10/6
*Lune	Fowey
*Ribble	*Eden
*Dee	*Seint
Clwyd & Elwy... 20/-	Dwyfach
*Conway	Towy
*Dovey	*Taw and Torridge... 12/-
*Teify	*Camel
Usk	*Kent and Leven ...
*Wye	Rhymney
Avon and Erne ... 20/-	*Ayron
*Dart	Severn
*Teign	Axe
Exe	Trent (Yorkshire) ...

Stour (Kent) ...	Tamar and Plym ...
Yorkshire	Ouse (Sussex)
Tees	Wear
*Tyne	Coquet
Cleddy	Cuckmere
Taff and Ely ... 10/6	Adur
Ogmore	

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1896, in the hands of local boards of conservators appointed for the purpose, with the Board of Trade as the central authority. Districts may be formed, and Boards of Conservators appointed, for waters containing salmon, or freshwater fish.

Such Boards have been appointed for 53 Districts. [The districts generally include all rivers running into the sea between the points named, and in the cases marked + also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries.]

These Boards of Conservators consist of three classes of members—those appointed annually by the County Councils of the various counties

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
+Eden.....	Sark Foot to Seaton	J. B. Slater, Carlisle.
+Derwent.....	Seaton to St. Bees Head	T. C. Burn, Papcastle, Cockerm'uth.
+West Cumberland	St. Bees Head to Haverigg Point	J. Webster, Whitehaven.

Frome	Portland Bill to Hampshire Boundary	P. E. L. Budge, Wareham.
Avon and Stour	W. Boundary of Hants to Hurst Castle	R. D. Sharp, Christchurch.
+Adur	West Tarring to Portobello	E. W. Oxborough, Brighton.
+Ouse (Sussex)	Portobello to Seaford Head	F. Holman, Lewes.
+Cuckmere	Seaford Head to Fairlight	H. J. Woodhams, Berwick, Polegate.
+Rother	Fairlight to Dungeness	T. J. Smith, Rye.
Stour (Kent)	North to South Foreland	—
+Suffolk & Essex	Dovercourt Light to Covehithe Coastgd. Sn.	A. T. Cobbold, Ipswich.
Norfolk and Suffolk	{ West Boundary of Norfolk to Lap- water Hall	H. Brittain, Norwich.
+Ouse and Nene.....	Lapwater Hall to Western Point	Joseph Miller, Bedford.
Welland	Western Point to Gibraltar	S. B. Sharpe, Market Deeping.
+Witham	Ingoldmell's Point to Trent Falls	H. Snaith, Boston.
+Trent	Trent Falls to Hayburn Wyke	C. K. Eddowes, Derby.
+Yorkshire	Hayburn Wyke to Skinningrove Beck.....	J. E. Jones, Market Street, York.
+Esk (Yorkshire)	Skinningrove Beck to Hardwick Hall	W. Brown, Whitby.
+Tees	Hardwick Hall to Souter Point	M. B. Dodds, Stockton.
+Wear	Souter Point to Newbiggin Point	W. Halero, Sunderland.
+Tyne	Newbiggin Point to Hawick Burn	J. Gibson, Hexham.
+Coquet.....		C. Percy, Alnwick.

through which the rivers flow; *ex-officio* members, or those qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by the persons who have paid licence duty on instruments other than rod and line, used for salmon fishing in public waters.

There are also certain bodies created by local

statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Lee Conservancy Board, and Conservators of the Medway.

These Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other kinds of fishing

which are prejudicial to such Fisheries. They are also empowered to issue licences for fishing for salmon, trout, &c. (see p. 695).

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 31 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Act, 1888, the Board of Trade has power to form sea fisheries districts within the territorial waters of England and Wales, and to appoint local Fisheries Committees. These committees may be appointed either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Trade, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on

fishing grounds, &c. The following districts have been created—including in each case the coast and territorial seas adjoining between the points respectively mentioned:—1. Northumberland (co-terminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, from Donna Nook to Hap-pisburgh. 4. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (co-terminous with that county). 6. Southern, from the western boundary of Dorset to Hayling Island. 7. Devon. 8. Cornwall (each co-terminous with the respective counties). 9. Glamorgan, from Nash Point to Worms Head. 10. Milford Haven, from Worms Head to Cemmas Head. 11. Lancashire and Western, from Cemmas Head to Haverigg Point. 12. Cumberland, from Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

The following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The asterisk (*) signifies that the fish are then

in their prime; the dagger (+) signifies that the fish may be obtained, but are not at their best; the double dagger (‡) signifies that it is "close time" as fixed by statute.

(a) This is for sea crayfish. River crayfish can be obtained in the spring, summer, and autumn. It is a moot point whether it is legal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for storage.

(c) In the close season salmon from Holland and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(d) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

Hunts and Hounds.

THESE are in England, including "Her Majesty's" (Master, Lord Coventry), of which there are 40 couples the kennels being at Ascot Heath, 17 packs of Staghounds, containing between them 422 couples of hounds besides four packs in Ireland, with 102 couples. The following are the Masters, the Kennels, and the numbers of the principal packs of Staghounds (with over 100 couples each):—

PACK.	COUPLES.	MASTER.	KENNELS.
Amory's, Sir J.	25	Sir J. Amory, Bart.	Hensleigh, Tiverton.
County Down	34	Mr. F. Barbour	Ballinacinch, county Down.
Devon and Somerset ..	50	Mr. R. A. Sanders	Exford, Taunton, Somerset.
Enfield Chase	25	Mr. J. H. Harbridge	Enfield Court, Middlesex.
Essex	22	Mr. W. H. Barnes	M. Ghills, Du. m.w.
Gerard's, Mr.	26	Hon. R. Gerard	Wrightington Hall, Appley Bridge, Lancs.
Mid Kent	25	Mr. Aug. Leney	Wateringbury, Maidstone.
New Forest	26	Mr. E. F. Kelly	Northerwood, Lyndhurst, Hants.
Omnrod's, Mr Peter ..	25	Mr. P. Omnrod	Wyresdale, Scorton, Lancs.
Rothschild's (Lord) ..	30	Lord Rothschild	Ascot, Leighton Buzzard.
Roscommon	26	(a committee)	South Park, Castlereagh.
Surrey	25	Mr. F. Gregory	Horleyland, Horley, Surrey.
Surrey, West	24	Mr A. J. Curneck	Woodland Park, Leatherhead.
Ward Union	30	Mr. Percy Maynard	Ashbourne, county Meath.
Savernake	30	Mr. J. L. Phipps	Savernake, Marlborough.

Of Foxhound packs, there are no less than 163 in England and Wales containing 6,172 couples of hounds; in Scotland, ten packs, with 370 couples; and in Ireland, 23 packs, with 886 couples. The following are the packs of Foxhounds containing 50 couples of hounds or more:—

PACK.	COUPLES.	MASTER.	KENNELS.
Albrighton	54	Mr. Jas. Foster	Whiston Cross, Shiffnal.
Atherstone	63	Mr. G. H. Hardy	Witherley, Atherstone, Warwickshire.
Badsworth	70	Mr. J. S. H. Fullerton	Badsworth, Pontefract.
Beaufort's, D. of	75	Duke of Beaufort	Badminton, Wilts.
Bedale	50	Sir G. Greenall	Low Street, Bedale, Yorks.
Belvoir	66	Mr. E. Dunn	Belvoir Castle, Grantham, Lincoln.
Berkshire, Old	56	Mr. Heywood Lonsdale	Kingston Bagpuze, Abingdon.
Bicester and Warden Hill ..	53	Mr. J. Hargreaves	Stratton Audley, Bicester, Oxon.
Blackmore Vale	56	Mr. N. C. Cockburn	Charleton Horethorne, Sherborne, Dorset.
Blankney	50	Capt. J. R. Lane-Fox	Blankney, Sleaford.
Bramham Moor	50	Mr. T. Wilson	Bramham Park, Boston Spa, Yorkshire.
Burton	55	Rev. E. A. Milne	Reepham, Lincolnshire.
Cattistock	51	Mr. E. Hanbury	Cattistock, Dorchester.
Cottesmore	54	Mr. L. Barlow	Ashwell Road, Oakham, Rutland.
Craven	50	Mr. C. B. Godman	Walcot, Hungerford.
Crawley and Horsham	50	Mr. W. Coryton	West Grinstead, Sussex.
Dartmoor	50	(a committee)	Woodland, Ivybridge.
Essex	52	Mr. E. T. Mashiter	Harlow, Essex.
Essex Union	50	Mr. C. W. Fernie	Great Burstead, Billericay.
Fernie's (Mr.)	64	Lord Fitzhardinge	Medburne, Market Harborough.
Fitzhardinge's (Lord)	50	Mr. G. W. Fitzwilliam	Berkley, Gloucester.
Fitzwilliam's (Mr.)	55	Lord Galway	Milton, near Peterborough.
Galway's (Lord)	55	Mr. T. Garth	Serlby, Bawtry, Yorks.
Garth's (Mr.)	53	Hon. E. D. Pennant	Haines Hill, Twyford, Berkshire.
Grafton	52	Mr. F. Coryton & Col. Knox	Roopers Pury, Worcester.
H. H. (Hampshire)	54	Earl of Harrington	Poules, Alresford.
Harrington's (Earl)	50	Messrs. T. Harrison & O. Part	Gedling, Notts.
Hertfordshire	56	Mr. A. Brassey	Keuesbourne Green, Luton.
Heythrop	54	Mr. A. Wilson	Chipping Norton, Oxon.
Holderness	56	Mr. H. M. Wilson	Etton, near Hull.
Ledbury	54	Mr. R. Fort	Ledbury, Herefordshire.
Maynell	50	Lord Middleton	Sudbury, Derby.
Middleton's (Lord)	50	Earl of Emskillen	Birdsall, Malton, York.
North Cheshire	55	Duke of Sutherland	Forest Kennels, Northwich.
North Staffordshire	60	Lord Algernon Percy	Trentham, Stoke.
North Warwickshire	50	Mr. P. A. Whitaker	Kenilworth.
Oakley	56	Mr. A. F. B. Cresswell	Milton Ernest, Bedford.
Percy	60	Mr. E. C. Barclay	Greenrig, Lesbury.
Puckeridge	65	Mr. W. M. Wroughton	Braughing, Ware, Herts.
Pycinley	55	Capt. B. Hartopp	Brixworth, Northampton.
Quorn	55	Mr. L. Rolleston	Quorn, Loughborough.
Rufford	50	Hon. C. Brand	R. fford, Ollerton, Newark.
Southdown	50	Mr. E. P. Rawnsley	Kingmer, Lewes, Sussex.
Southwold	52	Mr. W. J. Scarlett	Belchford, Hornacastle, Lincolnshire.
Tedworth	50	Mr. J. C. Straker	Tedworth, Marlborough.
Tynedale	50	Hon. R. G. Verney	Stagshaw, Corbridge-on-Tyne.
Warwickshire	52	Earl Dudley	Kineton, Warwick.
Worcestershire	53	Sir H. Williams Wynn, Bart.	Fernhill Heath, Worcester.
Wynnstay	50	Earl of Yarborough	Wynnstay, Raubon.
Yarborough's (Earl of) ..	54	Mr. E. Lyett Green	Brookley Park, Lincs.
York and Ainsty	50	Marquess of Zetland	Acombe, York.
Zetland's (Marquess of) ..	5		Aske, Richmond, Yorkshire.

IRELAND.

Kildare	55	Col. H. de Robeck	Jigginstown, Naas, county Kildare.
Meath	66	Mr. John Watson	Bective, Navan, county Meath.
Tipperary	55	Mr. R. Burke	Grove, Fethard, co. Tipperary.

SCOTLAND.

Berwickshire	50	Sir Jas. Miller, Bart.	Striery Hill, Edrom.
Buccleuch's (Duke of)	57	Duke of Buccleuch, &c.	St. Boswells, Roxburghshire.
Eglinton's (Earl of)	50	Earl of Eglinton and Winton ..	Kilwinning Castle, Irvine, Ayr.

UP to the year 1858 the probate and safe custody of wills was entirely within the jurisdiction of the Ecclesiastical Courts. Complaints of the carelessness and insecurity to which the documents were exposed at the hands of sinecurists and absentee officials became very rife, culminating perhaps in the vigorous onslaught on the system which was made by Charles Dickens in "David Copperfield" and "Household Words." The result was the establishment throughout the country of forty District Registries. To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, which is freely open to the public. In the latter case, the original will, proved in the District Registry, is there kept, but a copy is sent to and filed at Somerset House, and may there be seen. Any will may be read by anybody who is ready to pay a search fee of one shilling; but the reader may not copy any part of the will except the names and addresses of the executors, and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Districts.	Registrar.	Registries.
Flint, Denbigh, Merioneth	J. P. Lewis ...	St. Asaph.
Derbyshire	C. T. E. Wilde	Derby.
Nottinghamshire ..	W. G. Vincent	Nottingham.
Leicestershire and Rutland	G. H. Nevinson	Leicester.
Lincolnshire	John Swan	Lincoln.
Salop and Montgomery	F. R. B. Walton	Shrewsbury.
Northants, N. Huntingdon, Cambridge	Henry William Gates	Peterboro'.
Norfolk	G. R. Harman	Norwich.
Suffolk, East	W. H. Walpole	Ipswich.
Essex, North	C. Wodehouse	Bury St. Edmunds.
Suffolk, W.		
Bedford & South Northants	C. C. Becke ...	Northampton
Warwickshire	W. G. Middleton	Birmingham.
Staffordshire	T. W. H. Oakley	Lichfield.
Radnor, Brecknock, and Herefordshire	T. C. Paris	Hereford.
Cardigan, Carmarthen, Pembroke, etc.	W. Morgan Griffiths	Carmarthen.
Glamorgan and Monmouthshire ..	Clemt. Waldron	Llandaff.
Worcestershire ...	H. A. Franklin	Worcester.
Gloucestershire, except Bristol.	R. Fuller	Gloucester.
Bristol and Bath. ...	Wm. H. Clarke	Bristol.
Oxford, Berks, & Bucks	Thomas M. Daventport	Oxford.
Somerset, East, except the Bath C. C. District.	John Raymond Holligan ...	Wells.
Somerset, West ...	E. T. Alms	Taunton.
Devonshire	W. H. Bailey ...	Exeter.
Cornwall	W. H. Shadwell	Bodmin.
Wiltshire	H. Elliott Fox	Salisbury.
Dorsetshire	H. F. C. de Crespigny	Blandford.
Hampshire	C. Woodbridge	Winchester.
Sussex, East	J. W. Heisch ...	Lewes.

DEPOSITORY FOR THE WILLS OF LIVING PERSONS.—It is unfortunate for the success of this institution that its existence is little known.

It may be added that the formalities and expense attendant upon depositing a will in Somerset House for safe custody do little to recommend that safety to the public. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vict. c. 77; but the provision has been almost dead letter, for in three recent years there were only seven, nine, and seventeen testators found to place their wills in Somerset House. This may be done through the Registrar of District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar.

Hall Marks on Plate.

ONE of the revivals of the past half century has been that of the taste for ancient gold and silver ware, but especially of silver. With the revival of this taste there has also grown up with it the very laudable desire to know something of the history of the manufacture and manufacturers of the plate itself. The literature of the subject is not large, but it is almost exhaustive, and for the materials of this Article readers of the Almanack are indebted to Mr. Wilfred Cripps, whose volume on "Old English Plate" contains nearly all that can be said upon the subject. Readers are also further indebted to that gentleman for the loan of some of the following illustrations, without which this paper would scarcely be intelligible.

It must be premised that pure gold and pure silver in a manufactured state do not exist; both are alloyed with a coarser metal, gold sometimes with silver, but mostly with copper; and silver invariably with the latter metal: silver thus alloyed becomes less brittle and is more easily shaped by the workman's hammer. But mixed, the metal is of less value than when pure, and as the uninformed public could have no means of testing its intrinsic value, the Government at a very early period took steps to insure uniformity in the quantity of base metal used as alloy. So far back as the year 1180 there appears to have been a test or check upon the manufacture, and in 1260 discreet men of the craft were appointed to watch over the ware produced for sale; but not till the year 1300 was there any actual legislation, the first ordinance being that

the Leopard's Head  should be marked upon

all sterling articles of gold and silver. The Company of Goldsmiths of London was incorporated by Edward III. in the year 1327, and the leopard's head has ever since been borne on the company's shield. In addition to London and the six others mentioned there have been Assay Offices at Bristol, Exeter, Newcastle-on-Tyne, Norwich and York, all of which are now closed. In Scotland, Edinburgh and Glasgow have this privilege: in Ireland, Dublin alone. One of the duties imposed upon the Goldsmiths Company is to test all articles of gold and silver, except certain small articles, and having tested them, to impress the HALL MARK thereon. Sterling silver is one invariable standard, viz., 11 oz. 2 dwts. of fine silver to 18 dwts. of alloy, which, when thus mixed, becomes standard, and a pound troy coined into sixty-six shillings gives the nominal value of 5s. 6d. to the troy ounce. There is, however, a higher standard, viz., 11 oz. 10 dwts. of fine silver to 10 dwts. of alloy, and this was the only legal standard for the manufacture of plate from March 1697, to June 1720; after that date the old standard was again adopted, but the higher standard (commonly known as "Britannia" standard, from the figure of Britannia on all such plate) still remained in use, and is used, though to a very limited extent, at the present day. The Britannia standard is denoted by a lion's head erased, as well as by the figure of Britannia, the latter in place of the leopard's head and lion passant seen on silver of the sterling standard. In sterling gold there are twenty-two carats fine to two of alloy, the value of which is £3 17s. 10½d. In order to encourage the home jewellery trade, other degrees of fineness are permitted, but these degrees are marked on articles sent to the "Hall" for the purpose. The value of the various standards per ounce troy are—

	£	s.	d.
Pure gold, 22 carats.....	4	4	11½
Standard, 22 carats.....	3	17	10½
2nd ditto, 18 carats.....	3	3	8½
3rd ditto, 15 carats.....	2	13	1
4th ditto, 12 carats.....	2	2	5¾
5th ditto, 9 carats.....	1	11	10½

An ordinary piece of English silver plate has the following marks:

1. That of the maker, which must be the first letters of his Christian and Surname.

2. That of the Company, the Leopard's Head (this in London only). 

3. That which is supposed to be the Sovereign's mark, the lion passant. 

4. A letter denoting the year in which the plate is made, e.g. **A**

[And, in the case of those articles which were chargeable with duty, the Sovereign's Head; this is now no longer impressed, the duty having been abolished in June 1890.]

The maker's mark is placed upon the article by the manufacturer himself. The Sovereign's Head does not appear upon plate manufactured prior to the year 1784. And for the first year or so after its introduction it appeared in intaglio with the profile turned to the left; subsequently it appeared in relief like the other assay marks with the head turned to the right, although Queen Victoria's head is turned to the left again. The leopard's head is without crown from 1823.

In respect to gold plate we have precisely the same marks, with the exception of a crown in place of the lion passant and the degree of fineness as above stated; although previous to 1798 there was absolutely no distinguishing mark between gold of 18 carats and silver-plate, nor until 1844 for 22-carat gold. To prevent the importation of foreign plate of a lower standard than that required of English plate, all such plate of recent manufacture must be assayed and marked in the same way as that of home production, but with the addition of the letter F to denote its foreign origin.

Though there is now no duty upon gold and silver plate, the Hall marking is compulsory; no one can complain of this, as the charge for assaying and marking at Goldsmiths' Hall is little more than nominal, that for a dozen tea-spoons being but 3d., and for a dozen table spoons or forks and other wares weighing 5 oz. each and upwards one halfpenny per oz.

By the following table of date-marks the age of any piece of plate manufactured in London and assayed at Goldsmiths' Hall may be ascertained:

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 „ 1477-8
	Lombardic, double cusps	1478-9 „ 1497-8
	Black letter, small	1498-9 „ 1517-8

	Lombardic	1518-9 to 1537-8
	Roman and other capitals	1538-9 ,, 1557-8
	Black letter, small	1558-9 ,, 1577-8
	Roman letter, capitals	1578-9 to 1597-8
	Lombardic, external cusps	1598-9 ,, 1617-8
	Italic letter, small	1618-9 ,, 1637-8
	Court hand	1638-9 ,, 1657-8
	Black letter, capitals	1658-9 ,, 1677-8
	Black letter, small	1678-9 ,, 1696-7
	Court hand	1697 ,, 1715-6 From March 1697 only, see col. 1 of p. 702.
	Roman letter, capitals	1716-7 ,, 1735-6
	Roman letter, small	1736-7 ,, 1755-6
	Old English, capitals	1756-7 ,, 1775-6
	Roman letter, small	1776-7 ,, 1795-6
	Roman letter, capitals	1796-7 ,, 1815-6
	Roman letter, small	1816-7 ,, 1835-6
	Old English, capitals	1836-7 ,, 1855-6

	Old English, small.....	1856-7 to 1875-6
	Roman letter, capitals	1876-7 ,, 1895-6
	Roman letter, small ...	1896-7 ,, 1915-6

Each Assay Office has its distinguishing mark in lieu of the Leopard's Head of Goldsmiths' Hall, and its own cycle and chronological alphabet. The type and the shape of shield on which the letters are impressed change with each cycle.

The collector with even limited experience will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, e.g. :

An article marked with the letter  1721-2 can be distinguished from letter  1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head; and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from  1831-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of  1801-2); the absence of crown on leopard's head, and the presence of the Queen's vice the King's head.

The London Goldsmiths' letter for the year ending 29th May, 1901, is , on a shield shaped like that of the last specimen shown above: that for 1902 is the letter .

ASSAY OFFICES OUT OF LONDON.

Assay Office.	Distinguishing Mark.	*Letter for 1901-02.	Cycle.
Birmingham ..	An Anchor	b	Years. 25
Chester	The City Arms (3 garbs and a sword)	R.S.	25 or 20
Sheffield	A Crown	h i	Variable [20 to 25]
Edinburgh ...	A Castle	t n	25
Glasgow ...	Tree, Fish, and Bell	D E	26
Dublin	A Harp, crowned	E F	25

* The date letters are changed in the middle of each year.

THE following are the values, according to the British standard, of the commoner measures of length, surface, capacity (dry and liquid), and weight in use in foreign countries. Those measures which appear in italics may be regarded as obsolete. It should be borne in mind that in the majority of semi-civilized lands the measures frequently vary with the locality, or with the species of thing to be measured. The chief authorities which have been consulted are Siegfried's "Münz-, Maass-, und Gewichts-Tabelle" (Leipzig, 1837), and Dr. W. A. Browne's "Merchants' Handbook" (Stanford, 1879). To the latter, inquirers may be referred for fuller information.

The Metric System is fully given on p. 436.

Annam (Cochin China).

1 Tak	=	1'92 inches.
1 Thuok	=	19'2 inches.

1 Pièce (Bordeaux).....	=	668'8 pints.
1 Pipe.....	=	1091'2 pints.
1 Tonneau.....	=	2204'6 lbs. av.

Germany.

The Metric System was legalized throughout the Empire, Jan. 1, 1872, but French nomenclature is as far as possible avoided. The millimètre is also called Strich; the centimètre, Neu Zoll; the mètre, Stab; the décimètre, Kette; the litre, Kanne; the half-litre, Schoppen; the hectolitre, Fass; the décaграмme, Neu Loth; the half-kilogramme, Pfund. The Centner is 50, and the Tonne is 1,000 kilogrammes. The chief obsolete measures are:

Prussian Fuss (12 Zoll).....	=	1'0297 feet.
" Elle.....	=	2'1831 feet.
" Ruth.....	=	4'1188 yards.
" Meile.....	=	4'6805 miles.
" Morgen.....	=	2'5207 roods.
" Hufe (30 Morgen).....	=	18'929 acres.
" Metze.....	=	3'024 quarts.
" Scheffel (4 Viertel).....	=	1'512 bushels.
" Tonne.....	=	756 qr.
" Last (60 Scheffel)...	=	11'340 grs.
" Ossel.....	=	1'007 pints.
" Anker (60 Ossel).....	=	7'559 gallons.
" Ohm (2 Eimer) ...	=	30'237 gallons.
" Fuder.....	=	181'422 gallons.
" Zollpfund (30 Loth) =	=	1'1027 lbs. av.

Germany—continued.

Prussian Old Pfund	=	7217'886 Tr. grs.
Saxon Fuss	=	11'1494 inches.
" Stab	=	44'5976 inches.
" Scheffel	=	2'892 bushels.
" Kanne	=	1'647 pints.
" Fass (2 Ochoft)	=	88'937 gallons.
Hanoverian Fuss	=	11'5 inches.
" Last	=	10'284 grs.
" Anker (4 Viertel)	=	8'570 gallons.
Brunswick Fuss	=	11'235 inches.
" Anker (10 Stubschen)	=	8'24 gallons.
Oldenburg Fuss	=	11'649 inches.
" Anker (26 Kanne)	=	7'860 gallons.
Baden Fuss	=	11'811 inches.
" Maass	=	1'320 quarts.
" Pfund	=	1'1023 lbs. av.
Württemberg Fuss	=	9'399 foot.
" Pfund (32 Loth)	=	1'031 lbs. av.
Hamburg Fuss	=	11'2825 inches.
" Anker	=	7'9735 gals.
" New Pfund	=	1'1023 lbs. av.
Bremen Fuss	=	11'3919 inches.
" Anker	=	7'8 gallons.
Lubeck Fuss	=	11'323 inches.
" Anker	=	8'006 gallons.
" Pfund (33 Loth) ...	=	1'0725 lbs. av.

Greece.

The Metric System was introduced by an ordinance of Oct. 26, 1832. In Greece, gramme = millimeter; daktylos = centimeter; palame = decimeter; pecheus = meter; stadion = kilometer; skionis = myriameter; stremma = are; kybos = milliliter; mystron = centiliter; kottyle = deciliter; litra = liter; kolion = hectoliter; kokkos = centigram; obolos = decigram; drachme gram; mna = 1½ kilogram.

Hayti, as in France.

India.—Bengal.

Under "The Indian Weights and Measures Act, 1870," the standard of weight is the Ser (Kilogramme) = 2'20462 lbs. av.; the standard of length is the metre = 3'280899 feet; and the standard of capacity is the Ser (litre) = 1'760773 pints, or 61'027045 cubic inches.

1 Moot (4 Ungulee) ...	=	3 inches.

1 Coyan	=	375 gallons.
1 Tael (4 Bat)	=	936 25 Tr. grains.
1 Chang, or Catty	=	2 675 lbs. av.
1 Hap, or Pecul	=	133 75 lbs. av.
1 Keenan (20 Piculs) ...	=	1675 lbs. av.

Spain.

The Metric System was made compulsory on July 1, 1868. In many countries that were

colonized by Spain some of the old Spanish

measures are still used, e.g.,	
1 Pulgada (12 Linea)	= 927 inch.
1 Sesma (6 Pulgada)	= 5 364 inches.
1 Vara (6 Sesma)	= 2 782 feet.
1 Estado (2 Vara)	= 5 564 feet.
1 Legua (of Castile)	= 4636 66 yards.
1 Fanegada	= 1 6374 acres.
1 Cuartillo (4 Capo)	= 1 109 gal.
1 Cuartilla (2 Azumbre) ...	= 8879 gal.
1 Arroba Mayor (or Cantara) ..	= 3 5517 gals.
1 Mayor (16 Cantara)	= 56 276 gals.
1 Medio (2 Cuartillo)	= 621 bushl.
1 Almude (2 Medio)	= 1256 bushl.
1 Fanega	= 1 5076 bushls.
1 Cahiz	= 18 0919 bushls.
1 Tomin (12 Grano)	= 20213 oz. av.
1 Onza	= 6634 lb. av.
1 Libra (of Castile)	= 1 014 lbs. av.
1 Quintal	= 101 442 lbs. av.
1 Tonelada	= 1014 42 lbs. av.

Sweden.

The Metric System since 1875.

1 Fot (10 Tum)	= 11 689 inches.
1 Mil (360 Ref)	= 6 6416 miles.
1 Kanna	= 4 608 pints.
1 Skoalpund (100 Ort) ...	= 937 lb. av.

