The government of St. Helena is administered by a Governor, with the aid of an Executive Council of up to 4 official and 3 unofficial members. The Governor is also assisted by a Legislative Council of up to 12 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

Governor, His Excellency Dermot Art Murphy, C.M.G., O.B.E. (1968)	£2,000
Government Secretary, J. L. Boyd-Wilson. (+ a/cce.)	£1,872
Colonial Treasurer and Collector of Customs, J. O. Talbot-Phibbs, O.B.E. (+ a/cce.) ..	£1,656
Senior Medical Officer, Dr. J. S. Noaks (+ a/cce.)	£1,656
Agricultural and Forestry Officer, A. G. Brightmore. (+ a/cce.)	£1,380
Distance from London: 4,472 miles; transit, 14 days.

CAPITAL, ♀ Jamestown population (1956), 1,568.		

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated $7^{\circ} 55' 55''$ S. lat. and $14^{\circ} 25' 55''$ W. long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is $7\frac{1}{2}$ miles, and extreme breadth 6 miles, with an area of about 28 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; on Dec. 31, 1965, the population was 1,217. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters

Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. ♀ Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

Administrator, Maj. J. M. E. Wainwright.

TRISTAN DA CUNHA

Tristan da Cunha, is the chief of a group of islands of volcanic origin lying in lat. $37^{\circ} 6' S.$ and long. $12^{\circ} 2' W.$, discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S. W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (died 1853), remaining at his own request, with his wife and two children. This party, with five others, formed a settlement. In 1827 five coloured women from St. Helena, and afterwards, others from Cape Colony, joined the party.

In 1961 the population numbered 280 persons, the islands being administered by the Colonial Office through a resident Administrator, with headquarters at the settlement of Edinburgh. There is an elected Island Council of 16 members, with universal suffrage at 18.

In October, 1961, a volcano, believed to have been extinct for thousands of years, erupted and mounds of earth were thrown up in some cases to a height of 35 feet. In view of the danger of further volcanic activity, the inhabitants were evacuated and reached the United Kingdom on Nov. 23, 1961, where they remained for nearly two years. An advance party returned to Tristan da Cunha in the spring of 1963, and the main body of the islanders has now returned to the island. Some went back to England in 1966, but most returned in August, 1967.

A boat harbour was completed in 1967. The first freezing factory was re-established in 1966, and life has returned to normal. There are no taxes on Tristan, income being derived from royalties paid by the fishing company and from the sale of stamps.

Administrator, B. Watkins.

Chaplain, Rev. A. A. Welsh.

INACCESSIBLE ISLAND is a lofty mass of rock with sides a miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937, but has been abandoned.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is a mile long and a mile wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in $40^{\circ} 20' S.$ and $9^{\circ} 44' W.$, lies about 250 miles S.S.E. of Tristan da Cunha. The island is about a miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South

African Government and manned by South Africans.

SEYCHELLES

The Colony of Seychelles, in the Indian Ocean, consists of two distinct collections of islands—the Mahé group, 32 islands in all, granitic with high hills and mountains (highest point 2,971 feet) and the out-lying islands, the Coralline group, numbering 57 more and, for the most part, only a little above sea-level. Proclaimed as French territory in 1756, the Mahé group began to be settled as a dependency of Mauritius from 1770, was captured by a British ship in 1794 and was finally assigned to Great Britain in 1810. By Letters Patent of September, 1903, these islands, together with the Coralline group, were erected into a separate Colony. The total area of the Granitic group is 100 square miles, of which Mahé, the largest island and the seat of Government, claims 55. The next largest island is Praslin, home of the unique double coconut, Coco de Mer. Islands of the Coralline group lie at distances from Mahé varying between 60 and 612 miles and, exclusive of the Aldabra lagoon (50 sq. miles), have a total area of approximately 13 sq. miles. Aldabra is famous for the gigantic land tortoises. These islands have no permanent population and, where worked, are supplied by contract labour from the Granitic group. The population in June, 1967, was 48,730. Although only 4° S. of the Equator, the islands are healthy; the death and birth rates in 1967 were 11·0 and 37·7 per 1,000 respectively. There are 33 primary schools, 10 secondary schools and a teachers' training college.

The new Constitution which was introduced in late 1967 created a single Council with both executive and legislative functions and an unofficial majority. The General Election held under the Constitution in December was also significant in that for the first time it was contested on the basis of universal adult suffrage. The Governing Council consists of three *ex-officio* members, eight elected members and up to four nominated members of whom at least two are not public officers, with the Governor as President.

FINANCE

	1966	1966
Revenue.....	£773,649	
Expenditure.....	1,319,970	

Exchange rate 1 Rupee = 1s. 6d. The colony is grant-aided: U.K. grants in 1966 totalled £469,944.

TRADE

SOUTH PACIFIC COMMISSION

The South Pacific Commission, an advisory and consultative body set up by the Governments responsible for the administration of island territories in the South Pacific region, recommends to the member Governments means for promoting the well-being of the peoples of these territories. It is concerned with social, economic and health matters. Headquarters, Nouméa, New Caledonia.

The Commission was established by an Agreement between the Governments of Australia, France, the Netherlands, New Zealand, the United Kingdom and the United States of America, signed at Canberra in 1947 and ratified on July 29, 1948. Until November 7, 1951, the area of the Commission's activities comprised territories lying generally south of the Equator from and including Netherlands New Guinea in the west to the French Establishments in Oceania and Pitcairn in the east. On November 7, 1951, an additional Agreement was signed extending the scope of the Commission to include Guam and the Trust Territory of the Pacific Islands under United States administration. Netherlands membership ceased on Dec. 31, 1962. In 1964 Western Samoa acceded to the Agreement and became a member government of the Commission. The Commission consists of twelve Commissioners, two from each Government, and normally holds one session each year.

Secretary-General, Sir Gawain Bell, K.C.M.G., C.B.E.

TONGA

The Tongan or Friendly Islands form a self-governing State under the protection of Great Britain, in accordance with the terms of the revised Treaty of Friendship signed at Nuku'alofa on Aug. 26, 1958. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (1966) of 77,429. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nukualofa, on the island of Tongatapu, is the seat of government. The present King Taufa'ahau Tupou IV, K.C.M.G., K.B.E., succeeded his mother, the late Queen Salote Tupou III, on December 16, 1965. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 22 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of Island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. In 1960, women were allowed to vote for the first time. Soil generally is fertile, the principal export is copra. Revenue 1965-66 T\$1,968,184; expenditure, T\$1,872,356. There is no debt. Total imports (1966), T\$2,070,730; total exports T\$1,808,759. The total shipping cleared in 1966 was 358,644 tons. Tongan currency is parity with Australian currency in relation to sterling.

British Commissioner and Consul, A. C. Reid, C.M.G. (1965) £a,800.

THE WEST INDIES

The West Indies are a number of islands and islets, some of them mere rocks; situated between 10° to 27° North and $59^{\circ} 30'$ to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq. miles) and *Hispaniola* (Haiti and the Dominican Republic) (30,000 sq. miles), *Jamaica* and *Puerto Rico*; II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are variously divided; the British islands in the Lesser Antilles are the Leeward and Windward Islands. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 British, 3,800 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

The West India Islands that lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds blowing generally from the eastern point in the area.

COMMISSION FOR THE EAST CARIBBEAN

GOVERNMENTS

10 Haymarket, S.W.1.

Commissioner, N. G. F. Taylor.

The British West Indies were governed under a series of federal arrangements, the last of which, a federation of the Leeward and Windward Islands with Barbados, was abandoned in 1966. It was announced in Jan., 1967 that the islands of Antigua, Dominica, Grenada, St. Kitts-Nevis-Anguilla and St. Lucia were to become States in association with Britain. Britain's powers and responsibilities are limited to defence and external affairs.

West Indies Associated States

The Associated States are described individually in the following sections. The Office of the British Government Representative has been established at George Gordon Building, Bourbon Street (P.O. Box 227), Castries, St. Lucia.

British Government Representative, C. S. Roberts (1967).

Deputy do., D. M. Kerr.

Development Adviser, W. L. Bell, M.B.E. (Resident at Bridgetown, Barbados).

Supreme Court

Established by Order in Council (1967), which gives the Court additional jurisdiction in Montserrat and the British Virgin Islands. There are two constituents, a Court of Appeal and a High Court. The Chief Justice is appointed by Her Majesty and puisne judges by the Judicial and Legal Services Commission. Expenses of the Supreme Court, after allowing for contributions from Montserrat and the Virgin Islands, are met by the States in equal shares.

Chief Justice, Hon. Mr. Justice Allen Montgomery Lewis, Q.C.

Justices of Appeal, K. L. Gordon; P. C. Lewis.

Puisne Judges, E. L. St. Bernard (St. Vincent);

N. Berridge (Antigua); E. H. A. Bishop (St. Lucia); E. F. Glasgow (St. Kitts and Brit. Virgin Isds.); A. F. L. Louisy (Dominica and Montserrat);

N. Peterkin (Grenada).

ANTIGUA

Antigua lies in $17^{\circ} 6'$ N. lat. and $61^{\circ} 45'$ W. long., and is nearly 108 square miles in area with a coastline of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. Population at the census of 1960 totalled 54,304. It is much less

hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which one central sugar factory has been erected. Cotton is now planted on a large scale and the island also exports molasses and rum. The population, with Barbuda, is estimated at 62,000. The island has begun to take advantage of its many fine beaches, and tourism is becoming an important new industry.

Finance and Trade

	1964	1965
Revenue.....	£1,900,112	£1,912,635
Expenditure.....	1,917,203	1,933,090
Public debt.....	713,306	1,490,960
Total imports.....	4,802,940	6,754,377
Total exports.....	971,248	1,320,904

Governor, Sir Wilfred Ebenezer Jacobs, O.B.E., Q.C. (1967) (*plus £750 a/cce. and house*) £3,750

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. $17^{\circ} 35'$ N., long. $61^{\circ} 42'$ W. Area, 62 square miles. Population, 1,000. The island is flat and mostly stony, producing cotton, corn and ground-nuts. Wild deer are found, and there is good tarpon and other fishing. *Warden*, E. Creque (and quarters), £980 to £1,350. *Redonda* is uninhabited.

CAPITAL Ψ St. John's. Population 25,000.

THE CAYMAN ISLANDS

The Cayman Islands, between $79^{\circ} 44'$ and $81^{\circ} 26'$ W. and $19^{\circ} 15'$ and $19^{\circ} 46'$ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (1960 Census), 7,616. The constitution provides for an Administrator, Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not fewer than two nor more than three nominated members, not fewer than two nor more than three official members and 12 elected members. The Executive Council consists of the Administrator and two official members appointed from among the official members of the Assembly, one nominated member appointed from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years. Supervisory powers over the government of the Islands exercised by the Government of Jamaica came to an end in August, 1962.

The principal town is Ψ George Town, in Grand Cayman, population (1960 census) 2,558.

<i>Administrator</i> , His Hon. J. A. Cumber, C.M.G., M.B.E., T.D.		

MONTSERRAT

Situated in $16^{\circ} 45'$ N. lat. and $61^{\circ} 15'$ W. long., 27 miles S.W. of Antigua, the island is about 11 miles long and 7 wide, with an area of 39 square miles; population (estimated, 1967), 14,468. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs.

while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest capable of cultivation. The chief exports are sea island cotton, tomatoes and other fruits and vegetables. Exports of fruit and vegetables are expanding and in recent years markets were found in Bermuda and the United Kingdom for the island's production of mangoes and hot peppers. Since 1963 real estate development and tourism have done much to aid the island's economy. Revenue (1967), £3,562,000; Expenditure £4,069,476.

Cabinet government was introduced in Montserrat in 1960. The Executive Council is composed of 4 unofficial members (the Chief, 2 other Ministers and 1 Member without Portfolio) and two official members (the Attorney-General and the Financial Secretary). The 3 Ministers are appointed from the elected members of the Legislative Council. The present composition of the Legislative Council is the Administrator, who presides, two official members, one nominated unofficial member and 7 elected members.

Administrator, His Hon. Dennis Raleigh Gibbs, C.M.G., C.V.O., D.S.O. (1964) (+ allowances of £550 and £208 and quarters) £2,750

EXECUTIVE COUNCIL

President, The Administrator.

Chief Minister, Minister of Justice, Trade and Production, Hon. W. H. Bramble.

Minister of Social Services, Hon. B. W. Edwards.

Communications and Works, Hon. P. A. Bramble.

Attorney-General, Hon. D. M. Lambert... £2,000

Financial Secretary, Hon. P. R. Ellis, O.B.E... 1,800

Without Portfolio, Hon. J. Howe.

Secretary to the Executive Council, G. C. H. Thomas, O.B.E.

CHIEF TOWN.—Ψ Plymouth (3,500).

ST. KITTS-NEVIS-ANGUILLA

The islands of St. Kitts, Nevis, and Anguilla united to form one Territory, and taken together they have a population (1960) of 56,693, and a total area of about 136 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88° F.

St. Kitts (population 1960, 38,113), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18' N. and long. 62° 48' W., and has an area of 65 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green sugar estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,792 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Ψ Basseterre, is a port of registry.

Nevis (population 1960, 12,770) is separated from St. Kitts by a strait 3 miles wide and has an area of 36 sq. miles. Cotton is exported and coconuts are also now exported, mainly to Barbados. The raising of livestock and cultivation of vegetables are also important features of the island's economy. Its greatest elevation is 3,596 feet. The chief town, Ψ Charlestown, is a port of entry.

Anguilla (population 1960 5,810) is about 70 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised. Governor, Sir Fred Albert Phillips, C.V.O. (1966) (+ a/cce.) £18,000

CAPITAL, Ψ Basseterre (St. Kitts). Population (1960), 15,579.

TURKS AND CAICOS ISLANDS

These West Indian islands geographically form part of the Bahamas group, from which Government they were separated in 1848. From 1873 until 1962 they were annexed to Jamaica, from which they are distant about 450 miles, reverting to U.K. administration on August 6, 1962, upon Jamaica's attainment of independence. On November 5, 1965, the Governor of the Bahamas became also the Governor of the Turks and Caicos. The two Colonies share a Common Bench for their Courts of Appeal. They have an area of about 166 square miles, and a population estimated, Dec. 1962, of 6,035. Ψ Grand Turk is an important cable station. A tourist industry is rapidly developing — the climate, beaches and sea sports generally are amongst the finest in the world. Trade in salt, for which the island used to be celebrated, has greatly diminished in recent years. Other exports are sisal, crawfish and conches. A considerable number of men are employed overseas in the Bahamas. There is a U.S. Air Force missile tracking station and a Naval facility at Grand Turk, and a government-owned airstrip at South Caicos, at which refuelling and other facilities are provided.

	1966	1967*
Revenue.....	£342,147	£342,200
Expenditure.....	319,204	342,200

* Revised Estimates.

TRADE

	1966	1967
Total imports.....	£422,795	£356,943
Total exports.....	44,953	50,692

The Constitution provides for an Administrator, a Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not fewer than two nor more than three official members, not fewer than two nor more than three nominated members and nine elected members. The Executive Council consists of the Administrator, two official members from among the official members of the Assembly, one nominated member from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years.

Administrator, His Hon. R. E. Wainwright, C.M.G., O.B.E. (1967) (+ duty a/cce. £300) £2,450

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada, St. Vincent, St. Lucia and Dominica with their dependencies; the Grenadines being divided between Grenada and St. Vincent. The total area is 821 square miles. Since March 1967, with the attainment of the status of Associated Statehood, there has been a Governor in Grenada, St. Lucia and Dominica. A similar change is to take place in St. Vincent. Each island has its own elected Parliament and Senate and a Premier. The ministerial form of government was introduced in 1956.

GRENADA AND THE GRENADINES

Grenada is situated between the parallels of 12° 13'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 200 miles S.W. of Barbados. Area, about 133 square miles; estimated population (including some of the Grenadines), 102,214. The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus

in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, bananas, sugar cane, cotton, coconuts, limes and fruit are grown. The imports are chiefly dry goods, wheat, flour, dried fish, feedstuffs, hardware, rice, etc.

Ψ St. George's (population 8,400) on the south-west coast, is the chief town, and possesses ■ good harbour.

Finance

	1965	1966
Public revenue.....	\$10,584,820	\$12,286,087

Total exports.....	10,872,452	10,195,761

Government

Grenada became an Associated State in association with Great Britain on March 3, 1967. The Legislature became bicameral consisting of Her Majesty, ■ Senate and ■ House of Representatives. There is a Premier, with four other Ministers. The Principal Law Officer is *ex officio* a member of the Senate.

Governor, Dr. Hilda Louisa Bynoe (1968)
(+allice. £1,925)..... £2,750

Premier, Eric M. Gairy.

The Grenadines are ■ chain of small islands lying between Grenada and St. Vincent, within which Governments they are included. The largest Island is Carriacou, attached to the Government of Grenada, with area of 13 sq. miles and population of 8,177.

ST. LUCIA

the second largest and the most picturesque of the Windward group, situated in 13° 54' N. lat. and 60° 50' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with an estimated population (1965) of 106,663. About 56,000 acres are devoted to agriculture. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are bananas, copra, coconuts, cocoa, edible oil. Over 6,000,000 stems of bananas, valued at \$9,443,134, were exported to the U.K. in 1966. The chief imports are flour, machinery, cottonpiece goods, sacks and bags.

CAPITAL.—Ψ Castries, (estimated population, 40,000) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. In 1966, 1,708 vessels with a total gross tonnage of 2,011,650 called at Castries.

ST. VINCENT

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (estimated 1967) of 90,000. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1783 it was secured to Great Britain.

The chief products are bananas, arrowroot, cotton, copra, coconuts, cassava, cocoa, ground provisions, and spices. Its chief imports are food-stuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 58 primary schools with 26,992 pupils in 1967, and ■ Government secondary schools with an attendance of 724. In addition, there are 7 grant-aided secondary schools with an attendance of 1,742 and ■ unaided secondary schools with 172 pupils.

CAPITAL.—Ψ Kingstown, population (1967), 21,432.

Registrar and Additional Magistrate, H. M. Squires..... \$6,480 to \$7,440

DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between 15° 20' and 15° 45' N. lat. and 61° 13' and 61° 30' W.

long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad comprising an area of 290 sq. miles, of which about 37,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°F. The climate is healthy, and during the winter months very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra and vanilla. Population (estimated, 1967, 69,780). The principal towns are Roseau, on the south-west coast, population, 21,924 and Portsmouth, population, 2,566.

Education.—There are 53 elementary schools, of which 50 are Government and 3 assisted. Of the 4 secondary schools, 3 receive a grant-in-aid and one is maintained by the Government.

Imports.....	\$18,000,000	\$17,374,715*
Exports.....	10,500,000	11,144,021*

* Provisional.

Government

On March 1, 1967, Dominica received a new Constitution and became an Associated State of the United Kingdom. The Queen's Representative was renamed the Governor.

The new House of Assembly now comprises 11 elected and 3 nominated members, one nominated on the advice of the Leader of the Opposition. The Cabinet (Executive) presided over by the Premier, consists of 4 other Government Ministers, a Parliamentary Secretary and the Attorney General (Official Member). The Premier is appointed by the Governor from the elected members of the House of Assembly. The other Ministers are appointed by the Governor on the advice of the Premier. The Speaker is elected from among the members of the House or from outside.

Governor, His Excellency Sir Louis Cools-Lartigue, O.B.E. (1967).
Premier, Hon. E. O. Leblanc.

COMMONWEALTH SCIENTIFIC LIAISON OFFICES

Africa House, Kingsway, W.C.2

The Commonwealth Scientific Liaison Offices exist to keep in touch with scientific developments in the United Kingdom, to deal with scientific enquiries from and to their home countries and to act as scientific advisers to the Commonwealth High Commissioners and Governments concerned. Joint headquarters were set up in May, 1948. Liaison offices of the various countries continue to act as separate autonomous units but share common services to the cost of which the Commonwealth countries contribute in agreed proportions.

DISTANCES FROM LONDON BY AIR

A list of the distances in statute miles from London to various places abroad. Distances given are those of the shortest routes in use by the British Airways Corporations—B.O.A.C. services(O); B.E.A. services(E).

Ireland

See also Northern Ireland, pp. 688-91; Republic of Ireland, pp. 792-794.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between $51^{\circ} 26'$ and $55^{\circ} 21'$ N. latitude and from $5^{\circ} 25'$ to $10^{\circ} 30'$ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of Achill Island (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the Central Plain, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the Sperrin Mountains (Sawel 2,240 ft.) of County Tyrone; the Mountains of Mourne (Slieve Donard 2,796 ft.) of County Down, and the Wicklow Mountains (Lugnaquilla 3,039 ft.); the Derryveagh Mountains (Errigal 2,466 ft.) of County Donegal; the Connemara Mountains (Twelve Pins 2,695 ft.) of County Galway; Macgillicuddy's Reeks (Carrantuohill 3,412 ft., the highest point in Ireland); and the Galtee Mountains (3,018 ft.) of County Tipperary, and the Knockmealdown (2,609 ft.) and Comeragh Mountains (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the Shannon (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to estuary on the western Atlantic seaboard. The Slaney flows into Wexford Harbour, the Liffey to Dublin Bay, the Boyne to Drogheda, the Lee to Cork Harbour, the Blackwater to Youghal Harbour, and the Suir, Barrow and Nore, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the Loughs, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of Allen, Boderg, Forbes, Ree and Derg, and the Erne Chain of Gowna, Oughter, Lower Erne, and Erne; Melvin, Gill, Gara and Conn in the north-west; and Corrib and Mash (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous Lakes of Killarney. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the Kingdom of Tara, about 500 B.C. The supremacy of the *Arddi* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connacht, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of Northmen (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Findgaill* (White Strangers) and the Danes as *Dubgaill* (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (*Ulaids-tir*, *Laigintir*, *Mumans-tir* and *Kunnak-tir*). The outstanding events in the encounters with the Northmen are the Battle of Tara (980), at which the Hy Neill

king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the Battle of Clontarf (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII, Sir Edward Poynings, as Lord Deputy had passed at the Parliament of Drogheda (1494) the act later known as *Poynings' Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

Republic of Ireland

Area and Population.—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Laois, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULLSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the Census held on April 17, 1966 was 2,884,002 (males, 1,449,032; females, 1,434,970), a density of 108 persons per sq. miie. Provisional figures showed 61,027 births, 17,605 marriages and 31,002 deaths in the year 1967.

THE PRESIDENT

Uachtáran na hÉireann (President), Éamon de Valéra, born 1882, assumed office June 25, 1959; re-elected for second term, June 25, 1966

MEMBERS OF THE GOVERNMENT

Taoiseach, Seán Ó Loinsigh (John Lynch)	£3,300

Industry and Commerce, Seoíse Ó Colla (George Colley)	2,200
Health, Séan Ó Flannagáin (Scan Flanagan)	2,200
Lands and the Gaeltacht, Pádraig Ó Fachtna (Patrick Faulkner)	2,200

GOVERNMENT

The Constitution.—The Constitution approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President—Uachtáran na hÉireann—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the Taoiseach (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the

exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—Oireachtas—consists of the President and two Houses: a House of Representatives—Dáil Éireann—and a Senate—Seanad Éireann.

Dáil Éireann is composed of 144 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the Taoiseach and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

Members of Dáil Éireann are paid an allowance of £1,500 per annum (and members of Seanad Éireann £1,000); are allowed free travelling facilities between Dublin and their constituencies and are, subject to certain restrictions, granted free telephone and postal facilities from Leinster House and allowances for overnight stays in Dublin.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dáil Éireann. The Taoiseach appoints a member of the Government to be the Tánaiste who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the Tánaiste and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

THE LEGISLATURE

The Legislature (Oireachtas) consists of the President and two Houses—a House of Representatives (Dáil Éireann) and a Senate (Seanad Éireann). Dáil Éireann is composed of 144 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same Dáil does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present (18th) Dáil was elected on April 7, 1965, and met on April 21, 1965.

Strengths of the parties in the Dáil on June 12, 1968, were: Fianna Fáil, 74; Fine Gael, 46; Labour, 19; Independent, 4. Total membership, including the Speaker, 144.

Parliamentary Secretaries

- Parliamentary Secretary to the Taoiseach and to the Minister for Defence*, Micheál Mac Cártáigh (Michael Carty).
Do. to the Minister for Local Government, Pádraig Ó Braonáin (Paudge Brennan).
Do. to the Minister for Finance, Séamus Mac Giobúin (James Gibbons).
Do. to the Minister for Posts and Telegraphs, Transport and Power, Pádraig Ó Leathlobhair (Patrick Joseph Lalor).
Do. to the Minister for Agriculture, Eoin Ó Dabharáin, T.D. (Don B. Davern).

Attorney-General, Colm Condún, s.c. (Colm Condún, s.c.).

Secretary to the Government, Nioclás Ó Nualláin, Ph.D. (Nicholas G. Nolan).

Assistant Secretary to the Government, Donal Ó Suilleabháin.

British Embassy

39 Merrion Square, Dublin

His Excellency Sir Andrew Graham Gilchrist, K.C.M.G. (1967) £5,375

Counsellor, R. W. Piper.

First Secretaries, G. G. Collins; G. Miles (Commercial).

Military Attaché, Brig. F. G. McMullen.

Ambassadors Abroad

The Holy See, M. L. Skentelberg.

Argentina, T. J. Horan.

U.S.A., W. P. Fay.

United Nations Mission (New York), C. C. Cremin; (Geneva), S. P. Kennan (*Minister*).

European Communities, S. Morrissey.

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—Cúirt Uachtarach. The Courts of First Instance include a High Court—Ard-Chúirt—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Gearbháil Ó Dalaigh (Daly). £6,360

<i>President of the High Court</i> , Hon. Aindreas Ó Caoimh (O'Keefe).....	£4,950
<i>Judges, Supreme Court</i> , Hon. Kevin Haugh; Hon. Brian Walsh; Hon. F. G. Budd; Hon. W. O'B. Fitzgerald.....	4,950
<i>Judges, High Court</i> , Hon. R. McLoughlin, Hon. George Murnaghan; Hon. Thomas Teevan; Hon. Séan Kenny; Hon. Séamus Henchy; Hon. Barra O'Brien (<i>ex officio</i>); Hon. Sean Butler.....	each 4,400
<i>Master of High Court</i> , John O. Leahy, s.c.	

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. To aid and counsel the Minister for Defence on all matters in relation to the business of the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1969, provide for approximately 24,200 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. The Naval Service has three corvettes and three tenders. The Defence Estimates for the year ending March 31, 1969, provide for an expenditure of £12,452,000.

FINANCE

	1967-68 (Actual)	1968-69 (Estimated)
Revenue.....	£305,41m.	£332,69m.
Expenditure (current).....	£305,62m.	£332,69m.

In addition to the Expenditure figures shown above there were certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1967-68 amounted to £77,990,000, and for 1968-69 are estimated at £94,070,000.

The estimated Revenue for 1968-69 includes Customs £72,640,000; Excise, £68,160,000; Estate etc. Duties, £5,450,000; Income Tax, Sur-tax and Super-tax, £80,980,000; Corporation Profits Tax, £13,450,000; Motor Vehicle Duties, £12,160,000; Stamp Duties, £4,300,000; Post Office Services, £22,200,000; Turnover Tax, £17,500,000; Wholesale Tax, £7,750,000.

The principal items of estimated current Expenditure for 1968-69 are Debt Service, £74,970,000; Agriculture, etc. £58,340,000; Defence, £12,450,000; Police and Justice, £9,590,000; Education, £41,090,000; Social Welfare, £48,410,000; Health Services, £23,540,000; Postal Services, £15,470,000; Superannuation, £11,230,000.

The Gross Debt (*provisional*) on March 31, 1968, was £96,000,000, with assets £472,000,000, leaving the net total of the debt at £434,000,000.

RELIGION

(Census of 1961)

Catholic.....	7,673,473
Church of Ireland.....	104,016
Presbyterians.....	18,953
Methodists.....	6,676
Others.....	15,223
Total.....	2,818,341

EDUCATION

Primary education is directed by the State. (There are 4,797 primary schools with an enrolment of 506,225 and average daily attendance 88 per cent.). Secondary education is in private hands and is largely conducted by Religious Orders (585 recognized schools with 98,667 pupils 12-20 years of age). Vocational (continuation and technical) education is conducted by 38 local Committees in 342 permanent schools (excluding 14 residential schools of domestic training and a day trades preparatory school) and a large number of temporary centres (37,520 full-time day students and 68,222 other students). The foregoing figures are for school year 1965-66.

The estimated State expenditure on education in 1968-69, excluding administration and inspection, is Primary £20,857,000; Secondary £14,487,000; Vocational £5,790,000; Science and Art £705,047. The vote for Universities and Colleges for 1968-69 amounts to £6,013,000 while in addition grants of £785,984 are provided in respect of the Faculties of General Agriculture and Dairy Science.

* There are two Universities in Dublin, of which the National University has 3 constituent colleges (Dublin, Cork and Galway) with 961 Professors, etc., and 12,896 students; and Trinity College, Dublin, with 248 Professors, etc., and 3,295 students in the academic year 1965-66.

PRODUCTION AND INDUSTRY

Agriculture and Livestock.—In 1967 there were 884,200 acres under corn crops, 409,700 under root and green crops, 8,300 under fruit and 2,058,600 under hay, a total of 3,360,700 acres. The principal produce in 1967 was: oats 288,900 tons; wheat 293,300 tons; barley, 666,000 tons; turnips, 2,366,400 tons; potatoes, 1,720,100 tons; sugar beet, 941,100 tons; and hay, 4,573,600 tons. The live stock included, 5,585,800 cattle, 4,239,300 sheep, 984,900 pigs and 186,000 horses and ponies.

Minerals.—1,000 persons were employed in the coal mines in 1967 and 186,000 tons of coal won.

Sea Fisheries.—5,262 persons were employed in the fisheries in 1966, the total value of all fish (excluding salmon) landed being £2,033,000.

COMMUNICATIONS

Railways.—In the year ended March 31, 1967, there were 1,334 miles of railway all of standard (5 ft. 3 in.) gauge; 9,294,179 passengers and 2,615,879 tons of merchandise were conveyed; the receipts were £9,843,718 and expenditure £11,701,917. These figures are in respect of railway working by Coras Iompair Éireann, the national transport undertaking which is now the only concern operating a rail service in the State.

Road Motor Services.—In 1967 road motor (omnibus) vehicles carried 299,566,113 passengers, the gross receipts being £9,597,749.

Shipping.—In 1966 the number of ships with cargoes and in ballast entered at the various ports, Cobh, Cork, Drogheada, Dublin, Dundalk, Dún Laoghaire, Galway, Limerick, Rosslare, Waterford, Whitegate, etc. was 21,427 of 10,787,581 tons, of which 1,924 (1,437,375 tons) were Republic of Ireland flag, and 4,418 (5,288,151 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1967 the airport handled 557,426 passengers, 18,028 tons of cargo and 1,065 tons of mail.

Dublin Airport, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline Aer Lingus and other airlines. During 1967 the airport handled 1,526,900 passengers, 29,679 tons of cargo and 2,400 tons of mail.

Cork Airport, 5 miles S. of Cork, serves the cross-channel and European services operated by Aer Lingus and other airlines. During 1967 the airport handled 167,701 passengers, 723 tons of cargo and 1,43 tons of mail.

Licensed private aerodromes include: Weston, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S. of Killarney; Headfort, 2 miles E.N.E. of Kells; Coonagh, 11 miles W. of Limerick; The Commons, 1 mile S.W. of Thurles; Kilkenny, 1½ miles W. of Kilkenny; Castlebar, 1 mile E. of Castlebar; and Ballyfree, 5 miles W.S.W. of Wicklow Town.

PRINCIPAL ARTICLES

Imports (1967)

The principal groups were: live animals, £13,620,257; food, drink and tobacco, £55,116,575; petroleum and petroleum products, £29,312,884; chemicals, £35,782,824; machinery (non-electric), £44,566,278; electrical machinery, £18,340,820; transport equipment, £29,397,211; metal and manufactures, £32,223,715; textiles and clothing, £38,348,881; paper, paperboard and manufactures, £10,762,523.

Domestic Exports (1967)

Principally live animals, £52,990,007; meat and meat preparations, £58,739,408; other food, drink, and tobacco, £51,219,266; machinery and transport equipment, £13,612,048; clothing, headgear and footwear, £12,123,354; textiles, £16,288,069; metal ores and scrap, £6,309,705; metals and manufactures, £6,607,602; non-metallic mineral manufactures, £5,466,254; chemicals £8,441,917.

CAPITAL.—Dublin (Baile Átha Cliath) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1966, its population was 568,772. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns, with populations at the Census of 1966 are: Cork (122,146); Limerick (55,912); Dun Laoghaire (51,772); Waterford (29,842); Galway (24,597); Dundalk (20,002); Drogheada (17,908); Sligo (13,424); Bray (12,699); Wexford (11,542); Tralee (11,213); Cavan (11,031); Kilkenny (10,052); Athlone (9,623).

FLAG.—Equal vertical stripes of green, white and orange.

NATIONAL DAY.—March 17 (St. Patrick's Day).

The United States of America

Area and Population

Population, 1968.—The total resident population of the United States on May 1, 1968, was estimated at 299,549,000, excluding Armed Forces stationed abroad. Civilian resident population at the same date was estimated at 297,284,000. Including Armed Forces stationed abroad (May 1, 1968), 300,827,000.

PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25° 0'—49° 23' North and longitude 66° 57'—124° 44' West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of 71° 23' N., at Point Barrow, a distance of 2,502 miles from the geographic centre of the United States.

The general coastline of the 50 States has a length of about 2,069 miles on the Atlantic, 7,623 miles on the Pacific, 1,060 miles on the Arctic, and 1,631 miles on the Gulf of Mexico. The length of the shoreline of the Great Lakes is 3,586 miles.

The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of 3,710 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals, gold and silver, have been mined, chiefly in Arizona, Colorado, California, Montana, Utah, Idaho and South Dakota. The highest point is Mount McKinley (Alaska), 20,320 ft. above sea level (*see below*), and the lowest point of dry land is in Death Valley (Inyo, California), 282 ft. below sea-level. The mean elevation of the United States is approximately 2,500 ft.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization — Territories, and 30 were admitted after such organization), and of a organized Territory. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternately. July 4 (Independence Day) is observed as the National Day.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-fifth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951, March 29, 1961, Jan. 23, 1964 and Feb. 10, 1967), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

The Executive power is vested in a President, who is elected every four years, and is eligible for re-election for one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first *Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first *Monday after the second Wednesday in December* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *sixth day of January* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of \$100,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance of not exceeding \$40,000. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein. (2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials. (3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked. (4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress. (5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

President of the United States, LYNDON BAINES JOHNSON, born August 27, 1908, acceded to the Presidency on the death of President John F. Kennedy, November 22, 1963, elected President, Nov. 3, 1964. Democrat. Vice-President, Hubert Horatio Humphrey, Jr., born May 27, 1911, elected Vice-President, Nov. 3, 1964.

THE CABINET (Each \$35,000)

Secretary of State, Dean Rusk, of New York (born Feb. 9, 1909), appointed Jan. 21, 1961.
 Secretary of Treasury, Henry H. Fowler, of Virginia (born Sept. 5, 1908), appointed April 1, 1965.
 Secretary of Defence, Clark M. Clifford, of Kansas (born Dec. 25, 1906), appointed Jan. 30, 1968.
 Attorney-General, Ramsey Clark, of Texas (born Dec. 18, 1927), appointed March 2, 1967.
 Postmaster-General, William M. Watson, of Texas (born 1925), appointed April 10, 1968.
 Secretary of Interior, Stewart L. Udall, of Arizona (born Jan. 31, 1920), appointed Jan. 21, 1961.
 Secretary of Agriculture, Orville L. Freeman, of Minnesota (born May 9, 1918), appointed Jan. 21, 1961.
 Secretary of Commerce, Cyrus R. Smith, of Texas (born 1900), appointed Feb. 28, 1968.
 Secretary of Labour, William Willard Wirtz, of Illinois (born Mar. 14, 1912), appointed Aug. 30, 1962.
 Secretary of Health, Education and Welfare, Wilbur J. Cohen, of Wisconsin (born 1913), appointed March 22, 1968.
 Secretary of Housing and Urban Development, Robert C. Weaver, of New York (born Dec. 29, 1907), appointed Jan. 18, 1966.
 Secretary of Transportation, Allan S. Boyd, of Florida (born July 20, 1922), appointed Jan. 16, 1967.

CAPITAL OF THE UNITED STATES

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital Washington and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the District of Columbia (with which

the City of Washington is considered co-extensive) is 69.245 square miles, with a population at the Census of 1960 of 763,956.

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President.

The City of Washington is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,164. The Senate consists of 100 members. The salary of a Senator is \$30,000 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 Representatives and a resident commissioner from Puerto Rico. The salary of a Representative is \$30,000 per annum with mileage for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On Nov. 1, 1966, there were 114,377,000 persons of voting age, excluding members of the armed forces overseas.

THE NINETIETH CONGRESS

Noon of Jan. 4, 1967, to Noon of Jan. 3, 1969.
President of the Senate, Hubert H. Humphrey (Vice-President).

Speaker of the House of Representatives,

John W. McCormack, Mass..... \$43,000
Secretary of the Senate, Francis R. Valeo, District of Columbia.

Clerk of the House of Representatives, William P. Jennings, Va.

Members of the 90th Congress were elected on Nov. 3, 1966.

The 90th Congress is constituted as follows:

Senate.—Democrats, 64; Republicans, 36. Total, 100. House of Representatives.—Democrats, 247; Republicans, 187; (1 vacancy). Total 435.

THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The United States Courts of Appeals, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The 91 District Courts, served by 342 District Court Judges.

THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.)
Chief Justice, *Earl Warren, Cal., born March 19, 1891, appointed Sept. 30, 1953..... \$40,000

Associate Justices (each \$39,500)

Name.	Born.	Apptd.
Hugo L. Black, Ala.	1886	1937

Clerk of the Supreme Court, John F. Davis.		

* Mr. Abe Fortas was nominated as Chief Justice on June 26, 1968, but the appointment had not been confirmed at the time of going to press.

DEFENCE

Department of Defence.

Secretary of Defence (in the Cabinet), Clark M. Clifford (Jan. 30, 1968).

Secretary of the Army, Stanley R. Resor.

Secretary of the Navy, Paul R. Ignatius.

Secretary of the Air Force, Harold Brown.

Chairman, Joint Chiefs of Staff, Gen. Earle G. Wheeler, U.S. Army (July 3, 1964).

The Department of Defence includes the Secretary of Defence as its head, the Deputy Secretary of Defence, the Defence staff offices, the Joint Chiefs of Staff and the Joint Staff, the three military departments and the military services within those departments, the unified and specified commands, and other Department of Defence agencies as the Secretary of Defence establishes to meet specific requirements. The Defence staff offices and the Joint Chiefs of Staff, although separately organized, function in full coordination and cooperation. They include the offices of the Director of Defence Research and Engineering, the seven Assistant Secretaries of Defence, the General Counsel of the Department of Defence and such other staff offices as the Secretary of Defence may establish. The Joint Chiefs of Staff, ■ ■ group, are directly responsible to the Secretary of Defence for the functions assigned to them. Each member of the Joint Chiefs of Staff, other than the Chairman, is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary and functions under the direction, authority and control of the Secretary of Defence.

The Department of Defence maintains and employs armed forces: (1) to support and defend the Constitution of the United States against all enemies, foreign and domestic; (2) to insure, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; (3) to uphold and advance the national policies and interest of the United States; and (4) to safeguard the internal security of the United States. All functions in the Department of Defence and its component agencies are performed under the direction, authority and control of the Secretary of Defence.

Commanders of unified and specified commands are responsible to the President and the Secretary of Defence for the accomplishment of military missions assigned to them.

Unified Defence Commands

Commanders-in-Chief

U.S. European Command, Brussels.—Gen. Lyman L. Lemnitzer (concurrently NATO Supreme Allied Commander).

U.S. Southern Command, Quarry Heights, Panama Canal Zone.—Gen. Robert W. Porter, Jr. (U.S. Army).

Atlantic, Norfolk, Virginia.—Adm. Ephraim P. Holmes (U.S. Navy) (concurrently NATO Supreme Allied Commander, Atlantic).

Pacific, Hawaii.—Adm. John S. McCain, Jr. (U.S. Navy).

U.S. Naval Forces, Europe, London.—Adm. Waldemar F. A. Went (U.S. Navy).

N. American Air Defence Command, Colorado Springs.—Gen. Raymond J. Reeves (U.S.A.F.).

Strategic Air Command, Omaha.—Gen. Joseph J. Nazzaro (U.S.A.F.).

Alaskan Command, Anchorage, Alaska.—Lt.-Gen. Robert A. Breitweiser (U.S.A.F.).

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1950, to 501,700 (excluding Air Corps). The strength

in March, 1968, was approximately 1,512,000. Stationed in Europe were four divisions and other large combat elements of less than division size. There were two divisions in Korea. Strong combat units were on duty in the Caribbean area and in Alaska and other combat units were in Italy as part of the NATO force. On June 22, 1968, some 356,000 troops were serving in South Vietnam.

Chief of Staff of the Army, Gen. William C. Westmoreland (July 3, 1968).

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,880,205. The strength in March, 1968, was 755,000. Strength of the Marine Corps, 297,000.

The U.S. Navy had in service in Jan., 1968, more than 950 vessels, including 16 attack carriers, 11 anti-submarine carriers, 39 cruiser types, 355 destroyer types, 2 command ships, 207 submarines (including 80 nuclear, 41 Polaris-carrying), 142 minecraft, 145 patrol craft, 230 amphibious craft and more than 200 other active fleet ships. The exact figures are classified.

Chief of Naval Operations, Admiral Thomas H. Moorer (Aug. 1, 1967).

Air.—The United States Air Force was established as a separate organization on September 18, 1947. On March 31, 1968, there were more than 1½ million people in the Air Force. About 902,000 officers and airmen are on active duty, with more than 342,000 civilian employees and some 502,000 members of the Air Force Reserve and Air National Guard.

There are approximately 15,000 aircraft in the Air Force inventory. To deter aggression the Air Force has some 600 strategic bombers maintaining constant alert as well as some 1,000 inter-continental ballistic missiles in hardened silos. In addition, the Air Force maintains the capability to carry out limited war and special air warfare operations. In March, 1961, the Air Force was assigned primary responsibility for the Department of Defence space development programmes and projects. By Nov. 9, 1967, the United States had placed 514 spacecraft in orbit round the earth and sent 28 others to the moon and other distant planets. These included Air Force, Army and N.A.S.A. shots.

Chief of Staff of the U.S. Air Force, Gen. John P. McConnell (Feb. 1, 1965).

FINANCE THE UNITED STATES BUDGET

[Fiscal years]

Description	Actual	
	1967 (revised)	1968 (preliminary)
Receipts by Source, 1967-68		
Individual income taxes.....	\$61,526,000,000	\$68,692,000,000
Corporation income taxes.....	33,971,000,000	28,657,000,000
Employment taxes.....	27,823,000,000	29,224,000,000
Unemployment insurance.....	3,659,000,000	3,345,000,000
Premiums for other insurance and retirement.....	1,856,000,000	2,039,000,000
Excise taxes.....	13,719,000,000	14,071,000,000
Estate and gift taxes.....	2,978,000,000	3,045,000,000
Customs.....	1,901,000,000	2,038,000,000
Miscellaneous receipts.....	2,122,000,000	2,373,000,000
Total, budget receipts.....	\$149,555,000,000	\$153,485,000,000
Outlays by Agency		
Legislative Branch.....		
The Judiciary.....	240,000,000	255,000,000
Executive Office of the President.....	86,000,000	91,000,000
Funds appropriated to the President.....	28,000,000	28,000,000
Department of Agriculture.....	4,872,000,000	4,903,000,000
Department of Commerce.....	5,841,000,000	7,326,000,000
Department of Defense—Military.....	738,000,000	800,000,000
Department of Defense—Civil.....	67,453,000,000	77,190,000,000
Department of Health, Education, and Welfare.....	1,310,000,000	1,287,000,000
Department of Housing and Urban Development.....	35,153,000,000	41,048,000,000
Department of the Interior.....	2,787,000,000	4,088,000,000
Department of Justice.....	529,000,000	259,000,000
Department of Labor.....	403,000,000	430,000,000
Post Office Department.....	3,289,000,000	3,268,000,000
Department of State.....	1,141,000,000	1,084,000,000
Department of Transportation.....	418,000,000	420,000,000
Treasury Department.....	5,428,000,000	5,731,000,000
Atomic Energy Commission.....	13,044,000,000	14,719,000,000
General Services Administration.....	2,264,000,000	2,404,000,000
National Aeronautics and Space Administration.....	131,000,000	417,000,000
Veterans Administration.....	5,423,000,000	4,722,000,000
Other independent agencies.....	6,847,000,000	6,878,000,000
Undistributed adjustments to amounts above:		
Government contributions, ■ employer, for retirement.....	— 1,743,000,000	— 1,904,000,000
Interest received by trust funds.....	— 2,285,000,000	— 2,692,000,000
Total, budget outlays.....	\$158,362,000,000	\$178,892,000,000

PUBLIC DEBT

On June 28, 1968, the total *Federal Debt* of the United States stood at \$369,776,000,000; the level at the end of the fiscal year 1967 was \$341,348,000,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical workers—single persons and families—in 50 cities representative of all cities in the United States) showed ■ monthly average during the calendar year 1967 of 116.3 (the basic figure of 100 being the 1957-59 average). The average of consumer prices for the first seven months of 1968 was: January, 118.6; February, 119.0; March, 119.5; April, 119.9; May, 120.3; June, 120.9, and July, 121.5.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) rose from 114.7 to 118.2 in the calendar year 1967. In the year to July, 1968, food prices rose from 117.0 to 120.0; all other commodities—111.2 to 113.2; rent—113.7 to 115.1; all other services—134.6 to 139.3.

The wholesale price index of all commodities showed a monthly average during 1967 of 106.1 (the average for the years 1957-59 is 100). The preliminary index in August, 1968, was 108.7. Wholesale prices for farm products fell from 105.6 in 1966 to 99.7 in 1967. (The preliminary index for August, 1968, was 101.5.) Industrial prices averaged 106.3 in 1967, increasing to 108.9 (prelim.) in August, 1968.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$538.9 billion in 1965 to \$586.8 billion in 1966 and further to \$628.8 billion in 1967. In the year 1967

labour income rose by \$31.3 billion, business and professional income by \$1.5 billion and personal interest income by \$3.7 billion. Dividend income rose by \$1.2 billion to \$22.9 billion. Personal incomes from all sources other than agriculture rose by \$4.2 billion. Preliminary estimates for July, 1968 (seasonally adjusted annual rate) showed personal income at \$689.2 billion, an increase of \$60.4 billion over the 1967 level. Labour income rose from \$446.7 billion in 1967 to \$492.0 in June, 1968, an increase of \$45.3 billion. Business and professional incomes rose from \$46.3 billion in 1967 to \$48.0 billion in July, 1968, and personal interest income rose from \$46.8 billion in 1967 to \$52.6 billion in July, 1968.

Disposition of personal incomes.—Of the total of \$628.8 billion gross personal income in 1967, \$82.5 billion was taken by personal taxes and \$506.2 billion was consumed on: Durable goods (\$72.6 billion); non-durable goods (\$215.8 billion); and services (\$203.8 billion), showing personal saving totalling \$40.2 billion out of \$546.3 disposable personal income. At current prices the latter showed an average of \$2,744 per head. Savings amounted to 7.4 per cent. of disposable personal income, as against 6.4 per cent. in 1966.

Private domestic investment.—The total gross private domestic investment rose from \$67.8 billion in 1957 to \$114.3 billion in 1967. Fixed investment in new residential construction (excluding farm investment) rose to \$24.6 billion (1957, \$20.2 billion) and other non-farm construction to \$24.0 billion (1957, \$19.5 billion). Investment in producers' durable equipment (excluding farm equipment) rose from \$25.9 billion in 1957 to \$51.0 billion in 1967.

PRODUCTION

AGRICULTURE AND LIVESTOCK

Agriculture.—The total land surface, including Hawaii and Alaska, is 2,280,864,000 acres of which about 50 per cent. is in farms. The total number of farms in 1968 was 3,059,000. The cash income from crops in 1966 was \$18,256,000,000, and in 1967, \$24,405,000,000. Cash income from livestock and livestock products in 1966 was \$24,924,000,000 and in 1967, \$24,405,000,000.

Combined production of all crops in 1967 was about 3 per cent. more than in 1966, due largely to increased acreages for major crops, offset in part by a reduction in cotton acreage. The composite index of yields per acre of 28 major crops was 123 (1957-59 = 100) compared with 122 in 1966. The cotton crop of 7,455,000 bales was down more than a fifth from a year earlier. However, production of corn (maize), grain sorghums, rice, peanuts, wheat and soybeans was ■ record. Farm output of livestock and livestock products was up nearly 3 per cent. in 1967 because of increases in meat animals and poultry.

Livestock on Farms, Jan. 1

	1962-66 '000 head	1966 '000 head	1967 '000 head	1968 '000 head

MINERALS

The value of mineral production in the United States in 1967 totalled ■ estimated \$23.8 billion compared with \$22.9 billion in 1966 and \$21.4 billion in 1965. Domestic mine production of

copper, gold, and silver was off sharply from 1966. Lead, zinc, and iron production also were down from the previous year. Uranium ore output, mine production of mercury, and primary magnesium production showed significant increases in 1967 from 1966.

Nearly 60 per cent. of the mineral production of the United States (in value) consists of fuels. In 1967, U.S. production of crude petroleum amounted to 3,216 billion barrels, valued at \$9.4 billion. Total demand (domestic plus exports) averaged 12.6 million barrels daily, an increase of 4.4 per cent. over 1966.

In the three principal oil-producing states in 1967 daily average production increased as follows: Louisiana, 275,000 barrels (total average daily production, 2,122,000 barrels); Texas, 170,000 barrels (total average daily production 3,068,000 barrels); and California, 38,000 barrels (total average daily production 984,000 barrels).

Production of anthracite again decreased in 1967, reflecting continued declines in major markets at home and abroad. Pennsylvania anthracite production fell 7 per cent. below the 1966 figure, which was itself an ■ per cent. drop from 1965. Anthracite exports to Canada fell 28 per cent. below the 1966 tonnage. The quantity shipped to western Europe was 15 per cent. above the 1966 level. The continued loss in the domestic market was due to competition from other fuels, principally oil and gas.

Bituminous coal and lignite produced in 1967 totalled 551 million tons, an increase of 3.2 per cent. over 1966. Exports remained at the same relative level of 49.5 million tons. The average value at the mine was estimated at \$4.77 ■ ton in 1967, 23 cents above the 1966 value. The gains in mine prices and production raised the total value to \$2.6 billion, ■ rise of 8.4 per cent. compared with 1966.

MAJOR INDUSTRY GROUPS, 1966 (Adjusted)

Group	No. of Employees	Payroll	Value added by Manufacture
Food and kindred products.....	1,642,145	\$9,542,146,000	24,895,940,000

Total.....	19,065,997	\$125,458,784,000	\$251,013,903,000

MANUFACTURES

The leading five States according to value added by manufacture at the 1963 Census of Manufacture were: New York (\$19,558,039,000), California (\$17,162,504,000); Ohio (\$15,506,118,000); Illinois (\$14,640,121,000); and Pennsylvania (\$14,043,602,000).

The average number of employees in 1963 for the United States as a whole was 16,960,983, salaries and wages totalling \$99,904,279,000. The value added by manufacture (value of output less cost of materials and supplies, plus value created by merchandising operations, etc.) was \$192,103,102,000.

LABOUR IN THE UNITED STATES

Organized Labour.—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formally established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership in 1966 was 16,200,000 (including 1,241,000 members in Canada). There are also 3,000,000 members of unions not affiliated to the AFL-CIO.

Approximately 28·0 per cent. of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 4,595 stoppages recorded in 1967, involving 2,870,000 workers. There were 42,100,000 man-days of idleness, representing 0·30 per cent. of estimated working time of all workers.

Employment and Unemployment.—The civilian labour force (working population) was 78,234,000 in May, 1968. This includes self-employed, wage and salary-earners, and unpaid family workers, employed and unemployed. Unemployment was estimated at 2,303,000 in May 1968 (2·9 per cent.).

Wages.—In May, 1968, gross average weekly earnings by industry ranged from \$197·22 per week in electrical work to \$51·33 in variety stores (29·5 hours and \$1·74 average hourly earnings). The average for all manufacturing was \$122·29, an increase of over 425 per cent. since 1939, but in

terms of 1957-59 purchasing power the increase was 2·12 times.

	Average Earnings	Hours Worked	Average Hourly Earnings
May, 1968	Week	Per Week	Hourly
Manufacturing.....	\$122·29	40·9	\$2·99
Durable.....	132·29	41·6	3·18
Non-durable.....	108·26	39·8	2·72
Coal Mining.....	151·13	40·3	3·75
Bituminous Coal and Lignite Mining.....	152·69	40·5	3·77
Gen. Bldg. Contractors.....	151·72	36·4	4·16
Gas, Electricity and Sanitary Services....	147·91	41·2	3·59
Wholesale trade.....	120·99	39·8	3·04
Retail trade (incl. eating and drinking places).....	73·40	34·3	2·14
Laundries, Cleaners....	69·38	37·1	1·87

On Feb. 1, 1967, the minimum wage set by federal law became \$1·40 an hour for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities closely related and directly essential to such production. The law requires at least time and a half of an employee's regular rate of pay for all hours over 40 a week. From Feb. 1, 1968, the minimum wage for these employees became \$1·60 = hour.

Other employees employed in certain large enterprises having some employees engaged in commerce or the production of goods for commerce, on Feb. 1, 1967, became entitled to a minimum wage of \$1·00 an hour increasing by 15 cents each year until it reaches \$1·60 after Feb. 1, 1971. Overtime premium—44 hours in a week after Feb. 1, 1967—is reduced to 42 hours one year later and to 40 hours after Feb. 1, 1969.

There are certain exemptions from these monetary requirements in specific occupations and industries.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds, financed by the employer or by employer and employees jointly.

EXTERNAL TRADE OF THE UNITED STATES

Figures adjusted to include imports of uranium ore and exports of uranium and other nuclear fuels.

Year	General Imports	Total Exports and Re-exports	Excess of Exports over Imports
1963	\$ 17,140,000,000	\$ 23,347,000,000	+ \$5,287,000,000

ROADS

In 1966 there were 3,697,950 miles of roads and streets in the United States, of which 3,187,715 miles were in rural areas and 510,235 miles were in municipal areas. Surfaced roads and streets account for 2,800,481 miles of the total; 897,469 miles were unimproved and graded and drained. State primary roads, including extensions in municipal areas, total 470,212 miles (466,113) surfaced. Other roads and streets under State control total 291,044 miles (261,269 surfaced), 2,776,450 miles are under local control (2,029,129 surfaced); and 160,244 miles (43,970 surfaced) are under Federal control (in national forests and parks).

An estimated total of \$15,127,000,000 was spent in 1967 for roads and streets in the United States. Of this total \$10,620,000,000 was spent for State highways, \$2,118,000,000 was spent for county and local rural roads, \$2,105,000,000 was spent for city streets and \$284,000,000 was spent on roads in Federal areas. Capital outlay accounts for 62·0 per cent. of the total expenditures; 24·2 per cent. was spent for maintenance; and 5·8 per cent. for administration; 4·2 per cent. for highway police and safety; and 3·8 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.—The number of motor vehicles registered in 1967 in the United States was 96,937,627, an increase of 3·2 per cent. over the 1966 total of 93,962,030. The State governments received \$1,468,554,000 in 1961 and \$7,898,371 in 1967, respectively, from motor-fuel, motor-vehicle, and motor-carrier taxes. In 1967 the Federal Government received \$5,666,317 from excise taxes on motor vehicles and parts, tyres and

tubes, gasoline, diesel and special fuels and lubricating oils.

Accidents.—In 1967 there were 53,000 deaths caused by motor vehicle accidents. The death rate per 100,000,000 vehicle miles of travel was 5·5 in 1967, compared with 5·7 in 1966.

SHIPPING

The active ocean-going Merchant Marine of the U.S. on June 1, 1968, consisted of 1,102 vessels of 1,000 gross tons and over, of which 925 were privately owned and 177 were government-owned ships under charter or general agency agreement with private companies. There were 955 government-owned vessels in the National Defense Reserve Fleet. Of the active vessels, 809 were dry cargo ships, 26 were combination passenger and cargo, and 267 were tankers.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1967 were estimated to have carried 132,093,000 passengers over 98,746,641,000 passenger miles, 95 per cent. of which were flown in jets. The freight flown by the scheduled airliners during 1967 totalled 2,351,108,000 ton miles and express 98,883,000 ton miles. In addition, the airliners flew 975,485,000 ton miles of mail, an increase of 29·7 per cent. over 1966.

Total operating revenues of all U.S. scheduled airlines reached the record figure of \$6,864,645,000 in 1967, an increase of 19·5 per cent. over 1966. Similarly, total operating expenses rose to a record high total of \$6,156,391,000 last year, or 23·9 per cent. more than the previous year. The net operating income (i.e., before deduction of taxes, interest, etc.) was \$708,254,000, a decrease of 8·8 per cent. from the previous year, resulting in a profit of \$415,411,000 compared with a profit of \$428,584,000 in 1966.

Nine principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (11); (b) Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (10); (c) The International and Territorial Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico, the Caribbean and to Alaska and Hawaii (14); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Intra-Alaskan Carriers, providing service within Alaska (5); other classes are (f) Certified All Cargo Lines (5); (g) Helicopter Carriers (4); (h) Supplemental Air Carriers (13); and (i) Air Freight Forwarders (150) and Air Taxi Operators, of which there are over 3,530 authorized.

In 1967, 276,023 persons were employed by the domestic and international airlines, 13·1 per cent. more than in 1966.

EDUCATION

State School Systems

Almost every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In the autumn of 1967 the total number of children in the United States of 5 to 17 years of age was 51,584,000, of whom 43,887,000 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was estimated at 40,708,000 for the 1967-68 school year, the average length of school term was estimated at 179 days, and the average number of days attended by each pupil enrolled at 165. In 1967, 1,855,000 teachers were employed. The estimated average annual salary of all teachers was \$7,320.

The 1966-67 total revenue receipts for school purposes, excluding balances on hand, were about \$26,820,000,000. Of this amount, about \$2,150,000,000 were received from Federal sources, \$10,690,000,000 from State sources and \$13,980,000,000 from county and local sources. For 1967-68 current expenditures are estimated at \$26,340,000,000. It is estimated that \$4,220,000,000 were expended for sites, buildings, furniture and equipment, and \$950,000,000 for interest.

Institutions of Higher Education

In the autumn of 1967 enrolment in institutions of higher education numbered 6,964,000.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges and junior colleges. The 1967 survey of enrolments covered 2,382 institutions classified as follows: 1,593 universities, colleges and professional schools enrolling 5,446,000 students; and 789 junior colleges enrolling 1,518,000 students. There are 96 institutions of higher education attended predominantly by Negroes, enrolling 144,000 students included in the foregoing figures.

During the school year 1965-66, 555,613 bachelor's and first professional degrees were conferred, 331,122 to men and 224,491 to women; 140,772 master's degrees, 93,184 to men and 47,588 to women; and 18,239 doctorates, 16,121 to men and 2,118 to women. Education, Social Sciences, and Business and Commerce were, in that order, the fields in which most students received first-level degrees. There were 118,421 bachelor's and first professional degrees in Education, 93,669 in Social Sciences, and 63,500 in Business and Commerce. The three leading fields of study for the master's degree were Education (50,478), Social Sciences (16,460) and Engineering (13,678). The most popular fields of study on the doctorate level were Education (3,063), Physical Sciences (3,045) and Engineering (2,304).

Particulars of some of the Universities are: *Harvard* (20,345 students, including 6,216 women in 1967), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; *Yale* (8,665 students, including 1,028 women, in 1967), founded at New Haven, Connecticut, in 1701; *Bowdoin*, Brunswick, Me. (founded 1794; 929 men); *Brown*, Providence, R.I. (founded 1764; 5,042 students, including 1,366 women, in 1967); *Columbia*, New York, N.Y. (founded 1754; 25,404 students, including 10,087 women, in 1967); *Cornell* (founded at Ithaca, N.Y., 1865; 19,438

students, including 5,152 women, in 1967); *Dartmouth*, Hanover, N.H. (founded 1769; 3,929 students, including 44 women, in 1967); *Georgetown*, Washington, D.C. (founded 1789; 7,479 students, including 1,445 women, in 1967); *North Carolina*, Chapel Hill, N.C. (founded in 1789; 15,601 students, including 4,478 women, in 1967); *Pennsylvania*, Philadelphia, Pa. (founded 1740; 19,417 students, including 5,329 women, in 1967); *Pittsburgh*, Pittsburgh, Pa. (founded 1787; 25,060 students, including 9,606 women, in 1967); *Princeton*, Princeton, N.J. (founded 1746; 4,693 men and 63 women in 1967); *Tennessee*, Knoxville, Tenn. (founded 1794; 28,679 students, including 10,090 women, in 1967); *William and Mary*, Williamsburg, Va. (founded 1693; 9,551 students, including 3,959 women, in 1967); *New York University*, founded in 1831 at New York, had 34,582 students, including 11,425 women, in 1967.

Private Schools and Colleges

In the autumn of 1967 it was estimated that there were about 5,200,000 pupils in private kindergarten and elementary schools, 1,400,000 pupils in private high schools and academies, and 2,100,000 students in privately controlled institutions of higher education. Enrolment figures for private elementary and secondary schools include about 60,000 pupils enrolled in privately controlled schools for exceptional children and sub-collegiate departments of private institutions of higher education.

WEIGHTS AND MEASURES

The *Weights and Measures* in the United States in common use are of British origin and in the case of weights and linear units correspond in large part with those now employed in Great Britain. The short ton of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the long ton of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0.9689 British bushel, and 1 U.S. gallon = 0.83267 British gallon. The U.S. liquid quart is divided into 32 fluid ounces.

The metric system was made lawful in the United States by Congress in 1866. It is used almost universally in scientific work and by the pharmaceutical industry in U.S.A. A decimal inch is regularly used in the automotive and other large industries and a decimal pound is also in use in industry and increasingly so in retail food stores.

† Died in office. § Assassinated. (a) Elected as Vice-President.

‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

TERRITORIES, ETC. OF THE UNITED STATES

CANTON AND ENDERBURY

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of over 91,000 in 1967. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

Canton Island was successively used for aviation support activities and as a missile tracking station by the U.S. National Aeronautics and Space Administration. These activities have been terminated and the island is now uninhabited. Enderbury has been uninhabited since World War II.

GUAM

Guam, the largest of the Ladron or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 200 square miles, with an estimated Guamanian population (1967) of 63,000.

The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, Manuel F. Leon Guerrero.

Secretary, Denver Dickerson.

CAPITAL, Agaña. Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945. Population (1960), 1,097.

Midway Islands, with a total area of 28 sq. miles and a population (1960) of 2,356, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50' - 18^{\circ} 30'$ N. lat. and $65^{\circ} 30' - 67^{\circ} 15'$ W. long., with a total area of 3,435 square miles and a population estimated (1966) of 2,600,000. The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 100 miles from west to east, and 35 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. About 7,500 miles of paved roads were in use in 1966. There are good harbours at San Juan, Mayaguez and Ponce. The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local self-government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 9 members is appointed by the Governor, with the advice and consent of the Senate. There are 9 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all judges. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat

in the House of Representatives, but not a vote. Great improvement has been made in the progress, industrialization and welfare of the island during the last two decades. A programme of tax exemption has raised income from industry to a level higher than that from agriculture. Public schools are established throughout—enrolment in 1967 was 729,473.

CAPITAL.— Ψ San Juan, population 477,000; Metropolitan Area (1967), 783,100. Other major towns are: Ψ Ponce (161,300); Bayamón (115,800); Ψ Mayaguez (92,500); Ψ Arecibo (80,100); and Caguas (75,700).

Governor, Roberto Sánchez-Vilella, elected 1964.

Resident Commissioner, Santiago Polanco Abreu.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 26,000 in 1968.

Tutuila, the largest of the group, has an area of 52 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1960, 1,251), the capital and seat of government. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces. *Governor*, Owen S. Aspinall.

Secretary, Alvin R. Mangnall.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1967 was estimated at 91,448. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary considerably among island groups and even more among islands and atolls in the same geographic area. Nine different languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947, administration being under the general jurisdiction of the Secretary of the Interior.

For administrative purposes, the territory is divided into six districts: The Marianas, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, William R. Norwood.

Deputy High Commissioner, Martin P. Mangan.

CAPITAL (Provisional).—Saipan, Mariana Islands.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 133 sq. miles, with an estimated population of 56,000. St. Thomas (28 sq. miles) had a population of 28,000; St. Croix (84 sq. miles) had a population of 26,500; St. John (20 sq. miles) had a population of 1,500.

CAPITAL, Charlotte Amalie contains one of the finest harbours in the West Indies. The government of the Virgin Islands is organized under the provisions of the Revised Organic Act of the Virgin Islands, enacted by the Congress of the United States on July 22, 1954. Legislative power is vested in the Legislature of the Virgin Islands, a unicameral body composed of 15 senators popularly elected for two-year terms. Virgin Islanders are citizens of the United States. A Governor is appointed. The Virgin Islands are now a favourite tourist area in the Caribbean. The climate of the Islands is delightful at all times, and particularly so during the winter months. Imports from the United Kingdom in 1967 totalled £1,014,000; Exports to U.K., £5,365,000.

Governor, Ralph M. Pajewonsky.
Government Secretary, Cyril E. King.

THE PANAMA CANAL

The Panama Canal, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1911, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General W. P. Leber, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

In 1523, Charles V of Spain ordered an investigation into the possibility of a canal through the Isthmus of Panama. From then until 1904, the principal maritime nations of the world gave earnest consideration to the project. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. For various reasons, including those of finance and inability to master the health problems on the humid isthmus, the initial effort failed. A receiver was appointed in 1889 and a second French company undertook the last project, with excavation work resuming in 1894. This was continued until the United States Government acquired the effects of the French company on Panama on May 4, 1904.

Congress authorized the President in 1902 to purchase the rights and property of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the isthmus, were ceded to the United States.

The U.S. guaranteed the Republic of Panama's independence and agreed to pay it \$10,000,000 and an annuity which was to begin nine years after the ratification of the treaty. The canal is built through the centre of this territory. Under the terms of a treaty between Panama and the United States, signed at Panama in January, 1955, the United States increased its annuity to Panama from \$430,000 to \$1,930,000 and agreed to hand over to the Republic land and railroad yards valued at \$25,000,000, to construct a high-level bridge over the Pacific entrance to the Canal which cost \$20,000,000 and to extend various commercial and other privileges to the Republic. The Canal Zone has an area of 647 sq. miles (about 1 per cent. of the total area of Panama) (land area, 372 sq. miles) and a population in 1967 of 49,433, of whom 39,812 (including military) are U.S. citizens.

Chief Town.—Balboa Heights (Population, including Balboa and Ancon, 3,665):

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights: 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea takes on average 13 to 15 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The Panama Canal Company is engaged in a Canal improvement programme which will result in a minimum channel width of 500 feet in the Cut. The final phase of the \$50 million programme began in the fiscal year 1967. The maximum draft allowable for ships using the Panama Canal is determined by the level of Lake Gatun, which is an average of 85 feet above sea level. During dry season, from December to April, the lake level drops, imposing draft restrictions. The all-time high maximum tropical fresh water draft was 40 feet for certain types of vessels in 1967.

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 16 fiscal years is shown below. In 1967 a record number of vessels used the canal carrying the highest tonnage so far recorded.

Fiscal Year	No. of Transits	Canal. * Net Tons	Cargo Tons
1952	6,524	30,674,302	33,610,509
1953	7,410	36,678,636	36,095,349
1954	7,784	38,027,812	39,095,067
1955	7,997	38,643,797	40,646,301
1956	8,209	41,273,020	45,119,042
1957	8,579	43,714,264	49,702,200
1958	9,187	47,968,018	48,124,809
1959	9,718	52,216,061	51,153,096
1960	10,795	58,301,926	59,258,219
1961	10,866	61,826,002	63,669,738
1962	11,149	65,378,845	67,524,552
1963	11,017	64,438,115	62,247,094
1964	11,808	69,707,102	70,550,090
1965	11,835	74,8-3,264	76,573,071
1966	11,926	78,918,013	81,712,940
1967	12,413	88,266,343	86,193,430

* Net Tonnage figures are estimated figures based on revised measurement rules which became effective March 1, 1938.

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York. October 24 has been designated "United Nations Day".

The following 125 states are members of the United Nations:

Afghanistan, Albania, Algeria, Argentina, Australia, Austria, Barbados, Belgium, Bolivia, Botswana, Brazil, Bulgaria, Burma, Burundi, Byelorussian Soviet Socialist Republic, Cambodia, Cameroon, Canada, Central African Republic, Ceylon, Chad, Chile, China, Colombia, Congo (Brazzaville), Congolese Republic, Costa Rica, Cuba, Cyprus, Czechoslovakia, Dahomey, Denmark, Dominican Republic, Ecuador, Ethiopia, Finland, France, Gaboon, Gambia, Ghana, Greece, Guatemala, Guinea, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Republic of Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Kenya, Kuwait, Laos, Lebanon, Lesotho, Liberia, Libya, Luxembourg, Madagascar, Malawi, Malaysia, Maldives Islands, Mali, Malta, Mauritania, Mauritius, Mexico, Mongolia, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Ruanda, Rumania, Salvador, Saudi Arabia, Senegal, Sierra Leone, Singapore, Somalia, South Africa, Southern Yemen, Spain, Sudan, Sweden, Switzerland, Syria, Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, Uganda, Ukrainian Soviet Socialist Republic, Union of Soviet Socialist Republics, United Arab Republic, United Kingdom, United States of America, Upper Volta, Uruguay, Venezuela, Yemen, Yugoslavia, Zambia.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided among seven Main Committees, on each of which every Member has the right to be represented:—(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—General Committee and a Credentials Com-

mittee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission. In 1964 the General Assembly set up the United Nations Conference on Trade and Development (UNCTAD) as a permanent body.

The United Nations Industrial Development Organization (UNIDO) was set up on Jan. 1, 1967, to promote industrialization and co-ordinate United Nations activities in this field.

2. The Security Council

The Security Council consists of fifteen Members, each of which has one representative and one vote. There are five permanent Members (China, France, U.K., U.S.A., U.S.S.R.) and ten non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by the affirmative vote of seven Members. On all other matters the affirmative vote of nine Members must include the concurring votes of the permanent Members, and it is this clause which makes the *Veto* possible. The only exception to this rule is that with regard to measures for peaceful settlement a party to a dispute may refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A Committee on the Admission of New Members was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Far East, Latin America and Africa. The Council also supervises and co-ordinates the work of fourteen related agencies.

United Nations Children's Fund (UNICEF), London Office, 14-15 Stratford Place, W.1.—UNICEF embraces all aspects of child welfare and assists the

governments of the developing countries in developing maternal and child health services, the prevention and treatment of disease, nutrition and the preparation of children for adult life. It is financed by voluntary contributions from Governments and from the public and its work is carried out in co-operation with the Specialized Agencies of the United Nations.

4. Trusteeship Council

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and one other country elected by the General Assembly for a three-year term.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

THE SECRETARIAT

Secretary-General (1966-71), U Thant (Burma).

Under-Secretaries-General

Chef de Cabinet, C. V. Narasimhan (*India*).
Special Political Affairs, Ralph J. Bunche (*U.S.A.*); J. Rolz-Bennett (*Guatemala*).
Conference Services, Jiri Nosek (*Czechoslovakia*).
Economic and Social Affairs, P. de Seynes (*France*).
Trusteeship and Information from Non-Self-Governing Territories, I. S. Djermakoye (*Niger*).
Political and Security Council Affairs, Aleksei E. Nesterenko (*U.S.S.R.*).
Director-General, U.N. Office, Geneva, V. W. Guicciardino (*Italy*).

Assistant Secretaries-General

Legal Counsel, C. A. Stavropoulos (*Greece*).
Controller, B. Turner (*New Zealand*).
Personnel (vacant).
Office of Public Information, A. A. Hamid (*Pakistan*).
General Services, D. Vaughan (*U.S.A.*).
Inter-Agency Affairs, M. Hill (*U.K.*).

Administrator, U.N. Development Programme (UNDP), Paul G. Hoffman (*U.S.A.*); **Co-administrator**, David Owen (*U.K.*).
Executive Director, U.N. Children's Fund (UNICEF), Henry Labouisse (*U.S.A.*).
Secretary-General, U.N. Conference on Trade and Development (UNCTAD), R. Prebisch (*Argentina*).

U.N. High Commissioner for Refugees, Prince Sadruddin Aga Khan (*Iran*).
Commissioner-General, U.N. Relief and Works Agency for Palestine Refugees in the Near East, Laurence V. Michelmore (*U.S.A.*).
Executive Director, U.N. Industrial Development Organization (UNIDO), I. H. Abdel-Rahman (*U.A.R.*)).

Executive Director, U.N. Institute for Training and Research (UNITAR), Chief S. O. Adebo (*Nigeria*).

Executive Secretaries of Economic Commissions
Europe (ECE), J. Stanovik (*Yugoslavia*).
Asia and the Far East (ECAFE), U Nyun (*Burma*).
Latin America (ECLA), C. Quintana (*Mexico*).
Africa (ECA), R.R.K.A. Gardiner (*Ghana*).

U.N. Information Centre, 14-15, Stratford Place, W.1.

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. For the year 1968, the gross appropriation was \$140,430,950. The scale of assessments on 1968-70 budget for the British Commonwealth countries was: Australia, 1·52 per cent.; Canada, 3·0 per cent.; Ghana, 0·08 per cent.; India, 1·74 per cent.; Malaysia, 0·11 per cent.; New Zealand, 0·36 per cent.; Pakistan, 0·37 per cent.; United Kingdom, 6·62 per cent. The United States contribution was 32·57 per cent.; U.S.S.R. was 14·61 per cent.; France was 6·0 per cent.; Italy was 3·24 per cent.; Japan was 3·78 per cent.; and China was 4·00 p.c.

UNITED KINGDOM REPRESENTATIVES

845 Third Avenue, New York

Permanent Representative to the United Nations and Representative on the Security Council, The Lord Caradon, P.C., G.C.M.G., K.C.V.O., O.B.E. (Minister of State for Foreign Affairs)..... £5,625
Deputy Permanent Representative, Sir Leslie Glass, K.C.M.G.
Ministers, M. E. Allen, C.M.G., C.V.O. (Economic and Social Affairs); D. H. T. Hildyard, C.M.G., D.F.C.; J. I. McK. Rhodes (*Treasury Adviser*).
Counsellors, E. Youde, C.M.G., M.B.E. (Head of Chancery); J. D. B. Shaw, M.V.O. (Trusteeship Affairs); C. J. Brown, O.B.E. (*Admin.*); H. G. Darwin (*Legal Adviser*).
Military Adviser, Col. H. J. Sweeney, M.C.
1st Secretaries: Mrs. M. B. Chitty; P. J. S. Moon; D. N. Lane; C. W. Squire; R. A. C. Byatt; S. L. Egerton; R. N. Posnett, O.B.E.; D. F. Milton; T. N. Haining; Miss S. E. Harden, M.B.E.; Miss E. C. Wallis, M.B.E.
2nd Secretary, Miss J. H. Mather.
Attaché, P. A. McDermott.

INTERNATIONAL ATOMIC ENERGY AGENCY

Kärntnerring 11-13, Vienna

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it or under its supervision is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and some of the specialized agencies. In June, 1967, 98 states were members.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (25 members) carries out the functions of the Agency and meets usually four times a year. The Budget in 1967 amounted to \$11,879,500. Director-General, Dr. John A. Hall (*U.S.A.*).

INTERNATIONAL AGENCIES

Fourteen other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organisation (ILO)
Geneva (London Branch Office, Sackville House, 40 Piccadilly, W.1.)—Established in 1919 as an autonomous institution connected with the League of

Nations, in 1946 it became the first specialized agency associated with the United Nations. The ILO exists to contribute to the establishment of lasting peace by promoting social justice and by international action to improve labour conditions and living standards, and to promote economic and social stability. In June 1968, the Organisation had 118 member States.

The International Labour Conference, composed of national delegations of two government delegates, one delegate representing management and a fourth representing labour, meets annually and formulates international labour standards.

A 48-member Governing Body, composed of 24 Governments, 12 worker members and 12 employer members supervises the work of the International Labour Office and acts as the Organisation executive council. Ten Governments hold seats on the Governing Body because of their industrial importance. These are Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The International Labour Office, the Secretariat of the Organisation, collects and distributes information, assists governments upon request in drafting legislation on the basis of decisions of the Conference, directs technical co-operation activities and issues publications.

Director-General, David A. Morse (U.S.A.).

Food and Agriculture Organization of the United Nations (FAO), Viale delle Terme di Caracalla, Rome.—Established on October 16, 1945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy. Among its many activities the Organization promotes the global exchange of new types of plants, combats epidemics of animal diseases in many countries and provides technical assistance in such fields ■ nutrition and food management, soil erosion control, re-afforestation, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. As well as its work as an intergovernmental agency the Organization also mobilizes the efforts of private individuals and associations through the worldwide *Freedom from Hunger Campaign*. Jointly with the United Nations it administers ■ \$300,000,000 World Food Programme using food as capital backing for development programmes in developing countries. The 1967 session of the governing Conference approved a budget of \$59,861,000 for the years 1966-69. In addition, FAO is carrying out field programmes involving expenditure of more than \$400,000,000 under the U.N. Development Programme. Through its co-operative programme with the World Bank it is helping to increase international investment in agriculture and allied fields.

The policy of the Organization is directed by ■ two-yearly Conference of the 117 member countries. A council (34 members) acts for the Conference between its sessions.

Director-General, Dr. A. H. Boerma (Netherlands).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris, 7 ème.—Unesco was established on Nov. 4, 1946, to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental

freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, . . . to give fresh impulse to popular education and to the spread of culture, . . . to maintain, increase and diffuse knowledge.

The three main bodies of the "Organization are: ■ General Conference which meets every two years to approve the programme and budget, an Executive Board of 30 members and the Secretariat. In addition, National Commissions are set up in Member States to serve as ■ link with Unesco and carry out the programme of the Organization.

This programme is essentially designed to stimulate and expand international co-operation and national efforts in the fields of education, natural sciences, social sciences, cultural activities, mass communication and exchange of persons for study and educational travel abroad. Current activities of the Organization focus on development of international co-operation among specialists and non-governmental organizations, the collection and dissemination of information, direct action to promote education and science in under-developed countries and the preparation of international agreements related to Unesco's interests. Member States in June 1968, 122.

Director-General, René Maheu (France).

World Health Organization (WHO), 1211 Geneva 27. Established on April 7, 1948, the World Health Organization exists to forward the attainment by all peoples of the highest possible level of health. Its services are of two kinds—advisory, to spread knowledge, help to train personnel and assist countries on such subjects as malaria, tuberculosis, venereal diseases and other communicable diseases, maternal and child health, nutrition, and environmental health—and technical services of world-wide interest such as biological standardization and unification of pharmacopoeias, collection and dissemination of epidemiological intelligence, medical research and publication of technical and scientific works. Budget for 1969, \$60,747,800. Membership (June, 1968), 131.

Organs are a *World Health Assembly* meeting annually to frame policy, an *Executive Board* (24 members), meeting at least twice a year, and a *Secretariat*.

Director-General, Dr. M. G. Candau (Brazil).

International Bank for Reconstruction and Development (*The World Bank*), 1818 H Street, Washington, D.C.—Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of member countries by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources. The 552 loans made by the Bank since its inception to June 30, 1968, totalled \$11,518,000,000 to 85 countries. Subscribed capital, July 1, 1968, \$22,942,000,000.

The *Board of Governors* consists of one Governor and one alternate appointed by each of the 106 member countries.

Twenty *Executive Directors* exercise all powers of the Bank except those reserved to the *Board of Governors*. The *President*, selected by the *Executive Directors*, conducts the business of the Bank, with the assistance of an international staff.

President, Robert S. MacNamara (U.S.A.).

International Development Association (IDA), 1818 H Street, Washington D.C.—An affiliate of the World Bank established in September 1960. Its purposes are to promote economic development, increase productivity and thus raise standards of living in the less developed areas of the world included within the Association's membership, in particular by providing finance to meet their important developmental requirements on terms which are more flexible and bear less heavily on the balance of payments than those of conventional loans, thereby furthering the objectives of the World Bank and supplementing its activities. IDA's Board of Governors and Executive Directors are the same as those holding equivalent positions in the World Bank, serving *ex officio* in IDA. By June 30, 1968, IDA had extended 127 development credits totalling \$1,832,000,000 in 40 countries for improved transportation, agriculture, electric power facilities, industry, education and municipal water supplies. The credits were for terms of 50 years, free of interest.

International Finance Corporation (IFC), 1813 H Street, Washington, D.C.—The IFC was established in 1956 as an affiliate of the World Bank to assist less developed member countries by promoting the growth of the private sector of their economies. IFC's share capital of \$101,368,000 at June 30, 1968, had been subscribed by 86 countries. In addition, IFC is empowered to borrow up to approximately \$400,000,000 from the World Bank.

In association with other investors, IFC provides risk capital without government guarantee for productive private enterprises, usually on a mixed equity and loan basis. It also carries out standby and underwriting operations and furnishes technical and financial assistance to private development finance companies. IFC funds are augmented by sales of participations in its commitments to other investors. At the end of June, 1968, IFC had made commitments totalling more than \$271,000,000 in 39 countries. IFC is responsible for the technical and financial appraisal and supervision of all industrial, mining and development finance company projects submitted to the World Bank Group.

President, Robert S. McNamara (U.S.A.).

International Monetary Fund, 19th and H Streets, N.W., Washington D.C.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. 107 countries were in membership of the Fund in April, 1968, their total quota subscriptions being \$21,000,000,000. The Fund has an additional arrangement enabling it to borrow up to \$6,000,000,000 from ten industrial members.

The \$21,000,000,000 which the Fund holds in gold and currencies provides a reserve on which members may draw, with its agreement, to meet foreign obligations during periods of deficit in their international balance of payments. This use of the Fund's resources is linked to its efforts to reduce exchange restrictions and discrimination, and establish currency convertibility.

The Fund's financial assistance takes the form of a foreign exchange transaction. The member pays to the Fund a amount of its own money equivalent,

at the par value agreed with the Fund, to the amount of foreign currency it wishes to draw. The member is expected to "repurchase" its own currency from the Fund within three, or at the outside five years, with payment of gold or dollars or convertible currency acceptable to the Fund. These arrangements are subject to certain charges which rise in proportion to the amount of foreign exchange involved, and the length of time it is held.

Currencies drawn from the Fund may be used in a flexible way to relieve the member's payments difficulty, but its assets are not intended to be used for military purposes, or for programmes of economic development. Countries that are pursuing national development programmes may use the Fund if they experience temporary payments difficulties such as would ordinarily entitle member to Fund assistance.

Each member of the Fund is assigned a quota which approximately determines its voting power and the amount of foreign exchange that it may draw from the Fund. The subscription of each member is equal to its quota, and is payable partly in gold and partly in the member's own currency. On May 1, 1967, the Fund's assets included \$3,732,000,000 in gold, \$808,000,000 in subscriptions receivable and \$17,982,000,000 in various national currencies. Total drawings from the Fund up to April 30, 1968, amounted to \$14,600,000,000.

Managing Director, Pierre-Paul Schweitzer (France).

International Civil Aviation Organization (ICAO), 1080 University Street, Montreal, 3.—In existence since April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations or operation, and simpler procedures at international airports. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations ■ they apply to international air transport. 116 states are now members of ICAO.

An Assembly of delegates from member states meets at least once every three years. A Council of 27 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

President of Council, Walter Binaghi (Argentina).
Secretary-General, B. T. Twigt (Netherlands).

Universal Postal Union (UPU), Schosshaldenstrasse 46, 3000 Berne.—Established on October 9, 1874, by the postal Convention of Berne and in operation from July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union includes almost all the countries of the world. Budget, 1969, \$2,025,000. A Universal Postal Congress meets at five-yearly intervals, the next Congress to be held at Tokyo in 1969.

Director-General, Dr. Michel Rahi (U.A.R.).

International Telecommunication Union (ITU), Place des Nations, Geneva.—Founded at Paris in 1865 as the International Telegraph Union, ITU became ■ U.N. Specialized Agency in 1947 and since 1967 has been governed by the Convention adopted by the Montreux Conference held in 1965. ITU exists to set up international regulations for telegraph, telephone and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, collects and publishes information on telecommunication matters, including space radio communications. The budget for 1969 is \$5,261,320.

Secretary-General, M. Mili (Tunisia) (acting).

World Meteorological Organization (WMO), Geneva.—Established on March 23, 1950, WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology, and to promote the establishment and maintenance of centres providing meteorological services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, agriculture, and other human activities; to encourage research and training in meteorology and to coordinate their international aspects. Budget (1968-71), \$U.S.11,817,000.

A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (24 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), eight technical commissions and a Secretariat.

Secretary-General, D. A. Davies (U.K.).

SOUTH-EAST ASIA TREATY ORGANIZATION

Headquarters: Bangkok, Thailand.

A *South-East Asia Collective Defence Treaty* was signed on Sept. 8, 1954, by representatives of Australia, New Zealand, Pakistan, the Philippines, Thailand, France, the United Kingdom and the United States. The Treaty consists of eleven Articles. The parties undertake mutual defence responsibilities in the area of the Treaty. Other articles deal with mutual economic assistance, including technical assistance, designed to promote economic progress and social well-being; the rights and obligations of the parties under the Charter of the United Nations; accession of further states; and define the area to which the Treaty applies. Member Countries are represented on a Council which provides for consultation with regard to military and other planning. The United States executed the Treaty with the understanding that its recognition of the effect of aggression and armed attack apply only to Communist aggression, but agreed to consult with the other signatories in the event of any other armed attack.

In a declaration of principles, *The Pacific Charter*, the Treaty powers uphold the principle of equal rights and self-determination of peoples. They will earnestly strive by every peaceful means to

Inter-Governmental Maritime Consultative Organisation (IMCO), 22 Berners Street, W.1.—A United Nations Specialized Agency established on March 17, 1958, to provide means for co-operation and exchange of information among governments on technical matters related to international shipping, especially with regard to safety at sea. IMCO is responsible for calling maritime conferences and drafting maritime agreements, e.g. Convention on Facilitation of International Maritime Traffic 1965, Load Line Convention 1966. It has produced International Maritime Dangerous Goods Code; Code of Safe Practice for Bulk Cargoes; revised International Code of Signals; fire safety measures for ships; and tonnage measurement recommendations. In June 1968, 68 nations were in membership. Budget, 1968-69, \$2,102,241. *Secretary-General, C. Goad (U.K.).*

International Trade, General Agreement on Tariffs and Trade.—A draft charter for an international trade organization was completed in 1948, but as it became clear that it was not acceptable to leading trading powers the attempt to bring it into operation was abandoned.

An international treaty to which some 76 countries are parties came into operation in 1948, with the object of lowering and stabilizing tariffs, expanding international trade and promoting economic development. Six important tariff conferences have been held through which members have reduced or frozen their tariffs on thousands of items. The sixth negotiating conference, the Kennedy Round, completed in June, 1967, resulted in unprecedented tariff reductions, a cereals agreement and an anti-dumping code. In recent years an increasing amount of GATT's work has been concerned with the trade and development problems of developing countries. In 1964 an International Trade Centre was created to assist developing countries in export promotion, by means of market research, training courses and advisory services; it is operated jointly by GATT and UNCTAD.

Director-General, O. Long (Switzerland), Villa Le Bocage, Palais des Nations, Geneva 10, Switzerland.

promote self-government and to secure the independence of all countries whose peoples desire it and are able to undertake its responsibilities. They will continue to co-operate in the economic, social and cultural fields in order to promote higher living standards, economic progress and social well-being in the region. They are determined to prevent or counter by appropriate means any attempt in the Treaty area to subvert their freedom or destroy their sovereignty or territorial integrity.

CENTRAL TREATY ORGANIZATION

Headquarters: Ankara, Turkey

A mutual security and defence treaty was concluded between Turkey and Iraq at Baghdad, Feb. 24, 1955. Three further states, the United Kingdom, Iran, and Pakistan signed the *Baghdad Pact* later in the same year. The United States, although not ■ full member of the Council, participates in ■ observer capacity, is ■ member of all major committees, and contributes an equal share to the international staff and budget, as well ■ a large share of economic and military assistance. Iraq formally withdrew from the Pact on March 24, 1959, and the title Central Treaty Organization (CENTO) was adopted on Aug. 21, 1959. *Secretary-General, Turgut Menemencioglu (1968).*

Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Capitals, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of H.M. Diplomatic Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to officers serving abroad:

Grade I—	£8,600.
Grade II—	£6,300.
Grade III—	£5,375.
Grade IV—	£3,625 to £4,625.
Grade V—	£2,600 to £3,550.
Grade VI—	£2,985 to £3,525.
Grade VII—	£2,345 to £2,845.
Grade VIII—	£2,050 to £2,497.
Grade IX—	£1,865 to £2,225.
Grade X—	£1,145 to £1,865.
Grade XI—	£775 to £1,735.
Grade XII—	£525 to £1,225.

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

Cost of British representation in all overseas countries, including representation on international organizations such as the United Nations, North Atlantic Treaty Organization, OECD and EFTA, was estimated at £24,029,000 in 1968-69 (compared with £22,680,000 in the previous year). The total includes salaries of overseas staff, £15,953,000; general allowances, £6,606,000; representation allowances £650,000; and overseas entertainment allowances, £820,000.

ABYSSINIA. See Ethiopia.

AFGHANISTAN

(Afghanistān)

King of Afghanistan., H.M. Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, Nadir Shah); married Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue five sons and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, b. 1941; H.R.H. Prince Shah Mahmud, b. 1946; H.R.H. Prince Daud, b. 1949; H.R.H. Prince Mir Wais, b. 1957; and H.R.H. Princess Bilqis, b. 1931; H.R.H. Princess Maryam, b. 1936.

CABINET

Prime Minister and Minister of Foreign Affairs, Nur Ahmed Etemadi.
1st Deputy Prime Minister and Education, Dr. Ali Ahmad Popal.
2nd Deputy Prime Minister, Abdullah Yaftali.
Defence, Gen. Khan Mohamad.
Interior, M. Omar Wardak.
Justice, Mohamad Asghar.
Finance, Mohamad Anwar Zyace.
Commerce, Dr. Nur Ali.

2nd Secretary, Abdul Qayum Afzal.
Attaché, Hafizullah Anwar.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population 15,227,000 (estimated, 1964). The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durranis, from whom the Royal family springs, and the Ghilzais. Then come the Tajiks, an Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (now W. Pakistan) (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (now W. Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfiqar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. An Afghan-Chinese border treaty was signed in 1963 and the border demarcated in 1964. The Indo-Afghan frontier was settled by the Durand agreement of 1893.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into 29 provinces each under a Governor.

Government.—Afghanistan is a constitutional monarchy. By the new constitution which came into effect in October, 1965, sovereign power is vested in the National Assembly of 216 elected members. There is also an Upper House or Senate. Executive Government is carried out by a Cabinet consisting of a Prime Minister and 26 Ministers. Elections were held during 1965 for a new Parliament, consisting of an elected Lower House and a partly-elected Upper House. The Prime Minister is chosen by the King. Ministers may be appointed from among members of the Parliament or outside it but they must cease to be members of the Parliament on appointment. Mr. Nur Ahmed Etemadi was appointed Prime Minister by the King

on Nov. 1, 1967, and formed a new Cabinet (see p. 816).

By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Judiciary.—Hitherto Afghanistan has been ruled on the basis of Sharia or Islamic law. The new Constitution, however, introduced in 1965, provides for the creation of a legal code, and for a new structure of courts, consisting of a lower court in each *wuluswali* (sub province), and a court of appeal in each province, with a Supreme Court in Kabul. This system marks the complete separation of executive and judiciary for the first time.

Defence.—The Army has been reorganized and is recruited by twice-yearly calls. Service is for one year for officers and 2 years for other ranks. The peace strength is about 80,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (a) Internal: Kabul-Kandahar (310 miles); Kandahar-Herat (350 miles); Herat-Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif-Kabul (380 miles). Also Kabul-Khanabad-Faizabad (450 miles); Kabul-Gardez (80 miles); Kabul-Bamian (140 miles). The road from Kabul to the North has now been shortened by the completion in 1964 of the Salang pass. (b) Roads to the frontiers: Kabul-Khyber (175 miles); Kandahar-Chaman (70 miles) and roads from Herat to the Russian and Persian borders. The Kabul-Kandahar and Kandahar-Herat-Kushki roads have been surfaced by U.S. and Soviet Aid respectively. The Kabul-Khyber, Kandahar-Spin Boldak and Kabul-Kunduz-Qizil Qala roads are also surfaced. Work on the metallising of the Pul-i-Kumhri-Shiberghan road has begun, with Soviet assistance. Otherwise roads are unmetalled. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pashto, and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pashto. The Government is encouraging the spread of Pashto, the language of the Pathans. Education is free and nominally compulsory, elementary schools having been established in most centres; there are

secondary schools in large urban areas and a university (established in 1932) at the capital.

The annual revenue, of some £2,000,000,000 *Afghanis*, consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have become eligible for income-tax.

Trade with U.K.

	1966	1967
Imports from U.K..	£1,262,000	£961,000
Exports to U.K.....	6,364,000	3,016,000

Exports are mainly Persian lambskins (Karakuli), fruits, cotton, raw wool, carpets and spices, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

CAPITAL, Kabul (about 450,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000).

FLAG.—Vertical stripes of black, red and green, with white device in centre.

NATIONAL DAY.—May 27.

Secretariat of the Central Committee, Enver Hoxha (*1st Secretary*); R. Alia; H. Kapo; X. Spahiu.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1955) of 1,394,000.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hoxha as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945, on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A. It was admitted in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize.

CAPITAL, Tirana (pop. 50,000).

FLAG.—Black two-headed eagle surmounted by yellow outline star, all on a red field.

Algeria lies between 8° 45' W. to 12° E. longitude, 37° 6' N. to a southern limit about 19° N. Area, 855,900 sq. miles (estimated). The population is estimated at 12,102,000 (1966), of which 30 per cent. are urban dwellers.

Government.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. Between 1955 and 1960 these were re-organized to form 13 departments: Algiers, Tizi-Ouzou, Orléansville,

Médéa, Constantine, Bône (now Annaba), Setif, Batna, Oran, Tlemcen, Mostaganem, Saida and Tiaret. An armed rebellion led by the Moslem *Front de Libération Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. On September 16, 1959, General de Gaulle announced plans for the self-determination of Algeria, but the Moslem Nationalist Revolution continued. After various attempts by the European population of Algeria aided by a section of the French Army, to retain control in Algeria, peace talks between representatives of the French Government and the Nationalists opened at Evian on May 30, 1961, and agreement was finally reached between the two parties on March 19, 1962. A Referendum held in France on April 8, 1962, and a second one held in Algeria on July 1, confirmed the choice of the Algerian people for independence with continued co-operation with France. President de Gaulle declared Algeria independent on July 3, 1962. A Government under Ben Bella ruled the country on a provisional basis until an official Constitution was adopted in September, 1963. Under the terms of the constitution the F.L.N. is the only legally recognized party. Ben Bella was elected President of the Republic for a five-year term in September, 1963. He was deposed and a Council of the Revolution presided over by Col. Boumedienne assumed power on June 19, 1965. A new Government was formed on July 10. Algerian independence and the aftermath of the European insurrection in Algiers led to the flight of more than four-fifths of the French population and even more have left since. In a series of decrees the Algerian Government took over a large number of properties and organized their running by committees of workers. An agrarian reform aimed at land redistribution was announced for 1967-68. By October, 1963, all agricultural land held by foreigners had been expropriated. Considerable amounts in aid to sustain the Algerian economy are still being provided by the French Government which agreed in 1965 to provide Frs. 1,000 million for the execution of a five-year industrialization project.

Trade with U.K.

	1966	1967
Imports from U.K.....	£3,095,000	£2,970,000
Exports to U.K.....	22,681,000	15,233,000

Exports are mainly wine, barley and other cereals, skins, olives, citrus fruits, dates, iron and zinc ores, phosphate rock, corkwood, esparto grass, manufactured tobacco, vegetables, crude petroleum and methane (liquefied natural gas). The principal imports from the United Kingdom are tractors and agricultural machinery, engines, machine tools, rubber manufactures and metal manufactures. Natural gas from the Sahara is supplied to the coastal area. A special plant at Arzew, completed in 1964, liquefies the gas, which is then exported in specially-designed tankers. Methane exports to the United Kingdom (484,664 tons in 1966) were interrupted in 1967.

The Algerian State Railways network (2,402 miles) in 1964 carried 4,736,541 passengers and 4,552,032 tons of freight. In 1965 the number of ships in foreign trade entering Algerian ports was 10,551. 51,390 civilian aircraft carrying 786,214 passengers used the 18 principal Algerian airports in 1965. There were 25,300 kilometres of road open in 1966, including 2,300 km. of asphalt roads in the Sahara.

The territories of Ain Sefra, Ghardala, Touggourt and the Saharan Oasis, formerly a separate colony, became an integral part of Algeria on independence.

Oil, natural gas and iron ore are found in quantities in the Saharan regions. Substantial oil and gas deposits are now being worked. A third

pipeline for the Algerian Government was completed by a British construction company in March, 1966. Production of crude oil in 1966 totalled 32,043,127 tons, compared with 26,129,438 tons in 1965. In 1966, 1,957,000,000 cubic metres of natural gas were produced (1965, 1,700,000,000).

CAPITAL.—Algiers, population (census of 1966), 943,000. The large numbers of French inhabitants who left the country have largely been replaced by an influx of Algerians to the city. Other towns include Oran (324,000), Constantine (255,000), Annaba (formerly Bône) (165,000), Sidi-Bel-Abbes (101,000), Setif (98,000), Tlemcen (80,000), Skikda (formerly Philippeville) (85,000), Blida (87,000), Mostaganem (64,000), Tizi Ouzou (40,000).

FLAG.—Red crescent and star on a divided green and white background.

NATIONAL DAY.—November 1.

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France, with an approximate area of 180 square miles and population of about 16,000, one-third of whom are native Andorrans. It is surrounded by mountains of 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes, each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-four (Heads of families only may vote). The nominal heads of the state are the Bishop of Urgel, Spain, and the President of the French Republic. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. Each co-prince nominates his own representative and has a Permanent Delegation and a Supreme Tribune for the hearing of civil causes. These two Tribunes together form the Supreme Courts.

The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted currency. A good road crossing the Valleys from Spain to France is open most of the year. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that over 800,000 tourists visit the Valleys during the year.

There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

Imports from the United Kingdom rose from £30,000 in value in 1966 to £37,000 in 1967.

CAPITAL: Andorra la Vella (population 2,500).

FLAG.—Three vertical bands, blue, yellow, red;

Andorran coat of arms frequently imposed on central (yellow) band but not essential.
H.M. Consul-General, D. H. Clibborn, C.M.G. (Resident at Barcelona).

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 250 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 20,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in U.A.R. and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

See also.—BAHRAIN; KUWAIT; MUSCAT AND OMAN; QATAR; SAUDI ARABIA; SOUTHERN YEMEN; TRUCIAL STATES; YEMEN.

Ambassador, His Excellency Brig. Eduardo Francisco McLoughlin (1966).
Naval Attaché, Rear Adm. Luis M. Iriart.
Minister Plenipotentiary, Roberto H. Tiscornia.
Counsellors, Juan Manuel Figueroa Antequeda; Enrique J. Ros; Rafael Gonzalez.
Military and Air Attaché, Commodore Roberto D. Bortot.

Economic Counsellor, Leonardo A. Vartialitis.
Financial Counsellor, Carlos A. Montagne.
Asst. Naval Attachés, Cdr. Eduardo René Fracassi; Cdr. Juan Carlos Martinez.
Asst. Air Attachés, Cdre. Roberto Costa Martinez.
 Vice-Cdre. Rodolfo Alberto Aymonina.
1st Secretary, Alfonso A. S. von der Becke.
3rd Secretaries, Dr. Carlos A. Castilla; Eduardo M. Ainaldi.

Attache, Eduardo Alberto Cotelo.
Consulate-General, 53 Hans Place, S.W.1 (01-584-1701).

Minister Plenipotentiary, José A. del Carril.
1st Secretary, Esteban R. Osorio.

There is also a Consulate in Liverpool.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia

to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known ■ *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Río Negro; and south of the Río Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Córdoba by the San Luis and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombón Bay (Atlantic). In the south the Colorado and Río Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 22 provinces, one territory (Tierra del Fuego) and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with ■ estimated population of 23,037,000 (1967).

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after ■ long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán. A revolt in September, 1955, overthrew the Government under the presidency of General Juan D. Perón and an interim Provisional Government was formed by the late General Eduardo Lonardi. This Provisional presidency passed to General Pedro Aramburu in November, 1955.

A Constituent Assembly, elected on July 28, 1957, decided that the country should revert to the 1853 Constitution. General Elections were held in February, 1958, and Dr. Arturo Frondizi was elected President. Following Perónist victories in the partial elections of March, 1962, the armed forces took over the Government and appointed the Chairman of the Senate, Dr. Guido, President. He held office until 1963. After general elections of July 7, Dr. Arturo Illia was elected President in July, 1963, and took office in October, 1963, for a period of six years. But after the bloodless revolution by the Armed Services of June 27-28, 1966, the Presidency was offered to and accepted by General Onganía. Congress was dissolved and the President now rules by decree. For the most part his Cabinet comprises civilians, expert in their particular fields.

Agriculture.—Of a total land area of approximately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export trade in many others. Pastoral and agricultural products provide more than 90 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Ríos, Córdoba and La Pampa.

The following table shows the yield of the more important crops:

	1966-67
	Tons
Wheat	7,800,000
Maize	8,510,000
Linseed	430,000
Oats	540,000
Barley	438,000
Rye	270,000
Rice	27,000
Bird seed	32,200
Cotton (gross bulk production)	240,000
Sugar cane	11,960,000
Millet	156,000
Tobacco	59,000

Livestock.—Livestock population in 1967 was: cattle, 46,700,000; sheep, 48,000,000; and pigs, 3,780,000. Meat exports to U.K. in 1967 were 170,344 tons, compared with 170,505 in 1966. In 1967 total exports of meat (with 1966 totals in brackets) were: beef and veal, 101,393 tons (118,378); mutton and lamb, 18,394 tons (20,003). 11,075,800 cattle were slaughtered in 1967.

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquén), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also a natural gas pipeline from the same source to the outskirts of Buenos Aires. The production of oil is of first importance to Argentina's rapidly expanding industries and, to some extent, to her economic and financial development. Total petroleum output for 1966 was 16,638,400 cubic metres compared with 15,624,700 cubic metres in 1965.

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold and silver. Coal production in 1966 was 365,500 tons, compared with 373,800 tons in 1965; this is produced at the Rio Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural resources.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile industry and in engineering, especially in the production of motor vehicles and steel manufactures.

Communications.—There are 27,874 miles of railways of which 15,604 miles are broad gauge (5' 6"), 1,940 miles standard (4' 8½"), 9,664 miles of 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. Plans are in hand for complete re-organization of the railways which is expected to bring a substantial reduction in the lengths of lines operated. The combined national and provincial road network totals approximately 91,500 miles of which 7,500 miles are surfaced. There are air services between Argentina and all the neighbouring republics, Europe, Canada and the U.S.A.

Total tonnage entering Argentine ports was 13,269,600 in 1966. Of this figure 1,378,500 were Argentine, 1,389,600 British, 1,311,800 Italian, 1,256,300 Norwegian, 1,262,900 Greek, 1,473,600 Liberian, 606,800 U.S.A., 603,600 Netherlands, 526,000 Panamanian, 447,000 German, 403,100 Brazilian, 202,100 Danish, 462,200 Spanish, 308,900 French, 218,000 Japanese and 290,100 Swedish.

There are now 14 short-wave broadcasting stations, 93 medium wave (of which 36 are official), 4 television stations in Buenos Aires, 3 in Mendoza, 2 in Córdoba and Mar del Plata, and one each in La Plata, Rosario, San Juan and Comodoro Rivadavia. Television receivers numbered 1,600,000 at the end of 1964.

Defence.—The Army is organized in four corps in which are combined four infantry divisions, one motorized infantry division and one motorized infantry brigade, one mounted infantry division, one armoured division and one cavalry division and numbers about 5,000 officers, 15,000 N.C.O.s and 65,700 men on a peace footing.

The Navy consists of 2 cruisers, 1 aircraft carrier, 9 destroyers, 7 frigates, 1 ice-breaker, 8 minesweepers, 9 motor torpedo boats, 2 submarines, 23 landing craft, 7 oilers, 8 transports, 2 survey ships and auxiliary vessels; 4 squadrons Naval Air Arm. Strength about 2,000 officers and 25,000 men.

The Air Force consists of 5 brigades and a training force, with a strength of 1,700 officers, 11,000 other ranks and 19,000 civilians. The aircraft include Meteor IV, Lincoln, Lancaster, Viking, Bristol 170 and Dove.

Education.—Primary Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahía Blanca and private universities run by the Church.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the 1955 revolution the traditional freedoms have been restored. About 200 daily newspapers are published in Argentina, including 50 in the city of Buenos Aires. The English language newspaper is the *Buenos Aires Herald* (daily). There are numerous other foreign language newspapers.

TRADE	1966	1967
	Dollars U.S.	
Total Imports . . .	£1,124,306,400	£1,095,541,900

AUSTRIAN EMBASSY IN LONDON.

18 Belgrave Square, S.W.1.

[Belgravia : 3731]

Ambassador in London, His Excellency Dr. Josef A. Schoener, G.C.V.O. (1966).
Councillors, Dr. Gert Heible, M.V.O.; Dr. Erich Hochleitner.
3rd Secretary, Dr. Erich Wessely.
Defence Attaché, Lt.-Col. Hans Buttler-Eberberg, C.V.O.
Attaché, Dr. Ingo Mussi, M.V.O.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population (estimated July, 1966), 7,290,500.

Government.—The Austrian Federal Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German Reich under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely-elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. In the elections of March, 1966, the conservative People's Party won a small overall majority, the first time any party had done so since 1945. The subsequent People's Party government brought to an end the conservative-socialist coalition which had characterized Austrian politics since the war. The present state of the parties is:

People's Party	85
Socialist Party	74
Freedom Party (right wing)	6

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 15 and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz, Innsbruck, Salzburg and Linz.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are 8 daily papers in Vienna and 24 in the provinces, as well as numerous weeklies and monthlies.

Communications.—Internal communications in Austria are partly restricted because of the mountainous nature of the country, and road and rail routes must, of necessity, follow the river valleys. The railways in Austria are state-owned and have 5,951,934 km. of track of which 2,386,035 km. had been electrified by the end of 1964. While road surfaces in many cases are not up to British standards, the main roads linking the major towns are generally good and relatively fast. An autobahn, completed in 1967, links Munich, Salzburg, Linz and Vienna. An internal air service between the major towns of Austria was inaugurated in May, 1963.

Production and industry.—Agriculture is an important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth with about 38 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-

wood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1966 include (in thousands of metric tons): pig iron 2,195, steel 3,193, rolled products 2,346. Raw magnesite, nitrogenous fertilizers, paper and chemical pulp are produced in quantity. In addition, motor cycles and motor-cars, scooters, tractors and motor lorries are produced.

Hydro-electric power offers great possibilities in Austria. Much has already been done to develop it, and a long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1966 was 23,815 million kWh.

Minerals.—There are iron ore deposits and, in Eastern Austria, oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

	1968
	Budget (Schillings)
Ordinary Budget:	
Expenditure	82,737,000,000
Revenue	77,787,000,000
Extraordinary Budget:	
Expenditure	4,296,000,000

	1966	1967
Imports from U.K. . .	£40,784,000	£38,584,000
Exports to U.K.	27,799,000	41,743,000

Currency.—The unit of currency is the Schilling of 100 Groschen, reintroduced in December, 1945. The official rate of exchange (fixed in Nov. 1967) is 62·40 Austrian schillings = £1, at par.

CAPITAL. Vienna, on the Danube, population 1,636,600. Other towns are Graz (252,200), Linz (204,900), Innsbruck (108,699), Salzburg (117,383), and Klagenfurt (70,832).

FLAG.—Horizontal stripes of red, white, red, with eagle crest on white stripe.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Horace Anthony Claude Rumbold, Bt., K.C.M.G., C.B. (1967) £6,300
Counsellor (Commercial) and Consul-General, P. H. Scott.
1st Secretary, Hon. E. H. B. Gibbs (Head of Chancery). There are British Consular Offices at Vienna and Innsbruck.
British Council Representative, A. C. Hawkins, O.B.E., Freyung 1, Vienna 1.

