Guarantee Fund and Divisible Surplus, £10,294,158.

HEAD OFFICE FOR THE UNITED KINGDOM:

16, 17 & 18, CORNHILL, E.C.

D. C. HALDEMAN, General Manager

Scottish Provident

stituted
1837.

Institution.

Incorporated
1848.

HEAD OFFICE: 6, St. Andrew Square, EDINBURGH.

IN THIS SOCIETY are combined the Advantages of
Mutual Assurance with Moderate Premiums.

THE PREMIUMS are so moderate that at usual ages for Assurance £1200 or £1250 may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) £1000 only—the difference being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

THE WHOLE SURPLUS goes to the Policyholders, on a system at once safe and equitable,—no share being given to those by whose early death there is a loss to the common fund.

Examples of Premium for £100 at Death.—With Profits.

AGE.	25	30*	35+	40	45	50
During Life.....	£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7
25 Payments	2 10 2	2 13 0	2 17 9	3 4 6	3 14 0	4 8 7
15 Payments	3 8 5	3 12 1	3 18 0	4 5 8	4 16 2	5 11 8

* A PERSON OF 30 may secure £1000 at Death by a yearly payment, *during life*, of £20 : 15s., which would in most Offices secure (with profits) £300 only. Or he may secure £1000 by 25 payments of £26 : 10s., being thus free of payment before age 55.

+ AT AGE 35, the Premium *ceasing before age 60* is, for £1000, £28 : 17s. 6d., being about the same as many Offices require during the whole of life. To Professional Men and others whose income is dependent on health, the limited payment system is specially recommended.

THE SURPLUS at last Investigation amounted to £1,423,000.

More than one half of the Members who died during the Septennial period were entitled to Bonuses which, notwithstanding that the premiums do not as a rule exceed the non-profit rates of other Offices, were on the average equal to an addition of about 50 per cent. to the policies which participated.

The ACCUMULATED FUNDS exceed £11,500,000.

ARRANGEMENTS as to SURRENDER, NON-FORFEITURE, LOANS on POLICIES, IMMEDIATE PAYMENT OF CLAIMS, FREE RESIDENCE, &c., are specially liberal.

JAMES GRAHAM WATSON, *Manager.*

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON OFFICE: 17, KING WILLIAM ST., E.C.—J. MUIR LEITCH, *Secretary.*

31, GREAT PORTLAND STREET, W. Telegram: SELFHHELP, LONDON.

THE pick of the output of a number of Irish Factories, and of Peasant hand-work, comes solely to my DEPOT here; and from thence is distributed all over the Globe. The taste bestowed on the selection, the variety, and the value are beyond question. Nothing but what is made of Pure Wool finds any space in my warehouse. Great strides have been made by the manufacturers of recent years towards meeting the wants, and even fancies, of the British and Foreign public; and they fear no competition in their own class of goods. Now that shoddy is rampant everywhere, all interested in the perpetuation of the good name and fame of our manufactures should study to support those who strive after that object; assist thereby in the development of Irish trade, our immediate interest: and at the same time procure satisfaction to themselves. (11th year.) **RETAIL, WHOLESALE, & EXPORT.**

Description of some of my Standard Goods. Detailed Catalogues on application.

IRISH FRIEZES (strong, rough TWERDS) made in the Marquis of Waterford's Industrial House (*vide* special circular). These are *par excellence* the Cloths for **Country Suits, for Travellers, for Sportsmen, and for Cold Climates**, being substantial, warm, pliable, hard-wearing, and almost weather-proof; made in various mixtures; dark and light, plain and plaids. Make also most useful and comfortable Ulsters. Price 3s. yard, 28 inches wide.

IRISH HOMESPUNS.—These, like the FRIEZES, are admirable for gentlemen's Country Suits, Fishing, Shooting, Golfing, etc.; they are lighter in weight, and more loosely woven, after the style of Harris Homespuns. 28 inches, 3s. yard; in pretty light weavings and fancies.

Very stout **IRISH TWEEDS** for rough country wear at home or abroad. 2s. 6d. 3s. 6d. yard; splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.

Extra thick FRIEZES, plain and napped, for heavy travelling and driving Ulsters or Suits in high latitudes, double width, from 6s. to 10s. 6d. yard.

Useful and substantial **IRISH TWEEDS** for ordinary wear, town or country, 2s. 9d., 3s. and 3s. 3d. yard, 28 inches. (For youths' wear many of these are excellent, being hard twisted and closely woven.)

IRISH "SAXONY" TWEEDS for professional or business wear, made from fine colonial wools; 3s. to 4s. 6d. yard, according to weight; and degree of fineness.

IRISH (thin) HOMESPUNS make capital suits for warm climates or for home summer wear, being light, woolly, and cool, 2s., 2s. 3d. and 2s. 6d. yard, 28 inches. Some of these are also admirably suited for ladies' Gowns, Cloaks, and Ulsters, others for Cycling; and still others for small boys' suits.

DONEGAL HOMESPUNS, hand-spun and hand-woven by the peasantry, 2s. to 3s. 6d. yard, according to weight and merit, 27 to 30 inches wide. The thin ones are perfect for tropical climates, the medium for ordinary summer lounge wear, whilst the heavier are almost identical with the genuine high-priced Harris homespuns, and made in exactly the same way. (*vide* Special Circular.)

Cork, Galway, Kerry, Tipperary, and Mayo peasant-made homespuns, 2s. upwards. (Rare.)

UNDYED or SHEEPS GREY HOMESPUNS, light, medium, and heavy, 2s. 3d. to 3s. 6d. yard. **IRISH HOMESPUN TWEEDS** for a serviceable all round suit; and boys' wear, 28 in., 2s. 8d. yd.

Special IRISH TWEEDS for Mourning and Clerical wear, 2s. 6d. to 3s. 6d. yard, 28 in. wide.

NAVY SERGES of superior manufacture and hard wear, comprising the recognised yachting qualities, those for ordinary wear, and the rough, strong Royal Navy and Police SERGES; price according to quality and weight. Also Black and Grey SERGES.

IRISH MELTONS; PILOT CLOTHS; DIAGONALS; VICUNAS; WHIP-CORDS or RIDING TWEEDS and TROUSERINGS; all of sterling value, and fixed, closest prices.

IRISH FLANNELS, TWEEDS and CASHMERES for TROPICAL SUITS. SHIRTINGS, TRAVELLING RUGS; all of exceptional worth, and seldom to be met with.

HAND-KNITTED SOCKS and STOCKINGS, made by the Irish peasantry: Socks, 9d., 10½d. and 1s. pair: Stockings, plain ribbed, 2s. 6d. pair; Fancy, 3s. to 4s. 6d. pair. Gloves 9d. to 2s. pair.

FLANNEL TWEEDS for thinnest tropical suits, made of selected wools, mostly natural browns; well spun, and woven on hand-looms. They wear extremely well and don't shrink. Anglo-Indians, "Cape" residents and others are urged to give this speciality of mine a trial. 16½d. to 2s. 6d. yard.

Patterns of any of above by request. Applicants must be explicit in stating their wants as to quality, and fancy as regards pattern; and whether for Town or Country wear. A promise also must be given that they will be returned carefully within a week, anywhere in the United Kingdom (those living in London are expected to call and view the stock for themselves); abroad, by next mail after a week's time for examination.

With few exceptions, I allow a discount of 10% off above prices for orders aggregating over 100 yards at a time—7½% ditto over 50 yards; and 5% over 25 yards—an inducement to circulate the patterns amongst friends, especially when sent to distant countries; the higher discounts are great concessions.

Parties abroad, not caring to wait for Patterns to be sent to order from, may depend upon my exercising diligence and fidelity in selecting for them, if they give a clear indication of their wants and enclose a remittance (as I know by experience the kind of clothes best suited to every climate and country). Any surplus will be at their disposal.

Customers employing their own tailor will find the cost of making a suit, with furnishings, varies from about 21s. in the country to 35s. in London. With this information an estimate can be made of the total cost, and saving effected.

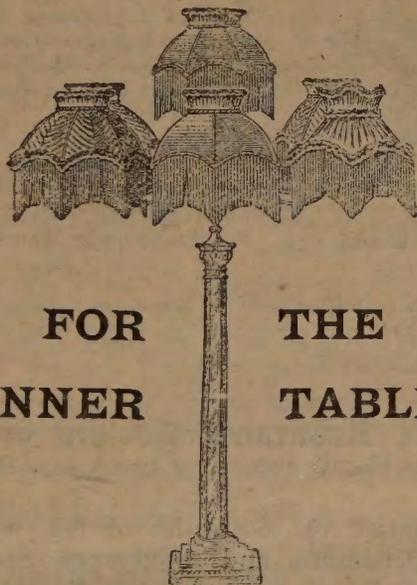

All Cloths average 28 inches wide, except when stated to be double width; 7 yards single width, or 3½ yards double, is the quantity for an ordinary size man's suit; 5 yards to 8 yards for Ulster, according to length and if cape is required. The weight of a suit length varies from 8 lbs. for a light Homespun or Tweed to 8lbs. for a thick Frieze. When parcels are to be forwarded by post the cost must be added to remittance: if by rail or sea, charges will be booked forward.

Correspondence in various languages. (Established over 50 years.)

"CRICKLITE" LAMPS

FOR DOUBLE WICK WAX LIGHTS,
OR ELECTRIC LIGHT.

Clarke's Double
Wick Wax Lights
are the only lights
for burning in these
Lamps.

Clarke's Double
Wick Wax Lights
are the only lights
for burning in these
Lamps.

FOR THE
DINNER TABLE.

A NEW BRANCH SHOW ROOM at 132, REGENT ST., W.,
has been opened for the Sale of these Charming Lamps for Lighting a Dinner
Table.

N.B.—These Lamps can be OBTAINED ONLY at the "CRICKLITE" LAMP DEPOT,

&c. &c.

LONDON

OFFICE: 12, WARWICK LANE,

PATERNOSTER ROW

PREFACE TO THE XXXIIIRD ANNUAL VOLUME.

THE changes rendered necessary by the General Election have made certain pages of the present volume almost unrecognisable, and the sections devoted to the Service Lists, the Peerage, and Knightage, have been greatly disturbed by the number of casualties in the War in South Africa. Every section has been subjected to the most rigid scrutiny, and by concentration and rearrangement room has been found for the Civil Service of Scotland and Ireland, to give effect to the process of decentralisation which has of late come about in the system of government.

In the Appendix will be found an epitomised History of the XIXth Century, and an account of Men and Weapons in the South African Campaign. In an alphabetical list, the length of which must give pause to all, will be found the names of Commissioned Officers and Army Nurses who have fallen in the War. Among other articles are short treatises on England and the Dutch Colonies, Voters' Qualifications, and many other matters; while it has been found possible to insert a List of Officers Risen from the Ranks and now serving on the Active List of the Army. Miscellaneous statistical tables have been added here and there, and the Article on Mercantile Fleets of the World, considerably enlarged once again, will surprise many who have hitherto regarded England as undisputed "Mistress of the Seas."

Year by year the Editor acknowledges his indebtedness to correspondents for the loyalty of their letters and for the benefit derived from their suggestions. In the year that is passed the number of letters has largely increased, with a concomitant increment of suggestions. While again thanking the correspondents, the Editor trusts that the ALMANACK will merit their continued assistance, and that the present year's issue will be found to deserve the good opinion of all, at least as completely as any of its predecessors. Letters containing suggestions should be posted to reach the office not later than the 1st of October, in order that they may be considered to their full advantage.

WARWICK LANE, PATERNOSTER ROW,
LONDON, 23rd November, 1900.

DURATION OF LIGHT AND DARKNESS.

The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. For the first three and last six days of January there is no moonlight from 6 P.M. till 6 A.M., but from the 11th to the 17th it will be seen that there is moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—

WHITAKER'S ALMANACK FOR 1901.

BEING THE FIFTH AFTER BISSEXTILE, AND 64 AND 65 OF QUEEN VICTORIA.

Common Notes for the Year.

Golden Number	II	Ascension Day—Holy Thursday	May 16
Epaet	10	Birth of Queen Victoria (1819)	" 24
Solar Cycle	6	Pentecost—Whit Sunday	" 26
Roman Indiction	14	Trinity Sunday	June 1

By H. F. L. MEYER.

EXPLANATIONS.

The old style ended in Italy on Oct. 4, 1582, and the new style began on Oct. 15, 1582; but in England the old style ended on Sept. 2, 1752, and the new style commenced on the following day, that day being called Sept. 14, 1752. Thus in that year the dates from Sept. 3 to Sept. 13 did not exist. In most other countries the change took place between 1582 and 1752, but Greece, Russia, and the Balkan States still adhere to the old style.

Examples:—To find the day of the week for 17 Nov., 1247. Under the year 47 in the line of the century 1200 stands Tu; take Tu above Nov., and in this line, over the 17th day, stands Su = Sunday.

On what day of the week was April 7, 1800? The letter for the century is W, which for Apr. stands in the second column of the central table, and in this line stands M for the 7th.

When will June 6 be on a Monday? The 6th day shows the M in a line, which for June gives Sa, and Sa for 1800 shows the year 98, and for 1900 the years 4, 10, 21, &c.

LEAP YEARS.

The years in heavier type are leap years, for which the two months January and February must be used. Examples below.

CENTURIES.

OLD STYLE. NEW STYLE.

...	700	1400	...	1700	2100	Sa	Su	M	Tu	W	Th	F
100	800	1500	F	Sa	Su	M	Tu	W	Th
200	900	1600	...	1800	2200	Th	F	Sa	Su	M	Tu	W
300	1000	1700	W	Th	F	Sa	Su	M	Tu
400	1100	...	1500	1900	2300	Tu	W	Th	F	Sa	Su	M
500	1200	...	1600	2000	2400	M	Tu	W	Th	F	Sa	Su
600	1300	Su	M	Tu	W	Th	F	Sa

Examples for Leap Years.

When will Jan. 25 be on a Friday? The 25th day shows the F in the sixth line above it, and in this horizontal line stands Tu for Jan. and W for Jan. Now Tu for 1800 gave the year 95, and gives for 1900 the years 1, 7, 18, &c., and W is for the leap years in 1900, which are 24, 52, and 80.

In what years will Jan. 1 fall on a Sunday? The 1st day gives the Su for Jan. and Jan. in the 7th line of the week days, and these Su and M for 1800 show the year 99, and for 1900 the years 5, 11, 22, 28, 33, &c.

For further examples see the next column.

JOSEPH WHITAKER, F.S.A., was born on 4 May, 1820, and died 15 May, 1895. In the line of 1800, under the year 20, stands Su, and May shows the Su in a line which for the 4th has Thursday. 1895 began on a Tu, and the Tu above May has in that line a W for the 15th.

The initial letter for the year ■ is M, therefore the 25 July of that year was a Thursday. The letter for 300 is Tu, therefore we use Tu for any of the months in that year, and find the 4 Feb. to be ■ Sunday. 1100 has M, 1101 has Tu, thus the 3 Aug. 1101 was a Saturday. February has 5 Sundays in the leap years 1824, 1852, 1880, 1920, 1948, 1976, &c. 1901, the first year of the new century, has five Sundays in March, June, Sept. and Dec. There are 53 Sundays in 1899, 1905, 1911, 1916, &c. A week day with a fixed date is repeated at intervals of 5, 6, or 11 years, but with the leap day at 12, 23, or 40 years.

1900 was not a leap year, for it was found in the sixteenth century that three leap days must be omitted in every four centuries, since the length of the year is not 365 $\frac{1}{4}$ 6 $\frac{1}{2}$, but 365 $\frac{1}{4}$ 5 $\frac{1}{2}$ 48m. 46s., and it was decided that these secular years 170, 1800, and 1900 should be common years, but 2000 a leap year.

The Russian date "Dec. 2, 1890," means the Friday which was the 7th in Russia and the 15th in England. On and after 1st March, 1900, there is a difference of 13 days between the old style and the new. The historical English date "Jan. 30, 1548-9" shows the old style 1548, and the new style 1549, for the year 1548 ended on March 24.

The Solar year of 365 days could be divided into 13 months of 28 days each (excepting the last month, which would have 29, or in leap year 30), and the commencement of the year on the shortest day would make the calendar more consistent with astronomical events. The 1st, 8 h, 15th, and 22nd days of each month would be on a certain day of the week. By this calendar the 1st day of 1900 was a Thursday (the 21 Dec., 1899), and the next leap day, that of 1904, would be the 30th of the 13th month (Tuesday the 20 Dec.).

RAINFALL IN JANUARY, 1900.

In this month rain fell on 22 days. The total fall for the month was 2'29 inches; *above* the average of fifty years, 1841-90, by 6'30 inch.

MONTHLY NOTES.

January 1. All cases of infection to be notified to the Local Authorities—Dog and establishment licences renewable. Queen's taxes due.

—, Parliamentary and Local Government Registers of Electors come into force.

—, Holiday on Stock Exchange; Bank Holiday in Scotland.

5. Dividends on Consols, &c., due.

9. Christmas Fire Insurances must be paid.

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, Souths Afternoon, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semidiameter at Noon, Age at Noon, Configuration of Jupiter's Satellites at 7h. A.M. Rows 1-31.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks at 6h. 2m. morn., and Twilight ends at 6h. 6m. aft., the length of the Day being 7h. 52m.

Jan. 2. Earth at least distance from the Sun, 9h. aft.

Jan. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 10' 6s.

Jan. 6. Occultation of alpha Cancri, magnitude 5 1/2. The disappearance takes place at 6h. 36m. aft., 145 degrees from the vertex; the reappearance at 7h. 31m. aft., 317 degrees from the vertex.

Jan. 18. Venus in conjunction with the Moon, 2h. aft. zeta 2 12' S.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 9' 4s.

Jan. 20. Mercury in conjunction with the Moon, 3h. aft. gamma 6' 34' S.

Jan. 22. Mercury in superior conjunction with the Sun, 2h. morn.

Jan. 28. Occultation of 13 Tauri; magnitude 5 1/2. The disappearance takes place at 8h. 3m. aft., 354 degrees from the vertex; the reappearance at 8h. 28m. aft., 310 degrees from the vertex.

Jan. 31. Occultation of gamma 1 Orionis, magnitude 4 1/2. The disappearance takes place at 2h. 41m. morn., 69 degrees from the vertex; the reappearance at 3h. 36m. morn., 229 degrees from the vertex.

In this month the Mornings increase 25 m., and the Afternoons 45 m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), H. M. S. Rows 1-31.

MORNING AND EVENING STARS.

Mercury is a morning star at the beginning of the month, and an evening star at the end.

Venus is a morning star throughout the month, rising low down in the S.E. 1h before the Sun.

Mars is in Leo throughout the month. Stationary on the 11th between epsilon and delta Leonis.

Jupiter is a morning star, rising about same time as, and not far from, Venus.

Saturn is a morning star, rising shortly before the Sun, low down in the S.E.

APPARENT DECLINATION OF THE ABOVE PLANETS

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), H. M. S. Rows 1-31.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: Planet (Sun, Mercury, Venus, Mars, Jupiter, Saturn), H. M. S. Rows 1, 15, 25.

SEMI DIAMETER OF SUN AND PLANETS.

Table with columns: Planet (Sun, Mercury, Venus, Mars, Jupiter, Saturn), H. M. S. Rows 1, 15, 25.

In the early part of the month the constellations Camelopardus, Lynx, Gemini, Monoceros, and Canis Major are on the meridian about midnight. In Gemini there is a fine compressed cluster of small stars in the right leg of Pollux, in R. A. 6h. 48m., and Decl. 18° 8' N., nearly midway between γ and ζ Geminorum. This cluster is triangular in shape, and, in small telescopes, hardly distinguishable from a nebula. It can be best observed on the nights immediately before and after the 20th. There is a very fine cluster in Canis Major, in R. A. 6h. 43m., and Decl. 20° 39' S., about 4' South of Sirius. With a very small astronomical telescope the individual stars can be easily distinguished; and with a low-power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes. Neptune can be observed early in this month. See p. 73.

MONTHLY NOTES.

Feb. 1. Partridge and pheasant shooting ends. Copies of Register of Voters to be sent to Secretary of State within three weeks.

11. Scottish general salmon-fishing begins.

19. Notice of Election of Borough Auditors to be published. Nominations must be delivered by the 21st.

28. Hare-hunting ends.

RAINFALL IN FEBRUARY, 1900.

In this month rain fell on 19 days. The total fall for the month was 3'59 inches; above the average of fifty years, 1841-99, by 2'11 inch.

* The Meteorological Observations throughout the Almanack are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest readings of the Thermometer with the average for 50 years; the mean of Barometer at a height of 155 feet above the mean level of the sea; the daily Rainfall, the daily Sunshine and the daily general direction and maximum force of the Wind.

Mean Longitude of Moon's Ascending Node, February 1, 238° 10' III.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5h. 42m. morn., and Twilight ends at 6h. 46m. aft., the length of the Day being 9h. 6m.

Feb. 3. Occultation of α¹ Cancri, magnitude 5½. The disappearance takes place at 5h. 20m. morn., 3° from the vertex; the reappearance at 5h. 42m. morn., 318° from the vertex.

Feb. 5. Mars in conjunction with the Moon, 10h. aft. δ⁹ 54' N

Feb. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 76s.

Feb. 10. Occultation of B. A. C. 4700, magnitude 5½. The disappearance takes place at 5h. 38m. morn., 124° from the vertex; the reappearance at 6h. 53m. morn., 244° from the vertex.

Feb. 15. Jupiter in conjunction with the Moon, 7h. morn. δ² 51' S.

Feb. 15. Saturn in conjunction with the Moon, 7h. aft. η³ 3' S.

Feb. 17. Venus in conjunction with the Moon, 9h. aft. ♀⁵ 45' S.

Feb. 19. Mercury at least distance from the Sun, 9h. morn.

Feb. 19. Mercury at greatest elongation (18°) East, 10h. aft.

Feb. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 60s.

Feb. 22. Mars in opposition to the Sun, 6h. morn.

Feb. 25. Mars at greatest distance from the Sun, 8h. morn.

In this month the Mornings increase 50 m., and the Afternoons 48m.

MORNING AND EVENING STARS.

♿ MERCURY is an evening star during the month; may be well observed about 1h. after Sunset, in the middle of the month, a little S. of W. Near Moon on 20th.

♀ VENUS is a morning star, rising in the S.E. shortly before the Sun.

♂ MARS in Leo. In opposition towards the end of the month, and not far from Regulus.

♃ JUPITER is a morning star; in Sagittarius; rising low down in the S.E. about two hours before the Sun in the early part of the month.

♄ SATURN a morning star; not far from Jupiter.

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames, will probably a higher rise of the river, and the low-lying riverside districts to be flooded. See Tides, p. 74.

28	East	33	11 56	31	37 1	30	2 59

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars situated in the Crab's southern claw, in R.A. 8h. 45m. 45s., and Decl. 12° 11' N., consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Praesepe," can be best observed in this month. It does not consist of a very great number of stars, but the components are, as com-

pared with those of other clusters, of considerable magnitude. It is situated in R.A. 8h. 34m., and Decl. 20° 20' N., about 1° to the west of a line joining the stars δ and γ Cancri.

The triple star ζ in Cancer may be examined in this month: it will be found in R.A. 8h. 6m. 31s., and Decl. 17° 57' N. Two of the stars are only 1' apart, and the third about 5" from them.

Vesta be well observed early in the month, see p. 73.

At midnight, in the beginning of March, the constellations Ursa Major, Leo, Crater, and Hydra are on the meridian. In Ursa Major is a large planetary Nebula, appearing as a mass of attenuated light, from 3 1/2' to 4' in diameter; it is situated in R.A. 11h. 8m. 57s., and Decl. 55° 34' N. Its spectroscopic examination leads to the inference that it is mainly a mass of incandescent gas.

towards the end of this month. Between Virgo and Coma Berenices is a large Nebula, one of the class known as "Spiral Nebulae," situated in R.A. 12h. 13m. 34s., and Decl. 15° 0' N. With a large telescope of 8 inches aperture it appears to be resolvable in the centre into two bright star-like points. This constellation is thickly strewed with nebulae, which may be best observed on the evening; immediately before and after the 20th of the month.

RAINFALL IN APRIL, 1900.

In this month rain fell on 11 days. The total fall for the month was 0.93 inch; below the average of fifty years, 1841-90. by 0.73 inch.

MONTHLY NOTES.

- April 1. Refreshment House Licences to be renewed. Quarter Sessions to be held this week unless otherwise fixed.
- 5. Dividends on Consols, &c., due. Financial year, 1900-1901, for Imperial purposes ends to-day.
- 6. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.
- 8. English Bank Holiday.
- 9. Fire Insurances must be paid.
- 15. Parish Councils to hold their annual meeting on or within seven days after this date. There will be no Parish Council elections this year.
- 15. Edinburgh Spring Holiday.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3^h. 37m. morn., and Twilight ends at 8^h. 31m. aft., the length of the Day being 12^h. 52m.

Apr. 4. Mercury at greatest elongation (28^o) West, 6^h. morn.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 44^s.

Apr. 8. Occultation of ω² Scorpii, magnitude 4¹/₂. The disappearance takes place at 3^h. 59m. morn., 71^o from the vertex; the reappearance at 5^h. 19m. morn., 267^o from the vertex.

Apr. 8. Occultation of ω¹ Scorpii, magnitude 4. The disappearance takes place at 4^h. 5m. morn., 5^o from the vertex; the reappearance at 4^h. 20m. morn., 342^o from the vertex.

Apr. 11. Saturn in conjunction with the Moon, 7^h. aft. 1^h 3' 42" S.

Apr. 18. Venus in conjunction with the Moon, 7^h. aft. 9' 3' 47" S.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 5^os.

Apr. 26. Saturn stationary, 5^h. morn.

Apr. 27. Mars in conjunction with the Moon, 2^h. aft. 3' 7" 57" N.

In this month the Mornings increase 1^h. 1m., and the Afternoons 47m.

MORNING AND EVENING STARS.

♄ MERCURY is a morning star, in Pisces. Too near the Sun for observation.

♀ VENUS is too near the Sun for observation in this month.

♂ MARS in Leo, not far from Regulus.

♃ JUPITER is a morning star in Sagittarius. Rises in the S.E., 3^h. before the Sun.

♄ SATURN is a morning star, near to Jupiter.

At the latter part of April the constellations Draco, Boötes, and Libra will be on the meridian about midnight. An irresolvable double Nebula in Canes Venatici, near η Ursæ Majoris, can be observed in this month: it is situated in R.A. 13h. 25m. 40s., and in Decl. 47° 43' N. The Southern Nebula is surrounded by a faint ring of nebulous light, and was called by Herschel, in his Catalogue, "the Halo Nebula." Later observations placed it among the "Spiral" Nebulae. That this is not a true incandescent Nebula is shown by the ab-

sence of bright lines in its spectrum. In R.A. 15h. 13m. 30s., Decl. 2° 28' N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel could distinguish over 200 stars in this group in the field of his 40-foot reflector, but found the middle portion so condensed that the individual stars could not be distinguished. Lord Rosse says that the stars range from the 12th to 15th mag. The evenings about the 18th are the best for observing these objects.

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, Souths Afternoon, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semidiameter at Noon, Age at Noon, Configurations of Jupiter's Satellites at ah. A.M. Includes rows 1-31 with various astronomical data.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at ah. 3m. morn., and Twilight ends at 9h. 51m. aft., the length of the Day being 14h. 46m.

May 1. Venus in superior conjunction with the Sun 1h. morn.

May 2. Occultation of i Virginis, magnitude 5½. The disappearance takes place at 3h. 18m. morn., 50° from the vertex; at the reappearance the star will be below the horizon at Greenwich.

May 3. A penumbral Eclipse of the Moon, partly visible at Greenwich. See p. 69.

May 5. Mean time of Sun's semidiameter passing the meridian, 1m. 6½s.

May 8. Occultation of 21 Sagittarii, magnitude 5. The disappearance takes place at oh. 39m. morn., 86° from the vertex; the reappearance at 1h. 51m. morn., 305° from the vertex.

May 9. Occultation of d Sagittarii, magnitude 5. The disappearance takes place at oh. 26m. morn., 153° from the vertex. The reappearance at 1h. 23m. morn., 247° from the vertex.

May 18. Total Eclipse of the Sun, invisible at Greenwich. See p. 69.

May 20. Mean time of Sun's semidiameter passing the meridian 1m. 7½s.

May 31. Occultation of B.A.C. 5109, magnitude 5½. The disappearance takes place at 1h. 49m. aft., 34° from the vertex; the reappearance on June 1st at oh. 36m. morn., 319° from the vertex.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: D., ♄ MERCURY, ♀ VENUS, ♂ MARS, ♃ JUPITER, ♄ SATURN. Includes rows 1-31 with right ascension data.

In this month the Mornings increase 43m., and the Afternoons 43m.

MORNING AND EVENING STARS.

♄ ♀ MERCURY and ♀ VENUS are evening stars; at the end of the month they may be observed setting about 1h. after the Sun in the N.W.

♂ MARS is in Leo not very far from Regulus.

♃ JUPITER is a morning star; low down in the S.E. In Sagittarius.

♄ SATURN not far from Jupiter; in Sagittarius.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25. Includes rows 1-31 with declination data.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: D., ☉, ♀, ♀, ♂, ♃, ♄. Includes rows 5, 15, 25 with parallax data.

SEMIDIAMETER OF SUN AND PLANETS.

Table with columns: ☉, ♀, ♀, ♂, ♃, ♄. Includes rows 5, 15, 25 with semidiameter data.

Towards the end of May we shall find the constellations Draco, Hercules, Ophiuchus, and Scorpio on the meridian about midnight.

Hercules contains a very splendid cluster of stars situated in R.A. 16h. 38m. 11s., and Decl. 36° 41' N. This, like most of the star-clusters, is condensed in the centre, and may be easily resolved with moderate telescopic aid; and a few days about the 18th, when the Moon is absent, it may, if the opportunity is taken of a very clear night,

be seen with the naked eye, plainly, between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

Uranus can be observed at end of this month and beginning of June, see p. 73.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Sagittarius there is a notable and very extensive Nebula, known as the "Horse-shoe," from its peculiar shape. It will be found in R.A. 13h. 14m. 54s., and Decl. 16° 15' S. The spectroscopic shows this Nebula to consist of a mass of incandescent gas. Professor Holden says that one arm of the

Nebula has changed its position since Herschel's time. In shape it somewhat resembles the great Nebula in Andromeda.

In Sagittarius, a little West and North of A, is a globular cluster of very small stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing this Nebula except when southing. The evenings about the 16th will be the most favourable for observing it.

RAINFALL IN JULY, 1900.

In this month rain fell on 5 days. The total fall for the month was 1'42 inch; below the average of fifty years, 1841-90, by 1'05 inch.

MONTHLY NOTES.

July 1. Special Sessions for Licences to deal in Game to be held this month.—Quarter Sessions held this week.
 5. Dividends due. 8. Old Quarter Day.
 9. Fire Insurances to be paid.
 13. Glasgow Fair Saturday. 19. Eclipse Stakes.
 20. Rates and Taxes due January 5th must be paid on or before this day by Voters to prevent disqualification.—Last day for County and Parochial Electors to send in their claims to vote.

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, Souths Morning, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semi-diameter at Noon, Age at Noon, Configuration of Jupiter's Satellites at 11h. P.M. Rows 1-31.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

July 1. There is no real night until after the 20th of this month.

July 1. Mercury at greatest distance from the Sun, 7h. morn.

July 4. Earth at greatest distance from the Sun, 5h. aft.

July 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 8'4s.

July 13. Mercury in inferior conjunction with the Sun, ch. aft.

July 15. Mercury in conjunction with the Moon, 4h. aft. ♀ 0° 37' S.

July 17. Venus in conjunction with the Moon, 6h. aft. ♀ 6° 55' N.

July 20. Mean time of Sun's semidiameter passing the meridian, 1m. 7'4s.

July 23. Occultation of 21 Sagittarii, magnitude 5. The disappearance takes place at 5h. 51m. a.m., 61° from the vertex; the reappearance at 11h. 6m. aft., 271° from the vertex.

July 28. Jupiter in conjunction with the Moon, 11h. aft. ♀ 3° 37' S.

July 29. Occultation of d Sagittarii, magnitude 5. The disappearance takes place at 8h. 33m. aft., 116° from the vertex; the reappearance at 9h. 48m. aft., 252° from the vertex.

In this month the Mornings decrease 35m., and the Afternoons 29m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: ♀ MERCURY, ♀ VENUS, ♂ MARS, ♃ JUPITER, ♄ SATURN. Rows D, 5, 10, 15, 20, 25, 30.

MORNING AND EVENING STARS.

♀ MERCURY is a morning star towards the end of the month; in Gemini.

♀ VENUS is an evening star; setting in the N.W. about 1h. after the Sun; very near Regulus on the 25th.

♂ MARS is an evening star setting due W. in middle of month, about 2h. after the Sun.

♃, ♄ JUPITER and SATURN near together; rising low down in S.E. in early evening.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: ♀, ♂, ♃, ♄. Rows 5, 10, 15, 20, 25, 30.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: ☉, ♀, ♀, ♂, ♃, ♄. Rows D, 5, 15, 25.

SEMI-DIAMETER OF SUN AND PLANETS.

Table with columns: ☉, ♀, ♀, ♂, ♃, ♄. Rows 5, 15, 25.

Mean Longitude of Moon's Ascending Node, July 1, 230° 13' 11".

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ , is the best example of the Annular Nebulae; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it well: it is in R.A. 18h. 49m. 53s., and Decl. 32° 54' N.

It exhibits a spectrum as if composed of an incandescent gas. There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyrae and β Cygni: it was formerly considered a Nebula, until resolved into stars by Sir William Herschel in 1784. It is in R.A. 19h. 12m. 44s., Decl. 30° 0' N. The best nights for the observation of these objects are those just before and after the 15th.

At the beginning of August Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula, nearly 4° due north of γ Sagittæ, is the famous "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed some trace of resolvability shown. It is situated in R.A. 19h. 55m. 20s., and Decl. 22° 27' N., and gives a spectrum of bright lines, according to Sir William Huggins.

There is a small bright globular cluster, 4° due south of ε Delphini, consisting of a mass of very small stars, not very easy for small telescopes; it is situated in R.A. 20h. 29m. 6s., and Decl. 7° 3' N. This cluster is a good one, according to Sir John Herschel, for testing the space-penetrating power of telescopes. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 14th of this month.

MONTHLY NOTES.

September 1. Declarations as to misdescription or other error in County or Burgess Lists to be delivered to the Town Clerks and Clerks of the Peace.—The lists of objections to County Electors, and claims and objections in Boroughs, to be open to inspection till 8th. Lists of Jurors to be affixed to church doors for the first three Sundays. Salmon close-time begins.
 9. First day on which Revising Barristers may hold revision Courts.
 24. Sheriffs of City of London to be sworn in.
 29. Accounts of Overseers to be made up to this date for the past half-year.

RAINFALL IN SEPTEMBER, 1900.
 In this month rain fell ■ ■ days. The total fall for the month was 1.13 inch; below the average of fifty years, 1841-90, by 1.12 inch.

THE MOON.