Switzerland.

The Metric System since Jan. 1st, 1873.

1 Fuss (10 Zoll)	= 11 8112 inches.
1 Stunde (1600 Ruthe) ...	= 2 9825 miles.
1 Malter (10 Viertel) ...	= 4 126 bushels.
1 Maass (4 Schoppen) ...	= 2 641 pints.
1 Pfund (16 Unze)	= 1 1023 lbs. av.

Tripoli.

1 Pike	= 26 416 inches.
1 Draâ	= 19 13 inches.
1 Orbah	= 1 476 gallons.
1 Hueba (4 Temen) ...	= 2 952 bushels.
1 Secchie (4 Bozze) ...	= 2 361 gallons.
1 Oka (40 Uckieh) ...	= 2 69 lbs. av.
1 Centner (100 Rottoli) .	= 107 66 lbs. av.

Turkey.

1 Pike or Arshen	= 27 1/4 inches.
1 Pike or Arshen (land) ..	= 29 3/4 inches.
1 Halebi or Archim ...	= 27 9 inches.
1 Endazzezh (Silk)	= 25 1/4 inches.
1 Agatsch (3 Berri) ...	= 3 1159 miles.
1 Jubbeh (11 Rottol) ...	= 4851 bushel.
1 Fortin (4 Killow) ...	= 3 8809 bushels.
1 Rottol (12 Okieieh) ...	= 2 513 pints.
1 Almud (8 Oka)	= 1 1519 gallons.
1 Cantar (100 Rottol) ...	= 31 417 gallons.
1 Cantar (dry)	= 124 08 av.
1 Okieieh (10 Dirhem) ...	= 70854 lb av.
1 Kéléor Oke (4 Okieieh) ...	= 2 1975 lbs. av.
1 Batman (dry)	= 16 92 av.

United States.

The Metric System, authorized 1866; also weight, length, and surface measures as in England, and old Winchester measure.

1 Pint (dry)	= 9694 pint.
1 Gallon (dry)	= 9694 gallon.
1 Bushel	= 9694 bushel.
1 Quarter	= 9694 quarter.
1 Pint (wine or spirit) .	= 8331 pint.
1 Gallon (wine or spirit) .	= 8331 gallon.
1 Pint (beer)	= 1 017 pints.
1 Quintal or Centner ...	= 100 lbs. av.
1 Barrel (of flour)	= 196 lbs. av.
1 Barrel (of beef)	= 200 lbs. av.

Uruguay.

Metric System, introduced 1864; also as in Argentine Republic, Venezuela, the Metrical System, since 1857; and old Spanish.

On the morrow of St. Martin (12th November) certain high officials, usually the Lord President of the Council, the Chancellor of the Exchequer, the Lord Chancellor, several Judges, the Clerk of the Council, and others, assemble in the Court of the Queen's Bench Division of the High Court of Justice, and after certain ceremonies have been gone through, three gentlemen are nominated for the office of Sheriff for every one of the counties of England and Wales; Cornwall is nominated by the Prince of Wales as Duke of that county; and Lancaster, by its Duke the Queen. The three names, engrossed upon a parchment roll, are afterwards brought before Her Majesty, who then, with a golden bodkin, pricks through the parchment against one name for every county. The name thus pricked is usually the first on the list, and they come into office after Hilary Term. The following is a list of the gentlemen thus nominated whose names stand first upon the roll:—

BEDFORDSHIRE.—Arthur Macnamara, Billington Manor, Leighton Buzzard.
BERKSHIRE.—Lt.-Col. Frederick Finch Mackenzie, Ramsdale, Bracknell.
BUCKINGHAMSHIRE.—Rudolf Chambers Lehmann, Fieldhead, Bourne End.
CAMBRIDGE AND HUNTINGDON (SHIRES).—Thomas Walter Harding, Kirkstall Abbey, Leeds, and Doddington, Cambridgeshire.
CHESHIRE.—Arthur Masterton Robertson Legh, Adlington Hall, Macclesfield.
CUMBERLAND.—Hamlet Riley, Eonim.
DEBBYSHIRE.—Henry Walthall-Walthall, Alton Manor, Wirksworth.
DEVONSHIRE.—Frederick Hamlyn, Clovelly Court, Bideford.
DORSET.—Capt. Edward Wilmot Williams, Her-ringstone House, Dorchester.
DURHAM.—George Fenwick Boyd, Moorhouse, Leamside, E.S.O.
ESSEX.—Ernest James Wythes, Copped Hall, Epping.
GLOUCESTERSHIRE.—Gardner Sebastian Bazley, Hatherop Castle, Fairford.
HEREFORDSHIRE.—James Louis Alexander Hope, Whitney Court, Whitney.
HERTFORDSHIRE.—Major-General Apsley Cherry-Garrard, Lamer Park, Wheathampstead.
KENT.—Henry Booth Hobler, Fawkham Manor, Longfield.
LEICESTERSHIRE.—James Burns Hartopp, Scrap-toft Hall, Leicester.
LINCOLNSHIRE.—Joseph Cliff, Scawby Grove, Brigg.
LONDON, COUNTY OF.—Arthur Hill, 22 Upper Grosvenor Street, W.
MIDDLESEX.—Frederick Cox, Harefield Place, Harefield, Uxbridge.
MONMOUTHSHIRE.—William Llewellyn, Upton House, near Poole, Dorset.
NORFOLK.—Maj. Robert Heath Jary, Burlingham.
NORTHAMPTONSHIRE.—James Griffith Dearden, Walcot Hall, Southorp.
NORTHUMBERLAND.—Hugh Andrews, Swarland Hall, Felton.
NOTTINGHAMSHIRE.—John Robinson, Worksop Manor.
OXFORDSHIRE.—Henry Clerke Brown, Kingston Blount.
RUTLAND.—William Henry Neill, The Grange, Wing, Oakham.
SHERIFFSHIRE.—John Sidney Burton-Borough, Chetwynd Park, Newport, Salop.
SOMERSET.—William Robert Phelps, Montacute House, Montacute.

SOUTHAMPTON, COUNTY OF.—Herman Le Roy Lewis, Westbury House, Petersfield.
STAFFORDSHIRE.—Richard Powell Cooper, Shenstone Court, Lichfield.
SUFFOLK.—John Dupuis Cobbold, Holywells, Ipswich.
SURREY.—Herbert Gosling, Botley's Park, Chertsey.
SUSSEX.—Charles Egerton Legge, Ashling House, Chichester.
WARWICKSHIRE.—Harry Leigh Townshend, Caldecote Hall, Nuneaton.
WESTMORLAND.—Edward William Wakefield, Stricklandgate House, Kendal.
WILTSHIRE.—Chas. A. W. dry, Shaw Hill, Melksham.
WORCESTERSHIRE.—Edward Alfred Broome, Arelcy Court, Stourport.
YORKSHIRE.—Sir Theophilus Peel, Bart., Potterton Hall; Barwick-in-Elmet, Leeds.

Wales (North and South).

ANGLESEY.—William Jones, Llwydiarth Fawr, Llanerchymedd.
BRECONSHIRE.—John Edwards Vaughan, Rheola, Neath.
CARDIGANSHIRE.—Edward Walter David Evans, Camnant Hall, Llandysil.
CARMARTHENSHIRE.—Ernest Trubshaw, Aelybryn, Llanelly.
CARNARVONSHIRE.—Lt.-Col. Owen Lloyd Jones Evans, Broomhall, Chwilog.
DENBIGHSHIRE.—Lord Newborough, Plas Newydd, Trefnant.
FLINTSHIRE.—Philip Thomas Godsall, Iscoyd Park.
GLAMORGANSHIRE.—Lieutenant-Colonel William Edwin Llewellyn Morgan, Swansea.
MERIONETHSHIRE.—Robert Prys Owen, Aelybryn, D. ffryn.
MONTGOMERYSHIRE.—Arthur Watkin Williams Wynn, Coedymaen.
PEMBROKESHIRE.—George Powell Roch, Butter Hill, Milford Haven.
RADNORSHIRE.—James Mansergh, Bryngwy, Rhayader.

Foreign Moneys.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Market Price of Standard Silver in Pence per Troy Ounce.

Oz.	27	27½	28	28½	29	29½	30	30½	31	31½	32
1	27	27½	28	28½	29	29½	30	30½	31	31½	32
2	54	55 0	56	57 0	58	59 0	60	61 0	62	63 0	64
3	81	82 ½	84	85 ½	87	88 ½	90	91 ½	93	94 ½	96
4	108	110 0	112	114 0	116	118 0	120	122 0	124	126 0	128
5	135	137 ½	140	142 ½	145	147 ½	150	152 ½	155	157 ½	160
6	162	165 0	168	171 0	174	177 0	180	183 0	186	189 0	192
7	189	192 ½	196	199 ½	203	206 ½	210	213 ½	217	220 ½	224
8	216	220 0	224	228 0	232	236 0	240	244 0	248	252 0	256
9	243	247 ½	252	256 ½	261	265 ½	270	274 ½	279	283 ½	288

By means of the above table, taken in conjunction with the column of the opposite page headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several prices other than those given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in the first column, find the numbers opposite to them in the column of the above table giving the price of silver and add these together, taking care to move the decimal point successively one, two, and three places, to the left; the result will be the coin's intrinsic value in pence.

Foreign Monies and their English Equivalents.

EXCHANGE NOTES.—France, Belgium, Italy, Greece and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness, excepting a difference, however, in name. The same system has been in part adopted by Spain, Serbia, Bulgaria, Rumania, and Roumania, and their coins are alike in weight and fineness, and centimes in Spain; levs and banis in Roumania; leva and stotniks in Bulgaria. Similarly the Scandinavian countries, Norway, Sweden, and Denmark, have coins of the same weight, and fineness, their names being also alike. Most of the South American States possess a standard coin, equal in weight and fineness to the silver 5-fr. piece, generally termed a "peso." In Hayti the corresponding coin is a "courde."

In most British Colonies, English money is current. The currency of Ceylon, Mauritius, and the East Africa Protectorate is, however, based on the rupee of British India, that of the British Settlements, Hong Kong, and Labuan on the Mexican dollar, and of Canada and British Honduras on the United States dollar. A British dollar identical in weight and fineness with the Japanese "yen," was authorized by Order in Council in 1884, and has been made legal tender in the Straits Settlements, Hong Kong, and Labuan. The exchange value of the moneys of those countries indicated by a * is determined by the rate of exchange for the day, and may be taken as approximately that given in the last column. The rate given in the daily papers generally represents the number of the standard coins (see page 431) that are equivalent to one sovereign. The Spanish rate is given in terms of pence per dollar (= a escudo), the Russian in pence per rouble, Portuguese in pence per milreis, and the United States rate in pence per dollar. The value of other silver coins must be sought in one of the columns headed "Intrinsic Value with Silver at par Troy Ounces." The exchange value of the rupee depends on the rate for "India Council Bills," but by an Act of 1891 the British sovereign was made legal tender and equivalent to 15 rupees, the rupee being thus rated at rs. 67 $\frac{1}{2}$ "metallic" countries pure gold is generally taken as being worth 151 times its weight of pure silver. This proportion corresponds to giving standard silver a constant value of 60 $\frac{1}{2}$ in the last column of the table.

* The R.C.Y.C. has an Admiral, not a Commodore.

† Secretary's address in brackets.

‡ Office.

¶ Qualification—1,000 miles ocean voyage out and home in candidate's own yacht.

FOR Police purposes London is divided into two jurisdictions, that of the METROPOLITAN and that of the CITY Police. The former force superseded the "Night Watchmen" in 1830, when a Bill introduced by Sir Robert Peel authorised the establishment of a Metropolitan Police under the control of the executive government. The night watch system continued in the City itself until 1839, when a force of City Police was established under the control of the Common Council.

The CITY POLICE* district comprises an area of 671 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates. Although the area is comparatively small, the rateable value is enormous, and there are 31,148 night residents to be protected.

The Force comprises 1 Superintendent, 1 ditto, Detective Department, 3 Chief Inspectors, 15 District Inspectors, 23 Station Inspectors, 12 Detective Inspectors, 74 Sergeants, 7 Detective Sergeants, and 865 Constables; also 57 Constables on private service duty.

The METROPOLITAN POLICE* district embraces an area of 440,518 statute acres, with a population of between six and seven millions. There are within this area fifteen Police Courts, viz., Bow Street, Clerkenwell, Marlborough St., Greenwich, Lambeth, Marylebone, North London (Stoke Newington Rd.), South Western (Lavender Hill), Southwark, Thames (Stepney), West Ham, West London (Vernon St.), Westminster, Woolwich, and Worship St.

The Force on Oct. 26, 1900, consisted of 32 Superintendents, 572 Inspectors, 1,981 Sergeants, and 13,270 Constables, making a total of 15,854, with 314 horses.

It is scarcely possible to form an accurate estimate of the enormous actual value of the property under police protection, but the mean rateable value of the metropolitan area for Metropolitan Police purposes for the year '99-1900 was £42,557,150. The Police Rate is now fixed

by 31 & 32 Vict. c. 67 at *9d.* in the £, of which *4d.* in the £ is payable out of the Local Taxation Account under the Local Government Act, 1888. The total amount of Police Rate levied on the Parishes for the year ending 31 March, 1900, was £882,130, and the Local Taxation Account (including £4,389 under the Agricultural Rates Act, 1895) contributed £701,682 to the Police Fund during the year. The pay of the Force, including Chief Constables, Superintendents, Inspectors, Sergeants and Constables, was £1,227,393. During the year 1899, the criminal offences reported to the Metropolitan Police amounted to 18,508 a decrease of 1,148 as compared with the preceding year. The proportion of felonies relating to property was only 2'439 per thousand of the population. Of burglaries, 447 were committed in 1899, a decrease of 51 over 1898, and the estimated value of the property stolen in these burglaries was £4,225, of which £542 was recovered. Housebreakings numbered 1,321, and the value of the property lost was £17,048. Murder cases in 1899 numbered 21; there were nine death sentences; in one case the homicide was made amenable, but found insane; in one case the murderer committed suicide; in another the homicide was sent to Broadmoor before trial, and in another the trial of the accused resulted in acquittal. There were three cases in which women died from the effects of illegal operations. Of manslaughter there were 31 cases in 1899 as compared with 39 in 1898. The number of Penal Servitude Convicts liberated on licence in the Metropolitan Police District was 681—69 less than in 1898.

* For the official staff of the two Forces, see p. 180.

Metropolitan Fire Brigade.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organized and worked a fire-engine establishment of their own. On Jan. 1, 1866, the Metropolitan Board of Works took over these responsibilities. On Jan. 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844), the service of the saving of life from fire.

By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade, and there is no limit as regards the amount of rate to be assessed.

The total estimated expenditure for the year ended March 31, 1901, was, on capital account, all of which was borne by the ratepayers, £38,737, and on rate account £198,640. Of this latter amount the Treasury and the various insurance companies contributed £41,800. The amount to be raised from the ratepayers £150,905.

The strength of the Brigade in Dec., 1900, was as follows: 64 Fire-Engine Stations, with Horses,

18 Street and Sub-stations, without Horses, 4 River Stations with Floating Fire-Engines, 20 Hose Cart and Escape Stations in the streets, 33 Escape Stations in the streets.

The appliances include 65 Steam Fire-Engines, 20 Manual Engines, 48 Hosed E-capes, 10 River Tugs and Fire Floats, 40 miles of Hose, 96 Firemen, including Chief Officer, Second Officer, and Third Officer, Superintendents, and all ranks, 36 men under Instruction, 17 Pilots, 146 Coachmen, 252 Horses, 108 Telephones between Fire Stations, 620 call-points.

The total number of calls for fires was, in 1899, 4,850, of which 781 were false alarms; of the latter no fewer than 268 were maliciously sent through the call-posts, unfortunately only 7 of the offenders being arrested.

During 1899 there were 3,846 fires in the metropolis, and at 102 of them lives were lost.

Headquarters, Southwark Bridge Road, S.E.
Chief Officer, Commander L. de L. Wells, R.N. £900
Second Officer, Sydney G. Gaule, C.E. 500
Third Officer, Lieut. S. Sinden, R.N. 320

A Widows' and Orphans' and General Benefit Club is maintained by the subscriptions of the Officers and Firemen; outside help will be gratefully acknowledged by the President, Commander Wells, R.N.

Shipbuilding at Home and Abroad.

We have been supplied with the following information by "Lloyd's Register of British and Foreign Shipping":—

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN THE UNITED KINGDOM DURING RECENT YEARS.

Year.	No.	Gross Tonnage.
1891.....	822	1,130,816
1892.....	681	1,109,950
1893.....	536	836,383
1894.....	614	1,046,508
1895.....	579	950,967
1896.....	636	1,159,751
1897.....	591	932,486
1898.....	761	1,367,570
*1899.....	726	1,416,791

* In addition, there were launched in the United Kingdom, during 1899, 35 Warships of 168,590 tons displacement, of which 18 of 121,140 tons were for the British Government.

Of the merchant steamers (714 in all) launched in the United Kingdom during 1899, 9 vessels were over 10,000 tons, the largest being the "Oceanic" of 17,274 tons; 13 were between 7,000 and 10,000; 81 were between 4,000 and 7,000 tons each; and 262 were between 1,000 and 4,000 tons. No sailing

vessel of considerable size has been launched in the United Kingdom during 1899. The largest being the yacht "Glenliffer" of 473 tons.

MERCHANT AND OTHER VESSELS (not Warships) UNDER CONSTRUCTION IN THE UNITED KINGDOM AT VARIOUS DATES. (Vessels not to be classified by Lloyd's Register are also included.)

30th September.	No.	Gross Tonnage.

DESCRIPTION OF VESSELS BUILDING IN THE UNITED KINGDOM IN 1875 AND 1900 RESPECTIVELY.

DATE.	STEEL.				IRON.				WOOD.				TOTAL.			
	STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.	
	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.
30 Sept. 1875	126	157,466	114	106,521	2	1,065	203	51,122	132	158,531	317	157,643
30 Sept. 1900	398	1,187,264	9	9,280	23	4,353	2	735	20	2,316	423	1,192,414	29	11,595

These figures show that the average size of vessels built at the present time is quite 3¼ times that of vessels built twenty-five years ago. Then, steel was not used for shipbuilding purposes; now,

it has all but supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant.

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN EACH OF THE PRINCIPAL SHIP-BUILDING DISTRICTS OF THE UNITED KINGDOM DURING 1899.

* Including steel vessels built on the Great Lakes.

A GLANCE AT THE FIRST STEAMBOATS AND EARLIEST LINES—EVOLUTION FROM STEAM PACKET TO STEAM PALACE ON THE ATLANTIC—OWNERS OF THE LARGEST FLEETS, STEAM AND SAIL—BIGGEST AND FASTEST STRAINERS.

In the early part of the 18th century numerous inventors propounded schemes for applying steam-power to vessels to be run upon rivers and canals. Denis Papin, who made improvements in the steam engine—then in a crude state—fitted one to drive the paddle-wheels of a small boat on the river Fulda in 1737; Jonathan Hulls in 1736 patented designs embodying features similar to the modern paddle boat. For nearly 50 years little progress was made, but in 1769 James Watt patented a double-acting side-lever engine, the first one to be of any real service in the development of steam navigation.

After the Marquis de Jouffroy's attempts in 1783 came experiments independently carried on in America by James Rumsey and Rob't Fitch; the former, in 1785, drove a boat along at 4 miles an hour by a jet of water steam-pumped through a pipe at the stern, an idea subsequently shelved as un-sound. Fitch, in 1785, was trying steam-paddles, and fitted a boat on the Delaware, 1787, with a series of single canoe-paddles worked by a moving beam, which was America's earliest steamboat; another one in 1790 travelled for a short time at 7 miles an hour between Philadelphia and Burlington. Subsequent trials, including a propeller to a model, leading to no practical results. Fitch retired disgusted, his well-founded prophecies as to the future of steam navigation being only ridiculed. Miller of Edinburgh was experimenting in 1787 with primitive manual machinery, and in conjunction with Symington, the inventor of a locomotive for road purposes, an engine was fitted to a double-hull boat in 1788, developing a speed of 5 miles an hour, which was increased to 7 when the paddle-wheel was tried over the stern of a larger boat. Miller abandoned these costly trials, and Symington could not proceed without means, but in 1802 he seized an opportunity to produce the *Charlotte Dundas* for Lord Dundas—which gave effect in part to Jonathan Hulls' ideas, hitherto untried—intended for towing barges on the Forth and Clyde canal, but she rusted away an idle spectacle, the proprietors, in spite of satisfactory trials, fearing injury to their canal banks. The first sea voyage by steamer occurred two years later, when J. C. Stephens, with his screw boat *Phoenix*, fitted with a Watt's engine and tubular boiler, journeyed at 4 miles an hour from Hoboken to the Delaware. Robert Fulton and Henry Bell had profitably inspected the *Charlotte Dundas*. Fulton returned to America in 1806, having ordered a similar engine from Boulton and Watt for the *Clermont*, 133 x 18 x 7, built in 1807 for him and Livingston, her first trip from Albany to New York took 32 hours; and she was the first passenger steamer continuously and advantageously employed.

In 1803 the *Accommodation* was on the St. Lawrence, and in 1812 a steam-ferry connected New York with New Jersey, one year before the ferry *Etna* appeared at Liverpool. In 1814 Fulton built a frigate for the U. S. Government, but she only steamed 4 miles an hour. The *Washington*, in 1815, was the first to steam up as well as down the strong-running Mississippi, the side-wheeler *Ontario* being built on the Lakes, 1816, 25 years before the *Vandal* introduced the propeller there. The year 1819 brought a

small instalment of the fulfilment of Fitch's predictions, when Scarborough and Isaacs purchased a sailing ship on the stocks at New York, and fitted her with auxiliary paddle-wheels; she sailed from Savannah, which she was called after, but only steamed 80 hours during her 30 days passage, which terminated at Liverpool, June 20th.

Beil, in Scotland—failing government support here or in America—had the *Comet* built in 1812, a twin-boat 25 feet long, going 5 miles an hour, with two paddle-wheels each side, increased to 6 miles with a new engine and only one pair of paddles. She ran between Glasgow and Helensburgh, the first passenger steamer regularly employed in Europe. The South Kensington Museum contains her engines, set up there by John Robertson, their maker. The *Margory* in 1814 plied on the Thames, followed next year by the up-river steamer *Richmond*; the *Regent* starting in 1816 between London and Margate. In 1818 Denny built the first sea-trading steamer in the world, the *Rob Roy*, 90 tons, for Napier of Glasgow, who made her engines and ran her between Glasgow and Belfast. In 1819 the *Tulbot*, 156 tons, inaugurated the Holyhead-Dublin steam service, when the passages of the sailing cutters averaged 20 hours. The *James Watt*, 448 tons, between Glasgow and Leith, was the biggest steamer afloat in 1822, when Napier got capitalists to build the *Robert Burns* and other steamers for the Liverpool and Glasgow trade.

Iron first superseded wood for the building of light inland craft; the *Vulcan* in 1818 being so built on a Scotch canal. The *Aaron Manby* steamer was called after her designer, who built her at Tipton in 1821. The *Agata* appeared on the Clyde, and *Prince Albert* on the Tyne in 1832, in which year Laird and Co. built the *Eburkah* for an expedition up the Niger; but ridiculous and imaginary objections long retarded the adoption of iron for sea-going vessels. In 1837 the largest iron vessel was the *Rainbow*, 600 tons, belonging to the General Steam Navigation Company, her length being 185 feet.

1824 witnessed the birth in England of the railway system, which tended so much to promote trade, wealth, and general advancement. The Stockton and Darlington Railway was opened in 1825, a year bracketed with the names of George Stephenson and his famous locomotive *Rocket*. Vested interests hindered the movement until after 1840, when a railway mania succeeded the period of prejudice, and construction in all directions was hurried forward. With the introduction of the "iron horse" the General Steam Navigation Company arose to champion the adoption of steam; ocean trade was then carried on with sailing ships, mostly under 500 tons each, all the steamboats in the United Kingdom only numbering 109. The comprehensive area of the *Navy Co.*'s original programme is indicated by its title; its prospectus, which made a successful appearance in 1824, included amongst many influential names, Mr. John Hall, whose boats were trading between London and Hull, and Mr. Brocklebank, who was running the diminutive *Eagle* between London and Margate. The national benefits calculated to result from steam power, enabling vessels to enter and quit harbours regardless of wind and tide, were emphasised by

the Directors, as well as the prospects of connecting the remotest parts of the earth, but the Company was too fully engaged with business near at hand to carry out that portion of the founder's views. The first operations were attended with remarkably profitable results; safer and quicker communications were established between the Capital and the Home Ports for passengers and goods in competition with the stage coaches and waggons ashore, and the smacks and "geordies" afloat. The Company soon extended to maintaining express services between London and Continental ports, Her Majesty's mails being carried to Rotterdam and Hamburg long before the railway companies developed into running their own steamships. Queen Victoria and Prince Albert travelled from Scotland in the Company's *Tri ent*, 1000 tons, and were safely landed at Woolwich on September 30th, 1842.

The origin of the propeller is lost in history. One, associated with Bernoulli, dating back to 1762. Pettit Smith, John Ericsson, and Woodcroft, were the first to attain any success; Smith's culminating in the *Arch med s*, 237 tons, launched in 1838, which reduced the Dover-Calais passage, when tried there, to under 2 hours. Commercial results, however, followed Ericsson's efforts. In 1837 he had the *Francis B. Ogden* built by Laird, which towed a vessel 7 miles an hour, and the Admiralty barge at 10 miles; but "my Lords" withheld encouragement, fearing the screw would impede steering. Others did not think so, notably an American, who at once ordered a boat fitted with Ericsson's propeller, named after himself *R. F. Stockton*; she sailed to America, the first iron vessel to cross the Atlantic, and was the first screw steamer ever used there, being employed as a tug-boat. Ericsson fitted a propeller to the U. S. warship *Princeton* in '89, three years before a screw of an improved type by Woodcroft was used on H. M. S. *Baird*, built by the Admiralty, 20 years after the first steamboat, the *Comet*, had been constructed in a Royal dockyard.

The earliest Atlantic steamers now claim attention. The first to steam across the Atlantic was the *Royal William*, launched at Wolfe's Cove, Quebec 1831, her engines being sent from England. In 1833 she went from Pictou, N.S., to Gravesend, arriving Sept. 11th after 22 days passage. She was bought by the Spanish government, re-named *Isabella Segunda*, and was utilised as a warship at Sebastian against the Carlists.

The pioneer steamer from the old world to the new was the Cork packet *Sibus*, chartered by the British and North American Steam Navigation Company, whose vessels hailed from Port-mouth. Leaving Cork, April 5, 1838, she reached New York, April 23, having been compelled to burn everything available. On the same day the *Great Western*, the first specially built for the Atlantic service, paddled in, having left Bristol, April 8th—a wonderfully quick passage of 14½ days. The Great Western Steam Navigation Company patronised Bristol until 1841, and before the Royal Mail Company bought the *Great Western* in 1847 she reduced the westward record to 12 days 18 hours, and the one east to 12 days 7½ hours. In 1849 the company which had despatched the *Sirius* built and sent from Port-mouth, July 12, the *British Queen*, with 600 tons of coal, carrying a crew of 100 and a cargo valued at £1,500,000. After an outward run of 14 days 8 hours, she

made several voyages, but, failing to pay, was sold to the Belgian Government in 1841, which, with the loss the same year of her sister-ship *President*—not heard of after leaving New York for Liverpool, March 10th—resulted in the retirement of her owners. A third company, called the Transatlantic Company had selected Liverpool as their port, and started with the *Royal William*; she was the earliest steamer with watertight compartments, and the first to cross from Liverpool, July 18, 38, taking 19 days. The Transatlantic Company built the *Liverpool*, which sailed on her first voyage, October 20th, 1838; she was eventually acquired by the Peninsular and Oriental Company, who called her the *Great Liverpool*.