BAHRAIN

Ruler. H. H. Shaikh Isa bin Sulman Al Khalifah, K.C.M.G., born 1932; acceded Dec. 16, 1961.

Bahrain consists of a group of low-lying islands situated halfway down the Persian Gulf some 30 miles off the east coast of Arabia. The largest of these, Bahrain Island itself, is about 30 miles long and 10 miles wide at its broadest. The two most important towns are Manama (79,098) and Muharraq (34,430). The latter is situated on a separate island of the same name which is connected with Bahrain Island by a causeway 1½ miles long. The population of the islands at the Census held in 1965 was 182,203, of whom about half belong to the Shia Sect, the remainder, including the ruling family

being Sunnis. There are 3,135 Europeans and Americans and 35,259 non-Bahrainis of whom about half are Iranians, Indians and Pakistanis. The standard of living is high among the large and influential merchant class and steadily rising among the lower social groups.

Bahrain enjoys a typical Persian Gulf climate with long, mild winters and an annual rainfall of about 3". Summer extends from May to October, with temperatures between 100° F and 115° F and humidity often approaching 100 per cent. The surrounding sea abounds in a variety of fish, and some of the best prawns in the world inhabit the warm sheltered waters.

The ruling family (Al Khalifah) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The state is administered under the Ruler by a number of departmental heads whose activities are co-ordinated by the Secretariat. A small Administration Council consisting of certain members of the ruling family and some heads of departments has been created by the Ruler to consider and advise on general matters; Health, Education, Port, Agriculture and Water Councils exist to advise the respective departments. Local government is the responsibility of six municipalities and the Rural Affairs Department which cares for the villages. Half of the members of four of the municipal councils (Manama, Muharraq, Riffaa and Hidd) are elected by the public and half nominated by the Government; all the members of the other two, which were created later (Sitra and Jidhafs) are nominated by the Government. In addition to the Department of Rural Affairs, there are a Department of Social Affairs, a Labour Department, Lands Department and Public Works Department. There is free primary and secondary education and free medical treatment. In 1963 work was started on the construction of a new town, Madinat Isa, which planned to rehouse nearly 18 per cent. of the population.

In earlier days the only industry was the pearl trade, of which Bahrain was an important centre, but this has declined since the advent of the cultured pearl and petroleum dominates the scene. Oil was discovered in 1932 and The Bahrain Petroleum Company, Limited (BAPCO), has its headquarters in Awali, some eleven miles from Manama. The company also operates a refinery and about 80 per cent. of the oil refined is piped from Saudi Arabia.

The second source of revenue is that of Bahrain's traditional *entrepot* trade. The island is conveniently situated to handle goods in transit to the mainland and it is estimated that not less than 70 per cent. of the imports unloaded at Bahrain were, up to a few years ago, destined for onward movement. A decline in this *entrepot* trade has, however, occurred as there is a growing tendency for eastern Saudi Arabia, Qatar and other places in the Gulf to import direct. This trend was reversed in 1966 when Bahrain re-exported 30 per cent. of its imports compared to the 27·2 per cent. in 1965. In 1967 this increased further to 32·4 per cent. To encourage the *entrepot* trade, free transit facilities were introduced in the port of Bahrain on January 1, 1958, and a new harbour, named the Mina Sulman after the late Ruler, was opened in May, 1962.

The principal imports and re-exports are household goods, foodstuffs, piece-goods, timber and building materials (especially cement), wearing apparel, vehicles and machinery.

Trade with U.K.

	1966	1967
Imports from U.K.	£7,636,000	£8,404,000
Exports to U.K.	5,636,000	2,868,000

Manama, the capital and commercial centre, extends for two miles along the northern shore of Bahrain Island and is a regular port of call for thirty steamship lines. Bahrain is also a port of call for B.O.A.C. and other international airlines, with a modern air terminal and facilities for jet air-lines. Banking services are provided by the Bank of Bahrain and by branches of the Eastern Bank, the British Bank of the Middle East and of the Arab Bank. There is a radio-telephone service to the United Kingdom and many other parts of the world. Electricity and water supply is available in all towns and most villages.

FLAG: Red, with vertical straight or serrated white bar next to staff.

CAPITAL, *ψ* Manama; population, 61,726. Secretary to the Government, G. W. R. Smith, M.B.E., H.M. Political Agent, A. D. Parsons, M.V.O., M.C. (1965).

Bahrain is the headquarters of H.M. Political Resident in the Persian Gulf, Sir Stewart Crawford, K.C.M.G., C.V.O (1966) £6,300

BELGIUM

(Royaume de Belgique.)

King of the Belgians, H.M. King Baudouin, K.G., born Sept. 7, 1930; succeeded July 17, 1951, on the abdication of his father, King Leopold III, after having acted as Head of the State since August 11, 1950; married Dec. 15, 1960, Doña Fabiola de Mora y Aragón.

Heir Presumptive, H.R.H. Prince Albert, born June 6, 1934, brother of the King; married July 2, 1959, Donna Paola Ruffo di Calabria, and has issue Prince Philippe Léopold Louis Marie, b. April 15, 1960; Princess Astrid Josephine-Charlotte Fabrizia Elisabeth Paola Marie, b. June 5, 1962; Prince Laurent, b. Oct. 20, 1963.

Ambassador Extraordinary and Plenipotentiary, His Excellency Baron J. van den Bosch (1965). Minister Counsellor, M. S. Frey. Counsellors, M. Pierre Van Coppenolle (Economic Affairs); M. Jan R. Blancquaert; M. Yves A. Vercauteren.

Naval, Military and Air Attaché, Lt.-Col. R. C. Close. 1st Secretary, M. P. M. J. A. C. Noterdaeme (Commercial).

Agricultural Attaché, M. Maurice Cammaerts, St. Margaret's Mansions, 51 Victoria Street, S.W.1. Attachés, Baron A. Guillaume; M. R. A. P. van Speybrouck; Mlle. F. van Haelewyck.

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, Dec. 31, 1966 (including Eupen and Malmedy) of 9,556,000. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxembourg, and on the W. by the North Sea.

Belgium has a frontier of 859 miles, and a seaboard of 41 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet at the Signal de Botrange, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an

increase in the Flemish population of almost 517,000 and in the Walloon population of about 100,000. Nearly all the inhabitants are Roman Catholics.

Government.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 4, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 175 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of March 31, 1968, returned to the Chamber of Deputies 69 Social Christians (Catholics), 59 Socialists, 47 *Parti de la Liberté et du Progrès* (Liberals), 20 *Volksunie*, 12 *Front Démocratique des Bruxellois Francophones* and *Rassemblement Wallon*, and 5 Communists, total 222. The Senate of 179 Members (plus H.R.H. Prince Albert) includes 53 Socialists, 37 *Parti de la Liberté et du Progrès* (Liberals), 14 *Volksunie*, 8 *Front Démocratique des Bruxellois Francophones* and *Rassemblement Wallon*, and 2 Communists.

Production.—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly averaged some 30,000,000 tons but which dropped to 17,495,000 tons in 1966 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1966 was 8,916,000 metric tons.

Education.—Schools are maintained by communal taxation, with provincial and state grants; many are under ecclesiastical control, Roman Catholic largely predominating. 642 secondary schools, offering a general education, are maintained by the State, 47 by local government authorities, while 687 are controlled by independent bodies (largely Roman Catholic) but are mainly eligible for state subsidies. Of primary schools, 457 are controlled by the State, 4,691 by local governments and 3,819 by independent authorities. The Universities of Ghent and Liège are state institutions; the Free University of Brussels and the Catholic University of Louvain are independent though largely subsidized by the State.

Language and Literature.—Flemish is spoken in the provinces of West Flanders, East Flanders,

Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxembourg, Liège and the southern half of Brabant. Legislation enacted on Feb. 15, 1962, provided for a fixed linguistic border between the Flemish-speaking and French-speaking areas of Belgium. Flemish is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. The City of Brussels and the University of Louvain are bilingual, though the latter is situated in a Flemish-speaking area. The linguistic border runs from a point south of Ypres and on the French frontier, to a point south of Brussels, then to a point north of Liège and east to the German frontier south of Aachen.

The literature of France and the Netherlands is supplemented by indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862–1949) was awarded the Nobel Prize for Literature in 1911. Emile Verhaeren (1855–1916) was a poet of international standing. Of contemporary Belgian writers, perhaps the most celebrated is Georges Simenon (born at Liège in 1903). There are 72 daily newspapers (French, Flemish and some German) in Belgium.

FINANCE 1968

Revenue (Ordinary Budget estimate).....	B.Fr. 240,602,000,000
Expenditure (Ordinary Budget estimate).....	240,748,000,000
Budget Estimate Extraordinary:	

Revenue.....	587,000,000
Expenditure.....	31,186,200,000

The unit of currency is the Belgian franc. On June 28, 1968, the Bank of England official rate of exchange was 119 francs = £1. (See also p. 83.)

TRADE

	1966	1967
	('000 Francs)	('000 Francs)
Total Imports.....	358,700,767	358,795,000
Total Exports.....	341,450,263	351,621,000

Trade with U.K.

	1966	1967
Imports from U.K. £180,797,000	£177,496,000	
Exports to U.K... 128,794,000	143,120,000	

COMMUNICATIONS.—On Dec. 31, 1967, there were 4,336 kilometres of normal gauge railways operated by the Belgian National Railways, of which 1,078 kilometres were electrified; the length of light railways operated in 1965 was 582 kilometres (of which 558 were electrified). Belgian National Railways also operate 6,863 kilometres of regular bus routes. Other operators run 13,224 km. of bus routes. On Dec. 31, 1967, there were 1,117,846 telephone subscribers in Belgium.

Ship canals include Ghent-Terneuzen (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825–27) which, under the terms of an agreement signed by the Belgian and Netherlands Governments is being improved to permit the passage to Ghent of ships up to 50,000 tons; Roussel (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and Bruges (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The Albert Canal (79 miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. The modernization of the port of Antwerp begun in 1956 is now well advanced.

Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal is being widened or deepened to take barges up to 1,350 tons. These improvements were expected to involve a total cost of £78,500,000.

There are 10,443 kilometres of State roads of which 3,18 km. are motorways, 1,241 kilometres of provincial roads and 11,925 km. of roads which are the responsibility of the communes. Most of the maritime trade of Belgium is carried in foreign shipping, the mercantile marine consisting (1967) of 93 vessels (835,371 tons), in addition to which there are 358 fishing boats (30,707 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, as well as overseas services to the United States, the Congo and the U.S.S.R. A passenger and mail-carrying helicopter service the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

CITIES AND TOWNS.

The Capital, BRUSSELS, had a population (Dec. 31, 1967) of 1,079,181 (with suburbs). Other towns are ♀ Antwerp, the chief port (657,485); ♀ Ghent (232,915), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (452,713), the centre of the iron industry, and Charleroi (283,426), the important coal-mining and metallurgical centre; ♀ Bruges (105,715); ♀ Ostend (57,359); Malines (65,474). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, 1 hr.

NATIONAL FLAG.—Three vertical bands, black, yellow, red.

BRITISH CHAMBER OF COMMERCE. 204 Rue Royale, Brussels.

BHUTAN

King of Bhutan, Jigme Dorji Wangchuk, born 1929; succeeded his father, March, 1952.

Bhutan (area, about 18,000 sq. miles; pop. (1966) about 750,000, mainly Buddhists) is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a Protectorate of the Republic of India (For MAP, see p. 745). In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 as compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. A motor road runs 107 miles from Paro, the winter capital, to Phuntsholign in W. Bengal. Three other roads linking Bhutan with India are under construction or projected. The Prime Minister of Bhutan, Lhendup Dorji, succeeded his brother on July 25, 1964. The Government of India has a diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

CAPITAL, Punakha.

BOLIVIA

(República de Bolivia)

President, General Rene Barrientos Ortuño, elected July 3, 1966; inaugurated Aug. 6, 1966.

BOLIVIAN EMBASSY IN LONDON

106 Eaton Square, S.W.1.

[01-235-4248]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Roberto Querejazu Calvo (1966).

Consulate, 106 Eccleston Mews, S.W.1.

Minister-Counsellor, Sr. Carlos Hanhart (Commercial).

Counsellor, Sr. Carlos Peñaranda Ipiña (Economic).

2nd Secretary, Sr. Gonzalo Bilbao La Vieja.

There are Bolivian Consular Offices in Liverpool, Birmingham, Hull, Cardiff and Glasgow.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W. It has an area estimated at 475,000 square miles; with an estimated population (1967) of 4,336,900. (For MAP, see p. 829.) The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

Bolivia came under military rule in November, 1964, when a Junta took over by force from the National Revolutionary Movement which had been in power for twelve years. The National Congress was suspended and Dr. Victor Paz Estensoro who had been three times President went into exile in Lima. The former Commander-in-Chief of the Air Force, General Barrientos, who had been Vice-President during Dr. Paz's third term of office, became President with a Cabinet consisting entirely of service officers. General Ovando, until then Commander-in-Chief of the Armed Forces, joined Barrientos as Co-President on May 26, 1965, with General Barrientos taking over joint responsibility at the same time for the Armed Forces. The present régime has abolished the 1961 Constitution which was promulgated by the N.R.M. and returned to that of 1947. In January, 1966, General Barrientos resigned as Co-President in order to stand as a constitutional Presidential candidate and won a substantial victory in the elections which were held on July 3. In July, 1968, following a

Cabinet crisis, Bolivia returned to military government under President Barrientos.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Iténez, Beni, Mamore and Madre de Dios.

Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosí are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaya, the largest in the world, 25,522 tons being produced in 1966; copper, antimony, lead, zinc, asbestos, wolfram, bismuth, salt and sulphur are found, and petroleum is also produced.

The Republic has been self-supporting in most petroleum products since January, 1954. Production of crude oil in 1967 totalled 15,715,518 barrels (of 42 U.S. gallons), of which 9,169,892 barrels were exported. Its agricultural produce consists chiefly of rice, barley, oats, wheat, sugar-cane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, etc. Manufactures are in a very undeveloped state.

There are 2,200 miles of railways in operation including the lines from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312 miles). There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosí, and from Potosí to Sucre, the legal capital. The Antofagasta (Chile) and Bolivia Railroad was formerly an all-British concern, but the Bolivian sector has now been nationalized. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial aviation in Bolivia is conducted by Braniff International Airways (American), Lufthansa, Aerolineas Argentinas, and Lloyd Aereo Boliviano (Bolivian), the three former providing international connections with U.S.A., West coast South American countries, Canal Zone and Argentina; Lloyd Aereo Boliviano, maintaining a service to Lima and São Paulo and attending to local flights, links with La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones and Antofagasta by the "Pacific War" of 1879-1882.

Language and Literature.—The official language of the country is Spanish, but many of the Indian inhabitants (about two-thirds of the population) speak Quechua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion was disestablished in 1961 but relations between it and the State are good. Elementary education is compulsory and free and there are secondary schools in urban centres. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are six other universities, the largest being the University of

San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are twelve principal daily newspapers in Bolivia, with an estimated daily circulation of 150,000.

FINANCE

The Budget for 1968 showed estimated revenue of \$84,352,225,973; estimated expenditure, \$84,415,956,000; deficit \$63,730,238.

On December 15, 1956, the *Boliviiano* was made freely convertible for all purposes without restriction and from Jan. 1, 1963, the *Boliviiano* is replaced by the *Peso Boliviiano* at the rate of Bs. 1,000=Peso 1 (\$8.1). Exchange rate (1968): \$828.45 = £1. (See also p. 83.)

Trade with U.K.

	1966	1967
Imports from U.K. .	£1,712,000	£1,684,000
Exports to U.K.	22,338,000	23,796,000

The principal exports are tin (most of which is exported to the U.K.), lead and antimony ores, silver, copper, wolfram, zinc, gold, nuts, hides and skins, vicuña wool and coffee. The chief imports are wheat and flour, sugar, iron and steel products, machinery, vehicles and textiles.

SEAT OF GOVERNMENT, La Paz. Population (estimated 1966) 461,000. Other large centres are Cochabamba (116,000), Oruro (90,000), Santa Cruz (99,000), Potosí (65,000). Sucre, the legal capital and seat of the judiciary (58,000) and Tarija (24,000).

FLAG: Three horizontal bands; Red, yellow, green; device on yellow band.

NATIONAL DAY.—August 6 (Independence Day).

Consul-General, Sr. J. G. Lampreia.

Deputy Consul, Sr. P. M. Polzin.

Vice-Consul, Sr. M. C. Magnavita.

There are also a Brazilian Consulate-General at Liverpool and Consular offices at Newcastle upon Tyne, Cardiff and Glasgow.

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles with a population (estimated 1967), 87,000,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra da Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolomi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paraná*, between Goiás and Minas Gerais, the *Serra dos Aimorés*, which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia, Branca* and *Araripe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from the Plateau of Mato Grosso and the

mountains of Goiás to the Gulf of Pará. The Parnaíba flows from the encircling mountains of Piauí into the Atlantic. The São Francisco rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The Paraguai, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the Parán, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguassú or Iguazu, which unites with the Upper Parán at the Brazil-Argentine-Paraguay boundary, are the majestic Falls of the Iguassú (200 ft.), and on the São Francisco are the no less famous falls of Paulo Afonso (260 ft.).

Government.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getúlio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a coup d'état of Nov. 10, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 28, 1946, the Estado Novo established by Vargas was superseded

by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1960, elections took place in which Sr. Jânio Quadros was elected President to succeed Dr. Kubitschek. Sr. Quadros resigned in August, 1961, and was succeeded by the Vice-President, Sr. Goulart.

As a result of a referendum held on Jan. 6, 1963, the Ato Adicional instituting the office of Prime Minister was revoked. President Goulart after an indecisive period of government, during which he frequently changed his ministers, was deposed on April 1, 1964, by a revolt which originated in the States of Minas Gerais and São Paulo. Sr. Ranieri Mazzilli, President of the Chamber of Deputies, became President of the Republic in accordance with the Constitution. Shortly afterwards, Congress elected Marshal Humberto Castelo Branco to the Presidency. He assumed office on April 15. President Castelo Branco appointed a non-party cabinet of ministers most of whom possessed some experience in their respective fields.

By stringent measures this government sought, with some success, to restore the economy, political stability and administrative discipline. Marshal Arthur da Costa e Silva assumed the Presidency on March 15, 1967, with a new team of ministers.

Following the 1964 Revolution new legislation was decreed giving the executive extensive powers

and in March, 1967, a new Constitution, replacing that of 1946, came into effect. This incorporated much of the legislation of the Revolutionary Government. The system of indirect Presidential elections was maintained, while the President's powers were increased at the expense of Congress and those of the Federal Government at the expense of the States.

Production.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is still exploited to a limited extent only. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. The estimated production of iron ore in 1967 was 23,254,386 metric tons. Oil production in 1967 was 10,253,176 cubic metres. Coal production in 1967 was estimated at 3,380,420 metric tons. 3,580,206 metric tons of steel ingots and 19,756,046 barrels of refined petroleum products were produced in 1967.

Licences for new foreign investments amounting to U.S.\$4,068,000 were issued in 1966, bringing the total since 1955 to U.S.\$539,556,000.

In 1967 the Brazilian automobile industry produced 2,858 heavy lorries and buses; 170,388 passenger and cargo trucks; 27,783 light lorries; 8,140 utility vehicles. Also 4,000 light, 2,750 medium and 2,300 heavy tractors.

The main exports of agricultural produce in 1967 were:

	Metric Tons	Value \$U.S.
Coffee	1,004,250	704,715,000
Cotton	189,442	111,004,000
Cocoa beans.....	114,351	50,731,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

Defence.—The peace-time strength of the Army ■ 150,000 of which some 80 to 100,000 are doing military service, with ■ immediate reserve of 250,000. The Navy consists of ■ Aircraft Carrier, ■ Cruisers, 18 Destroyers and Escorts, 2 Submarines, 4 Minesweepers, 6 Survey Vessels, 10 Corvettes (tugs) and 4 naval transports. The strength of the Navy is 55,000 including marines. The Marine Corps strength is over 10,000. The Air Force, with a strength of 35,000, including approximately 2,500 pilots and aircrew, has 600 aircraft and is the largest in South America.

Education.—Primary education is compulsory and is the responsibility of State governments and municipalities. At this level approximately 12 per cent. attend private schools. In 1967 12,080,000 children were enrolled in primary schools of all types.

Secondary education is largely the responsibility of the State and Municipal Governments, although ■ small number of very old foundations (the Pedro II Schools) remain under direct Federal control. Over 50 per cent. of all pupils at this level attend Private Schools.

In 1965 ■ total of 2,154,530 pupils were enrolled in all types of Secondary School—1,645,320 following the basic 4 year course and 509,110 the 3 year superior course leading to university entrance standard. Of this grand total 1,553,699 were in Academic Secondary Schools, 288,351 in Commercial Schools; 79,230 in Technical Schools; 12,878 in

Agricultural Schools; and 220,272 in Normal Schools (for Primary Teacher Training). The total Secondary enrolment figure for 1967 is 2,707,000 but no breakdown into individual types of school is yet available.

In 1967 total of 174,604 students enrolled for courses in 37 Federal and State Universities and other establishments offering courses at university level. In 1965 there were ■ total of 1,280 Faculties half of which were within universities, the remainder being independent. Of this grand total, 604 were privately run.

Language and Literature.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

Communications.—In 1964 there were about 34,630 kilometres of railways in service, largely of 1 metre gauge, but including some 4,000 kilometres of other gauges. Traffic carried in 1965 was—Passengers, 363,215,000; Freight, 28,977,900 metric tons; Livestock, 2,118,000 head. During 1965 the ports of Rio de Janeiro and Santos were used by 5,902 vessels representing 27,098,000 registered tons.

Varig of Brazil and nine foreign airlines operate services between Brazil and Europe, 3 between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country. During 1966, 2,220,092 passengers passed through Brazilian airports; 29,171 tons of cargo were transported and 3,532 tons of mail. The airports of Rio de Janeiro and São Paulo alone recorded 57,542 aircraft arrivals and departures in 1966.

Postal facilities in Brazil include approximately 5,750 post offices and 50,000 miles of telegraph. In 1959, 874,000 telephones were in use, of which ■ large proportion are dial operated.

	FINANCE	
	1966	1967
	New Cruzeiros	New Cruzeiros
	'000	'000
Revenue.....	4,678,907	6,683,844
Expenditure.....	4,719,085	6,943,198

The total internal debt of the Union in 1966 amounted to NCrs. 169,728,400; States (1965) NCrs. 71,085 (estimated). The average for the year 1967 of the free market exchange rate was NCrs. 2·21 = \$U.S.1 or NCrs. 6·21 = £1. On June 30, 1968, rates stood at NCrs. 3·22 = \$U.S.1 or NCrs. 7·68 = £1. (See also p. 83.)

	TRADE (1966)
Total Imports.....	\$U.S.1,667,429,000
Total Exports.....	\$U.S.1,654,037,000

*Converted at official exchange rate.

	Trade with U.K.	
	1966	1967
Imports from U.K. .	£16,906,000	£19,633,000
Exports to U.K....	31,545,000	26,556,000

The principal imports are fuel oils, machinery, wheat, chemicals, industrial raw materials and newsprint. The principal exports are coffee (about 70 per cent. of the total value of exports), cocoa, timber, iron ore, sugar, fruit, tobacco, wax, hides and skins and fibre.

CAPITAL.—Brasilia (inaugurated on April 21, 1960). Population (estimated 1967), 300,000. Other important centres are São Paulo 3,850,000; the former capital ♀ Rio de Janeiro, with a population (est. 1960) of 3,288,000; ♀ Recife (Pernambuco) 784,000; ♀ Salvador (Bahia) 656,000; ♀ Porto Alegre (Rio Grande do Sul) 643,000; ♀ Belo Horizonte (Minas Gerais) 600,000; ♀ Fortaleza (Ceará) 514,000; Curitiba (Paraná) 362,000; ♀ Niterói (Rio de Janeiro) 245,000.

FLAG.—Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Peter Voutou (1966).

Counsellors, Lubomir Zhelyaskov; Maurice Assa (Commercial).

Military, Naval and Air Attaché, Col. Ivan G. Kochovski.

1st Secretaries, Vladimir Pchelarov (Economic); Mrs Raina E. Georgieva.

2nd Secretaries, Bogomil Guerassimov; Georgi Shkutov.

3rd Secretary, Zhivko Popov (Consular).
Commercial Attaché, Ivan Ivanov.

The Republic of Bulgaria is bounded on the north by Rumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population in December, 1967, of 8,334,000. The largest religion of the Bulgarians is the Bulgarian Orthodox Church. For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the Treaty of Neuilly, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The

Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a coup d'état gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

Government.—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465. According to the present Constitution the legislature is a single chamber National Assembly or *Skobranie* elected by adult suffrage on the basis of one deputy to every 20,000 inhabitants for a maximum term of four years. The opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 11, 1948.

Production.—Bulgaria is predominantly an agricultural country, but is engaged upon an elaborate programme of industrialization. About 90 per cent. of the country's agriculture has been turned over to co-operatives, and a smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The live-stock includes cattle, sheep, goats, pigs, horses, asses, mules and water buffaloes.

There is now a substantial engineering industry producing *inter alia* machine tools, electric trucks of all kinds, agricultural machinery, cranes, electric motors and electronic components, which accounts for about a third of Bulgaria's exports; and considerable production of lead, zinc and copper (1965, 93,421 tons; 65,764 tons and 49,100 tons respec-

tively). Also in 1965 a production of 10,244,000,000 kw. of electricity, 588,000 tons of steel, 26,300,000 tons of coal (of which, however, 24,000,000 tons is soft coal) was claimed.

There are mineral deposits of varying importance. Bulgaria's heavy industry includes the Kremikovtsi Metallurgical Plant near Sofia, whose first blast furnace, with an annual output of 560,000 tons, was put into operation in 1963, the petrochemical plant at Burgas with an annual capacity of 2 million tons of processed oil, a nitrogenous fertilizer plant, and other chemical and metallurgical works.

Defence.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 120,000 strong.

Education.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1965-66 there were 1,612 elementary schools, 87 secondary schools, 3,073 combined elementary and secondary schools, 131 grammar schools (gymnasiums), 157 schools for all levels and 329 vocational training schools; there were 1,630,741 pupils and 79,077 teachers.

There are 26 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1965-66 there were stated to be 84,467 students at higher educational establishments.

Language and Literature.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic. In 1967 there were 8 daily newspapers in Sofia.

Finance.—Budget revenue in 1967 was estimated at leva 4,078,000,000; expenditure leva 4,063,000,000. Currency of Bulgaria is the lev, the rate of exchange in 1967 being approximately leva 3·28 = £1 for commercial and 5·60 = £1 for all other transactions (including the purchase of currency by tourists and visitors). For 1968 rate, see p. 83.

TRADE.

The principal imports are industrial and agricultural machinery, industrial raw materials, machine tools, chemicals, dyestuffs, drugs, rubber, paper. The principal exports are cereals, tobacco, fruit, vegetables, livestock, oil seeds, oils, fats, textiles, eggs, chemicals, essential oils including attar of roses, hardwoods, non-ferrous metals, electric trucks and motors, pumps, ships, accumulators and simple machine tools. In 1964, 80 per cent. of Bulgaria's foreign trade was with the Soviet bloc, including 53 per cent. with the Soviet Union.

Trade with U.K.

	1966	1967
Imports from U.K. . . .	£7,413,000	£6,137,000
Exports to U.K. . . .	6,176,000	6,292,000

CAPITAL.—Sofia, Pop. (1967), 858,876, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of Varna (119,769) and 125 miles from Lom (23,015), on the Danube; Burgas (72,795) is also a Black Sea Port, those on the Danube being Ruse (83,472), Svishtov (18,537), Vidin (23,984). Other important trading and industrial centres are Plovdiv (162,518) and Pleven (57,758).

FLAG.—3 horizontal bands, white, green, red; national emblem on white stripe near hoist.

NATIONAL DAY.—Sept. 9 (Day of Freedom).

BRITISH EMBASSY

Residence, 69 Boulevard Tolbuhin, Sofia.
Ambassador Extraordinary and Plenipotentiary, His Excellency Desmond John Chetwode Crawley, C.M.G., C.V.O. (1966) £5,375

 3rd Secretary, P. M. H. Young.

BURMA**Republic of the Union of Burma***Revolutionary Government**Chairman and Member for Defence*, General Ne Win.**BURMESE EMBASSY AND CONSULATE**19A Charles St., Berkeley Square, W.1.
[01-499-8841]*Ambassador*, His Excellency U Ba Saw (1968).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between $9^{\circ} 58'$ and $28^{\circ} 0'$ latitude and $92^{\circ} 11'$ and $101^{\circ} 9'$ E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west and a frontier with Pakistan along the Naaf River, defined in 1964 by a Memorandum of Agreements, and India to the north-west defined in 1967; in the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and has since been demarcated; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. (*For MAP, see p. 745*). The total area of the Union is about 262,000 square miles, with an officially estimated population of 25,811,000 in 1967—about 99 persons to the square mile.

Political Divisions.—The Union of Burma comprises Burma proper (at about 145,000 sq. miles by far the largest unit), administered direct by the Central Government, and also the Shan State (60,155 sq. miles), Kachin State (34,379 sq. miles), Kawthoole (formerly Karen) State (11,731 sq. miles) and Kayah State (4,529 sq. miles) each with its own State Government. There is also the Special Division of the Chins (13,907 sq. miles).

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (10,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Thai groups. The three important non-indigenous elements are Indians, Chinese and Pakistanis. Numbers of resident foreigners have shown a sharp decline in recent years. Burmese is the official language, but minority languages include Shan, Karen, Chin, and the various Kachin dialects.

English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma became an independent republic outside the British Commonwealth on January 4, 1948. It was a bicameral parliamentary democracy with an elected Head of State. For the first ten years of independence the ruling party was the Anti-Fascist People's Freedom League under the Leadership of U Nu. After a split in the A.F.P.F.L. in 1958, General Ne Win and his Caretaker Government were invited to take office. General Elections in February, 1960, resulted in a victory for U Nu's new party, the Union Party (161 out of 250 seats).

On March 2, 1962, the army staged a coup d'état, abolished parliament, suspended the Constitution and imprisoned most of the Cabinet. The Revolutionary Council of senior officers under General Ne Win have since taken a number of measures to establish state socialism in Burma in line with the policy statement "The Burmese Way to Socialism". A new political party, the Burma Socialist Programme Party, is being established to take over the government under a one-party system. The problem of insurgency (minority and Communist groups) remains an important one for the country.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade.

Under the University Education Law of 1964, the Government reorganized the higher education system to encourage the expansion of medical and technical studies. The four existing Universities (Rangoon, Mandalay, Moulmein and Bassein) have been decentralized and the faculties of Medicine (at present there are 2 Medical Institutes in Rangoon and one in Mandalay), Economics, Engineering, Agriculture, Veterinary Science and Education have been reconstituted as independent Institutes. The remaining faculties are grouped together as the Arts & Science University of the city concerned.

There are teachers' training colleges in Rangoon, Moulmein and Mandalay which train junior assistant teachers and 8 State Teachers Training Institutes for primary assistant teachers. The Institute of Education in Rangoon trains senior assistant teachers and awards degrees. There are three Government technical institutes at Insein (near Rangoon), Mandalay and Kalaw. There are 5 technical high schools, 2 in Rangoon, 1 in Mandalay, 1 in Maymo and 1 in Taunggyi. Under the Colombo Plan, New Zealand has financed the construction of a school at Taunggyi at a cost of £100,000 sterling and Britain has provided the school with equipment valued at £45,000. There is an industrial trade school in Aungsannmyo.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1967-68 were: Revenue, K.9,253,000,000; Expenditure, K.9,195,000,000.

Production, Industry and Commerce.—Three-quarters of the population depend on agriculture; the chief products are rice, oilseeds (sesame and groundnut), maize, millet, cotton, beans, wheat and grain. Rice is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being derived from 12,000,000 acres or 70 per cent. of the country's total cropped area.

The pre-war yearly average of rice exports was over 3,000,000 tons, but has declined in recent years and exports in 1966-67 amounted to 590,794 tons, including by-products. The net area sown to all crops in 1966-67 was 21,404,209 acres and reserved forests covered 22,308,880 acres. The principal export after rice is teak, of which some 200,000 tons were exported annually before the war. The 1966-67 figure was 100,000 tons. Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum products are the most important. Production of crude oil in 1966-67 totalled 15,300,000 gallons. There is a refinery at the main oilfield, Chauk, and another at Syriem near Rangoon. Their combined output of petroleum products is sufficient for most of Burma's needs. The production and distribution of petroleum and the importation of oil products is a monopoly of the People's Oil Industry (formerly Burma Oil Company (1954), Ltd.) which is now fully owned by the Government of Burma.

Under the Government's development plan, a cement plant, a brick and tile factory, a steel rolling mill, a jute bag and twine mill, two cotton spinning and weaving mills, a pharmaceutical plant, a large hydro-electric scheme and three sugar factories are in production. A paper factory and a textile mill are being constructed with the loan of £30,000,000 from China and a glass factory and a fertilizer factory are being constructed with a West German loan of £3,150,000. Under an agreement of January, 1964, Japan will make available to Burma £50,000,000 over 12 years, commencing in 1965. Commercial loans totalling £10,700,000 will be offered over 6 years at 6 per cent. interest.

Trade with U.K.

	1966	1967
Imports from U.K.	£8,110,000	£6,375,000
Exports to U.K.	5,199,000	3,235,000

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries and through the specialized agencies of the United Nations.

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

The chief seaports are Rangoon, Moulmein, Akyab and Bassein. Transit from London to Rangoon: by sea, 26-35 days; by air, 18 hours.

The Burma Railways had a total length in 1940 of 2,059 miles, extending to Myitkyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and a further 50 French and West German diesel-electric locomotives have been purchased with a recent World Bank loan. There are about 5,472 miles of main roads. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles international traffic.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1967), 1,616,948.

Mandalay, the chief city of Upper Burma, had a population of 316,796 in 1966, Moulmein of 156,968 and Bassein of 90,006. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

FLAG.—The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars.

NATIONAL DAY.—January 4.

2nd Secretary, Miss C. Swann (Consul).

BURUNDI.

(Republic of Burundi)

President, Col. Micombero Michel, assumed office, Nov. 28, 1966.

Formerly a Belgian trusteeship under the United Nations, Burundi was proclaimed an independent State on July 1, 1962. Situated on the east side of Lake Tanganyika, the State has an area of 10,747 sq. miles and a population (estimated, 1965) of 3,000,000. There are some 2,500 Europeans and 1,500 Asians. The population is mainly of the Bahutu and Batutsi tribes.

Burundi became independent as a Constitutional monarchy, but this was overthrown on November 28, 1966. The Constitution and Parliament were also abolished. The President rules through a Cabinet of Ministers and the UPRONA party apparatus. All the Governors of the eight Provinces are Army officers. Burundi is a one-Party State.

The chief crop is coffee, much of which is exported to the United States, and cotton is also grown. Hides and skins exports are also important. Joint economic arrangements of Burundi with Ruanda ended in 1964 and each country now has its own national bank, coffee organization, etc.

The currency is the Burundi franc. The rate of exchange is Fr. Bu. 210 = £1. Government expenditure in 1967 amounted to Fr. Bu. 1,650,000,000 and revenue Fr. Bu. 1,550,000,000.

In 1967 Burundi exported goods worth Fr. Bu. 1,455,600,000 and imported goods worth Fr. Bu. 1,496,700,000 in the same period. Burundi imported British goods to the value of £135,000 in 1967 and exported goods valued at £1,169,000 to the United Kingdom.

CAPITAL.—Bujumbura (formerly Usumbura), with about 70,000 inhabitants. Gitega (7,000 inhabitants) is the only other sizeable town. Official languages are Kirundi, a Bantu language, and French. Kiswahili is also used.

FLAG.—White diagonal cross on green and red quarters, with a circular white panel in the centre.

NATIONAL DAY.—July 1.

British Ambassador, His Excellency John Richard Cotton, C.M.G., O.B.E. (1967) (resident at Kinshasa, Congolese Republic).

Hon. British Consul, J. Hussey, P.O. Box 1750, Bujumbura.

CAMBODIA

(Kampuchea)

Queen-Dowager (symbol of the Throne), Her Majesty Kossamak Nearirat, widow of King Norodom Suramarit (died April, 1960). Head of State, Prince Norodom Sihanouk (June, 1960).

A Government headed by Samdech Penn Nouth took office on May 1, 1968.

CAMBODIAN EMBASSY
26 Townshend Road, N.W.8
[or-722-8011]

Ambassador (resident in Paris).
Minister Plenipotentiary, His Excellency Ly Chinly
(*Chargé d'Affaires*).
Attaché, M. Pheng Son.

Area and Population.—A kingdom with an area of some 70,000 square miles and a population of 6,300,000 (1967), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam. (*For MAP, see Index.*)

History.—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. Full independence was proclaimed on November 9, 1953. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. All governments since then have been drawn from the Popular Socialist Community (*Sangkum Reastr Yum*), a movement formed by Prince Norodom Sihanouk who abdicated in March, 1955, in favour of his parents, King Norodom Suramarit and Queen Kossamak.

The Community holds all 82 seats in the National Assembly as a result of the last general elections which were held in September, 1966. Following the death of King Norodom Suramarit in April, 1960, a Council of Regency was in being until June, when Prince Norodom Sihanouk assumed office as Head of State. In November, 1963, Prince Sihanouk announced the ending of U.S. aid and the nationalization of foreign trade and banking. Diplomatic and consular relations between Cambodia and U.S.A. were broken off in May, 1965.

Geography, Economy and Communications.—Cambodia has an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber are the main exports. Fifty per cent. of the total land area is forest or jungle abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has over 5,000 kilometres of roads, of which nearly half are hard-surfaced and passable in the rainy season. There are two railways. One runs from Phnom-Penh to the Thai border; the other, from Phnom-Penh to Kampot, is being extended to Sihanoukville. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. The main installations of a deep water port at Sihanoukville on the Gulf of Thailand have been completed and can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway. There is as yet no large-scale industry, but textile mills and plywood, cement and paper factories have been constructed with Chinese aid and a sugar factory financed by Czechoslovakia has started production. Jute, bottle and tyre factories, and a lorry and

tractor assembly plant have been set up and an oil refinery and a brewery are under construction. Cambodia receives foreign aid from China, France, the Soviet Union, and members of the Colombo Plan. Since 1956, Cambodia has sought to increase her foreign trade by the conclusion of trade exchange and payments agreements with several countries, including China, Poland, Czechoslovakia, Rumania, North Vietnam, Yugoslavia, the United Arab Republic, Laos and Japan.

The Cambodian airline, Royal Air Cambodia, operates services to Saigon, Singapore, Canton and Hong Kong, also to Siemreap where the famous ruins of Angkor are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

Religion and Education.—The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese (400,000) and Vietnamese (500,000) minorities. The national language Cambodian (*Khmer*), although French is widely spoken and is still largely the official language of government and commerce. Considerable efforts are now being devoted to the development of education and new schools, colleges and technical institutes have been established. A Buddhist University has been inaugurated in Phnom-Penh, where there are also Faculties of Arts, Medicine and Law, and a Technological Institute. Several residential teachers' training colleges are now in operation.

Trade with U.K.

	1966	1967
Imports from U.K.	£1,359,000	£1,494,000
Exports to U.K.	208,000	692,000

CAPITAL, Phnom-Penh. Population (estimated, 1967), 600,000.

FLAG.—Horizontal stripes of blue, wide red stripe bearing emblem (Temple of Angkor Wat in white), and blue. **NATIONAL DAY.**—November 9.

CAMEROON REPUBLIC

(Federal Republic of Cameroon)

President, Ahmadou Ahidjo, elected for 5 years, May 5, 1960; re-elected for 5 years, May 7, 1965.
Vice-President, John Ngu Foncha.

CAMEROON EMBASSY
84 Holland Park, W.11.

[or-727-0771]

Ambassador Extraordinary and Plenipotentiary, Excellency Lucas Zaa Nkweta (1965).
Counsellors, D. I. E. Namme; P. T. Bilao; J. B. Etame (Commercial); V. Ndiba (Cultural).

The Federal Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west, Chad and the Central African Republic to the east and Congo and Gaboon to the south. (*For MAP, see p. 836.*) It has an area of approximately 183,381 sq. miles (432,000 sq. km.) and a population estimated (1964) at 5,550,000 (W. Cameroon 1,080,000). Principal products of East Cameroon are cocoa, coffee, bananas, cotton, timber, ground-nuts and aluminium; of West Cameroon, bananas, rubber, timber, cocoa and palm products. There is an aluminium smelting plant at Edéa in East

Cameroon with an annual capacity of 50,000 tons. Total trade of the Federal Republic in 1965 was approximately. Exports, £54,000,000; Imports, £55,000,000.

Trade with U.K.

	1966	1967
Imports from U.K.....	£2,222,000	£2,001,000
Exports to U.K.....	2,620,000	1,475,000

The whole territory was administered by Germany from 1884 to 1916. From 1916 to 1959, present-day East Cameroon was administered by France as a League of Nations (later U.N.) trusteeship. On Jan. 1, 1960 it became independent as the Republic of Cameroon. The Republic was joined on October 1, 1961, by the former British administered trust territory of the Southern Cameroons (now West Cameroon), after a plebiscite held under United Nations auspices. The Federal government consists of President, Vice-President and 9 Federal Ministers. There are separate East and West Cameroon state governments.

CAPITAL.—Yaoundé (120,000). ♀ Douala (200,000), is an important commercial centre.

FLAG.—Vertical stripes of green, red and yellow with two five-pointed stars in upper half of green band.

NATIONAL DAY.—January 1 (Independence Day).

Archivist, C. A. Willeard.

CENTRAL AFRICAN REPUBLIC

President, Colonel Bedel Bokassa, assumed office, Jan. 1, 1966.

Formerly the French colony of Ubangi Shari, the Republic lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has a common boundary with the Republic of Chad in the north and with the Congolese Republic in the south. The Republic has an area of about 234,000 sq. miles and a population estimated (1967) at 2,900,000. On December 1, 1958, Ubangi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960. The first President of the Central African Republic, M. David Dacko, held office from 1960 until Jan. 1, 1966, when he was replaced by Col. Bokassa after a coup d'état. Imports from U.K., 1967, £369,000; Exports to U.K., £377,000.

CAPITAL.—Bangui, near the border with the Congolese Republic (238,000).

FLAG.—Four horizontal stripes, blue, white, yellow, green, crossed by central vertical red stripe; a yellow star in centre of blue half-stripe next staff.

British Ambassador, His Excellency Alan John Edden, C.M.G. (1966) (Resident at Yaoundé, Cameroon).
1st Secretary and Consul, A. B. Moore (resident at Yaoundé).

CHAD REPUBLIC

President, François Tombalbaye, elected August 11, 1960.

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by the Kingdom of Libya in the north, by the Sudan on the east and by the Central African Republic on the south. (For MAP, see p. 910). It has an area of 487,920 sq. miles and a population estimated at 3,400,000. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960. On April 14, 1962, a new Constitution was adopted for a presidential-type regime. Mr. Tombalbaye accepting the formal title of President on April 23, 1962.

Imports from U.K. in 1967 were valued at £140,000.

CAPITAL.—Fort Lamy, south of Lake Chad (45,600).

FLAG.—Vertical stripes, blue, yellow and red.
British Ambassador, His Excellency Alan John Edden, C.M.G. (1966) (Resident at Yaoundé, Cameroon).

CHILE

(República de Chile)

President (1964-70), Eduardo Frei, G.C.B., born 1911, elected Sept. 6, 1964; assumed office Nov. 4, 1964.

CABINET.

Minister of the Interior, Bernardo Leighton Guzman.
Foreign Affairs, Gabriel Valdés Subercaseaux.

Finance, Andrej Zaldívar.

Education, Maximo Pacheco.

Health, Dr. Ramón Valdivieso Delauney.

Public Works, Sergio Ossa Pretot.

Labour, Eduardo Leon.

Economy, Juan de Dios Carmona.

Mines, Alejandro Hales Jamarine.

Defence, Gen. Tulio Marambio.

Justice, William Thayer Artega.

Housing, Juan Hamilton Depassier.

Lands and Colonization, Victor Gonzales Martens.

EMBASSY AND CONSULATE IN LONDON

3 Hamilton Place, W.1.

[Mayfair: 8382]

Ambassador in London, His Excellency Sr. Don Victor Santa Cruz, G.C.V.O. (1959), 92 Eaton Place, S.W.1.

Minister-Counsellors, Sr. don Alejandro Jara; Sr. don Sergio Figueroa.

Naval Attaché, Capt. G. Thornton (Naval Attaché's Office: 01-629-8384).

Air Attaché, Lt.-Col. (Air) Eduardo Fernet.

1st Secretary, Sr. Don Germán Carrasco.

2nd Secretaries, Sr. Gonzalo Guerra; Sr. Don Raul Schmidt (Consular).

Asst. Naval Attaché, Cdr. Roberto Saldivia.

Civil Attachés, Rear-Adm. Don Calixto Rogers;

Sr. Ignacio Cox.

Cultural Attaché, Sr. Don Fernando Debesa.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 50' S., and long. 66° 30' and 75° 48' W.

Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid. (For MAP, see p. 820).

Among the island possessions of Chile are the *Juan Fernandez group* (3 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (*Robinson Crusoe*) shipwreck. *Easter Island* (27° 8' S. and 109° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with an estimated population of 8,750,000 (1966). Two of these provinces, Arica and Antofagasta, were annexed from Peru and Bolivia respectively after the War of the Pacific (1879-84). The province of Tacna was also annexed but under a treaty signed in 1929 was returned to Peru which at the same time received payment of £1,200,000 for Arica. The Chilean population has four main sources: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants. Only the few remaining indigenous Indians and some originally Bolivian Indians in the north are racially separate. Following extensive inter-marriage there is no effective distinction among the remainder.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

At a general election held on Sept. 5, 1964, the first Christian Democrat President, Señor Eduardo Frei, was elected by a large majority.

PRODUCTION, &c.—Nearly 30 per cent. of the working population is engaged in agriculture but this industry contributes only 10 per cent. of the country's gross domestic product. Manufacturing and mining, with about 20 per cent. of the active population, provide 25 per cent. of the G.D.P. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, chilli-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Good wines are produced and exported and are becoming more widely known in world markets. There are

large timber tracts in the central and southern zones of Chile, some types of which are exported to Europe and the Argentine, but high production costs have caused serious difficulties to this export trade. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. Copper production in 1966 totalled 660,000 metric tons. Copper provides over 70 per cent. of Chile's export earnings. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural resources in the world. Production in 1966 (including potassium nitrate) was 1,061,607 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 1,542,000 metric tons of coal, and 12,207,000 metric tons of iron ores were produced in 1967. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities. Annual production is between 25,000 and 50,000 metric tons. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the industry is now self-supporting. Production in 1967 was nearly 2,000,000 cubic metres. An oleoduct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. The total production and some imported crude oil is now being refined at Concon and San Vicente. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepción. In 1967 the output of steel ingots from Huachipato totalled 497,000 metric tons.

In recent years a considerable cotton and woollen textile industry has developed. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch, soap, biscuits, rope, glassware, plastic goods, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper and newsprint, radio receivers and valves, rubber products, synthetic detergents, motor vehicle tyres and cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—Most of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or via the Panama Canal to Europe or via the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine numbers about 60 vessels (of over 100 tons gross) with a total gross tonnage of about 400,000. Under a law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,575 miles of track, of which 5,360 miles are State owned. A metre-gauge line (the *Longitudinal*) runs from La Calera, just north of Santiago, to Iquique. The wide gauge railway (1.676 metres) runs from Valparaíso through La Calera, 60 miles inland, and after passing through Santiago ends at Puerto Montt.

With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso on the Pacific

with Buenos Aires, crossing the Andes at 11,500 ft.

Chile is served by 15 international airlines. Four-fifths of the domestic traffic is carried by the State-owned Linea Aerea Nacional. Chile has an extensive system of airports which are being modernized with U.S. financial assistance.

Chile's road system is about 55,000 kilometres in length, but only an estimated 3,000 kilometres are first-class paved highways. At the end of 1965 there were registered 89,098 cars and taxis, 87,595 goods vehicles and 9,249 buses and coaches.

DEFENCE.—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. In 1966 the Army had 6 infantry divisions, 1 cavalry division and one armoured division with a total strength of 1,900 officers, 11,000 regular other ranks plus 11,000 conscripts. In addition there is a police force of "Carabineros" of 22,500 officers and men. The Air Force had 600 officers and 6,180 other ranks with a strength of 230 aircraft. The Navy consisted of 2 cruisers, 4 destroyers, 3 frigates, 3 corvettes, 2 submarines and 4 motor torpedo boats all operational. There is a support force of transports, tankers, a submarine dépôt ship and ancillary small craft. The strength of the Navy is 1,000 officers and 11,500 men, plus a Marine Force for coastal defence of 87 officers and 2,200 men.

EDUCATION.—Elementary education is compulsory since 1920. There are 8 Universities (3 in Santiago, 2 in Valparaíso, 1 in Antofagasta, 1 in Concepción and 1 in Valdivia). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

FINANCE.—The 1967 budget balanced at Escudos 6,985,700,000. Foreign debt at Dec. 31, 1966, was calculated at \$U.S. 1,889,000,000.

The official rate of exchange, May 24, 1968, was about E^o 15.82 = £1 (bankers' rate) and E^o 18.42 = £1 (brokers' rate).

EXTERNAL TRADE.

	1966
Total imports	\$U.S. 899,900,000
Total exports	743,300,000

Trade with U.K.

	1966	1967
Imports from U.K.	£10,725,000	£13,208,000
Exports to U.K.	44,240,000	46,504,000

The principal exports are metallic and non-metallic minerals (refined copper, ingots and bars, iron ore, etc.), cereals, vegetables, fruit and wool. The principal imports are industrial oils, raw cotton, chemicals, wheat, meat, machinery, tools, electrical and transport equipment and sugar.

CAPITAL. Santiago (December, 1964) 2,100,000 (Greater Santiago). Other large towns are: Valparaíso (261,684), Concepción (158,941), Temuco (209,141), Viña del Mar (107,563), Chillán (79,461), Talca (75,354), Antofagasta (74,050), Valdivia (72,988), Talcahuano (75,643), Iquique (47,906), Punta Arenas (44,597). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG.—2 horizontal bands, white, red; in top sixth a white star on blue square, next staff.

NATIONAL DAY.—September 18 (National Anniversary).

BRITISH EMBASSY.

Calle Bandera 227, Piso 3° Santiago (Casilla 72D). Ambassador Extraordinary and Plenipotentiary, His Excellency Frederick Cecil Mason, C.M.G. (1966)

Charge d'Affaires, Hsüng Hsiang-hui. [Councillors, 3; 1st Secretaries, 2; Attachés, 1; 2nd Secretaries, 3; 3rd Secretaries, 4.]

AREA AND POPULATION.—The area of China is about 4,300,000 square miles. Estimates of the present population vary considerably, but a figure of more than 700,000,000 is generally accepted. According to figures published in 1957 by the National Bureau of Statistics, the total population of China was 656,630,000, not including Chinese living in Hong Kong, Macao or abroad. The Chinese use the round figure of 690,000,000. According to the 1953 census the birth rate averaged 37 per thousand and the death rate 17 per thousand, producing an annual population increase of 2 per cent. A further census was held in 1964, but no results are available. In 1953 the percentage distribution of the population was as follows:

Han, 94·13; Mongolian, 0·26; Tibetan, 0·48; Manchu, 0·41; Tribal, 3·57; Others, 1·15. There is no reason to suppose that the proportions have significantly changed.

THE PROVINCES OF CHINA.

According to the National Bureau of Statistics the populations of the Chinese provinces at the end of 1957 were as follows:

Anhwei	33,560,000
Chekkiang	25,280,000
Chinghai	2,050,000
Fukien	14,650,000
Heilungkiang	14,860,000
Honan	48,670,000
Hopei	44,720,000
Hunan	36,220,000
Hupeh	30,790,000
Kansu	12,800,000
Kiangsi	18,610,000
Kiangsu	45,230,000
Kirin	12,550,000
Kwangsi Chuang Autonomous Region	19,390,000
Kwangtung	37,960,000
Kweichow	16,890,000
Liaoning	24,090,000
Inner Mongolian Autonomous Region	9,200,000
Ningsia Autonomous Region	1,810,000
Shansi	15,960,000
Shantung	54,030,000
Shensi	18,130,000
Sinkiang Uighur Autonomous Region	6,640,000
Szechuan	72,160,000
Tibet	1,270,000
(Taiwan	10,100,000
Yunnan	19,100,000

Sinkiang is the largest region or province in area (about 1/6th of the whole area of the country) and Szechuan the most populous.

Government.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang. Events leading up to the end of the war with Japan are briefly described in earlier issues of WHITAKER'S ALMANACK.

On September 30, 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C.) met in Peking and appointed the National People's Government Council under the Chairmanship of Mao Tse-tung. On October 1, Mao proclaimed the inauguration of the Chinese People's Republic. The Soviet Union broke off relations with the Nationalists and established relations with the new régime on October 2. The régime was recognized by all the Communist bloc countries in quick succession, and soon after by the Asian countries of the Commonwealth, the United Kingdom and by a number of other countries. France recognized the Chinese People's Republic on January 27, 1964. The United States and certain other countries continue to recognize the Nationalist régime in Formosa.

The C.P.P.C.C. continued to be the supreme legislative body of the new state until September 20, 1954, when a new constitution was adopted. It was then replaced as the highest organ of state power by the National People's Congress, which exercises legislative power. The Congress can amend the constitution and supervises its enforcement, enacts laws and decides on questions of war and peace. It approves the state budget and adopts the national economic plan. It elects and may remove from office the Chairman and Vice-Chairmen of the Republic. The National People's Congress is supposed to meet only once a year; between sessions its functions are exercised by its Standing Committee, a body made up of a Chairman, 13

Vice-Chairmen, the Secretary-General and 35 ordinary members.

With the adoption of the Constitution, the National People's Government Council was replaced by the State Council, composed of the Premier, 16 Vice-Premiers and the heads of ministries and commissions. This body is the supreme administrative body, responsible for the day-to-day running of the country.

Under the Constitution a complicated interlocking hierarchy exists from the bottom to the top. The National People's Congress is not directly elected, but is the peak of a pyramid. Direct elections occur only in rural districts, urban districts and small towns. Local Congresses have two main functions: (1) to appoint as their administrative arm a People's Council; and (2) to elect the next higher level congress, in this case county congresses or large town congresses. The County congresses have a similar twin function: to appoint County People's Councils and to elect the Provincial Congresses. The Provincial Congresses appoint Provincial People's Councils and elect the National People's Congress. The administrative organs, the People's Councils, are controlled by the next higher administrative organ, (e.g. a County People's Council obeys the orders of the Provincial Council immediately above it). Complications are caused by the existence of Autonomous Regions and Counties set aside for particular national minorities and by the fact that large cities such as Peking, Shanghai and Tientsin are under the Central Government and other towns under provincial governments. Since Congresses meet only rarely and the Councils are responsible for arranging elections of the next Congress, the line of control running down from the State Council through the

hierarchy of local Councils is much stronger than the expression of the public will rising up from the basic level Congresses to the National People's Congress.

China is a Communist state but the position of the Communist party is not reflected in the constitution. Its complete dominance over the Government, which includes "united-front" figures from lesser parties, is achieved by ensuring that all the really important positions at whatever level are filled by Party members. Until April, 1959, Mao Tse-tung was Chairman both of the Republic and of the Communist Party. Since he stood down from his position as Head of State, Liu Shao-ch'i, the first Vice-Chairman of the Party, has been Head of State.

Armed Forces.—All three military arms in China are parts of the People's Liberation Army (P.L.A.) The size of this body has not been formally given, but it is estimated that China has between $\frac{1}{2}$ and 3 million men under arms, with a further 12 million (or perhaps many more) reserves who take part in militia activities. Until 1955 the P.L.A. did not have a rank structure, but one was introduced in that year similar to that of the Russian Army. In the same year compulsory military service was introduced for all men between the ages of 18 and 40. This service was on a selective basis. In January, 1965, the length of service for those conscripted was increased by one year, to four years for the Army, five years for the Air Force and six years for the Navy; and with effect from June 1, 1965, the rank structure was abolished, together with all marks of distinction of branch of service (although members of the services may still be distinguished from one another by the colour of their uniforms). This means a reversion to the previous system by which

members of the armed forces are known only by their appointment.

China exploded her first experimental nuclear device on October 16, 1964. Further tests followed in 1965 and in May, October and December, 1966.

Religion.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. There are also Chinese Moslems and Christians. Since 1949, the practice of all religions has been severely curtailed, although not actually prohibited.

Education.—Although primary education was compulsory under the Nationalists, mass education did not become a fact until after the Communists had taken over. However, since June, 1966, all the major educational establishments have closed down for the "Great Proletarian Cultural Revolution". The Chinese Government announced that the entire education system will be reformed, including the school curriculum.

Language and Literature.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu (Shanghai), and, most important, Mandarin. Mandarin is the basis of the Common Speech (*Putonghua*) and is founded mainly on the Peking dialects. The Communists, when they came into power, continued the Kuomintang policy of promoting it as the national language and made much more intensive efforts to propagate it throughout the country. Since the most important aspect of this policy is the use of the spoken language in writing, the old literary style of writing has fallen into disuse.

Chinese writing is ideographic and not phonetic. The number of sounds in *Putonghua* is strictly limited; each sound may have a large number of different characters and meanings. Whereas originally the language was monosyllabic and confusion was avoided by the use of different characters, thus producing texts which were visually clear but ambiguous to the ear, with the increasing use of the spoken language for writing people are increasingly making use of polysyllabic compounds both in speech and writing in order to avoid confusion. In 1956, after some 4 years of study, the Government decided to introduce 230 simplified characters with a view to making reading and writing easier. The list was enlarged; there are now about 1,000 simplified characters in use. In January, 1956, all Chinese newspapers and most books began to appear with the characters printed horizontally from left to right, instead of vertically reading from right to left, as previously.

In November 1957, after some experimentation, the Government introduced a system of Romanization, using 25 of the letters of the Latin alphabet (not v). This is at present used only in assisting primary school children and others to learn their characters and pronounce them in *Putonghua*. Hopes have been expressed that eventually the new alphabet will replace the characters entirely, but this aim is not likely to be realized for many years.

Chinese literature is one of the richest in the world. Paper has been employed for writing and printing for nearly 2,000 years. The Confucian classics which formed the basis of the traditional Chinese culture date from the Warring States period (4th–3rd centuries B.C.) as do the earliest texts of the rival tradition, Taoism. Histories, philosophical and scientific works, poetry, literary and art criticism, novels and romances survive from most periods. Many have been translated into English. In the past all this considerable literature was available only to a very small class of *literati*,

but with the spread of literacy in the 20th century, a process which has received enormous impetus since the Communists took over in 1950, the old traditional literature has been largely superseded by modern works of a popular kind and by the classics of Marxism and modern developments from them.

Eight newspapers are now published in Peking, of which the most important is the People's Daily, the organ of the Chinese Communist Party.

Currency and Exchange.—The yuan was re-valued with effect from March 1, 1955, on the basis of 10,000 old yuan for one new yuan. (See also p. 83).

6.895 yuan = £1; 2.46 yuan = \$1.

Production and Industry.—China is essentially an agricultural and pastoral country: peasants constitute about 80 per cent. of the population. After the establishment of the Chinese People's Government at which time land for the most part was privately owned, there occurred several stages of land reform culminating in the formation of the people's communes in 1958. With the exception of a few State farms, the communes embrace the whole rural population. In all there are 74,000 communes and each is sub-divided into production brigades and teams. Work is assigned on a collective basis and the production team (of about 45 families) is the normal unit of accounting and labour. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities. The mineral wealth of the country is very great. Coal of excellent quality is produced. Iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundant. Oil is produced in Kansu, Sinkiang, Sining and at a new major oilfield of unspecified location. No reliable figures for industrial production have been published since 1959. The figures given below for 1958 levels are accepted as generally accurate:

Steel, 8,000,000 tons; Pig Iron, 9,530,000 tons; Coal, 270,000,000 tons; Electric Power, 27,530,000,000 kWh.; Crude Petroleum, 2,264,000 tons; Cement, 9,300,000 tons; Timber, 35,000,000 cubic metres; Sulphuric Acid, 740,000 tons; Chemical Fertilizers, 811,000 tons; Machine Tools, 50,000; Motor Vehicles, 16,000; Paper, 1,630,000 tons; and Cotton Cloth 5,700,000,000 metres

Following the Great Leap Forward in 1958 and during three subsequent years of difficult conditions for agriculture, there was a cut back in both agricultural and industrial production, but in the last two years production has been consolidated at a level not lower than that before the Great Leap Forward began. Industrial policy is governed by the need to build up agriculture, and some branches of industry, especially those such as machine tools and chemical fertilizers which have a direct relevance to agriculture have gone ahead more quickly. China is now virtually self-sufficient in petrol and oil.

A new (Third) Five Year Plan began in 1966 but no details of the plan have yet been published.

The principal articles of export are animals and animal products; oils; textiles; ores, metals and tea. The principal imports are raw cotton, cotton yarn and thread; motor vehicles; machinery; chemical fertilizer plants; wheat; aircraft; books, paper and paper-making materials; chemicals; metals and ores; and dyes.

Trade with U.K.

	1966	1967
Imports from U.K. . .	£31,995,000	£38,099,000
Exports to U.K.	33,787,000	29,660,000

Communications.—Of the total area of China about half consists of tableland and mountainous areas where communications and travel are generally difficult. By 1949, the communications system, as a result of years of neglect and civil war, was more or less completely paralysed. In any case such roads and railways as did exist were largely confined to the eastern plains. After the Communists achieved complete control they devoted much attention to restoring and improving the communications system. By the end of 1958 the total length of railways was 19,000 miles (42 p.c. more than 1949), the total length of roads was 250,000 miles (about 5 times as much as in 1949) and of inland waterways about 100,000 miles (twice as much as 1949). In addition, internal civil aviation has been developed: routes total more than 20,000 miles. As a result the communications network now covers most of the country. In the past where roads did not exist the principal means of communications east to west was provided by the rivers, the most important of which are the Yangtze (3,400 miles long), the Yellow River (2,600 miles long) and the West River (1,650 miles). These, together with the network of canals connecting them, are still much used, but their overall importance is less than it was. In the past 10 years great progress has been made in developing postal and telecommunications. It is now claimed that 95 p.c. of all rural communes are on the telephone and that postal routes reach practically every production brigade headquarters.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population (estimated, 1957) of 1,270,000.

From 1911 to 1950, Tibet was virtually an independent country but its status was never officially so defined. In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby the Chinese army was allowed entry into Tibet. A Communist military and administrative headquarters was set up. In 1954 the Government of India recognized that Tibet was an integral part of China, in return for the right to maintain trade and consular representation there.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government and setting up a 16-member Preparatory Committee for the Tibetan Autonomous Region, with the Panchen Lama as Acting Chairman and including 4 Chinese officials. Elections were held to choose local People's Congresses in Tibet, thus indicating that the government organization there no longer differed significantly from that of any ordinary province in China. The Dalai Lama, now exiled in India, announced a "new constitution" in March, 1963.

The Dalai Lama, although absent, had been nominated as Chairman of the Preparatory Committee, but in December, 1964, he was declared to be a traitor, and both he and the Panchen Lama were dismissed. The position of Acting Chairman of the Preparatory Committee was assumed by Jigme, who had long been the most prominent secular figure in Tibet. This move marked the end of the period of co-operation by the Chinese Government with the traditional religious authorities, and the eclipse of the latter. The Preparatory Committee completed its work with the setting up of Tibet as an Autonomous Region of China Sept. 9, 1965.

CAPITAL.—Peking, population (estimated, 1957), 4,020,000. The population of the other principal towns in 1957 was estimated as : Ψ Shanghai, 6,900,000; Tientsin, 3,220,000; Shenyang (Mukden), 2,411,000; Wuhan (formerly Hankow, Hanyang and Wuchang), 2,146,000; Chungking, 2,121,000; Ψ Canton, 1,840,000; Harbin, 1,552,000; Ψ Port Arthur (Lushun)/Dairen, 1,508,000; Nanking, 1,409,000; Sian, 1,310,000; Ψ Tsingtao, 1,121,000; Chengtu, 1,107,000; Taiyuan, 1,020,000.

NATIONAL DAY.—October 1 (Founding of People's Republic).

Fuller; G. Mather; M. Gallagher; Miss N. M.
Smyth.

FORMOSA

(Taiwan)

President, General Chiang Kai-shek, born 1887,
assumed office 1948.

Prime Minister, Dr. C. K. Yen (Dec. 16, 1963).

An island of some 13,800 sq. miles in the China Sea, Formosa lies 90 miles east of the Chinese mainland in latitude $23^{\circ} 45' N.$ — $25^{\circ} 38' N.$ The population, principally Chinese, was 12,071,929 in 1967. The territory of Formosa includes the Pescadores Islands (50 sq. miles), some 35 miles west of Formosa, as well as Quemoy (68 sq. miles) and Matsu (11 sq. miles) which are only a few miles from the mainland. Settled for centuries by the Chinese, the island has been known as Ryukyu and Taiwan. It has been colonized in part by Dutch and Spanish expeditions and latterly by Japan. Japanese administration lasted from 1894 to 1945. General Chiang Kai-shek withdrew to Formosa in 1949, towards the end of the war against Nationalist troops, since when the territory has continued under his presidency. American forces have intervened on several occasions to maintain the *status quo*, the United States recognizing the Formosa régime as the "Government of the Republic of China." A mutual defence treaty was signed in 1954.

The eastern part of the main island is mountainous and forest covered. Mt. Morrison (Yu Shan) (13,035 ft.) and Mt. Sylvia (Tzu'ukaoshan) (12,972 ft.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, tea, bananas, pineapples and tobacco. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports Ψ Kee-lung (295,936) and Ψ Kaohsiung (669,146) are sit-

uated in the northern and southern sections of the island.

Trade with U.K.

	1966	1967
Imports from U.K.	£2,162,000	£2,207,000
Exports to U.K.	1,632,000	1,964,000

CAPITAL.—Taipei (population 1967, 1,224,642). Other towns are: Ψ Kaohsiung (669,146); Tainan (428,853); Taichung (391,518); and Ψ Keelung (295,936).

FLAG.—Red, with blue quarter at top next staff, bearing a twelve-point white sun.

BRITISH CONSULATES

Tamsui, R. J. Bray (*Consul*).
Taipei Branch Office, K. W. Canterbury (*Vice-Consul*).

COLOMBIA

(República de Colombia)

President (1966–70), Dr. Carlos Lleras Restrepo, elected May 1, 1966; assumed office August 7, 1966.
[01-589-9177]

EMBASSY AND CONSULATE
3 Hans Crescent, S.W.1

[01-589-9177]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Victor Mosquera-Chaux.
Counsellor, Señor Alfonso Uribe.
1st Secretary, Sra. Luz Valencia de Uruburu.
Consul-General, Señor Ernesto Caro.

There is a Colombian Consular Office at Liverpool.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between $4^{\circ} 13' S.$ to $12^{\circ} 30' N.$ lat. and 68° to $79^{\circ} W.$ long., with an approximate area of 440,000 square miles, and a population (estimated 1965) of 17,787,000.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811–1824. In 1819 Simon Bolívar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and became a separate Republic.

Following a period of dictatorship and government by decree from 1953, a military junta established on May 10, 1957, prepared the way for a return to democratic government. Congressional elections were held on March 16, 1958, which yielded a Liberal majority of votes. A plebiscite voted on December 1, 1957, had made constitutional changes by which the office of president would during the next sixteen years alternate between candidates of the Liberal and Conservative parties who would hold office for terms of four years, while the two parties would have equal representation in Congress and in the national and departmental governments. On May 1, 1966, presidential elections returned Dr. Carlos Lleras Restrepo (*Liberal*).

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the most important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patia. The Patia flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Rio Bogotá is the great *Fall of Tequendama*, 482 ft. in height.

The Colombian forests are extensive: among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1966 some 72 million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee (which accounts for 65 per cent. of total exports by value), cotton, bananas, rice, cocoa, sugar, tobacco, maize, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel. Successive foreign exchange crises have led to the encouragement by the Government of the rapid development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery.

The Navy consists of 4 destroyers, 3 frigates, some gunboats and some other small craft, with personnel about 5,000, including one battalion of marines; a battalion of the Colombian army served with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Marta, was opened in July, 1961. There are about 2,200 miles of rail in use at present. The total road network (1964) consists of 35,000 km. of roads of all types, of which 7,000 km. are classified as main trunk and transversal roads. A programme of road improvement and construction is under way, financed by a new tax on petrol. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. Less traffic than hitherto is carried on the River Magdalena, which is navigable for 900 miles. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, and services to London daily via New York, three times a week via Jamaica and three times a week via Paris, and air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellin, Cali and Tunja.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing

illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University with headquarters at Bogotá there are 26 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

Finance.—Ordinary budget revenue and expenditure were roughly in balance at about pesos 5,800,000,000 in 1965 and in 1966 there was a surplus, revenue being Pesos 8,397,600,000 and expenditure Pesos 7,719,600,000. Rate of exchange, See p. 83.

	1965 pesos	1966 pesos
Total imports	4,450,990,000	8,746,873,000
Total exports*....	4,221,971,000	4,414,944,000

* Excluding petroleum.

Trade with U.K.

	1966	1967
Imports from U.K. ..	£15,595,000	£8,421,000
Exports to U.K.	10,147,000	9,742,000

CAPITAL.—Bogotá, pop. (estimated, 1963) 1,406,230. Bogotá is an inland city in the Eastern Cordilleras, at an elevation of 8,600 to 9,000 feet above sea level. Other centres are Cali (750,770); Medellin (732,570); Barranquilla (497,000); Bucaramanga (235,720); Pereira (212,540); Ψ Cartagena (192,270); and Manizales (181,420).

FLAG.—Broad yellow band in upper half, surmounting equal bands of blue and red.

NATIONAL DAY.—July 20 (National Independence Day).

BRITISH EMBASSY

Carrera 10, No. 19-65, Bogotá.

Ambassador Extraordinary and Plenipotentiary. His Excellency William Hilary Young, C.M.G. (1966) £5,375

1st Secretaries, J. M. Brown; J. T. Hyslop (Commercial and Consul); K. E. H. Morris.

Naval Attaché, Cdr. H. S. Bennett, R.N. (resident at Caracas, Venezuela).

Military and Air Attaché, Group Capt. D. Devitt (resident at Lima, Peru).

Labour Attaché, D. M. Jones (resident at Caracas, Venezuela).

2nd Secretaries, F. Culver (Commercial and Vice-Consul); D. Parker (Technical Assistance).

BRITISH CONSULAR OFFICES

There are British Consular Offices at Bogotá, Barranquilla, Medellin and Cali.

BRITISH COUNCIL.—Representative, P. B. Gotch, Carrera 10, 19-65, Bogotá.

CONGO

President, National Council for the Revolution, Capt. Ngouari.

Prime Minister, Capt. R. Alfred.

The Republic lies on the Equator between Gaboon on the west and the Congolese Republic on the east, the River Congo and its tributary the Ubangi forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. (For MAP, see p. 836). Area of the Republic of Congo is 129,960 sq. miles, with a population (Census of 1962) of 864,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

M. Fulbert Youlou held office as President of the Republic from Aug. 7, 1960. Growing discontent with the regime culminated in riots in Brazzaville and led to the President's resignation on Aug. 15, 1963, and the dissolution by the Army of the

National Assembly. A provisional Government led by M. Alphonse Massemba-Débat took office on Aug. 16, and a new constitution, giving the provisional Government full powers, came into operation in December, 1963.

On Jan. 12, 1968, the President dismissed the Prime Minister, M. Noumazayal, with three other members of his Cabinet and himself assumed office as Prime Minister with a reformed Ministry. He was himself arrested after heavy fighting during the last few days of August and resigned on Sept. 4, 1968. Conduct of affairs was assumed by a National Council of Army officers.

Trade with U.K.

	1966	1967
Imports from U.K. ..	£776,000	£929,000
Exports to U.K.	2,341,000	3,124,000

CAPITAL.—Brazzaville (136,000); Ψ Pointe Noire (54,000). FLAG.—Tricolour of green, yellow and red (diagonal yellow stripe).

(Diplomatic relations with U.K. suspended, Dec. 18, 1965.)

THE CONGOLESE REPUBLIC

(Democratic Republic of the Congo)

President and Prime Minister, Gen. Joseph-Desiré Mobutu, born Oct. 30, 1930, assumed office November 25, 1965.

CABINET

Interior, Etienne Tshisekedi.

Foreign Affairs and External Trade, Justin-Marie Bombozo.

CONGOLESE EMBASSY

26, Chesham Place, S.W. 1

[CI-235-6137]

Ambassador (vacant).

1st Secretary (*Charge d'Affaires*), M. Paul M'Bala

1st Secretary, M. O. M. J. Nyangule.

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960. Situated between long. 12° - 31° E. and lat. 5° N.- 13° S., the Congolese Republic comprises an area of 905,582 sq. miles, with a population estimated (1965) at 15,627,000. The State was divided into 22 provinces by July 1963, the number being reduced to 8 in 1966 (see below).

Government.—On June 30, 1960, the Belgian Congo became an independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the *Loi Fondamentale*, drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the independence of the State of Katanga and although he failed to obtain international recognition he continued to act in an independent manner with the creation of a visa system, a Katanga franc, etc. Katanga did

not come under the Government at Leopoldville until January 14, 1963.

The constitutional and political situation remained unsettled, the United Nations having mixed forces in the country until 1964. By the middle of 1965, the Congolese Government formed by M. Tshombe in July, 1964, had succeeded in gaining control of all the towns from the rebels and depriving them of military aid from outside the Congo. At elections held in the spring of 1965 the Government party won an overall majority of 86, but the elections in three provinces were annulled on the grounds that they had been irregularly conducted. Following fresh elections held in these provinces in August, 1965, M. Tshombe's Government was dismissed by the President. A new Cabinet was formed by M. Evariste Kimba on October 19 and held office until the deposition on Nov. 25 of the President.

General Joseph Desiré Mobutu, Commander-in-Chief of the Congolese National Army, announced on November 25, 1965, that he had assumed the Presidency and issued a 13-point proclamation appointing Col. Léonard Mulamba as Prime Minister with the task of forming a 21-member Cabinet, one member being drawn from each Province. Gen. Louis Boboizo was appointed to command the Army. In December, 1966, the Cabinet was re-organized without a Prime Minister, Gen. Mulamba having previously been dropped from the Government. The Cabinet as re-organized on Oct. 5, 1967, is listed above.

Climate.—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. There has been some increase in sleeping-sickness since independence. Malaria, formerly under control in Leopoldville (now Kinshasa) and Matadi, has also begun to creep back as the former daily spraying ceased.

Extensive forest covers the central districts.

Provinces.—On Dec. 24, 1966, the provinces of the Republic were re-organized, the total number being reduced to 8. Previously various towns whose names were of European origin had been renamed, notably Leopoldville—now Kinshasa. Following are the eight provinces with names of capitals: Central Congo (Matadi), Bandundu (Bandundu, formerly Banningville); Equateur (Mbandaka, formerly Coquilhatville); Orientale (Kisangani, formerly Stanleyville); Kivu (Bukavu); Katanga

(Lubumbashi, formerly Elisabethville); East Kasai (Muju-Mayi, formerly Port Francqui); and West Kasai (Luluabourg). The city of Kinshasa is an administrative unit by itself.

Production.—The cultivation of oil palms is widespread, palm oil being the most important agricultural cash product. Rubber, coffee and timber are the next most important agricultural exports. The production of tea rose in 1962, but cotton, pyrethrum, copal and fibres production continues to be severely reduced. The country is rich in minerals, particularly Katanga province. Production of diamonds in Kasai province for 1963 was 14,763,863 carats. By 1964 there was still no legal production of gem stones at the Tshikapa concession. Extensive radium deposits exist near Lubumbashi and reef-gold exists in the north-east of the country.

There is a wide variety of small but flourishing secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint and sugar. There are very large reserves of hydro-electric power.

The chief exports are copper, palm-oil and palm-kernels, coffee, diamonds, rubber, cobalt and cassiterite.

Currency.—In November, 1963, the Congolese Franc was devalued from 180 C.F. = £1 to 420 C.F. = £1, for persons selling foreign exchange to obtain Congolese francs and 504 to the £ for persons buying foreign exchange with Congolese francs. In June, 1967, a new currency was introduced, the unit of which, the Zaire, replaced 1,000 old francs. At the same time the currency was re-valued at £1 = Z1.2. (See also p. 83.)

Trade with U.K.

	1966	1967
Imports from U.K. . .	£4,834,000	£6,960,000
Exports to U.K.	10,172,000	11,566,000

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, and Lingala along the river. It is estimated there are 5,000,000 African Christians in the Republic (Roman Catholic 4,200,000, Protestant 800,000).

CAPITAL, Kinshasa (*formerly Leopoldville*) (population, estimated 1964: 1,000,000-1,200,000). Principal towns, Lubumbashi (*formerly Elisabethville*) (182,638); Kisangani (*formerly Stanleyville*) (79,942); Jadotville (74,478); Luluabourg (59,935); Ψ Matadi (59,184); Kolwezi (47,712); Mbandaka (*formerly Coquilhatville*) (37,587); and Ψ Boma (31,598).

FLAG.—Blue with diagonal red band flanked by narrow yellow stripes; 5-point star in blue next staff.

NATIONAL DAY.—June 30.

There is a British Consulate at Lubumbashi.

COSTA RICA

(República de Costa Rica)

President (1966-70) Señor José Joaquin Trejos Fernandez, elected February 6, 1966; assumed office May 8, 1966.

COSTA RICAN EMBASSY AND CONSULATE
3 Zetland House, Marloes Road, W.8.
[or 937-7883]

Ambassador (vacant).

Minister-Counsellor (Chargé d'Affaires), His Excellency Manuel Escalante Durán.

The Republic of Costa Rica, in Central America, extends across the isthmus between $8^{\circ} 17'$ and $11^{\circ} 10'$ N. lat. and from $82^{\circ} 30'$ to $85^{\circ} 45'$ W. long., contains an area of 19,653 English sq. miles, and a population (estimated, 1967) of 1,598,000. The population is basically of European stock, in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824 to 1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific by rail.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Increasing attention is being paid to cattle raising.

The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Puntarenas on the Pacific coast. Bananas are exported from Golfito on the Pacific Coast, by the United Fruit Co., and from Limón by the Standard Fruit Co. In 1966, 1,124 ships of gross tonnage of 4,772,218 entered at Costa Rican ports. About 500 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, LACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is

the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

	FINANCE	1967

TRADE

1966 1967

Total imports \$U.S. 178,000,000 \$U.S. 191,000,000

Total exports 138,000,000 148,000,000

Trade with U.K.

	1966	1967
Imports from U.K. . .	£2,611,000	£3,692,000
Exports to U.K.	413,000	368,000

The chief exports (1967) were coffee, bananas, meat, sugar, cacao, and fertilizers. The imports, 40 per cent. from U.S.A., 10 per cent. from other Central American Common Market countries, 9 per cent. from Germany and 7·9 per cent. from Japan, consisted of machinery, motor vehicles, bicycles, chemicals, textiles, fuel and lubricants, rubber manufactures, non-ferrous metals, etc.

CAPITAL, San José, pop. (Dec. 1966), 185,640; Alajuela (71,612); Puntarenas (62,579); Cartago (52,075); Limón (44,786); Heredia (34,635); Liberia (21,585). (Populations shown are of the Central Cantons of provincial capitals at December, 1966.)

FLAG.—Five horizontal bands, blue, white, red, white, blue (the red band twice the width of the others with emblem near staff).

NATIONAL DAY.—September 15.

BRITISH EMBASSY.

CUBAN EMBASSY IN LONDON

57 Kensington Court, W.8

[01-937-8226]

Ambassador Extraordinary and Plenipotentiary, Her Excellency Señorita Alba Grinán Nuñez (1965). Counsellors, Sr. O. A. Viera; Sr. D. Arranz-Tremols (Commercial); Sr. F. I. Iglesias (Commercial).

1st Secretary, Sra. G. V. Estevez.

Consul, Sr. Justo Luis Betancourt, 22 Mount Street, W.1.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population (June, 1967) of 8,033,000.

The island of Cuba was visited by Christopher

Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office.

A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years. Dr. Castro has since proclaimed the revolution to be Socialist and himself to be a Marxist-Leninist.

In October, 1965, the Communist Party of Cuba was formed to succeed the United Party of the Socialist Revolution. It is the only authorized political party. Elections are no longer to be held. A new Socialist constitution has also been promised, but no date has been set for its introduction.

The Revolutionary Government has carried out programmes of land and urban reform and of nationalization of the means of production and distribution. By June, 1963, 90 per cent. of industrial production, all foreign trade and about 50 per cent of small commercial companies were in state hands. In March, 1968, virtually all remaining private commercial enterprises were nationalized. About 70 per cent. of the cultivated land is in state farms or co-operatives. Private smallholders, who own the remainder, also come under a measure of Government control.

Sugar remains the major item in the economy and accounts for 80 per cent. of Cuban exports. A drought in 1967 seriously affected the 1967-68 harvest which totalled between 5 and $5\frac{1}{2}$ million tons, instead of a forecast of $7\frac{1}{2}$ million tons. Tobacco provides 5 per cent. of exports. Sweet potatoes, bananas, rice, coffee, cocoa, maize, cotton and tropical fruits also flourish. There are large herds of cattle.

11,915 miles of railway are open (public service 4,880; sugar plantations and mining areas 7,035) and about 12,000 miles of telegraph line. There are about 8,291 miles of road. At present scheduled international air services run only to Mexico City, Moscow, Prague and Madrid.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728, but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. There are universities at Santiago de Cuba and Santa Clara. Public libraries have been established. The daily press, which has a fairly wide circulation, and broadcasting and television are under the control of the Ministry of Education.

Finance.—The public revenue rose from an estimated £365,247,946 in 1958 to £2,399,006,000 for 1964, including profits from State trading concerns, etc. No up-to-date figures are available for the public debt—at the end of 1958 this stood at £760,300,000.

Nominally £=U.S. \$1. U.S. currency ceased to be legal tender in Cuba on June 30, 1957 (see also p. 83).

Trade.—Exports in 1965 were valued at £685,500,000, compared with £713,800,000 in 1964; imports, 1965, £866,000,000 (1964, £1,018,814,000).

Trade with U.K.

	1966	1967
Imports from U.K.	£7,737,000	£8,409,000
Exports to U.K.	4,630,000	4,674,000

The exports are principally molasses and tobacco; the imports are mainly machinery.

CAPITAL.—Havana (pop., Census 1953), 783,162; other towns are Santiago (166,565), Holguín (226,644), Camagüey (204,254), Santa Clara (144,630), and Cienfuegos (100,000).

FLAG.—Five horizontal bands, blue and white (blue at top and bottom) with red triangle, close to staff, charged with 5-point white star.

NATIONAL DAY.—January 1 (Day of Liberation).

CZECHOSLOVAKIA

(Československá Socialistická Republika)

President, Ludwig Svoboda, born Nov. 25, 1895, elected March 30, 1968.

CABINET

[At the time of going to press there was doubt as to the exact composition of Mr. Černík's Cabinet. The following list shows the appointments shortly before the invasion of Czechoslovakia.]

Prime Minister, Ing. Oldřich Černík.

Deputy Prime Ministers, František Hamouz; Dr. Lubomír Štrougal; Academician Ota Šík; Prof. Peter Colotka; Dr. Gustav Husák.

Agriculture and Food, Josef Borůvka.

Foreign Affairs, Professor Jiří Hájek.

Finance, Ing. Bohumil Sucharda.

Education, Professor Vladimír Kadlec.

Foreign Trade, Ing. Václav Valeš.

Transport, Dr. František Řehák.

Power Generation, Josef Korčák.

Interior, Josef Pavel.

National Defence, Lt.-Gen. Martin Dzur.

Consumer Goods Industry, Božena Machačová Dostálková.

Justice, Dr. Bohuslav Kučera.

Mining, František Penc.

Culture, Miroslav Galuška.

Forestry and Water, Ing. Július Hanus.

Construction, Professor Jozef Trokan.

Internal Trade, Oldřich Pavlovský.

Chemical Industry, Ing. Stanislav Rázil.

Technology, Ing. Miloslav Hruškovič.

National Economic Planning, Dr. František Vlasák.

Health, Dr. Vladislav Vlček.

Heavy Industry, Ing. Josef Krejčí.

State Price Office, Ing. Václav Hůla.

Labour and Social Welfare, Michal Šlancel.

THE COMMUNIST PARTY

Presidium of the Central Committee (elected Sept. 1, 1968), Alexander Dubcek (1st Secretary); Oldřich Černík; Evžen Erban; Anton Tažký; Gustav Husák; Jarolím Hetes; Bohumír Šimon; Josef Smrkovský; Ludvík Svoboda; Josef Špásek; Josef Žrank; Mrs. Libuse Hrdinová; Václav Simecek; Zdeněk Mlynar; Josef Pinkova; Václav Slavík; Vladimír Kabrina; Stepan Sadovsky; Vasil Bilak.

CZECHOSLOVAK EMBASSY AND CONSULATE

Commercial Attachés, Josef Chvalovský; Otto Kykal.

Assistant Military and Air Attaché, Boris Neoral.

1st Secretaries, Dr. Karel Pravec; Josef Kalina; Milan Glozar.

2nd Secretaries, Stanislav Patejl; Václav Červený; Jaromír Sedláček; Dr. M. Had.

3rd Secretaries, Josef Jandura; Miroslav Fresl; Václav Satra.

Attachés, František Zajíček; Stanislav Melichar; František Dědek; Jaromír Výlupek; Jiří Pelc; Josef Procházká.

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory affected having an area of 53,700 square miles, reduced, by the cession of Ruthenia to U.S.S.R. in 1945, to 49,700 square miles. The population of Czechoslovakia is estimated (Dec. 31, 1966) at 14,274,000.

Government.—The Communist Party, with the aid of Action Committees, seized power in Czechoslovakia in February, 1948, and Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

Two national five-year plans were carried on between 1949 and 1960 with emphasis on heavy engineering. Production doubled in the first Plan and industrial production increased by two-thirds in the Second. Fuel and power development and agriculture did not, however, meet their targets. The third 5-Year Plan was abandoned in 1962.

because the targets were too high and the economy was run on a year to year basis for the next three years. During that time economic performance remained below expectation and although there was some improvement in 1964 and 1965 imbalances remained. A major economic reorganization was approved by the Central Committee of the Czechoslovak Communist Party in January, 1965. The main features of this new system were—a reduction in central planning and greater devolution of responsibility to individual enterprises and factories; increased emphasis on profitability and competition; recognition of the value of the market, coupled with a more flexible price policy and greater participation by all production units in foreign trade. During 1965 and 1966, some rationalization of industry took place and minor elements of the new economic system were introduced experimentally. In June, 1966, the XIIIth Congress of the Party determined that the new system as such should be introduced from 1967. The fourth 5-Year Plan, 1966–70, and the annual plan for 1966 were drawn up on the basis of the old system and modifications will be undertaken from time to time. A start on applying the new system was made on January 1, 1967, by a revision of the structure of wholesale prices.

Following Novotný's removal from the post of First Secretary in January, 1968, there developed a wave of pressure for legal and political reform. During the ensuing months Novotný's supporters were removed from leading positions, and the programme of reform was embodied in a Party Action Programme adopted in April. Shortly afterwards the National Assembly began work on a new legislation. The reforms envisaged the democratization of the country's political life, greater guarantees of fundamental liberties and the establishment of a federal system.

By the summer of 1968 it was evident that the more liberal policies of the Czechoslovak Government did not meet with Soviet approval. The Government and party leaders of U.S.S.R., Poland, Hungary and Eastern Germany met at Warsaw on July 14 and 15 and warned Czechoslovakia in a joint letter against the activities of "anti-socialist and revisionist forces" in Czechoslovakia. Meetings of the Czechoslovak Presidium with the Soviet Politburo at Černá and with representatives of the Warsaw powers at Bratislava on August 3 followed, and the Czechoslovak and Rumanian Governments signed a 20-year treaty of friendship and mutual assistance during the

Rumanian President's visit to Prague on August 15–16. At the same time fresh accusations of the stepping-up of subversive activities in Czechoslovakia appeared in the Soviet press. On the night of August 20, Czechoslovakia was invaded by Soviet, Polish, East German, Hungarian and Bulgarian troops, the capital and all major towns and cities being occupied (see also EVENTS OF THE YEAR).

By Sept. 2, Alexander Dubcek had been re-elected First Secretary of the Czechoslovak Communist Party and had appointed a 21-member Presidium, including President Svoboda, the Prime Minister, Oldřich Černík, and Josef Smrkovsky, President of the National Assembly (see above).

Language and Literature.—Czech and Slovak are the official languages, each having its own literature. The Reformation gave a wide-spread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) a religious and social reformer) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the 17th century when Jan Amos Komenský or Comenius (1592–1670) was expelled from the country. He is still recognized as an outstanding educationalist and a thinker of first magnitude. Under Austrian repression and with the persistent pursuit of Germanization, there was a period of stagnation until the national revival in the first half of the 19th century. Modern prose, drama and fiction, penned between the Wars, are represented by several authors of international reputation, notably K. M. Čapek-Chod (1860–1927), Viktor Dyk (1877–1931), Jaroslav Hašek (1883–1923), Karel Čapek (1890–1938), Vladimír Vaňura (1891–1942), and Ivan Olbracht (1882–1952). Liberty of the press ceased with the loss of independence and the Nazi occupation in 1939. It was temporarily restored on the liberation of the country. After the Communist take-over of February 1948, however, freedom of the press was curtailed. All papers and periodicals were forced to follow the Party line and a number of publications were banned. Following the thaw of 1956 and after the relapse into dogmatism after the Hungarian Revolution, the new wave of freedom started in 1962–1963 and led to increased recognition of Czech and Slovak literature in the world. Greater international recognition is hampered by translation difficulties. In 1966 nearly 250 Czech and Slovak books were published abroad, including roughly one-third in non-Socialist countries. The prominent writers include František Hrubin (b. 1910), Bohumil Hrabal (b. 1914),

Václav Havel (b. 1936), Ladislav Mňáčko (b. 1919), Ladislav Novomeský (b. 1904), Arnošt Lustig (b. 1926), Jiří Mucha (b. 1915), and others. Poetic writing ranges from traditional lyric (Jaroslav Seifert) to "concrete" and typographic modernism (Jiří Kolář, Josef Hiršal).

Education.—The number of pupils in basic nine-year schools is 2,164,000 (Dec. 31, 1966). There are 10,000 students in the secondary grammar schools and the number given for technical schools of all kinds is 284,000. Education is compulsory and free for all children from the ages of 6 to 15. There are five universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno, Olomouc and Košice. In addition there are a considerable number of other institutions of university standing, technical colleges, agricultural colleges, etc. On Dec. 31, 1966, there were 139,000 full-time students in centres of higher education and 46,000 adults part-time.

Finance.—The Czechoslovak currency is the Czechoslovak Koruna (Kčs.=Czechoslovak crown) of 100 heller. The present Czechoslovak rate of exchange is Kčs. 17·22 = £1 with a bonus of Kčs. 20 for non-commercial travellers (see also p. 83).

Trade with U.K.

	1966	1967
Imports from U.K.	£17,907,000	£13,917,000
Exports to U.K.	19,517,000	20,508,000

DAHOMEY

(Republic of Dahomey)

President, Dr. Emile Derlin Zinsou, assumed office, April 1, 1968.

A republic situated in West Africa, between 2° and 3° W and 6° and 12° N., Dahomey has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by Upper Volta and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population estimated (Aug., 1967) at 2,508,000. Although poor in resources, Dahomey is one of the most thickly populated areas in West Africa, with a high level of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of inter-

communicating lagoons, a clay belt and a sandy plateau in the north.

The first treaty with France was signed by one of the kings of Abomey in 1851 but the country was not placed under French administration until 1892. Dahomey became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. In October, 1963, a popular revolution led to the fall of the government of the first President of Dahomey, Hubert Maga. The Army held power until Sourou-Migan Apithy was elected President and Justin Ahomadegbé Chief of Government in January, 1964, after a new constitution had been agreed. This government was overthrown in November, 1965, following a long-standing disagreement between Maga and Apithy. It was replaced by President Tahirou Congacou, who was in turn dismissed in December of the same year by the Army. Christophe Soglo then assumed control and dismissed the Assembly. Soglo was in his turn overthrown by an Army coup d'état on December 17, 1967. Dahomey again has a civilian Head of State, President Zinsou having the support of the Army junta.

Dahomey is a member of the *Conseil de l'Entente*, the *Organisation Commune Africaine et Malgache* (OCAM) and the Organisation of African Unity (O.A.U.). The official language is French.

Finance.—The currency of Dahomey is the *Franc CFA* (Frances CFA 50 = 1 French Franc) (Francs CFA 592 = £1).

Trade.—The principal exports are palm products (80 per cent.) followed by ground nuts, shea-nuts and coffee. Small deposits of gold, iron and chrome have been found. Imports from U.K., 1967, £479,000.

CAPITAL.—Porto Novo (105,000). Principal commercial town and port, Cotonou (100,000).

FLAG.—Three stripes, one vertical, green, two horizontal yellow and red.

NATIONAL DAY.—August 1.
British Embassy (see Togo).

DENMARK

(Kongeriget Danmark)

King, Frederik IX, K.G., elder son of King Christian X, born March 11, 1899; suc. April 20, 1947; married May 24, 1935, Princess Ingrid (born March 23, 1910), daughter of H.M. King Gustav VI Adolf, King of Sweden; and has issue Princess Margrethe, born April 16, 1940 (Heir Presumptive), married June 20, 1967, Count Henri de Monpezat (Prince Henrik of Denmark); Princess Benedikte, born April 20, 1944, married Feb. 3, 1968, Prince Richard of Sayn-Wittgenstein-Berleburg; and Princess Anne-Marie, born Aug. 30, 1946, married Sept. 18, 1964, Constantine XIII, King of the Hellenes.

Military Attaché, Lt.-Col. H. H. Prince Georg of Denmark, C.V.O.

Area and Population.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between $54^{\circ} 34' - 57^{\circ} 45'$ N. lat., and $8^{\circ} 5' - 15^{\circ} 12'$ E. long., with an area of 17,000 square miles, and a population estimated (July, 1966), of 4,797,000. In 1966 there were 88,322 births, 49,344 deaths and 41,424 marriages.

Government.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Faroe and 1 for Greenland. The voting age is 21 years. In the 1968 elections the Social Democrats obtained 62 seats, Conservatives 37, Venstre 34, Radicals 27, Socialist People's Party 11, Left-Socialists 4, Faroes 2, Greenland 2.

Education is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478), Aarhus (1933), and Odense (1966).

Language and Literature.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805-1875), Søren Kierkegaard (1813-1855) and Georg Brandes (1842-1927), with Henrik Pontoppidan (1857-1943) and Karl Gjellerup (1857-1929), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873-1950), who received the same award in 1944. Some 61 newspapers are published in Denmark; 10 daily papers are published in Copenhagen.

Production and Industry.—Nine per cent. of the population lives exclusively by agriculture, and about 52 per cent. by manufactures and trade. The chief products are pigs, cattle, dairy products, poultry and eggs, seeds, cereals and sugar beet; manufactures are mostly based on imported raw material but there are also considerable imports of finished goods.

Communications.—Mercantile marine (ships above 100 gross tonnage) (January, 1968) 1,244 ships, with a gross tonnage of 2,980,000. On March 31, 1967, there were 2,354 kilometres of railway and 3,252,234 kilometres of telegraph and telephone lines.

	1968-69
Revenue (Budget estimate).....	Kr. 20,068,700,000
Expenditure (Budget estimate)	26,167,600,000
Government Debt (March 31, 1967) :—	
Internal	4,185,000,000
External	1,920,000,000
Rate of Exchange—Kr. 17.90 = £1 (see also p. 83). .	

	TRADE	1967
Total Imports	Kr. 21,855,000,000	
Total Exports	17,257,000,000	

	Trade with U.K.	1967
Imports from U.K.	£133,913,000	£143,665,000
Exports to U.K....	206,109,000	217,458,000

The principal imports are machinery, liquid and solid fuels, base metals, vehicles, textile products, chemicals, fertilizers, cereals, feeding stuffs and wood and cork. The chief exports are agricultural produce, fish products, butter, bacon, eggs, meat and livestock, ships, machinery, pharmaceuticals and ready made clothing.

CAPITAL.—Copenhagen. Population (1968), 845,525; Greater Copenhagen, 1,383,044. Other centres are: Aarhus, 114,779; Odense, 104,567; Aallong, 84,098; Esbjerg, 57,184; Randers, 42,009; Roskilde, 38,344; Kolding, 36,960; Harsens, 36,452; Fredericia, 34,066; Vejle, 32,214.

FLAG.—Red. with white cross

NATIONAL DAY.—June 5 (Constitution Day). Copenhagen, distant from London 728 miles; transit 36 hours by sea.

There are Consulates at Aabenraa, Aalborg,
Esbjerg, Aarhus and Odense; and Vice-Consulates at
Thorshavn and Klaksvig (Faroe).

British Council Representative, E. A. S. Butterworth
(Cultural Attaché), Møntergade 1, Copenhagen.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 75,000 inhabitants. The FAROE, or Sheep Islands (540 sq. m.; pop. (1966) 196,000), capital, Thorshavn, are governed by a Lagting of 26 members. ■ Landstyr of 4 members which deals with special Faroe affairs, and send 2 representatives to the Folketing at Copenhagen. On Sept. 14, 1946, the Lagting, with the consent of the Danish Government, for its own guidance held a plebiscite on the Faroe. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the Lagting ■ great majority voted in favour of remaining part of the Kingdom of Denmark with ■ certain extent of home rule. In 1948 the Faroe received a certain measure of home rule. Trade with U.K. in 1967 totalled: Imports, £664,000; Exports, £805,000. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, 1965, 39,613), is divided into 3 provinces (West, North and East). Greenland (capital, Godthaab) has a Landsraad of 76 members and sends 2 representatives to the Folketing at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Greenland exported goods to the value of £203,000 to the United Kingdom in 1967 (1966, £105,000). The United States of America has acquired certain rights to maintain air bases in Greenland.

DOMINICAN REPUBLIC

(República Dominicana)

President, Joaquin Balaguer, born Sept. 1, 1907;
elected June 1, 1966; assumed office July 1, 1966.

EMBASSY AND CONSULATE.

4 Braemar Mansions, Cornwall Gardens, S.W.7
[01-937-1921; 7116 (Consulate)]

Ambassador Extraordinary and Plenipotentiary, His
Excellency Lic. Porfirio Herrera Baez.

There are also Consular Offices at Liverpool,
Birmingham, Manchester, Nottingham, Grimsby,
Southampton, Plymouth, Cardiff, Edinburgh, Glasgow
and Belfast.

The Dominican Republic, formerly the Spanish
portion of the island of Hispaniola, is the oldest
settlement of European origin in America. (For
Map, see p. 872.)

It lies between Cuba on the west and Puerto
Rico on the east and covers an area of about
19,322 square miles, with a population (estimated,
1968) of 3,900,000. The climate is tropical in the
low lands and semi-tropical to temperate in the
higher altitudes.

Government.—Santo Domingo was discovered
by Christopher Columbus in December, 1492, and
remained a Spanish Colony until 1821. In 1822
it was subjugated by the neighbouring Haitians
who remained in control until 1844 when the
Dominican Republic was proclaimed. The
country was occupied by American marines from
1916 until the adoption of a new Constitution
in 1924. In July, 1924, a properly elected Constitu-
tional Government was installed. From 1930
until May 30, 1961 (when he was assassinated)
Generalissimo Rafael Trujillo ruled the country.

A Council of State headed by Rafael F. Bonnelly
was set up in 1962, and Professor Juan Bosch,
elected President in December 1962, held office
until September, 1963, when he was deposed by a
military junta. An Army revolt in favour of ex-
President Bosch in April, 1965, developed into
civil war lasting until September the same year
when a provisional President was elected. At
■ further election on June 1, 1966, Dr. Joaquin
Balaguer was elected President.

Communications.—According to local classifica-
tion there are 2,443 miles of first class and 2,102
miles of second class and inter-communal roads in
the Republic. There is a direct road from Santo
Domingo to Port-au-Prince, the capital of Haiti,
but that part of it in the border area has fallen into
disuse and it is no longer possible to travel direct
between the two capitals except by air. The
frontier has been closed since Sept., 1967. A tele-
phone system connects practically all the principal
towns of the republic and there is ■ telegraph ser-
vice with all parts of the world. There are more
than 90 commercial broadcasting stations and there
is ■ television station operated by Radiotelevision
Dominicana, which with the help of relay stations
provides receptions of its programmes in the major
cities. A second television station in Santo
Domingo-Rahintel transmits to the local area.

Spanish is the language of the Republic.

The Republic is served by five airlines, and an
international airport 18 miles to the east of the
capital is in operation.

Sugar, coffee, cocoa, and tobacco are the most
important crops. Other products are peanuts,
maize, rice, bananas, molasses, salt, cement, timber,
cattle, iron ore, sisal products, honey and chocolate.
There are several light industries producing beer,
tinned foodstuffs, glass products, cotton textiles,
shoes, paper, rum, matches, peanut oil and other
products.

	FINANCE	
Budget	1966	1967
Revenue.....	RD \$162,600,000	RD \$178,200,000
Expenditure..	194,300,000	225,900,000
One Dominican Peso = \$1.00 U.S.		

	TRADE	
Imports.....	1966	1967

Exports.....	125,500,000	137,500,000

Trade with U.K.

	1966	1967
Imports from U.K.	£2,184,000	£2,169,000
Exports to U.K.	73,000	785,000

The chief imports are machinery, foodstuffs, iron and steel, cotton textiles and yarns, mineral oils (including petrol), cars and other motor vehicles, chemical and pharmaceutical products, electrical equipment and accessories, construction material, paper and paper products, and rubber and rubber products; the chief exports are sugar, coffee, cocoa, tobacco, chocolate, molasses and bauxite.

The principal export to U.K. over many years has been sugar and sugar preparations.

CAPITAL.—Santo Domingo (recently called Ciudad Trujillo), population of the Capital District (Census, 1964), 529,396. Other centres are Santiago de los Caballeros (329,808); San Cristóbal (286,094); La Vega (284,139); Puerto Plata (187,727); Duarte (184,783); Espaillat (134,156); El Seibo (132,413); Peravia (122,256); Sánchez Ramírez (107,092); and La Romana and Higüey (120,252).

FLAG.—Red and blue, with white cross bearing an emblem at centre.

NATIONAL DAY.—February 27 (Independence Day, 1844).

BRITISH EMBASSY

(Avenida Independencia 84, Santo Domingo.)
Ambassador Extraordinary and Plenipotentiary, His Excellency Ian Wright Bell, C.B.E. (1965). £4,625
1st Secretary, G. C. Gunn (Consul).

BRITISH CONSULAR OFFICES

There are British Consular Offices at Santo Domingo, Puerto Plata and San Pedro de Macoris.

ECUADOR

(República del Ecuador)

President, Dr. José María Velasco (Ibarra), elected June 2, 1968; assumed office Sept. 1, 1968.

EMBASSY AND CONSULATE.

Flat 3B, 3 Hans Crescent, S.W.1
[01-584-1367]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Dr. Don Marco Tulio González (1967).

Counsellors, Señor Don Vicente Aguirre; Señor Joaquín Zevallos (Commercial).

Air, Naval and Military Attaché, Señor Coronel Don Alfredo Valenzuela.

1st Secretary, Señor Lic. Don Patricio Maldonado.

There are consulates at Liverpool, Birmingham and Glasgow.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 20' and 82° W. long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles. (For MAP, see p. 919).

The Republic of Ecuador is divided into 19 provinces and one territory. It has a population estimated (1967) at 5,416,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Carihuairazo (16,515 ft.), Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sinchon-

lagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The Galápagos (Tortoise) Islands forming the territory of Colón, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1966) of 2,391. The capital is San Cristóbal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The islands export guano, orchilla moss and cattle. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). The constitution of 1946 was suspended in 1963, when Dr. Carlos Arrospide, President of Ecuador from Nov. 8, 1961, was deposed by the Armed Forces on July 11, 1963. His powers were taken over by a junta of officers who stayed in power until March 29, 1966, when a caretaker government took office. A new Government was formed in November, 1966, after elections for a constituent assembly. A new constitution came into force on May 19, 1967. At elections held on June 2, 1968, Dr. José María Velasco (Ibarra) was elected President, to take office on Sept. 1, 1968.

Production and Industry.—The chief products are bananas, cocoa, coffee, sugar, rice, petroleum, straw hats, pyrethrum, vegetable ivory and balsa wood. The petroleum is insufficient to meet the whole of Ecuador's needs, but the recent discovery of oil in commercial quantities in the eastern part of Ecuador may lead eventually to the country having an exportable surplus, when the problem of transporting the oil across the Andes has been solved. In the highlands the principal crops are maize, wheat, potatoes and other temperate products. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found. There is little industry, the textile industry being the most important.

Communications.—There are 11,380 miles of permanent roads and 617 miles of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. Nine commercial airlines operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, Paris, Frankfurt, etc. There are internal services between all important towns.

Defence.—The standing Army has a strength of about 15,000. There is an Air Force of some 40 aircraft of various kinds and a small Navy. All are being advised by U.S. missions.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 4 at Guayaquil. Elementary education is free and compulsory. In 1965-66 there were

800,507 pupils at the 6,721 primary schools and 117,270 pupils at the 507 High Schools. The 7 Universities (at Quito (2), Guayaquil (2), Cuenca, Loja and Portoviejo) and the Polytechnic Schools at Quito and Guayaquil had 15,085 students in the same year.

ETHIOPIA

(Ya Ityopia Nigusa Nagast Mangist—The Imperial Ethiopian Government)

Emperor of Ethiopia, His Imperial Majesty Haile Selassie I, K.G., G.C.B., G.C.M.G., G.C.V.O., LL.D., son of the late Ras Makonnen, Governor of Harar; born July 23, 1892; married in July, 1911, Woizero (Lady) Menan, (who died February, 1962) daughter of Jantrar Asfaw of Ambassel and Woizero (Lady) Sehin Mikael, daughter of King Mikael of Wollo; crowned as Negus, Oct., 1928; proclaimed Emperor, April 2, 1930; crowned as Emperor, Nov. 2, 1930; in exile, 1936–1940; led his patriot army, 1940–41; returned to his capital, May 5, 1941.

Crown Prince, H.H. Prince Asfa Wossen, G.C.V.O., G.B.E., eldest son of the Emperor, born July 27, 1926; married May 9, 1932, Walatta Israel daughter of Ras Seyoum, whom he divorced in 1945, when he married Woizero Medferish Worg, daughter of Major-General Ababa Damtaw. Prime Minister, Aklilou Habte-Wold.

EMBASSY IN LONDON

17 Princes Gate, S.W.7

[01-589-7212]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ato Gabre-Mascal Keflegzi (1966).

Counsellor, Assefaw Leggese.

1st Secretary, Ato Amare Gugsa.

3rd Secretary, Ato Zelleke Bellete.

Position and Extent.—The Empire of Ethiopia, with which Eritrea was federated from 1952 to 1962 when it was incorporated as a province, is in North-Eastern Africa, bounded on the north west by the Sudan; on the south by Kenya; on the east by French Somaliland and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles, with a population estimated (1966) at 23,000,000, of whom about one-third are of the ruling race of Semitic origin (Amharas and Tigres) and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. Eritrea consists of a mountainous hogsback range up to 10,000 ft., interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. On the high plateaux there are two main seasons in the year, dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

Those of Semitic origin (Amharas and Tigres), who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous; the Patriarch ranks immediately after the Alexandrian Patriarch. Moslems predominate in some areas, notably northern Eritrea, Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and

parts of Sidamo and Arussi have considerable pagan elements.

GOVERNMENT

Ethiopia.—The Empire is governed by a Council of Ministers, responsible to the Emperor, and ■ Parliament consisting of a Senate and a Chamber of Deputies, in accordance with the constitution promulgated in 1955. Elections, on a basis of universal suffrage, were held in 1957, and the Chamber of Deputies met for the first time at the end of that year. The second General Election was held in 1961 and a third took place in 1965. The Chamber enjoys greater fiscal control than the previous Assembly and there is a limited degree of ministerial responsibility to Parliament. The Senate continues to be nominated by the Emperor.

Eritrea.—Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown, becoming a province of Ethiopia in 1962.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 56 per cent. of the country's total exports by value in 1967. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, beer and cement. Hydroelectric power production and telecommunications are expanding rapidly, however, mainly with loans from the World Bank.

Communications.—A railway links Addis Ababa, the capital, via Dire-Dawa, with Jibuti, 486 miles away. In Eritrea a narrow gauge line runs from Massawa to Asmara and on to Agordet. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with ■ branch from Dessie to Assab on the Red Sea Coast. Addis Ababa and Asmara are now linked also by ■ road running through Gondar and along Lake Tana. Others run from Addis Ababa west to Lekempti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East to Dire Dawa, Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to most of the provincial towns. External services are operated to Athens, Frankfurt, Madrid, Rome, Beirut, Aden, Jibuti, Taiz, Cairo, Khartoum, Nairobi, Dar-es-Salaam, Entebbe, Lagos, Accra, New Delhi and Karachi.