Table of Moon's position: Day of M., Rises Afternoon, Sets Morning, Souths Morning, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semidiameter at Noon, Age at Noon, Configuration of Jupiter's Satellites at 8h. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 7m. morn., and Twilight ends at 8h. 53m. aft., the length of the Day being 13h. 34m.

Sept. 5. Occultation of ε Tauri, magnitude 3 1/2. The disappearance takes place at 4h. 2m. morn., 146° from the vertex; the reappearance at 4h. 58m. morn., 230° from the vertex.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 4' 0".

Sept. 10. Occultation of κ Cancri, magnitude 5. The disappearance takes place before the star has risen; the reappearance at 3h. 25m. morn., 334° from the vertex.

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 3' 8".

Sept. 23. Sun enters Libra. Autumn commences, 6h. aft.

Sept. 23. A near approach of β Capricorni to the Moon, magnitude 3 1/2. The least distance of star from Moon's limb at 9h. 26m. aft., 32° from the vertex.

Sept. 27. Mercury at greatest distance from the Sun, 7h. morn.

Sept. 28. A near approach of δ Piscium to the Moon, magnitude 4 1/2. The least distance of star from Moon's limb at 6h. 47m. aft., 18° from the vertex.

In this month the Mornings decrease 46m., and the Afternoons 1h. 6m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table of Apparent Right Ascension: Columns for Mercury, Venus, Mars, Jupiter, Saturn with hours, minutes, seconds.

MORNING AND EVENING STARS.

♁ MERCURY is an evening star in Leo; very near to β Virginis on the 8th.

♃ VENUS is an evening star; setting in early part of month about 1h. after the Sun in S.W.

♂ MARS is an evening star; about 1h. behind the Sun, in the S.W.

♃ ♄ JUPITER and ♄ SATURN may be observed near together; low down in S.W. after Sunset.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table of Apparent Declination: Columns for Mercury, Venus, Mars, Jupiter, Saturn with degrees, arc minutes, arc seconds.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table of Horizontal Equatorial Parallax: Columns for Sun, Mercury, Venus, Mars, Jupiter, Saturn.

SEMI DIAMETER OF SUN AND PLANETS.

Table of Semidiameter: Columns for Sun, Mercury, Venus, Mars, Jupiter, Saturn.

Mean Longitude of Moon's Ascending Node, September 1, 225° 56' m.

ANGULAR DISTANCE of the MOON FROM SATURN.

D.	Position of Planet	P.M.	P.M.	Midnight.
1	West	35 0 29	36 41 24	38 22 47
10	West	49 40 43	50 25 16	52 10 14
19	West	62 48 31	64 36 14	66 24 18
28	West	77 19 24	79 9 35	81 0

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus, R.A. 21h. 25m. 11s., and Decl. 11° 43' N., is a fine globular cluster of very small stars, 4½" north-west of α Pegasi, much condensed towards the centre where the stars cannot be resolved: there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true globular form,

consisting of very small stars very much compressed. It is situated in R.A. 21h. 28m. 17s., and Decl. 1° 16' S.

In the early evening, at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21h. 34m. 44s., and Decl. 23° 36' S., can be observed: it is rather bright, with a central condensation, and does not require great telescopic power to see it well. The best evenings for observation are those immediately before and after the 12th.

Pallas can be well observed in this month; see p. 73.

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, South Morning, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semi-diameter at Noon, Age at Noon, Configurations of Jupiter's Satellites at 6.30 P.M. Rows 1-31.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 8m. morn., and Twilight ends at 7h. 32m. aft., the length of the Day being 11h. 38m.

Oct. 4. Occultation of 71 Orionis, magnitude 5. The disappearance takes place at 5h. 10m. morn., 61° from the vertex; the reappearance at 6h. 9m. morn., 302° from the vertex.

Oct. 5. Mean time of Sun's semi-diameter passing the Meridian, 1m. 4'3".

Oct. 12. Mercury at greatest elongation (25°) East. 5h. aft.

Oct. 17. Occultation of ̵ Ophiuchi, magnitude 4½. The disappearance takes place at 5h. 2m. aft., 135° from the vertex; the reappearance at 5h. 32m. aft., 183° from the vertex.

Oct. 20. Mean time of Sun's semi-diameter passing the Meridian 1m. 5'4".

Oct. 22. Occultation of c¹ Capricorni, magnitude 5. The disappearance takes place at 9h. 5m. aft., 138° from the vertex; the reappearance at 9h. 7m. aft., 141° from the vertex.

Oct. 23. Occultation of κ Aquarii, magnitude 5½. The disappearance takes place at 8h. 53m. aft., 56° from the vertex; the reappearance at 10h. 6m. aft., 228° from the vertex.

Oct. 25. Occultation of λ Piscium, magnitude 5½. The disappearance takes place at 2h. 35m. morn., 35° from the vertex; the reappearance at 3h. 30m. morn., 208° from the vertex.

Oct. 27. A partial Eclipse of the Moon, partly visible at Greenwich, see p. 69.

In this month the Mornings decrease 52m. and the Afternoons 1h. 4m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), and sub-columns for H., M., S. Rows D., 3, 8, 13, 18, 23, 28.

MORNING AND EVENING STARS.

♄ MERCURY is an evening star; near a Libræ about the 10th.

♀ VENUS is an evening star; near to Antares on the 20th.

♂ MARS is an evening star, setting very low down in S. W. after Sunset.

♃ ♄ JUPITER and ♄ SATURN near together, low down in S. W. after Sunset.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), and sub-columns for °, ' (minutes), '' (seconds). Rows D., 3, 8, 13, 18, 23, 28.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: Planet (Sun, Mercury, Venus, Mars, Jupiter, Saturn) and sub-columns for ' (minutes), '' (seconds). Rows D., 5, 15, 25.

SEMI-DIAMETER OF SUN AND PLANETS.

Table with columns: Planet (Sun, Mercury, Venus, Mars, Jupiter, Saturn) and sub-columns for ' (minutes), '' (seconds). Rows D., 5, 15, 25.

Mean Longitude of Moon's Ascending Node, October 1, 225° 23' 0".

RAINFALL IN NOVEMBER, 1899.

In this month rain fell on 9 days. The total fall for the month was 372 inches; above the average of fifty years, 1841-90, by 145 inch. An "Inch of Rain" means a gallon of water spread over a surface of nearly two square feet. 3,630 cubic feet = 100 tons upon an acre

MONTHLY NOTES.

- November 1. Latest day for receiving corrections for Whitaker's Almanack.
- , Salmon-fishing with rod and line ends.—
- Ordinary day of election of Borough Councillors.
- Holiday at Bank Transfer Office and Stock Exchange.—Fox-hunting begins.
- 9. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.
- 11. Martinmas: Scottish Quarter Day.
- 13. County Sheriffs for next year nominated.
- 15. Solicitors', notaries', proctors', and clerks' certificates expire. See Note, Dec. 15.

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, Souths Morning, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semi-diameter at Noon, Age at Noon, Configuration of Jupiter's Satellites at 3 30m P.M. Rows 1-30.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 1m. morn., and Twilight ends at 6h. 27 m. aft., the length of the dry being 9h. 38 u.

Nov. 4. Mercury in inferior conjunction with the Sun, 6h. aft.

Nov. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 7 1/2 s.

Nov. 11. Annular Eclipse of the Sun, invisible at Green wich. See p. 69.

Nov. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 8 9/10 s.

Nov. 21. Mercury at greatest elongation (20°) West, 5h. morn.

Nov. 27. Occultation of 71 Orionis, magnitude 5. The disappearance takes place at 10h. 41m. aft., 49° from the vertex; the reappearance at 10h. 53m. aft., 26° from the vertex.

Nov. 29. Occultation of 63 Geminorum, magnitude 5. The disappearance takes place at 7h. 18m. morn., 102° from the vertex; the reappearance at 8h. 6m. morn., 210° from the vertex.

Nov. 30. Occultation of κ Cancri, magnitude 5. The disappearance takes place at 9h. 54m. aft., 84° from the vertex; the reappearance at 10h. 24m. aft., 20° from the vertex.

In this month the Mornings decrease 48m., and the Afternoons 39m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), Day (D), H. M. S. Rows 1-30.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star; may be well observed on 19th in S.E., rising nearly 2h. before the Sun.

♀ VENUS is an evening star nearly 2h. after the Sun, low down in S.W.

♂ MARS is an evening star; low down in the S.W.

♃ ♄ JUPITER and SATURN may still be seen after Sunset, low down in S.W.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: Planet, Day (D), Declination (° ' "). Rows 1-30.

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: Planet (Sun, Mercury, Venus, Mars, Jupiter, Saturn), Day (D), Parallax ("). Rows 1-30.

SEMI- DIAMETER OF SUN AND PLANETS.

Table with columns: Planet, Day (D), Semi-diameter ("). Rows 1-30.

Mean Longitude of Moon's Ascending Node, November 1, 223° 43' m.

On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula 2½° to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches

local length. It is a very elongated Nebula, 15' long by 3' broad, with a cleft, dark in the middle, and suggests the idea of a flat ring seen very obliquely. It is in R.A. 2h. 16m., and Decl. 41° 49' N. The best evenings for observing it are those immediately before and after the 10th.

THE MOON.

Table with columns: Day of M., Rises Afternoon, Sets Morning, Souths Morning, Right Ascension at Noon, Declination at Noon, Horizontal Parallax at Noon, Semidiameter at Noon, Age at Noon, Configurations of Jupiter's Satellites at Sh. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 41m. morn., and Twilight ends at 5h. 57m. aft., the length of the Day being 8h. 8m.

Dec. 5. Venus at greatest elongation (47°) East, 10h. morn.

Dec. 5. Mean time of Sun's semidiameter passing the meridian 1m. 10'35.

Dec. 14. Occultation of beta Capricorni, magnitude 3 1/2. The disappearance takes place at 6h. 43m. aft., 9° from the vertex; at the time of reappearance the star will be below the horizon at Greenwich.

Dec. 18. Occultation of lambda Piscium, magnitude 4 1/2. The disappearance takes place at 7h. 24m. aft., 35° from the vertex; the reappearance at 8h. 9m. aft., 27° from the vertex.

Dec. 20. Meantime of Sun's semidiameter passing the meridian, 1m. 11'08.

Dec. 22. Sun enters Capricornus. Winter commences, 1h. aft.

Dec. 23. Occultation of epsilon Tauri, magnitude 3 1/2. The disappearance takes place at 5h. 53m. aft., 50° from the vertex; the reappearance at 6h. 12m. aft., 11° from the vertex.

Dec. 24. Mercury at greatest distance from the Sun, 6h. morn.

In this month the Mornings decrease 23m., and the Afternoons increase 5m.

APPARENT RIGHT ASCENSION OF THE PRINCIPAL PLANETS AT MEAN NOON.

Table with columns: Planet (Mercury, Venus, Mars, Jupiter, Saturn), Day (D.), Hour (H.), Minute (M.), Second (S.)

MORNING AND EVENING STARS.

MERCURY is a morning star; low down in the S.E.

VENUS can be well observed in S.E. after sunset.

MARS is an evening star; about 1h. 30m. after the Sun in S.W.

JUPITER and SATURN set shortly after the Sun low down in S.W.

APPARENT DECLINATION OF THE ABOVE PLANETS.

Table with columns: Planet, Day (D.), Hour (H.), Minute (M.), Second (S.)

HORIZONTAL EQUATORIAL PARALLAX OF SUN AND PLANETS.

Table with columns: Planet (Sun, Mercury, Venus, Mars, Jupiter, Saturn), Parallax (")

SEMI- DIAMETER OF SUN AND PLANETS.

Table with columns: Planet, Semidiameter (")

Mean Longitude of Moon's Ascending Node, December 1, 227° 6' 11.

Day of Time of High Water at the undermentioned Places—

Table with columns for Month, Week, and various locations: LONDON BRIDGE, LIVERPOOL, BRISTOL, HULL, GREENOCK, LEITH, DUBLIN (Bar). Each location has sub-columns for Morning and Afternoon, with further sub-columns for H.M. and M. values.

RIISING, SOUTHING, and SETTING of the PRINCIPAL PLANETS at intervals of Seven Days.

Table with columns for planets: MERCURY, VENUS, MARS, JUPITER, SATURN. Each planet has sub-columns for Rises, Souths, and Sets, with further sub-columns for h. m. and s. values.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE POLE STAR.

ANGULAR DISTANCE OF THE MOON FROM ARIETIS.

Table with columns for R.A., DECL. N., Position of Star, 6 P.M., P.M., and Midnight. It includes data for the pole star and the moon's distance from Aries.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine resolvable Nebula of a pearly white colour 1 1/2° North-west of ζ Tauri, in R.A. 5h. 28m. 30s., and Decl. 21° 57' N. This Nebula is the one known as the "Crab."

About the middle of the month Orion souths at midnight, and can be best observed in this month.

This magnificent constellation contains the grandest of all the Nebulae, situate in the Sword-Scabbard. A line drawn from α Orionis through ζ, the third star of the belt, will pass over β Orionis and the Nebula. It can be seen with the naked eye. Evenings before and after the 10th of the month are the best for observing it.

Neptune can be well observed towards the end of the month. See p. 73.

Variation of Time depends upon Longitude; every Degree East of Greenwich is four minutes ~~more~~, and every Degree West four minutes later. Note the variations in the U.S. or in British America.

Tidal Constants,

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.

NOTE.—The time thus found will be Greenwich Time for British, Belgian and Dutch Ports; Dublin Time for Irish Ports, and Paris Time for French Ports.

EXAMPLE 1.—Required the time of high water at Aberdeen on January 1st:—

Time of high water at London Bridge 10h. 5m. Morn.
 Subtract tide interval..... 0 50

Time of high water at Aberdeen..... 9 19 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on January 24th:—

Time of high water at London Bridge 4h. 20m. Morn.
 Add tide interval..... 2 55

Time of high water at Scarborough... 2 5 Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be

taken, in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 24 hours; in this case, the excess will be the time of high water after the noon or midnight following, according to the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, February 16th aft.:—

Time of high water at London Bridge on February 17th + 12 hours..... 2ah. 24m. Morn.
 Subtract tide interval..... 0 50

Time of high water at Aberdeen, Feb. 16th 34 After.

Previous to 1752 the above dates are computed from the Old Style. Those printed in heavier type are leap-years. 1752 had E D up to September 3, but A from September 14 to December 31, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. Until then also the years were considered to begin on March 25; but that, as it did

not affect the date of Easter, is not noticed in this Table. The Table of Moveable Feasts in the Prayer-Book gives all the others after finding Easter in this. The Sunday Letters in the Calendar then enable any one to count the days of the week from Sunday. The tables in modern Prayer-Books are calculated for the New Style only.

The French Republican Calendar.

THIS, although reckoned from the 22nd September, 1792, was not introduced until the 22nd November, 1793. It remained in use only till the 31st December, 1805. The Gregorian Calendar was restored January 1st, 1806 (Nivôse 10, Year XIV.). The months varied in different years, thus Nivôse 1 commenced December 21st in 1793, December 22nd in 1795, December 21st in 1796, December 22nd in 1799, December 23rd in 1803, and December 22nd in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire (<i>Vintage</i>), 23 Sept. to Oct. ■	Germinial (<i>Budding</i>), ■ Mar. to Apr. ■
Brumaire (<i>Foggy</i>), 23 Oct. to Nov. ■	Floréal (<i>Flowery</i>), ■ April to May 20
Frimaire (<i>Sleety</i>), 22 Nov. to Dec. 21	Prairial (<i>Pasture</i>), 21 May to June 20
Nivôse (<i>Snowy</i>), ■ Dec. to Jan. ■	Messidor (<i>Harvest</i>), ■ June to July 19
Pluviôse (<i>Rainy</i>), 21 Jan. to Feb. ■	Thermidor (<i>Hot</i>), ■ July to Aug. 19
Ventôse (<i>Windy</i>), 20 Feb. to Mar. ■	Fructidor (<i>Fruit</i>), 19 Aug. to Sept. 18

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Primidi*), dedicated to Virtue; (*Duodi*) to Genius; (*Triidi*) to Labour; (*Quartidi*) to Opinion; and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, a sixth day, the 22nd or 23rd September (*Septidi*), "Jour de la Révolution," was added. This variation of days has led to considerable confusion, and those who may wish to trace the fourteen years will find very elaborate tables in the English edition of Bourrienne's "Life of Napoleon"; Bentley.

The Athanasian Creed to be read the days marked *.		MORNING PRAYER.		EVENING PRAYER.

The Days of the Roman Month.

In the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year—which, with the Romans, began with March—were called Quintilis and Sextilis; afterwards they were named in honour of the emperors Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be *n* many days before the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in *n* of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undevicesimum Kal. Jan.*), Dec. 13th being *Idibus Decembris*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

In the year 1901 there will be four Eclipses; two of the Sun, and two of the Moon: those of the Moon both partly visible, and those of the Sun both invisible, at Greenwich.

I. A penumbral Eclipse of the Moon, May 3, partly visible at Greenwich.

First contact with the Penumbra	4h. 6m. aft.	} Greenwich Mean Time.
Middle of the Eclipse	31 aft.	
Last contact with Penumbra	8 55 aft.	

The first contact takes place at 62° from the most northern point of the Moon's limb, counting towards the East; and the last contact 38° from the same point, counting towards the West.

The Moon rises at Greenwich, on May 3, at 7h. 28m. aft.

II. A total eclipse of the Sun, May 18, invisible at Greenwich. Begins on the Earth generally at 1h. om. morn., in longitude 52° East of Greenwich, and latitude 20° South. Central Eclipse begins generally at 3h. 58m. morn. in longitude 40° East of Greenwich, and latitude 28° South. Central Eclipse ends generally at 7h. 10m. morn., in longitude 157° East of Greenwich, and latitude 13° South. Ends on the Earth generally at 8h. 8m. morn., in longitude 145° East of Greenwich, and latitude 6° South.

The line of Central Eclipse passes from the South of Madagascar, through the Mauritius, across the Indian Ocean, through Sumatra, Borneo, Celebes, and the Southern portion of New Guinea.

At the Mauritius.		} Mauritius Mean Time.
Totality begins at	7h. 52m. morn.	
Greatest Phase	7 54 morn.	

A partial Eclipse will be visible at Hong Kong, Madras, Adelaide, and Perth, in West Australia.

III. A partial Eclipse of the Moon, October 27, partly visible at Greenwich.

First contact with the Shadow	2h. 25m. aft.	} Mean Time at Greenwich.
Middle of Eclipse 3h. 15m. aft.		
Last contact with the Shadow	4 6 aft.	

The first contact with the shadow occurs at 137° from the most northern point of the Moon's limb, counting towards the East, and the last contact at 166° from the same point towards the

West. Taking the Moon's diameter = 1, the magnitude of the Eclipse will be represented by 0.23. As the Moon does not rise at Greenwich till 4h. 37m. aft., only the last contact with the penumbra will be visible at that place, at 5h. 26m. aft.

IV. An Annular Eclipse of the Sun, November 11, invisible at Greenwich. Begins on the Earth generally at 4h. 30m. morn. in longitude 27° East of Greenwich, and latitude 27° North. Central Eclipse begins generally at 5h. 44m. morn. in longitude 13° East of Greenwich, and latitude 37° North. Central Eclipse ends generally at 9h. 13m. morn. in longitude 122° East of Greenwich, and latitude 17° North. Ends on the Earth generally at 10h. 27m. morn. in longitude 107° East of Greenwich, and latitude 7° North. The line of Central Eclipse passes from a little to the South of Sicily, across the Mediterranean to Alexandria, through Arabia, across the Indian Ocean to Ceylon, and thence to Siam, a little below Bangkok. A partial Eclipse will be visible at Madras, beginning at 1h. 18m. morn. Greatest phase at 1h. 30m. aft., and ending at 3h. 22m. aft.; Madras Mean Time.

V. ECLIPSES OF JUPITER'S SATELLITES.

The following table contains all the Eclipses of the first Satellite, and those only which are visible at Greenwich of the second and third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D and R signifying respectively, Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D or R in the second column.

Till June 30 the disappearances and reappearances will take place on the Western side of the Planet; from June 30 to the end of the year on the Eastern side. If the phenomena are observed with an astronomical telescope (which inverts the image in the field of view), the Western limb of the planet will be on the observer's left hand, and the Eastern limb on the right, when looking south.

The mean time of Eclipse for any other place than Greenwich may be found by applying to the times given in the Table the difference of longitude, adding the difference if the longitude of the place is East of Greenwich, and subtracting if West.

EXPLANATION OF THE ASTRONOMICAL TABLES.

Mean Right Ascension.
The Mean Right Ascension and Declination for any other year may be found from this table by multiplying the annual precession by the number of years elapsed, and applying the result to the quantities given in this table. If the required date be earlier than 1901, the signs of the annual variations must be changed. In applying the corrections, to reduce to any other date, to the Declinations, it must be borne in mind that N. Declination is +, and S. Declination -, and that the corrections must be added algebraically.

Configuration of Jupiter's Satellites.

This column exhibits, at the particular hour mentioned, the respective position of Jupiter and his Satellites as seen in an inverting telescope. The white circles represent the Planet, and the numerals 1, 2, 3, and 4 the respective Satellites: a black circle is intended to show, either that the Satellite whose numeral it stands in the place of is in the shadow of the Planet (eclipsed), or else is behind the disc of Jupiter (occulted); the sign ♀ indicates that the Satellite in question is on the disc of the Planet.

Sidereal Time at Mean Noon.

This column indicates the Sidereal Time at Mean Noon on each day of the year, and is the time which the Observatory or Astronomical clock should show when the Mean Time clock points to Noon, and, in connection with the Table in the Appendix, serves to convert Sidereal into Mean Solar Time.

Mean Time at Sidereal Noon.

This column indicates the time which should be shown by the Mean Time Clock when the first point of Aries is on the meridian, or, in other words, when it is Sidereal Noon, and is useful for changing Mean

72 Mean Right Ascension and Declination of 100 Fundamental Stars.

NAME OF STAR.	Mag.	Right Ascension.			Annual Precess.	Declination.			Ann. Prec.	Solar into Sidereal Time with the help of the Table in the Appendix.	
		H.	M.	S.		"	"	"			
α Ophiuchi.....	3½	16	52	58.9	+ 2.86	-	31	44	- 5.8	Following the Phases of the Moon on the first page of each month there will be found, as well as the times of Apogee and Perigee, the corresponding distances from the Earth to the nearest 100 miles. The mean distance of the Moon from the Earth is 238,840 miles. Under the head "Eclipses, Occultations, and other Celestial Phenomena," in each month, will be found the "Mean Time of the Sun's Semidiameter passing the Meridian" for the 5th and 20th days. This will be useful in determining time by the Dipleidoscope or similar instrument, when, from the interference of clouds, &c., only one limb of the Sun is observed. From the values on the 5th and 20th, that for any other day can be easily inferred with sufficient accuracy, the change in the apparent diameter being very slow.

Standard Time.

STANDARD TIME referred to the meridian of Greenwich has been adopted for railway and other purposes in the countries mentioned in the following table. The globe is supposed to be divided into zones extending 7° 30' on each side of the central meridians, and the local time is used for all places within that zone. The central meridians are taken at every 15° of longitude, equal to 1h., east and west of Greenwich.

Place.	Central Meridian.	Fast or Slow on Greenwich Time.	Place.	Central Meridian.	Fast or Slow on Greenwich Time.
Mid-Europe.....	15° E. 1h. fast.	Australia & Japan.		
Cape Colony.....	22½° E. 1½h. fast.	West Australia.	120° E. 8h. fast.

JUNO.

There will be no opposition of this Planet in the year 1901. The last opposition took place on September 27, 1900, and the next will occur on March 14, 1902.

The times of Southing may be obtained with sufficient accuracy by taking a ■■■■ between the times of Rising and Setting.

Astronomical and other Notes.

The time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time ■ shown by the Sun.

SIGNS OF ■ ZODIAC.

s.	Seconds of time.	"	Seconds of Arc.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two

kinds: the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that ■ happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to ■ observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through ■ telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to ■ again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from ■ spectator on the Earth, certain of the Fixed Stars,

and occasionally one or other of the Planets; these occurrences are called *Occlusions*. Among the "Celestial Phenomena" are given the times at which certain of these Occlusions take place, as well as the exact point on the Moon's limb where the observer is to look for the phenomenon; this point is reckoned from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from 0° to 360° . The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versa* when viewed through an inverting or astronomical telescope. Stars to the fifth magnitude only have been included in this summary, excepting that, in one or two cases, fainter stars have been inserted, when the occlusion takes place with the Moon in the first or fourth quarter; the times of disappearance or reappearance at the dark limb of the Moon only being noted.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

TIDES AND TIDAL WAVES.

The great cause of our ocean tides is the Moon's nearness as compared with the Sun's distance. The Sun is $25\frac{1}{2}$ million times heavier than the Moon, but his attractive power acts upon our planet mainly as a whole; whereas the Moon, being in our immediate neighbourhood and much smaller in size, acts specially and more intensely upon that limited area of the Earth's surface which is nearest her and directly under her. Wherever the Moon may be in her course, if a great ocean lies immediately beneath, its waters are heaped up by what is termed her "lifting power," and the crest of that bulging and liquid mass constitutes *high water* for that part of the world.

In 24 hours and 50 minutes, owing to the Earth's rotation, plus the Moon's orbital motion, that same part of the world is exactly under the Moon again, and thus another similar tide must always occur after that interval of time. These, the primary tides, being accounted for, to what cause are the secondary tides due, which occur exactly half way between in point of time? Suppose Ocean A is exactly under the Moon, as in the case just discussed, and that Ocean B is on the opposite side of our planet, how is the latter affected by our satellite? Very slightly: because not only has she to lift up the waters of Ocean A, causing the primary tide there, but she has to exercise her attractive power on the great solid mass of the planet itself which separates the two oceans. Thus the Earth as a whole is drawn away from Ocean B, because the latter is so remote, and its waters, being left behind, bulge up at a point diametrically opposite to the primary tides of Ocean A, and form the secondary tides. It is manifest, therefore, that at every moment of the day and night two tides are being formed, on opposite sides of our planet, one directly under the Moon, the other at the point furthest from the Moon.

When a primary and the corresponding secondary tides are thus heaped up at two opposite points of the Earth's equator, then two other points half way between (*i.e.*, 90° distant in longitude) must be deprived of their waters, which have been ebb-

ing either East or West to make up the primary and secondary. In other words, at any moment *low water* occurs 90° East or West of high water: or, since the Moon revolves in $24\text{h. } 50\text{m.}$, any particular meridian must not only have its secondary tide $12\text{h. } 25\text{m.}$ after the primary, but must have low water $6\text{h. } 12\frac{1}{2}\text{m.}$ after high water.

According to mathematicians, some of the greatest of whom have bestowed much attention on the theory of the tides, the lifting power of the Sun on our oceans is only from 33 to 44 per cent. of that of the Moon. Three points are notable as to the influence of the Sun during each lunar month:—(1) At New Moon he acts with the Moon upon the primary tide at that meridian; (2) at Full Moon he pulls against the Moon, and therefore helps to heap up the secondary tide; and (3) when the Moon is in her quarters, the influence of the Sun is at right angles to that of the Moon, counteracting it, and therefore both primary and secondary tides are lowered. The first and second cases constitute *Spring Tides*; the third, *Neap Tides*. Thus, the solar tides are practically of no account except for their modifying influence on the lunar or true tides.

If our planet had no land on its surface, and the shoreless ocean were of uniform depth, the tidal wave-crests, both primary and secondary, would travel in regular succession from East to West, following the Moon's course. With our actual geography many local complications arise: seas like the Mediterranean, Baltic, or Euxine offer so small an area that the Moon can only act upon each as a whole, and there is practically no tide. The disturbing action requires a very wide expanse of deep water, such as the great Southern Ocean, or the S. Pacific; and there accordingly is assigned the birthplace of our great tidal wave, to which many tides in distant seas are referred. One mighty pulse enters the Pacific in a N.W. direction, and another the Atlantic, both to be modified by the depth of water and the form of the coasts; and both extending to the bottom of the ocean. Owing to the islands of the Pacific the tides there become small, as the impulse travels north; but in the long deep trough of the Atlantic the tidal force attains a velocity of from 600 to 650 miles an hour. The western impulse across the S. Pacific reaches Tasmania in 12 hours, and in 12 hours more dashes against Hindostan and S. Africa. Another 12 hours and the tidal wave has reached Newfoundland on the West, and the African Cape Blanco on the East. Turning eastward across the N. Atlantic, the tide in four hours is split into two waves at Land's End, one of which goes slowly up the shallow English Channel, while the main branch is borne round the North of Scotland—to bring high water to Aberdeen and the coasts of Norway and Denmark—and finally reaches the mouth of the Thames in 48 hours after leaving the Antarctic Ocean. The Atlantic, being deep and free of islands, produces an independent tide, which helps to modify the tidal impulse from the South, one result being the famous high tides of the Bay of Fundy.

The tides are locally affected by the configuration of the coasts, and also to a slight extent by the changes of atmospheric pressure. Where the tidal wave enters gulfs or estuaries which open in its direction the difference between high and low water is much increased—*e.g.*, Bristol Channel, 40–60 ft.; St. Malo in the English Channel, 50 ft.; Chepstow, 60 ft.; Bay of Fundy, 70 ft. up to 100 ft.

in the highest spring-tides. The "bore" or "eagre" on certain rivers occur when the advanced portion of the tidal wave moves so slowly, owing to shallowness or other circumstances, that the succeeding waters gather in a heap—e.g., Severn, "head" 3 feet high; Hoogly, 5 ft.: Amazons, 12 to 15 ft.—that on the Tsien Tang in China has been estimated to flow up the river with a velocity of 25 miles an hour. Another curious local modification of the tides is seen at Southampton, Poole, Weymouth, &c., where two tides occur in 12 hours; a similar anomaly Clackmannan on the Forth is known as the "leaky tides."

The following heights of tides on the Thames, with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxliii. 204):—

	Height.		Distance.
	ft. in.		m.
London Docks	18	10	■
Putney.....	■	■	67½
Kew	7	1	73
Richmond	3	10	76
Teddington	1	4½	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of the year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at 23½°; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of summer and winter: giving long days and Summer to the Northern hemisphere when the Sun is North of the Equator, and short days and Winter when South of it.

This inclination of the two planes will cause the Sun to cross the Equator twice in the year, viz., once in the Spring, and again in the Autumn, at which times the Days and Nights are equal all over the world; and we experience for a day or two what would be the constant state of our climate if the Sun moved in the plane of the Equator.

From Spring, through Summer to Autumn the Sun traverses exactly one half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by

the eccentricity of the Earth's orbit, and the Law of Areas, as it is called by Astronomers—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. To do this, the Earth when nearer to the Sun, as at the Winter Solstice, must move more quickly than when farther away, at the Summer Solstice; because then the line joining the two bodies is shorter than in the latter case; the effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's sensible atmosphere is generally supposed to extend some forty miles in height, probably farther, but becoming, at only a few miles from the surface, of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and when laden with clouds, hindering the Earth from radiating its acquired heat into space. The amount of heat absorbed in its passage through the atmosphere will depend upon the thickness of the stratum which the rays have to penetrate, and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, and consisted entirely of land or water, the mean temperature of our Seasons would depend solely on our geographical latitude, and we should then find that all places on the same parallel would enjoy the same temperatures; but being, as it is, made up of water and land very unequally distributed, the former occupying two-thirds of the entire surface of the Globe, the temperature of the Seasons at places on the same parallel of latitude is modified by the surrounding masses of land and water. The great capacity of water for heat, and its low power of radiation, make the great Ocean, extending from Pole to Pole, the reservoir which stores up for us the heat it has received from the Sun; while the land, radiating again its heat very quickly, would soon grow cold. The principal medium by which this heat is conveyed to the land is that of the Winds, which, receiving their warmth and moisture from the water, pass over the land, and compensate for the loss of heat which the latter suffers from radiation. From this cause it is that islands enjoy more equable Seasons than inland countries, being neither so cold in Winter nor so hot in Summer; since the same clouded skies that retard the cooling of the land by radiation also shield it from the rays of the Sun in Summer. But in the interior of continents, where the winds have lost their moisture on their passage from the coast, great extremes are known to prevail between the Summer and Winter temperatures. Moscow has a difference between its Summer heat and Winter cold of 82°, London of 57°, while in the Shetland Islands, and at Penzance, in Cornwall, the differences are only 46° and 43° respectively. Beyond the fact of the presence of water, we must not forget that the oceans and seas are traversed by currents of warm water from the Equatorial regions, which greatly promote the distribution of heat. The chief of these prevail in the North Atlantic Ocean, and it is to one of them—the Gulf Stream—that we probably owe the mildness of the western coasts of Europe. This remarkable current, issuing from the Gulf of Mexico, flows in a north-easterly direction along the shores of America, and on encountering the Banks of Newfoundland splits into two branches, one of which proceeds to the Azores, and the other to the British Isles.

VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of Stars, is one situated in the constellation Cetus, and known by the name of α Ceti, or Mira Ceti. It has a period of nearly 331 $\frac{1}{3}$ days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. It will be found in R. A. 2h. 14m. 20s. and South Declination $3^{\circ} 26'$. The maximum will occur about Aug. 3.

Another remarkable Variable Star is Algol, β Persei. This has a very short period, not quite three days—and ranges from the second to the fourth magnitude. It continues at its maximum for two days and a half, then begins to decrease very suddenly, and in rather more than three hours is reduced to a Star of the fourth magnitude; after remaining at this magnitude for a quarter of an hour, it again attains to its maximum in the same time that it took in passing from it to the minimum. This Star will be found in Right Ascension 3h. 1m. 44s. and North Declination $40^{\circ} 34'$. It will be well observed in October and November.

γ Ophiuchi varies from the 6th to the 6 $\frac{1}{4}$ magnitude, with a period of 20h. 8m. It may be observed in June; southing about midnight on the 9th. Will be found in R. A. 17h. 11m. 30s. and North Declination $1^{\circ} 19'$.

The Variable Star β Lyrae is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R. A. 18h. 46m. 26s. and North Declination $33^{\circ} 15'$. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this star.

The Star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5 $\frac{1}{2}$ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R. A. 22h. 25m. 30s. and North Declination $57^{\circ} 54'$. August and September are the best months in which to observe it.

There are two hypotheses suggested to explain the phenomena exhibited by the variable or periodical Stars; one of which endeavours to account for the variations in magnitude by supposing that opaque bodies are revolving around these particular Stars, and that at certain times they are interposed between the Earth and the Star, and so cut off from our portion of the luminous rays of the latter. The other hypothesis suggests that the Stars themselves may have portions of their surface of unequal reflecting power,

and that in their rotations they present to us in turns these more or less bright parts, and so cause the variations that we observe. This theory fails to explain the changes observed in the stars of the Algol type, and is only applicable to such as are quite regular in their fluctuations. Professor Pickering has shown that none of the theories put forward to account for the variability of the light of such stars as Algol will satisfy the observed changes, except that of an opaque, or less bright satellite. Adopting this theory (which is now generally accepted) he finds theoretically such a satellite whose position and movements would agree with the observed facts.

The above-mentioned "variables" are but a very small portion of the Stars which are known to experience fluctuations of magnitude, but they are the most celebrated examples of their class. It is very likely that our knowledge concerning variable Stars and their distribution in space will be greatly increased when the examination of the photographic plates taken for the chart of the Heavens shall have been completed.

TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by certain bars of steel, called Magnets, of attracting pieces of iron and also other magnets: beyond this idea very little, if any, meaning is popularly attached to the term Magnetism.

Every magnet has two poles, each pole having, as the term implies, exactly opposite properties, such that if we suspend one magnet by a thread free to move in any direction it will be found that on bringing another magnet, held in the hand, near to one end of the suspended magnet, if the opposing poles of each are of like properties, they will repel each other, but if of unlike, they will be attracted towards each other. By placing the magnet held in the hand in the proper position, the moveable magnet may be made to take up any required direction, long or short the magnetism in the magnets and their relative positions remain the same. In the Mariner's Compass we have an example of this kind, where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic South Pole of the Earth, differing from the true or Astronomical North by a quantity called the "Variation." The Variation of the compass is not only different for different places on the Earth, but is moreover liable to slow variation from year to year, causing it in the course of centuries to oscillate from East to West of the Astronomical meridian. In 1580, at London, the needle had an Eastern variation of about $11\frac{1}{2}^{\circ}$; between 1657 and 1662 its direction coincided with the plane of the Astronomical meridian; that is to say, the variation, or declination as it is generally called, was zero; since then it travelled westwards, and reached the maximum Western declination in 1815, and is at the present time (1901) approaching the zero, previously to again becoming Easterly.

The compass-needle being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis placed in the magnetic meridian, and been left free to move in a vertical plane, it would have been found to Dip,

as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this *inclination* or *dip* varies also in different places on the globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situated in 97° West longitude and 70° North latitude. The South Magnetic Pole is situated about 168° East longitude and 76° South latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which Observatories have been established all over the world, and elaborate series of observations made on the motions of variously suspended magnets (their movements in most Observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or pleasure, depend so much upon the weather that we can imagine mankind to have taken an interest in its study from very early times; and, as a matter of fact, the popular ideas about weather prognostics are much the same as those which were in vogue in the earliest ages. Aristotle, in his book on Meteors (which, in his time, were supposed to have an atmospheric origin), collected all the then known prognostics of the weather, but in this work no serious attempt is made to explain the phenomena observed. In the cases where the attempt is made, the explanations offered are often very absurd, and show entire ignorance of the principles of physical science.

The observation of the state of the sky taught the meteorologists of early times when to expect good or bad weather, and the result of these observations, formulated into short and pithy sayings, made up, until quite recent times, the science of weather prognostics.

Birds and beasts are all more or less sensitive to coming changes in the weather, and by observation of their movements, sure warning of changes in the weather may be obtained. Among other instances it is observed that birds, in stormy weather, fly inland in search of food; wild fowl leave the marshy grounds for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together in bushes and trees.

It was not until the discovery of the barometer, in 1643, that the first great step was made towards a knowledge of the state of our atmosphere. We were then, by its help, enabled to ascertain the weight and pressure of the great aerial mass which surrounds us, and to learn when and where it was in a state of calm or storm. The invention of the thermometer, shortly afterwards, gave the means of determining its temperature. The hygrometer for showing the amount of moisture it contained, and the anemometer for giving the direction and force of the wind, are also instruments of great importance to the

meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a warm atmosphere artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become limp and sticky, indicating a probable change of weather in the shape of rain.

Since the time of Admiral FitzRoy the science of weather forecasting has made much progress in its details, but, for the individual observer, the method remains much the same now as then. The principal rules in use for forecasting the weather at present may be briefly stated as follows:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, indicates weather, and a low one the contrary.

If the barometer has been about its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west: a fall of the barometer, with low thermometer, foretells snow.

With the barometer below its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably back, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind veers by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to raise the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is when the first signs of the dawn appear on the horizon) all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are above the bank of clouds) presages wind.

From the clouds may draw the following conclusions: soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from many stations as he desires the height of the barometer, direction and force of wind, &c., data which will inform him of the condition and movements of the aerial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through all the places where the quicksilver stands at the same height, at any convenient interval he obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the height or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts (as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the region from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the change going on, and enable the meteorologist to predict, to a certain extent, what will be the immediately coming weather. This is a general description of the way in which the forecasts of weather, printed in the daily papers, are made. The interpretation of these synoptic charts may not appear to the reader to be a very difficult operation, but it must be remembered that meteorology is purely a science of observation, and, as such, will be most successfully handled by the observer of the greatest experience. From want of knowledge concerning the laws which govern the fluctuations of the weather, failures in the forecasts must happen now and again, and no reason can be given why certain states of the atmosphere, which previous observation would lead us to believe should be stable, suddenly break up without any apparent warning.

Attempts have been frequently made to connect the state of the weather with the aspects of the planets, the changes of the Moon, or some other astronomical occurrences. The idea that the weather is dependent on the Moon's phases still finds favour with the vulgar, although any appreciable connection has been repeatedly disproved.

Besides the meteorological instruments mentioned above, there is one often used to indicate

weather changes which is known as the chemical weather-glass, camphor-glass, or storm-glass.

Though sold in London more than a hundred years ago, no scientific explanation of its indications seems to have been attempted till the late Admiral FitzRoy took it in hand. Up to the year 1825 these storm-glasses had been considered rather as curiosities than otherwise; nothing certain could be made of their variations; but lately, says the Admiral, writing in 1862, it was fairly demonstrated that if fixed undisturbed in free air—not exposed to radiation from fire or sun—but in the ordinary light of a well-ventilated room, or, preferably, in the outer air, the chemical mixture in the storm-glass varies in character with the direction of the wind—not its force, especially (though it may so vary in appearance only)—from another cause, electrical tension.

Admiral FitzRoy considered that these instruments had a scientific value, used in conjunction with the barometer and thermometer, in predicting local storms. Some other writers are at variance with the Admiral on this point—one affirming that the weather indications of the storm-glass are not to be relied on; another, that light and temperature are the agents that bring about the changes observed.

The instrument itself consists of a mixture of camphor, nitrate of potassium, and muriate of ammonia, partly dissolved in alcohol, with a little water. This solution is placed in a long glass vial or tube, with some air, and hermetically sealed. Some authorities say that a small hole should be left in the top to admit the external air.

At one time the upper part of the liquid in the tube will appear quite clear, the bottom portion being occupied by a shapeless mass like melting white sugar. Again, the liquid portion will be more or less filled with crystallizations like fern-leaves or hoar-frost, and under some circumstances like stars.

The general rules given for interpreting the readings of the storm-glass are as follow:—

- (a) If the undissolved substance lies low and smooth at the bottom of the tube—fine weather.
- (b) If it rises gradually in the shape of fern or feather-like crystallizations—rain.
- (c) If it rises much higher than in (b), and if the liquid portion is less clear, with star-like crystals in motion, high wind or storm will follow.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is its angular distance measured along the Equator from that point of intersection of the Equator and Ecliptic known as the Vernal Equinox. In the time of the ancient astronomers this point was situated in the constellation of Aries, and called by them the "First Point of Aries," but it has since then retrograded considerably behind that constellation, and is at present in the sign Pisces. Modern astronomers, however, still speak of this zero point, whence Right Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longi-

tudes, while the astronomer reckons his from the meridian of the First Point of Aries.

Since a well-regulated astronomical clock should show *o. m. os.* when the First Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon, printed on the second page of each month. The rule may be thus stated:—From the given Right Ascension subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of 10 secs. = hour. If the Right Ascension should be smaller than the Sidereal time to be subtracted, then 24 hours must be added to it. As an example:—At what time will Regulus South on March 15?

R. A. of Regulus + 24h. 34h. 3m. 6s.
Sidereal Time at Mean Noon (sub.) 23h. 29m. 35s.

Diminish by the Acceleration for 10h. 33m. 31s. at 10s. per hour } 10h. 33m. 31s.
1m. 46s.

Approximate time of Southing, March 15 } 10h. 31m. 45s.

In a similar manner the Sidereal time corresponding to any mean time may be found. Suppose, for instance, that we wish to know approximately what the Sidereal time would be at 9.30 p.m. on November 5, we have merely to add Greenwich time to the time given in the column headed Sidereal Time at Mean Noon of that date, increasing the result by the amount of the acceleration in 9h. 30m. :—

Sidereal time at Mean Noon 14h. 56m. 5s.
Greenwich time (add) 9h. 30m. —

Add for acceleration for 9h. 30m. at 10s. per hour } 0h. 26m. 5s.
1m. 35s.

Sidereal time November 5 at 9h. 30m. P.M. } 0h. 27m. 40s.

To observers who are not furnished with a Sidereal Clock the Sidereal times at Mean Noon will be found very useful for readily finding the approximate mean times of Southing of the Stars.

APPARENT DIMENSIONS OF SATURN'S RING, 1901.

ILLUMINATED PORTIONS OF THE DISCS OF VENUS AND MARS, 1901.

Date.	Major Axis.	Minor Axis.	Date.	VENUS.	MARS.
Jan. 5	34'94	15'18	Jan. 15	0'502	0'949

Oct. 12	38'04	16'45	Oct. 15	0'705	0'951
Nov. 21	35'97	15'26	Nov. 15	0'591	0'967
Dec. 11	35'34	14'74	Dec. 15	0'445	0'980

The figures in the second and third columns of the above Table give the apparent dimensions of Saturn's Ring as seen from the Earth, and refer to the outer limit of the outer ring. In 1901 the northern surface will be visible. The ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the ring.

The figures in the fifth and sixth columns represent respectively the *versed sines* of the illuminated portions of the discs of Venus and Mars.

MAGNETIC

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and apply to Greenwich only.

The diurnal variation of the magnetic declination at Greenwich is about 12' in summer, and 7' in winter. The needle occupies its mean position about 10h. a.m., and again about 6h. p.m., throughout the year. It reaches its most westerly position about 2h. p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are generally coincident with the passage of great outbursts of sun spots across the sun's central meridian.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in O. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
1889	17 34'9	1821	67 24'9

 Younger Sons of the younger Sons of Peers.
 Baronets' younger Sons.
 Younger Sons of Knights in the order — their Fathers.
 Naval, Military, and other Esquires by Office.
 Gentlemen entitled to bear —
 Women take the same rank as their husbands or — their eldest brothers ; but the daughter of a peer marrying a Commoner retains her Title — Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedence — that of their husbands ; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife. For further information see WHITAKER'S PEERAGE, pp. 13-20.
 There are three Orders confined to Ladies: the Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.
LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Aldermen, Sheriff, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

KNIGHTS OF THE MOST NOBLE ORDER OF THE GARTER (1349)—K.G.

- Williams, Sir George. 80
- Wilks, Sir William. 82

the *Magnum Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and, in addition, 16 Hereditary Peers of Scotland elected to each Parliament, and 23 Hereditary or created Peers of Ireland elected for life. A large number of Scottish and Irish Peers have English titles, by virtue of which they are entitled to a seat, and 2 of the elected Peers of Ireland (*viz.* the Viscounts Hawarden and Powerscourt) have, since their election, been created Peers of the United Kingdom. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The *full Assembly* would consist of 5 Princes of the Blood, 2 Archbishops, 22 Dukes, 22 Marquesses, 121 Earls, 30 Viscounts, 24 Bishops, 322 Barons, 16 Scottish and 28 (26 besides the 2 above) Irish Representative Peers: total 550. See WHITAKER'S PEERAGE, page 21, for complete table, showing numbers of Life Peers, Minors, &c. There are also 11 Ladies who are Peeresses in their own right (9 of England and the United Kingdom, and 2 of Scotland), whose titles and names are given at pages 130, 133

b. signifies born; *s.*, succeeded; *m.*, married; *w.*, widow or widower; *div.*, divorced; *M.*, minor.

SPEAKER.—Hardinge Stanley, Earl of Halsbury, Lord High Chancellor of England £4,000
Chairman of Committees.—The Earl of Morley £2,500

THE constitution of Parliament, as it now exists, dates back almost eight centuries to the time of King John and Magna Charta. In this document there is a provision that "no scutage or aid shall be imposed in our realm save by the Commune Concilium of the realm," and to this Council were to be summoned the Prelates and Greater Barons individually, and the Lesser Barons and Tenants-in-chief collectively. From this groundwork the National Assembly has grown up through the reigns of the various Sovereigns until it has assumed its present shape. The principal landmarks of this growth are, the summons of citizens from Boroughs by Simon de Montfort, the assumption of the maxim "Grievances precede supply" under the Tudors and Stuarts; and the appearance of the office of Prime Minister, with the abolition of the custom of the Sovereign presiding at meetings of the Ministers, under the House of Hanover.

The representation in the Commons varied considerably until 1885, since which date it has stood at 670:—465 members from England, 30 from Wales, 72 from Scotland, and 103 from Ireland. Previous to the Union with Scotland, in 1707, the House consisted of only 513 members; in that year 45 were added for the new Kingdom. In 1801, when Ireland became part of the Kingdom, 100 members were added, and in 1832 the Reform Act raised the representation of Ireland to 105, and that of Scotland to 53. Between this date and 1885 only one change was made, 7 members being added to Scotland in 1867. Many of the old abuses have been swept away by the different Acts of Reform, but much confusion still remains in the nomenclature of the various divisions and subdivisions of the constituencies, in consequence of which the members for Shoreditch, for instance, must be sought under the headings Haggerston and Hoxton.

The allotment of members to the great divisions of the Kingdom is shown in the following table, which also presents a view of the balance of parties as returned by each division at the General Election of 1900:—

	DISTRIBUTION OF MEMBERS.				* POSITION AS TO PARTIES (1900).		
	Counties.	Boroughs.	Universities.	Total Members.	Ministerial.	Opposition.	Majority.
England	234	226	5	465	339	126	213 Min.
Wales	19	11	—	30	4	26	22 Opp.
Scotland	39	31	■	72	38	34	4 Min.
Ireland	85	16	■	103	■	8■	61 Opp.
United Kingdom	377	284	9	670	402	268	134 Min.

The two parties are thus made up of Ministerialists 402 (Conservatives 334; Liberal Unionists 68); Opposition 268 (Liberals 185, Nationalists 82, Socialists 1); the Labour Party being represented by 9 Liberals 1 Socialist, and 2 Nationalists.

The letters after the names are—*C* Conservative *U* Liberal-Unionist, *L* Liberal, *N* Nationalist, *S* Socialist, *Ind.* Independent, *Lab.* Labour, and *Temp.* Temperance. Former Members who lost their seats at the General Election have a § prefixed, while those who contested or won constituencies other than they formerly represented are marked thus †.

The figures placed after the names of constituencies give the number of electors on the register in the year 1900; the figures after the names of candidates represent the votes polled at the General Election (unless otherwise stated); members are printed in italics.

The total number of Electors upon the register in 1900 is given below, together with the Registrar-General's estimate of the Population in the middle of the year:—

	ENGLAND AND WALES.		SCOTLAND.		IRELAND.		UNITED KINGDOM.	
	Total.	Per Member.	Total.	Per Member.	Total.	Per Member.	Total.	Per Member.
Electors	5,287,285	10,681	681,182	9,461	764,196	7,419	6,732,619	10,049
Estmd. Population	32,091,907	64,832	4,313,993	59,916	4,515,471	43,840	40,921,371	61,077

At the time of going to press there were several vacancies, caused by the acceptance of office by new members of the Ministry.

* At the Dissolution (September 25, 1900) the figures were, MINISTERIALISTS 399; OPPOSITION 27; MINISTERIAL MAJORITY, 128.

Speaker, The Right Hon. William Court Gully, M.P. for the City of Carlisle £5,000.
 Chairman of Committees, Rt. Hon. James William Lowther, M.P. for Penrith Div. of Cumberland, £2,500.
 Temporary Chairmen, John Edward Ellis; Rt. Hon. C. B. Stuart-Wortley, q.c.; and Rt. Hon. Edmund R. Wodehouse.

Note.—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the three Mints of London, Sydney, and Melbourne. They are distinguishable, however, in that the Australian coins bear minute "Mint Marks," the letter S being borne by Sydney coins and M by those issued from Melbourne. A Mint was erected in 1898 at Perth, Western Australia, which now issues gold coins bearing the letter P as a "Mint Mark."

<i>Prime Minister</i>	1st MINISTRY (1885-86) Marquess of Salisbury ..	2ND MINISTRY (1886-92) Marquess of Salisbury...	3RD MINISTRY (1895). Marquess of Salisbury. Earl of Halsbury. Duke of Devonshire. Viscount Cross Marquess of Salisbury.

(s) Up to July 1, 1894, interest was paid on the purchase-money, and since that date on the shares held.

In the Financial Statement or Budget for the Financial Year 1900-1901 (1 April to 31 March) the Revenue was estimated at £116,500,000 on the then basis of taxation, and the Expenditure at £154,082,200, leaving an estimated Deficit of £37,182,000. To meet this deficit, the Income Tax was raised to 1s. in the £, and additional duties were imposed on Beer (£1,752,000), Spirits (£1,015,000), Tobacco (£1,100,000), and Tea (£1,800,000), together amounting to £12,167,000; whilst the Expenditure was reduced by £4,640,000, that amount being deducted from the sum annually set aside for the service and redemption of the National Debt. The final balance sheet thus showed an estimated Deficit of £25,375,000, which added to a Deficit of £17,770,000 from the Financial Year 1899-1900, left £43,145,000 unprovided. This final deficit was met by the renewal of Treasury Bills (£8,000,000), an issue of Treasury Bills (£5,000,000), and a projected Loan of about £30,000,000.

The following tables show the Exchequer Receipts and Issues in 1899-1900:—

RECEIPTS.		£	ISSUES.		£
Balance at Banks of England and Ireland, 31 March, 1898		8,919,173	Total Expenditure (as detailed below)		133,722,407
Total Revenue (as detailed below)	...	119,839,904	To meet other Expenditure—		
Repayment of Advances—			(1) Barracks Act (1890)	150,000	
(1) By Mint	890,000		(2) Telegraph Acts (1892, 1899)	290,000

The National Debt.*

THE NATIONAL DEBT amounted on 31 March, 1900, to £539,165,265 *Gross*, and £610,477,757 *Net*. This amount is the remnant of the growth of many years, and nearly all was raised for foreign wars. There was a trifling sum (£564,263) due when the "glorious revolution" of 1688 brought over the Dutch King William to save the country from Popery, arbitrary government, and other evils, but in carrying out these projects he succeeded in adding to the Debt nearly sixteen millions during the twelve years of his reign. Under Queen Anne, Marlborough added to the glories of the country, and helped to swell the Debt, which at the time of the Queen's death had increased by nearly thirty-eight millions. Under King George I. the Debt decreased slightly; but George II. in his reign of 33 years, left the country nearly eighty-seven millions worse off than he found it. During the first twelve years of George III. the Debt was again reduced by about ten millions, and at the time of the revolt of the American Colonies it was under one hundred and thirty millions, an amount which frightened all the political economists of that day. The cost of the American War was very heavy, and one hundred and twenty-one millions were added to the permanent Debt. On the conclusion of the disastrous war, which had all along been unpopular, there was a considerable outcry at the waste; some efforts were made to reduce the amount, and in the nine years from 1784 to 1793, ten and a half millions were paid off, no less than £2,421,681 of this disappearing in one year—1792.

The French revolutionary war began in 1793, and with a short interval of exhaustion, called "Peace," lasted till 1815, when Bonaparte was sent to St. Helena, and the forty years' real peace commenced. During these twenty-three years of war money was borrowed in the most extravagant manner. From 1793 to 1801 the average price of £100 three per cent. stock was £57 17s. 6d., and from 1803 to the conclusion of the war, £60 17s. 6d. In 1815 a loan of £35,000,000 was negotiated, every subscriber receiving £174 three per cent. stock, and £10 four per cent. The following loans were raised from 1793 to 1816:—

Year.	£	Year.	£	Year.	£
1793...	4,877,956	1801...	27,305,271	1809...	12,298,375
1794...	6,998,389	1802...	14,638,254	1810...	7,792,444
1795...	30,464,831	1803...	8,752,761	1811...	19,143,953
1796...	22,244,982	1804...	14,570,763	1812...	24,790,697
1797...	30,356,873	1805...	16,649,801	1813...	39,649,282
1798...	16,858,503	1806...	13,035,344	1814...	34,563,603
1799...	21,714,863	1807...	10,432,934	1815...	20,241,807
1800...	23,030,520	1808...	12,095,044	1816...	514,059

In 1816 our indebtedness was over nine hundred millions sterling. Within a few years this was reduced by one hundred millions, and after that by a comparatively small sum nearly every year. In 1816 the debt amounted to £45 a head of the population; but in 1900, taking the population from the Registrar General's estimate, the *Net* total only amounted to £4 17s. 11½d. for each of the 40,909,925 inhabitants of the United Kingdom.

The *nominal* amount of debt in January, 1816, was £885,186,323; but by adopting the present

method of capitalizing the Annuities then outstanding as three per cent. stock, the following figures will represent the actual state of the Debt on that date. Reckoned in this manner, it stood as follows:—

Funded Debt	£816,312,000
Unfunded Debt	44,727,000
Terminable Annuities capitalized...	39,397,000
	£900,436,000

With peace secured, efforts were made to reduce the Debt; but this was no easy matter. In 1813, the national expenditure had reached the unprecedented amount of £108,397,645, of which £68,748,363 was raised by taxation, and £39,640,282 by loans. In 1815, the Waterloo year, the amount raised by taxation had increased to £72,210,512; but in 1817, the war being finished, taxation was reduced to £52,055,913, and out of this the sum of £1,826,814 was applied to the reduction of Debt. The following amounts were paid off from 1817-37:

Year.	£	Year.	£	Year.	£
1817...	1,826,814	1824...	7,456,559	1831...	2,673,858
1818...	1,624,606	1825...	9,900,725	1832...	5,606
1819...	3,163,130	1826...	1,195,531	1833...	1,023,784
1820...	1,913,019	1827...	2,023,028	1834...	1,776,370
1821...	4,104,457	1828...	4,667,965	1835...	1,270,050
1822...	2,963,564	1829...	2,760,003	1836...	1,590,727
1823...	5,261,725	1830...	1,935,465	1837...	1,085,885

The abolition of slavery (1833) led to an increase of the debt, and the Crimean War added over £30,000,000, so that the total in March, 1857, was £8,918,443. In the 43 years since that date the total has been reduced by £198,753,178.

Decreases from 1889-1900:—

Year.	£	Year.	£	Year.	£
1889...	7,426,812	1893...	6,894,203	1897...	7,630,258
1890...	8,646,931	1894...	4,543,540	1898...	6,643,365
1891...	4,709,810	1895...	8,943,417	1899...	6,873,119
1892...	5,412,351	1896...	7,620,502	1900...	<i>Nil.</i>

The gross Liabilities of the State on March 31, 1900, were as follows:—

I. THE FUNDED DEBT:—	
(a) Permanent	£552,606,808
(b) Annuities	60,238,883
II. The Unfunded Debt	15,132,000
III. Other Capital Liabilities	10,186,482

Total Debt.....£639,165,265

From this total must be deducted the following assets:—

Value of Suez Canal Shares.....	£24,312,000
Unrepaid Loans	713,384
Moiety of estimated capital value of Red Sea and India Telegraph Company's Annuity, repayable by Indian Government	130,214
Present value of Annuity from Australasian Colonies	24,843
Exchange Balances at the Banks of England and Ireland	3,517,047

Total Assets.....£18,687,508

leaving the net Liabilities at £610,477,757.

* See also article "The Growth of National Indebtedness," p. 595 of 1899 issue.

The Debt is of three descriptions:—I. Funded (a) Permanent, (b) Terminable; II. Unfunded; III. Certain other Liabilities.

I. FUNDING DEBT.—(a) PERMANENT. That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on March 31, 1900:—

2½ per cent. Consols	£502,657,133
2½ per cent. 1905	4,635,491
2½ per cent.	31,671,904
Bank of England Debt	11,015,100
Bank of Ireland do.	2,630,766
	<u>£ 52,566,897</u>

(b) TERMINABLE ANNUITIES.

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off every year, and after a certain time the capitalized sum entirely extinguished. It may be shortly explained that the Treasury is empowered to give an Annuity for a certain number of years in exchange for permanent stock. Thus A transfers to the Treasury £1,000 of 2½ per cent. stock on which he is receiving £27 10s. a year; the Treasury in return undertakes to pay A £55 a year for twenty years or thereabouts. The Treasury cancels the £1,000 stock, and thus reduces, say, Consols by that amount; but during twenty years it pays a much larger sum than it would have paid if it had left matters alone.

The following is a list of these terminable annuities with the dates when they expire, and their capitalized value as on March 31, 1900:—

(1) Annuities for Life and Terms of years	£12,652,660
(2) Red Sea and India Telegraph Companies (1908)	260,468
(3) Converted Annuities (1904)	2,431,173
(4) Chancery Funds (1904)	11,45,077
(5) Savings Banks (1911-2)	5,642,167
(6) Savings Banks (1922-23)	14,633,718
(7) Book Debt Annuities (1922)	12,518,793
(8) Trustee Savings Banks (1908) ...	608,429
(9) Annuity of 1884 (1903)	126,550
(10) Sinking Fund Annuities (1934) ..	—
	<u>£ 50,237,845</u>

II. UNFUNDED DEBT.

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government is bound to pay off at certain dates, and is represented by certain loans having currency for

periods varying from a few months to five or more years. On March 31, 1900, these consisted of six- and twelve-months Treasury Bills (for supply purposes) to the amount of £8,133,000, and also of Treasury Bills to amount of £8,000,000, the interest on which is *awarded* from the Fixed Annual Charge by 63 Vic. cap. 2.

III. OTHER CAPITAL LIABILITIES.

These sums are not included in the Capital on which Interest is arranged for in the Permanent charge.

On March 31, 1900, these sums stood as follows:—

Imperial Defence Act (1888) Annuities	£95 3 5
Russian Dutch Loan Annuity	277,305
Under 1 arracks Act, 1860	2,810,014
“ Telegraph Acts, 1892 to 1899 ..	1,456,145
“ Uganda Railway Act, 1896 ...	3,060,263
“ Public Offices Act, 1895	454,503
“ (Whitehall Site) Act, 1897 ...	515 294
“ Royal Niger Compy. Act, 1899	823 590
“ Naval Works Acts, 1895-99 ...	693 528
Total	<u>£10,186,482</u>

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On March 31, 1900, these amounted to the following sums:—

Liability to Suitors (Chancery)	£2,331,884
“ “ Bankrupts' Estates	1,114,577
“ “ Suitors (Ireland)	259,151
Fee and other Funds “	163,285
Court of Bankruptcy “	35,042
Unclaimed Dividends (B. of England)	125,040
“ South Sea Annuities, &c. “	39,788
“ Dividends (Bank of Ireland) ...	1,459
Life Annuities, &c. (Nat. Debt Office)	20,000
Uncl. Dividend acct. “	37,155
Total	<u>£4,128,282</u>

The Permanent Charge of the Debt for the last two years is detailed below:—

DEBT:	1898-9.	1899-1900.
Funded Debt (Interest) ..	£16,009,557	£15,247,193
Terminable Annuities ...	7,281,793	7,250,490
Unfunded (Interest) ...	139,254	272,578
Cost of management ...	175,027	174,064
New Sinking Fund	1,394,459	19,875
Interest on War Debt	—	216,657
Total Charge for Debt	<u>£25,000,000</u>	<u>£23,216,657</u>

DUCHY OF LANCASTER.

The revenue of the Duchy was £29,000 in 1847 and £94,740 net in 1899. £60,000 was paid to Her Majesty; £5,248 laid out for the benefit of the estate; £4,453 deducted under various Acts of Parliament; £6,437 to defray the cost of management; and £2,000 to the Chancellor, leaving a balance of £17,643. Capital account, December, 1899, £22,114 in cash, and £16,319 in securities.

DUCHY OF CORNWALL.

Income, 1899, £117,134. £66,915 was paid to the Prince of Wales; £13,837 the benefit of the estate; deductions under various Acts of Parliament, £13,363; superannuations, &c. £1,493;

expenses of management, £5,485; leaving a balance in favour of 1900 of £11,377. Capital account, December, 1899, £44,390 in cash, and £389,393 in securities.

WOODS, FORESTS, AND LAND REVENUES.

The receipts amounted on March 31, 1899, to £105,639; expenditure to £111,780. £430,000 was paid over as Surplus Income to the Exchequer. Estates were purchased to the value of £222,724; sold £478,872; stock bought, £328,652. The expenses on "Royal Forests and Woodlands" came to £22,055, and on "Woods, Forests, and Lands" to £111,780. The balances (capital account) on March 31, 1899, were £42,144 (cash) and £596,780 (stock).

(a) Appropriations in Aid.—Under Class II.—Fees for Private Bills, &c. (House of Lords), £35,000; House of Commons, £30,000; Board of Trade fees, £12,830; Mercantile Marine Department Office fees, £50,276; Bankruptcy Department, £132,924; Royal Mint profit on coinage, £700,000; Sales by Stationery Office, £90,205. CLASS III.—Suprem. Court fees, £53,000; County Court fees, £440,000; Scottish Court fees, &c., £20,050. CLASS IV.—London University fees, £18,980; fees and books, National Schools (Ireland), £33,250; Queen's College (Ireland) fees, £5,500. CLASS V.—Consular Court fees, £70,000. CLASS VII.—Fees for honours and dignities, £5,204.

NET INCREASE, 1900-1901, £52,382,200; ORDNANCE FACTORIES, GROSS, £3,790,100; NET, £47,100.

THE Army Expenditure was vastly augmented in 1899-1900 owing mainly to the operations in South Africa and to the disturbed state of affairs in China. A large proportion of the vast increase (£52,382,200) will be temporary only; but a sum of £1,925,000 represents a permanent addition, being: £516,000 for additional pay for the increased establishment; £750,000 for warlike stores; £334,000 for provisions; and £160,000 for transport. *Supplementary Estimates* were presented in October, 1899, for £10,000,000 and 35,000 men; in February, 1900, for £13,000,000 and 120,000 men; and in July, 1900, for a further sum of £11,500,000.

ORDNANCE FACTORIES ESTIMATE, 1899-1900.

The gross amount of the estimate is £3,319,100, against £2,922,000 in 1898-99, and the items are:—Establishment pay £26,878; wages and police £1,615,538; materials and stores £1,511,000; machinery obtained by contract £41,900; buildings £85,034; miscellaneous £29,200; non-effective charges £9,500. Of the gross total £1,395,000 is chargeable to the Army for stores, £1,265,000 to the Navy, £100,000 to India. £70,000 is covered by sale of old stores, £12,000 by miscellaneous receipts, and £22,000 transferred from Suspense Account. This leaves £100 as the net amount of the vote, as in 1898-99. Materials and stores for Woolwich cost £1,312,000, for Enfield £47,000, for Waltham Abbey £140,000, and for Birmingham £10,000. The machinery obtained by contract is in addition to that made by the factory, and is valued at £41,900. Buildings include the cost of new works £53,034, the maintenance and repairs being £32,000.

(a) *The Gross and Net Totals are arrived at by deducting Appropriations in Aid.*—These consist of contributions from India. £700,000, and the Colonies, £324,000 (Canada, £21,000; Ceylon, £123,000; Mauritius, £22,200; Hong Kong, £51,600; Straits Settlements, £87,200; Malta, £5,000; and Natal £4,000), and of £87,000 paid by Egypt, while £42,000 is derived from the purchase of Discharge and £42,000 from Hospital Stoppages. The sum of £16,000 is derived from the sale of horses, &c.; £73,000 from the sale of provisions, &c.; £60,000 from the sale of old arms, &c.; £144,233 from the sale and rents of land, &c.; and £200 from fees payable by Gentlemen Cadets at Woolwich and Sandhurst.

* The sum of £1,717,561 was this year transferred from the Army Estimates, and £205,980 to the Army Estimates.

NET INCREASE 1900-1901, £2,197,400.

The Naval Expenditure in 1899-1900 amounted to nearly one-fourth of the whole expenditure of the country, and was at the rate of about 12s. 9d. per head of the estimated population.

The gross and net totals of the several votes for the last two years are shown in the following abstract for the purpose of comparison, the net amount being derived by deducting "(a) Appropriations in Aid" :—

The *Normal Regimental Establishment of the Regular Army*. (exclusive of the Forces in India) now includes 3 Regiments of Household Cavalry, 19 Cavalry of the Line; 13 Batteries of Royal Horse and 114 Field and 4 Mountain Artillery; 83 Companies of Royal Garrison Artillery; 77 Battalions of Royal Engineers; 9 Battalions of Foot Guards, and 108 of Infantry of the Line.

The *Normal Distribution* leaves at home 3 Household and 16 Line Cavalry Regiments (12,684 officers and men); 18 Horse, 110 Field, 2 Mountain and 45 Garrison Companies and Batteries (30,787 officers and men); 57 Companies Royal Engineers (7,185 officers and men); 6 Battalions Foot Guards and 79 Line Regiments (87,776 officers and men); 6,637 officers and men of the Army Service Corps, and 2,375 of the Royal Army Medical Corps. This gives a total establishment of 150,509 of all ranks, the remainder serving in Egypt and the Colonies. The Army in India comes under a separate heading (*see India, p. 479*).

Recruiting.—Recruits are enlisted for (A) 12 years with the Colours, (B) 7 years with the Colours and 5 years in the Reserve; (C) 5 years with the Colours and 9 years in the Reserve. The second is the most popular term, and in 1899 32,531 recruits out of a total number of 42,700 elected to serve under those conditions. Re-

cruits are drawn from the Labouring, Servant, and Husbandmen classes (64.9 per cent.), Manufacturing Artizans (14.1 per cent.), Mechanics (10.3 per cent.), Shopmen and Clerks (6.8 per cent.), and Professional Occupations, Students, &c., 9 per cent. Of the foregoing 7.1 per cent. were described in 1899 as well educated, 89.9 per cent. as able to read and write, and 1.7 per cent. unable to read. Out of a total number of 68,059 applications, 32.9 per cent. were rejected on medical examination.

Civil Employment of Discharged Soldiers and Recruits.—A large number of time-expired men and those transferred from service with the Colours to the Reserve find employment through the agency of benevolent institutions under Government auspices. In 1899, out of a total of 5,590 vacancies in the English and Scottish Police and Royal Irish Constabulary, 766 were filled by ex-soldiers; 74 were employed in the Prisons Department, 8 as park-keepers, 1701 in War Office Departments, 36 Customs watchers, and 80 as pensioned messengers in Government offices. There were in 1899 1,140 Reservists employed by the Post Office and 11,440 ex-soldiers by the various Railway Companies in the United Kingdom; of the latter 6,115 were appointed in 1899, and 4,322 recalled to Army Service.

DAILY PAY OF THE ARMY.

TAFF.—General, £8; Lieutenant-General, £5 10s.; Major-General, £3; Brigadier-General, £2 10s.; Colonel ■ Staff, £2; D.A.G. or Military Secretary, £1 10s.; A.A.G., £1 5s.; Brigade-Major, D.A.A.G., or Asst. THE CHURCH of ENGLAND is "that pure and reformed part of Christ's Holy Catholic Church which is established within this Realm." The word "established" implies that "certain relation exists between it and the Realm itself; and the Church of England is "established" in its recognition ■ the national organisation for the maintenance of Christian belief and practice. Its clergy are an estate of the realm; the Sovereign is one of its members, and its supreme governor on earth; the free exercise of its inherent rights as ■ Church is guaranteed, and its authority, when lawfully exercised, is enforced. The Church has taken a large share in the promotion of civilisation, education, and philanthropic enterprise, and has exercised a powerful moral influence towards order, peace, and national progress.