The *Royal William* previously referred to had been chartered from the City of Dublin Steam Packet Company, now the oldest steamship company in the world. It dates back to 1823, in which year the *Enterprize*, 479 tons, after ten stoppages en route, managed to reach Calcutta from London in 113 days. A voyage worth recollecting, by way of contrast, is that of the *City of Venice*, a full-rigged ship which in 1867 sailed from the Clyde, over the same course as the *Enterprize*, in 65 days; she belonged to Messrs Geo. Smith & Sons, City Line of Glasgow, established 1840.

Messrs. Bourne & Co., the largest proprietors of the City of Dublin Steam Packet Company, were stage-coach contractors for the conveyance of the mails in Ireland, and were instrumental in commencing several Continental trades. The Company was incorporated in 1833, and has carried the mails between Holyhead and Dublin during the whole of Her Majesty's reign.

One of their steamers, the *Royal Tar*, having been chartered to Dom Pedro, and then to the Queen Regent of Spain through their brokers Messrs. Wilcox & Anderson, Messrs. Bourne & Co. were induced, in 1836 to put on steamers from Falmouth to Lisbon, which line was started by the *William Flaxen*, 206 tons, and represented in London by Wilcox & Anderson, the *Iberia*, sailing September, 1837, being the first to carry the Peninsular mails. The original capital and directors were largely found by the Irish company, which was thus practically the godfather of the Peninsular and Oriental Company, so-called when the mail services upon this side of Egypt were combined in 1839 under the time-honoured flag of the "P. & O.," which received its charter in 1840.

The failure of the earliest Atlantic companies did not deter the establishment and development of the Cunard Company. Samuel Cunard, its founder, was the agent at Halifax, N.S., of the East India Company, and had been conducting with sailing ships the local services between Boston, Newfoundland, and Bermuda, which brought home to him the need for steam. As a director of the Canadian Company, which owned the first *Royal William*, he speedily made up his mind as to the possibilities and future of the new power, hence was well prepared to act promptly, when the opportune moment arrived for his memorable and successful mission. To the discomfiture and astonishment of the Great Western Company this enterprising gentleman's tender was accepted, which secured the subsidy of £80,000 a year for a monthly Atlantic service of 4 steamers. The gun brigs were thereupon superseded as mail carriers, and a brighter era was auspiciously commenced by the despatch of the *Brianna*, 1,139 tons, on July 4th, 1840.

In 1839, the Royal Mail Steam Packet Company was formed and incorporated by Royal Charter, and undertook the conveyance of mails to the West Indies at a time when a steam passage of even a fortnight's duration was to many a subject of wonder. In 1842 the *Thames*, 1889 tons, began the main line to the West Indies, smaller steamers being built to remain out there, and work the company's inter-colonial branch lines, in connection with the mail boats from Falmouth. Directly the feasibility of maintaining steam services across the Atlantic had been demonstrated, the Pacific Steam Navigation Company was formed to run a service between Panama and Valparaiso for the conveyance of the British mails along the shores of the Pacific, receiving them upon the other side of the Isthmus from the Royal Mail Steam Packet Company, who organised the necessary transport across it with mules and canoes. The Pacific Steam Navigation Co.'s *Osic* and *Peru*, each 700 tons, were sent out through the Straits of Magellan at the close of 1840, and were the first steamers to plough the waters of the Pacific, receiving a public welcome from the inhabitants of Valparaiso.

In 1847 the Pacific Mail Steamship Company was organised as an American line between Oregon and Panama, and the acquisition of California a year later by the United States hastened the necessity for improved communications with the Pacific. 1850 was memorable for the advent of the screw-steamers of Wm. Immau, who commenced his service from Liverpool to Philadelphia with the *City of Glasgow*, which had previously been run from Glasgow to New York by her builders, Tod and McGregor. Next year Mr. Bibby had the *Fiber* and *Arno* built for his line, upon then conducted with sailing ships to the East Indies, since 1821. The African Steamship Company began a monthly mail service to the gold and ivory coasts of West Africa, 1852, in which year Messrs. Palmer & Co., of Jarrow, equipped the first steamer (a screw collier) with water tanks for ballast. The Union Line ran colliers to the Cape in 1853, flourishing four years afterwards into a monthly Mail Line, and during the three succeeding years the Asian, British India, and Anchor Lines joined the ranks of steam in the order named.

The *Great Britain*, built by the Great Western Company, 1839-45, deserves special mention as the first iron screw steamer, and the precursor of the modern Atlantic steamer. Brunel, who designed her, altered his plans for paddle-wheels, which had been commenced after he had seen the *Archimedes* at work. Her dimensions were 322 x 40 x 31, which detained her a year at Bristol, being too wide to pass through the dock gates. She eventually sailed from Liverpool, August 1845, completing two Atlantic voyages but on her third outward passage she stranded at Dundrum Bay, 1846, remaining there intact a whole winter, a signal proof of the durability of iron for shipbuilding. She was got off August 1847, but changed hands, owing to the effect of this disaster upon her owners. After considerable alterations she ran until 1874, to and from Australia, for a long time the only steamer on the Cape route; was converted into a sailing ship in 1882; and, being condemned soon after at the Falkland Isles, finished there as a hulk.

In the *Great Eastern*, whose owners had her built for the eastern trade, Brunel combined the declining paddle-wheel with the dawning pro-

PELLER systems, but 1,700 horse-power for the former and but 1,000 for the latter, with which she was fitted, afforded nothing like enough power to manage and drive such a vast fabric the hull of which was 680 feet long and 83 wide. She was begun at Millwall in 1854, and after several costly attempts at launching, floated herself in 1858. After some unremunerative voyages to America, she was in 1865 instrumental in laying the Atlantic cable and subsequently other ones. During varying vicissitudes she changed hands several times; and after vain efforts to employ the huge failure profitably, once even being tried as a coal hulk at Gibraltar, the leviathan was privately sold for £16,000. Luckily for the speculator in her, a rise occurred in the values of copper and iron, and she fetched £53,000 in 1838 at public auction. She was on exhibition to large crowds at Birk-head before being demolished, after holding for 40 years the barren record of having been the biggest vessel in the world.

Some homeward runs by clippers of the Black Ball and other lines were of sufficient interest to be chronicled here. The *Red Jacket* in 1834 crossed from New York to the Jersey in 13 days, and the *Ligatung* did the passage in a little less time. In 1836 the *Sagorashure* made a run of 14 days, but the *Dreadnought*, 1,413 tons, 220 x 45 x 26, eclipsed all previous runs in 1862, when she reeled off between Sandy Hook and Queenstown the enduring record of 9 days 17 hours. Mention must also be made of the celebrated clipper *Thermopylae*, of the Aberdeen Line, between London and Australia, whose owners, Messrs. Geo. Thompson & Sons, started business at Aberdeen in 1825. Her maiden voyage, in 1858, of 60 days between London and Melbourne remains the fastest ever known. This swift vessel, built at Aberdeen by Walter Hood was a full-ripped heavily-sparred ship, 991 tons, with a hull like that of a big yacht, 212 x 36 x 20. She travelled 2,000 miles in one week, and logged 380 miles in one day, from which can be formed some idea of her wonderful speed. In 1859 the *Patriarch*, 1,339 tons, made for the same owlers the record passage of 68 days between London and Sydney. Their ss. *Aberdeen*, built in 1881, was the earliest ocean steamer to demonstrate decisively the superior merits of triple expansion engines; and the favourite steamers of this line, follow the track of their former "flyers" round the Cape of Good Hope.

The oldest sailing line in existence is Messrs. Devitt & Moore's, whose service of packets dates back to the despatch of the *Conqueror* in 1836. Of late years this firm have made a speciality of the nautical instruction of youths desirous of becoming officers in the Merchant Service. Two fine ships, the *Hesperus*, 1,777 tons and *Acquarone*, 1,867 tons, being specially arranged for the highly desirable purposes of ocean training vessels.

In 184 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 5,000 tons by 1850. There were 76 British steamers afloat in 1838, in all but short of 150,000 tons. Lloyd's invaluable "Register of British and Foreign Shipping" shows that now every other steamer upon the high seas flies the British ensign, and the steamship empire builders of Greater Britain own 8,000 vessels, aggregating more than 12 millions of tons, exclusive of nearly 3,000 ships (2,100,000 tons) belonging to the dwindling disciples of time-honoured canvas.

AFRICAN STEAMSHIP COMPANY, the earliest African line, traces its origin to a private expedition of the *Elburkah* up the Niger in 1831, its success leading to others for opening up the West Coast of Africa or suppressing the slave-trade. This Company received its charter in 1852, with an annual subsidy of £30,000 for a monthly mail, passenger, and freight service, performed continuously ever since, the pioneer boats *Forerunner*, *Faith*, *Hope*, and *Charity* rendering valuable aid in the Crimean War. In 1891, the Company associated itself with the British and African Steam Navigation Company (see p. 723), under the conjoint management of Messrs. Elder, Dempster & Company, of Liverpool, and maintain 7 distinct services from Liverpool, Hamburg, Rotterdam, and Antwerp to West and South-West Africa, the one from the last-mentioned port being under contract with the Congo Free State.

Fleet, 34 steamers, 90,457 tons.

London Office, 21, Gt. St. Helens, E.C.

ALLAN LINE.—The Allan Line Steamship Company, Limited, was originally called the Montreal Ocean Steamship Company. When McKean gave up, a contract with the Canadian Government for a steam-link with the mother country was undertaken by the Allan Brothers, who, as sailing shipowners, had been connected with Canada since 1820. The *Cornucopia*, 1,700 tons, was despatched from Liverpool to Montreal and Quebec Sept. 20, 1854, but owing to the Crimean War the mail service did not begin until April, 1855, with the sailing of the *North American*, and the line has continued to meet and promote the postal commercial, and immigration requirements of the now vast Dominion, but at present, in the absence of satisfactory arrangements, the mails are not being carried by the Allan line. Since 1859, sailings have been weekly, the steamers going to Halifax and Portland when the St. Lawrence is closed. The itinerary includes Glasgow, Liverpool, and London, embracing on the other side, in addition to several Canadian ports, Boston, New York, Philadelphia, and the River Plate. The twin-screw *Bavarian*, 10,376 tons, can, like her sister-ship *Tunisian*, accommodate 500 passengers.

Fleet, 35 steamers, 192,000 tons.

London Office, 103, Leadenhall Street, E.C.

AMERICAN LINE, which inherited the records of the noted Inman Line, alone of Transatlantic services flies the United States flag. The International Navigation Company, the proprietary organisation, was incorporated in Pennsylvania in 1871; a fortnightly service was established in 1873 between Antwerp and Philadelphia with steamers under the Belgian flag, known as the Red Star Line; and the American Line was started with the American-built *Illinois*, *Indiana*, *Ohio*, and *Pennsylvania*; 1880 brought a weekly line between New York and Antwerp, this expansion being followed in 1886 by the important acquisition of the Inman Line with its five steamers and Liverpool-New York connections, Messrs. Richardson, Spence & Co. continuing their management on this side. The year 1888 and 1889 witnessed the enterprising appearance of the *City of New York* and *City of Paris*, which vessels marked an advance in size as well as the adoption of twin-screws. In 1893 the Inman and International, as the line was then called, underwent another phase of re-organisation and extended into the American

Line, the mail steamers exchanging Liverpool for Southampton, their names being all shortened to the bare titles of cities. The *New York* and *Paris* were, under a special Act of Congress, naturalised into the U.S. register providing two steamers of no less size or speed were produced for their owners upon American soil, and the *St. Louis* and *St. Paul* in 1895 emanated from the busy yards at Philadelphia of Cramp & Sons, to fulfil the conditions of the memorable contract (see p. 721). Weekly New York mail lines are run to and from Antwerp, and also Southampton, the latter departures calling at Cherbourg. Philadelphia passenger and freight lines are maintained to and from Liverpool, as well as Antwerp. Six steamers over 10,000 tons each are in course of construction, 4 in the United Kingdom and 2 in the United States.

Fleet, 26 steamers, 187,000 tons.

London Office, 115 & 116, Leadenhall Street, E.C.

ANCHOR LINE.—In 1856, the Anchor Line entered the Transatlantic trade with the *Tempest*, 1,500 tons, diverted from their South American and Indian sailing ships and converted into a screw steamer. As the American trade prospered, Messrs. Handiside and Henderson, the founders of the Anchor line, paid more attention to their Atlantic service, and in 1853 put on two large steamers, the *Britannia* and *Caledonia*; the Glasgow-New York trade was vigorously developed with fine steamers, the sizes of which were gradually increased to 5,000 tons. In 1879 the *Circassia* was carrying dead meat by the dry-air process of refrigeration. Besides the American service between Glasgow and New York, the line, which became a public company in 1899, maintains services between New York, New Orleans, and various Mediterranean ports; also runs one from Glasgow and Liverpool to Bombay, returning *via* Marseilles and Gibraltar; and another to Calcutta, returning to London. The *City of Rome* is 8,453 tons, and amongst the steamers building are the *Columbia* 8,400 tons and *Numidia* 6,250 tons.

Fleet, 32 steamers, 134,000 tons.

London Office, 18 Leadenhall Street, E.C.

ATLANTIC TRANSPORT CO., LTD., THE originated in London in 1836 with the *Maryland*, 2,853 tons. Until 1839 the steamers were owned by separate companies under one management; one of them, the *Missouri*, rescuing 735 lives from the sinking steamer *Danmark*. In 1839 the boats were all transferred to the Atlantic Transport Co., Ltd., registered in London for the purpose, the prime movers and principal stock-holders being Americans. The Company in 1896 purchased the controlling interest in the National Steamship Co., a line which dated back to 1853, and after flourishing into front rank, declined by degrees. When the Atlantic Transport Co. commenced first, a line was run from London to Baltimore, *via* Swansea; soon Philadelphia was added to the itinerary, subsequent growth leading to a service to New York, necessitating large steamers built specially for the carriage of cargo, refrigerated meat and live stock, together with only first-class passengers. Travelers preferring comfort to speed soon patronised boats not burdened with emigrants, and no appreciable inconvenience was experienced from the four-footed American citizens which crossed to England every passage (55,987 head were carried during the year 1899, besides 9,925 horses). The line growing in favour,

saloon accommodation has increased from 50 to 250, which can be carried by the new twin-screw steamers *Hinchaha*, 13,402 tons, and *Minneapolis*, 13,401 tons. In 1898 the steamers and New York business of the Wilsons and Furness-Leyland Line, Limited, were secured, an operation involving close upon £1,000,000, to replace the company's steamers simultaneously sold to Americans at the time of the war with Spain. The Chairman of the Company is Mr. Bernard N. Baker, of Baltimore, U.S., who, generously loaned the ss. *Maine* as a hospital ship to the British Government during the recent war, contributing personally the major part of the expenses. Fleet 23 steamers; 81,548 tons.

London Office, 108, Fenchurch Street, E.C.

AUSTRIAN LLOYD STEAM NAVIGATION COMPANY, established in 1835, belongs to Trieste, whence seven services are kept up to and from Adriatic, Mediterranean, and Levant ports, served by three branch lines. Besides a line to the West as far as Brazil, there is an accelerated monthly mail service between Trieste, Brindisi, and Bombay; also an ordinary service as frequently between Trieste, Bombay, China, and Japan, in connection with a monthly branch between Colombo, Madras, and Calcutta. The "*Erzherzog Franz Ferdinand*," 6,043 tons, will be surpassed in size by one of the 5 steamers building which swell the total by 20,000 tons.

Fleet, 69 steamers, 173,697 tons.

London Agents, Hickie, Borman & Co., 22, Billiter Street, E.C.

BIBBY LINE.—This Line was founded in 1807 by Mr. John Bibby, the grandfather of the present representatives, the Fleet at that time consisting of small sailing vessels, of which a regular Line to the East Indies was established in 1821. In 1851 the steam fleet was commenced with the *Tiber* and the *Arno*. Later, Mr. James Bibby ordered from Messrs. Harland & Wolff the *Syrian*, *Sicilian*, and *Venetian* (the pioneers of the present style of steamers), which were the now famous shipbuilding firm's first order. In 1891 the *Lancashire*, whose passage of 23 days, 20 hours, in July, from Liverpool to Rangoon stands the fastest, started the present service, which runs to Colombo and Rangoon, *via* Marseilles, from which port of call Ceylon is 18 days' passage, and Burmah 23. The fast and modern steamers of this Line, which belongs to the Bibby Family, are all built by Harland & Wolff and authorised by the Indian Government for officers returning on expiry of furlough, it being the recognised route to Burmah; easy connections being made with Southern India generally by a daily steam service between Colombo and Tuticorin.

Fleet, 7 steamers, 40,526 tons.

London Office, Dunster House, Mincing Lane, E.C.

BRITISH AND AFRICAN STEAM NAVIGATION COMPANY, Ltd., established in 1858 a service, the steamers being mail, passenger, and cargo, named after various African ports, trading stations, and rivers to which they run from Liverpool, &c. Water-ways have been discovered, explored, and brought into prominence by their captains, one, the "*Jones*," being so called after Alfred L. Jones, the presiding genius of the firm of Messrs. Elder, Dempster & Co., of Liverpool, who have recently taken this Company over and will carry it on as usual under the above title, having added to the Fleet the

Montezuma, *Montreal*, *Lake Erie*, *Lake Champlain*, *Minmouth*, *Montauk*, *Sangra*, *Prah*, and *Lake Magantic*. The rapidly extending commercial operations of this Firm with the Canary Islands and the West Coast of Africa, as well as in the Canadian, United States, West Indian (See p. 731), and other trades, in which a large number of additional steamers are employed, are upon a comprehensive and enormous scale.

Fleet, 34 steamers, 99,348 tons.

London Office, 4, St. Mary Axe, E.C.

BRITISH INDIA STEAM NAVIGATION COMPANY.—In 1855 the founder of this Company, the late Sir William Mackinnon, arranged to establish the Calcutta and Burmah Steam Navigation Company for the performance of mail services for the East India Company, with which object it was incorporated in 1855, the *Baltic* and *Cape of Good Hope* being sent out in 1857 to start the business. The Company's vessels have often repeated the timely services rendered to the Government during the Mutiny that year, and during the Abyssinian War the compound engines of their steamers were serviceably employed condensing daily supplies of water for the troops. In 1862 a fresh mail service was entered into which included additional routes, and the name of the Company was officially altered to its present title—more in keeping with its business, which strikingly benefited from the opening of the Suez Canal, through which the Company's steamship *India* conveyed the first cargo of Indian produce. The Aden-Zanzibar mail service was put on in 1872, and from then until now new routes have been constantly added to its itinerary, the extent of which will not admit of more than a bare outline. The Company is under contract with the Home and Indian Governments for mail services to Arabia, Persia, India, Burmah, East India, the Mauritius and the Seychelles, and also runs other services to Batavia, Queensland, &c. In 1899 a three-weekly line from Calcutta to Manila was established, which has since been extended to Yokohama, Kobe, and Moji. This important undertaking, with its far-reaching organisation and connections, supplies over 100 ports with commercial facilities; it is under the management of Messrs. MacKinnon, MacKenzie & Co., in India, Messrs. Gray, Dawes & Co., having represented the Company in London since 1866. *Golconda* 5874, *Ikonona*, *Imaita*, *Istana*, *Itola*, *Itin a*, *Itarra*, each 5400 tons.

Fleet, 122 steamers, 385,740 tons.

London Office, 9, Throgmorton Avenue, E.C.

THE BUCKNALL STEAMSHIP LINES, Ltd., was formed in 1900, with a share and debenture capital of £2,750,000, to take over and extend the British and Colonial Line from London to South and E. African Ports, established in 1892, for passengers and cargo; also lines between N. York and S. Africa; and N. York and India; as well as a line between Manchester and Persian Gulf ports *via* Marseilles. The *Baratse* and *Munira* are 4,000 tons each, and two similar boats are building. The founders of the lines, Messrs. Bucknall Brothers, will conduct the operations of the Company.

Fleet, 20 steamers; 72,512 tons.

London Office, 23, Leadenhall St., E.C.

CANADIAN-AUSTRALIAN LINE was established in 1893, and runs in connection with the Canadian Pacific Railway. The steamers

Aorangi, 4,268 tons, *Miwera*, 3,345 tons, and *Warrimoo*, 3,325 tons, are under contract with the Canadian, New South Wales, and Queensland governments for a monthly mail service between Vancouver, Victoria, B.C., Honolulu, Brisbane, and Sydney, N.S.W.

London Office, 138, Leadenhall Street, E.C.

CANADIAN PACIFIC RAILWAY.—Besides their Lake route Steamships, the finest of their kind, The **EMERALD LINE** a three-weekly service between Vancouver and Japan and China was established 1891, composed of magnificent twin-screw mail-boats, each 5,505 tons, and respectively named after *India*, *Japan* and *China*, and subsidised for service as cruisers. They call at Yokohama, Kobe, Nagasaki, Shanghai, and Hong Kong; the *Empress of India* went in 1887 from Vancouver to Yokohama in 10 days, 10 hours, 22 minutes, her total time to Hong Kong being 17 days, 16 minutes. By reducing the stopping-places, from 140 to 80, the Canadian Pacific Railway runs its Transcontinental Express, the "Imperial Limited," from Montreal to Vancouver in 104 hours, returning in 98, London being thus brought within three weeks of Japan.

London Office, 67, King William Street, E.C.

CITY LINE.—Messrs. George Smith & Sons celebrated their Jubilee at Glasgow in 1889, fifty years after their *Constellation*, 344 tons, sailed thence for Calcutta. The *Majestic*, a full-rigged ship of 560 tons, which appeared in 1846, was the first vessel specially built for the firm, who joined the ranks of steam in 1870, with the *City of Oxford*, 2,319 tons. Thirty sailings are despatched every year from Glasgow and Liverpool to Calcutta and back to London; as well as 13 to Bombay and Karachi, which return to Liverpool, all of these steamers carrying passengers regularly to and from Malta and Egypt, in addition to the above ports.

Fleet, 13 vessels, 54,599 tons.

London Agents, Montgomerie & Workman, 36, Gracechurch Street, E.C.

CLAN LINE began a fortnightly service from Glasgow and Liverpool to Bombay and Kurrachee in 1878 adding one to South and East African Ports in 1881, and another to Colombo Madras and Calcutta in 1882, a joint service from N. York direct to south and East African ports appearing in 1893. Seventeen turret-deck steamers figure in the fleet, of which the *Cun Barquebar*, 5,858 tons, *Cun Solajah* is 5,765 tons, and *Cun Urquhart* 5,855 tons, are the largest. The line is under the management of Messrs. Cayzer, Irvine & Co., of Glasgow, Liverpool, Manchester, and London, whose senior partner, Sir Charles Cayzer, M.P., was the founder and is the chairman of it.

London Office, 115, Leadenhall Street, E.C.

COMPAGNIE GÉNÉRALE TRANSATLANTIQUE established 1862, is the second large-steamship company in France, and is heavily subsidised by that government. With its fine fleet of mostly fast boats, the Company maintains important connections between Havre (its head port), St. Nazaire, Bordeaux, Marseilles, etc., and various Mediterranean, African, West Indian, and North, Central, and South American ports. *La Lorraine* has been, and *La Savoie* is being, built on French soil, according to terms of mail contract, at the Company's own shipyard. They have 11,200 tons

each, with a speed of 20 knots, the largest ever constructed in France.

Fleet, 66 steamers, 179,499 tons.

London Office, 36, Leadenhall Street, E.C.

COMPANIA TRASANTLANTICA of Barcelona and Cadiz, is the leading company in Spain, the largest steamers in the fleet being *Alfonso XII.*, 7,000 tons, *Amor y Lapes*, 6,500 tons, and *Afonso XIII.*, 5,200 tons.

This Company in 1881 succeeded Messrs. A. Lopes & Co., who were established in 1870; regular mail and passenger services are maintained to the Antilles, River Plate, North Africa, Philippines, &c., the Liverpool Line being managed by Messrs. Larrinaga & Co.

Fleet, 26 steamers, 89,927 tons.

CUNARD LINE celebrated its jubilee in 1890. The foundation stone was, and remains, *safety*; it has never lost the life of a single passenger. An important stepping-stone to sorely-tried sea-voyagers was *speed*: it made, and holds, the record each way between Liverpool and New York. Another consideration, which includes every luxury sea-travelling will admit of, is the *comfort* of its passengers (110,000 have been carried in one year), the total lists running into millions. Chief amongst numerous rivals which vainly disputed the supremacy of the "Cunarders" was the noted Collins Line of fast U.S. paddle steamers, which in 1849 threw down the gauntlet only to be beaten off by 1856, when the American Government discontinued all subsidies after a bitter and futile struggle. The pioneer steamer, *Britannia*, left Liverpool July 4, 1840. She was 207 by 34'2 by 22'4, 2,050 tons, 740 h.p., and, like her three sister-ships, was specially built for the Company, then known as the British and North American Steam Packet Company. They were engined by D. Napier, of Glasgow, who, in conjunction with Burns of that city and MacIver of Liverpool, enabled Samuel Cunard to secure the first capital of £270,000. The first iron paddle steamer, the *Persia*, 3,300 tons, appeared in 1856 the *Scotia*, 3,871 tons, the Company's last paddle boat, was built in 1852, which year witnessed the *China*, 2,539 tons, their first Atlantic screw steamer. The *Russia*, 2,959 tons, took her place in the line in 1867, and before leaving it had traversed 630,000 miles and carried 26,076 cabin passengers, without experiencing an accident. The *Armenia*, 2,553 tons, in 1870, was followed with six steamers, the last being the *Gladia*, 4,808 tons, in 1879, all fitted with compound engines. The steel-built *Servia*, 7,392 tons, came in 1881, closely followed by the *Ararica*, and then the speedy *Orion* joined the fleet. The *Eruria* and *Umbria*, each 8,127 tons, were in the foremost rank in 1884, the service being augmented in 1891 by the still swifter *Jampuria* and *Lucania*, each 12,950 tons. These long steps forward were the crowning glory of their builders, the Fairfield Shipbuilding and Engineering Co., Ltd., and are subsidised by U.M. Government for service as fast armed cruisers, each steamer being provided with a duplicate set of triple expansion engines for driving twin-screws capable of 30,000 h.p. The best possible Ships, Crews, and Organisation are the Cunard life-secrets of sixty years' honourable records, which alone rendered possible 10,000 successive passages through the wreck-fields of the North Atlantic. How the Company's steamers pass the most exacting tests with immunity from loss of life, the storm-swept *Pavonia* strikingly

demonstrated in 1899. A private company was formed in 1878, which the public participated in two years later. The quickest crossings recorded to date are as follow:—

WEST.			EAST.			Average Sea Speed.	Highest Day's Runs.
d.	h.	m.	d.	h.	m.	knots.	knots.
Lucania	5	7	23	5	8	38	562
Campania	5	9	9	5	9	18	553
Etruria	5	20	53	6	0	37	599
Umbria	5	22	7	6	1	15	510

The new twin-screw steamers *Luernia* and *Saxonia*, now running in the Boston service, are the large-t-b ships afloat of the class to which they belong—dimensions, 600 × 64 × 49.6; gross tonnage, 13,963 tons; displacement, 25,000 tons.

Fleet, 19 steamers; 120,000 tons.

London Office, 93, Bishopsgate St. Within, E.C.

DOMINION LINE.—In 1870 some Liverpool and New Orleans cotton merchants formed the Mississippi and Dominion Steamship Company, Ltd., to run from Liverpool, Quebec and Montreal in summer, and to New Orleans in winter, but later on Portland (Maine) became the winter port. Since 1894 the proprietary company has been the British and North Atlantic Steam Navigation Company, Ltd. under the management of Messrs. Richards, Mills & Co. In addition to a service to Canada, the Company maintain a service with Boston, U.S. The *New England* is 11,400 tons, and there is a boat building similar to the *Commonwealth*, 12,907 tons, making 7 passenger steamers in addition to which there are 6 freight and live-stock carriers, of which the *Norseman* and *Frishtman*, each 11,700 tons, are the largest, 9 of the Fleet being twin-screw steamers.

Fleet, 13 steamers, 110,500 tons.