Defence.—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army, including the Imperial Bodyguard, the Imperial Air Force and the Imperial Navy. The Army consists of armour, infantry, artillery, engineers, signals, ordnance and supply services and a parachute battalion, in all, four divisions plus army troops. The Army is trained by Americans and Israelis. There is ■ military academy at Harar and ■ military training centre at Holleta with a specialist training wing. The Imperial Air Force

comprises a transport squadron, three fighter squadrons, a training squadron, a jet conversion squadron, a reconnaissance unit and an elementary training unit. The Imperial Air Force Headquarters is situated at Debre Zeit. The aircraft are of American manufacture.

The Imperial Navy has a small headquarters in Addis Ababa with bases at Massawa and Assale. The principal units are an ex-U.S. seaplane tender (*Ethiopia*) and a patrol craft squadron of 4.

Education.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools, and cadet-schools for the Army, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. In 1961 the Haile Selassie I University was founded to co-ordinate the existing institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.) and to provide a framework for future development. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

Finance.—Total revenue in 1967-68 was £91,223,000 compared with £70,940,000 in 1966-67; expenditure totalled £96,944,000 (1966, £73,650,000). The Ethiopian dollar has a value of 5·52 grains of fine gold and is divided into 100 cents. At Dec. 31, 1967, the combined note and coin issue amounted to £42,000,000. Foreign exchange reserves of the National Bank and Commercial Banks amounted to £26,000,000 at the same date. Eth. \$6 = £1. (See also p. 83).

Trade.—The chief imports by value are machinery and transport equipment, manufactured goods, chemicals, beverages and tobacco (from U.K.); the principal exports by value being coffee, oilseeds, hides and skins, and pulses.

TRADE

Total Imports (1967)	£59,600,000
Total Exports (1967)	41,600,000

Trade with U.K.

	1966	1967
Imports from U.K.....	£4,472,000	£3,929,000
Exports to U.K.....	1,714,000	1,506,000

CAPITAL. Addis Ababa (population, estimated July, 1961, 449,021), also capital of the province of Shoa; Asmara (population 120,000) is the capital of the Province of Eritrea. Dire Dawa is the most important commercial centre after Addis Ababa and Asmara, Ψ Massawa and Ψ Assab (recently enlarged) are the two main ports. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG.—Three horizontal bands; green, yellow, red; bearing crowned lion at centre.

NATIONAL DAY.—July 23.

FINNISH EMBASSY AND CONSULATE

66 Chester Square, S.W.1

[01-730-0771-5]

Ambassador Extraordinary and Plenipotentiary, His Excellency Otso Wartiovara (1968).

Counsellor, M. Ilkka Pastinen.

1st Secretary, M. Erkki Pajari.

Attache and Vice-Consul, Juha Puromies.

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,165 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (July, 1967), 4,664,000. In 1966 the birth rate was 16.7, death rate 9.4 per 1,000. The infant mortality rate was 14.4 per 1,000 live births. 92.6 per cent. of the people are Lutherans, 1.3 per cent. Greek Orthodox and 6.1 per cent. others.

The Åland Archipelago (Ahvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1966) of 21,552 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (Eduskunta) for which women are eligible, composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

Following the presidential elections in February, 1968, a new coalition government was formed by Mr. Koivisto from representatives of the Social Democrat Party, the Centre Party, the People's Democrat Party, the Swedish People's Party and the Social Democrat Opposition Party.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,400. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8-11 months. None of the defence forces has the full complement permitted.

Education.—Primary education is compulsory and free for all children from 7 to 16 years, and in 1965-66 there were 544,407 in attendance at primary schools, with 268,014 in secondary schools; and 76,953 in colleges for vocational training. In 1965-66 there were 8 Higher Schools with 7,331 students, and 6 universities; the State University of Helsinki (17,954 students); a at Turku (one Swedish-speaking); and new universities at Oulu, Jyväskylä and Tampere. Combined enrolment at Higher Schools and Universities was 38,408.

Language and Literature.—Most Finns are bilingual, 92.4 per cent. speak Finnish as their first language, 7.4 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on equal footing with Swedish as the official language of Finland, but since independence in 1917 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 70 daily newspapers in Finland which appear on 4 or more days per week (60 Finnish language, and 10 Swedish).

Production and Industry.—Finland has a greater area covered in forest than any other European country except the Soviet Union. Consequently the national economy is based on the timber, pulp and paper industries. These industries employ a large proportion of the working population and

accounted in 1966 for 67 per cent. of Finland's foreign exchange earnings. The metal and engineering industries, producing 18 per cent. of Finland's export income in 1965, form the second important group. Exports of agricultural and dairy products amounted to 6 per cent. of total exports in 1965. The remaining export revenue came from the glass, ceramics and furniture industries. To a large extent domestic requirements in the textile, rubber, plastics, chemical and pharmaceutical, footwear and foodstuff trades, are met by local factories.

Communications.—There are 5,556 miles of rail-road and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R.; passenger boat connection with Sweden, Denmark and West Germany. Vessels on the London to Leningrad route call at Helsinki. There are also passenger/cargo boat connections with most countries in the world. External civil air services are maintained by BEA, Aero Oy (Finnish Airlines), Kar Air, Scandinavian Airlines Malev and Czech Airlines. Finnair and Aeroflot each maintain services to Moscow and to Leningrad. The merchant fleet (May, 1968) consists of 86 steamships (134,052 tons gross), 411 motor vessels (936,555 tons gross), and 16 sailing ships with auxiliary engine (2,350 tons gross).

Finance.—On Jan. 1, 1963, all values expressed in Finmarks were divided by 100, in a reform of the currency. Finmark figures below are expressed in terms of the New Finmark.

Finmarks 10·00 = £1 (see also p. 83).

	1968
Revenue (Budget)	Finmarks 9,276,000,000
Expenditure (do.)	9,275,000,000
Debt (Dec., 1967)	4,431,000,000

TRADE

	1966	1967
Finnmarks	Finmarks	Finmarks
Total Imports. Fmks. 5,524,405,000	5,794,694,000	5,794,694,000
Total Exports	4,816,941,000	5,230,295,000

Trade with U.K.

	1966	1967
Imports from U.K.....	£75,562,000	£71,317,000
Exports to U.K.....	122,858,000	129,878,000

The principal imports are raw materials, food-stuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

CAPITAL. Ψ Helsinki (Helsingfors). Population (Jan., 1966), 570,283; other towns are Tampere (Tammerfors), 144,962; Ψ Turku (Abo), 139,141; Lahti, 81,908; Ψ Oulu (Uleaborg) 80,379; Ψ Pori (Bjöneborg) 60,006; Jyväskylä, 52,855; Kuopio, 52,075 and Ψ Vaasa (Vasa), 47,162.

NATIONAL DAY.—December 6 (Day of Independence).

FLAG.—White with blue cross.

Area and Population.—The most westerly State of Central Europe, extending from $42^{\circ} 20'$ to $51^{\circ} 5' N.$ lat., and from $7^{\circ} 45' E.$ to $4^{\circ} 45' W.$ long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1939) at 212,895 square miles divided into 96 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The population of Metropolitan France at a national census held on March 7, 1962, was 46,520,271. The population was estimated to have risen to 49,750,000 by March 1, 1967. The 1962 Census showed that 74·4 per cent. of the population lived in urban areas compared with 70·7 per cent. in 1954. Principal groups of foreigners living in France in 1962 were: Italians, 644,000; Spaniards, 430,000; Algerians, 335,000; and Poles, 176,000. During 1961 there were 829,700 live births, 538,300 deaths and 317,000 marriages.

Departments of the District of Paris appear in italic type.

(a), (b), (c). These Departments correspond with the districts of Alsace and Lorraine.

* Ville de Paris since 1963.

† Divided 1963 into the six departments of Yvelines, Essonne, Hauts-de-Seine, Seine St. Denis, Val-de-Marne, Val-d'Oise. Departments number 95.

Government.—The monarchical system of government was overthrown by the French Revolution (1789–1793), and the First Republic lasted until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The constitution of the Third Republic vested the legislative power in ■ Chamber of Deputies and a Senate. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress.

On Sept. 1, 1939, Germany invaded Poland thus precipitating war with France and Great Britain, which had (March 31, 1939) given an open pledge to support Poland against aggression.

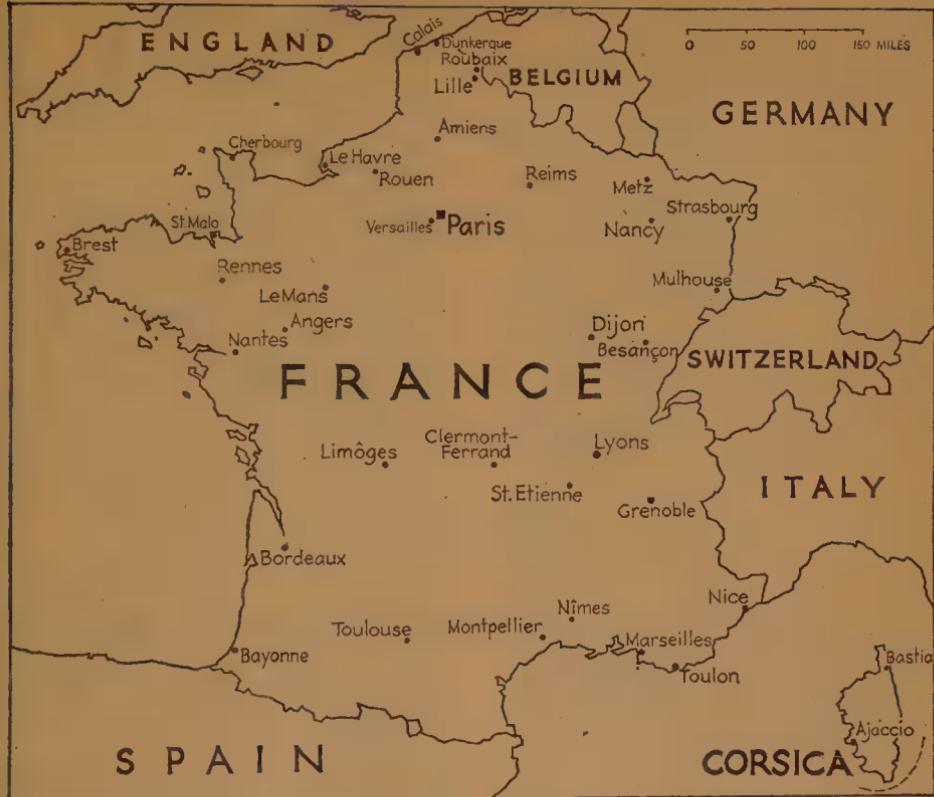

On June 17, 1940, the late Maréchal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee "to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader."

On June 3, 1943, after prolonged negotiation, there was set up ■ French Committee of National Liberation, which was recognized by the allied nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the allied nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxembourg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following ■ national referendum on Oct. 21, 1945, a Constituent Assembly was elected with the

task of drafting a new constitution. This was duly drawn up and adopted at a further referendum on Oct. 13, 1946. A National Assembly and Council of the Republic, elected on a territorial basis, were set up. With amendments made in 1954, the Constitution of the Fourth Republic was in force from 1946 until Oct. 5, 1958. From the liberation of Paris in 1944 until the Fourth Republic came to an end in 1958, 26 Cabinets were formed with an average life of 5½ months. The Government of M. Mollet for 16 months in 1956–57 was the longest in office, that of M. Queuille in 1950 the shortest, being in office for only three days.

Insurrections took place in Algeria and in the Metropolitan Department of Corsica in May, 1958, and, faced by a threat of imminent insurrection among the armed forces at home, President Coty warned the nation that it was on the brink of civil war and invited General de Gaulle to form a Government. M. Pflimlin formally resigned the office of Prime Minister on May 31. On June 1, by 329 votes to 224, Gen. de Gaulle was invested in the National Assembly as Prime Minister, with power to govern by decree for a period of six months during which time proposals for constitutional reform would be submitted to a national referendum.

The Fifth Republic.—The Constitution of the Fifth Republic, embodying important changes, was adopted by an overwhelming majority at a referendum held on Sept. 28 in Metropolitan France and all overseas departments and territories.

The President was elected for a term of 7 years by an electoral college consisting of both Houses of Parliament, the departmental general councils,

overseas assemblies and elected representatives of the municipal councils. As the result of a referendum in October, 1962, future Presidents are to be elected by direct universal suffrage. Presidents are eligible for re-election. The President appoints the Prime Minister. He may dissolve the National Assembly after consultation with the Prime Minister and Presidents of both Houses, but may do so more than once in twelve months. He may submit disputed legislation to a national referendum at the request of the Government or of both Houses of Parliament. The President may assume special powers in emergency. At the presidential elections held on Dec. 21, 1958, General de Gaulle was elected President by an overwhelming majority and took office on Jan. 8, 1959, as first President of the Fifth French Republic. The second presidential elections were held on Dec. 5 and 19, 1965, in two rounds. On the first round on December 5, General de Gaulle obtained only 44 per cent. of the vote and so a second round was necessary on December 19 in which his only opponent was M. Mitterrand. On this occasion the General's share of the poll was 55 per cent. His second presidential term started on January 8, 1966.

Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The Prime Minister and the Cabinet are responsible

only to Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session. Ministers relinquish Parliamentary seats on joining the Cabinet.

A Constitutional Council is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the Economic and Social Council gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

Production.—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1967 was:—

	(Quintals)
Wheat	143,830,000
Oats	27,580,000
Barley	97,240,000
Rye	3,620,000
Maize	36,790,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the ■■■ Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1967 was 61,644,000 hectolitres. Cider-making is also an important industry. The live stock (1967) included 21,417,000 cattle, 9,248,500 sheep and lambs, 9,746,300 pigs, 1,000,000 horses and 942,200 goats. The mineral resources include coal, natural gas, pig iron, bauxite, lead, silver, antimony and salt. In 1967 coal production amounted to 50,552,000 tons. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

Language and Literature.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Italy, Tunisia, Algeria, Mauritius, Haiti and the Province of Quebec, Canada, to whom the almost inexhaustible literature of France is a treasured heritage. The work of the French Academy, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 10 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952), Albert Camus (1957) and St. John Perse (Alexis Léger) (1960).

Defence.—The personnel of the Defence Forces at the end of 1967 included: ARMY 330,421; AIR FORCE, 107,584; NAVY, 68,998; Common Services, 68,215 (including GENDARMERIE of 60,988). The Army has a variety of new French-made equipment coming into service, including medium tanks, field and air defence guns, trucks and radio sets. A tactical nuclear weapon is promised for the 1970's. The Air Force is equipped with *Mirage IV* nuclear

bombers, KC135 tanker/transports, *Mirage IIIE* fighters and *Transall* transports, supported by a large number of older operational aircraft. The Navy includes 2 cruisers, 3 aircraft carriers, 18 fleet escorts, 18 fast escorts, 19 submarines, 15 ocean minesweepers, 1 helicopter carrier, 1 GW destroyer, 8 tropical duty frigates, 2 LSD, 7 LST, 82 coastal and inshore minesweepers, 4 logistic support ships and 8 oilers.

Education.—The educational system is highly developed and centralized. It is administered by the Ministry of National Education, comprising (a) the Direction de l'Administration Générale, the Direction de l'Enseignement Supérieur, and the Direction Générale de l'Organisation et des Programmes Scolaires, the three principal administrative services; (b) the Superior Council of National Education (consultative); and (c) other organizations and services concerned with libraries, research, external relations whose heads are directly responsible to the Minister; and (d) the Inspectorate. The former High Commissariat for Youth and Sports of the Ministry of National Education has now become a separate Ministry. Local Administration comprises 23 Territorial Academies, with inspecting staff for all grades, and (b) Departmental Councils presided over by the Préfet, and charged especially with primary education.

Primary and secondary education are compulsory, free and secular, the school age being from 6 to 14 (6 to 16 from 1967 onwards). Schools are for boys, for girls, or mixed. (i) Primary education is given in écoles maternelles (nursery schools), écoles primaires élémentaires (primary schools) and collèges d'enseignement général (4-year secondary modern course); (ii) Secondary education in collèges d'enseignement technique, collèges d'enseignement secondaire and lycées (7-year course leading to one of the five baccalaureats). *Baccalaureat A* consists largely of philosophy and languages with a little mathematics, and provides entry into the faculties of Letters and Law. *Baccalaureat B* groups languages, mathematics and economics with philosophy classes oriented towards psychology and sociology. It provides entry to the faculties of Letters for the social sciences and to the faculty of Law for economics. *Baccalaureat C*, consisting of mathematics and physics with some languages, provides entry to the faculty of Sciences for those studying for a degree in mathematics and physics. *Baccalaureat D* has the same language component as *Baccalaureat C*, but its main feature is the natural sciences. It provides entry to the faculty of Sciences for natural science degrees, and also to the Medicine and Pharmacy Faculties. *Baccalaureat E* is largely scientific and technical with a language element, and provides entry to engineering schools and the Faculty of Science. (iii) Special schools are numerous. (iv) There are 19 universities (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Besançon (1485), Bordeaux (1441), Caen (1432), Clermont-Ferrand (1808), Dijon (1772), Grenoble (1339), Lille (1530), Lyons (1808), Montpellier (1225), Nancy (1572), Nantes (re-created 1961), Paris (1150), Poitiers (1431), Reims (1961), Rennes (1735), Strasbourg (1567) and Toulouse (1230). Three new universities were created during 1964, at Orléans, Reims and Rouen. Higher education is also given in various branches—medicine, law, science and arts—in State institutes in Amiens, Angers, Chambéry, Le Mans, Limoges, Nice, Pau, Rouen, St. Etienne and Tours.

The widespread student disorders of May, 1968, were expected to be followed by reforms in the field of higher education, including the granting of

a measure of autonomy in the universities (not hitherto enjoyed), starting in the autumn of 1968.

Archaeology, etc.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Caesar found Gaul "divided into three parts" and described three political groups—Aquitaniens south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgae from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIth century châteaux survived the French Revolution.

Roads.—The length of the *Routes Nationales* at the end of 1966 was 80,838 km. and of motorways 789 km. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use having a length in 1966 of 8,756 km., of which 4,724 km were canals.

Railways.—The system of railroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic in 1966 was 37,810 km., of which 8,580 km. were electrified. Traffic in 1966 totalled 38,400,000,000 passenger-km. and 64,060,000,000 ton-km.

Shipping.—The French mercantile marine in 1966 consisted of 639 ships of 5,113,000 tons gross, of which 48 were passenger vessels (489,000 tons), 156 tankers (2,538,000 tons) and 435 cargo vessels (2,085,000 tons).

FINANCE

	1966	1967
	F. millions	

Total revenue (<i>Budget</i>).....	110,246	118,421
Ordinary expenditure (<i>do</i>)....	107,354	119,600

The Public Debt on Dec. 31, 1967, was F.90,630,000,000, of which the external debt amounted to F.4,614,000,000.

Currency.—The unit of currency is the *franc* of 100 centimes. The *New Franc*, worth 100 old francs, came into use on Jan. 1, 1960, in metropolitan France and Algeria, as the basic monetary unit. Bank notes in 10, 50 and 100 new franc denominations and coins in 5 new francs were introduced. On January 1, 1963, the designation of the French currency was changed from *New Franc* to *Franc* with no change in value.

EXCHANGE RATE.—F.11·84 = £1.

COMMERCE

The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

OVERSEAS DEPARTMENTS

With effect from Jan. 1, 1947, the colonies of Guyane (French Guiana), Martinique, Guadeloupe and La Réunion with its dependencies have been theoretically administered in exactly the same way as the Metropolitan Departments, but in practice somewhat greater discretion is allowed to the Prefects and the locally elected bodies.

La Réunion.—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (estimated, 1965), 397,000. Capital, St. Denis (65,614). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations (1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land (see p. 717) in the Antarctic Continent are also dependencies of Réunion. Imports from U.K., 1967, £206,000.

Martinique.—An island situated in the Windward Islands group of the West Indies, between the British colonies of Dominica in the north and St. Lucia in the south. Population (estimated, 1965), 321,000. Capital, Ψ Fort de France (60,600). Other towns are Ψ Trinité (39,173) and Ψ Marin (31,369).

Guadeloupe.—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélémy and St. Martin, form the other West Indian Department of France. Population (Census, 1961), 282,000. Capital, Ψ Pointe à Pitre (26,200). Other towns are Ψ Basse Terre (13,636) in Guadeloupe and Ψ Grand Bourg (12,827) in Marie Galante.

French Guiana.—Area, 35,000 sq. miles. Population (Census, 1961), 33,000. Capital, Ψ Cayenne (13,300). Situated on the north-eastern coast of South America, French Guiana is flanked by Netherlands Guiana on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royal and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894 to 1899.

CAPITAL OF FRANCE

Paris, on the Seine. Population (Census of 1962), 2,790,091.

District of Paris.—Created by legislation promulgated on August 2, 1961, the District covers the areas of the Seine and Seine-et-Oise Departments, with a population of 8,469,863. Improvements and development of the Paris region is the responsibility of a Council of Administration consisting of 28 members, half elected by the Government from among local members of Parliament, and the other half by local councils. The Council, which has its own budget and revenue, co-ordinates the development works of existing authorities and has power to initiate its own schemes. A Delegate-General appointed by the Government is the Council's executive officer.

Thirty-two other French cities have populations greater than 100,000—Ψ Marseilles (783,738); Ψ Lyons (535,784); Toulouse (330,570); Ψ Nice (294,976); Ψ Bordeaux (254,122); Ψ Nantes (246,227); Strasbourg (233,549); St. Etienne (203,633); Lille (199,033); Ψ Le Havre (184,133); Ψ Toulon (172,586); Grenoble (162,764); Rennes (157,692); Ψ Brest (142,901); Dijon (141,104); Reims (138,576); Le Mans (136,083); Clermont-

Ferrand (134,532); Nancy (133,532); Ψ Rouen (123,474); Montpellier (123,367); Angers (122,269); Limoges (120,596); Roubaix (113,163); Muhouse (110,735); Amiens (109,869); Metz (109,678); Villeurbanne (107,630); Boulogne-Billancourt (107,074); Nîmes (105,199); Besançon (101,729).

The chief towns of Corsica are Ψ Ajaccio (42,282) and Ψ Bastia (50,881).

Paris is distant from London 267 miles; transit by air, 1 hr.

FLAG.—The “tricolour,” three vertical bands, blue, white, red (blue next to flagstaff).

NATIONAL DAY.—July 14.

BRITISH CONSULAR OFFICES

There are British Consular Offices in Metropolitan France at Paris, Bordeaux, Boulogne, Calais, Cherbourg, Dieppe, Dunkirk, Le Havre, Lille, Lyons, Marseilles, Nice and Strasbourg.

BRITISH CHAMBER OF COMMERCE

6 Rue Halévy, Paris 9

President, P. T. Simpson-Jones.

Vice-Presidents, H. Start, C.B.E.; D. H. Goodchild.

BRITISH COUNCIL

Representative in Paris, C. F. de Winton, C.B.E., rue des Ecoles 36, Paris V.

THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 1958, envisaged the establishment of a French Community of States closely linked with common institutions. A number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally members of the French Community. The Community Institutions in fact never operated as envisaged. Nevertheless, with the exception of Guinea, which opted out of the Community in the 1958 referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements.

Madagascar (République malgache).—See separate article.

OTHER TERRITORIES

French Territory of the Afars and Issas.—Situated on the north-east coast of Africa, the Territory has an area of 9,000 sq. miles with a population (estimated, 1961) of about 81,000.

Formerly French Somaliland, the Territory was renamed on July 6, 1967, to emphasize the existence of the two main ethnic groups in the population. A renamed Chamber of Deputies succeeded the former territorial assembly to which a governing council is responsible for the administration of the territory. The French High Commissioner retains responsibility for foreign policy, defence, currency, credit, citizenship and law, other than traditional civil law. Capital, Ψ Djibouti (17,000).

Imports from the United Kingdom in 1967 were valued at £1,191,000; Exports to U.K., £57,000.

New Caledonia.—Area, 7,200 sq. miles. Population (1964), 89,000. Capital, Ψ Nouméa (12,000). A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc.), the Huon Islands and Alofis. New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement.

Wallis and Futuna Islands.—Following a request from local kings and chiefs, it was decided by referendum (Dec. 27, 1959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 9,500, mostly Polynesians.

French Polynesia.—Area, 2,500 sq. miles. Population (1964), 82,000. Capital, Ψ Papeete (15,220), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-oa, etc., 500 sq. miles, population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raivavae, Rimatara and Rapa Island; and Maiao Island).

Comoro Archipelago.—Area, 800 sq. miles. Population (1957), 177,000. Capital, Dzaoudzi. Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean.

St. Pierre and Miquelon.—Area, 93 sq. miles. Population (1957), 4,900. Two small groups of islands off the coast of Newfoundland.

GABOON

(Republic of Gaboon)

(For MAP, see p. 836.)

President, Albert-Bernard Bongo, assumed office December, 1967.

Gaboon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by the Spanish territory of Rio Muni and the Cameroons Republic and on the east and south by the Republic of Congo. It has an area of 101,400 sq. miles and a population estimated at 470,000. Gaboon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

Trade with U.K.

Imports from U.K.	£665,000	1966	1967
Exports to U.K.	915,000	£691,000	2,641,000

CAPITAL.—Libreville (31,000).

FLAG.—Horizontal bands, green, yellow and blue.

NATIONAL DAY.—August 17.
British Ambassador, His Excellency Alan John Edden, C.M.G. (Resident at Yaoundé, Cameroon).

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863-1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the name German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or Nazis) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontested authority in the Reich.

THE WAR OF 1939-1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark and Norway (April, 1940), Belgium, the Netherlands, Luxembourg and France (May, 1940). Norway capitulated on June 9, France sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxembourg, Eupen-Malmédy, large

* Nazi historians referred to the National Socialist régime as *Drittes Reich*. The First was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The Second was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The Third was established by Adolf Hitler in 1933.

areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

In 1962 the Federal Statistical Office reported that during the course of the war from 1939 to 1945, 593,000 persons were killed during allied air attacks on Germany and 403,000 dwellings were destroyed. 537,000 civilians were killed, some 15 per cent. children under 14, and 56,000 foreign civilians, members of the police and armed forces. In the area now covered by the Federal Republic persons injured numbered 486,000, including 16,000 foreigners and prisoners of war.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the areas lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a

dead letter when the Russians withdrew from the Control Council in March, 1948.

Federal Republic of Germany

President, Dr. Heinrich Lübbe, born Oct. 14, 1894, re-elected July 1, 1964, for second term of five years from Sept. 13, 1964.

CABINET

Federal Chancellor, Dr. Kurt Georg Kiesinger (C.D.U.).

Foreign Minister and Vice-Chancellor, Willy Brandt (S.P.D.).

Interior, Ernst Benda (C.D.U.).

NOTE.—Except where otherwise indicated statistical data on the Federal Republic of Germany include Berlin (West).

Area and Population.—The area of the Federal Republic is approximately 95,962 sq. miles. Total population of the Federal Republic on Dec. 31, 1967, was 57,785,000, excluding Western Berlin.

compared with 43,008,300 in 1939. Distribution of the population among the *Länder* on Dec. 31, 1967, was:

Schleswig-Holstein	2,500,000
Hamburg	1,833,000
Lower Saxony	6,993,000
Bremen	752,000
North Rhine-Westphalia	16,843,000
Hessen	5,263,000
Rhineland-Palatinate	3,625,000
Baden-Württemberg	8,566,000
Bavaria	10,280,000
Saarland	1,131,000
Berlin (West)	2,163,000

The population of the principal cities and towns in the Federal Republic on Dec. 31, 1967, was:

Berlin (West)	2,163,306	
Ψ Hamburg	1,832,560	
Munich	1,244,237	
Cologne	854,482	
Essen	705,203

	Herne	106,707
	Koblenz	103,783
	Wilhelmshaven	102,859
	Wanne-Eickel	101,932
		810,026 sheep, 19,032,490 pigs and 91,388,019 fowl.

Vital Statistics.—There were 17·6 live births per 1,000 inhabitants in the Federal Republic in 1966, compared with 19·5 per 1,000 for the same area in 1938. There was an excess of live births over deaths in 1967 of 5·5 per 1,000 and in 1938 of 8·0.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948–49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 23, 1949. It provides for a President, elected for a five-year term, a Lower House, with a four-year term of office, elected by direct universal suffrage, and an Upper House composed of delegates of the *Länder*, without a fixed term of office.

The results of the elections held for the lower House (*Bundestag*) on September 19, 1965, were as follows:

Party	Numbers
Christian Democratic and Christian Social Unions	245
Social Democrats	202
Free Democrats	49
Total	496

with an additional 22 representatives of Berlin elected by the Berlin Chamber of Deputies (Christian Democrats, 6; Social Democrats, 15; Free Democrats, 1). The Christian Democratic and Christian Social Unions, having no absolute majority, form a coalition with the Social Democrats. The Free Democrats are the Parliamentary Opposition.

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitutions, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the *Länder* governments in June, 1968, were:

Ministers-President

Baden-Württemberg.—Dr. Hans Filbinger.

Bavaria.—Dr. Alfons Goppel.

Bremen.—Klaus Schütz (*Governing Mayor*).

Hamburg.—Prof. Dr. Herbert Weichmann (*Mayor*).

Hessen.—Dr. E. Georg-August Zinn.

Lower Saxony.—Dr. Georg Diederichs.

North Rhine-Westphalia.—Heinz Kühn.

Rhineland-Palatinate.—Dr. Peter Altmeyer.

Saarland.—Dr. Franz-Josef Röder.

Schleswig-Holstein.—Dr. Helmut Lemke.

Economic position.—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1967 was estimated at DM. 483·6 milliard, an increase of DM. 2·9 milliard or 0·6 per cent. over 1966.

Agriculture.—In 1967 total area of farmland was 13,996,100 hectares of which 7,577,400 hectares were arable land. Forest areas cover 7,184,700 hectares. The 1967 harvest yielded 9,136,000 metric tons of bread grains, 8,694,000 metric tons of feeding grains and 21,294,000 metric tons of potatoes. The livestock population at the end of 1967 included 13,981,162 cattle, 283,165 horses, 810,026 sheep, 19,032,490 pigs and 91,388,019 fowl.

Industrial Production.—The index of industrial net production adjusted for irregularities of the calendar (1962 = 100) has developed in the Federal Republic, including Berlin, as follows:

	1965	1966	1967
Mining	100·2	95·8	90·0
Manufacturing industry	119·1	121·2	118·5
(i) Basic materials	124·8	129·2	132·7
(ii) Capital goods	117·8	117·3	109·7
(iii) Consumer goods	115·6	118·4	113·2
(iv) Foodstuffs	115·2	118·8	121·4
Power (electricity and gas)	125·5	131·6	137·3
Building Industry	118·9	123·7	115·0
Total industry	118·2	120·3	117·4

Total

Productivity of labour in industry (excluding electricity, gas and building industries) per man-hour: 1965, 122·1; 1966, 127·9; 1967, 138·2 per cent.

Some production figures are shown below (monthly averages):

	1966	1967
	Number	Tons
Passenger cars.....	209,606	170,236
Commercial vehicles.....	17,104	14,294
Sulphuric acid (SO ₃)	260,845	257,002
Chlorine.....	102,507	114,126
Artificial plastic material.....	191,066	219,164
Man-made fibres.....	41,037	41,295
Cotton yarn	23,393	39,915
Woollen yarn	7,542	5,871

572,400 new dwellings were completed in 1967 in the Federal Republic (1966, 604,978).

Labour.—Of 26,292,000 employed in 1967, 16,884,000 were men. The average number of unemployed was 459,489, of whom 335,102 were men (1966=161,060 and 116,525). In 1967, an average number of 1,034,417 foreign workers was employed in the Federal Republic. An average of 7,842,662 (1966=8,384,000) were employed in industry (establishments employing 10 and more persons)

	1966	1967
Coal mining.....	389,400	336,003
Iron and steel production.....	346,500	327,331
Mechanical engineering.....	1,615,300	1,524,068
Chemicals.....	538,500	533,593
Textiles and clothing.....	944,900	860,699

Finance.—Under the Constitution of the Federal Republic of Germany, the Federal Government and the *Länder* are jointly entitled to the income and corporation tax. In 1968, 37 per cent. of the yield accrued to the Federal Government and 63 per cent. to the *Länder*. Customs and excise duties, other than the beer tax, and also the turnover tax accrue to the Federal Government, all other taxes (with the exception of local taxes, i.e. particularly taxes on land and buildings as well as the trade tax) to the *Länder*.

Preliminary figures of budgetary expenditure in 1968 are: Total expenditure DM. 79,024,000,000 (1967, 76,964,000,000); Defence DM. 19,236,000,000 (1967, 20,798,000,000); Social expenditure (including housing and welfare, DM. 21,865,000,000 (1965, 21,023,000,000); (about 28 per cent); Agriculture and food, DM. 5,148,000,000 (1967, 4,303,000,000) (about 7 per cent.); Transport, DM. 8,152,000,000 (1967, 8,910,000,000).

Currency.—The currency of the Federal Republic is the *Deutsche Mark* of 100 *Pfennig*, the rate of exchange with sterling being DM. 9·60 = £1. Limited exchange fluctuations are permitted. (See also p. 83.)

Foreign Trade.—In 1967, imports were valued at DM. 70,183,000,000 (1966, 72,670,000,000); and exports at DM. 87,045,000,000 (1966, 80,628,000,000); 23 per cent. of imports consisted of foodstuffs and 16·9 per cent. of industrial raw materials; 39·4 per cent. came from the Common Market countries; 15·7 per cent. from the E.F.T.A.* and 13·5 per cent. from the United States and Canada. The Common Market countries took 36·8 per cent. of all exports, the E.F.T.A. 23·7 per cent. and the United States and Canada 10·1 per cent.

Trade with U.K.

	1966	1967
Imports from U.K....	£253,436,000	£246,525,000
Exports to U.K.....	301,942,000	339,291,000

Communications.—The state-owned railways of

the Federal Republic measured 18,783 miles of which 4,341 miles were electrified, and the privately owned railways 2,639 miles, a total of 21,422 miles. In 1967 the railways handled 320,000,000 tons of goods and the inland waterways 214,438,000 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1967, 3,375 steam locomotives, 2,038 electric locomotives, 2,129 diesel locomotives, 18,916 passenger coaches, 881 rail buses and 283,262 goods waggon. Classified roads measure 158,395 miles. On Jan. 1, 1968, there were registered 11,292,900 cars, 954,500 commercial vehicles (incl. buses) and 1,331,800 tractors. Ocean-going shipping under the German flag in Dec., 1967, amounted to 6,524,000 tons gross (2,693 ships). Civil aircraft in service at the same date totalled 115 aircraft.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the second and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a decent standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646-1716) to Kant (1724-1804), Fichte (1762-1814), Schelling (1775-1854) and Hegel (1770-1831); the drama from Goethe (1749-1832) and Schiller (1759-1805) to Gerhart Hauptmann (1862-1946); and in poetry, Heine (1800-1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1912), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). In 1967 there were 1,358 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14 (or 15). In May, 1966, there were in the Federal Republic 28,452 primary schools (*Volksschulen*) with 155,205 teachers and 5,375,002 pupils. Intermediate schools (*Realschulen*) numbered 1,479 with 21,410 teachers and 552,767 pupils. The number of secondary schools (*Höhere Schulen*) was 1,801 with 48,418 teachers and 963,182 pupils. The number of unified schools combining primary and secondary education (*Schulen mit neuorganisiertem Schulaufbau*) in Hamburg, Bremen and Berlin (West) was 928 with 17,979 teachers and 432,467 pupils; the number of *Freie Waldorf-Schulen* was 25, with 754 teachers and 12,674 pupils.

There were also 1,641 special schools (*Sonderschulen*) for retarded, physically and mentally handicapped and socially maladjusted children in the Federal Republic with 10,834 teachers and 198,833 pupils.

The secondary school leaving examination (*Abitur*) entitles the holder to a place of study at a

* Common Market: W. Germany, Belgium and Luxembourg, France, Italy, Netherlands.

* E.F.T.A. (European Free Trade Association): Austria, Denmark, Norway, Portugal, Sweden, Switzerland, U.K.

university or another institution of higher education. The number of examinations passed in 1966 was 51,278.

Children below the age of 18 who are not attending an intermediate or secondary school are obliged to take a three-year course (part-time) at a vocational school. In November, 1966, there were 1,814 part-time vocational schools (*Berufsschulen*) with 24,765 teachers and 1,747,444 pupils, 2,170 full-time vocational schools (*Berufssachschulen*) with 8,102 teachers and 176,095 pupils and 2,902 advanced vocational schools (*Fachschulen*), including 142 engineering schools (*Ingenieurschulen*), with 11,664 teachers and 212,438 students. [State expenditure for primary schools per annum amounted to DM 1,098 per pupil, for intermediate schools DM 1,697, and for grammar schools DM 2,424. State expenditure per pupil for part-time vocational, full-time vocational and advanced vocational schools per annum amounted to DM 937.] In the summer term 1967 there were 21 universities (222,950 students; 9,939 on leave), 9 technical universities (*Technische Hochschulen*) (53,381 students; 1,906 on leave), 21 other scientific colleges (6,898 students; 202 on leave), 26 colleges of fine arts and music (*Kunst- und Musikhochschulen*) (8,607 students; 357 on leave), 1 college for physical education (*Sporthochschule*) (735 students; 110 on leave); \square total of 268,193 German and 24,378 foreign students. In the winter term 1966-67 there were also 109 teachers' training colleges (*Pädagogische Hochschulen*) (54,794 students). The largest universities are in Munich, Cologne, Hamburg, West Berlin, Munster (Westf.), Frankfurt, Bonn, Freiburg and Heidelberg. There were 1,192 adult education centres. The attendance figure for 1967 was 4,179,200.

Religion.—In 1965 there were 29,100,000 Protestants in the Republic, 27,500,000 Roman Catholics and (Dec., 1966), 26,134 Jews.

CAPITAL. Bonn, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 137,960 (Dec. 31, 1967).

FLAG.—Horizontal bars of black, red and gold.

Head of Visa Section (Düsseldorf), A. E. Higgs.

Chaplain, Rev. P. Durnford.

Archivist, E. H. L. Ellis.

Accountant, A. W. H. Rumsey, M.B.E.

There are British Consulates-General at Berlin, Hamburg, Hanover, Düsseldorf, Frankfurt, Munich and Stuttgart; and a British Vice-Consulate at Bremen.

BRITISH COUNCIL

Representative, J. McDonaugh, O.B.E., Hahnenstrasse 6, Cologne. There are British Council offices at Berlin, Hamburg, Frankfurt and Munich.

BERLIN

G.O.C. British Sector, Maj.-Gen. F. J. C. Bowes-Lyon, O.B.E., M.C.

Deputy Commandant (Minister), R. G. A. Etherington-Smith, C.M.G.

Political Adviser, P. H. Laurence, M.C.

EASTERN GERMANY

(For MAP, see p. 864)

Area and Population.—The territory of East Germany, an area 41,380 sq. miles in extent, is that of the five former German *länder* of Brandenburg, Mecklenburg, Saxony, Saxony-Anhalt and Thuringia and includes Eastern Berlin, the walled-off former Russian zone of the city. The population of Eastern Germany was officially estimated at 15,988,000 in June, 1966, 1,312,000 less than in October, 1946. The former *länder* were abolished in July, 1952, and divided into the 14 *Bezirke* (regions) of Potsdam, Cottbus and Frankfurt (formerly Brandenburg); Rostock, Schwerin and Neubrandenburg (formerly Mecklenburg); Karlmarstadt, Dresden and Leipzig (formerly Saxony); Halle and Magdeburg (formerly Saxony-Anhalt); Erfurt, Gera and Gohl (formerly Thuringia).

Government.—The Constitution of the "German Democratic Republic" in force from Oct. 7, 1949, came to an end with the approval of a new "socialist draft constitution" by the East German *Volkssammer* (People's Chamber) on March 26, 1968. The supreme organ of State power is the *Volkssammer*, which has power to elect and dismiss the State Council, the Council of Ministers, the Chairman of the National Defence Council, the Supreme Court and the Procurator-General. The State Council is, between sessions, responsible to the *Volkssammer* for the execution of all its laws and decisions and must convene the Chamber on the demand of one-third of the Deputies. Decrees and decisions of the State Council confirmed by the Chamber have the force of law. The executive, with collective responsibility, is the *Council of Ministers*. Among items of the 1949 Constitution omitted from that of 1968 were the former rights of the trade unions to strike, of citizens to emigrate, and of newspapers to publish without censorship.

The German Democratic Republic is not recognized by the governments of Western countries.

The present *Volkssammer* is that elected on July 2, 1967. The office of President having been abolished on Sept. 12, 1960, presidential powers are exercised by the Council of State.

Council of State

Chairman, Herr Walter Ulbricht.

Deputy Chairmen, Herr Willi Stoph; Prof. Johannes Dieckmann; Herr Gerald Götting; Dr. Heinrich Homann; Dr. Manfred Gerlach; Herr Hans Rietz.

Members, Prof. E. Correns; Herr F. Ebert; Herr E. Grützner; Frau B. Hanke; Prof. Lieselott Herfurth; Herr F. Kind; Frau Else Merke; Dr. G. Mittag; Frau A. Neumann; Herr K. Riecke; Prof. H. Rodenberg; Herr H.-H. Simon; Herr K. Sorgenicht; Frau M. Schneider; Herr H. Schumann; Herr P. Strauss.

Council of Ministers

Prime Minister, Herr Willi Stoph.

1st Deputy Prime Minister, Herr Alfred Neumann.

Total membership of the Council is 38, including 10 other Deputy Prime Ministers, 13 holding principal portfolios and 13 holding portfolios of mainly technical nature.

GERMAN SOCIALIST UNITY (=Communist) PARTY

Politbüro of the Central Committee, F. Ebert; P. Fröhlich; G. Grüneberg; K. Hager; E. Honecker; H. Matern; G. Mittag; E. Mückenberger; A. Neumann; A. Norden; H. Sindermann; W. Stoph; W. Ulbricht; P. Verner; H. Warnke (*full members*); H. Axen; G. Ewald; W. Halbritter; W. Jarowinsky; G. Kleiber; M. Müller; W. Lamberz (*alternate members*).

Secretariat of the Central Committee, Walter Ulbricht (1st); H. Axen; G. Grüneberg; K. Hager; E. Honecker; W. Jarowinsky; W. Lamberz; G. Mittag; A. Norden; P. Verner.

Economic Position.—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore. Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The U.S.S.R. claimed reparations from Germany to a value of \$ (1938) 10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone paid reparations from current production to the U.S.S.R. until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large steel plants have been erected at Füstenberg/Oder and at Calbe, and crude steel production is now greater than before the war.

The East German Government announced on April 14, 1960, that collectivization of agriculture in East Germany had been completed, the only exceptions being a few small areas unsuitable for large-scale farming.

Trade with U.K.

	1966	1967
Imports from U.K.	£15,913,000	£13,495,000
Exports to U.K.	£3,538,000	£2,152,000

Principal cities and towns: Dresden (467,966); Leipzig (607,655); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862), and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

GREECE

(Hellas)

King of the Hellenes, Constantine XIII, born June 2, 1940; acceded (on the death of his father King Paul), March 6, 1964; married Sept. 18, 1964, H.R.H. Princess Anne-Marie of Denmark (born Aug. 30, 1946); and has issue:

Crown Prince Paul, born May 20, 1967; H.R.H. Princess Alexia, born July 10, 1965.

CABINET

Prime Minister and Minister of Defence, George Papadopoulos.

1st Deputy Premier and Minister of Interior, Stylianos Patakos.

2nd Deputy Premier and Minister for Northern Greece, Demetrios Patilis.

Foreign Affairs, Panayotis Pipinelis.

Co-ordination, Nikolaos Makarezos; Ioannis Orlan-dos-Rodinos (*Deputy*).

Education, Theofylaktos Papaconstantinou.

Finance, Adamantios Androustopoulos.

Commerce, Epaminondas Tselos.

Industry, Constantine Kypraios.

Public Works, Constantine Papadimitriou.

Communications, Spyridon Lizardos.

Agriculture, Alexandros Matthaiou.

Public Welfare, Prof. Loukas Patras.

Merchant Marine, Prof. Ioannis Holevas.

Justice, Prof. Ioannis Triantafyllopoulos.

Labour, Apostolos Voyatzis.

Public Security, Panayotis Tzevelekos.

ROYAL GREEK EMBASSY IN LONDON

51 Upper Brook Street, W.1

[01-629-0694]

Ambassador Extraordinary and Plenipotentiary, His Excellency Panagiotis Verykios (1967).

Minister Plenipotentiary (Special Adviser), M. Cos-matos.

Counsellors, Eustace Lagacos; E. Antonopoulos (*Consular*); D. Manolatos; E. Bacarinos (*Commer-cial*); C. Roussen (*Press and Information*).

Naval, Military and Air Attaché, Cdre. J. Athanasiou, 71 Park Street, W.1.

2nd Secretary, P. A. Tsounis.

3rd Secretary, P. Apostolides (*Consular*).

Shipping Attaché, Cdr. T. Tsalas.

Attachés (Press and Information), A. Kovatsis; G. Kalfoglou; C. Tsikos.

Attachés, C. Lambropoulos; J. Villiotis, M.V.O.

Asst. Commercial Attaché (Agriculture), C. Kon-doyiannis.

Commercial Secretary, P. Karoussos.

Consulate General, Department of Information and Commercial Department, 49 Upper Brook Street, W.1.

There are Honorary Consulates at Birmingham, Bradford, Bristol, Falmouth, Hull, Immingham, Liverpool, Newcastle, Plymouth, Portsmouth, Southampton, Cardiff, Swansea and Glasgow, and at Belfast.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. A census held throughout the country on March 19, 1961, recorded a population of 8,388,553; (estimated 1966) 8,614,000.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos

and the island of *Thasos*), *Thrace* (including the island of *Samothrace*), *Epirus*, *Thessaly*, *Continental Greece* (which includes the island of *Euboea* and the *Sporades*, or "scattered islands," of which the largest is *Skyros*), the *Peloponnesus* (or *Morea*), the *Dodecanese* or *Southern Sporades* (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khaliki and Tilos, the *Cyclades* (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the *Ionian Islands* (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the *Aegean Islands* (Chios, Lesbos, Limnos and Samos). In Crete there was for over 1,500 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Knossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

Government.—Four successive Governments of the National Radical Union Party under M. Karamanlis held office from October, 1955, to June, 1963, when M. Karamanlis resigned after King Paul had refused to accept his advice that the state visit to Britain should be postponed in view of incidents in London. A Government of the Centre Union Party under M. Papandreou was returned at the elections of November, 1963, but did not have an overall majority in Parliament. At the elections of February 26, 1964, the Centre Union was returned to power with a comfortable majority. After a disagreement with the King, however, M. Papandreou resigned in July, 1965. A Cabinet formed in September, 1965, by M. Stephanopoulos consisted of Centre Union deputies who had broken with M. Papandreou and was dependent for its majority on the tolerance of the National Radical Union.

In December, 1966, a caretaker government was appointed and the way seemed clear for elections to be held in May, 1967. A military coup on April 21, 1967, however, suspended parliamentary government and, following an unsuccessful royal counter-coup on December 13, 1967, the King went into voluntary exile. He now lives in Rome. How-

ever, the Government announced that a new constitution would be submitted to a National Referendum on September 1, 1968, as a first step towards a return to parliamentary rule.

Defence.—The Navy has 65 major war vessels, almost all of U.S. origin, and is mainly a fleet of landing ships supported by destroyers and other escort vessels. The strength of the Army is 116,000. The Air Force consists of 28,000 men, eleven offensive squadrons, two transport squadrons and one helicopter, together with the necessary support, training and maintenance organizations.

Communications.—The 2,650 kilometres of Greek railways are State owned with the exception of the Athens-Piraeus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Greek roads total somewhat over 50,000 kilometres, of which about 30 per cent. are classified as national highways and 30,000 km. are classified as provincial roads.

In March, 1968, the Greek mercantile fleet numbered 1,872 ships with a total tonnage of 8,185,864 tons gross. No exact figures are available for Greek-owned ships registered under foreign flags but there has been a significant increase over the 1966 figures of 1,012 ships (12,039,867 tons gross). Athens has direct airline links with most countries in Europe and the Middle East.

Religion.—Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Ecumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has jurisdiction over the Church of Crete, which has a degree of autonomy under the Ecumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Ecumenical Patriarch.

Education.—Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are three Universities, Athens, Salonic (which also has departments of Philosophy and Mathematics at Ioannina) and Patras. There are several other institutes of higher learning, mostly in Athens.

Language and Literature.—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevousa*, a conservative literary dialect evolved by Adamantios Korais (Diamantios Coray), who lived and died in Paris (1748-1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854-1929). The poets Solomos, Palamas, Cavafis, Sikelianos and Seferis have won a European reputation.

Production.—Though there has in recent years been a substantial measure of industrialization, Greece is still predominantly an agricultural country. Agriculture employs about half the working population, the most important product and export being tobacco, which still accounts for about one-third of the value of total visible exports from Greece. Since the war the production of wheat, cotton and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, almond, pomegranate and currant-vine, and considerable efforts have lately been made to develop exports of Greek fresh fruit and vegetables.

as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are bauxite, iron ore, iron pyrites, manganese, magnesite, chrome, lead, zinc and emery, and prospecting for petroleum is being carried on. Oil refineries are in operation near Athens and at Salonika, where there is also a petro-chemical plant. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. In recent years new factories have been opened for the production of aluminium, nickel, iron and steel products, tyres, chemicals, fertilizers and sugar (from locally-grown beet). Food processing and ancillary industries have also grown up throughout the country. The development of the country's electric power resources, irrigation and land reclamation schemes, and the exploitation of Greece's lignite resources for fuel and industrial purposes are also being carried out, and a television network is planned for the near future. Efforts are also being made to develop tourism more rapidly. Greece continues to receive limited aid from the United States mainly in the form of military equipment and foodstuffs. She also receives grants from NATO countries to assist her defence programme and loans from member countries of the O.E.C.D. consortium.

Currency.—The Greek drachma has an official exchange rate of 72 = £1 sterling and 30 = U.S. 1\$. (See also p. 83.)

	1966	1967

BRITISH COUNCIL

Representative, W. J. Ball, M.B.E., 17 Filikis Etarrias 17, Kolonaki Square, Athens 138 (Cultural Attaché).

GUATEMALA

(República de Guatemala)

President, Dr. Julio Cesar Mendez Montenegro, elected for 4 years March 6, 1966; assumed office, July 1, 1966.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from $13^{\circ} 45'$ to $17^{\circ} 49'$, and in W. long. from $88^{\circ} 12' 49''$ to $92^{\circ} 13' 43''$, and has an area of 42,042 square miles, and a population (estimated, 1967) of 4,717,000 (for MAP, see p. 874). The constitutionally elected president, Gen. Miguel Ydígoras Fuentes, who had taken office on March 3, 1958, was overthrown on March 31, 1963, by the Army, which handed executive and legislative powers to the Minister of Defence, Col. Enrique Peralta Azurdia. Important changes were included in a new constitution promulgated on Sept. 15, 1965, including the reduction of the presidential term from 6 to 4 years and the establishment of a Council of State under the chairmanship of a Vice-President. Elections for a new Congress and for President and Vice-President took place on March 6, 1966. Dr. Mendez failed to obtain an absolute majority under the Constitution but was duly chosen as President at the first meeting of the new Congress on May 5.

The Republic is divided into 14 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec. 1927. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief Ψ seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Matias de Gálvez (formerly Santo Tomás) and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital, education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

Finance.—Revenue and expenditure balanced at Quetzales 178,000,000 in 1968, compared with Quetzales 190,600,000 in 1967.

At par 1 Quetzal = \$1 U.S. (See also p. 83.)

TRADE

	1965	1966
Imports (c.i.f.).....	229,300,000	207,000,000
Exports (f.o.b.).....	185,800,000	226,000,000

Trade with U.K.

	1966	1967
Imports from U.K....	£3,632,000	£3,045,000
Exports to U.K.....	642,000	762,000

The principal export is coffee, other articles being bananas, cotton, chicle (chewing gum), essential

oils, zinc and lead. The chief imports are textiles, petroleum, vehicles, machinery and foodstuffs.

CAPITAL, Guatemala. Pop. (1964), 572,900. Quezaltenango (second city of the Republic), has a pop. of 38,400. Other towns are Puerto Barrios (32,100), Mazatenango (32,400), and Antigua (22,000).

FLAG.—Three vertical bands, blue, white, blue; coat of arms on white stripe.

BRITISH EMBASSY

(Diplomatic relations suspended, July 31, 1963).

GUINEA

(Republic of Guinea)

President, Ahmed Sékou Touré, elected for a term of 7 years, January, 1961; re-elected, 1968.

President of National Assembly, Léon Maka.

CABINET

Minister of State for Financial Planning, El Hadj Diallo Saïfoulaye.

Foreign Affairs, Dr. Lansana Beavogui.

Army and Civil Service, Gen. Diane Lansana.

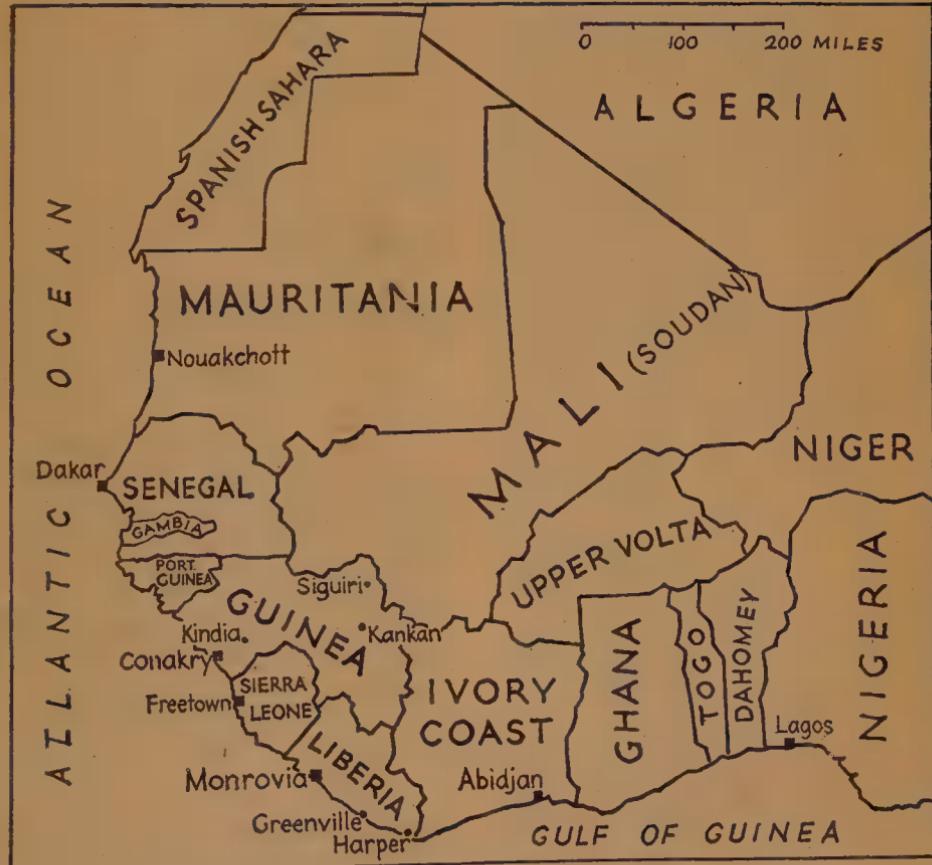

Economic Development, Ismael Touré.

Health and Social Affairs, Dr. Touré Mamouna.

Commerce, Kéita N'Famara.

15 Secretaries of State and 4 Ministers-Delegate for the regions (Forestal, Upper, Middle and Maritime Guinea) were also appointed in January, 1968.

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Portuguese Guinea and Sierra Leone and in the interior is adjacent to Senegal, Mali, Ivory Coast, Liberia and Sierra Leone (see below). Area, 96,865

sq. miles. The population was estimated in July, 1967 at 3,702,000, mostly the Fullah, Malinké and Soussou tribes. It is estimated that there are about 2,000 Europeans in the country.

Government.—Guinea was separated from Senegal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had

adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. M. Sékou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for

re-election, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, 1961 and re-elected in 1968. General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the Guinean franc (at par with the franc C.F.A.). This led to the rupture of commercial relations with France, hitherto her most important supplier and purchaser. Guinea is in receipt of economic aid and technical assistance from a number of countries, including the United States, Federal Republic of Germany, Yugoslavia, the Soviet Union and China. The Government's foreign policy is one of "positive neutralism" and non-alignment. In May, 1963, Guinea signed agreements with France covering *inter alia* the settlement of Governmental claims and technical co-operation. Diplomatic relations with U.K., suspended in December, 1965, were resumed on Feb. 20, 1968.

Production, etc.—The principal products of Guinea are alumina, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. In the mountains in the hinterland of Guinea (Fouta Djalon, 4,970 feet), where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) are worked and alumina is produced for export. Bauxite has been worked and exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on. There are a British-built cotton mill and a Chinese-built cigarette and match factory.

	Trade with U.K.	
	1966	1967
Imports from U.K.	£855,000	£388,000
Exports to U.K.	796,000	185,000

CAPITAL.—Conakry (120,000). Other towns are Kankan (29,000), which is connected with Conakry by a railway, Kindia (25,000), N'Zérékoré, Mamou, Siguiri and Labé.

FLAG.—Three vertical stripes of red, yellow and green.

NATIONAL DAY.—October 20 (Anniversary of Proclamation of Independence).

BRITISH EMBASSY Conakry.

Ambassador Extraordinary and Plenipotentiary, His Excellency John Noel Ormiston Curle, C.M.G., C.V.O. (1968).

Hon. British Consul, J. Buhagiar, c/o Paterson Zochonis Guinée S.A., B.P. 598, Conakry.

HAITI (République d'Haiti)

President, Dr. François Duvalier, installed Oct. 22, 1957; re-installed for life, June 22, 1964.

EMBASSY AND CONSULATE Office: ■ Hans Road, S.W.3.; Residence: 69 Cadogan Square, S.W.1.

[0x-580-4443/4]

Charge d'Affaires, Delorme Mèhu.

The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic, including off-shore islands, is about 10,700 sq. miles with population (estimated, 1966) of 4,485,000. The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood. About 250 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Domingue from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former negro slave, who, on January 1, 1804, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The six-year term of General Magloire having ended in December 1956, he attempted to stay in power for a further period but was forced to resign and go into exile. A period of political upheaval followed and for many months there was no effective government. A military junta took over in June, 1957, and elections were held in September, following which Dr. Duvalier was installed as the new President of the Republic. He began a second term in 1961 and in May, 1964, a new constitution granting absolute power to the President was adopted by the National Assembly. Dr. Duvalier was re-elected as life President on June 15, 1964, following organized demonstrations and a "national referendum".

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of productivity. The main project is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley.

The principal products are coffee, sisal, sugar, essential oils, bananas, cocoa and cotton. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite began in 1957 and production of copper in the Terre Neuve area started in 1960. Industry is still on a small scale. The tourist trade expanded until 1956, since when it has fallen off owing to political upheavals. With the establishment of a National Tourist Office, in July, 1964, fresh efforts are being made to re-activate tourism which could make an important contribution to revenue. The country is one of the most beautiful in the Caribbean.

Communications.—There are very few asphalted roads and internal communications are very bad. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army. The principal towns and villages are connected by telephone and/or telegraph. Much of the internal telephone and telegraph system is permanently out of order. The reinstallation which was being carried out by a British firm was stopped in 1957 and has not been resumed. External telegraph, telephone and postal services are normal. There are several commercial radio stations and a television station at Port-au-Prince.

Air services by Pan-American World Airways and Air France are operated 3 times weekly, and there are passenger sailings every 10 days (approx.) for New York by the Grace Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. (Air mail U.K./Port-au-Prince, 4-7 days.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the language of the government and the press, but it is only understood by the educated minority. The usual language of the people is Creole. Education is free but estimates of illiteracy are as high as 90 per cent. There are 3 French daily newspapers and several weekly papers including in English. The total circulation is very small.

Finance.—The International Monetary Fund has granted Haiti a stand-by credit of \$U.S.4,000,000 renewable annually.

HONDURAS

(República de Honduras)

President, General de Brigada Don Oswaldo Lopez Arellano; assumed office June 6, 1965.

HONDURAS EMBASSY AND CONSULATE
104 Great Portland Street, W.1.
[01-580-6103]

Ambassador (vacant).

1st Secretary (Chargé d'Affaires), Dr. Juan Miguel Fájolos Castillo.

2nd Secretary, Sr. Ramon Humberto España Nini. Consulate, 48 George Street, W.1. [01-486-4880].

There is a Consular Office at Birmingham.

Honduras, one of the six Republican States of Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains a total area of approximately 43,278 square miles and a population of 1,884,765 (Census of 1960); estimated, 1967, 2,500,000, of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras. Most of the soil is poor and acid, except for a few areas along the North coast and in the interior. Rainfall is seasonal, May to October being wet and November to April dry. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

On October 3, 1963, the Armed Forces overthrew the constitutional Government and established a Military Government with the Commander-in-Chief as its head. Elections for a constituent assembly took place in February, 1965, resulting in a victory for the Nationalist Party who elected the Head of Government as Constitutional President.

The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, tobacco, beans, maize, rice, cotton, sugar cane, cement and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but only a small portion is at present exploited owing to transport difficulties.

There are about 730 miles of railway in operation, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage

is approximately 2,260, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 33 unpretentious airports and two international airports in use in Honduras. A new international airport suitable for jet aircraft has been built near San Pedro Sula. There are numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and 2 domestic air services (SAHSA and Aero Servicios). There are 1,646 miles of telephone lines, 5,324 miles of telegraph lines and 488 post-offices.

The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free, primary education being compulsory, and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

Commercial Attaché, M. István Mohácsi, 46 Eaton
Place, S.W.1 [01-235-8767].

Area and Population.—The area of Hungary may
be stated as approximately 36,000 sq. miles with a
population (Jan. 1, 1967) of 10,197,000.

Government.—Hungary was reconstituted a king-
dom in 1920 after having been declared a republic
on Nov. 17, 1918. She joined the Anti-Comintern
Pact on Feb. 24, 1939, and entered the 1939-45
War on the side of Germany in 1941. On Jan. 20,
1945, a Hungarian provisional government of
liberation, which had been set up during the
preceding December, signed an armistice under the
terms of which the frontiers of Hungary were
withdrawn to the limits existing in 1937.

For the first four years after the liberation,
Hungary was governed by a coalition of the Small-
holder, National Peasant, Social Democrat and
Communist parties. During this time land reform
was carried out, the great landowners being dis-
possessed and their estates partitioned among
peasants; mines, heavy industry, banks and schools
were nationalized. By 1949 the Communists, under
the leadership of Mr. Rákosi, having compelled
the Social Democrat Party to merge with them,
and having disrupted the peasant parties, had
succeeded in gaining a monopoly of power. Elec-
tions in that year, in which candidates for the
National Assembly were drawn from a single list,
resulted in 95.6 per cent. of the votes cast being
obtained by the Communist-dominated People's
Front. A campaign was opened to collectivize
agriculture and by 1952 practically the entire
economy had been "socialized."

In mid-1953 Mr. Imre Nagy replaced Mr.
Rákosi as Prime Minister, though the latter con-
tinued to hold his post as First Secretary of the
Party. Mr. Nagy introduced a more moderate
policy based largely on the development of agri-
culture rather than heavy industry; but in April,
1955, Mr. Rákosi succeeded in turning the tables on
his rival who was removed from his position as
Prime Minister and subsequently expelled from the
Party. But after the 20th Congress of the Soviet
Communist Party, opposition to Mr. Rákosi with-
in the Hungarian Communist Party mounted and
on July 18, 1956, he was removed from his post as
First Secretary and succeeded by Mr. Gerő, who
had been one of his closest associates. The period
from July to the outbreak of the national revolution
on Oct. 23, 1956, was marked by growing
ferment in intellectual circles and increased discord
within the Party. The immediate signal for the
revolt was a series of students' demonstrations, first
in Szeged on Oct. 22 and in Budapest a day later.
The chief demands put forward by students and
other demonstrators were for the return of Mr.
Nagy as Prime Minister, for the withdrawal of
Soviet troops from the country and for free elec-
tions. Fighting broke out on the night of Oct. 23
between demonstrators, who had been joined by
large numbers of factory workers, and the State
Security Police (A.V.H.). Soviet forces intervened
in strength early the next morning. By Oct. 30
Soviet troops had withdrawn from Budapest and
on Nov. 3 Mr. Nagy formed an all-party coalition
government. This government was overthrown
and the revolution suppressed as the result of a re-
newed attack by Soviet forces on Budapest in the
early hours of Nov. 4. Simultaneously the forma-
tion of a new Hungarian Revolutionary Worker
Peasant Government under the leadership of Mr.
Kádár, Mr. Gerő's successor as First Secretary of the
Party, was announced. The trial and execution of
Imre Nagy and three of his associates was announced
on June 17, 1958. Dr. Ferenc Münnich succeeded

as President of the Council of Ministers on Jan. 27, 1958, and held office until Sept. 13, 1961, being replaced by Mr. Kádár. Several other Ministers were replaced at the same time. Mr. Kádár relinquished the post of President of the Council of Ministers in June, 1965, and was succeeded by Mr. Kállai. In April, 1967, Mr. Fock replaced Mr. Kállai as Prime Minister and two new Deputy Prime Ministers were appointed. Mr. Kádár continues as First Secretary of the Hungarian Socialist Workers' Party.

Production, Industry, etc.—Though industrialisation has made considerable progress in the last decade, agriculture still occupies an important place in the Hungarian economy and 58 per cent. of the total area of the country is arable land. 14·2 per cent. of this arable land is owned by state farms and 80·3 per cent. by co-operative farms. Production of the most important crops in 1966 was as follows (1,000 tons): Wheat, 2,192; rye, 242; barley, 916; maize, 3,907; rice, 31; oats, 72; potatoes, 2,433; sugar beet, 3,570; sunflower seed, 102; green maize, 1,333; silage maize, 3,429; lucerne, 1,368.

Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, considerable deposits of natural gas (some not yet under full exploitation), some iron ore and oil. Output figures in 1966: coal, 30,348 tons; bauxite, 1,429,000 tons; steel, 2,649,000 tons; crude oil, 1,706,000 tons; cement, 2,610 tons. Natural gas production reached 1,900,000,000 cu. metres in 1967.

The output of raw materials and general industrial production were sharply reduced by the revolution of Oct., 1956, but all the ground then lost has since been made up and industrial production rose by 9 per cent. in 1967. This increase exceeded the planned rise in all fields except agriculture. A new system of economic management was introduced on Jan. 1, 1968, which provides for greater decentralization, profitability and profit-sharing.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3–6, general schools 6–14 (compulsory), vocational schools (15–18), secondary schools (15–18), universities and adult training schools (over 18). In the academic year 1966–67 there were 89,544 students at institutions of higher learning, 37,734 at secondary schools and 1,380,286 at general schools.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800–1855), Sándor Petőfi (1823–1849), János Arany (1817–1882), Endre Ady (1877–1918), Attila József (1905–1937), Mihály Babits (1883–1941) and Dezső Kosztolányi (1885–1936).

Finance.—The budget estimates for the year 1968–69 were: Revenue, Forints 135,600,000,000; Expenditure, Forints 137,000,000,000. The Forint (of 100 Filler) has an official exchange value of 28·18 Forints = £1. The tourist exchange rate is 71·93 Forints = £1.

EMBASSY IN LONDON

1 Eaton Terrace, S.W.1

[01-730-5131-2]

Ambassador Extraordinary and Plenipotentiary. His Excellency Guðmundur Guðmundsson, K.B.E. (1965)

Counsellor. M. Ólafur Benedikz.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,500 square miles, or about one-sixth greater than that of Ireland. The population was 199,526 on Jan. 1, 1968.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of seven Ministers, responsible to the *Althing*, a Parliamentary assembly of 60 members. The present government, elected in June, 1967, is a coalition of Conservatives and Social Democrats, with the Progressive and Communist parties forming the Opposition.

Iceland lives very largely by her catching and export of fish, and this is held to justify an extension of exclusive fishery limits round her coast to a greater extent than that hitherto sanctioned by international law. The extended Icelandic limits were in dispute between 1952 and 1961, Iceland

claiming the right to a 12-mile fishery limit. After lengthy negotiation between the Icelandic and British Governments, the dispute was settled by an Exchange of Notes on March 11, 1961, by which the United Kingdom Government agreed that it would no longer object to a 12 mile fishery zone around Iceland and the Icelandic Government agreed that United Kingdom fishing vessels could fish within certain specified zones between 6 and 12 miles for a period of 3 years.

The principal products of the island are fish, fish oils, whales, mutton, wool and ponies. The principal exports are fish, fish meals and oils, whale oil and meat, and sheepskins; the imports consist of almost all the necessities of life, the chief items being petroleum, transportation equipment, textiles, machinery, base metals, wood and cork, and cereals.

At January 1, 1968, the mercantile marine consisted of 569 vessels of under 100 gross tons and 299 ships of 100 gross tons and over; a total of 868 vessels (149,861 gross tons). Principal types were: Fishing vessels, under 100 gross tons, 548 (18,382 gross tons); 100 and over, 208 (43,379 gross tons); Trawlers 100 tons and over, 30 (21,491 gross tons); Passenger and dry cargo ships, 37 (50,170 gross tons); Inspection ships, 5 (2,421 gross tons); and Oil Tankers, 7 (8,361 gross tons). There is a regular shipping service between Reykjavik, Leith and Copenhagen, fortnightly in summer and every three weeks in winter. Frequent but irregular services run between Reykjavik and Hull, and the Continent. One Icelandic cargo line has recently established a fortnightly service between Reykjavik and Hull via the Continent.

A regular thrice-weekly air service (daily in summer) is maintained between Glasgow and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A., Germany and Luxemburg.

Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres are well surfaced. The State highways and side roads are non-metalled (gravel and lava dust). The climate and terrain make first-class surfaces for highways out of the question. Iceland changed to right-hand driving on May 26, 1968, at an estimated cost of Kr.58,000,000 (£410,000). Total number of vehicles licensed is 43,000 (private cars, 36,000).

Language and Literature.—The ancient Norraena

(or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

INDONESIAN EMBASSY AND CONSULATE
 38 Grosvenor Square, W.1.

[Grosvenor: 7661]

Ambassador Extraordinary and Plenipotentiary, Lt.-Gen. Ibrahim Adjie (1966).

Minister-Counsellor, M. Buntarlan.

Military Attaché, Col. Edi Sugardo.

Air Attaché, Col. Sunaryo.

Naval Attaché, Capt. Atmodjo Brotodarmodjo.

Economic Counsellor, M. Jusuf Natananegara.

1st Secretary, M. Achmad Hussain Djaelani.

2nd Secretary (Press and Public Relations), Mlle. Sukartini Sabekti.

3rd Secretary (Economic), M. Arifin M. Janur.

3rd Secretary, M. Endoeng Sasmito.

Attaché (Administration), M. Juzar Sjahruddin Hadiz.

Attaché, Capt. Achmad Rasjid.

Situated between latitudes 6° North and 11°

South and between longitudes 95° and 141° East, Indonesia comprises the islands of Java and Madura, the island of Sumatra, the Riouw-Lingga Archipelago (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of Bangka and Billiton, part of the island of Borneo, Celebes Island, the Molucca Islands (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of Timor Island, the islands of Bali and Lombok and the western half of the island of New Guinea (West Irian), with a total area of 735,000 sq. miles, and a population (estimated, 1966) of 107,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War 1939-45, during which the Archipelago was occupied by the Japanese, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands of all the former Dutch East Indies except W. New Guinea took place on December 27, 1949.

Dr. Sukarno was elected President of Indonesia and held office until his deposition in 1967.

Following the establishment of Malaysia (including Sabah and Sarawak) in 1963, President

Sukarno pursued a policy of "confrontation" against it, involving border incursions in both West and East Malaysia. Commonwealth forces assisted Malaysian resistance. Western New Guinea became part of Indonesia in 1963 under the name West Irian.

On Sept. 30, 1965, an attempted coup d'état assisted by the Palace Guard resulted in the murder of six generals. The Indonesian Communist Party was charged with plotting to destroy the power of the Army and to set up a Peking-oriented regime, nominally under President Sukarno. The coup was swiftly crushed and a widespread massacre of Communists and their supporters followed. Sukarno remained in office but his Foreign Minister, Dr. Subandrio, among others, was arrested and later sentenced to death. The sentence had not been carried out by the summer of 1968.

Following a three-week period of unrest and violent student demonstrations the Minister of the Army, General Soeharto, took over effective political power in March, 1966, and announced the banning in Indonesia of the Communist Party.

The new regime concluded an agreement ending the "confrontation" with Malaysia on Aug. 11, 1966, and Indonesia resumed membership of the United Nations Organization which it had left in 1965. General Soeharto was made Acting President with full powers, on March 12, 1967.

Using his powers as Acting President, General Soeharto revised the membership of the two Houses of Parliament, and on March 28, 1968, the MPRS (Provisional People's Consultative Congress), the highest constitutional body, appointed him full President for a period of five years, and instructed him to arrange for general elections to be held not later than July 5, 1972; the last general elections were held in 1955. In accordance with another instruction General Soeharto on June 6 replaced the Ampera Cabinet with the Development Cabinet, i.e. one which was intended to reflect the emphasis to be placed henceforward on the development of the country, economic affairs, efficiency and expertise in general, and to reduce the direct influence of the military in the Government.

Finance.—Following new measures introduced by the Government in October, 1966, inflation declined from the rate of 600 per cent. in 1966 to a figure of approximately 110 per cent. for 1967. Bank notes in circulation in December, 1967, totalled *rupiahs* 38,863,000,000 compared with 16,635,000,000 at the beginning of the year. Following the agreement on the re-scheduling of Indonesia's debts in 1966, Western creditor nations agreed to make available aid amounting to \$200 million as balance of payments support for Indonesia for 1967. The new measures adopted by the Government in October, 1966, included the abolition of State controls and the introduction of a free market policy with more realistic exchange rates geared to a floating rate for the purchase of foreign exchange in the form of bonus export certificates for essential imports. The rate at the end of 1966 was about *Rps* 100 to the dollar and had risen to *Rps* 160 to the dollar by September, 1967. Following a crisis caused by a shortage of rice and foreign exchange at the end of the year the rate rose sharply and stood at just under 300 by the end of the year. Tourists and foreign residents in Indonesia are able to change currency at a rate near to, but slightly higher than the bonus export rate.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and pepper cloves are produced, mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estates. Rubber, tea, coffee and tobacco are also produced by both in large quantities. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers, but production is insufficient to meet home demands and substantial imports of rice are necessary.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits.

Trade with U.K.

There was a progressive decline in British exports to Indonesia after 1960. This became more marked during Indonesia's policy of "confrontation" against Malaysia which resulted in a disruption of normal commercial relations and stringent import controls due to lack of foreign currency, but exports improved in 1967 following the restoration of normal commercial relations.

	1966	1967
Imports from U.K.	£3,692,000	£5,745,000
Exports to U.K.	5,046,000	4,942,000

Principal exports to the United Kingdom are rubber, tea, coffee, spices and sugar. Imports from the United Kingdom are mainly of machinery, chemicals, electrical equipment, motor vehicles, cycles, lubricating and heavy oils, and metal goods.

Transport.—In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including a line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago are maintained by the State-run shipping companies Djakarta-Lloyd (ocean-going) and Pelti (coastal and inter-island) and other smaller concerns. In 1962 there were 13 ocean-going and 276 inter-island vessels in use by Indonesia. Transport by small craft on the rivers of the larger islands plays

an important part in trade. Air services in Indonesia are operated by Garuda Indonesian Airways and Djakarta is served by various international services. There are approximately 49,000 miles of roads.

CAPITAL.—Djakarta, formerly Batavia (population 4,500,000). Other important centres are: (Java) Surabaya, Semarang, Bandung, Tjeronibon, Surakarta and Djogjakarta; (Madura) Pamekasan (180,000); (Sumatra) Palembang (500,000), Medan (500,000) and Padang; (Celebes) Macassar (450,000) and Menado; (Borneo) Banjermasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000); (Bali) Denpasar and Singaraja (120,000); (W. Timor) Kupang (10,000); (W. Irian) Sukarnapura.

NATIONAL DAY.—August 17 (Anniversary of Proclamation of Independence).

FLAG.—Equal bands of red over white.

BRITISH EMBASSY

Djakarta

BRITISH CONSULAR OFFICES

There are British Consular Offices at Djakarta, Surabaya and Medan.

IRAN

(Persia)

Shahanshah of Iran, H.I.M. Mohammed Reza Pahlevi, born Oct. 26, 1919; acceded Sept. 16, 1941 (on abdication of his father Reza Shah Pahlevi); married (March 15, 1939), Princess Fawzieh, sister of ex-King Farouk of Egypt (marriage dissolved Nov. 17, 1948), and has issue a daughter born 1940. The Shah married (Feb. 12, 1951) Suraya Esfandiari Bakhtiari (marriage dissolved, April 6, 1958); married Dec. 21, 1959, Farah Dibah (Empress Farah Pahlevi) and has issue Crown Prince Reza, born Oct. 31, 1960; Princess Farahnaz, b. March, 1963; Prince Ali Reza, b. April 28, 1966.

(The coronation of the Shah and Empress Farah took place in October, 1967.)

Prime Minister, Amir Abbas Huvaida.

3rd Secretaries, Manoutchehr Ardalani; Abbas Makki.
Attachés, Parviz Azarnia; Miss Chirine Tahmasseb; Fereydoun Azarbeygui; Ebrahim Navai.

Area and Population.—Iran has an area of 628,000 sq. miles, with a population of 25,781,090 (Census of 1966); estimated March 31, 1967, 26,015,000. It is mostly an arid table-land, encircled, except in the east, by mountains, the highest in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Iranians are mostly Shi'ah Moslems but among them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Iran was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Iranian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlevi.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Reza Shah abdicated and left the country, nominating the Crown Prince as his successor.

The Prince ascended the throne under the title of Mohammed Reza Shah Pahlevi.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On February 26, 1963, the Shah announced his six point "White Revolution". The six points are: 1. A land reform designed to redistribute land and place it in the hands of the peasants. 2. Nationalization of all forest land. 3. The sale of government shares in factories and industrial enterprises to raise money for the implementation of the land reform. 4. The distribution of factory profits among the factory employees. 5. The granting of the vote to women. 6. The creation of a Literacy Corps to bring basic education to the rural areas.

For the purposes of local government the country is divided into 13 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The Ground Forces, which have a strength of about 60,000 regulars and 100,000 conscripts, are made up of 7 infantry and 1 armoured divisions grouped under three Army Headquarters. Their equipment is modern and includes the latest American tanks and some Russian vehicles. The Air Force has a strength of about 14,000. It is equipped with some 140 American aircraft including 100 jets. The Navy consists of a small fleet of frigates, minesweepers and patrol boats in the Persian Gulf, and some small craft in the Caspian Sea. The personnel of the Navy amounts to about 6,000 all ranks. The Gendarmerie is an all regular, para-military force of about 32,000 men which provides frontier guards and mans small posts throughout the country.

Education.—Since 1943 primary education has been compulsory and free. The establishment in 1963 of the Literacy Corps (a body of National Servicemen who are seconded to the Ministry of Education to work as Primary School teachers in rural districts) has brought schooling to hitherto deprived villages and is making a valuable contribution in increasing educational opportunities for country people. During the academic year 1964-65 there were a total of 2,470,755 children attending 13,620 schools. A little over a million of these were at Primary School. There are in Iran seven universities (Tehran (3), Tabriz, Meshed, Isfahan, Shiraz and Ahwaz) and attending these and other institutes of higher education there are just over 24,000 students.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kasim Mansuri, or Firdausi (A.D. 939-1020), Omar Khayyam, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389).

Press.—In Iran about 140 newspapers and magazines are published, over half of them in Tehran. Three papers in the capital have the status of national dailies. Two English and one French daily are also published in Tehran. Provincial publications have very small circulations.

Finance.—The budget for the Iranian year beginning March 21, 1968, including development expenditure, balanced at Rs. 274,580,000,000 (£1,500,000,000) an increase of 26 per cent. over 1967-68. The development budget balanced at

Rls. 99,820,000,000, an increase of 46 per cent. over 1967-68.

Following the devaluation of sterling in November, 1967, the rate of exchange was fixed at Rials 182 = £1.

Production and Industry.—While petroleum is the principal product and by far the greatest export, Iran, except for its desert areas, is essentially an agricultural country and three-quarters of the inhabitants depend for their living on the land. Wheat is the principal crop, using about half the area under cultivation. Other important crops are barley, rice, cotton, sugar beet, fruits and vegetables. Wool is also produced—sheep, as well as goats, being numerous. There are extensive forests in the north and west, the conservation of which is an urgent problem. The cultivation of opium is prohibited. A certain amount of progress has been made in the development of industry. Apart from oil, the principal industrial products are carpets, textiles (mainly cotton), sugar, cement and other construction materials, ginned cotton, vegetable oil and other food products, leather and shoes, metal manufactures, pharmaceuticals, automobiles, fertilizers, plastics, matches and cigarettes.

The oilfields had produced over 200,000 metric tons of oil from their first output to Dec. 31, 1946. Production had risen to a total of 35,000,000 metric tons in 1950, the last full year before nationalization. Oil shipments ceased in 1951 and were not resumed until Oct. 30, 1954.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Iran were taken over for an initial period of 25 years by a consortium of oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Iran £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Iran and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20-25 years. The consortium is responsible for the production, refining and sale of Iranian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Recent oil production figures are (in long tons): 1963, 70,497,000; 1964, 81,100,000; 1965, 91,600,000; 1966, 99,800,000; 1967, 129,300,000.

Communications.—The principal roads are from the frontier of Iraq at Khusruvi to Tehran; from Tehran via Saveh and Hamadan to Ahwaz and Khorramshahr; from Tehran via Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elbruz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, via Yezd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Iranian roads are not asphalted but gravel-surfaced, although the asphalting of main trunk routes is progressing steadily. Railways have been constructed since 1927. The Trans-Iranian Railway, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and Khorramshahr to

Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kashan is now in operation as is one from Bandar Shah to Gorgan.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. The Iranian National Airlines Corporation was formed from the former Iranian Airways and Persian Air Services in February, 1962. The Company is 51 per cent. Government-owned and operates internal and international routes. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, B.O.A.C., Qantas, P.I.A., Aeroflot, Alitalia, Aryana Airways and El Al operate services to Tehran.

	TRADE	
	1965-66	1966-67
Imports..	Rials 66,517,609,209	Rials 73,644,066,000

Exports.. 13,558,559,525 11,815,000,000 These figures are calculated at the commercial rate of exchange and exclude oil exports. Totals, including oil exports: 1965-66, Rials 107,773,525,308; 1966-67, Rials 103,881,000,000.

	Trade with U.K.	
	1966	1967
Imports from U.K.....	£39,047,000	£42,764,000

Exports to U.K..... 38,241,000 33,422,000 Imports into Iran consist mainly of industrial and agricultural machinery, iron and steel (including manufactures), electrical machinery and goods, sugar, chemicals and pharmaceuticals, motor vehicles and certain textile fabrics and yarns. The principal exports, apart from oil, are cotton, carpets, dried fruits and nuts, hides and skins, mineral ores, wool, gums, caviare, cummin seed and animal casings. West Germany, the U.S.A. and the U.K. are Iran's three leading suppliers. West Germany, the U.S.S.R., the U.K. and the U.S.A. are the main customers for non-oil exports.

CAPITAL: Tehran, population (1964), 2,317,000. Other large towns are Tabriz (388,000), Isfahan (340,000), Meshed (312,000), Shiraz (206,000), Resht (119,000), Kerman (73,000), Hamadan (115,000), Yezd (74,000), Kermanshah (152,000), Ψ Abadan (273,000), Ahwaz (145,000).

FLAG.—Equal horizontal bands of green, white and red; with arms (lion and sun) in centre.

NATIONAL DAY.—October 26 (Anniversary of Birthday of the Shahanshah).

The *Liwa* is the present Iraqi unit of administration, the *Vilayet* being the former Ottoman unit.

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzerum in the Dumlup Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the *Euphrates* at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal was elected King of Iraq. The country was a monarchy until July, 1958, when King Faisal II was assassinated. From 1958 until 1968 Iraq has been under Presidential rule with ■ succession of republican Cabinets: President Kassem (Qasim), 1958-63 (executed); President Abdul Salam Arif, 1963-66 (killed in an air accident); President Abdul Rahman Arif, 1966-68 (overthrown and exiled, July 17, 1968).

President Arif's régime ended in a bloodless military coup d'état on July 17, 1968, when Maj.-Gen. Ahmed Hassan al-Bakr was elected President by the Revolutionary Command Council. The Prime Minister, Gen. Yahya, was arrested. A Cabinet formed by Col. Abdul Razzah al Nayef on July 19 held office until July 30 when the Prime Minister was arrested and deported to Morocco. A further new Cabinet was formed by the President himself on July 31, retaining 12 of the Nayef Ministers (see col. 1).

Diplomatic relations with the United Kingdom were suspended by Iraq when hostilities broke out in 1967 between Israel and the surrounding Arab states.

Production and Industry.—Iraq is capable of supporting ■ considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *Liwas* is sufficient for the needs of the country. Production of crude oil in Iraq totalled 962,609 long tons in 1935, rising to 4,162,939 long tons in 1938. Revised production figures for the years 1953-1966 are:

	Long Tons	Long Tons	
1953....	27,220,199	1960....	46,534,398
1954....	20,615,569	1961....	45,851,135
1955....	32,716,227	1962....	48,214,537
1956....	30,606,282	1963....	53,256,530
1957....	21,361,979	1964....	60,348,000
1958....	34,931,461	1965....	64,664,000
1959....	40,897,676	1966....	63,150,000

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government action. An economic and technical co-operation agreement was signed with the Soviet Union in 1960, providing for the setting up of specified industries. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel fabrications including furniture, tanning, textiles, footwear and vegetable oils.

Communications and Trade.—New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. Under the terms of the Permanent Economic Plan, 1961–66, 51 per cent. of all oil royalties is allocated for development projects. A minimum of £25,000,000 per annum is guaranteed, but oil revenues by 1962 had reached £95,137,336 for the year. The Permanent Economic Plan provides for a total expenditure of ID556,000,000 on industry, communications, agriculture and building construction. The industrial projects include 13 factories being supplied under the Iraq/Soviet agreement. Contracts for 9 of these were signed in 1961.

The port of Basrah is well equipped and able to handle expeditiously all seaborne traffic. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has been dredged. The desert route between Baghdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent via Basrah.

Airports for the use of international air traffic have been provided at Baghdad and Basrah (Maqil). BOAC provides a thrice-weekly service between London and Baghdad, which is also served by Iraqi Airways and airlines of Iran, the Lebanon, the Netherlands, Italy, West Germany, Switzerland, Czechoslovakia and Pakistan. Iraqi Airways operates a daily service to Basrah and services from Baghdad to Mosul, Kirkuk, the Persian Gulf, Amman, Beirut, Cairo, Damascus, Tehran, Athens, Istanbul, Rome, Zürich, Prague, Vienna, Frankfurt, London, Karachi and Bombay.

Iraqi Republican Railways provide a regular passenger and goods service between Baghdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanqaqin, Kirkuk and Arbil. The railway line from Baghdad to Mosul, linking up through Syria and Turkey with the Mediterranean and the Bosphorus, is standard gauge.

Language, Literature and Archaeology.—The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts.

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C. as investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Excavations in 1948 at Tel Abu Shahraein, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul Liwa covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. A British archaeological expedition carried out excavations at Nimrud, in the same area, from 1950 to 1963, and is now working at Tell Rimah.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the Garden of Eden. The "Tree of Knowledge," which had stood there "from time immemorial," withered and died in December, 1946. It has been replaced by a shoot said to be from the original tree.

FINANCE

Total revenue....	ID143,110,000	ID169,595,000
Total expenditure....	141,620,000	180,304,000
The Iraqi Dinar of 1,000 Fils = £1 sterling.		

TRADE

(Excluding oil)

	1964	1965
Total imports....	ID147,450,000	ID160,931,000
Total exports....	15,300,000	18,120,000

Trade with U.K.

	1965	1966
Imports from U.K.....	£25,835,000	£16,688,000
Exports to U.K.....	65,554,000	23,520,000

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports—crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbasid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an urban population of 1,106,139; of the other towns Ḫāṣṭah has an urban population of 422,879 and Mosul 388,211.

FLAG.—Horizontal stripes of red, white and black, with three green stars on the white stripe.

BRITISH EMBASSY

Sharia Salah Ud-Din,
Karkh, Baghdad

Ambassador Extraordinary and Plenipotentiary, His Excellency Trefor Ellis Evans, C.M.G., O.B.E. (1968).

Counsellor, P. McKearney (Head of Chancery).

1st Secretaries, A. E. Saunders; G. F. Hancock.

2nd Secretaries, R. C. Harrison (Consul); B. Hannaby (Administration); D. J. F. Barwell.

3rd Secretary, A. Arnold (Commercial).

BRITISH CONSULAR OFFICES IN IRAQ.

There are British Consular Offices at *Baġdad* and *Baṣṭah*.

British Council Representative, J. G. G. Muir, O.B.E., D.S.C., Abu Nawass Street, Baġdad.

ISRAEL

(Yisra'el)

President of the Republic, Zalman Shazar, born 1889, elected President of Israel, May 22, 1963.

CABINET

*Prime Minister, Levi Eshkol.
Deputy Prime Minister and Minister for Absorption, Yigal Allon.*

Foreign Affairs, Abba Eban.

Agriculture, Haim Gvati.

Labour, Joseph Almogi.

Defence, Moshe Dayan.

Education and Culture, Zalman Aranne.

Justice, Yaakov Shapiro.

Police, Eliehu Sasson.

Interior, Moshe Shapiro (N.R.P.).

Health, Israel Barzilai.

Finance, Commerce and Industry, Zeev Sharaf.

Transport and Communications. Moshe Carmel Housing, Mordechai Bentov (*Mapam*). Posts, Sharabi Yeshayahu.

Development and Tourism. Moshe Kol (*Ind. Liberal*). *Social Welfare.* Josef Burg (*N.R.P.*).

Religious Affairs. Dr. Zerah Warhaftig (*N.R.P.*).

Without Portfolio. Israel Galili; Menahem Begin (*Herut*); Joseph Saphir (*Liberal*).

Apart from Ministers marked otherwise, members of the Cabinet belong to the Israel Labour Party ■ merger (Jan. 21, 1968) of the former *Mapai*, *Ahdut Avodah* and *Rafai* parties. *N.R.P.* = National Religious Party; *Mapam* = Unified Workers Party.

EMBASSY IN LONDON

■ Palace Green, Kensington, W.8

[01-937-8091]

Ambassador Extraordinary and Plenipotentiary, His Excellency Aharon Remez (1965). *Consular Section,* 2A Palace Green, W.8. *Consul-General,* Raanan M. Sivan.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. $29^{\circ} 30'$ – $33^{\circ} 15'$ N. and long. $34^{\circ} 15'$ – $35^{\circ} 40'$ E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 7,992 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by

Jordan and Egypt). The population was estimated (Sept., 1967) at 3,673,000. Jewish immigration has made rapid progress since the establishment of the State. In 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048. During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries. Since 1948 the population of Israel has more than trebled.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on currency and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the Knesset for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judaea and Samaria, rising in places to heights of nearly 4,000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdrælon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals

which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Qishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51·5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are among the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cenaculum on Mount Zion; Ein Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and medieval days, such as Ascalon, Caesarea, Atlit Megiddo and Hazor.

Government.—There is a Cabinet and a single-chamber Parliament (*Knesset Israel*) of 120 members. On November 2, 1965, twelve political parties returned members to the *Knesset*, including The Alignment (*Mapai* and *Ahdut Avoda*) (45), Herut-Liberal (*Gahal*) (26), National Religious Front (11), Israel Labour List (*Rafai*) (10), *Mapam* (8). The new Coalition, which took office in January, 1966, is one of *Mapai*, *Ahdut Avoda*, the National Religious Front, *Mapam*, and Independent Liberals; Mr. Levi Eshkol is Prime Minister. In June, 1967, a National Government was formed by co-opting to the Cabinet Moshe Dayan (*Rafai*), Menahem Begin (*Herut*) and Joseph Saphir (*Liberal*).

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State over 1,200,000 immigrants had entered Israel from over 100 different countries.

Education.—Elementary education for all children from 5 to 14 years is compulsory. The Law also provides for working youth, age 14-17, who, for some reason, have not completed their primary education, to be exempted from work by their employers in order to do so.

In the 1966-67 school year the number of pupils in elementary and secondary schools was approximately 717,000, including 76,000 Arab pupils attending Arab schools. There were 99,000 in kindergartens, 459,500 at primary and 142,000 at secondary schools (also 16,500 pupils at schools for the handicapped and schools for working youth), 26,700 at academic institutions of higher learning,

7,700 at primary teachers' colleges, and 5,900 at other institutions (art and music institutions, school of surveying, etc.).

The Israel Institute of Technology (*Technion*) at Haifa provided courses in engineering, architecture, aeronautics and other technical subjects for 4,260 students in 1966-67 and Tel Aviv University provided courses in science and the humanities for 3,547 students. The Bar-Ilan University in Tel Aviv had 1,838 students and the University College of Haifa 878. The Weizmann Institute of Science at Rehovoth is engaged in pure and applied research and has a staff of almost 1,400.

Finance.—Government expenditure for the fiscal year 1965-66 totalled £4,840,000,000, with revenue at £4,603,000,000.

The unit of account is the Israel pound of 100 agorot. Exchange rate, see p. 84.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lod, Nahariya, Beersheba, Dimona, Ashdod and intermediate stations. In December, 1965, the total railway network amounted to 688 km. There were approximately 4,300 km. of paved roads and 195,000 licensed vehicles.

Shipping.—Israel's merchant marine had reached a total tonnage of 1,130,000 at the end of 1965, when ■ further 13 ships (371,000 tons) were on order.

The chief ports are Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; the new harbour on the Red Sea at Eilat, inaugurated in September, 1965, has ■ capacity of 10,000 tons ■ day; Acre has an anchorage for small vessels; the deep-water port at Ashdod, ■ miles south of Tel Aviv, which started operations at the end of 1965, was designed to handle 1,000,000 tons of cargo in the first year, 2 m. annually until 1970, and 4 m. tons later, after deepening.

Civil Aviation.—Thirteen international companies maintain regular flights to Lod, Israel's main airport. El Al (Israel Airlines) regularly serves New York, London, Paris, Brussels, Copenhagen, Amsterdam, Frankfurt, Munich, Zurich, Vienna, Rome, Istanbul, Athens, Rhodes and Sofia (in the summer), Nicosia, Tehran, Nairobi and Johannesburg.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to subtropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities mostly in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1966-67 season was 1,063,000 tons. Of this total, 682,000 tons were exported, of which about 187,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds)

reached 20,560 tons in 1966. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production. The area under irrigation has increased more than five-fold (from 75,000 to 400,000) since 1948 through several national water schemes. The largest of these is the Kinneret-Negev Project. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

TRADE

	1965	1966
Imports.....	\$U.S. 834,625,000	\$U.S. 839,198,000
Exports.....	429,842,000	502,175,000

Trade with U.K.

	1966	1967
Imports from U.K.....	£51,921,000	£49,209,000
Exports to U.K.....	26,533,000	32,394,000

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

CAPITAL.—Most of the Government departments are in Jerusalem (population, estimated 1965, 187,500). A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israeli parliament on Jan. 23, 1950. It is not, however, recognized as the capital by the United Nations. Other principal towns are Tel Aviv-Jaffa (393,800); Haifa and district (200,800); Ramat Gan (100,100) and Beersheba (62,000).

FLAG.—White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Until 1967 Jerusalem was divided between Israel and Jordan, two of the 36 recognized Christian Holy Places (in the New City) being under Jewish administration, the remainder under Arab administration in the Old City. At the conclusion of hostilities between Israel and the surrounding Arab countries in 1967 the entire city was under Israeli control.

Cultural Attaché, Prof. Filippo Donini.

Administrative Attaché, Signor Amadeo Baroni.

Italian Consulate General, 38 Eaton Place, S.W.1. (Belgravia: 4831).

Consul General, Signor Mario Tonarelli.

Area and Population.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies noted below). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated at 324,000 sq. kilometres, about 131,000 sq. miles, with a resident population (estimated 1967) of 53,649,000.

Live births in 1963 numbered 938,990, deaths 507,977, and marriages 406,496 (estimated figures).

Physiography.—The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and Yugoslavia. Mont Blanc (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are Monte Rosa (15,217 feet), Matterhorn (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (405 miles), which flows through Piedmont, Lombardy and the Veneto and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The Rubicon, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in

49 B.C., thus "invading" Italy in arms) is used to indicate definite committal to some course of action.

Government.—Italian unity was accomplished under the House of Savoy, after a heroic struggle from 1848 to 1870, in which the great patriots Mazzini (1805-72), Garibaldi (1807-82) and Cavour (1810-61) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum re-

sulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

Since the General Election of 1948, governments have been formed by Signor de Gasperi (1948-53, coalition); Signor Pella (1953-54, Christian Democrat); Signor Scelba (1954-55, coalition); Signor Segni (July, 1955-May, 1957, coalition); Signor Zoli (June, 1957-May, 1958, Christian Democrat); Signor Fanfani (May, 1958-Feb., 1959, coalition); S. Segni (Feb., 1959-Feb., 1960, Christian Democrat, with Liberal support). Signor Tambroni (March 25-July 1960, Christian Democrat, with Neo-Fascist support); Signor Fanfani (July 27, 1960-Feb., 1962, Christian Democrat); Signor Fanfani (Feb. 1962-June, 1963, coalition); Signor Leone (June-Nov., 1963, Christian Democrat); Signor Moro (coalitions formed, Nov., 1963; July, 1964; Feb., 1966).

Signor Moro took office in November, 1963, at the head of a coalition consisting of the four parties of the centre-left, i.e., the Christian Democrats, the Republicans, the Socialist and Social Democratic Parties (united in October, 1966, to form the United Socialist Party). This coalition remained in being until the General Election of May 19, 1968, at which the Communists and their left-wing allies gained votes at the expense of the United Socialists. The latter therefore refused to rejoin the coalition after the elections until they could decide on a new political line at their Congress in the autumn of

1968. Meanwhile the country was run by a caretaker government led by Senator Leone.

The New Constitution.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

Defence.—The Army consists of about 250,000 men and includes two armoured divisions, five infantry divisions, five Alpine brigades, one independent armoured brigade, one missile brigade and one parachute brigade. There is also a paramilitary force, the *Carabinieri*, about 80,000 strong. The period of conscription is 15 months. The Navy consists of 3 cruisers, 45 escorts including 2 G.W. destroyers, 9 submarines, 60 minesweepers and also coastal craft and fleet auxiliaries. Approximate strength: officers, 3,700; men, 36,000. The Air Force consists of 500 aircraft; approximate strength: officers, 6,800; men, 57,000, with some 1,500 under training.

Language and Literature.—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785-1873), Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1965, there were 85 daily newspapers published in Italy, of which 16 were published in Rome and 9 in Milan.

Education.—Education is free and compulsory between the ages of 6 and 14; this comprises five years at primary school and three in the "middle school", of which there are about 3,000. Pupils who obtain the middle school certificate may seek admission to any "senior secondary school", which is roughly equivalent to a U.K. grammar school but may be a lyceum with a classical or scientific or artistic bias, or may be an Institute or school for teacher training, or may be an Institute directed at technology (of which there are eight different types) or trade or industry (including vocational schools). Courses at the lyceums and technical institutes usually last for five years and success in the final examination qualifies for admission to university. There are 32 State and 17 private universities, some of ancient foundation; those at Bologna, Genoa, Macerata, Naples, Padua and Perugia were started in the thirteenth century. University education is not free, but entrants with higher qualifications are charged reduced fees according to a sliding scale. In general, schools, lyceums and universities are financed by local taxation and central government grants.

Industrial Production.—Italian industry is expanding rapidly. It is the source of about half of the national income and about 8,000,000 people are employed in it.

The chief manufactures are textiles of all kinds, including synthetic fibres, iron and steel and their

products, building materials, ships, rolling stock, motor vehicles, rubber products, leathers and footwear, chemicals, engineering products, agricultural and light machinery of all kinds, wood manufactures, especially furniture, food preserves and plastics. Numerous artisan industries produce gloves, straw products and typical Italian artistic products such as pottery, glassware, mosaics, coral and imitation jewellery.

Agriculture.—Agriculture is still Italy's main single industry but employs a fast decreasing share of the total labour force (about 5,100,000 in 1965). The principal products are cereals, fruit (especially citrus) vegetables, olives and olive oil, cheese and wine. Wheat is the most important cereal with an average annual yield of over 8,000,000 metric tons since 1948. Sugar beet is by far the most important industrial crop; tobacco is also grown. Livestock supplies large dairy and meat industries, but growing quantities of beef are imported. Fishing is carried on extensively, almost exclusively for the home market, but once again imports of fish are necessary to supplement the declining yield of Mediterranean waters.

Mineral Production.—Italy is generally poor in mineral resources but since the war deposits of natural methane gas and smaller deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Sulphur production, in Sicily and Calabria, is important although declining in volume. Other minerals produced in significant quantities include iron ores and pyrites, mercury (over one-quarter of the world production), lead, zinc and aluminium. Marble is a traditional product of the Massa Carrara district. Salt and tobacco are Government monopolies.

Tourist traffic.—27,744,600 visitors entered Italy in 1967 compared with 25,000,000 in Jan.-Oct., 1966. During 1967 estimated expenditure by tourists totalled 889,700,000,000 lire compared with 813,000,000,000 lire in 1966 (Jan.-Oct.).

Communications.—The main railways system is State-run, but some subsidiary lines are still privately operated. Serious damage to the railway system during the war necessitated a large programme for restoring the tracks, electrification, rebuilding stations and replacing and increasing rolling stock. The electrification programme is now virtually complete, but a 5-year modernization and re-equipment plan (notably for tracks and rolling-stock) is still under way. A network of *autostrade* (motorways) is at present under construction between the major cities and steps have been taken to improve local roads particularly in the South where these were formerly very poor or non-existent. New road tunnels under the Alps, to France and Switzerland, have been opened or are under construction. The Italian Mercantile Marine totalled 5,945,000 tons in January, 1967, compared with 3,500,000 tons before the war. *Alitalia*, the principal international and domestic airline, is State-controlled. Other smaller companies operate on domestic routes.

THE ECONOMY AND FOREIGN TRADE

In 1967 the fast rate of growth of the previous year was maintained, the Gross National Product increasing by about 5·7 per cent. at constant prices. Industrial production increases were greatest in metallurgy and engineering. Investment was up by 10·5 per cent. on 1966 while retail prices increased by only 2·5 per cent. and unit labour costs by about 2 per cent. Imports rose by 12·9 per cent. over the year. Exports rose by 8·3 per cent. Italy continued to have a large balance of payments surplus (of about £135,000,000), the deficit on trading account being counteracted by receipts

from residents abroad, foreign investments and tourism. The prospects for a similar growth in the Italian economy in 1968 were good.

Industrial Activity.—Of Italy's total labour force of 20,032,000 about 25 per cent. work on the land and 40 per cent. in industry. The North is traditionally the main industrial area, the principal centres of heavy industry being Milan, Turin and Genoa. But a new industrial complex is being created in the Puglia region in the south, based on the large state-owned steelworks at Taranto. Italy has to import most of her coal, but this disadvantage has largely been overcome by the exploitation of natural gas deposits and hydroelectric power. Electricity production in 1964 was 75·2 milliard kWh, an increase of 7 per cent. on 1963. The main manufacturing industries are general engineering and motor vehicles; petroleum, coal derivatives and chemicals; food processing; textiles and footwear; metallurgy.

Foreign Trade.—Germany, France and the United States, the United Kingdom, and the Middle East oil states are the main sources of Italy's imports. The principal markets for her exports are Germany, the U.S.A., France, Switzerland and the United Kingdom.

	1964 (£'000,000)	1965	1966
Total Imports.....	2,321	2,639	3,078
Total Exports.....	2,114	2,581	2,885

Trade with U.K.

	1966	1967
Imports from U.K....	£127,999,000	£140,098,000
Exports to U.K.....	166,154,000	195,175,000

The following table gives the percentage by value of Italy's total trade in 1967 with EEC and United Kingdom:

	Italian Imports	Italian Exports
EEC.....	35·0	38·8
U.K.....	4·5	4·8

CURRENCY

The market rate of exchange on September 26, 1968 stood at lire 1,486 = £1 (see also p. 83).

CAPITAL, Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1871. Population (estimated, March, 1966), 2,477,367.

Estimated population of the principal cities and towns on October 15, 1964 was: Milan, 1,661,970; Ψ Naples, 1,212,790; Turin, 1,115,466; Ψ Genoa, 834,103; Bologna, 479,051; Florence, 455,314; Ψ Venice, 357,951; Ψ Bari, 366,446; Ψ Trieste, 357,951; Verona, 236,700; Padua, 209,547; Ψ Taranto, 202,495; Brescia, 187,786; Ψ Leghorn, 166,966; Ferrara, 157,323; Ψ Reggio Calabria, 156,359; Parma, 158,930; Modena, 151,543; Ψ La Spezia, 127,833; Ψ Salerno, 128,362; Reggio Emilia, 121,786; Ψ Ravenna, 123,360; Bergamo, 129,431; in Sicily: Ψ Palermo, 618,327; Ψ Catania, 383,739; Ψ Messina, 260,802; \blacksquare Sardinia: Ψ Cagliari, 383,739.

TRIESTE.—From June 12, 1945, the area of Trieste was administered by Allied Military Government; Zone A, including Duino and the city and harbour of Trieste, by Anglo-U.S. forces and Zone B, including the towns of Capodistria, Pirano and Cittanova by Yugoslavia. Provision for setting up ■ Free Territory of Trieste, included in the Italian

Peace Treaty signed in Paris on Feb. 10, 1947, proved to be unworkable and military occupation of the two Zones continued until 1954, when an agreement was concluded in London on Oct. 5 between Italy, Yugoslavia, the United Kingdom and the United States, partitioning this territory between Italy and Yugoslavia along the lines of demarcation of the two Zones, with a minor frontier rectification in favour of Yugoslavia. Zone A, an area of about 90 square miles with ■ population of 296,220, was formally handed over to Italian administration on October 26, 1954.

REGIONS.—In accordance with the constitution five autonomous regions have been established by special statute: Trentino with Alto Adige; Val d'Aosta; Sicily; Sardinia and Friuli-Venezia Giulia.

ISLANDS.—*Panteleeria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,306. The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,458. The *Tuscan Archipelago* (including Elba), area 293 sq. km., pop. 31,850; *Pontine Archipelago* (including Ponza, area 10 sq. km., pop. 2,530); *Flegrean Islands* (including Ischia, area 60 sq. km., pop. 49,953); *Capri*; *Eolian Islands* (including Lipari, area 116 sq. km., pop. 17,697); *Tremiti Islands* (area 3 sq. km., pop. 401).

FLAG.—Vertical stripes of green, white and red.

NATIONAL DAY.—June 2.

BRITISH EMBASSY

Villa Wolkonsky, Via Conte Rosso 25, Rome.
British Ambassador, His Excellency Sir Charles Arthur Evelyn Shuckburgh, G.C.M.G., C.B. (1966). £8,600

Defence and Military Attaché, Col. G. D. Gill, M.B.E.
Assi. Defence Attaché, Sqn.-Ldr. B. E. Hogan.
Naval Attaché, Cdr. S. A. Hammick, D.S.C.
Air Attaché, Group-Capt. P. J. S. Finlayson, A.F.C.
Counsellors, A. A. Golds, M.V.O. (*Head of Chancery*); J. A. Ford, C.M.G., M.C. (*Commercial*); K. Kenney, O.B.E. (*Labour*); I. C. L. Alexander, O.B.E. (*Information*).

1st Secretaries, R. Q. Braithwaite; E. P. N. de Haan, O.B.E.; G. F. FitzHerbert; J. S. Dixon (*Administration*); R. F. C. Hall (*Head of Consular Section*); D. A. Hamley (*Commercial*); D. McAlindon (*Economic*).

2nd Secretaries, J. A. Shorten; P. S. Fairweather; W. Marsden; L. W. A. Harley (*Administration*); E. G. Markee (*Head of Visa Section*).

Commercial Attaché, A. A. C. Nash, o.b.e.
Chaplain, Rev. D. J. N. Wanstall, c.b.e.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Rome, Naples, Milan, Genoa, Florence, Palermo, Turin, Venice, Trieste, Messina, Bari and Cagliari (Sardinia).