Christianity was introduced into these islands before the close of the second century. It soon found ■ home amongst the Britons of the Roman provinces, and gradually spread amongst the Celtic tribes outside the sphere of Roman influence. We know that Alban, the first British martyr, was put to death about the beginning of the fourth century, and that three British bishops took part in the Council of Arles in 314. We read also of British bishops attending the Council of Ariminum in 359; and there is much other evidence with regard to the wide-spread Christianity of the Celtic peoples. When however the pagan English tribes landed in Britain, they drove the inhabitants into the mountainous regions of the west; and their faith went with them.

The English Church, ■ distinguished from the earlier British Church which the pagan English had expelled from their kingdoms, took its rise in 597, when Ethelbert, the pagan King of Kent, was baptized by missionaries sent by Gregory, the Bishop of Rome. The Italians only converted, permanently, the small kingdom of Kent; but they made the first beginning of the Church of England. East Anglia and Wessex were converted by other foreigners. The great impetus to the spread of the faith was given by two English Northumbrian Kings, who had been taught by the Scotch (Celtic) Church from its centre at Iona. By their influence the new faith was established in by far the largest part of the country.

The Church of the Britons continued ■ separate existence in its mountainous retreats, and took no part in the conversion of the English. It had merged its organisation in that of the English Church as early as the Norman times; and thus the Church of England and Wales is one.

About the years 660 to 680, the principal Kings of the English Heptarchy learned to take united action in Church matters, and that was the beginning of the unity of England. It was not till 150 years later that England became in any sense one kingdom. At that time, A.D. 828, the Archbishoprics of Canterbury and York had long been in existence, and the Bishoprics of London, Rochester, Winchester, Lichfield, Worcester, Hereford, and the originals of the Sees now called Chester, Lincoln, Salisbury, Norwich, Chichester, Durham, as also four Bishoprics since merged in others. Thus, to speak generally, the present organisation and geographical arrangement of the Church of England ■ older by ■ century and a half, in some parts by two centuries and more, than the Kingdom of England.

The Church of England passed unbroken through the Norman Conquest. Lanfranc was consecrated the first Norman Archbishop of Canterbury by nine English Bishops. The Reformation which began under Henry VIII. is the most important landmark in its existence. All care was taken to preserve the continuous life of the English Church, and many important changes were made with a view to purifying that life by the light of Holy Scripture and the primitive fathers. In 1541 the Bishoprics of Chester, Oxford, Peterborough, Bristol, and Gloucester were formed. In the present century, to meet the wants of the growing populations, the sees of Ripon, Manchester, St. Albans, Liverpool, Wakefield, Truro, Newcastle and Southwell have been created. There are now two Archbishops, 33 diocesan Bishops (of whom 24 have seats in the House of Lords), and 17 Bishops Suffragan. The Anglican Episcopate has spread far and wide. There are 90 colonial and missionary bishoprics, the first being that of Nova Scotia in 1787; and 80 American bishoprics, the first in 1784. The growth in modern times may be seen from the invitations to the Lambeth Conference of Bishops in communion with the Church of England: in 1867, 144; 1878, 173; 1888, 211; in 1897, 247.

The Convocations of Canterbury and York are the deliberative bodies of the Church of the Southern province and the Northern province respectively. The archbishops and bishops, the deans and archdeacons, sit in Convocation *ex officio*, and there are elected representatives of the Cathedral Chapters and the beneficed clergy. In accordance with ancient custom, Convocation cannot make ecclesiastical laws or canons without the permission of the Sovereign.

There are about 14,000 parishes, and in half of these the income of the incumbent is less than £130 ■ year. The estates of the Bishoprics and Cathedrals are in the main managed by the Ecclesiastical Commissioners, who pay the incomes of the bishops, &c., and spend the balance in improving the endowments and buildings of parishes, providing funds for additional clergy, and endowing new parishes. The whole number of clergy, beneficed and not beneficed, is about 23,000; the Archdeacons (90 in number) and Rural Deans (810) are the officers through whom the bishop of the diocese regulates their proceedings. Each diocesan bishop has a Court with legal officials, for the trial of cases that arise.

The sums raised by voluntary contribution during the year 1895, or the alternate period from Easter 1895 to Easter 1896, as given in the "Church Year Book" for 1897, amounted to nearly £5,750,000, exclusive of offerings by Churchmen made direct to societies and independently of the parochial clergy (or for the general maintenance of hospitals and similar institutions). In the 25 years from 1860 to 1884, £35,000,000 was given for Church building and work of that kind; £7,000,000 for Home Mission work, £10,000,000 for Foreign Missions, £22,000,000 for Elementary Education, £4,000,000 for Charitable Work, and £2,000,000 for Clergy Charities; with ■ total of £81,000,000. In the ten years from 1884 to 1893, £13,500,000 was given for church building, &c. Some of the most important items are exclusive of the action of Societies, and a vast amount of charity is never put on record.

The Dean and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to take, in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income; they are consequently suffering more or less from the present agricultural depression.

*Canterbury. £15,000.

MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop. The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Chichester; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwell; St. Albans; St. Asaph; St. Davids; Truro; Worcester.

Lower House.

Prolocutor, The Ven. Archdeacon Lightfoot, D.D. The Very Rev. the Archdeacons. The Venerable the Archdeacons.

Also the following Proctors:

BANGOR.—*Chapter*, Canon Thomas. *Clergy*, T. Edwards; E. Hughes.
BATH & WELLS.—*Chapter*, Canon Church. *Clergy*, J. W. Robinson; J. N. Quirke.
BRISTOL.—*Chapter*, Canon Teley.
Clergy, Hon. M. J. G. Ponsoby; C. Griffiths.
CANTERBURY.—*Chapter*, Canon F. J. Holland. *Clergy*, F. H. Murray; H. Bartram.
CHICHESTER.—*Chapter*, Canon Sanderson, D.D. *Clergy*, A. H. S. Barwell; J. J. Hannah.
ELY.—*Chapter*, Canon E. C. Lowe, D.D. *Clergy*, J. H. Macaulay; W. Cunningham.
EXETER.—*Chapter*, Canon Edmonds. *Clergy*, H. Tudor; R. Martin.
GLOUCESTER.—*Chapter*, Canon St. John. *Clergy*, H. Proctor; C. V. Child.
HEREFORD.—*Chapter*, W. Poole. *Clergy*, E. F. Clayton; C. S. Palmer.
LICHFIELD.—*Chapter*, Rt. Rev. Sir L. T. Stamer, Bt. *Clergy*, C. N. Bolton; H. J. Wilkinson.
LINCOLN.—*Chapter*, Canon J. H. Overton. *Clergy*, G. W. Jeudwine; A. S. Wilde.
LLANDAFF.—*Chapter*, Prebendary C. J. Thompson. *Clergy*, John T. Harding; B. Lloyd.
LONDON.—*Chapter*, Canon W. E. C. Newbolt; Canon Gore (*Westminster*). *Clergy*, Preb. A. J. Ingram; H. W. Villiers.
NORWICH.—*Chapter*, Canon A. B. Crosse. *Clergy*, Constantine Frere; W. M. Hoare.
OXFORD.—*Chapter*, Canon R. C. Moberley. *Clergy*, Edmund Savory; H. Barter.
PETERBOROUGH.—*Chapter*, Canon L. Clayton. *Clergy*, Canons C. T. Cruttwell and C. R. Ball.
ROCHESTER.—*Chapter*, Canon Jelf. *Clergy*, Canons Clarke and Edwards.
ST. ALBANS.—*Chapter* (none). *Clergy*, Canons J. M. Practer and W. Quennell.
ST. ASAPH.—*Chapter*, Canon W. H. Fletcher. *Clergy*, David Jones; D. G. Davis.

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.—Dean and Ordinary, Very Rev. Henry Jellett, D.D.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. J. George Scott, D.D.; Ven. Wm. Colquhoun, M.A.; Sir J. C. Meredith, LL.D.; Gordon E. Tombe, J.P.

Sec. to the REPRESENTATIVE CHURCH BODY (INCOR. 1870). T. Greene, M.A., 52 St. Stephen's Grn. E., Dublin.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the General Synod are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of a Parish is appointed by a Board of Nomination, consisting of persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and three parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 1300-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property held the capital sum £7,581,073, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital now amounts only to £1,053,768, charged with annuities to 220 annuitants, £36,798. The funds, however, in the custody of the Representative Body amount in all to £8,128,444, made up of Commutation £1,053,768, Parochial Sustentation £4,779,171, Episcopal Sustentation £558,862, Glebes purchase £345,470, Miscellaneous purposes £1,391,173.

Since 1869, members of the Church have paid in to the Representative Body a total sum of £5,321,047. The interest of the Parochial Sustentation Fund is £191,166. The total amount of assessment for stipend paid by parishes, 1899, is £133,281, and the total amount paid for stipends under Diocesan Schemes is £252,292.

The number of members of the Church of Ireland by the Census of 1891 is 502,300.

THE EPISCOPAL CHURCH IN SCOTLAND.

Churches, Stations, &c., 354. Parsonages, 131. Clergy, 336. Communicants, 45,384.

The ESTABLISHED CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), and the Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 for his services. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are about 1,800 ministers and licentiates engaged in ministerial work. The Church population exceeds that of all the other Presbyterian bodies united, and is estimated at about half the whole population of Scotland; the number of communicants in 1897 was 656,112. The sum of £492,816 was raised in 1899 for home

and missionary purposes. Within the last 50 years 405 chapels, at a cost of £1,477,833, have been endowed and erected into parishes *quoad sacra*. The original parishes were 924, in addition to which there were in 1898, 405 new and 42 Parliamentary parishes, also 203 unendowed churches and 184 mission stations; a total of 1,758. The Presbyterian form of Church government first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688, Presbyterianism regained the legal establishment, which it still preserves. In consequence of the action of the civil courts in certain cases of disputed settlements, confirmed by a decision of the House of Lords in 1842, about 289 parish ministers resigned their preferments and in 1843 founded the *Free Church*. LORD HIGH COMMISSIONER, The Earl of Leven and Melville. MODERATOR, 1900, Rt. Rev. Norman Macleod, D.D.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union, on Oct. 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 11 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. Accurate statistics of the United Church are not yet available; but according to the latest returns for the separate Churches they together have 1,772 ministers, 1656 congregations, and about 40 preaching stations. In 15 Foreign Mission Fields, there are 333 European Mission Agents and 2,230 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the two Churches, for all purposes, at the close of their last financial year, amounted to £1,055,993. MODERATOR, Rev. Principal Laing, D.D., New College, Edinburgh.

(2) *The Presbyterian Church in Ireland*.—According to the Census of 1891, the members of the various Presbyterian churches in Ireland were 446,687. The largest of these, under the superintendence of the General Assembly, consists of

35 presbyteries, 658 ministers, 570 congregations, with 106,630 communicants, 84,247 families, 9,031 Sabbath-school teachers, and 102,401 scholars. During the year 1899-1900 this branch contributed by congregational effort £111,430 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £277,623. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 14 professors, and has 30 ordained with medical missionaries in foreign parts. MODERATOR, 1900-1901, Rev. J. M. Hamilton, M.A., Dublin. *Nerth*, Rev. W. J. Lowe, M.A., D.D., Londonderry.

(3) *The Presbyterian Church of England* has 12 presbyteries, 311 congregations, 13 preaching stations, and 71,444 communicants. It has a Theological College (Westminster Coll., Cambridge), and supports 54 missionaries abroad, including 22 women. In 1899 the amount raised for all purposes was £306,847. MODERATOR of Synod for 1900-1901, Rev. John Watson, D.D., Liverpool.

(4) The less numerous divisions are: the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches.

UNDER the general designation of METHODISTS included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revs. John and Charles Wesley. The most numerous and influential of them are—

Wesleyan Methodists, the original body founded in 1739 by these two brothers. While students at Oxford, in 1729, they gathered a number of young men together for purposes of study and devotion, who were nicknamed, first, "The Holy Club," and afterwards "The Methodists." In 1739 John Wesley founded the "Religious Societies," in which the first beginnings of Methodism were to be found. The number of members rapidly increased, until a more definite and extensive organisation than Wesley at first gave them was imperatively demanded. The first Conference, consisting of six clergymen and four laymen, was held in 1744. The conference is now composed in its Representative Session of 300 ministers and 300 laymen with a ministerial president and secretary at its head, elected year by year; by semi-annual meetings

of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference; and by quarterly meeting of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. When Wesley died the number of members was 76,968, and since then the increase has been so great that about 18,000,000 people are now receiving Methodist instruction in various parts of the world. At Washington in October, 1891, it was reported that there were more than 30,000,000 Methodists. This statement has been recently repeated by leading Wesleyans; but no evidence is forthcoming to establish its accuracy, which is more than doubtful. *Pres.* Rev. T. Allen, D.D.; *Sec.* Rev. M. Hartley. Various distinct bodies of Methodists have been formed, the most important being—

1. *The Methodist New Connexion*, which was formed in 1797 by the Rev. Alexander Kilham,

one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference and at once founded a new community.—*President*, Rev. George S. Hornby.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings" the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. Joseph Odell.

3. *The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.—*President*, Rev. J. Luke.

4. *The United Methodist Free Churches*, which are an amalgamation of three different secessions—the Protestant Methodist, formed in 1828; the

Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to leading Wesleyan officials was organised, which found expression in the Conference debates, but more strongly in anonymous pamphlets, a suspicion of being the authors and circulators of which three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.—*President*, Rev. Frederick Galpin.

Finances.—The Wesleyans raised in 1898-99 £195,489 to sustain their very extensive missionary operations. At the same time their Home missionary income was £36,034; £19,440 were expended on the education of ministers' children at the Connexional schools; £213,619 were expended in Great Britain for chapel-building; and £12,933 for the training of candidates for the ministry, of whom there are 183 in the four theological colleges. By the *Methodist New Connexion* the following sums were raised: For chapel fund, £455; for missions, £5,561. The *Primitive Methodists* raised £29,971 for new chapels, and the *United Methodist Free Churches* £12,232 for their missions. During the past two years the Wesleyans have been raising a Twentieth Century Fund of one million guineas to be applied to their Evangelistic Educational and Philanthropic work.

Other Religious Denominations.

THE INDEPENDENTS, OR CONGREGATIONALISTS, in England come next to the Methodists; they are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. They first appeared in the time of Elizabeth, under whom they were very harshly treated; in consequence, great numbers repaired to North America; but their principles triumphed under the Commonwealth. In 1831 the majority of their churches were formed into the Congregational Union. There are 51 county and other Associations in England and Wales, with 4,592 churches and preaching stations containing 1,636,259 sittings; the number of ministers in the British Isles is 3,132. Of these 289 are temporarily without pastoral charge, 68 are engaged in collegiate and tutorial duties, 53 are occupied in secretarial work, and 307 by reason of age or ill-health have retired from pastoral duty. CHAIRMAN, 1901, Rev. Joseph Parker, D.D. Sec., Rev. W. J. Woods, B.A. (Memorial Hall, Farringdon St.).

The *Countess of Huntingdon's Connexion*, with 36 chapels. Its tenets are expressed in XV articles, founded on the XXXIX articles and Westminster Confession, but in some chapels the prayers of the Church of England are read.

The BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in

one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in Associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1899, 3,870 chapels and 1,959 pastors. The members numbered 360,475, and Sunday scholars 519,338. In addition to the members in this country, the Baptists have numerous chapels and several hundred ministers in the Colonies. In the United States they form one of the most numerous religious bodies there, the "members" alone numbering somewhere about 4,000,000. Their missionaries are employed in India, Ceylon, China, Palestine, the West Indies, Africa, Brittany, and Italy. Secretary, 1900-1901, Rev. J. H. Shakespeare, M.A.

THE WELSH CALVINISTIC METHODIST CONNEXION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England (see p. 246). At the present time the body numbers—churches, 1,345; chapels and places of worship, 1,557; ministers and preachers, 1,229; deacons, 5,561; communicants, 156,038; on probation, 2,336; Sunday-school teachers, 25,377; scholars and teachers, 200,079; number belong-

ing to the congregations (including communicants), 315,182. A sum amounting to £284,183 was collected for various religious purposes in 1899. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children: the vernacular is the language generally used in these schools. There are 254 English congregations with 17,204 communicants; all the rest are Welsh. MODERATOR of General Assembly, 1900-1901, Rev. J. J. Roberts, Portmadoc; *Statistical Secretaries*, Rev. J. Evans, Denbigh; Rev. T. J. Morgan, Garn.

The SALVATION ARMY is one of the most recent religious denominations, and one of the most successful. In Dec. 1898, the number of *Officers* was 13,894, of *Cerps* and *Outposts* 6,822, *Local Officers* 35,224. The number of countries occupied was 45, and of languages used 23. Connected with the Salvation Army are numerous philanthropic institutions under various denominations including 92 Rescue Homes for Fallen Women, 116 Slum Posts, 12 Prison Gate Homes, 112 Shelters and Cheap Food Depôts for Homeless, 54 Workshops and Factories, 34 Labour Bureaux, 11 Farms, &c. "GENERAL," William Booth.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels, and other places of worship. The Society

of Friends, which consists of 17,153 members in Great Britain and 2,609 in Ireland, has 400 recorded ministers, including 160 women; their places of worship in 1899 numbered 416. *Central Office*, 12 Bishopsgate St. Without, E.C. The Moravians have about 50 congregations and preaching stations. The Catholic Apostolic Church have above 80 churches; the New Jerusalem Church (Swedenborgians), 75 societies, with 6,063 registered members; the Latter-Day Saints (Mormons) have 82 churches. Among the inhabitants of the United Kingdom are about 120,000 Jews, mainly in London and other large towns, who possess 80 synagogues, with about 100 ministers and readers (*Chief Rabbi*, Dr. Hermann Adler, Chief Rabbi's House, Finsbury Square, E.C.). The Jews support their own poor, and raise about £150,000 annually for religious and benevolent purposes. Their number throughout the world is computed at various totals, ranging between 8 and 9 millions. The Brethren, Plymouth Brethren, have 23 places of worship in London and the suburbs. The Greeks have churches in London, Manchester, and Liverpool. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; a mosque has been opened for Moslems.

The Roman Catholic Church.

In England, from 1623 to 1850, Catholics were under Bishops, as Vicars-Apostolic, with first 1, then 4, and afterwards 8 Districts or Vicariates; in 1850 the Hierarchy was restored, by the erection of one Archbishop and 12 Episcopal Sees, now increased to 15. In Scotland, Catholics were under Bishops, as Vicars Apostolic, from 1694 to 1878, with first 1, then 2, and afterwards 3 Districts or Vicariates; in 1878 the Hierarchy was restored, by the erection of 1 Archbishop and 4 Episcopal Sees. In Ireland, the Hierarchy consists of 4 Archbishop and 23 Episcopal Sees.—Besides the United Kingdom, Hierarchies are established in British America, India, and Australasia. There are now in the British Empire 28 Archbishop and 105 Episcopal Sees; and 7 Vicariates and Prefectures Apostolic. Including Coadjutors and Bishops Auxiliary, the number of Archbishops and Bishops now holding office in the British Empire is 170, distributed as follows:—

In the Middle Ages the term "University" could be applied to any organised body of men. There could thus be a "university" of persons engaged in any particular occupation. The term came, however, to be appropriated exclusively to bodies of persons engaged in the occupation of teaching and study. Such Universities or guilds of teachers and students, when they had attained some definite organisation, naturally secured the right of granting licences to teach. As time went on it became the custom to grant these licences not only to persons who actually wished to teach, but to all who demanded them and who fulfilled certain requirements, and thus they became what we now understand by the term "degrees."

The earlier Universities grew so imperceptibly from small beginnings, that it is impossible to say who were their founders or in what year they were founded. Bologna (the earliest) and Paris (the most important) first rose into notice in the twelfth century, Oxford and Cambridge in the thirteenth. The system of degrees and the names of the chief officers of the University were introduced into England, as well as into other countries, from Paris. The distinguishing characteristic of the Universities of Oxford and Cambridge undoubtedly is the existence of a number of separate corporations, or Colleges, of which the names are given below.

There have been and are Colleges at many Universities, but nowhere have they reached anything like the same influence and importance as at Oxford and Cambridge. The origin of the Colleges was due to benevolent persons who desired to relieve a certain number of poor scholars from some of the hardships of their life at the mediæval Universities, and in order to do this provided a building in which such scholars could live a common life, and also an endowment for their maintenance. University and Balliol Colleges at Oxford were established in a somewhat rudimentary form in the middle of the thirteenth century; but the establishment of Merton College at Oxford, in 1274, by Walter de Merton, was the real beginning of the English college system. In the foundation of Peterhouse, the first Cambridge college, ten years later, "the rule of Merton" was closely followed.

The early College consisted of a Head and scholars, endowed with board and lodging by means of the buildings and revenues provided by the founder. The scholars were divided into senior scholars engaged in giving instruction, and junior scholars engaged in receiving it; the senior scholars were each other's "fellows;" and gradually the term "Fellow" became appropriated to the senior or governing members of the College, while the term "Scholar" was restricted to the junior members. It was not till long after the establishment of Colleges that it became the custom for them to take in paying boarders—"commoners" at Oxford, "pensioners" at Cambridge. At first the class which corresponds to the commoners and pensioners of the present time continued to live (as the whole University did before the establishment of Colleges) in lodgings kept by townsmen or graduates. One of the old lodging-houses, or "Halls" kept by graduates still remains at Oxford; but under the regulations of the Commission of 1832, it will disappear on the next vacancy in the office of Principal. But a statute of the same year provided for the existence of Private Halls; of these there at present are four, with 45 undergraduates. Twenty years ago the pre-college was to some

small extent restored by the admission of "non-collegiate students" to Oxford and Cambridge.

THE UNIVERSITY OF OXFORD at present numbers upwards of 12,000 members. Of these about 3,000 are in residence in Oxford; the remainder, with a few exceptions, have finished their academic course, taken a degree, and are scattered over the country following various professions. The resident members of the University consist of undergraduates going through a course of instruction and study, and of graduates giving instruction or engaged in research. The resident graduates are 400 or 500 in number, and the undergraduates in residence are about 2,500.

The government of the University is in the hands of three bodies:—1. Convocation, which consists of all Masters of Arts and Doctors of Civil Law, Medicine, or Divinity, who remain members of the University, whether resident or non-resident; 2. Congregation of the University, which consists of resident members of Convocation; 3. The Hebdomadal Council, which consists of certain officers and 18 members elected by Congregation. The Hebdomadal Council alone has the power of initiation; Congregation can amend, confirm, or reject its proposals; Convocation can only confirm or reject them; it may, however, amend certain proposals relating to money. The election of the University representatives in Parliament is vested in the members of Convocation. The Ancient House of Congregation, which must not be confounded with the Congregation of the University, has now nothing to do with legislation in any form, but confines itself to granting degrees and electing examiners. In order to "matriculate," or become a member of the University, it is necessary to be admitted into one of the Colleges or Halls, or into the body called Non-Collegiate Students. A candidate may be admitted into a College as a scholar, as an exhibitioner, or as a commoner. Most of the scholarships are now open to competition for youths under 19, and chiefly of the value of £80 per annum for (practically) four years. Some of the exhibitions are scarcely distinguishable in any important respect from open scholarships, but election to an exhibition is, as a rule, subject to the satisfaction of the electors that the candidate is in necessitous circumstances. Besides the open scholarships and exhibitions, there are still a few "close" confined to particular localities, or particular schools. To be admitted into a College as a commoner, or to become a member of a Hall, or a non-collegiate student, it is necessary to pass an examination held by the College or Hall, or by the delegates of non-collegiate students, or to have passed some test accepted in lieu of this examination. The degree of Bachelor of Arts, the ordinary University degree, cannot be obtained in less than a year and 8 months from matriculation, nor without residing in Oxford for twelve terms, which need not be continuous; there are 4 terms in each year. Members of the University who wish to proceed to a degree must first pass Responsions or one of the examinations accepted as equivalent. The path of undergraduates then divides: those aiming at Honours in Natural Science take the science preliminary, and then the final schools; to the rest three courses are open, (a) to read Pass Moderations and Pass Finals; (b) to read Pass Moderations (or, what is reckoned as the equivalent for the schools of Law and Modern History, the Law Prelim.), and one

of the final honour schools of Litt. Hum., Mathematics, Natural Science, Law, Modern History, Theology, Oriental Studies, and English Literature; (c) to read Honour Moderations in Classics or Mathematics, and any one of the above-mentioned Honour Schools or the Pass final School. After passing these examinations the under-graduate is entitled to take the degree of Bachelor of Arts (or Medicine). For a musical degree a special course is prescribed. For the higher degrees of Bachelor or Doctor in Civil Law, Medicine, and Divinity no more residence is necessary, but for the baccalaureate in Civil Law and Medicine there is an examination prescribed. For the degree of B.Litt. or B.Sc., a special course of study is prescribed by the statutes of the University; for the baccalaureate in Divinity a thesis is at present required. For the M.A. degree the only requirement is that the candidate should have taken the B.A. degree and had his name on the books for twenty-six terms since his matriculation. The bulk of the instruction at Oxford is given by the college tutors and lecturers under a system which allows members of one College to attend lectures given in any other. The remainder of the instruction is given by the University Professors and Readers. The chief University institutions are the Bodleian Library, the second library in the Kingdom; and the Museum, which is furnished with all that is necessary for teaching natural science and medicine.

In 1884 a statute was passed by which "any College or Institution within the United Kingdom, in any part of the British dominions, being a place of education in which the majority of the students are of the age of 17 at least, may, under certain conditions, be admitted to the privilege of affiliated Colleges." A list of such affiliated Colleges and Universities is given on p. 255.

In 1884 a statute was passed allowing the delegates of local examinations to examine the several honour schools of the University for the purpose of the examination of women. Somerville College, Lady Margaret Hall, St. Hugh's Hall, and St. Hilda's Hall, are now established in Oxford for the higher education of women, and some of the members avail themselves of this statute, and are also admitted to the lectures of some of the University professors, and to certain of the College lectures.

The semi-official guide to the University is the "Student's Handbook to the University of Oxford."

THE UNIVERSITY OF CAMBRIDGE is an incorporation of students in all and every of the liberal arts and sciences. It consists of seventeen Colleges, one public, and one private, hostel, founded "for the study of learning and knowledge, and for the better service of Church and State." These are maintained by the endowments of their several founders and benefactors; each of them is a corporate body, and is bound by its own statutes, but is likewise controlled by the paramount laws of the University. A new Code of Statutes for the University was approved by the Queen in Council in 1882. In each of the Colleges there are eight separate orders: these are—(1) Head; (2) Fellows; (3) Nobleman graduates, doctors in the several faculties, bachelors of divinity, masters of arts and masters of law, who are not upon the foundation; (4) Bachelors of Arts, Physic, and Law; (5) Fellow-commoners; (6) Scholars; (7) Pensioners, forming the great bulk of the students; and (8) Sizar, students of narrow means, and in receipt of various emoluments. The head of each college has supreme disciplinary authority in

educational matters; and he, together with the foundation fellows, or a council elected by them, form the governing body. The great legislative assembly of the University is called the Senate: it is composed of all those who have obtained the degree of Doctor or Master, and whose names are still in the register. There is a Council of the Senate (consisting of the Vice-Chancellor and sixteen members of the Senate, of whom eight vacate their office every second year, the office being held for two years), by whom every University "grace" or decree must be approved before it is offered to the Senate. A residence of nine terms is required from each student before taking the B.A. degree, and "honours" may be obtained in any of the following:—Mathematics, Classics, Moral Sciences, Natural Sciences, Mechanical Sciences, Law, History, Theology, Semitic, Indian, and Modern Languages. The University possesses a library of more than 300,000 printed volumes, besides MSS., the Fitzwilliam Museum, the Observatory, the Botanical Garden, the Museum of Biological and Physical Science, and the Divinity School. James I. granted to the University the privilege of sending two Members to Parliament, which it has ever since enjoyed. In 1896-97, the number of students who matriculated was 887, while the members on the boards amounted in 1897 to 13,079. The University has powers with regard to the admission of affiliated students similar to those possessed by the University of Oxford and privileges of affiliation are also granted under certain conditions to students and local lecture centres. A list of the Colleges and Institutions admitted to the privileges of affiliation is given on p. 257.

The University also admits persons as Advanced Students. Each applicant must submit (1) a diploma or other certificate of graduation; (2) a statement as to the course or courses of (a) advanced study or (b) research which he desires to pursue, with such evidence of qualification, attainments, and previous study as he may be able to submit; (3) a certificate or declaration that he has attained the age of 21 years. When the application has been approved by the Special Board connected with the applicant's studies, he must be admitted a member of a College or a Non-Collegiate Student. An Advanced Student who has kept by residence at least six terms, and has obeyed the regulations as to examinations, &c., may proceed to the degree of B.A., and also may an Advanced Student who has obtained a certificate of research.

DUBLIN UNIVERSITY, which is, for most purposes, identical with Trinity College, Dublin, was incorporated by Royal Charter in 1591. Oxford and Cambridge recognise each other's degrees, and those granted by Dublin University, but no others. There are schools of Divinity, Law, Medicine and Surgery, and Engineering. It is represented in Parliament by two members.

SCOTLAND possesses four Universities, namely, those of St. Andrews, Aberdeen, Edinburgh, and Glasgow, and the general regulations for graduation are common to all. THE UNIVERSITY OF EDINBURGH was founded in 1582 by a charter granted by James VI. of Scotland, and in 1621 the Scottish Parliament granted to it all the privileges enjoyed by other Universities in the kingdom. This grant was confirmed in the Treaty of Union between England and Scotland, and again in the Act of Security. The constitution was, however, modified by the Act (1838) relating to the Scottish Universities, and again

by the Universities Act of 1889, with numerous ordinances issued by the Commissioners appointed under the latter Act. The University of Edinburgh consists of a chancellor, rector, principal, 40 professors, and 100 lecturers, &c., 8,500 registered graduates, and about 2,800 matriculated students. There are now six faculties in the University, viz., Arts, Science, Divinity, Law, Medicine, and Music. The University confers the following degrees after examination, viz.:—M.A., D.Litt., D.Phil., B.Sc., D.Sc., B.D., B.L., LL.B., M.B., Ch.B., M.D., Ch.M., Mus. B. and Mus. D. It also confers the honorary degrees of D.D., LL.D., and Mus. Doc. The buildings have been more than doubled in extent within the last 20 years, and the magnificent McEwan hall is now completed. The library contains about 250,000 volumes and 7,500 MSS., and there is also a theological library of 10,000 volumes. In the various faculties there are bursaries, prizes, scholarships, and fellowships, tenable from one to four years, and ranging in value from £10 to £160, their total value being about £17,800 per annum.

THE UNIVERSITY OF ST. ANDREWS was founded by Henry Wardlaw, Bishop of the diocese, in 1411, and was confirmed by a Bull of Pope Benedict XIII. in 1413. During the 15th and 16th centuries three Colleges were established in connection with it, viz., St. Salvator (1450), St. Leonard (1512), and St. Mary (1537). All the Colleges had originally teachers both in philosophy (or arts) and in theology, but in 1579 the two older of them were confined to philosophy, and that of St. Mary to theology. In the year 1747, the Colleges of St. Leonard and St. Salvator were united by Act of Parliament. The Universities of Edinburgh and St. Andrews unite in sending a representative to Parliament.

THE UNIVERSITY OF GLASGOW was founded by a Bull of Pope Nicholas V. (1450-51), with the power of creating doctors and masters, and enrolling readers and students, the whole of whom were to enjoy the same rights and privileges as the University of Bologna. In 1460, James, Lord Hamilton, bequeathed to the then Regent and his successors a tenement in the High Street, with four acres of land adjoining, for the "use of the College of Arts." Between 1577, when a new charter was issued, and the Restoration, the University flourished in every way but the re-establishment of episcopacy detached from it a large part of its revenues, and many of its professorships were abandoned. After the Revolution prosperity set in and in the present century there has been great expansion. The University of Glasgow includes five faculties, viz., Arts, Theology, Law, Medicine, and Science: it was reconstituted and received further endowments under the Acts of 1858 and 1889, the latter Acts providing for the admission of women to Graduation. Conjointly with the University of Aberdeen, it sends one member to Parliament.

The present UNIVERSITY OF ABERDEEN derives its origin from two distinct foundations, viz. the University and King's College of Aberdeen, founded in 1494 by William Elphinstone, Chancellor of Scotland and Bishop of Aberdeen, under the authority of a Papal Bull; and the Marischal College and University of Aberdeen, founded (1593) by George Keith, 5th Earl Marischal, under a charter afterwards ratified by Act of Parliament. In 1860, by another Act of Parliament, the two foundations were united and incorporated into one University and College,

under the title of the University of Aberdeen. The five faculties are Arts, Science, Divinity, Law, and Medicine. Bursaries, Scholarships, Fellowships, and Prizes (exclusive of the ordinary class prizes and medals) to the number of 350, and annual value of £7,800, are awarded to students in the various faculties. The University Library contains upwards of 125,000 volumes.

THE UNIVERSITY OF LONDON was first incorporated by Royal Letters Patent dated November 28, 1836. The present Charter was issued in 1863; and a supplemental charter, opening all degrees to women, was granted in 1878. This University was reorganised in 1900, and now undertakes teaching as well as examination. The Governing Body is the Senate consisting of the Chancellor, Vice-Chancellor, and Chairman of Convocation, and 54 appointed members (see p. 258). There are three standing Committees, the Academic Council, the Council for External Students, and the Board to promote the Extension of University Teaching.

Convocation, represented by sixteen members on the Senate, consists of the Chancellor, the Vice-Chancellor, all members of the three Standing Committees of the Senate not already on Convocation, and the registered Graduates of the University of prescribed standing. Members of Convocation, not being disqualified by sex or otherwise, constitute the Parliamentary Constituency of the University.

There are eight Faculties—Theology, Arts, Laws, Music, Medicine, Science, Engineering, and Economics and Political Science.

Boards of Studies, consisting of teachers of the University and others, are appointed by the Senate to deal with matters concerning the study of the various subjects contained in the University curricula. Thirty-two Boards of Studies are provided for in the regulations.

The remaining modern Universities are DURHAM, established by the Dean and Chapter of Durham under the authority of an Act of Parliament passed in 1831; the VICTORIA UNIVERSITY, which received a Royal Charter in 1880, and combines Owens College, Manchester, University College, Liverpool, and the Yorkshire College, Leeds; the ROYAL AND CATHOLIC UNIVERSITIES OF IRELAND; and the UNIVERSITY OF WALES. Efforts are also being made to raise a sufficient sum for the establishment and endowment of a University at Birmingham, and when the amount required is obtained application for a Charter will be made.

UNIVERSITY EXTENSION.

Of late years much has been done in the way of extending University teaching and advantages. Both Oxford and Cambridge now hold what are called "Local" Examinations, senior and junior, in many parts of the country, and the certificates granted to the successful candidates are accepted as evidence of competency from an educational point of view. They have also organised "University Extension Lectures," which are given in all parts of the kingdom by arrangement with local committees, who apply for a course of lectures and guarantee the small expense. Full particulars may be obtained from J. A. R. Marriott, M.A. (Oxford) and R. D. Roberts, M.A. (Cambridge).