London Office, 22 Billiter Street, E.C.

FEDERAL STEAM NAVIGATION CO., LTD.

—The late firm of Money Wigram & Son, held for many years a commanding position in the carrying trade between this country and Australia. Upon their retirement Mr. Allan Hughes, who had been long connected with the old firm, organised the above line, the steamers of which fly a similar flag and bear names similar to the former well-known Wigram packets, some of which were early to the fore in the adoption of the screw as an auxiliary. The fleet consists of large steamers engaged in conveying general merchandise to Australia, returning with frozen produce and wool, and were all selected for transporting men, horses, and mules, to South Africa. Fleet, 8 steamers; 41,852 tons.

London Office, 2, Fenchurch Avenue, E.C.

FORENEDE DAMPSKIBS SELSKAB.—See United Steamship Co Page 731.

GENERAL STEAM NAVIGATION COMPANY, established 1824 and incorporated by Act of Parliament 1834, is essentially a London institution (see p. 715). Besides East Coast Services Continental trades are served between Hamburg in the north and Bordeaux in the south other lines extending to the Mediterranean, Adriatic, Levant, and Black Sea. The sea-going services include the *Shieldark*, 2,697 tons; *Adriatic*, 2,392 tons; *Prinston*, 2,099 tons. whilst the fast paddle-steamer *Eagle* and five similar popular pleasure boats run during the summer season to seaside resorts in Kent, Norfolk, &c.

Fleet, 52 steamers; 52,350 tons.

London Office, 55, Great Tower Street, E.C.

HAMBURG-AMERICAN LINE, in point of carrying capacity, owns the largest fleet in the world, which includes 20 large twin-screw passenger boats. The Packet Company began its Transatlantic service in 1847, with the *Deutschland*, 717 tons, and by 1853 possessed 5 more sailing vessels like her, all having a combined capacity for 4,000 tons of cargo, each accommodating 200 passengers. The entire fleet could then carry annually to New York only 12,000 tons of freight, which quantity the *Penny-vonia* can herself take in 12 days, a practical demonstration of the progress made in fifty years. The s.s. *Borussia*, 2,349 tons, appearing in 1853, was followed by other steamers, monthly departures being kept up until 1860, when the ships were sold, and enough steamers purchased to make fortnightly departures to New York, the sailings being increased to weekly ones in 1872. In 1888 the Company decided upon twin-screws, and the *Columbia*, *Auguste Victoria*, (*Normannia*), and *Furst Bismarck*, successively joined the ever-swelling fleet.

The very able administration of this prospering concern vividly represents the tendency of Continental shipping towards centralisation, the power to compete with British lines being correspondingly strengthened; its progressive policy boldly culminated in the *Dut chland*, 15,500 tons, the largest so far built in Germany, whose engines of 35,000 h.-p. have surpassed all previous records. The routes of the Weekly Express steamers are Hamburg, Southampton, Cherbourg to New York, returning in reverse order. Another service leaves Hamburg every Sunday for New York via Boulogne-sur-Mer, in addition to which steamers run regularly to Boston, Baltimore, Philadelphia, New Orleans, Montreal, West Indies, Mexico, River Plate, the Amazon, China and Japan. Harmonious working arrangements exist with the North German Lloyd, whereby the earnings of both are augmented. There are 12 steamers building counted in the total tonnage given, but 25,455 tons of river steamers, lighters, &c., are not included.

Fleet, 93 steamers; 515,628 tons.

London Office, 22, Cockspur Street, W.

HAMBURG SOUTH AMERICAN STEAMSHIP COMPANY was established at Hamburg in 1871, recent additions being the *Cap Fin, Cap to co*, and *Cap Verd*, each 5,600 tons. Regular passenger services are maintained from Germany, Portugal, and Spain, to Brazil, Uruguay and Argentine.

Fleet, 32 steamers; 126,260 tons.

HANSA COMPANY of Bremen, established 1889, maintains regular cargo services from Bremen, Hamburg, Antwerp and Middlesbrough, to Bombay and Karachi; to Colombo, Madras, and Calcutta; to Colombo and Haugoon; also a fortnightly service between Bremen, Antwerp, and the River Plate. The *Drachenfels*, 7,144 tons, is the largest steamer.

Fleet, 32 steamers; 105,000 tons.

London Agents, J. H. Wackerbarth & Co., 27, Leadenhall Street, E.C.

HARRISON LINE was established in 1830 and is managed by Messrs. Thos. and Jas. Harrison, of Liverpool under the name of the Charente Steamship Company, Limited, regular services being maintained to and from West Indies,

United States, Mexico, Brazil, East Indies, and South of France. The *Mechanicus* is 9,043 tons, and the *Custodian* 9,214 tons.

Fleet, 31 steamers; 146,367 tons.

HOLLAND AMERICA LINE, of Rotterdam, was established in 1872, and maintains a regular passenger and freight service between that port and New York *via* Boulogne-sur-Mer, as well as a direct line between Amsterdam and New York. The *Rotterdam* is 8,301 tons and the *Statesdam* 10,500 tons; but these twin-screw steamers are surpassed in size by the newest one—the *Potsdam*—12,000 tons. The quickest passages between New York and Boulogne-sur-Mer are about nine days. A bi-daily service from Rotterdam by the well-known Rhine boats to Mannheim, Mayence and intermediate stations, enable passengers to easily and cheaply connect with points in middle and southern Germany. Fleet, 7 steamers; 46,779 tons.

London Agents, Browne, Geveke & Co., 102, Fenchurch St., E.C.

HOULDER BROS. & CO., LTD., which became a public company in 1898, was established in 1849 by Mr. Edwin Houlder. In the palmy days of the clippers this firm took front rank as leading brokers from London to the Australian colonies; their position being now retained with the Grange Fleet of modern steamers for passengers and cargo, which are gradually superseding the sailing ships. To South and East African ports bulky and heavy cargoes received special attention, as well as coal and railway contracts; they also act as loading brokers for the British and Colonial Steam Nav. Co. Houlder Bros. quickly grasped the importance of the frozen meat trade, building steamers to each carry 100,000 carcasses of mutton from Australia and the River Plate; pedigree horses and stock have been largely conveyed by them to South America, big cargoes of live cattle and sheep being regularly brought back. *Royston Grange* ran out from United Kingdom to River Plate in a few hours over 21 days, the homeward passage occupying a day longer; the *Ripplingham Grange* is 9,200 tons, but the two new twin-screw steamers, *Drayton Grange* and *Oswestry Grange*, will each register about 10,000 tons.

Fleet, 12 steamers; 49,928 tons.

Head Office, 146, Leadenhall Street, London.

THE HOUSTON LINE was formed by the senior partner of the firm of R. P. Houston & Co., of Liverpool. Services of freight steamers are maintained between Liverpool and the River Plate, and between the River Plate and New York. The *Hudonnes*, 5,658 tons, heads the list, the latest addition being the *Hellenes*, 3,332 tons.

Fleet, 17 steamers; 54,837 tons.

London Office, Finsbury House, Blomfield St., E.C.

IMPERIAL DIRECT W.I. Mail Service from Bristol. (*Particulars sent too late for insertion.*)

JOHNSTON LINE gradually entered the Mediterranean, Black Sea, Danube, American and Canadian trades, and keep up regular lines from Liverpool, London, and Antwerp. *Queensmore*, 7,302 tons; *Maplemore*, 7,719 tons, and *Robanmore*, 9,456 tons, amongst the finest freight and live-stock carriers in existence, head a long list of well built, well kept, and well managed steamers belonging to Messrs. Wm. Johnston & Co., Ltd., of Liverpool. Fleet, 23 steamers; 100,305 tons. London Office, 1, St. Mary Axe, E.C.

KOSMOS COMPANY, of Hamburg, performs a direct service from Hamburg and Antwerp to

the West coast of South and Central America, *via* Straits of Magellan. The line was begun in 1873 to Chile and Peru, and afterwards extended to various other Central American ports, the service having recently developed to the inclusion of Mexican ports and 'Frisco. There are fortnightly departures to Chile and Peru from Hamburg and Antwerp, also a sailing from London every six weeks. Several of the steamers are as large as the *Assuan* and *Alra*, 6,800 tons each, the smallest ones being, like the *Serapis*, 4,000 tons.

Fleet, 28 steamers; 152,800 tons.

London Agents, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

LAMPART AND HOLT LINE—The Liverpool, Brazil, and River Plate Steam Navigation Company, Limited, was formed in 1865, being popularly known as the Lampart and Holt Line, after its first and present managers. The steamers are run at regular intervals from Antwerp, London, Glasgow, Manchester, Liverpool, Havre and New York to Pernambuco, Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, and Rosario; also to the ports of Chile, Peru, and Ecuador, on the West Coast of South America, likewise, a line from New York to Manchester. All the steamers are fitted with telescope masts, many have first-class accommodation for passengers, especially those running between New York and South America; others have been specially constructed to carry large numbers of horses, cattle, and sheep, having all the latest improvements for the safe-carriage of live-stock, and their well-being during transit, the largest being the *Rossetti*, 6,508 tons; *Rabucca*, 5,183 tons; and *Canning* 5,356 tons. In addition to their own fleet, 16 vessels with a total tonnage of 52,375 tons run regularly under the "L. & H." flag.

Fleet, 40 steamers, 120,000 tons.

London Office, 36, Lime Street, E.C.

LEYLAND LINE.—This old-established business was converted into a public company in 1892, after the death of its founder, Mr. F. R. Leyland. Owing to the enterprise and ability of the new management the company soon attained a solid and influential position, and now possesses a fine fleet including some of the largest vessels afloat. The *Winefedian* and *Devonian* are 11,000 tons each, making a total of 34 vessels (without counting the interest of the company in the Wilsons and Furness-Leyland Line), with a tonnage of 145,000 tons, including the *Iberian*, 5,300 tons; *Quebecian*, 4,986 tons; *Rheinian*, 8,548 tons; and *Croatian*, 9,560 tons, added last year for the New York and Boston trades, all calculated in every necessary detail to sustain the reputation of the Company with passengers and shippers. In 1895, a new passenger service was established between Liverpool and the United States, and another line was started from Antwerp to Montreal in 1899. Besides their Transatlantic Services, regular lines are run to Portugal, Italy, Sicily, Malta, Alexandria, Constantinople, and Black Sea, which trades Mr. Leyland took up in succession to Mr. Hibby. In 1900 the Company acquired by purchase the West India and Pacific Steamship Company. This old-established concern consists of 20 steamers, with a total tonnage of about 100,000 tons, and carries passengers and cargo to the principal ports in the Spanish Main, the west coasts of North and South America, and the Gulf of Mexico. The New Orleans cotton trade has been given special

attention, and the steamers now in this service have each a capacity of about 30,000 bales.

Fleet, 54 steamers, 245,000 tons.

London Agents, T. Ronaldson & Co., Ltd., 34, Leadenhall Street, E.C.

MESSAGERIES MARITIMES DE FRANCE.—From a concern for inland mail carriage, the present noted company developed. In 1851, an over-sea contract was entered into for the French mails to Italy, Egypt, Syria, the Levant and Greece. There are five services to Mediterranean, Black Sea and Danube ports, the last two trades being taken up in 1857. The India and China Mail contract was secured in 1861. Besides a monthly line direct to Bombay, there is a service *via* Bombay, and another *via* Colombo, every month to China and Japan, with branches from Colombo, Singapore, and Saigoa to Indian ports, Java, Tonquin and Cochin China. Departures to Australia and New Caledonia occur every four weeks, connecting at Colombo with China, main line. Two lines a month leave for Mauritius *via* Djibouti, Zanzibar, Madagascar and Réunion, with a branch down South-East Africa, between Diego-Suarez and Natal; also a Madagascar Coastal service between Nossi-Bé and Tullera. The foregoing, with a weekly cargo line to London *via* Havre, sail from Marseilles. The mail service from Bordeaux to Brazil and River Plate, commenced in 1861, now leaves fortnightly, with a steamer once a month for cargo only. The "M. M." successfully upholds its pride of place in France, with a splendid fleet of steamers, distinguished for excellence in every department—*Annam, Tonkin, Indes, and Laos*, each 6,200 tons; *Armand-Béhic, Ville de la Oïotat, Australien, and Polynésien*, each 6,500 tons.

Fleet, 62 steamers, 247,338 tons.

London Office, 97, Cannon Street, E.C.

THE MOOR LINE of steamers, which trade to all parts of the world, was commenced in 1835 by Messrs. Walker Runciman & Co., of Newcastle-on-Tyne; the fleet is composed of modern-built vessels, 15 having been placed on the water since 1894, the *Inchmoor*, and *Ventmoor*, each 5,700 tons, and *Uskmoor*, and *Westmoor*, 6,000 tons; having been added last year. Fleet, 21 steamers; 61,732 tons.

London Office, 54 and 56, Bishopsgate St., E.C.

NATAL LINE.—In the middle of the last century, the firm of Bullard King & Co., established a line of clipper ships between England and Natal, and in 1879 inaugurated the present service with the *Ponyo*. Steamers are despatched fortnightly from London *direct* to Natal, Delagoa Bay, Beira, and East African ports, which offer special facilities for passengers and cargo for those points. Besides a through service at regular intervals between South African ports and China and Japan; another fortnightly one, under contract with Natal Government, from Cape Colony and Natal *via* East African ports to Madras and Calcutta, calls at Ceylon. The tonnages and draft of all the fleet, the large *tabing* the *Umata*, 2,655 tons, admit of discharging inside Natal harbour, thereby avoiding transhipping.

Fleet, 13 steamers, 27,784 tons.

London Office, 14, St. Mary Axe, E.C.

NAVIGAZIONE GENERALE ITALIANA.—Under this title were united the Lines which formerly belonged to Florio, of Palermo, and Rubattino, of Genoa, having the head office at Rome. There are Lines from Italy to India,

China, New York, New Orleans, and River Plate, in connection with the Company's Mediterranean, Adriatic, and Levant services. In addition to the monthly Bombay Line from Genoa, the company has recently started a line of fast passenger steamers from Venice to Bombay, calling at Alexandria, Port Said, and Aden. The *Danufo*, *Reno*, *Rosiano*, *Tamigi*, and *Volta*, all in course of construction, are 5,600 tons each.

Fleet, 101 steamers, 233,030 tons.

London Agents, A. Laming & Co., 8, Leadenhall Street, E.C.

THE NEDERLAND LINE of Amsterdam is subsidised by the Government of the Netherlands to maintain a service for passengers and cargo between Holland and Java. The Nederland Steam Navigation Company was established in 1870 and now maintains two departures a month, carrying the royal mail. Calling at Southampton, the steamers proceed to Batavia, Samarang, and Sourabaya, *via* Genoa, Port Said, Suez, and Padang; connection with ports in Netherlands India being made with the steamers of the Koninklyke Paket Co. There are also extra departures direct from Amsterdam. Passengers to Java have the option of returning either by this line (quickest homeward passage 42 days) or by the Rotterdam Lloyd. The *Koning Willem III.* is 4,500 tons, from which size the boats range to the *Sumatra*, 2,500 tons. Fleet, 20 steamers; 70,000 tons.

London and Southampton Agents, Keller, Wallis & Co.

NEW ZEALAND SHIPPING COMPANY, organised at Christchurch, New Zealand, in 1873, carried on business for ten years, with sailing ships specially built for passengers and the trade. The first direct steamer *Stad Harlem*, conveyed in 1879 600 emigrants to the enterprising Colony; four years later the *British King* began the Government Mail contract for which five steamers were built. Last year sailing ships vanished from the fleet which include the twin-screws *Paparo*, 6,553 tons, the *Rumulaka* and *Tongoriro*, each 9,160 tons, and the *Kuapahu*, 9,160 tons, building. New Zealand emphasises its British characteristics by sending here nearly all its produce, which the development of the frozen industries has multiplied. This Company's *Matura* sailed from Port Chalmers in 1882, with 150 tons of mutton prepared on board in the absence of the necessary plant ashore. The passenger steamers sail from London every Thursday *via* Plymouth, Teneriffe Cape Town, and Hobart, returning round Cape Horn *via* Montevideo, or Rio Janeiro. Rates are low compared with the conveniences and table supplied to all classes.

Fleet, 12 steamers, 81,000 tons.

London Office, 138, Leadenhall Street, E.C.

NIPPON YUSEN KAISHA.—In 1863 steamship communication was opened between Tokyo and Osaka by a company which gave way to a Mail Line under Imperial control in 1871, which year the foundation of all modern maritime enterprise in Japan appeared in the shape of the "Three Diamonds Co.," which in 1876 bought the Shanghai-Yokohama service of the Pacific Steamship Co. In 1882 the Union Navigation Company was started, but in three years the proved inexpediency of having two State-aided concerns resulted in amalgamation, and the above, known as the Japanese Mail Steamship Company was established in 1885.

Regular services were kept up from Kobe to Vladivostock, Tientsin, and Korean Ports; a Line between Japan and Bombay being put on in 1892, when the development of the spinning industry increased the importation of raw cotton. The importance of the Company rose with the size of its fleet owing to the war with China in 1894, 50 of its steamers being engaged at one time transporting the 120,000 fighting men with their 100,000 attendant coolies. Independent of a complete Japanese coastal system, services are maintained to China, Corea, Asiatic Russia, Hawaii, the Straits Settlements, India, the Mediterranean, Europe, America, and Australia. By continually adding boats like *Wakasa Maru*, 6,216 tons, *Bunco*, *Maru*, 6,241 tons; *Sod. Maru*, 6,219 tons; *Awa Maru* and *Shinno Maru*, the fleet which hails from the kingdom of the Mikado has made such phenomenal progress that it now takes a prominent place amongst the first companies.

Fleet, 68 steamers: 207,200 tons.

London Office: 5, Fenchurch Avenue.

NORDEUTSCHER LLOYD sprang into existence in 1856, initial operations taking the form of Lines to Hull and to London. On 19th June, 1858 the *Bremen*, 334 × 42 × 28, sailed to New York via Southampton with 22 cabin passengers, 93 steerage, and 150 tons of cargo, followed by the *Weser*, the service being made fortnightly in 1866. Extensions to Baltimore 1868, New Orleans 1869, West Indies 1871, Brazil and River Plate 1876, evidenced the growth towards front rank which was assumed in 1881 with fast mail-boats built for an Express Atlantic Service. The Imperial German Mail Service to Eastern Asia and Australia, with various branch lines, began in 1885, were followed in 1891, with an Express line between Italy and New York. In 1892, the first twin-screw steamer, *H. H. Meyer*, joined the fleet, which from that date has been completely reorganised and renovated. Since 1894, the Company, which had expended millions in this country, have confined their orders to German firms. In 1897 the *Kaiser Wilhelm der Grosse* sailed forth from the Vulcan Works at Stettin, and this glorification of the German ship-builder's art promptly won the palm for ocean speed; in March, 1900 she crossed from Cherbourg to Sandy Hook in 5 days 50 hours 58 min., averaging 22 3/4 knots per hour over 3,148 miles distance run. The stately "N.D.L." fleet, which is the pride of the Port of Bremen and of the Fatherland, has doubled during the last ten years, and includes 23 twin-screw boats (10 of them over 10,000 tons each).

Fleet, 108 steamers: 501,050 tons.

London Agents: Keller, Wallis & Co., 2, King William Street, E.C.

OCEAN STEAMSHIP COMPANY.—The first to carry high pressure steam to sea successfully was Mr. Alfred Holt with the *Neator*, in 1861. The successful performances of the *Neator*, which ran for years on long voyages, resulted in the formation of the Ocean Steamship Company in 1865. The *Agamemnon* began the Line on April 19, 1866, sailing from Liverpool for Singapore and China via Mauritius, which port of call, as well as the Cape route, was given up on the opening of the Suez Canal. The Company maintains a weekly service of cargo steamers from Liverpool to the Straits Settlements (China, and Japan; and a fortnightly one from Amsterdam

via Liverpool to Sumatra and Java. In conjunction with the West Australian Steam Navigation Company, Ltd., there is also a fortnightly line for cargo and passengers between Singapore and West Australian ports. The *Ajax*, *Achilles*, *Agamemnon*, and *Deu-alion*, are 7,000 tons each, and the two steamers building are 7,500 tons each.

Fleet, 43 steamers 183,000 tons.

London Agents: J. Swire & Sons, Billiter Buildings, E.C.

ORIENT LINE.—The Orient Line between England and Australia was really a development of the old-established lines of fast clipper ships run by the well-known firms of F. Green & Co. and Anderson, Anderson & Co., who are joint managers of the Orient Line. With the co-operation of the Pacific Steam Navigation Company (four of whose fine steamers run in the Line), monthly sailings were commenced with the *Luiana* in 1877, but when the Orient Steam Navigation Company, Ltd., was formed in 1880 a fortnightly mail service each way was inaugurated, since regularly maintained under contract with the Government for an annual subsidy of £85,000. The steamers, which have to make uniformly quick passages, sail from London on alternate Fridays for Sydney calling at Plymouth, Gibraltar, Marseilles, Naples, Port Said, Suez, Colombo, Albany, Adelaide, and Melbourne, returning homewards in the reverse order on alternate Saturdays. In addition to the magnificent twin-screw steam palaces *Sphinx*, 6,910 tons, and *Omrak*, 8,231 tons (each 10,000 effective horse-power), another similar vessel, the *Ortona*, 7,945 tons, has joined the service. The comfortable accommodation afforded by this Line to third-class passengers, whose requirements are made a special study of, strikingly testifies to the benefits conferred by steam navigation upon long-distance travellers able to pay only the cheapest fares. In addition to the mail service, the Orient Company were among the earliest to bring within easy reach of the public the advantages of yachting to foreign countries in ocean pleasure-steamers, which are run frequently, the cruises varying from two to eight weeks in duration.

Fleet, 10 steamers 61,344 tons.

London Office: 5, Fenchurch Avenue, E.C.

THE OTTOMAN STEAMSHIP CO., of Galata, run boats from Constantinople to the Asiatic coast of the Black Sea and also to the Syrian coast. The company is partly a Government concern and the steamers are always used as transports, but the boats are not of the best class and the services are somewhat irregular. The largest vessel is the *Garbi*, 3,329 tons. Fleet, 54 steamers; about 50,000 tons.

PACIFIC STEAM NAVIGATION COMPANY, incorporated by Royal Charter in 1840, began business with the *Chile* and *Peru* (see p. 717), receiving a small subsidy. A bi-monthly service between Valparaiso and Panama necessitated four more steamers in 1852, the Pacific trade developing, and fresh branches of commerce being opened up. Compound engines were welcomed and adopted in 1856, thereby reducing the costly consumption of coal, the scarcity of which article had been the earliest difficulty. The Company's powers were enlarged in 1865, to run as far as the River Plate. In 1867, the capital was increased for the onerous performance of a monthly mail service from

Liverpool, through the Straits of Magellan to Valparaiso, the *Pacific*, 1,630 tons, sailing from that port May, 1868. The success of the new line resulted in three sailings a month, and an extension to Callao, by 1870. Again, two years later, the capital was added to, the *so ата*, 4,038 tons, starting in 1873 a weekly service from Liverpool to Callao *via* France, Spain, Portugal, Brazil, and River Plate. One of the finest and largest fleets was acquired, 54 steamers being employed in 184, recording 120,000 tons, but trade with South America falling off fortnightly departures were reverted to, and the requisite employment for some of the boats presented itself in 1877, when the *Lebania* led the way to Australia for the Orient Line, in which service the "Pacific Company" have the *Arctica*, *Orizaba*, *Oryza*, and *Oruba*. The fleet owned by the Company contains many long list of noble vessels (cal ed after South American places), with which its reputation is well sustained for safety, speed and comfort.

Fleet, 39 steamers, 134,318 tons.

London Office: 5, Fenchurch Avenue, E.C.

PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY.—Mr. Brodie Macfarlane Wilcox began to sow the seeds in 1825, and from the *William Barrett*, 206 tons: 60 h.-p.: 74×15×8, blossomed the Peninsular Company, subsequently ripening into the above institution, which was incorporated 1830 (see p. 716), and celebrated its Jubilee 1837. Universally known as the "P. & O.," it glories in the motto, "Quis separabit."

Mails were conveyed by Post Office sailing packets from Falmouth to Lisbon before the contract was given to the Peninsular Company. The Indian Mails were at that time taken in Government steamers from Bombay to Su-z. Prior to the completion of the railway, 1837, followed by the Suez Canal, 1870, everybody and everything had to take the caravan route across the desert to Cairo, intimately associated with the name of Lieut. Waghorn, who organised quicker and better facilities, Nile steamers afterwards superseding the sailing boats between Cairo and Alexandria. From Alexandria, Home Government steam packets carried the mails to Gibraltar, where the Peninsular Company received them. They soon suggested and pressed a better service than this upon the Government, and eventually, a line from England *via* Gibraltar and Malta to Alexandria, was begun by the *Merial*, 1,600 tons, and *Great Liverpool*, 1,540 tons, for which purpose, the above company was constituted. The P. & O. Company secured the contract for the mails between Suez and Calcutta in 1842, the first sailing being the *Hindustan*, 1,800 tons; but the East India Company obstinately refused to hand over their inferior Bombay-Suez Line until 1844, by which period the P. & O. had engaged to run to China and Singapore. The first service to Australia was interrupted by the Crimean War, 11 P. & O. boats being employed. The necessity growing for an independent Australian Mail Line, the government called for tenders in 1856, but the P. & O. desired the onerous conditions which were swallowed by the European and Australian Steam Navigation Company, who soon failed. The Royal Mail Company stopped the breach but temporarily, and the Government, having learnt a lesson, accepted the tender of the P. & O. Company in 1859.

The Mails are invariably ahead of the contract times, which are as follows:—

Indian mails—Bombay ... 14½ days.
China " —Shanghai 33
Australian " —Adelaide 30½ "

The *Calcedonia*, 7,558 tons, has landed the mails at Bombay within 12¼ days from London *via* Brindisi, the steamer's own passage between Bombay and Plymouth having been less than 17 days. The *Sis* and *Orris* running in the Brindisi-Port Said Express Service deliver the Egyptian Mails within four days from the Metro-olis of the Empire. The *Persia*, 8,000 tons, and the *Assava*, *Subiron*, and *Piassy*, each 7,240 tons, have been recently added, and the present fleet of large and fast steamers, which cost about £8,000,000, is being strengthened by the *Syria*, *Sudan*, *Smaï* and *Sicilia*, each 6,600 tons for the carriage of passengers and cargo in the Intermediate services: a flotilla of 29 steam tenders and tugs, not included in the total given, count for 3,257 tons more.

Fleet, 58 steamers, 313,392 tons.

London office: 122, Leadenhall Street, E.C.

PRINCE LINE, LIMITED, is the substantial handiwork of Mr. James Knott of Newcastle-on-Tyne since he despatched the *Saxon Prince* in 1883 as the pioneer of his present big fleet of ubiquitous steamers of which the largest are the *Saxon Prince*, 3,471 tons, and *Norman Prince*, 3,464 tons. There are regular passenger and cargo services from London, Liverpool, Manchester and the Continent, United States, Brazil, Mediterranean, Syria, &c., a line being also run between New York and Italian Ports, which carried 12,000 emigrants from Italy during year 1899-1900. 12 steamers are being built, which will increase the carrying capacity of the fleet by 85,000 tons.

Fleet, 36 steamers, 83,454 tons.

London Office: 5, Fen Court, Fenchurch St., E.C.

ROTTERDAM LLOYD line of steamers to Java, *via* Su-z Canal, is under special mail contract with the Netherlands Government. The service was established in 1833 by the present managers, Messrs Wm. Ruys & Sons, one of the old st and most important ship-owning and ship-broking firms in Holland. The steamers are despatched from Rotterdam, *via* Southampton, fortnightly, for Padang, Batavia, Cheribon, Samarang and Sanabaya, calling at Marseilles. The largest steamers are the *Sindoro*, 5,498 tons, and the *Bogor*, 3,621 tons.

Fleet, 18 steamers.

London and Southampton Agents, Escombe Brothers & Co.