British Council Representative, D. A. A. Traversi, O.B.E., Palazzo del Drago, Via Quattro Fontane 20, Rome.

There are British Council Institutes at Milan and Naples, and ■ Centre at Bologna. There are also British Institutes at Florence and Turin.

IVORY COAST

(Republic of the Ivory Coast)

President and Minister of Foreign Affairs, Félix Houphouët-Boigny, elected for five years on November 27, 1960; re-elected November 7, 1965. President of National Assembly, Philippe Yace. President of Economic and Social Council, Mamadou Coulibaly.

President of Supreme Court, Alphonse Boni.
 Minister of State, Auguste Denise.
 Minister for Foreign Affairs, Arsène Usher Assouan.

IVORY COAST EMBASSY IN LONDON
 ■ Upper Belgrave Street, S.W.1

Ambassador Extraordinary and Plenipotentiary, His Excellency Ernest Amos Djoro.
 Counsellor, M. Agnini B. Malan.
 1st Secretary, M. Jean A. Ackah-Mezian.
 Attachés, M. Gilbert Kacou (*Press*); Koussan C. N'Da; M. Seydou Diarra; M. G. N'Dia.

The Ivory Coast is situated on the Gulf of Guinea between 5° and 10° N and 3° and 8° W and is flanked on the West by Guinea and Liberia, on the North by Mali and the Voltaic Republic and on the East by Ghana. It has an area of about 189,029 square miles—tropical rain forest in the southern half and savannah in the northern—and a population estimated in 1966 at 4,100,000 divided into a large number of ethnic and tribal groups. (*For MAP, see p. 871.*)

Although official French contact was made in the first half of the 19th century, the Ivory Coast became a Colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The Ivory Coast was a founder member of the *Conseil de l'Entente*, established on May 29, 1959, as a loose union embracing also, without abrogation of sovereignty, Dahomey, Niger and Upper Volta. Togo also adhered in June, 1966. The Ivory Coast is also an Associated State of E.E.C. and a member of the Organisation Communale Africaine et Malgache (O.C.A.M.) and of the Organization of African Unity (O.A.U.). The official language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 85 members was elected on November 7, 1965, for five years. The defence of the Constitution, which was promulgated on Nov. 3, 1960, is vested in a Supreme Court.

Finance.—The currency of the Ivory Coast is the Franc CFA (Francs CFA 50 = 1 French franc; Francs CFA 593 = £1). In 1968, the Ivory Coast budget balanced at Francs CFA 43,200,000,000.

Trade.—The principal exports are coffee, cocoa, timber and bananas. The United Kingdom imports Ivory Coast timber and a small quantity of her coffee. Diamonds and manganese are exported. Manganese exports in 1967 were valued at Francs CFA 473,000,000. There are a few deposits of other minerals. Trade in 1967 was valued at: Imports, Francs CFA 65,050,000,000; Exports, Francs CFA 80,263,000,000.

Trade with U.K.

	1966	1967
Imports from U.K.	£1,745,000	£1,949,000
Exports to U.K.	4,503,000	4,517,000

CAPITAL, Ψ Abidjan (population, 400,000) which is also the main port.

FLAG.—3 vertical stripes, orange, white and green.

NATIONAL DAY.—August 7 (Proclamation of Independence).

BRITISH EMBASSY

2nd Secretaries, Masao Honma (*Consular*); Tatsuo Endo (*Economic*); Tatsuo Arima (*Political*); Fumiaki Ibuki (*Financial*).
 3rd Secretaries, Kensaku Hogen; Masaki Orita; Saburo Tanaka.

Area and Population.—Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude $128^{\circ} 6'$ East and $145^{\circ} 49'$ East and between latitude $26^{\circ} 59'$ and $45^{\circ} 31'$ N., with a total area of 142,505 square miles and a population (Jan., 1968) of 100,510,000.

Japan Proper consists of Honshū (or Mainland), 230,448 sq. k. (88,839 sq. m.), Shikoku, 18,757 sq. k. (7,231 sq. m.), Kyūshū, 42,079 sq. k. (16,170 sq. m.), Hokkaidō, 78,508 sq. k. (30,265 sq. m.). Formosa and the Kwantung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939–45.

After the unconditional surrender to the Allied Nations (Aug. 14, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

British participation in the occupation of Japan was virtually over by May, 1950. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces, from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure. On July 1, 1956, the

was played by drastic methods, induced abortion and sterilization, the legal grounds for which had been extended by the Eugenics Law, 1948, to include economic and social hardship. The improving standard of living has also played an important part in keeping the birthrate down.

The death rate in 1967 was 6·7 per 1,000, compared with 17 per 1,000 in pre-war years, natural increase of the population being 1,304,200 for 1967.

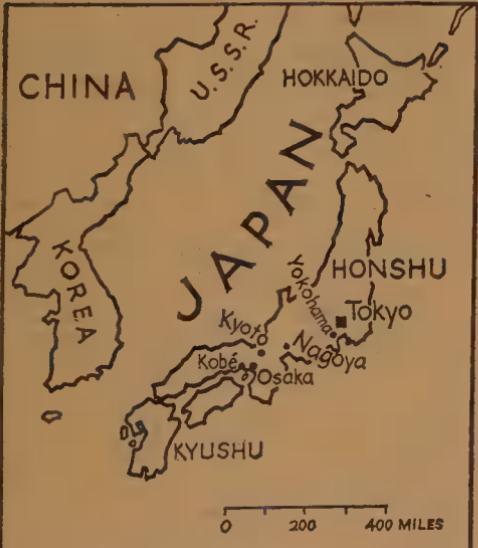

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical in the south to cool temperate in the north. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "Meiji Constitution" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

A general election was held on January 29, 1967, in which the Liberal Democratic Party was once more returned to power. The strength of the parties in the House of Representatives on July 16, 1968, was: Liberal Democratic Party, 273; Socialist Party, 137; Democratic Socialist Party, 31; Komeito, 25; Communist Party, 5; Independents, 5; vacancies, 10. Strengths of the parties in the House of Councillors were: Liberal Democratic Party, 137; Socialist Party, 65; Komeito, 24; Democratic Socialist Party, 10; Communist Party, 7; Niin Club, 4; Independents, 3.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in April, 1966, 25,167,000 hectares of forest, which include the *Cryptomeria japonica*, *Pinus massoniana*, *Zelkova keaki*, and *Pawlonia imperialis* in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In August, 1966, there were 5,996,000 hectares under cereals (rice, 3,254,000 hectares). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated: rice is the staple food of the people, about 14,451,000 metric tons being produced in 1967. The floral kingdom is rich, beautiful, and varied. Fruit is abundant, including the mandarin, persimmon, loquat and

base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of 1957.

Under the terms of the Japan-U.S.A. Security Treaty of Sept. 8, 1951, United States forces remained to assist in the defence of Japan. However, as Japan's own Self Defence Forces have been built up, U.S. ground troops have been withdrawn. A revised version of the security treaty, which went into effect on June 23, 1960, was the subject of considerable controversy in the summer of that year.

Vital Statistics.—In October, 1965, Japan proper had 98,660,000 inhabitants. The birth rate in 1967 was 19·7 per 1,000 (1947, 34 per cent; 1966, 13·7 per cent). It has been stated that a considerable part in reducing the birth rate to its present level

peach; European fruits such as apples, strawberries, pears, grapes and figs are also produced. Mulberry trees are now cultivated on only 161,700 hectares (1966) compared with 577,525 in 1935.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1967, was 50,580,000, of which only 630,000 were unemployed. Of the total labour force, some 39,670,000 were engaged in non-agricultural industries, 10,270,000 in agriculture, forestry and fisheries.

Communications.—There were 27,859 kilometres of Government and private railroad (steam and electric) in 1967. In March, 1968, the merchant fleet (ocean-going ships over 100 tons gross) consisted of 4,953 vessels totalling 14,889,447 tons gross.

Armed Forces.—After the unconditional surrender of August, 1945, the Imperial Army and Navy were disarmed and disbanded and all aircraft confiscated by the occupying forces.

Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being in August, 1950, and a Maritime Safety Force was established in April, 1952. In August, 1952, these Forces were renamed the National Safety Force and the Coastal Safety Force and were placed under a National Safety Agency. In July, 1954, the Agency was renamed the Defence Agency, the Forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force, was created. At the same time the mission of the forces was extended to include the defence of Japan against direct and indirect aggression.

A Treaty of Mutual Co-operation and Security between Japan and the U.S.A. was signed in January, 1960, replacing an earlier Security Treaty signed in 1951 at the same time as the Peace Treaty. By this Treaty each country recognized that an armed attack against either in the territories under the administration of Japan would be dangerous to its own safety and declared that it would act to meet the counter danger.

By 1967 the authorized uniformed strength of the three Self Defence Forces was 173,000 in the G.S.D.F., 36,591 in the M.S.D.F. and 40,703 in the A.S.D.F. The Combined Defence Agency vote for 1968-69 was Yen 422,075,000,000.

At the end of March, 1968, the strength of the M.S.D.F. was one Guided Missile Destroyer (equipped with TARTAR Surface-to-Air Missile system), 29 Destroyers, 13 Frigates, 6 Patrol Frigates, 12 Submarines and 43 Coastal Minesweepers together with other miscellaneous craft, and some 253 land-based aircraft, including 118 Maritime Patrol Aircraft, helicopters, trainers and a few transports. The uniformed personnel strength is about 35,000.

The Ground Self Defence Force is broadly organized into 12 divisions (about 9,000 strong), one armoured division and an airborne brigade. In April, 1968, the overall strength of the G.S.D.F. was 160,000 (approx.). Japanese-made small arms, armoured vehicles and communication equipment

is slowly replacing that of United States manufacture.

The Air Self Defence Force at the end of 1966 had four main types of aircraft: fighters, trainers, transports and helicopters—a total of 1,049. Most of this number were interceptor fighters and jet trainers. The A.S.D.F. also has two S.A.M. units (Nike-Ajax), each equipped with 12 launchers. Uniformed personnel strength was 39,553.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 2 Cardinals, 2 archbishops and 14 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 11 Japanese bishops (1968) and is an autonomous branch of the Anglican communion. There is also a United Protestant Church.

Education.—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In May, 1967, the total number of these junior colleges and universities was 820, of which 97 were established and maintained by the State, while 80 were established and maintained by prefectures and cities, and 643 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaidō (Sapporo), Kyūshū (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Japanese who have received school education (99.8 per cent. of the population) can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In April, 1967, there were 778 libraries open to the public (The National Diet Library and 777 public libraries) with 29,819,809 volumes. In addition there were 768 University libraries with 47,331,364 volumes in April, 1967. There were 93 daily newspapers in Japan of which 16 were published at Tokyo, 8 at Osaka and 5 in the Nagoya region (all editions included). Japan's total newspaper circulation was estimated at 32,447,141 copies and 1.23 per household in October, 1967.

FINANCE

The Budget for the financial year 1968-69, ending on March 31, is estimated to balance at Yen 5,818,598,454,000 for revenue and expenditure on the general account, an increase of 11.8 per cent. over the preceding financial year.

The official rate of exchange with Sterling on Sept. 26, 1968, was yen 857 = £1. (See also p. 83.)

PRODUCTION AND TRADE

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of raw materials (cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides), foodstuffs (wheat, barley, soya beans, sugar), petroleum, chemicals and specialized machinery. Principal exports consist of cotton and rayon textiles, machinery, ships,

metals and products, canned fish, chemicals and a wide variety of manufactured goods, including chinaware, toys, bicycles, sewing machines, cameras and transistor radios.

FOREIGN TRADE

	1966	1967
\$1,000	\$1,000	
Total Imports.....	9,522,701	9,070,000
Total Visible Exports.....	9,776,390	10,229,000

JORDANIAN EMBASSY AND CONSULATE
6 Upper Phillimore Gardens, W.8

[01-937-3685]

Ambassador Extraordinary and Plenipotentiary, His Excellency Midhet Juma.

Counsellors, Faridon Hikmat (Information).

Military, Naval and Air Attaché, Brig. Mahmoud Kurdi.

1st Secretary, Nabil Nimir.

3rd Secretaries, Kasim Ghazzawi; Miss Zein Rifai.

Asst. Military, Naval and Air Attaché, Major Asad Suleiman Ahmad.

Finance Officer, Lieut. H. Hamarneh.

Service Attaché's Office, 18 Upper Phillimore Gardens, W.8 [01-937-9611].

Area and Population.—The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the State. Total population in December, 1967, was estimated at 2,071,000. (For MAP, see p. 884.)

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (30 persons nominated by the King) and a House of Representatives, consisting of 60 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 881,658 tons were exported in 1967.

Communications.—There is an excellent trunk road system. The Hejaz Railway is now being rebuilt and an extension to Saudi Arabia is planned. ALIA (Royal Jordanian Airlines) operate air services from Amman to Aqaba, Cairo, Jeddah, Dhahran, Doha, Kuwait, Beirut, Athens, Rome, Paris and London.

KOREA

(Hankuk)

Korea is situated between $124^{\circ} 11'$ and $130^{\circ} 57'$ E. long., and between $33^{\circ} 7'$ and $43^{\circ} 1'$ N. lat. It has an area of 85,256 sq. miles with an estimated population of about 39,640,000, of whom about 28,600,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart).

Agriculture.—The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and sericulture are also practised. Gingseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (now in North Korean hands) but also in parts of South Korea. It forms a rich source of revenue.

Minerals.—Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north.

In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Political necessity in recent years has led to some industrialization south of the demarcation line, but the southern portion of the peninsula remains predominantly agricultural.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korea forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Inchon which was quickly followed by a breakout from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier, when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not accepted by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 25, 1954, but failed to agree on measures for reunifying the country.

Republic of Korea

President, Gen. Park Chung Hee, assumed office, March 22, 1962; re-elected for four years 1963 and 1967 (May 3).

Prime Minister, Chung Il-kwon (May 8, 1964).

KOREAN EMBASSY

*36 Cadogan Square, S.W. x
(01-589-0690; 80251)*

*Ambassador Extraordinary and Plenipotentiary, His Excellency Ei Whan Pai (1967).
Minister, Adm. Sihak Hyum.*

Counsellors, Ingung Kim; Sango Doo Park; Keun Sup Chang.

*Naval, Military and Air Attaché, Col. Sang Sup Rim.
2nd Secretary, Kwang Yoon Kim.*

3rd Secretaries, Hyung Kai Min (Vice-Consul); Suk Hyun Kim (Vice-Consul).

Communications Attaché, Suk Hwan Choo.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 38,022 sq. miles and a population of 29,207,856 (Census of 1966).

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected the late Dr. Syngman Rhee as the first President of the Republic of Korea, an office which he held until 1960. On

August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end.

President Syngman Rhee was succeeded as President by Dr. John M. Chang whose Government was, however, overthrown by a revolution led by army officers. On March 22, 1962, General Park Chung Hee took over as acting President, retaining his post as Chairman of the Supreme Council. Elections were originally promised for May and August, 1963, respectively, but when political activities were allowed to start again at the beginning of that year there was considerable confusion, so that the military government decided to retain power until December, 1963. Elections were then held in which General Park Chung Hee was elected and the Democratic Republican Party secured a majority. At further elections held on May 3, 1967, Gen. Park Chung Hee was returned by a comfortable majority for a new four-year term and on June 8, 1967, his Democratic Republican Party secured additional seats in the National Assembly.

The Republic of Korea has ■ army of about 550,000 men, a small navy mainly for coast protection, a small air force and a Marine Corps which includes one division trained ■ amphibious operations.

Finance.—The Budget for the year ending December 31, 1967, totalled Won 141,628,956. Expenditure on National Defence is estimated at Won 40,534,521.

The unit of Korean currency is the Won. On March 24, 1965, a unitary fluctuating rate of exchange was introduced and since devaluation of sterling the rate has been about Won 660 = £1.

Trade.—The Republic of Korea's main exports are tungsten and iron ores, graphite, anthracite, fish and fish products, agar-agar, seaweed, raw silk, textile yarns and fabric. Her main customer is Japan. Imports greatly exceed exports. In 1966 exports totalled \$U.S.250,334,000; imports amounted to \$U.S.716,441,000.

Trade with U.K.

	1966	1967
Imports from U.K.	£971,000	£2,326,000
Exports to U.K.	1,705,000	2,649,000

CAPITAL.—Seoul, population (1966), 3,794,959. Other main centres are ■ Pusan (pop. 1,425,703), Taegu (pop. 845,073) and ■ Inchon (pop. 525,072). Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Seoul, are the main ports but the development of Inchon is hampered by a tide variation of 28–30 feet.

NATIONAL DAY.—August 15 (Independence Day).

BRITISH EMBASSY Seoul

Ambassador Extraordinary and Plenipotentiary, His Excellency Ian Clayton Mackenzie, C.B.E. (1967) £5,375

1st Secretary, F. F. Rainsford, C.B.E., D.F.C. (Commercial and Consular).

Defence Attaché, Brig. A. D. R. G. Wilson, M.B.E.

KUWAIT

(The State of Kuwait)

Amir, H.H. Shaikh Sabah as-Salem as Sabah, born 1915; acceded Nov. 24, 1965.

Crown Prince and Prime Minister, (Dec., 1965), H.H. Shaikh Jaber al-Ahmed as-Sabah; appointed Crown Prince, May 31, 1966.

KUWAIT EMBASSY IN LONDON

40 Devonshire Street, W.1

[01-580-8471]

Ambassador, His Excellency Shaikh Salem al-Sabah al-Salem (1965).

Area and Population.—Kuwait extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population (Census, 1965) of 468,000; estimated 1966, 491,000. It is estimated that 47 per cent. of this total are Kuwaitis, the remainder being large numbers of other Arab peoples, Persians, Indians and Pakistanis. The total European and American population is about 4,600. Kuwait has ■ hot, dry climate with a summer season extending from April to September. During the coldest month (January) the temperatures can fall below freezing, but normally range between 50° to 60°F. Shade temperatures are about 85°F.; and can reach 125°F.; 180°F. has been recorded in the sun. Humidity rarely exceeds 60 per cent. except in July and August.

Government.—Although Kuwait had been independent for some years, the "exclusive agreement" of 1899 between the Shaikh of Kuwait and the British Government was formally abrogated by an exchange of letters dated June 19, 1961. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait and, in accordance with the terms of the exchange, the Amir requested British Military assistance to help him maintain his sovereignty and independence, which was immediately supplied. British troops were withdrawn

in October, 1961, and replaced by the Arab League Security Force composed of contingents from various Arab States. The withdrawal of this Force was completed in January, 1963. On May 7, 1963, Kuwait was admitted to the United Nations and on Oct. 4, 1963, Iraq recognized Kuwait's independence. A (three-year) notice of the ending of the British defence agreement with Kuwait was reported to have been issued on May 13, 1968.

Elections were held in December, 1961, for a Constituent Assembly, which held its first meeting in January, 1962. A council of Ministers including non-members of the ruling family was formed in January, 1962, to replace the former Supreme and Joint Councils. Under the Constitution drafted by the Constituent Assembly, a 50-member National Assembly was elected in January, 1963. The Constitution provides that the Assembly must pass all laws and approve the Heir Apparent nominated by the Amir. The Prime Minister is appointed by the Amir and can appoint his Ministers from the members of the Assembly or from outside. The Assembly has the right to pass a vote of no confidence in any Minister except the Prime Minister.

Education, etc.—As a result of the very considerable oil revenues, the Kuwait Government embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. Kuwait University was opened in 1966. In 1966 there were 53,550 boys and 38,238 girls in 172 government schools.

Public Utilities.—Kuwait has a domestic water supply from a British-built sea water distillation plant which operates on waste natural gas from the oil fields. This plant can produce over 8,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. There is also a 7,500,000 gallon reservoir at Shuaiba attached to the power station there and a 10,000,000 gallon storage reservoir at Hawalli.

In 1961 a natural source of fresh water was discovered at Raudhatain in the north of the State. This has been developed to produce 5,000,000 gallons per day for at least 20 years and a pipeline has been built to carry the water to Kuwait town. Kuwait signed an agreement with Iraq on Feb. 11, 1964, allowing her to draw up to 120,000,000 gallons of sweet water a day from the Shatt-al-Arab. Two power stations are now in operation at Kuwait (output, 160,000 kW. per day) and at Shuaiba (210,000 kW.). The town is now served by a network of dual carriage-way roads and more are under construction. Expenditure on roads in 1966-67 was estimated at £11,000,000.

Communications.—Ships of British, Dutch and other lines make regular calls at Kuwait. B.O.A.C., Kuwait Airways, K.L.M., Lufthansa and several international and Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications, telephone and postal services are conducted by the Kuwait Government.

Finance.—Banking is carried out by the British Bank of the Middle East, the National Bank of Kuwait, the Commercial Bank, and the Gulf Bank. The currency is the Kuwait dinar, equal in value to the £.

National revenue is expected to reach KD 918,000,000 (= £918,000,000) by 1970 as a result of Kuwait's Five Year Plan. This represents an increase of 50 per cent. on the 1965 figures of KD 612,000,000. The plan will cost an estimated KD 700,000,000. It includes the following allocations: housing and public buildings, KD 177,000,000;

transport and communications, KD 152,000,000; municipal and public services, KD 46,000,000; education, KD 50,000,000; public health KD 33,000,000; oil and gas, KD 99,000,000; and other industry, KD 119,000,000.

Production and Trade.—The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina-al-Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1966 totalled 112,548,188 tons. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. It employs about 5,243 men, including British, Americans, Indians, Pakistanis, Kuwaitis and Arabs from neighbouring territories. In May, 1962, the Company relinquished about half of its original concession area. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. Concessions for this area are held by the American Independent Oil Co. (Aminoil) from Kuwait and the Getty Oil Company from Saudi Arabia. Aminoil's production for 1966 (i.e., Kuwait's share from the Neutral Zone) was 4,294,077 tons.

The Arabian Oil Company, of Japan, having been awarded in 1958 the oil concession for the Neutral Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 1960. The first shipment of crude oil was made in March, 1961. Kuwait's share of Arabian oil production in 1966 was 6,438,341 tons. A concession covering the off-shore area of Kuwait proper was awarded to the Shell Company in November, 1960, and the concession agreement in the name of The Kuwait Shell Petroleum Development Co. was signed in Kuwait on January 15, 1961. Exploratory drilling began in 1962 but was suspended in the autumn of 1963. The establishment of a Kuwait company, The Kuwait National Petroleum Co., was authorized by an Amiri Decree on October 5, 1960. This company took over the distribution of petroleum products in Kuwait from the Kuwait Oil Co., on June 1, 1961, and was, in partnership with the Spanish Company Hispanoil, awarded the concession to exploit the area relinquished by the K.O.C. Ltd. in 1962.

In addition to petroleum products, skins and wool are also exported. Trade, in 1966, amounted to: Imports: £105,281,635; Exports (including re-exports), £13,642,929, excluding oil.

Trade with U.K.

	1966	1967
Imports from U.K...	£25,789,000	£25,138,000
Exports to U.K.....	92,663,000	73,632,000

CAPITAL.—Ψ Kuwait (population, excluding suburbs, 99,633).

FLAG.—Three horizontal stripes of green, white and red, with black trapezoid next to staff.

 5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary, H.R.H.
 Prince Khammao (1967).

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of Champassac, united under King Sisavang Vong of the House of Luang Prabang, father of the present ruler. The country has an estimated area of 90,000 square miles and an estimated population of 2,700,000. The independence of the kingdom was recognized by France in July, 1949. In the Indo-China war the rebel *Pathet Lao* forces led by Prince Souphanouvong collaborated with the *Viet Minh*. The 1954 Geneva Agreements provided for the integration of the *Pathet Lao* forces and the re-unification of the country. Agreement was reached on these points in November, 1957 but the agreement broke down and in 1958 a more right-wing government was formed and in 1960 elections brought an openly anti-Communist ministry to power.

The government was overthrown on August 9, 1960, by a coup d'état led by Captain Kong Le. The new government of Prince Souvanna Phouma was opposed by one half of the army led by General Phoumi Nosavan who set up a Revolutionary Committee at Savannakhet under the nominal headship of Prince Boun Oum. General Phoumi retook Vientiane in December, 1960, and, Souvanna Phouma's government having fled, a government under Prince Boun Oum was approved by the National Assembly on January 4. Captain Kong Le and Prince Souvanna Phouma retired to Xieng Khouang where, in collaboration with the pro-communist *Pathet Lao* forces and with material support from communist countries, they were able to counter-attack successfully and compel the Government forces to agree to a cease-fire. A 14-nation conference met in Geneva in May, 1961 to work out an international framework for Laotian neutrality. Agreement was held up by internal rivalries in Laos, but in June, 1962, the "three Princes" finally agreed on a coalition government under Prince Souvanna Phouma, and a new Geneva agreement to safeguard Laotian neutrality was signed on July 23.

Since then no real progress has been made towards the unification and pacification of the country. The two senior *Pathet Lao* ministers left Vientiane in April, 1963, and have remained in *Pathet Lao*-occupied territory in the north of Laos. Attempts have been made to persuade them to return and to reassemble the Government of National Union outside Vientiane but without success.

On April 19, 1964, a military coup d'état led by rightist General Kou Prasith Abhay and Police General Siho attempted to overthrow Prince Souvanna Phouma but the King insisted on his remaining in office at the head of the same Government of National Union. The *Pathet Lao* responded promptly to the coup d'état and fighting broke out on and around the Plain of Jars during which their troops, with North Vietnamese support, forced the withdrawal of Kong Le's neutralist forces from the Plain of Jars. Consultations between representatives of six of the signatory powers of the 1962 Geneva Declaration and the Royal Government of Laos took place in Vientiane in June, 1964, in response to the Prime Minister's

call for talks under article IV of the Geneva Agreement, in order to consider measures necessary to restore the situation and to ensure the observance of the Geneva Agreement.

From February 1-3, 1965, fighting took place in Vientiane between troops loyal to the Government and those supporting the right-wing Vice-Premier, Gen. Phoumi, and Police General Siho. The latter were beaten and the two leaders fled to Thailand. They have been stripped of all appointments. Gen. Siho returned to Laos where he gave himself up in June, 1966. He was later shot dead while allegedly trying to escape from prison.

Elections on the basis of a limited suffrage took place in the Government-held areas in July, 1965. These were boycotted by the *Pathet Lao*. In September, 1966, the National Assembly was however dissolved following its rejection of the Government's budget proposals. Fresh elections were held in January, 1967, but these were again boycotted by the *Pathet Lao*. Backed by the Army and influential politicians, Prince Souvanna Phouma and his supporters gained considerable ground.

During the latter part of 1966, the Army command brought under its immediate control both the Neutralist Army, whose leader Kong Le left Laos and finally went to France in June 1967, and the Air Force, whose leader General Thao Ma, after bombing Army H.Q. in Vientiane, fled to Thailand and sought political asylum there.

Laos is now in effect divided into two halves between which a civil war is being fought. The Communists (*Pathet Lao*) control the Northern and Eastern half and are assisted by approximately 40,000 North Vietnamese troops, whose main interests are the safeguarding of communications between North and South Vietnam along the Ho Chi Minh trail and the maintenance of the *Pathet Lao* as a credible alternative to the present Vientiane Government.

In the 1967-68 dry season the Communist forces made substantial gains as a result of which they have regained control of all the territory they had occupied in 1962.

Laos imported goods to the value of £454,000 from the United Kingdom in 1967 (1966, £666,000).

CAPITAL.—Vientiane, population (estimated, 1962), 162,297.

FLAG.—Three-headed white elephant on 5 steps, surmounted by parasol, all on a red ground.

NATIONAL DAY.—May 11 (Independence Day).

BRITISH EMBASSY

Vientiane

Ambassador Extraordinary and Plenipotentiary, His Excellency Harold Smedley, C.M.G., M.B.E. (1967)

LEBANESE EMBASSY IN LONDON
 (21 Kensington Palace Gardens, W.8)
 [01-229-7265]

Ambassador Extraordinary and Plenipotentiary, His Excellency Nadim Dimechkie (1966).
1st Secretary, Zafer El-Hassan.
Attaché, Samir El-Khoury.
Military, Naval and Air Attaché, Col. Nicolas Samaha.

Consular Section, 15 Palace Gardens Mews, W.8
 (01-229-8485).

Area and Population.—Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Israel frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Begaq*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses. The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 2,460,000 in 1966. (For MAP, see p. 884).

Production.—Fruits are the most important products and include citrus fruit, apples, bananas and olives. Industry is on a small scale, the most important industries being those connected with food and drinks (sugar refining, flour milling, confectionery, wines and beer, etc.) and the textile industry. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with a branch of the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nasusybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Sidon and Beirut to Tripoli.

Civil Aviation.—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local services connect with all Middle Eastern capitals except Tel Aviv. There are 3 national airline companies in the Lebanon serving international as well as local routes. Of these the most important is Middle East Airlines/Air Liban which operates VC 10, Comet, Viscount and Caravelle services.

Archaeology, etc.—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of first to third century Roman temples and Jubail (Biblos), one of the oldest continuously inhabited towns in the world, and ancient Tyre which is in course of excavation.

Language and Literature.—Arabic is the principal language (see Arabia), and French is also widely used. The use of English is increasing. About 40 daily papers are published, including 3 in French,

1 in English and 4 in Armenian; and a further 30 periodicals.

Education.—There are four universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University and the Arab University which recent foundations in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

Finance.—Revenue and Expenditure, 1967 (Estimated) £L631,681,000. The monetary unit is the Lebanese £(L); official rate £L7.58 = £1. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about £L7.00 = £1. (See also p. 84).

Principal imports.—Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, wood, pharmaceuticals, raw hides, sugar, motor-vehicles, livestock, wheat, flour, machinery, crude oil, chemicals and domestic electric appliances, and paper.

Principal exports.—Gold and precious metals, citrus fruits, onions, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap, butter, cereals, oil-seed, cement products, wooden and steel furniture, tobacco and wines.

Trade with U.K.

	1966	1967
Imports from U.K.	£16,417,000	£13,084,000
Exports to U.K.	2,602,000	3,124,000

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at the end of each pipeline which can fulfil Lebanon's needs.

CAPITAL.—Ψ Beirut (population about 500,000). Other towns are Ψ Tripoli (175,000), Zahlé (40,000), Ψ Sidon (25,000), Ψ Tyre (12,000).

FLAG.—Horizontal bands of red, white and red with a green cedar of Lebanon in the centre of the white band.

NATIONAL DAY.—November 22.

BRITISH EMBASSY
 Beirut

Ambassador Extraordinary and Plenipotentiary, His Excellency Cecil Edward King, C.M.G. (1963).

LIBERIAN EMBASSY IN LONDON

21 Princes Gate, S.W.7

[or 589-9405]

Ambassador Extraordinary and Plenipotentiary, His Excellency J. Dudley Lawrence (1964)... £4,585
Counsellors, F. A. Dennis, C.V.O.; Mrs. M. Reeves.
2nd Secretaries, Julia B. Wesley, M.V.O.; Sylvester O. Jarrett.

3rd Secretary, F. Holder.

Consul-General, Mrs. M. Reeves-Gorgia, 13 New Burlington Street, W.1.

An independent Negro Republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. The population at the Census of 1962 was 1,000,000 (estimated 1967, 1,098,000). (For MAP, see p. 861).

The executive power is vested in a President elected for 4 years (8 years in the first instance) assisted by a Cabinet; there are two houses of Legislature, the Senate and the House of Representatives. The Senate is composed of eighteen members elected from each of the nine Counties. They hold office for a period of six years. The House of Representatives is composed of fifty-two members, each member holding office for four years. The Army of Liberia consists of one division of brigades of militia, three regular infantry battalions, one engineer battalion and a small coast-guard. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S.A.I.D. (successor to I.C.A.), particularly in the field of education, and technicians have been sent from U.S.A. to advise on various projects. Technical assistance is also being provided by several other countries, including the United Kingdom. UNESCO, WHO and FAO have missions in the country providing technical assistance. The U.S.A. has also made loans for the improvement of power and water supplies, roads and hospitals.

FINANCE

1967 1968

Revenue.....	\$47,932,000	\$55,917,000
Expenditure.....	50,432,000	55,917,000

Cultural Attaché, Ramadan Ghaddafi.

Press Counsellor, Ahmed Ashurakis.

Commercial Attaché, Ahmed Mokadmy.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three former provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population (estimated, 1967), of 1,738,000. The people of Libya are principally Arab with some Berbers in the West and aboriginal tribes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The

Southern part of the country lies within the Sahara Desert. There are no rivers and rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Jagabub, Gadames, Jofra, Sebha, Murzuch, Brach, Cat, Jalo and the Kufra group in the South-East. Exports from Libya include crude oil, wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. Including the nineteen new concessions which were awarded in the spring of 1966, there are now forty-five oil companies prospecting in the country, of which seven (Esso, Oasis, Mobil, Amoseas, Phillips, B.P. and Occidental) are already producing oil in commercial quantities from 18 fields. In addition to the Esso main pipeline from Zelten to the terminal at Mersa Bregha, and the U.S. Oasis Company's pipe-line from Dahra to Ras-es-Sidre, Mobil's new 176 mile pipeline from Amal to Ras Lanuf went into operation in early 1966, the B.P. line from Serir to Tobruk in February, 1967, and the Occidental line from the Idris field to Zveitina in April, 1968. Production of crude oil in 1965 amounted to over 445,000,000 barrels—an increase of 41 per cent. over the previous year's production.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. Recently an Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 5,000 years old. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area, where a motor road (now under reconstruction to international standards) runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, in the Fezzan, was completed in October,

1962. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. There are airports near Tripoli (Idris el Awal) and Benghazi (Benina), Tobruk (El Adem), Marsa Brega, Sebha, Ghadames and Beida regularly used by commercial airlines and military airfields at El Adem and Wheelus Field (Meliaha) (near Tripoli).

Government.—Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has an hereditary monarchy. Government is by a two-chamber parliament. The Senate has 42 members, half of whom are nominated by the King. The House of Representatives is an elected body at present consisting of 55 members, 35 from Tripolitania, 15 from Cyrenaica and 5 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

Local Government.—Until the amendment of the Constitution in 1963, Libya was a Federal State, each of the three Provinces, Tripolitania, Cyrenaica and Fezzan, being administered by a Governor assisted by Executive and Legislative Councils. In April, 1963, however, comprehensive unity was proclaimed and the Federal system (together with the Governors and the Executive and Legislative Councils) abolished. The country is now divided into ten divisions, each administered by a Commissioner (*Muhafidh*).

Currency.—The £ Libyan is equal to £1 3s. 4d. Sterling and is divided into 1,000 millièmes. There are five denominations of notes (£10, 5, 1, ½, and ¼) and six denominations of coins (1, 5, 10, 20, 500 and 100 millième pieces). (See also p. 83.)

Technical assistance is being provided by the United Nations, the United States and the United Kingdom to foster Libya's economic development.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953. Libya makes military facilities available to British troops (including the R.A.F.) which are stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States-Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic development during the period of this Agreement which runs until Dec. 24, 1970.

Trade with U.K.

	1966	1967
Imports from U.K.	£28,844,000	£22,492,000
Exports to U.K.	60,701,000	66,892,000

CAPITAL.—Tripoli and Benghazi are the joint

capitals of Libya. A new capital is under construction at Beida in Cyrenaica, to which some Ministries have now officially moved.

The principal towns with the latest available estimates of populations are: Tripoli (231,955); Misurata (70,015); Benghazi (107,657); Khoms-Cussabat (66,559); Derna (21,432); Barce (10,645); Tobruk (15,867); Sebha (9,804).

FLAG.—The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre. NATIONAL DAY.—December 24 (Independence Day).

Justice, Education, Family, Youth, Population, M. Jean Dupong; Mme. Madeleine Frieden-Kinnen (Secretary of State).

Secretary of State, Public Health, M. Raymond Vouel.

EMBASSY AND CONSULATE

27 Wilton Crescent, S.W.1

[01-235-6961]

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency André J. Clasen (1955).

A Grand Duchy in Western Europe, bounded as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein". In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, Germany renounced her former agreements with Luxembourg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (B.L.E.U.). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxembourg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Economic Community.

Besides B.L.E.U., Luxembourg is also a member of the Belgium-Netherlands-Luxembourg Customs Union (Benelux). The Court of the European Community has its seat in Luxembourg, as does the Secretariat of the European Parliament.

The area is 1,000 square miles; the population (1967) 335,000, nearly all Roman Catholics. There is a Chamber of 56 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity of over 4,000,000 tons. The revenue for 1968 was estimated at L.Fr.6 milliard, expenditure L.Fr.9 milliard. The Luxembourg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy. Exchange Rate, 120 Francs = £1. There are approximately 200 miles of railway.

Trade with U.K.

	1966	1967
Imports from U.K.	£1,176,000	£1,104,000
Exports to U.K.	3,143,000	3,233,000

The capital, Luxemburg, pop. (1964), 77,254, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language: all speak German and many English.

FLAG.—Three horizontal bands, red, white and blue. NATIONAL DAY.—June 23.

MADAGASCAR

(Ny Repoblika Malagasy)

President and Head of Government, M. Philibert Tsiranana, elected, 1959; re-elected, 1965.
Vice-President of the Government, M. Calvin Tsiebo.
Minister of Foreign Affairs, M. Jacques Rabe-mananjara.

MALAGASY EMBASSY IN LONDON
33 Thurloe Square, S.W.7.
[01-584-3714]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Cézaire Rabenoro (1967). Counsellors, H. Razafindratovo (1st Counsellor); G. Andrianasolo (Commercial); R. Rambahinari-sion (Economic); Mme. G. Rabenoro (Cultural). Area 228,000 sq. miles. Population (1967), 6,750,731. Madagascar is 240 miles distant from the S.E. coast of Africa and is the fifth largest island in the world. It became a French protectorate in 1895. In 1896 the Hova dynasty was suppressed and the administration entrusted to a Governor-General. Constitutional reforms were introduced in 1957, giving the island internal autonomy and Madagascar adopted republican status on Oct. 14, 1958, while remaining within the French Community. Complete independence was proclaimed on June 26, 1960, and immediately thereafter, the President of the Republic, M. Philibert Tsiranana, signed formal agreements with the French Government confirming Madagascar's continued membership of the French Community and establishing co-operation with the French Republic on defence, monetary, judicial and educational matters, etc.

The island's economy is still mainly agricultural. A first development plan (1964-68) was put into operation in 1965, with emphasis on increased agricultural production and creation of small industries. A second development plan is under preparation. The principal exports in 1967 in order of value were coffee (31.6 per cent. of total), meat and meat products (16.2 per cent.), sugar, rice, vanilla, petroleum products, raffia, clove, sisal, tobacco and cigarettes, graphite, clove oil, ground-nuts, butter beans, hides and skins, cattle, bananas, pepper, tapioca and mica. Cattle raising is an important activity and fresh markets are being sought. Minerals mined and exported include graphite, mica and uranothorite. Total exports in 1967 were FMG 25,711,300,000 compared with Frs FMG 24,131,500,000 in 1966. The main imports in 1967, which totalled Frs. FMG 35,885,300,000 (as compared with Frs. FMG 35,073,600,000 in 1966) were transport equipment, chemicals and semi-chemical goods, textiles, food products, metal products, machinery, electrical equipment, crude and other petroleum products, paper and paper products.

Imports from the United Kingdom in 1967 were valued at £454,000; Exports, £856,000.

The average rate of exchange is Malagasy francs (FMG) 590 = £1. (See also p. 84.)

CAPITAL.—Tananarive (Antananarivo) (335,149). Other towns are Ψ Tamatave, the chief port (50,247); Ψ Majunga, the second port (44,805); Fianarantsoa (43,997); Diego-Suarez (38,080); Tuléar (30,072) and Antsirabe (29,164).

The former dependencies of Madagascar in the Mozambique Channel, Juan de Nova, Europa Island and Bassas da India (uninhabited), are integral parts of the French Republic and, ■ such, are administered by the Ministry of Overseas Territories and Departments of the French Government. The Island of Saint-Marie, off the east coast of Madagascar is recognized as a dependency of the Malagasy Republic but its inhabitants enjoy dual (French/Malagasy) nationality.

FLAG.—Equal horizontal bands of red (above) and green, with vertical white band by staff.

NATIONAL DAY.—October 14 (Proclamation of Republic).

There is an Honorary British Vice-Consul at Tamatave.

THE MALDIVE ISLANDS

Sultan, His Highness Al Amir Sir Mohammed Fareed Didi, K.C.M.G., installed March 7, 1954.
Prime Minister, Hon. Ibrahim Nasir.

Area, etc.—The Maldives Islands are a chain of coral atolls, some 400 miles to the south-west of Ceylon, stretching from just south of the equator for about 600 miles to the north. There are 12 clearly defined atolls, separated from each other by deep channels, through which the currents run strongly. The total number of islands is over 1,067, some being very small indeed; about 210 of them are inhabited. The population of the islands according to the 1967 census figures is 103,801. The people are Muslims and the Maldivian language is akin to Elu or old Sinhalese. They are highly civilized and are great navigators and traders.

Government.—The Maldives Islands form a Sultanate which is elective. There is a Parliament (the *Majlis*) with representatives elected from all the atolls. The life of the *Majlis* is 5 years. The Government consists of the Prime Minister and the Cabinet, who are responsible to the *Majlis*. By the agreement signed with the British Government in 1965, the Maldives Islands form a composite sovereign and fully independent state, free to conduct their own external relations with other countries.

With the agreement of the Maldivian Government, an R.A.F. staging post has been constructed on Gan Island, in Addu Atoll, the most southerly atoll, lying just south of the equator.

Production, etc.—The islands are thickly covered with coconut palms, and coir and ropes are exported. The principal industry is fishing and considerable quantities of dried fish are exported to Ceylon, where it is in great demand.

CAPITAL.—Maïé (population about 11,760). Communications are by steam or sailing ship, and

a small air strip has been constructed on Hulule Island, about 1 mile from Malé.

BRITISH REPRESENTATION

Although the Maldiv Islands ceased to belong to the Commonwealth, the Secretary of State for Commonwealth Relations continues to be responsible for relations with the Maldivian Government.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Stanley Tomlinson, K.C.M.G. (1966) (concurrently H.M. High Commissioner in Ceylon).

MALI (République de Mali)

President, Modibo Keita.

The Republic of Mali, an inland state in north-west Africa has an area of 465,000 square miles and the population was estimated at 4,745,000 in 1967.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Senegal. The title of the Republic of Mali was adopted on Sept. 22, 1960. The Republic is no longer a member of the French Community. On July 1, 1962, a Mali franc equal in value to the Franc CFA was introduced and a new State bank set up.

Mali's principal exports are groundnuts (raw and processed), cotton fibres, meat and dried fish. The principal rivers are the Niger and the Senegal. Goods to the value of £294,000 were imported from the United Kingdom in 1967 (1966, £338,000).

CAPITAL.—Bamako (150,000). Other towns are Gao, Kayes, Mopti, Sikasso and Segou (all regional capitals), and Timbuktu.

FLAG.—Vertical stripes of green (by staff), yellow and red. **NATIONAL DAY.**—September 22.

BRITISH EMBASSY
(Diplomatic relations suspended.)

MAURITANIA

(Islamic Republic of Mauritania)
President and Prime Minister, Moktar Ould Daddah.

Mauritania lies on the north-west coast of Africa between Spanish Sahara and the Republic of Senegal. It is bounded on the east and south by the Re-

public of Mali. Area 419,000 sq. miles. The population of Mauritania was estimated at 900,000 in 1965. (For MAP, see p. 871.) The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic. It became fully independent on Nov. 28, 1960. Mauritania's main source of potential wealth lies in rich deposits of iron ore around Fort Gouraud, in the north of the country. These are being exploited by an international company, the Société de Mines de Fer de Mauritanie, with the aid of a loan from the I.B.R.D. Exports began in June, 1963, by a new railway built to link the mine with the Mauritanian coast at Port Etienne. A company is being set up to exploit copper deposits at Akjait, starting in 1970.

Trade with U.K.

	1966	1967
Imports from U.K.	£67,000	£267,000
Exports to U.K.	6,545,000	6,944,000

FLAG.—Yellow star and crescent on green ground. **NATIONAL DAY.**—November 28.

CAPITAL.—Nouakchott. (15,000). **British Ambassador, His Excellency John Gabriel Tahourdin, C.M.G. (1966) (Resident at Dakar).**

MEXICAN EMBASSY IN LONDON

48 Belgrave Square, S.W.1

[01-235-6393]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Lic. Don Eduardo Suárez (1965). Minister, Señor Lic. Don Rubén González Sosa. Counsellors (Cultural Affairs), Señor Lic. don Hugo Gutiérrez Vega; Señor José Manuel Orozco Uruchurtu. 2nd Secretary, Señor Don Luis Wybo Alfaro (Consular Affairs). Commercial Attaché, Señor Lic. Don Román Millán Morales. Attaché, Señor Lic. Carlos Ortiz Mena.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from $14^{\circ} 33'$ to $32^{\circ} 43'$ N. lat. and $86^{\circ} 46'$ to $117^{\circ} 08'$ W. long., and comprising one of the most varied zones in the world. It contains 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles. Results of the Mexican General Census taken on June 8, 1960, showed a total population of 34,923,129; estimated (June, 1967), 45,671,000.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Cítaltepetl ("El Pico de Orizaba") on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 ft.), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 ft.), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 ft.). The only considerable rivers are the *Río Grande del Norte* which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Río Grande de Santiago*, *Río Balsas* and *Río Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas". The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from 500 to 1100 A.D. and 1300 to 1500 A.D. and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive

archaeological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in the States of Yucatán and Chiapas (Maya); Teotihuacán, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacano); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Vera Cruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to war from 1845–48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency resulted in invasion by French forces which installed Maximilian as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Diaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of a Senate of 60 members, elected for six years, and of a Chamber of Deputies, at present numbering 212, elected for three years. Presidents, who wield full executive powers, are elected for six years: they cannot be re-elected.

There are four political parties registered in Mexico, of which by far the largest and most influential is the Partido Revolucionario Institucional (P.R.I.) which has for many years constituted the government party.

Communications.—Veracruz, Tampico and Coatzacoalcos are the chief ports on the Atlantic, and Guaymas, Mazatlán, Acapulco and Salina Cruz on the Pacific. The total tonnage of registered merchant marine at the end of 1965 was 450,000 tons. There were 23,793 kilometres of railway track open in Mexico in 1963. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system; help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States.

The total length of road at the end of 1965 was 58,278 kilometres, of which 51,461 kilometres were usable in all weathers. Mexico City may be reached by at least three excellent roads from the United States, and work is complete on roads southward from Mexico City to Yucatán and the Guatemalan border. The toll road from Mexico City to Veracruz is nearing completion.

At the end of 1963 the national telegraph system's lines were 191,653 kilometres in length. International telegraph services to the United States frontier are provided by the Government-owned Mexican Telegraph Company and then through the United States to Canada and Europe.

Telephone communications are similar, with 3,529,163 km. of lines in 1963.

There is a good national and international network of air services. Distance covered in 1965 totalled 102,000,000 kilometres. Registered civil aircraft numbered 1,692 in August, 1966.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 34,000,000 acres are under cultivation and great efforts are being made to increase this area. Grazing land is estimated at 80,000,000 acres (plains) and 115,000,000 acres (highlands) and about 46,000,000 acres are covered by exploitable forests. The principal agricultural crops are maize, beans, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, rice, chickpeas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus yields several fermented drinks, mezcal and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries, over 80 per cent. of all consumer goods now being made in Mexico. Most of the remaining 20 per cent. is in fact made up of bulk imports of industrial equipment and motor vehicles for assembly, so that the true figure for local manufacture of consumer goods is nearer to 95 per cent. The steel industry has expanded rapidly and produced 2,975,335 tons of steel in 1964. The mineral wealth is great, but in recent years the low world market prices have caused a slump in the mining industry. The principal minerals are gold, silver, copper, lead, zinc, quick-silver, iron and sulphur. Substantial reserves of uranium have been found. Production in 1965 amounted to Gold, 6,712 kilograms; Silver, 1,254 tons; Copper, 69,162 tons; Lead, 170,092 tons; and Zinc, 224,876 tons.

The total petroleum reserves were said to be 5,078 m. U.S. barrels in 1965. Total production of petroleum and natural gasoline reached 132,141,000 barrels and 14,000 million cubic metres respectively in 1965.

Woollen and cotton spinning and weaving, the making of footwear and clothing and of domestic appliances of all kinds have made such progress in recent years that all these industries are protected by high import duties and import licence restrictions.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 4,423 million kWh in 1950 to 17,253 million kWh in 1965.

Defence.—The regular army has ■ strength of fifty infantry battalions, one infantry brigade and ■ Presidential Guard of three battalions, 21 cavalry regiments, ■ parachute battalion and a small number of artillery and engineer units. There is also ■ conscript army of about 250,000 men organized into National Service divisions, each 6,000-7,000 strong. The Navy has some 50 ships of all kinds and the Air Force some 180 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish ■ well. Of those speaking indigenous languages only, about 30 per cent. speak

Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec, 7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1964 there were 35,165 primary schools with 5,620,324 pupils, 1,645 secondary schools with 360,014 pupils, and 1,064 technical and commercial secondary schools with 189,764 pupils. The National University of Mexico was founded in 1533 and reorganized in 1910. There are 34 other Universities including one exclusively for women. The prevailing religion is Roman Catholic. In 1957, only 28 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

FINANCE 1966

Estimated revenue (Budget) ... Pesos 20,133,000,000
expenditure (do.) - 20,132,200,000

As from April 19, 1954, by agreement with the International Monetary Fund, the Rate of Exchange has been fixed at 12.50 pesos=1 \$U.S. (See also p. 84).

TRADE 1965

Total Imports Pesos 19,502,500,000
Total Exports " 13,883,750,000

Trade with U.K.

1966	1967
Imports from U.K. £20,198,000	£26,408,000
Exports to U.K. 12,313,000	11,514,000

The imports (mainly from U.S.A.) consist largely of machinery and implements for industry, mining and agriculture, and raw materials for industry. Principal exports are cotton, coffee, sisal (henequen), tomatoes and shrimps, lead, silver, gold, copper, zinc and other metals, tobacco, sulphur and heavy fuel oil.

CAPITAL. Mexico City, Population (Census, June 8, 1960) 4,829,402. Other towns are Guadalajara (734,346), Monterrey (600,609), Puebla (285,284), Ψ Mérida (177,405), San Luis Potosí (173,886), Mexicali (171,648), Chihuahua (144,653), Aguascalientes (122,809), Morelia (101,395).

FLAG.—Three vertical bands, green, white, red, with shield of Mexico in centre. **NATIONAL DAY.**—September 16 (Proclamation of Independence).

MONACO

(Principauté de Monaco)

Sovereign Prince, H.S.H. Rainier III-Louis-Henri-Maxence Bertrand, born May 31, 1923, succeeded his grandfather (H.S.H. Prince Louis II), May 9, 1949; married April 19, 1956, Miss Grace Patricia Kelly and has issue Prince Albert Alexandre Louis Pierre, born March 14, 1958, Princess Caroline Louise Marguerite, born January 23, 1957; and Princess Stephanie Marie Elisabeth, born Feb. 1, 1965.

Secretary of State, M. Paul Noghès.

President of the National Council, M. Paul Demange (Minister of State), appointed 1967.

CONSULATE-GENERAL IN LONDON
4 Audley Square, W.1.

[01-629-0734]

Consul-General, I. S. Ivanovic.

Consul, A. J. Hucker, 3 Gray's Inn Square, W.C.1 [01-242-5323].

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long and half-a-mile broad (area approx. 360 acres), with (1956) 20,422 inhabitants (Monégasque nationals, 2,606), and a yearly average of over 650,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay), and the import duties are the same as in France. The National Council consists of 18 members and the Council of Government of the Minister of State and three State Counsellors. There is a local police force of 160 men.

A new constitution was promulgated by Prince Rainier on Dec. 17, 1962, which is subject to modification only with the approval of the elected National Council. It maintains the traditional hereditary monarchy and gives guarantees for the right of association, trade union freedom and the right to strike.

CAPITAL.—Monaco-ville (2,422).

FLAG.—Red and white

British Consul-General, G. M. E. Paulson, C.B., C.M.G., O.B.E. (Resident at Nice).

suren; S. Luvsan; D. Maidar; D. Molomzhants; Zh. Sambu; Yu. Tsedenbal; N. Zhagvaral (full members); B. Lkhamsuren; N. Luvsanravdan (alternate members).

Secretariat of the Central Committee, Yu. Tsedenbal (1st); Ts. Dugersuren; B. Lkhamsuren; D. Molomzhants; N. Zhagvaral.

Area and Population.—The Mongolian People's Republic (Outer Mongolia) is a large and sparsely populated country to the North of China. Its area is over 600,000 square miles. Its population, was officially estimated at 1,140,000 in 1966. However, this total constitutes only part of the Mongolians of Asia, the greater number of whom are to be found in China (especially Inner Mongolia and Sinkiang) and in the neighbouring regions of the Soviet Union (especially the Mongolian Buryat Autonomous Region). This country, which is almost nowhere below 1,000 feet above sea level, forms part of the Central Asiatic Plateau and rises towards the west in the high mountains of the Mongolian Altai and Khanggal Ranges. The Khentai Mountain Range, situated to the north-east of the capital Ulan Bator, is less high. The Gobi region covers the southern half of the country. It contains some sand deserts, but between these less hospitable areas there is steppe land which provides pasture for great numbers of cattle, sheep, goats, camels and horses (the latter is still the characteristic means of transport for the population). There are several long rivers and many lakes, but good water is scarce since much of the water is salty. The climate is hard, with a short mild summer giving way to a long winter when temperatures can drop as low as minus 50° Centigrade.

History.—Mongolia, under Genghis Khan the conqueror of China and much of Asia, was for many years a buffer state between Tsarist Russia and China, although it was under general Chinese suzerainty. The outbreak of the Chinese Revolution in 1911 was the signal for a declaration of independence which was confirmed by the Sino-Russian Treaty of Kiakhta (1915), but cancelled by a unilateral Chinese declaration in 1919. Later the country became a battleground of the Russian Civil War, and Soviet and Mongolian troops occupied Ulan Bator in 1921: this was followed by another declaration of independence. However, in 1924 the Soviet Union in a Treaty with China again recognized the latter's sovereignty over Mongolia: but this was never properly exercised because of China's pre-occupation with internal affairs, and later by the anti-Japanese war. The Mongolian People's Republic was formally established in 1924. Under the Yalta Agreement, Chiang Kai-shek agreed to a plebiscite, held in 1945, in which the Mongolians declared their desire for autonomy; this was granted. The country entered the United Nations in 1961. The heroes of Mongolian history during the earlier part of the century were Sukhebatur, who died in 1923, and the Communist Choibalsang (died 1952), who did much to turn the country into the Communist state it is today, and carried out a systematic destruction of the power of the Lamas, and the old princely houses which had previously been the dominant force in both the economy and the government.

Production, etc.—The total of Mongolia's live-stock is about 24,000,000 (14,000,000 sheep, 5,000,000 goats, 2,000,000 horned cattle, over 2,000,000 horses, under 1,000,000 camels). Traditionally the Mongolian is a herdsman, tending his flocks of sheep, goats and horses, cows and camels and leading a totally nomadic life. With the coming of the Communist régime (under the Mongolian People's Revolutionary Party) and especially since 1952, great efforts have been made

to settle the population, but 80 per cent. or more still live in the traditional *yurt* (circular tent). The pastoral population was collectivized at the end of the 1950's into huge *negdels* (co-operatives) which have hastened the process of settlement, but within a *negdel* or state farm the herdsmen and their families still move with their *yurts* from pasture to pasture as the seasons change. The country, except for the capital, is today divided into 18 *aimaks* (provinces) and beneath these into more than 300 *somons* (counties), and these form the basis of the State organization of the country, parallel with which runs the apparatus of the Revolutionary Party.

Membership of the Communist bloc has brought Mongolia considerable quantities of aid from other Socialist countries, especially the Soviet Union and China, the last of which has supplied many thousands of workers to help with various construction projects. Mongolia is now relying much less on Chinese and more on eastern European, especially Czech, Polish and East German aid to supplement the massive assistance received from the Soviet Union. Soviet and Bloc aid is hastening the process of industrialization; for although the economy remains based on the herds of animals, and the principal exports of the country are still animal by-products (especially wool, hides and furs) and cattle, factories serving the needs of the country have been started up and the coal and electricity industries have been developed to provide an industrial base.

Ulan Bator, which contains a quarter of the country's population, is the main seat of industry. Under the third 5-year plan, a new industrial centre has been founded at Darkhan, north of the capital near the Soviet frontier. This is being continued in the fourth 5-year plan (1966–70), and a start has been made with the development of Choibalsan in the east as a third industrial town (mostly for the processing of animal and agricultural products). There are mineral resources which are beginning to be exploited. Agriculture, formerly little practised, is now being extended. Communication is still difficult in the country as there are virtually no roads. The trans-Mongolian railway, following the line of the old north-south trade route, was opened in 1955 and links Mongolia with both China and Russia. Mongolia's fundamental difficulty is its very small population and labour force.

Foreign trade is dominated by the Soviet Union, with the eastern European countries taking most of what is left. The Government hopes nevertheless to build up some trade with western countries. Mongolia's imports from the United Kingdom in 1967 were valued at £211,000 (1966, £19,000).

CAPITAL.—Ulan Bator (195,300).

FLAG.—Vertical tri-colour red, blue, red and in the hoist the traditional Soyombo symbol in gold.

NATIONAL DAY.—July 11 (Anniversary of the Mongolian People's Republic).

Diplomatic Representation

The United Kingdom and Mongolia agreed to exchange envoys in 1963. The Mongolian Ambassador to Bulgaria, resident in Sofia, is simultaneously accredited to the Court of St. James's.

BRITISH EMBASSY

MOROCCO

(Kingdom of Morocco)

King, H.M. King Hassan II, born July 9, 1929; succeeded February 26, 1961, on the death of his father, King Mohammad V.

Ministers in the Royal Cabinet.—Ahmed Majid

Benjelloun; Thami Ouazzani; Dey Ould Sidi Baba; Ahmed Ben Messaoud (*Minister in the Court*).

Prime Minister and Minister of Economic Affairs and Planning, Mohammed Benhima.

There are 27 Ministers in the Cabinet and 3 Secretaries of State.

ROYAL MOROCCAN EMBASSY AND CONSULATE
49 Queen's Gate Gardens, S.W.7
[or 584-8827]

Ambassador Extraordinary and Plenipotentiary, Her Excellency H.R.H. Princess Lalla Aicha (1965). Counsellor, El Ghali Benhima.

Attachés, Miss Rita Bennis (*Culture*); Abderrazak Doghmi (*Administration*); Cdt. Farid Chraibi (*Military*); Mohamed Fenzar (*Commercial*).

Area and Population.—Morocco is situated in the north-western corner of the African continent between latitude 27° 40'–36° N. and longitude 2°–11° W. with an area estimated at approximately 180,000 sq. miles, and population (estimated 1968) of 14,000,000. It is traversed in the north by the Riff Mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the Pillars of Hercules, the western gateway of the Mediterranean.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast, (where a high degree of humidity is, however, prevalent) the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

Government.—Under the terms of the Treaty of Fez (1912) Morocco was a French Protectorate until 1956. A Spanish "sphere of influence" extended over the northern part of the country with the exception of the Tangier Zone. The

latter territory, under international administration, enjoyed a special régime involving a free monetary system and free trade, until its final integration with Morocco on April 19, 1960.

Ceuta and Melilla (see under Spain) are Spanish "State Territories". Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century, and Melilla, further east on a rocky promontory of the Riff coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhucemas, Penon de Velez and the Zaffarin Islands are Spanish possessions.

Morocco became an independent sovereign state in 1956, following joint declarations made with France on March 2, 1956, and with Spain on April 7, 1956. The Sultan of Morocco, Sidi Mohammed ben Youssef, adopted the title of King Mohammed V and as Prime Minister was personally responsible for the administration until his death.

A constitution was adopted by referendum on December 7, 1962, and came into force on December 14, 1962. Based on the French model, it provided for a bi-cameral elected legislature with limited legislative powers and a considerable degree of overall control of affairs by the monarch. It represented none the less a considerable advance towards parliamentary democracy.

The series of elections necessary for the establishment of parliamentary institutions, provided for by the constitution, began on May 17, 1963, with an election for the Chamber of Representatives (the lower house with 144 members) which gave the F.D.C.I. 74 seats, the Istiqal party 41 seats, the U.N.F.P. 28 seats and one independent.

A new government was formed on November 13, 1963, the majority of portfolios being entrusted to members of the F.D.C.I. On November 18, 1963, the first session of the Moroccan parliament was officially opened by King Hassan II.

Following serious disturbances in Casablanca in March 1965, attempts were made by King Hassan, in consultation with all political parties, to form a government of national union. These efforts were unsuccessful and on June 7, 1965, the King proclaimed a "state of exception" and suspended Parliament. Assuming himself the office of Prime Minister, he announced the formation of a new government and indicated that constitutional changes were to follow. Several partial government reconstructions have taken place since, but in 1968 the "state of exception" still continued.

Defence.—The Moroccan army, formed in 1956, is about 50,000 strong. A Moroccan air force was also formed in 1959 and a navy in 1960. The armed forces possess quantities of French and American equipment, including aircraft.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The current Five Year Plan (1968-72) for economic development places particular emphasis on agricultural development. Other priority sectors are education and training and tourism.

Agriculture employs some 70 per cent. of the working population and accounts for about 45 per cent. of Morocco's exports. The main agricultural products are cereals, citrus fruits, olives, grapes, tomatoes and vegetables. Dates and figs are also grown and exported. Cork is the most important commercial forest product. Esparto grass is also produced. There is a fishing industry and substantial quantities of canned fish, mainly sardines, are exported. Livestock in 1966 included about 15,000,000 sheep, 7,400,000 goats, 2,900,000 horned cattle and smaller numbers of donkeys, camels, horses and pigs.

Morocco's mineral exports are phosphates,

anthracite, manganese, iron ore, lead and zinc, while the following are also produced: petroleum, cobalt, graphite, copper molybdenum, tin, antimony, ochre and gypsum. Production of phosphates totalled 10,058,400 tons in 1967, of which 9,268,871 tons were exported. There is an oil refinery at Mohammedia, near Casablanca with an annual capacity of 1,250,000 tons and a smaller one at Sidi Kacem (300,000 tons). Production of crude oil in 1967 amounted to 97,161 tons.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France and the franc area, the U.S.A., Germany, the United Kingdom and Italy, was valued in 1967 at Imports, DH 2,620,244,000; Exports, DH 2,146,199,000.

Trade with U.K.

	1966	1967
Imports from U.K.	£5,115,000	£6,852,000
Exports to U.K.	11,248,000	12,307,000

There is a British Chamber of Commerce at Casablanca (115 Boulevard Mohammed V).

Finance and Currency.—Morocco is part of the franc Zone. The unit of currency is the dirham. Exchange rate (1968): DH 12·10 = £ (see also p. 84).

The 1968 Ordinary Budget amounted to DH 2,381,635,190 and the Development Budget to DH 1,130,244,100.

Communications: Railways.—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due south from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,250 miles and traction is electric or diesel.

Roads.—In the south the road network is extensive (9,000 miles of road suitable for year-round traffic and some 20,000 miles of dry-season tracks). In the north an asphalt road links Tangier with Tetuan, branches north to Ceuta, and continues eastward through Villa San Jurjo to Melilla, and on to Oujda through Berkane. The new Route de l'Unité, connecting the road network of the former Northern Zone with the south, through Fez, was opened to traffic in 1962.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea. B.E.A. operates services between Tangier and London and Royal-Air-Maroc between Casablanca and London. There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-France and Royal-Air-Maroc operate internal services and many between Morocco and towns in France and Spain. There are also regular services to other European and North African countries and to Senegal and the Canaries.

Language.—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The foreign population is estimated at 190,000 (1967), a figure which includes 97,000 French and 50,000 Spaniards. The national daily press consists of 3 Arabic, 4 French and one Spanish newspapers.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a secular university at

Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

CAPITAL.—Ψ Rabat (population 261,450). On Jan. 2, 1962, it was decreed that Tangier (166,290) would be the summer capital of Morocco, the King and the Government residing there for two months each year from 1962. Tangier was on the same date declared a "free zone" primarily for commercial purposes. The other chief towns are: Ψ Casablanca (1,177,000); Marrakesh (264,300); Fez (249,450); Meknès (205,000); Oujda (149,300); Tetouan (117,000). Ψ Kenitra (99,380). The towns of Fez, Marrakesh and Meknes were capitals at various times in Morocco's history.

FLAG.—Red, with green pentagram (the Seal of Solomon). NATIONAL DAY.—March 3 (Anniversary of the Throne).

MUSCAT & OMAN

(The Sultanate of Muscat and Oman)
Sultan, Said bin Taimur, born Aug. 13, 1910, succeeded his father (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

CONSULATE IN LONDON

7, Albert Court, Kensington Gore, S.W.7
Consul, Capt. C. E. Kendall (1962).

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibat on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast of the peninsula which belongs to the Trucial Shaikhdom of Sharjah. Ras Darbat Ali marks the boundary between the Sultanate and the territory of Southern Yemen. The Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called.

Physically, the Sultanate consists of 3 divisions, coastal plain, range of hills and plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation.

North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July,

well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province, which is the only part of the Arabian peninsula to receive the benefit of the monsoon. Frankincense is also exported. Its principal town is Salalah on the coast, while Ψ Murbat is the port. Ψ Guradur, situated on the Baluchistan coast, formerly belonged to the Sultanate, but was transferred to Pakistan on September 8, 1958.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman, although the Sultan himself has stayed in Salalah since 1958. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 565,000 (1966). The Kuria Muria Islands ceded to the Sultanate on Nov. 30, 1967, have 78 inhabitants. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The inhabitants of the towns of Muscat (pop. 6,208) and Matrah (pop. 14,119) are mostly of Baluchi and Negro stock. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. A Development Secretary was appointed in 1958, and under his control much progress has been made in agriculture, public health, education and roads. The inland tribes breed large numbers of camel, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is Ψ Muscat (one of the ports on the mail route between Bombay and Basra). 174 vessels of all nationalities, including 106 British, with a total tonnage of 624,695, entered the port in the foreign trade of Muscat in 1965. 55,083 tons of cargo were discharged in Muscat in 1965 and 53,743 tons in 1966. These figures do not include tonnage discharged for the oil company at Mina-el-Fahl, which in 1966 was estimated at about 60 per cent. of the above. The mail service between Muscat and Basra is once every two or three weeks in each direction.

Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. The towns of Muscat and Matrah are now connected by a fairly good concrete road and the concrete road from the airfield at Bait-al-Falaj to Matrah is also complete. Outside the towns of Muscat and Matrah and the airfield there are only tracks ranging from good ones which have been cleared and graded to ravines containing large boulders or stretches of soft sand. Land-Rovers and similar types of truck are the only vehicles which can be relied on. The Sultanate Development Department has completed over 500 miles of motorable tracks so far.

Finance.—Before the advent of oil revenues, the annual revenue of the Sultanate was estimated at

£900,000. The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee note (but not coin) circulates and is the official currency of the Sultanate, although not generally in use in the interior. There are also four denominations of copper coins, twenty, ten, five and three, called "baizas". The official rate of exchange is 320 baizas = 1 M.T. dollar = Rs. 5 (approx.). The weights in use are one *kiyas* = the weight of six dollars or 5.9375 oz.; 24 *kiyas* = one Muscat maund; 10 maunds = one *Farasala*; 200 maunds = 1 *Bahar*. Rice is sold by the bag, other cereals by the following measurement: 40 *Palis* = one *Farrah*; 20 *Farrahs* = one *Khandi*.

Trade with U.K.

	1966	1967
Imports from U.K.	£3,071,000	£2,308,000
Exports to U.K.	16,000	1,083,000

Commerce and Trade.—Trade is mainly with India, Pakistan, the Persian Gulf States, Australia, the United Kingdom, the Netherlands and Japan. Imports for the year 1967 amounted to £3,589,480 (excluding duty-free imports); the average annual value of exports is about £800,000. Chief imports in 1967 were: rice, about £350,000; wheat and wheat flour, £300,000; sugar, £72,000; cement, £117,000; and cigarettes and tobacco, £55,000 (from U.K.).

Petroleum Development (Oman) Ltd., a subsidiary of Shell began exporting oil on Aug. 1, 1967. Exports are currently at a rate of 10,000,000 tons annually and are expected to rise to 15,000,000 tons before 1970. A Germany company, Wintershall A.-G. has an offshore concession in the Gulf of Oman and is shortly to begin exploratory drilling in the region of Sohar.

Development.—A British firm has been commissioned by the Sultan to prepare and undertake a development plan for the region of Muscat and Matrah. Its cost is likely to be several million pounds and will be carried out in phases over a number of years. Public buildings, housing, schools, hospitals, recreation centres, electric supply and water are among the priority items. The new power station was expected to be generating electricity by October, 1968, and the new fresh water supply to be piped a distance of 33 miles was expected to be in use in mid-1969.

CAPITAL.—Ψ Muscat, population (estimated), 6,208.

Muscat—British Consul-General, D. C. Carden.

NAURU

(Republic of Nauru)

President. Hammer DeRoburt, born 1922, elected May 19, 1968.

The Republic of Nauru is an island of some 8 sq. miles in size, situated in 166° 55' E. longitude and 32° S. of the Equator. It had a population of 6,056 at the Census of June 30, 1966, of whom 3,101 were Nauruans and 2,955 non-indigenous, including other Pacific Islanders, Chinese and Europeans.

Nauru was discovered by Capt Fearn, R.N. in 1798, and was annexed by Germany in 1888. It surrendered to H.M.A.S. *Melbourne* in November, 1914. Until 1968 Nauru was administered by Australia under an international trusteeship agreement which on Nov. 1, 1947, superseded a former League of Nations Mandate.

Government.—Under Australian administration a Legislative Council of nine elected and five official members was established in 1966 and a four-member Executive Council. After negotiations at Canberra during 1967 between Mr. DeRoburt, then Head Chief of Nauru, and representatives of the

Trusteeship powers Australia, New Zealand and the United Kingdom, and with the concurrence of the U.N. Trusteeship Council, Nauru became an independent State from February 1, 1968. **Judiciary.**—The Nauruan Judiciary consists of a District Court, a Central Court and a Court of Appeal.

Education and Welfare.—Nauru has a hospital service and other medical and dental services. There is also a maternity and child welfare service. Education is available in schools on the island up to fourth year secondary school standard, beyond which overseas scholarships and public service cadetships are available.

Production, etc.—There are valuable deposits of phosphates on the island which were purchased from the Pacific Phosphate Company in 1919 by the Governments of Australia, New Zealand and the United Kingdom for £3,500,000 and vested in the British Phosphate Commissioners. Royalties on phosphate exports (about £5,000,000 annually) have been paid partly to the Nauruans and partly into a trust fund which used income from investments abroad to pay for Nauru's administrative and social services. Under the 1967 agreement, ownership of the phosphates (which are expected to be exhausted within about 30 years) will pass to the Nauruan Government by 1970. Phosphates will continue to be supplied exclusively to Britain, Australia and New Zealand.

Trade with U.K.

	1966	1967
Imports from U.K.	£68,000	£20,000
Exports to U.K.	1,172,000	355,000

FLAG.—Twelve-point star (representing the 12 original Nauruan tribes) below a gold bar (representing the Equator), all on a blue ground.

NEJD. See Saudi Arabia

NEPAL

Sovereign, King Mahendra Bir Bikram Shah Deva; succeeded, March 13, 1955.

COUNCIL OF MINISTERS

Prime Minister, Minister of Palace Affairs, Finance and General Administration, Surya Bahadur Thapa.
Deputy Prime Minister and Minister of Foreign Affairs, Kirtinidhi Bista.

Defence, Giri Prasad Budathoki.
Land Reform, Food and Agriculture, Rajeswar Devkota.
Law, Justice, Commerce and Industry, Surendra Bahadur Basnet.

Home Affairs, Panchayat, Information and Broadcasting, Gehendra Bahadur Rajbhandari.

There are also 6 assistant ministers, of whom 3 are concerned with Home and Panchayat Affairs, one with Land Reform, one with Food and Agriculture and one with General Administration.

Ministers of State, Daya Nidhi Sharma (Forest); Gyanendra Bahadur Karki (Education and Health); Rudra Prasad Giri (Transport, Communication, Power and Water).

ROYAL NEPALESE EMBASSY IN LONDON

12A, Kensington Palace Gardens, W.8.

[01-229-6231]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sirdar Iswarji Raj Misra (1965).
1st Secretary (vacant).

Military Attaché, Lt.-Col. S. B. Thapa.

Nepal (area 54,362 sq. miles; pop. (1966), 10,294,000) lies between India and Tibet on the slopes of the Himalayas, and includes Mt. Everest (29,028 ft.). Amid the mountains lie many fertile valleys. The lower hills and Terai Plains are

covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. (For MAP, see p. 745.) Katmandu, the capital, is connected with India by road, the mountain section of which was built by India under the Colombo Plan, and to Tibet by road from Katmandu to Kodari on the border, which was built by the Chinese and opened on May 26, 1967. The Indian-aided Sunauli Pokhara road (128 miles) was nearing completion in 1968.

Nepal exports rice and other grains, hides, oil-seeds, ghi, cattle, jute, large quantities of timber, etc., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, etc. Nepalese imports from U.K. were valued at £364,000 in 1967 and £310,000 in 1966.

Finance.—The revenue, realized chiefly from land rent, etc., was NRs. 311,000,000 in 1967-68. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. The exchange rate is NRs 24·20 = £1.

The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Hinduism and Buddhism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha, whose ruler founded the present Nepalese dynasty, became predominant in 1768. During the 1914-18 and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary movement in 1950 and 1951 achieved the aim of breaking the hereditary power of the Ranas and of restoring to the monarchy the powers which it had lost 104 years before. After ten years, during which various parties and individuals tried their hand at government, King Mahendra resumed direct powers on December 26, 1960, with the object of leading a united country to basic democracy.

The state of emergency ended on April 13, 1963, the King appointing a Cabinet consisting of a Prime Minister and seven other ministers, all of whom have seats in the indirectly elected *Rashtriya Panchayat* (Parliament). A State Council (*Raj Sabha*) of 60 members, to advise the King on state affairs, constitutional matters and on the choice of the heir to the throne was also appointed on April 2, 1963. An Act was passed at the same time maintaining the existing ban on political parties.

A new constitution, based on the Panchayat system, was introduced on December 16, 1962.

CAPITAL.—Katmandu, population (1961) 224,867. Other towns of importance are Lalitpur (145,301) and Bhaktapur (89,822). Both these population figures include some adjacent rural areas.

FLAG.—Double pennant of crimson with blue border on peaks; white moon with rays in centre of top peak; white quarter sun, recumbent in centre of bottom peak. **NATIONAL DAY.**—February 18.

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency Arthur Roy Handasyde Kellas, C.M.G. (1966). £4,625
1st Secretaries, G. F. Kinnear (Head of Chancery and Consul); D. A. Spain (Information).
Military Attaché, Lt.-Col. T. C. White.
2nd Secretary, R. E. Ashbourne.
Vice-Consul, I. J. Towner.

British Council Representative, R. Arbuthnott, Adda Ghar, King's Way, Katmandu.

NETHERLANDS (or HOLLAND)

(Koninkrijk Der Nederlanden)

Queen of the Netherlands, Her Majesty JULIANA, K.G., born April 30, 1909; married January 7, 1937, Prince Bernhard of Lippe-Biesterfeld, G.C.B., G.C.V.O., G.B.E. (PRINCE OF THE NETHERLANDS), born June 29, 1911, succeeded, September 4, 1948, upon the abdication of her mother Queen Wilhelmina who died Nov. 28, 1962. Issue:

- (1) H.R.H. Princess Beatrix Wilhelmina Armgard, G.C.V.O., born Jan. 31, 1938; married March 10, 1966, H.R.H. Prince Claus George Willem Otto Frederik Geert of the Netherlands, Jonkheer van Amsberg; and has issue, Prince Willem Alexander, b. April 27, 1967; and a son, b. Sept. 25, 1968.
- (2) H.R.H. Princess Irene Emma Elizabeth, born Aug. 5, 1939; married April 29, 1964, Prince Hugo Carlos of Bourbon-Parme.
- (3) H.R.H. Princess Margriet Franciska, born (at Ottawa, Canada), Jan. 19, 1943; married Jan. 10, 1967, Jhr. Peter van Vollenhoven; and has issue, Prince Mauritz, b. April 17, 1968.
- (4) H.R.H. Princess Maria Christina, born Feb. 18, 1947.

CABINET

Prime Minister and Minister of General Affairs, P. J. S. de Jong (Catholic).

Vice-Premier and Minister of Finance, Prof. H. J. Witteveen (Liberal).

Vice-Premier and Minister of Transport and Waterways.

Agricultural Attaché, W. G. F. van Oosten.

Asst. Agricultural Attachés, P. G. Meuwissen; M. Van der Top.

Consular Section.

38 Hyde Park Gate, S.W.7.

Consul-General, Jhr. H. A. Teixeira de Mattos.

1st Secretary (Consular), Jhr. R. de Beaufort.

2nd Secretary, Jhr. C. C. C. M. van Nispen tot Sevenaer.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. $50^{\circ} 46' - 53^{\circ} 34'$ N. and long. $3^{\circ} 22' - 7^{\circ} 14'$ E., consisting of 12 provinces plus the North-East Polder and Oostelijk Flevoland (reclaimed parts of the Zuider

a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the *Tweede Kamer* are paid.

General elections were held on February 15, 1967, for the Second Chamber of the States-General. Party representation is: Catholic People's Party, 42; Labour Party, 37; Liberal, 17; Anti-Revolutionary, 15; Christian Historical Union, 12; Democrats '66, 7; Farmers' Party, 7; Communists, 5; Pacifist Socialists, 4; Political Reformed, 3; Re-formed Political Union, 1.

The Upper House of the States General was elected by the Provincial Councils half in 1963 and half in 1966. Party representation is: Catholic People's Party, 25; Labour Party, 22; Liberal Party, 8; Anti-Revolutionary Party 7; Christian Historical Union, 7; Pacifist Socialist Party, 3; Farmers' Party 2; Communist, 1.

Defence.—The army is a component part of the North Atlantic Treaty Organization. The Royal Netherlands Navy is being built up to a modern force of one aircraft carrier, 2 cruisers, 18 modern escorts, 6 submarines, 1 fleet supply ship and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force", has been reconstituted since the war, and now forms an integral part of the air defence of N.A.T.O. After a period of reorganization and expansion it has now attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. The latter is integrated into the N.A.T.O. tactical air force.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are ten national papers, four of which are morning papers, and there are many regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), Tilburg (R.C.) (commercial), Enschede (polytechnic) and Eindhoven (polytechnic) (opened in Sept. 1957).

Communications.—The total extent of navigable rivers is 3,500 miles and of roads approximately 27,770 miles. On January 1, 1966, the total length of the railway system amounted to 2,030 miles, of which 1,017 miles were electrified. The mercantile marine on Jan. 1, 1967, consisted of 1,389 ships of total 4,836,000 gross registered tons, including vessels registered in the Netherlands Antilles and Surinam, but excluding tugs and contractors' equipment. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the course of 1967 was 158,125 miles.

Zee) and containing a total area of 13,500 sq. miles (34,830 sq. km.). The population in March, 1968, was 12,676,000. The live birth rate in 1967 was 19·5 per 1,000 of the population, and the death-rate 8·5.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt.

The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, both mechanical and electrical, electronics, nuclear energy, petrochemicals and plastics, aircraftmotors and shipbuilding, steel, textiles of all types, leather goods, electrical appliances, metal ware, furniture, paper, cigars, sugar, liqueurs, beer, clothing, rubber products, etc.

Production of coal (1967) was 8,065,000 metric tons; oil, 2,265,000 metric tons; steel, 3,497,000 metric tons and natural gas, 7,185,000,000 cu. metres. Diamond-cutting, though still an important industry, has declined considerably in importance, employing about 540 hands at the end of 1967.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I,

Foreign Debt.....	345,000,000

The official rate of exchange permits of fluctuation between 8.55 and 8.82½ florins = £1.

See also p. 83.

TRADE

The Dutch are traditionally a trading nation. *Entrepô*: trade, banking and shipping are of particular importance in their economy. The geographical position of the Netherlands, at the mouths of the Rhine, Meuse and Scheldt, brings a large volume of transit trade to and from the interior of Europe to Dutch ports.

Principal trading partners are the Federal Republic of Germany and Belgium/Luxemburg. Britain supplied 5·6 per cent. of Netherlands imports in 1967 (Fls. 1,674,000,000) and took 8·7 per cent. of Netherlands exports (Fls. 2,330,000,000).

In common with other members of the European Economic Community, the Netherlands on July 1, 1968, removed remaining duties on imports from EEC countries and brought down duties on imports from other countries into line with the Common External Tariff of the EEC.

The index of industrial production in the Netherlands rose from 123 in 1966 to 129 in 1967 and the index of production per worker rose from 121 to 132 (base: 1932=100).

In 1967 Dutch imports amounted to Fl. 30,182,000,000 and exports to Fl. 26,381,000,000 so that imports were covered by exports to the extent of 87 per cent.

There is an Honorary British Consul at Curaçao, Netherlands Antilles.

British Council Representative, H. G. Wayment, O.B.E., Keizersgracht 343, Amsterdam.

OVERSEAS TERRITORIES

The Netherlands West Indies comprise Surinam (Dutch Guiana) in South America, and certain islands in the West Indies known as the *Netherlands Antilles* (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population in 1964 of about 324,000; area of Netherlands Antilles, 394·1 sq. miles, with a population of 209,000 at December 31, 1965. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam.

Governors
Netherlands Antilles, N. Debrot.
Surinam, H. H. de Vries.

Trade with U.K.

Netherlands Antilles	1966	1967
Imports from U.K....	£4,581,000	£5,041,000
Exports to U.K....	16,318,000	16,322,000

Imports from U.K....	£1,854,000	£2,117,000
Exports to U.K....	211,000	189,000

The administrative capital of Surinam is Paramaribo (population, 1962, 120,000); the capital of Curaçao is Willemstad (pop. 45,000); of Aruba, Oranjestad; of Bonaire, Kralendijk; of St. Martin, Philipsburg; of Statia (St. Eustatius), Oranjestad; and of Saba, Bottom.

NICARAGUA

(República de Nicaragua)

President, Gen. Anastasio Somoza Debayle, assumed office, May 1, 1967.
Foreign Affairs, Dr. Lorenzo Guerrero.

NICARAGUAN EMBASSY AND CONSULATE GENERAL
8 Gloucester Road, S.W.7

[01-584-3231]

Ambassador Extraordinary and Plenipotentiary His Excellency Señor Don Marcel J. Ulvert-Portocarrero (1967).

2nd Secretary, Señor Lic. B. M. Abaúzua.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 57,145 English square miles (see MAP, p. 874). It has a population estimated at 1,800,000, of whom about three-quarters are of mixed blood. Another 5 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage. Congress comprises a Senate of 16 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 42 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are cotton, coffee, sugar, sesame and bananas. Beans, rice, maize and ipecacuanha are also important. Livestock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 252 miles of railway, all on the Pacific side, 3,150 miles of telegraph and 3,721 miles of telephone lines and 12,528 telephones. There are several powerful wireless stations and two television stations at Managua. An automatic telephone system has been installed in the capital and extended to the provincial towns of León and Chinandega. Transport, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally from Corinto on the Pacific coast to Rama, where there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.

Language and Literature.—The official language of the country is Spanish. In 1968 there were 3 daily newspapers published at Managua, apart from the official Gazette (*La Gaceta*) and 3 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There are universities at León and Managua.

Trade with U.K.

	1966	1967
Imports from U.K.	£1,790,000	£2,895,000
Exports to U.K.	563,000	708,000

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. The chief exports are cotton, coffee, beef, gold, sugar, cottonseed, copper and soluble coffee.

CAPITAL. Managua, population (1967), 300,000; León, 62,019; Granada, 40,104; Masaya, 34,158; Chinandega, 36,885; Ψ Bluefields, 27,706; Matagalpa, 61,520; Jinotepé, 15,957. Ψ Corinto (9,650), on the Pacific, is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Cabezas on the E. coast are mainly concerned in the banana and timber trade to New Orleans, U.S.A.

FLAG.—Three horizontal bands, blue, white, blue (the arms of the Republic on the white band, displaying five volcanoes surmounted by a cap of liberty under a rainbow).

BRITISH EMBASSY

Managua

- Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency George Michael Warr, C.B.E. (1967)** £4,625
Defence Attaché, Gp.-Capt. J. R. Musgrave, D.S.O. (resident at Caracas, Venezuela).
1st Secretary, F. B. Sedgwick-Gele (Head of Chancery and Consul).
1st Secretary (Labour), J. D. Carr (resident at Mexico City).

NIGER

(Republic of Niger)

President and Minister for Foreign Affairs, Hamani Diori, elected for five years, November 9, 1960; re-elected Sept. 30, 1965.

President, National Assembly, Boubou Hama.

President, Supreme Court, Diallo Ousmane Bassarou.

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad, Nigeria, Dahomey, Mali and Upper Volta.

It has an area of about 484,000 square miles with a population estimated in 1965 at 4,033,500. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djerma in the south-west and the nomadic Touaregs in the north.

The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961.

The constitution of Niger, adopted on November 8, 1960, provides for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly. The present Assembly of 50 members was elected on October 21, 1965. Niger is a member of the United Nations, the *Conseil de l'Entente* and of the Organization for African Unity (O.A.U.) (see Ivory Coast). The official language is French.

Finance.—The currency of Niger is the franc CFA (Frances CFA 50 = 1 French Franc). In 1968 the operating budget amounted to Frances CFA 9,570,100,000 and the development budget to Frances CFA 858,800,000.

Trade.—The cultivation of ground nuts and the production of livestock are the main industries and provide the two main exports. There are indications of deposits of copper, uranium and iron and several companies are prospecting for petroleum. Total value of trade in 1966 was: Imports, francs CFA 11,115,128,000; Exports, francs CFA 8,574,348,000 of which ground-nuts and groundnut oil accounted for Francs CFA 5,991,000,000.

live animals and hides Francs CFA 1,064,000,000 and cotton Francs CFA 500,000,000.

CAPITAL.—Niamey (56,000).

FLAG.—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe. **NATIONAL DAY.**—December 18. **British Ambassador**, His Excellency Dudley John Cheke, C.M.G. (resident at Abidjan).

NORWAY

(Norge)

King, Olav V, K.G., K.T., G.C.B., G.C.V.O., b. July 2, 1903; succeeded, Sept. 21, 1957, on death of his father King Haakon VII; **married** March 21, 1929, Princess Märtha of Sweden (born March 29, 1901; died April 5, 1954); having issue, Harald (see below) and two daughters.

Heir-Accidental, H.R.H. Prince Harald, G.C.V.O., b. Feb. 21, 1937; m. Aug. 29, 1968, Sonja Haraldsen.

Asst. Defence Attaché, Maj. Erling Hornslien.

Cultural Attaché, Hans Aanestad.

Attaché, Jens D. Breivik.
Commercial Counsellor, Per Smith-Kielland, 20 Pall Mall, S.W.1.

Commercial Attaché, Arne Norman.

2nd Secretary (Commercial), Ole F. Knudsen.

Consulate, 42 Lancaster Gate, W.2.

Consular Attaché, Thor Torvik.

2nd Secretary (Consular), Kjell Nordang.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 20 counties (*fylker*) and comprises an area of 324,219 sq. km. (125,181 sq. miles) with a population (1967) of 3,769,269. In 1965 there were for every 1,000 inhabitants: 17·5 live births;

9·9 deaths; 16·9 deaths during first year of age (per 1,000 live births); 6·6 marriages.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 28 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North

America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 35 per cent. of the working population lived on industry, 18 per cent. on agriculture and forestry, 11 per cent. on trading, 10 per cent. on transport and communications and 4 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 15,000,000 k.W. at 82 per cent. efficiency, of which over 4,500,000 k.W. are utilized. In normal years the quantity of fish caught by

Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1966 the total catch amounted to 2,650,511 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was 131,000 barrels in 1966.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Laging* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8–9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. It was expected that the period of compulsory national service would be reduced to 15 months (without refresher training) in the Navy, and 12 months (with later refresher training) in the Army and Air Force. Previously the period of national service was 18 and 16 months respectively.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 12,369 students and the University of Bergen (opened in 1948) by 3,046 students in 1966. Plans for new universities were announced on March 28, 1968, by the *Storting*—at Tromsø (for 2,200 students) in faculties of medicine, science, political science and the humanities; and at Trondheim (for 7,000 students) by a merger of the State Institute of Technology (2,839 students in 1966), the State College for Teachers and the Museum of the Royal Norwegian Society of Science. The latter university is expected to have facilities in engineering, architecture, the sciences, medicine, the humanities and political sciences by 1975.

Language and Literature.—Norwegian is one of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludwig Holberg (1684–1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805–1845). Some of the famous names are Henrik Ibsen (1828–1906) the dramatist, Bjørnstjerne Bjørnson (1832–1910) journalist, dramatist and novelist and Nobel Prizewinner in 1903, Jonas Lie (1833–1908) novelist, Knut Hamsun (1859–1952) novelist and Nobel Prizewinner in 1920, and Sigrid Undset (1882–1949), champion of Norwegian womanhood and herself a Nobel Prizewinner in 1928. In 1966 there were 84 daily newspapers in the country with a total circulation of 1,436,863, and 74 newspapers published 1 to 5 times a week with a total circulation of 297,120.

Communications.—The total length of railways open at the end of 1966 was 4,297 km., excluding

private lines. The extension of the main line from Fauske to Bodø, 60 miles north of the Arctic Circle, was completed in 1962 and opened on June 7 by King Olav. The number of telephones in 1965 was 907,919, which is about 5 inhabitants per telephone. There are 66,685 km. of public roads in Norway. At the end of 1966 about 869,661 road motor vehicles were registered, equivalent to 13·4 inhabitants per passenger car.

Civil Aviation.—Scheduled airlines are operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartselskap (DNL), by Braathens South American and Far East Air Transport (SAFE), and by Widerøes Flyveselskap A.S.

Mercantile Marine.—The Mercantile Marine December 31, 1966, consisted of 2,300 vessels of 16,740,000 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

	FINANCE	1968
Revenue (Budget)	<i>Kr.</i> 13,583,000,000	
Expenditure (do.)	15,355,000,000

SVALBARD

(*Spitsbergen and Bear Island*)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantling of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 2,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. Annual production of coal, the chief mineral of the archipelago, is 390,000 tons.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'–71° 9' N. lat. and 7° 53'–9° 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50' S. lat. and 90° 35' W. long.) was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

PANAMA

(República de Panamá)

President, Dr. Arnulfo Arias, born 1902, elected for a term of 4 years, May 30, 1968; assumed office Oct. 1, 1968.

Vice-Presidents, Señor Don Raul Arango N.; Col. José Dominador Bazán.

PANAMANIAN EMBASSY AND CONSULATE

17 Alexander Place, S.W.7

[01-589-0296]

Consulate-General, 23–25 Billiter Street, E.C.3.

Ambassador Extraordinary and Plenipotentiary, His Excellency Eusebio A. Morales (1964).

Minister-Counsellor, Señor Don José M. Avila.

3rd Secretary, Señor Lic. Don Victor Bocanegra.

Attachés, Señor Don Teodoro F. Franco; Señora Edith de Bocanegra; Señorita Ines V. Zarak; Señor Luciano Sanchez.

There are Consular Offices of the Republic at Newcastle, Glasgow and Birmingham.

Panama lies on the isthmus of that name which connects N. and S. America (see MAP, p. 846). After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 42 elected members. The area of the Republic is 31,890 sq. m., the population (estimated, 1967), 1,372,200. The birth rate in 1966 was 39·8 and the death rate 45·4 per thousand. The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee and cereals. The shrimp industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. In 1966 there were 1,552 official primary schools and 68 private primary schools; 42 official secondary and 139 private secondary schools. Primary students numbered 210,628 in 1966; secondary students, 68,517. The average number of students at Panama University is about 7,600 and at the Catholic University (*Universidad Santa María La Antigua*) about 315.

Language and Literature.—The official language is Spanish. There are 7 daily newspapers published in the capital, 2 of which print editions in English. There are also one English and three Spanish weekly newspapers.

FINANCE

1967
Estimated Budget Revenue... Balboas 127,984,498
Estimated Budget Expenditure... 127,984,498

The monetary unit is the *Balboa* (= \$1 U.S.); no Panamanian paper currency is issued, and U.S. dollar bills of all values are in circulation in the Republic and in the Canal Zone.

Braemar Lodge, Cornwall Gardens, S.W.7
tel: 937-1253

Ambassador (vacant).

1st Secretary, Dr. Pedro D. S. Patino.

Consul-General, Capt. Ignacio A. Pane, 29 Kensington Court, W.8.

There is also a Paraguayan Consulate in *Liverpool*.

Area and Population.—Paraguay is an inland subtropical State of South America, situated between Argentina, Bolivia and Brazil (see MAP, p. 829). The area is computed at 157,000 square miles, with a population (estimated, 1967) of 2,161,000.

Eastern Paraguay consists of a series of plains, intersected by abrupt ranges of hills, none of which exceeds 2,300 feet above sea level. The Paraguay and Alto Paraná rivers are normally navigable for vessels of 6 to 7 feet draught. Some of the tributary streams are also navigable. The Pilcomayo river is navigable for small craft for 180 miles from Asunción. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucú," or "endless," is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is flat plain, rising uniformly towards its western boundary to a height of 1,140 feet; it suffers much from floods and still more from drought.

Government.—In 1535 Paraguay was settled as a Spanish possession. In 1811 it declared its independence of Spain.

The 1967 constitution provides for a two-chamber parliament consisting of a 30-member Senate and a 60-member Chamber of Deputies. Two-thirds of the seats in each chamber are allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18.

The President is elected for 5 years and may be re-elected for a further term. He appoints the Cabinet, which exercises all the functions of government. During parliamentary recess it can govern by decree through the Council of State, the members of which are representative of the Government, the armed forces and various other bodies.

The first elections under the new constitution were held on Feb. 11, 1968.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned and frozen meat, timber, quebracho extract, cotton, hides, yerba mate, tobacco, sugar, citrus fruits, and petit grain essence (which are the principal exports), manioc, maize, rice and edible oils are also produced for home consumption. Grape fruit is exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). There are direct shipping services between Hamburg, Antwerp, Amsterdam and Asunción; New York, Philadelphia, Baltimore and Asunción; and Liverpool, London and Asunción. Nine airlines operate services from Asunción.

There are 375 miles of asphalted roads in Paraguay, and about 3,750 miles of earth roads in fairly good condition, but liable to be closed or to become impassable in wet weather. Bus services connect the principal towns and there are services to Buenos Aires and São Paulo.

Defence.—There is a permanent military force of about 20,000 all ranks. Three gunboats and a number of small armed launches patrol inland waters.

Language and Literature.—Spanish is the official language of the country but outside the larger towns *Guarani*, the language of the largest single unit of original Indian inhabitants, is widely spoken. Four morning and one evening daily, one bi-weekly and four weekly newspapers are published in Asunción.

Education.—Primary education is free and compulsory. There are over 2,600 primary schools with 360,000 pupils, 244 secondary schools with 33,000 pupils, a national university and a Catholic university in Asunción and three other Catholic universities in provincial cities. There are about 5,500 university students.

	1965	1966
	<i>Guaranies</i>	<i>Guaranies</i>
Revenue.....	4,786,200,000	5,222,700,000

Consul-General, Liverpool (24 Sir Thomas Street),

Señor don Augusto Arzubiaga.

Vice-Consuls, Señor don Miguel Pons; Señor don Héctor Cabada.

There are Consulates at Hull, Birmingham and Glasgow.

Area and Population.—Peru is a maritime Republic of South America, situated between $0^{\circ} 00' 48''$ and $18^{\circ} 21' 00''$ S. latitude and between $68^{\circ} 39' 27''$ and $81^{\circ} 20' 13''$ W. longitude. The area of the Republic including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilo-

metres of the coastal islands, is about 532,000 square miles. The total population was estimated at 12,400,000 in 1967.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being Huascarán ($22,211$ feet), Huandoy ($20,855$ feet), Ausangate ($20,235$ feet), Misti volcano ($18,364$ feet), Hualcan ($20,000$ feet), Chachani ($19,037$ feet), Antajashua ($18,020$ feet), Pichupichu ($17,724$ feet), and Mount Meiggs ($17,583$ feet).

There are three main regions, the Costa, west of the Andes, the Sierra or mountain ranges of the Andes, which include the Punas or mountainous wastes below the region of perpetual snow and the Montana, or Selva, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population.

In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quechua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women

between the ages of 18 and 21 who are legally released from parental tutelage.

Presidential and Congressional elections on a basis of proportional representation were held on June 9, 1963, and a new President, Sr. Belaúnde Terry, took office on July 28, Peru's day of independence. In the summer of 1968, 58 seats in the Chamber of Deputies were held by Sr. Haya de la Torre's APRA party, 11 by the *Unión Nacional Odrísta* (led by former President Gen. Odriá), 37 by *Acción Popular*, 9 by Christian Democrats and 25 by others.

President Belaúnde Terry was deposed by a revolutionary junta on Oct. 3, 1968, and sent out of the country. A new Cabinet, sworn in on the same day, proclaimed itself the Government and Maj.-Gen. Alvarado assumed office as President.

Production.—Agriculture, mining and fishing are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat, barley, grapes and coffee. Minerals produced in 1962 were valued at £*5,915,009,565* and included lead, zinc, copper, iron ore, petroleum, silver, gold, tungsten, bismuth, antimony and vanadium. The islands off the Pacific coast provided guano amounting to 206,097 metric tons in 1962.

Peru is today the largest exporter of fish meal and the volume of the fish catch now exceeds that of Japan. Exports of fish products during the past decade have risen from 30,000 tons valued at £*3,100,000* to 1,248,133 tons valued at £*44,000,000* in 1962.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, *via* Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo María, to Pucallpa, the river port on the Ucayali, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boquerón del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout.

The first railway was opened in 1850 and of the 2,494 miles of railways now operating, Government lines account for 578 miles, the Peruvian Corporation 1,180 miles and private enterprises about 726 miles. There is also steam navigation on the eastern rivers such as the Ucayali (see *Andean Highway*, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription (2 years), and numbers about 30,000 of all ranks. Armoured units are equipped with American and French vehicles. Engineer units are employed on the reconstruction of roadways in North Eastern Peru using American equipment. **Navy.**—The Navy consists of 2 cruisers; 5 destroyers; 3 frigates; 4 submarines completed in the United States of America in 1954-57; 4 LST's; 7 river gunboats; 4 fleet oilers; 4 fleet auxiliaries; 2 river transports; 4 patrol boats; 4 launches; 1 floating dock; 3 tugs. There is a naval cadet school at La Punta and a submarine base at Callao. **Air Force.**—The Air Force is equipped with British Hunter and Canberra aircraft; American fighter, bomber, transport

and training aircraft; French helicopters (*Alouette*) for training and rescue purposes. *Mirages* aircraft were in order from France in 1968. There are military aerodromes at Talara, Chiclayo, Las Palmas (near Lima) and Piura, and a seaplane base at Iquitos.

Education.—Elementary education is compulsory and free for both sexes between the ages of 7 and 14. In 1961 there were 1,495,047 pupils undergoing primary education, 184,849 attending ordinary secondary schools and 42,978 attending technical secondary schools. There were 13,510 state primary schools with 36,503 teachers and 450 state secondary schools with 10,900 teachers (of which 191 schools and 4,200 teachers provided technical education). In addition there were 1,350 private schools providing primary education, with 7,050 teachers, and 420 private secondary schools (of which 70 technical) with 7,490 teachers (900 technical); and 306 schools conducted by religious orders. The State provides rural agricultural schools for Indians, and mining schools and polytechnics in the more populated centres. There are now 23 state and seven private universities in Peru. The University of San Marcos at Lima, founded in 1551 has about 14,000 students.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quechua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879-1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1960 there were 7 main morning papers, including the Government newspaper *El Peruano*, and four afternoon papers daily; 48 provincial papers have a small and purely local circulation. A chair of English was established in 1938 at the *Universidad Mayor de San Marcos* in Lima.

FINANCE

	1964	1965
	Soles	Soles

Public revenue... £*14,602,000,000* £*17,313,000,000*

PHILIPPINE EMBASSY AND CONSULATE GENERAL

9a Palace Green, W.8
[01-937-3646]

Ambassador Extraordinary and Plenipotentiary, His Excellency Narciso G. Reyes.

Area and Population.—The Philippines are situated between $21^{\circ} 20' - 4^{\circ} 30' \text{ N. lat.}$ and $116^{\circ} 55' - 126^{\circ} 36' \text{ E. long.}$, and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having ■ combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon	40,422	Mindoro	3,759
Mindanao	36,538	Leyte	2,786
Samar	5,050	Cebu	1,703
Negros	4,906	Bohol	1,493
Palawan	4,550	Masbate	1,263
Panay	4,446		

Other groups in the Republic are the Sulu Islands (Capital, Jolo), Babuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines was estimated in 1967 at 34,656,000.

The inhabitants, known ■ Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Moslem Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish, American and Indian.

The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, ■ small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas", after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 ■ rebellion under Aguinaldo, ■ native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining ■ desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised ■ large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

Language and Literature.—The official languages are Pilipino, English and Spanish. Pilipino, the national language, is based on Tagalog, one of the Malay-Polynesian languages which according to the 1960 census is spoken by 44 per cent. of the population. English, which is the language of government and of instruction in secondary and university education, is spoken by at least 40 per cent. of the population, while Spanish, which is in decline, is now spoken by only 1 per cent. 72 per cent. of the population are literate. There is a National Library in the capital with branches in other urban centres and a flourishing press. Education accounts for about 30 per cent. of total expenditure in the national budget. Secondary and higher education is extensive and there are 27 private universities recognized by the Government, including the Dominican University of Santo Thomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there are also 6 State-supported universities including the University of the Philippines, founded 1908. It is estimated that students at private universities number 232,797; State universities, 23,357.

Roads and Railways.—Communications suffered serious damage during the War of 1941–45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system is undergoing rehabilitation and extension and, including all types of services, now covers 36,809 miles. In 1966 there were 359,068 road vehicles registered. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 642 miles are still operated. Rolling stock losses were also heavy, but have been largely made up, and the Manila railway, on Luzon island, has been converted to diesel traction.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, Jose Panganiban, San Fernando La Union and Tacloban. There are 2,410 vessels of various types, totalling 324,756 tons, engaged in inter-island traffic. There are 93 ocean-going vessels registered in the Philippines, totalling 609,197 gross tons.

Civil Aviation.—Air transport plays a key part in inter-island travel and an important one in communications overseas. Philippine Air Lines have regular flights to Hong Kong, Taipei, Sydney, Singapore and Tokyo and operate four trans-Pacific flights a week to San Francisco, in addition to inter-island services. Air Manila (Inc.) and Filipinas Orient Airways (Inc.) also operate internal air services.

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber. There is, however, an increasing number of manufacturing industries and it is the policy of the Government to diversify its economy.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

CAPITAL.—Manila, in the island of Luzon: population (1968): City area, 1,499,000; Manila with suburbs (incl. Quezon City, Pasay City, Caloocan City, Makati, Parañaque, San Juan Mandaluyong and Navotas), 2,888,300. Quezon City has been designated as the future capital of the Philippines, but pending completion of government building projects, the Executive, Legislative and Judicial departments of the government are still located in Manila. The next largest cities are Cebu (332,100), Davao (298,300), Iloilo (201,000), Zamboanga (176,800), and Bacolod (156,900).

FLAG.—Equal horizontal bands of blue (above) and red; gold sun with three stars on a white triangle next staff. **NATIONAL DAY.**—June 12 (Independence Day).

Consulate-General in London, 19 Weymouth Street, W.x.

Area and Population.—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per

cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles; on Dec. 31, 1967, it was estimated at 32,065,000. Roman Catholicism is the religion of the vast majority of the inhabitants.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznania and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 250 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17, 1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952. It changed the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion were recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński. Dissatisfaction with the régime and conditions of life led to riots in Poznań in June, 1956, and sub-

sequently M. Wladyslaw Gomułka, who had been expelled from the Party in 1949, was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszyński was allowed to resume his functions. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government, still led by M. Cyrankiewicz, took office. Fresh elections to the *Sejm* were held in May, 1965; M. Cyrankiewicz remained Prime Minister, with the composition of the Government almost unchanged, though subsequent reconstructions have taken place. In 1966 the Polish Government celebrated the 1000th anniversary of Poland's existence as a state and the Roman Catholic Church celebrated the millennium of the introduction of Christianity into Poland. In March, 1968, there were student disturbances in Warsaw and some other university cities. These were blamed on revisionist and Zionist elements and were followed by purges in many fields of Polish life. M. Edward Ochab resigned from the Chairmanship of the Council of State in April, 1968, and was replaced by Marshal Marian Spychalski, former Minister of Defence. There were also some changes in the Council of Ministers.

Education.—Elementary education is compulsory and free. There are universities at Kraków, Warsaw, Poznań, Lódz, Wrocław, Lublin and Toruń and a considerable number of other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former school of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846–1916), Nobel Prize-winner for Literature in 1905, Bolesław Prus (1847–1912), and Stanisław Reymont (1868–1925), Nobel Prize-winner in 1924. There are now 42 daily papers published in Poland, 11 of them in Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, and electricity services, banks, textile factories and large retail stores. At present over 90 per cent. of Polish industry is stated to be "socialized", but 86 per cent. of agricultural land is privately farmed.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, (for MAP, see p. 937). It contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 9,228,000 (1966). It lies between $36^{\circ} 58' - 42^{\circ} 9' 12''$ N. lat. and $6^{\circ} 11' 48'' - 9^{\circ} 29' 45''$ W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira Islands in North Atlantic are treated as parts of continental Portugal for administrative purposes.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II and the Royal family into exile, and the National Assembly of Aug. 27, 1911, sanctioned a Republican form of government. The President is elected for seven years by indirect vote of the electors, who vote for members of an electoral college to select the President. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. During the serious illness of Dr. Salazar, Prime Minister since 1932, Prof. Marcello Caetano was appointed Prime Minister on Sept. 26, 1968.

The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporative Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decree-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

The annual *per capita* income in Portugal is about £140. It is still essentially an agricultural country and over 40 per cent. of the working population are engaged in agriculture, forestry and animal husbandry.

Defence.—Military service is compulsory for all men who are physically fit and very few are exempted. The present strength of the Army is about 120,000 of which a large proportion is serving in Portuguese Africa. Much of the Army's old British equipment is now being replaced by French, German and American material. The Navy consists of 1,280 officers and 13,200 men manning a total of over 130 craft. The serving strength of the Air Force is about 1,000 officers and 12,500 other ranks (including some 2,500 parachutists) and about 500 aircraft of all types.

Education is free and compulsory for four years from the age of 7 and is being extended to six years. Secondary education is mainly conducted in State lyceums, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil.

Portuguese language and literature reached the culminating point of their development in the *Lusiadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (*Camões*), born in 1524, died in 1580. Until the second

quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Civil aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. A new airfield at Faro in the Algarve now takes direct flights from London. There is a civil airline, an inter-island service and services in Portuguese Africa. British European Airways and *Transportes Aéreos Portugueses* operate a daily service between London and Lisbon by agreement between them which calls at Oporto twice weekly in both directions. There are altogether 19 airlines operating a total of about 400 services a month through Lisbon airport.

Agriculture.—The chief agricultural products are cork, maize, wheat, rye, rice, oats, barley, potatoes, beans, onions, olives, oranges, lemons, figs, almonds, tomatoes, timber, port wine and table wines. There are extensive forests of pine, cork, eucalyptus and chestnut covering about 20 per cent. of the total area of the country.

Industry.—The country is so far only moderately industrialized, but is fairly rapidly extending its industries. The principal manufactures, most of which are still protected by high tariffs, are textiles (cotton, woolen and rayon), furniture, pottery, glassware, cork goods, leather, paper pulp, tomato concentrates, canned fish, cement, fertilizers, chemicals and hardware. There is a modern steelworks; several British and foreign motor-car manufacturers assemble their vehicles in Portugal and lately the tourist industry has become an important earner of foreign exchange. There are several hydro-electric power stations and a new thermal power station. **Minerals.**—The principal mineral products are pyrites, wolfram, tin, iron ores and some copper.

Finance.—Portugal is a member of the European Monetary Agreement, the World Bank, the International Monetary Fund and the International Finance Corporation. The country has large gold and foreign exchange reserves, which amounted to *Escudos* 35,220,000,000 at the end of 1967. The 1967 State budget was balanced at *Escudos* 23,460,000,000. A third development plan forecasts an investment of *Escudos* 123,000,000,000 in Metropolitan Portugal and *Escudos* 44,000,000,000 in the Overseas Provinces.

Currency.—*Escudo* (of 100 Centavos). *Conto* consists of 1,000 *escudos*. Since devaluation of the £ sterling in 1967 the rate of exchange has fluctuated around the level *Escudos* 68·50 = £1 (see also p. 83).