The University of London, too, has arranged a definite scheme, which is now in full working, and a scheme has been started by the Victoria University Manchester and by the "London Society for the Extension of University Teaching."

English, I. Gollancz, M.A., *Christ's*.
Chemical Physiology, F. G. Hopkins.
Physical Anthropology, W. L. H. Duckworth, M.A., *Jes.*
 Gibby Lecturer in Agriculture, Sir Ernest Clarke,
 M.A., *St. John's*.
 Hawsa Lecturer, C. H. Robinson, M.A., *Trin.*
 Paleogeography, H. Woods, *Joh.*, 1900.
 Ethnology, Dr. Haddon, *Christ's*, 1900.
 Bacteriology, Dr. Nuttall, 1900.
 Agricultural Chemistry, T. B. Wood, *Cai.*, 1900.
 Russian, Mr. Goudy, 1900.

SIR ROBERT REDE'S LECTURER.

Fc. Harrison, M.A., Oxon, 1900.

AFFILIATED COLLEGES.

Lampeter, St. David's	1831
Sheffield, Firth College	1886
Aberystwith, Univ. College of Wales	1832
Nottingham, Univ. College	1894
Ware, St. Edmund's College ..	1896

AFFILIATED UNIVERSITIES.

New Zealand, 1886; Adelaide, 1891; Cape of Good Hope, 1892; Calcutta, 1895; Allahabad, 1895; Bombay, 1896; Punjab, 1856; Toronto, 1866; Madras, 1837; Sydney, 1858 (McGill); Montreal, 1899; Tasmania, 1900.

MATRICULATIONS.

1889-90	1,027	1895-96	935
1890-91	952	1896-97	887
1891-92	934	1897-98	931
1892-93	942	1898-99	945
1893-94	935	1899-1900	932
1894-95	918		

UNIVERSITY SCHOLARSHIPS, 1899-1900.

Abbott, W. S. Ostle, *Jes.*; W. H. Smith, *Jes.* (equal).
 Allen, H. A. Wilson, B.A., *Trin.*
 Barnes, A. P. Thompson, *Pemb.*
 Battie, J. Toplis, *Trin.*
 Bell, H. R. Pate, *King's*; H. P. W. Macnaghten, *King's*.
 Browne (Sir Wm.), (not awarded).
 Clerk Maxwell, J. S. E. Townsend, B.A., *Trin.*
 Craven, A. E. A. W. Smyth, *Trin.*
 Crosse, C. T. Wood, B.A., *Pemb.*
 Davies, F. H. Marshall, *Emmanuel*.
 Harkness, A. L. Hall, B.A., *Cuius*.
 Lightfoot (not awarded).
 Pitt, T. G. Johnson, *Jesus*.
 Porson, W. Rennie, *Trin.*
 Stewart of Rannoch, H. R. Pate, *King's*; H. A. Webb, *Trin.* (*Classics*); E. S. Roper, *Corp.*; G. W. Brewster, *King's* (*Sacred Music*); (*Hebrew*) not awarded.
 Tyrwhitt (*Hebrew*), C. T. Wood, B.A., *Pemb.* (1); T. H. Hennessy, B.A., *Jesus* (2).
 Waddington, G. C. Armstrong, *Trin.*
 Whewell, H. M. Wiener, *Cuius*; E. W. Seward, *King's*.

UNIVERSITY STUDENTSHIPS, 1899-1900.

Arnold Gerstenberg, C. F. G. Masterman, B.A. *Christ's*.
 Balfour, J. Stanley Gardiner, M.A., *Govv. & Cai.*
 Craven, E. H. Minns, M.A., *Pemb.*
 Isaac Newton, J. H. Jeans, B.A., *Trin.*

John Lucas Walker, W. Myers, M.A., *Govv. & Cai.*; E. S. St. B. Sladen, M.A., *Govv. & Cai.*
 Prendergast, C. D. Edmonds, B.A., *Em.*

UNIVERSITY PRIZES, 1899-1900.

Adam Smith, S. J. Chapman, B.A., *Trin.*
 Adams, J. Larmor, M.A., *St. John's*; G. T. Walker, M.A., *Trin.*
 Bhavnagar, C. E. Guiterman, B.A., *Trin.*
 Browne (Sir Wm.) Medals, G. D. R. Tucker, *Magdalene* (*Greek Epigram*) and (*Latin Epigram*).
 Not awarded *Greek and Latin Odes*.
 Burney (not awarded).
 Carus, C. T. Wood, B.A., *Pembroke*; H. B'sseker, *Jes.*, R. Talbot, *Emman.* (equal).
 Chancellor's Medals: *Classics*, E. Harrison, *Trin.* (1); R. K. Gaye, *Trin.* (2).
English Verse, F. Sidgwick, *Trin.*
English Law, W. G. Brown, *Trin.*
 Cobden, S. J. Chapman, B.A., *Trin.*
 Evans, R. M. Woolley, *St. John's*.
 George Long (not awarded).
 George Williams (not awarded).
 Hare (vacant).
 Harness (no essays sent in).
 Hebrew, R. R. Smith, *Selwyn*.
 Hebrew Mason, C. T. Wood, B.A., *Pembroke*.
 Hulsean, C. J. B. Gaskoin, B.A., *Jes.*
 Jeremie, C. T. Wood, B.A., *Pemb.*; C. H. Druitt, B.A., *Corp.*

Kaye, H. St. J. Thackeray, M.A., *King's*.
 Le Bas (no essays sent in).
 Maitland, R. A. Thomas, B.A., *Trin. Hall*.
 Members, R. Narayanan, *King's*. (*English Essay*); not awarded (*Latin do.*).
 Norrisian, E. H. Askwith, M.A., *Trin.*
 Forson, R. K. Gaye, *Trin.*
 Paris (Medal), G. Norwood, *St. John's*.
 Prince Consort, F. W. Head, B.A., *Emmanuel*, T. S. Roberts, B.A., *Peterhouse*.
 Scholefield (not awarded).
 Seatonian, J. Hudson, M.A., *Peterhouse*.
 Sedgwick (not awarded).
 Seeley (Medal), F. W. Head, B.A., *Emmanuel*.
 Smith, J. F. Cameron, B.A., *Govv. & Cai.*; R. W. H. T. Hudson, B.A., *St. John's*.
 Thirlwall (no essay sent in).
 Tyson (not awarded).
 Walsingham (Medals), H. H. W. Pearson, B.A., *Cuius*; J. Barcroft, B.A., *King's*.
 Winchester, G. F. Kely, *Trin. Hall* (1); J. A. Hubback, *King's* (2).
 Fork, R. J. T. Goffin, B.A., *U.C.B.*, *Jes.*

SENIOR WRANGLER.

J. E. Wright, *Trin.*

UNIVERSITY RECEIPTS AND EXPENDITURE.

Receipts for the year 1899.

Receipts, 1899 £45,614 9 10

Expenditure for the year 1899.

Total payments £45,418 11 5
 Balance due to chest, 1899 195 18 5

£45,614 11 10

University of London (£18,840)* 1836. South Kensington, S.W.

[The University of London has been re-organised in accordance with the Statutes and Regulations drawn up by the Royal Commission appointed under the University of London Act, 1836. Under these Statutes, which received the Royal Assent 29th June 1890, the University undertakes teaching functions in addition to its previous exclusive work of examination.]

Chancellor, The Rt. Hon. Earl of Kimberley, K.G.,
D.C.L.
Vice-Chancellor, Sir Hy. Enfield Roscoe, D.C.L.,
F.R.S.
Representative in Parliament, Sir Michael Foster,
K.C.B., M.D., Sec. R.S.
Representative on Medical Council, Philip Henry
Pye-Smith, M.D., F.R.S.
Registrar, F. V. Dickins, M.B. £956
Assist. do. and Librarian, H. F. Heath, P.A.D. £578
Clerk to Senate, Alfred Milnes, M.A. £445
Assistant do., E. Brewer, £330; R. Roscoe, B.A. £179

Chairman of Convocation, E. H. Bask, M.A.
Clerk of do., Henry E. Allen, LL.B. £250

The Senate.—The Chancellor, The Chairman of Convocation, The Vice-Chancellor. *By the Crown*, Hon. W. P. Reeves, Sir H. Roscoe, Mrs. E. Sidgwick, Sir J. W. Wolfe-Barry. *By Convocation—(Arts)*, J. B. Beason, J. D. McClure, T. L. Mears, J. Fletcher Moulton, T. B. Napier, Sir A. K. Rollit, (Laws), Hon. Sir H. H. Cozens-Hardy; (Mus.) J. W. Sidebotham; (Medicine), T. Barlow, J. F. Payne; (Science), Mrs. S. Bryant, F. Clowes, C. W. Kitmans, F. S. McAnlay, Sir P. Magnus, S. P. Thompson. *By Royal College of Physicians*, W. H. Allchin, P. H. Pye-Smith. *By Royal College of Surgeons*, A. P. Gould H. G. Howse. *By University College*, G. Carey Foster, Lord Reay. *By King's College*, Lord Lister, Principal Robertson. *By Lincoln's Inn*, Rt. Hon. Lord Maonaghten. *By Inner Temple*, Sir A. Marten. *By Middle Temple*, C. M. Warmington. *By Gray's Inn*, C. A. Russell. *By Incorporated Law Society*, R. Pennington, W. Godden. *By Corporation of London*, T. B. Crosby. *By London County Council*, W. J. Collins, S. J. Webb. *By City and Guilds Institute*, Sir F. Abel. *By the Faculties—(Theology)*, Rev. Principal Cave; (Arts), Prof. M. J. M. Hill, Prof. W. P. Ker, Miss E. Penrose, Prof. G. C. W. Warr; (Laws), Rt. Hon. Lord Davey (appointed by the Crown); (Music), Sir C. H. H. Parry; (Medicine), Prof. J. R. Bradford, Dr. J. K. Fowler, Dr. E. C. Perry; (Science), Sir M. Foster, Prof. W. D. Halliburton, Prof. W. Ramsay, Prof. A. W. Rücker; (Engineering), Prof. W. C. Unwin; (Economics, &c.), Prof. W. A. S. Hewins.

The Colleges of the University are:—

In all Faculties in which instruction is afforded, Univ. Coll., London (see p. 258); King's Coll., London (see p. 259).
In Theology, Hackney Coll., Hampstead (see p. 271); New Coll., Hampstead (see p. 271); Regent's Park Coll. (see p. 271); Cheshunt Coll. (see p. 271); Wesleyan Coll., Richmond (see p. 272); St. John's Hall, Highbury (see p. 271).
In Arts and Science, Roy. Holloway Coll., Egham (see p. 273); Bedford Coll. (see p. 273).
In Science, Roy. Coll. of Science (see p. 158).
In Agriculture, S. E. Agric. Coll., Wye (see p. 266).
In Medicine, The Medical Schools of St. Bartholomew's, London, Guy's, St. Thomas's, St. George's, Middlesex, St. Mary's, Charing

Cross, and Westminster Hospitals, and the London School of Hospital for women (see p. 267).

In Engineering, Central Technical Coll. (see p. 270).

In Economics and Political Science, London Sch. of Economics and Political Science (see p. 272).

UNIVERSITY COLLEGE, Gower St., W.C., 1826.

President, Rt. Hon. Lord Reay, G.C.S.I., LL.D.
Vice-Pres., Rt. Hon. Sir U. J. K. Shuttleworth,
Bt.; M.P.
Treasurer, W. Arthur Sharpe.
Principal, G. Carey Foster, B.A., F.R.S.
Secretary, T. Gregory Foster, PH.D.
Cashier, Walter Brown.
Lady Superintendent, Miss Rosa Morison.

PROFESSORS.

Faculties of Arts and Laws, and of Science.
Ancient and Modern History, F. C. Montague, M.A.
Arabic, S. A. Strong, M.A.
Archæology (Yates), E. A. Gardner, M.A.
Architecture, T. Roger Smith, F.R.I.B.A.
Botany (Quain), F. W. Oliver, D.Sc.
Burmese [Vacant].
Chemistry, &c., William Ramsay, LL.D., F.R.S.
Civil Engin. & Survey, L. F. Vernon-Harcourt, M.A.
Comparative Law [Vacant].
Comparative Philology, J. P. Postgate, LITT.D.
Constitutional Law & Hist. [Vacant].
Elec. Eng. (Pender), J. A. Fleming, D.Sc., F.R.S.
Egyptology (Edwards), W. M. F. Petrie, D.O.L.
English Lang. and Lit. (Quain), W. P. Ker, LL.D.
Fine Arts (Stade), Frederick Brown.
French, Henri Lallemand, B. ès sc.
Geology & Mineral., Rev. T. G. Bonney, D.Sc., F.R.S.
German, R. Friebsch, PH.D.
Greek, J. A. Platt, M.A.
Gujerati, S. A. Kapadia, M.D.
Hebrew (Goldsmid), S. Schechter, LITT.D.
Hindustani & Bengali, J. F. Blumhardt, M.A.
History, F. C. Montague, M.A.
Hygiene, &c., W. H. Corfield, M.D.
Italian, A. J. Butler, M.A.
Indian Law and Marathi, J. W. Neill.
Jurisprudence, J. Pawley Bate, LL.D.
Latin, A. E. Housman, M.A.
Law (Quain), Augustine Birrell, Q.C., M.P.
Pure Mathematics, M. J. M. Hill, D.Sc., F.R.S.
Applied Mathematics, K. Pearson, M.A., F.R.S.
Mechanical Engineering, T. H. Beare, B.Sc., M.I.C.E.
Pali and Buddhist Lit., T. W. Rhys Davids, LL.D.
Pathological Chemistry, V. Harley, M.D.
Pathology, Sidney Martin, M.D., F.R.S.
Persian, E. Denison Ross, PH.D.
Philosophy of Mind, &c. (Grote), J. Sully, LL.D.
Physics (Quain), H. L. Callendar, M.A., F.R.S.
Physiology (Jodrell), E. H. Starling, M.D., F.R.S.
Political Economy, H. S. Foxwell, M.A.
Roman Law, A. F. Murison, LL.D.
Sanskrit, Cecil Bendall, M.A.
Tamil & Telegu, R. W. Frazer, LL.B.
Zoology (Jodrell), E. A. Minchin, M.A.

Faculties of Medicine.

Anatomy, George Dancer Thane.
Botany, F. W. Oliver, D.Sc.
Chemistry, &c., W. Ramsay, LL.D., F.R.S.
Clinical Dental Surgery, S. Spokes, M.R.C.S.

The amounts named in this list are the sums originally voted by Parliament for the current year.

Clinical Medicine (Holme), F. T. Roberts, M.D.
Clinical Medicine, T. Barlow, M.D.
Clinical Surgery (Holme), R. J. Godlee, F.R.C.S.
Clinical Surgery, Victor Horsley, O.S., F.R.S.
Hygiene and Public Health, W. H. Corfield, M.D.
Materia Medica, J. Rose Bradford, M.D., F.R.S.
Med. Juris & Clin. Med. J. R. Russell, M.D. F.R.C.P.
Mental Physiology, W. J. Mickle, M.D.
Obstetric Medicine, H. R. Spencer, F.R.C.P.
Operative Surgery, B. Pollard, F.R.C.S.
Ophthalmic Medicine, &c., John Tweedy, F.R.C.S.
Medicine, G. V. Poore, M.D.
Pathology, Sidney Martin, M.D., F.R.S.
Physiology (Jodrell) & *Zoology* (Jodrell), see p. 253.
Practical Surgery, B. Pollard, F.R.C.S.; R. Johnson, F.R.C.S.
Surg. & Clinical Surg., A. E. Barker, F.R.C.S.

KING'S COLLEGE, Strand, W.C., 1828.

Principal of College, Rev. A. Robertson, D.D.
Vice-Principal & Chaplain, Rev. G. E. Newson, M.A.
Vice-Principal, Ladies' Dept., Miss L. M. Faithfull.
Secretary, Walter Smith.
Librarian, F. W. Walton, M.A.

PROFESSORS.

Architecture, R. Elsey Smith, A.B.I.B.A.
Chinese, Robert K. Douglas.
Civil Engineering, H. Robinson, M.I.N.S.T.C.E.
Classical Literature, G. C. W. Warr, M.A.
Colloquial Arabic, Habib Anthony Salmoné.
Commerce, James Gault.
Electrical Engineering, E. Wilson, M.I.M.E.
English Lang., John W. Hales, M.A.
Fine Art, A. W. Holden.
French, Victor Spiers, M.A.
Geography, Mineral, & Geology, H. G. Seeley, F.R.S.
Geometrical Drawing, F. E. Hulne, F.S.A.
German, H. G. Atkins, M.A.
Hebrew, Rev. A. Nairne, M.A.
Indian Jurisprudence, A. McMillan, M.A.
Italian, Napoleone Perini.
Law and Jurisprudence, J. Gault; H. J. H. Mackay, LL.B.; W. N. Hibbert, LL.D.; C. M. Neale.
Logic and Metaphysics, Rev. A. Caldecott, B.D.
Mathematics, W. H. H. Hudson, M.A.
Mechanical Engineering and Workshops, D. S. Capper, M.A.
Metallurgy, A. K. Huntington, M.I.M.E.
Modern History, J. K. Laughton, M.A.
Natural and Experimental Philosophy, W. G. Adams, D.Sc., F.R.S.
Political Economy, W. A. S. Hewins, M.A.
Sanskrit and Persian, G. F. Nicoll, M.A.
Spanish, Ricardo Ramirez.
Theological Faculty, The Principal, Rev. R. J. Knowling, D.D.; Rev. W. E. Collins, M.A.; Rev. G. E. Newson, M.A.; Rev. A. Nairne, M.A.
Vocal Music, J. E. Verham.

Medical School.

Anatomy, (vacant).
Anæsthetics, J. F. W. Silk, M.D.
Aural Surgery, Urban Pritchard, M.D.
Bacteriology, E. M. Crookshank, M.B.
Botany, W. B. Bottomley, M.A.
Chemistry, J. M. Thomson, F.R.S.
Clinical Medicine, John Curnow, M.D.
Clinical Surgery, W. Rose, F.R.C.S.
Dental Surgery, A. S. Underwood, F.R.C.S.
Diseases of the Skin, A. Whitfield, M.D.
Forensic Medicine, W. B. Smith, M.D.
Hygiene, W. J. R. Simpson, M.D.
Materia Medica, F. W. Tunnicliffe, M.D.

Medicine, N. I. C. Tirard, M.D.
Midwifery, T. C. Hayes, M.D.; J. Phillips, M.D.
Neuro-Pathology, David Ferrier, M.D., F.R.S.
Ophthalmology, M. M. McHardy, F.R.C.S.
Pathological Anatomy, N. Dalton, M.D.
Physiology, W. D. Halliburton, M.D., F.R.S.
Psychological Medicine, E. W. White, M.B.
Surgery, W. W. Cheyne, F.R.S.
Operative, A. Carless, M.S.
State Medicine Laboratory, W. R. Smith, M.D.
Civil Service Dept., W. Braginton, M.A. *Dean.*

University of Durham, 1831.

TERMS (1900-1901).—*Mich.*, Oct. 9 to Dec. 11. *Epiph.*, Jan. 15 to March 18. *Easter*, April 27 to June 25.
Governors, The Dean and Chapter of Durham.
Warden, Very Rev. the Dean of Durham.
Sub-Warden, Rev. Alfred Plummer, D.D.

PROFESSORS.

Divinity & Eccles. Hist., Rev. A. S. Farrar, D.D.
Greek and Classical Lit., Rev. H. Kynaston, D.D.
Mathematics, R. A. Sampson, M.A.
Hebrew, Ven. H. W. Watkins, D.D.
Medicine, G. H. Philipson, M.D.
Surgery, F. Page, M.D.
Physiology, T. Oliver, M.D.
Anatomy, R. Howden, M.B.
Comparative Pathology, G. R. Murray, M.D.
Music, P. Armes, MUS.D.
Tutors, Rev. A. Plummer, D.D.; F. B. Jevons, D.LIT.; Rev. D. Walker, M.A.
Registrar, W. K. Hilton, M.A.
[Affiliated Colleges—Codrington, Barbados; Fourah Bay, Sierra Leone.]

UNIVERSITY COLLEGE.

Master, Rev. A. Plummer, D.D.
Censor and Bursar, W. K. Hilton, M.A.

HATFIELD HALL.

Principal, F. B. Jevons, D.LIT.
Bursar, A. Robinson, B.O.L.

UNATTACHED STUDENTS.

Censor, P. J. Heawood, B.A.

COLLEGE OF MEDICINE.

Newcastle, 1832.

President, Sir George Hare Philipson D.C.L.
Registrar, Frederick Page, M.D.
Treasurer, G. R. Murray, M.D.
Secretary, Robert Howden, M.B.

DURHAM COLLEGE OF SCIENCE.

Newcastle, 1871.

TERMS (1903).—Oct. 1 to Dec. 21. 1901.—Jan. 7 to March 22: April 23 to June 25.
President, Very Rev. the Dean of Durham.
Principal, Rev. H. P. Gurney, D.C.L.
Lady Tutor, Miss E. Simey, B.A.
Secretary, F. H. Pruen.
Treasurer, T. Hodgkin, D.C.L., J.P.

PROFESSORS.

Mathematics, The Principal; C. M. Jessop, M.A.
Physics, H. Stroud, D.Sc.
Chemistry, P. Phillips Bedson, D.Sc.
Geology, G. A. Lebour, M.A.
Natural History, G. S. Brady, LL.D., F.R.S.
Botany, M. C. Potter, M.A.
Classics, J. W. Duff, M.A.
Eng. Lang. and Lit., C. E. Vaughan, M.A. *Vice-Prin.*
Agriculture and Rural Econ., T. H. Middleton, B.Sc.
Engineering and Naval Architecture, R. L. Weighton, M.A.
Mining, Henry Louis, M.A.
Normal Education, Mark E. Wright, M.A.
Headmaster, School of Art, R. G. Hatton.

The Victoria University.

Manchester, 1830.

TERMS (1900).—*Mich.*, Oct. 2 to Dec. 19.
(1901).—*Lent*, Jan. 8 to March 26.
Easter, April 16 to June 29.

Chancellor, Earl Spencer, K.G., LL.D.
Vice-Chancellor, Alfred Hopkinson, M.A., Q.C.
Treasurer, E. J. Broadfield.
Registrar, Alfred Hughes, M.A.
Chairm. of Board of Studies, A. Hopkinson, M.A., Q.C.
Deputy Chairman, A. W. Dale, M.A.
Chairman of Convocation, H. Lamb, LL.D.
Clerk of Convocation, A. E. Steintal, M.A.

COLLEGES OF THE UNIVERSITY—Owens College,
Manchester; University College, Liverpool;
Yorkshire College, Leeds.

I.—OWENS COLLEGE, Manchester. 1831.

President, The Duke of Devonshire, K.G., LL.D.
Principal, Alfred Hopkinson, M.A., Q.C.
Registrar, Sydney Chaffers.

PROFESSORS.

Arts, Science, and Law Department.

Greek & Comp. Philology, J. Strachan, M.A.
Latin & Greek Testament, A. S. Wilkins, LL.D.
English Language, T. N. Toller, M.A.
French, Victor Kastner, B. Es L.
German, Arwid Johansson, M.A.
History, T. F. Tout, M.A.
Logic & Moral Philosophy, S. Alexander, M.A.
Political Economy, A. W. Flux, M.A.
Law, W. A. Copinger, LL.D.; J. S. Seaton, M.A.;
The Principal.

Education, H. L. Withers, M.A.
Mathematics, Horace Lamb, LL.D., F.R.S.
Physics, A. Schuster, PH.D., F.R.S.; T. H. Core, M.A.
Engineering, O. Reynolds, LL.D., F.R.S.
Chemistry & Metallurgy, H. B. Dixon, M.A., F.R.S.
Organic Chemistry, W. H. Perkin, PH.D., F.R.S.
Zoology, S. J. Hickson, D.Sc., F.R.S.
Botany, F. E. Weiss, B.Sc.
Geology, W. B. Dawkins, M.A., F.R.S.
Physiology, W. Stirling, M.D.

DAY TRAINING COLLEGE (for Men and Women).

Prof. of Education, H. L. Withers, M.A.
Mistress of Method, Miss C. I. Dodd.
Tutor, H. T. Mark, B.A.

Medical Department.

Anatomy, A. H. Young, M.B., F.R.C.S., Dean.
Physiology, Biology and Zoology, Chemistry, Organic
Chemistry, Botany, see Arts Department.
Medicine, J. Dreschfeld, M.D.
Surgery (Systematic), G. A. Wright, M.B., F.R.C.S.
(Clinical), F. A. Southam, M.B., F.R.C.S.
Pathology, A. Sheridan Delépine, M.B.
Obstetrics & Gynaecology, W. J. Sinclair, M.D.
Medical Jurisprudence, J. Dixon Mann, M.D.

Department for Women.

The Professors and Lecturers of the College.
Tutor, Miss Edith C. Wilson.
Assistant do., Miss Alice M. Cooke, M.A.

Department of Evening Classes.

The Professors and Lecturers of the College, and
some additional Lecturers.

II.—THE YORKSHIRE COLLEGE, Leeds, 1874.

President, The Marquess of Ripon, K.G.
Principal, N. Bodington, LL.T.D.
Dean of Dept. of Medicine, De Burgh Birch, M.D.
Registrar and Secretary, W. F. Husband, LL.B.

PROFESSORS.

Department of Science, Technology and Arts.

Mathematics, L. J. Rogers, M.A.

Physics, W. Stroud, D.Sc.
Chemistry, Arthur Smithells, B.Sc.
Mining, E. H. Liveing, A.R.S.M.
Biology, L. C. Miall, F.R.S.
Engineering, John Goodman, M.I.M.E.
Greek, N. Bodington, LL.T.D.
History, Arthur J. Grant, M.A.
French, P. H. M. du Gillon.
German, A. W. Schuddekopf, PH.D.
Textile Industries, Roberts Beaumont.
Dyeing, J. J. Hummel, F.I.C.
Education, J. Welton, M.A.
Leather Industries, H. R. Procter, F.I.C.
Agriculture, R. S. Seton, B.Sc.
Law, W. R. Phillips, LL.M.

Medical Department.

Medicine, A. G. Barrs, M.D.
Surgery, E. Ward, M.B.
Anatomy, T. Wardrop Griffith, M.D.
Physiology and Histology, De Burgh Birch, M.D.
Pathology, E. F. Trevelyan, M.B.
Midwifery, Charles J. Wright, M.B.O.S.
Materia Medica, Pharmacology, Therapeutics, C. M.
Chadwick, M.D.
Hygiene and Public Health, R. N. Hartley, M.B.

III.—UNIVERSITY COLLEGE, Liverpool, 1881.

President, Rt. Hon. the Earl of Derby, K.G.
Principal, A. W. W. Dale, M.A.
Registrar, Chevalier E. Londini, D.C.L.

PROFESSORS.

Faculties of Art, Science and Law.

Greek, Gilbert A. Davies, M.A.
Latin, Herbert A. Strong, LL.D.
Classical Literature, A. W. W. Dale, M.A.
Teutonic Languages, Kuno Meyer, PH.D.
Modern Literature, Oliver Elton, M.A.
Economic Science, E. G. K. Gonner, M.A.
History, J. M. Mackay, M.A.
Philosophy, John MacCunn, LL.D.
Mathematics, F. S. Carey, M.A.
Physics, L. B. Wilberforce, M.A.
Engineering, H. S. Hele Shaw, LL.D., F.R.S.
Law, G. H. Emmott, LL.M.
Architecture, F. M. Simpson.
Chemistry, James Campbell Brown, D.Sc.
Natural History, William A. Herdman, D.Sc., F.R.S.
Botany, R. J. Harvey Gibson, M.A.
Education, W. H. Woodward, B.A.

Faculty of Medicine.

Anatomy, A. Melville Paterson, M.D. (Dean).
Medicine, T. Robinson Glynn, M.D.
Surgery, Rushton Parker, F.R.C.S.
Pathology, Robert Boyce, M.B.
Physiology, C. S. Sherrington, M.D., F.R.S.
Midwifery and Gynaecology, W. Briggs, M.D.
Materia Medica, W. Carter, LL.B., M.D.
Medical Jurisprudence, F. T. Paul, F.R.C.S.
Public Health, E. W. Hope, M.D.

The Birmingham University.

Birmingham, 1900.

MASON UNIVERSITY COLLEGE. 1875.

Chairman of Council, Alderman F. C. Clayton, J.P.
Principal, R. S. Heape, D.Sc.
Librarian, W. H. Coth.
Secretary and Registrar, G. H. Morley.

PROFESSORS.

Faculties of Arts and Science.

Mathematics, The Principal.
Physics, J. H. Poynting, D.Sc., F.R.S.
Chemistry & Metallurgy, P. F. Frankland, PH.D.,
F.R.S.

Zoology, T. W. Bridge, D.S.C.
 Botany, W. Hillhouse, M.A.
 Physiology, E. W. Wace Carlier, M.D.
 Geology & Physiography, C. Lapworth, LL.D., F.R.S.;
 W. W. Watts, M.A.
 Civil, Mech., & Electr. Eng., F. W. Burstall, M.A.
 Greek and Latin, E. A. Sonnenschein, M.A.
 English Lang. and Lit., W. Macneile Dixon, LITT.D.
 Mental and Moral Philosophy, and Political Economy,
 J. H. Muirhead, M.A.
 French and Italian, Clovis Bévenot, M.A.
 German, Hermann G. Fiedler, Ph.D.
 Brewing, Adrian J. Brown, F.I.C.

Queen's Faculty of Medicine.

Dean, B. C. A. Windle, M.D.
 Sub-Dean, G. Barling, F.R.C.S.
 Medicine, R. Saundby, M.D.; A. H. Carter, M.D.
 Surgery, Bennett May, F.R.C.S.; G. Barling, F.R.C.S.
 Anatomy, B. C. A. Windle, D.S.C.
 Elementary Biology, T. W. Bridge, Sc.D.
 Therapeutics, A. Foxwell, M.D.
 Forensic Medicine, J. T. J. Morrison, F.R.C.S.
 Hygiene and Public Health, A. Bostock Hill, M.D.
 Midwifery, Edward Malins, M.D.
 Gynaecology (vacant).
 Pathology, R. F. C. Leith, F.R.C.P.
 Lunacy & Mental Diseases, E. B. Whitcombe, M.B.C.S.
 Operative Surgery, Jordan Lloyd, F.R.C.S.
 Ophthalmology, Priestley Smith, M.B.C.S.
 Dental School, J. Humphreys, L.D.S.I. Hon. Sec.
 Physiology, Chemistry & Physics, see above.

DAY TRAINING DEPARTMENT.

Head Mistress, Miss A. H. Joyce.
 Master of Method (men), C. O. Tunstall, B.A.

GRESHAM COLLEGE, Basinghall St., E.C.
 Clerk to the Joint Gresham Committee, Mercers'
 Hall, London, E.C., Sir John Watney.

Provincial Colleges.

BRISTOL—UNIVERSITY COLLEGE 1876.
 TERMS (1900).—Oct. 2 to Dec. 19. (1901).—Jan. 17
 to March 27; April 25 to June 25.
 President, The Lord Bishop of Hereford.
 Principal, C. Lloyd Morgan, F.R.S.
 Tutor to the Women Students, Miss M. Rosamund
 Eric.
 Secretary, James Rafter.

PROFESSORS.

Arts and Science.
 Chemistry, Sydney Young, D.S.C., F.R.S.
 Mathematics, Frank R. Barrell, M.A.
 Experimental Physics A. P. Chattock, M.I.E.E.
 Engineering, T. E. Stanton, D.S.C.
 Geology and Zoology, The Principal; S. H. Rey-
 nolds, M.A.
 Modern History & Eng. Lit., J. Rowley, M.A.
 Greek & Latin, Reginald Fanshawe, M.A.
 Medicine.
 Medicine, E. M. Skerritt, M.D. (Dean); J. E. Shaw, M.B.
 Surgery, C. A. Morton, F.R.C.S., J. Swain, F.R.C.S.
 Anatomy, Edward Fawcett, M.B.
 Physiology & Histology, A. P. Stanley Kent, M.A.
 Midwifery, A. E. Aust Lawrence, M.D.
 Pathology, J. Michell Clarke, M.D.

DURHAM COLLEGE OF SCIENCE.
 (See University of Durham.)

EXETER—ROYAL ALBERT MEMORIAL
 COLLEGE.

TERMS (1900).—Sept. 24 to Dec. 15. (1901).—Jan.
 14 to April 3; April 29 to July 20.
 Principal, A. W. Clayden, M.A.
 Secs., G. R. Shorto; Miss Montgomery.

Director of Drawing, Painting and Design, G. Fell.
 Director of Modelling, A. Drury, A.R.A.

NEWCASTLE-ON-TYNE—RUTHERFORD
 COLLEGE. 1878.

TERMS (1900).—Sept. 17 to Dec. 21. (1901).—
 Jan. 7 to April 4; April 15 to June 21.
 Chairman, Dr. V. H. Rutherford, M.A.
 Principal, A. M. Ellis.

Hon. Sec. & Treas., H. Crawford Smith, J.P.
 NOTTINGHAM—UNIVERSITY COLL. 1880.
 Principal, Rev. J. E. Symes, M.A.
 Secretary, P. H. Stevenson, F.I.C.

PROFESSORS.

History, Literature, & Pol. Econ., The Principal.
 Latin, Greek, and Philosophy, F. S. Grainger, LITT.D.
 French, E. Weekley, M.A.
 Chemistry and Metallurgy, F. S. Kipping, D.S.C., F.R.S.
 Natural Sciences, J. W. Carr, M.A.
 Mathematics & Physics, W. H. Heaton, M.A.
 Engineering, William Robinson, M.E.

DAY TRAINING COLLEGE;

Normal Master, A. Henderson, B.A.
 Normal Mistress, Miss Bird, LL.A.

READING COLLEGE.

Principal, H. J. Mackinder, M.A.
 Registrar, F. H. Wright

SHEFFIELD—UNIVERSITY COLLEGE, 1897.

Principal, W. M. Hicks, D.S.C.
 Registrar, Ensor Drury.

PROFESSORS.

Mathematics, A. H. Leahy, M.A.
 Physics, The Principal.
 Chemistry, W. C. Williams, B.Sc.
 Classics, W. C. F. Anderson, M.A.
 History, H. W. Appleton, M.A.
 English Lang. and Lit., G. C. Moore Smith, M.A.
 Biology, A. Denny, F.I.S.

Technical Department.

Civil and Mech. Engineering, W. Ripper, M.INST.C.E.
 Mining do., F. W. Hardwick, M.A.
 Metallurgy, J. O. Arnold.

Medical Department.

Anatomy, C. Addison, F.R.C.S.
 Medicine, W. Dyson, M.D.
 Surgery, R. J. Pye-Smith, F.R.C.S.
 Pathology, A. J. Hall, M.B.
 Midwifery & Diseases of Women, R. Favell, F.R.C.S.
 Materia Medica, &c., W. T. Cocking, M.D.
 Ophthalmology, Simeon Snell, F.R.C.S.E.
 Public Health, John Robertson, M.D.