ROYAL MAIL STEAM PACKET COMPANY was originated by Mr. James Macqueen, and received its charter in 1833, with a subsidy of £240,000 a year, for the conduct of operations to and from the West Indies, and the promotion of British interests therewith, Beginning upon a big scale by building 14 steamers, the *Thames* started a fortnightly service from Falmouth, 1842, returning to Southampton, the Company's headquarters. In 1839 the subsidy was renewed, subject to the doubling of the service to Colon, and the performance of a monthly line to Brazil and River Plate, which was inaugurated 1851. The Royal Mail helped to finance the Panama railroad, which 47¼ miles has been the highway for vast traffic, since its completion, 1855, and

in 1857 added to its work by temporarily taking the mails *via* Suez to Australia. The abstraction of Messrs. Slidell & Mason from the *Trent* in 1861 created an international incident which aroused intense public excitement. In 1863 one of the main lines was extended to Colon, and next year the other one followed suit to Buenos Ayres, the latter growing into a fortnightly service by 1872. This distinguished Company possess a fleet of fine steamers exceptionally well adapted for tropical trades. The *Danube* and *Nie* being each 5,946 tons, and the *Clyde* and *Thames* each 5,615 tons. The area of commerce covered by the fleet can be measured by its visits to 60 Ports, necessitating 4,000 departures and entrances annually, and 1¼ millions of mileage.

Fleet, 23 steamers, 83,283 tons.

London Office: 18, Moorgate Street, E.C.

SHAW, SAVILL AND ALBION COMPANY, LIMITED.—Messrs. Shaw, Savill and Company's London ships, and the Glasgow ones of Messrs. Patrick Henderson and Co., sailed monthly to New Zealand nearly 50 years ago, occupying 4 to 5 months, passages being subsequently reduced to 85 to 90 days by the Clippers. An amalgamated service of steamers was established in 1883, the vessels now ranging from 3,000 to 8,000 tons. Besides the 12,090 tons of 10 sailing ships, the company owns 12 steamers, including the *Karama*, 5,464 tons; *Kumara*, 6,034 tons, and *Waiwera*, 6,237 tons, two steamers, about 10,000 tons being nearly completed. A first class monthly service for mails, passengers, and merchandise is maintained, sheep and dairy produce figuring very largely homewards. Messrs. Ismay, Imrie and Company have associated with this Line their *Ionic*, *Delphic*, and *Gothic*, a passage of the last named having been under 35½ days. Outwards the passage is *via* the Cape of Good Hope, returning round Cape Horn, presenting a health-giving and varied voyage of 25,000 miles.

Fleet, 22 vessels, steam and sail, 79,152 tons.

London Office: 34, Leadenhall Street, E.C.

THE "SHELL" TRANSPORT AND TRADING COMPANY, LTD., was formed as a limited company in 1838 to take over the business founded by Messrs. M. Samuel & Co. for the transport of Petroleum in bulk through the Suez Canal. Started in 1892 with three steamers of about 4,500 tons dead-weight capacity, the fleet has now increased to 36 steamers, the largest of which carries 10,000 tons of dead weight. At the inception of the business oil was obtained from Russia, but the company have energetically developed their own fields in Borneo, and their principal supplies are now derived from that source. The majority of the steamers are adapted for carrying general cargo as well as oil, and are frequently utilised for this purpose when returning from the East to load in Russia, and owing to special systems of ventilation the steamers have acquired an enviable reputation as reliable carriers for the most delicate cargoes. A new feature is that a large number of the vessels steam entirely upon liquid fuel instead of upon coal, and this mode of generating steam has been found highly successful and economical. The capital of The "Shell" Transport and Trading Company, Ltd., is two millions sterling, and a Reserve and Depreciation Fund of £600,000 has been formed since it was started.

Fleet, 36 steamers, 125,040 tons.

London Office, 15, Leadenhall Street, E.C.

ROBT. M. SLOMAN & CO.—The late Mr. Sloman filled the proud position of the Nestor of the Shipping Trade of the Port of Hamburg, his firm, one of the largest in Germany, dating back to 1793. A fortnightly service is maintained between Hamburg and Mediterranean Ports, the steamers engaged having accommodation for a limited number of passengers. The "Union Line" of cargo boats also carries emigrants, sailing every alternate Wednesday from Hamburg to New York and Newport News. There is a fortnightly line between New York and Brazil, conveying the U.S. mails, passengers, and cargo, as well as a service of cargo boats running between the U. States, and China and Japan. *Vernona*, 4,655 tons; *Fisr*, 4,416 tons, and *Alvenga*, 4,188 tons, are the largest and newest vessels. Fleet, 32 steamers: 77,958 tons.

THE UNION-CASTLE LINE.—Early in 1900 the two well-known steamship companies—the Union Steamship Company, Limited, and the Castle Mail Packets Company, Limited who for many years have performed the Mail Service between England and S. Africa—were formally amalgamated, under the title of the Union-Castle Mail Steamship Company, Limited, the joint concern being conducted by Messrs. Donald Currie & Co., who were the managers of the Castle Line. The Royal Mail steamships of the line are despatched from Southampton every Saturday for the Cape of Good Hope and Natal, calling at Madeira. In addition, steamships leave London every week calling at Southampton for the Cape Colony, Natal, and Delagoa Bay, taking passengers at lower rates than the mail steamers. These intermediate steamers proceed alternately *via* Las Palmas and Teneriffe, calling once a month at St. Helena and Ascension. Every 14 days the Union-Castle Line despatches an additional steamer from Southampton to the Cape Ports, Natal, and Delagoa Bay, calling at Las Palmas, which vessels proceed beyond Delagoa Bay alternately to Beira and Mauritius; they carry intermediate saloon and third-class passengers only at lower rates than by the intermediate steamers. Some of the steamers have made the voyage between England and South Africa in the quick time of 14 days; all the vessels are fully provided with water-tight bulkheads and every appliance for minimizing sea risks; the fleet is amply furnished with every contrivance for the up-to-date convenience of all classes of passengers, and the popularity of the line is due to the special attention paid to the traveling public. During the past year most of the steamers of the line have been engaged in carrying troops to the Cape, the *Dunster Curtis* having had the distinction of conveying Lord Roberts, Lord Kitchener, General Buller, and General Baden-Powell to S. Africa. The largest steamers in the fleet are *Saxon*, 12,385 tons; *Briton*, 10,243; *Kumfauns Castle*, 9,664; *Kildonan Castle*, 9,652; *Scot*, 7,815; *Norman*, 7,537; *Carisbrook Castle*, 7,626.

Fleet, 41 steamers, 222,506 tons.

London Office: 3 Fenchurch St.

UNION STEAMSHIP COMPANY OF NEW ZEALAND.—Prior to the opening of the gold fields in 1862, a solitary paddle-boat fulfilled the requirements of the district of Otago. Trade then increasing five more steamers were purchased for links with other Ports in the Middle Island, the undertaking developing by 1875 into the above concern. It is now the most important in the Southern Hemisphere and keeps busily and

profitably employed a large Fleet of high-class modern steamers fitted with the latest improvements, which testifies to the expansion of both Colony and Company. *Moana*, 3,915 tons; *Mokua*, 3,302 tons; and *Monowai*, 3,433 tons, are on the top of the list.

Fleet, 54 steamers; 77,111 tons.

London Office: 34, Leadenhall Street, E.C.

THE UNITED STEAMSHIP CO. of Copenhagen, celebrated its 23th anniversary in 1891. It is the largest maritime undertaking in Denmark and possesses 12 steel barges, representing 2,441 tons, and six tug boats, 470 tons, in addition to a large fleet of steamers, of all kinds and sizes. The transport of dairy produce is an important feature in the Company's far-reaching operations, which cover services with Russia, Germany, Norway, U. Kingdom, Belgium, France, Spain, and Italy. The Scandinavian Amerika Line is maintained between Copenhagen and New York, via Christiania and Christiansand, for which service a twin-screw 10,000 tons steamer is being built to have a speed of 16 knots, and accommodation for 200 cabin passengers. Fleet, 119 steamers; 128,251 tons.

London Agents, Tegner Price & Co., Fenchurch Street, E.C.

THE WEST AUSTRALIAN STEAM NAVIGATION CO., LTD. was established in 1833 by Messrs. Trinder, Anderson & Co., and Bethell, Gwyn & Co., both of London. A Fortnightly Service is now run, in conjunction with Mr. Alfred Holt, of Liverpool, which forms a connecting link between Eastern Asia and North and West Australia, mails, passengers, and cargo being carried between Singapore and Port Darwin, as well as the other Ports on the North-West Coast of Australia, down to Fremantle. The *Australind*, 1,019 tons; *Saladin*, 1,874 tons; *Karakatta*, 2,091 tons; and *Sultan*, 2,063 tons; are all modern steamers, fitted with the latest requirements; transhipment is effected at Singapore to all the principal ports of the world, Christmas Island being called at en route.

London Office, 22 Billiter Street, E.C.

WEST INDIA AND PACIFIC STEAM SHIP COMPANY, LIMITED.—See Leyland Line, p 725.

WHITE STAR LINE.—The original line of Australian clippers was taken over in 1867 by the late Mr. T. H. Ismay. Messrs. Ismay, Imrie & Co. soon saw the great future in store for steamships, and in 1869 proceeded to found the Oceanic Steam Navigation Company, Ltd., better known as above, a project carried out by them with conspicuous success. They came immediately into prominence with the *Oceanic*, 3,807 tons, 420 × 42 × 31, in which vessel the genius of the late Sir Edward Harland introduced many admirable features. A fleet was speedily built of steamers, whose names are too well-known to need repetition, but not until 1875 did the line take the lead in point of speed with *Britannic*, 5,004 tons, and *Germanic*, 5,070 tons. The former crossed the Atlantic in 7 days 10 hrs. 50 min., reducing by three hours the previous best on record. In 1893 *Germanic* received new boilers and engines; in August, 1896, she made her 229th westward passage in 6 days 21 hrs. 38 min. The *Teutonic*, 9,984 tons, came out in 1889, closely followed by *Majestic*, 9,965 tons. The *Teutonic* won golden opinions at the Naval Review, 1889, and attended the Diamond Jubilee Review armed with 16 guns. In July, 1891, *Majestic* created a record of 5 days 18 hrs. 8 min.

(West), *Teutonic* lowering this the next month to 5 days 16 hrs. 31 min. In August, 1896, *Majestic* excelled her previous performance by 12 min. But the steamers of this line are notorious for improving with age, all having been built by Harland & Wolff. *Britannic*, in 1866, actually completed a record of 1½ millions of miles, traversed with her original boilers and engines, the passage terminating this feat being one of 7 days 7 hrs. 30 min. to New York. On January 14, 1899, a new chapter in the history of ship-building was opened, when there glided from the famous yard of Harland & Wolff a giantess which put the *Great Liners* era in the shade, the tonnage of *Oceanic II.*, reaching 17,074 tons and her displacement 30,000 tons. Considerably exceeding in size any vessel then built or building, she sailed upon her maiden voyage Sep. 6, 1893. The *Medic*, 11,984 tons, with 85 passengers and a large cargo was despatched August 3, 1899, to inaugurate a Liverpool, South African, and Australian service with twin-screw steamers carrying one class of passengers only. The *Atric* and *Persic* shortly followed, and the new service will be completed with the *Aunic*, recently launched and *Suivic*, which will be put into the water before the end of the year. The White Star Steam Expresses, models of comfort and luxury, have carried the United States mails since 1877. Besides a cargo service to New York there is a Pacific line worked by the Occidental and Oriental Steamship Co. of San Francisco between San Francisco, Yokohama, and Hong-Kong, also a New Zealand service under the flag of Shaw, Savill & Albion Co., Ltd. The White Star Fleet contains 17 twin-screw vessels including some of the finest and largest cargo and live-stock carriers in existence, and also two large tenders.

Fleet, 24 steamers; 192,285 tons.

London Office: 34, Leadenhall Street, E.C.

WILSON LINE.—The firm of Beckinton, Wilson, and Co. founded at Hull, about 1835, by Mr. Thos. Wilson, merged its proprietorship in the Wilson family a few years later, when the present style of the firm was adopted, and the business (which became a private Company in 1891) has been conducted by Messrs. Charles and Arthur Wilson. Ever since 1845, the firm has held the foremost position in the Baltic trade. In 1850, the pre-ent mail service between England and Sweden was started with the *Courier*, 400 tons, and soon developed into a large mail and passenger service to the principal Swedish and Norwegian ports. The St. Petersburg, Riga, and Stettin trades were next included, the *Dido*, 1,409 tons, in 1869, being the first departure to the Adriatic, the same year operations being extended to the Black Sea. In 1875 the New York and Boston Trades were entered, and have been developed into employing the most tonnage, the *Toronto*, 6,035 tons, and *Consuelo*, 6,025 tons, both twin-screw steamers, being the largest. In 1878 the steamers of Messrs. Brownlow, Marsden & Co. were purchased, and the Hamburg, Antwerp and Dunkirk trades taken up. Connection with India, which had been maintained from 1870 to 1875, was resumed in 1893, with a Line between Hull and Bombay, and in 1895, a service between London and Boston, U.S., was established in association with the Furness and Leyland Lines. Messrs. Thos. Wilson, Sons & Co., Ltd., are the largest private shipowning concern in the world.

Fleet, 87 steamers, 189,193 tons.

London Agents: W. E. Bott & Co., 1, E. India Avenue, E.C.

RAILWAYS AND THEIR HISTORY.

TOTAL LENGTH, CAPITAL, PASSENGERS CONVEYED, RECEIPTS, AND WORKING EXPENSES
RAILWAYS IN THE UNITED KINGDOM FOR THE PAST 50 YEARS, 1850-1899.

* Return for 1868 incomplete.

In the first half of the seventeenth century (1633 has been cited as the best approach to definite date) we meet with the earliest mention of the introduction of rails for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal mines at Newcastle: and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was

adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1801 that "edge rails" were introduced, the credit of their adoption being assigned to Lord Penrhyn's slate quarries in Carmarthenshire. James Watt had conceived the idea of utilizing steam for locomotion, and there is a record of a steam locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

opened in 1825, was really the first to follow the example of the Stockton and Darlington, and several other small lines—including the Canterbury and Whitstable, a remarkable undertaking, worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1825, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place; but even then the aid of the Press, powerfully and influentially invoked, failed to arouse anything in the shape of enthusiasm. Royal patronage was not bestowed upon the opening ceremony, although eagerly solicited. To the great minds of the time, however, the event assumed more than ordinary importance, and it is reported that the impression made upon Lord Brougham's contemplative mind forced a tear from his eye. Leicester to Swannington came next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Brighton, Birmingham and Manchester, and Edinburgh and Glasgow, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the

existing great trunk lines of railway in this country.

The expenditure incurred in securing legislative authority to construct railways was enormous. The Parliamentary costs of the Brighton Railway averaged £4,806 per mile; of the Manchester and Birmingham, £5,190 per mile; and of the Blackwall, £14,414 per mile! The solicitors' bill for the South-Eastern Railway contained 10,000 folios, and amounted to £249,000.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projects, even in the earliest stages of legislation, 293 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying ten per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania." At least four times as many schemes came before the credulous and overweening public as ever came to receive legislative deliberation, and between the close of the 1845 session and the opening of that for 1846, no less than 1,300 projects were brought out, and it was calculated that even the small parliamentary deposits required to be lodged with each Bill would aggregate to nearly sixty millions. Gradually, however, it dawned upon the minds of reflecting people, that of the £600,000,000 required, a vast proportion were mere paper projects or competitive schemes, alike unnecessary and uncalled for, and the inevitable collapse soon followed.

General legislation relative to railways was

introduced about 1840. The lines that had been constructed previous to this were established under Special Acts. More than anything else in the nature of public or private enterprise, it was beginning to be felt that the railways were instrumental in promoting the interests not only of the rich, but perhaps even in a greater degree the interests of the community at large. The enormous development of the trade of the country was ascribed to the instrumentality of railways. It is not wonderful, therefore, that a new branch of law for their regulation was introduced. The variety and repeated alterations in the railway laws showed the difficulty of dealing with the various and often conflicting interests concerned. The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale

of railways, on the gauge, on cheap trains, passenger duty, &c. In their civil and commercial importance, and the enormous interests they represented, railways soon came to occupy the attention of leading minds of the day, and an active part in their administration was shared by members of the Government and of both Houses of Legislature, and the railway interest has continued powerfully represented.

RAILWAYS IN 1899.

The number of persons employed in working the railways of the United Kingdom in 1899 was 534,141. The number dependent upon this large body must also be very great; and if we take into account the vast numbers besides who are employed in branches of trade which administer to the requirements of railways, the social dependence upon their existence must be something enormous.

At the close of the year 1899 there were in use upon the railways 20,461 locomotive engines, 45,948 carriages for the conveyance of passengers, 18,189 other vehicles attached to passenger trains, 671,852 waggons for the conveyance of live stock, minerals, and general merchandise, and 16,941 miscellaneous vehicles.

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1899, to £1,275,370,942. Of this sum, £1,152,317,501 (which includes £184,765,871 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1898 of £17,849,039, or 1·55 per cent. The £1,152,317,501 is composed of £110,870,461 guaranteed, £22,169,237 debenture, £297,934,053 preferential, and £440,463,543 ordinary stocks and shares, besides a sum of £1,057,073 raised by loans. The net receipts for the year amount to £41,576,370, equal to 3·61 per cent. on the total capital sum, as compared with £40,291,958 in 1898, with a corresponding capital of £1,134,493,462, which gave a net receipt of 3·55 per cent. The percentage of 3·61 is below the average of former years, and an explanation of the causes of this decrease may be interesting to railway proprietors. Firstly, although the gross receipts have for the first time reached nine figures, viz., nearly 102 millions of money, the prices during the year have risen in almost everything: in the case of railway companies, however, the directors have not been able to raise the price of the article they have to sell, viz., transport for goods and passengers, but on the other hand, have had to pay these increased prices for the materials they require to work the railways. Secondly, when we turn to the working expenses, the accounts present a very different aspect to the cheering results shown on the revenue side, the two largest expense items being the increased wages and curtailment of the hours of labour of railway servants, and the rapid growth of local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit and to the benefits which the companies derive from the expenditure of the rates. That this burden of taxation shows a constant tendency to grow heavier year by year is illustrated by the fact that in 1888 the amount paid for rates and taxes was equal to 16 per cent. of the amount distributed as ordinary dividend, but in 1899 this percentage had increased to 20 per cent., or say 4· in the £. Lastly, the companies have had to contend with a marked rise in the price of coal, which has helped to a large extent to decrease the net percentage on the total capital sunk. In spite, however, of all these financial drawbacks, the growing confidence of the public in railway stocks is evinced by the appreciation in the market value of all descriptions of these securities, and money is readily obtainable for railway companies at 3 per cent., whereas formerly it could only be obtained on the basis of 5 per cent.

Gross Earnings of the Railways.—The earnings for the year 1899 amounted to £101,667,065, as compared with £96,252,501 for the year 1898, which gives an increase of £5,414,564, equal to 5·33 per cent. The increase in the passenger receipts is £1,599,288, made up as follows:—

	1899. £	1898. £	Inc. or Dec. £
1st Class.....	3,370,432	3,200,867	+169,565
2nd „.....	2,899,079	2,585,627	+223,452
3rd „.....	27,271,457	26,210,247	+1,061,210
Seas. & Peri- odical Tk. } Holders ... }	3,331,804	3,183,713	+151,061
	36,782,772	35,183,484	+1,599,288

The numbers carried were:

	1899. No.	1898. No.	Inc. or Dec. No.
1st Class.....	34,208,632	33,037,190	+1,171,442
2nd „.....	68,437,071	66,199,930	+2,237,141
3rd „.....	1,033,999,238	963,673,996	+40,322,242
Seas. & Peri- odical Tk. } Holders ... }	1,537,765	1,283,045	+254,720
	1,108,229,756	1,054,194,161	+44,035,595

It will be seen that there is an all-round increase in numbers and receipts in all classes, including season ticket holders, and it is satisfactory to have to record, that whereas second-class traffic has hitherto been decreasing, it shows this year an increase of 2,287,141 in numbers and £223,452 in receipts. This increase is owing to the new plan which is being generally adopted by railway companies who run second class carriages, of calculating the fares upon a scale of 2d., 1½d., and 1d. per mile, according to the class of carriage, thus minimising the difference between the second and third class fare, and increasing the number of travellers in second class. The increase in numbers travelling by third class is 4·16 per cent. over 1898. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1899 to £6,951,627, as compared with £6,663,590 in 1898, being an increase of £288,037 or 4·14. The total figures of traffic falling under the heading of "goods" are £52,116,994, as compared with £49,218,964 in 1898, an increase of £2,898,030, or 5·50. The aggregate is made up of £28,612,220 from merchandise; £21,834,477 from minerals; and £1,421,237 from live stock. The total quantity of goods carried in 1899 was 413,623,025 tons, as compared with 378,563,085 tons in 1898, showing an increase of 35,059,940 tons, or 8·47 per cent.

Expenditure.—The total working expenses of the whole of the railways for the year 1899

RAILWAYS OPENED IN 1899.

Railway.	From	To	Date.	Miles.
Great Central	Annesley	Quinton Road	Mar. 15	9½
Great Western	Llanely	Burry-port	Mar. 15	4½
" "	Lettenston	Goodwick	July 1	6½
" Highland "	Golanfield Jct.	Fort George	July 1	2
London & North Western	Ashbourne	Parsley Hay	Aug. 4	13
London & South Western	Wadebridge	Padstow	Mar. 27	5½

amounted to £60,090,687, equal to 59 per cent. of the gross earnings as compared with a total of £55,950,543 for the year 1898, equal to 58 per cent. The increase compared with 1898 amounts to £4,130,144 or 6·87 per cent. The total number of miles travelled by passenger and goods trains during the year 1899 was 396,241,265 or 15,985,925 more than in 1898. Analysing the expenditure we find the item £16,491,377 for locomotive power; £4,939,993 for repairs and renewals of carriages, &c.; £9,401,084 for maintenance of permanent way, stations, &c.; and £18,371,068 for traffic expenses. The locomotive expenses in 1899 amounted to 9·99*i*. per train mile.

Compensation.—The amount paid for compensation for personal injuries sustained during the year 1899 amounted to £166,041, as compared with £161,842 for the year 1898, resulting in an increase of £4,199, which is not a very serious item, seeing that the companies carried over 44 millions more passengers than in 1898. In the movement of goods the companies have paid for damages and losses £415,380, as compared with £367,403 in 1898, an increase of £47,978.

We subjoin a statement showing the amounts paid by the principal companies under both heads:—

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares. From 1st November, 1891, the Great Northern Railway Company also abolished second-class fares to all stations north of Hatfield; from 1st January, 1893, the Great Eastern abolished it in the provinces; the Cumbrian followed on 1st May of the same year, but re-introduced them in 1899. It also disappeared from all journeys between London and Scotland, and on the 1st of July, 1897, the Furness Company discontinued second class accommodation.

£2,898,030, and from rents, tolls, navigation and steamboats, &c., £629,209, and a total increase from all sources of £5,414,564. The net receipts for 1899 on the capital outlay give a sum of 3·61 per cent., compared with 3·55 per cent. for the year 1898, and 3·73 per cent. for the year 1897. As may be seen, however, on page 732, 18 millions additional capital has been raised during the year 1899, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive. Increased working expenses, caused by diminished hours of labour and a proportionate increase in the number of men employed, and increased wages have also operated on the net profit. The increase in the amount of wages has for some years been gradually getting larger. A few years ago the amount paid as wages was less than 20 per cent., but now the wages bill represents 24 per cent. of the total. Rates and taxes are also yearly increasing in a disproportionate ratio to the net profit, but even with these increasing expenses a percentage of 3·61 on the net receipts

Net Result of Working the Railways.—The gross receipts compared with those of the preceding year, show an increase from passengers (which includes season ticket, carriage, horse, dog and post office mail traffic) of £1,887,325; from goods,

for the year must be viewed as a very favourable result.

RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the immunity from accidents, as evidenced for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1898 the cost per passenger train-mile for personal injury was 0.15*d.*, and in 1899 0.18*d.* In loss and damage of goods, the cost in 1893 was 0.52*d.*, and in 1899 0.56*d.* per goods train-mile. The comparatively small amount paid by the companies for compensation is owing to the improved modes of working and the mechanical appliances which have been adopted to secure the safety of the travelling public, and it is in facilitating this security that some of the chief causes of increase of cost in railway working—such as the more general adoption of the block system, and the system of interlocking points and signals, and of improved continuous brakes, on which the Board of Trade have insisted—may be accounted for. It is also very noticeable that on those lines where these improvements have not been carried out, the want of them has largely contributed to the accidents which have occurred. The general report to the Board of Trade for 1899 shows that although accidents

and collisions of a serious nature have occurred during the year to passenger trains, yet the numbers (particularly in the case of the number killed) are very low when compared with the millions of passengers carried by the companies during the year.

The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,340 killed and 19,155 injured (as compared with 1,259 killed and 19,030 injured in 1898).

The increase since the year 1897 in the number injured is owing to an order recently made by the Board of Trade, regarding the mode in which the returns are to be compiled by the Railway Companies. Hitherto some Companies have only reported accidents of gravity, but they are now directed to report all accidents which prevent the servant injured from being employed for five hours on his ordinary work on one of the three working days next after the accident. We will now proceed to investigate under three distinct heads the various causes from which these accidents arose.

Accidents to Passengers.—Fourteen passengers were killed and 693 injured from accidents to trains, rolling stock, permanent way, &c. (as compared with 25 killed and 632 injured in 1898), while 141 passengers were killed, and 1,457 injured from other causes—such as falling between carriages and platforms, or on to the platforms, on getting into

RAILWAY SPEED.

or alighting from trains, passing over the line at stations, falling out of carriages during the travelling of trains, and is inclusive of 277 injuries resulting from the closing of carriage doors. In addition to the above may be recorded 10 killed and 617 injured by accidents in which the movement of railway vehicles was not concerned, viz.: ascending or descending steps at stations, falling off platforms, &c., and is inclusive of 108 injured by being struck by barrows or stumbling over packages.

Accidents to Servants in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles used exclusively upon railways is concerned, show that 531 were killed and 4,633 injured during the year; of this number 19 deaths and 196 injuries were caused by collisions, 16 were killed and 567 injured in coupling or uncoupling vehicles, 2 were killed and 22 were injured by passing over or standing upon buffers during shunting, 13 were killed and 243 injured in getting on or off, or falling off, engines, waggons, &c.; 13 were killed and 397 injured whilst spragging or chocking wheels, 15 were killed and 505 injured by moving vehicles by capstans, turntables, props, &c., and 51 were killed and 493 injured during shunting operations; 88 were killed and 167 injured whilst working on the permanent way, sidings, &c., and 150 killed and 309 injured whilst walking, crossing, or standing on the line. In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 11 killed and 2,524 injured whilst loading, unloading, or sheathing waggons, and 594 injured by the falling of waggons, lamps, bales of goods, &c., 10 killed and 612 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

Accidents to Persons other than Passengers or Servants.—Under this head is classed casualties whilst passing over railways at level crossings; this caused 60 deaths and 22 injuries in 1899 (as compared with 64 deaths and 27 injuries in 1898). There were 313 deaths and 139 injuries resulting from persons trespassing on the railways, 131 persons committed suicide upon the lines in 1899 (compared with 126 in 1898).

The above figures may appear formidable, but in analysing them it becomes necessary to review the business done by the railways of the United Kingdom during the year 1899. The companies carried over 1,100 millions of passengers holding ordinary tickets, and besides this number there were over one and a half million persons travelling with season or periodical tickets (the number of journeys made with these tickets can only be guessed at); still the companies must have carried considerably over one thousand five hundred millions of passengers (a number not very far short of the entire population of the globe), and also moved 414,000,000 tons of goods and minerals, and run 396,000,000 of train miles.

BLOCK SYSTEM.