Trade.—Total trade of Portugal in the year ended Dec. 31, 1967 was: Imports, *Escudos* 29,135,216,000; Exports, *Escudos* 19,684,973,000.

Portugal is a member of E.F.T.A., G.A.T.T. and O.E.C.D. The principal imports are raw and semi-manufactured iron and steel of the types that are not produced by the national steel-works, industrial machinery, chemicals, crude oil, motor vehicles, wool and dried cod fish.

The principal exports in 1967 were canned fish, cotton piece goods, cork manufactures, unmanufactured cork, unmanufactured or semi-manufactured wood, resins, port wine, ordinary wines and cotton thread. 25·2 per cent. (by value) of exports went to the Portuguese Overseas Provinces, 19·9 per cent. to the United Kingdom, 10·2 per cent. to the United States and 5·4 per cent. to Western Germany.

Principal imports in 1967 were iron and steel,

BW cotton, crude oil, passenger cars and sugar. 14·3 per cent. (by value) of imports came from the Portuguese Overseas Provinces, 15·0 per cent. from Western Germany, 13·7 per cent. from the United Kingdom and 6·8 per cent. from France.

Trade with U.K.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Lisbon*, *Oporto*, *Portimao* and *Vila Real de Santo Antonio*, *Figuera da Foz* (Portugal), *St. Vincent* (Cape Verde Islands), *Funchal* (Madeira), *Lourenço Marques* and *Beira* (Portuguese East Africa), *Luanda* (Portuguese West Africa) and *Macao*.

BRITISH COUNCIL

Representative, A. M. Welsh. The British Institute, Rua de Luis Fernandes 3, Lisbon 2.

There is a British Institute at *Coimbra* (Rua Alexandre Herculano 34) and an Anglo-Portuguese Association at *Oporto* (Rua de Breyner 79).

ROYAL BRITISH CLUB, Rua da Estrela 8, Lisbon.

BRITISH-PORTUGUESE CHAMBER OF COMMERCE, Rua da Estrela 8, Lisbon (Branches at Madorninha Senhora de Hora, *Oporto*, and 13A Rua 5 de Junho, *Funchal*, Madeira).

MADEIRA AND THE AZORES

Madeira and **The Azores** are administratively parts of metropolitan Portugal.

The *Madeiras* are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of *Madeira*, *Porto Santo* and 3 uninhabited islands (*Desertas*). The total area is 314 square miles, with a population of 269,769. Ψ *Funchal* in *Madeira*, the largest island (270 square miles), is the capital, with a population of 43,301; *Machico* (4,734). Trade with U.K., 1967: Imports from U.K., £844,000; Exports, £242,000.

The *Azores* are a group of 9 islands (*Flores*, *Corvo*, *Terceira*, *São Jorge*, *Pico*, *Fajal*, *Graciosa*, *São Miguel* and *Santa Maria*) in the Atlantic Ocean, with a total area of 922 square miles and a population of 318,558. Ψ *Ponta Delgada* the capital of the group, has a population of 22,448. Other ports are Ψ *Angra*, in *Terceira*, (13,501) and Ψ *Horta*

(7,109). Trade with U.K., 1967: Imports from U.K., £296,000; Exports, £180,000.

PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antao, São Vicente, Santa Luzia, São Nicolao, Boa Vista and Sal, the last-named having ■ South Atlantic air base, opened in 1949) and Leeward (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 square miles and ■ population (Census of 1960) of 201,549. Revenue (1964), Escudos 135,411,000. Capital, Ψ *Praia* (6,000). Vessels take coal and oil at Ψ Mindelo, São Vicente (pop. 20,000).

SÃO TOMÉ and PRÍNCIPE ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1966), 63,485). Capital, Ψ São Tomé (3,187).

PORTUGUESE GUINEA, area 14,000 sq. miles, pop. (1960), 519,229; (capital Ψ *Bissau*, population 6,000). Revenue (1964), Escudos 202,012,000.

ANGOLA has an area of 488,000 sq. miles, pop. 4,830,449, with present capital Ψ *St. Paul de Luanda* (pop. 346,763), and capital designate *Nova Lisboa*, and includes also *Kabinda* and Portuguese *Zaire* (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Revenue (1964), *Contos* 4,642,891.

Angola's Trade with U.K.

	1966	1967
Imports from U.K....	£7,856,000	£7,313,000
Exports to U.K.....	844,000	584,000

A transcontinental railway from *Benguela* (Lobito Bay) in Angola, which traverses the Katanga mineral district of the Congo and then runs southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, or MOZAMBIQUE. *Lourenço Marques*, *Inhambane*, *Quelimane*, *Tete*, *Mozambique*, *Cape Delgado* and *Nyasa*, together with the territory of *Manica* and *Sofala*, has ■ total area of 297,657 square miles, with a population (1960) of 6,528,604. Capital Ψ *Lourenço Marques* (441,363). Revenue (1964), *Contos* 5,132,386.

Trade with U.K.

	1966	1967
Imports from U.K....	£8,008,000	£9,339,000
Exports to U.K.....	3,343,000	3,968,000

Ψ MACAU, in China, on the Canton River, has ■ area of 5 square miles and a population (1960) of 160,299. Revenue (1964), *Contos* 296,649.

PORTUGUESE TIMOR (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (1960) of 517,679. Capital, Ψ *Dili*, pop. 7,000.

QATAR

Ruler of Qatar, Shaikh Ahmad bin Ali bin Abdullah Al Thani; succeeded Oct. 24, 1960.

Deputy Ruler and Minister of Finance, Shaikh Khalifa bin Hamad Al Thani.

Minister of Education, Shaikh Jasim bin Hamad Al Thani.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of *Khor al Odaid* to the Eastern shore of *Khor al Salwa*. The area is about 4,000 sq. miles, with ■ population estimated at about 80,000 (1967).

Oil deposits on land are being exploited by the *Qatar Petroleum Company*, ■ subsidiary of I.P.C.,

under a concession granted by the Ruler, and the first oil shipment was made on December 31, 1949. The Company is following an agreed policy of levelling off annual production at about 9,000,000 long tons. Considerable development has resulted from this source of income.

Outside Doha and the oil company's installations, conditions are primitive. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment in the oil industry and on development projects, pearl fishing, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Encouragement is being given to the development of agriculture in the north of the peninsula, where there is some fertile soil and freshwater wells. Further development projects include a cement factory which was due to start production at the end of 1968, a factory for processing and freezing prawns in Doha, already in operation, and a broadcasting station transmitting on medium and short wave bands. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, an airport of international standard, an increasing number of modern buildings and an expanding population. The oil Company's deep water port at Umm Said on the East Coast has hitherto provided the only anchorage for ocean-going vessels but the dredging of a deep water channel into Doha harbour has enabled ships to unload there on to lighters from the middle of 1966. Plans are in hand to make Doha a fully-fledged port with 4-5 deep-water berths and these should be realized by the end of 1969. An offshore concession is held by the Shell Company of Qatar, which is exporting oil from its terminal on Halul Island, at a rate of about 7,000,000 long tons per annum. The Continental Oil Company of Qatar has obtained a concession over areas on land and offshore, mainly areas relinquished by Q.P.C. and Shell, and are searching for oil. A new water desalination project is expected to increase the Doha water supply by another 2,000,000 gallons daily.

Regular air services connect Qatar with the other Persian Gulf Shaikhdoms (Bahrain and the Trucial States), Kuwait, Muscat, Iran, Saudi Arabia, the Indian sub-continent, the Lebanon and Europe. The Ruler has an international staff of technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. On May 24, 1963, the Qatar Government took over the management of its postal services from the British G.P.O. The Indian external rupee was withdrawn in June, 1966, and replaced temporarily by the Saudi riyal. In September the new Qatar/Dubai currency was introduced, one riyal being equivalent to the pre-devaluation rate of the Indian external rupee = 1s. 6d. sterling—since sterling devaluation in 1967 the Qatar-Dubai riyal has been equivalent to 1s. 9d.

Trade with U.K.

	1966	1967
Imports from U.K.	£3,292,000	£3,689,000
Exports to U.K.	16,849,000	4,282,000

CAPITAL.—Doha. Population (estimated) 50,000.

FLAG.—White and maroon, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

RUMANIAN EMBASSY IN LONDON

4 Palace Green, W.8

[Western: 96661]

Ambassador Extraordinary and Plenipotentiary, His Excellency Vasile Pungan (1966). Counsellors, G. Anghelescu; Aurel Ionciă (Commercial).

Area and Population.—Rumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* under the Treaty of Paris (April, 1856). The area in October, 1945, was estimated at 91,600 sq. miles, with a population (estimated, July 1, 1967) of 19,287,245.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the Treaty of Berlin (July 13, 1878) the Principality was recognized as an independent State, and part of the Dobrudja (which had been occupied by the Rumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914–18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crișana–Maramureș, these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Trianon, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government.

the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Rumania ceded to Bulgaria the portion of Southern Dobrudja (about 3,000 sq. miles) taken from Bulgaria in 1913. Rumania became "The Rumanian People's Republic" in December, 1947, on the abdication of King Michael.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in February, 1957; in March, 1961 and in March, 1965. A new Constitution was approved by the Grand National Assembly in 1965 when the name of the state was changed to The Socialist Republic of Rumania. The Constitution states (Art. 3) that the leading political force of the whole of society is the Rumanian Communist Party.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax and hemp. Agriculture and sheep and cattle raising are the principal industries of Rumania, but the climate of this part of South-Eastern Europe is of the

Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The total arable land under cultivation in 1967 was 9,799,800 hectares.

Socialization of agriculture was completed when plans for collectivization were fulfilled in the spring of 1962, some three years ahead of the planned date.

Natural Resources and Industry.—Before the war petroleum and agriculture were the backbone of the Rumanian economy. Though the production of both industries has increased, they no longer hold the same dominant position. Rumania's oil resources now enable her to produce about 13,000,000 tons of crude oil a year and there are plentiful supplies of natural gas, together with various mineral deposits including coal, iron ore, bauxite, lead, zinc, copper and uranium in quantities which allow a substantial part of the requirements of industry to be met from local resources. Since 1948 industrialization has proceeded rapidly and the State is well on the way to establishing a mixed industrial economy. Heavy investments have been made in electric power, the chemical industry, the metallurgical industry and the engineering industry and growing attention is being paid to light industry. The economy is centrally organized on the basis of Five-Year Plans which cover all branches of national activity including investment and production. The current Five-Year Plan (1966 to 1970) calls for an average annual increase of 11 per cent. in industrial output, a figure which has been exceeded in the first two of the five years.

1967 production figures were: crude oil, 13,206,000 tons; coal, 15,019,000 tons; electric power, 24,769 million kWh; natural gas, 16,036 million cubic metres; steel, 4,088,000 tons; pig iron, 2,456,000 tons; wheat, 5,819,600 tons; maize, 6,857,900 tons; sunflower seed, 719,800 tons; sugar beet, 3,829,800 tons.

Language and Literature.—Rumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the State Committee for Culture and Art, which has the status of a Ministry. In 1968 53 daily newspapers were published. The leading religion is that of the Rumanian Orthodox Church; the Roman Catholics and some Protestant denominations are of importance numerically. The Jewish community has declined through emigration.

Education is free and nominally compulsory, with 3,902,347 in attendance in 1967–68, including 14,158 in higher education. There are 5 Universities, at Bucharest, Jasi, Cluj, Timisoara and Craiova. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galatz and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

Communications.—In 1967 there were 11,023 miles of railway open for traffic. The mercantile marine, as a result of war losses, seizure and reparations, was reduced to a few moderate-sized sea-going steamers and a number of coastal and river craft, but is being steadily built up. The principal ports are Constantza (on the Black Sea), Sulina (on the

Danube Estuary), Galati, the most important, Brăila, Giurgiu and Turnu Severin. Rumania is a member of the Danube Commission whose seat is at Budapest.

FINANCE

	1966	1967
	Lei	Lei
Revenue....	108,867,000,000	129,307,000,000
Expenditure..	105,372,000,000	124,322,000,000

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Rumanian *Leu* (of 100 *Bani*) had been revalued three times since the war by Feb. 1, 1954. With a 100 per cent. premium on all "capitalist" currencies for non-commercial transactions, the effective exchange rate after devaluation of sterling in Nov., 1967, was *Lei* 28.80 = £1 and *Lei* 12 = \$U.S.1. A special tourist rate is available to all tourists.

TRADE

	1966	1967
	Lei	Lei
Imports.....	7,279,300,000	9,276,500,000
Exports.....	7,116,900,000	8,372,100,000

No complete figures for foreign trade have been published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., although relatively small has increased notably since the signature of an Anglo-Rumanian trade arrangement in 1960.

Trade with U.K.

	1966	1967
Imports from U.K.	£10,344,000	£9,763,000
Exports to U.K.	15,131,000	25,668,000

About 65 per cent. of Rumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Rumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance".

CAPITAL, Bucharest, on the Dimbovita, population (1966), 1,511,388. Other towns with a population of over 100,000 in 1966 are: Brasov (263,201); Cluj (222,652); Ψ Constantza (199,356); Iasi (194,835); Timisoara (193,039); Ploiesti (190,687); Craiova (173,315); Ψ Galati (151,349); Ψ Braila (144,341); Arad (136,912); Oradea (134,939); Resita (121,458); Sibiu (109,546); Baia Mare (108,709); Tigră-Mureş (104,922); and Hunedoara (100,953).

FLAG.—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band. NATIONAL DAY.—August 23 (Liberation Day, 1944).

RWANDA

(Republic of Rwanda)

President, Grégoire Kayibanda, born 1925; elected Oct. 26, 1961; assumed office, July 1, 1962; re-elected, Oct. 3, 1965.

Rwanda became an independent republic on July 1, 1962. Formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, it has an area of 10,169 sq. miles and a population (estimated, 1965) of 3,018,000, mainly of the Bahutu tribe, with Batutsi and Batwa minorities. Coffee and cotton are grown and there is some mineral production. Hides, extract of quinine and pyrethrum flowers are also exported.

The currency is the *Rwanda franc*. In 1966 total imports were valued at *Rw.Fr.* 1,777,000,000; imports from U.K., £129,000; total exports, *Rw.Fr.* 1,085,000,000; Budget estimates in 1965 totalled: Revenue, *Rw.Fr.* 837,000,000; Expenditure *Rw.Fr.* 619,000,000.

At a referendum held in September, 1961, under supervision of the United Nations, a large majority voted against the retention of the monarchy which was accordingly abolished on Oct. 2, 1961. Elections for a new Legislative Assembly were also held in September, 1961, and the Assembly elected M. Kayibanda as President of the National Council, to hold office as Head of State and Head of the Government. Admission of Rwanda to membership of the United Nations was approved on July 26, 1962.

CAPITAL.—Kigali (4,273).

FLAG.—Three vertical bands, red, yellow and green with letter R on yellow band.

British Ambassador, His Excellency David Aubrey Scott, C.M.G. (1967) (resident at Kampala, Uganda).

SALVADOR

(República de El Salvador)

President, Fidel Sanchez Hernandez; elected March 5, 1967; assumed office July 1, 1967, for a five-year term.

Vice-President, Humberto Guillermo Cuestas. Minister of Foreign Affairs, Dr. Francisco José Guerrero.

SALVADOREAN EMBASSY AND CONSULATE

98 Portland Place, W.1.
[01-636-9563]

Ambassador (vacant).

Chargé d'Affaires and Consul, Manuel Monterrosa.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 260 miles with a general breadth of about 50 miles, and contains an area of 7,722 square miles, with an estimated population of over 3,000,000. El Salvador is therefore a densely populated country with some 390 persons per square mile. It is divided into 14 Departments. (For MAP, see p. 870.)

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vincente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 3, 1965, when considerable damage was done to San Salvador.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) ■■■ few miles to the

east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

Government.—Salvador was conquered in 1526 by Pedro de Alvarodo, and formed part of the Spanish vice-royalty of Guatemala until 1821. Under a new Constitution adopted in 1950, the President is elected for six years and the Legislature for two. New legislative elections under proportional representation held in March, 1968, resulted in a chamber composed of 27 deputies of the official party and 25 opposition deputies. Presidential elections were again held on March 5, 1967, and the candidate of the Government Party, Colonel Fidel Sanchez Hernandez, won by 54·4 per cent. of the votes against three opposition candidates.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes, and cotton, which is cultivated on the coastal plains; cane sugar is also produced, as well as maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

Communications.—The Salvador Railway, nearly 200 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Union (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and repaving of most of the capital has been completed, ■ has also the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways, TACA, TAN, LANICA, SAHSA and LACSA connect El Salvador with the rest of the world. The Ilopango International airport has been enlarged and can now receive jet aircraft.

There are post and telegraph offices throughout the country. There are many broadcasting stations and two television stations.

FINANCE

	1966 Colones	1967 Colones
Revenue (Budget) . . .	240,500,000	235,500,000
Expenditure (do) . . .	274,691,000	254,100,000

Regents, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON

Saxone House, 74A Regent Street, W.1
Consul General, C. Forte.
Vice-Consul, R. E. Rudge.

A small Republic in the hills ■ Rimini, on the Adriatic, founded, it is stated, by a pious stonemason of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity ■ respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Captains-Regent. The Great and General Council, a legislative body of 60 members is elected by ■ universal suffrage for a term of 5 years. A Council of Twelve forms in certain cases a Supreme Court of Justice. The area is approximately 23 square miles, the population on Dec. 31, 1967, was 18,181. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cattle, ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

FLAG.—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

SAUDI ARABIA

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Ibn Saud ■ an independent

ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with ■ estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at about 3,500,000, the majority being Moslems of the Wahhabi persuasion. There is little agriculture, but wheat and barley are grown, and there is ■ experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by mid-1968 total production of crude oil for the whole country, including off-shore concessions, was running at a rate of some 3,000,000 barrels per day. Exports other than oil are negligible. The capital is Riyadh (300,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (100,000), ♀ Al Khobar and ♀ Dammam on the Persian Gulf littoral, Anaiza, Buraidah, Hail (20,000), and Jauf. The old ports (Persian Gulf) were ♀ Qatif, ♀ Uqair and ♀ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under ■ 60 years' lease, has built ■ deep-water port for its own purposes at ♀ Ras Tanura, and a civil deep-water port, with a pier seven miles long, was brought into use at ♀ Dammam in 1950. A railway is in operation from Dammam through Hofuf to Riyadh.

The Hejaz ("The Boundary"—between Nejd and Tihamah) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejh, Yanbu', Rabegh and Gizan. Jeddah contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hejaz Railway which is now under reconstruction. The Oasis of Khaibar, east of the railway, contains ■ considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (al Madinah al Munawwarah, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has ■ permanent population of about 20,000 and is celebrated ■ the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains

the sacred tomb of Muhammad. Mecca, the birth-place of the Prophet, is 45 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a population estimated at 200,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham", placed in the south-east wall of the Kaaba at such height that it may be kissed by the devout pilgrim. Jeddah (250,000) is the principal port and commercial centre of Saudi Arabia. A new deep-water port is under construction, for completion in 1971.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

Finance and Trade.—Oil is the main source of the country's wealth, though customs revenues and other taxes, as well as foreign exchange accruing from the annual pilgrimage to Mecca, also bring significant income. In the fiscal year 1967-68 (Oct. 25, 1967-Oct. 14, 1968) the budget was balanced at SR.4,937,000,000 (£461,000,000) of which 80 per cent. was derived from oil. Revenue and expenditure were marginally lower than in the previous year. 43 per cent. of total Government expenditure is allocated to development projects (£200,000,000). The rate of exchange is about SR.10·70 = £1. The currency is strong, and backed by gold and foreign exchange reserves of over £315,000,000. With few exceptions, such as the ban on alcohol, there are no restrictions on trade or payments. There is no public debt. Imports in 1966-67 were about £214,000,000, compared with annual rate of £2,500,000 before 1939. The United States of America is the leading supplier, followed (in 1967) by Japan, West Germany, and the United Kingdom.

Trade with U.K.

	1966	1967
Imports from U.K....	£20,299,000	£15,839,000
Exports to U.K.....	39,681,000	62,543,000

Communications.—The railway from the port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. Metalled roads connect Mecca with its Port of Jeddah (45 miles), and with Riyadh and Dhahran. A 7,658 km. (4,760 miles) programme of new road construction is now under way. This will provide the first stage of a country-wide network. The Saudi Arabian Government employs Transworld Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Convair, Boeing 720 and Douglas DC9 aircraft. Scheduled services are flown to all the main towns of the country. There are first-class airports at Dhahran, where a new airport was opened in 1962, and at Jeddah. A new field for Jeddah is being designed. Riyadh Airport is to be brought up to international standards and 13 other internal airfields are to be constructed. Saudi Arabian airlines have an extensive overseas operation including a weekly direct flight to London. A large and increasing number of international airlines operate into Jeddah and Dhahran.

Education.—There are 1,287 Government schools, mostly primary or intermediate, but including eleven secondary schools. There is an Islamic University at Medina, a college of Islamic law at Mecca and universities at Riyadh and Jeddah. Government education is free. With three exceptions all schools are maintained by the Government. Education at all levels is free.

CAPITAL. Riyadh, population about 300,000.

SAUDI ARABIAN FLAG.—Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

SENEGAL

(République du Senegal)

President and Head of Government, Léopold Senghor.
elected President, Sept. 5, 1960.

Ambassador in London, His Excellency M. Seyni Loum, 10 Gloucester Place, W.1. [01-935-0313].

Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea in the south. (For MAP, see p. 871). It has an area of 77,814 sq. miles and a population (estimated, 1966) of 3,580,000.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. Foundation of a Federation of Mali, to consist of the State of Senegal, (French) Soudan, Dahomey and Upper Volta, was announced in January, 1959, and the Federation came into existence on April 4, consisting of Senegal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20, 1960. However, these arrangements proved short-lived as on August 22, 1960, the Senegal Legislative Assembly formally approved measures to secede from the Federation and continue as an independent state. In March, 1963 (after an attempted coup d'état by the then Prime Minister in the previous December) a new constitution was approved giving executive powers to the President, on the lines of the present French constitution. Senegal's principal exports are groundnuts (raw and processed) and phosphates.

Trade.—Total trade of Senegal in 1966 amounted to: Imports Francs CFA. 38,313,000,000; Exports Francs CFA. 36,764,000,000. Trade with U.K., 1967: Imports from U.K., £913,000; Exports, £1,243,000.

CAPITAL.—Dakar (450,000).

FLAG.—Three vertical bands, green, yellow and red; green star on the yellow band. **NATIONAL DAY.**—April 4.

SOMALIA

(Somali Republic)

President, Dr. Abdelrahid Ali Shermarké, elected June 10, 1967, for a term of six years.
Prime Minister, Mohammed Hadij Ibrahim Egal.
Minister of Foreign Affairs, Ali Omar Scego.

EMBASSY

60 Portland Place, W.1.
 [01-580-7148]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Jama Abdilleh (1968).
Counsellor, Abdullahi Abby Farah.
1st Secretary, Mohamud Haji Nur.
Attaché, Mohamud Osman Osmer.

The Somali Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Cape Guardafui (12° N.); and on the Gulf of Aden to the boundary with the Territory of the Afars and Issas. (For MAP, see p. 854). Somalia is bounded on the west by the Territory of the Afars and Issas, Ethiopia and Kenya and covers an area of approximately 246,000 sq. miles. The population, of which a large proportion is nomadic, is estimated (1966) at 2,580,000. Livestock raising is the main occupation in Somalia and there is a modest export trade in livestock on the hoof, skins and hides. Italy imports the bulk of the banana crop under agreement with the Somali Government.

Government.—The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July 1, 1960. British rule in Somaliland lasted from 1887 until June 26, 1960, with the exception of a short period in 1940–41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 1941 until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to an end on July 1, 1960, when Somalia became independent and united with the former British Somaliland Protectorate under the title of the Somali Republic. Aden Abdulle Osman was returned to office as the first substantive President of the Republic in 1961, after a year as provisional President. Following national elections on June 10, 1967, Dr. Shermarké succeeded to the Presidency and on July 6 appointed Mr. Egal as Prime Minister. A new Cabinet was formed on July 15.

Somalia imported British goods to the value of £697,000 in 1967 (1966, £646,000).

CAPITAL.—Mogadishu (Mogadiscio), population (estimated 1967), 170,000. Other towns are Hargeisa (50,000), Kisimayu (30,000), Berbera (19,000) and Burao (10,000).

FLAG.—Five-pointed white star on blue ground.

Area and Population.—The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Molopo and Orange Rivers ($34^{\circ} 50' 22''$ South latitude) to the Cape of Good Hope, with the exception of Lesotho, Botswana and Swaziland, and part of Mozambique. It has a total area of 472,350 square miles, and a total population (census of 1960) of 15,982,664 (White, 3,088,492; African, 10,907,789; Coloured, 1,509,258; and Asian, 477,125). Populations of the Provinces at the 1960 census (preliminary figures) were: Cape Province (278,465 sq. miles), 5,342,720; Natal (33,578 sq. miles), 2,979,920; Transvaal (110,450 sq. miles), 6,273,477; Orange Free State

(49,866 sq. miles), 1,386,547. The total population was estimated to have risen to 18,733,000 by July, 1967.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the districts of Babanango, Vryheid and Ngotshe and by Swaziland. In 1951, the appointment was confirmed of Cyprian Bekuzulu, grandson of Dinizulu and great-grandson of Cetewayo, as Paramount Chief of the Zulus in Natal.

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Table Mountain (3,582 feet), while the Great Swartberg and Langeberg run in parallel lines from west to east of the Cape Province. Between these two ranges and the Roggeveld and Nieuwveld ranges to the north is the Great Karroo Plateau, which is bounded on the east by the Sneeuwberg, containing the highest summit in the province (Komrasberg, 7,800 feet). In the east are ranges which join the Drakensberg (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,600 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the Magaliesberg and Waterberg ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Bankenveld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces. The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between the Territory of South West Africa and the Cape Province. The Limpopo, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

Government.—The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, under the South Africa Act, 1909, in a legislative union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as a member of the British Commonwealth until 1961. A referendum held among white voters on October 5, 1960, decided by a narrow majority in favour of Republican status. 1,633,772 votes were cast—a poll of 90·73 per cent.—with 52·05 per cent. in favour. The Union of South Africa became a republic on May 31, 1961, and withdrew from the Commonwealth. Mr. C. R. Swart was elected the first President of the Republic on May 10 and assumed office on May 31, 1961. He retired on May 31, 1967, a year before his term of office was due to expire. The former Minister of Finance, Dr. T. E. Dönges, was elected to the Presidency but fell seriously ill before his inauguration. The Leader of the Senate, Senator J. F. T. Naudé was Acting President during 1967 and until the inauguration of Mr. Fouché on April 10, 1968.

The Senate, as reconstituted by the Senate Act,

1960, consists of 54 members, appointed or elected for a term of five years. Eleven are appointed by the Government (8 for the Republic, 2 for South West Africa and a Coloured representative). Forty-three are elected (Transvaal, 14; Cape Province, 11; Natal and Orange Free State, each 8; and South West Africa, 2). The Act of 1960 reintroduced proportional representation at elections to the Senate and excluded Native representation.

The House of Assembly consists of 170 elected members, 54 of whom represent the Cape of Good Hope, 18 Natal, 73 Transvaal, 15 the Orange Free State, and 6 South West Africa. There are also 11 members elected under the Separate Representation of Voters Act, 1951, to represent the electoral divisions for the coloured voters in the Cape Province. Members of both Houses must be South African citizens of white descent. White female franchise was introduced under the provision of Act No. 18 of 1930. Cape Bantu voters ceased to be entitled to elect 3 members in Nov. 1959.

After the General Election on March 30, 1966, the party representation in the House of Assembly was as follows: Nationalist Party, 126; United Party, 39; National Union, 1; Progressive Party, 1; Representatives of Coloured Voters, 4. Total 170.

Defence.—The South Africa Defence Act, 1957, became law on Nov. 1, 1958. This Act, as amended in 1961, provides that every citizen between the ages of 17 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of peace training with the Citizen Force or Commandos spread over a period of four consecutive years. Thereafter citizens are required to serve with the Reserve for a prescribed period of time.

Education.—The Provinces have been relieved of all vocational education (technical and industrial), and the Department of Education, Arts and Science under the Minister is concerned with 9 Universities, 11 technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools, State-aided vocational schools and State and State-aided special schools for the physically handicapped. There are two non-white university colleges and three Bantu university colleges, students of these taking the examinations of the University of South Africa.

Communications.—The total open mileage of Government-owned railway lines at the end of March, 1965, was 13,232 miles, of which 1,902 miles were electrified. Working expenditure (excluding depreciation) amounted to R. 383,690,000. Internal air services are operated between all the major centres in South and South West Africa. Regional air services are operated between Johannesburg and Rhodesia, East Africa, Central Africa and Portuguese East Africa. The "Springbok Service" is operated jointly by South African Airways and the British Overseas Airways Corporation, using modern aircraft and providing a regular service between Johannesburg and London.

Production and Trade.—Final figures for the principal crops produced in 1964–65 (lbs. 200) were wheat, 11,516,064; maize, 49,494,000; Kaffir corn, 4,828 (150 lbs.); barley, 451,355; oats, 707,890. Estimates of 1965–66 crops included: maize, 54,020,000,000 bags of 200 lbs.; Kaffir corn, 4,260,000,000 bags of 200 lbs.; wheat, 7,852,000 bags (200 lbs.); barley, 446,000 bags (150 lbs.); oats, 1,518,000 bags (150 lbs.). The estimated production of groundnuts in 1965–66 was 145,000 short tons. Sales of wool during the 1964–65 season amounted to 296,000,000 lbs. (1963–64, 306,000,000 lb.).

Mineral production is of the greatest importance

in the South African economy, value of production in 1965 being (R.1,000): gold, 766,542; diamonds 49,602; coal, 83,306; copper, 32,120; tin, 4,303; silver, 2,903; asbestos, 25,233. Exports of uranium oxide amounted to R.58,069,000 in 1964 (figures no longer declared).

Value of trade in 1964 (with 1963 figures in italic type) was: R.1,529,900,000 (R.1,202,800,000); Exports R.955,000,000 (R.915,700,000).

Trade with U.K.*

	1966	1967
Imports from U.K.	£242,880,000	£257,193,000
Exports to U.K.	191,408,000	219,597,000

*Excluding gold bullion and specie.

Currency.—The South African £ reached parity with the £ sterling in 1946. A new decimal currency the Rand (R.) was introduced in South Africa on Feb. 14, 1961, with 1 par value of 10s. Sterling. Since devaluation of the £ sterling in Nov., 1967, the rate of exchange has been R.1·72 = £1 (see also p. 83). Coins are one silver coin, the Rand (10s.); four nickel coins, 50 cents (5s.); 20 cents (2s.); 10 cents (1s.), 5 cents (6d.); two bronze coins, 2 cents (2d.) and 1 cent (1d.). In addition the yellow bronze $\frac{1}{2}$ cent, though no longer minted, will remain in circulation for an unspecified period. (See also p. 83.)

Finance.—Total revenue for the year ended December 31, 1965 was R.1,130,606,000 (1964, R.1,001,436,000). The gross Public Debt of the Republic on March 31, 1966 was R.3,395,000,000 (1964, R.3,222,000,000).

CAPITAL.—The administrative seat of the Government is PRETORIA, Transvaal; population (census of 1960), 422,590; the seat of the Legislature is CAPE TOWN, population (1961), 807,211. Cape Town is 5,979 miles from Southampton; transit by mail steamer 11 days, and by air mail two days. There is a modern and well-equipped aerodrome seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance. Other large towns are Johannesburg, Transvaal (1,110,905); DURBAN, Natal, the largest seaport (659,934); PORT ELIZABETH, Cape (274,180); Germiston, Transvaal (213,642); BLOEMFONTEIN, capital of Orange Free State (145,273); Springs, Transvaal (137,253); Benoni, Transvaal (136,476); EAST LONDON, Cape (115,677); Welkom, O.F.S. (67,614); and PIETERMARITZBURG, capital of Natal (96,236).

FLAG.—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full. The national flag was adopted by the Union in 1927 and was flown side by side with the Union Jack. This practice was expected to be continued in Natal.

NATIONAL DAY.—May 31.

BRITISH EMBASSY

Hill Street, Pretoria

91 Parliament Street, Cape Town (Jan.–June)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir John Walter Nicholls, K.C.M.G., O.B.E. (1966) £8,600
Minister, M. A. Robb, C.M.G.
Minister (Commercial), D. A. Bryan, C.M.G., O.B.E.
Counsellor, M. H. Morgan (Head of Chancery).
1st Secretaries, M. S. Berthoud; P. V. Killick (Information); A. C. McCarthy (Commercial); L. Jones (Administration); R. A. Dewhurst; R. B. Couchman.

Naval Attaché, Cdre. J. W. D. Cook.

Military Attaché, Col. P. R. H. Turner.

Air Attaché, Air Cdre. J. B. Coward, A.F.C.

Ast. Naval Attaché, Cdr. S. K. Sharrock.

Cultural Attaché and British Council Representative, R. T. Butlin, O.B.E.

Assistant Cultural Attaché, M. R. Tatham.

2nd Secretary, J. Beale (Commercial).

3rd Secretary, Miss P. Stanbridge.

There are British Consular Offices at Cape Town, Johannesburg, Durban and Port Elizabeth.

South West Africa.

Administrator, W. C. du Plessis.

South West Africa stretches from the southern border of Angola (lat. 17°23' S.) to part of the northern (Orange River) and north-western borders of the Cape Province of the Republic of South Africa; and from the Atlantic Ocean in the west to Botswana in the east.

The territory has an area of 318,261 sq. miles, including the area of Walvis Bay (434 sq. miles) which, although part of the Republic of South Africa, is for convenience administered as part of South West Africa. The population was estimated at 610,100 in 1966 and the main population groups are: Ovambo (270,900), Whites (96,000), Damara (50,200), Herero (40,000), Nama (39,400), Okavango (31,500), East Caprivians (17,900) Coloureds (15,400), Basters (13,700), Bushmen (13,300), Kaokovelders (10,500), Tswana and others (11,300).

Government.—A German protectorate from 1880–1915, South West Africa was administered until the end of 1920 by the Union of South Africa. In terms of the Treaty of Versailles the Territory was declared a "C" Mandate and entrusted to South Africa with full powers of administration and legislation over the Territory. After the dissolution of the League of Nations and in the absence of a trusteeship agreement, South Africa informed the United Nations that she would continue to administer South West Africa in the spirit of the Mandate. Since the establishment of the United Nations, South West Africa has been the subject of dispute.

Production and Communications.—Mining, agriculture and fisheries are important. In 1965, animal husbandry accounted for 99 per cent. of the total gross output of commercial agriculture which was estimated at £22·2 million. The average rainfall over 70 per cent. of the Territory is below 400 mm. per annum. 1,453 miles of railway line have been laid; 810 miles of road have been tarred; 41,526 motor vehicles were registered in 1966; air links exist between Windhoek and major cities of the Republic. Lüderitz is the only harbour in the Territory proper. 118 telephone exchanges serve the 16,492 telephone subscribers in the Territory. In 1966 the school attendance for the indigenous groups was 62 per cent.; in 1960 there were 37 Native pupils to one teacher and it was estimated that 56 per cent. of the adult indigenous population was literate.

Trade.—Exports in 1966 totalled £104,650,000. Agricultural products, £16,320,000; Fishery products, £24,450,000; Mineral products, £63,880,000.

Nearly half the Territory's total exports are disposed of in the South African market and about 90 per cent. of the Territory's imports are obtained from the Republic of South Africa.

Development.—Under the current five-year plan of the Department of Bantu Administration and Development £30 million will be spent on the indigenous groups (£11·065 million for community centres, schools, offices and other buildings;

£6·595 million for water and electricity supplies; £2·28 million for internal roads; £2·46 million for residential housing; £1·675 million for the control of animal diseases and stock improvements).

Trade with U.K.

	1966	1967
Imports from U.K.	£1,457,000	£2,120,000
Exports to U.K.	24,103,000	21,343,000

CAPITAL.—Windhoek (estimated population, 60,000). The ports are Ψ Walvis Bay (see above) and Ψ Lüderitz.

SOUTHERN YEMEN

(People's Republic of South Yemen)

President. Qahtan as-Shaabi, born 1921, assumed office Nov. 30, 1967.

[01-499-2536]

Ambassador Extraordinary and Plenipotentiary. His Excellency Ali Jafar Mohammed Nasser (1968).

Minister Plenipotentiary (Cultural). Abdullah Ahmed Muhelrez.

2nd Secretary. M. S. M. Al-Absi.

3rd Secretary. Saeed Ali Khubara.

Area and Population.—Southern Yemen lies at the southern end of the Arabian peninsula, having a frontier with the Yemen, and a coastline extending to 400 miles from the Red Sea eastwards along the Gulf of Aden. The area is largely composed of mountains and desert. Rainfall is generally scarce and unpredictable. The population outside Aden lives on a tribal basis and is concentrated in the fertile districts. In the more extensive desert and near-desert areas nomadic communities depend on their livestock for a livelihood.

Included in Southern Yemen are the offshore islands of Perim (in the Bab-el-Mandeb Straits), Kamaran (area, 70 sq. miles) in the Red Sea, and Socotra, formerly part of the sultanate of Qishn and Socotra, now merged in the People's Republic. Estimated area of Southern Yemen is 60,000 sq. miles, with a total population of about 900,000. The population of Aden (75 sq. miles) was estimated at 285,000 in 1965; it is formed by the twin volcanic peninsulas of Aden and Little Aden linked by a sandy strip of coastline and comprises the towns of Tawahi, Crater, Maalla (built on land reclaimed from the sea), Khormaksar and Sheikh Othman and the villages of Imad and Hiswa.

Government.—The People's Republic of South Yemen was set up on Nov. 30, 1967, bringing to an end 22 years of British rule in Aden and its hinterland. Territory of the Republic is that of the former Federation of South Arabia and the Eastern Aden Protectorate, consisting of the State

of Aden and some 17 sultanates and amirates in which effective power had passed to the National Liberation Front during August and September, 1967. By Nov. 8, 1967, the N.L.F. claimed to be exercising sovereignty outside British-manned enclaves. Negotiations held between the British Government and representatives of the N.L.F. at Geneva from Nov. 21-29, 1967, ended in agreement on financial aid to South Yemen for civil and military purposes for a period of six months from the date of independence. Evacuation of British military forces which had begun in April, 1967, was completed on Nov. 29, covered by strong naval forces, ■ few hours before the territory was proclaimed ■ republic.

The Secretary-General of the National Liberation Front, Mr. Qahtan as-Shaabi, who had been appointed President from Nov. 30, announced that South Yemen would have ■ one-party system and a presidential form of government, as in the United Arab Republic. A 12-member Cabinet was formed on Dec. 1, headed by the President (see above). South Yemen was admitted to membership of the United Nations on Dec. 14, 1967.

During the period of the emergency in Aden which began at the end of 1963, 53 British servicemen were killed and 669 wounded in anti-terrorist operations, mainly in the State of Aden. A further 76 British servicemen were killed and 235 wounded in other parts of the Federation during the same period.

Kuria Muria Islands.—The Kuria Muria Islands, which had been administered by Gt. Britain from Aden although ■ miles distant from Yemen territory, were ceded to the Sultanate of Muscat and Oman on Nov. 30, 1967.

Production.—Agriculture is the main occupation of the inhabitants of the 60,000 square miles of the Republic, outside Aden State. This is largely of a subsistence nature, sorghum, sesame and millets being the chief crops, and wheat and barley widely grown at the higher elevations. Of increasing importance, however, are the cash crops which have been developed since the second world war, by far the most important of which is the Abyan long-staple cotton, which is now the country's major export, and revenue from which averages over £1,000,000 annually.

Owing to lack of rainfall, cultivation is largely confined to fertile valleys and flood plains on silt built up and irrigated in the traditional manner. Of recent years, however, these traditional methods have been augmented and replaced by the use of modern earth-moving machinery and pumps. Irrigation schemes, designed to replace some of the more important traditional structures with permanent installations, are now being undertaken. Nearly all the fruit and vegetables grown in the Republic are marketed in Aden, through which passes annually some 30,000 tons of locally produced fruit and vegetables worth up to £600,000.

Trade.—Figures shown below are of British trade with the State of Aden:

	1966	1967
Imports from U.K.	£13,175,000	£9,343,000
Exports to U.K.	13,825,000	10,614,000

The trade of Aden is mainly transhipment and entrepôt, the port serving as ■ centre of distribution to and from neighbouring territories. Because of its favourable geographical position it is an important oil bunkering port. Transit trade is mainly in textiles, gums, and resins; grains and flour; coffee; tea; hides and skins, raw cotton and cotton-seed; and cheap consumer goods. There is ■ flourishing trade in luxury goods sold to visitors from ships.

Because of its favourable geographical position and its efficient service to ships, Aden became one of the busiest oil bunkering ports in the world, handling some 500 ships a month. The British Petroleum Refinery exports about 3,700,000 tons of petroleum products annually. In the main harbour, cargo handling for larger vessels is by lighter, but new wharves have been constructed at Maalla to accommodate alongside vessels of 2,500 gross registered tons. Aden has 140 miles of roads, 127 miles of which are asphalted.

Finance and Currency.—In the final year of the Federation, revenue was estimated at £25,144,784 and expenditure, £25,168,117. Currency is the South Arabian dinar, the total circulation of which is about £17,000,000.

Communications.—There are no railways in the Republic, but a system of undeveloped but motorable roads links the towns and villages outside Aden. There is an ambitious programme of road building and main trade routes are being installed. There is an international airport at Aden (Khor-makasar) and ten international airlines operate into South Yemen.

CAPITAL.—Aden (population, 1,500,000).

FLAG.—A tricolour, red, white and black horizontal bands, with a triangle of light blue at the hoist pointing towards the fly and charged with a five pointed star red.

NATIONAL DAYS.—Independence Day, Nov. 30; Revolution Day, Oct. 14.

Area and Population.—A National State in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the

south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 square miles, with an estimated population (July, 1968) of 32,411,407. Returns for 1966 gave 661,731 births, 267,407 deaths and 229,796 marriages. Infant mortality (under one year) was 17,631.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro and the Minho.

Government.—In April, 1931, the last monarch of Spain, Alfonso XIII, left the country; a Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican

and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the *Azadía* (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the Nationalists (General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (*Leader*) of the Empire and Chief of the State. In the Civil War of 1936-39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstitution of the *Cortes de España*. This was reorganized by an Organic Law of 1967 and is composed of approximately 564 members—ministers, 19; members of the National Council of the Movement, 109; Presidents of various State bodies, 5; representatives of the national syndicates, 150; 100 members elected by heads of families and married women; university rectors, 12; representatives of professional, academic and scientific bodies, 28; representatives of local administration, 116; and 25 members directly appointed by the Head of State.

On April 1, 1947, a Law of Succession was promulgated creating two new bodies: the Council of the Realm and the Council of Regency. The main duty of the Council of the Realm is to nominate a successor to Generalissimo Franco should the latter not already have done so before the time of his decease or incapacitation. The Council of Regency is intended to rule during an interregnum and in the absence abroad of the Head of State; it has a membership of three. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,145,163 affirmative votes out of a recorded total of 15,219,563.

A referendum held in 1967 approved ■ Organic Law of the State introducing a number of changes in state institutions. The offices of Head of State and Head of Government, held jointly since the Civil War by General Franco, were separated.

Defence.—Army: There are in Spain one Armoured, one Cavalry, four Mountain and seven Infantry Divisions of which three are mechanized. There are also an Airborne Brigade and Independent brigades of Infantry, mechanized Cavalry and Artillery in the Peninsula. The Guardia Civil also forms part of the Army though it operates as a gendarmerie in the rural areas under the control of the Ministry of the Interior.

The active Spanish Navy consists of ■ cruisers, 6 destroyers, 22 frigates and corvettes, ■ attack transports, 6 minelayers, 25 minesweepers, 4 submarines, 4 midget submarines, 3 landing ships, 3 squadrons of helicopters, a large number of auxiliary and small craft. Two destroyers are being completely rebuilt and ■ building programme of 5 large destroyers and 2 submarines is being started.

The Air Force is divided geographically into 5

Regions covering Spain plus ■ Air Zone for the Canaries and an Air Sector for the Balearics. There are also separate functional Air Defence, Tactical and Transport Commands. The Air Force consists of 4 Fighter Wings, ■ Fighter Bomber Wings, 1 Light Bomber Wing, 2 Transport Wings and 1 Mixed Wing. There is also a variety of training and miscellaneous aircraft and some helicopters. Total strength approximately 450 aircraft.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. There are 12 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid (1500), Murcia (1915). The Catholic University of Pamplona (1953) is the only University in Spain not subject to government control.

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provencal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922) and Juan Ramón Jiménez (1956).

FINANCE

	1966 million Pesetas	1967 million Pesetas
Estimated Revenue....	168,710	204,291
Estimated Expenditure.	168,710	204,291

Public Debt (Dec. 31, 1964) excluding parastatal organizations and State-guaranteed issues: Pesetas 112,876,190,000.

The rate of exchange for the peseta in Sept., 1968, was 166.5 pesetas = £1 sterling (see also p. 83).

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—olives, oranges, lemons, almonds, pomegranates, bananas, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. The orange crop is exported mainly to Germany, France and the United Kingdom. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced.

Spain's mineral resources of coal, iron, wolfram, copper, zinc, lead and iron ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1966 the coal output amounted to 15,625,000 metric tons. 2,114,000 metric tons of iron and 3,750,000 metric tons of steel were produced in 1966. Other production figures included ('000 metric tons): pyrites, 2,498; cement, 11,800; sulphuric acid, 1,517; paper, 1,552; cotton yarn, 122.5 and wool yarn, 32.8. Production of electric

power was 37,500 million kWh. The fishing industry is important.

The principal manufactures are textile goods of all kinds, footwear and other leather goods, ceramics, sewing machines, bicycles, chemical products and light engineering manufactures.

Communications.—In 1963 there were 13,433 kilometres of railways in service. The sea-going mercantile marine in 1963 (excluding fishing boats) registered a total of 2,007,340 gross tons. Civil aviation is under the control of the Air Ministry; there are several inland and international services in operation.

--------------------	------------	------------

ISLA DE LOS FAISANES is ■ uninhabited Franco-Spanish condominium, at the mouth of the Bidasoa in La Higuera bay.

CEUTA is ■ fortified post ■ the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with ■ population (estimated, 1967) of 100,000.

MELILLA is ■ town on ■ rocky promontory of the Rif coast, connected with the mainland by ■ narrow isthmus. Melilla has been in Spanish possession since 1492. Population (estimated, 1967) 100,000. Ceuta and Melilla are parts of Metropolitan Spain.

OVERSEAS TERRITORIES

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with ■ total area of close on 82,400 square miles.

SPANISH GUINEA, consisting of the islands of Fernando Póo and Annobón, the Corisco Islands and Rio Muni (mainland) was divided into two provinces on April 1, 1960, each becoming ■ province of Metropolitan Spain under a civil governor, the inhabitants having the same rights as Spanish citizens. Since December, 1960, six deputies have represented the two provinces in the *Cortes* at Madrid. By a plebiscite on December 15, 1963, the combined electorate of the two provinces voted in favour of the régime of autonomy proposed by the Spanish Government. Under this régime certain legislative and executive powers were given to elected bodies of the two provinces, and a Council of local elected Ministers was made responsible to ■ High Commissioner to be appointed by the Spanish Government. Following elections to local councils, the procedure of instituting the régime of autonomy was completed by the approval of the Spanish Government on June 2, 1964.

In 1968 the date of Oct. 12, 1968, was fixed for the complete independence of the Territory. Fernando Póo lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from

the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has ■■■■■ of about 800 square miles, and ■■■■■ population estimated at 34,200. The capital of Spanish Guinea is ♀ Santa Isabel (pop. 9,000) on the island of Fernando Póo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population in 1960 of approximately 246,000, with 6,262 in *Fernando Póo* (including 4,200 Europeans) and nearly 200,000 in Rio Muni.

Annonbon Island (*Anno Bom*), in the Gulf of Guinea, in $1^{\circ} 24' S.$ lat. and $5^{\circ} 3E.$ long.; population 1,410.

Corisco Islands, consisting of Corisco, Eloboey Grande, and Eloboey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio Muni (the second province) is ■■■ coastal settlement between Cameroon and Congo ($1^{\circ} N.$ — $2^{\circ} 10' N.$ lat.) extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni Benito and Campa rivers, and at ♀ Bata (the principal town) on the coast.

WESTERN SAHARA.—Spanish possessions in the Western Sahara consist of two provinces—Ifni and Spanish Sahara. Ifni (capital, Sidi Ifni) extends on the coast from the mouth of Bou Sedra (Asif Salouad) (approximately $29^{\circ} 38' N.$ lat.) to the River Assaka (Nun) which forms the S.W. boundary. The eastern boundary runs between $9^{\circ} 50'$ and $9^{\circ} 55'$ W. long. The coast line is 36 miles in length and the territory measures approximately 950 square miles. The province of Spanish Sahara extends from $27^{\circ} 40' N.$ lat. in the north to La Agüera (Cape Blanco) in the south, though the main southern boundary runs along latitude $21^{\circ} 20'$. The land area is approximately 125,000 square miles. Spanish Sahara is divided into two regions separated by latitude 26° which passes south of Cape Bojador. The northern region is the Segura el Hamra (Rio Rojo) of which the capital is Aaiun. It extends eastward to approximately $8^{\circ} 40' W.$ long. The southern region is the Rio de Oro, of which the capital is Villa Cisneros. Its eastern boundary is approximately $12^{\circ} W.$ long. Total population about 36,000.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over ■■■ part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements ■■■ the Moroccan seaboard are:—

Alhucemas, the bay of that name includes six islands; population 366.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The *Chafarinas* (or Zaffarines) are a group of three islands near the Algerian frontier, about ■■■ miles north of Cape del Agua; population 610.

SUDAN

(Republic of the Sudan)

Chairman of Supreme Council of State, Ismail el Azhari.

Prime Minister and Minister of Foreign Affairs, Mohammed Ahmed Mahgoub.

NOTE.—On July 25, 1966, the Sudan Constituent

Assembly passed a vote of censure on the Prime Minister, Mr. Mahgoub who then resigned. Dr. Sadiq el Mahdi announced on July 31 that he had formed a Coalition consisting of members of the Umma Party and National Unionist Party. The Umma Party members of this cabinet resigned on Sept. 30, 1966. A new cabinet was formed on May 29, 1967, by Mr. Mahgoub.

The present Cabinet was formed by Mr. Mahgoub in June, 1968, after the success of the Democratic Unionist Party in the general election of May, 1968.

SUDANESE EMBASSY IN LONDON
3 Cleveland Row, S.W.1.
[01-839-8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sayed Sir El-Khatim el Khalifa, G.C.M.G. (1968).

Counsellor, Sayed Eisa Mustafa.

1st Secretary, Sayed Abdel Aziz Sayed Taha.

2nd Secretary, Sayed Ali A. Abu-Sinn.

Military, Naval and Air Attaché, Col. El Tayib El Mardi.

Asst. do., Lt.-Col. Yousif Ahmed Yousif.

Cultural Attaché, Sayed Ahmed Mohamed Saad.

Assistant Cultural Attaché, Sayed Hassan Abbas, M.V.O.

Commercial Attaché, Sayed Tawfig Tigani Abu-Groon.

Area and Population.—The Sudan extends from the southern boundary of U.A.R. $22^{\circ} N.$ lat., to the northern boundary of Uganda, $3^{\circ} 36' N.$ lat., and reaches from the Republic of Chad about $21^{\circ} 49' E.$ (at $12^{\circ} 45' N.$) to the north-west boundary of Ethiopia in $38^{\circ} 35' E.$ (at $18^{\circ} N.$). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22° parallel of North latitude; on the east lie the Red Sea and Ethiopia; on the south lie Kenya, Uganda and the Congolese Republic; and on the west the Central African Republic, Chad and Libya.

The White Nile enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The Blue Nile flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the White Nile at Khartoum. The next confluence of importance

is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa occur five of the six Cataracts.

The estimated area is about 976,750 sq. miles, with a population (estimated, 1967) of 24,355,000, partly Arabs, partly Negroes, and partly of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and other Northern peoples are all Moslems. The Nilotes of the Bahr el Ghazal and Upper Nile Valleys are generally pagans, but some have been converted to Christianity and others are beginning to go over to Islam.

Government.—By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan was until 1955 administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The first Sudanese General Election was held at the end of 1953.

The Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state, and on Jan. 1, 1956, the Republic was proclaimed and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. On November 17, 1958, by means of a coup d'état, the Army took over control of the country. The constitution was suspended, Parliament and political parties dissolved. A Supreme Council of the Armed Forces and a Council of Ministers were set up. In November, 1962, the Government announced a new electoral system comprising partly elected and partly nominated local councils, province councils and a Central Council. The local and province councils under the new system were in being by July, 1963, and the Central Council held its first session on December 13, 1963. In October 1964 a civilian Cabinet was appointed, and after the resignation of President Abboud in the following month, a Supreme Council of State, with 5 members, was set up.

Education.—Government education is heavily subsidized or free according to means, beginning at the age of seven and passing through elementary, intermediate and secondary stages, each of four years. University degree courses vary from 4 to 6 years. Arabic is the normal language of instruction in schools throughout the Sudan, although English is the main language of instruction in higher education. English is taught in intermediate and secondary schools as the first foreign language.

In 1968-69 the University of Khartoum had over 3,500 students of whom 400 graduated in 1968 in nine faculties. There were about 700 students at the Khartoum Technical Institute, which is divided in eight vocational schools and about 300 at the Senior Trade School. The Higher Teacher Training Institute at Omdurman had about 500 students. B.Ed. degrees will be awarded from 1971 after affiliation with the University of Khartoum. Non-governmental higher education was offered by Cairo University, Khartoum Branch (three faculties with about 1,600 students), and at the newly established Islamic University of Omdurman (600 students).

There were two training colleges for intermediate teachers with 200 men and 50 women, and 14 training colleges for elementary school teachers

with 1,400 students. 42 academic secondary schools, with a total first year entry of 114 streams with 40 pupils each (go for boys and 24 for girls), had a total of 14,000 boys and 4,000 girls. There was one secondary technical school with 4 class entry and 11 post-intermediate two-year technical schools with 4 class entry, making a total of 1,642 boys. 7 Government religious secondary schools also had about 1,200 boys. There were 228 streams in academic intermediate schools, making a total of 37,800 boy pupils and 12,200 girls, increasing of about 10 per cent. over 1967-68.

In 1967-68 there were 455,000 pupils receiving elementary education. In addition, 107,600 were enrolled in private schools at all levels, an increase of nearly two-thirds in a single year. The percentage of the age-group enrolled in all schools is: elementary, 31 per cent; intermediate, 4·5 per cent; secondary, 2·2 per cent.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (mainly Egyptian type) cotton of which the Sudan is a major producer, but increasing quantities of short and medium staple (American) type cotton are being grown. Production in 1965-66 totalled 790,180, an increase over the figure of 541,963 for 1963-64, but less than the 1961-62 level of 1,142,392 bales. Much of the high quality, long-staple cotton is provided by the Sudan Gezira Scheme (a Government-controlled project irrigated from the Sennar Dam on the Blue Nile) and its extension, the Managil Scheme. The Sudan also produces the bulk of the world's supply of gum arabic. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South. A new dam at Khashm el Girba began to store water in May, 1964, and will eventually provide irrigation to about 500,000 acres, most of which is being used to resettle the population of the Wadi Halfa area which is being flooded by the reservoir of the Egyptian High Dam. Another dam at Roseires on the Blue Nile will enable new or increased irrigation on a further 3,000,000 acres well providing hydro-electric power.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branches out southwards to Wau from the Sennar/Nyala western line. Regular rail and Nile steamer services connect Khartoum with Juba in Equatoria Province which in turn is connected by bus service with Nimule on the Uganda border. The river service between Wadi Halfa and Shellal in the U.A.R. was withdrawn in 1964 and it has not yet been decided finally what form of transport, if any, will replace it. Port Sudan is a well-equipped modern seaport. Sudan Airways fly regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, the United Kingdom, Ethiopia, Uganda and W. Germany and are equipped with a Comet 4C and 4 Fokker F27 aircraft as well as some smaller machines.

Consul-General, Baron G. F. von Otter.

Counsellor, E. Rosenblad.

2nd Secretary, G. Luthman.

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 24 local government districts, "Län," with an area of 173,436 sq. miles, and a population, Jan. 1, 1968 of 7,893,704. In 1966 there were 122,000 births (15.5 per 1,000 inhabitants; death rate was 10.1 per 1,000 inhabitants and infant mortality rate (under one year of age) 14.2 per cent. of all live births.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte. Jean-Baptiste Jules Bernadotte, Prince of Ponte Corvo, ■■■ Marshal of France, was invited to accept the title of Crown Prince, with succession to the throne. He landed at Helsingborg ■■■ Oct. 20, 1810, and succeeded Charles XIII in 1818. There is a Diet (Riksdag) of two Chambers, Första Kammaren of 151 members, elected for 3 years; and Andra Kammaren of 233 members, elected for 4 years. The Council of Ministers (Statsråd) is responsible to the Riksdag.

Production and Industry.—Since the end of the First World War Sweden has become one of the leading industrial nations of Europe. Agriculture is still one of the main activities, but its relative importance is declining and in 1967 less than 15 per cent. of the working population was engaged in

* This is the official title of the King of Sweden.

farming and forestry. The country's rising industrial prosperity is based on an abundance of natural resources in the form of forests, mineral deposits and water power. The forests are very extensive, covering about half the total land surface, and sustain flourishing timber, pulp and paper milling industries. The mineral resources include iron ore of excellent quality, lead, zinc, sulphur, granite and marble. There are also extensive deposits of low grade uranium ore. Important industries based on mining include iron and steel, aluminium, and copper. The engineering industry has expanded largely on the basis of products invented or developed by Swedish engineers. Sweden has now ■ of the most important shipbuilding industries in the world. Motor car manufacturing is becoming a major industry. The recent establishment of a petro-chemicals industry has led to ■ rapid expansion in the output of chemicals and plastics.

Communications.—Railroads totalling 8,600 miles in length (of which 7,900 are the property of the State) were open on January 1, 1967. At the beginning of 1966 there were 460 telephones for every 1,000 of the population, 383 per 1,000 had obtained wireless licences and in January, 1966, the number of television licences issued had reached 2,145,000. On Sept. 3, 1967, right-hand traffic rules were introduced on the roads in Sweden. The number of private cars in use on January 1, 1966, was 1,792,671 (231 per 1,000 population).

The Mercantile Marine (Dec., 1968) consisted of 838 vessels of 100 tons gross and over with a total tonnage of 4,565,871. The Board of Civil Aviation under the control of the Ministry of Communications handles civil aviation matters. Regular domestic air traffic is maintained by the Scandinavian Airlines System and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained by the Scandinavian Airline System.

Defence.—Service in the Defence Forces is universal and compulsory, an average of 45,000 reservists being trained annually; strength of the Army is about 49,000, with some 500,000 trained reserves, equipped with modern weapons and largely mechanized. The Navy consists of 1 cruiser, ■ destroyers, 9 frigates, 41 F.P.B.'s, 21 submarines and a large number of minor craft and auxiliaries. The Air Force is equipped with modern jet aircraft of Swedish manufacture, many of which are supersonic. There are 9 Fighter, 4 Attack and 2 Reconnaissance wings.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

Language and Literature.—As one of the Scandinavian languages, Swedish is closely allied to Norwegian, Danish and Icelandic. Swedish literature dates back to King Magnus Eriksson, who codified the old Swedish provincial laws in 1350. With his translation of the Bible, Olaus Petri (1493-1552) formed the basis for the modern Swedish language. In 1643 Georg Stiernhielm wrote his first poem, dedicated to Queen Christina, the first in a series of works which earned him the title of "The father of Swedish poetry". Literature flourished during the reign of Gustavus III, who founded the Swedish Academy in 1786, and Swedish drama was born. 19th century Swedish literature was studded by names such as Atterbom, Almqvist, Levertin, Rydberg, and was enriched by Finnish writers such as Topelius and Runeberg. At the culmination of this tradition came Strindberg and Lagerlöf. The modern tone was set by the so-called Proletarian School, the most famous authors of which were Ivar Lo-Johansson and Martinsson.

There followed ■ proliferation of young writers among whom Moberg, Lagerquist, Dagerman and Frans G. Bengtsson have won international repute. In 1966 there were 125 daily newspapers with a total circulation of 4,000,000 copies, 4 major papers being published at Stockholm, ■ at Göteborg and 4 at Malmö.

Education.—Well developed and recently reorganized to provide (i) 9 years' compulsory schooling from the age of 7 to 16 in the *Grundskolan*; (ii) further education from 16 to 18/19 in the *Gymnasia*, which offer a number of courses preparing for entry to the universities, other centres of higher education, the professions, etc.; (iii) Vocational and continuation schools following upon the *Grundskolan* and offering both practical and theoretical courses. These may be said to stand between the *Grundskolan* and the *Gymnasia*. (iv) the universities. There ■ five State universities—Uppsala (founded 1477); Lund (founded 1668); Stockholm (founded 1878); Göteborg (founded 1887); Umeå (founded 1963). Tuition within the State system, which is maintained by the State and by local taxation, is free.

	FINANCE	1968-69 (Estimated)

Consul and Head of Chancery, Fritz Adams.

There is a Swiss Consulate in Manchester.

Area and Population.—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'-47° 48' N. lat. and 5° 58'-

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is generally succeeded by the Vice-President.

10° 3' E. long. It is composed of 22 Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1847, and comprises a total area of 15,950 square miles, with a population (estimated Dec. 1967) of 6,071,000. In 1967 there were 107,417 live births, 55,742 deaths and 45,269 marriages. The infant mortality rate was 17 per 1,000 live births in 1966. In 1960, out of a total of 5,492,061, 52·6 per cent. of the population was Protestant, 45·6 per cent. Roman Catholic and 0·4 per cent. Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,777), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz. There are also many artificial lakes.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasture. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

Government.—The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 200 members, and a Council of States (*Ständerat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—All Swiss males must undertake military service in the Army. Elite (ages 20 to 32) initial training, 118 days. Subsequently 8 training periods of 21 days; then Landwehr (33-42) and Landsturm (43 to 50). Flying personnel of the Air Force, which is part of the Army (ages 20-36).

Initial training 1 year, totalling 200 hours of flying. 6 weeks with squadron each year and completion of 70 hours of flying. After 36 revert to ground duties with Air Force or Army. Swiss Army equipment includes many British items, notably Centurion tanks, Bloodhound missiles, and Venom, Vampire and Hunter aircraft.

Communications.—By the end of 1967 there were 3,141 miles of railway tracks (Swiss Federal Railways 1,823 miles, Swiss privately owned railways 1,318 miles); the whole system is electrified. At the end of 1967 there were 47,715 miles of telegraph and telephone lines. By December, 1967, the number of telephone subscribers amounted to 1,637,376, and the network was fully automatic throughout the country. There were 1,725,341 licensed radio receivers and 867,951 television receivers. At the end of 1965, the total length of first-class roads was 35,976 miles. The San Bernardino road tunnel, connecting Zurich with Lugano and Milan, was opened on Dec. 1, 1967.

The number of motor vehicles licensed at the end of 1967 was 1,747,425 (1,081,386 private cars, 547,574 motor cycles, motor scooters and bicycles with auxiliary motor, 4,483 motor buses, 91,438 motor lorries, 22,544 special vehicles and tractors).

A merchant marine, established in 1940, consisted in 1967 of 33 vessels with a total displacement of 201,334 tons (gross). In addition 488 vessels with a total tonnage of 467,856 were engaged in Rhine shipping. In 1967, goods handled at the Basle Rhine Port amounted to 791,202 tons. 121 lake vessels transported 9,464,000 passengers and 459,943 tons of freight in 1966.

The national airline, Swissair, has a network covering 10,156,666 nautical miles and in 1967 carried ■ total of 2,692,000 passengers. Its aircraft fleet comprises 7 Convair Coronados, 7 Caravelles, 6 DC 8s and 6 Convair 440's. In 1967 the net profit was 24,548,000 francs. It flies to and from the Swiss airports at Zurich, Geneva and Basle.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.) Primary: Free and compulsory. School age varies, generally 7 to 14. (ii.) Secondary: Age 12-15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) Special schools make a feature of commercial and technical instruction. (iv.) Universities: Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons.

Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845-1924) and Hermann Hesse (1877-1962) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

FINANCE Budget 1968

Revenue.....	Swiss Francs 6,310,000,000
Expenditure.....	6,504,000,000
Federal Public Debt (Dec. 31, 1966):—	

Internal consolidated 4,918,000,000

Since devaluation of sterling in November, 1967, the rate of exchange has fluctuated between Swiss

Francs 10.50 and 10.22 = £1 sterling for transactions through normal financial channels. The rate of exchange for sterling notes has fluctuated between Swiss Francs 10.40 and 10.25 = £1 (see also p. 83).

Justice, Issam Sbeinati.
Higher Education, Mustapha el Said.
Health, Dr. Zakariya Khayyata.
Oil, Electricity and Industrial Projects, Dr. Ahmed el Hassan.
Culture, National Guidance and Planning, and Tourism, Suhailel Ghazzi.

Food and Supply, Mohammed Talab Hilal.
Minister of State for Planning, Hammud el Kabbani.

[Following the outbreak of hostilities between Israel and the surrounding Arab States, Syria broke off diplomatic and consular relations with the United Kingdom on June 6, 1967.]

Area and Population.—Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (estimated 1966) of 5,634,000, Arabic speaking and mainly Moslems. (For MAP, see p. 884). The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the oldest continuously inhabited city in the world, having an existence ■ a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix. 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the *tell* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the 12th and 13th centuries has been restored as a museum.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

Government.—Syria, which had been under French mandate since the 1914-18 war, became an independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic. Syria seceded from the United Arab Republic on Sept. 28, 1961. Following a *coup d'état* by the Army on March 8, 1963, Syria is governed by the Baath Arab Socialist Party with ■ Ministerial Cabinet which was responsible to a Presidency Council, but since the *coup d'état* of February 23, 1966, is now responsible to the Regional Command of the Party, a body of sixteen members.

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebieh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil, glass, soap, sugar, plastics and copper and brass utensils are locally produced. There are also some light assembly plants. Mineral wealth is small but oil

has been found at Karachuk in the north-eastern corner of the country and drilling is continuing. A pipeline is to be built to the Mediterranean port of Tartous, *via* Homs. An oil refinery is in production at Homs and revenue is derived from the Kirkuk-Banias oil pipeline and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline). Syria also has deposits of phosphate and rock salt.

Language and Literature.—Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are ■ daily newspapers and several periodicals in Arabic published in Damascus ■ one daily newspaper in Aleppo.

Education.—Education in Syria is under State control and, although a few of the schools are privately owned, they all follow ■ common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts, commerce, agriculture, divinity, fine arts, and a Higher Teachers' Training College. The number of students has risen from ■ few hundred in 1943 to about 20,000. There are also over 4,500 students at Aleppo University (founded 1961). Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Beirut and Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. From Damascus the Hejaz railway runs southwards to Jordan. Railway lines are under construction to link the ports of Lattakia and Tartous with Aleppo and Qamishli. All the principal towns in the country are connected by roads of varying quality. An internal air service operates between Damascus and Aleppo, and between Aleppo and Qamishli. There are also flights from Damascus to Palmyra and Deir-ez-Zor. Damascus is also on international air routes.

Currency.—The monetary unit is the Syrian paper pound (L.Syr.). Exchange rate, see p. 84.

TRADE

Principal Imports.—Foodstuffs (fruit, vegetables, cereals, meat and dairy products, tea, coffee and sugar), mineral and petroleum products, yarn and textiles, iron and steel manufactures, machinery, chemicals, pharmaceuticals, fertilizers and timber.

Principal Exports.—Raw cotton, cereals, fruit, livestock and dairy products, other foodstuffs, textiles and raw wool.

The value of Syria's foreign trade was:—

	1965	1966
Imports... L.Syr. 812,000,000	L.Syr. 1,119,200,000	
Exports... 644,000,000	645,600,000	

Trade with U.K.

	1966	1967
Imports from U.K.... £6,938,000	£5,178,000	
Exports to U.K.... 1,037,000	479,000	

CHIEF TOWNS.—Damascus (population (1965), 599,000) is the capital of Syria, other important towns being Aleppo (population 562,000), Homs (189,000) and Hama (135,000), and the principal port is ♀ Lattakia (82,000).

FLAG.—Red over white over black horizontal bands, with three green stars on central white band.
NATIONAL DAY.—April 17.

BRITISH EMBASSY

[Diplomatic relations suspended, June 6, 1967.]

THAILAND (Siam)

King. His Majesty Bhumibol Adulyadej, born 1927; succeeded his brother, June 9, 1946; married Princess Sirikit Kitiyakara, April 28, 1950; crowned May 5, 1950; daughter born, April 6, 1951; son and heir born, July 28, 1952; second daughter born April 2, 1955; third daughter born July 4, 1957.

Prime Minister. Field Marshal Thanom Kittikachorn.
Foreign Minister. Nai Thanat Khoman.

ROYAL THAI EMBASSY IN LONDON

30 Queen's Gate, S.W.7
 [01-589-0173]

Ambassador Extraordinary and Plenipotentiary. His Excellency Sunthorn Hongladarom (1968).

Area and Population.—The Kingdom of Thailand, or Muang Thai, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1967) of 32,680,000. For position, see MAP, p. 970. It has a common boundary with Malaysia in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory.

The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms a boundary with Burma for 200 miles), the Menam-Chao Phya with its tributary the Méping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a sovereign independent state. Under the interim constitution promulgated in February, 1959, following on the bloodless revolution of October, 1958, the King exercises legislative power by and with the advice and consent of a Constituent Assembly, executive power through the Council of Ministers and judicial power through the courts established by law. He is advised by a Privy Council appointed by himself. The 240 members of the Constituent Assembly, who were appointed in February, 1959, under the terms of the interim constitution, as well as acting for the time being as the national legislature, have drafted a permanent constitution for Thailand.

Language, Religion and Education.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering 24,563,523 in 1964, with 1,025,569 Moslems and 150,053 Christians. The 2,500th anniversary of the Buddhist Era was celebrated in Bangkok in 1957, with religious and public ceremonies. Primary education is compulsory and free and secondary education in Government Schools is free. In 1964 there were 28,264 schools of all kinds, with 5,007,430 pupils and 158,920 teachers. There are 7 Universities attended by 45,000 students, 34 training colleges and 196 vocational schools (all types). New universities have been opened at Chiengmai

and Khon Kaen in 1966 and another in the southern part of the country was planned.

Production and Industry.—The country's most important products are agricultural or forest; rice (about 10,000,000 tons a year), rubber (about 210,000 tons a year) and timber (about 2,000,000 cubic metres a year of which only 161,000 are of teak, traditionally the important timber product). Other crops of some importance are sugar cane, tapioca, kenaf, groundnuts, tobacco, maize, soya beans, cotton and coconuts.

As regards mineral wealth, tin ore (production in 1965, 26,419 tons) is important, and small amounts of wolfram, iron and lead are mined, and over 125,000 tons of lignite. Most of the output of tin concentrates is now processed in a smelter in South Thailand which began operation in 1965. Exports of iron ore in 1965 were 700,000 tons (approx.), largely to Japan. Upwards of 200,000 tons a year of salt is produced by sea-water evaporation.

Before the war industry was mainly confined to the basic processing industries—sawmilling, rice-milling, etc. After the war the Government set up a number of factories, run by the Civil Service or the Armed Forces. The Government still has a sizeable stake in industry—notably the tobacco monopoly and factories for the manufacture of cement, glass, paper, jute, textiles, sugar and beer and spirits.

The present Revolutionary Government in 1958 instituted a policy of encouraging the private sector to invest in industry, by means of tax reliefs and other incentives. This policy is beginning to produce results although the Government has interests, directly or indirectly, in some of the largest current ventures—e.g. two refineries and a paper mill. The private sector industries are almost entirely of a secondary nature; soap products, gunny bags, textiles, car assembly, pharmaceutical preparations and packaging, dry batteries, etc. Nevertheless, more advanced organizations have recently started, such as a tyre factory, an aluminium rolling mill, a third glass factory, food processing plants and the manufacture of asbestos cement products. A fertilizer plant and a kraft paper factory have also been established.

Communications.—About 2,250 miles of State-owned railways were open to traffic in 1966. The track is metre gauge. Main lines run from Bangkok to Aranya Pradet, linking up with the Cambodian state railway at this border town (160 miles E.); via Korat to Ubol (about 352 miles E.) and to Nongkhai (415 miles N.E.) the ferry terminal on the River Mekhong opposite Vientiane, capital of Laos; to Chiengmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malay Peninsula, via Sungai Golok and Penang respectively, to Singapore.

Thailand has about 9,200 kilometres of highways, of which about 45 per cent. are paved. An additional 1,500 kms. of highway is under construction or planned. The development of roads is being given top priority in the Government's development plans and substantial extensions and improvements are being financed mainly by World Bank funds.

Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, Japan and Australasia, as well as other parts of S.E. Asia. Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. Domestic routes are operated by Thai Airways Corporation. There are about 14,500 miles of telegraph lines and parts of a countrywide micro-wave communications system are coming into operation. The har-

bour at Bangkok, which can take vessels up to 10,000 tons dead weight, is becoming congested, but an expansion programme is under study.

FINANCE 1964 1965

	millions of Baht	millions of Baht
Total revenue.....	10,470	12,160
Total expenditure.....	12,336	14,355

Since 1950 Thailand has received amounts in excess of U.S.\$380,000,000 in external loans for rehabilitation and development of railways, the port of Bangkok, irrigation, hydro-electric and other projects.

Thailand receives economic and technical assistance from many sources. The largest civil sector contribution is that of the United States which amounts to approximately U.S.\$31,000,000 annually. Substantial military aid is also received from U.S. sources.

The exchange rate for the *Baht* was officially fixed at *Baht 20·8 = \$1 U.S.* (See also p. 84.)

TRADE

	1964	1965
	millions of Baht	millions of Baht
Total imports.....	14,253	15,219
Total exports.....	12,339	13,049

Trade with U.K.

	1966	1967
Imports from U.K.....	£21,147,000	£22,074,000
Exports to U.K.....	5,645,000	5,398,000

The main exports are rice and rubber which normally account for about 50 per cent. of the total. Principal exports in 1965 (millions of *Baht*) were: Rice, 4,376; Rubber, 1,999; Tin, 766; Maize, 980. Other exports, whose levels vary more are jute and kenaf, teak, and tapioca products. The main imports are machinery, petroleum products, iron and steel, cotton fabrics and vehicles.

CAPITAL, Ψ Bangkok (population, 1966, 1,577,003); in the delta of the Manam Chao Phya. Other centres are Chiengmai, Nakorn Sawan and Korat, but no other town approaches Bangkok in size or importance.

FLAG.—Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others). NATIONAL DAY.—December 5 (King's Birthday).

BRITISH EMBASSY (Bangkok)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Neil Pritchard, K.C.M.G., (1967) £6,300
Counsellor, R. S. Scrivener, C.M.G. (Consul-General).
Defence and Military Attaché, Col. P. R. Body.

CONSULAR OFFICES
There are Consular Offices at Bangkok and Chiengmai.

BRITISH COUNCIL
Representative, M. H. Cardiff, O.B.E., 122 Chakrapet Road, Bangkok.

TOGO (Republic of Togo)

President and Minister of Defence, Gen. Etienne Eyadéma, born 1937, assumed office as Head of State, April 14, 1967.

Minister for Foreign Affairs, M. Joachim Hunlédé.

The Republic is situated in West Africa between $0^{\circ}2^{\circ}$ W. and $6^{\circ}11^{\circ}$ N., with a coastline only 35 miles long on the Gulf of Guinea, and extends northward inland for 350 miles. It is flanked on the west by Ghana, on the north by Upper Volta and in the east by Dahomey (see MAP, p. 956). It has an area of 21,000 sq. miles and a population

(estimated 1967) of 1,724,000, including people of several African races.

The first President of Togo, Sylvanus Olympio, assassinated on January 13, 1963, was succeeded by Nicolas Grunitzky, who was himself overthrown by an army coup d'état on January 13, 1967. On April 14, 1967, the Commander-in-Chief of the Togolese army, Lt. Colonel (later promoted General) Etienne Eyadéma named himself President. Togo is a member of the *Conseil de l'Entente*, the *Organisation Communale Africaine et Malgache* (O.C.A.M.), and the *Organisation of African Unity* (O.U.A.). The official language is French.

Finance.—The currency of Togo is the *Franc C.F.A.* (*Francs C.F.A.* 50=1 French Franc) (*Francs C.F.A.* 592= Li.).

Production and Trade.—The economy of Togo is largely agricultural, the main exports being coffee, cocoa, palm kernels, copra, cotton and manioc. Production of phosphates by a Franco-American consortium begun in 1955 contributed 38·4 per cent. to Togo's export revenue in 1967.

Trade with U.K.

	1966	1967
Imports from U.K.....	£1,155,000	£1,179,000
Exports to U.K.....	300,000	305,000

CAPITAL.— Ψ Lomé, population (1967), 86,400.

FLAG.—Five alternating green and yellow horizontal stripes; a quarter in red at top next staff bearing a white star. NATIONAL DAY.—April 27 (Independence Day).

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Ronald Fraser McKeever (1968) £4,625
3rd Secretary, I. S. Danson (Vice-Consul).

TRUCIAL STATES

Seven independent Arab Shaikhdoms, known collectively as the Trucial States, have treaty relations with the British Government originating in treaties to prevent slavery and the piracy which formerly gave the name of "The Pirate Coast" to this area, and to maintain a perpetual maritime truce. The earliest treaty dates from 1820.

The British Government, by virtue of a treaty made in 1892, is responsible for the external affairs of the states through the British Political Resident in the Persian Gulf and the British Political Agents in the Trucial States. Six of the states lie on the coast of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West and one, Fujairah, lies on the Gulf of Oman.

Area and Population.—The approximate combined area of the states is 32,000 square miles and the estimated population is about 180,000. Security in the area is maintained by the Trucial Oman Scouts, the force having its headquarters at Sharjah and in Abu Dhabi, by the Abu Dhabi Defence Force. There are police forces in Dubai, Abu Dhabi, Ras al Khaimah, Sharjah, Ajman and Umm al Qaiwain.

Revenue is chiefly derived from customs dues on imports and oil concession payments. The export of dried fish is also a significant source of revenue and some pearl fishing is still carried on. In Abu Dhabi, the onshore concession is held by Abu Dhabi Petroleum Co., Ltd. and the offshore concessions by Abu Dhabi Marine Areas Ltd.; in Dubai, the onshore concession is held by Dubai Petroleum Company and the offshore concession by Dubai Marine Areas; the onshore and offshore concessions in Sharjah, Ajman and Umm al Qaiwain are not let at present. The concession for Ras al-Khaimah is held by the Union Oil Exploration and Produc-

tion Co. The concession for Fujairah is held by Bomin.

From 1956 to 1965 the British Government financed a Trucial States Development Scheme to contribute to the material welfare of the people; the scheme included an Agricultural Trials Station in the Shaikhdom of Ras al-Khaimah. Trade Schools in Sharjah and Dubai, a hospital in Ras al-Khaimah and a number of dispensaries in the smaller towns and villages. In 1965 this scheme was amalgamated with the Trucial States Council's Development Office, which was founded to manage a fund for development, established with contributions from Britain, Qatar, Bahrain and Abu Dhabi. The Kuwait Government has also given aid in the form of schools, clinics and mosques. It has carried out numerous development projects: roads, jetties, piped water and electricity supplies, flood and sea protection, soil, water and mineral surveys, a trade school at Ras al Khaimah, and clinics and dispensaries.

Kuwait, U.A.R., Bahrain and Qatar contribute educational assistance to the states. There are hospitals in Dubai and Ras al-Khaimah. Her Majesty's Government has jurisdiction over certain categories of foreigners. The Rulers of all the states meet together in the Trucial States Council to discuss matters of mutual interest three or four times a year. The currency in Abu Dhabi is the Bahraini dinar; in the other Trucial States, the Qatar and Dubai riyal, which equals an Indian rupee.

Abu Dhabi is the largest of the Trucial States in area, stretching from the Khor el Odaid in the West to the borders with Dubai in the region of Jebel Ali. It includes six villages of the Buraimi oasis and a number of settlements in the series of oases known as the Liwa. Two oil companies are operating in Abu Dhabi territory, Abu Dhabi Petroleum Co. Ltd. on land and Abu Dhabi Marine Areas Ltd. in the Abu Dhabi off-shore concession area. Oil has been discovered off Das Island, where Abu Dhabi Marine Areas has its headquarters and production started in 1962. Production from the on-shore Murban oil field commenced in December, 1963. There are airfields at Abu Dhabi and at Das Island and an air strip at Buraimi. Work has started on a substantial development plan for the town of Abu Dhabi and the first stage has been completed.

Trade with U.K.

	1966	1967
Imports from U.K....	£3,282,000	£6,755,000
Exports to U.K.....	11,113,000	5,995,000

Dubai is by far the largest town in the Trucial States and has a population estimated at about 60,000. It is the main port for the import of goods into the Trucial States and the interior of Oman, and there is also a lively entrepot trade. The value of imports in the year 1966 was over £3,000,000 and in 1967 over £33,000,000. It has a good natural harbour, improvements to which have been carried out since 1959. The airport has been enlarged to take jet airliners. There are regular B.O.A.C. and other international and local airline services. The Dubai Telephone Company, formed in May, 1959, started generation and distribution in August, 1961. The main source of revenue is from customs. Wireless communications are managed by Cable and Wireless Ltd. and the Post Office was handed over to the Dubai Government by the British G.P.O. in 1963. Oil was struck off-shore in July 1966, and was declared to be in commercial quantities in May, 1967. Exports were expected to start early in 1968.

Sharjah has a port, much silted up, but a new jetty to replace it is under construction. It has an

airport served by Gulf Aviation and Syrian Arab Airlines. Sharjah has dependencies on the Batinah coast at Khorfakkan, which forms a good natural harbour, Kalba and Dibba. The headquarters of the Trucial Oman Scouts is near Sharjah. Units of the Royal Air Force and a battalion of the British Army are based at Sharjah.

Ajman is the smallest state, having a population of only about 5,000. It has inland enclaves at Manama and Masfut. *Umm el Qaiwain* does a small trade in dried fish. It has an oasis at Falaj al Mu'alla where palms and some fruit are grown. Ras al Khaimah has a population of about 25,000, of whom about half live in the town. It is an ancient seaport near which some remains of archaeological interest have been found. Dates, vegetables, fruit and tobacco are grown. The seat of government has now moved from its present exposed position on the shore to the inland side of the Creek. Fujairah was recognized as one of the Trucial States in 1952. The inhabitants are hill people in the mountains of the Musandam peninsula, with a few cultivators around Fujairah itself, which is on the fertile plain of the Batinah coast. The most important export is tobacco.

Trucial States Trade with U.K. (excluding Abu Dhabi, see above)

	1966	1967
Imports from U.K.....	£2,804,000	£5,278,000
Exports to U.K.....	3,199,000	6,676,000
British Political Agent, Trucial States, L. J. Bullard (resident at Dubai).		
British Political Agent, Abu Dhabi, C. J. Treadwell.		

TUNISIA (Tunisian Republic)

President, Habib Bourguiba, elected July 25, 1957;
re-elected 1959 and 1964.

TUNISIAN EMBASSY IN LONDON

29 Princes Gate, S.W.7

[01-584-5157]

Ambassador, His Excellency M'hamed Essaifi (1964).
3rd Secretaries, Ahmed Badra; Mustapha Mizouni.
Attaché, Mustafa Zardi (1967).

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles and a population (estimated, 1966) of 4,460,000.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956.

Following ■ first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. A few days later the Government was reconstructed on the "presidential" model, the Ministers becoming Secretaries of State. On June 1, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 12 regions each administered by Governor.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated.

The chief exports are olive oil, phosphates, cereals and, normally, wine but the French market has been virtually closed to Tunisian wine since the end of 1964 and exports of wine have declined sharply. The chief imports are machinery, food-stuffs, iron and steel, textiles and crude petroleum, etc. Some oil has been discovered in Tunisia and production is running at about 2,000,000 tons a year. In 1967 Tunisia's imports totalled in value £37,087,000 dinars and exports 78,360,000 dinars. The volume of Tunisia's trade with France is diminishing but France still remains Tunisia's main trading partner. In 1966 France supplied 31 per cent. of Tunisia's total imports and she bought 28 per cent. of Tunisia's total exports.

Trade with U.K.

	1966	1967
Imports from U.K.	£2,724,000	£1,720,000
Exports to U.K.	3,953,000	2,346,000

Currency.—The Tunisian dinar was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. Although Tunisia remains in the Franc Zone the dinar is not tied to the French franc. The current rate of exchange is dinars 1·25 = £1.

So far as trade is concerned Tunisia was effectively part of metropolitan France until September, 1959, when she abrogated the Customs Union with the latter and a new trade and payments agreement was negotiated. This reduced or

eliminated the tariff advantages enjoyed by certain French goods. Under commercial agreements concluded in November, 1962, and February, 1964, import quotas were established for certain French goods. In June, 1964, however, following Tunisian measures regarding the take-over of foreign-owned lands in Tunisia, France gave notice that she would not renew the 1959 Trade Agreement, due to expire on Sept. 30, 1964. In May, 1966, France opened import quotas for a wide range of Tunisian goods (but excluding wine). Within these quota limits these goods can be admitted into France customs-free. In 1966 ■ policy of severe import restriction was adopted in order to reduce the country's chronic imbalance of trade.

CAPITAL. Ψ Tunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 680,000 at the Census of 1956. The ruins of ancient Carthage lie ■ few miles from the city. Other towns of importance are Ψ Sfax (65,635), Ψ Sousse (48,172), Kairouan (33,968).

FLAG.—Red crescent and star in a white orb, all on a red ground. **NATIONAL DAY.**—June 1.

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only ■■■ part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. (For MAP, see p. 950).

Turkey extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. Total population at the Census of October, 1966, was 39,910,000.

Turkey in Europe consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles (Hellespont)—about 40 miles in length with ■ width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west. Population (estimated, 1966), 2,720,000.

Turkey in Asia comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922. Population (estimated, 1966), 29,190,000.

Government.—On October 29, 1923, the National Assembly declared Turkey ■ Republic and elected Gazi Mustafa Kemal (later known as Kemal Ataturk) President. Following the introduction of a multi-party régime in 1945, the Democratic Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, a body originally composed of 38 military officers, but reduced to 23 following an

internal purge in November, 1960. The committee ruled from January to November, 1961, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly. Following a prolonged trial on multiple charges of crimes against the Constitution, Adnan Menderes, the former Democratic Party Prime Minister, was executed on Sept. 17, 1961, together with the former Foreign and Finance Ministers. Sentence of death passed on Celal Bayar, former President, was commuted to life imprisonment.

In October, 1961, general elections were held for a new Grand National Assembly (150 Senators) and the National Assembly (450 Deputies). From 1961 until October, 1965, Turkey was governed by four coalition Governments, the first three under M. Ismet Inönü and the PRP and the last under the J.P. with an independent Prime Minister, M. Ürgüplü.

General Elections were held in October, 1965 in which the Justice Party obtained 240 seats and formed ■ unitary Government under Suleyman Demirel. The next largest party, the People's Republican Party, with 134 seats in 1965, split in April, 1967, 32 members forming the Reliance Party.

Turkey is divided for administrative purposes into 67 vilayet with subdivisions into kaza and nahiyə. Each vilayet has a governor (vali) and elective council.

Religion and Education.—98.99 per cent. of the population are Moslems. The main religious minorities, which are concentrated in Istanbul and on the Syrian frontier, are: Orthodox, 107,000; Armenian Apostolic, 71,000; Catholic, 25,000; Protestant, 17,000; others, 10,000 (Total Christians, 230,000); Jewish, 44,000. On April 10, 1928, the Grand National Assembly passed ■ law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1966-7 there were 26,000 primary schools, with 4,233 pupils. There are two universities at Istanbul (one being ■ Technical University), two at Ankara (including the recently-founded Middle East Technical University), one each at Izmir, Erzurum and Trabzon. The expenditure allocated to education in the 2nd Five Year Plan (1968-72) is TL 7,500,000,000.

Language and Literature.—Osmanlı or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the number of Turks who can read and write is rising steadily (although the proportion is constant at about 40 per cent.). Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to ■ small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects, but few trade or commercial publications.

Agricultural Production.—In recent years, agriculture has accounted for about 37 per cent. of gross domestic income, while exports of agricultural commodities have represented some 80 per cent. of total exports. About 10,000,000, 77·6 per cent. of the working population, is in the rural sector, but agriculture is still primitive and agricultural productivity is low. Production figures for the principal crops in 1967 were ('000 tons): Cereals, 17,016; Sugar beet, 4,700; Cotton, 393; Tobacco, 183; Olives, 390; Hazel nuts, 70; Figs, 45; Tea, (1966) 23; Sultanas, 95. With the important exception of wheat, which is mostly grown on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred around Izmir, where substantial quantities of cotton are also grown. The main cotton area is in the Cukurova Plain around Adana. In 1966 it was estimated that there were 73,000,000 head of livestock, including sheep, 34,000,000; goats, 21,000,000; and cattle, 13,000,000. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the deprivations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Industry.—After agriculture, Turkey's second most important industry is based on her considerable mineral wealth which is, however, as yet comparatively unexploited. The most important developments are in coal, of which over 9,400,000 metric tons are produced annually (over 46 per cent. of the production is lignite) for domestic needs. The main export mineral is chromite, of which 607,400 metric tons were produced in 1967. Production of iron ore in 1967 was 1,484,600 tons; chrome, 607,400 tons; manganese, 39,000 tons; sulphur, 25,500 tons; blister copper, 25,400 tons and boracite, 228,505 tons. The research and exploitation of the principal mineral deposits are mainly in the hands of the State-owned Etibank which controls directly, on behalf of the Government, all the copper, sulphur, and pyrite output of Turkey, as well as much of the cromemite and chrome production. Since State-sponsored industrialization began in 1935, industry has played an increasing part in the Turkish economy. Here, also, as in the case of minerals, much of the industry of the country is controlled by the Government.

The progress made in the manufacture of sugar, cotton, woollen and silk textiles, and cement, has been such that the bulk of the country's requirements can now be produced locally, while other industries contributing substantially to local needs include paper, glass and glassware, iron and steel, leather and leather goods, sulphur refining, canning and rubber goods, soaps and cosmetics, pharmaceutical products, prepared foodstuffs and a host of minor industries. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to promote the exploitation of Turkey's petroleum resources by foreign countries. Local production of crude petroleum in 1967 totalled 2,728,000 tons.

General Economic Factors.—Turkey's balance of payments continues to be burdened with the servicing of her large external debts (the total of public and private external debts payable in foreign currencies totalled TL16,213,500,000 in January, 1968, but this included credits of TL3,925,800,000 not yet used) and the difficulty of increasing exports, which are more or less limited to agricultural products, and minor raw materials for which world markets are rather weak. At the same time, Turkey's population is growing at an estimated

rate of 3 per cent. per annum. Since the Second World War the United States Government has been giving Turkey financial aid on a large scale, both for military and for economic purposes. In the last 18 years military aid has totalled almost 2½ billion dollars and economic aid has totalled slightly under 2 billion dollars. The other main official sources of foreign aid have been the O.E.C.D. and the I.M.F., which have made medium term loans for balance of payment support. By Dec. 31, 1967, the United Kingdom had given Turkey £26,574,000. Of this more than 90 per cent. was in the form of either tied programme loans (£17,539,000) or in the form of debt relief (£7,688,000).

The second of Turkey's three Five-Year Development Plans, for the years 1968–72, began in January, 1968. The basic economic objective of the second plan is to achieve an aggregate growth rate of around 40·3 per cent. in the gross national product.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length of lines in operation at the beginning of 1967 was 8,008 kilometres (4,976 miles). In 1966, the railways carried 86,000,000 passengers, 15,803,000 metric tons of freight and 3,700,000 head of livestock.

Roads.—At the end of 1967, there were 21,845 miles of national roads (6,073 of which were hard-surfaced), and 14,975 miles and 29,894 miles of various types of provincial roads and village roads respectively. The number of motor vehicles in use at the end of 1966 was 90,250 passenger cars, 84,673 trucks, 23,256 buses and 65,103 tractors.

Posts.—On Dec. 31, 1967, the number of telephone subscribers in Turkey was 275,380. There is a considerable shortage of telephone lines in some of Turkey's major cities.

Shipping.—At the end of 1966, the Turkish Merchant Navy consisted of 106 dry cargo ships of 300 tons gross and over totalling 338,367 tons, 23 passenger ships of a gross tonnage of 110,921 tons and 18 tankers with a gross tonnage of 104,205 tons.

Civil Aviation.—The State Airlines (T.H.Y.) operate all internal services and have services to Athens, Beirut, Brussels, Cologne, Amsterdam, Zurich, Bucharest, Geneva, Frankfurt, Munich, Rome, Nicosia, Tel Aviv and Vienna. Most of the leading foreign airlines operate services to Istanbul and some also to Ankara, including British European Airways. A recent agreement on a service between Turkey and U.S.S.R. has been implemented, the Soviet airline I.L.18's which fly USSR to Cairo from Turkey. The T.H.Y. fleet is composed of Vickers Viscounts, D.C.3 Dakotas and Fokker Friendships. The airports at Istanbul, Ankara and Adana have been improved to P.I.A.C.O. (Class B) standard.

FINANCE (Financial year, March 1 to February 28)

	1967-68	1968-69
	TL'000,000	TL'000,000
Estimated Expenditure...	9,398	21,612
Estimated Revenue.....	2,435	20,712

The estimated deficit of TL900,000,000 will be covered by domestic borrowing of TL500,000,000 and by Government staff economies.

Currency.—The Turkish Lira (TL) is divided into 100 Kuruş. The official rate of exchange TL21·60 = £1 and TL9·0 = U.S.\$1. A special tourist rate of exchange was introduced in 1968 of TL28·80 = £1 and TL12 = U.S.\$1.

TRADE

	1966	1967
Total imports*....	\$718,269,000	\$684,669,000
Total exports.....	490,508,000	522,667,000

All imports are subject to licence and the issue of licences is limited to goods considered necessary for the country's economy. Lists of permitted imports are published bi-annually at the beginning of January and at the beginning of July. The main imports are machinery, crude oil and petroleum products, iron and steel, vehicles, medicines and dyes, fabrics and yarns. The principal exports are cotton, tobacco, fruits, minerals, livestock, cereals and oil seeds.

Trade with U.K.

	1966	1967
Imports from U.K. .	£23,593,000	£29,170,000
Exports to U.K.	17,371,000	13,594,000

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 275 miles E.S.E. of Istanbul, with a population (1965 census), of 902,000. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and ■ marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city has been laid out on modern lines, with parks, statues and avenues. Ψ ISTANBUL (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; estimated population, 1,750,000. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 ■ museum of Byzantine and Turkish art. Other cities are Ψ Izmir (Smyrna) 417,000; Adana, 290,000; Bursa (Brusa) 212,000; Eskisichir, 174,000; Gaziantep, 158,000; Konya, 157,000; Kayseri (Caesarea), 126,000; and Erzurum, 106,000.

FLAG.—Red, with white crescent and star. NATIONAL DAY.—October 29 (Republic Day).

Social Affairs and Minister of State for National Assembly Affairs, Dia El Din Mohamed Daoud.

EMBASSY IN LONDON

26 South Street, W.1

[01-499-2401]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Hassan El-Feki (1967). Minister Plenipotentiary, Salah el Din Hassan. Counsellors, Dr. Hussein Amin Fawzi (Cultural

Affairs); M. Samir Ahmed; Ahmed Fawzi Mohamed Mahboub (Consular); Omran el-Shafie.

1st Secretaries, Dr. Kamal M. Hagras; Dr. Hamdi El-Tahri (Consular); Mustafa Khaled Hamdy (Commercial).

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population (estimated 1967), of 30,907,000.

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellâh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa of mixed Arab and negro blood. The *Bedouin* and *Nubiens* are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Soilûm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 feddâns (12,431 square miles) and the area of lakes at 641,000 feddâns (1,039 square miles), a total of 8,308,000 feddâns (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country.

The Nile has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river formerly had a regular yearly rise and fall of about 13 feet at Cairo, but since the commencement of storage in the reservoir of the High Dam in 1965, there has been no flood downstream of the Dam and the water level remains almost constant throughout the year. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small

areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia and Siwa.

On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 457 feet high. Close to the pyramids is the *Great Sphinx*, 289 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

Religions.—The predominant religion is Islam but there are about 2,000,000 Christians (mainly Copts). By 1968 nearly all the Jews had left the country. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti al Gumhuriya al Arabiya al Muttaahid*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by *pashas* sent from Constantinople until the beginning of the 18th century, when for about 200 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arâbi Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by *Sheikh Mohammed Ahmed* of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

During the War of 1914–18 a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by *Hussein Kamel*, with the title of Sultan, who died Oct. 9, 1917, being succeeded by his brother, *Ahmed Fuad*. The British Protectorate terminated on Feb. 28, 1922, and Sultan *Ahmed Fuad* was proclaimed King of Egypt. Following closely on the accession of King *Farouk*, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.–Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'état*, King *Farouk* abdicated in favour of his infant son, who became King *Ahmed Fuad II*. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic.

Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

A union with Syria was effected in 1958 and lasted until September, 1961, when Syria seceded after a *coup d'état*. The title and flag of the United Arab Republic were, however, retained for Egypt.

Zaharia Mohiedin resigned ■ Prime Minister in September, 1966, and was replaced by the former Minister for the High Dam, Sidky Soliman. After the defeat of the Egyptian forces in the war with Israel, President Nasser resigned on June 9, 1967, but withdrew his resignation after large demonstrations in his favour. On June 19, President Nasser also assumed the office of Prime Minister, forming ■ new government at the same time. Further Cabinet changes were made on Jan. 25, 1968, and on March 21, 1968.

Agriculture.—For the first time in history the Nile Flood was arrested in 1965. The flow of the river can now be regulated throughout the year by the High Dam, according to the needs of agriculture. The new pattern of cultivation which this will make possible has not yet fully emerged and it will take time to change traditional planting habits. The principal crops grown during *Saifi* (summer) were cotton, rice, sugar cane and sorgho (maize). *Nili* (flood) part of *Saifi*, had the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reached its highest level in September—it generally began in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, bersin (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to a new port being constructed upstream of the High Dam. At this point a steamer connection runs to New Halfa, connecting the Egyptian Republic with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs ■ line to the frontier at Sollum, thus joining Tripoli to Egypt. The gauge is standard (4 ft. 8½ in.). The Auxiliary Railway of Upper Egypt, consists of 282 miles of standard gauge.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollum and thence to connect with the coast road in Libya. A bitumen road leads to Kharga and Dakhla, from the former of which there is a route, known as the Darb el 'Arbain, leading to Dar Fur and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir, a metallled road, being probably the most frequently used.

Shipping.—♀ Apart from the three great seaports of Alexandria, Port Said and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

Currency.—£E (Egyptian pound of 100 piastres) = 19s. 2d. sterling. Official Rate of Exchange—(Buying) £Er 0·4347 = £1; (Selling) £Er 0·4973 = £1. (See also p. 84).

Trade with U.K.

	1966	1967
Imports from U.K. .	£18,002,000	£10,734,000
Exports to U.K.	8,673,000	7,375,000

The principal imports are metals, and manufactures thereof, coal and coke, chemicals and pharmaceuticals, capital plant and other machinery, vehicles, foodstuffs, timber and wood and paper. The exports are principally raw cotton, rice, mineral products, onions and a growing list of secondary exports, many of them manufactured goods.

CAPITAL.—Cairo (population, estimated 1966, 4,219,853), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century and containing in its walls the Mosque of Mohamed Ali built in the 19th century.

Ψ ALEXANDRIA (estimated population, 1,801,056), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Other towns are: Ismailia (344,789); Ψ Port Said (282,977); Mansura (102,709), Asyut (284,000), Fayūm (162,000), Tanta (139,965), Mahalla el Kubra (15,509), Ψ Suez (203,000), Ψ Damietta (97,000).

CAIRO is 2,520 miles from London: transit via Trieste, 5 days; via Marseilles, 6 days.

FLAG.—Horizontal bands of red, white and black, with two 5-point green stars in white band.

NATIONAL DAY.—July 23 (Anniversary of Revolution in 1952).

BRITISH EMBASSY

Kasr el Doubara, Garden City, Cairo

British Council Representative, J. A. O'Brien, C.B.E.

UPPER VOLTA

(République de Haute Volta)

Head of State (provisional Government) and **Minister of Foreign Affairs**, Lt.-Col. Sangoulé Lamizana, assumed power January 3, 1966

Upper Volta is an inland, savannah state in West Africa, situated between 9° and 15°N and 2°E and 5°W with an area of about 100,000 square miles and a population estimated in 1967 at 5,054,000. It has common boundaries with Mali on the west, Niger and Dahomey on the east and Togo, Ghana and the Ivory Coast on the south. The largest tribe is the Mossi whose king, the Moro Naba, still wields ■ certain moral influence.

Upper Volta was annexed by France in 1896 and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, etc., were signed in Paris on April 24, 1961. The Voltaic Republic is a member of the *Conseil de l'Entente*, the Organization of African Unity, etc. The official language is French. The constitution, adopted by referendum on November 27, 1960, provides for a presidential form of government with single chamber National Assembly, but the Constitution was suspended and the National Assembly dissolved in January, 1966, when the Army assumed power after popular demonstrations in Ouagadougou against the régime of the former President Yaméogo.

Finance and Trade.—The currency of the Republic is the Franc CFA (Francs CFA 50 = 1 French Franc) (Francs CFA 593 = £1). The 1968 Budget totalled Francs CFA 8,563,610,000.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea-nuts and cotton. Small deposits of gold, manganese, copper, bauxite and graphite have been found. Value of trade in 1966 amounted to: Imports, francs CFA 9,293,000,000; Exports, francs CFA 3,985,000,000.

CAPITAL.—Ouagadougou (100,000). Other principal town: Bobo-Dioulasso (56,150).

FLAG.—Three horizontal stripes, black (above) white and red. **NATIONAL DAY.**—December 11. **British Ambassador,** His Excellency Dudley John Cheke, C.M.G. (resident at Abidjan).

URUGUAY
(República Oriental del Uruguay)
President, Jorge Pacheco Areco, born 1920, succeeded to the Presidency on the death of President Gestido, Dec. 6, 1967.
Vice-President, Dr. Alberto Abdala.

Minister of Interior, Dr. Eduardo Jiménez de Arechaga.
Foreign Affairs, Venancio Flores.
National Defence, Gen. Antonio Francese.
Finance, Dr. Cesar Charlone.
Public Works, Walter Pintos Risso.
Public Health, Dr. Walter Ravenna.

Livestock and Agriculture, Dr. Carlos Frick Davie.
Transport, Communications and Tourism, Ing. José Serrato.
Culture, Dr. Federico García Capurro.
Labour and Social Security, Dr. Julio César Espinola.
Director of Planning and Budget, Dr. Aquiles Lanza.

URUGUAYAN EMBASSY AND CONSULATE
Chancery: 48 Lennox Gardens, S.W.1
[0x-589-8835; Consulate 01-589-8735]
Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Carlos María Velázquez (1965).

Counsellor. Señor Don Alfredo Lafone (Consular Affairs).

1st Secretary. Sra. E. Riso Platero (Cultural Affairs).

Area and Population.—The smallest Republic in South America, on the east coast of the Rio de la Plata, situated in lat. 30° – 35° S. and long. $53^{\circ} 25'$ – $57^{\circ} 42'$ W., with an area of 72,172 square miles, and a population (estimated, 1967) of 2,783,000 almost entirely white and predominantly of Spanish and Italian descent. Many Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande or the south and east. In no case do the peaks exceed 2,000 feet.

The principal river is the *Rio Negro* (with its tributary the *Yí*), flowing from north-east to southwest into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the *Negro* is also navigable for a considerable distance. Smaller rivers are the *Cuareim*, *Yaguaron*, *Santa Lucia*, *Quequay*, and the *Cebollati*. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merín.

The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the *Uruguay River* was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 200 years later the Portuguese settlements were captured by the Spaniards. From 1726 to 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

Elections were held on Nov. 27, 1966, together with a referendum which decided in favour of Uruguay's return to a presidential system. The election gave the Colorado Party a narrow majority.

The President appoints a council of 12 ministers and the Vice-President presides over Congress. The legislature consists of a Chamber of 99 deputies and a Senate of 30 members (plus the Vice-President), elected for five years by a system of proportional representation. Voting is obligatory and extends to all citizens of good repute and certain long standing residents who are not citizens, from the age of 18.

President Jorge Pacheco Areco succeeded Gen. Gestido, who died on Dec. 6, 1967.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandú, both situated on the River *Uruguay*, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The last livestock census showed figures of 8,792,428 cattle, 21,737,862 sheep, 498,097 horses, 383,357 hogs, and 10,461 goats. In addition to the meat packing industry, other foodstuffs, wine, beer and textiles are of importance.

The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, plastics, household consumer goods, edible oils and the refining of petroleum and petroleum products. There are no mineral deposits of importance.

Communications.—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

There are about 1,873 miles of standard gauge railway in use in Uruguay. A State Autonomous Entity was formed to administer the railway systems purchased by the Government from four British companies in 1948.

An internal airline, PLUNA, which is now owned by the State, runs a daily passenger service and limited freight service to the principal capitals of the interior, and also runs services to Southern Brazil, Paraguay and Argentina. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 270,980 pupils in 2,362 state schools and technical and trade schools and evening courses for adult education. In 1964 there were 71,175 pupils in secondary schools including 11,000 in the 11 State *Liceos* of the capital. The University at Montevideo (founded in 1849) had, in 1964, 16,200 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. 10 daily newspapers are published in Montevideo with an estimated total circulation of 200,000. Most of them are distributed throughout the country.

FINANCE

Estimated revenue and expenditure for the years 1967 and 1968 were as follows:

	1967	1968
Revenue..	\$Ur. 18,700,000,000	\$Ur. 46100,000,000
Expenditure	24,500,000,000	56,400,000,000

The public debt at June 30, 1967, amounted to \$Ur. 6,847,316,706.

The monetary unit is the *peso*. In May 1963 the gold content of the *peso* was fixed at 0.059245 grammes of pure gold. After several devaluations the *peso* stood in May, 1968, at \$Ur. 250 = \$U.S. 1 in the official markets. Quotations in the parallel markets fluctuate, within 10 per cent. of the official rate. Sterling exchange on May 20, 1968, stood at pesos 590 = £1 (see also p. 84).

TRADE

1966	1967
Total imports \$U.S. 162,242,000	\$U.S. 171,410,000
Total exports 185,835,000	158,673,000

Trade with U.K.

1966	1967
Imports from U.K. ... £3,088,000	£3,351,000
Exports to U.K. 12,374,000	13,687,000

The exports are principally animal and agricultural products, and include chilled, frozen and canned meat, wool, hides and oleaginous products; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber and foodstuffs.

The principal imports from the U.K. are vehicles (including omnibus chassis, tractors and spares and accessories), iron sheets, tinplate, raw materials, industrial machinery spare parts, paper money, road-making machinery, chemical products and tea.

CAPITAL, Ψ Montevideo, Pop. (1963), 1,173,114. Other centres are Ψ Salto (60,000), Ψ Paysandú (60,000), Ψ Mercedes (34,000), Minas (34,000), Melo (30,000), and Rivera (22,000).

FLAG.—Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff. NATIONAL DAY.—August 25 (Declaration of Independence, 1825).

Time of transit from London to Montevideo, by air, 20–22 hours.

BRITISH EMBASSY

Chancery, Calle Cerrito, 420, Montevideo.
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Keith Unwin, R.B.E., C.M.G. (1966) £5,735

1st Secretaries, K. F. X. Burns (Head of Chancery); I. Ross-Bell (Commercial).
2nd Secretaries, C. J. Sharkey (Information); J. F. Skelton (Vice-Consul).
Naval Attaché, Capt. G. D. van Someren, R.N. (resident at Buenos Aires).
Defence and Military Attaché, Col. P. Pardoe (resident at Buenos Aires).
Air Attaché, Group-Capt. K. P. Smale, D.S.O., D.F.C. (resident at Buenos Aires).
Labour Attaché, F. Sharples.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Montevideo and Fray Bentos.

BRITISH COUNCIL.—Representative, A. Richardson, San José 1426, Montevideo.

ANGLO-URUGUAYAN CULTURAL INSTITUTE, San José 1426, Montevideo—Director (vacant).

There are branch Institutes at Salto, Paysandú, Fray Bentos, Rivera, Las Piedras, Melo, Mercedes, Trinidad and Treinta y Tres.

BRITISH CHAMBER OF COMMERCE IN URUGUAY, Edificio Banco de Londres, Calle Cerrito, 420, Montevideo.

U.S.S.R.