SOUTHAMPTON—HARTLEY COLLEGE.
 TERMS (1900).—Sept. 27 to Dec. 19. (1901).—Jan.
 9 to April 13; April 17 to July 10.

Principal, S. W. Richardson, D.S.C.
 Registrar, D. Kiddle.

PROFESSORS.

Classics and English, W. F. Masom, M.A.
 French and German, L. Braudin, L.ès.L.
 Mathematics, J. F. Hudson, M.A.
 Physics, The Principal.
 Chemistry, D. R. Boyd, Ph.D.
 Biology and Geology, E. T. Mellor, B.Sc.
 Engineering, J. Eustice, M.INST.C.E.

WALES.

The University of Wales, 1893.

"PRIFYSGOL CYMRU."

TERMS (1900-1901) Autumn, Oct. 2 to Dec. 19;
 Spring, Jan. 11 to March 23; Summer, April 10
 to June 29.
 Chancellor, H.R.H. The Prince of Wales, K.G.
 Senior Dep. Chancellor, Dr. Isaacbard Owen.

Vice-Chancellor, Principal Reichel, M.A.
 Junior Do., Hon. G. T. Kenyon, M.A.
 Warden, & id of Graduates, Prof. J. E. Lloyd, M.A.
 Treasurer, Lieut.-Gen Sir J. Hills-Johnes, F.R.S.,
 G.C.B.
 Solicitor, C. M. Owen, LL.M.
 Clerk, Guild of Graduates, C. Morgan, M.A.
 Registrar, Ivor James (Brecon).

I. UNIVERSITY COLLEGE OF WALES— Aberystwyth (1872).

Principal, Thomas Francis Roberts, M.A.
 Registrar, T. Mortimer Green.
 Librarian, E. P. Jones, M.A.

PROFESSORS.

Greek, The Principal; J. W. Marshall, M.A.
 Latin & Comparative Philology, J. M. Angus, M.A.
 Oriental, German, & Italian Languages, H. Ethé, Ph.D.
 English Lang. and Lit., C. H. Herford, Litt.D.
 History and Pol. Econ., Edward Edwards, M.A.
 Math., Nat. Philos., & Astron., R. W. Genese, M.A.
 Logic and Philosophy, J. Brough, LL.D.
 Chemistry, H. Lloyd Snape, D.Sc.
 Physics, D. Morgan Lewis, M.A.
 Zoology and Geology, J. R. Ainsworth Davis, M.A.
 Botany, J. H. Salter, D.Sc.
 Welsh, Edward Anwyl, M.A.
 French, W. Borsdorf, Ph.D.
 Education, Foster Watson, M.A.

HALL OF RESIDENCE FOR WOMEN.

Lady Principal, Miss E. A. Carpenter.

II. UNIVERSITY COLLEGE OF NORTH WALES—Bangor (1884).

Principal, H. R. Reichel, M.A.
 Secretary and Registrar, J. E. Lloyd, M.A.

PROFESSORS.

Constitutional History, The Principal.
 History, J. E. Lloyd, M.A.
 Greek, W. Rhys Roberts, Litt.D.
 Latin, E. V. Arnold, Litt.D.
 French & German, F. Spencer, Ph.D.
 English Language & Literature, W. L. Jones, M.A.
 Logic, Philosophy and Pol. Econ., J. Gibson, M.A.
 Mathematics, G. H. Bryan, Sc.D., F.R.S.
 Physics, E. T. Jones, D.Sc.
 Chemistry, J. J. Dobbie, D.Sc.
 Botany, R. W. Phillips, D.Sc.
 Welsh, J. M. Jones, M.A.
 Agriculture, T. Winter, M.A.
 Zoology, P. J. White, M.B., F.R.S.E.
 Education, J. Green, B.A.

HALL OF RESIDENCE FOR WOMEN.

Lady Superintendent, Miss Mary Maude.

III. UNIVERSITY COLL. OF SOUTH WALES^S AND MONMOUTHSHIRE—Cardiff (1883).

Principal, J. Viriamu Jones, M.A., F.R.S.
 Registrar and Sec., J. Austin Jenkins, B.A.

PROFESSORS.

Greek, R. N. Burrows, M.A.
 Latin, R. S. Conway, Litt.D.
 Logic and Philosophy, J. S. Mackenzie, M.A.
 English Lang. & Literature, H. Littledale, M.A.
 History, A. G. Little, M.A.
 Mathematics and Astronomy, H. W. Lloyd Tanner,
 M.A., F.R.S.
 Celtic, Thomas Powel, M.A.
 Physics, The Principal and A. L. Selby, M.A.
 Chemistry, C. M. Thompson, D.Sc.
 Engineering, A. C. Elliott, D.Sc.
 Zoology, W. N. Parker, Ph.D.
 Mining, W. Galloway, M.E.

Faculty of Medicine.

Anatomy, A. Francis Dixon, D.Sc.
 Physiology, J. B. Hayeraft, M.D., F.R.S.E.
 ABERDARE HALL.
 Lady Principal, Miss Kate Hurbatt.

LAMPETER—ST. DAVID'S COLLEGE. 1828.

TERMS: 1900—Michaelmas, 11 Oct to 13 Dec.
 1901—Lent, 17 Jan. to 21 March.
 Easter, 25 April to 28 June.

Principal and Senior Bursar, Rev. Ll. J. M. Bebb,
 M.A.
 Steward, Prof. Williams, M.A.

PROFESSORS.

Theology and Greek, The Principal.
 Hebrew and Theology, Rev. E. T. Green, M.A.
 Mathemat. and Physical Science, A. W. Scott, M.A.
 Latin, Rev. G. W. Wade, M.A., Librarian.
 English Philos., H. Walker, M.A., Junior Bursar,
 Welsh and History, Rev. B. Williams, M.A.
 [Lampeter possesses the exceptional privilege
 of conferring degrees, B.A. and B.D., and has been
 affiliated to Oxford and Cambridge.]

SCOTLAND.

University of St. Andrews, 1411

(£10,800).

Number of Students (1899-1900), 378.

Winter Session (1900-1901), 9 Oct. to 20 March.

Summer Session (1901), 23 April to 28 June.

Chancellor (vacant).

Vice-Chancellor, Principal Donaldson, LL.D.

Rector, James Stuart, LL.D.

Principal, James Donaldson, LL.D.

Representative in Parliament, Sir J. B. Tuke, D.C.

Registrar & Secretary, J. E. Williams.

Librarian, J. M. Anderson. Factor, W. Wilkie.

UNITED COLLEGE OF ST. SALVATOR AND

ST. LEONARD.

Principal, James Donaldson, LL.D. £900

PROFESSORS.

Humanity, Wallace M. Lindsay 696
 Logic & Metaphysics, D. G. Ritchie, LL.D. 615
 Greek, John Burnet, M.A. (Dean: Arts) 734
 Mathematics, P. R. Scott Lang, M.A. 709
 Moral Philosophy, Wm. A. Knight, LL.D. 615
 Nat. Philos., A. S. Butler, M.A. (Dean: Science) 709
 Natural History, W. C. McIntosh, M.D. 615
 Medicine, J. Bell Pettigrew, M.D. 578
 Chemistry, Thos. Purdie, B.Sc. 615
 Education, John M. D. Mencklejohn, M.A. 520
 English Literature, Alexander Lawson, M.A. 555

COLLEGE OF ST. MARY.

Prin., Very Rev. A. Stewart, D.D. (Dean: Theo.)

PROFESSORS.

Primarius Prof. of Divinity, The Principal ... £633
 Biblical Criticism, Rev. Allan Menzies, D.D. 534
 Ecclesiastical History, Rev. John Herkless, D.D. 540
 Oriental Languages, Rev. John Birrell, D.D. .. 613

UNIVERSITY COLLEGE, DUNDEE, 1880.

Principal, John Yule Mackay, M.D.

Secretary, R. N. Kerr, F.R.S.

PROFESSORS.

Mathematics, J. E. A. Steggall, M.A. £453
 Natural Philosophy, J. P. Kuenen, Ph.D. 432
 Chemistry, James Walker, D.Sc. 475
 Natural History, D'Arcy W. Thompson, B.A. 430

Botany (White's), Patrick Geddes, F.R.S.E.	£227
Anatomy (Coat's), J. Yule Mackay, M.D.	396
Physiology, E. W. Reid, B.A. (Dean: Medicine)	359
Engn. and Drawing, T. C. Fidler, M.I.C.E.	477
English Literature, Wm. S. M'Cormick, M.A.	469
Modern Languages, H. Durlac.	50
Pathology, L. R. Sutherland.	350
Surgery, D. MacEwan, M.D.	120

University of Glasgow, 1450 (£20,880).

Number of Students (1899-1900), 1,965.
 TERMS (1900-1901), 18 Oct. to 29 Mar.; (1901)
 24 April to 30 June.

Chancellor, Earl of Stair, K.T., LL.D.
 Vice-Chancellor, The Principal.
 Rector, Earl of Rosebery, K.G., K.T.
 Principal, Very Rev. Robt. H. Story, D.D. *£1,100
 Represent. in Parl., Rt. Hon. James A. Campbell,
 LL.D.

PROFESSORS.

Humanity, George G. Ramsay, LL.D.	*£1,430
Greek, John S. Phillimore, M.A.	*1,350
Civil Engineering & Mechanics, Archibald Barr, D.Sc.	900
Logic and Rhetoric, Robert Adamson, LL.D.	*800
Moral Philosophy, Henry Jones, LL.D.	*800
Natural Philosophy, A. Gray, LL.D., F.R.S.	*1,252
Mathematics, William Jack, LL.D. (Dean: Arts)	*1,440
English Lang. & Lit., W. A. Raleigh, M.A.	900
History, Dudley J. Medley, M.A.	900
Astronomy, Ludwig Becker, Ph.D.	600
Naval Architecture, J. Harvard Biles.	800
Divinity, William Hastie, D.D.	395
Church History, James Cooper, D.D.	*483
Biblical Criticism, W. Stewart, D.D. (Dean: Theology)	500
Hebrew & Semitic Lang., Jas. Robertson, D.D.	*700
Scots Law, A. Moody Stuart, LL.D.	*800
Conveyancing, James Moir (Dean: Law)	600
Materia Medica, Ralph Stockman, M.D., F.R.S.	700
Chemistry, John Ferguson, LL.D.	1,300
Surgery, William Macewen, M.D., F.R.S.	800
Practice of Medicine, T. McCall Anderson, M.D., (Dean: Medicine)	*800
Midwifery, Murdoch Cameron, M.D.	700
Anatomy, John Cleland, M.D., F.R.S.	*1,645
Natural History, John Young, M.D. (Dean: Science)	806
Rotary, Frederick O. Bower, D.Sc., F.R.S.	830
Physiology, J. G. McKendrick, M.D., F.R.S.	1,100
Forensic Medicine, John Glaister, M.D.	600
Clinical Surgery, Sir H. A. Cameron, M.D.	113
Clinical Medicine, S. Gemmill, M.D.	113
Pathology, Robert Muir, M.D.	1,100
Political Economy, W. Smart, LL.D.	600
Olerk of Senatus, Professor W. Stewart, D.D. Assistant do., W. I. Addison; J. Couits, M.A. Keeper of Hunterian Mus., Prof. Young, M.D. Curator of the Library, Prof. Dickson, D.D. Librarian, James Lymburn. Registrar of Gen. Council, Jas. Couits, M.A. Clerk to Gen. Council, Archibald Craig, LL.B. Sec. to Univ. Court, A. E. Clapperton, B.L.	

University of Aberdeen, 1494.

Number of Matriculated Students (1899-1900), 828.
 Winter Session, 16 Oct., 1900, to 20 March, 1901;
 Summer Session, 20 Apr., to 12 July, 1901.
 Chancellor, Duke of Richmond and Gordon, K.G. 1861
 Rector, Lord Strathcona and Mount Royal... 1899

Vice-Chancellor and Principal, The Very Rev. John
 Marshall Lang, D.D. *£800
 Represent. in Parl., Rt. Hon. J. A. Campbell, LL.D.
 Registrar and Sec. of Univ. Court, R. Walker, M.A.
 Secretary of the Senatus, Donaldson R. Thom, M.A.
 Librarian, P. J. Anderson, LL.B.

PROFESSORS.

Greek, John Harrower, M.A.	*£815
Humanity, Wm. M. Ramsay, D.C.L.	*825
English, Herbert J. C. Grierson, M.A.	631
Logic, Rev. W. L. Davidson, LL.D.	£31
Mathematics, Rev. George Pirie, LL.D.	*770
Moral Philosophy, Robert Latta, M.A., D.Phil.	631
Natural Philosophy, Charles Niven, M.A., F.R.S.	917
Systematic Theol., Rev. Wm. P. Paterson, D.D.	*388
Church History, Rev. Henry Cowan, D.D.	*488
Biblical Criticism, Rev. Thomas Nicol, D.D.	*415
Heb. & Sem. Lang., Rev. James Gilroy, B.D.	541
Law, John Dove Wilson, LL.D.	541
Physiology, John Alex. McWilliam, M.D.	*812
Medicine, David White Finlay, M.D.	541
Chemistry, Fras. R. Japp, LL.D., F.R.S.	*812
Anatomy, Robert William Reid, F.R.C.S.	*1,300
Surgery, Alexander Ogston, C.M.	600
Materia Medica, John Theod. Cash, M.D., F.R.S.	631
Midwifery, William Stephenson, M.D.	541
Forensic Medicine, Matthew Hay, M.D.	541
Botany, James W. H. Trail, M.D., F.R.S.	*745
Pathology, D. J. Hamilton, M.B., F.R.C.S.E.	*812
Natural History, J. Arthur Thomson, M.A.	751

University of Edinburgh, 1582.

(£25,870.)

Number of Matriculated Students (1899-1900),
 2,783.

WINTER SESSION, Oct., 1900 to March, 1901;
 SUMMER SESSION, May to July, 1901.

Chancellor, Rt. Hon. Arthur J. Balfour, M.P., D.C.L.
 Rector, Marquess of Dufferin and Ava, K.P.
 Vice-Chancellor and Principal, Sir William Muir,
 K.C.S.I., D.C.L.
 Representative in Parliament, Sir J. B. Tuke, M.D.
 Sec. of Univ. Court, Rev. Professor Taylor, D.D.
 Secretary of Senatus, Sir L. J. Grant, Bart., B.A.
 Clerk to the Senatus and Secretary and Registrar of
 the General Council, Thomas Gilbert.
 Librarian, (vacant).

PROFESSORS.

Humanity, W. R. Hardie, M.A.	*£1,100
Greek, Samuel Henry Butcher, LL.D.	1,176
Mathematics, Geo. Chrystal, LL.D. (Dean: Arts)	1,345
Logic & Metaphysics, Andrew Seth Pringle Pattison, LL.D.	900
Moral Philosophy, James Seth	900
Natural Philos., Peter Guthrie Tait, D.Sc.	1,028
Rhetoric & Eng. Lit., Geo. Saintsbury, M.A.	900
Astronomy, Ralph Copeland	400
Agriculture & Rural Economy, Robt. Wallace.	750
Music, Frederick Niecks	621
Sanskrit & Comp. Philology, Julius Eggeling. Ph.D.	600
Engineering, G. F. Armstrong, M.I.C.E., M.A.	800
Geology, James Geikie, LL.D. (Dean: Science)	830
Commercial and Political Economy and Mer- cantile Law, Joseph S. Nicholson, D.Sc.	800
Education, Simon S. Laurie, LL.D.	700
Fine Art, G. Baldwin Brown, M.A.	600

* The sums appended to the various Chairs are the amounts received in the year 1898-99; each of those marked * has an official residence in addition the salaries marked † are fixed on the understanding that the Professors do not engage in private practice

<i>Celtic Languages & Lit.</i> , D. Mackinnon, M.A.	£600

(of the United Kingdom), Chancery Lane, W.C.

[The Society controls the examination of articleed clerks, the admission of solicitors, and the discipline of the profession. Number of members, 7,840.]

President, 1900, Robert Ellett.

Vice-President, Sir H. H. Fowler, M.P., G.O.S.I.

Secretary, Edward Walter Williamson.

Assist. Secretary, S. P. B. Bucknill.

Librarian, F. Boase.

MEDICAL.

MEDICAL AND DENTAL REGISTRATION.

GENERAL MEDICAL COUNCIL, 299 Oxford Street,

W.—President, Sir William Turner, M.B., F.R.S.,

Registrars:—England, H. E. Allen, LL.B.; Scotland,

J. Robertson, 48, George Square, Edinburgh; Ire-

land, S. W. Wilson, 35 Dawson Street, Dublin.

Any person falsely assuming the title of Physician, Surgeon, Doctor, or Apothecary, is liable to a heavy penalty under the Medical Act; and to a further fine under the Apothecaries Act.

There is a similar penalty for Dentists.

CHARING CROSS HOSPITAL MEDICAL COLLEGE,

—Entrance fee for General students, 110 guineas,

or 121 guineas in five instalments. For Dental

students, 54 guineas, or 60 guineas in two equal

instalments. Number of beds, 180. Dean, Montague

Murray, M.D.

GUY'S HOSPITAL.—Average number of beds in

occupation, 554. The various appointments

and offices are filled by students, selected accord-

ing to merit. Some of the scholarships are of the

value of £150. Composition fee, £157 10s. in one

sum, or £168 in four instalments. Dean, Dr. Shaw.

KING'S COLLEGE HOSPITAL.—Fees, £135. Num-

ber of beds, 217. Dean, Alfred W. Hughes, F.R.C.S.

LONDON HOSPITAL AND MEDICAL COLLEGE.—

This is the largest general hospital in Great

Britain, and contains nearly 800 beds. 60 resident

appointments are made annually, as well as

numerous clinical clerkships, dresserships, &c.

Holders of resident appointments are provided

with rooms and board entirely free of expense.

Fee £126 or by instalments; 15 guineas less to

sons of medical men; 38 prizes and scholarships

are awarded annually. Warden of the College,

Munro Scott, Turner Street, Mile End.

LONDON SCHOOL OF TROPICAL MEDICINE
(Under Government Auspices). Connected with
Seamen's Hospital Society, Seamen's Hospital,
Albert Dock, E.—Weekly fee £1 9s. od.; a travel-
ling scholarship of £300 per annum is in the gift
of the School. Sec., P. Michell.

MIDDLESEX HOSPITAL.—Entrance fee, £141 15s.
Number of beds 321. Two scholarships, value
£100 and £60, and one of £60 for students of
Oxford or Cambridge, are awarded annually.
Dean, W. Pasteur, M.D.

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE.—
The clinical practice of this hospital comprises a
service of 674 beds, besides 70 beds for conva-
lescent patients at Swanley, in Kent. The resident
appointments, 34 in number, as well as all
the students' appointments—clinical clerk-
ships, dresserships, &c.—are chosen from the
students, without fee. Scholarships and
prizes to the value of nearly £900 are awarded
annually. A college is attached, where students
may reside. Number of patients, 1899—in, 6,343;
out, 141,001. Entrance fee, for lectures and hos-
pital practice, 150 guineas, perpetual.—Warden of
the College, Dr. James Calvert.

ST. GEORGE'S HOSPITAL.—Perpetual fee £150,
or £150 in four yearly instalments. Number
of beds 351. Dean, Isambard Owen, M.D.

ST. MARY'S HOSPITAL.—Perpetual fee, £140;
or by instalments, £145. Number of beds 281.—
Dean, Dr. H. A. Caley.

ST. THOMAS'S HOSPITAL. (Founded 1228).—In
this hospital, which contains 572 beds, the prizes
and scholarships are numerous. More than
house appointments are open to students who
have obtained their diplomas. Clinical clerkships
and dresserships may be held without extra fees.
The School buildings are among the most com-
plete in London. Composition fee, £150.—Medical
Secretary, G. Rendle, M.R.C.S.

UNIVERSITY COLLEGE HOSPITAL.—Entrance
fees varying from £57 15s. to £141 15s.; or by
instalments £147. Number of beds, 210. Dean,
H. R. Spencer, F.R.C.P.

WESTMINSTER HOSPITAL.—Entrance fee,
£115 10s.; or by instalments, £126 to £141 15s.
Number of beds, 212. Dean, A. H. Tubby, M.S.,
F.R.C.S.

All the above Hospitals have Schools of Medi-
cine attached to them. Application in every
instance to be made to the Medical Secretary.

METROPOLITAN ASYLUMS BOARD *Exmouth* (see P. 292).

SHORTHAND.

PITMAN'S METROPOLITAN SCHOOL, Southampton Row, W.C.

Principal, B. de Bear.

TECHNICAL EDUCATION.

THE development of technical education during the past few years has been very marked. The City and Guilds of London Institute was one of the first organisations which was established to meet the special educational requirements of the industrial population and to supplement the more general scientific and artistic training afforded by the Science and Art Department. The passing of the City of London Parochial Charities Act in 1883, was a step of great importance to the Metropolis, as it provided for the establishment of polytechnics in various parts of London on the model of Mr. Quintin Hogg's original institution at Regent Street. But the country, as a whole, did not obtain the necessary facilities for the development of technical education until the passing of the Technical Instruction Act in 1889, which gave County Councils the power to raise a rate of 1d. in the £ for supplying and maintaining technical instruction, and the Local Taxation (Customs and Excise) Act, 1900, which handed over to County Councils an annual sum of about three-quarters of a million as applicable to technical education. During the past few years the amount of the annual Exchequer contribution under the provisions of this Act has increased, and in 1899 it amounted to £867,000, of which £804,000 was appropriated by County Councils to technical education. Local authorities further

raised during the same year rates under the Technical Instruction Act, 1889, amounting to £32,000. The grants under the Act of 1890 are made to the Councils of Administrative Counties and County Boroughs, and are administered by committees of these Councils, which, in some cases, consist entirely of Council members and in other cases contain a certain proportion of outside members. In London the Technical Education Board of the London County Council is composed of 35 members of whom 20 are Councillors and 15 outside members.

Technical Education Board of the L.C.C.

Chairman (1900-1901), T. A. Organ, B.A., L.C.C.

Secretary, W. Garnett, D.C.L.

Assist. Secretaries, B. M. Allen, M.A.

Inspector of Science, G. W. Kimmins, D.Sc.

Inspectors and Inspectors, G. Frampton, A.B.A.;

W. R. Lethaby, and E. Catterston-Smith.

Lady Organiser of Domestic Economy, Miss E. Pycroft.

The principal technical institutes maintained or aided by the Board are the following:—

L.C.C. CENTRAL SCHOOL OF ARTS AND CRAFTS, 316, Regent Street, W.

Curator, C. W. Beckett.

L.C.C. SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, Bolt Court, Fleet Street.

Principal, C. W. Gamble.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS (Lord Leighton Art Gallery, Peckham Road, S.E.)

Headmaster, W. B. Dalton.

Secretary, C. H. Johnson, B.A.

L.C.C. SHOREDITCH TECHNICAL INSTITUTE Pitfield Street, Hoxton, N.

Superintendent of Trade Classes, W. E. Degardon.

Secretary, S. Hicks.

L.C.C. CARRIAGE BUILDING SCHOOL, Balderton Street, W.

Headmaster, L. J. Butler.

Polytechnics.

THE CITY POLYTECHNIC, comprising:—

(i) *The Birbeck Literary and Scientific Institution*, Bream's Buildings, Chancery Lane.

Principal, G. Armitage Smith, M.A.

Secretary, W. H. Congreve.

(ii) *The City or London College*, White Street, Moorfields

Principal, Sidney Humphreys, B.A., LL.B.

Secretary, D. Savage.

(iii) *The Northampton Institute*, Clerkenwell.

Principal, R. M. Walsley, D.Sc.

Secretary, Sydney Axford.

THE EAST LONDON TECHNICAL COLLEGE (People's Palace, Mile End Road, E.

Director of Studies, J. L. S. Hatton, M.A.

THE NORTHERN POLYTECHNIC, Holloway Road, N,

Principal, J. T. Dunn, D.Sc.

Secretary, W. M. Macbeth.

THE BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.

Principal, S. H. Wells.

Secretary, J. Harwood.

THE SOUTH WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.

Principal, H. Tomlinson, B.A., F.R.S.

Secretary, A. B. Harper.

THE BOROUGH POLYTECHNIC, Borough Road, S.E.

Principal, C. T. Millis, M.I.M.E.

Secretary, W. M. Richardson.

THE REGENT STREET POLYTECHNIC, 309, Regent Street, W.

Director of Education, Robert Mitchell.

GOLDSWITH'S INSTITUTE, New Cross, S.E.
Secretary, J. S. Redmayne, B.A.
 WOOLWICH POLYTECHNIC, William Street, Woolwich.
Principal, J. Ryan, M.A., L.L.M., D.Sc.
Secretary, A. J. Naylor.

Schools of Art.

BLACKHEATH, LEE AND LEWISHAM, Blackheath.
Headmaster, J. H. Hale.
 CAMDEN, Dalmeny Avenue, Camden Road.
Headmaster, F. Black, R.B.A.
 CLAPHAM, Vernon Road, High Street, Clapham.
Headmaster, L. C. Nightingale.
 CLAPTON AND STAMFORD HILL, 11, Clapton Common.
Headmistress, Miss Edith F. Giles.
 HAMMERSMITH, Dunsany Road, Brook Green.
Headmaster, F. Hawkes.
 LAMBETH, Miller's Lane, Upper Kennington Lane.
Headmaster, T. McKeggie.
 NORTH LONDON AND BOROUGH OF HACKNEY, Sandringham Road, Dalston.
Headmaster, C. H. Swinstead.
 PUTNEY, Oxford Road, Putney.
Headmaster (vacant).
 ST. MARTIN'S Castle Street, Endell St., Long Acre.
Headmaster, J. E. Allen.
 THE ROYAL FEMALE SCHOOL OF ART, Queen's Square, Bloomsbury.
Superintendent, Miss Cann.
 WESTMINSTER, conducted in the Architectural Museum, Tufton Street, Westminster.
Headmaster, M. Loudon.

In addition to the above schools there are Schools of Art attached to all the Polytechnics, except the Northern Polytechnic. Schools of Art are also conducted by the City and Guilds of London in Institute at Finsbury Technical College and at the South London Technical Art School, 122-124 Kennington Park Road. Art classes are also held at the Royal School of Art Needlework and the School of Art Woodcarving, both at South Kensington.

Other Institutions.

ALLENHAM INSTITUTE, Pancras Road, N.W.
Secretary, H. S. Mingard.

AMBULANCE SERVICE OF LONDON.

The "Bischoffsheim," Office, St. Mary's Hospital,
Praed Street, W.
Hon. Sec., Thos. Ryan.

THE METROPOLITAN HOSPITAL SUNDAY FUND.

THIS excellent charity was started, under the
presidency of the LORD MAYOR, in 1873, the total
receipts in that year amounting to £27,700.
They have since risen as high as £60,361 in
the year of greatest prosperity, 1895, when a special
donation of £10,000 was received. The total for
the year ending Oct., 1900, stood at £51,993 4s. 6d.

The BALANCE SHEET for the year ending
31st October, 1900, shows the following results:—

RECEIPTS.—Collections made at various places
of worship, £33,855 18s. 11d.; collections at
schools £26 6s. 1d.; donations (including £13 11s. for
surgical appliances), £14,671 os. 2s.; dividend on
£15,346, invested in 2½ Consols, per execu-
tors to the will of the late W. A. Guesdon, and
interest, £1,339 19s. 4d.; balance in hand, £2,076.

EXPENDITURE.—Awards to one hundred and
thirty-two hospitals (including 30 General Hos-
pitals, 5 Chest Diseases, 17 Children's, 6 Lying-
In, 6 Hospitals for Women, 24 other special
hospitals, 29 Convalescent, and 15 Cottage
Hospitals), £43,754; eight Institutions, £699;
fifty-four Dispensaries, £1,917; Surgical Appli-
ances £2,506; office expenses, printing and
stationery, advertising, postage, &c., £1,716.

SPECIAL EXPENSES.—Special Church and Chapel
Appeals, £55.

THE HOSPITAL SATURDAY FUND.

THE twenty-sixth Annual Report (1899) shows
■ slight increase on its immediate predecessor, the
receipts being £190 more than those for 1898. The
BALANCE SHEET for the year ending 8th January,
1900, is as follows:—RECEIPTS.—Balance brought
forward, £205; General Collection, £19,739;
Special Donations, £275, making a total of
£20,219.

EXPENDITURE.—General expenses (including
rent, salaries, printing, postage, local committees),
£2,191; awards to Hospitals, Dispensaries, &c.,
£14,576; grants to Distribution Committee, £1,360;
to Surgical Appliance Committee, £1,020; Ambu-
lance, £58; leaving a balance of £1,013.

THE PRINCE OF WALES'S HOSPITAL FUND.

THE account of Receipts and Expenditure from
1st January to 31st Dec., 1899, shows the total
receipts for that period to have been £43,537;
the total expenses amounting to £1854. The
sums disbursed to Hospitals were as follows:—
Grants to Hospitals, £41,000; Grants to Conva-
lescent Homes, £1,000; total, £42,000. The
Funds in Hand after payment of the 1899
distribution were £176,016.

THE BANK OF ENGLAND, FOUNDED 1694.

Capital, £14,553,000. Rest, ■ Reserve, on 10th October, 1900, £3,150,984.

The Total Dividends for the year ending 31st August, 1900, were at the rate of £10 per cent. The Price of Bank Stock, 10th October, 1900, was £333.

NOTES in circulation, 10th Oct., 1900, £30,158,385. Notes unemployed, £19,660,510.

GOLD and SILVER Coin and Bullion, Head Office and all Branches, £33,599,845.

THE GOVERNOR, DEPUTY GOVERNOR, AND OTHER OFFICERS FOR THE YEAR 1900-1901.

THE BANKERS' CLEARING-HOUSE.

THE BANKERS' CLEARING-HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31st, 1899, was £9,150,269,000, an increase of £1,052,978,000 compared with the year 1898, and the largest amount on record. On Stock Exchange days the payments were £1,544,295,000, an increase of £312,448,000 on the year 1898, and the highest total on record. The payments on Consols account days for the same period amounted to £403,042,000, an increase of £181,000 as compared with 1898, also the highest total ever reached; and on the 4ths of the months the payments for 1899 amounted to £359,088,000, an increase of £27,821,000 compared with 1898, again the highest amount on record. The establishment is managed by a Committee—Chairman, The Rt. Hon. Lord Avebury, F.R.S.; Deputy Chairman, Bonamy Dobree; Hon. Sec., J. Herbert Tritton; Acting Managers, Philip W. Matthews (Chief Inspector); Arthur E. Salt (Deputy Inspector).

Population of the United Kingdom.

PREVIOUS to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

attracted the rural population to towns, in consequence of which many villages were comparatively deserted. The American War and the French Revolutionary War carried off large numbers of men; and this, coupled with the removal of the rustic population, gave rise to the impression that the inhabitants of the country had decreased, and were rapidly decreasing. The first general Census in 1801 dispelled this idea, and showed that, notwithstanding all drawbacks, there were many more people than any one supposed. Since the time named there had been a fresh numbering every ten years, with the following results:—

1570.....4,160,221 1670.....5,773,646
 1600.....4,811,718 1700.....6,045,008
 1630.....5,600,517 1750.....6,517,035

(a) These rates have been corrected for the varying length of the intercensal periods.

† Exclusive of the Army, Navy, and Merchant Seamen Abroad, who numbered in 1801, 442,013; in 1811, 502,530; in 1821, 289,005; in 1831, 260,192; in 1841, 202,954; in 1851, 212,194; in 1861, 250,356; in 1871, 216,080; in 1881, 215,374; and in 1891, 224,211.

** Incorrectly taken. † Decrease.

Briefly the Census of 1891 showed an increase of 3,028,086 persons and 619,978 inhabited houses in England and Wales; in Scotland, increases of 290,074 and 78,563; in the Channel Islands and Man, an increase of 6,582 persons and of 1,627 houses; but in Ireland a decrease of 470,086 persons (or 62,961 families) and 43,530 inhabited houses; giving, after these deductions, an increase of 2,854,658 persons and 656,638 inhabited houses.

Is the following table the Population and Birth and Death rates are shown for 117 large towns in the United Kingdom and in different parts of the globe. The populations, in most cases, are those estimated for the month of June, 1899. The most salubrious neighbourhoods, according to the figures here shown, are Bournemouth, Hornsey, and Eastbourne, which have a death-rate of a trifle more than a half that of Paris or Vienna, and almost a third of that of Dublin and Alexandria. The largest birth-rate is at Madras, and the smallest at Bournemouth, which also has the smallest death-rate.

* Rate not stated.

THE British Isles, including the United Kingdom of Great Britain and Ireland, the Isle of Man and the Channel Islands, lie between the 48th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 77,681,644 acres, or 121,377 sq. miles, with a population in 1891 of 37,740,283, and estimated at 40,509,925 in 1900. In 1899 there were 1,163,111 births, 741,144 deaths, and 317,090 marriages in the United Kingdom, the marriage rate being 16·3 per 1,000 (in England and Wales only) in 1898. The Domestic Exports totalled £6 10s. 5d. per head, the Imports £11 19s. 2d. per head, and the total trade £20 1s. 7½d. per head of the estimated population in 1899. The amounts cleared at the Bankers' Clearing House totalled £9,150,269,000 or £225 11s. 11½d. per head, and the National Debt amounted to £610,477,757, or £4 17s. 11½d. per head of the estimated population in 1900. The National Income in 1899-1900 was £119,839,095, or £2 19s. 0¾d. per head, and the Expenditure £133,722,406, or £3 5s. 11¼d. per head. Of the total area 47,789,444 acres were under cultivation in 1900; of this total 8,707,391 acres were under corn crops; 4,301,774 green crops; 28,261,529 permanent pasture or grass; 233,548 orchards; and 3,033,777 acres were preserved woods, coppices, &c. The live stock included 2,028,092 horses; 11,344,696 cattle; 31,680,225 sheep; and 4,003,589 pigs.

ENGLAND.

which may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the Rivers Tweed and Solway, and from Wales by the Severn and Dee, has an area of nearly 51,000 square miles, and a population (census, 1891) of 27,501,352. Except in the west and the north, England is for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, including iron, tin, lead, zinc, slate, and coal, which make abundant amends for the poverty of their surface.

The southern and eastern parts of England have a population mainly derived from Belgic Gaul, whilst the western districts and Wales have been peopled from the West of France and the North of Spain, while Ireland and Scotland are believed to have been peopled by a race originally Belgic. When the Romans first came to our shores the inhabitants might have been roughly divided into two sections: those who lived inland, and who may with some reason be called Celtic colonists, were a race of hunters and shepherds, dressed in the skins of beasts, and inhabiting huts made of rude wicker-work and covered with rushes; whereas the coast-dwellers were, probably, of Gallic origin, with some approach towards civilisation, and holding intercourse, for purposes of trade, with foreign merchants visiting the island. Neglecting the Romans, who were no more than mere military garrisons, and mingled little with the natives—much like Europeans in the East at the present day—we have the Saxons and Jutes established from Kent to Devonshire, and the Angles (and subsequently the Norsemen) from the Thames to the Tweed. The Norman Conquest brought in a mixed multitude from the Continent; the wars of Stephen introduced a numerous body of Flemings, who were settled by Henry II. in Wales; and the commercial views of Edward III. led to the establishment of a still larger body of the same people as clothworkers in Kent. The west of England was known to the Phœnicians, and was resorted to by them for its tin, four centuries or more B.C.; hence the whole country received the name of the Cassiterides, or Tin Islands. When invaded by Cæsar (B.C. 55) it was called Britain perhaps derived from Prydain, the name of an early chief of great power), or sometimes Albion, that is, the *White Land*, from the white cliffs on the S. E. coast.