There has been no relaxation during the past few years in the progress made for rendering railway working more safe, by the extension of the interlocking and absolute block systems over a larger railway mileage, and continual progress is reported in this matter, so essential to the safe working of the railways. The proportion in which the signal and point levers had been interlocked on railways was 99·7 per cent. in England and Wales, in Scotland 99, and 97·7 per cent. in Ireland, so that 99 per cent. is now given for the United Kingdom. At the end of the year the absolute block system had been adopted on 11,235 miles out of 11,252 miles of double lines open for traffic. When the orders made upon the railway companies under the Regulation of Railways Act, 1889, come into full force the absolute block and interlocking systems will have to be generally adopted.

CONTINUOUS BRAKES.

In several cases the good effects of continuous brakes have been specially mentioned, whilst in other cases the accidents and collisions might, according to the statements in the reports of inquiries, have been either prevented or their effects mitigated had the trains been fitted with quickly-acting continuous brakes, automatic in their action, instead of those with which the trains were fitted. It appears that 99·4 per cent. of the vehicles used in passenger trains had been fitted with continuous brakes, leaving 6 per cent. to be so fitted.

THE CHEAP TRAINS ACT.

The "Cheap Trains Act, 1883," is a measure which affects not only railway shareholders and

the public generally, but especially the working classes whose domiciles have been interfered with by the extension of the railway systems into crowded centres of London and other large urban areas. The Act has been received by the railway companies with indifference, its provisions being regarded as partial so far as free and untaxed locomotion is concerned, and nothing less than total repeal of all taxation is the universal desire of the railway proprietors and authorities.

The Act, which took effect 1st October, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of two per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

If at any time the Board of Trade have reason to believe that upon any railway a due and sufficient proportion of accommodation is not provided at fares not exceeding a penny a mile, or that such proper and sufficient trains are not provided for workmen going to and returning from their work, at such fares and at such times between six in the evening and eight in the morning as appear to the Board of Trade to be reasonable, steps may be taken to compel the company to provide such accommodation.

Provision is also made in the Act continuing the companies' powers as to special mileage and exceptional charges, and also enlarging their powers in dealing with the charges over distances which include fractions of a mile over a quarter of a mile. The Queen's forces, including officers or men in the navy or naval volunteers, or in the regular, reserve, or auxiliary forces of the army, or in any police force when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

RAILWAY SERVANTS' RISKS.

Some idea of the relative amount of risk run by the different classes of railway servants is afforded by the table on p. 741, which shows the number of men employed in various occupations, and the number of fatal accidents and injuries to each class, in the year 1899.

The figures referring to goods guards and shunters are a very startling record of the dangers to which these men are exposed, necessarily in a few cases; but in a great many instances they arise from indifference, or daring, which ordinary reason should be able to restrain. The railway (Prevention of Accidents) Act, 1900, will, however, it is hoped, minimize these dangers.

FURTHER LEGISLATION FOR RAILWAYS.

The report by the Board of Trade in accordance with section 24 of the Railway and Canal Traffic Act, 1888, on the classification of merchandise traffic and schedule of maximum rates applicable thereto, determined in respect of the various companies, shows that the proposed rates and the actual charges approach nearer than anticipated. The adoption of the New

Schedules would result in a serious but not overwhelming loss, and there is no probability that the loss would be recouped by an increase of traffic, as the decrease in revenue would affect hundreds of thousands of rates, and the reduction for any particular class of goods would be too small to encourage new traffic. As to terminals for station accommodation, and charges for servants' labour, the Board of Trade have adopted a uniform maximum based on as fair an average as it is possible to attain, and have limited the charge to services for loading, unloading, covering, and uncovering. It is also proposed that in all cases there shall be a truck rate for the conveyance of animals. The Companies believe that, if they rightly understand the principle laid down in the report as to the revision of rates, no serious difference will be found to exist, but that it is the failure of these schedules to give due and fair effect to those principles that stands in the way of an agreement between the Board of Trade and the Companies. The new rates operated on and from January 1, 1893.

The Workmen's Compensation Act, 1897. This Act, which received the Royal assent on August 6, 1897, and came into operation on July 1, 1898, is intitled "An act to amend the law with respect to compensation to workmen for accidental injuries suffered in the course of their employment."

The Employers' Liability Act of 1880 only gives compensation in cases where the personal injury is caused by the negligence of the employer or his representatives, or by a defect in the works or machinery used in his business. The Act of 1897 entirely disregards the cause of the accident, with the exception of the wilful misconduct of the injured workman himself, and awards compensation to employes in all cases of personal injury by accident arising out of and in the course of their employment. It further provides that compensation for injuries received whilst performing duties involving considerable personal danger shall become a charge upon the profits of the undertaking, thus throwing a serious burden upon Railway Companies and other employers specifically enumerated in the 7th section of the Act. The new Act will in time cause the entire extinction of the Companies' Accident Insurance Societies, by whatever title they may be known. The amount paid for compensation under this Act to railway employes during the year 1899 was £118,849.

The Railway (Prevention of Accidents) Act, 1900. By this Act, where the Board of Trade consider that avoidable danger to persons employed on any railway arise from anything done or omitted to be done by the Companies, or from want of proper appliances or plant, they may, after giving a reasonable opportunity of removing the danger, make rules for that purpose, by compelling them to use plant or appliance to the satisfaction of the Board, or the disuse of any plant or appliance which involves danger. The Act also empowers the Board to make rules in order to minimize danger generally. The penalties for non-compliance with these rules is a fine of £50, or in the case of a continuance of the offence (after conviction) a fine of £10 for every day during that continuance. The Board of Trade may appoint such persons as appear to them to be required for carrying this Act into effect, and may hold such inquiries and make such experiments as they think expedient for that purpose.

Waterfd., Link. & Western	J. Tighe.

THE RAILWAY CLEARING HOUSE.

THIS Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to

rates and fares, &c., are arrived at. *Chairman*, Lord Claud Hamilton; *Secy.*, H. Smart; *Offices*, Seymour Street, N.W.

Indian Railways.

THE construction of Railways in India, which commenced in 1853, has been conducted on three different systems: first, the employment of companies under a system of guarantee; secondly, by the State through its own officials; and thirdly, by assisted companies either with or without guarantee or subsidy from the State, and working with capital wholly raised by themselves or partly with capital provided by the State. Out of eight lines constructed on the first system, five* have been purchased by the State. Two of these are worked by companies. The more important, the East Indian line, is carried on by the same company that constructed it in the first instance, on special terms as to the sharing of profits. The second, the South India line, is in

the hands of a new company, whose capital was subscribed by the shareholders of the old one. The three remaining lines are worked by the State, and all five come into the category of State lines in the accounts of the Government of India.

In the following table, the annuities and stock created for the purchase of the lines, the yield on which does not depend on the profits of working, are excluded. The debenture stocks of the companies are also excluded. Some of the principal State lines worked by the State are given for purposes of comparison.

The figures of the Rajputana-Malwa line, which is worked by the Bombay-Baroda, are given separately, but in other cases the statistics of some minor undertakings are included in the totals of the railway by which they are worked.

The railways of India involve a yearly loss to the Indian revenues, amounting in 1899-1900 to Rs. 12,700, and from the commencement to Rs. 57,811,487.

*East Indian; *Eastern Bengal (part of the system now so called); *Oudh and Rohilkhand; *Scinde, Punjab and Delhi (now part of North-western system); *South Indian Bombay, Baroda and Central India; *Great Indian Peninsula; Madras.

Indian Railways.—STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, ETC.

In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

PRINCIPAL RAILWAY SYSTEMS IN INDIA.		YEAR ENDED 31 DECEMBER, 1899.													
Guaranteed Railways— Bombay, Baroda & C. I., Great Indian Peninsula, Madras	Date of first opening of line.	LONDON OFFICE of Company.	Miles open to end of Year.	Total Capital Outlay to end of Year. 1 Standard Gauge.
 2 Including the Kamini-Dhanila & Co. gauge branch, also local sections.
 3 Although for convenience classed as Standard State Railways, these lines are the property of the Bengal Central Railway Company, to whom the working was made over on Jan. 1, 1897.
 4 Working transferred to a Company from Sept. 1, 1896.
 5 In addition to the guaranteed interest a bonus of 4.83% of 1st half and 4.10% of 2nd half year of 1899, was declared payable in following half years.
 6 20.11% of 1899 was declared.
 7 Including Branch Lines worked.
 8 Depreciated due to certain credits.
 9 Eastern Bengal Standard Gauge and Northern and Behar sections Metro Gauge.

County and Municipal Directory of England and Wales.

Containing a List of Counties, with the Acreage, Population, and Rental, the names of Lords Lieutenant, High Sheriffs in office in January, Chairmen of Quarter Sessions and of County Councils, Clerks of the Peace and of County Councils, Chief Constables (with the number of Officers), Coroners, &c. Also of Cities and Municipal Boroughs, with their Poor Law valuation, the names of the High Stewards, Mayors, Recorders, Stipendiary Magistrates, Town Clerks, &c. In the statistical figures as to area, population, &c. the County Boroughs are excluded from the Counties. The figures in larger type denote the distance from London.

For the ■ of Parish Councils, Overseers, Churchwardens, Vestry Clerks, Magistrates' Clerks, Clerks of the Peace, and Town Clerks, Superintendent and District Registrars, Coroners, and County, Municipal, District, and Parochial Officers and Citizens generally, showing the days when certain Official Duties are to be performed; also the days when Inland Revenue Licences expire.

NOTA BENE.—1. A rule of law is that Sunday is no day. Any act, therefore, which falls to be done on ■ Sunday should be performed the day previous unless statutory provision exists to the contrary. Every meeting or adjourned meeting of any vestry or corporation (other than Municipal, but including Parish, Rural, and Urban District Councils), or of any public company, for the nomination, election, or admission of any officer, or for the transaction of any affair of such vestry, corporation, or company, which according to any Act of Parliament, charter, prescription, or usage whatsoever, is or shall be required to be held on any day which shall happen to be a Lord's Day, shall, by 3 & 4 Will. IV. c. 31, be held on the Saturday preceding or on the Monday ensuing; and every matter transacted at any meeting or adjourned meeting held upon any Lord's Day shall be absolutely void. When no such nomination, election, or admission shall have taken place on the Saturday, every person whose term of office would have expired on any such Lord's Day shall continue in office, and exercise and enjoy all powers and privileges, until the Monday next ensuing.

2. By the Municipal Corporations Act, 1882, when ■ limited time from or after any date or event is appointed for the doing of any act, the time is exclusive of the day of that date or of the happening of that event, and as commencing at the beginning of the next following day; and the act is to be done on the last day of the limited time, unless that should be a Sunday, Christmas Day, Good Friday, Monday or Tuesday in Easter Week, or a day appointed for ■ public fast or thanksgiving, in which case the act will be done in due time if performed the day following. The same applies to any act directed to be done on a certain day, and that day falls on one of the days above mentioned. Further, if any act or proceeding is directed to be done within any time not exceeding seven days, the days above specified are not to be reckoned.

3. "Three clear days" means that three days must intervene between the day on which a notice is given and the day on which a meeting is held, and notices sent by post must be delivered three clear days before ■ meeting.

4. In regard to Bills of Exchange that fall due on ■ Sunday, Good Friday, Christmas Day, or a day appointed for ■ fast or thanksgiving, presentation for payment should be made on the preceding business day. Bills of Exchange falling due on a Bank Holiday are not payable until the following day, and when the last day of grace is a Sunday, and the second day of grace is appointed as a Bank Holiday, such bills are due and payable on the succeeding business day (see 45 & 46 Vict. c. 61).

5. **PARLIAMENTARY ELECTIONS.**—The times that must elapse between the receipt of the writ by the Returning Officer and the dates fixed for the various steps in the election are as follows:—Assuming that the writ is received on the 1st of any month, the notice of election must be issued on the 2nd in Boroughs, and 3rd in Counties. The nomination must take place on the 4th or 5th in Boroughs, and on any day between the 5th and 10th (both inclusive) in Counties.

The poll (if any) must be fixed for some date between the 6th and 9th (both inclusive) in all Boroughs, except those mentioned in Rule 57, Schedule I, to the Ballot Act, 1872, in which the date may be between the 7th and 12th (both inclusive).

6. **LOCAL GOVERNMENT AUDIT STAMP DUTY.**—The following is the scale of Stamp Duty payable by County and Urban and Rural District Councils and Parish Councils, and by the Chairmen of Parish Meetings on the Audit of their accounts by District Auditors:—

Where the total of the expenditure comprised in the Financial Statement is—		£	s.	d.
Under £20	the sum shall be	0	5	0
£20 and under £50	do.	0	10	0
£50	do.	1	0	0
£100	do.	2	0	0
£500	do.	3	0	0
£1,000	do.	4	0	0
£2,500	do.	5	0	0
£5,000	do.	10	0	0
£10,000	do.	15	0	0
£20,000	do.	20	0	0
£50,000	do.	30	0	0
£100,000 and upwards	do.	50	0	0

January.

1. **TU.**—The Land Tax, Income Tax, and the Duties on inhabited houses are due on this date. Under the Finance Act, 1898, any person (which term includes any corporate body) who is entitled to exemption from or abatement of income tax may obtain from the Surveyor of Taxes a certificate of exemption from or abatement of land tax. This provision is of great importance to Trustees, School Boards, Parish Councils, and others, who own small quantities of land. Licences for carriages, male servants, and to use armorial bearings fall due and must be taken out before the end of the month and thereafter within twenty-one days after ■ person becomes liable to duty. Doglicences must be taken out without delay: no grace can be claimed, but on renewal, if with other licences, they may be taken out any time during January.

The Registers of Parliamentary, Local Government and Parochial Electors come into force for the year.

The Burial Act, 1900, the Companies Act, 1900, and the Agricultural Holdings Act, 1900, come into operation.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made for the regulation and guidance of borough constables since the last quarterly return.

Between this date and the 31st March, the Medical Officer of the parish to visit every pauper lunatic not in ■ asylum; and before the 7th of this month make ■ report to the Clerk to the Guardians, or to the Overseers, of his visits during the preceding quarter, which report, within three days after its receipt, is to be transmitted to the Commissioners in Lunacy, and a copy sent to the Clerk to the Visitors of the asylum for the county or borough in which the union or parish is situate.

Clerk to Guardians and Overseers of parishes on this date, or as soon after as may be, to make out an annual list of all lunatics chargeable to the parish, and send copies before the 1st February to the Local Government Board, the Commissioners in Lunacy, Clerk to Visitors of Asylums, and to the Clerk of the Peace of the county, or Clerk to the Justices of the borough, to be by him laid before the Justices.

Return of Paupers relieved on 1st instant and of children boarded-out, to be made to Local Government Board.

On this date, or within ten days after (if no other day be prescribed), municipal corporations to appoint members of the council as trustees of corporate property.

Registrars, except of London districts, to post to the Registrar-General a correct return of births and deaths registered during the preceding quarter.

Coroners to send return of inquests for preceding year to Secretary of State during this month.

Within fifteen days after this date Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnized.

Within fifteen days after this date bankers not registered under the Joint Stock Companies Act to deliver returns at the Stamp Office in London.

Medical Officers of Health are required to send their annual reports for the past year to the District Council for the district, to the County Council and to the Local Government Board as soon as possible.

Quarter Sessions to be held during this week. Under the Quarter Sessions Act, 1894, the Justices in General Quarter Sessions or at any adjourned or special meeting thereof, may at any time, when it may appear desirable for the purpose of not interfering with the Assizes then next ensuing, fix or alter the time for holding the then next General Quarter Sessions so that they shall be held not earlier than fourteen days before and not later than fourteen days after the week in which they would otherwise be held.

Within one week after the termination of Quarter Sessions the gaoler to send to the Secretary of State a calendar of the prisoners tried thereat.

Holiday on the Stock Exchange, and Bank Holiday in Scotland.

7 M.—Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of the names, ages, and residences of all male persons of full age, and also, when and as required by the Overseers, of all women who have died between the 8th September (or the date when the preceding return was made) and the 31st December.

Latest date for Medical Officers to send quarterly list of pauper lunatics visited by them to the Clerk to Guardians.

Solicitors, conveyancers, special pleaders, and draughtsmen in Equity in *Ireland* must renew their certificates about this date and Feb. 6.

9 W.—Latest date to pay Fire Insurances due at Christmas.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and to Clerk to Visitors.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

11 F.—Hilary Law Sittings commence.

14 M.—Latest date upon which notices of appeal against supplemental valuation lists in the Metropolis can be given.

Registrars to apply on or before this date to the officiating minister of every place of worship in which marriages may be solemnized within their sub-districts for certified copies of all entries of marriages solemnized, or for certificates of "No Registry," during the quarter ended 31st December last. Registrar to deliver these, on or before the 20th of this month, to the Superintendent Registrar.

Bankers' returns to be delivered at the Stamp Office not later than this date.

Latest date for Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnized.

20 S.—On or before this date Registrars to personally deliver to Superintendent Registrars certified copies of all entries of Births, Deaths, and Marriages made during the quarter ended 31st December last. Last day for Local Authority to send to Local Government Board reports under Canal Boats Acts.

On = before this date returns to be sent to Mines Inspectors, giving particulars up to preceding 31st December, = required by s. 33 of Coal Mines Regulation Act, 1887.

Latest date for Savings Banks to send annual statement of affairs to Commissioners for Reduction of National Debt.

24 T.—Between this date and the 1st February, Companies, Corporations, and County Councils compounding for stamp duties with the Commissioners of Inland Revenue to deliver half-yearly accounts to the Commissioners.

31 T.—Latest date for Clerk to Visitors of Asylums to transmit report to Commissioners in Lunacy.

Last day for Local Authorities to send to Local Government Board Analysts' reports for preceding year.

Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of the registers of Births, Deaths, and Marriages for the quarter ended 31st December last.

Railway Companies, on or before this date, if required, to send an abstract of their annual account to the Clerk of the County Council and the Overseers of the Poor of the counties through which the railway passes.

February.

1 F.—Within 21 days after this date the Clerk of the Peace of every county, and the Town Clerk of every borough, to transmit to the Secretary of State = printed copy of the Register of Electors.

On or before this date borough Coroners to send to the Secretary of State returns in writing of inquests held by them or their deputies in the preceding year.

Latest date for Clerk to Guardians to transmit copies of annual list of pauper lunatics to Commissioners in Lunacy, Local Government Board, Clerk to Visitors of Asylums, Clerk to the Council of any County, and to the Town Clerk of any borough.

Reports of Medical Officers of Health for the past year should be sent to Local Government Board during this month.

Companies, Corporations, and County Councils compounding for stamp duties to deliver half-

yearly accounts and pay duty to Commissioners of Inland Revenue not later than this date.

Four weeks at least before the 25th March Clerks to Board of Guardians to estimate the probable expenditure for the ensuing half-year and the probable balance due to or from each parish for the current half-year, and prepare contribution orders to be laid before the Guardians before the expiration of the current half-year. These estimates and the subsequent apportionments must be made on the "Assessable" value of Parishes ■ determined by s. ■ of the Agricultural Rates Act, and not ■ rateable value ■ formerly.

■ S.—Candlemas. Scotch Quarter Day.

Latest date to renew certificates of Solicitors, Conveyancers, and Draughtsmen in Equity in Ireland.

10 S.—Nine days at least before the 1st March Town Clerk to publish a notice of the election of auditors.

21 TH.—Latest day for delivery of nomination papers in election of Auditors in Boroughs.

Latest date for the Clerk of the Peace of every county, and the Town Clerk or other officer having charge of the register, to send a printed copy of the Register of Electors to the Secretary of State

24 S.—Four days at least before the 1st March the Mayors of boroughs to publish notices of the situation of polling-places for the election of Auditors.

26 TU.—Notice of Triennial Election of County Councillors must be published on this day if election is on 8 March as fixed by law.

March.

1 F.—Between this date and 1st August, persons shooting or taking wild birds are liable to penalties under the Wild Birds Protection Act, 1880, and persons selling or exposing for sale any hare or leveret (except a foreign hare) are liable to penalties under the Hares Preservation Act, 1892. Under the Wild Birds Protection Act, 1894, a Secretary of State may, on the application of any County Council, prohibit the taking of eggs within a county or any part thereof.

Ordinary day for election of elective Auditors in boroughs.

The Triennial Elections of County Councillors will take place on the 8th March, or on such other day between the 2nd and 7th (both inclusive) as the County Council may fix.

The Occupier of every Factory and Workshop must on or before this date send return of persons employed during year ending 31st December last, to Inspector of Factories, in pursuance of the Factory and Workshop Act, 1895.

Town Council of borough, on or before this date, to transmit to the Local Government Board ■ statement of receipts and expenditure up to last audit.

The Annual Parish Meeting is to be held in every Rural Parish on some day between 1st March and 1st April, to appoint Overseers.

Borough Treasurers to submit their accounts to audit within one month from this date, or that approved of by the Local Government Board for the making up of such accounts.

8 F.—Latest date for Returning Officers to publish Notice of Election for Urban and Rural

District Councillors and Guardians, and for the Triennial Election of Parish Councillors.

14 TH.—Nominations in Elections of Urban and Rural District Councillors and Guardians and Parish Councillors to be delivered by noon on this day.

15 F.—After this date, and until the 1st August, any person having in his control or possession any wild bird killed or taken in the United Kingdom since the 1st of this month, is liable to a penalty under the Wild Birds Protection Act, 1880. Notice of decision as to validity of nomination papers to be given by Returning Officer.

16 S.—Returning Officer to make out statement of persons validly nominated in Elections of Urban and Rural District Councillors, Guardians, and Parish Councillors.

20 W.—Within fourteen days after this date a special sessions may be held for appointment of the days for holding not less than eight nor more than twelve special sessions for executing the purposes of the Highways Act. This is liable to alteration by the County Council, and the fixing of these Sessions is no longer compulsory, ■ Highway business can be done at any Petty Sessions.

21 TH.—Railway Companies to pay quarterly instalments of Income Tax on or before this date.

25 M.—During this week the Census Enumerators will leave a Schedule at every dwelling in Great Britain, to be filled up by the occupier, showing particulars ■ to every person who sleeps in the house on the night of Sunday 31st.

Quarter Day. Union accounts to be made up to this date, or to the end of the Union week first completed after this date. Returns made to Local Government Board under Local Taxation Returns Act, 1877, by Corporations, and other local authorities to be made up to this date. (See 31st March.)

Half-yearly accounts of School Boards to be made up to this date.

Overseers of the Poor to be nominated and appointed within fourteen days after this date in Urban parishes.

Churchwardens and Overseers in Urban parishes and Overseers in Rural parishes, within fourteen days after other Overseers have been appointed to succeed them, to deliver to such succeeding Overseers ■ just, true, and perfect account in writing of all sums of money in their hands, as required by 17 Geo. II. c. 38, s. 1.

Medical Officer of Unions entitled to be paid any extra fees, to make out his quarterly account to this date, and lay the same before the Guardians: his claim to accrue at the expiration of one calendar month following this date, but the Guardians may pay it earlier.

The Overseers, and every Collector appointed for ■ Parish, to make up their accounts to this date, and deposit them for the free inspection of the ratepayers at some house within the parish for seven clear days at least before the audit.

Trustees of Parochial Charities to prepare accounts to be delivered to Parish Councils, and forward copy to Charity Commissioners within fourteen days.

District Medical Officers to notify at the commencement of this quarter to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months; advise as to the continuance of such paupers in such list, and take the direction of the Board thereon.

26 Tu.—Latest date for publication of Notice of Election of Urban and Rural District Councillors and Guardians, and of the Triennial Election of Parish Councillors.

31 S.—Under the Local Government Acts, 1888 and 1894, the local financial year ends on this date. All enactments relating to accounts of local authorities, or to meetings or other matters, are to be modified so far as is necessary to adapt them to the Act. The accounts of all County Councils, Urban and Rural District Councils, and of all Parish Councils and Parish Meetings, must be made up to this date.

Railway companies unincorporated to furnish statements of capital, traffic, and working expenditure to the Board of Trade not later than this date. Incorporated companies to send their returns within fourteen days after their first ordinary half-yearly meeting held in each year.

Quarter Sessions to be held the first week after this date. (See January 1.)

Hawkers', Refreshment-House Keepers', and Packet Boat liquor and tobacco licences expire on this date.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made since 31st December for the regulation and guidance of constables.

DEPOSIT BANK.

The Company receives MONEY ON DEPOSIT in large or small sums, repayable at short notice, and allows Compound Interest thereon, with Half-yearly Rests on the 30th June and 31st December, at the rate of £2 10s. per cent. per annum.

DESCRIPTIVE PROSPECTUS and FULL PARTICULARS MAY BE OBTAINED FROM THE Manager & Secretary, 63, CHANCERY LANE, LONDON, W.C. [265

WHITAKER'S TRAIN GUIDE.

THIS Railway Time Table is for the whole of Great Britain and Ireland, and is a new solution of an old difficulty.

It is intended for all those—and they are many—who find existing Time Tables difficult to navigate.

Therefore, its first object is Simplicity. The services of each Company are dissected and spread out, in order that the entire course of each train may be shown by itself. Branch lines which feed the Main, are not included in the Main line train, but each has a separate column given to it.

This principle is, of course, an expensive one, both in space and cost; but everything is made subservient to clearness and certainty.

The first number, for January, 1901, will be well worth study as a piece of tabular book-work, and the Editors will greatly appreciate all suggestions and criticisms which may tend to the Guide's improvement.

It will consist of about 800 pages, with folding Map, in green wrapper. [A fac-simile of the cover is inserted in each copy of this Almanack.]

WHITAKER'S TRAIN GUIDE will be published Monthly, price SIXPENCE. It can be supplied by any Bookseller, Stationer, or Newsagent, and will be found at all the Railway Bookstalls.

PUBLISHED EARLY IN 1901.

Whitaker's Peerage

BEING A

DIRECTORY OF TITLED PERSONS.

A COMPLETE Peerage, Baronetage, Knightage and Companionship, containing everything usually sought for in a PEERAGE, with many particulars not to be found elsewhere.

PLEASE NOTE TITLE CAREFULLY . . .

THE TIMES WEEKLY EDITION.

25th YEAR.

EVERY FRIDAY.

PRICE 2d.

THE TIMES WEEKLY EDITION gives a complete epitome of the week's news, carefully condensed from the telegrams and other reports in *The Times*, and designed especially for readers in the Colonies, India, the United States, and foreign countries; and for those in the United Kingdom who do not take time to read a daily paper.

THE TIMES WEEKLY EDITION contains a full summary of the proceedings of IMPERIAL PARLIAMENT during the Session.

THE TIMES WEEKLY EDITION contains not only news, but a selection of the most important LEADING ARTICLES, SPECIAL ARTICLES, REVIEWS OF BOOKS, and LETTERS TO THE EDITOR appearing in *The Times* during the week.

THE TIMES WEEKLY EDITION gives NAVAL and MILITARY INTELLIGENCE, including Launches and trials of Warships and announcements from the *London Gazette*; ECCLESIASTICAL INTELLIGENCE; LAW REPORT; COURT and PERSONAL News; BIOGRAPHIES from the Obituary columns of *The Times*; MUSICAL and DRAMATIC Notes; SPORTING Intelligence, including the full scores of all County and other first-class Cricket Matches, and a special CHESS Column; and much timely information on any topic of special interest at the moment.

THE TIMES WEEKLY EDITION contains a specially prepared weekly report of the MONEY MARKET; the latest prices of STOCKS and SHARES, with a record of their variations during the week; and the RAILWAY TRAFFIC RECEIPTS.

THE TIMES WEEKLY EDITION gives in full *The Times* SPECIAL CROP REPORTS during the season, and a weekly summary of the Agricultural Situation.

THE TIMES WEEKLY EDITION was enlarged by four pages at the beginning of 1900.

A SERIAL STORY

BY A WELL KNOWN AND POPULAR WRITER is a feature of
THE TIMES WEEKLY EDITION.

Special Four-page Supplements are issued with all copies of **THE TIMES WEEKLY EDITION** destined for AUSTRALASIA, INDIA, SOUTH AFRICA, and CANADA and UNITED STATES, giving in full the Articles, Reviews, Speeches, Reports and Meetings of Companies, and other Commercial and General Intelligence appearing in *The Times* which are of particular interest to readers in the respective countries.