(Soyuz Sovetskikh Sotsialisticheskikh Respublik = Union of Soviet Socialist Republics)

(August, 1968)

THE COMMUNIST PARTY OF THE SOVIET UNION

(K.P.S.S.=Komunisticheskaya Partiya Sovetskogo Soyuza)

Constitutionally, the highest executive organ of

the C.P.S.U. is its Central Committee, as elected by the Party Congress. The present Central Committee (elected at the XXIIIrd Party Congress in April, 1966) consists of 195 members; there are also 165 "candidates for membership" with a consultative voice and 79 members of the Central Auditing Commission. The real power in the Party is vested, however, in the Politbureau and the Secretariat of the Central Committee:

Politbureau, L. I. Brezhnev; A. P. Kirilenko; A. N. Kosygin; K. T. Mazurov; A. J. Peše; N. V. Podgorny; D. S. Polyansky; A. N. Shelepin; P. Ye. Shelest; M. A. Suslov; G. I. Voronov (full members). Yu. P. Andropov; P. N. Demichev; V. V. Grishin; D. A. Kunayev; P. M. Mashevov; V. P. Mzhavanadze; Sh. R. Rashidov; V. V. Shcherbitsky; D. F. Ustinov (candidates for membership).

Secretariat, Leonid Illich Brezhnev (General Secretary) (since October 14, 1964); P. N. Demichev; I. V. Kapitonov; K. F. Katushev; A. P. Kirilenko; F. D. Kulakov; B. N. Ponomarev; M. S. Solomentsev; M. A. Suslov; D. F. Ustinov.

Committee of Party Control, A. J. Peše (Chairman). Komsomol (Young Communist League), Ye. M. Tyazhelnikov (1st Secretary).

GOVERNMENT OF THE U.S.S.R.
The Presidium of the Supreme Soviet of the U.S.S.R.

Chairman (=President of the U.S.S.R.), Nikolay Viktorovich Podgorny (elected, December 9, 1965).

Secretary, M. P. Georgadze.

The Supreme Soviet (=Parliament) consists of two chambers.

Chairman (=Speaker) of the Council of the Union, I. V. Spiridonov.

Chairman (=Speaker) of the Council of Nationalities, J. I. Paleckis.

The Council of Ministers of the U.S.S.R.

Chairman (=Prime Minister), Alexei Nikolayevich Kosygin (since October 14, 1964).

1st Vice-Chairmen, K. T. Mazurov; D. S. Polyansky. Vice-Chairmen, N. K. Baybakov; V. E. Dymshits; V. A. Kirillin; M. A. Leshchko; I. T. Novikov; V. N. Novikov; L. V. Smirnov; N. A. Tikhonov; M. T. Yefremov; and the Prime Ministers of the 15 constituent republics *ex officio*.

Ministries.—There are three groups of departmental ministries, with a total of 70 ministers—25 All Union Ministries, i.e. federal ministries, 31 Union Republican Ministries (co-ordinating ministries of individual republics) and 14 Chairmen of State committees, etc., ranking as Ministers.

EMBASSY OF THE U.S.S.R. IN LONDON
13 Kensington Palace Gardens, W.8

[01-229-2666; 3628; 6412.]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mikhail N. Smirnovsky (1966). Minister-Counsellor, V. M. Vashev.

Counsellors, V. N. Sofinov; A. P. Chuev; I. D. Bir'yukov; N. I. Efimov; I. A. Gavva; V. M. Chubarov; B. D. Piadyshev; Y. N. Voronin; Y. F. Sepelev; B. G. Kolodiyazhny. 1st Secretaries, I. F. Kovalenko; G. V. Shevchenko; E. F. Rogov; A. I. Borisenko; I. A. Shishkin; N. A. Makarov; I. P. Azarov; L. N. Sherstnev; Y. E. Chernetskov; L. A. Rogov; Y. I. Pavlov.

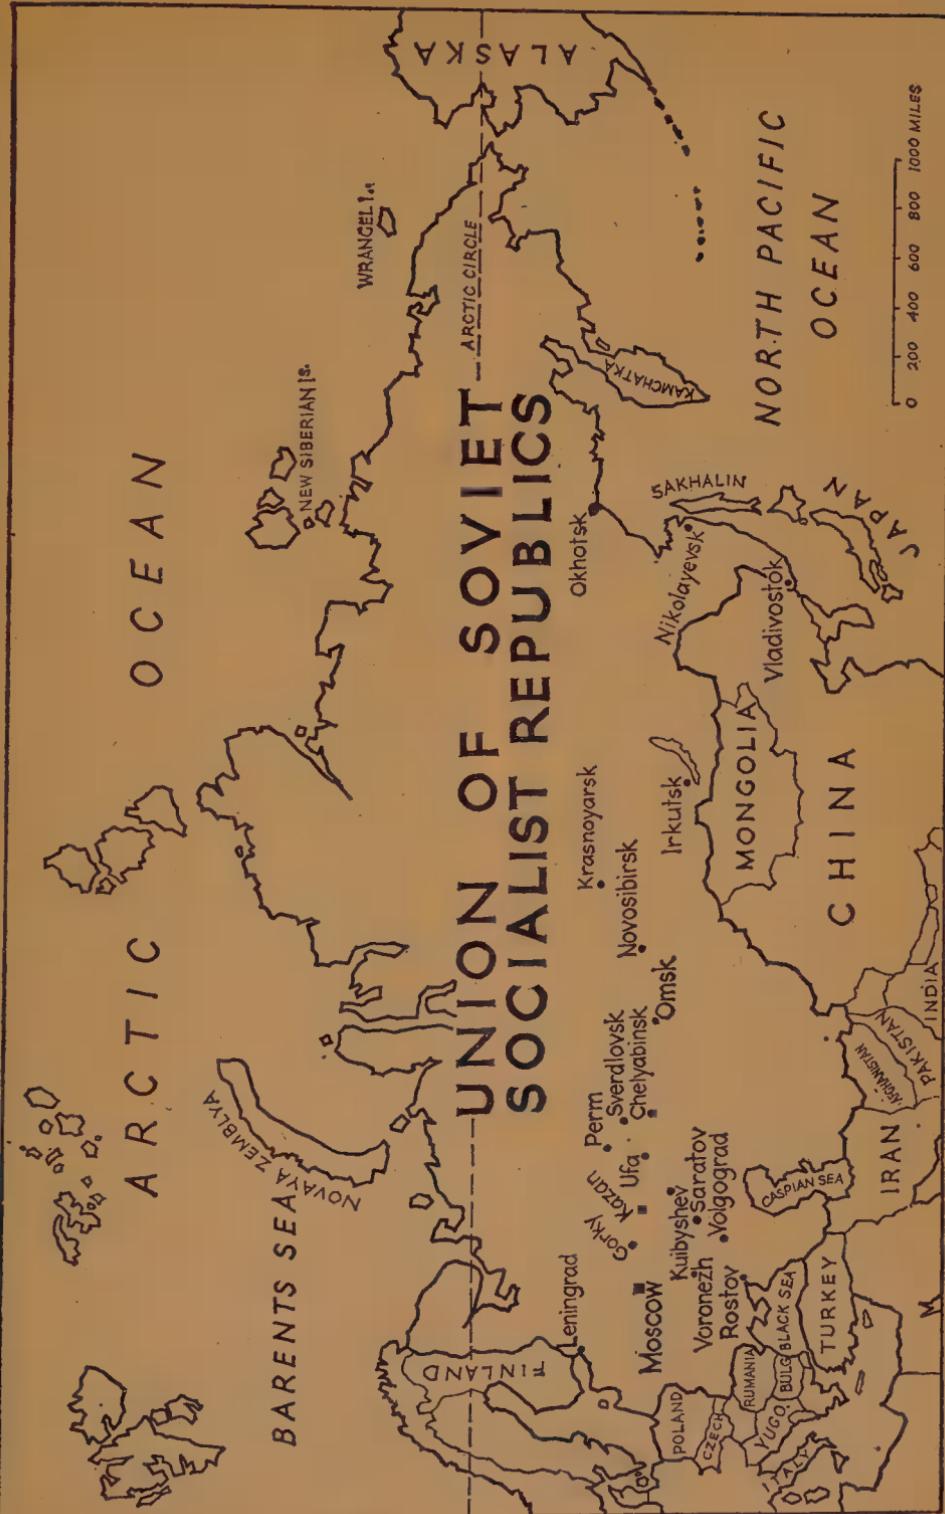

Military Attaché, Maj.-Gen. L. D. Nemchenko. Naval Attaché, Rear-Adm. B. D. Yashin.

Air Attaché, Col. G. S. Semenov.

Trade Representative, Boris S. Gordeev.

Deputy Trade Representatives, D. O. Shkrebtienko; K. D. Tikhomirov.

Consulate, 5 Kensington Palace Gardens, W.8. [01-229-3215]

AREA AND POPULATION

The U.S.S.R. is composed of 15 Union Republics (see below). Before the outbreak of the war of 1939–45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaijani, Georgian, Turkmen, Uzbek, Tadzhik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of Bessarabia ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of Bessarabia, including the Danube estuary port of Izmail, and Northern Bukovina, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania.

In August, 1940, the three independent Baltic States, Estonia, Latvia and Lithuania, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, Ruthenia was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of Transcarpathia. After the defeat of Germany, a part of East Prussia with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of Memel (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of Peissamo (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of Sakhalin and the whole of the Kurile Islands were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, Tannu-Tuva, until the war of 1939–45 a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of Tuva and, in 1961, the Autonomous Republic of Tuva, within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (Karelian) Republic within the R.S.F.S.R.

Area and population (estimate, January 1, 1968) of the constituent Republics of the U.S.S.R. with their capitals:—

Republic (Capital)	Sq. miles	Population
I. R.S.F.S.R. (Moscow).....	6,593,391	127,911,000
II. Ukraine (Kiev).....	232,046	46,381,000
III. Belorussia (Minsk).....	20,154	8,820,000
IV. Uzbekistan (Tashkent).....	158,069	11,266,000
V. Kazakhstan (Alma-Ata).....	1,064,092	12,678,000
VI. Georgia (Tbilisi).....	26,911	4,659,000
VII. Azerbaijan (Baku).....	33,436	4,917,000
VIII. Lithuania (Vilnius).....	26,173	3,064,000
IX. Moldavia (Kishinev).....	13,012	3,484,000
X. Latvia (Riga).....	24,695	2,298,000
XI. Kirghizia (Frunze)	76,642	2,836,000
XII. Tadzhikistan (Dushanbe).....	54,019	2,736,000

XIII. Armenia (Erevan).....	11,306	2,306,000
XIV. Turkmenistan (Ashkhabad).....	188,417	2,029,000
XV. Estonia (Tallin).....	17,413	1,304,000
Total.....	8,599,806	236,689,000

A striking demographic feature is the growing urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total, in 1967 it reached 55 per cent., owing to migration into towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 33 towns with over 500,000 (11 in 1939).

The proportion of women to men is 54·2 to 45·8 per cent. The birth-rate is 17·4, the mortality rate 7·6; the natural increase, 9·8 per 1,000.

More than three-quarters of the people were born after the 1917 Revolution.

Main Nationalities (1965 Estimate)

The most numerous nationality groups of U.S.S.R. are Russian, 122m. and Ukrainian, 40 m. There are between 5 and 9 million Belorussians, Uzbeks and Tartars respectively. Kazakhs, Azerbaijanis, Armenians and Georgians number between 3 and 5 million each group. There are some 2·5 million Lithuanians, Jews and Moldavians respectively. In each of the remaining nationality groups the population numbers between 1·05 and 1·8 million: Germans, Tadzhiks, Chuvashes, Latvians, Poles, Mordovians, Turkmens, Kirghizians, Bashkirs and Estonians.

CONSTITUTION

Under the 1936 ("Stalin") Constitution, the Union of Soviet Socialist Republics is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the Soviet of the Union (elected on the basis of one deputy for every 300,000 of the population) and the Soviet of Nationalities (elected at the ratio of

25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33–35). The Supreme Soviet which, as a rule, meets 4 to 5 times a year for about a week, delegates most of its power to its Presidium which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its Presidium (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118–121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state." The new Party programme, adopted in November, 1961, envisages a great increase of the economic capacity of the country and promises the transition to "full Communism" some time after 1980.

A special committee was set up in November, 1961, to draft a new constitution, but has been in abeyance ever since.

Local Government.—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the Soviets of Working People's Deputies (§ 94), elected by the working people of the respective administrative units for a term of two years (§ 95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§ 99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57–63 and 79–88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their

own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries and/or the Gosplan. The Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization or, rather, "de-concentration".

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939–1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943, to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests, many churches, mosques and synagogues and several big monasteries were reopened.

The proselytizing successes of the religious communities have become of great concern to the authorities; there has been a great increase of anti-religious articles in the press since 1959, and a number of religious institutions was once again closed or banned.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists. President, M. V. Keldysh.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1920, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE, LITERATURE AND ARTS

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyril-

lic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). The 20th century produced great poets like Alexander Blok (1880-1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890-1960), Vladimir Mayakovsky (1893-1930) and Anna Akhmatova (1889-1966). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekhov (1860-1904), Maxim Gorky (1868-1936) and Ivan Bunin (1870-1953).

Great names in music include Glinka (1804-1857), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikovsky (1840-1893), Rakhmaninov (1873-1949), Scriabin (1872-1915), Prokofiev (1891-1953), Stravinsky (b. 1882) and Shostakovich (b. 1906).

FINANCE

A new, "heavy" Rouble was introduced on January 1, 1961. Prices and wages have been changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The official exchange rate is now £1=R.2·16. It bears little relation to the actual purchasing power of the two currencies. Banknotes in circulation are those valuing R. 1, 3, 4, 25, 50 and 100. There are also new coins valuing Kopecks 1, 2, 3, 5, 10, 20, and 50 and R. 1. Old Kopeck coins are also current at the same value ■ new ones.

DEFENCE

No official returns concerning the services are made in the U.S.S.R. It may be said, however, that the general trend over the last years has consisted in a growing emphasis on nuclear missiles and in a steady reduction of conventional arms.

The basic military service is two years in the Army and four years in the Air Force and the Navy.

Defence Budget, 1967: 14,500 million Roubles. This total represents the defence vote, and almost certainly does not include space research costs or the research and development budget for advanced weapons systems. At the official exchange rate, this figure would be approximately £6,700m. At a more realistic exchange rate, total Soviet military expenditure, including elements not in the official budget, is probably nearer the equivalent of £16,000m. a year.

The total size of the Soviet regular forces is now estimated to be about 3,150,000 men.

Operational ICBM's now total around 270, an increase of about 40 per cent, on the 1964 figure. The number of MRBM's and IRBM's launchers still appears to be between 700 and 750. The operational personnel of the Strategic Rocket Forces totals about 180,000.

The Air Forces comprise about 10,500 operational aircraft. The total strength of the Air Forces, excluding the Naval Air Force, is about 510,000 men. The total personnel of the separate Air Defence Command is estimated at 250,000 men.

The total size of the Soviet Army is estimated at 2,000,000 men. It is thought to be organized in 140 divisions, distributed as follows: 75 divisions in European U.S.S.R., 22 in Central U.S.S.R., 17 in the Far East, 26 in Eastern Europe.

The total strength of the Soviet Navy and Naval

Air Force is 450,000 men. In total tonnage, it is the second largest navy in the world, and its main strength still lies in the submarine fleet. There are now 370 conventionally-powered and 40 nuclear-powered submarines. At least 40 can fire ballistic missiles and carry an average of three each. Over 300 are ocean-going.

There are no aircraft-carriers in the Soviet Navy. The land-based Naval Air Force comprises about 400 bombers and 400 other aircraft. The surface ships comprise 20 cruisers and 80 destroyers.

The security and border troops number some 230,000. There are also about 1½ million DOSAAF members who participate in such activities as shooting, athletics and parachuting.

*Minister of Defence, Marshal A. A. Grechko.
Chief of General Staff, Marshal M. V. Zakharov.
Chief, Political Administration, Soviet Armed Forces,
Army Gen. A. A. Yerishev.*

On May 14, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European associates (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Roumania and Czechoslovakia) to serve as ■ counter-poise to NATO. A unified military command was set up in Moscow (Secretary-General, N. P. Firyubin; C.-in-C., Marshal I. I. Yakubovsky).

Industry and Agriculture

One of the most remarkable aspects of Soviet economy has been the transformation of ■ essentially agricultural country into the second-strongest industrial power in the world. The 1967 output amounted to 74,800,000* tons of pig-iron, 102,200,000* tons of steel, 81,700,000* tons of rolled metal, 595,000,000* tons of coal, 288,000,000* tons of crude oil, 84,800,000* tons of cement, 589,000 million kW/h of electricity and 729,000 motor vehicles.

Agricultural development has been far slower, mainly owing to lack of incentives among peasants organized in *kolkhozy* (collective farms). Repeated droughts, such ■ in 1965, were a contributing factor to a permanent shortage of grain. In the last few years, vast quantities of grain had to be imported from Canada, the U.S. and Australia. Stock breeding has also suffered from the general mismanagement of farming. The livestock in 1968 included 97,100,000 cattle, including 41,600,000 cows, and 143,900,000 sheep and goats. The level of productivity remains very low. It remains to be seen whether new incentives for peasants introduced in 1966 will bring about a radical change in the situation. Forests cover nearly 40 per cent. of the whole area of the Union and form ■ considerable source of wealth.

Trade with U.K.

	1966	1967
Imports from U.K. . .	£49,708,000	£63,306,000
Exports to U.K.	125,421,000	123,510,000

COMMUNICATIONS

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have ■ good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia via Sverdlovsk, Cheylabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia,

with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Tians-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektneya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Seven Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 239,000,000 tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don* Canal linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

FLAG OF THE U.S.S.R.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY OF THE U.S.S.R.—November 7 (Commemorating the October Bolshevik Revolution of 1917).

BRITISH EMBASSY

(Naberezhnaya Morisa Toreza 14, Moscow)
Ambassador Extraordinary and Plenipotentiary, Sir (Achibald) Duncan Wilson, K.C.M.G. (1968)
£8,600

Minister, P. C. F. Dalton, C.M.G.

Counsellors, E. F. Given, C.M.G.; E. A. Alexander (Scientific).

1st Secretaries, J. C. C. Bennett (Cultural); M. J. F. Duncan; D. J. E. Ratford (Commercial); G. E. Clark; L. E. Sturmey, M.B.E. (H.M. Consul); A. B. Williams; Dr. D. J. Sheehan (Medical Officer).

2nd Secretaries, J. H. Symons; J. O. Kerr; B. H. Mason; G. D. G. Murrell; R. P. Joscelyne; H. B. Formstone; W. B. Harris.

Defence and Air Attaché, Air Cdre. R. G. Dutton, C.B.E., D.S.O., D.F.C.

Asst. Air Attachés, Sqn. Ldr. J. Gibbon; Sqn. Ldr. D. Higham; Sqn. Ldr. J. L. Blackford.

Military Attaché, Brig. H. G. Kemball.

Asst. Military Attaché, Major J. U. H. Burke.

Naval Attaché, Capt. S. R. Sandford, R.N.
Asst. Naval Attachés, Lt. Cdr. G. R. B. Booth, R.N.; Lt.-Cdr. A. L. Miller, R.N.

There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)
Chairman of the Presidium of the Supreme Soviet, M. A. Yasnov.

Chairman of the Council of Ministers, G. I. Voronov.

The R.S.F.S.R. has no Communist Party Central Committee of its own.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R., and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 56 per cent. of the total population. It consists of 16 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Osetian, Tartar, Tuva, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kalinograd, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Voronezh and Yaroslavl).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. extends over all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Do. and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron

ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.R.—the Bashkir and Tartar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Novokuznetsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Volgograd, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, MOSCOW. Population 6,567,000. Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914-1924 "Petrograd") has a population of 3,755,000.

Other towns with populations exceeding 500,000

are:

Gorky (Nizhny-Novgorod)	1,140,000
Novosibirsk (Novonikolayevsk)	1,080,000
Kuibyshev (Samara)	1,016,000
Sverdlovsk (Yekaterinburg)	981,005
Chelyabinsk	851,000
Kazan	838,000
Perm (Molotov)	811,000
Omsk	801,000
Ψ Rostov-on-Don	774,000
Volgograd (Stalingrad; Tsaritsyn)	757,000
Saratov	738,000
Ufa	724,000
Voronezh	668,000
Krasnoyarsk	592,000

Ψ Seaport.

About 83 per cent. of the population are Russians.

II.—UKRAINE

First Secretary of the Party Central Committee, P. Ye. Shelest.

Chairman of the Presidium of the Supreme Soviet, D. S. Korotchenko.

Chairman of the Council of Ministers, V. V. Shcherbitsky.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkassy, Chernigov, Chernovtsi, Crimea, Dnepropetrovsk, Donetsk, Ivano-Frankovsk, Kharkov, Kherson, Khmelnitsky, Kiev, Kirovograd, Lugansk, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the southwest) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1955, the Ukraine provided 37 per cent. of the total Soviet steel, 39 per cent. of metal goods and 32 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in the U.S.S.R. founded in the 9th century A.D., was the capital of the Russian State from 865 to 1240. Population (1968), 1,457,000. Other towns with population over 500,000 are:—

Kharkov	1,148,000
Donetsk (Stalino; Yuzovka, i.e. Hughesovka)	855,000
Dnepropetrovsk (Yekaterinoslav)	837,000
Ψ Odessa	797,000
Zaporozhye (Aleksandrovskaya)	616,000
Lvov (Lviv; Lwown)	524,000
Krivoy-Rog	523,000

III.—BELORUSSIA

(White Russia)

First Secretary of the Party Central Committee, P. M. Masharov.

Chairman of the Presidium of the Supreme Soviet, S. O. Pritytsky.

Chairman of the Council of Ministers, T. Ya. Kiselev.

The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also

been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population 805,000.

Belorussians make up four-fifths of the population, with Russians and Poles coming next.

IV.—UZBEKISTAN

First Secretary of the Party Central Committee, Sh. R. Rashidov.

Chairman of the Presidium of the Supreme Soviet, Mrs. Ya. S. Nasriddinova.

Chairman of the Council of Ministers, R. Kurbanov.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 10 provinces (Andizhan, Bokhara, Ferghana, Kashka-Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya, Syr-Darya and Tashkent). It lies between the high Tien-shan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khaudag), coal (Angren) and sulphur (Shorsu).

The Uzbeks, ■ Turkic people, make up 62 per cent. of the population, the Russians (14 per cent.) and Tartars (five per cent.) come next.

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population 1,295,000. Samarkand contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory. Heavy damage was done to this ancient city by the series of severe earthquakes in April and May, 1966.

V.—KAZAKHSTAN.

First Secretary of the Party Central Committee, D. A. Kunayev.

Chairman of the Presidium of Supreme Soviet, S. B. Niayzbekov.

Chairman of the Council of Ministers, M. Beysebayev.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted ■ Union Republic in 1936. It consists of the 14 Provinces: Akyubinsk, Alma-Ata, Chimkent, Djambul, East-Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanay, Kzyl-Orda, Semipalatinsk, Taldy-Kurzan, Tselinograd and Uralsk.

Kazakhstan is a country of arid steppes and misericards, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mountains, and elsewhere. It also contains an important coal-

producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the north and north-east and cotton in the south and south-east. In 1954 ■ ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 30 per cent. of its population. Russian settlers make up 43 per cent. and Ukrainians 8 per cent.

CAPITAL, Alma-Ata (formerly Verny). Population, 668,000. Karaganda, a major mining centre, has ■ population of 505,000.

VI.—GEORGIA

First Secretary of the Party Central Committee, V. P. Mzhavanadze.

Chairman of the Presidium of the Supreme Soviet, G. S. Dzotenidze.

Chairman of the Council of Ministers, G. D. Djavakhishvili.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjaria) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with ■ more continental and dry climate. The Black Sea shore and the Rion lowlands are subtropical in their climatic character. The most important mineral deposits are manganese (Chaturv) coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viniculture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up 63 per cent. of the population, the remainder being composed of Armenians, Russians, Azerbaijani and Osetians.

CAPITAL, Tbilisi (Tiflis), population 861,000.

VII.—AZERBAIDJAN

First Secretary of the Party Central Committee, V. Yu. Akhundov.

Chairman of the Presidium of the Supreme Soviet, M. A. Iskenderov.

Chairman of the Council of Ministers, E. N. Alikhanov.

The Azerbaijan S.S.R. occupies the eastern part of Transcaucasia, on the shore of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922 and 1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the

spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Aragva. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaijan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the second-largest oil-producing area in the U.S.S.R. A large power station on the Kura (Mingechar) was completed in 1954. Azerbaijan has also important cotton-growing areas. The Azerbaijani (Turks) make up two-thirds of the population of the Republic, Armenians, about 12 per cent., and Russians, about 14 per cent.

CAPITAL, Baku. Population 1,218,000.

VIII.—LITHUANIA

First Secretary of the Party Central Committee, A. J. Snieckus.

Chairman of the Presidium of the Supreme Soviet, M. J. Šumauskas.

Chairman of the Council of Ministers, I. A. Maniušis.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941 until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 8·5 per cent. each.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after the collapse and partition of Poland in 1939, and recaptured by Soviet forces in 1944). Population 329,000.

IX.—MOLDAVIA

First Secretary of the Party Central Committee, I. L. Bodiyul.

Chairman of the Presidium of the Supreme Soviet, K. F. Ilyashenko.

Chairman of the Council of Ministers, A. F. Diorditsa.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. In 1918, Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians from 1941 to 1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. Moldavians make up 65 per cent. of the population, with Ukrainians, and Russians next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population, 312,000.

X.—LATVIA

First Secretary of the Party Central Committee, A. E. Voss.

Chairman of the Presidium of the Supreme Soviet, J. E. Kalnberzin.

Chairman of the Council of Ministers, V. P. Ruben.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

The Latvians make up 62 per cent. of the Republic's population, Russians 27 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940–41 and again after 1944.

CAPITAL, Riga. Population, 691,000.

XI.—KIRGHIZIA

First Secretary of the Party Central Committee, T. U. Usubaliyev.

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, A. S. Suyumbayev.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936 a Union Republic. It contains one separate province (Osh). The Kirghiz Republic is a mountainous country, the major part being covered by the ridge of the Central Tien-Shan, while mountains of the Pamiro-Alai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. The Kirghiz now constitute only 41 per cent. of the population, the Russians, 30 per cent. The Uzbeks (in Eastern Ferghana) amount to 10 per cent.

CAPITAL, Frunze (formerly Pishpek). Population, 412,000.

XII.—TADJIKISTAN

First Secretary of the Party Central Committee, D. Rasulov.

Chairman of the Presidium of the Supreme Soviet, M. Kholov.

Chairman of the Council of Ministers, A. Kakharov.

The Tadzhik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-

Badakhshan Autonomous Province and the Leninabad Province.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,500 feet), in the centre the high ridges of the Pamir-Altaï system. Plains are formed by wide stretches of the Syr-Darya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadzhikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fifty-three per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), about 23 per cent. Uzbeks, the rest Russians and Tartars.

CAPITAL, Dushanbe (formerly Stalinabad; Dushambe). Population, 341,000.

XIII.—ARMENIA

First Secretary of the Party Central Committee, A. E. Kochinyan.

Chairman of the Presidium of the Supreme Soviet, N. Kh. Arutyunyan.

Chairman of the Council of Ministers, B. A. Muradyan.

The Armenian S.S.R. occupies the southwestern part of Transcaucasia: it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is Mount Ararat (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population, 687,000.

XIV.—TURKMENISTAN

First Secretary of the Party Central Committee, B. Ovezov.

Chairman of the Presidium of the Supreme Soviet, A. Klychev.

Chairman of the Council of Ministers, M. Gapurov.

Turmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains three Provinces (Chardjou, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 61 per

cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL, Ashkhabad (formerly Askhabad, Poltoratsk). Population, 244,000.

XV.—ESTONIA

First Secretary of the Party Central Committee, I. G. Käbin.

Chairman of the Presidium of the Supreme Soviet, A. A. Müürisepp.

Chairman of the Council of Ministers, W. J. Klauson.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941 and 1944, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, woodworking, etc.

The population consists of Estonians (73 per cent.) and Russians (22 per cent.).

CAPITAL, Tallin (formerly Reval). Population, 346,000.

THE VATICAN CITY STATE

(Stato della Città del Vaticano)

Sovereign Pontiff, His Holiness Pope Paul VI (Giovanni Battista Montini), born at Concesio (Brescia), Sept. 26, 1897, elected Pope (in succession to John XXIII), June 21, 1963.

Secretary of State, Cardinal Amleto Cicognani, appointed Aug. 14, 1961.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846–1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City in 1967 was, 1000.

BRITISH LEGATION
(91 Via Condotti, Rome)

Envoy Extraordinary and Minister Plenipotentiary to the Holy See, His Excellency Sir Michael Sanigear Williams, K.C.M.G. (1965) £5,375

*2nd Secretary, J. A. Snellgrove.
Attaché, J. D. Utley, M.V.O.
Archivist, Miss A. Y. Thomas, M.B.E.*

VENEZUELA (La República de Venezuela)

President, Dr. Raúl Leoni, assumed office March 11 1964.

VENEZUELAN EMBASSY IN LONDON
3 Hans Crescent, S.W.1.
(01-584-4206)

Ambassador (vacant).

Chargé d’Affaires, Señor Dr. Alejandro Tinoco.

Secretary, Señor Lic. José de Jesús Osio.

Secretary, Señor Lic. Rafael Grimán.

Secretary, Señor Alvaro Parra-Dávila.

Air Attaché, Col. Federico Schael.

Military Attaché, Col. Pedro Tejera Marquez.

Asst. Naval Attaché, Cdr. Jaime Heli Pirela-Luengo.

Asst. Air Attachés, Maj. Maximiliano Hernández;

Capt. Benito Adolfo Tovar.

Special Attaché, Señora Miriam Blanco-Fombona de Hood.

Consulate-General: 71A Park Mansions, S.W.1.

Minister-Counsellor, Señor Dr. Manuel Villanueva (Consul).

There is also a Consulate-General at Liverpool.

Area and Population.—The most northerly Republic of South America, situated approximately between $1^{\circ} 40'$ S. lat. and $12^{\circ} 26'$ N. lat. and $59^{\circ} 52'-73^{\circ} 15'$ W. long. It consists of one Federal District, 20 states and 2 territories. Venezuela has a total area of 352,051 square miles and a population (estimated, 1967) of 9,189,292, increasing annually at a rate of 3.37 per 1,000.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by Guyana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nueva Esparta*. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela

the small island of *Pálos* (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Mérida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraíma, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parma contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guyana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claimed to have discovered the source of the Orinoco, on Nov. 27, 1951, at $63^{\circ} 15'$ W. long., $2^{\circ} 18'$ N. lat., and about 1,200 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 24 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream). Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. A British scientific expedition travelled in April-May, 1968, by Hovercraft from Manaos in Brazil via the Rio Negro, Casiquiare canal and Orinoco River to Trinidad. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles) about 1,400 ft. above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October the dry, cooler season from November to March.

Government.—On January 23, 1958, the military dictatorship of Colonel Marcos Pérez Jiménez, which had lasted since 1953 and covered a period of remarkable economic expansion due to the Venezuelan oil boom, was overthrown by a popular and military uprising. Since 1958 Venezuela has had a

freely-elected democratic government. In elections in December, 1958, *Acción Democrática* (A.D.) gained a clear majority and Sr. Rómulo Betancourt of A.D. was elected President. For most of his five-year term of office Sr. Betancourt governed in coalition with the Christian Socialist Party, *Copei*. Further national elections were held on December 1, 1963, in which A.D. retained a reduced majority. Dr. Raúl Leoni of A.D. was elected President. The inauguration of the new Government took place on March 11, 1964. Formation of a broad-based coalition government composed of A.D., U.R.D. (*Unión Republicana Democrática*) and F.N.D. (*Frente Nacional Democrático*) was announced on Nov. 5, 1964. The F.N.D. left the Government in 1965 and U.R.D. in April, 1968. National general elections were planned for December, 1968.

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, ground-nuts, potatoes, tomatoes, other vegetables, sisal and tobacco. Although there is an extensive beef and dairy farming industry, the country does not produce all the grain and other food products it requires.

The principal industry is that of *Petroleum*. Annual production of the oilfields had reached a level of 1,292,873,044 barrels (42 gallons) by 1967. Before the war of 1939–45 over 80 per cent. of the crude oil was exported to Netherlands West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardón went into production in February, 1949, and the Creole refinery at Amuay a year later. Other refineries are being operated at Caripito, San Lorenzo, Puerto La Cruz, Tucupito, El Chaire and El Palito. The Venezuelan Government receive about 65 per cent. of the profits of local oil companies. As a result of income tax increases decreed in December, 1958, this percentage was raised to over 70 per cent.

Rich iron ore deposits in Eastern Venezuela are being developed and production was 15,650,000 metric tons in 1964. The government-owned steel mill at Las Matanzas in the Guayana region is now in production. It uses local iron ore and obtains its electric power from the hydro-electric installation on the Caroni River. It produces seamless steel tubes, billets and wire. The production of many more steel products is planned over the next four years.

Other industries include petrochemicals, gold, diamonds and asbestos; textiles and clothing; plastics; manufacture of paper, cement, glass and plate glass; beer and other alcoholic beverages; tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly; preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 23 daily newspapers in Venezuela, of which 8 are published in Caracas, 75 weeklies and 23 fortnightlies. There are also 233 other periodicals, mostly monthlies, but including also some appearing once, twice or three times a week.

Education is free and primary education compulsory from the age of 7 years. There are eight uni-

versities in Venezuela, three in Caracas and the others in Maracaibo, Mérida, Valencia, Ciudad Bolívar and Barquisimeto.

Finance.—Ordinary revenue and expenditure in 1965 and 1966 was as follows:

	1965 (in millions of Bs.)	1966
Revenue.....	7,366·7	7,951·3
Expenditure.....	7,400·3	7,922·9

Currency.—The unit of currency is the gold *Bolívar* of 100 *centimos*. The selling rate for foreign exchange for all purposes is Bs. 4·50=U.S. \$1. The rates for other currencies fluctuate according to their quotations against the U.S. dollar. Importers of wheat and dried powdered milk can obtain a subsidy of Bs. 1·15 per U.S. dollar. There are special buying rates for the proceeds of petroleum, iron ore, coffee and cocoa exports.

Communications.—There are about 22,500 miles of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 650 kilometres. Road and river communications have made railway development of negligible importance in Venezuela except for carrying iron-ore in the south-east. Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with the United States, Central America, South America, the West Indies and Europe. The Venezuelan state-owned merchant fleet has a gross tonnage of about 342,000. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radiotelegraph and radio-telephone services are state-owned. There are one government-controlled and 79 commercial broadcasting stations. There are five television stations in Venezuela (three in Caracas, one in Maracaibo and one in Valencia). The two Caracas commercial television stations have relay transmitters in the interior of the country, Radio Caracas T.V. having five and Venevision three.

	TRADE	
	1965	1966
Imports.....	Bs.5,700,500,000	Bs.12,875,200,000

Exports..... 13,025,700,000 5,243,800,000

The principal imports are machinery, foodstuffs, durable and non-durable consumer goods, iron, steel and chemicals. The principal exports are petroleum and petroleum products (92 per cent. in 1961), iron ore, coffee and cocoa. The value of exports of iron ore in 1963 and 1964 was Bs. 334,000,000 and Bs. 516,800,000 respectively.

	Trade with U.K.	
	1966	1967
Imports from U.K. .	£23,496,000	£21,318,000

Exports to U.K. 58,151,000 68,537,000

CAPITAL.—Caracas (3,000 ft.). Population, Nov. 1967, 2,000,000. Other principal towns are Maracaibo (500,000), Barquisimeto (300,000), Valencia (300,000), Maracay (200,000), San Cristóbal (150,000), Cumaná (120,000) and Ciudad Bolívar (100,000).

FLAG.—Three horizontal bands, yellow, blue, red (with seven white stars on blue band and crest next staff on yellow band). **NATIONAL DAY.**—July 5.

VIETNAM

SOUTHERN ZONE

President, Nguyen van Thieu, appointed June 19, 1965; re-elected Sept. 3, 1967.

Vice-President, Air Vice Marshal Nguyen-cao-Ky.
Prime Minister, Tran Van Huong, appointed May 25, 1968.

Secretary-General, General Pham-xuan-Chieu.

VIETNAM EMBASSY AND CONSULATE

12 Victoria Road, W.8
 [01-937-3765]

Ambassador Extraordinary and Plenipotentiary, His Excellency Le-Ngoc-Chan (1967).

Minister, Nguyen Van An.

Defence Attaché, Lt.-Col. Nguyen Quoc Tuan.

Counsellors, Than Trong Nghia (Cultural and Consular); Diep Quan Hong (Information and Press).
1st Secretary, Phan Trong Quy (Press and Information).

2nd Secretary, Miss Ngo Thi Lien Hoa (Economic and Commercial).

3rd Secretaries, Luu Tuong Quang; Do Duc Hau.

Attachés, Nguyen Xuan Khang; Huynh Cong Minh; Nguyen Van Trt.

The Southern Zone has an area of 66,281 sq. miles. Its population was estimated in 1967 at 26,067,136. Rice and rubber are the chief products. Trade in 1967 (Jan.-Aug) was: Imports £160,000,000; Exports £4,500,000.

Trade with U.K.

	1966	1967
Imports from U.K.	£4,861,000	£3,916,000
Exports to U.K.	1,498,000	1,057,000

Following the devaluation of sterling in 1967 exchange rates for the piastre were: Official rate VN \$192 = £1 and free market rate VN \$283 = £1. The free market rate is used for most transactions, including import and export business.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October 26, and his first act was to declare Vietnam a Republic of which he became the President. An elected constituent assembly became the first Legislative Assembly of the Republic of Vietnam on Oct. 26, 1956. A new national assembly was elected on August 31, 1963, President Diem having been re-elected for a second term of 5 years in April, 1961. On November 1, 1963, the Government of President Diem was overthrown by a military coup d'état during which the President was killed.

General Duong-Van-Minh assumed power as Chairman of the Military Revolutionary Council and Head of State, but the former position was wrested from him on January 30 by General Nguen-Khanh who assumed the function of Prime Minister and on Aug. 17 the Presidency.

The Military Revolution Council was dissolved on August 27, to be followed by the Provisional Steering Committee led by three Army generals. This Committee in turn dissolved on October 26 and on November 4 Tran van Huong became Prime Minister and Phan Khac Suu Head of State.

On December 18, the Armed Forces Council was created under General Khanh and became the real power. On December 20, the A.F.C. dissolved the High National Council and on Jan. 27, 1965, Huong was forced to resign under pressure from the A.F.C. and the Buddhists. On February 16, the A.F.C. nominated Phan Huy Quat as Prime Minister. Then on February 22 General Khan himself was overthrown by a coup d'état and, under the temporary leadership of General Nguyen van Thieu, the A.F.C. lasted only until May 5 before dissolving itself and handing back control of the country to the civilian government under Mr. Quat. The latter, with the Head of State (Mr. Suu) resigned under pressure on June 12 and on June 19, full power reverted to the armed forces in the form of a National Leadership Committee led by General van Thieu. Elections to a constituent assembly were held on Sept. 11, 1966, and a new democratic constitution was promulgated on April 1, 1967. Presidential elections were held on Sept. 3, 1967.

At his presidential inauguration on October 30, 1967, President Nguyen Van Thieu proclaimed the Second Republic of Vietnam. Nguyen Van Loc was appointed Prime Minister and held office from Nov. 7, 1967 until his resignation in May, 1968. By presidential decree a new Cabinet was formed on May 25, 1968, under Mr. Tran Van Huong. The Government of the Republic of Vietnam in Saigon is recognized by the United Kingdom, the United States and other members of the United Nations as the legal government of Vietnam.

CAPITAL.—Ψ Saigon, population (August, 1967), 1,628,184 of which 12,000 were thought to be foreigners. Other principal towns are Ψ Danang (253,022) and Hué (222,315). Saigon and Danang are the main ports.

NATIONAL DAY.—November 1.

BRITISH EMBASSY Saigon

Ambassador Extraordinary and Plenipotentiary, His Excellency Crawford Murray MacLachlan, C.M.G., M.B.E. (1967) £5,375

Military Attaché, Col. B. J. Coombe.

NORTHERN ZONE

President, Ho Chi Minh, assumed office, 1945; re-elected July 15, 1960.

Vice-President, Ton Duc Thang.

Prime Minister, Pham Van Dong (1955).

Minister of Foreign Affairs, Nguyen duy Trinh.

VIETNAMESE WORKERS' (= Communist) PARTY Chairman, Ho Chi Minh.

Politbureau of the Central Committee, Hoang Van Hoan; Le Duc Tho; Hoang Quoc Viet; Le Duan; Le Thanh Nghi; Nguyen Chi Thanh; Nguyen Duy Trinh; Pham Hung; Pham Van Dong; Truong Chinh; Vo Nguyen Giap (full members); Tran Quoc Hoan; Van Tien Dung (alternate members).

Secretariat of the Central Committee, Le Duan (1st); Hoang Anh; Le Duc Tho; Nguyen Van Tran; To Huu; Le Van Luong; Pham Hung.

The Northern Zone (north of the 17th parallel)

has ■ area of approximately 63,000 sq. miles and a population of 19,500,000 (1966). The capital is Hanoi (800,000) and the chief port is Haiphong (367,000). The chief crop is rice, of which the production in 1961 was claimed to be 4,600,000 tons. No figures have been given since. The chief industrial products are coal and cement. The production of apatite (phosphate) is increasing, and with Chinese and Soviet aid some new factories have been built to produce consumer goods.

The régime in the north styles itself the Government of the Democratic Republic of Vietnam, of which the President is Ho Chi Minh. Power is wielded by the *Lao Dong* (or Workers') Party which is Communist in character, and which can exert its influence through another mass organization known as the Fatherland Front (which some years ago superseded the "Vietminh"). The policy of the northern régime is to work for unification of north and south, whilst in the meantime it strives to

remould the political and economic life of the north on Communist lines. A five-year plan started in 1961. Elections to the "Second National Assembly" were held in the north in April 1964. The régime has diplomatic relations with the U.S.S.R., China and other states of the Sino-Soviet bloc, but very few other countries recognize it.

There is a British Consulate General at Hanoi.

THE YEMEN

Council of the Presidency. Qadi Abdul Rahman al-Iriani; Ahmad Muhammad Noman; Muhammad Ali Othman.

Prime Minister, Muhsin al-Aini.

YEMENI LEGATION
41 South Street, W.1
[01-499-5246]

Minister (vacant).

Counsellor (Chargeé d'Affaires), Assayed Abdul Wahab Al-Shamy.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asit and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 5,000,000 (1960). It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range, form the most fertile part of Arabia, with an abundant and regular rainfall.

Trade.—The main exports are coffee, cotton, oil-grains, salt, hides, and raisins. Trade agreements have been concluded with a number of countries. Aden is an important centre for Yemeni exports and imports. The chief port of the Yemen is Ψ Hodeida (Ahmedia) which now has deep water quays, able to accommodate ocean-going vessels.

The ruins of Marib, the ancient Sabean capital and its dam are in the Yemen.

Recent History.—The death of the ruler of the Yemen, Imam Ahmed, on September 19, 1962, was followed by an armed insurrection in Sana'a. His successor, Imam Mohammed, escaped assassination and gathered considerable Royalist support in the country.

A republican government was formed by Col. Abdullah Sallal at Sana'a on September 28, 1962, and a royalist government-in-exile by Prince Hassan, uncle of the Imam, at Jeddah, Saudi Arabia. The royalist party has since received the support of Saudi Arabia and Jordan, while the republican government was supported by the United Arab Republic, whose air and ground forces in the Yemen were reported to have reached a total strength of 70,000 by 1965.

Inconclusive conferences among the parties concerned were held at Khamer, near Sana'a, at Jeddah and at Harad, on November 23, 1965, when a royalist party sent a delegation led by Ahmed al Shami, its Foreign Minister. The Harad Conference ended, without reaching agreement, on December 24, 1965, and later talks were held between Egyptian, Saudi Arabian and Yemeni leaders.

With the withdrawal of U.A.R. forces from the country well advanced, the President was deposed on Nov. 5, 1967, and a 3-member Presidency Council took power with the backing of the Yemen Army (see above). Muhsin al-Aini was named Prime Minister.

CAPITAL.—Taiz (pop. about 20,000); Sana'a has about 60,000 inhabitants. Other cities of the Yemen are Ψ Hodeida, Ibb, Mocha and Beidha.

FLAG.—Horizontal bands of red, white and black, with 5-point green star in centre of white band. (Adopted Dec., 1962).

BRITISH LEGATION
(No representation in Yemen.)

YUGOSLAVIA

(Socijalistička Federativna Republika Jugoslavija)

President of the Republic, President of the League of Communists of Yugoslavia, Chairman of the National Defence Council and Supreme Commander of the Armed Forces, Josip Broz Tito, assumed office, Jan. 14, 1953, re-elected for 4 years, 1954, 1958, 1963 and May 17, 1967.

President of the Federal Assembly, Milentije Popović.
President of the Federal Executive Council, Mika Spiljak.

President of the Socialist Alliance of the Working People of Yugoslavia, Rato Dugonjić.

Vice-Presidents of the Federal Assembly, Filip Bajković; Dr. Marjan Breclj; Blazo Djuričić; Džavid Nimani; Gustav Vlahov; Dr. Miloš Zanko.

Vice-Presidents of the Federal Executive Council, Kiro Gligorov; Rudi Kolak.

Secretary of the Federal Executive Council, Rajko Gagović.

Foreign Affairs, Marko Nikežić.

Defence, Nicola Ljubičić.

Internal Affairs, Radovan Stijačić.

Finance, Janko Smole.

Economy, Dr. Borivoje Jelić.

Foreign Trade, Dr. Vasil Grivčev.

President of the Constitutional Court, Blazo Jovanović.

LEAGUE OF YUGOSLAV COMMUNISTS

President, Josip Broz Tito.

Predium of Central Committee, J. Broz Tito; V. Bakarić; J. Blažević; K. Crvenkovski; Mrs. S. Dabčević; R. Dugonjić; I. Gošnjak; F. Hodža; A. Humo; A. Japović; B. Jovanović; O. Karabegović; E. Kardelj; R. Kolak; L. Količevski; M. Marinčić; C. Mijatović; I. Maček; D. Pajković; D. Petrović; K. Popović; M. Popović; V. Popović; D. Pučar; D. Radosavljević; N. Sekulić; V. Smilefski; P. Stambolić; Mrs. L. Šentjurc; P. Sotić; M. Spiljak; B. Temelkovski; J. Veselinov; V. Vlahović; S. Vukmanović.

Executive of the Central Committee, R. Albreht; S. Bijelić; M. Cvjetković; N. Dizdarević; K. Hadživasilev; D. Kekić; S. Miroslavlevski; M. Pekuljić; M. Ribić; B. Soskić; M. Todorović.

(The Yugoslav League of Communists has no Secretariat of the Central Committee.)

YUGOSLAV EMBASSY IN LONDON

25 Kensington Gore, S.W.7

[or—589-3400]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ivo Sarajčić (1966).

Minister-C Counsellor, Vojislav Pekić.

Counsellors, Vinko Trumbić (Economic); Milan Zupan (Press); Mita Matevski (Consular).

1st Secretaries, Boštjan Barborič; Bosko Srđanov (Press and Cultural Affairs).

Defence Attaché, Col. Branco Kobali.

Asst. Defence Attaché, Cdr. Zvonko Kostic.

2nd Secretary, Dragoljub Kontic.

Attaché, Božidar Gicev.

Consulate, 19 Upper Phillimore Gardens, W.8.

Area and Population.—Yugoslavia is a Federation comprising the Socialist Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the autonomous province of the Vojvodina and the autonomous region of Kosovo and Metohija (Kosmet). In July, 1946, Pelagoša and adjacent islands with all territory east of the line known as the French Line in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria) Piran (Pirano) and Novi Grad (Cittanova). The area has now been divided between the Republics of Slovenia and Croatia. The area of Yugoslavia is

estimated at 255,804 square kilometres (98,725 square miles) and the population in 1967 at 20,958,000. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Government.—On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupshtina and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

On April 7, 1963, a new Constitution was proclaimed under which the official name of the country was changed to "The Socialist Federal Republic of Yugoslavia." The existing two Councils of the Federal Assembly were replaced by five Chambers of 120 members each (Federal Chamber, Economic Chamber, Educational-Cultural Chamber, Social Welfare and Health Chamber, and Organizational/Political Chamber), plus a Chamber of Nationalities of 70 members. A Constitutional Court was created. Elections to the new Federal Assembly were held in 1963 and in April, 1967.

Defence.—The Army, Navy and Air Force on a peace footing consist of 289,000 officers and men.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. The 1953 Census revealed that 2,127,875 of the population were without religion, 6,984,686 were Orthodox, 5,370,760 Catholic, 157,702 Protestant, 61,274 other Christians, 2,090,380 Moslem, 2,565 Jews, 495 other non-Christians, 10,096 undecided and 130,740 unknown. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1966 there were 14,146 elementary schools with 102,057 teachers and 2,945,520 pupils and 2,886 secondary schools (including adult and special schools) with 33,338 teachers and 665,890 pupils. In addition, in the 1966-67 academic year there were 14 art academies with 500 teachers and 2,031 pupils, 16 high schools with 767 teachers and 7,167 pupils, and

141 higher schools with 3,880 teachers and 75,408 pupils. There are seven universities: Belgrade, Zagreb, Ljubljana, Sarajevo, Skopje, Novi Sad and Niš, with 97 faculties, 15,675 teachers and 109,757 students.

Language and Literature.—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South-Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Roumanian, Albanian, Italian, Slovak and Ruthenian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 4 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana (Ljubljana), 2 Croat dailies in Zagreb, 2 dailies in Novi Sad, one in Hungarian, 2 dailies in Rijeka, one in Italian and daily papers at Skopje, Sarajevo, Priština, Split, Maribor and Osijek.

Production and Industry.—About 65 per cent. of the population is engaged in agriculture, although in recent years industry has expanded rapidly and industrial production has grown sevenfold since 1939. Recent emphasis has been on the integration of small industrial enterprises into more efficient complexes. In agriculture the main emphasis is on increased investment in mechanization and fertilizers in the large socially-owned agricultural combines but now the private sector is being encouraged to mechanize and become more efficient and small size tractors, farm machinery and implements are being supplied.

The main crops are wheat and maize, of which the yields in 1967 were 4,820,000 and 7,290,000 tons respectively. The forest areas produced 17,065,000 cubic metres of timber in 1967. According to Yugoslav official estimates, the livestock population at the beginning of 1968 was approximately as follows: cattle, 5,710,000; sheep, 10,329,000; pigs 5,525,000; poultry, 25,153,000. Minerals are an important source of wealth, particularly in the central and south-eastern regions. Estimated production in 1967 included the following ('000 tons) Hard coal 908; brown coal 9,023; lignite 16,535; electrolytic copper 66; refined lead 94; iron ore 2,580; pig iron 1,177; steel (total) 1,832; aluminium 45; zinc 53; mercury 545 and crude petroleum 2,374.

FINANCE Federal Budget (estimated figures).

	1966	1967
	Dinars	Dinars
Revenue.....	867,700,000	9,785,000
Expenditure.....	856,159,000	9,683,440

Since Nov. 21, 1967, the rate of exchange has been 30 dinars = £1 (see also p. 84).

Communications.—In 1967 there were approximately 8,513 miles of standard and narrow gauge railway and approximately 49,007 miles of roads of widely varying quality. There were also 490,000 telephones in use in the country. The principal ports on the long Adriatic seaboard of Yugoslavia are Rijeka, Šibenik, Split, Zadar, Ploče, Dubrovnik, Bar, Kotor (Carrara) and Koper. A new port is still under construction at Bakar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

Trade with U.K.

	1966	1967
Imports from U.K.....	£26,907,000	£22,855,000
Exports to U.K.....	13,298,000	15,675,000

The chief exports to the United Kingdom ■■■

meat and meat products, furniture and timber. The main imports from the United Kingdom are machinery of all kinds, iron and steel, chemicals, wool tops and metal manufactures.

CAPITAL.—Belgrade, population (Greater Belgrade, 1965) 963,000. Other towns are Zagreb (Greater 869,000); Skopje (288,000); Ljubljana (242,000); Sarajevo (199,000); Novi Sad (167,000); Maribor (163,000); Split (145,000); Rijeka (141,000).

FLAG.—Five-point red star outlined by narrow yellow stripe, on a ground of three horizontal bars, blue, white and red. NATIONAL DAY.—November 29.

BRITISH EMBASSY

Generala Ždanova 46, Belgrade.

Ambassador Extraordinary and Plenipotentiary, His Excellency Terence Willcocks Garvey, C.M.G. (1968) £6,300 Counsellors, A. J. Wilton, C.M.G., M.C.; J. A. Molyneux (Economic and Commercial).

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Dept. of Employment and Productivity (in Northern Ireland any local office of the Ministry of Health and Social Services). Applications for passports required in less than ten days should not be taken to such local offices.

London.—Clive House, Petty France, S.W.1.

Liverpool.—India Buildings, Water Street, Liverpool, 2.

Newport, Mon.—Olympia House, Dock Street.

Peterborough.—Post Office, Peterborough.

Glasgow.—14 Princes Square, 48 Buchanan Street, Glasgow, C.1.

Hours. The above offices are open Mon.-Fri. 9 a.m. to 4.30 p.m. The Passport Offices are also open for cases of special emergency only, between 4.30 p.m. and 5.30 p.m. (6.30 p.m. in London); Saturdays 10.00-12.00, and in London on Sundays and Public Holidays between 10 a.m. and noon (except Christmas Day).

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Dept. of Employment and Productivity Local Offices, completed forms of applications should be sent to one of the five Passport Offices, with photographs, supporting documents and the fee of £2. Remittances sent with postal applications should be in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office. Notes or postage stamps should not be sent in payment.

Persons resident in Northern Ireland may apply in person to the Foreign Office Passport Agency, 1 May Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest British Passport issuing authority.

Foreign Office Passports are granted:—

- (i) To citizens of the United Kingdom and Colonies.
- (ii) To British subjects without citizenship.

Defence Attaché, Col. D. H. Aubrey-Smith, M.B.E.
Naval and Air Attaché, Wing-Cdr. M. F. J. Matthews, A.F.C.

1st Secretaries, J. C. Thomas (Information); K. H. M. Duke; D. M. Harrison (Consular); H. M. Shone (Visa); C. Marshall, O.B.E. (Labour); D. K. Urquhart (Commercial).

3rd Secretaries, P. E. L. Jackson (Commercial); D. T. Healy; Miss M. R. Page; A. Morgan and J. Easton (Consular).

Attachés, K. Goodwin; B. P. Pullen.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Belgrade, Zagreb and Split.

British Council Representative, Dr. P. A. I. Tahourdin, O.B.E., Generala Ždanova 34, Belgrade. There is also a centre at Zagreb.

(iii) To British Protected Persons.

Passports are available for ten years unless otherwise stated. They are not available beyond ten years from the original date of issue. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the holder's wife is not available for the wife's use when she is travelling alone. A wife's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. Their applications must be signed by one of their parents.

The application must be countersigned by a Member of Parliament, Justice of the Peace, Minister of Religion, Doctor, Lawyer, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by one of the parents on form (B).

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are generally available for travel to all countries. The possession of a Passport does not, however, exempt the holder from compliance with any Immigration Regulations in force in British or foreign countries, or from the necessity of obtaining a visa where required.

PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on thin paper and must not be glazed on the reverse side. They should measure not more than 2½ in. by 1 in. or less than 1 in. by 1½ in., and should be taken full face without a hat.

RENEWAL OF PASSPORTS

Applications for the renewal of Foreign Office passports must be made on Form D.

British Visitors' Passports

A simplified form of travel document is available for British subjects* (Citizens of the United Kingdom and Colonies) wishing to pay short visits (not exceeding three months) to certain foreign

* See Legal Notes.

countries, *viz.*

ANDORRA; AUSTRIA; BELGIUM; DENMARK†; FINLAND†; FRANCE (incl. CORSIKA); GREECE (& THE GREEK ISLANDS); W. GERMANY (incl. West Berlin by air only); ICELAND; ITALY; LIECHTENSTEIN; LUXEMBURG; MONACO; NETHERLANDS; NORWAY†; PORTUGAL (incl. MADEIRA & AZORES); SAN MARINO; SPAIN (incl. BALEARIC & CANARY ISLANDS); SWEDEN†; SWITZERLAND; TURKEY.

†Length of stay restricted to three months in any nine months in Nordic Group Countries (including Finland and Iceland) as a whole. Holders may also pay short visits to Canada, Gibraltar and Malta. A British Visitor's Passport must be valid for three months beyond the last day on which the visitor will be in Canada.

A fee of 7s. 6d. is charged for the issue of a British Visitors' Passport, which is valid for 12 months, cannot be amended and is not renewable; on expiry application should be made for a new passport if required. Particulars of an applicant's wife and/or children under 16 years can be included at the time of issue only at no extra cost. A child of 8 years of age and over is eligible to hold a British

Visitors' Passport. Applications for, or including, a person under 21 years of age (unless married or serving in H.M. Forces) must be countersigned by the legal guardian.

British Visitors' Passports are obtainable by application on Form VP (from any local office of the Dept. of Employment and Productivity and from the Passport Office or Branches). Applicants in England, Scotland and Wales should take the completed form in person to any local office of the Dept. of Employment and Productivity which will normally issue the passport without further delay; applicants in Northern Ireland to any local office of the Ministry of Health and Social Services. *British Visitors' Passports are not obtainable from the Passport Offices.* Two recent passport photographs will be required, of the applicant and of his wife if to be included; photographs of children are not required. Size of photographs must be 2 in. x 1½ in. (see also PHOTOGRAPHS above). No visas are required on British Visitors' Passports.

Applicants must also produce for the purpose of identification a N.H.S. Medical Card, birth certificate or retirement pension book.

EUROPEAN COMMUNITY

The ECSC, Common Market and Euratom share a single institutional framework: ■ Commission, Council of Ministers, Parliament and Court of Justice. The core of the Community policy-making process is the 'dialogue' between the Commission, which initiates and implements policy, and the Council of Ministers, which takes major policy decisions. The beginnings of democratic control are exercised by the European Parliament, while the Court of Justice ensures the rule of law and is the final arbiter in all matters arising from the Community Treaties.

Since the start of the Common Market and Euratom in 1958, the Parliament and Court of Justice have been common to all three Communities. Up to July, 1967, each Community had its own executive body (the EEC and Euratom Commissions, and the ECSC High Authority) and its own Council of Ministers.

In April, 1965, the Six signed a treaty providing for the merger of the three executive bodies in a single Commission and the three Councils in a single Council, with a view to the eventual merger of the three Communities themselves. The merger treaty came into force on July 1, 1967; the single Commission and single Council then took office. They enjoy the same powers under the three Community Treaties as did their predecessors.

The Commission

The Commission consists of 14 members—three each from Germany, France and Italy, two from the Netherlands and Belgium, and one from Luxemburg. Within three years of the July, 1967, merger their number is to be reduced to nine. The members of the Commission are appointed by agreement among the six member governments for a four-year renewable term; the president and vice-presidents are appointed from among the members for a two-year term, also renewable.

The members of the Commission are pledged to independence of the governments and of national or other particular interests. They accept joint responsibility for their decisions, which are taken by majority vote.

In addition to being the initiator of Community action and having specific powers, the Commission acts as a mediator between the member governments in Community affairs and is the guardian of the Community Treaties.

Commission of the European Communities 23-27 Avenue de la Joyeuse Entrée, Brussels 4.

President, Jean Rey (Belgium).
Vice-Presidents, S. Mansholt (Netherlands); L. Levi Sandri (Italy); F. Hellwig (Germany); R. Barre (France);

Members, A. Coppé (Belgium); G. Colonna di Paliano (Italy); H. von der Groeben (Germany); H. Rochereau (France); E. Sassen (Netherlands); V. Bodson (Luxemburg); J.-F. Deniau (France); W. Haferkamp (Germany); E. Martino (Italy).

The Commission maintains information offices in London (23 Chesham Street, S.W.1), Washington (808 Farragat Building, 900 17th Street, N.W., D.C. 20006), New York (2207 Commerce Building, 155 East 44th Street, N.Y. 10017) and in other cities.

The Council of Ministers 2 Rue Ravenstein, Brussels 1.

This consists of ministers from each member government, the ministers concerned depending on the subject under discussion. It is the Community's main decision-taking body but its authority is not as great in ECSC matters as in those relating to the Common Market and Euratom. For coal and steel, decisions are usually by majority vote; on Common Market and Euratom matters decisions usually had to be unanimous in the early stages, but most decisions can now be taken by a qualified majority vote. For certain vital questions, however, unanimity is still required. (Admission of new members is not decided by the Council, but by a unanimous decision of the member governments.) Although the Council is the Community's ultimate decision-taking body, in almost all cases it can act only on the basis of proposals submitted by the Commission. The meetings of the Council are prepared by a committee of permanent representatives of the member states.

European Parliament Secretariat: Centre Européen, Kirchberg, Luxembourg.

The European Parliament consists of 142 members nominated by the national parliaments of the member countries—36 members each from France, Germany and Italy, 14 each from Belgium and the Netherlands and 6 from Luxemburg. Set up under the terms of the ECSC Treaty of 1952, its authority

was extended by the Treaty of Rome 1957 to cover also the European Economic Community and Euratom. The Parliament must be consulted on all major issues and can force the dismissal of the Commission by a vote of no-confidence. The Treaty provides for its direct election and a scheme for this was drawn up by the Parliament in May, 1960. So far no decision on this project has been taken. The members of the Parliament have formed four political groups—Socialist (33 members in May, 1968), Christian Democrat (60), Liberal (25), and European Democratic Union (16).

President, Alain Poher (French Christian Democrat) (1966).

European Court of Justice

12, Rue de la Côte d'Eich, Luxemburg.

The European Court superseded the Court of Justice of ECSC and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide on the legality of decisions of the Council of Ministers or the Commission and to determine violations of the Treaties. Cases may be brought to it by the member States, the Community institutions, firms or individuals. Its decisions are directly binding in the member countries. The seven judges of the court are appointed by the member Governments in concert and hold office for 6 years, being eligible for re-appointment.

Judges, R. Lecourt; W. Strauss; R. Monaco; A. Trabucchi; A. M. Donner; J. J. Mertens de Wilmars; Pierre Pescatore.

Advocates-General, K. Roemer; J. Gand. Registrar, A. Van Houtte.

EUROPEAN COAL AND STEEL COMMUNITY

Member States.—France, the German Federal Republic, Italy, Belgium and Luxemburg, and the Netherlands.

This, the first of the European Communities, was established in 1952. Since then it has abolished for coal, steel, iron ore and scrap, customs duties, quantitative restrictions, the dual pricing system whereby prices charged on exported coal or steel differed from those charged to home consumers, currency restrictions and discrimination in transport rates based on the nationality of customers and the special frontier charges which made international transport of these goods within the Community dearer than transport within national frontiers. It has applied rules for fair competition and a harmonised external tariff for the whole Community.

In the period 1952 to 1967 Community steel production rose rapidly from 42·9 to 90 million tons. The coal industry, however, after expanding initially in conditions of acute energy shortage, found that a growing share of the energy market was being won by oil. The task of the ECSC thus came to be to ensure the orderly retreat of coal at a price which would avoid social or economic dislocation. So far, since the start of the crisis in 1957, the Community's coal industry has lost a third of its labour force. The ECSC has been especially active in meeting the social problems raised by such changes. Its adaptation aid from 1953 to end-1967 amounted to \$94 million and was matched by an equivalent contribution from the six governments. It has also made grants and loans for industrial redevelopment, increasing this activity sharply during the coal and steel crises of 1967. Its housing programmes are helping to provide 100,000 houses for coal and steel workers.

Decisions of the European Commission in ECSC matters are directly binding on the industries concerned. The Commission now supervises the

smooth working of the common market in ECSC products, ensures that the Treaty rules of fair competition are observed, stimulates investment and research, and aids workers threatened with unemployment. The merger of the three Communities' Executives in July, 1967, is expected to bring particular benefits in permitting the co-ordination of energy policy, hitherto a field for which responsibility was divided between the ECSC (coal), EEC (oil and natural gas) and Euratom (nuclear energy).

EUROPEAN ECONOMIC COMMUNITY (THE COMMON MARKET)

Discussions were held at Messina, Sicily, in 1955 between the foreign ministers of the six member states of ECSC (see above) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. The Common Market is being established during a transition period of twelve years. The Treaty provides for the elimination of customs duties and quotas in trade between member states; the establishment of a common customs tariff and a common trade policy towards third countries; the abolition of the obstacles to free movement of persons, services and capital between member states; the inauguration of common policies for agriculture and transport; the establishment of a system ensuring that competition shall not be distorted in the Common Market; the coordination of economic policies; the harmonization of social and economic legislation to the extent necessary in order to enable the Common Market to work; the creation of a European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living; the establishment of a European Investment Bank intended to aid investment in underdeveloped areas and help to finance modernization; and the association of overseas countries and territories with the Community with a view to increasing trade and to pursuing jointly their effort towards economic and social development.

To date, this programme has been put into effect as follows:

Reduction of trade barriers.—A first 10 per cent. reduction in customs duties between member countries took place on January 1, 1959. Decisions taken by the Council of Ministers in May, 1960, and July, 1963, resulted in a speeding up of the rate of tariff cutting. On May 11, 1966, the Council of Ministers agreed that the abolition of internal duties should be completed on July 1, 1968—18 months ahead of the planned date. Quota restrictions on trade within the Common Market were completely removed on January 1, 1962.

E.E.C. Trade with U.K.

	1966	1967
Imports from U.K.	£957,023,000	£963,650,000
Exports to U.K..	1,103,509,000	1,265,056,000

Common external tariff.—The Common Market has a common external tariff which came fully into effect on July 1, 1968. A first 30 per cent. move of notional duties towards the common external tariff was made at the end of 1960, on the basis of a notional common tariff reduced by 20 per cent. A second 30 per cent. move towards the common tariff took place on July 1, 1963.

In international tariff and trade negotiations in the GATT framework (such as the Kennedy

Round), the Community is represented by the Commission, which negotiates under a mandate from the Council of Ministers.

Trade between the member countries of the Common Market increased in value by 256 per cent. to \$24,200,000,000 during the first years of its history (1958-67). Community trade with the rest of the world rose by 94 per cent. in the same period.

Free movement of labour.—Freedom of movement for workers has been achieved within the Common Market, and those who work in member countries other than their own are ensured of rights equal to those of local workers, and of full transferability of social security benefits. They enjoy equal treatment in applying for jobs and receive priority over workers from non-member countries. There is, however, a shortage of trained labour in all Community countries at present.

Services.—The right of Community firms to establish businesses in member countries other than their own is being progressively freed, as is the right of Community citizens to engage in professional activities in member countries other than their own. In parallel with this programme, the harmonization of professional qualifications is being achieved.

Capital.—So far unconditional and complete freedom of movement has been achieved for direct investments, transfers of personal funds and emigrants' remittances, short and medium term commercial loans and the buying and selling of stocks and shares. For other transactions, such as capital issues, there is conditional liberalization. Progress is being made towards equalizing access to domestic capital markets within the Six.

Rules for Fair Competition.—The Common Market Treaty bans agreements which prevent, restrain or distort competition and, in particular, price-fixing, market-sharing, restriction of production or of technical development and discriminatory supply conditions if they are likely to affect trade between member states. The abuse of a dominant position in the market by a firm or firms is also banned. Implementing regulations adopted by the Council have caused some 36,000 restrictive agreements to be registered with the Commission. Decisions banning or authorizing particular agreements have begun to be taken, and a body of case-law is being established.

Agriculture.—The basic machinery for a common organization of agricultural markets throughout the Community was established by decision of the Council of Ministers in January 1962. It involved the setting of target prices, support buying, levies on imports, and export rebates. Community funds can be allotted for the modernization of farming and the improvement of agricultural productivity in the Community. The common agricultural policy came into effect in July, 1962, for grains, eggs and poultry, pigmeat, fruit and vegetables, and wine. It was extended in September, 1964, to rice, and in November 1964 to beef, veal, and dairy produce, thus covering 90 per cent. of total Community agricultural output.

Under a decision reached in December, 1964 common price levels throughout the Community came into effect in July, 1967, for grains, pigmeat, and eggs and poultry. Further decisions taken on July 24, 1966, established common marketing regulations and common price levels for fruit and vegetables, sugar, dairy produce and fats and oils; to come into force between July 1, 1967, and July 1, 1968. On July 24, also, common price levels were fixed for beef and veal, milk and other dairy produce.

On July 1, 1967, grains, pigmeat, eggs and poultry reached the full single-market stage, thus bringing half the Community's farm production

under the common agricultural policy's marketing and financial provisions. On May 29, 1968, the Six agreed on the pricing system for dairy produce and beef and veal in the single-market stage from July 1, 1968, having failed to agree by the original planned date of May 1. The Ministers of Agriculture did not accept the Commission's recommendation that the common prices for milk and butter be reduced in order to diminish the Community's mounting surplus of butter; they did, however, agree on measures to limit the common commitment to finance the dairy policy and to maintain differential prices between some member states as a temporary measure.

A progressively greater part of the cost of the agricultural policy is borne by the Community's Agricultural Guidance and Guarantee Fund, which will take over the full cost by January 1, 1970 from joint Community funds. The funds required are contributed from national budgets, partly in proportion to national receipts from the levy system. From July 1, 1967, 90 per cent. of income from the import levies goes to the Fund, meeting about 45 per cent. of its total needs; the remaining 55 per cent. will be covered, until 1970, by contributions from the member Governments. At the end of the Common Market's transitional period in 1970, all agricultural levies will go direct to the Community to help finance the common farm policy.

Economic Policy.—Member States are required by the Treaty to consider their economic policies as matters of common interest, and to consult with each other and the Commission in order to concert these policies. The Commission undertakes annual economic forecasts, quarterly economic surveys, and monthly business surveys to help towards this end. A strong tradition of consultation between those responsible for economic policy in the member countries has been established. A Monetary Committee bringing together senior officials from national treasuries and central banks has met regularly since 1959 to discuss Community monetary and economic problems. Similar Committees on Short Term Economic Policy and Budgetary Policy have been established, as has a Committee of Governors of Central Banks, and a Committee on Medium Term Economic Policy, which in May, 1966, published its first 5-year programme, covering the period 1966-1970; this programme was adopted by the member states in February, 1967. In April 1964, the Council of Ministers adopted for the first time a series of recommendations to member governments on short term economic policy to meet the current threat of inflation in the Community. Steps are being taken to harmonize the tax policies of the member states. In February, 1967, the Council agreed to adopt a single system of added-value tax from 1970 with the harmonization of the applicable rate to be introduced later. In June, 1967, the E.E.C. Commission published a draft plan for the harmonization of direct taxes on debenture interest and dividend.

Transport.—The Treaty aims to establish a common policy on transport, with common rules for international transport within the Common Market, covering road, rail and inland water transport. Rates for freight which discriminate as to the national origin or destination of goods transported are to be eliminated within the transitional period. In June, 1965, the Council adopted a Commission proposal setting out the principles of a common policy to be put into force by the end of the transition period. The member governments did not agree on the implementation of these principles, but late in 1967 and early in 1968 a number of steps were agreed, on controlling social and economic conditions in intra-Community

transport, especially road-haulage. Other measures covering railways were due to be presented by the Commission later in 1968.

Social Policy.—Under the Treaty, member states agree upon the necessity to promote improvement of the living and working conditions of labour so as to permit the equalization of such conditions in an upward direction. They also cooperate closely on matters relating to employment, labour legislation and working conditions, occupational training, social security, industrial accidents and diseases, industrial hygiene and trade union law. Equal pay for men and women is also required and a regulation was agreed in December, 1961, by which all discrimination was to be abolished by the end of 1964. The Commission's most important instrument of social policy is the European Social Fund which promotes employment facilities and the mobility of workers within the community by means of vocational retraining, resettlement and other aids. It provides 50 per cent. of expenditure undertaken by the Six governments in the productive re-employment of workers.

Regional development policy. Proposals have been made by the Commission for an overall policy on regional development in the Community. A major instrument of this policy is the European Investment Bank with a capital of \$1,000 million, which aids investment in the Community's under-developed regions and helps modernization projects or new activities of general Community interest.

The Community's external relations.—Association agreements were signed with *Greece* in July, 1961, and with *Turkey* in September, 1963. The agreement with Greece provides for the establishment of a customs union over a transitional period of 20 years and leaves open the possibility of Greece becoming a full member of the Community when she is able to accept the economic obligations of membership. The agreement with Turkey provides for a preparatory period, during which Turkey will receive economic aid and trade benefits from the Community before any move towards a customs union is made. The Community has also concluded non-discriminatory trade agreements with *Iraq* and *Israel*, and an agreement on trade and technical assistance with the *Lebanon*. Negotiations for association or trade agreements are in progress with *Morocco*, *Tunisia* and *Algeria*. Negotiations on Austria's request for association began in May, 1965. In April, 1967, the Council of Ministers agreed on a mandate for the Commission to open negotiations with Spain with a view to introducing a preferential trade agreement between her and the Community.

An association agreement, concluded on the basis of equality, was signed at Yaoundé, Cameroon, in July, 1963, by the member countries of the Community and 18 independent African states. It replaced an earlier association negotiated at the time of the Rome Treaty, and will run until 1969. Under the agreement, Community tariffs on exports from the associated countries are being gradually abolished. In return, these countries are gradually removing their tariffs on Community exports, but can still take steps to protect infant industries. The Community is providing \$730,000,000 in aid over the five years 1963-1968. (\$580,000,000 was provided under the first 5-year agreement.) The association has a Ministerial Council and a parliamentary body linking members of the European Parliament and the Parliaments of the associated countries. An agreement establishing an association between the Community and Nigeria was signed in Lagos on July 16, 1966.

In the autumn of 1961, after consultation with

members of the British Commonwealth, the United Kingdom Government requested the opening of negotiations with a view to Britain's becoming a member of the European Community. The Irish Republic, Denmark and Norway also sought membership, and Austria, Sweden, Switzerland, Spain and Cyprus sought association with the Community. Negotiations terminated in January, 1963, after General de Gaulle made it plain that France was opposed to British entry. In May, 1967, the United Kingdom, Ireland and Denmark formally submitted applications for Community membership. In July, Norway applied for membership and Sweden announced that it would seek the enlargement of the Community on terms compatible with its neutrality. In December, 1967, the French Government did not agree with its partners' acceptance of the Commission's recommendation that negotiations with U.K. and the other applicants should be opened.

Budget of EEC.—Contributions to the Budget of EEC were fixed in the following proportions: France, Italy and German Federal Republic, each 28 per cent.; Belgium and the Netherlands, each 7·9 per cent.; Luxembourg 0·2 per cent. The size of the budget is decided annually by the Council of Ministers.

EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM)

A second treaty, arising from the Messina discussions between the ECSC powers on additional means of co-operation, was signed in Rome on March 25, 1957, setting up the European Atomic Energy Community. The task of Euratom, defined in detail in the Treaty, is to create within a short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on a large scale. Other sections of the Treaty cover the establishment and growth of nuclear industries, the procurement, ownership and control of nuclear materials matters affecting health and safety, including training, and external relations, the stimulation of scientific research and the training of specialists, to assure through a Supply Agency adequate supplies of nuclear fuels, the supervision of the nuclear common market, inspection and control of the use of fissile material, and the safeguarding of both workers and the population at large by laying down basic standards for the protection of health.

BRITISH AMBASSADOR TO THE EUROPEAN COMMUNITY

28 rue Joseph II, Brussels 4.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir James Alexander Milne Marjoribanks, K.C.M.G. £6,300

EUROPEAN FREE TRADE ASSOCIATION (EFTA)

Following the unsuccessful attempt to create a European Free Trade Area linking the E.E.C. with other members of the O.E.E.C., seven European states—Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom—came together in 1959 to form the European Free Trade Association. The E.F.T.A. Convention became effective on May 3, 1960, and just over a year later, on June 26, 1961, Finland became an associate member. The Faroe Islands, sponsored by Denmark, were included in the EFTA area from January 1, 1968.

The Convention defines the objects of the Association as (1) to promote economic expansion

in the area of the Association and in each member state; (2) to ensure that trade between member states takes place in conditions of fair competition; (3) to avoid significant disparity between member states in the conditions of supply of raw materials produced within the area; and (4) to contribute to the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Members agreed to reduce progressively their tariffs on imports of industrial goods originating in the Area with a view to their complete elimination by January 1, 1970. They also undertook to abolish quantitative restrictions on imports of goods from the free trade area. Provision was made for alterations in these timetables and in May, 1963, when tariffs had been reduced to 50 per cent. of the original rates, members agreed to bring forward the date when tariffs and quotas would be finally eliminated to December 31, 1966. Since that date therefore the member countries of the Association have constituted a complete industrial free trade area. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. The Convention includes rules governing the origin of goods manufactured in the area. It also contains provisions relating to the "rules of competition"—government subsidies, restrictive business practices, etc. There are special provisions relating to trade in agricultural and fish products.

E.F.T.A. Trade With U.K.

	1966	1967
Imports from U.K.	£739,618,000	£758,333,000
Exports to U.K.	£839,811,000	£941 456,000

The Council of EFTA consists of one ministerial or official representative from each member country. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries.

*Secretary-General, Sir John Coulson, K.C.M.G. (U.K.),
32 Chemin des Colombettes, Geneva.*

THE COUNCIL OF EUROPE

Headquarters: Strasbourg, France 67.

Secretary-General, P. H. B. O. Smithers.

A European organization founded in 1949 whose aim is to achieve a greater unity between its Members to safeguard their European heritage and to facilitate their economic and social progress.

The aim of the Council is pursued through discussion and common action in economic, social, cultural, educational, scientific, legal and administrative matters and in the maintenance and further realization of human rights and fundamental freedoms.

The following 18 countries belong to the Council: Austria, Belgium, Cyprus, Denmark, France, the Federal Republic of Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Sweden, Switzerland, Turkey and the United Kingdom.

The organs are the Committee of Ministers, consisting of the Foreign Ministers of member countries; the Consultative Assembly of 247 members, elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties; the Joint Committee of Ministers and Members of the Assembly.

The Committee of Ministers is the executive organ of the Council. Its conclusions may take the form of international conventions or of recommen-

dations to Governments. On many major matters the Committee votes by unanimity. Nevertheless, abstention is permitted and decisions of the Ministers may then take the form of partial agreements. The Ministers may meet at the level of Deputies empowered to take all decisions which they do not wish to reserve for Ministers of Foreign Affairs. Since 1952, member governments have accredited permanent representatives to the Council in Strasbourg and these Representatives combine their task with that of the Ministers' Deputies.

The Committee holds organized political consultation in the light of recommendations received from the Assembly. The Consultative Assembly may debate all matters with the exception of defence. Its findings may take the form of recommendations addressed to the Committee of Ministers. Ministers, including Ministers other than those for Foreign Affairs, may address the Assembly and take part in its debates.

The Assembly holds three week-long sessions a year. The Chairman in office of the Committee of Ministers submits a report at each Session.

The Assembly also debates reports received annually from the O.E.C.D., other European organizations, and the specialized agencies of the United Nations. It holds an annual joint meeting with the members of the European Parliament of the 'Six'. The Joint Committee permits the Ministers and the Assembly to discuss matters of mutual interest and endeavours to achieve harmony where doubt exists. It acts by consultation and not by vote.

The Council's Budget is voted annually in December and is met by agreed contributions of member countries.

Among the principal achievements of the Council of Europe are the European Convention on Human Rights, 1950; the European Cultural Convention, 1953; and the European Social Charter, 1960. Other conventions cover social insurance, equivalence of European diplomas for university entrances, equivalence of University degrees, public health, patents, travel without passports, hotelkeepers' liability, extradition, etc. Over 60 conventions and agreements have been concluded.

The Council's cultural and educational programme is administered by the Council for Cultural Co-operation to which Spain and the Holy See belong in addition to members of the Council of Europe. A European Committee for Legal Co-operation administers the Organization's legal programme. Finland also takes part in a wide range of intergovernmental activities.

In May 1966, the Committee of Ministers unanimously approved a new programme of work for the Council of Europe. This programme represents an attempt to relate the inter-governmental work of the Council more closely to the Organization's statutory aim—greater European unity. It takes the form of a list of about 250 precise projects. It thus provides a guide to the Council's intergovernmental work for national administrations, international organizations and other interested circles. The Secretary-General submits a revised version to Ministers each year. The revised programme for 1968 and 1969 was adopted in May, 1968.

Since 1964, the Committee of Ministers has, with the support of the Assembly, pursued an open door policy towards associating Eastern European Governments with the technical inter-governmental work of the organization. This policy has met with limited, but positive results.

Permanent U.K. Representative, His Excellency Evelyn Basil Boothby, C.M.G. £5,375

OLYMPIC GAMES

The Modern Olympic Games were revived in 1896 and meetings have been held as follows:—					
I 1896 Athens	VII 1920 Antwerp	XIV 1948 London			
II 1900 Paris	VIII 1924 Paris	XV 1952 Helsinki			
III 1904 St. Louis	IX 1928 Amsterdam	XVI 1956 Melbourne			
IV 1908 London	X 1932 Los Angeles	XVII 1960 Rome			
V 1912 Stockholm	XI 1936 Berlin	XVIII 1964 Tokyo			
VI 1916 Berlin**	XII 1940 Tokyo, Helsinki**	XIX 1968 Mexico City			
	XIII 1944 London**				

** The Games of 1916 were allotted to Berlin, but were not held owing to the war. The Games of 1940 were allotted first to Tokyo, then in 1938 to Helsinki, but also were not held owing to the war. The Games of 1944 were awarded to London in 1939, but again were not held owing to the war. It is a rule of the Olympic Charter that the cancellation of any Meeting must not alter the numbered sequence.

The venue of each Olympic Meeting is fixed some time ahead by the International Olympic Committee, who have awarded the 1972 Games to Munich. At the time of going to press competitors were assembled for the 1968 Games in Mexico City from Saturday, October 13, to Saturday, October 27. The programme comprised the following sports—Athletics, Basketball, Boxing, Canoeing, Cycling, Equestrianism, Fencing, Football, Gymnastics, Hockey, Modern Pentathlon, Rowing, Shooting, Swimming, Volley Ball, Water Polo, Weightlifting, Wrestling and Yachting. (See OCCURRENCES DURING PRINTING).

WORLD'S ATHLETIC RECORDS

* (All the world records given below have been accepted by the International Amateur Athletic Federation with the exception of those marked thus (*) which await ratification and are likely to be accepted.)

THE DERBY, 1958-1968

For particulars of the Derby from 1780-1957 see 1921-58 editions.

The Distance of the Derby course at Epsom is $\frac{1}{2}$ mile. Lord Egremont won Derby in 1782, 1804, 5, 7 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

Year	OWNER AND NAME OF WINNER	Betting	Jockey	Trainer	No. of R'n'rs

WRESTLING.—British Amateur Wrestling Association. Sec., A. Wishart, 60 Calabria Road, N.5.

YACHTING.—Royal Yachting Association. Sec., N. Hacking, 1 Buckingham Gate, S.W.1.

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology or Medicine; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Sciences—(a) Physics; (b) Chemistry; the Royal Caroline Institute, Stockholm—(c) Physiology or Medicine; the Swedish Academy—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of five members and three deputy members. The Swedish Government appoints a chairman and a deputy chairman, the remaining members being appointed by the awarding authorities.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia; (ff) Yugoslavia; (gg) Greece; (hh) Israel; (ii) Guatemala. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901–1953, see earlier editions of WHITAKER'S ALMANACK.

The awards have been distributed as follows:—PHYSICS:—U.S.A. 29; Gt. Britain, 15; Germany, 15; France 8; U.S.S.R., 6; Netherlands, 5; Austria, 3; Sweden, 2; Italy, 2; Japan, 2; China, 2; India, 1; Denmark, 1; Republic of Ireland, 1. CHEMISTRY:—Germany, 22; Gt. Britain, 17; U.S.A., 14; France, 6; Sweden, 4; Switzerland, 3; Netherlands, 2; Hungary, 1; Austria, 1; Finland, 1; U.S.S.R., 1; Czechoslovakia, 1; Italy, 1. PHYSIOLOGY OR MEDICINE:—U.S.A., 30; Gt. Britain, 15; Germany, 10; France, 6; Denmark, 4; Switzerland, 4; Austria, 3; Sweden, 3; Belgium, 2; Canada, 2; Italy, 2; Netherlands, 2; Hungary, 2; U.S.S.R., 2; Australia, 2; Spain, 1; Argentina, 1; Portugal, 1; South Africa, 1. LITERATURE:—France, 11; Gt. Britain, 6; U.S.A., 6; Germany, 6; Italy, 4; Sweden, 4; Norway, 3; Denmark, 3; Spain, 3; U.S.S.R., 3; Poland, 2; Switzerland, 2; Belgium, 1; India, 1; Finland, 1; Chile, 1; Irish Free State, 1; Iceland, 1; Yugoslavia, 1; Greece, 1; Guatemala, 1. PEACE:—U.S.A., 14; France, 8; Gt. Britain, 7; Sweden, 4; Switzerland, 3; Germany, 3; Belgium, 3; Norway, 2; Austria, 2; Argentina, 1; Canada, 1; Denmark, 1; Israel, 1; Italy, 1; Netherlands, 1; South Africa, 1.

LITERATURE OF THE YEAR

The first appearance in print, in 1968, of a book written in 1480 was a notable event for scholars and bibliophiles; and, indeed, in the history of literature. Caxton's translation into English of Ovid's *Metamorphoses*, made in that year probably from a French version, was never printed, and the manuscript was lost. In 1688 Samuel Pepys, a great collector, bought the latter half of the manuscript at a sale, and bequeathed it, with the rest of his books and papers, to Magdalene College, Cambridge. The missing first half of the manuscript, comprising the first nine of the 15 "books", was discovered only in 1964, among the vast Phillips collection of manuscripts and rare books. Auctioned, the Caxton Ovid made a record price for a single manuscript of £90,000. When it was learned that the buyer was an American there was a public outcry against its removal across the Atlantic, which would perpetuate the severance of the complete work into two portions. Export was delayed pending the outcome of an appeal for funds to buy back this first portion, but the response was slow and the appeal seemed doomed to failure.

Then, in 1967, two other Americans came to the rescue. One offered to produce a facsimile edition of the whole work, the sales of which would complete the appeal fund; and the other offered to lend the large sum of money needed to do this. These offers were accepted. And on Sept. 17, 1968, at the British Museum, a copy of the limited facsimile edition, in two massive and handsomely bound volumes (priced at £120) was presented by a group of English scholars to the American financier who had made the rescue of the work possible. Whether all or any part of the manuscript is in Caxton's own hand is uncertain, but the writing is legible and the translation excellent. Spaces were left for illustrations, but only four coloured miniatures were made and inserted. The reason for this, and Caxton's intentions in making the translation, are subjects of conjecture only, as are the successive ownerships and resting-places of the two parts of the work. There can be only satisfaction that the complete manuscript, its two halves reunited after 488 years of separation, now reposes at Cambridge.

Churchill Work Halted

The second volume of Randolph Churchill's monumental Life of his famous father, *Winston Churchill: Young Statesman, 1901-1914*, appeared in the autumn of 1967, and was as absorbing and as well produced as its predecessor. It reminded us that Churchill became a junior minister at 31, and held office for ten of his first 15 years in Parliament. In those years he fought many political battles, making enemies as well as friends; and the author described these activities with zest and authority, while allowing his father to speak largely for himself through his books, letters and speeches. He dealt firmly and lucidly with such matters as Tonypandy, Sidney Street, Irish Home Rule, and the build-up of the Navy; Churchill's first exercise in "crossing the floor" to join the Liberal Party, in 1904; his introduction of labour exchanges and his laying of foundations for the introduction of unemployment insurance; and his happy marriage. The untimely death of Mr. Randolph Churchill on June 6, 1968, unfortunately dislocated the programme of work on the three further promised volumes of this biography; and no announcement about its continuation had been made up to the time of printing.

The bicentenary of the death (on March 18, 1768) of Laurence Sterne was marked by an exhibition of Sterneana in the Minster Library at York

during the summer. Although Sterne was born in Ireland and died in London, he held a Yorkshire living for many years, and the first two volumes of *Tristram Shandy* were first published in York. The Nollekens bust and a copy of the Reynolds portrait loomed over an assemblage of all editions of his works, translations of his books in a dozen languages, many hitherto unrecognized contributions to journals, some rare pamphlets and fine engravings, and the author's death mask. It was a fitting tribute to a pioneer novelist and remarkable "character".

Bad for Children?

Many children's books, especially fairy stories, were likely to be "positively harmful" to many children between five and seven years old, according to Mr. Nicholas Tucker, a London educational psychologist. Writing in a publication of the Advisory Centre for Education, Mr. Tucker said that some books by the force and vividness of their detail could overcome a child's defences and make him (or her) afraid of the dark. Some children were more affected by the pictures than by the text. He cited the 19th-century illustrations of *Struwwelpeter*, who cut off poor Conrad's thumbs, and the repulsive figures in Rackman's illustrations of fairy tales, as being specially frightening. Horrifying stories which should be approached with caution included, he said, some of the grimmer stories of the Grimms, *Treasure Island* (because of Blind Pew) and most of Poe's tales. Mr. Tucker concluded that it could be a mistake to introduce children to the classics too early; but as long as the child could be sure that parents were handy to protect and comfort him, he soon reached the point of being able to sort out fact from fiction.

Large and Valuable

In May the first volume appeared of the long-awaited *Oxford Latin Dictionary*, a project that was first considered in 1931 and begun two years later. Many interruptions, including the war, slowed the work of collecting and sorting at least a million quotation slips, but at last the task nears completion. In fact it is hoped to complete it by 1982, publishing one volume every two years to make a total of eight. Readably large type and a high degree of accuracy in its setting enhance the value of the work, which is planned on the lines of the great *Oxford English Dictionary*, with definitions illustrated by numerous dated quotations from Latin authors. Since 1946 the work has been done at the New Bodleian Library, latterly under the editorship of Peter Glare, who has worked on the task for 18 years. This is a completely original, all-British production; the publishers point out that all previous Latin-English dictionaries have been largely translations or adaptations of continental publications.

An even larger project was launched in February with the publication of the two first volumes of the *Complete Works of Jeremy Bentham* (1748-1832) which is planned to run to 38 volumes and to be completed in the mid-1980s. The general editor is Prof. J. H. Burns, of University College, London, in which college is preserved in a cabinet Bentham's skeleton, clothed and with a mask reproducing his features. This sage political scientist, legal luminary, economist, reformer—a blend, perhaps, of Socrates and Benjamin Franklin—was a prolific writer from the age of three until his death 80 years later: hence the need for so many volumes. The two first published were *The Correspondence of Jeremy Bentham*, ably edited by Dr. T. L. S. Sprigge,

and four more will be required to give us all the letters he wrote and received. The contents of these first two demonstrate the developing breadth of Bentham's mind during his first 30 years. His published books, though not "popular" or widely read, exercised considerable influence on the reforming of criminal law and judicial procedure, as well as on parliamentary and civil service reform.

Rising Prices and Sales

The rising prices of books continued during the year to present a problem to students needing many of them and living on grants that do not rise commensurately; and also to public librarians whose annual budgets are limited. The Librarian of Plymouth Corporation, suggesting that the Prices and Incomes Board might not continue "to ignore this deteriorating situation", stated that in the period 1961-66 the average cost of new books rose by 44·5 per cent., and according to *The Bookseller* there had been a further increase of nearly 15 per cent. in the first half of 1967. The difficulty in preparing a case for the Board lay in the fact that each book title was an individual product, not to be compared with price variations in mass-produced articles such as matches. But the higher prices meant that a librarian could buy only two-thirds of the number of books he could have bought five years ago; and students had to pay about 50 per cent. more for each of their "instruments of education".

The phenomenal growth in the production of paperbacks continued, but here, too, prices were rising steadily. By early in the year the number of titles in print had passed the 30,000 mark and was growing at an annual rate of nearly 6,000. But the price of many had made them inaccessible to some of the students for whom one supposes they were produced. A writer in the *Times Literary Supplement* (which itself was increased twice in price, from 9d. to 1s. and then to 1s. 6d.) commented: "The paperback is presumably the trade's last word in cheapness—or is there a Backless Revolution yet to come?"

The Publishers' Association in its annual report again complained that the right of certain libraries to receive a free copy of every new book published meant a loss of about £250,000 a year in trade sales. Nevertheless, the association's council took a radical decision early in the year, when they decided to amend the national book agreement to allow of simultaneous publication of hard-cover books at full price for ordinary shop sale, and of book club editions also in hard covers at a lower price to club members. This decision was adversely criticized by the Booksellers' Association.

History: Fact and Fiction

Another large project that came under consideration during the year was the production of a complete *History of Oxford University*, which was estimated to require six volumes and to take ten years. It was stated to be the biggest such project ever to have been contemplated by any university. Oxford was a centre of learning before the foundation of its first colleges: University in 1249, Balliol 1263, Merton 1264 and St. Edmund Hall 1270.

The author of many historical novels that were both popular and scholarly, Miss Margaret Irwin (Mrs. J. R. Monsell), died shortly before Christmas. Her character drawing was full and vivid, especially in her series of novels about Montrose, Prince Rupert, Bothwell and Queen Mary, and in her trilogy about the early years of Elizabeth I. She could describe campaigns and paint historical backgrounds as briskly as she recounted the adventures, grandeur and treacheries of the soldiers and

courtiars and monarchs among whom she moved so surely.

An interesting publication in the late autumn was a limited facsimile edition of the first edition of Beeton's *Book of Household Management* by Mrs. Isabella Beeton, which was originally published in 1861 and has been a household name ever since. Although it has been a steady best-seller for more than a century, copies of the first edition are scarce, and some subsequently published editions have been abridged. This facsimile reproduced all the 1,112 pages of the 1861 edition, with more than 500 engravings, 14 coloured plates and an index. Apart from the usefulness, still, of much of its contents, the book is a fascinating illustration of English social life and conditions of a century ago. It is in itself a remarkable achievement for ■■■■■ of those days who, it may be recalled, was only 28 when she died.

Readers of Jane Austen's *Northanger Abbey* may remember that seven "horrid novels" were recommended by Isabella Thorpe to Catherine Morland, at a time when "Gothic romances" or, as we might call them today, "Horror books," were widely popular. The Folio Society had the happy idea of reprinting all seven of them—they are all now extremely rare, although they were best-sellers in their day—and issued them as a set under the group title *Horrid Novels*. Each was introduced by Prof. Devendra P. Varma, of Dalhousie University, who had tracked down first editions of all seven from which these new editions were handsomely printed and uniformly bound. Although they are full of ghosts and gore, modern readers are likely to enjoy them with more smiles than shudders. The books should also be of special value to students of the development of English Literature. The seven novels are: *Castle of Wolkenbach* and *Mysterious Warning*, both by Eliza Parsons; *The Necromancer of the Black Forest* by Lawrence Flammenberg, translated by Peter Teuthold; Francis Lathom's *The Midnight Bell*; Regina Maria Roche's *Clermont*; *Horrid Mysteries* by the Marquis de Grosse, translated by Peter Will; and *Orphan of the Rhine* by Eleanor Sleath.

Leaders' Lives

Several notable political biographies, besides Mr. Churchill's second volume, appeared during the year, chief among them being Brian Crozier's *Franco*, which should (but perhaps will not yet) correct some biased views of a brilliant soldier and skilful political leader. A second biography of him appeared shortly after the first, entitled *Franco: The Man and His Nation*, by George Hills, which dealt more largely with Spanish history as it moulded his political outlook, but equally well with the myths that have clung round his name. That Franco was really no Fascist was shown, the author asserts, by his contempt for Mussolini and his firm defiance of Hitler. There was also Alexander Hepple's *Verwoerd*, a discerning study of the murdered, Dutch-born South African premier who, the author concludes, put great talents to wretched use in his constant and clever advocacy of apartheid. Rowland Evans and Robert Novak produced a thorough study of America's enigmatic and really little-known leader in *Lyndon B. Johnson: The Exercise of Power*. It should help towards understanding of American life and politics. Two books about the late Senator Robert Kennedy, both written before his murder, showed ■■■■■ man of enormous vitality. William V. Shannon in *The Heir-Apparent* dealt mainly with Kennedy as senator, attorney-general and enemy of gangsterdom and corruption. And in *Robert Kennedy*, Margaret Laing gave us more of the human side

of the man, his childhood training and home life. Andrew Boyle produced in *Montagu Norman* a life of the former Governor of the Bank of England which set out clearly his dealings with financial leaders at home and abroad.

About Themselves

After the 1914-1918 war ■ play, *Journey's End*, made a fortune for its author and launched him ■ a long and successful writing career. In his autobiography *No Leading Lady* (the play had none) the author, R. C. Sheriff, wrote of its creation and highly profitable success, and also about his other work, which has included the screen-play of *The Dam Busters* and a notable novel, *Fortnight in September*. Another writer whose first success came out of the first world war, Ernest Raymond, gave us a pleasant account of his life between 1888 and 1922 in *The Story of My Days*. He recalls in it his service as a chaplain at Gallipoli in 1915 which led to the writing of his first successful novel, *Tell England*. Covering more recent times, the third and final volume of *Diaries and Letters* of the late Sir Harold Nicolson, faithfully edited by his son Nigel, contained some amusing anecdotes about notable people. But there were some sadder notes of frustration and bereavement in those years from 1945 to 1962, during which he joined the Labour Party but failed to be elected to Parliament, and was disappointed with his reward for writing the life of George V. Another well-known writer, Kingsley Martin, published the second volume of his autobiography, *Editor*, 1931-45, written with the wit, sparkle and inside knowledge that made him a leading columnist for 30 years. His many recollections include a new sidelight on the abdication crisis of 1936.

That eminent Australian Sir Robert Menzies gave us some memories of people and events which made interesting reading in *Afternoon Light*, including some frank comments on Commonwealth conferences. Some lectures given by Sir Robert at the University of Virginia also appeared in book form as *Central Power in the Australian Government*, which provides ■ useful guide to Australian law. General and former President Eisenhower published another book, a volume of personal reminiscences of his early life and family background, entitled *At Ease*. A particularly entertaining autobiographical work was *Chips: The Diaries of Sir Henry Channon*, edited by Robert Rhodes James. It illuminated the political and social scene in Britain between the wars, including the abdication crisis and the appeasement policy. After many years of successful novel writing Cecil Roberts published the first volume of his memoirs, *The Growing Boy*, and promised us three more. In this book he re-enacted with affection and frankness a lively and happy boyhood in Nottingham, where he later was to edit a newspaper.

Books of War

The German view of the 1939-1945 war in the air was contained in *The Luftwaffe War Diaries* by Cains Bekker, well translated and edited by Frank Ziegler. This was the first account of the German air force's rise and decline to appear, and should interest British former airmen. The author discounted British official figures of German losses and disparaged the R.A.F.'s achievements, but the book is highly readable for its disclosures of German errors. Alleged inadequacy of our area bombing was the theme of *The Bomber Offensive* by Anthony Verrier. It contains a detailed narrative of the whole bombing war and makes plain the author's conclusion that the bomber offensive alone could

not succeed in winning the war although—as its leader Sir Arthur Harris, in his book *Bomber Offensive* (published in 1947) amply showed—it played a major part. Among the best of war books by generals was *Call to Arms*, in which Sir Richard Gale wrote perceptively about both world wars. His comments on the strategy of the Somme and Passchendaele are cooler and wiser than some—he served through both those battles as ■ subaltern. As deputy to the Supreme Allied Commander, Europe, in the second world war his comments on the invasion of Normandy and the Arnhem failure are authoritative and well deployed.

Several other books dealt with allied failures or setbacks in the second war. A good account of what went wrong and why in the Far East was given by James Leasor in *Singapore: The Battle That Changed the World*. He sets out his views on how the city's fall changed world politics, and he showed the causes of its fall to have been excessive economies in its defences. Complementary to this book was *Sinister Twilight: Fall and Rise Again of Singapore* by Noel Barber. He showed the follies and blunders, the devotion and courage, that marked that sorry tale. The causes and manner of the French débâcle in 1940 were well studied and set forth by John Williams in *The Ides of May*, in which, after surveying the course of French politico-military strategy from 1870, he gave a detailed account of the 46 days' campaign which followed the eight months of the "phony war" and introduced the five years of enemy occupation. More recent tragedy in the Far East was coolly told by Dr. Barbara Evans in *Caduceus in Saigon*, telling of her own and her husband's experiences in the British medical mission in South Vietnam.

Christie and Wodehouse

It was announced in May that 51 per cent. of Agatha Christie Limited had been acquired by Booker Books, a literary subsidiary of a sugar, rum and engineering group of companies which already owned ■ similar share in the works of the late Ian Fleming (of James Bond fame) and five other authors. The Christie company owns about one-third of this prolific writer's enormous output, paying her a salary, an arrangement now controlled by Bookers. During the year she published *Endless Night*, in which she shelved Poirot and Miss Marple (temporarily, no doubt) to write a first-rate novel in the most modern idiom. Two new novels came from the pen of the apparently immortal P. G. Wodehouse, now in his 86th year. *One, Company for Henry*, provided amusing company for a fireside evening, with characters as vitally comic as ever; and the same might be said of the other, *Do Butlers Burgle Banks?* He also joined with Scott Meredith in selecting the contents of *A Carnival of Modern Humour*, in which they gathered together 30 good examples of the work of the great humorous writers of the century. There also appeared in America, where Mr. Wodehouse has made his home for more than 20 years, a somewhat severe study, *P. G. Wodehouse*, by Prof. Richard J. Voorhees. It gave us ■ detached and mostly appreciative view of the writer and his novels. Another experienced writer of novels, Michael Innes, presented another highly polished and literary detective story, his 31st, in *Appleby At Allington*. The murder, after a *son-et-lumière* performance, is gravely solved by Sir John Appleby.

Short Stories

Collected short stories were popular additions to the booksellers' shelves. All the 15 so far written by Christianna Brand were contained in *What*

Dread Hand. Two of them had previously won awards and all were good examples of straight crime or horror, well worth collecting. A baker's dozen of short stories, mostly Scottish and mostly good, by Fred Urquhart, were collected under the title *The Dying Stallion*. No kilts, tartans or bagpipes were mentioned in these down-to-earth tales of country folk. Some first-class short stories were brought together in *The Stories of Eric Linklater* which ranged diversely over the modern scene. Very different but also deeply interesting was ■ volume of short stories about Europeans in India, *A Stronger Climate*, seen through the eyes of an Indian woman writer, Mrs. R. Prawer Jhabvala.

Additional sales of the late John Galsworthy's numerous Forsyte novels in separate volumes and in omnibus, stated to have totalled more than a million copies, resulted from the enormous serial presentation of *The Forsyte Saga* on both B.B.C. television channels in turn. There were 26 episodes in the serial, which, shown twice, lasted through 1967 and 1968 and on into 1969. We also had the opportunity of seeing another classic character, in television dramatizations of 16 of the late Sir Arthur Conan Doyle's stories of the immortal Sherlock Holmes, who was portrayed by Peter Cushing. The series included both longer novels and short stories, some of them not previously seen on the screen.

Royal Taste

In the 19th century the arts and sciences were much encouraged by the Prince Consort. His activities, and much else about the period, were described in a sumptuously illustrated volume, *Prince Albert and Victorian Taste*, by Winslow Ames. A less pleasing aspect of the earlier years of that century was well described by the expert hand of Roger Fulford in *The Trial of Queen Caroline*. Two good books about the first Stuart king of England were *The Making of a King* by Caroline Bingham, giving a good account of the upbringing of James VI; and David Mathew's *James I*, covering the full span of the king's life and fully descriptive of his favourites. From J. J. Scarisbrick we had a scholarly life of *Henry VIII*, well written and attractively illustrated, which seems likely to become the standard biography of the King. The same description applies to the life of another monarch of whom many biographies have been written: *Louis XIV*, by John B. Wolf, acclaimed by some critics as the best life of the Sun King yet written. In a large and handsome volume the author shows all sides of the king's character and shrewdly analyses his policies.

From Enoch Powell, the controversial politician, we had ■ scholarly work of historical research in *The House of Lords in the Middle Ages*, which provided background to the parliamentary exchanges about Lords' reform. This volume ends at 1541 and its successor will be eagerly awaited by historians and politicians alike. Some fascinating historical detective work was applied to an 868-year-old mystery by Duncan Grinnell-Milne to writing *The Killing of William Rufus*. He puts the blame for a well-planned murder on the king's brother Henry.

Cricket and Other Diversions

In a year that included the 200th Test Match between cricketers representing England and Australia, the record-making 200th Test Match appearance of England's (and Kent's) captain, Colin Cowdrey, and the controversy about the M.C.C.'s South African tour, there was naturally special interest in books about the game. Colin Milburn gave us some lively anecdotes in his largely

autobiographical *Largely Cricket*. More cricketing recollections came from Brian Close, a former England captain, in his aptly titled *Close to Cricket*. And he also produced a book on *The MCC Tour of the West Indies, 1968*, which he accompanied as a writer. Several books connected with journalism and broadcasting appeared, including *The Press Council: History, Procedure and Cases*, by H. Phillip Levy, introduced by the council's chairman, Lord Devlin. It sets out the first 14 years of the council's work. A topical book was a small volume on *The Future of the Press* by Cecil H. King, which he saw published shortly before his departure from the boardroom of the International Publishing Company. It contained thoughtful comments on many aspects of journalism, and commended the training of journalists, but said that much of the bad prose in newspapers was not the fault of the reporters but of those they were reporting. A selection from the writings of ■ leading newspaper writer, James Cameron, appeared in *What a Way to Run the Tribe*. His observations and comments were well worth thus preserving. And an amusing book describing some of the catastrophes that have befallen B.B.C. people and programmes was *To Auntie With Love*, by Jack De Manio.

Among other books published during the year were the following:

Biography

From the Wings, by Thelma Cazalet-Keir; *Remember Butler*, by Edward McCourt; *Lord Reading*, by H. Montgomery Hyde; *George Bell, Bishop of Chichester*, by Ronald C. D. Jasper; *My Brother Evelyn and Other Profiles*, by Alec Waugh; *Teilhard de Chardin*, by Robert Speaight; *William Morris*, by Philip Henderson; *Thomas Becket*, by Richard Winston; *Burghley*; *Tudor Statesman*, by B. W. Beckingsale; *The Hero as Murderer* (life of E. J. Eyre), by Geoffrey Dutton; *My Life and Times: Octave Seven, 1932-38*, by Sir Compton Mackenzie; *Memoirs, 1925-1950*, by George F. Kennan; *The Europe I Saw*, by Elizabeth Wiskemann; *John Keats*, by Robert Gibbons; *The Sassoons*, by Stanley Jackson; *Byron and Shelley*, by John Buxton; *Ellen Terry*, by Roger Manvell; *Sir Philip Sidney*, by Roger Howell; *Smuts: The Fields of Force, 1919-50*, by Sir Keith Hancock; *A Cat at the Door*, by V. S. Pritchett; *Somerville and Ross*, by Maurice Collis; *John Christie of Glyndebourne*, by Wilfrid Blunt; *The Letters of Rupert Brooke*, ed. Sir Geoffrey Keynes; *Richelieu*, by D. P. O'Connell; *William James*, by Gay Wilson Allen; *Wellington as Military Commander*, by Michael Glover; *Marx*, by Robert Payne; *The Life and Letters of Lord Collingwood*, by Oliver Warner; *George Eliot*, by Gordon S. Haight.

Fiction

No Laughing Matter, by Angus Wilson; *The Smaller Sky*, by John Wain; *The Commander*, by Robert Henriques; *The Nice and the Good*, by Iris Murdoch; *Out of Town*, by J. B. Priestley; *The Day of the Feast*, by Margaret Lane; *The Four Beauties*, by H. E. Bates; *The Governor's Lady*, by Norman Collins; *Tune*, by Lawrence Durrell; *Consider the Lilies*, by Auberon Waugh; *The Survival of the Fittest*, by Pamela Hansford Johnson; *Enderby Outside*, by Anthony Burgess; *The Indian Summer of Gabriel Murray*, by Hugo Charteris; *The Public Image*, by Muriel Spark; *Tell Me How Long the Train's Been Gone*, by James Baldwin; *The Love Object*, by Edna O'Brien; *Richer Than All His Tribe*, by Nicholas Monsarrat; *The Hunter and the Whale*, by Laurens van der Post.

History

A Wreath to Clio, by Sir John Wheeler-Bennett; *Edgehill 1642*, by Brig. Peter Young; *Reformation*,

to Industrial Revolution, by Christopher Hill; *The Medieval Foundation*, by Sir Arthur Bryant; *Protestant Island*, by Sir Arthur Bryant; *The Phoenix Park Murders*, by Tom Corfe; *Napoleon in Russia*, by Alan Palmer; *Great Britain and the War of 1914–18*, by Sir Llewellyn Woodward; *Contemporary England, 1914–64*, by W. N. Medlicott; *The Court of Richard II*, by Gervase Mathew; *Armistice, 1918*, by Brig. C. N. Barclay; *The British Seaman, 1200–1860*, by Christopher Lloyd; *Balfour and the British Empire*, by Denis Judd; *Between Two Seas: the Creation of the Suez Canal*, by Lord Kinross.