The Romans subdued all England, and parts of Scotland and Wales, but did not reach Ireland,

though its existence was known to them. About A.D. 410, the Romans abandoned the island after a rule of about 350 years, traces of which still remain in every quarter. These may best be observed in the names of many of our most ancient towns, in the great roads that reach from end to end of the country, and in the remains of Roman buildings and architecture from time to time unearthed in different places. For example, every town whose name consists wholly, or in part, of *cester*, *caster*, or *chester* (derived from Latin *castra*, a camp) marks the site of one of those wonderful entrenched camps for which the Roman armies were famous. The military roads, straight, broad, and splendidly made, are still to be traced; Watling Street, from the coast of Kent by way of London, to Carnarvon; the Foss—or Foadyke—from Cornwall to Lincoln; Ikenild Street, from the mouth of the Tyne, through York and Derby, to St. David's; and Irmin Street, from the last-named spot to Southampton. The Britons, being divided into as many hostile States as they had cities, were unable to resist the fresh hordes (now called Saxons and Angles) that poured into the island, and about A.D. 457 the kingdom of Kent was founded. The Britons still fought stubbornly, but were gradually driven westward, and by the year 584 the kingdom of Mercia (meaning the march-land, or frontier State) was established, being the last of the seven kingdoms founded by the invaders—whence the whole is usually styled the Heptarchy. The kings of the Heptarchy made war on each other, but at last, in 827, Egbert of Wessex obtained the supremacy of the whole, and styled himself King of England. His descendants, of whom Alfred the Great was the most illustrious, held the throne for more than 200 years, but the country suffered greatly during the time from the ravages of the Danes, who, under Canute and his sons, became its rulers for 25 years (1017-1042). The Saxon line was restored in the person of Edward the Confessor, to whom Harold succeeded; but his death in the Battle of Hastings, on the 14th October, 1066, gave England into the hands of the Norman kings, who reigned from 1066 to 1154. Then came the Plantagenets (1154-1485), the Tudors (1485-1603), and the Stuarts (1603-1714), to whom the House of Hanover succeeded on the death of Queen Anne. Her present Majesty is the sixth sovereign of that line, and on June 22, 1897, celebrated the completion of the 60th year of her reign.

The entire population of England and Wales is here given for 1891 (29,002,525), with the gross estimated rental as settled by the Assessment Committees in the Valuation Lists in 1899, the amount collected for the Poor Rate for the year ending Lady-Day, 1899, and the number of paupers who were actually in receipt of relief on Jan. 1st, 1900. The total number of persons in England and Wales receiving relief on Jan. 1st, 1900, was 307,471, as against 821,036 on Jan. 1st, 1899. The total cost of Relief to the Poor for the year ended Lady-Day, 1899 (the last information published), was £11,285,973, as against £10,828,275 for the year ended Lady-Day, 1898.

The sum raised by Poor Rates in England and Wales during the year ended Lady-Day, 1899, was £22,063,539; the receipts in aid, inclusive of grants from County and Borough Councils, and grants under the Agricultural Rates Act, 1896, amounted to £3,166,024, forming a total receipt of £25,229,563; considerably over one-half of this amount was expended for other purposes than the relief of the Poor; the payments towards the County, Borough, and Police Rate, for instance, amounted to £9,514,835; to Rural District Councils, £1,635,932; and to School Boards, £1,253,876. The actual relief to the poor for the year ended Lady-Day, 1899, amounted to 7s. 2d. per head of the estimated population, while the sum levied as Poor Rate during the same period was equal to a rate of 14s. 1d. per head; as compared with 7s. 0d. and 13s. 9d. respectively, in the year ended Lady-Day, 1898. (For statistics and other particulars as to Wales, see next page.)

* POPULATION OF COUNTIES.—The county population is that given in the Census of 1891, as the population of each Registration County. The Registration Counties do not precisely correspond with the area of ordinary counties, but with Poor Law areas to which the figures in this table re-

late. In 1861 the amount levied for poor rates was at the rate of 7s. 1½d. per head; in 1891 the amount levied was at the rate of 10s. 9½d. In 1861 the officials employed received but £660,370; in 1891 this had increased to £1,452,810, and in 1899 to £1,971,614.

THE Principality of Wales, with an extreme length of 135 miles, and a breadth varying from 35 miles to 95 miles, lies in the S.W. of Great Britain, and has an area of 7,378 square miles, or about 4,720,000 acres. The Principality is rich in minerals; slate, coal, and iron being among the more important; while of its manufactures, flannel, cloth, and hosiery alone are worthy of mention. The native inhabitants are almost wholly of the Cymric stock of the Celtic race; and a large number of them belong to the religious body known as the Calvinistic Methodists.

At what time Christianity was introduced it is impossible to tell, but certainly not later than A.D. 400. When the British Christians were driven from their homes, such of them as did not seek refuge beyond the seas, found in the rocky fastnesses of the Welsh mountains a secure retreat from their enemies. There they immediately set about dividing the country into ecclesiastical divisions for administrative purposes, and the present sees of Wales represent those leading centres of religious thought that became famous in the sixth century.

The four bishoprics still remain as of old, and the numbers of beneficed clergy now to be found in them are as follows: St. David's, 360; Llandaff, 246; St. Asaph, 206; and Bangor, 147. The sees of St. David's and Llandaff were united with the Southern province in the year 1107, and those of Bangor and St. Asaph in the years 1092 and 1143 respectively.

When the Saxon pirates began to visit and ravage the eastern shores of Britain, the Celtic inhabitants were gradually pressed westward by the invading hordes, and finally found secure shelter in the wilds of Wales, Devon, and Cornwall. The border-lands, or marches, between England and Wales were long in a state of at least guerrilla warfare; and it was not until about 850 A.D. that one Roderick (Rhodi Mawr) contrived to unite the whole country into one Principality, dividing it afterwards among his sons into three smaller ones, named, severally, Gwynedd, Dyfed and Ceredigion, and Powis. This was followed by the incursions of the Danes, after which Howel once more (in the 10th century) succeeded in re-uniting the country. Later, when England was tending in the same direction of unity, Athelstane received a tribute from the Welsh in recognition of his nominal sovereignty over them. William I. and his son Rufus both tried the plan of granting fiefs to their more

adventurous Norman knights, on condition of their conquering the land, while Henry I. introduced into the Principality a colony of Flemish wool-workers. Henry II., too, and John, endeavoured, with doubtful success, to effect a final subjugation of the troublesome province. A combination of fortuitous circumstances led to its lasting conquest. Llewellyn, who succeeded David, had been implicated in the Montfort rebellion, but, on the accession of Edward I., managed to get included in the general amnesty granted to those who had joined the Leicester faction. In 1276, however, Edward, having been repeatedly refused the homage due to him from Llewellyn, raised an army to enforce his commands. Internal dissensions among the Welsh greatly aided the English, and Llewellyn, at length cooped up and almost starved to death among the Snowdon mountains, was forced to submit at discretion, and accept the terms offered by the victor (1277). By the grace of Edward the Welsh prince was allowed to return to the Principality; but trouble arising again, in which both Llewellyn and his brother David were concerned, a war arose, and the independence of Wales was forever shattered. Llewellyn was slain in battle in 1282, with two thousand of his followers; and in the following year David, being betrayed to the English, was sent in chains to Shrewsbury, and at last put to a painful and ignominious death as a traitor. The Welsh nobility then submitted in a body, and King Edward invested his son Edward (who had been born at Carnarvon) with the Principality, which very soon afterwards was fully annexed to the Crown. In later days the history of Wales has been almost identical with the history of England, the Principality and country marching side by side in sure and steady progress.

In education the Principality has made great strides of recent years, and possesses a University (Prifysgol Cymru), consisting of the three university colleges of Aberystwyth, Bangor, and Cardiff, in addition to St. David's College at Lampeter.

The following table of statistics contains some interesting information with reference to the various individual counties of Wales. In addition to those named, Monmouth is, not without good reason, claimed as a Welsh county; if admitted, it would add another quarter of a million to the population of the Principality, thus making it larger than that of Scotland in the early part of the century. The Welsh is a distinct nationality, with a language and literature of its own.

LOCAL TAXATION (ENGLAND AND WALES).—POOR RATE.

STATEMENT AS TO RATEABLE VALUE, RECEIPTS, AND EXPENDITURE, FOR EACH YEAR FROM 1852 TO 1899, INCLUSIVE, SHOWING THE PROPORTION OF EXPENDITURE CONNECTED AND UNCONNECTED WITH THE RELIEF OF THE POOR, THE RATE PER £ ON RATEABLE VALUE, AND PER HEAD OF POPULATION, ETC.

Table with 20 columns: Year, Rateable Value at Year, Receipts in Aid, Total, In-Maintenance, Out-Relief, Maintenance of Lunatics, Salaries and Rations of Officers, Superannuation, Total Expenditure, Rate per Head on Population, County, Borough, and Police Rate, Highway, Rural District, Burial Boards, &c., School Boards and Schol. Attendance Expenses, Vaccination Fees, Parliamentary Grants, Total Expenditure unconnected with Relief of Poor, Total Expenditure connected with Relief of Poor.

(40) Not shown. (41) Calculated on the Assessable Value reduced by an amount equal to one-half of the Rateable Value of Agricultural Land.

THE most northerly part of the island, divided from the south by the River Tweed, the Cheviot Hills, and the Solway Firth, is the ancient Caledonia or modern Scotland, a mountainous country, and to a great extent bleak and barren, but inhabited by a race of men who have made the country productive, wealthy, and prosperous. It contains nearly 30,000 square miles, or 19,084,659 acres, of which not quite 4,500,000 are in a state of cultivation, with a population in 1881 of 3,735,573, and of 4,025,647 in 1891.

After the Union with England in the year 1707, and the suppression of the Rebellion of 1745, the Scottish people generally awoke to the fact that the loss of their separate nationality was a gain; and being united to a wealthy neighbour, they with one accord determined to derive all possible benefit from the change. By means of an admirable

banking system, capital was utilised. With wonderful ingenuity and perseverance a great commercial port, Glasgow, was opened in the west. Scottish citizens flocked south and into the British colonies, everywhere carrying with them their habits of industry and thrift. India especially became the scene of their operations, and notwithstanding any narrow feelings of national jealousy, it was seen that they were creators of commerce and producers of wealth. Education was widely diffused throughout the masses, while the Calvinistic religion, even if it did not in all instances produce piety, helped to promote thought and mental activity. At the Union the Scottish Church and Judiciary were left intact, and so, with slight modifications, have remained to the present day; both England and Scotland borrowing something from each other and gradually assimilating.

POPULATION, AREA, VALUATION AND PAUPERS OF COUNTIES.

** The valuation of lands and heritages is only approximate: it is that furnished by the Inspectors of the Poor to the Local Government Board for Scotland. The number of Paupers is that chargeable on May 15, 1899.

The Sheriff-Principal of Lanark resides in Glasgow, all the others reside in Edinburgh.

TERM DAYS IN SCOTLAND.

Candlemas, 2nd Feb.; Whitsunday, 15th May;
Lammas, 1st Aug.; Martinmas, 11th Nov.; Re-
moval Terms, 28 May, 28 November.

When a Scottish Term falls on a Sunday, the
day after is held as Term Day.

LAW TERMS.—Sittings, 15th October to 20th
March; 12th May to 20th July.

BANK HOLIDAYS.—New Year's Day, 1st
Jan.; Christmas Day [if either of the preceding
falls on a Sunday, the Monday following shall be
the Bank Holiday]; Good Friday; First Monday
in May; First Monday in August.

The above, with the addition of Her Majesty's
Birthdays, are also the holidays observed in
Customs and Inland Revenue Offices.

IRELAND is an island lying between 51° 26' and 55° 23' N. lat. and 5° 20' and 10° 26' W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,759 square miles, or 20,326,209 acres. The greater part of the surface is a plain, interspersed with low hills, the highest mountain being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world. The climate is temperate, and many plants which can only be grown in hot-houses in England flourish in the open air in Ireland; while the great moisture which generally prevails is so favourable to vegetation that the country early received the name of the Green or Emerald Isle.

The population of Ireland on April 3, 1891, was 4,704,750, a decrease of 470,086—equal to 9·1 per cent. since the preceding Census of 1881. It was not till 1821 that the first complete census was taken, and the numbers were then found to be 6,801,827; in 1831 they had increased to 7,767,401, and in 1841 to 8,175,124. The highest point was reached in 1845, when the entire population was estimated at 8,295,061. According to the Census of 1891 (when the male population amounted to 2,318,953) 86,118 were professionally occupied, 17,588 in domestic employ, 93,284 in commercial occupations, 838,326 in agriculture, 11,201 in fishing, and 404,899 in industrial pursuits, leaving 867,537 unoccupied. Of the total female population (2,335,797 in 1891) 25,947 were following professions, 220,627 in domestic service, 2,162 in commercial occupations, 91,017 in agriculture, and 252,255 in industrial pursuits, leaving 1,793,712 unoccupied. Of the total population 940,621 men and women were therefore engaged in agriculture and fishing, and 657,154 in industrial pursuits. Agriculture is therefore the principal occupation of the people, and in 1899 51,866 acres were under wheat, 1,135,536 oats, 169,469 barley, 12,113 rye, 662,914 potatoes, 301,449 turnips, 62,714 mangel wurzel and beetroot,

34,989 flax, and 2,118,907 under clover, sanfoin, and grasses and permanent pasture. The produce of the soil in 1899 was 927,452 cwts. of wheat, 17,895,880 cwts. of oats, 3,040,083 cwts. of barley, 155,738 cwts. of rye, 2,760,289 tons of potatoes, 4,309,053 tons of turnips, 1,055,91 tons of mangel wurzel and beetroot, 7,138 tons of flax, and 4,875,795 tons of hay. An industry which is rapidly gaining ground is bee-keeping, the average amount of honey produced in the ten years 1838-1897 being 286,602 lbs., while in 1898 the total amounted to 526,374 lbs.

The number of persons employed in factories and workshops in 1897 was 216,726 (of whom 100,232 were women). Of this total 73,567 were employed in textile factories, 113,015 in non-textile factories, and 30,144 in workshops.

The conquest of Ireland was begun in the year 1170, but can hardly be regarded as completed until the surrender of Limerick in 1691, and was declared a kingdom in 1542; and this kingdom was united to that of Great Britain by the Act of Union, on Jan. 1st, 1801, the empty title of "King of France," which the English kings had borne since the time of Edward III., being abandoned.

The government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, almost regal sway. He has a salary of £20,000, but being usually a nobleman of large private fortune, his expenditure is frequently much more than the amount received. The peerage consists of 176 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The prevailing religion is Roman Catholic, 75 per cent. of the population professing that form of faith. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 12 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Ireland is well supplied with educational establishments, having two universities, a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of Primary Schools under the National School Commissioners.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

THE LORD LIEUTENANT.

His Excellency the Right Honourable George Henry, 5th Earl Cadogan, K.G., G.M.P., born 12th May, 1840; married, 16th May, 1865, Lady Beatrix, 4th daughter of 2nd Earl of Craven; Lord Lieutenant General and General Governor of Ireland; sworn in 8th July, 1895 £20,000

ROYAL IRISH CONSTABULARY.

Headquarters, Dublin Castle—£1,352,408.

The Royal Irish Constabulary, then styled "the Constabulary of Ireland," was formed in 1836 by the consolidation of the "Barony Constables" and the "Peace Preservation Police." The force is armed with rifle, sword, and pistol, and its duties are varied, and military as well as police work has often to be undertaken. The loyalty with which the duties of the force are performed, often against the kith and kin of its members, has been rewarded on many occasions by violent abuse on platforms and in the Press. In 1857, by Her Majesty's command, the title of the force was changed from the Constabulary of Ireland to Royal Irish Constabulary, in special recognition of the splendid services rendered in the past, and in particular, during the Fenian outbreaks of that year, a special grant of £180,000 being voted by Parliament for distribution among the force. Officers and men alike have given repeated proofs of conspicuous courage and daring, and of exceptional moderation under the most trying circumstances. On 1 Nov., 1900, the strength of the force was 250 Head Constables, 1,912 Sergeants, 445 Acting Sergeants, and 8,333 Constables; total, 15,940.

Insp.-Gen., Col. Neville F. F. Chamberlain	£1,500
Private Sec., E. M. P. Wynne	£150
Dep.-In.-Gen., H. F. Considine, B.A., D.L.	£1,000
Asst. do., C. E. A. Cameron; T. Whelan	£700

McClintock; F. S. Ireland; M. Deigan; G. McConkey	£350 to £400
2nd Div. Clks. (High. Grd.), Two.. each	£250 to £350
Depôt	
Asst. Insp.-Genl., Commd., T. F. Singleton	£600
Surgeon, S. T. Gordon, F.R.C.P.I.	£400
Counties, &c.	
Town Inspector (Belfast), T. Moriarty, J.P.	£600
36 County Inspectors	each £350 to £500
212 District Inspectors	each £125 to £300

REVENUE AND EXPENDITURE.

A return relating to Imperial Revenue states that the estimated true revenue from Ireland for the financial year ending March 31, 1900, was £8,664,500, against £8,202,000 in the previous financial year. The proportion to the total revenue of the United Kingdom was 6.88 per cent. in 1899-1900 against 6.74 per cent. in the year 1898-99. In 1859-60 the proportion was 11.12 per cent. The population of Ireland was in 1861 20 per cent. of that of the United Kingdom, and in the middle of the year 1899 this proportion had decreased to 11.2 per cent. The expenditure rose from £6,477,000 in 1893-99 to £6,980,000 in 1899-1900, figures in 1859-60 being £2,304,000.

SUPREME COURT OF JUDICATURE.

COURT OF APPEAL.

Ex-Officio Judges.—The Lord Chancellor, the Lord Chief Justice, the Master of the Rolls, the Chief Baron of the Exchequer.

ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3'—54° 25' N. and long. 4° 18'—4° 47' W., nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 145,325 acres, with a population of 55,598. Curiously enough the history of the island is intimately linked with that of the Hebrides and the kingdoms of Scotland and Norway. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition, conquered the Orkneys and the Shetlands, the Western Isles, and Man, and added them to the kingdom already beneath his sway. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the Battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1736 James, 10th Earl of Derby, died without issue male; the earldom went to his next male heir, but the sovereignty of the island went, with the Barony of Strange, to his heir general, James, Duke of Athole, on whose death the island descended to his daughter Charlotte, from whom, in 1765, Parliament purchased the sovereignty for £70,000. In 1827 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed, and about 23 miles of electric tram roads. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. Bills after having passed both Houses are signed by the Members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL: Douglas, pop. 19,525 (Castletown, pop. 2,178, is the ancient capital); the other towns are Peel, pop. 3,631, and Ramsey, pop. 4,866.

THE CHANNEL ISLANDS

comprise the bailiwicks of Jersey (including the Minquiers and Ecréhou Rocks) and Guernsey (in the latter of which are comprehended the small islands of Alderney, Sark, and Herm), situated off the north-west coast of France, at distances of from ten to thirty miles. They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles; and the population in 1891 was 92,272—Jersey, 54,518, Guernsey with Herm and Jetou 35,243, Alderney, 1,857, and Sark, 570. The land under cultivation in Jersey amounted in 1900 to 19,234 acres, and in Guernsey 11,623 acres, the principal product of the soil of Jersey being potatoes and wheat, and in Guernsey green crops and oats. There were 2,447 horses, 12,272 cattle, 258 sheep, and 5,841 pigs in Jersey in 1900; in Guernsey, 1,638 horses, 7,029 cattle, 319 sheep, and 4,743 pigs. The famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents Her Majesty. French is the official language of the local legislatures, called the *States*, and of the Royal Court, but the old Norman dialect is still spoken by the people. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The climate of these islands is mild, and the soil exceptionally productive. The islands being all but exempt from imperial taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre, on the east coast.

LONDON was a place of importance under the Romans, and was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1189, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, three Lord Mayor of London" (in reality, four times, A.D. 1297, 1398, 1406, 1409); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1861, 1862; and Alderman Sir R. N. Fowler, 1883, 1885. The title of Lord Mayor was first bestowed in 1354 on Sir Thomas Legge, by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually

until 1394, when a charter of Richard II. directed them to be chosen for life. The Common Council was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than 4. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but it is commonly placed in A.D. 1189. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but Edward IV., whose cause was favoured by the citizens of London, gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected. He is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is mentioned as a royal officer in 1195; when he became a civic official is not known; but the Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as "ancient" officers in the Charter of Edward II. (A.D. 1319).

The Lord Mayor, Aldermen, and Principal Officers of the City of London.

Lord Mayor. £10,000.

Offices—Victoria Embankment, E.C. Hours 10 to 5 (Sat. 10—1). Board Meetings Thursday, at 3 p.m. Was instituted (in accordance with Mr. Forster's Elementary Education Act) in 1870, and the first election took place on Nov. 29, 1870. From that date to Lady Day, 1900, accommodation in permanent schools had been provided for 577,385 children, and schools with accommodation for 5,619 are in process of erection. At Lady Day last there were upon the rolls of the Board Schools (including certain schools transferred, and temporary schools), 536,019 children. The staff of teachers comprised 10,538 adult, and 2,283 pupil-teachers and candidates.

When the census of all efficient and non-efficient schools in London was taken in 1871, the number of children on the roll was 320,143; the number upon the roll of efficient schools was (1900) 755,940; the number sent to industrial schools at the instance of the Board, up to Lady Day, 1900, being 28,555. In addition, many other cases had been referred to various voluntary agencies, &c., to be dealt with. The precepts for the year 1900-1901 amount to £2,172,047, which is at the rate of 13'9³d. in the pound.

MEMBERS (elected Nov. 29, 1900, for 3 years).

THE London County Council was constituted, in common with county councils throughout England and Wales, under the Local Government Act of 1888. The main principle of the Act is that it adapts to counties that form of municipal government which had previously pertained only to English boroughs.

London is an administrative county, covering an area of 121 square miles, with boundaries conforming with those of the area over which the late Metropolitan Board of Works exercised its jurisdiction under the Metropolitan Management Act of 1855, except that under the London Government Act, 1899, there has been some rearrangement of the county boundaries, the principal being that Penge is taken out of, and South Hornsey is added to London. The county has absorbed, so far as rateable value is concerned, about seven-eighths of Middlesex, about two-thirds of Surrey, and nearly one-third of Kent.

The City of London is an electoral division of the county and was not much affected by the Act. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolitan outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties. Such matters necessitate the consideration of both the administrative county and the non-administrative county are referred to "The Standing Joint Committee" of the London County Council and the London Quarter Sessions.

The Administrative County of London has no jurisdiction over the police, in that respect differing from other counties.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman (as at present), 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, and will all retire in March, 1901, the fourth council having been elected in March, 1898. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same except as to the term of office. The first meeting of the London County Council was held on the 21st March, 1889, under the presidency of Lord Rosebery.

The powers, duties, and liabilities of the Council are: *First*, those formerly belonging to the Metropolitan Board of Works in connection with the raising and loaning of money, and the sanctioning of loans required by vestries (now borough councils); main-drainage, and the sanctioning of local sewers; fire brigade; parks and open spaces; works for prevention of floods by the Thames; bridges over the Thames within the county (but outside the City), and other Thames crossings, including the tunnel under the Thames at Blackwall and the free ferry at Woolwich; street improvements; controlling the width of new streets, the building line, and the naming and numbering of streets; maintaining subways under streets for gas and water mains, &c.; supervising buildings and district surveyors; dangerous structures; buildings unfit for habitation; structure of theatres and music-halls; artisans' dwellings; cattle diseases; explosive substances and petroleum storage; infant life protection; tramways; locomotives on roads; gas, gas-meter, and electric-

meter testing; and constant supply of water. *Secondly*, those transferred from former county justices in connection with the granting of music and dancing licences; asylums for pauper lunatics; reformatory and industrial schools; testing weights and measures; county buildings; coroners; and other minor matters. *Thirdly*, powers transferred from various authorities with regard to highways; licensing of houses or places for the performance of stage-plays beyond the limits of the Lord Chamberlain's authority; licensing of slaughter-houses and of cow-houses; and the supervision of common lodging-houses. *Fourthly*, new powers conferred by recent Acts with respect to technical education; Bills in Parliament, and actions at law; registration of electors; public health; historic buildings and monuments; rifle ranges; inspection of factories to secure means of escape from fire; suppression of nuisances; regulation of overhead wires; the administration of the Shop Hours and Shop Seats Acts; and the establishment of reformatories for inebriates. As the central representative body in London, the Council also interests itself in the thousand and one things affecting the welfare of the people of London as a whole, and has delegates on the Thames and Lea Conservancy Boards, and numerous other boards, charities, &c.

The Council meets weekly, and receives reports from its 30 committees. The Finance Committee have important statutory powers. The Council is the principal money-raising body for all the local authorities in the county, and has a gross debt of £44,400,000, a Sinking Fund of £21,400,000, and an annual expenditure of about seven millions. The Asylums Committee have special powers under the Lunacy Acts, and manage Hanwell, Colney Hatch, Banstead, Cane-hill, Claybury, Bexley and Horton Manor Asylums. An eighth asylum for 2,000 patients is in process of building, and the provision of a working colony for 300 male epileptic patients has been approved as an experiment. The Industrial Schools are under the care of another Committee: the schools at Feltham and Mayford accommodate 730 boys. A great deal of attention has been given to the organisation of the schools. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts; they have recently formulated schemes for the clearance of insanitary areas in Clerkenwell, Holborn, Southwark, St. Luke's and Poplar, at an estimated net cost of over half a million. The Committee have in hand also the clearance of several smaller areas, and the building of working-class dwellings. Upwards of £1,000,000 has been expended by the Council on the provision of working-class dwellings, which are, generally speaking, self-supporting. The Council is pressed to take up the problem of providing suitable healthy dwellings for the poorer classes and in congested districts, but financial difficulties have hitherto barred the way, it being held by many to be economically unsound to build such dwellings except they are self-supporting. This committee have also taken action in connection with the question of workmen's trains, which has an important bearing upon the housing problem. The Council has established a model municipal lodging-house for men, at Parker Street, Drury Lane. The Bridges Committee are chiefly concerned with Thames crossings, including

not only the bridges over the river but also the tunnel under the river at Blackwall (opened in May, 1897, by H. R. H. the Prince of Wales on behalf of Her Majesty the Queen), and the Free Ferry at Woolwich. The rebuilding of Vauxhall Bridge is proceeding; and a foot-tunnel is being constructed under the Thames at Greenwich. Powers were also obtained in 1900 for the construction of a 30 feet (external measurement) tunnel to connect the districts of Rotherhithe and Shadwell. This tunnel will be $1\frac{1}{2}$ miles in length, and is estimated to cost upwards of £2,000,000. The Improvements Committee are engaged upon the formation of a new street 100 feet wide between Holborn and the Strand (authorised by Act of 1899), new approaches to the Tower Bridge, the widening of Mare-street, Hackney, and several smaller improvements; and the Council has obtained Parliamentary powers to embank the Thames from the Houses of Parliament to Lambeth-bridge. The Fire Brigade, directed by the Fire Brigade Committee, has been much increased since the Council came into existence: the authorised staff now numbers over 1,100 men, and several new stations are being built, while old stations are being improved and enlarged.*

Perhaps the most popular work of the Council is that connected with its parks and open spaces; 2,656 acres were taken over from the late Board, and 1,150 acres have since been added. The total number of places is 91, and the yearly cost of upkeep is £114,000.

The disposal of sewage is the work of the Main Drainage Committee. All the sewage of London is conveyed by 87½ miles of main intercepting sewers to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, the harmless effluent being allowed to flow into the river, and the sludge, amounting to 2,300,000 tons in a year, being carried out to sea by a fleet of six specially-constructed vessels. The great improvement in the condition of the river observed in late years has been maintained. A comprehensive scheme for enlarging the main drainage system to meet the increased population, and modern sanitary requirements has been recently adopted by the Council. The complete scheme involves an outlay of three millions sterling, and the Council has voted $1\frac{1}{4}$ millions for the first part of the work.

In 1893 a "Works Department" was formed for the purpose of carrying out building, painting, sewer construction, paving, and other works, without the intervention of contractors. £106,000 has been expended on the purchase of premises and the erection of workshops, &c., at Belvedere-road, Lambeth, and a subsidiary depot at Battersea bridge. Works are carried out by the Manager of the Department, who is responsible to the Spending Committees in the same way as a contractor would be; the finances of the department are under the control of the Finance Committee. During the year ended the 31st March last the department executed works to the value of £364,461.

In the 1898 Almanack, particulars were given of the purchase by the Council of the tramways of the London Street Tramways Company, and those of the North Metropolitan Tramways Company within the county, comprising in all about 50 miles of tramway lines, and the depots, stables, &c., connected, therewith. These are

leased to the North Metropolitan Company until Midsummer, 1910, at rents amounting to nearly £60,000 a year, together with 12½ per cent. of the increase in gross receipts over those for the year 1895. On the 31st December, 1898, the Council purchased the undertaking of the London Tramways Company, which is the largest of the systems south of the Thames, extending over 24 miles. These tramways are worked by the Council. The traffic receipts for the year ending 31st March, 1900, amounted to £439,230, and the profit on working was £92,991, or after deducting interest on, and provision for repayment of, capital outlay £51,774. Night services are run on certain routes.

The Council obtained powers in the last session of Parliament for the conversion of all tramways in the county belonging to, or hereafter coming into possession of, the Council to electrical traction.

During the past year the Council has established at Horley, Surrey, a home for female inebriates, with accommodation for 30 patients and the necessary staff.

The Council has decided to purchase land at Ponders End, and to establish a volunteer rifle-range.

Powers are to be sought in the ensuing year to run municipal steamboats on the Thames.

The question of water supply is still engaging serious attention. The Council has resolved to again promote bills for the purchase of the undertakings of the eight London Water Companies.

Twenty members of the Council, together with fifteen representatives (nominated by the Council) of other bodies or interests, constitute the Technical Education Board, charged with the performance of duties under the Technical Instruction Acts.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock, and current income raised in a county rate. Certain contributions are also received from the Imperial Exchequer. The capital disbursements for the year ended 31st March, 1900, amounted to £1,952,876, including street improvements, £614,910; housing of the working classes, £532,187; main drainage, £157,286; fire brigade, £81,729; lunatic asylums, £277,275; and the purchase of tramways, £88,037. The maintenance of such works, the sinking fund to pay off debt, and the interest on the debt, together with all recurring disbursements of every kind, are paid out of rates. Some idea of the nature and amount of this class of disbursements will be gathered from the statement on page 348.

The Council's powers to expend capital money and raise Stock, or, as they are called, "borrowing powers," are conferred by its annual Money Act. The Act of last session sanctioned, for the year ending March, 1901, expenditure on various improvements and services not exceeding £7,880,495, but a large proportion of this amount was a grant of unexercised powers contained in previous Acts. The Act also conferred powers to lend during the year to the School Board, vestries, and other public bodies not exceeding £3,000,000.

The Council issued £5,000,000 of new 3 per cent. London County Consolidated Stock last June. This stock is not to be redeemed at any fixed date, but the Council reserves power to redeem at par at any time after the 19th March, 1920, and a sinking fund has to be provided, under Treasury approval, sufficient to repay all expenditure within a period of 60 years. This issue was made at a fixed price of £97 10s., and up to the time of closing the list £27,831,380 was

For further particulars, see "Metrop. Fire Brigade."

applied for. The total stock now outstanding amounts to £46,761,638. During 1900, two issues of London County bills were made, £400,000 in February and £600,000 in May, all with a six months currency. The gross debt of the Council, including liabilities transferred from the former counties of Middlesex, Surrey, and Kent, stood on 31st March last, at £44,435,192; against this there were loans owing to the Council from the School Board, vestries, and other public bodies amounting to £17,743,791. Property was held to the extent of £2,534,089, and there were also other assets bringing down the net liability to £23,031,516, of which £2,536,903 was remunerative debt incurred for tramways and working class dwellings.

The rating for the year 1900-1 amounts to 12¼d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 2¼d. in the pound, together 14¾d.; in 1839-1900 the rate was £13½d.: in 1898-99 and 1897-98 it was 14d.; in 1896-97 and

1895-96, 15d.; in 1894-95 14d.; in 1893-94 13d.; in 1892-93 12½d.; in 1891-92 11¾d.; in 1890-91 13¼d.; and in 1889-90 12½d. The assessable value of the County of London on 6th April, 1900, was £37,549,521—a 1d. rate producing £156,456.

In considering the question of rating, the grants paid by the Council in relief of local rates (indoor paupers, registration of electors, &c.) must be borne in mind; they tend to lighten the burden in some parishes and increase it in others; generally speaking, the effect is to materially benefit the poorer parishes. A still more important step towards the equalisation of London rates was effected by the London (Equalisation of Rates) Act, 1894, under which the Council is to levy half-yearly a rate of 3d. in the £ to make an "equalisation fund"; and then to distribute the fund on the basis of population.

The amount raised by county rate for the year to 31st March, 1900, is made up as follows:—

ESTIMATED RECEIPTS.

1. CASH BALANCE on 1 April, 1900 ...	£351,743	
2. RECEIPTS in aid of expenditure:—		
Exchequer Contribution	£664,485	
Interest on loans advanced, on cash balances, &c.	657,165	
Rents	104,018	
Sundry contributions, fees, fines, &c.	155,093	
		1,580,761
3. TRANSFER from Tramways Account		80,500
4. GRANT from Local Taxation Account under the Agricultural Rates Act, 1896		931
5. COUNTY CONTRIBUTIONS required to be raised:—		
For General County purposes, equal to a rate of 12¼d.	£1,916,552	
For Special County purposes, equal to a rate of 2¼d.	309,163	
		2,225,715
[Total rate, 14¾d.]		
		£4,239,650

ESTIMATED EXPENDITURE.

1. DEBT:—		
Redemption	£610,164	
Dividends on Stock (less income-tax)	1,377,055	
Interest on sundry liabilities	52,569	
Income Tax	53,885	
Management of stock, &c.	33,683	
		£2,037,361
2. GRANTS:—		
To Guardians for indoor paupers	£326,809	
To Guardians and others out of the Exchequer contribution	252,382	
Registration of Electors	14,500	
Main roads	10,700	
		638,861
3. PENSIONS (including Superannuation and Provident Fund)		51,720
4. ESTABLISHMENT CHARGES		151,870
5. JUDICIAL EXPENSES		44,635
6. SERVICES:—		
Main Drainage	£55,010	
Fire Brigade	193,640	
Parks and Open Spaces	113,210	
Bridges, Tunnel and Ferry	45,079	
Embankments	14,680	
Pauper Lunatics	70,570	
Industrial Schools	23,935	
Coroners	33,000	
Weights and Measures	14,635	
Miscellaneous	74,226	
		858,015
7. TECHNICAL EDUCATION		182,000
8. PARLIAMENTARY EXPENSES, Inquiries, Rating Appeals, Election of Councillors, &c.		49,255
		3,956,737
9. ESTIMATED CASH BALANCE on 31 March, 1901		242,913
		£4,239,650

The Fourth London County Council.