MAY BE HAD OF ALL NEWSAGENTS.

Approved School Books by Dr. CORNWELL, F.R.G.S.

"We are qualified by ample trial of the books in our classes to speak to their great efficiency and value. We have never known much interest evinced, much progress made, since we have employed these our school-books."—EDUCATIONAL TIMES.

A SCHOOL GEOGRAPHY. 88th Edition, 3s. 6d.; or with Thirty Maps on Steel, 5s. 6d.

"Very superior to the common run of such books. It contains a good deal of useful matter of a more practical kind than usual, which the exercises are likely to impress on the mind more deeply than by the parrot system."—*Athenæum*.

SCHOOL ATLAS. Consisting of Thirty Small Maps. A Companion Atlas to the Author's "School Geography." 2s. 6d.; 4s., coloured.

GEOGRAPHY FOR BEGINNERS. 68th Edition, 1s.; or with 48 pages of Questions, 1s. 4d. QUESTIONS, 6d.

"A very useful series of educational works, of which Dr. Cornwell is either author or editor. It ('The Geography for Beginners') is an admirable introduction. There is vast difficulty in writing a good elementary book, and Dr. Cornwell has shown himself possessed of that rare combination of faculties which is required for the task."—*John Bull*.

ALLEN AND CORNWELL'S SCHOOL GRAMMAR. 65th Edition, 2s., red leather; or 1s. 9d. cloth.

GRAMMAR FOR BEGINNERS: An Introduction to ALLEN and CORNWELL'S "School Grammar." 88th Edition, 1s. cloth; 9d. sewed.

"This simple introduction is as good a book as can be used."—*Spectator*.

"The book is enlarged by a Section on Word-Building, with Exercises for Young Children."

POETRY FOR BEGINNERS: A Selection of Short and Easy Poems for Reading and Recitation. 13th Edition, 1s.

THE YOUNG COMPOSER: Progressive Exercises in English Composition. 48th Edition, 1s. 6d. KEY, 3s.

"The plan of the work is very superior. We are persuaded this little book will be found valuable to the intelligent instructor."—*Westminster Review*.

SPELLING FOR BEGINNERS. A Method of Teaching Reading and Spelling at the same time. 4th Edition, 1s.

SCIENCE OF ARITHMETIC. A Systematic Course of Numerical Reasoning and Computations; with very numerous Exercises. By JAMES CORNWELL, Ph.D., and Sir JOSHUA G. FITCH, LL.D. 26th Edition, 4s. 6d.

KEY TO SCIENCE OF ARITHMETIC. With the Method of Solution to every Question. 4s. 6d.

SCHOOL ARITHMETIC. 18th Edition, 1s. 6d. KEY, 4s. 6d.

"Eminently practical, well stored with examples of wider range and more varied character than are usually given in such books, and, its method of treatment being thoroughly inductive, it is pre-eminently the book for general use."—*English Journal of Education*.

ARITHMETIC FOR BEGINNERS. Combines simplicity and fulness in Teaching the first Four Rules and Elementary Fractions. 9th Edition, 1s.

London: SIMPKIN, MARSHALL, HAMILTON, KENT & CO., Limited.
Edinburgh: OLIVER & BOYD. [269]

STANDARD ENGLISH DICTIONARIES.

Large fcap. 4to, cloth, 7s. 6d.; half-Persian, 10s. 6d.; half-mor., flexible, 12s. 6d.

THE STUDENT'S ENGLISH DICTIONARY.

Literary, Scientific, Etymological and Pronouncing. By JOHN OGILVIE, LL.D.

New Edition, thoroughly Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D., Editor of the New Edition of "The Imperial Dictionary." Extensive and Useful Appendices. Nearly 800 Engravings on Wood.

"Leaving out of account the unwieldy and expensive recent editions of Webster and Worcester, we have no hesitation in saying that this is by far the most useful one-volume English dictionary at present existing."—*Athenæum*.

In One Vol., fcap. 4to, cloth, 3s. 6d.; half-roxburgh, 5s. 6d.; half-morocco, 7s. 6d.

THE CONCISE DICTIONARY OF THE ENGLISH

LANGUAGE. Etymological and Pronouncing, Literary, Scientific and Technical. By CHARLES ANNANDALE, M.A., LL.D. New Edition, Revised and Extended.

"Stands towards other dictionaries of the smaller character in the relation of the 'Imperial' to rival lexicons—in other words, it holds the 'premier' place."—*Spectator*.

In Four Vols., imperial 8vo, cloth, £4 net; or half-morocco, £5 net.

THE IMPERIAL DICTIONARY OF THE ENGLISH

LANGUAGE. A Complete Encyclopædic Lexicon, Literary, Etymological, Scientific, Technological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 3,000 Engravings on Wood.

"So far as vocabulary and treatment are concerned, we should not wish for anything better than the new 'Imperial.' The etymology is clear and concise, and the illustrations are copious, appropriate and well executed."—*Times*.

London: BLACKIE & SON, Limited, 50, Old Bailey. [276]

ORDNANCE SURVEY MAPS.

ALL SCALES of these valuable Maps can be obtained for any part of the British Isles from the London Agent, EDWARD STANFORD, 12, 13, and 14 LONG ACRE, LONDON, W.C., Geographer to the Queen.

NOBLEMEN and LANDED GENTLEMEN will find the Ordnance Survey Maps on the 6-in. or 25-in. scales invaluable for estate purposes, or, for residential purposes, the sheets of the 1-in. Survey can be mounted to make up admirable maps for hunting, driving, or walking, for 10, 15, 20, or any number of miles round. Such maps are most convenient when mounted on a spring-roller, or mounted and framed like a picture, and when so mounted they are ornamental and useful on the walls of a library, hall, or billiard-room. For Illustrations and particulars, see STANFORD'S METHODS OF MAP MOUNTING, sent post free.

Inquiries answered, and Estimates for Mounting given. Résumé of Publications post free on application to 12, 13, and 14 LONG ACRE, LONDON, W.C.

London: EDWARD STANFORD, 12, 13, and 14 Long Acre, W.C.

Geographer to Her Majesty the Queen.

An Invaluable Work of Reference. Easy to handle, and a pleasure to consult.

DICTIONARY OF QUOTATIONS

*From Ancient and Modern,
English and Foreign Sources.*

Including Phrases, Mottoes, Maxims, Proverbs,
Definitions, Aphorisms, and Sayings of Wise
Men, in their bearing on Life, Literature, Specu-
lation, Science, Art, Religion, and Morals;
especially on the modern aspects of them.

Selected and Compiled by the

REV. JAMES WOOD,

Editor of "Nuttall's Standard Dictionary."

"Never before have materials so widespread
been collated into a single volume, and the work
has besides the unique distinction of including
something like a representative collection of
quotations from the modern writings which
hitherto have hardly been laid under tribute for
such a purpose at all."—*Liverpool Courier.*

INVESTMENT STOCK & SHARE BROKERS.

CORNFORTH & REACHER,

MANSION HOUSE BUILDINGS,

4, QUEEN VICTORIA STREET, LONDON, E.C.

We invite correspondence from investors, to whose interests and needs special attention is devoted.

SPECULATIVE BUSINESS ON OPEN ACCOUNT IS NOT UNDERTAKEN.

We publish month by month "Notes for Investors," giving details of a considerable number of promising securities; and also a Monthly Investment List, giving prices of Government Stocks, Railways, Industrial and Trading Companies, Mines, &c., showing fluctuations in prices, and the yield per cent. to an investor.

GOVERNMENT and RAILWAY STOCKS BOUGHT and SOLD.

We do a large business in BANK shares, and devote considerable attention to INSURANCE investments.

A special feature is made of INDUSTRIAL and TRADING Companies. We have numerous dealings in Aërated Bread shares, Liptons, Bovrils, John Barkers, Slaters, Roberts (Islington and Stratford), George Newnes, Harmsworth, D. H. Evans, Thomas Wallis, Welfords, and similar undertakings.

We do not consider correspondence a trouble, even if no business results immediately, and are always glad to answer questions to the best of our ability.

MINES.

Mining shares are, of course, speculative. Our Notes, carefully prepared each month and based on most recent information, should be seen by those interested in Indian, Australian and African (Gold or Diamond) Mines. Dealing at close prices. Prompt delivery.

Send Postcard for Investment List.

References can be given in every large town in England.

CURRENT ACCOUNTS are kept in conformity with the usual practice in London and the country respectively. Customers keeping Current Accounts have the facility of discounting approved Bills, of obtaining loans upon negotiable Securities, of depositing Bills, Coupons, &c., for collection. The Bank will take charge of Foreign and Colonial Bonds, &c., and will detach and collect the Coupons as they become due, passing the interest to the credit of Customers as received. Sums of money may be paid into any Office for transmission to any other Office of the Bank for the credit of customers, free of charge. Every facility afforded for the transmission of money between London, Liverpool, Manchester, Scotland and Ireland, and for the receipt and delivery of Stocks, Shares, &c.

LETTERS OF CREDIT AND CIRCULAR NOTES, payable at any of the Chief Commercial Towns and Cities of the World, are issued.

Bankers—UNION BANK OF LONDON, Limited, Charing Cross.

Solicitors—Messrs. SHOUBRIDGE & MAY, 32, Lincoln's Inn Fields.

This Company, established upwards of sixty years, PURCHASES or makes LOANS upon REVERSIONARY INTERESTS, vested or contingent, in well-secured Property; also

LIFE INTERESTS in Possession, as well as in Expectation, and

POLICIES OF ASSURANCE upon Lives,

Loans upon Reversions may be obtained either at an Annual Interest, or in consideration of redeemable deferred charges, payable upon the Reversions falling in.

PRESENT INCOMES are likewise granted upon the latter principle to persons entitled to Reversionary Interests, who may thus obtain the means of support until their property falls into possession, without being called upon for any payment until that event.

Prospectuses and Forms of Proposal may be obtained from the Secretary, to whom all communications should be addressed.

D. A. BUMSTED, F.I.A., *Actuary and Secretary.*

152

LAW REVERSIONARY INTEREST SOCIETY, LIMITED.

ESTABLISHED 1853.

OFFICES:—No. 24, LINCOLN'S INN FIELDS, LONDON, W.C.

Capital, £400,000. Debentures and Debenture Stock, £207,230.

DIRECTORS.

Chairman—C.R. RIVINGTON, Esq., J.P., D.L. *Deputy Chairman*—The Rt. Hon. J.W. MELLOR, Q.C., M.P.
ERNEST BEVIR, Esq., Devereux Chambers. | L. W. N. HICKLEY, Esq., 10, King's Bench Walk.
EDWARD BULLOCK, Esq., Barrister-at-Law. | ARCHIBALD H. JAMES, Esq., Norfolk House, W.C.
The Hon. Mr. Justice CHANNELL. | RICHARD MILLS, Esq., 34, Queen's Gate Terrace.
EDWARD DALTON, Esq., 16, Porchester Square. | JOHN HERBERT SECKER, Esq., Barrister-at-Law.
JOHN C. DEVERELL, Esq., Dorking.

Solicitors—Messrs. CAPRONS, HITCHINS, BRABANT & HITCHINS, Savile Place, Conduit Street.

PURCHASES.—The Society purchases Reversions and Remainders, whether absolute or contingent; Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

LOANS.—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

Forms of Proposal and full information can be obtained at the Society's Offices.

W. OSCAR NASH, F.I.A., *Actuary and Secretary.*

1, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust was established in the year 1893, for the purpose of acquiring Freehold and Leasehold Properties, primarily in the London District, solely for investment purposes.

It affords large and small capitalists opportunities for investment to great advantage, both as regards security and rate of interest. Transactions of a speculative character are studiously avoided, and only properties of sound commercial value are dealt with.

The Investments consist of Shop Properties situate in main thoroughfares and well-established neighbourhoods, let on full repairing leases. The present rental income exceeds £10,300 per annum, of which £3,500 is derived from freeholds.

The paid-up capital amounts to £48,545. Interest at the rate of six per cent. has been regularly paid since the establishment of the Trust.

The Directors, Solicitor and Secretary serve without remuneration, and, as holders of the Founders' Shares, receive no share of profits until a dividend of 6 per cent. per annum is paid, and one-fourth of the balance of profits is carried to a Reserve Fund invested in Consols. Shareholders thus obtain a preferential dividend of 6 per cent. per annum, and their position is further assured by the Reserve Fund.

The Directors invite applications for Capital in fully paid Shares of £5 each.

Applications can be made direct to the Secretary at the Offices of the Trust, No. 1, Frederick's Place, Old Jewry, E.C., from whom a copy of the last Annual Report and Balance Sheet can be obtained.

MONEY PROMPTLY ADVANCED

BY THE

MUTUAL LOAN FUND ASSOCIATION

LIMITED (*Incorporated 1850*),

On Personal Security, Shares, Leases, &c., at moderate interest. Repayable by instalments, or as agreed. No preliminary fees. Forms free.

Favourably reviewed by over 100 influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

MORNING POST.—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

PALL MALL GAZETTE.—"Deals very clearly with the main points to be borne in mind in selecting an Office, and the tabular matter is very useful. Armed with this pamphlet, and blessed with a little commonsense, the ordinary man cannot go very far wrong."

DAILY CHRONICLE.—"Cannot fail to be instructive."

STATIST.—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry." "To those who may contemplate insurance, the expenditure of 1s. on this pamphlet will be a judicious outlay."

FINANCIAL TIMES.—"Carefully and skilfully compiled."

POLICY-HOLDER.—"Life Assurance a investment, and Endowment Assurance, are both explained in a very attractive way."

UNITED SERVICE GAZETTE.—"The fact that this pamphlet has now reached its third edition amply demonstrates the value of its contents."

BRADFORD OBSERVER.—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read."

CARDIFF TIMES.—"In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money."

GLASGOW HERALD.—"The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a Company."

LIVERPOOL COURIER.—"The dialogue is smartly written and touches on many of the most important elements that have to be considered before a policy is taken in any Office. Appended are illustrative tables showing how widely different Offices vary in their mode of doing business."

MANCHESTER EXAMINER.—"We heartily commend the little work to those about to insure, to those who are already insured, and to those who have made up their minds that they cannot or will not insure."

Price 1s. By post, 1s. 1d. (under four ounces).

FRIENDS' PROVIDENT INSTITUTION FOR MUTUAL LIFE ASSURANCE.

ESTABLISHED 1832.

ACCUMULATED FUND	£2,800,000
ANNUAL INCOME	£300,000

This Institution is the Life Assurance Office established by the Society of Friends (Quakers), and is under the management of Members of that Society.

The Scale of Premiums charged is below the average; but owing to careful selection of lives and economical management, very satisfactory Bonuses have been realized.

The advantages of the Institution are open to those persons who are or have been Friends; and to others who are of Quaker descent, or are connected with Friends by ties of kindred or marriage, or by partnership in business.

LIFE DEPARTMENT.

The last Quinquennial Valuation was made on the basis of the Institute of Actuaries' (HM ■ HM 9) Tables of Mortality and 3 per cent. interest, the net premiums only being valued and the whole of the loading reserved. The sum of £242,810 was divided as ■ bonus among 8,657 participating policies assuring, exclusive of existing bonus, £5,251,548 13s., the annual premiums payable under which amounted to £170,704 16s. 6d.

BONUSES.

The very satisfactory results of the last division of Profits are fully set out in the Company's Prospectus. The Reserves were substantially increased, and the rates of Bonus will compare favourably with those of most Offices.

LIFE FUND (1899), £3,024,000. LIFE INCOME, £323,000.

FIRE DEPARTMENT.

Insurances effected upon Property at Home and Abroad at Moderate Rates.

Losses by Lightning are made good by the Company.

FIRE FUND (1899), £538,000. FIRE INCOME, £398,000.

ACCIDENT DEPARTMENT.

Policies insuring against General Accidents, and also to indemnify Employers against the Compensation which they have to pay to their Workmen in the event of Accident, are now issued by this old and wealthy Company.

ACCIDENT FUND (1899), £6,600.
ACCIDENT INCOME, £12,400.

The Directors are prepared to consider Applications for Agencies.

THE CAPITAL, amounting to FIVE MILLIONS, was fully subscribed before the Society commenced business in 1845, and the shares are now held by a body of Shareholders, comprising some of the highest and most influential members of the Legal profession. The success which has attended the operations of the Society is founded on its strong financial position, the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements are met.

THE LONDON LIFE ASSOCIATION

LIMITED,

81, KING WILLIAM STREET, LONDON, E.C.

ESTABLISHED 1806.

FUNDS IN HAND, £4,575,000.

Mutual Life Assurance in its simplest form, without the burden of any shareholding body.

No Commission allowed or Agents or Travellers employed, the intervention of a paid Middleman being entirely dispensed with, at a saving to the Members of one shilling and more out of every pound paid in premiums.

Economical Management, the Expenses being only ~~£4~~ 7s. 3d. per cent. of the Premiums, or ~~£2~~ 18s. 5d. per cent. of the Income from premiums and interest.

From the accounts published by the Board of Trade, it may be seen that the Association is managed at a lower ratio of expenditure to premium income than any other life assurance office doing business in the United Kingdom.

Nearest Age, instead of age next birthday, used in calculating premiums.

Large Reductions of Premium for the year, the rates ranging at the present time from the equivalent of 100 per cent. (that is, NO PAYMENT but SOME ADDITION to the amount assured) to 54 per cent. thereof.

Half Premiums on Credit at 4 per cent.
It should be so preferred, the immediate advantage of a largely **Increased Sum Assured** being thus obtained.

The Association's System is almost unique, for while it more than provides for any possible fluctuation in rates of mortality and interest, yet the Policyholder is only charged the Actual Cost of Assurance, instead of having to pay throughout life a larger premium than necessary in the expectation that a portion will afterwards be returned as "bonus."

Chief Office in Great Britain—75 & 76, CORNHILL, LONDON.
JOHN MUNRO, *Manager.*

All the Profits belong to the Assured and are divided every Three Years.
RATES LOW. BONUSES LARGE. CONDITIONS LIBERAL.

Three Important Principles introduced by this ASSOCIATION.

1. No Policy allowed to lapse on account of non-payment of premium so long as there is a Surrender Value sufficient to pay the premium overdue.
2. No Member compelled to pay a higher premium than that set opposite his age in the published table of rates.
3. The age of Members taken as at their nearest birthday.

AGENTS WANTED FOR TOWN AND COUNTRY.

[123]

NATIONAL PROVIDENT INSTITUTION,

Medical Officers—T. HENRY GREEN, Esq., M.D., and JOHN CROFT, Esq., F.R.C.S.

Solicitor—THOS. MYDDLETON MORRIS, Esq.

Auditors—W. C. JACKSON, Esq., F.C.A.; G. BOLLAND NEWTON, Esq.; WM. CASH, Esq., F.C.A.
Assistant Actuary—L. F. HOVIL. *Agency Manager*—C. I. CROFT.

Accumulated Fund ..	£3,400,000	Claims Paid	£11,000,000
Profits divided	£3,400,000	Gross Annual Income ..	£500,000

The Whole of the Profits are Divided every Five Years among the Members, without any deduction for dividends to Shareholders. At the last (1897) Division of Profits £714,390 Cash Profit was apportioned amongst the Members, being nearly 37 per cent. of the amount paid in premiums during the previous Five Years.

There were then nearly 1,000 Policies in respect of which not only were the premiums entirely extinguished, but Cash Bonuses were also paid, whilst in the case of many Policies, the Original Sums assured are now more than doubled by the Bonus Additions.

The Next Division will be made as at 20th November, 1902, and all Assurances then in force will participate.

Endowment.—Assurance Policies are issued combining Life Assurance at Minimum Cost with Provision for Old Age.

Nov., 1900.

ARTHUR SMITHER, *Actuary and Secretary.*

LIFE DEPARTMENT.

The principles on which this Company was founded, and on which it continues to act, combine the system of Mutual Assurance with the safety of a large Protecting Capital and Accumulated Funds. Ninety per cent. of the Life Assurance Profits is divided among the Assurers on the Participating Scale. The Profits are divided every five years. Next Division Dec. 31st, 1905. Claims paid on proof of Death and Title. Five per cent. Investment Policies, Threefold Option Policies, &c.

Annuities of all kinds are granted, and the rates fixed on the most favourable terms.

FIRE DEPARTMENT.

Property of nearly every description at Home and Abroad insured at the lowest rates of Premium corresponding to the risk. Net Premiums for 1899 amounted to £1,446,521 1s. 7d.

Favourably reviewed by over 100 Influential Newspapers.

“HOW TO SELECT A LIFE OFFICE.”

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

“Those who are seeking an Office for the purpose of assurance will do well to peruse this ‘dialogue’ before deciding upon any particular Company.”—*Bullionist*.

“The statistics ■ to Endowment assurance policies ■ investments ■■ highly interesting and convincing.”—*Citizen*.

“To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended ■ about the wisest step they could take. Everyone should read it.”—*Fairplay*.

“There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable.”—*Financial Times*.

“An interesting study of the dialogues and tables given will more than repay the shilling outlay.”—*Dundee Advertiser*.

“All who intend to insure their lives will find much useful information in this pamphlet.”—*Belfast News Letter*.

“The publication is of value to the insurance broker and other professional men, but of ■■■ value still to the intending insurer.”—*Halifax Courier*.

“A cleverly-written dialogue. Both tables are explained with great lucidity.”—*Law Journal*.

“All who contemplate insuring their lives should read, mark, learn and inwardly digest this able and interesting treatise.”—*Leeds Times*.

“A well-written pamphlet. Anyone proposing to insure his life will easily find from the author’s ‘three interviews’ how to spend his money to the best advantage.”—*Liverpool Mercury*.

“Mr. Dent explains with singular clearness the ■■■ by which the security of ■ Office may be tested, and its prosperity gauged, and shows the immense difference between the advantages offered by different Companies; all this being set forth in such simple, untechnical language, that the reader most unused to the phraseology of finance may follow him not merely with apprehension, but with real pleasure and interest.”—*Manchester Examiner*.

“A valuable pamphlet on life assurance. . . There are two carefully prepared tables—No. 1, ‘exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,’ and No. 2, ‘showing the different results to policy-holders, produced by the payment of the same money to the various Offices.’”—*Morning Post*.

“A most valuable and exhaustive pamphlet.”—*Nonconformist*.

“One special branch of the question, which is most lucidly treated, is the value of life assurance considered simply as ■ investment.”—*Southport Guardian*.

“An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book.”—*Statist*.

The Society grants assurances on the lives of those persons **only** who are, or have been, members of one of the Universities or of some approved Educational Institution. Experience has shown that the average duration of the lives of educated persons is longer than that of the general public, and the limitation of the Society's business has consequently resulted in the accumulation of **Strong Reserves** and the declaration of **Large Bonuses**.

Reserves.—The Valuation made as at April 30, 1900, was based on the most stringent mortality tables now in use, with 2½ per cent. interest.

Bonuses.—As the result of the Valuation of April 30, 1900, Bonuses were declared at the following rates in respect of each year's premium paid during the preceding quinquennium:—

£2 10s. per cent. on Ordinary Whole-Life Assurances.

£2 per cent. on Ordinary Endowment Assurances.

Before assuring elsewhere, University and Public School Men should write for a copy of the Society's Prospectus to the ACTUARY and SECRETARY. [148]

BENEVOLENT SOCIETY OF ST. PATRICK.

PATRONS—

Her Majesty the Queen and R. H. the Prince of Wales.

PRESIDENT—

Lord Justice Henn-Collins.

The Schools of this Society are established for the Free Education, Clothing, Partial Feeding, and benefit of some 500 very poor children of Irish parentage, without distinction as to "their religious tenets or mode of worship."

H.R.H. THE DUKE OF YORK, at the Anniversary Festival, held March 17th, 1895, said:—"I congratulate you on having attained the 112th year of your existence. . . . The connection between the origin of the Illustrious Order of St. Patrick and the Benevolent Society of St. Patrick is a very interesting feature of your history. . . . In 1820, half a century before the foundation of the London School Board, you built your first large schools in London. . . . A matter of great importance is the supervision exercised by the Society, and the premiums for good conduct which it grants during the five years after the children have left the schools. . . . As your President, I should like to feel that a special effort has been made to increase the numbers of your scholars."

[With the aid of a legacy, bequeathed by the late Dr. Madden, the Society many years since added technical classes to their system of education, and much increased the usefulness of the schools.]

The Committee will gladly receive subscriptions or donations addressed to—

A. F. RANALD DANIEL, Secretary, The School House, 61, Stamford St., S.E. [152]

THE BELGRAVE HOSPITAL FOR CHILDREN.

A Hospital for Children in South London, to be re-erected on a Site in the Clapham Road, adjoining St. Mark's Church, Kennington.

PATRONESS—H.R.H. THE PRINCESS HENRY OF BATTENBERG.

FUNDS are urgently needed for the new Hospital, the foundation stone of which was laid by H.R.H. the Patroness on June 27, 1900, £50,000 being required. The Hospital will contain 80 beds, will be erected with every modern improvement, and on entirely new principles.

Cheques may be sent to the Treasurers, crossed "BARCLAY & CO.," 1, Pall Mall East, for Building Fund.

CHELSEA
HOSPITAL
FOR
WOMEN.

The Hospital has 52 Beds, and was founded for the reception and treatment of respectable poor women and gentlewomen in reduced circumstances, suffering from those many distressing diseases to which the female sex is liable. A great proportion of women thus afflicted are those upon whom the numberless misfortunes of ill-health most heavily fall—the poor gentlewoman, the governess, the wife of the lowly-paid clerk, the artisan, and the very poor. Their homes are altogether unsuited for the performance of a critical operation, nor can they there have the special nursing and care which their condition demands. It is therefore obvious that the work of this Charity in restoring Mothers, Wives and Daughters to that health upon which the maintenance of families so frequently depends is one of real value and importance.

FREE IN-PATIENTS

are admitted on recommendation of Subscriber, one Letter being sufficient for each Patient's entire stay.

CONTRIBUTING IN-PATIENTS

are supported upon payment Weekly of 10s. 6d., 21s. or 42s., according to means.

OUT-PATIENTS

attend daily at 2.15 o'clock, with subscribers' letter, or on payment of 1s.

CONVALESCENT HOME

at St. Leonards-on-Sea contains 22 Beds, and is not reserved for hospital patients.

The Hospital is entirely without Endowment or Reserve Funds of any kind, and is in pressing need of assistance.—Annual Subscriptions are especially solicited. Any contributions will be thankfully received, and information gladly given by

HERBERT H. JENNINGS, Sec.

[160]

CITY OF LONDON TRUSS SOCIETY,

The Hospital contains **164** Beds, and is the special Hospital for Consumption and Heart and Chest Diseases in the **EAST END**.

Several Wards are now, unfortunately, **CLOSED ENTIRELY FOR WANT OF FUNDS**.

1,021 In-patients relieved during the past year. **58,973** Attendances in the Out-patients Department during the same period.

The **OPEN-AIR** treatment for Consumption has now been adopted.

Additional Help is very urgently needed to carry on this great work among the poor of the **EAST END**.

HENRY T. DUDLEY RYDER, *Secretary*. [164]

EARLSWOOD.

*A TRAINING AND EDUCATIONAL HOME
FOR THE WEAKMINDED AND IMBECILE.*

Affords the necessary protection and development that can only be secured under a skilled staff of Teachers.

Established in 1847, it now affords protection to about **600** inmates, and everything that kindness and science can suggest is employed to ameliorate their condition.

METHODS OF ADMISSION are:—

By Payment, according to the circumstances and the requirements of the Patient.

By Election to the Foundation, by the VOTES of the SUBSCRIBERS, as PART-PAYMENT or as ORDINARY CANDIDATES.

At each Half-Yearly Election there are generally over **One Hundred and Fifty Applicants** seeking admission, of whom the Board can only elect **25 to 35**, owing to want of sufficient Funds for a larger number.

FUNDS URGENTLY NEEDED.

For full particulars apply to

H. HOWARD, *Secretary*.

Offices: 36, King William Street, London Bridge, E.C.