Poetry

Touch, by Thom Gunn; *Poems, 1965–1968*, by Robert Graves; *Selected Poetry*, by Roy Campbell; ed. J. M. Lalley; *Poems, 1942–67*, by Alan Ross.

Travel and Topography

Islands of the Gulf, by Shirley Maddock; *South to the Pole*, by L. B. Quartermain; *Vanishing Cornwall*, by Daphne du Maurier; *Gipsy Moth Circles the World*, by Sir Francis Chichester.

Miscellaneous

Southern Baroque Revisited, by Sacheverell Sitwell; *The Battle for Italy*, by Maj.-Gen. W. G. F. Jackson; *The Myth of the Machine*, by Lewis Mumford; *The History of the Royal Academy, 1768–1968*, by Sydney C. Hutchison; *Munich 1938*, by Keith Robbins; *The New American Constitution*, by John Herin; *The Ides of May*, by John Williams; *Speaking Aloud*, by Richard Church; *The Ghost in the Machine*, by Arthur Koestler.

DRAMATIC SUMMARY, 1967–68

ALDWYCH, Aldwych, W.C.2.—(1968). Jan. 4. *Macbeth* (Paul Scofield, Brewster Mason, Ian Richardson and Vivien Merchant). Jan. 17. *All's Well That Ends Well* (Sebastian Shaw, Brewster Mason, Clive Swift, Ian Richardson, Catherine Lacey, Lynn Farleigh and Helen Mirren). March 4. Dylan Thomas' *Under Milk Wood* (Peter Geddis, Emrys James, Susan Fleetwood and Sheila Allen). April 15. World Theatre Season began with visit from Theatre of the Balustrade, Prague; later companies to appear were the Théâtre de France, the Rome Stabile Theatre, the Abbey Theatre, Dublin, the Stockholm Royal Dramatic Theatre and Bunraku National Theatre of Japan. July 4. *The Indians*, by Arthur Kopit (Barrie Ingham and Derek Smith). July 15. *The Merry Wives of Windsor* (Brewster Mason, Ian Richardson, Brenda Bruce and Lily Kaye). Aug. 15. *Vanbrugh's The Relapse* (Barrie Ingham, Brewster Mason, Toby Robins and Frances de la Tour).

APOLLO, Shaftesbury Avenue, W.1.—(1968). Sept. 13. Revival of *The Beggar's Opera* (John Cater, James Cossins, Peter Gilmore, Jan Waters, HY Hazell, Frances Cuka and Angela Richards).

COMEDY, Panton Street, S.W.1.—(1967). Nov. 29. Revival of *The Boy Friend*, musical comedy by Sandy Wilson (Tony Adams, Jeremy Hawk, Cheryl Kennedy, Marion Grimaldi and Ann Beach).

CRITERION, Piccadilly, W.1.—(1967). Oct. 24. *Mrs. Wilson's Diary*, lampoon. (1968) June 17. *The Real Inspector Hound*, by Tom Stoppard (Richard Briers and Ronnie Barker), preceded by *The Audition*, by Sean Patrick Vincent.

DRURY LANE, W.C.2.—(1967) Dec. 5. *The Four Musketeers*, musical (Harry Secombe, Kenneth Connor, Aubrey Woods, Elizabeth Larner and Stephanie Voss).

DUCHESS, Catherine Street, W.C.2.—(1968) April 1. *Little Boxes*, two plays by John Bowen (David Cook, Elizabeth MacLennan, June Jago and Anna Cropper). Sept. 10. *A Boston Story*, by Ronald Gow (Tony Britton, Basil Hopkins, Patrick Mower, Dinah Sheridan and Nicola Pagett).

DUKE OF YORK'S, St. Martin's Lane, W.C.2.—(1968) Feb. 14. Noel Coward's *Hay Fever* (Roland Culver, Richard Vernon, Michael Graham Cox, Simon Williams, Celia Johnson, Prunella Scales, Diana Fairfax and Lucy Fleming). April 16. *The Duel*, version of Chekhov's story by Jack Holton Dell (Peter Wyngarde, Michael Bryant, James Hayter, Lewis Fiander, Elspeth March and Nyree Dawn Porter).

FORTUNE, Drury Lane, W.C.2.—(1967). Nov. 16. *Fanghorn*, by David Pinner (Peter Bayliss, Glenda Jackson and Rachel Herbert). (1968). Feb. 1. *You're a Good Man, Charlie Brown*, musical,

by John Gordon and Clark Gesner (David-Rhys Anderson, Don Potter, Gene Kildwell, Gene Scandur, Courtney Lane and Boni Enten). May 29. *Cindy*, U.S. musical (Hy Hazell and Rose Hill). July 10. *Summer*, by Romain Weingarten (Bryan Pringle, Brian Murphy, Malcolm Patton and Jane Asher).

HAYMARKET, S.W.1.—(1967). Dec. 7. Revival of Dodie Smith's *Dear Octopus* (Jack Hulbert, Richard Todd, Cicely Courtneidge, Lally Bowers, Joyce Carey, Ursula Howells, Perlita Neilson, Valerie White and Dorothy Primrose). (1968). Feb. 8. Wilde's *The Importance of Being Earnest* (Daniel Massey, John Standing, Robert Eddison, Dame Flora Robson, Isabel Jeans and Pauline Collins).

LYRIC, Shaftesbury Avenue, W.1.—(1967) Nov. 9. Shaw's *Heartbreak House* (John Clements, Michael Aldridge, Bill Fraser, Irene Worth, Diana Churchill and Sarah Badel). (1968). Feb. 21. *The White Liars and Black Comedy*, by Peter Shaffer (James Bolam, Ian McKellar, Angela Scoular and Dorothy Reynolds). May 16. *I Do! I Do!*, U.S. musical (Ian Carmichael and Anne Rogers). August 28. *Oh, Clarence!*, by John Chapman, adapted from P. G. Wodehouse (Naunton Wayne, Robertson Hare, Austin Trevor, James Hayter, Jon Pertwee, Peggy Mount and Agnes Lauchlan).

MERMAID, Puddle Dock, E.C.—(1967). Oct. 18. *The High Bid*, by Henry James (Edward Woodward, Laurence Hardy, Fenella Fielding and Janie Booth). Nov. 24. *Climb the Greased Pole*, by Vincent Longhi (Bernard Miles and Libby Morris). Dec. 18. *Treasure Island* (Barry Humphries and Spike Milligan). (1968). Feb. 7. *The Black Girl in Search of God*, adapted by Basil Ashmore from Bernard Shaw's story (John Westbrook, Paul Hardwick, Dame Edith Evans, Mona Hammond and Jessie Evans). March 14. *Open on Sundays*, by Michael Landy and Ron Pember. April 18. *Hadrian the Seventh*, by Peter Luke (Alec McCowen, Patrick McLainney, Alan MacNaughtan and Margaret Courtney).

NEW, St. Martin's Lane, W.C.2.—(1968). June 26. *You Know I Can't Hear You When the Water's Running*, four comedies by Robert Anderson (Tom Ewell, Mason Adams and Rosemary Murphy). July 29. *Janie Jackson*, by Robert P. Hillier (Rudolph Walker and Marlene Warfield).

OLD VIC (National Theatre), Waterloo Road, S.E.1.—(1967). Oct. 3. *As You Like It* (Jeremy Brett, Robert Stephens, Derek Jacobi, Ronald Pickup, Charles Kay, Richard Kay and Anthony Hopkins). Nov. 21. *Molière's Tartuffe* (Sir John Gielgud, Robert Stephens and Joan Plowright). (1968). Jan. 16. *Ben Jonson's Volpone* (Colin Blakely, Graham Crowden, Frank Wylie, Edward

Petherbridge, Paul Curran and Gabrielle Laye). March 19. Seneca's *Oedipus* (Sir John Gielgud, Colin Blakely and Irene Worth). April 30. *Edward II*, by Bertolt Brecht and Lion Feuchtwanger (John Stride, Robert Lang, Charles Kay and Geraldine McEwan). June 18. Triple Bill (Fielding's *The Covent Garden Tragedy*, A Most Unwarrantable Intrusion, by Maddison Morton and In His Own Write, by John Lennon) (Louis Purnell, Gerald Mason, Derek Jacobi, Ronald Pickup and Angela Baddeley). Sept. 24. *The Advertisement*, by Natalia Ginzburg (Edward Petherbridge, Joan Plowright and Anna Carteret).

PALACE, Cambridge Circus, W.1.—(1968). Feb. 28. *Cabaret*, U.S. musical by John Kander and Fred Ebb (Peter Sallis, Barry Niven, Judi Dench and Lila Kedrova).

PALLADIUM, Argyll St., W.1.—(1968). June 4. *Golden Boy*, musical version of Clifford Odets' play (Sammy Davis, Mark Dawson, Al Kirk and Gloria De Haven).

PHOENIX, Charing Cross Road, W.C.2.—(1967). Oct. 4. *Let's All Go Down the Strand*, by Hugh and Margaret Williams (Hugh Williams, William Kendall, Dame Gladys Cooper, Evelyn Laye, Avice Landon and Dinah Sheridan). (1968). March 21. *Canterbury Tales*, musical (Wilfred Brambell, Kenneth J. Warren and Jessie Evans).

PICCADILLY, Denman Street, W.1.—(1968). April 24. *Man of La Mancha*, U.S. musical (Keith Michell, Bernard Spear and Joan Diener).

PRINCE OF WALES, Coventry Street, W.1. (1967). Oct. 11. *Sweet Charity*, by Niel Simon (Rod McLennan, John Keston, Laurie Webb, Juliet Prowse, Josephine Blake and Paula Kelly).

QUEEN'S, Shaftesbury Avenue, W.1.—(1967). Oct. 5. Chekhov's *The Cherry Orchard* (Patrick Wymark, Terry Scully, Edward Atienza and Lila Kedrova). Nov. 23. *Halfway Up the Tree*, by Peter Ustinov (Robert Morley, Mark Dignam, Robert Raglan, Jonathan Cecil, Michael Johnson, Ambrosine Phillipps, Pinkie Johnstone and Bridget Armstrong).

ROYAL COURT, Sloane Square, S.W.1.—(1967). Oct. 19. *Marya*, by Isaac Babel (Arthur Lowe, Malcolm Tierney, Ken Wynne and Diane Cilento). Nov. 15. *Dingo*, by Charles Wood (Leon Lissek, John Hussey and Henry Woolf). (1968). Jan. 31. *Twelfth Night* (Jack Shepherd, John Normington and Vickery Turner). Feb. 29. Season of D. H. Lawrence plays began with *A Collier's Friday Night* (Victor Henry, John Barrett, Anne Dyson, Susan Williams and Gwendolyn Watts); on March 7, *The Daughter in Law* (Victor Henry, Michael Coles, Anne Dyson and Judy Parfitt) was produced, and on March 14, *The Widowing of Mrs. Holroyd* (Michael Coles, Mark Jones, Anne Dyson and Judy Parfitt). May 8. *Backbone*, by Michael Rosen (Ray Brooks, Harry Towb, Thelma Whiteley and Marty Cruickshank). May 23. *Time Present*, by John Osborne (Tom Adams, Katharine Blake and

Jill Bennett). July 3. *The Hotel in Amsterdam*, by John Osborne (Paul Scofield, David Burke, Joss Ackland, Judy Parfitt, Isabel Dean and Susan Engel). Sept. 11. *Total Eclipse*, by Christopher Hampton (Victor Henry and John Grillo).

ST. MARTIN'S, West Street, W.C.2.—(1968).

Jan. 32. John Galsworthy's *Justice* (Richard Briers, Eric Portman and Barbara Murray). March 28. *Enter a Free Man*, by Tom Stoppard (Michael Hordern, Megs Jenkins and Vanessa Forsyth). May 8. Revue of Terence Rattigan's *The Sleeping Prince* (George Baker, David Hutchison, Roger Davenport, Susan Hampshire and Jean Anderson).

SAVILLE, Shaftesbury Avenue, W.C.2.—(1967).

Dec. 18. D'Oyly Carte Company season of Gilbert and Sullivan operas began. (1968). June 6. Revival of Ivor Novello's *The Dancing Years* (David Knight and June Bronhill). July 25. Revival of *Lady Be Good*, by George Gershwin, Ira Gershwin and Guy Bolton (Lionel Blair, Joe Baker and Aimi Macdonald).

SAVOY, Strand, W.C.2.—(1968). May 2. *The Queen's Highland Servant*, by William Douglas Home (Archie Duncan, David Garth, Sean Arnold and Pamela Stanley). June 20. *My Giddy Aunt*, by Ray Cooney and John Chapman (Manning Wilson, Roger Carey, Charles Stapley, Guy Slater, Peter Gray, Irene Handl and Margo Johns).

SHAFTESBURY, Shaftesbury Avenue, W.1.—(1968). Sept. 27. *Hair*, U.S. musical.

STRAND, Aldwych, W.C.2.—(1967). Nov. 15. Number 10, by Ronald Millar (Alastair Sim, Michael Denison, John Gregson and Dulcie Gray). (1968). March 17. *Zigger Zagger*, by Peter Terson (Anthony May, Nigel Humphreys, Roland Oliver, Harry Philton and Veronica Clifford). June 12. *Not Now Darling*, by Ray Cooney and John Chapman (Donald Sinden and Bernard Cribbins).

VAUDEVILLE, Strand, W.C.2.—(1967). Oct. 17.

La Mama Troupe in *Tom Paine*, by Paul Foster. Nov. 28. Wilde's *A Woman of No Importance* (Tony Britton, James Hayter, Portland Mason, Michael Pennington, Phyllis Calvert, Diane Hart, Pauline Jameson and Agnes Lauchlan). (1968). Jan. 24. Revival of *The Bells*, by Leopold Lewis and *Lend Me Five Shillings*, by John Maddison Morton (Marius Goring). March 13. *Staring at the Sun*, by Alfred Aiken (Andrew Ray, Robert Ayres, Melvyn Hayes, Joan Miller, June Barry and Yolande Turner). May 1. Molière's *The Imaginary Invalid* (Ian Trigger, Richard Wordsworth and Eileen Gourlay). July 4. *The Man Most Likely to...*, by Joyce Rayburn (Dermot Walsh, Leslie Phillips, Trevor Kent, Diane Hart and Ciaran Madden).

WYNDHAM'S, Charing Cross Road, W.C.2.—(1967).

Oct. 10. *Wise Child*, by Simon Gray (Sir Alec Guinness, Gordon Jackson and Simon Ward). (1968). Feb. 6. *The Italian Girl*, by Iris Murdoch and James Saunders (Timothy West, Richard Pasco, Jane Wenham, Elizabeth Sellars, Deborah Grant and Imogen Hassall).

CLUB AND LIBRARY EDITION OF WHITAKER, 1969

The Club and Library Edition of Whitaker's Almanack, 1969, contains 1,237 pages, including illustrations and coloured maps (The World, The British Isles, Baltic States, Russia and her neighbours, Germany and her neighbours, France and Spain, The Far East, India, Pakistan and Burma, Africa, Canada and Newfoundland, The United States, South America, Australia, New Zealand) in strong leather binding, with gilt top and silk headband. Price 45s. net.

WIRELESS DEVELOPMENT AND BROADCASTING 1967-68

Independent Television Companies

The new allocation of Independent Television contracts to programme companies for the period 1968-74 was outlined in WHITAKER 1968 and the list is given below. Certain developments consequent upon the allocations remain to be noted.

Discussions took place between A.B.C. and Rediffusion on the formation of a joint company as proposed by the I.T.A., to be responsible for weekday programmes in the London area. As a result, the terms of an agreement on the new company, to be called Thames Television, and with Sir Philip Warter as chairman, were announced on Oct. 26, 1967.

The programme companies announced that they would set up a new company, Independent Television Publications, Ltd., to publish a new national journal, based on London and with 14 regional editions; one director would be appointed by each programme company, and one by the I.T.A.

In accordance with the stipulation made by the I.T.A., a scheme of arrangement whereby the Thomson Organization's holding in Scottish T.V. would be reduced from 55 per cent. to 25 per cent. was approved on April 5 by a shareholders' meeting. Lord Thomson said that it was their intention and that of the I.T.A. that as far as possible the shares should be sold to people in Scotland. It was also stated that during 1968 work would start on a new Scottish T.V. complex in the Glasgow area.

With the exception of Harlech Television, which started to transmit earlier in the year, the new or revised operating companies began their activities on July 29, though the opening programmes were disrupted by a strike of the technicians' union, which lasted for three weeks.

Increased Cost of Licences

Mr. Stonehouse, the Postmaster General, speaking in the Commons on July 23, announced increases in broadcast licence fees. He said that earlier in the year the B.B.C. had decided to retain the services of McKinsey and Co. to review the corporation's organization and management methods with a view to improving their efficiency. But any improvements from the McKinsey study would be long term in their effect, and the B.B.C. must have more revenue if it was to maintain and develop its services. Accordingly, said Mr. Stonehouse, from Jan. 1, 1969, the combined sound and monochrome television fee would be increased from £5 to £6, and the combined sound and colour television fee from £10 to £11. The sound-only licence fee would remain unchanged at 25s.

Mr. Stonehouse rejected Opposition suggestions that the increase should be referred to the Prices and Incomes Board, and also said that for the time being he was not prepared to allow the B.B.C. to have commercial advertising, nor had they requested it.

Speaking two days later, Mr. Robin Scott, controller of B.B.C. Radio One and Two, said that the possibility of carrying advertising on those services to help B.B.C. finances was a dead letter, and that he had had no instructions to initiate plans for incorporating commercials on either of the services. The budget for Radio One and Radio Two was now almost £1,000,000 a year, or £150,000 a year more than when the two services replaced the Light Programme in September, 1967. There had been an increase of 17 per cent. in radio audiences since the new services started, and about 27,000,000 in the country tuned in to B.B.C. radio at some time of the day, even if only for a brief

WIRELESS DEVELOPMENT AND BROADCASTING 1967-68

period. Mr. Scott said that from Sept. 30 there would be a weekly increase of two hours in choice of programmes between the two networks.

Licence Figures

Television licence figures for the end of June showed an increase of 127,014 in three months and totalled 15,222,486. This was nearly 750,000 more than the figure for June 30, 1967. Colour television licences, which had been introduced on Jan. 1, had been rising steadily at the rate of 5,000 a month and by the end of June totalled over 34,000. The Post Office stated that in less than two years anti-evasion measures had reduced the estimated number of T.V. licence defaulters from 2,000,000 to 1,300,000 and the estimated loss of revenue from £10,000,000 to £6,500,000.

Colour Television

The official start of the colour service on B.B.C.-2 took place on Dec. 2, 1967. Discussing the B.B.C.'s plans shortly before that date, Mr. David Attenborough said that the service would start with 27 hours of colour per week, which would increase to 29 hours a week when the news was included in colour. B.B.C.-2 had been allowed 30 hours a week of general broadcasting, plus time for outside broadcasts, educational programmes and party political broadcasts. Consequently, about ninetenths of B.B.C.-2 would soon be in colour. The news service would be brought forward to 7.30 p.m. and would run for half an hour. Mr. Attenborough agreed that there were still problems with set stability—the ability to maintain a constant colour picture.

In May, 1968, Mr. Paul Fox, controller of B.B.C.-1, said that the target date for the start of colour on B.B.C.-1 and Independent television was Nov. 15, 1969, and although he had been told that that was an optimistic forecast, he believed that there would be "a colourful Christmas" in 1969. Colour transmissions would start in London, the Midlands and the North, and other areas would be brought in as quickly as possible. At the beginning, about 60 per cent. of programmes would be in colour. There were expected to be about 500,000 colour sets in homes in Britain by 1971.

Mr. Fox also spoke of B.B.C. coverage of the Olympic Games in Mexico City in October. He said that about 100 hours of the Games would be transmitted live by the two B.B.C. television channels and that the events on B.B.C.-2 would be in colour. Because of the clock difference live reports would start at about 10 p.m.

I.T.V. Unmanned Relay Stations

One of the final VHF transmitters to be set up by the I.T.A. was opened at Huntshaw Cross in North Devon on April 22. Unmanned relay transmitter stations are intended to fill the remaining gaps where poor reception of I.T.V. still persists. The Huntshaw Cross station was expected to provide better reception for nearly 80,000 viewers. The transmitter would be fed by signals from the existing I.T.V. station at Stockland Hill and would operate purely automatically. It was fitted with a new transistorized type of relay transmitter and special remote control and monitoring equipment.

An I.T.A. spokesman said that it was the final plan of their programme for V.H.F. transmitters which started with the beginning of I.T.V. in 1955. They now covered 98 per cent. of the population in V.H.F., but colour programmes on the 625 line

standard would have to go out on U.H.F., and it would take some time before the programmes reached all parts of the country. The final phase of V.H.F. transmitter building was aimed at ensuring that as many areas as possible, which would not at the outset be able to get I.T.V. colour programmes on U.H.F., would at least have good black and white pictures. The I.T.V. colour service, like that of B.B.C.-1, was expected to begin in London, the Midlands and the North late in 1969 or early in 1970. To build the transmitters ready for the switchover to V.H.F. would cost about £10,500,000 by 1971.

London Schools' Television

The London Schools' Television service opened on Sept. 12. A former school in Islington was turned into a complete television centre, with studios and offices, but the intention is to move the studios during 1969 to another school in Battersea. Post Office engineers designed a cable distribution system with built-in amplifiers and fault-finding equipment. The equipment is capable of carrying seven simultaneous channels, and in some areas nine, and can transmit programmes in colour as well as black and white. Initially the T.V. centre was connected with 300 schools, but by 1970 the service is intended to link 1,300 schools in the I.L.E.A. area, thus becoming the largest closed-circuit system in the world.

The system involved the construction of a underground cable network of main feeders with branches to schools. The cable used is a single coaxial tube with a solid polythene dielectric for strength and a welded copper outer conductor to prevent interference. The combined vision and sound channel is of the same form as the 625-line signals transmitted by the B.B.C. Line repeaters are installed in telephone exchanges or manholes at intervals of 500 to 800 yards to amplify and equalize the channels. In each school the underground cable is connected to a terminal repeater which also amplifies and equalizes the received signals. An internal distribution network has been installed in each school to feed the television channels to receiver sockets in the classrooms. A 24-hour watch is maintained on the system by transmitting a pilot signal throughout the network. School repeaters at the end of the network pick up the pilot signal and send a supervisory tone back to the nearest telephone exchange. If the pilot fails, the supervisory tone is not returned and an alarm is given.

A similar schools' closed circuit television scheme,

also designed by the G.P.O., was due to be opened in Plymouth during September.

Other closed circuit projects on which the Post-office was working during the year included a network for the London Stock Exchange price dissemination service, and a system for distributing tourist information to 11 leading West End hotels. The Stock Exchange scheme will provide twenty 625-line television channels on a single coaxial cable between the Stock Exchange and 200 member firms in the City.

I.T.A. Programme Companies

On June 11, 1967, contracts for the provision of programmes from July 30, 1968, were awarded by the Independent Television Authority to the following companies:

Borders and Isle of Man.—Border Television Ltd., Carlisle, Cumberland (14 Curzon Street, London, W.1).

Central Scotland.—Scottish Television Ltd., Theatre Royal, Hope Street, Glasgow, C.2 (70 Grosvenor Street, W.1).

Channel Islands.—Channel Television, Rouge Bouillon, St. Helier, Jersey (195 Knightsbridge, S.W.7).

East of England.—Anglia Television Ltd., Anglia House, Norwich (Brook House, Park Lane, W.1). *Lancashire*.—Granada Television Ltd., Manchester 3 (36 Golden Square, W.1).

London (week-days).—Thames Television Ltd., (Teddington Lock, Teddington, Middlesex).

London (week-ends).—London Weekend Television Ltd., (Station House, Harrow Road, Wembley, Middlesex).

Midlands.—ATV Network Ltd., ATV House, 17 Great Cumberland Place, London, W.1; 150 Edmund Street, Birmingham 3; Television House, Mount Street, Manchester 2.

North-East England.—Tyne Tees Television Ltd., Television Centre, City Road, Newcastle upon Tyne (22-30 Old Burlington Street, W.1).

North-East Scotland.—Graemian Television Ltd., Queen's Cross, Aberdeen; 26 Carlton Road, Edinburgh 1 (Nuffield House, 41 Piccadilly, W.1).

Northern Ireland.—Ulster Television Ltd., Havelock House, Ormeau Road, Belfast 7 (19 Marylebone Road, W.1).

South of England.—Southern Television Ltd., Television Centre, Northam, Southampton (Glen House, Stag Place, S.W.1).

South-West England.—Westward Television Ltd., Armada Way, Plymouth (P.O. Box 2LE, 4/7 Woodstock Street, W.1).

Wales and West of England.—Harlech Television Ltd., Portcanna Studios, Cardiff.

Yorkshire.—[Yorkshire Television Ltd.], (The Television Centre, Leeds 3).

TOPICS OF THE DAY

ISAAC NEWTON TELESCOPE

On December 1, 1967, the Queen inaugurated the new 98-inch optical telescope at the Royal Greenwich Observatory at Herstmonceux, Sussex.

For many years the largest telescopes in the British Isles had been the 36-inch reflectors at the Royal Observatories at Herstmonceux and Edinburgh. However it is interesting to note that in earlier years Herschel, the third Earl of Rosse and Andrew Ainslie Common had all used larger apertures; Lord Rosse had used the largest one, of 72 inches aperture, in Ireland. In more recent times many astronomers had felt that the erection of a large telescope in a poor climate such as that of the British Isles was rather a waste, particularly when there were so few telescopes in the southern hemisphere. Thus the Radcliffe Trustees, some thirty years ago, decided to erect a 74-inch telescope in South Africa rather than in Britain.

After the war suggestions were made for the construction of a Schmidt telescope of between 49 and 72 inches aperture. This was shortly followed by a gift to the Royal Greenwich Observatory, from the MacGregor Trust of Michigan, U.S.A., of a 98-inch diameter disk of pyrex glass, which had been cast by the Corning Glass Company in 1936. This blank has since been ground and polished by Grubb Parsons Ltd., of Newcastle upon Tyne, who were also responsible for the construction of the telescope itself. During the grinding process 1,800 lbs. of glass were removed, reducing the weight of the disc to 9,000 lbs.

The final design was a telescope working at a focal ratio of $f_{3.0}$, at the prime focus. The use of a hyperboloid secondary mirror gives a focal ratio of $f_{14.1}$ at the Cassegrain focus and a focal ratio of $f_{32.3}$ at the Coudé focus. Observations may be made at the prime focus by entering an observing capsule which can be attached to the top end of the telescope or the observer can use the Cassegrain focus situated directly behind the central hole in the main mirror. The Coudé focus is situated in a room on the floor below the telescope, the light having been directed down one of the trunnions supporting the declination axis. This third possibility enables high magnifications to be obtained and thus the high dispersion required for accurate spectroscopic work.

Mounting a large telescope poses considerable mechanical problems, the main one being the maintenance of all optical components in perfect alignment in any conceivable attitude adopted by the telescope. To achieve this an ingenious support system utilizing an air bag is used for the main mirror (which weighs four tons), in order that the figure of the mirror surface may be maintained in all positions. The internal pressure of the air bag is 1.3 pounds per sq. in.

The equatorial mounting is basically a "fork" mounting though the polar axis has been shortened to become a large polar disk. This polar disk is supported on a thin film of oil, the pressure in the oil pads being maintained at 200 lb/sq. in., which gives a clearance between the oil pad and the polar disk of four-thousandths of an inch. This system successfully carries a weight of over 100 tons. The tines which carry the tube of the telescope are equally massive. The whole mounting rests on a substantial concrete pier.

The dome itself has become quite a landmark, rising nearly 100 ft. above the ground. It stands in a prominent position to the south-east of Herstmonceux Castle, in the spacious grounds of the Observatory. The hemispherical dome, made of aluminium sheeting, is 61 ft. in diameter. To minimize the flow of warm air currents which

could have a disastrous effect on the "seeing", no heating is used inside the dome, which itself carries a layer of insulation in the form of a double skin of polystyrene and hardboard cladding. To lessen the effect of daytime heating and night-time radiation from the soil the whole area in the vicinity of the dome has been planted with young conifer trees. Construction and equipment of the dome and telescope is estimated to have cost approximately £1,000,000.

On the ground floor is the special visitors entrance and also the aluminizing plant to which the primary mirror and secondary mirrors can be lowered for re-aluminizing. The Coudé focus room is on the next floor, below the main observing floor which is 50 ft. above ground level. As the declination axis of the telescope is lower than the opening in the dome it is not possible to set on positions where the altitude is below $30^{\circ}-35^{\circ}$. Thus any object more than a few degrees south of the equator cannot be studied. This restriction was a deliberate decision based on the fact that atmospheric disturbances at the lower altitudes would mean that only relatively poor images would be seen, particularly with a large telescope and a high magnification. A night assistant seated at the console can set the telescope quite accurately to any position in the sky, final adjustments being made by the astronomer at the telescope itself.

The Science Research Council is responsible for the operation of the telescope and has set up a Large Telescope Users' Panel, headed by the Astronomer Royal, Sir Richard van der Riet Woolley. This panel will allocate observing time to suitable British astronomers, after the completion of a year's testing by astronomers of the Royal Greenwich Observatory to assess the performance and capabilities of the telescope.

The public is admitted free to the public gallery to view the telescope every afternoon on weekdays and from 11 a.m. onwards at weekends.

HEART TRANSPLANTS

The third of December, 1967, saw the world's first human heart transplant operation and the beginning of what must be the world's most violent medical controversy. According to the differing views that day was a red letter day in medical history or else a very black one, either the day which marked a new and greater miracle of surgery or the one which saw proper medical care suborned by considerations of national prestige and individual pride with medical genius sidetracked into unprofitable channels. No doubt much of the publicity and some of the strength of opinion was due to what might be called the myth and poetry of the heart, the idea of it — the seat of life and love. It was notable that when, on the day of Britain's first heart transplant operation, there took place, by coincidence, the first transplant in the country of an equally essential single organ, the liver, incidentally a more difficult task, it was the heart transplant which received the front page publicity, the applause and the condemnation, while the liver transplant went virtually unnoticed. By that December day there were many surgeons around the world well practised in heart transplant operations on animals though there was some general reluctance to take the step of a human operation. The man who took the plunge was Professor Christian Barnard, Professor of Cardio-thoracic Surgery at the University of Cape Town. In a six hour operation at the Groote Schuur Hospital he removed the diseased heart of Louis Waskansky, a 56 years old wholesale grocer, and, in its place,

implanted that of Miss Denise Darvell, a 25 years old bank clerk, fatally injured in a road crash. Within three days the second heart transplant operation took place, on a $\frac{1}{2}$ weeks old baby in Brooklyn. The baby died seven hours later, the first fatality in human heart transplants. Louis Waskansky lived for eighteen days, his new heart being the last organ to fail, according to Prof. Barnard. On January 2 came the transplant which, in the view of Prof. Barnard and many others, provided evidence that these operations could be considered a success. As the South African surgeon said later in the year they had never believed that heart transplants would provide a complete cure but it had been shown that patients dying of heart disease could be got better. To that extent, he said, heart transplant surgery had achieved its aim.

The first patient to "get better" was Dr. Philip Blaiberg, a 58 years old retired dentist, Prof. Barnard's second patient, who received the heart of a coloured factory worker, Clive Haupt, 24. Mr. Haupt had suffered a brain haemorrhage while spending New Year's Day on the beach. Though opponents of heart transplant surgery claimed that Blaiberg had not been brought back to full life and was still a chronic invalid, he survived well beyond the term his doctors had given him with his diseased heart. Six months after the operation he suffered a relapse and Prof. Barnard flew back to Capetown from London on hearing his patient was seriously ill. But renewed treatment with anti-rejection drugs and serum resulted in a marked recovery and Dr. Blaiberg again returned home.

British Transplants.

The first British heart recipient was Frederick West, a 45 year old contract manager of Leigh-on-Sea, on May 3. The donor was a 26-year-old Irish building worker, Patrick Ryan, who received severe head injuries in a fall. West had found himself a victim of severe congestive trouble three years before, had had to give up work 18 months before and, at the time of the operation, was in severe pain and unable to walk across a room. After the operation he reported how much better he felt, how little discomfort he had from the operation and was obviously in good spirits as he talked to his nurses in his sterilized quarters in the National Heart Hospital. But complications developed and, after a nine day fight for his life he died of overwhelming infection 46 days after the operation. Later Mr. Donald Ross, who had carried out the operation, said that too much of the old heart had been left behind and this had resulted in the formation of clots along the join. At the time of writing only one other heart transplant had been carried out in Britain, at the same hospital, Mr. Reginald Forde, aged 48. He was desperately ill when, on July 26, he was given the heart of a man who had been fatally injured in a car crash. Mr. Forde died 60 hours after the operation and doctors said that if a heart had become available a week earlier he might have survived. Anti-rejection therapy had begun five days before the operation in the expectation that a heart might become available after the following week-end's road accidents or from some other mishap.

With varying degrees of success heart transplants had been carried out in South Africa, the United States, India, France, Great Britain, Brazil, Argentina, Czechoslovakia and Japan, most in the U.S.A. By early September there had been 41 transplants and, of the first 31, eleven had survived the first crucial 20 day period. Quite the most prolific and successful surgeon was Dr. Denton Cooley, of Houston, Texas, who had carried out eleven operations. Three patients had died and of the

others, six had got through that first crucial period. One of his patients, 47 years old Everett Thomas, became, on July 26, the first heart recipient to go back to work.

Criticisms and the Future.

Among objections to the publicity surrounding some of the operations there were complaints about "I'm backing Britain" flags and special ties in evidence at a press conference following the Frederick West operation. On a different level there was the argument that these operations were taking a disproportionate amount of medical effort and money. Surgeons were reported to be charging nothing for the operation but Mr. Thomas's stay in hospital is reported to have cost £10,000 in hospital charges alone, the 16-day fight for the life of another American cost £12,000 and an American journal estimated the cost for Mr. West at £500 a day. Lord Cohen of Birkenhead, the eminent physician, put the question in a public speech, "Is it right that we should spend £10,000 on a heart transplant or spend it on another health centre?" The British Medical Association at its annual meeting asked its planning unit to look into the whole question of medical priorities. Surgeons at Hammersmith Hospital, famous for pioneer work in heart surgery and kidney transplants, explaining why they were not undertaking heart transplants, said it was difficult to justify the maintenance of a large team for what could be, at best, just a palliative and that only for a minute fraction of patients. They also referred to another objection, the great mystery still surrounding the immune process by which the body rejects foreign proteins, whether they be disease germs or transplant organs. It does appear, though, that the rejection phenomenon does not act quite so strongly in the case of the heart as in some other organs. Anti-rejection drugs can be used in doses which do not necessarily make the patient is defenceless against infection.

High hopes are held for a new development in immunology, the use of anti-lymphocytic-serum, or ALS, to diminish the lymph activity on which the immune reaction appears to depend. It is prepared by injecting one species with the lymph of another; horses can be used to produce anti-human serum. But one other cause for concern is the question whether or not the donor is really dead before vital single organs are removed. When Prof. Roy Caine, the Cambridge surgeon who carried out the British liver transplant, suggested at a Rhodesian congress that there should be an independent team of doctors to decide on the question of death, Prof. Barnard replied that this was an insult to the integrity of transplant surgeons. However, world medical opinion hardened in favour of an independent decision and the British Medical Association suggested that it should be based partly on electrical studies of the brain. But a group of Edinburgh surgeons pointed out that reliance on the "brain wave" test to decide that cerebral function had ended and that there could be no real life again, was not satisfactory. They had had patients with no reaction on electro-encephalograms who had fully recovered. This problem of the definition of death was worrying the British Ministry of Health and also the Soviet Ministry of Health—which had forbidden heart transplants because of the problem and also that of rejection. But one Russian team, it was known, were working on the problem of reanimating hearts of dead persons—and, at the same time, by perfusing the brain with highly oxygenated blood, were bringing back to life those people in a state of "clinical death" who, in other circumstances, might well be used as donors. But, as Prof. Barnard has said,

when all these problems have gone there will still be a shortage of human hearts. He has suggested that other animals would soon be used as donors, probably chimpanzees and baboons and, in ten years time, artificial hearts could be the prevalent technique. An attempt at the National Heart Hospital to use a pig's heart in parallel with the patient to give a boost to carry him through a potentially curable condition failed and the technique was abandoned after unfavourable publicity. On the artificial heart front work was going on in the United States and at Strathclyde University, Scotland. At the latter, a gas-powered artificial heart had been designed which could operate for seven hours on the contents of a two pound plastic cylinder of gas.

NATURAL GAS

The long drawn out negotiations over the price to be paid for North Sea gas by the Gas Council came at least to a beginning of the end with an agreement with Phillips Petroleum Company in March, 1968. This was for a price of 2·87 pence a therm for gas from the Hewett Field and later Phillips's partner, Arpet, agreed to the same figure. The two companies entered into 25-year contracts to supply an average of 350 mcf/d (million cubic feet a day). Then the Shell-Esso group, working the Leman Bank field, the richest of all, also accepted the 2·87 pence figure as an interim agreement. During the price negotiations it had been reliably reported that the exploring companies were holding out for 4·2 pence a therm while the Gas Council had originally offered 1·8 pence. The Ministry of Fuel had seemed adamant that the figure should not go over 2·5 pence, so it could be considered that the companies had achieved some small concession. At any rate, despite gloomy predictions that this sort of price would not make further searches for gas worth while, Arpet announced its own plans to continue exploration. It did seem that there was some relaxation of effort for, with only four rigs in operation, the summer activity was the lowest since drilling began. But, towards the end of the summer, Phillips announced another find, a new field, named "Deborah", producing an initial flow of 26 mcf/d. Deliveries began from the Leman Bank and Hewett fields during the second part of the year, to add to the 100 mcf/d which had been coming ashore from the British Petroleum platform on West Sole. With production expected to begin from the fourth main field, Indefatigable, during 1969, production should reach the 2,000 mcf/d expected in 1971, according to the White Paper on Fuel Policy of November, 1967.⁴ The Gas Council, in the expectation that further reserves would be discovered, was planning for a production of 4,000 mcf/d by 1975, almost quadruple the total present gas supply. Despite differing opinions about the prospects put forward by different sections of the fuel industry—coal, for example, feeling less enthusiastic than the oil companies—it was generally agreed that the present reserves, estimated at 25 million cubic feet, could sustain a production of 3,000 mcf/d for 20 to 25 years.

Not all Britain's natural gas is hidden beneath the North Sea. A strike was made in the North Riding of Yorkshire near the site of one of similar proportions in 1966. Between them they pointed to the biggest gas find ever made on the mainland and indicated a reservoir able to yield 150 mcf/d. The gas flow was said to be faster than from any other field in Europe and the cost of production attractive compared with that in the North Sea. A survey also began off the Welsh coast, many geologists believing that the continental shelf there is also

likely to contain underground structures holding oil or gas or both.

Finance and Pipelines

The cost of the national conversion to natural gas led the Gas Council to seek an increase in its borrowing powers, from the £1,200,000,000 limit set by 1965 Act to £2,400,000,000. By March 31, 1968, the Gas Council had borrowed a total of £1,063,000,000 under the original act. It estimated then that from April 1, 1968 to March 31, 1973, it would need to spend £1,600,000,000, of which it would provide £500,000,000 from its own resources. Of this £1,221,000,000 would go on providing fixed assets, primarily transmission, storage and distribution facilities, with £276,000,000 going to meet the cost of conversion of equipment to burn natural gas. Transmission means pipelines—at a cost of £1,000 to £3,000 a mile for every inch in diameter. The Council plans a 2,500 mile national transmission system for natural gas. In June it announced contracts for laying 240 miles of large diameter pipeline, half the total mileage to be laid during the current financial year. There were then already 800 miles of the network in operation or under construction. The biggest new project was a 90 mile long 30 inch diameter line to run from the end of the existing natural gas grid, between Leeds and Bradford, to Blaydon near Newcastle upon Tyne.

Not only would it supply North Sea Gas to the Northern Gas Board plant there and eventually go on into Scotland, it would also link with the existing pipeline running across the Pennines from Newcastle to Carlisle. In those 90 miles it would cross eight rivers, one canal and the A.1 road. A 24-inch pipeline would take North Sea gas to Bristol and the West Country and another would supply Cheshire and North Wales.

World Position

The price agreement of 2·87 pence a therm was noted with interest not only in Britain. It was thought to have some general application in Europe where, for example, it was reported that the Russian price for delivering gas to the Austrian border for supplying Austria, Italy and, possibly, France, was 3·8 pence a therm. That gas, though, would have travelled immense distances across Russia through pipelines laid at a cost which would make the Gas Council's borrowing powers look trivial, viewed in the whole world context. At the largest forecast it seems that natural gas will never make up more than 15 per cent. of our own energy balance while in the United States it accounts for 35 per cent. and in the U.S.S.R., where it is growing phenomenally, it has already reached 17 per cent. These two countries have the advantages of vast spaces and enormous reserves, not to be expected in a single European country. However the prodigious discoveries at Slochteren in the province of Groningen in Holland in 1959 gave a great boost to European prospecting activities as well as to European supplies and was the incentive behind the North Sea exploration. The Groningen field has reserves of around 60 billion cubic feet and was the largest known gas field in the world, though it has now almost certainly had to yield this title to at least one of the new Siberian discoveries. Between them the two world giants, the United States and the U.S.S.R. consume 80 per cent. of the world's natural gas and hold around half the global reserves. Although there are enormous reserves in the Middle East, much of the gas is flared off, except where it is returned to maintain pressure, though there is now a growing trade in liquified gas with Japan.

Previously much of the American gas was also wasted but now all but 4 per cent. is used and accounts for over one third of all American energy. U.S.A. production in 1967 was 51,000 mcf/d, about three times that of Russia, though the Russian figure was equal to 230 million tons of coal a year. In terms of reserves the American position is not so favourable. Proved reserves there amount to just under 300 billion cubic feet. The Russian figure was only half this two years ago but Siberian discoveries have already lifted it over the 300 billion point and one source has estimated ■ total of 2,000 billion, enough to maintain present total world consumption for over a century. The United States is already crisscrossed by 215,000 miles of natural gas-pipelines. The U.S.S.R. is still building its gas grid, with matters complicated by the fact that the biggest discoveries are at great distances from the main industrial areas. Pipelines of 56 inch diameter have already been laid, the biggest in the world, and, at the time of writing, final tests were going on preparatory to the laying of 100 inch pipelines to tap the vast Tyumen fields. One pipeline of this size could carry three or four times the 4,000 mcf/d the Gas Council hopes for by 1975. In Western Europe, apart from Holland, there are gas fields in France, West Germany and Italy. France may have enough to export, following a second large find, but most European countries have to import from Holland or, in liquified form, from North Africa. Methane, the principal constituent, can be liquified at -258°F . and can be shipped in specially insulated tankers, though at a total cost three times that of crude oil, in terms of heat content. Apart from its heating value, natural gas has considerable chemical uses. Excess sulphur, at first ■ problem because of the need to remove it, is proving a valuable asset to some countries, particularly France. Ethane, propane and butane may be present to provide raw material for the petrochemical industry. The hydrogen present can be used to produce ammonia and, in time, could be the fuel for hypersonic aircraft and rockets. Then there is helium, vital in the new low-temperature science and industry because of its low liquefaction point. Physicists meeting in St. Andrews, Scotland, last summer, were concerned that there might not be enough for the world's needs by the turn of the century. Much has already gone to waste in natural gas. Now they want it extracted and stockpiled to await its use.

THE GOLD CRISIS

The international financial system has been under severe strain for the past twelve months and confidence in the major currencies has frequently been at a low ebb with the result that speculative pressures have emerged. Inevitably this has brought about an unusually heavy demand for gold, the price of which has at times risen to unprecedented heights despite declarations by the United States authorities that the existing gold price would be maintained. Nor did the announcement of measures to reduce the American balance of payments deficit and the abolition of the statutory 25 per cent. gold backing of the Federal Reserve note issue convince speculators that a rise in the dollar price of gold was not inevitable.

Apart from the U.S. dollar, the link between currencies and gold is somewhat tenuous. Orderly conditions in foreign exchange markets in the greater part of the world, however, are governed by the rules of the International Monetary Fund under which the par values of member countries' currencies are expressed in terms of gold and in terms of the U.S. dollar of the weight and fineness in effect on 1st July, 1944. Par values are therefore

directly related to the price of \$35 per ounce, at which since 1934 the U.S. authorities have been prepared to deal in gold with central banks and official monetary authorities. Most countries, and the United States in particular, have therefore seen merit in maintaining stability in the \$35 gold price, since wide fluctuations could easily undermine the stability of currencies with consequent effects on world trade.

Orderly conditions in the gold market have, in recent years, been maintained by the gold pool which co-ordinated the gold operations in London of certain European central banks and of the Federal Reserve Bank of New York. The origins of the gold pool can be traced back to the autumn of 1960 but it began to take more formal shape in October 1961 when the U.S. financial authorities proposed an arrangement for sharing the burden of the cost of intervening on the London gold market to keep the price within reasonable limits. This proposal was accepted and the central banks of Belgium, France, Italy, the Netherlands, Western Germany and the United Kingdom agreed, in case of need, to co-operate with the Federal Reserve Bank of New York in a sales consortium. The Bank of England acted as operating agent for the group, drawing on ■ pool of gold to which the European central banks contributed according to agreed quotas, while the United States undertook to match the combined contributions of the other participants, thus taking a 50 per cent. share in the consortium. France withdrew in 1967, but the operations of the pool and the expression by the remaining central bank members of confidence in their ability to maintain the existing gold price and exchange parities was undoubtedly ■ stabilising influence in the upheavals of November 1967 when sterling was devalued.

A similar reaffirmation in March 1968 to continue their support to the pool, based on the fixed price of \$35 per ounce of gold, failed to check ■ fresh wave of speculative buying of gold. There is little doubt that in meeting the exceptionally heavy demand the members of the gold pool became alarmed at the rate at which the gold portion of their reserves was being depleted. By Thursday, March 14, drastic action was clearly necessary and at the request of the United States authorities the London gold market was closed. Friday, March 15, was declared a bank holiday and an emergency meeting of the central bank governors of active gold pool countries was held over the week-end in Washington.

The outcome of the Washington meeting was that the gold pool came to an end and was replaced by arrangements whereby the United States authorities continue to buy and sell gold at the price of \$35 an ounce in transactions with monetary authorities, but the seven central banks no longer supplied gold to any free market, nor sold gold to monetary authorities to replace gold sold by those authorities to the market. They also stated that they no longer felt it necessary to buy gold from the market. To enable these new arrangements to settle down it was agreed that the London gold market should remain closed until April 1. There was also agreement at the conference to co-operate even more closely than in the past to minimise flows of funds contributing to instability in exchange markets and to offset as necessary any such flows as might arise.

These steps conserved for monetary use the gold stocks of ■ important part of the international monetary system, but they did mean that while the price of gold in free markets is above \$35 an ounce there is likely to be very little addition to official gold reserves. The need to restore confidence in the reserve currencies is therefore greater than

ever and in this connection the scheme for Special Drawing Rights agreed upon by the Group of Ten countries (France abstaining) was an extremely important contribution to strengthening the monetary system.

The foregoing arrangements in effect inaugurated a two-tiered price system of gold and many people doubted whether this could long survive. When the London gold market reopened the price of gold was fixed at \$38. Growing uncertainties led to renewed buying of gold by speculators and investors and the price moved steadily higher until the French crisis broke when a figure of \$43 was reached. Further expressions of determination to prevent the situation getting out of hand gradually brought the price of gold down and by mid-July it touched around \$38. Returning confidence in the international monetary situation played a part in this movement which also owed something to the expectation that South Africa might begin sales in the free market. Dealings were also affected by rumours that Russia might be re-entering the market as a seller after a long absence to pay for grain imports.

Gold still plays a vital part in the international monetary system, but it would clearly be an advantage if it could be insulated against some of the pressures which are generated at critical periods. Hence the attention that has been given to devising ways and means such as Special Drawing Rights or similar arrangements whereby additional lines of defence against speculation are created. Within this category also comes the agreement to reduce the volatility of the sterling balances by providing cover against loss through a further devaluation of sterling. Doubtless other protective measures will be evolved in due course but the strongest defence of all will always be a sound world economy with no distorted balance of payments positions. To achieve such a desirable state of affairs will call for constant watchfulness on the part of the monetary authorities.

In seeking an agreed policy for operating a world monetary system based upon gold there is always a conflict of interest between the producers and the monetary authorities. This was highlighted by the sequence of events towards the middle of 1968. The drop in the free market price of gold of about \$3 an ounce was, as already mentioned, partly due to the expectation that South Africa might resume sales of gold to the London market. The South African Finance Minister subsequently let it be known that South Africa had secretly sold "a substantial amount of gold" to the free market in May and June and he went on to say that South Africa reserves its right to sell both to central banks and on the free market. No further information was given as to the timing of such sales or the quantity of gold involved.

Sooner rather than later it seems probable that South Africa will be forced to sell more gold. The South African Government is presumably anxious to have freedom to divide sales between the free and the official markets in such a way as to reap the greatest benefit. Meanwhile the United States' position is still that all South African gold should be sold through the market with the aim of pushing the market price not merely close to \$35 but even below it. The Secretary of the Treasury made it clear that the United States is opposed to any kind of support for the market price.

At the time of writing deadlock has been reached. But it is clearly in the interests of both the United States and South Africa and of the international monetary system that a more flexible position should be adopted. Meanwhile the interested observer will keep in mind the fact that since the

war, the total of gold in international monetary reserves has dropped from over 80 per cent. to just over 50 per cent.

DECIMAL CURRENCY IN THE UNITED KINGDOM

The Decimal Currency Act 1967, gave effect to proposals described in the White Paper, "Decimal Currency in the United Kingdom" (Cmnd. 3164) presented to Parliament in December, 1966. From February 15, 1971, the £ will be the major unit of currency as at present but it will be divided into 100 minor units. The minor unit is to be called "the new penny" and there will be six denominations in the new coinage, one of which will eventually replace the 10s. note. The £, £5 and £10 notes will remain in use, although a new series of these notes, together with a £20 note, will be introduced over the next few years.

Halsbury Committee Recommendations

A Committee of Inquiry headed by the Earl of Halsbury recommended in July, 1963, by a majority of four to two the adoption of the £-cent system (now to be known as the "£-new penny" system). As Australia decimalized in February, 1966, and New Zealand in July, 1967, the United Kingdom is now the only major country in the world without the benefit of a decimal currency. Decimalization will harmonize money and other calculations. This will not only speed money calculations and the mechanics of payment and change-giving in shops, but it will also make it possible to use for monetary calculations aids intended for ordinary calculations, enabling calculating machines to be standardized and manufacturers to keep down costs and compete more easily abroad. In schools, teaching time will be saved and textbooks simplified.

In the view of the Halsbury Committee as a whole there were eight features which were desirable in a decimal currency system. These could be divided into two groups of four; the first being features inherent in the system and the second being features relating to the introduction of the system.

The system (1) should be a consistent decimal system and should seek to maximize the benefits hoped for from decimalization; (2) should be simple; (3) should be flexible, and convenient for money transactions of all values; (4) should be lasting. The introduction of the system: (5) should not affect the international standing of sterling; (6) should not present people with undue difficulties of adaptation in the changeover period; (7) should not result in avoidable price changes; (8) should not result in unduly high machine and non-machine costs. The Committee pointed out that there was no single decimal system which would incorporate all these desirable features fully. Any system recommended must be a compromise. In their Report they analysed the merits of 25 systems—four of them in detail—and concluded that the final choice must lie between the £-cent and 10s.-cent systems. In both systems the smallest coin would be worth the equivalent of 1·2d..

The Government's View

The Government considered that the practical advantages of retaining the £ were decisive and it therefore followed the majority report of the Committee which favoured the £-cent system. This decision was not based primarily on the "international case" for the £, as there are other arguments for retaining the £ which are more obvious and concerned with sterling as a domestic currency. A high value major unit has advantages

in a highly developed industrial and trading economy and, as the Halsbury Committee's majority report stressed, to halve the value of the major unit by adopting a 10s. system "seems to go against the economic logic of history". There are also both short and long term accounting and machine advantages in retaining the £. During the changeover, the costs of converting accounts in industry and commerce will be substantially lower as well as the costs of converting business machines. In the long term these advantages are also important. Retaining the high value unit means a more efficient system and a more effective use of machinery. Furthermore, given that the importance of currency units changes as standards of living rise, there would need to be powerful reasons to justify a switch to a major unit with only half the value of the present £.

Retaining the £ avoids an important difficulty of the 10s. system: finding ■ acceptable name for ■ new major unit. Under either system ■ new name is required for the minor unit. The minor unit is to be called a "new penny" during the changeover period and the adjective "new" is to be gradually dropped after the transition.

"Associability"

The 10s. system has some short term advantages of what the Halsbury Committee called "associability", which means the ease with which it is possible to translate sums of money from £ s. d. to decimals and back and to other factors which affect the willingness of the general public to adapt themselves to the new system. However, the £ has a very important "associability" advantage because it retains the most important unit of our money values as a familiar point of reference. The problem of conversion from £ s. d. to decimals will be largely overcome by conversion tables and dual-price labels in shops. Although the £ system has

colloge disadvantages—mainly the introduction of ■ new halfpenny—compared with the 10s. system these disadvantages are essentially transitional or short term. There should be no significant difference between the two systems in the cost of the changeover or in price increases stemming from the change.

As well ■ being the domestic currency of the United Kingdom the £ sterling is also widely used throughout the world as ■ trading and ■ reserve currency. Between one-quarter and one-third of the world's trade is transacted in sterling and almost half of this covers trade between countries other than the United Kingdom. The amount involved is something of the order of £18,000,000,000 ■ year in each direction and the use of sterling for this purpose contributes to the City's invisible earnings of about £200,000,000 a year. The Government considered that there was ■ danger that if ■ new unit were introduced some of those who at present hold or use sterling might cease to do so.

The New Coinage

With one exception, the Government has followed the Halsbury Committee recommendations on the choice of coins, weight-value relationship and the denomination of the halfpenny. The exception is the 20 new penny piece which the Government considers would be unpopular.

In addition to the five recommended coins, which are described in the Act, a new seven-sided coin—a 50 new penny piece—will be introduced in October, 1969, to replace the 10s. note. This move will not really form part of the decimalization process and is being made primarily for economic reasons: although costing more to produce, a coin will last probably 40-50 years, compared with an average life in circulation of no more than 5 months for a 10s. note.

<i>Denomination</i>	<i>Present Value</i>	<i>Metal</i>	<i>Standard Weight (grams)</i>	<i>Standard Diameter (centimetres)</i>
New halfpenny.....	1·2d.	bronze	1·78200	1·7145
New penny.....	2·4d.	bronze	3·56400	2·0320
2 New pence.....	4·8d.	bronze	7·12800	2·5910
5 New pence.....	1s.	cupro-nickel	5·65518	2·3595
10 New pence.....	2s.	cupro-nickel	11·31036	2·8500
50 New pence.....	10s.	cupro-nickel	13·5	3·0

The complete new coinage will, therefore comprise the six coins shown above. The 5 and 10 new penny coins were put into circulation on April 23, 1968: this was made possible because, except for their design, they are identical in value, size, weight and metal content with the shilling and florin respectively, and are completely interchangeable with them. Although contained in souvenir coin sets—which have been on sale since June, 1968 for general familiarization purposes—the other three recommended coins will not become legal tender until Decimal Day. These coins differ in size, weight and value from the coins they replace.

Following the changeover in February, 1971, there will be a transitional period during which £sd and decimal coins will circulate together. This period is necessary because it is impossible to convert the country's five million accounting, vending and other similar machines overnight. The Decimal Currency Board considers that it is unlikely that the period will exceed 18 months and that it may well be shorter.

To avoid confusion with the 2p coin during the changeover period, the present halfpenny will be demonetized on August 1, 1969, and the half-

crown—which has an awkward decimal equivalent of 12½p—on January 1, 1970. The clearing banks are already co-operating in the withdrawal of the halfpenny from circulation. The major tasks in the preparatory period, which has already begun, will be the minting of 9,000 million decimal coins and their distribution throughout the United Kingdom; the conversion of the five million machines already referred to; and the making-known by intensive publicity campaigns of the issues involved—and the need on the part of management, industry, commerce and the man-in-the-street to plan accordingly.

Decimal Currency Board

The preparatory work, including ■ big campaign of public education, will be co-ordinated by the Decimal Currency Board (see pp. 373-4). The expenses incurred in minting the new coins and the remuneration and expenses of the Decimal Currency Board and its staff will be spread over a period of some six or seven years. The estimated net cost of minting the new coins is £30,750,000,000. Compensation for change-over costs are not, as a general principle, to be acceptable. The functions

of the Board are: (a) to examine, in consultation with such organizations and persons as the Board consider appropriate, problems involved in the transition; (b) to furnish information and advice about the new currency and coinage, and to publish, whether by advertisement or otherwise, such information as the Board thinks useful for familiarizing the public with it and its relation to the existing currency and coinage; (c) to promote arrangements for the adaptation or replacement of commercial and other equipment designed to record or calculate in the existing currency or to be operated by the existing coinage; (d) to receive and consider representations in respect of expenditure or loss incurred or to be incurred by particular persons or classes of persons in consequence of the change; (e) to make investigations and surveys for obtaining information relevant to the exercise of any of the functions of the Board.

THE BRAIN DRAIN

The migration of qualified engineers, technologists and scientists to and from the United Kingdom has aroused considerable public interest in the past few years, in particular their emigration to the North American continent. There is no doubt that public opinion is sensitive to any image of this country which suggests a flight of talent and this aspect was somewhat emotionally termed "The Brain Drain".

Although there is nothing new in migration itself, the migration in recent years has been highly selective, with ■ greater emphasis on qualified manpower. Year by year, the United Kingdom loses by emigration appreciable numbers from its first-rank manpower and most of this loss is in men of the age range 25 to 35, at the height of their mental and physical powers and at the start of their most productive years. It is difficult to give precise figures of the cost to the economy of the emigration of such qualified people, but the loss to the British economy of an able young engineer who emigrates has been estimated at just under £30,000.

Statistics show that in recent years there has been ■ large increase in the flow of engineers and technologists to North America. From 1961 to 1966, as is shown in the table below, their numbers quadrupled and the American proportion of the total flow of engineers and technologists increased from little more than a quarter to almost a half.

Destinations of British and Commonwealth engineers, technologists and scientists emigrating in the years 1961-1966

	Total	North America	Other countries
<i>Engineers and technologists</i>			
1961	1900	500	1400
1962	2200	700	1600
1963	2500	800	1700
1964	3100	1000	2100
1965	3300	1300	1900
1966	4200	2000	2200
<i>Scientists</i>			
1961	1300	800	500
1962	1300	800	500
1963	1500	900	600
1964	1700	1000	700
1965	1800	1000	800
1966	2000	1100	900

The basic reason given for the emigration of such qualified persons to North America from this

country is that in the last twenty years or so massive United States investment in pure and applied science such as the space programmes, has led to the establishment of new and well-endowed centres both in industry and at the universities. Thus a young graduate has many more choices open to him in the United States than in the United Kingdom.

In November, 1966, the Committee on Manpower Resources for Science and Technology appointed a Working Group "to study the international migration of qualified engineers, technologists and scientists as it affects the United Kingdom; to identify both the advantages and the disadvantages; and to make recommendations accordingly". It became clear to the Working Group at the outset that the principal movement causing concern was emigration to North America, and particularly to the United States, and therefore, their subsequent report concentrated on the causes and effects of this movement.

The following is a summary of the main conclusions and recommendations in the Working Group's Report, published in October, 1967:-

There is a serious brain drain of young engineers, technologists and scientists from the United Kingdom.

The right solution is to create more challenging opportunities, particularly in industry, for talented people. This will require, as an element, a high and sustained level of industrial investment.

It will also require greater recognition that the source of national wealth is in industry, and that new ideas create wealth only if commercially exploited.

The national research and development effort should be kept under review to ensure that it is effectively directed towards increasing national wealth.

More effective long-term planning of Government-financed projects, including research and development, is necessary. An Annual Review should be published.

Government and industry should ensure that adequate provision is made to meet the need for risk finance for promoting research and development projects of potential long-term benefit and for exploiting them commercially.

The Government should consider the case for financial incentives for manufacturing industry to encourage the more effective employment of highly qualified engineers, technologists and scientists.

We reject as measures to counter the brain drain all such negative suggestions as the physical control of emigration; reimbursement by nations or individuals for education costs; restricting university places in certain disciplines; or curbing foreign recruiting agencies.

The Government should sponsor ■ determined and concerted effort to recruit engineers, technologists and scientists in North America for British industry.

Statistics of the migration of qualified manpower are inadequate. The Government should consider improving the present arrangements.

There appears to be a somewhat artificial division of Departmental responsibilities between industrial training and education directed towards the needs of industry.

The United Kingdom should play ■ full part in international discussions on the effects of the brain drain for developing countries.

Greater mobility between employments within the United Kingdom is essential; pensions should be made readily transferable and other obstacles to mobility should be tackled.

There is room for ■ more professional approach to management. There should be Anglo-American and intra-European exchanges of teams to study

management attitudes to the employment of qualified manpower.

Engineers, technologists and scientists should play a fuller part in the formulation of company policy and objectives.

Industry must be able, allowed and prepared to recruit and retain the best engineers, technologists and scientists. There should be a deliberate national policy of higher pay on a selective basis for talented young men in these fields in industry.

Industry should appoint more engineers, technologists and scientists to serve on its Boards of Directors. It should also make greater use of scientific career ladders.

The excitement, rewards and challenge of industry need to be more imaginatively presented to talented people in the universities.

Industry should appoint more university staff as part-time members of Boards of Directors. Universities should appoint more people from industry as visiting professors and lecturers.

Universities should reverse the current tendency to train scientists towards academic achievement as an end in itself and should direct the emphasis of their education more towards the needs of manufacturing industry.

Universities should recognize work in industrial laboratories for higher degrees.

Universities should consider linking or combining faculties of engineering, technology and science.

ALEC ROSE'S VOYAGE

Alec Rose, a 59-year-old greengrocer, left Portsmouth on July 16, 1967, to sail round the world single-handed in his 36-foot ketch *Lively Lady*, on what he called "my personal adventure". The first leg of his trip was a 14,500-mile voyage to Australia following the same route taken by Sir Francis Chichester. He encountered two major setbacks en route, first when his rudder snapped off and then with 3,000 miles to go, the main-mast backstay also snapped leaving the mast waving in strong winds. He managed to fix both by hand. Despite these difficulties he arrived in Melbourne on Dec. 17 and was given a hero's welcome.

He stayed in Williamstown for a month's rest with his son's family before leaving on the return voyage to England by way of Cape Horn on Jan. 14. Expecting to cover the 12,000 miles to Portsmouth in about 130 days he soon met with unfavourable conditions and made slow progress. On Feb. 1, Rose was forced to put into Bluff in New Zealand for repairs to a rigging attachment on the mast, but set sail five days later.

The Chilean Navy reported that *Lively Lady* had rounded Cape Horn on April 1 in a choppy sea. Steady progress marked the last leg of her voyage. Later in June anxiety was rising when a search for Alec Rose had failed to make contact with him for nine days, but on June 30, *Lively Lady* was spotted by R.A.F. Shackleton 25 miles south-west of the Isles of Scilly.

Alec Rose completed his lone voyage when he crossed the finishing line at the Royal Albert Yacht Club, Southsea, on the morning of July 4, to a rapturous welcome from thousands lining the shore. He was welcomed by the Lord Mayor of Portsmouth and received messages of congratulations from the Queen and the Duke of Edinburgh, and from the Prime Minister on behalf of the Government. He was then driven at the head of a procession to the Guildhall with crowds lining the route. On July 20 he was knighted by the Queen at Buckingham Palace.

THE DONOVAN REPORT

In April 1965, a Royal Commission on Trade Unions and Employers' Associations was appointed

under the Chairmanship of Lord Donovan. It was the fifth Royal Commission to be appointed in the last hundred years to inquire into questions affecting industrial relations. The twelve-strong Commission had "to consider relations between management and employees and the role of trade unions and employers' associations in promoting the interests of their members and in accelerating the social and economic advance of the nation, with particular reference to the law affecting the activities of these bodies." Their 145,000-word report was published more than three years later on June 13, 1968.

It recommended the setting up of a permanent statutory Industrial Relations Commission to ensure that Britain's collective bargaining system would be given a complete and radical overhaul. It also recommended that company and factory agreements should become the basis of industrial relations and that the boards of directors should bring about the change. The boards should review their industrial relations policies and aim to develop comprehensive and authoritative collective bargaining machinery at company and/or factory level. They should also welcome the exercise by employees of their right to join trade unions, develop positive management policies on specified matters and collect systematic information, which should be made available to workers' representatives insofar as they might reasonably require it.

The Commission reported that voluntary action was not enough and that legislation and Government action were necessary to speed reform. It proposed that an Industrial Relations Act should be passed under which an Industrial Relations Commission would be set up. In addition, companies would be obliged to register company and factory agreements with the Department of Employment and Productivity. The Commission would investigate and report on cases and problems arising out of the registration of agreements and the industrial relations difficulties being encountered in a factory or industry.

The report further suggested that industry-wide agreements should be revised and should cover only those matters which they could settle effectively. They could be used to lay down guide lines for satisfactory company and factory agreements. The present formal and informal systems of industrial relations only oppose each other, leading to the inefficient use of manpower, unofficial strikes, reluctance to change and the undermining of the incomes policy.

Unofficial strikes

The members of the Commission decided that by far the most important part in remedying the problem of unofficial strikes and other forms of unofficial action would be played in reforming the institutions of whose defects they are a symptom. New measures were needed to encourage the extension of collective bargaining. These included legislation to protect freedom of association; handling of problems of trade union recognition by the Industrial Relations Commission; amendment of the Wages Councils Act; and provision of compulsory arbitration on a selective basis. The Commission also made proposals for safeguarding the rights of individuals in industry. Workers should have statutory protection against unfair dismissal. Disputes between individual workers and employers arising out of contracts of employment or statutory rights should be handled by labour tribunals. Members or would-be members of trade unions should have a right to bring complaints of unfair treatment or of election malpractices on

the part of a union before an independent review body.

There should also be new laws relating to union rules covering admission, discipline, disputes between unions and members, elections, and shop stewards to provide better safeguards for individuals, but without impairing the freedom which trade unions should enjoy to frame rules to meet their own circumstances.

Need for more union mergers

Among the steps recommended to secure the reform of collective bargaining were more trade union mergers and the adoption by the T.U.C. of the principle of one union for one grade of work within one factory as a guide for the development of union structure, and help by employers' associations and companies in developing orderly industrial relations. It also recommended that unions and employers' associations should in future be granted corporate personality and be registered. The law relating to labour relations and unions and employers' associations should also be codified. A special Industrial Law Committee should be attached to the Industrial Relations Commission to keep the law under review.

Greater order must be introduced into factory and workshop relations. This could be achieved by effective and orderly collective bargaining over such issues as the control of incentive schemes, the regulation of hours actually worked, the use of job evaluation, work practices and the linking of changes in performance, facilities for shop stewards and disciplinary rules and appeals.

Boards of directors and their managers need the co-operation of the unions who must sign agreements and take their share of the responsibility. This will demand reform of the unions. Employers' associations, however, could continue to play an important role in the new system, but the over-riding need was to put an end to the conflict between the pretence of industry-wide agreements and realities of industrial relations. All boards of companies should review industrial relations and employers' association should work closely with the unions.

Factory Relations

The commission decided that what was needed first of all was a change in the nature of British collective bargaining and a more orderly method for workers and their representatives to exercise their influence in the factory; and for this to be accomplished, if possible, without destroying the British tradition of keeping industrial relations out of the courts. To accomplish this, an Industrial Relations Act should be passed under which companies would be obliged to register collective agreement with the Department of Employment and Productivity. It should also apply to nationalized industries and public services other than the Civil Service. The Act should provide for the establishment of an Industrial Relations Commission, with a full-time chairman and other full-time and part-time members. The Commission would be expected, on reference from the Department of Employment and Productivity to investigate and report on cases and problems arising out of the registration of agreements. It would have to develop its own rules and methods in the course of its work.

The intention of the Act would be to promote the reform of industrial relations by establishing a system of registration which would enable society's expectations in the field of industrial relations to be brought home clearly and unambiguously to the boards of companies and to trade unions. The proposals made by the Commission were designed

to provide effective control of industrial relations, including pay, at the level of the factory and company by means of properly conducted agreements between companies and trade unions. They also considered that it was contrary to the public interest that an employer should stipulate in a contract of employment that an employee was not to belong to a trade union.

The Commission agreed that it was for the Government to formulate and state in clear terms what its policy was in relation to the lowest paid and how it was to be pursued. It rejected, however, the possibility of dealing with restrictive practices by a tribunal.

Use of Manpower

The report went on to say that the Commission's proposals for the reform of collective bargaining were fundamental to the improved use of manpower. There was also an urgent need to secure the rapid and general adoption of systems and training. Objective standards by which to judge qualifications must be laid down and a person who had attained those standards must be universally accepted as qualified and eligible to do the work in question.

The Commission proposed that existing powers dealing with unofficial strikes, and other forms of unofficial action, should be widened, and reform of the collective bargaining system would solve this problem. It also said that it was desirable that satisfactory voluntary procedures governing dismissals should be developed and extended. Any worker who felt himself unfairly dismissed should have the right to appeal to a labour tribunal seeking compensation, or if both parties agreed, reinstatement.

Examining the case for and against the closed shops, the Commission came to the conclusion that the possibility of banning them must be rejected. Although abuse of power by unions was not widespread it did happen. Safeguards, therefore, were needed so that an applicant for union membership who considered that his application had been wrongly turned down should have the right of complaint to a new independent review body.

Finally, on employers' associations, the report says that it is hoped that the Confederation of British Industry and the employers' associations will reconsider their attitudes on union recognition with a view to encouraging the development of collective bargaining.

THE FOOT-AND-MOUTH DISEASE EPIDEMIC

The 1967-68 foot-and-mouth disease epidemic was the worst ever experienced in Britain. From Oct. 25, 1967, to June 4, 1968, 2,364 outbreaks of the disease occurred and approximately 211,800 cattle, 108,300 sheep and 113,300 pigs were slaughtered at a cost in compensation of over £26,000,000. Cheshire and Shropshire were the counties hardest hit, with over two-thirds of the total outbreaks.

The original outbreak was reported on Oct. 25, 1967, on a farm at Nantmawr, near Oswestry in Shropshire, and by Nov. 16, 1967, more than 80,000 animals had been slaughtered or condemned and 440 separate outbreaks recorded. A disease control area restriction order covering all England and Wales came into force on Nov. 17, 1967, after 55 new outbreaks had been confirmed during the day. The order prohibited the movement of animals throughout the country except under licence. Store markets could not be held and fat-stock markets only if licensed by the local authority.

The National Farmers' Union advised its members on measures to check the spread of the disease and appealed to the public to keep away from the countryside, keep to main roads and not allow dogs

to run loose. On Nov. 21, 1967, Mr. Peart, the Minister of Agriculture, gave farmers four rules to help halt the epidemic—keep as many animals as possible under cover; where practicable split livestock in separate units; have all animals examined at least every day; keep people and vehicles off farms by arranging a farm-gate collection and delivery service.

The disease control area restriction order was extended from midnight on Nov. 24, 1967, over the whole of Scotland, including the islands, making all Britain, except Northern Ireland, a controlled area. At the height of the epidemic in the latter part of November as many as 81 outbreaks were confirmed in one day, and Infected Area restrictions covered the whole of the North West Midlands. On Dec. 3, 1967, it was stated that the total number of outbreaks since the epidemic began had reached 1,456 and a total of more than 250,000 animals had been destroyed.

Import Restrictions, 1967

Mr. Peart announced in the Commons on Dec. 4, 1967, that part of the campaign against the epidemic, an immediate ban would be put on shipments of carcass meat and offal from all countries of the world except those where foot-and-mouth disease was unknown, or where there was a long history of freedom from it. He said that increases in some retail meat prices would be expected. No further licences for meat imports would be issued but this would not prevent the landing of meat already shipped. The Minister said he was still convinced that the slaughter policy was the best way to deal with foot-and-mouth disease, but he recognized that vaccine might be needed as a second line of defence.

Livestock Losses

By Jan. 3 it was reported that 356,738 animals had been slaughtered since the outbreak of the epidemic, but in the previous two weeks new cases had gradually fallen off. Farmers, however, were facing problems in other ways. Because of the epidemic, market prices of cattle had risen and although some of the farmers first affected were satisfied with the valuation put on their stock at the time, they were finding that replacements cost them considerably more. From Feb. 9 it was announced that restrictions on livestock movements and sporting events would be considerably relaxed, and there would be no restrictions in counties south of the Thames, in Essex, Suffolk and Norfolk, much of South Wales and more counties in the north of England, Scotland having already been freed. At its height, the epidemic had caused

Whipsnade Zoo to be closed, forced the Royal Smithfield Show to take place without any livestock and all horse racing in Britain to be cancelled.

A very full inquiry was made into the origin of the infection and a report was published in March. It considered all the possible means by which foot-and-mouth disease could have been brought to the original case at Bryn Farm near Oswestry. The possibility of the disease having been brought on the farm by animals or people was eliminated. The nearest outbreaks on the continent in 1967 were also too far away for carriage by birds or on the wind. The last previous cases in the United Kingdom were too far back for infection to have remained quiescent and there were no movements of animals to connect them.

The Probable Source of Infection

The inquiry examined the possibility that imported meat had been the source of infection and found that the only supplies of imported meat of any consequence distributed in the district at the relevant time were frozen lamb from Australia, New Zealand and South America. The first two were free from foot-and-mouth disease and were discounted. The butcher who supplied the Bryn Farm household purchased his supplies of imported meat from the Fatstock Marketing Corporation at Wrexham. He had received, as well as New Zealand lambs, 113 carcasses of frozen Argentine lamb. Throughout October he supplied the farm with both frozen lamb and lamb bones for the farm dogs. The disease on the farm was confirmed among pigs, and bones given to the dogs could have been carried into the yard or neighbouring fields where the affected pigs had been. The inquiry's report said that it was not possible to establish conclusively that imported frozen lamb carried foot-and-mouth disease virus to the farm, but as all other generally recognized sources of infection had been eliminated, it remained the most probable sector.

Mr. John Reid, the Chief Veterinary Officer, considering that he and the other members of the inquiry had been unable to discover any possible source of infection except Argentine lamb. Although there was not conclusive evidence that Argentine lamb was the source, the opinion was that there was sufficient circumstantial evidence for considering that this lamb was the cause of the initial case on Bryn Farm and some of the subsequent cases. The whole of England and Wales became free from foot-and-mouth restrictions with the removal of the infected area restriction around Llansilin, Denbighshire, at midnight on June 25.

NORTH ATLANTIC TREATY ORGANIZATION

Headquarters: Brussels 39, Belgium.

The North Atlantic Treaty was signed April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxemburg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany in 1955. Since April, 1952, the North Atlantic Council, principal body of the Treaty Organization, has been in continuous session. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts.

Permanent U.K. Representative, Sir Bernard Alexander Brocas Burrows, K.C.M.G. (£8,600).

The senior military authority in NATO is the Military Committee composed of a Chief-of-Staff of each member country except France, which is responsible for higher strategic direction throughout the North Atlantic Treaty area.

Secretary-General, M. Manlio Brosio (Italy).

Deputy-Secretary-General, James A. Roberts (Canada).

Asst. Secretaries-General, Joachim Jaenicke (Fed. Republic of Germany) (Political Affairs); Alfred P. Hockaday (U.K.) (Defence Planning and Policy); A. Tyler Port (U.S.A.) (Defence Support); Dr. Gunnar Randers (Norway) (Scientific Affairs). (one vacancy) (Economics and Finance).

U.K. Representative, Defence Research Group, W. B. H. Lord.

Supreme Allied Commander, Europe, Gen. Lyman L. Lemnitzer (U.S.A.).

Supreme Allied Commander, Atlantic, Vice-Admiral E. P. Holmes (U.S.A.).

Allied Commander-in-Chief, Channel, Adm. Sir John F. D. Bush, K.C.B., D.S.C. (U.K.).

BRITISH ARCHITECTURE OF 1967-68

THE HAYWARD GALLERY—
SOUTH BANK ARTS CENTRE

The opening of the Hayward Gallery by the Queen on July 9, 1968, completed the complex of buildings forming London's South Bank Arts Centre, which began in May 1949 with the building of the Royal Festival Hall for the 1951 Festival of Britain. So far the cost of the development, comprising the Festival Hall, the National Film Theatre, the Queen Elizabeth Hall and Purcell Room, including the £800,000 gallery, has been about £7,000,000, with the almost certain prospect of a further £3,750,000, together with the site being contributed by the G.L.C., towards the provision of ■ National Theatre during the next few years.

The new gallery, which was designed by architects of the Greater London Council in conjunction with the Arts Council of Great Britain, concurrently with the Queen Elizabeth Hall and Purcell Room, is named after Sir Isaac Hayward, Leader of the London County Council from 1947 to 1965. The two buildings were unified by consistent use of detailing and materials and related to the Royal Festival Hall by ■ system of pedestrian terraces which provide access from Waterloo Station concourse and Waterloo and Hungerford Bridges. The principal point of access to the Gallery is from these terraces. Vehicle access is by way of the Royal Festival Hall road to the exhibit loading bay and via the loop road between the Queen Elizabeth Hall and the Gallery to the car users' entrance. A car park for 150 cars, which is provided under the Gallery, is to be used temporarily as a park for artists performing in the concert halls, while the whole south bank car parking, including that for the National Theatre, is under construction. It is intended that eventually the car park will be available for public use ■ originally envisaged.

The basic requirement that several separate displays could proceed simultaneously and independently with controlled access to each display has been achieved by planning the galleries on two levels around a central vertical circulation core consisting of two staircases and ■ passenger lift. On the upper level are two naturally lit galleries with a total floor area of 5,500 sq. ft. It was necessary that the lighting in these galleries should be evenly distributed and without shadows, and its intensity controlled with no direct sunlight permitted to enter and ultra-violet radiation reduced to ■ acceptable level. The latter two requirements are necessary for the conservation of pictures.

In conjunction with the Building Research Station, the roofs were designed as a series of glass pyramids, steeply sloped to be as far as possible self cleansing. Below the glazing and within the depth of the structural lattice beams are baffles to exclude direct sunlight. It was necessary in the design of these, to ensure that they excluded as little natural light ■ possible. Under the baffles are motorized horizontal blinds which can be operated manually or automatically by light-sensitive cells to ensure that the desired light level within the galleries is not exceeded. Next to the blinds is a system of fluorescent lighting which can be similarly operated to reinforce the natural light should its intensity fall below the level required. The roof structure is separated from the gallery by an airtight verlarium consisting of panels made of two stretched polythene skins, the upper skin incorporating an ultra-violet filter, supported on a steel suspension. This suspension also houses a continuous electrified track which provides for alternative tungsten display lighting system.

Leading off the upper level are three sculpture

courts, open to the air, with a total exhibition space of 7,000 sq. ft. On the lower level are three artificially-lit galleries with ■ total floor area of 12,100 sq. ft. and heights varying between eleven and twenty feet. The ceilings of these galleries are designed ■ ■ series of aluminium trays in which are housed the air supply diffusers and fixings for tungsten display lights. Also within the ceiling are circulation lights which can be individually switched to suit any display layout. Facilities are provided in all galleries for wall display and in addition, in four galleries, a demountable display system is provided on a four feet module consisting of floor sockets and complementary ceiling bosses, into which posts carrying the display screens are fixed.

The walls of all galleries are plastered and finished with a matt surface. The staircases, ducts and lift shafts comprising the circulation core of the building all express the concrete structure with its carefully executed boarded finish. The floors of the four galleries in which heavy sculpture can be exhibited or over which such sculpture passes to the external courts are finished with a precast tile. The remaining gallery has a maple strip floor. Below the galleries are situated a workshop, air conditioned strong room, stores, staff lavatories, mess room and picture store, the latter equipped with sliding storage racks and having direct access to the enclosed loading bank. The plant rooms and electric intake room are also situated at this level and include a small gas boiler for domestic hot water purposes only, the heat for the building coming from the boiler plant housed in the Royal Festival Hall. From the plant room air is supplied to the galleries by main feeder ducts which are expressed in the structure over the ramp between the lower galleries and at high level externally around the galleries. In the upper two air conditioned galleries air is discharged from a series of diffusers within the verlarium and extracted through grilles at skirting level. The ventilation to the lower galleries is by plenum and extract system, again from diffusers at ceiling level and extract grilles at floor level.

With the exception of the roofs to the top galleries, which are supported on welded structural steel frames, the structure is essentially one of *in situ* reinforced concrete, the basic plasticity of the material being used to shape the structure around the complex geometrical forms of the building. The resulting membrane construction efficiently combines the structural and other functional requirements of the buildings expressing ■ formula which has been used consistently throughout the entire Art Centre project.

In common with the Concert Hall, the design of the Gallery expresses its units of accommodation. The box-type structure of the galleries is clearly expressed throughout the upper galleries resting transversely over the lower, with the part cantilevered sculpture courts forming a dominant feature of the design.

Externally, the walls of the gallery and lower areas are clad within precast concrete slabs incorporating ■ exposed finish of crushed Cornish granite aggregate in contrast to the sculpture courts and shafts from the circulation core, which, rising above the general level of the building, are of an exposed concrete finish, expressing the boarded shuttering. The doors and glazed screen to the foyer are of cast aluminium similar to that used in the windows and doors of the foyer to the Concert Hall.

THE UNIVERSITIES

Modern architecture has become almost an established part of university expansion, which all over

the country, under the guidance of the University Grants Commission, has attracted the attention of our leading architects and enriched the output of many building firms. It is becoming increasingly difficult to single out any one university or college ■ being more significant architecturally speaking than another, yet there are always buildings which for one reason or another emerge ■ milestones in design or technological progress.

Trevelyan College, Durham

Trevelyan College at the University of Durham, for example, is a building highly disciplined in detail yet informal in layout, providing ■ positive environment and ■ reaffirmation of traditional values at a time when the housing of university students is becoming a controversial issue. In their brief, the architects, Stillman & Eastwick-Field, were asked to provide a college for 250 women undergraduates. Generally the accommodation was to include single study bedrooms, with a small proportion of double rooms. There were also to be four guest rooms and flats provided for ten dons. Ancillary accommodation included a library, games room, music practice suite, common rooms, television room, tutorial rooms, administration offices, staff quarters and ■ dining hall to seat 300, including the high table. Other requirements indicated a flexibility in use, which would enable the accommodation to be equally suitable for both sexes attending vacation conferences and conventions, and also provide for the ultimate possibility of the college becoming mixed.

The site is of five acres set on a hill roughly a mile south of the Cathedral, adjoining other recent colleges sited amongst trees and grass of parkland character. The sight lines to the Cathedral required by the town planning authority precluded the use of the north-west corner of the site, and in order to maintain distant views of the Cathedral it dictated that the building should be kept as low as possible.

In order to dominate the natural features of the site ■ little ■ possible it was considered desirable that the college should be irregular, both in plan and outline. Perhaps the most notable feature of the plan is the shape of the study bedrooms, ■ wedge-shaped polygon, chosen to give an impression of increased space, together with flexibility of room arrangement; varied outlook (there being a conflict of aspect and orientation); and economic grouping of rooms around stair access.

The system of massing and articulation of the overall plan derives from the shape of the study bedrooms and their grouping into units of six, which are then paired at each staircase landing to make up one block unit. The resulting plan shape of each block is two overlapping hexagonal forms. The overall shape of the building is deliberately informal and there is no other dominant feature save the exploitation of hexagonal form, providing a very varied and interesting relationship between rooms, blocks and external spaces around the buildings.

Nine blocks, varying in height between two stories, are joined together in any of six directions, to form, with the dining hall block, a complex incorporating two small hexagonal cloisters and ■ large irregular courtyard, with two wings projecting to the north. This molecular arrangement produces its own logic of design which has been fastidiously followed throughout, encouraging the beautiful simplicity and consistency of architectural detailing, so important in the changing relationship of the blocks and spaces as one moves through and around the buildings.

Externally, the composition of the building is

expressed by a structure of warm grey, hand made, load bearing brickwork, which includes the perhaps unlikely inclusion today of brick cills and lintels, containing stained timber window frames. Generally the rooms themselves are plastered internally, but the circulation areas and the dining hall are finished in common brickwork, which has been slurred and painted—contrasting well with an exposed roof construction of triangular metal space frames, supporting a ceiling of woodwool slabs incorporating pyramidal roof lights.

Undoubtedly the college is successful socially, technically and aesthetically, a tribute to the architects' own very high standards of design and consistency of detailing throughout.

UNIVERSITY OF STIRLING

Although James VI of Scotland announced his intention of founding a "free college in Stirling", this plan was to remain unfulfilled for more than three hundred years. The first formal claim for a University at Stirling was made by the Town Council in 1946. In 1960, with the movement of national opinion in favour of University expansion, this claim was renewed, and subsequently in 1963, the Robbins Report recommended that six new Universities should be established at once and that one of these should be in Scotland. The Government's decision that its location should be at Stirling was announced in July, 1964.

In December, 1965, the University's Academic Planning Board reported to the Sponsoring Committee that an early start should be attempted, with the first admission of students by October, 1967, to be accommodated in preliminary buildings in ■ corner of the site while the main buildings were being designed and built. It was proposed that an initial intake of 150-200 students per year for the first three years would give sufficient impetus to growth; thereafter the population would increase rapidly to reach a total of 3,000 undergraduates in ten years or earlier.

The immediate problem was the provision at great speed of accommodation adequate for the first three years. On the advice of the architects, Robert Mathew, Johnson-Marshall and Partners, it was decided that there was just time for ■ simple, but permanent, preliminary building to be designed and occupied by the autumn of 1967; the University authorities would not be faced with having to replace or upgrade temporary buildings and the cost of the necessary services, particularly those connected with scientific teaching and research, would not be lost.

The building was to be a microcosm of the completed University for the first three years of its life, and thereafter was to change its function year by year as the main buildings were built and as departments were "decentred" into them. The building has therefore to be highly adaptable.

Different building methods were examined by the architects and consultants in terms of function, cost, speed and architectural character. After comparative studies had been made, a decision was taken to go ahead on the basis of a single storey light steel frame and ■ range of prefabricated components designed specifically for the project.

The layout takes the form of three single-storey terraces stepping down the slope of the exceptionally beautiful 340-acre site in the Airthrey Estate, situated against the background of the Ochil Hills. The lowest terrace accommodates staff rooms and the library, the middle terrace research laboratories, lecture rooms, and offices for the University administration, and the upper terrace teaching laboratories and the social group, including the restaurant. Each terrace is planned on a single

storey, but the roofs of three large volumes, the library, the main lecture theatre and the restaurant, rise to a higher level. Cross-corridors and staircases link the three levels at a number of points; the main link is a concourse 18 ft. wide, to which the largest rooms are closely related. The building, though large, sits inconspicuously in the landscape, the higher terraces overlooking the lower levels to obtain sun and views of Stirling Castle to the south.

At each level accommodation is designed around a series of enclosed and landscaped courts. In terms of construction the plan repeats in a series of similar bays; this repetition has been of great advantage in saving constructional time. In terms of appearance, the layout of internal walls varies from bay to bay and the landscaping of the courts varies in its arrangement of shrubs, paving and grass.

Considerable thought has been given in the constructional design of the building to the problems of building rapidly. The structure is one of steel columns spaced at intervals of 12 ft., supporting light steel trusses spanning 36 ft. over the bays of accommodation in each terrace. By placing columns outside the face of external walls, interruptions to planning from internal columns have been avoided and perimeter wall surfaces left clear for electrical and piped service runs.

Externally, the walls are for the most part pre-fabricated timber panels, finished in black preservative paint. These were designed to bear on to pre-cast concrete edge-beams spanning from stanchion base to stanchion base, to allow them to be fixed in position and glazed before the concrete site slab had been laid. With the completion of roofing, the building was wind and weathertight at an early stage in the contract, enabling programme-critical services work to get off to a good start and the wet work involved in concrete floor slabs and concrete blockwork partitions to proceed under cover. Concrete floor slabs were float-finished to eliminate the time-consuming process of screeding. Partitions were built of fair-faced blockwork finished in emulsion paint, to eliminate plastering delays. The partition blockwork is used in conjunction with a heavy suspended ceiling of mineral fibre acoustic board fixed to plasterboard to give adequate sound reduction between rooms.

EDINBURGH UNIVERSITY LIBRARY

The University of Edinburgh has six main libraries dispersed over a wide area on each side of George Square, at present holding a collection of nearly one million books acquired over a period of almost 400 years. The new building, designed by Sir Basil Spence, Glover and Ferguson, and completed in 1967 at a total cost of a little over £2,000,000, has become the centre of the whole University library system and is to date the largest university library building in the British Isles.

The University's requirements were stated in a substantial brief in 1961-62. This was expanded and modified in the course of planning the building and in the light of the University Grants Committee's developing regulations. A building was required which would serve the daily needs for study and research of an academic population of between five and six thousand persons, principally those in the Faculties of Arts and Social Sciences. The building was also to house the central administrative and processing services of the whole university library system, manuscripts and rare books in all subjects, and the central photographic and binding departments. The great majority of the books were to be on open access and available to all readers.

A prime requirement was that the building should

be as flexible as possible. All floors were to be strong enough to bear full stack weights at all points, and readers and library staff were to be assured of good lighting and ventilation throughout the building. The building was required to be simple in layout, to facilitate both the ready orientation of readers and the rapid re-arrangement of areas for alternative library use. All storeys were to have level floors for the easy movement of readers and books, and noise levels were to be kept low throughout the building.

The City planning authorities enforced a height restriction which, when coupled with the required floor area and the curtilage of the site, dictated the massing of the building. The University's comprehensive plan for the George Square area required the building to sit on a pedestrian podium at ground floor level with vehicular traffic circulating at lower ground floor level. New buildings adjoining were already designed with a strong horizontal emphasis, so that certain levels on elevation had to be carried through. Both the City and University planning authorities dictated certain external finishes.

The original requirement was that the building should accommodate just fewer than 1,900 readers and two million books. The subsequent expansion of the university, after the publication of the Robbins Report on Higher Education, caused the requirement for reader-places to be increased to 2,500. This has been achieved at the expense of a small proportion of the stack capacity but without alteration of a single wall or duct from those originally planned, thus proving the degree of flexibility in the design. The accommodation for readers now comprises nearly 1,300 seats in the reading rooms on the first and second floors, two hundred open carrels, forty typing carrels and twenty study rooms, with further seats scattered over the stack floors in "oases" and along the peripheries. The remaining reader-places are in the various reference rooms, the current periodicals room and in the manuscript and rare books department. Additional facilities include the exhibition hall (with subsidiary display space in the Drummond Room), two seminar rooms, a suite of microtext rooms, a sound room, a map area, and a small coffee room. Accommodation for library staff and their working areas is on the ground floor, lower ground and first floors, and is designed to provide the most productive and efficient working environment.

The requirement for a readily adaptable building conditioned the structural design. A very high design loading of two hundredweights per square foot was used to allow for book stacking anywhere and it was also considered necessary to keep the number of columns to a reasonable minimum. A grid of 27 ft. x 27 ft. was chosen to satisfy this demand and also the layout of book stacks, the columns themselves being kept to the same size as a stacking unit by using high quality concrete and reinforcement. A flooring system of wide shallow *in situ* beams supporting precast concrete trough units was developed and integrated with the ducting system.

Concrete columns and balcony soffits have been left a struck from the shutter with a smooth finish. Balcony fronts are precast concrete with a veneer of roach bed Portland stone used as permanent shuttering and the podium base is clad in riven Yorkstone. Windows are double glazed with silver anodised aluminium frames throughout. The main concourse is clad and furnished in teak with a quartzite floor and in this area air is pushed in through perforated ceiling tiles and extracted through the wall lining. Glazed finned screens have been designed to comply with fire regulations. All other areas are finished in white beech or plaster

with carpeted or linoleum floors. Book shelving is metal, seven feet high, and was specially designed by the manufacturers and the architects.

To produce the proper thermal environment for the preservation of the books, together with the demands of interchangeability of use of accommodation in the future and the planning in depth of the building, it was decided at an early stage that the library must be fully air-conditioned. In consideration of the number of ventilation terminal outlets and lighting fittings necessary in the ceiling, it was decided to combine them; and a linear composite lighting/ventilation fitting was developed. To offset fabric losses, a "brand" of off-peak electrical underfloor heating is provided round the perimeter of each floor. The fuel generally used throughout the George Square is electricity.

The designed temperature is 68°F., the relative humidity is 55 per cent, and the system is based on five air changes per hour, handling 200,000 c.f.m. The Rare Book Department has a separate plant room maintaining closer conditions in that area. Solar gain has been minimized by the construction of overhanging balconies on the upper floors, and the installation of grey-tinted glass on the south and louvres on the east and west sides. Special attention has been paid to noise and the noise criteria level is 25. The main ducts are constructed in brick and concrete and the distribution ducts in fibreglass. The intensity of light on stacks on the vertical plan is 12 to 15 lumens and on the horizontal plan 30 to 35 lumens. Most of the remainder of the building is illuminated to an intensity of 31 to 40 lumens. An automatic smoke detection system with a direct link to the Fire Station is installed with an automatic carbon dioxide sprinkler system in the strong room.

TOWN CENTRE,

CUMBERNAULD NEW TOWN

Cumbernauld, designated as a new town in 1956 to help in the relief of Glasgow's housing problem, took a big step forward in May, 1967, when H.R.H. Princess Margaret opened the first part of the town's huge £15,000,000 centre. Forming a vital pivot of the Cumbernauld plan, prepared under the direction of the Chief Architect and Planning Officer to the Development Corporation, R. Hugh Wilson (succeeded in 1962 by Dudley Leaker) the new centre contains the principal shopping, business, entertainment and public buildings for the whole township.

Unlike earlier new towns, Cumbernauld has no local "neighbourhood" shopping centres. Apart from small general stores in the residential areas—one shop for about every 300 houses—and a group of shops in the township of Abronhill, all the town's shopping will be concentrated in the new town centre.

The success of pedestrian shopping centres elsewhere has proved that people like to shop away from the noise and danger of motor roads. In Cumbernauld the struggle in crowded streets is replaced by pleasant conditions in the vehicle-free areas where shoppers can stroll and chat. At the same time the shopper demands easy access by car or bus and the opportunity to park the car within a short distance of the shops. At Cumbernauld this separation of pedestrians and vehicles is achieved vertically by the provision of a linear multi-deck centre with roads and car parks underneath.

The overall plan takes the form of two parallel main areas of building traversing the length of the centre. Running along the ridge of the hill on which the town is sited, and passing through the centre, is a dual carriageway road over which

bridges of varying width link the two main building zones.

At ground level the layout is devoted solely to transport and communication. The dual carriageway road links the major traffic interchanges at either end of the hilltop, and gives access to car parks planned on two floors under each of the two areas of building, with an ultimate capacity of 5,000 cars, and also to docks where goods vehicles unload and load.

After leaving the car the driver and passengers are able to move to the pedestrian decks above by escalator, lift, stairs or ramps. Goods are taken directly from the loading dock into the storage areas of the shops on the south side of the centre or are conveyed by hoists to the shopping and storage levels on the north side. A bus station is also provided and there are bus stops where access can be obtained to the pedestrian areas above.

Pedestrians will use the lowest levels only on the way between car or bus, escalator and lift, vehicles being excluded from all the floor levels above. Because of the crossfall of the site, the upper floor levels on the southern side of the centre are a half storey below those on the northern side, so that the residents from the south side housing walk up a ramp to the main shopping level while those from the north side cross a bridge leading directly to the shopping level.

Towards each end of the centre are open squares entered from the main footpaths which, with other paths, converge on the centre from the housing areas on either side of the hill. The square at the west end provides pedestrian access to the civic buildings, town church and hotel, in addition to the main commercial and other uses. The square at the east end will serve the entertainment buildings such as cinema, dance hall, bowling alley, swimming baths, indoor sports centre and cultural centre.

All the upper levels are linked by steps and ramps and bridges to give easy communication throughout the centre. The upper floors are laid out with squares and terraces, some covered and enclosed, others open. These spaces provide an attractive setting for the shops, restaurants and various public and commercial buildings.

Above the centre there will be terraces of maisonettes and stepped patio houses where the residents can enjoy the advantages of being in the centre without the hustle and noise. At this and other levels there will be views out of the centre across the town and into the surrounding countryside. Round the centre there will be spaces for open terraces, trees and an area for sports events, exhibitions or fairs.

A carefully planned balance of shops has been provided, including two supermarkets, one of which is the largest in Scotland. Office development has been one of the major successes of Cumbernauld, which is rapidly becoming a regional office centre. Negotiations are taking place all the time to bring further firms into the town. At the present time, occupied office space totals almost 200,000 sq. ft. Some of the attractions appear to be the central location with excellent communications, the wide range of housing available and the increasing flow of school leavers with high educational standards.

The first stage of the town centre ensures a full range of shopping and commercial facilities for the present population of 25,000. It is expected to reach 40,000 in about five years' time. Work is in progress to provide more for the growing population. The part under construction contains a 20,000 sq. ft. supermarket and 5 shops with a total area of 5,600 sq. ft. In addition, an arcade

will be included with a number of finished shop units on either side in various sizes. 176 car parking spaces will also be provided, bringing the total to nearly 700 of the planned 5,000. It is hoped that the shops and offices will be occupied by 1970. This is one of the first schemes of its kind in the world, and is in accord with the Cumbernauld Development Corporation's intention to provide the most efficient facilities for the people living in the town.

HOUSING—THAMESMEAD COMMUNITY

To meet the ever increasing demand for new housing within the London area, the G.L.C. has initiated its plan to build a new community for 80,000 people on about 1,300 acres of drained marshland between the Royal Arsenal at Woolwich and the Crossness Sewage Works towards Erith.

The first two phases of what is virtually to become a satellite town will be an extension of the adjoining medium density Abbey Wood estate, built during the late fifties, planned on mixed development lines and using the Balency system of precast concrete wall panel and floor construction. A site factory capable of producing an estimated 1,250 dwellings per year was set up in November 1967, aimed at completing the 3,300 dwellings of phase one by 1970.

An important feature of this development is in the use of a five storey "spine block", with maisonettes cascading down on either side of a central access deck. From phase 3 onwards the planning principle of these blocks will be developed to generate the form of new town, providing accommodation at a relatively high density of 130 to 150 persons per acre, ranged along the 3½ miles of river frontage and acting as buffers to the main distribution roads bisecting the community. The integration of spine blocks and distribution roads, together with 13-storey tower blocks of flats, will be such as to provide for easy access to parking and deliveries, closely relating the pattern of the main vertical and horizontal circulation within the blocks to the roadside of the buildings.

There is in many ways a similarity in concept to the form of Habitat, erected for Expo '67 at Montreal, but whereas there the whole design was subordinated to a uniform precast concrete system of box-like units, the G.L.C. architects at Thamesmead are using the interval between building of phases 1 and 2, to devise a means of expressing the difference in character between the permanence of the main decks and shafts of circulation and the individuality of the separate dwellings.

When eventually completed Thamesmead will have cost an estimated £160,000,000, of which approximately £76,000,000 will have been spent in providing the 17,000 or so dwellings, although as much as 50 per cent. of the housing may be built for sale by private developers. As at Runcorn, special emphasis has been given to the provision of local bus routes and 100 per cent. car parking, with the now familiar pattern of multi-level shopping arcades (200,000 sq. ft. with parking for 3,000 cars) and the highly desirable feature of an adjoining yacht basin, with hotels, pubs, restaurants and a fully equipped marina for 2,000 assorted craft.

ENGINEERING RESEARCH STATION

The Engineering Research Station at Killingworth New Town, just outside Newcastle, is the second major building to be built for the gas industry to designs by a Northumbrian firm of architects, Ryder and Yates and Partners. The first building was offices for the Northern Gas Board; the Research Station for the Gas Council

is to house their facilities for the study of future fuel and energy supplies and distribution, necessitated largely by the discovery in 1965 of commercial quantities of natural gas in the West Sole area of the North Sea. The effect of this discovery during the initial planning of the station was twofold. Provision had to be made for rapid and to a large extent unpredictable physical growth of the whole structure with maximum flexibility in the research laboratory area to cater for expansion and contraction of research programmes.

The basic design of the station embodies four distinct elements, comprising administration and parking facilities, workshops and crane bay, research laboratories and ancillary accommodation, in a total area of some 80,000 sq. ft., conceived on a modular basis to provide maximum internal flexibility of space division. The need for growth and change in facilities largely dictated the character of the low steel-framed building, housing the laboratories and workshops element, the open ended research component of which is firmly anchored by the fixed element of the administration, comprising two floors of parking for 80 cars with offices, library, restaurant, kitchen and plant room above, all firmly expressed in concrete.

The workshop is a vast double storey structure, 32 ft. high, topped by Vierendeel roof trusses spanning about 100 ft. A moving gantry serves the entire length of this area and vehicles which are to be offloaded can be driven through large folding doors at each end. The end wall is clad in plastic-coated corrugated sheet steel, designed in such a manner as to facilitate its removal after the building has been extended to minimize any disturbance to the users during the period of future construction.

In the ground floor laboratories, research is mainly analytical (metallurgy and electron microscopy among other facilities) relating to the workshop. On the upper floor, however, research chemistry and dynamics are much more experimental. In fact, the research facilities hardly existed at all in the original design brief and the architects adopted an essentially flexible system of services and partitions which could be adapted and rearranged by the Gas Council as necessity dictated. On the upper level a concourse divides the workshop from the laboratories, which will be extended with the building and function both as an area for circulation and social contact.

The single storied ancillaries wing detached from the main building by the service road, contains sections which because of danger, noise or accessibility are better kept separate, stores for corrosives and solvents, carpentry workshops, compressors and gas meter, etc. This block is already being extended to house hydraulic and radiography test areas where pipes can be tested to destruction under water or oil pressure and metals can be safely X-rayed.

A feature of the scheme and one which identifies the station with the architects' earlier building for the Northern Gas Board are six bold funnel-shaped towers rising above the reinforced concrete portion of the building. These contain the various water tanks and extract ducts used in conjunction with the plant room and are consistent with the architects' deliberate policy of contrasting the hard lines of modern industrial architecture with built-in sculptural forms. Undoubtedly this building must be counted as being one of the best of its kind in the country, evocative of the architects' imagination and skill, working harmoniously with mechanical services and structural consultants to ensure the close and equal collaboration of the whole environmental design team involved in the creation of a building.

ACLAND BURGHLEY SCHOOL

Rising against a background of decaying Victorian and Edwardian terraces, fragmented for the greater part into rooming houses and flats, the Acland Burghley School at Tufnell Park, North London, built for the Inner London Education Authority, is a striking example of the skill of the architects, Howell, Killick, Partridge and Amis, in evolving a design from a circulation pattern enabling 1,320 children to move freely about the building, yet still retain the feeling that they belong as individuals to separate parts of it.

The main building takes the form of a cluster of three classroom towers created to break the school up into separate units disposed in a semi-circle round the circulation core, to which they are each joined on one side with offshoots from the core stretching out to the assembly hall, playground deck over the railway cutting and the gymnasium. All movement is undercover and there is the added feature of a covered play space, one of the largest in the country, next to the playground deck.

The circulation core is reached from the deck or by a ramped main entrance to which the administration is adjacent. Routes between cloakrooms lead to staircases serving the lower, middle and upper school towers, each containing at ground level a pair of dining rooms with shared service and food trolley lift to the centralized kitchen and wash-ups below. At first floor level the towers contain classrooms for history, geography and commerce and, above these, general classrooms. The specialist nature of the first floor includes top-lit art rooms around a patio, needlecraft, housecraft, library and as a limb, the science laboratories. Under this limb the deck extends to form a covered walkway at lower ground level, giving entry to the music rooms and at the far end to the workshops fronting a service road.

Externally, the buildings, excluding the gymnasium and the assembly hall, have a structure of octagonal columns with continuous flint-faced nose-shaped precast cladding panels and boxed out acoustic double sliding windows for all classrooms. The windows are placed on two sides of every classroom to give, in the words of the architects, "visual variety or different orientation". The treatment internally has been to use, as painted partitions, either the structural fair-faced *in situ* concrete or "on edge" brick walls.

The gymnasium and games hall on the concrete deck over the railway cutting are under a large span structure with timber cladding. The castellated roof shape enables continuous barrel roof lighting to supplement the clerestory lighting. The timber externally is treated with dark stain and inside the gyms with a clear finish. The games hall is open to the playground on one side with an athletic training area adjacent. Further fenced games courts are sited between the schoolkeeper's house and the assembly hall.

The assembly hall itself is the most recent and perhaps the most striking construction of the whole building complex. Hexagonal in shape and directly linked to the circulation core, it is sunk into the ground with two drama classrooms backstage. It is double ended to serve any number of functions from school social events to full-length operas, and great attention has been given to acoustic and lighting detail. These aspects influenced the use of special timber wall lining, the untreated concrete and the shaped pine ceiling with very flexible general and stage lighting. The floor is of missandia and externally aluminium roofing is very effectively combined with dark stained timber and concrete.

The total cost of the school, including furniture and equipment, was about £900,000, of which approximately £260,000 was spent on the reinforced concrete platform over the railway cutting.

PROGRESS OF THE NEW TOWNS (To March 31, 1968)

Town	New Industries		New shops	New houses and flats	Estimated expenditure for all purposes
	Number of firms	Numbers employed			
Basildon.....	122	20,229	320	16,392	£69,568,000
Bracknell.....	33	8,417	121	7,008	34,850,000
Crawley.....	86	17,384	293	13,765	33,000,000
Harlow.....	103	15,494	311	19,552	63,504,000
Hatfield.....	15	1,023	96	4,293	10,900,000

Washington.....	18	444	3	28	4,395,000
Cwmbran.....	29	651	184	7,413	25,373,000
Cumbernauld.....	56	4,829	53	6,144	31,488,000
East Kilbride.....	140	13,402	172	15,483	49,313,000
Glenrothes.....	44	4,386	72	6,989	22,560,000
Livingston.....	11	1,378	4	1,713	12,373,000
Irvine.....	—	—	—	—	24,000
Total Expenditure.....	—	—	—	—	£563,562,000

Expenditure to March 31, 1968, on proposed new towns at: Milton Keynes, £135,000; Peterborough, £1,000; Newtown and Northampton, Nil.

* Industry already exists in the Trading Estate at Aycliffe.

EDUCATION IN THE UNITED KINGDOM

These are some of the basic facts about the major expansion of educational provision in the United Kingdom between 1954-55 and 1964-65. **Cost.**—The total expenditure on education (including university education) by public authorities increased from £513,400,000 (representing 3·2 per cent. of the Gross National Product) to £1,485,300,000 (5·1 per cent.). In addition, the cost of school meals and milk went up from £46,400,000 (0·3 per cent. of G.N.P.) to £93,300,000 (still 0·3 per cent.). **Pupils.**—The number of children in schools (including independent schools) rose from 8,300,000 to nearly 9,000,000. **Teachers.**—The total of full-time teachers in service in maintained and aided schools rose from 286,000 to 338,000 and of students training to be teachers from 32,000 to nearly 76,000. **Further Education.**—The number of students undertaking further education (other than university education) in grant-aided institutions went up from 2,000,000 to more than 3,000,000. **Universities.**—Full-time student numbers rose from 98,000 to nearly 169,000 and those of full-time teaching and research staff from 11,000 to nearly 19,000.

ENGLAND AND WALES

The present pattern of education in England and Wales derives from the Education Act of 1944 (Butler Act) which was modified by nine minor Acts from 1946 to 1968. The Secretary of State for Education and Science is assisted by three Ministers of State and a Parliamentary Under-Secretary of State. His responsibilities relating to civil service and (exercised through the University Grants Committee) the universities, cover the whole of Great Britain, but his functions in connection with schools, further education and teachers relate to England and Wales only. The work of the Department in London is organized in 17 Branches. Part of the Department, the Education Office for Wales, is in Cardiff and most of the work of the 550 H.M. Inspectors (who inspect schools and other educational establishments apart from universities and provide the Secretary of State with information and advice) is in the local education authority areas. The Secretary of State's requirements under the Act are issued, and guidance is given, mainly in the form of regulations, orders and circulars addressed to local education authorities and other bodies, and in booklets. A report and five volumes of statistics are published annually.

In February, 1968, a Select Committee of the House of Commons was appointed to consider the activities of the Department of Education and Science and the Scottish Education Department.