Porter, J. B. (M)	North Kensington.	Yates, W. B. (P)	Stepney.
Porter, Sir W. H. Bart.	Alderman till 1901.		

NOTE.—The italic capital letters (M), (P), (I) stand for the Party whose candidate the Member was at the election—viz., (M) Moderate; (P) Progressive; (I) Independent; (IL) Independent Labour.

CHIEF OFFICERS OF THE COUNTY COUNCIL.

Clerk of the Council, G. Laurence Gomma. £2,000	Public Control Dep., Alfred Spencer £950
Chief Clerk, T. Bell.	Statistical Officer, (vacant)
Engineer, Sir Alexander Binnie, Kt. £2,000	Chemist, F. Clowes, D.Sc. £900
Assistants, E. Bazalgette, C. Elwin, J. E. Worth, H. Bennett.	Parliamentary Agent, H. L. Cripps £1,100
Architect, W. E. Riley	Parks Dep., Lt.-Col. J. J. Sexby..... £600
Chief Asst., J. Hebb.	Chief of Fire Brigade, Comm. L. de L. Wells £900
Valuer, A. Young	Second Off., S. G. Gamble.
Asst. Valuer, E. J. Harper.	Manager Works Dep., W. Adams £1,500
Comptroller, H. E. Haward	Tramways Manager, Alfred Baker £1,000
Asst. Compt., E. Doggett.	Housing Manager (new appointment, not yet filled)..... £800
Solicitor and Deputy Clerk, W. A. Blaxland £1,200	Clerk Asylums Com., R. W. Partridge £1,100
Assistant Solicitor (Conveyancing), G. P. Jackson	Secretary, Technical Education Board, W. Garnett, M.A., D.C.L. £1,250
Medical Officer, Shiley Forster Murphy, M.D. £1,250	
Asst. Med. Officers, Dr. W. H. Hamer, Dr. C. W. F. Young.	

London City Livery Companies.

**THE CITY COMPANIES, NUMBER OF LIVERYMEN (1899),
CORPORATE AND TRUST INCOMES, MASTERS, CLERKS, AND HALLS.**

As will be seen from the following table, many of the London Livery Companies are possessed of great wealth. Of some portion of the property they are merely trustees, and no doubt render periodical accounts to the Charity Commissioners; but of the "Corporate" property they are the sole owners, are not bound to render any account, and may dispose of the income as they please. Fifteen of the Companies have more than ten

thousand pounds a year; some of them are very liberal in their charities, especially in the way of education. Some of the Companies invite fresh members to join, others do their utmost to repel. Corrections have been made from time to time by most of the Companies; those marked "†" have revised this year's list, but others withhold information. Where the return was incomplete, the Editor allowed the old figures to remain.

COMPANY.	No. of Livery.	Corpo- rate Income	Trust Income	Total Income	Master or Warden 1900-1901.	Clerk.	Hall.*
		£	£	£			
Mercers †	183	48,000	35,000	83,000	Geo. H. Blakesley	Sir John Watney ..	4 Ironmonger Lane.

* Woolmen ¶	20	376	None.	376	T. J. Caless ...	P. C. C. Francis...	[15 Gt. Winestr St., E.C.]

* In case of a Company having no Hall, the address of the Clerk is given in brackets.

The rateable value of the Halls of the London Companies is about £55,000, and that of their Schools and Almshouses about £18,000 a year. The value of their Plate and Furniture is about £320,000, and the annual income of the livings in their gift—several of the "great" Companies are patrons

of livings—about £12,300. In 1880 the Companies were indebted to the extent of about £270,000.

The above information is mainly derived from the report, in 5 vols., published in 1884, of the City Livery Companies' Commission appointed in 1880, of which the late Earl of Derby was chairman.

LONDON WITHIN VARIOUS BOUNDARIES.

Metropolitan and City Police Districts	443.421	4,766,661	5,633,806	*

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1898-99 of £41,419,203, and embraces an area of upwards of 588 square miles. The number of new houses built since 1849 up to and including the year 1898 is 6,845, with 8,496 in course of erection: the new mileage since 1849 being 2,233.

* Not shown in the Census.

THE following list of Life Offices, with two or three unimportant exceptions, contains the names of all the British offices, of four Colonial companies, and of four offices founded in New York.

DATE OF FORMATION.—This is of considerable importance, inasmuch as the normal rate of mortality is not fully experienced until the company has been doing business for five-and-twenty or thirty years. Any company established more recently than this must be judged largely by its prospects instead of by its results.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system, whereby the whole of the surplus or profits are allotted to the participating policyholders, or whether the company has proprietors or shareholders by whom part of the surplus is received. Many of the Life offices also transact other insurance business as well. These are indicated by letters in the column headed "Class." In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital, however, is usually liable for the claims of all branches. The companies in the first part of the Table all transact "ordinary" Life business; the companies doing Industrial business are stated separately.

FUNDS.—The Funds as stated in the table are in all cases taken from the Revenue Accounts deposited by the offices with the Board of Trade. The Paid-up Capital of Proprietary Offices that transact Life business only is included in the Funds. Paid-up capital of offices transacting other classes of business as well is excluded from the Funds as stated in the Table, because such capital is available for other claims than those of the Life Branch. The Funds as well as the premium income are derived from the latest annual accounts published by the offices, the date in the majority of cases being December, 1899. The amount of the funds taken alone affords no indication of the financial stability of a company, which cannot be judged unless its liabilities are known as well as its assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsuring parts of such risks as the offices do not feel justified in retaining in their entirety.

EXPENSES.—The expenses of a Life Office include not only the salaries of officials, rents of offices, cost of advertising, &c., but also in all cases where it is paid the commission paid to agents for the introduction of business. The amount of expenses as so understood is less important in itself than in relation to premium income, consequently we have stated in the table the percentage of the premium income absorbed in commission and expenses. The average percentage of the whole of the British Offices is about 14½%, of which 5½% is expended on commission and 9% on other expenses. This ratio taken by itself is frequently misleading, because a large proportion of a company's expenditure is incurred in obtaining new business. If the proportion of new business to total business is large, the percentage of the total premiums absorbed in expenses is also large; but when the expenses are distributed between new business and old, or renewal, business, a fair indication is obtained of

the real expenditure that an office is incurring. Perhaps the most satisfactory way to split up this expenditure is to assume that the percentage of new premiums absorbed in expenses is ten times as much as the percentage of renewal premiums absorbed in expenses. The expenses per cent. of new premiums given in the table means therefore that if, as in the case of the Atlas, 3½% of the new premiums goes in expenses, one-tenth of this percentage or 3½% of the renewal premiums is the cost of managing the renewal business. These two percentages taken together exactly amount to the total expenditure of the office. The relative economy or extravagance of the various offices may therefore be better judged by the percentage of new premiums absorbed in expenses than by the percentage of total premiums. The average annual expenditure of British offices is 80% of new premiums and 8% of renewal premiums.

VALUATIONS.—The last three columns of the table are derived from the valuation returns made by the companies to the Board of Trade usually every three, five, or seven years. These returns contain a great deal of information, and show the real position of a Life office in a very complete manner. It is not possible in the space here available to give anything but a very small part of the information supplied by these returns. A valuation consists of a calculation of the present liability of an office under its existing policies after making allowance for the amounts it will have to pay and to receive. In making this calculation it has to be assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various tables are employed, those most frequently used being those published by the Institute of Actuaries. These are called the Healthy Males (H^m) and the Healthy Males excluding from observation the mortality in the first five years of assurance ($H^m(5)$). If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes that only a low rate of interest will be earned, while the liability on account of mortality appears greater by some tables than by others. Consequently the position of an office is very strong and satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated liability and the experienced liability is larger and the surplus available for bonuses is larger also. As an approximate guide in this matter we may state that the H^m and $H^m(5)$ tables in conjunction are more stringent than the H^m table alone, that the H^m is more stringent than the American, and that with every table the lower the rate of interest assumed the more stringent the valuation. For comparison with the rate of interest assumed in the valuation we give the average rate of interest actually earned during the last valuation period. The greater the margin between the rates of interest earned and assumed the greater is the surplus, and, speaking generally, the larger the bonus, though bonuses may fall at the time when a more stringent basis is first adopted. The rate of interest earned upon the total funds is stated wherever possible; sometimes only the rate earned upon the investments alone can be ascertained, and in such cases the rate earned appears higher than it would if the total funds had been employed in calculating the rate yielded.

P = Proprietary.
M = Mutual.
F = Transact Fire Business also.
S = Transact Sickness or Accident Business also.
O = Transact Ordinary Life Business also.
I = Transact Industrial Life Business also.
a = Expenses include cost of Valuation.
b = Special Reserve in addition to provide for assuming lower rate of interest in future, or for other purposes.
c = Rate of Interest earned is on Invested (not Total) Funds.
d = No valuation yet filed with Board of Trade.
e = New Premiums not stated.
f = Does not pay Commission.
g = Interest earned excludes Reversions.
m = Transact Marine Business also.
* Sickness and Accident. Accident business commenced 1885.
* Caledonian. Fire business commenced 1805.

* Eagle. Excluding £7,966 for cost of pensions.
* Equitable. With additional reserve of more than one-third of clear surplus.
* Hand-in-Hand. Fire Business commenced 1866. Funds stated exclude General Accumulated Funds of £2,475,113.
* Law Union and Crown amalgamated 1892.
* London, Edin., and Glasgow. Expenses exclude amount charged to Capital.
* Marine and General. Also insures Mariners, &c., effects. Expenses include those of Marine Branch.
* National Mutual. Amalgamated 1896.
* Rock. Interest in last year of valuation period £2 ca. 4d.
* Scot. Acc. Accident Business commenced 1877.
* Scot. Amicable. Net premiums valued at 31 per cent.; so strengthening Reserves by £200,000.
* Sun of Canada. Commenced in Great Britain in 1893.
* Victoria Mutual. Accepts monthly payments.
* Union. Fire Business commenced 1774.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If the policy does not participate in profits, both the sum assured and the premium remain unchanged. If the policy does participate in profits, a higher premium is charged and bonuses are declared from time to time. The bonuses may usually be used either to increase the sum assured or to reduce the premium, or they may be taken in cash. It is usually to the advantage of an assurer to take a policy that participates in profits, but to overcome the objection of the higher premium that participation in pro-

fits usually involves, a plan has been adopted in recent years whereby future bonuses are anticipated and used to reduce the premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed the bonuses anticipated, the difference is paid to the policyholder; if however the anticipated bonuses exceed the declared bonuses, the difference has to be paid by the policyholder or to remain as a debt upon the policy. We give below the average premiums charged by British offices for the three classes of policies. The rates quoted are the amounts payable annually for the whole of life to assure £100 at death.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The rates in the above table are the average of the rates of all the offices that quote these three classes of policies respectively. The next table shows the annual premiums payable throughout life for the assurance of £100 at death with participation in profits in the different offices. Premium rates alone are not sufficient for judging the relative merits of life offices for participating policies. An office charging a high premium is more likely to give large bonuses than an office charging a low premium, and therefore the

bonuses as well as the premiums have to be taken into account. But the details of bonuses are too voluminous to be given here; they may be obtained from various insurance annuals. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. The offices that make a special feature of this sort of policy are the London Life, the Metropolitan, and (under one class of policy) the Hand-in-Hand.

ANNUAL PREMIUMS FOR ASSURANCE OF £100 PAYABLE AT DEATH. WITH PROFITS.

■ In the cases marked thus the rates are quoted for Assurances payable at ages 55 and 60, without mention being made as to the number of premiums payable. Thus it may in these cases be necessary to pay one more premium than in the case of those not marked *. For instance, a person Assuring at age 25 next birthday for a sum payable at age 60 may have to pay 26 premiums in an office marked *, while he would only pay 25 premiums in an office not so marked. In the latter case the sum Assured is sometimes paid on the anniversary of the day on which the Assurance was effected, sometimes on the anniversary of birth.

† With Tontines or Deferred Bonuses. B Matures on birthday of assured. I Matures on anniversary of issue. α Abstainers rates are less. i London Life, see note p. 358.

LIFE ASSURANCE PROGRESS.

Fire Insurance Rates.

RATES.—For merchandise at the principal ports, and for mills and manufactories and other leading industries throughout the United Kingdom, all the tariff or associated offices charge an identical minimum. Non-tariff and some class offices advertise that they assess individual risks on their merits. The following is a digest of the scale put forward by some of the oldest companies, and the rates and classification are those which are generally adopted.

Common Insurances.—At 1s. 6d. to 2s. per cent. per annum, with certain exceptions:—

1. Buildings covered with slates, tiles, or metals, and built on all sides with brick or stone, or separated by party-walls of brick or stone which are carried through the roof, and used for residence, or non-hazardous purposes.

2. Goods in buildings as above, such as household goods, plate, wearing apparel, and printed books, liquors in private use, and personal effects not comprised in the following categories.

Hazardous Insurances.—At 2s. 6d. to 3s. 6d. per cent. per annum, with certain exceptions:—

1. Buildings of timber and plaster, or not separated by partition walls of brick or stone, or not covered with slates, tiles, or metals, and thatched barns and outhouses, having no chimney, nor adjoining to any building having a chimney; and buildings falling under the description of common insurances, but in which hazardous goods are deposited, or hazardous trades are carried on.

2. Goods.—The stock and goods of bread-bakers, tallowchandlers (not melters), drapers, stationers, also chemists and grocers not dealing in mineral oils.

Doubly Hazardous Insurances.—At 4s. 6d. to 5s. per cent. per annum, with certain exceptions:—

1. Buildings.—All thatched buildings having chimneys, or communicating with or adjoining to buildings having one, although no hazardous trade shall be carried on, nor hazardous goods deposited therein, and all hazardous buildings in which hazardous goods are deposited, or hazardous trades carried on.

2. Goods.—All hazardous goods deposited in hazardous buildings, and in thatched buildings having no chimney; also china, glass, mathematical and musical instruments, pictures, and jewels in private use.

Much depends upon the surroundings of the building insured; for a printer's or bookbinder's workshop, in a narrow lane, with old wooden houses near it, the premium would possibly be from 10s. to 15s.

Special Insurances.—5s. per cent. per annum and upwards:—

Buildings and contents among others of workers in wood, dealers in mineral oils, large drapers, some mills, warehouses, and factories; in the case of some theatres the rate is as high as 31s. 6d. per cent.

Close proximity to, or communication with, building containing very hazardous goods or used for any specially hazardous trade will, of course, also increase the risk.

The most recent returns of 46 British Fire Offices give a premium income of £20,154,057; Losses, £12,555,818; Expenses, £6,930,239. Funds exclusive of Capital, £30,714,056; Paid-up Capital, £8,494,063. The losses amount to 62.30 per cent. of the premiums and the expenses to 34.39 per cent., making together 96.69 per cent. of the premiums. In the previous year the losses were 59.61 per cent., expenses 24.79 per cent., together 84.40 per cent. of the premiums.

Rules by which the Personal Estates (including leaseholds) of English Persons, and the Movable Estates of Scottish, Persons Dying Intestate are Distributed.

IN ■■■■ INSTANCE IT ■■ SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* Where this is prefixed the Regulation applies to Scotland only.]

By the Intestates' Estates Act, 1890, passed in the Session 53 & 54 Vict. c. 29, ■ very important change is made in the law as regards provision for widows of men who die intestate and without issue after the first of September, 1890, whereby it is enacted that the real and personal estate of an intestate so dying, passes absolutely to the widow as far ■ the first £500 in value is concerned. If under £500 she takes the whole; if above £500 she takes £500 in addition to what she was entitled to under the law previously in force. This Act is not applicable to Scotland.

If the Intestate die, leaving

His representatives take in the proportion following:—

Wife only, no blood relations.....	Half to wife, other half to the Crown.
Wife, no near relations	Half to wife, rest to next-of-kin in equal degree to intestate.
Wife and child, or children, and children of a deceased child	One-third to wife, rest to child or children; and if children are dead, then to their lineal descendants, subject to this, that such child or children as had estate by settlement of intestate, or were advanced by him in his lifetime, shall bring such estate or advancement into account (but heir does not bring real estate into account).
Wife and father	*One-third to wife; one-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate in life must collate the advances); one-third equally among living children <i>per capita</i> (see NOTE A, next page), and issue of dead children <i>per stirpes</i> .
Wife and mother	Half to wife, and half to father.
Wife, brother, or sister and children of ■ deceased brother ■ sister	Half to wife, and half to mother.
Wife, mother, nephews, and nieces	*Half to wife, one-sixth to mother, two-sixths to Crown failing kin.
Wife, mother, brothers, sisters, and nephews and nieces (children of deceased brothers and sisters)	Half to wife, one-fourth to living brother or sister, one-fourth to deceased brother's or sister's children.
No wife or child	*Half to wife one-sixth to brother two-sixths equally among children of dead brother or sister.
Children by one or more wives and the issue of deceased children	Half to wife, one-fourth to mother, and other fourth to nephews and nieces <i>per stirpes</i> .
Husband and children	*Half to wife, one-sixth to mother, two-sixths among nephews and nieces <i>per stirpes</i> .
Mother, but no wife, child, father, brother, sister, nephew, or niece.....	Half to wife, residue to mother, brothers, sisters, and nephews and nieces (as to nephews and nieces <i>per stirpes</i>).
Mother and brother ■ sister	*Half to wife, one-sixth to mother, two-sixths among the brothers and sisters (who take <i>per capita</i>), and the nieces who take <i>per stirpes</i> .
Mother, and brothers and sisters	All to next-of-kin of equal degree.
Father, and brothers and sisters	All children equally <i>per capita</i> , issue of deceased children <i>per stirpes</i> ; no difference between children of different wives.
	*One-half equally amongst all living children; the other half equally amongst living children <i>per capita</i> , and issue of dead children <i>per stirpes</i> .
	Whole to husband.
	The whole to mother.
	*One-third to mother, two-thirds to the Crown failing kin.
	Equally between them.
	*Mother one-third, brother two-thirds.
	Whole to them equally.
	*Mother one-third, brothers and sisters two-thirds equally <i>per capita</i> .
	Whole to father.
	*One-half to father, the other half equally amongst brothers and sisters <i>per capita</i> (see NOTE B).

Child and grandchild by deceased child.....	}	Half to child, half to grandchild, who takes by representation.
■ no child, children, ■ representatives of them...		*Three-fourths to child, one-fourth to grandchild.
Brother or sister, and children of a deceased brother or sister	}	All to next-of-kin in equal degree to intestate.
Brother and grandfather.....		Half to brother or sister <i>per capita</i> , half to children of deceased brother or sister <i>per stirpes</i> .
Brother's grandson, and brother's or sister's daughter	}	Whole to brother.
Brother and two aunts.....		All to daughter.
Brother and wife	}	All to brother.
Grandfather, no nearer relation		Half to brother, half to wife.
Father's father, and mother's mother.....	}	All to grandfather.
Grandmother, uncle, or aunt.....		Equally to both.
Uncle, and deceased uncle's child.....	}	All to grandmother.
Uncle by mother's side, and deceased uncle or aunt's child		*All to uncle or aunt ■ paternal.
Two aunts, nephew, and niece	}	All to uncle.
Uncle's or aunt's children, and brother's ■ sister's grandchildren		*Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
Nephew by brother, and nephew by half-sister ...	}	Equally to all.
Nephew by deceased brother, and nephews and nieces by deceased sister		*Nephew and niece.
	}	Equally to all.
		*Brother's or sister's grandchildren.
	}	Equally <i>per capita</i> (see NOTE A).
		*All to nephew by brother.
	}	Each in equal shares <i>per capita</i> , and not <i>per stirpes</i> .
		*The same, having regard to NOTE B.

NOTE A.—*Per capita*, that is, taking individually, and not by representation. Thus, if A. die leaving three brothers or sisters, they each take an equal part of his effects in his or her own right. But if either of them die, leaving children, his children would take his share *per stirpes*, that is, through him, and not in their own rights.

NOTE B.—By English Law, brothers and sisters of the half blood, whether by the mother's or father's side, share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother) and their issue.

NOTE C.—Posthumous brothers and sisters take equally with those born in lifetime of father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate and also showing the persons entitled to administer personal estate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. Custom of London for Administration of Personal Estate abolished in 1856. Leaseholds are Personal Estate. The Dower (*viz.*, widow's thirds) of widows married since 1833 is in the majority of cases barred by the purchase deed. Generally put in by Solicitors to avoid the inconvenience of dower attaching.

In each instance it is supposed that there are no nearer relations than those named.

The persons named within brackets are those who are entitled to administer.

If Intestate die, leaving

Real Property would descend to—

Wife only, no blood relations ...	}	One-third to wife for life, rest to Crown; copyholds to lord of manor. [<i>Wife.</i>]
		One-third to wife for life; rest to eldest son or his issue. [<i>Wife.</i>]
	}	One-third to wife for life in any case. [<i>Wife.</i>]
		Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female.
Wife and child, or children, and children of ■ deceased child ...	}	If no son, rest to daughters equally. [<i>Either daughter, or not exceeding three.</i>]

<p>Nephew by brother, and nephew by half-sister</p>	
<p>Nephew by deceased brother, and nephews and nieces by deceased sister.....</p>	

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 37. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as remodelled under

the Finance Act of 1894, will be found in detail on pp. 445-446.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the District Probate Registries (see Appendix), application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

THE sixth Session of the fourteenth Parliament of the present reign was marked with events of the greatest national importance, the public attention being directed to war with the two South African Republics, and later on to the crisis in China; so that it was not surprising that a waning Parliament was not pregnant of big legislative ambitions. The chief item was the Australian Commonwealth Bill, which embodied the new Constitution accepted by the principal Colonies of Australia.

Several measures foreshadowed in the Queen's Speech were not proceeded with, and these included the Military Manœuvres Bill, the Secondary Education Bill, the Scotch Education Bill, the Lunacy Bill, and the Factory Acts Amendment Bill, while amongst those placed on the Statute Book were the above-mentioned Australian Commonwealth Bill, the Irish Tithe Rent-charge Bill, the Railway Accidents Bill, the Agricultural Holdings Bill, the Housing of the Working Classes Bill, the Limited Liability Companies Bill, the Money-lending Bill, the Elementary Education Bill, the Irish Intermediate Education Bill, the Volunteers Bill, the Military Lands Bill, the Uganda Railway Bill, and several other measures.

Owing to the great expenditure for war supplies the Chancellor of the Exchequer had to meet a very adverse balance. The Budget proposals were an increase of 4*d.* in the pound; 2*d.* per pound on the tea duty; a shilling a barrel on the beer duty; 6*d.* per gallon on the spirit duty; 4*d.* per pound on the tobacco duty. This would produce 12 millions of new revenue.

Parliament was prorogued on August 8, and members knew that a dissolution would take place before the re-assembling of the House. This came early in October, and the Unionists were returned with almost a similar majority as they had at the previous election in 1895.

January 30.—**LORDS.** The Duke of Somerset moved and the Earl of Shaftesbury seconded the Address. In reply to the Queen's speech the Earl of Kimberley urged on the Government the necessity of ensuring the efficiency of the defences of the Empire, and to bring about a speedy termination of the war in South Africa. Lord Salisbury replied, and the debate was continued by Lord Rosebery and Lord Lansdowne. Address agreed to.

COMMONS. The Address moved by Captain Pretyman and seconded by Mr. P. Pease. Speeches by Sir H. Campbell-Bannerman. Lord E. Fitzmaurice moved an amendment to the Address criticising the Ministry in their preparations for the war in South Africa.

January 31. Debate continued by Mr. Stevenson, Colonel Milward, Mr. Buxton, Sir A. Acland-Hood, Sir R. Reed, and Mr. Brodrick.

February 1. Sir C. Dilke resumed the debate and was replied to by Mr. George Wyndham in a spirited speech.

LORDS. Lord Salisbury said, in respect to the Press attacks on the Chancellor of the Exchequer, that Sir M. Hicks-Beach had never refused anything that the War Office or the Admiralty thought necessary for the public service. Lord Lansdowne made a statement as to Sir W. Butler's resignation of the Command of the South African Forces.

February 2.—**COMMONS.** After a speech by Mr. Bryce, Mr. Goschen defended Mr. Chamberlain's

administration of the Colonial Office, while Sir E. Clarke threw the responsibility of the war on the Colonial Secretary. Colonel Sanderson caused a scene by stating that "the Nationalists never attacked in front," an expression he subsequently had to withdraw.

February 5. Sir W. Harcourt continued the debate on Lord E. Fitzmaurice's amendment, and was replied to by Mr. Chamberlain. Mr. Dillon on behalf of the "re-united" Irish party declined to support the amendment.

February 6. Speeches by Mr. Asquith, Sir H. Campbell-Bannerman, and Mr. Balfour, after which the amendment was rejected by 352 votes against 139.

February 7. Mr. J. Redmond moved an amendment to the Address, urging that the war in South Africa should be brought to a close by reorganising the independence of the Transvaal and the Orange Free State, which was rejected by 368 votes to 66.

February 9. The Address carried by 229 votes to 39.

February 12. Mr. George Wyndham unfolded the new Military proposals of the Government, which contemplated the addition of 30,000 men to the Regular Army and 50,000 to the Auxiliary Forces. The scheme was criticised by Sir H. Campbell-Bannerman and Sir Charles Dilke.

LORDS. Debate on the new Army proposals of the Government, which were outlined by Lord Lansdowne. Lords Kimberley, Tweedmouth, Wantage, Granby, and Wemyss spoke.

February 13.—**COMMONS.** Resumed debate on the new Military programme, Mr. Wyndham stated that the fifteen additional battalions would involve a permanent annual charge of £785,000 and the new batteries £535,000.

February 14. A Nationalist bill to amend the Irish Local Government Act rejected by 214 votes to 126.

February 15. The Military scheme further discussed.

LORDS. Lord Rosebery delivered an important speech on the crisis, and asked the Government to make proposals which were adequate to meet the serious situation. Lord Lansdowne and Lord Salisbury replied.

February 16.—**COMMONS.** The Supplementary Army Vote of £13,000,000 agreed to after the closure had been carried by 224 votes to 32.

LORDS. Discussion on the administration of the Patriotic Fund.

February 19.—Statement by Lord Lansdowne on the subject of Volunteer Rifle ranges.

COMMONS. Army Votes discussed on the Report Stage.

February 20.—A motion by Mr. D. A. Thomas in favour of re-opening the inquiry into the Jameson Raid negatived, after speeches by Mr. Chamberlain, Sir W. Harcourt, Sir H. Campbell-Bannerman, and Mr. Balfour, by 286 votes to 152.

LORDS. Debate on a motion by the Earl of Wemyss, advocating an amendment of the Militia Ballot Act, so that it might be available to be put into force. Lord Salisbury opposed the motion, which was defeated by 69 votes to 42.

February 22.—Lord James' Money-lending Bill re-introduced and read a second time.

COMMONS. A bill introduced by Mr. Chaplin for the better housing of the working classes, read a first time. Committee of Supply on Civil Service Supplementary Estimates. Several important increases foreshadowed.

February 23.—Statement as to Army contractors who had been struck off the list for misconduct. Discussion initiated by the Irish members on the Cromwell Statue.

February 25.—The Navy Estimates. Statement by Mr. Goschen that the contemplated expenditure was £27,000,000 and that the personnel, including reserves, represented 150,000 men. The subsequent discussion indicated general approval of the Government's proposals.

February 27.—Discussion on the Navy Estimates. **LOrds.** The Land Clauses Bill read a third time.

February 28.—**COMMONS.** An Eight Hours Bill for Miners, the second reading moved by Mr. Lewis, rejected by 99 votes to 175.

March 1.—In Committee of Supply, the circumstances under which bluejackets were employed in the war in South Africa discussed.

LOrds. Statement by Lord Lansdowne as to reinforcements for South Africa.

March 2.—**COMMONS.** A bill to amend the Factory Acts, brought in by the Home Secretary. Naval Estimates discussed.

March 5.—The Chancellor of the Exchequer, in making his annual Budget statement, estimated that owing to the prolongation of the War, the deficit for the current year was £17,770,000, and to 1900-1 £20,225,000, making, with £5,000,000 for contingencies, £43,000,000. Of this sum £30,000,000 would be raised by the issue of a stock of bonds, £8,000,000 by the renewal of Treasury Bills, and £5,000,000 would be reserved for a further issue of those bills. It was proposed to raise £12,317,000 by additional taxation in the ensuing financial year. Income-tax increased by 4*l.* in the pound would produce £6,500,000. An additional shilling a barrel on beer would be imposed, and sixpence a gallon on spirits, fourpence per pound on tobacco, sixpence per pound on foreign cigars, and twopence per pound on tea, while certain stamp duties would be extended. The usual discussion followed.

LOrds. Lord Onslow said that the present famine was without parallel in the history of India. The expenditure for relief works during the financial year was likely to be more than five crores of rupees (about £3,330,000).

March 5.—**COMMONS.** Budget resolution discussed.

March 7.—A bill introduced by Sir F. Fleming on Old-age Pensions talked out on the second reading stage.

March 8.—A bill to prevent the disfranchisement of Volunteers on active service in South Africa read a second time. Navy estimates discussed.

March 9.—The Census Bill read a second time.

March 12.—On the Army estimates Mr. Wyndham said that it was intended to increase the bounties given to the Militia, who in return would serve abroad in special emergencies. Extra capitulation grant would be given to the Volunteers, while the regular Army was to be permanently increased. Sir C. Dilke described the proposals of the Government as a make-shift scheme.

March 13.—The War Loan Bill read a second time by 268 votes to 21.

LOrds. Lord Salisbury stated his reply to the Presidents of the Transvaal and Orange Free State to their overtures for peace.

March 15.—Mr. Balfour announced that the Government did not propose to accept the intervention of any Power in South Africa.

March 16.—On the consideration of Army esti-

mates, Mr. Wyndham announced the proposals of the Government with regard to the training of the Yeomanry and Volunteers.

March 19.—The second reading of the Budget Bill carried by 182 votes to 30.

March 20.—Discussion with regard to "black-listed" firms who had obtained Government contracts from the War Office raised on the second reading of the Consolidated Fund Bill.

LOrds. Lord Lansdowne made a statement as to the future of the Yeomanry.

March 21.—**COMMONS.** The Government agreed to accept the second reading of a bill introduced by Mr. Goulding extending the Workmen's Compensation Act to agricultural labourers.

March 22.—Discussion on the financial relations between Great Britain and Ireland, and a motion in favour of readjustment, initiated by the Nationalist members, rejected after a series of scenes by 220 votes to 102.

LOrds. Lord Russell of Killowen's bill to check secret commissions in trade read a first time; and the Money-lending Bill passed.

March 23.—Discussion in reference to the new regulations in respect of educational grants.

COMMONS. The Nationalist proposal for a Roman Catholic University in Ireland discussed, and on a division negatived.

March 25.—Budget Bill debated.

March 27.—The increase in the beer duty agreed to by 223 votes to 71.

March 28.—A bill dealing with the penalty of flogging for certain offences thrown out by 195 votes to 72.

March 29.—The London Water (Purchase) Bill, rejected by 234 votes to 151. Another Bill on the subject was withdrawn. Committee on the Finance Bill.

April 2.—**LOrds.** Lord Russell of Killowen's bill for the Prevention of Corruption by making illegal secret commissions read a second time.

COMMONS. Finance Bill considered, and a clause remitting the death duties in case of officers and men who died in war leaving estates up to £5000 to their widows and orphans. Committee on the Army Annual Bill.

April 3.—Debate on the Famine in India.

April 5.—The Railways (Prevention of Accidents) Bill, after discussion, was read a second time and referred to the Standing Committee on Trade.

April 6.—The Finance Bill read a third time.

April 26.—The House reassembled after a long Easter recess. Mr. George Wyndham answered several important questions with regard to the war in South Africa.

April 27.—Post Office Vote in Committee of Supply.

April 30.—In Committee of Supply, further expenditure sanctioned for the completion of the Uganda Railway.

May 1.—The cost of the South African war was stated to be £13,250,000 up to March 31st.

May 4.—Civil Service Estimates: Inland Revenue and Post Office Votes discussed.

May 7.—The Uganda Railway Bill read a second time: also the Sea Fisheries Bill.

May 8.—The question of a breach of privilege discussed with regard to a letter addressed to the House by a firm of Liverpool solicitors representing a firm accused of being involved in the quarrels of the War Office. A proposal to limit speeches in the House to twenty minutes, except in the case of Cabinet Ministers, rejected by 137 votes to 91.

LORDS. Debate on the recommendations of the Licensing Act.

May 10.—The Housing of the Working Classes Bill debated on the second reading.

May 14.—Mr. Chamberlain introduced the Commonwealth of Australia Bill, which was to make Australia one indissoluble Federal Commonwealth, firmly united for one of the most important purposes of Government.

LORDS. Lord Lindley, as the new Lord of Appeal, took the oath on his elevation to the Peerage.

May 15.—**COMMONS.** Mr. S. Smith submitted a motion deploring the immorality of present-day plays, but his views were not shared by the House.

May 16.—A Cheap Trains Bill, the second reading of which was moved by Mr. Lough, after discussion, rejected by 172 votes to 143.

May 17.—The Housing of the Working Classes Act Amendment Bill read a second time without a division.

LORDS. The Prevention of Corruption Bill referred to a Select Committee.

May 18.—Lord Lansdowne introduced two bills affecting the constitution of Volunteer forces, by which volunteers might enter into an agreement to serve abroad, also to give compulsory power for the acquisition of land to be used for rifle ranges. Both were read a first time.

COMMONS. Committee of Supply on Scottish Estimates.

May 21.—The second reading of the Australian Commonwealth Bill carried without a division.

LORDS. The Scottish Education Bill passed through Committee.

May 22.—An Early Closing of Shops Bill rejected on the second reading by a large majority.

May 23.—**COMMONS.** The second reading of a Bill to Enable Women to sit as Aldermen and Councillors on the London Borough Council's was carried by a majority of 119.

May 25.—Irish Estimates discussed.

LORDS. Lord Lansdowne announced that the Government recognised that 28 days in camp was putting too great a strain on the convenience of the Volunteers and had reduced it to 14 days.

May 28.—The Volunteer Bill read a second time; as also was the Colonial Marriages (Deceased Wife's Sister) Bill after a division, 116 voting for, 31 against. House adjourned for Whitsun holidays till June 18.

COMMONS. Religion in Elementary Schools discussed.

June 18.—House reassembled after Whitsun recess. The Education vote discussed.

June 19.—Army Estimates discussed; forty-one millions sterling voted.

June 20.—The Report stage of the Workmen's Compensation Act (1897) Extension Bill, giving agricultural labourers the benefits of the Act, completed.

June 21.—The Commonwealth of Australia Constitution Bill passed through its Committee stage and reported.

LORDS. The Uganda Railway Bill read a second time.

June 22.—**COMMONS.** Civil Service Estimates in Supply.

June 25.—The Australian Commonwealth Bill read a third time; and the Bill to amend the Housing of the Working Classes Act considered in Committee.

June 26.—The Companies Bill read a second time and referred to the Standing Committee on

Trade. The Money-lending Bill also read a second time.

LORDS. The Duke of Devonshire introduced the Secondary Education Bill.