[172]

GENERAL LYING-IN HOSPITAL

YORK ROAD, LAMBETH, S.E. ESTABLISHED 1765.

Patron—The QUEEN.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women, in indigent circumstances, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss Annie Whyte, the Secretary, at the Hospital. [173]

THE GORDON BOYS' HOME (THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE QUEEN | Vice-Patron—H.R.H. PRINCESS OF WALES. | President—H.R.H. PRINCE OF WALES, K.G.
Chairman of Committee—Field Marshal Sir LINTORN J. SIMMONS, G.C.B., G.C.M.G.

**BUILDINGS NOW OPEN AT WEST END, WOKING, NEAR BROOKWOOD.
OFFICES—5, YORK STREET, ST. JAMES', S.W.**

The Home is constructed to accommodate 240 Boys, chosen from the homeless and destitute, between the ages of 7 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. None are admitted below 13½ years of age or above 15½. 2. He must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £22 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. There are now 240 Boys in the Home. Subscriptions and Donations are urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; by the Treasurer, General Sir DIGHTON PROBYN, V.C., Marlborough House, Pall Mall, S.W.; and by the Secretary, at the Office, 5, York Street, St. James', S.W., from whom any further information can be obtained.

THE TEMPORARY
HOME FOR LOST AND STARVING DOGS,

Battersea Park Rd., S. Lambeth, London, S.W.

PATRON—

Her Most Gracious Majesty the Queen.

President—His Grace the DUKE of PORTLAND,

Treasurer and Chairman—Sir GEORGE S. MEASOM, J.P.

OBJECTS—

1. To provide shelter and food for the lost, deserted and dangerous dogs of London,
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless operation, all valueless and diseased dogs.

FUNDS ARE URGENTLY NEEDED.

A Country Branch has been Established at Hackbridge, Surrey. Thither dogs left unclaimed are deported after their compulsory confinement at Battersea so as to improve their condition and, if possible, save them from the Lethal Chamber.

CONTRIBUTIONS THANKFULLY RECEIVED BY

HENRY J. WARD, *Secretary.* [177]

HOMES OF HOPE,

4, 5 & 6, Regent Square, Gray's Inn Rd., London, W.C.

(Established 1860.)

This Society was established in 1860 for the reception of the less degraded class of penitent fallen young women, for whom little provision had been made.

Young women are admitted on any day, and coming from any quarter whatsoever, if there be room in the Homes and Funds.

Special efforts are made on behalf of mothers with their first infants, who are really the most hopeful class of the fallen, and are generally to be pitied.

A Home has been opened for the reception of such young women, before they become mothers, as are unfitted, from their previous good character and position, to mix with others.

Since the Homes have been established, 5,004 have been admitted; of this number, 2,995 belonged to the class of young mothers who were thus saved from falling into deeper and continued sin; 798 were rescued from the surroundings of great temptation unfallen. In almost every case the mothers, and those admitted unfallen, have turned out well, and about 70 per cent. of the others.

While inmates of the Homes, the young women are trained in household and domestic duties, with a view to their becoming good and useful members of society. The great object, however, kept most anxiously before the Committee, is to afford them opportunities of religious instruction, and to impress upon them the extreme importance of turning to God with all their hearts.

The applications for admission are *painfully urgent*, and the charity is wholly dependent upon voluntary contributions.

The Secretary will be happy to forward the last Annual Report.

Bankers—Messrs. HOARE, 37, Fleet Street, E.C.

This Institution, founded in 1875, was the first of its kind in the Metropolis, and, it is believed, in the United Kingdom. It was established with the object of providing for the maintenance, care and medical treatment of Children (up to the age of sixteen) suffering from Chronic or Incurable Complaints of ■ aggravated character. It combines the advantage of a Home and a Hospital.

Nearly ■ Children have been received, and there are Thirty cots. A small Weekly Payment is required for each Child; but the expenses of such a charity are necessarily very large, and the Committee *appeal earnestly for Donations and new Subscriptions*, which are much needed. Visiting hours, 3 to 5 p.m. daily.

Mrs. BRUCE, *Matron*. [179]

HOSPITAL for CONSUMPTION BROMPTON.

The Hospital contains 321 Beds, and in 1899 received 1,723 In-patients. 14,281 Out-patients were also treated. The yearly requirements of the Hospital cannot be estimated at less than £25,000 a year. Further, it has been decided upon the unanimous and urgent advice of the Medical Staff to establish a

“COUNTRY BRANCH AND CONVALESCENT HOME”

(for which ■ site has already been secured),

and it is estimated that £20,000 will be needed to inaugurate this new departure.

The Charity being *Unendowed*, is dependent on Donations, Annual Subscriptions, and Legacies, *Contributions* are therefore earnestly solicited in aid of both objects.

Bankers—MESSRS. WILLIAMS, DEACON, & MANCHESTER AND SALFORD BANK,

This Hospital was established in March, 1887, for the treatment of Skin Affections.

It is free to the necessitous. In-patients; others are expected to contribute according to their means. The Hospital
has no endowment and is supported by the payments made by the In and Out-patients and voluntary contributions.

Eleven beds are available for paying In-patients. Up to the 31st of Dec. last, 19,000 persons had been relieved,
and the attendances exceeded 120,000; 2,000 new Patients were treated last year. Out-patients are seen every
afternoon at 2, and every evening at 7. Cheques should be crossed "Messrs. DRUMMOND." Subscriptions and Dona-
tions would be gratefully received by

H. MONTAGUE DUNCAN, Secretary.

[191]

THE LONDON CITY MISSION

EMPLOYS 458 MISSIONARIES,

And is MUCH IN NEED of Funds.

It is one of the oldest of the Home Missionary Societies, and has ever held fast to its Evangelical principles. Its work is still pioneering, inter-denominational, and subsidiary to that of the Churches.

Notwithstanding the uprising of other Evangelistic Agencies, the need is no less urgent now than formerly for persevering and systematic house-to-house visitation. In addition to 335 Missionaries, who give their whole attention to visiting the homes of the people, 123 men are set apart for the visitation of special classes, such as Bakers, Cabmen, Canal Boatmen, Navvies, Omnibusmen, Coachmen, Foreigners, Gasworkers, the Fire Brigade, Millers, Police, Postmen, Pottery Workers, Railwaymen. Tramwaymen, Scavengers, Soldiers and Sailors; also to the inmates of Hospitals and Workhouses, the Landlords and Customers in Public-houses, and men in the Coal-yards, Common Lodging-houses, Docks, Factories, Markets, &c. &c. More than half-a-million men were visited, and vast numbers of them personally dealt with, during the past year.

The labours of these devoted men have been largely blessed, and the Committee look with confidence to the liberality of Christians of all denominations for their future maintenance, and with the hope that the number may again reach 504.

At present there are upwards of 50 districts without any guaranteed support, and more than 100 districts for which less than £40 was contributed last year.

For every gift of £50 per annum one of the former can be retained, and for sums varying from £5 to £40 per annum the occupation of the partially supported districts can be continued.

If friends are unable to contribute the whole sum necessary to maintain a Missionary, they may, perhaps, be able to offer £10, £5, or smaller sums. These subscriptions will be grouped for particular districts, and will thus remove the very pressing anxiety of the Committee.

Gifts will be gratefully acknowledged by the Treasurer—F. A. BEVAN, Esq.; or by the Secretaries—Rev. T. S. HUTCHINSON, M.A., Rev. ROBERT DAWSON, B.A.

THE LONDON ASSOCIATION OF NURSES.

Chief Office: 123, NEW BOND STREET, W.

(Between Brook Street and Grosvenor Street.)

Branch Office: 86, KENNINGTON PARK ROAD, S.E.

Superior Hospital-trained Nurses for Medical, Surgical, Monthly, Mental, Fever and all Infectious Cases; also Male Nurses and Medical Rubbers can be obtained immediately on application to the Superintendent.

Great care is taken in the selection of Monthly Nurses, who reside in a separate home, and never come in contact with those who attend infectious cases.

There is a Home in connection with the Association where invalids can be received under the care of their own physicians, each patient being provided with a separate room and a trained nurse.

M. FIRTH, Superintendent.

Telephone—No. 1855, GERRARD.

[186

THE LONDON HOSPITAL MEDICAL COLLEGE.

ONE HUNDRED AND SIXTEENTH SESSION.

The **SUMMER SESSION** will commence on **May 1st,**
The **WINTER SESSION** on **Oct. 1st.**

The Hospital is the largest in the Kingdom: nearly 800 Beds are in constant use, and no beds are closed. Being the only general hospital for East London—i.e., for a million and a half people—the practice is immense. In-patients last year, 13,234; out-patients, 189,638; accidents, 17,871 major operations, 2,508.

APPOINTMENTS.—Owing to the enormous number of patients more appointments, salaried and resident, are open to students than at any other hospital. Sixty of these qualified appointments are made annually, and more than 150 Dressers, Clinical Clerks, &c., appointed every three months. All are free to Students of the College. Holders of resident appointments have free board.

SCHOLARSHIPS AND PRIZES.—Thirty-four Scholarships and Prizes are given annually. **SEVEN ENTRANCE SCHOLARSHIPS** will be offered in October.

SPECIAL CLASSES are held for the University of London and other higher Examinations. Special entries for Medical and Surgical Practice can be made. Qualified practitioners will find excellent opportunities for studying the rarest diseases. A reduction of 15 Guineas is made to the sons of members of the profession entering for the full course.

ENLARGEMENT OF THE COLLEGE.—The New laboratories and class-rooms for Bacteriology Public Health, Operative Surgery, Chemistry, Biology, are now open.

The Clubs Union Athletic Ground is within easy reach of the Hospital.

Luncheons and Dinners at moderate charges can be obtained in the Students' Club.

The Metropolitan and other railways have stations close to the Hospital and College.

For prospectus and information as to residence, &c., apply, personally or by letter, to
MUNRO SCOTT, Warden. [189

THE METROPOLITAN VISITING AND RELIEF ASSOCIATION.

President—THE LORD BISHOP OF LONDON.
OFFICE: 46A, Pall Mall, S.W. *Secretary*—GRANT MARSTON, Esq.

The aim of the Association is to Distribute such Funds as may be committed to it, in grants to the Local Committees of poor parishes, proportionate to the needs of each. The Clergy and District Visitors are the unpaid Agents of Relief, and possess the indispensable qualification of personal knowledge of the poor.

The overburdened Clergy are hereby greatly assisted in dealing with the distressing cases constantly before them. The religious persuasion of the poor is no obstacle to their relief.

Annual Report will be forwarded on application to the Secretary.

Cheques, payable to GRANT MARSTON, should be sent to the Office, 46A, Pall Mall, S.W., or to LLOYD'S BANKING CO., LTD., 16, St. James's Street, S.W. [192

THE NATIONAL BENEVOLENT INSTITUTION, FOUNDED BY THE LATE PETER HERVE.

Established 1812. Incorporated by Royal Charter.

Under the immediate Protection and Patronage of Her Most Excellent Majesty **Queen,**
and His Royal Highness The Prince of Wales.

Treasurer—The Reverend Prebendary WHITTINGTON, M.A.

This Institution was founded for the Purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to £13,200 per Annum.

The total number of aged Persons who have been supported by the Institution is **Two thousand six hundred and seventy six,** the gross sum distributed to them up to the present exceeding £533,200.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily.

Office—65, SOUTHAMPTON ROW, BLOOMSBURY, W.C. HENRY C. LATREILLE, *Secretary.* [195

LONDON LOCK HOSPITAL AND RESCUE HOME

(LATE ASYLUM),

HARROW ROAD, W.

Male Hospital—91, Dean Street, Soho, W.

230 Beds. Average number occupied, 168. Funds Urgently Needed.

This Institution is the only one of the kind in the Metropolis.

New Subscriptions are urgently required, as well as Donations, to prevent the Hospital running further into debt.

Cases are received from the London General Hospitals, from the Metropolitan Workhouse Infirmaries, and from all parts of the Country.

The "**Rescue Home**" is for those patients who wish to give up their former mode of life. A large number who pass through the Hospital are rescued through this and other Homes.

Treasurers—THE LORD KINNAIRD and J. F. W. DEACON, Esq.

Secretary—A. W. CRUIKSHANK.

Bankers—Messrs. BARCLAY & Co., Ltd.,

1, Pall Mall East, S.W.

[190]

CONSUMPTION.

THE VENTNOR ROYAL NATIONAL HOSPITAL FOR CONSUMPTION, on the Separate Principle, affords Hospital Treatment with Home-like Comforts to Sufferers from Consumption and other Chest affections. It consists of Eleven Blocks of Buildings (standing in Twenty-two acres), with separate Bedroom for each Patient, facing the South and overlooking the Sea: its situation is in the sheltered Undercliff of the Isle of Wight, and most suitable for Open Air Treatment. The results achieved with upwards of 16,000 Cases already admitted have been most encouraging.

Funds for maintenance are urgently needed.

A Donation of 30 Guineas, or an Annual Subscription of 3 Guineas, enables the contributor to recommend One In-Patient yearly. The yearly expenses exceed £10,000.

Bankers—THE LONDON AND WESTMINSTER, 1, St. James's Square, S.W.

Full particulars on application to ERNEST MORGAN, Secretary.

Offices—34, CRAVEN STREET, CHARING CROSS, LONDON, W.C.

[197]

THE NEW HOSPITAL FOR WOMEN,

144, EUSTON ROAD, N.W.

THE PHYSICIANS AND SURGEONS ARE WOMEN.

Treasurer—Mrs. WESTLAKE, River House, Chelsea Embankment.

Hon. Sec.—Miss VINCENT.

Physicians—Miss COCK, M.D., Miss WALKER, M.D.

Surgeons—Mrs. SCHARLIEB, M.D., M.S., Mrs. BOYD, M.D.

Physicians and Surgeons to Out-Patients—Miss WEBB, M.B., Miss MACDONALD, M.B.,

Miss ALDRICH-BLAKE, M.D., M.S.

Ophthalmic Surgeon—Miss ELLABY, M.D.

In-patients pay a weekly amount, according to their means. Out-patients, 6d. or 2s. on entrance, and 2d. each visit afterwards. Daily, from 1 to 1.30.

The Hospital being Unendowed, Donations and Subscriptions are earnestly solicited.

Bankers—BANK OF ENGLAND, Burlington Gardens, W. MARGT. M. BAGSTER, Secretary.

[199]

The Middlesex Hospital,

W.

Patron—HER MOST GRACIOUS MAJESTY THE QUEEN.

HELP URGENTLY NEEDED.

THIS HOSPITAL was founded in the year 1745, and contains 295 Beds, 126 of which are for Medical, 143 for Surgical, 9 for Male Cancer Patients, and 17 for Special Cases. The need of such a charity is seen by the fact that since its foundation the number of Patients annually treated has steadily increased, till, in recent years, the average has reached 3,547 In-Patients, and 44,886 Out-Patients. Annual deficit about £8,000.

There is a **Convalescent Home** at Clacton-on-Sea, which contains 51 Beds, and forms an indispensable adjunct to the Hospital, but **£2,700 IS REQUIRED** to meet the annual expenditure.

A New Wing for **Female Cancer Patients** (containing 40 Beds) has recently been opened, but it is regrettably **STILL IN DEBT** to the amount of about **£9,000**.

A Bed (in the Hospital or Cancer Wing) can be endowed and named in perpetuity for £1,050, and a Cot in the Hospital or a Bed in the Convalescent Home for £525.

A Subscription of £3 3s. constitutes an Annual Governor.

Cheques should be made payable to the "Middlesex Hospital," and crossed "COUTTS & CO."

F. CLARE MELHADO,

Secretary-Superintendent. [19]

NORTH EASTERN HOSPITAL FOR CHILDREN,

HACKNEY ROAD, SHOREDITCH, N.E.

Established 1867.

Patron—H.R.H. THE PRINCESS OF WALES.

Chairman—Lord FREDERICK FITZROY. | **Treasurer**—J. LISTER GODLEE, Esq.

VERY URGENT NECESSITY FOR IMMEDIATE EXTENSION.

Only Children's Hospital for Population of over 500,000. Now has only 57 Beds.

£34,500 still required to make up £40,000 (expected cost).

(1899) In-Patients, 748 (211 under 2 years of age).

Out-Patients, 16,665 (making 59,203 attendances).

Accident and Emergency Cases, 3,595. 1,609 operations were performed.

Average Annual Expenditure, £5,910.

New Annual Subscriptions much wanted.

■ A National, Undenominational Institution. Now in URGENT NEED ■ FUNDS. Supports 500 Orphan and other Necessitous Children, varying in age from infancy to 14 or (in Special Cases) 15 years. 5,500 have been Trained. Contributions thankfully received, and all information given by ALEXANDER GRANT, *Secretary*. [200

PADDINGTON GREEN CHILDREN'S HOSPITAL,

LONDON, W.

CONVALESCENT HOME—"THE LAURELS," WEALDSTONE, HARROW.

Free, without Letter of Recommendation, to the Children of the Poor.

The In-Patients average 550, and the New Out-Patients 13,000 a-year; the total attendances being nearly 40,000.

The Hospital, which formerly had accommodation for 23 Beds, has recently been RE-BUILT and ENLARGED, and now provides 46 Cots.

New Annual Subscriptions and Donations are URGENTLY NEEDED to meet the increased Expenditure, and for the Convalescent Home.

GEORGE HANBURY, *Treasurer*.

W. H. PEARCE, *Secretary*.

[201

NATIONAL INCORPORATED WAIFS' ASSOCIATION

OTHERWISE KNOWN AS

DR. BARNARDO'S HOMES.

**Over FIVE THOUSAND THREE HUNDRED ORPHAN
or WAIF CHILDREN are now in the Homes.**

"Christian, Protestant and Evangelical" is the religious motto of the Association, which is supported by all sections of Christendom, and in which all Evangelical Christians may and do join hands.

Last year 7,459 Children (the Greatest Family in the whole world) were maintained in the Homes.

Applications for urgent cases are received at any hour of the day or night.

Destitute Children of any age, or creed, of either sex, and of any nationality are eligible.

Deaf or Dumb, Blind or Crippled Children, or those Diseased and already Given Over to Death, are, if destitute, always eligible.

The most searching enquiry is made into every application, but NO REALLY DESTITUTE BOY OR GIRL IS EVER REJECTED. Each case is determined solely upon its merits, without election and without the intervention of wealthy patrons.

41,805 Children have been rescued since 1866. In 1899 alone the Homes admitted 3,011 Fresh Cases. About 60 Fresh Cases are admitted weekly during the Winter Months.

Nearly 2,000 Young Children are now Boarded Out in Rural Districts under careful supervision.

Technical Training in some one of the Fourteen Handicrafts carried on in the Homes is given to every Lad capable of receiving it.

All the Girls are brought up in Cottages on the Family System, or are boarded out in the Country, and carefully instructed in the various branches of Domestic Service or in Dressmaking.

11,532 Trained and Tested Children have already been placed out in the Colonies. Of these 98 per cent. have been successful.

Three Lodging Houses and a Night Refuge, open in the Metropolis, and Eleven "Ever Open Doors" in Provincial Towns, are accessible throughout all hours of the day and night to Homeless Waifs and Strays seeking temporary shelter.

These Homes actively co-operate with the N.S.P.C.C., and receive freely and at once all destitute cases recommended by that Society or by any of its Branches all over the Kingdom.

In all, the Association now includes 95 distinct Homes, dealing with every age and class of destitute and needy childhood, and 11 Mission Branches.

Funds are Urgently Needed for Food and Maintenance.

Donations and Subscriptions gratefully received by the Treasurer, WILLIAM FOWLER, Esq.; by the Chairman of Council, HOWARD WILLIAMS, Esq.; by the Founder and Director, Dr. THOS. J. BARNARDO; or by the Bankers, LONDON AND SOUTH-WESTERN BANK and MESSRS. PRESCOTT, DIMSDALE AND CO.

GEORGE CODE, *Honorary Secretary.*

JOHN ODLING, *Corresponding Secretary.*

QUEEN CHARLOTTE'S LYING-IN HOSPITAL

MARYLEBONE ROAD, LONDON, N.W.

FOUNDED 1752. INCORPORATED BY ROYAL CHARTER, 1885.

Patron.—HER MAJESTY THE QUEEN.

Vice-Patrons { H.R.H. The PRINCESS OF WALES.
H.R.H. The DUCHESS OF YORK.

President—THE VISCOUNT PORTMAN.

Treasurer—ALFRED C. DE ROTHSCHILD, ESQ.

Chairman of Committee—THE EARL OF HARDWICKE.

OBJECTS OF THE CHARITY.

1. To provide an Asylum for the delivery of Poor Married Women; and also of Deserving Unmarried Women *with their first child.*
 2. To provide skilled Midwives to attend Poor Married Women in their *Confinements at their own homes.*
 3. The Training of Medical Pupils, Midwives for the Poor, and Monthly Nurses.
- Since the foundation of the Hospital 100,000 poor women have been relieved. Last year, 1,150 patients were received into the Hospital, and 1,011 were attended at their own homes.

Annual expenditure of the Charity exceeds £4,500; Reliable Income, £2,000 only.

An Annual Subscription of £3 3s., or a Donation of £31 10s., entitles the Contributor to recommend Two In-Patients and Three Out-Patients yearly, and qualifies for election as a Governor.

Contributions will be gratefully received by the Bankers, Messrs. Cocks, Biddulph & Co., 43, Charing Cross, S.W., or by

ARTHUR WATTS, *Secretary.*

REEDHAM ORPHANAGE

PURLEY, SURREY.

Patron—Her Most Gracious Majesty THE QUEEN.

Treasurer—H. COSMO O. BONSOR, Esq.

Bankers—Messrs. BARCLAY & Co., Limited, 54, Lombard Street, E.C.

Office—99, CANNON STREET, E.C.

This Undenominational Institution is entirely dependent upon public benevolence, having *no endowment whatever.*

It was founded in 1844 for the Maintenance, Clothing and Education of Fatherless Children of both sexes.

Orphans are received from all parts of the Kingdom, at any age between *three months* and eleven years, and are retained until they are fifteen.

More than 2,000 children have already been admitted to its benefits, 300 of whom are still in the Orphanage.

Their requirements entail a yearly expenditure of at least £8,000, of which less than £2,300 is provided by annual subscriptions.

The large balance is dependent upon donations and legacies. Help from the benevolent public is therefore urgently needed and earnestly requested.

The Secretary will be pleased to give any further information,

J. ROWLAND EDWARDS, *Secretary.*

[203

ROYAL ASYLUM OF ST. ANNE'S SOCIETY.

SCHOOLS—RED HILL, SURREY. (Removed from Streatham Hill.)

Dep. Chairman—Vice-Admiral GEO. DIGBY MORANT. *Secretary*—Maj. F.A.C. CLAUGHTON

Honorary Rewards granted for Saving Life from Drowning in all British Possessions.

Pecuniary Rewards granted within an area of Thirty Miles around the Metropolis.

During the Skating Season, experienced Icemen are provided to prevent loss of life in the various waters about London; and Boats are in daily attendance, morning and evening, to prevent fatal results attending Accidents to the enormous number of Bathers in the Serpentine.

Nearly Three Hundred Places in and around London are furnished with Life-Saving Apparatus to rescue persons from Drowning.

The Society, some years ago, with a view of encouraging swimming coupled with a knowledge of the method of restoring the apparently drowned, instituted competitions at many of the public schools and on training ships, a medallion being awarded for proficiency. These competitions are held annually, and are the means of imparting much useful knowledge and instruction.

The Society is known throughout all the civilised world, but the pecuniary support it receives is quite inadequate to its usefulness, and it is necessary to remind the inhabitants of London that during a severe winter the Society has to incur a large outlay in finding ice-boats, ladders and ropes, for the protection of those who venture on dangerous ice; also for the wages and equipment of Icemen.

Life Governor.....TEN GUINEAS. Annual Governor.....ONE GUINEA.

Donations or Subscriptions will be thankfully received by Major F. A. C. CLAUGHTON, Secretary, at the Office, 4, Trafalgar Square, London, W.C.; or by Messrs. PRESCOTT, DIMSDALE, CAVE, TUGWELL & Co., Bankers, 50, Cornhill, E.C. [207]

WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

(Incorporated by Royal Charter, Nov. 1st, 1894). Supported by Voluntary Contributions.

Patron—H.R.H. the PRINCE OF WALES, K.G. | *President*—His Grace the DUKE OF DEVONSHIRE, K.G.

Treasurer—Rt. Hon. LORD ROTHSCHILD. | *Chairman*—WILLIAM BIRD, Esq., J.P., D.L.

IT needs:—**£63,000** to carry out the scheme of extension for which plans have been accepted, and by which provision is made for about **250 beds**; **£15,000** to pay off debt; and **£9,000** annually to maintain the present work of relieving upwards of **2,000 In-Patients** and **30,000 Out-Patients**. Its endowments yield an annual income of about **£150**. Wherefore it relies upon voluntary contributions for **£8,850** wherewith to meet its annual expenditure of **£9,000** already mentioned.

It is the nearest General Hospital for Hammersmith, Fulham, Acton, Chiswick, Brentford, and for large portions of Kensington and Barnes. The population it serves numbers more than 500,000 persons.

COUGHS, COLDS, ASTHMA, BRONCHITIS
DR. J. COLLIS BROWNE'S

CHLORODYNE.

ONLY GENUINE

DR. J. COLLIS BROWNE (late

Army Medical Staff) DISCOVERED a REMEDY, to denote which he coined the word CHLORODYNE. Dr. BROWNE is the SOLE INVENTOR, and, as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. BROWNE'S Chlorodyne *must be false.*

This Caution is necessary, many persons deceive purchasers by false representations.

DR. J. COLLIS BROWNE'S

CHLORODYNE.—Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was UNDOUBTEDLY the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue and he regretted to say it had been sworn to.—See Times, July 13th, 1864

ORIGINAL

The GREAT SPECIFIC for
CHOLERA,

DIARRHOEA, DYSENTERY.

GENERAL BOARD OF HEALTH, London, REPORT that it ACTS as a CHARM, one dose generally sufficient. Dr. GIBBON, Army Medical Staff, Calcutta, states: "2 doses COMPLETELY CURED ME OF DIARRHOEA."

DR. J. COLLIS BROWNE'S

CHLORODYNE is the
TRUE PALLIATIVE in
NEURALGIA, GOUT, CANCER,
TOOTHACHE,
RHEUMATISM.

The ILLUSTRATED LONDON NEWS of Sept. 28, 1865, says: "If I were asked which single medicine I should prefer to take abroad with me, as likely to be most generally useful, to the exclusion of all others, I should say CHLORODYNE. I never travel without it, and its general applicability to the relief of a large number of simple ailments forms its best recommendation."

Royal Irish Engineers, Cork, Feb. 6th, 1866.
 DEAR SIR,—I wish to raise public testimony to the infinite value which I derive from your Chlorodyne, and to inform members of the Special Service Corps, in the recent Ashanti Expedition, I bought a small bottle before leaving London.

for West Africa, and having used it myself with beneficial result, treated some of my comrades with equal success (though some of them were very bad). I should be very glad to recommend it to anyone about to travel in a treacherous climate, where they are so much exposed to this dangerous maldy.

Gratefully yours,
 To J. T. DAVENPORT, G. SMITH, "Band," R.I.F.

DR. J. COLLIS BROWNE'S

CHLORODYNE is a liquid medicine which assuages PAIN of EVERY KIND, affords a calm, refreshing sleep WITHOUT HEADACHE, and INVIGORATES the nervous system when exhausted.

DR. J. COLLIS BROWNE'S

CHLORODYNE rapidly cuts short all attacks of
EPILEPSY, SPASMS, COLIC,
PALPITATION, HYSTERIA.

IMPORTANT CAUTION.—

THE IMMENSE SALE of this REMEDY has given rise to many UNSCRUPULOUS IMITATIONS. Be careful to observe Trade Mark. Of all Chemists, Is. 14d., 2s. 9d., and 4s. 6d.

SOLE MANUFACTURER,