Among the main features of the system are:

(a) Its administration is decentralized, the responsibility for providing state primary, secondary and further education (but not university education) to meet the needs of their areas being that of the 162 local education authorities (L.E.A.'s). These are the elected councils of counties and county boroughs and the outer London boroughs, the Inner London Education Authority being a specially constituted statutory committee of the Greater London Council. The councils appoint education committees consisting of some of their own members (a majority of the committee) and some other persons with experience in education and knowledge of local educational conditions. The L.E.A.'s maintain schools and colleges and build new ones, pay teachers and provide equipment and materials. Most of the public money spent on education is disbursed by the local authorities. Education is by far the largest item of their expenditure. A large authority may spend £20,000,000 to £30,000,000 a year on education. L.E.A.'s are financed by rate support grants from the Ministry of Housing and Local Government under the Local Government Act 1966, and from the rates.

(b) Voluntary agencies play an important part in educational provision often in co-operation with the State. Some indication of its nature and extent is given below.

There are separate central advisory councils for education in England and Wales which advise the Secretary of State, usually on subjects referred to them. Their membership changes from one refer-

ence to another. Among the subjects on which the Council for England has reported in recent years are the education of boys and girls aged 15 to 18 (the Crowther Report, 1959), the education between 13 and 16 of pupils of average or less than average ability (the Newsom Report on *Half our Future*, 1963), and primary education and the transition to secondary education (the Plowden Report, 1967). The Plowden Report on *Children and their Primary Schools* recommended a national policy of positive discrimination in favour of areas where children are most deprived socially.

SCHOOLS AND PUPILS

Schooling is compulsory for all children between 5 and 15 years (16 years from 1972-73). No fees are charged in any publicly maintained school.

There are four main categories of school: (a) those maintained by local education authorities, the authorities meeting their expenditure partly from local rates and partly from grants made by the Ministry of Housing and Local Government; (b) direct grant schools which are assisted by grants from the Department of Education and Science; (c) recognized independent schools i.e. independent schools which have sought and obtained recognition efficient after inspection by H.M. Inspectors of Schools; (d) other independent schools.

Maintained schools are of two types: (i) county schools (19,000) which are built, maintained and staffed by local education authorities. Their managers (primary schools) and governors (secondary schools) are appointed by the L.E.A.'s. (ii) Voluntary schools (10,000) which although built by voluntary bodies (mainly religious denominations) are maintained by an L.E.A. More than two-thirds of the voluntary schools are Church of England schools and about 2,000 are Roman Catholic. Voluntary schools are of three kinds: controlled, aided, and special agreement. In controlled schools the L.E.A. nominates two-thirds of the managers or governors (the rest are nominated by the voluntary body), bears all costs and appoints the teachers. In aided schools the managers or governors (two-thirds appointed by the voluntary interest and one-third by the L.E.A.) are responsible for repairs to the exterior of the school building and for improvements and alterations to it though the Department of Education and Science may reimburse up to four-fifths of approved expenditure. The L.E.A. meets all running costs. The managers or governors control the appointment of teachers. Special agreement schools are those where the L.E.A. may, by special agreement, pay between one-half and three-quarters of the cost of building a new, or extending an existing, voluntary school, almost always a secondary school. Two-thirds of the governors are appointed by the voluntary body and the remainder by the L.E.A. Expenditure is normally apportioned between the authority and the voluntary body as for an aided school.

A direct grant grammar school has an independent governing body with L.E.A. representatives and

receives maintenance grants direct from the Department of Education and Science in return for which a quarter of its places ("free places") are offered to pupils who have attended a grant-aided primary school for not less than two years. The remainder of the places may be available for fee-payers, except that up to a further 25 per cent. ("reserved places") may be claimed by the authority. The authority's proportion of the admissions may not, unless the governors agree, exceed one half. Fees are paid by the L.E.A.'s for the places they take up and they pay for about 60 per cent. of direct grant pupils. The fees paid by the parents of all other pupils are assessed according to the parents' means, any balance being paid to the school by the Department of Education and Science. The maintenance grant from the D.E.S. to the school comprises a capitation grant for every boy and girl in the school together with an additional sum for each sixth-former.

By the term *public schools* is usually meant the independent schools in the membership of the Headmasters' Conference, the Governing Bodies Association or the Governing Bodies of Girls' Schools Association.

Independent schools charge fees and do not receive grants from the State. *Preparatory schools* are mainly for boys from about 8 to 13 years who wish to enter public schools. All independent schools are open to inspection and must register with the Department of Education and Science which lays down certain minimum standards and can make schools remedy any unacceptable features of their buildings or instruction and exclude any unsuitable teacher or proprietor. To be designated "recognized and efficient", an independent school must satisfy the D.E.S. that its standards are broadly comparable with those of grant-aided schools.

Report on Public Schools.—In July 1968 the Public Schools Commission, under the chairmanship of Sir John Newsom, published its first report on the integration of the independent boarding schools with the state system of education.

The Commission's general conclusion was that independent schools are a divisive influence in society and that the pupils, the schools and the country would benefit if children from a wider social background were admitted to them.

Among the main recommendations in the Commission's 52-point plan for achieving integration are:—

(a) independent boarding schools "suitable and willing" to enter the integrated sector should be encouraged to do so; initially they should offer within seven years at least half their places to assisted pupils from maintained schools;

(b) most independent schools (particularly boys' schools) should admit pupils of a wider range of ability; where schools are too small to admit children of widely differing ability over the whole age group, they should adapt as far as possible to the comprehensive system by shortening their courses and adjusting their ages of admission;

(c) in order to meet the needs of assisted pupils, particularly those from maintained day schools, integrating public schools should adapt themselves radically. "This", says the Commission, "must not mean sacrificing important traditions and values" but, in specified ways, "the style of life" should be reconsidered;

(d) schools which are Christian foundations (as most public schools are) should be encouraged to accept pupils from denominations other than their own, as well as pupils of other religions or no religion;

(e) the schools may have a valuable role to play in the education of immigrant children and there

should be no discrimination against them in allocating places;

(f) the only justification for spending public money on boarding education is "the need for boarding, for either social or academic reasons";

(g) a Boarding Schools Corporation should be created to administer the integration scheme; guidance on boarding and placing policy should be given by this Corporation to regional consortia of local education authorities which would, after the early stages, handle the main volume of applications;

(h) there should be more co-educational boarding schools;

(i) the Secretary of State should have power to compel a school to enter into a scheme of integration if all efforts at negotiation and persuasion should fail and if a school's refusal to enter the scheme would prejudice a successful integration policy;

(j) action should be taken to end the fiscal and other benefits derived by some schools from their status as charities.

Costs. The net cost of a take-up of 38,000 secondary and 9,000 preparatory places would be £12 million a year and of a modified scheme for a take-up of 32,000 places as an interim measure, £6.1 million a year. The ending of fiscal and similar reliefs would save £2 to £3 million a year.

The Commission recognizes that a scheme of integration appropriate to England and Wales might not be applicable to Scotland where a different kind of scheme might be necessary.

Three of the fifteen members of the Commission did not sign the report and appended a note of dissent to it; and a fourth member who did sign entered a general note of reservation.

The Commission has now been reconstituted, under the chairmanship of Professor D. V. Donnison, to consider its remaining terms of reference: to advise on the integration of day independent schools with the national system of education, and on the ways in which direct grant grammar schools in England and Wales and grant-aided schools in Scotland can participate in the movement towards comprehensive reorganization; and also to review the principle of central government grant to those schools.

The State System.—*The Primary Stage* begins at 5 years and the transfer to secondary school is made between 10½ and 12 years. About half the primary schools take 5 to 11-year olds; about a quarter are schools for infants (up to 7 years only); and most of the rest take juniors only (7 to 11 year olds). Children under 5 may attend the limited number of nursery schools or nursery classes attached to infant schools.

Secondary Stage.—Secondary schools are for children aged 11 to 15 (16 from 1972-73) and over. In January, 1967, when there were 2,832,851 pupils in maintained secondary schools the main types were: (a) secondary modern schools (1,459,377 pupils) providing mainly a general education with a practical bias, with an increasing number of pupils staying on after the school-leaving age; (b) grammar schools (694,898 pupils) providing an academic course from 11 to 16-18 years and constituting the main route to the universities and the professions; (c) comprehensive schools (407,475 pupils) catering for the secondary education of all pupils in an area; and (d) technical schools (69,704 pupils) providing an integrated academic and technical course. The allocation to (a), (b) and (d) of pupils leaving primary schools at or about the age of 11 years often took account of an "eleven plus" examination involving attainment or intelligence tests.

The Government aims to end selection at eleven plus and abolish separatism in secondary education.

In July, 1965, the Secretary of State for Education and Science in circular 10/65 requested each local education authority to prepare within a year a general statement of long-term proposals for the reorganization of county and voluntary schools in its area on comprehensive lines and a detailed statement of proposals for three years starting not later than September, 1967. No one pattern was laid down but certain forms of comprehensive schools were recommended for consideration by L.E.A.'s. The Secretary of State also announced an extensive programme of research to be carried out by the National Foundation for Educational Research into the various ways of organizing and running comprehensive schools, and an evaluation of their educational and social aims by the University of Manchester.

The Further Stage is treated separately below.

Primary and Secondary Schools

In January, 1967, there were 33,380 schools, of which 29,821 were maintained by local education authorities, 323 were direct grant schools, 1,506 were independent schools recognized as efficient, and 1,740 were other independent schools. There were at school in 1967, 7,999,488 children (4,112,656 boys and 3,886,832 girls) of whom 7,428,593 were in maintained schools, 127,212 in direct grant schools, 306,772 in recognized independent schools and 136,911 in other independent schools. Of those in maintained schools, 4,502,197 were in primary, 2,832,851 in secondary schools and the rest in nursery (24,232) or special (69,313) schools including hospital. Almost all maintained primary schools, and rather more than half of the maintained secondary schools, are for both boys and girls. At secondary level most independent schools are for boys only or girls only.

The total number aged 15 years or over (excluding those under the school-leaving age) was 584,683 (12·1 per cent. of the age-group); of these 473,279 (9·5 per cent. of age-group) were in maintained schools, 37,577 were in direct grant schools, 64,963 in recognized independent schools and 8,864 in other independent schools. 314,138 of the 584,683 were boys.

Of the total of 242,626 boys and girls in sixth forms, 181,751 (101,161 boys and 80,590 girls) were in maintained schools of whom 135,163 were in grammar schools, 23,260 in comprehensive schools, 8,442 in technical schools, and 6,970 in secondary modern schools. The number of sixth form pupils in direct grant schools was 23,743 and in recognized independent schools 37,132.

Class sizes.—The statutory maximum sizes of classes in maintained schools are 40 for primary schools and 30 for secondary schools but in January, 1967, 14·8 per cent. of primary pupils were in classes of over 40 (compared with 31·9 per cent. ten years before). 45·2 per cent. of secondary pupils were in classes of over 30 (compared with 62·1 per cent. ten years before). The average size of primary classes as registered was 32·7 and of secondary 27·5 but 11·6 per cent. of all primary classes were oversize and 36·5 per cent. of secondary classes; the corresponding percentages ten years earlier were 26·1 and 52·4.

Boarding.—Of the 7,999,488 pupils at school in January, 1967, 174,089 were boarders (118,187 boys and 55,902 girls); of these 17,926 boys and 7,226 girls were in maintained schools (mainly in secondary and special schools), 13,105 boys and 5,122 girls in direct grant schools (including 7,201 boys and 2,117 girls in direct grant grammar schools), 80,347 boys and 40,526 girls in recognized independent schools, and 6,802 boys and 3,038 girls in other independent schools.

School Meals.—In 1967, 69·5 per cent. (4,846,500) of day pupils at maintained schools were taking school dinners and 79·3 per cent. (5,969,671) took school milk. Milk is not available for secondary school pupils (since September 1968).

Immigrant pupils.—In 1966 there were 131,043 immigrant pupils in maintained schools with 10 or more immigrants, of whom 43·7 per cent. were from the West Indies and 18·6 from India; 5·9 had no English and 18·7 had some but needed further intensive training. In these schools 13·1 per cent. of pupils were immigrants. By 1967 the 131,043 had risen to 165,000 and in that year the total number of immigrant pupils in all maintained schools was 184,000 (2·5 per cent. of the total school population). A recent Parliamentary answer indicated that in *Wolverhampton* in January, 1968, immigrant pupils as a percentage of all pupils in the different categories of primary school were: Church of England 42·7, Roman Catholic 14·3, County primary 15·3; the corresponding percentages for *Birmingham* were 22·1, 4·3, 24·6.

Examinations.—Secondary school pupils can take the General Certificate of Education (G.C.E.) or the Certificate of Secondary Education (C.S.E.). The examinations for the G.C.E., which are conducted by eight examining bodies (most connected with universities) are set at two levels: Ordinary level ("O") and Advanced level ("A"). "A" level is usually taken after two years in the sixth form following "O" level. The G.C.E. is not a "grouped subject" examination and candidates at either level may take one or more subjects as they wish. At "A" level passes are awarded in five grades. "A" level candidates may take Special papers which are usually set on the same syllabus as the basic "A" level papers but contain more searching questions.

Like the G.C.E. the Certificate of Secondary Education (C.S.E.) can be taken in one or more subjects. It is open to boys and girls in any school completing five years of secondary education. Five grades are awarded. The C.S.E. can be examined in a number of ways, internal and external, and is controlled largely by teachers sitting on the 14 regional examining boards. In 1967 176,000 candidates took the C.S.E. examinations.

Co-ordinating the work of the G.C.E. and C.S.E. examining boards, and advising them, is the *Schools Council for the Curriculum and Examinations* which was established in 1964 by the Secretary of State for Education and Science as an independent body representing all educational interests with teachers forming a majority of its members. It is concerned *inter alia* with maintaining comparability of standards between boards and also between the two examinations (grade 1 in the C.S.E. is intended to indicate a standard such that a candidate achieving it might reasonably have been expected to obtain a pass at "O" level in the G.C.E. had he followed a course leading to that examination). The Council is also particularly concerned with promoting and encouraging curriculum study and development. Among its major programmes of work are those relating to English teaching at all school stages, preparations for the raising of the school-leaving age to 16 and sixth form curricula and examinations. It works closely with the Nuffield Foundation which has been sponsoring the preparation of new courses particularly in mathematics, science and modern languages.

Of the 233,051 sixth-form pupils at school in January 1966 (135,036 boys and 98,015 girls) 220,050 were following G.C.E. "A" level courses. 136,276 of the 233,051 were in maintained grammar schools, 36,906 in recognized independent schools, 23,144 in direct grant grammar schools, 16,558 in comprehensive schools, 8,447 in technical schools, 5,353 in

secondary modern schools and 6,367 in other maintained schools.

In a decade the number of school leavers with five or more passes at "O" level has more than doubled and the number with two or more "A" levels has almost trebled.

TEACHERS

Teachers are appointed by local education authorities, school governing bodies or managers. Those in maintained schools must (except temporary and occasional teachers) be approved as "qualified" by the Department of Education and Science. Most teachers become qualified by successfully completing a course at a college of education or university department of education. For the time being, graduates and holders of certain specialist qualifications may be recognized as qualified teachers without having to take a teacher training course but it is intended to make training obligatory in due course for all new entrants.

A major problem at present relates to the supply of teachers as the number of children at school increases with the birth rate and the number of those staying on at school beyond the statutory leaving age rises. It is estimated that in 1968 there will be 7,486,100 boys and girls in maintained primary and secondary schools, 7,678,600 in 1969, 9,137,500 in 1975 and 9,761,100 in 1979; this compares with 7,335,000 in 1967.

In February 1968 (provisional figures) the total number of qualified teachers in service in maintained schools was 316,915; this included the full-time equivalent of part-timers and represented an increase of 10,513 over the previous year and of 23 per cent. over the figure for 1958. There were also in 1968 9,860 unqualified temporary or occasional teachers.

In October, 1966, teachers were being trained in a total of 208 institutions of various types: 28 university departments of education providing mainly one-year courses for graduates; 146 general colleges of education (95 maintained by local authorities and 51 by voluntary bodies), providing mainly three-year courses for non-graduates; 7 colleges of housecraft education and 7 of physical education (all for women) providing mainly three-year specialist courses; 16 art training centres providing one-year courses for holders of art qualifications; and 4 colleges of education (technical) which gave one-year specialist courses. At the voluntary colleges (provided mainly by religious denominations) up to 80 per cent. of approved capital expenditure and 100 per cent. of running costs are paid by the Government. In 1966 there were 7,888 full-time teachers engaged in teaching the students in the colleges of education.

There were 90,785 students in training in October, 1966, (27,923 men and 62,862 women) of whom 5,026 were in university departments of education. The Government has set a target of 111,000 teacher-training places outside the universities by 1973-74 and student numbers in colleges of education are increasing rapidly. At the end of 1967 the colleges had a total of over 95,000 students compared with about 84,000 in 1966 and about 48,000 in 1962. Many colleges now provide for suitably qualified students a four-year course leading to a B.Ed. degree awarded by the university of whose institute of education the college is a member.

In 1968 (provisional figures), 8,363 married, qualified women teachers returned to service after a break of at least one year, 6,057 going to primary schools and 2,306 to secondary. 3,812 of them returned to full-time teaching and 4,551 to part-time;

1,178 of the 8,363 were graduates. Many local education authorities provide refresher courses which are often open also to graduates with no previous teaching experience.

With the increase in day training facilities there has been a rapid rise to nearly 6,000 in 1966 in the number of mature students (aged 25 years or over) entering teacher training.

In February, 1967, there were 41,441 part-time teachers in service (5,246 more than the previous year) in maintained primary and secondary schools (about half in each); 11 education authorities employed part-time teachers to an extent equivalent to more than 10 per cent. of their total teaching force and 90 authorities to at least 5 per cent.

Of the 288,629 teachers in full-time service in maintained primary and secondary schools in 1966, 20·3 per cent. were graduates.

Salaries.—The payment of full-time teachers in maintained schools is negotiated through a new Burnham Primary and Secondary Committee set up under the Remuneration of Teachers Act 1965. The committee has two sides, one (teachers' panel) representing teachers and the other (management panel) the Secretary of State for Education and Science and the local authorities, with an independent Chairman. Its agreed recommendations are transmitted to the Secretary of State who must give effect to them. If the committee is unable to agree on a new salary award the matter is referred to independent arbitration and the Secretary of State must give effect to the arbitrators' recommendations unless they are set aside by Parliament. The latest scales (adopted in July, 1967) were the product of such arbitration and involve a basic scale of £800 p.a. rising to £1,500 after 14 years of service (as compared with the previous basic £730 p.a. to £1,400 after 14 years) for teachers, with additions for qualifications above the minimum and for posts of responsibility. For head teachers there is a consolidated scale ranging at the maximum from £1,710 to £4,110. The increase cost an additional £29 million (7 per cent.).

There is a superannuation scheme administered by the Department of Education and Science.

FURTHER EDUCATION

Local Education Authorities are responsible, under the 1944 Education Act, for providing full-time and part-time courses of post-secondary education (other than university education) in their areas. There are ten Regional Advisory Councils which co-ordinate further education in their regions and nominate a majority of the members of the National Advisory Council on Education for Industry and Commerce which advises the Secretary of State for Education and Science on national educational policy relating to industry and commerce.

The 8,487 further education establishments (1966 enrolment: 3,107,522 students) other than the colleges of education, may at present be grouped in eight main categories of which all, except the last, are grant-aided:

1. *National Colleges* (6 in 1966).—Established and financed jointly by the Department of Education and Science and industry to provide advanced technical studies for particular industries. 1,345 students in 1966.

2. *Regional Colleges* (25).—Providing a substantial amount of advanced study particularly by means of full-time and sandwich courses for students from several Local Education Authority areas. 86,988 students.

3. *Colleges of Art* (150).—118,845 students.

4. *Agricultural Colleges* (5).—Providing courses mostly of two years' duration. 1,369 students.

5. Farm Institutes (40).—Providing mainly non-advanced courses. 9,487 students.

6. Other Major Establishments (510).—Including "area" and "local" colleges; technical colleges, colleges of commerce, etc., which provide a substantial number of day courses. 1,498,876 students.

7. Evening Institutes (7,662) offering a wide range of courses, many of them recreational, for evening students, and often housed in premises used by day for other educational purposes. 1,374,112 students.

8. Independent Establishments which are not required to register with the Department of Education and Science but may apply for recognition as efficient; in 1966 there were 89 such recognized establishments with 16,500 students.

For Colleges of Education, see under "Teachers" above.

The number of students taking advanced courses (full-time, part-time or sandwich) leading to recognized qualifications at grant-aided establishments rose to 162,380 (144,500 men and 17,880 women) in 1966. Of these 37,340 were on full-time courses, 27,150 were sandwich course students, 61,390 were taking part-time day courses and 46,510 were attending evening only classes. Almost 20,000 of the total were working for a first degree (university or C.N.A.A. (see below)) and 442 for a higher degree. 625,013 students were released by their employers to take part-time day courses at grant-aided establishments. The (provisional) total number of full-time teachers serving in technical colleges, colleges of art and farm institutes in 1967 was 41,500 (4,000 more than the previous year).

The development of the work of the Industrial Training Boards (see pp. 535-6) set up following the Industrial Training Act of 1964 is bound to increase the demands made on technical colleges with more and more young people expected to be released from industry for further education. By 1967 there were 21 Industrial Training Boards and about 12 million employees came within their scope.

Polytechnics.—To achieve a greater concentration of the facilities for full-time higher education within the Further Education system, the Government announced in 1966, in a White Paper, *A Plan for Polytechnics and Other Colleges*. The Secretary of State for Education and Science is to designate some 30 major centres (some single colleges and others combinations of colleges) in which a wide range of full-time, sandwich and part-time courses can be developed and which can become "comprehensive academic communities" catering for students at all levels of higher education, and entirely or almost entirely for those of 18 years or more. They will have governing bodies with a large measure of autonomy and will be mainly teaching institutions though provision will be made for certain essential research. As part of the sector of higher education within the Further Education system they will complement the universities and colleges of education. Among the colleges named as those from which it is proposed that particular polytechnics should be formed are many of the present regional colleges.

In May 1968 the Secretary of State for Education informed 16 local education authorities that he would be prepared to designate polytechnics in their areas in due course, subject to certain amendments of the L.E.A. proposals; four other polytechnic schemes were then still under consideration.

An important body with few, if any, parallels in other countries is the *Council for National Academic Awards* (C.N.A.A.) which awards degrees to students taking courses approved by it in non-university institutions. Following a recommendation of the Robbins Committee it was established by Royal Charter in 1964 as an autonomous body. More than 40 colleges in Great Britain conduct

courses leading to its degrees: B.A., B.Sc., and the higher degrees of M.A. and M.Sc. (for post-graduate course work) and M.Phil. and Ph.D. (for research which may be undertaken jointly in industry and college). Although these degrees are mainly in science and applied science subjects they can be awarded in any field and include at present degrees in economics, law, languages and business studies.

Adult Education. A wide variety of courses for the education and recreation of adults is provided by local education authorities, the Workers Educational Association and other voluntary bodies, the extra-mural departments of universities and certain residential colleges. In November, 1967, the total number of students enrolled at evening institutes was 1,419,765 of whom 935,704 were women; there were also many students engaged in day-time and evening non-vocational and recreational classes at other further educational establishments. In 1966-67 there were 236,330 students attending courses provided by the university extra-mural departments, the W.E.A. and other responsible bodies. The expenditure in 1964-65 of responsible bodies (the extra-mural departments of universities, the W.E.A. and two other bodies) was £1,985,000.

The Youth Service.—Provides for the spare-time activities of young people. The Local Education Authorities co-operate with voluntary bodies in their areas and may maintain their own youth clubs. There are various national voluntary youth organizations which receive grants from the Department of Education and Science. By the end of 1967 there were 1,560 full-time youth leaders on the Department's register. In addition there are about 6,000 part-time paid leaders and many thousands of volunteer workers. The estimated expenditure of the L.E.A.'s on the Youth Service in 1965-66 was £5,800,000.

STUDENT SUPPORT

Between 1958-59 and 1966-67 the expenditure on first degree and lower student awards for higher education in Great Britain made from public sources, rose from £29·1 million to (provisional) £110 million. In the same period expenditure on postgraduate awards from public sources rose from £2·1 million to (provisional) £8·4 million. "Public sources" comprises local education authorities, the research councils and government departments.

SCOTLAND

The educational system of Scotland has developed independently of that of England and presents a number of distinctive features. The Scottish Education Department is the central body and the Education Authorities are the local bodies concerned in administering the provisions of the Education (Scotland) Act, 1962 which consolidates the enactments relating to Education in Scotland. These authorities are the councils of the four cities (Aberdeen, Dundee, Edinburgh and Glasgow) and 32 county councils or joint county councils. Educational facilities of various kinds are also provided by the governing bodies of grant-aided schools, independent schools, central institutions providing advanced technical education and national voluntary organizations in the field of informal further education.

Schools in Scotland fall into three main categories, viz. public schools, which in Scotland means schools managed by Education Authorities; grant-aided schools, conducted by voluntary managers who receive grants direct from the Department; and independent schools which receive no direct grant, but which are subject to inspection and registration.

In January 1968 there were 3,134 public schools with a roll of 890,322, 47 grant-aided schools with a roll of 22,419 and 123 independent schools attended by 18,176 pupils.

The primary school course normally lasts for 7 years, covering the ages 5 to 12. Primary schools usually take both boys and girls, and normally include infant classes for children under 7 years. All pupils transfer from the primary course to the secondary courses about the age of 12.

Following the Government policy for reorganizing secondary education on comprehensive lines, announced in 1965, Education Authorities in Scotland have produced schemes of reorganization which they are steadily implementing as existing school accommodation and new building permit. Comprehensive schools will eliminate pre-selection for secondary education on the basis of primary school work, and only after a general introduction to secondary education during which they can show their full abilities and interests, will pupils be able to proceed to more specialized courses. In fact, comprehensive education is already some way established in Scotland; many secondary schools in rural areas have been traditionally comprehensive, and some Education Authorities began to establish comprehensive schools soon after the second world war. Nevertheless, until such time as reorganization has been completed selection for secondary courses will continue to a limited extent. The basis of selection will be mainly on primary school teachers' assessments and verbal reasoning tests. The abilities and interests of pupils and the wishes of their parents will also be taken into account.

The secondary course lasts from 3 to 6 years. Broadly there have been three types of courses: (a) 5- and 6-year courses leading to the Scottish Certificate of Education examination on the higher grade; (b) 4-year courses leading to the S.C.E. examination on the ordinary grade; and (c) 3-year (and occasionally 4-year) courses not leading to the S.C.E. examination, but providing a general education.

It is common for secondary schools to provide all these types of courses, but there are differences between areas, often determined by distribution of population. In some areas certificate and non-certificate courses are found in separate schools. In others, the pupils all commence their secondary course together but the pupils taking certificate courses are transferred to another school after the second, third or fourth year. As the policy of reorganization along comprehensive lines is more widely implemented these arrangements are being progressively modified. For example, the general intention is that all secondary pupils from a district will attend the same school at least for the first two years of secondary education. (In a few areas of scattered population and difficult communications other arrangements may have to be made.)

The Scottish Certificate of Education examination is conducted by the S.C.E. Examination Board. Pupils may attempt as many of a wide range of subjects as they are capable of, on either the Ordinary grade which corresponds to the Ordinary level of the General Certificate of Education, or on the Higher grade which is normally taken a year earlier than the G.C.E. Advanced level and is therefore not of so high a standard. In 1968 the Board introduced a Certificate of Sixth Year Studies which is designed to give direction and purpose to sixth-year work by encouraging pupils who have completed their main subjects at Higher grade to engage the study in depth of a particular subject.

Facilities for further education are provided by 13 Central Institutions (advanced colleges adminis-

tered by independent Boards of Governors) and by further education centres managed by Education Authorities. The Central Institutions provide the highest form of specialized and fully organized instruction in science and technology, agriculture, commerce, domestic science and the arts, and issue their own diplomas and associateships. Courses leading to degrees of the Council for National Academic Awards are also available in certain of the major Central Institutions.

The further education centres normally provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects, but a few offer courses of degree level. The vocational courses include those leading to craft certificates, certificates of the City and Guilds of London Institute, National Certificates and Diplomas, certificates of the Scottish Council for Commercial, Administrative and Professional Education and, in some cases, leading to recognition by the professional institutions. Courses are offered in a wide variety of subjects but to make the most economic use of resources, provision of certain courses is made on a regional or even national basis.

All teachers in permanent posts in public or grant-aided schools in Scotland are required to be registered with the General Teaching Council for Scotland and normally to hold a teaching qualification awarded by a Scottish college of education. There are ten of these colleges and six, including two Roman Catholic residential colleges for women, provide both one- and three-year courses leading to a teaching qualification (primary education) or a teaching qualification (secondary education). Four of these colleges, in conjunction with local universities, also provide four-year combined courses leading to the degree of B.Ed. and to a teaching qualification (primary and/or secondary education). One of the Roman Catholic colleges also admits men to the three-year non-graduate course for primary teachers. Of the remaining four colleges, one is a residential college of physical education for women and the other three train only non-graduate primary teachers.

The basic scales of teachers' salaries are non-graduate, graduate and honours graduate, with additional payment for posts of special responsibility.

NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly comparable to that in Great Britain. Under the 1947 Act (and its amendments to 1968) primary education is provided for children up to about 11½ years of age when they are transferred to secondary school. The main types of secondary school are: grammar and secondary (intermediate). Selection for secondary education is now based on verbal reasoning tests at eleven-plus combined with teachers' assessments of performance in school subjects. Fees are charged at grammar schools but qualified pupils there receive scholarships from their local education authority.

In January 1968 there were 1,353 primary (including nursery) schools with 199,455 pupils, 157 secondary (intermediate) schools with 74,118 pupils, a technical intermediate schools with 2,384 pupils, 81 grammar schools with 47,955 pupils, 23 special schools with 2,088 pupils.

In 1966-67 there were 32 institutions of further education and over 100 out-centres with 1,089 full-time teachers and an enrolment of 9,648 full-time, 10,684 part-time day and 41,630 evening students. In 1967 the training of teachers was carried out mainly in seven colleges, and in the department of education of the Queen's University of Belfast.

UNIVERSITIES

There are now 44 universities in the United Kingdom (see pp. 503-12). Of these, 33 are in England, eight in Scotland, two in Northern Ireland and one (a federal institution) in Wales. The most recently established is the New University of Ulster, which admitted its first students in October 1968. In October, 1966, the Secretary of State for Education and Science announced that it would not be possible for some years to create further new universities.

In 1965-66 there were 173,336 full-time students enrolled at universities in the United Kingdom; of these 45,804 were women, 28,842 were post-graduate students (including 5,953 women) and 52,446 were new entrants to first degree or first diploma courses. By 1966-67 the total of full-time students had risen to 188,894 and the number of new entrants was 54,049 (both figures provisional). The full-time total of 188,894 compares with 92,111 in 1956-57 and just over 50,000 in 1938-39. In 1965-66, 9·2 per cent. of all full-time students came from overseas. In 1964-65, 28,794 first degrees (including 20,315 honours degrees) and 5,054 higher degrees were awarded by universities. The corresponding figures for 1954-55 were 17,044 first degrees (including 10,424 honours degrees) and 2,766 higher degrees. There were 17,636 part-time students in 1965-66.

As compared with 11,525 ten years before, there were 22,657 full-time teaching and research staff in British universities in 1965-66; 2,498 of them were professors, 4,297 readers or senior lecturers, 11,819 lecturers, 3,180 assistant lecturers and 863 unclassified.

Students applying for admission to a first degree course at a university now do so through the Universities Central Council on Admissions (U.C.C.A.) which was set up by the universities in 1961 on the initiative of the Committee of Vice-Chancellors and Principals. All universities now participate fully in the U.C.C.A. scheme except Aberdeen, Dundee and Glasgow, which receive direct applications from candidates resident in Scotland and from those United Kingdom candidates

outside Scotland who are not also applying to other universities within the scheme. In its Report in 1967 the chairman of U.C.C.A. said that in October, 1966, the British universities found themselves short of about 1,100 suitable candidates in Pure Science and of about 500 candidates in Technology; but that it looked as if there were between 4,000 and 7,000 acceptable candidates who failed to find places in Arts, Social Studies and Medicine.

Students who are normally resident in Britain, have certain minimum qualifications and have been admitted to a university in the United Kingdom are entitled to a award from public funds; the amount varies according to the financial circumstances of the students and their parents (see also "Student Support" above).

In 1965-66 the total income of universities in Great Britain was £164,733,165, of which 1·5 per cent. came from endowments, 0·5 per cent. from donations and subscriptions, 1·2 per cent. from grants from local education authorities, 74·1 per cent. from exchequer grants, 7·4 per cent. from students' fees, 1·2 per cent. from grants from government departments, 10·8 per cent. from payments for research, and 3·3 per cent. from other sources. Non-recurrent grants for capital expenditure paid by the Exchequer totalled £79,868,827 in 1965-66.

The University Grants Committee advises the Secretary of State for Education and Science on university matters (see p. 441). In 1967 the Government accepted a recommendation of the Public Accounts Committee that the Comptroller and Auditor General should have access to the books and records of the U.G.C. and of the universities.

An "Open University" is being established to provide courses leading to degrees and other qualifications by a combination of television, radio, correspondence, tutorials, short residential courses and local audio-visual centres. Its first Vice-Chancellor (Dr. W. L. M. Perry) was appointed in mid-1968 and it is expected that the university will be launched in January 1971. It will be grant-aided directly by the Department of Education and Science and will not come within the University Grants Committee system.

THE ROYAL SOCIETY

The Royal Society received a charter from Charles II on April 22, 1662, when it was incorporated as a body politic and corporate under the appellation of The President, Council and Fellowship of the Royal Society of London, for improving Natural Knowledge.

Presidents of the Royal Society

Sir Robert Moray.....	1660	Earl of Rosse.....	1848
Viscount Brouncker.....	1662	Lord Wrottesley.....	1854
Sir Joseph Williamson.....	1677	Sir Benjamin Brodie, Bt.....	1858
Sir Christopher Wren.....	1680	Maj.-Gen. Sir Edward Sabine.....	1861
Sir John Hoskins, Bt.....	1682	Sir George Bidder, A.M.R.S.....	1871
Sir Cyril Wyche.....	1683	Sir Joseph Dalton Hooker.....	1873
Samuel Pepys.....	1684	William Spottiswoode.....	1878
Earl of Carbery.....	1686	Thomas Henry Huxley.....	1883
Earl of Pembroke.....	1689	Sir George Stokes, Bt.....	1885
Sir Robert Southwell.....	1690	Lord Kelvin.....	1890
Earl of Halifax.....	1695	Lord Lister.....	1895
Lord Somers.....	1698	Sir William Huggins.....	1900
Sir Isaac Newton.....	1703	Lord Rayleigh.....	1905
Sir Hans Sloane, Bt.....	1727	Sir Archibald Geikie.....	1908
Martin Folkes.....	1742	Sir William Crookes.....	1913
Earl of Macclesfield.....	1752	Sir Joseph John Thomson.....	1915
Earl of Morton.....	1764	Sir Charles Scott Sherrington.....	1920
Sir James Burrow.....	1768	Lord Rutherford.....	1925
James West.....	1768	Sir Frederick Gowland Hopkins.....	1930
Sir John Pringle, Bt.....	1772	Sir William Henry Bragg.....	1935
Sir Joseph Banks, Bt.....	1778	Sir Henry Hallett Dale.....	1940
William Hyde Wollaston.....	1820	Sir Robert Robinson.....	1945
Sir Humphrey Davy, Bt.....	1820	Lord Adrian.....	1950
Davies Gilbert.....	1827	Sir Cyril Hinshelwood.....	1955

SCIENCE, DISCOVERY AND INVENTION IN 1968.

Britain's financial difficulties led to her withdrawal from European projects in the two big spending sciences, space research and nuclear physics. First it was announced that she would stop contributing to the European Launcher Development Organization after the end of the present programme in 1972, that her spending on space would have to be kept within a general ceiling of six per cent. growth in which, presumably, all-British projects would take precedence, and that she would not participate in the proposed European television satellite. Then, later in the summer, came the long-expected news that Britain could not join in the European project to build a giant 300 GeV (three hundred thousand million electron volt) accelerator, ten times as powerful as the present CERN machine at Geneva. In both cases it was quickly assumed, in some quarters, that the British decision meant that the projects were doomed, that the kiss of death had been given to European efforts to keep up with the world giants, the U.S.A. and U.S.S.R., in two vital fields. There was no doubt that the troubles besetting the present ELDO project, for the Europa rocket, were such as to exasperate money-conscious politicians. Test firings of this three stage rocket, using Britain's Blue Streak as the first stage, had failed to come up to expectations, mainly due to troubles with the French second stage. But industrial criticism of the Government's action pointed out that Britain's total contribution from the inception of ELDO to the end of the present commitment in 1972 was £75 million, of which 88 per cent. was due to return directly to Britain in the form of industrial work. That was apart from the possibility of future earnings. Sir Edward Bedington-Behrens, chairman of the British Council of the European Movement argued that by 1980 space work in Europe would be at the break-even point between cost and benefit and that by 1990 there would be 6,000 million dollars benefit in communications, television, meteorology, earth survey and other fields in which Britain could share. Financial stringency also meant that British scientists could not take advantage of an offer to fly an advanced experiment in the American Apollo series of space flights. But the invitation showed the reputation of British space scientists in devising sophisticated experiments and apparatus, even without the use of their own large rockets to launch large satellites. In rockets British hopes lay in Black Arrow, which has been described as an attempt to lift ourselves into space by a shoestring—a financial shoestring, with an annual outlay of about £3 million and a total cost for the launcher of £6½ million. The low cost comes from the use of many of the components used in the successful Black Knight research rocket, 22 of which were launched from the Woomera range without a single failure. By 1972 it is hoped that Black Arrow will be launching its first scientific experiment. Relatively small, it is designed to put a scientific payload of about 220 lbs. into a 300 mile circular orbit. By itself it would be unable to put any object into a synchronous orbit, the "stationary" 24 hour orbit, 22,300 miles above the Earth, used by American communications satellites. But there were plans to use an electric rocket as a final stage. This, with only half the power of a single bar electric fire and developing only half an ounce of thrust but firing for the best part of a year would be able to put a useful payload of 75 lbs. into a synchronous orbit. The Americans flew an electric rocket in 1964 and had a proposal to use one for Jupiter fly-past. Electric power, obtained from solar energy, is used to accelerate ions of mercury to provide the thrust. In the Jupiter project 850 lbs. of mercury would keep the motor working for 470 days of a total flight time of 900 days with a scientific payload of 75 lbs. The British space effort continued with the very advanced Skylark sounding rockets, stabilized by a sensing equipment which locks on the sun with such an efficiency that it has enabled Britain to achieve world eminence in the field of solar ultra-violet and x-ray astronomy. A star-stabilized Skylark which would enable ultra-violet and x-ray studies to be made of stars down to magnitude five was being designed—as Sir Bernard Lovell pointed out at the British Association meeting even greater discoveries than from radio astronomy could come through observations at these wavelengths, which could only be made outside the earth's atmosphere.

Europe's first co-operative satellite, ESRO 11 was launched on May 17 by an American Scout rocket from a Californian range. Of the seven experiments on board five were from British universities. But plans for a European Large Astronomical Satellite were finally abandoned, the project of putting a large automatic telescope into orbit being thought too risky and expensive. Two medium satellites, each weighing half a ton and costing £8 million, TD1 and TD2, planned to observe solar effects on the earth at the next maximum in the sunspot cycle, were also threatened with cancellation, but Britain was fighting for their reprieve, the Science Research Council declaring that only they could justify participation in the European Space Organization.

American Troubles

But Britain's scientists were not alone in seeing their ambitions reduced by their country's financial position. The U.S.A. also had a balance of payments problem and American scientists were complaining about cutbacks in expenditure in these two same fields. A panel on high-energy physics set up by the Atomic Energy Commission reported that the U.S. leadership was passing, at least temporarily, to Western Europe and the U.S.S.R. While CERN, the European Council for Nuclear Research, had a steadily increasing budget and the Russians had built the world's largest accelerator, United States programmes generally had to operate on constant or decreasing budgets. In space research, too, the Americans were faced by budget cuts lopping their expenditure below what it had been for five years. Plans for exploration of the planets had been whittled down until there was little decided after the completion of the Apollo project to land a man on the Moon. It began to look as if, should the Apollo programme go satisfactorily as was hoped with a landing in 1969 or 1970, the Americans could be left with five or six of the giant Saturn V rockets, each with 7,500,000 lbs. thrust and nothing to do with them. One field in which the Americans had shown superiority over the Russians was in the reliability of their space probes to Venus and Mars. Now Professor James Van Allen, one of the leading American space scientists whose name was given to the first great satellite discovery, the bands of charged particles around the Earth, wrote that America was allowing its competence in planetary exploration to decay and was abandoning study of the planets to the Soviet Union. There were, however, plans for sending two Mariner probes to fly within 2,000 miles of the surface of Mars in 1969, one by the Southern polar cap and the other by the Martian Equator. The Americans were also beginning to fear that their giant Saturn V rocket might not be the biggest in the world. Dr. George Mueller, the associate administrator for

manned flight of the National Aeronautic and Space Administration reported NASA's belief that the Russians were developing a rocket twice as powerful. Earlier James Webb, the NASA administrator, had put ■ figure of 10 million pounds thrust on the new Russian rocket.

Space Achievements

Some of the most publicized space achievements of the Russians and the Americans during the period under review could be regarded as preparatory exercises for things to come. The Americans carried out two flights with the Saturn V rocket which has been developed to land a man on the Moon and bring him back. The first was a complete success but the second, in April, was only partially so. Two of the second stage engines stopped prematurely and ■ third stage engine failed to restart. There was also some excessive vibration. Later in the year Dr. Mueller said it was still hoped to land on the Moon in 1969. He pointed out that Apollo had 15 million parts and even with a reliability of 99.99 per cent. there would still be 1,500 failures. Though they had tried to offset this by duplication there were still some single points where failure could be disastrous. If a certain rocket engine failed to work then the astronauts would be doomed to continue encircling the Moon, unable to return to Earth. The director of the Apollo project, Major General Samuel Phillips, said that they were confident they knew the cause and the solution of the engine and vibration troubles in the April flight. The 1,950 photographs of the Moon's surface taken by the five wholly successful Lunar Orbiter Missions had been used to select five potential Apollo landing sites from 40 candidates identified from earth-based observations. Also in 1968, the U.S.A. made its fifth successful lunar landing with Surveyor 7, which took TV photographs and analysed the lunar soil. The Russians carried out their second exercise in the automatic rendezvous and docking of spacecraft. Cosmos 186 and 188, believed to be six ton Soyuz spaceships, capable of carrying ■ four-man crew each, carried out the first automatic docking in October 1967. Later this was described as "an initial experiment." It was followed in April by the second exercise. Cosmos 212, launched on April 14, was followed by Cosmos 213, launched the next day at such a time that it would go into orbit just as Cosmos 212 was passing by. In fact the distance between the two when Cosmos 213 entered orbit was only three miles, which meant that the timing of its launch was accurate to much less than one second. The relative speed of the two sputniks was 65 m.p.h. In orbit they sought each other by electronic sensing equipment and locked on to the Sun to ensure that they orientated in the same direction. Cosmos 212, the active sputnik, then used a main engine to manoeuvre out of its orbit to approach Cosmos 213. Then both sputniks used low thrust engines to control the speed of approach until at the moment of docking it was only a few inches a second. On docking the sputniks locked together, mechanically and electrically. The entire complex of operations was said to have worked faultlessly. After 3 hours and 50 minutes the two sputniks were unlocked, transferred to separate orbits, manoeuvred into many different orbits during the next four days and then returned to Earth. The whole operation was probably the most impressive technological feat so far achieved by man and the sputniks themselves could be described as the first computer-brained robots. It was pointed out that this technique was ideal for the assembly of giant space platforms or space ships in orbit and for the ferrying of supplies to a manned space laboratory. About

the same time Luna 14 was put into an orbit around the Moon. One of its tasks was to study the passage of radio signals between the Earth and the satellite in various positions relative to the lunar surface and this was seen as a preliminary to ■ probable flight around the Moon by a space craft carrying animals. One other Cosmos satellite which was out of the ordinary was Cosmos 215. This was an automatic observatory with eight three-inch reflecting telescopes observing hot stars over ■ wide range of wavelengths from visible light to ultra-violet and also an x-ray telescope.

Venus

In the period under review the American *Mariner 5* space probe flew by the planet Venus and the Russian *Venus 4* soft-landed. As *Venus 4* descended towards the planet it telemetered back information about its height above the planet, the composition of the atmosphere, the temperature and pressure. It was said afterwards that in a 90 minute period more had been learned about our nearest planetary neighbour than in the previous entire history of astronomy. But the *Mariner 5*'s fly-by, the next day, could have earned the same accolade but for that 24 hours difference. Consistently during the *Venus 4* descent analysis of the atmosphere showed that oxygen and water vapour made up less than 1½ per cent. of the total gas. A surprising result was that no nitrogen was found at all, but carbon dioxide made up over 90 per cent. of the Venusian atmosphere. A Russian expert, Academician Vinogradov, surmised that at some time the planet's temperature had risen above the water evaporation threshold of 50° C. and had set off an irreversible process. Surface water turned into cloud and the temperature was raised still higher by a greenhouse effect. Above 250° C. calcium and magnesium in the planet's crust would disintegrate, releasing volumes of carbon dioxide. *Venus 4* certainly found ■ temperature high enough for this process. From the top to the bottom of its 25 km descent the temperature rose from 40° C. to 280° C. The maximum pressure recorded was ■ Earth atmospheres. But even these figures may be too low. At a conference of the International Committee on Space Research Soviet scientists suggested that *Venus 4* may have landed in ■ mountainous area, at ■ height of six miles. Radio astronomy measurements give ■ surface temperature of 100 degrees higher than that recorded by *Venus 4*. It was also pointed out that the results of the Soviet and American probes agree quite closely if the radius of the planet, below its cloud cover, is 15 miles more than determined by American radar astronomy. Radar astronomy, a science in which the Americans excel, has given vastly increased precision in the measurement of distances in terms of the time taken by light to travel them. A measure of unreliability still creeps into actual physical distance because the speed of light is still known to only one part in a million. However, Prof. Shapiro, of the Massachusetts Institute of Technology, put greater faith in his radar telescopes than in *Venus 4*'s radar measurement of its own height. Measurements from *Mariner 5*, related to the accepted radar-determined radius of Venus would give a surface temperature nearer 500° C. and ■ pressure of 100 atmospheres. Conclusions on the composition of the Venus atmosphere, made from the *Mariner 5* measurements, which originally differed from the Russian picture, had been amended to agree more closely with *Venus 4*'s, Americans reported at the conference. Although the proportion of oxygen in the atmosphere is low the total amount is closer to that in the Earth's atmosphere, because of the greater

pressure. Experiments in Japan on whether a Venusian type atmosphere could support combustion showed that materials would oxidize in it. A probe powered by a high temperature ram-jet engine could travel inside the atmosphere of Venus to give a more complete picture of conditions on the planet. Despite the slowing down of American effort on planetary exploration and the cancellation of Voyager projects for soft-landings on Venus and Mars, some American space scientists were enthusiastically urging that a "grand tour" of the outer planets should be prepared for 1977. An opportunity which only occurs once in 175 years would then present itself for using the gravitational pull of the Jovian planets to swing a spacecraft on from one to the next. In this way the craft could visit Jupiter, Saturn, Uranus and Neptune, reaching Neptune in eight to eleven years. This may seem a long time but it compares with the 30 years which a direct flight using ordinary rocket techniques would require—and no present rocket could attempt it. Jupiter is possibly the most interesting of all planets, large enough, probably, to sustain some heat producing system of its own and with an atmosphere which could support some early life-producing activity. Again in 1968 the Russians proved more active than the Americans in space launchings. In the first six months they made 34 launchings, many of them four or six ton objects, to the Americans' 19. A Soviet report said that by August, 1968, 3,300 space vehicles and "assorted bric-a-brac" had been launched, including 800 satellites, automatic stations and piloted spaceships. The total weight approached 2,300 tons and of this over half had been burnt up in the atmosphere, much of it extremely costly scientific equipment. The then space population, still moving around the Earth, was 300 satellites and 800 rockets but by 1990 a million objects might have been launched, to bring real congestion to near-space. But one space object with which the Earth had been threatened, the asteroid Icarus, passed safely by. It was due to pass closer to the Earth than it will come for at least another century and some fears were expressed that it might hit, though the House of Commons was assured, on Russian authority, that it would not.

Icarus, at its nearest, on June 14, was still four million miles away.

Big Machines

The Science Research Council did not easily accept Britain's withdrawal from the 300 GeV European accelerator project. When he announced the decision at a CERN meeting Prof. Brian Flowers, chairman of SRC, made it clear that he and his colleagues would press the Government to change its mind. Britain's share of the cost, 22 per cent., would amount to about £39 million, at post-devaluation rates, spread over seven years. It did appear that, if the other countries still went ahead with the accelerator, Britain would build the bubble chamber for it. Explaining the reasons for the Government rejection of the scientists' recommendation that Britain should co-operate in building the accelerator, Mr. Edward Short, Secretary of State for Education and Science, told the Council for Scientific Policy, as expected, that lack of money was the main trouble, supported by the belief that the eventual cost would prove larger than the estimate. But he added that the Government failed to see any medium or long term economic benefits and complained that present high-energy physics laboratories had produced very few scientists and technologists for industry. In a further effort to get Mr. Short and his colleagues to change their mind the Science Research Council, it is

understood, offered to cut its own spending on the national accelerators at the Rutherford and Daresbury Laboratories. The Americans urged their own Government to take certain steps, including the building of storage rings, in which high energy particles are used to bombard each other, instead of stationary targets, with greater release of energy. Storage rings are being built and some are already in use in several places in Europe, the U.S.S.R. and Japan. The Americans also asked for the authorization of a 100 GeV accelerator planned for Weston, Illinois, which could be built by 1972 if authorized in 1969. This, it has been claimed, could easily be improved to a 400 GeV machine. In the meantime, they declared, funds should be made available for United States scientists to work at the giant Soviet accelerator at Serpukhov. This machine, commissioned in 1967, has achieved 76 GeV, 6 GeV over its planned power, and is already the scene of co-operation between East European scientists and their fellows from CERN. It seemed that the Russians would pass over the 300 to 500 GeV level if and when they build a larger machine and go directly to 1,000 GeV. It was revealed during the year that a 1 GeV prototype for the 1,000 GeV machine, constructed to a new principle, had been built and proved workable. This was a "cybernetic" accelerator in which a computer was used to control the movements of protons at speeds approaching that of light to ensure that they kept to the optimum path. But Russian scientists, too, it appears, are not completely free in their spending. The prototype had been built but it was up to "Moscow" to decide whether the real thing should be undertaken said a leading scientist from the Siberian High-Energy laboratories during the Soviet Exhibition at Earls Court in London. Both American and Russian workers were investigating the possibilities of a still more radical concept, the "Smokatron", following an idea put forward by British and Soviet scientists. In this a "smoke ring" of electrons is used to trap heavier particles. High energies are used to accelerate electrons to relativistic speeds, near that of light, but the greater mass of the trapped protons means that they achieve proportionately greater energies. Parts of a prototype had been individually tested at the Russian centre at Dubna and found to work. The next step was to assemble the whole prototype. Reports had it that protons in this machine would reach 1,500 GeV, though they would all be released in an infinitesimal fraction of a second so that only photographic techniques could be used to observe their effects. The Americans were hoping to use the technique in a 1,000 GeV machine. At the other end of the scale the Americans should secure a lead by 1971 with a machine called a "meson factory", an accelerator of relatively low energy but producing beams thousands of times more intense than any existing accelerator. An economic answer could have been given to Mr. Short in his comment on the deficiencies of high-energy physics by pointing to one exhibit at the Soviet exhibition in London which provoked admiration in the knowledgeable. This was a small industrial accelerator, produced in the Soviet science city near Novosibirsk by Prof. Evgeny Abramyan and said to be superior in a number of ways to the products of America which had previously had this field to themselves. These accelerators can be used for welding, improving the qualities of plastics, dealing with water pollution, sterilizing, for fixing atmospheric nitrogen, among their industrial uses, as well as for innumerable scientific purposes. Sales were earning foreign currency and Prof. Abramyan's institute was being credited with these earnings.

Modern Alchemy

The ideas and ambitions of the mediæval alchemists are small beer to the high energy physicist. As well as manufacturing, in nuclear piles and accelerators, the elements which nature has already produced, he is making a determined effort, all over the world, to produce the transuranium elements, of higher number than uranium, which are not found in ordinary conditions, though Prof. Powell, of Bristol University, reported during the summer that he had found evidence of them in cosmic rays. The capture of extra neutrons by uranium atoms in atomic piles was one of the earliest ways of producing transuranium elements, though this is a long and chancy business and, in the case of elements with numbers over 100 these usually break down spontaneously before they can capture any more neutrons. Then came the discovery that these elements are sometimes found in the debris of thermonuclear explosions. The Americans carried out special underground explosions to produce elements 101 to 106, but with an unexplained lack of success. Then American workers began efforts to produce these strange elements in accelerators and so set off a new line of effort. The most successful achievements in this new alchemy were described at a conference in the summer by Academician Georgii Flerov of Dubna. There a special accelerator has been devised to fire ions of light elements at targets of heavy elements. If, for example, a neon ion, atomic number 10, could be made to "stick" to uranium, atomic number 92, the result would be element 102. In fact it does stick and element 102 does result. Similar work is going on in Sweden and at the Berkeley laboratory, U.S.A., and the Russian workers admitted their indebtedness to techniques devised there. But undoubtedly the greatest success has been achieved at Dubna where not only the physical identification has been possible but also chemical analysis of elements 101, 102, 103, 104 and 105. These new elements fitted well into their deduced positions in the Mendeleev Table. Work was going on in producing enough atoms of element 106 to identify it but beyond this prospects were dim. Heavier elements would probably be unstable and the atoms would disintegrate almost immediately. But there was some hope that there would be "islands of stability" with elements 114 and 126. The American physicist, Victor Weisskopf, commented that Flerov could do anything nature did but he doubted if Nature could do everything Flerov did. But he hoped that Flerov would fail to isolate elements 114 and 126 as their stable existence would be a profound upset to present theory. He pointed out the value of this work in leading man to understand the processes going on in stars, the source of all energy and all materials.

Digging Deep

During the year the Americans made progress on their Deep Sea Drilling Project, to obtain cores of ocean sediments. Using a special ship which is accurately positioned every two hours through a satellite navigation system, by computer controlled positioning equipment, they are able to drill in up to 20,000 feet of water and penetrate sediment up to nearly half a mile. On its second drill a show of oil was found in nearly 12,000 feet of water in the Gulf of Mexico. This project was said to be in no way a substitute for the Mohole Project, to drill through the mantle of the Earth, which is thinnest beneath the oceans. The Russians were also boring deep. They completed an oil and gas well, more than four miles deep, in the near Caspian depression, and began one nearly five miles deep. After that

was to come a nine mile deep well. These were part of a project for ten "super-deep" wells, partly to prospect for minerals and partly to prepare for drilling right through the Earth's crust.

Feeding the Hungry

In a different "down to earth" field British scientists were doing great work for humanity in tackling the problem of providing food for the hungry. British processes for producing protein from oil are now being utilized in making animal feeding stuffs. During the year it was announced that another process, for extracting protein from waste leaves and vegetable matter, for protein-deficient humans, was at last getting under way. This uses a principle first described 200 years ago but not taken up until just before the 1939-45 war. The man who took it up was N. W. Pirie and at Rothamstead Experimental Station he perfected a machine which, it was announced, is to have its first large scale use in Africa and South America, following field trials in India and New Guinea. The machine crushes leaves and other material, extracts protein in the juice and coagulates it to separate it out. One ton of ordinary leaves can produce 40 pounds of pure protein and one machine could cater for the needs of 60,000 people a year, supplying extra protein to supplement the usual protein-deficient native diet. In tropical conditions well over one ton of protein could be obtained per acre in this way, far more than by conventional crops or by grazing. The residue of the vegetable matter could be used as cattle fodder and the waste liquor that runs off the coagulated protein curd could be used to cultivate yeasts and other organisms being studied for use as human foods. Moreover by linking a protein machine to a farm, people would be helped mentally as well as physically, by being encouraged to help themselves.

ARTISTRY BY CAMERA.—Whether the camera lies or not it is often a little too revealing, especially for the photographer who wants something of the artistry of the painter in his product. A critically focussed and brilliantly lit image can turn the human face into a craggy landscape, with every wrinkle delineated but with little to show the character of its owner as can the vaguer brushwork of an artist. Softening lenses, which can reduce the highlights of a scene so that spots of light are no longer sharply focussed but flow outwards were invented many years ago. They give the glaring white parts of a picture a shimmering appearance and brighten up the deepest shadows, but they do this at the expense of clarity. There is always some loss in the definition of the outlines. In this way the camera is inferior to the human eye which can see the light in a candle flame—the camera sees it through a softening lens yet also sees the outline of the flame in sharp focus. Ordinary softening lenses are often flat pieces of glass with a large number of concentric circles cut into them. They are fitted over the standard camera lens and stopping down the camera lens can restore the clarity of outline, but this, at the same time, destroys the softening effect.

A German optical firm claimed to have invented a form of softening lens which did not soften the image at the expense of clarity. It was made of plastic the outside surface of which was covered with "bumps" measuring two millimetres across by a few thousandths of a millimetre in thickness. The bumps were spread evenly but spaced at different intervals on three different kinds of attachment. Using the three types of attachment in different conjunctions, it was claimed, gave a wide range of softening effects. The effect remained constant with change of lens aperture, so the

photographer retained his ability to control the depth of focus, an important part of the photographer's art. Also, it was claimed, the new lens attachments were suitable for taking pictures against the light and for recording wide ranges of tones in, for example, shots of autumn trees with bright yellows against a dark background. In enlarging they could reduce the grain without blurring the outline.

AUTOMATIC PIPELAYER.—With the world laying each year more than enough pipeline to encircle the globe, equipment which can do the job ten times quicker at half the cost of anything else is likely to find a ready market. This was the operating efficiency claimed for a giant plough, the Badger Major, produced by a Leeds firm, Hudswell Yates Development Ltd., with National Research Development Corporation backing, which was demonstrated to pipelaying engineers from many countries during the summer. Equivalent to the animal namesake's striped nose is an 8 ft 6 inch steel plate, raised or lowered by hydraulic rams, which is forced edgewise through the soil by a large caterpillar tractor. The slot made by the cutting edge at the front of the plate is expanded at its base by a steel cylinder into a tunnel large enough to take the pipeline. As the tractor moves forward it lays the pipe in the tunnel left behind it. The process, it was claimed, could revolutionize the laying of plastic pipes for water supply, sewage, natural gas, land drainage and oil distribution. The Central Electricity Generating Board was also reported to be interested in the £80,000 machine for cable-laying.

Previous attempts at single operation pipelaying have been limited to three-inch pipe. The Badger Major can handle 18 inch pipes. It is also claimed to be the first vehicle to be controlled by a light beam. The light is projected along the line in which the pipe is to be laid by a projector behind the pipelayer. Any deviation from the intended course is signalled by a dashboard instrument to the driver who then adjusts the direction of the tractor or the depth of the blade. Control of future models, it was suggested, could be fully automatic. On its first trial it laid 1,000 yards of pipe in a day compared with 10 yards by conventional methods. In another scheme, used on a £430,000 contract, it saved about a quarter of that sum—in poor soil conditions the savings would be more.

BACTERIA FOR BABIES.—The deliberate inoculation of babies with one form of bacteria to protect them from the attentions of much more harmful kinds is a new form of treatment which roused some strong feelings and argument in medical circles, including complaints that it was "unethical". The vulnerability of babies to disease in their first few days of life is well-known, as, nowadays, is the occasional presence of particularly virulent forms of disease organisms in some hospitals because of orthodox methods of countering germs by chemical drugs and antibiotics and also, possibly, by standard antiseptics. The end result of the two was shown by the epidemics of baby diseases which swept through some hospitals and made newspaper headlines in 1968. The principle behind the new philosophy of "bacterial interference" was perhaps best displayed in a report in the New England Journal of Medicine of work in the infant nurseries at the Cincinnati General Hospital. There studies were made of the effects of the use of hexachlorophane, an antiseptic with a persistent and cumulative action, in the protection of newborn infants against disease germs, particularly against one form of staphylococcus. This was done by examining the bacteria in the nose and umbilical stump of the children, while progressive use was

made of the antiseptic. Handwashing by staff alone resulted in about fifty per cent. of the children having colonies of the staphylococci at the two sites. Daily bathing of the children with a preparation containing the antiseptic and a detergent reduced this to about five per cent., but at the same time there was a considerable increase in the number of babies who had coliform bacilli and special regimens developed to reduce these had little effect. It turned out that in only one case out of over 4,000 was the staphylococcus present when one form of the coliform bacillus was found. The antagonism between the two disease-germs could be explained by the fact that a product of one of the coliform bacillus has been used as an antiseptic on the Continent against staphylococci.

While no one was suggesting that a child should be deliberately infected with coliform bacilli which could lead to fatal intestinal illness a parallel case of "bacterial interference" had been put to practical account by the Cincinnati doctors. This was the introduction into the nose and umbilical stump of one type of staphylococcus confidently believed to be non-pathogenic. Usually successful colonization by this bacteria follows and once this has happened the organisms repel attempted invasion by virulent forms during epidemics. The evidence seems conclusive as large reductions in septic lesions, compared with controls, has been recorded. To the criticism that it was unethical deliberately to infect babies with any form of germ came the counter that fundamentally there was no difference, ethically, between this procedure and the use of live vaccines. It was also argued that the new procedure should not be limited to its present use, that there were precedents for "infecting" the alimentary tract with supposedly beneficent bacteria.

BARNACLE GLUE.—Barnacles will provide the answer to an age-old problem of the dentist—and his patient—if an American research programme pays off. The dentist's problem is how to fix fillings into a tooth so that they will not fall out and will not weaken the tooth. The patient's trouble is, of course, the pain that goes with a visit to the dentist. One reason for the pain is that fillings have to be mechanically locked into a tooth, they cannot be stuck in by any man-made adhesive. So sound tooth generally has to be drilled away to provide a mortise into which the filling can set. Not only is this a painful waste of good natural tooth, it can reduce the strength of the tooth and result in breakage and loss. If only the decayed part of a tooth had to be removed then that sound tooth would be saved, the patient would be spared a good part of the pain and his pocket, or that of the National Health Service, would suffer less too, for the job of filling would be quicker and less costly. At the moment this cannot be done for lack of an adhesive powerful enough to hold the filling against the strains of biting and durable enough to resist the solvent action of saliva. The answer, according to an American, Nathan F. Cardarelli, as reported in *Scientific American*, is barnacle cement, and his arguments have led the National Institute of Dental Research to sponsor an investigation at the University of Akron under the direction of Roger Keller. Barnacle cement, it appears, may turn out to be the stickiest of all natural adhesives. According to Cardarelli man's efforts at making things stick are in their infancy, he has not bothered to investigate many natural substances that do the job better than anything he has so far devised. In particular, it appears, barnacle cement is superior to all man-made adhesives. In a booklet for the National Institute of Dental Research Cardarelli points out that the research study has shown that,

with one or two exceptions, the common acorn barnacle can attach itself firmly to all surfaces that are immersed in ocean water, including such hard-to-stick surfaces as polished glass, mica, metals, ultra-smooth plastics and—human teeth. The barnacle secretes its cement, ■ pale brownish liquid from a gland beneath its antennae. In contact with water it hardens in about fifteen minutes to a brownish solid.

One species, it appears from mechanical tests, produces cement with an adhesive strength of 22 pounds per square inch, one and a half times the "stick" which would be provided by a perfect vacuum under normal atmospheric pressure. Its tensile strength is at least 50,000 pounds per square inch. As for the question whether it would stand up to the chemical conditions inside the human mouth, scrapings of cement made from the basal plates of Florida barnacles showed that it was extremely insoluble in almost all the common solvents. No one suggests, of course, that live barnacles should be used to produce the cement and so play a rôle in dentistry akin to that played by live leeches in medicine in the past. Efforts to analyse the cement so that it can be produced purely and artificially show that it is probably a polysaccharide and not ■ protein. But, apart from carbon, hydrogen and oxygen, there are a number of trace elements and efforts continue to determine its atomic structure.

BEETLE CAMOUFLAGE.—A rolling stone may gather no moss but the wandering leaf-eating beetles of New Guinea do, according to Dr J. L. Gressit and Dr. G. A. Samuelsen of Bishop Museum, Honolulu, and Dr. D. H. Vitt of the University of Michigan Herbarium. They reported in *Nature* an unusual camouflage system in which the beetles provide primitive plant life with ■ suitable place to grow in return for protection from their own predators. The beetles, Papuan Weevils, were found to have mosses, liverworts, algae, fungi and lichens growing on their backs. One combination of an alga and a fungus formed a hard green or yellow crust such as had been found on tree bark, stones and elsewhere. Examination of the weevils showed that they were adapted for their plant carrying role. On their backs were shallow depressions surrounded by ridges and hairs in which the tiny plants could grow with some protection.

Not only do the plants make the beetles resemble the moss-covered parts of the plants on which they feed, so hiding them from predators, but they may also make them unpalatable. In an experiment some of the moss-covered beetles were taken from their usual browsing grounds to bushes in ■ more exposed place where their camouflage would be far less effective. They still proved to be attacked very rarely, indicating that something other than the camouflage qualities of their moss cover was at work.

BRITISH ASSOCIATION.—The 130th annual meeting of the British Association for the Advancement of Science took place in Dundee under the presidency of Dame Kathleen Lonsdale, F.R.S., the Association's first woman president. Following precedent by giving a general survey in her presidential address, rather than ■ specialist account of her own field, crystallography, Dame Kathleen, ■ Quaker and a pacifist, told of the "occasional and nightmarish fear" that came to her, that her life's work in science had been wasted. One might fear, she told her audience of distinguished scientists, that science was, if not a monster, at best a victim of man's determination to destroy himself and his inheritance. She contrasted the beauties of the

countryside with the ugliness produced by man. Most scientific and technological debris was ugly, slag-heaps, hideous mining districts, detergent foam on streams, tar and oil on beaches, sulphurous fogs, discarded paper and tin, the smells and the noise, specially the noise. Scientists could not altogether wash their hands of those horrible consequences of the commercial applications of their work. If the pure scientist did have the privilege of spending much of his life being paid to do what he found most enjoyable then he could not, if his work was misused, blame those who had misused it, politicians, military men, industrialists, the man-in-the-street, and feel no sense of blame himself. Knowledge and privilege brought great responsibilities, including those of foreseeing what the fallout from one's research was likely to be over a wide area of human happiness and of devising feed-backs to give warning of potential dangers. "The scientist then could, and I think should, exercise his powers of influence and pressure as an informed citizen to see that, as far as in him lies, a right choice is made and right action taken." She also thought that one should not work in any field, however pure, of which the immediate and obvious application was evil and the good application obscure. Dame Kathleen urged that instead of exporting arms to developing countries we should meet their real needs for teachers, doctors, nurses, engineers, know-how and social security. Many scientifically-trained young people would be not only willing but glad to put in a period of international service abroad where their skills were most needed. She was suggesting not an unpaid voluntary or semi-voluntary service but a properly organized, properly paid-for period of international service abroad for young scientists, young engineers, young doctors, young teachers in those countries which needed them but which could not afford them and whose own scientists and doctors we were draining away.

During ■ symposium on disasters Lord Robens, Chairman of the National Coal Board, urged that the British Association should set up a working party to consider what steps might be taken to ensure that existing knowledge was used and foresight exercised in advance of new forms of disaster. There should be regional disaster squads with fleets of fully equipped vans to take immediate action.

The presidents of sections and the titles of their presidential addresses were: *Physics and Mathematics*, Sir Bernard Lovell, "The influence of radio-observations on the development of astronomy"; *Chemistry*, Dr. H. M. Stanley, "Research and development in petroleum chemicals"; *Geology*, Dr. S. Buchan, "Geology in Action"; *Zoology*, Prof. E. B. Ford, "Ecological Genetics"; *Geography*, Prof. W. B. Fisher, "Geographical contributions to development schemes—World examples with special reference to the Middle East"; *Economics*, Prof. E. M. Hugh-Jones, "The impact of technical change"; *Engineering*, Sir Herbert J. Manzoni, "Transportation and environment"; *Anthropology*, B. R. S. Megaw, "Three Royal Inauguration Rites"; *Physiology and Biochemistry*, Prof. P. J. Randle, "Metabolic integration in animals"; *Psychology*, Prof. H. Kay, "Psychology's task: techniques, tools and training"; *Botany*, Prof. L. J. Audus, "Plant growth substances—past present and future"; *Forestry*, Prof. J. N. Black, "Economic problems in State and private forestry"; *Education*, Sir Henry Wood, "From Robbins to 1970"; *Agriculture*, Sir David Lowe, "Farming for factories"; *Sociology*, Prof. K. Little, "Social effects of technological change in developing countries"; *General*, Sir Gordon Sutherland, "The migration of scientists".

CALL OF THE LOCUST.—Something in the air causes those immense swarms of locusts which can obscure the sky in those countries where locusts are a plague and can eat crop-bearing land into desert. The something, according to Dr. Sylvia Gillett, of the Anti-Locust Research Centre, writing in *Nature*, is a chemical produced by the locusts themselves, what is technically known as a pheromone. Chemicals released by individuals in a species which affect the group behaviour of the species are not unusual in the insect world and can be considered to be the social counterpart of hormones. Locusts are already known to release one pheromone that hastens maturity. Dr. Gillett reported experiments which suggest that another is produced by them which encourages grouping and induces locusts to change from the solitary life which they sometimes lead to the gregarious one. The locust living an individual life differs considerably in size and colour from those swarming together but solitary locusts can easily be made to become gregarious by crowding them together for a day.

Dr. Gillett tried to raise solitary locusts by keeping individuals in separate cages without physical contact between them. But she found that they usually showed the characteristics of the socially inclined locusts. Her failure to raise the solitary type led her to think that there might be a pheromone at work and that the large numbers of locusts present at the centre were affecting her experiments. So she bred some locusts at a locust-free laboratory in Edinburgh, raised them in individual cages and then put them together in one area to see if they did immediately form groups. She found that her Edinburgh locusts showed far less tendency to group than those at the Anti-Locust Research Centre and that many of them had the solitary appearance, including seven eye stripes, while those at the Research Centre had the six stripes of gregarious locusts. If her explanation is right then the much smaller numbers of locusts in Edinburgh meant a much smaller concentration of pheromones in the air, perhaps a complete absence, while the "group emanations" of the masses of locusts at the Research Centre were strong enough and widespread enough to affect all locusts bred there. Once a sufficient number of locusts come together in a group, she argued, they in effect surround themselves with a chemical aura which makes other locusts within range join them.

CHILLED MEAT—ON THE HOOF.—It is a wise farmer that knows his own cow—if his herd is as big as those prairie ranging ones of the U.S.A. Western films have made everyone familiar with the heated branding iron, the violent objections of the animal being branded, the bellow of pain, almost the stench of scorched skin and hide. But in Wild West days and for many since it has been the only sure way of giving an animal an unimpeachable identity. Dyes and bleach marks grow out with the animal's hair and plastic tags are eaten, torn off or just disappear in the mud. Even the old-fashioned brand mark, of course, was not visible except at close quarters. But would-be rustlers have more to fear with one of the latest achievements of American technology. This has produced a way of making a brand mark which will not wear out and is identifiable from the far end of a field, even if not from the other side of the prairie. The basic item is the same as the old-fashioned branding iron, but instead of being heated in a fire it is chilled to well below zero temperature with solid carbon dioxide—the "snow" used to destroy warts by freezing. The skin branded with the cold iron is frozen, the hair

drops out and the skin loses its pigmentation. When the hair does grow again it is permanently white so, provided the animal was not originally coloured white, a clear mark stands out on its skin for the rest of its life. The method is cheap, it does not adversely affect the value of the hide and, more importantly to the cow, it is not particularly painful.

CONTINUOUS STEELMAKING.—Hopes of developing a way for making steel in one continuous process from loading iron ore into the furnace to the finished steel casting came nearer realization with further successes in the British spray steelmaking system. Spray steelmaking, which operates at speeds up to 100,000 times faster than the century old processes still used to produce three quarters of the world's steel, reached the stage where plans were announced for building plant capable of producing nearly half a million tons a year coupled with continuous casting. Basically the art of steelmaking is to remove unwanted carbon and other elements from blast furnace iron, leaving behind just sufficient alloying material to produce steel of the strength and toughness required. This is done by oxidizing the unwanted elements away, usually by bubbling air through the molten metal, though the process can be quickened by using oxygen. Oxygen is being increasingly used but one disadvantage in the fastest traditional steelmaking process is that the use of oxygen can result in the rise of temperature to the point where damage is done to the vessels holding the metal.

One way of speeding up the reaction between oxygen and the metal is to expose a greater surface by turning the liquid metal into a spray. This is the basis of spray steelmaking and was first done in 1958 by the British Iron and Steel Research Association. Initially the idea was just to remove silicon from blast furnace iron so that steel could be made more quickly by conventional means. But results were so promising that attempts started to extend the process to carry out the entire operation of turning iron into steel. To do this lime is added to the spray to react with other unwanted materials to carry them away in the form of slag. Other fluxes are sometimes needed to keep the slag in the correct condition. In the process as developed, a flow of liquid metal is atomized by jets of oxygen to a cone of fine droplets into which the lime and other fluxes are introduced. A temperature of about 2,100 degrees Centigrade is produced by the reaction and in the second or so it takes for the metal to fall from an injecting nozzle to a containing vessel the whole process of steelmaking is completed.

In a Bessemer converter, the quickest traditional system of steelmaking, carbon is removed from iron at the rate of half of one per cent. Calculations show that in spray steelmaking it progresses one hundred thousand times as quickly. In the containing vessel the slag floats on top of the molten steel—and as the steel droplets pass through the slag further refining is possible. The separation of slag from steel makes it possible to draw slag and steel off continuously through different outlets. The theory may seem straightforward but its practice presented problems which took years to solve. It was found necessary to add inert gases to provide nucleation points around which the oxygen-carbon reaction could take place, just as adding a lump of sugar to a glass of fizzy lemonade bubbles off carbon dioxide gas much more quickly. Unwanted metals such as phosphorus proved difficult to get rid of to the extent necessary until slag-forming materials were included in the spray in exactly the right form and proportions. The amount of carbon left, upon which depends the quality of the steel, itself depends quite critically on the flow of oxygen.

The first application of the process, outside a small pilot plant at Sheffield, was at the Millom Hematite Ore and Iron Company in Cumberland. This really took the process beyond being a mere laboratory experiment by 1966 but the product was still not fully satisfactory. Another plant opened at the Lancashire Steel Manufacturing Company at Irlam, near Manchester, in 1967, took the process a stage further. More problems were revealed but they were solved and the economics of the process became clearer. In fact they became so clear that the British Iron and Steel Research Association formed Spray Steelmaking Limited in June, 1968, to help the adoption of this new technology by industry. Millom had hopes of building a 450,000 tons a year plant coupled with continuous casting and engineers of Humphreys and Glasgow, Spray Steelmaking's licensees outside the U.K. and N. America, prepared a design for a 400,000 tons a year plant which would cost only £250,000, considerably less than any other steelmaking plant of this size.

Dr. Malvern John Rhydderch, Manager, Research and Development, Spray Steelmaking Ltd., describing the present situation in *Science Journal* reported that the Soviet Union, Japan, Australia and France were all working strenuously to solve the problems of continuous steelmaking, which would produce steel not only more rapidly but more cheaply. The steelmaking plant of the future could well be a push button affair, with computer control, in which the separate arts of ironmaking, steelmaking, casting and rolling would be combined. Not only would this get around the disadvantages of batch production, with waste of fuel in reheating and the difficulties of meeting orders which were not multiples of the amount of one batch, it would give high yield, constant demands on raw materials and a more uniform product. In the steel plant of the future, as he pictured it, molten iron, tapped from a blast furnace, would flow into a dish with an outlet in its bottom. The metal would be atomized by blasts of oxygen as it fell out of the dish to pass into the spray steelmaking plant. Slag would be removed from one point while from another molten steel would flow to receive the necessary alloying additions before running into a continuous casting plant and then emerging to the finishing mill.

COUNTING ANCIENT DAYS.—Fresh evidence that the day is getting longer as the Earth slows its speed of rotation was claimed to have been found by two American scientists. Professor W. B. N. Berry and Dr. R. M. Barker, of California University, reported, in *Nature*, their belief that they had found a new way of counting the days in a year by the markings on fossil shells. Experiments with living shells in Cholla Bay, Mexico, showed that a ridge was added to the shell during each fortnightly tidal cycle. Studies of fossil shells from the rocks of the Cretaceous Period, about 100 million years old, showed an average of 24.98 such ridges in each annual band of growth. This would indicate that there were half this number of lunar months, 12.49 in the year then, each producing two tidal cycles as the Moon travelled around the Earth. The half-monthly bands were themselves divided by very fine ridges which were believed to represent daily growth. Modern experiments had already shown that such ridges were produced daily on coral and other shells. Counting the ridges on other fossils laid down at the same date showed an average of 29.65 in each lunar month. Multiplying the days in the Cretaceous month by the months in the Cretaceous gave a total of 370.3. This agrees well with a figure of 371 days indicated

by astronomical calculations. These indicate that while the period of the Earth's revolution around the Sun remains constant tidal forces on the surface and in the interior will slow down its rotation by about two seconds every 100,000 years. With shorter days in earlier times there must have been more days in the year.

CURE FOR SPACE STAGGERS.—In the rigorous course of training facing would-be astronauts there should be a few ballet lessons—if the advice of doctors in Copenhagen is taken. They called on the help of members of the Royal Danish Ballet to learn more about the problem of dizziness, which can be a serious hazard in the weightless conditions of zero gravity. Ballet dancers, as any spectator must notice, seem immune to dizziness. In Tchaikovsky's Swan Lake ballet, for example, one piece of music calls for 32 pirouettes to be performed in 24 seconds. To try to learn just what it is which brings about this immunity a special rotating chair was made to simulate pirouetting. Electrical recording equipment attached to the eyes of the subjects noted the degree of nystagmus—a rhythmic rocking movement of the eyes—which, in normal people, is a good guide to dizziness. When the researchers tried their device on themselves and their assistants they found that they all became markedly dizzy after only three turns or pirouettes, less than one tenth of the Swan Lake demand. When ballet dancers were put into the chair the first difference noted was that they were far more relaxed than the untrained subjects, they did not cling to the chair when rotated with that panicky grip which ordinary people use when lured into the more violent gyratory devices at fun fairs. None of the dancers showed any dizziness, no matter which way they were spun. Some did show nystagmus reaction but this was reduced when the dancers were asked to use the "spot-holding" technique. With this the dancer attempts to keep in view a stationary spot on a wall during rotation, so producing the sharp sideways head and neck movements which some dancers and ice skaters show when spinning.

The fact that a few dancers did show nystagmus reactions without becoming dizzy puzzled the investigators and one suggestion was that hard training must condition the central nervous system to disregard nervous impulses caused by spinning. If this is so, said one of the investigators, then it might be possible to shut off the mechanism which blocks these signals with alcohol. Perhaps not surprisingly one dancer who had the equivalent of nine whiskies before being spun in the chair did come out of it dizzy. The findings that dizziness and drink go together and that ballet dancers should stay sober are not the only ones reported by the Danish team. Astronauts, they say, should be given plenty of "spot-fixing" training and be spun rapidly to conquer any tendency to dizziness such as is believed to have made the trip of Hermann Titov, the second man in space, unpleasant for him.

DATING THE VINLAND MAP.—Radio-isotope dating of a new kind was developed by Dr. Allan Stevenson, of the British Museum, to date historic documents. Normally this form of dating is done by measuring the proportions of radioactive isotopes of certain elements in the object being dated: the older the object the more the radioactivity will have decayed. Dr. Stevenson, however, used radio-isotopes to reveal otherwise invisible watermarks and so make it possible to compare the watermarks in an undated document with those of another of known age. A layer of radioactive plastic, containing carbon-14, placed on one side of the

document will emit electrons which pass through the document to record on a photographic plate on the other side. The slightly thinner areas of paper left by the watermark show up in the photographic impression. The frames used by ancient paper makers to catch and dry the wet paper mixture, which leave the watermark, used to wear out in about two years and the minute differences in replacements easily show up in the radio-isotope photograph.

A report on his work in the journal *The Paper Maker* supported the belief that the Vinland map, which shows the outlines of Greenland and North America, was drawn before Columbus's voyage of 1492. The map itself is drawn on vellum which has no watermark but an accompanying document was examined and proved to have a watermark coming from the Piedmontese town of Caselle in about 1450 A.D. Use of the technique brought disappointment to the Pierpont Morgan Library in New York by dating the Constance missal, which the Library had bought in 1954 in the belief that it was printed by Gutenberg and was the earliest printed book in Europe. Dr. Stevenson showed that its watermarks dated it to 1473 and that it was not a product of Gutenberg.

DISHWATER RESEARCH.—Nothing is an unmixed blessing and labour saving aids, even in the kitchen, can lead to more work for someone. The coming of one piece of technology, the dish-washing machine, to the kitchen, has meant more technological problems. The trouble is that the dish-washing machine is not as sensitive as the human hand. Housewives rarely have the water hotter than 50 degrees Centigrade and their softer-handed husbands, when brought to the kitchen sink, usually want it cooler. The detergents used, as everyone knows from the advertisements, have to be mild. But the same does not apply with the dish-washing machine, and there's the rub, as far as the glassware is concerned. It does not get rubbed away but eaten away by very alkaline detergents helped on by the 80 degree temperatures used and the lengthy periods of time the mechanical washing up takes.

Workers at the British Glass Industry Research Association reported their struggles with the problem during the year. So far they had shown that although detergents ranked as "good" when used with ordinary dishes only start showing signs of attacking the glass after 25 washes, while the effects of "bad" detergents is noticeable after five, with both a customer would have cause for complaint after 200 washes. But the only advice that could be given at the time of the report was to wash in water alone.

One other washing up problem was solved by scientists of the U.K. Atomic Energy Authority. This was the problem of the elegant, modern wooden-handled cutlery. The handles cannot be kept out of the water, as good housewives advise, when a dish-washing machine is used. The answer, produced by the Wantage Research Laboratory, is to fill the pores of the wood with plastic. First of all the air is sucked out of the pores in a vacuum vessel. Then a liquid plastic is added and the vessel pressurized to drive the plastic into the wood. After that the wood is exposed to radiation from a nuclear pile and the plastic becomes solid. Some soft woods absorb more than their own weight of plastic, hard woods much less and teak less than one per cent. But the end result is a dense, harder wood which no longer shrinks and expands with changing air conditions and which is impervious to moisture. The treated wood can be brought to a high polish which is not affected by cold or hot water. Not only will these wooden articles stand up to a dish-

washing machine, they can even be boiled. Boats, garden tools, sports goods, parquet flooring will all last longer when made of this wood-plastic material, said the A.E.A., justifiably proud of one of the first results of the Government policy of putting its scientists to work in the ordinary industrial research field as well as in nuclear physics. The cost?—£200 to £300 per ton of wood treated.

EARTH WITHOUT OXYGEN?—Man may be bringing about the ultimate catastrophe, not with hydrogen bombs or genocidal use of disease germs, but by the depletion of the atmosphere's oxygen. This warning was given at the annual meeting of the American Association for the Advancement of Science by a professor of ecology, Lamont C. Cole, of Cornell University. Disaster could come through man, the highest form of life, breaking the ecological cycle by disregarding the importance of the humblest forms. Oxygen is taken out of the atmosphere by the act of breathing and by all the other processes, including the burning of fuel, which depend on the combination of oxygen with other materials. In turn the atmosphere is replenished with oxygen by the plant life which uses the energy of sunlight to break down carbon dioxide into oxygen and the carbon needed for tissue growth. Not only are plants the ultimate source of all animal food, they provide the oxygen which animals need to burn up their food. Nowadays, while man is increasing the rate at which oxygen is removed from the atmosphere by burning fossil fuels in larger quantities, he is also reducing the amount which goes back by removing a million acres of photosynthetic plant life each year as he covers the Earth with the asphalt and concrete of his civilization. But it is not his activities on land which Prof. Cole warned against. He pointed out that 70 per cent, or more of the oxygen replenishment of the Earth's atmosphere goes on in the seas by the activities of those humblest of plants, the diatoms in the plankton. Nowadays, said Prof. Cole, vast quantities of poisonous garbage is being dumped into the seas, pesticides, detergents, radio-isotopes, and no one knows just what effect they could have on forms of life which have never had a chance of adapting to them. We could not assert, he said, that we were not already poisoning the marine diatoms. Photosynthesis might have been stopped over the area of the North Sea if the *Torrey Canyon* had been carrying herbicide instead of oil.

GLASS BOATS.—Glass has one great advantage when used for the hulls of boats. It is transparent and so makes possible those glorious views of the seabottom and its denizens which delight visitors to marine exhibitions in Florida and other places where the colours are brighter and the waters clearer than around Britain. But it also has structural advantages which increase its usefulness when used for scientific purposes. According to Edwin W. Lusk, engineering supervisor of the Hydrospace Department at the Corning Glass Works in the U.S.A., it gains strength in the vast pressures of ocean depths, it is more buoyant than metals and is chemically inert to marine fouling and corrosion. Its strength to weight ratio, he declared, would have enabled the *Trieste* bathyscaphe, which descended in the Marianas trench in 1960, to have carried nearly an extra ton payload if its metal pressure hull were replaced by a glass one.

In a year when the limitations of conventional submarine construction and rescue equipment were shown by the loss of the American nuclear submarine *Scorpion*, it was disclosed that two U.S. Navy deep-sea research vehicles being built were using glass as a basic construction material. The

Corning Works had produced two 4 ft. 6 inch glass hemispheres to form the pressure hull of the Naval Underwater Warfare Center's Hikino manned vehicle and a 3 ft. 6 inch hemisphere to form the end of the Center's Deep View Vehicle. The 4 ft. 6 inch hemispheres were designed to operate at depths of almost four miles and would be joined by chemically strengthened glass and titanium.

HOTTER UNDER ENGLAND.—Whatever complaints one may have about summer temperatures in England it is appreciably hotter beneath the surface than it is under Wales, Ireland and Scotland, according to three Cambridge scientists. R. N. Edwards, R. J. Banks and a Canadian, L. K. Law, all of the University Department of Geodesy and Geophysics, measured subterranean temperatures by taking delicate measurements of the Earth's magnetic field, using a proton magnetometer. The surface magnetism is a guide to rock temperature because the hotter the underlying rocks are the greater their electrical activity. The Cambridge workers carried out their measurements along the 52nd parallel of latitude, just north of Cambridge, moving westwards across England into Wales and on to Ireland. Other measurements were taken south of Edinburgh and Glasgow. Analysis of the findings in the Cambridge University computer showed marked temperature changes, reaching about 1,200 degrees, about 100 kilometres below the surface in Wales, Ireland and Scotland but only fifty kilometres down in England.

JET-BELTS.—Strap-on flying equipment to enable the user, like the hero of an American comic, to leap over buildings and soar into the air became a prospect of the near future with a new piece of American ingenuity, reported to have come through its first tests. Instead of the winged shoes of antique legend it was an up-to-the-minute jet-belt which was to give twentieth-century personalized flying. As with many inventions military demand was providing the spur to human invention. The buildings that would be flown over would be enemy fortifications, in the first instance at any rate. There was also the somewhat far-fetched proposal that parachutists, with their operation completed or failed, might be able to use the equipment to leap a thousand feet or so up to a hovering collection point instead of calling vulnerable helicopters or transport planes down to ground level.

American investigations into the possibility of one-man snap-on flying equipment started after the Rolls-Royce "Flying Bedstead" showed the possibility of vertical take-off. Tests have gone on in the U.S. with a rocket-powered device which could be strapped around the waist. The lift from a small hydrogen peroxide rocket motor enabled demonstrators, in tests, to sail over small obstacles with a total horizontal range of about 300 yards. The new jet-belt uses a turbofan engine. Jet power from the engine is transmitted to two ducts which extend outward about two feet from behind the shoulders and then turn downwards. At the tips of the ducts are swivelling nozzles of the type used to make vertical take-off and landing possible in the British Harrier aircraft. In the jet-belt the nozzles can be made to tilt as well as swivel and point virtually all round the compass, providing the sole means of direction control as well as lift and propulsion. The engine is two foot long and a foot in diameter with the paraffin fuel carried in two transparent plastics and the whole outfit on a corset-sized belt with twist grip controls. To avoid any possibility of burning the parachutist, cooling air is passed immediately behind the wearer's back. Though the outfit did not as yet equal the seven-

leagued boots of folk lore—its range was expected to be one step of a few miles—it seemed in advance of those of Spring-Heeled Jack of criminal legend. (*New Scientist*).

LASER SPY.—The eminent American and Russian scientists who first developed the laser doubtless never thought that its first concert-hall demonstration would show it being used as a tool for espionage. This happened at the Queen Elizabeth Hall in London, before an audience of scientists and engineers attending an international glass technology conference. The laser is an instrument which produces a narrow beam of very pure light. Among the many uses of the laser the beam can, like a radio beam, be modulated to carry sound. Telephone conversations have been transmitted across Moscow by laser and Americans have plans for using a laser to communicate between the Earth and the Moon.

What Dr. Lawrence Pilkington, of the British family glass firm, demonstrated was the ability of the laser beam to pick up conversation inside a room just by being reflected off the windows, using window glass as an ultra sensitive microphone. The glass vibrates with the sound waves produced inside the room and though those vibrations are imperceptible by all ordinary standards they are enough to modulate the laser beam. Theoretically it would be possible to beam a laser on to the window of Cabinet Room, Defence headquarters, research department, industrial boardroom and tune into the reflection to listen in to the conversation inside at any distance up to the horizon. Under present British law this would be perfectly legal, at least so far as industrial espionage was concerned, for no trespass would be committed. Dr. Pilkington did not carry out his demonstration over horizon distance but he showed that the invisible beam, reflected off a telephone kiosk window and picked up on the concert hall stage operated as he said it would.

The idea had occurred to workers at the Pilkington laboratories. It was quite possible, indeed likely, that it had occurred elsewhere, to people not so ready to disclose their discovery and the laser spy could already be in use. There was one counter—double glazing, an expensive remedy but one with advantages to his own firm.

MAGNETISM DEFEATS THE BURGLAR.—In the continuing war against crime two Swedish engineers, Claes V. Allander and Rune Ununger, called on new principles to produce a lock claimed to be "virtually burglar proof". The lock had no keyhole of a conventional type so it was invulnerable to ordinary picklocks or skeleton keys. It was a combination lock but no cracksman with stethoscope and ultra-sensitive fingers could hope to find the combination. The lock could only be opened by a novel form of key consisting of a number of magnets arranged in a selected combination and imbedded in a rectangular piece of non-magnetic material. In the demonstration model this was a piece of plastic. Hidden inside the lock were an equivalent number of pins in the mirror counterpart of the magnetic combination. When the pins are moved, and they will only be moved by the correct key of magnets, they draw with them a perforated plate connected to a hook which opens or closes the lock.

Eight magnets need a key measuring $\frac{1}{2}$ inches by $\frac{1}{2}$ inch by $\frac{1}{8}$ inch. Each magnet can be placed in any of seven positions. This means that the eight magnets will provide 5,764,801 combinations and 16 magnets no fewer than 33,232,930,569,601 or roughly the number of seconds in a million years. Five or six magnets, say the inventors, should

guarantee full security in door locks and four in small padlocks. The lock could be mass-produced and should be inexpensive. It could be built into door handles or knobs, safes and desk drawers, cars, telephone dials and brief cases and jewellery boxes.

MAYAN SACRIFICIAL TREASURE.—A gold, jade and copper treasure unearthed by Mexican archaeologists at the ancient Mayan city of Chichen Itza threw more light on the rites of human sacrifices in the Mayan civilization. It was also greeted as supporting the views of those anthropologists who believe the Maya had their origins in the Mediterranean countries and migrated across Asia and down through North America to their eventual home. Their highly developed civilization flourished in the Yucatan peninsula and parts of Guatemala and Honduras from the fourth to the tenth century A.D. Although the Maya never achieved the highly organized political structure of the Incas and Aztecs they were far more advanced than other early American cultures in the development of picture writing, a calendar and in the knowledge of astronomy.

Intrinsically worth millions of pounds and said to be, historically, of incalculable value, the treasure was taken from the bottom of a large pool at the foot of a sheer 70 foot cliff, long believed to have been the scene of human sacrifices. It was embedded in a 18 ft. layer of clay at the bottom of the 60 foot deep pool with the skulls of young children killed to appease Chac, the Mayan god of water. Dressed in splendid robes and adorned with copper, gold and jade jewellery the victims were ceremoniously killed by stabbing in the heart and then hurled from the precipice into the pool below. Golden idols, sculpture, bells and furniture were thrown in after them.

Professor Ramon Pina Chan, head of the expedition, which was sponsored by the Mexican Institute of Anthropology and History, disclosed that 40 skulls, mostly of young children, had been recovered. It seemed that only small children and virgins were sacrificed. Among the finds, said Prof. Pina Chan, were hundreds of vases, golden bells and dishes, dozens of jade necklaces, four pairs of heavy gold sandals, delicately carved wooden chairs and benches and multi-coloured ceramics depicting scenes from Mayan life. Figures carved and painted on wood, copper and gold, closely resembled those found inside Egyptian pyramids, supporting the theory of a Mediterranean origin for the tribe.

An earlier searcher at the site, in the first decade of this century, was the then U.S. Ambassador to Mexico, Edward Thompson. Undaunted by the height of the precipice and the murky depths of the pool, which had deterred others despite the legends, he hauled out treasure worth, according to some reports, £20,000,000.

METEORITES UNDER THE SEA.—Two craters found under the sea in the Shetlands, nearly 500 ft. deep, could have been formed by meteorites crashing into the Earth's surface, perhaps a million years ago. Dr. Derek Flinn, Reader in Geology, Liverpool University, told the British Association meeting of his find, made by analysing echo traces of the sea floor, produced for him by ships ranging in size from the *Mauretania* to 60 ft. fishing boats, and also by studying existing charts. As well as U shaped and V shaped chasms in the sea floor there were these two crater shaped deeps, almost surrounded by land. They could not be the remains of volcanoes because the last volcanic eruption was so long ago that they would have been filled in by sediment. On the other hand they were formed before the last

Ice Age because they had been cleaned out by the ice before the coast line had retreated back from the sea. Although there was no direct evidence it was possible that they were meteorite explosion craters modified by ice erosion. Some of the rifts in the sea floor, ten miles long, a mile or so wide and several hundred feet deep, were probably produced by water from melting ice cutting a channel through rock as it escaped from beneath the ice sheet of the Ice Age.

MOLE PUZZLE.—The mystery of the frog-eating mole is puzzling naturalists, the British Association was told. How can an animal which is almost blind catch something as active as a frog? But moles have been seen chasing and catching frogs above ground, said Dr. K. Mellanby, Director of the Monks Wood Research Station in Huntingdonshire. Dr. Mellanby, who acquired his possibly unparalleled mole knowledge in lunch-time walks in the 347 acres of Monks Wood, pointed out that frog catching must be quite rare, but it had been seen by the most reputable observers. Normally, it seems, the mole's food falls like manna from heaven on to its dinner table as earthworms tumble into its burrow and lie on the floor. One of the fallacies he exploded is that the mole burrows through the ground looking for worms. In fact, bury a worm in the soil and the chances are the mole won't find it. The mole is a shift worker. It searches through its burrows for food for four hours and then, satisfied or not, it goes to sleep to allow time for a fresh meal to fall through. When food is very short it will venture out of the burrows above ground and, rarely, go after the frogs. Two or three fat earthworms are enough for a mole's dinner. Stories that they eat twice their weight in food a day are due to the fact that, in captivity, after eating a full dinner, they go on accepting worms, run them through their paws and bite off their heads. But that is to store the worms. Though a worm without a head can still crawl, it finds getting through the earth too painful.

MOTHS PUT TO WORK.—Hopes of success in a ten year long battle to achieve control over one form of pest in the Western U.S.A. were reported in the *Journal of Economic Entomology*. What was attempted was another example of the biological control of a pest, by natural predators rather than by chemical pesticides or weedkillers. In this case the pest was a plant, the poisonous weed, Tansy Ragwort, and the predator the Cinnabar Moth. Larvae of this moth will attack the Ragwort plant in preference to any other natural fodder and can destroy it when it would otherwise not be open to attack. In 1950 larvae of the moth were released at Fort Bragg, California, 5,000 being spread in one small creek. Since then there have been other releases of the moth, in Oregon and Washington, without any apparent success. In the Fort Bragg area, however, it does appear that the moth is becoming established. Four years after the release, in 1963, an abundant population of the larvae was found on one acre of an acre. By August of that year most of the Ragwort plants in that area had been stripped and there were enough larvae for an attempt to be made at colonization elsewhere. With several acre patches infested by the summer of 1968 it was considered that the insects would be able to move continuously outwards. The usual pattern is for the moths to start laying soon after they first appear, towards the beginning of May. With as many as 100 larvae feeding voraciously on one plant it is soon denuded of its leaves and the larvae then move off in search of another. Ragwort had been almost cleared from some fields without damage to grass.

PUTTING SUPERCONDUCTIVITY TO WORK.—The first real industrial application of superconductivity, the disappearance of electrical resistance in certain materials at very low temperatures, was made in Britain during the year. The Newcastle upon Tyne firm of International Research and Development, backed by a £500,000 contract with the National Research Development Corporation, developed a large 3,000 h.p. superconducting motor. The motor was to be installed at the Fawley oil-fired power station where it would drive a main watercooling pump.

Superconductivity is one of the strange phenomena of the world of very low temperatures. At around the temperature of liquid helium, a few degrees above absolute zero, this property suddenly appears in a number of materials. With the disappearance of electrical resistance a current set up in a ring of the material will go on circulating, in theory, for ever, accompanied by a magnetic field. The very large currents possible with zero resistance and, therefore, zero heating effect, mean very large magnetic fields maintained at virtually no cost, except for the refrigeration. Not all the materials which show superconductivity will handle large currents. In many resistance reappears as the current increases. But some, in particular the metal niobium, will remain superconducting at high current loads and British metallurgists have developed niobium alloys for this purpose. Most work, so far, has been done with direct current; alternating current superconductors have not shown anything like the same promise.

The Newcastle work began in 1963 with a feasibility study for the Navy and, in 1966, the building of an experimental 50 h.p. motor. The Fawley power station is to be used as a test bed, for twelve to eighteen months, for the 3,000 h.p. motor which should find important applications in fields where good speed control and high torque are needed at relatively low speeds. Steel and paper rolling, ship propulsion and even railway locomotives are some possible fields. The motor weighs 40 metric tons, has an efficiency of 97 per cent. and should cost £130,000. The conventional motor it replaces at Fawley weighs nearly ten times as much, has a lower efficiency, at 94 per cent., and cost £220,000.

The superconducting motor enabled use to be made of a principle invented by Faraday, the homopolar motor, until now little more than an interesting laboratory device. This is based on a single rotating disc and an offshoot of the Newcastle work would be lightweight motors which, though not superconducting, could revolutionize electric car transport by being mounted on each wheel of a car.

A scientific application of superconductivity in which Britain has done well is the making of small, extremely powerful magnets. The Oxford Instrument Company, by 1968, had delivered over 200 such magnets, probably more than the rest of Europe combined. With a large number of laboratories using magnets and wanting higher and higher field forces a good market exists. The Ministry of Technology gave a £25,000 contract to the Oxford firm for a very large magnet, said to be the first of its type built in Europe, for focusing beams of protons, nuclear particles, from the Cern 28 GeV accelerator. This magnet would use nearly a quarter of a ton of superconducting materials, operate at a liquid helium temperature of 4·3 degrees K and have a field of about 50 kilogauss.

Another British firm was working in another field in which superconductivity could have important applications in the future, current carrying cables. British Insulated Callender Cables showed

a cable design at a Royal Society Conversazione during the year. With this, the working part of the cable, using liquid helium cooled niobium, would itself be cooled by liquid nitrogen and protected by "superinsulation", the use of aluminium reflectors in vacuum. In the very first tests the thin niobium layer, half a millimetre thick, proved to have over 200 times the current carrying capacity of copper and even at the relatively low voltage of 33 kV it would have six times the carrying capacity of a normal oil-filled cable. Because superconducting cables would waste far less power, would not burn up the surrounding ground and would carry much higher loads they are an attractive prospect, but new materials and refrigeration techniques are needed to make them an economic proposition—niobium becomes superconducting at the highest temperature of presently known superconductors, 9·2 degrees K.

It looked during the year as if Russia would probably be the first country seriously to consider using superconducting cables, because of the unique problem of the vast distances of the country. Power losses over Russian distances are prohibitive using techniques acceptable in smaller countries. With plans to use cheap Siberian coal to generate power which would be transmitted 2,500 miles to the industries of European Russia, Soviet engineers were already arguing the case for superconducting cables. Electric power is one of the fields of Anglo-Soviet co-operation under a new technology agreement and it looked as if there might be an opening for British ideas and knowledge there.

REASSEMBLED MEAT.—A delight for the restaurateur, if not for his customer, seemed promised by a new product described in a British patent. The ordinary joint of beef was not designed by Nature with carving in mind. Roasted it causes trouble to cooks and carvers and the amount thrown away causes trouble to the restaurant keeper's pocket. But the patent, taken out by Armour and Company, discloses how to do better than Nature and "reassemble" the meat so that it is in a homogenous block which can be cut as thinly as desired on an ordinary slicing machine. The meat is trimmed of fat and gristle and then cut into lumps weighing about a quarter of a pound each. These are shaken with salt until a creamy layer of protein rises to the surface. The blocks are then pressed together and gently cooked. The protein, it is claimed, binds the blocks and seals in the juices. The meat has the same grain and texture as that from a normal joint and the appearance can be improved so much, it is claimed, that cheap cuts can be made to look like prime meat.

SAXON SETTLEMENT.—The finding of the skeleton of what was at first thought to be a murder victim was the beginning of "one of the most exciting archaeological finds of the century." That was the description given by Miss Vera Evison, Reader in Anglo-Saxon Archaeology at Birkbeck College, London, to the discovery of a fifth century Anglo-Saxon settlement on a hill on the Sussex coast between Brighton and Eastbourne. The 30 acre site at Harbour View, Bishopstone, Seaford, was found when a building worker uncovered a human skeleton and the police were called in to investigate the supposed murder. Excavations went on for six months before any public announcement of the find was made to avoid attracting treasure seekers. By that time a total of 118 graves had been found with possible temple sites. Silver inlaid buckles, brooches and buckles of the "quoit" style and weapons and spears of an unknown type were all recovered. A temple site is believed to have been revealed by the finding of the post holes of a large

Saxon timber building within the cemetery, beside a Bronze Age barrow used for the earliest Saxon graves. In the remains of three huts were bronze fittings, pottery, kitchen waste and coins. More huts were visible and due to be examined during the summer holiday "dig" season. An aerial survey was planned to indicate the full extent of the site, on agricultural land on which it was scheduled to build 300 seaside bungalows. One great value of the site was that the graves appeared to be in chronological order as they spread across the hill and therefore gave a reliable dating sequence for the fifth century.

SCIENTIFIC SCRAP SORTER.—A British invention which proved itself by picking out diamonds found a real money-making application during the year—sorting scrap. It was expected to revolutionize the scrap metal business, helping the balance of payments by saving valuable foreign bought metals. Exports of the machine were already earning foreign currency more directly. One complete plant was sold to the U.S.A. within weeks of the machine going into production at the Warrington factory of U.S.I. Engineering and orders were received from Norway and Sweden.

The scientifically-minded Steptoes of Britain, America, Scandinavia and the other countries which take the machine will be making use of the "fluidized bed" system of separation developed at the Ministry of Technology's Warren Spring laboratories. The bed consists of a layer of material in the form of very small, spherical grains. If air is passed through the layer in sufficient quantity to keep the grains separate the bed behaves like a fluid, heavy objects will sink in it, light ones will float. The first use of the machine was for reclaiming copper from scrap and reject cables. This copper was already worth £25 million a year before devaluation. The cable was passed through a granulator, a giant mincing machine, and chopped into small pieces which, after processing, fell to the fluidized bed. The copper sank to be swept away to one side of the machine while the covering was ejected on the other. The old system for reclaiming copper by burning cables is now falling foul of the pollution laws. Though burning in air can produce obnoxious gases from modern plastic coverings some still goes on, illicitly, with scrap merchants taking a lorry-load of cable and some paraffin to a quiet spot. Sometimes things go wrong as when the wind changed direction during a cable burning operation in the Pennines and a number of sheep were poisoned. Modern burning equipment uses forced airflow and after-burning but this makes the operation more expensive and can burn away up to one-tenth of the copper. It may still produce noxious gases, of the sort that prevent vegetation growing around copper refineries.

Different metals can be separated by choosing a "fluid" in which one will float while another will sink and the specific gravity of the fluid can be varied not only by changing the material of which the spherical grains are made but also by changing the rate of air flow. One triumph of the new machine was to separate the aluminium from the copper in a mass of old radiators with copper tubes and aluminium fins. Normally the aluminium, itself worth £100 a ton, would have had to be destroyed to get the copper. Aero-space cables, containing silver, have been reclaimed, an impossible job using burning because highly lethal gases would have been produced. New scrap car crushing plants were expected to provide an enormous field for the new machines. The technique could also replace expensive and laborious

hand picking in recovering valuable metals from difficult sources like tungsten in lamp bulbs and copper in switches and telephones.

The original Warren Spring development was for a machine to work at a much earlier stage in the history of metal, to separate ore from rock in countries where water is scarce. This use has still not been taken up. Mr. John Provan, of the Warrington firm, had the bright idea of modifying it for use with scrap when he saw it working at Warren Spring—it was then separating out diamonds to demonstrate its 100 per cent recovery rate. Nine months after that visit the first of the new scrap sorting machines had been made, "an almost unheard of speed of development" according to the National Research Development Corporation, which licensed the invention to the company.

SCIENTIFIC SEAMANSHIP.—Science plays an ever-increasing part in sport, from the electronic timing equipment of the Olympic Games to the physiology of training and the psychology of gamesmanship. But yachting probably provided the first example of an outdoor contest which it could be claimed was won by computer—in indoor games a Russian computer had beaten an American computer at chess. The *Sir Thomas Lipton*, the yacht that finished first in the single-handed transatlantic race during the summer of 1968, followed a course prepared daily by computer for its journey between Plymouth and Newport, Rhode Island. Three and a half minutes operation by a KDF9 machine at the Bureau Division of English Electric Computers Ltd., each day, produced a selection of fastest routes that could be followed that day. On June 8, following one of those routes, the skipper of the *Sir Thomas Lipton*, Geoffrey Williams, logged 390 kilometres, a new record for a day's run by a single-handed sailor.

The computer processed a number of pieces of information to arrive at its recommendation. Stored in its memory were the speed characteristics of the boat in different operating conditions. From the Meteorological Office there came fresh each day an account of wind conditions in the North Atlantic and detailed weather forecasts which projected wind speed and direction at six hourly intervals at points 100 miles apart. Then from the skipper came radioed information about his position, course and speed. During each run of the programme the computer calculated the distance the yacht would sail on 150 different courses, the suitability of the course being determined by the distance from Newport after 52 hours. The six best courses, as decided by the computer, were printed out. They were then checked by the Meteorological Office's own Ship Routing Officer at Bracknell, where a new service for Atlantic shipping has started, the best two or three being transmitted to Williams for his own final decision. It is estimated that if Williams had attempted to make an equivalent evaluation of the weather and its possibilities to the computer's 3½ minute programme it would have monopolized his attention for 24 to 36 hours. Computer experts admitted that his own intuition would have produced the right result on many occasions and, after all, this was the final decision. But there were some occasions, it was claimed, when it would have been necessary to work out all the possibilities to get the right result—and he did win (*Science Journal*).

SOLAR HOT LAKE.—A lake, heated by the Sun, in which the water was so hot that skin divers could not go more than three feet below the surface was found on the shores of the Red Sea by an Israeli team during a survey of the Sinai coast.

The lake, about 20 kilometres south of Eilat, was described in *Nature* by Dr. F. D. Pof of Jerusalem University. The heating is the result of a greenhouse effect. A surface layer of cooler water allows the Sun's radiation to penetrate and heat denser, more saline water beneath, but prevents the heat, so produced, being radiated away, in the same way that greenhouse glass allowed the passage of short-wave solar radiation but tends to trap the warmth of the air inside. In the case of solar lakes which, though rare, are also found in Rumania and on the Pacific coast of the U.S.A., the lower waters become much more saline and so more dense and there is virtually no mixing and no heat loss by convection.

The Sinai lake appeared to have formed like an ordinary lagoon. It was about thirty yards from the shore, separated from the sea by a bank of sand and shells through which the sea water could slowly seep. The incoming less saline water, on the top of the lake, was at a temperature of sixteen degrees Centigrade in February but a yard and a half down the temperature was 40 degrees. This compared with a Red Sea temperature of 22 degrees ten feet down. The salinity at the top of the lake was like that in the open sea but it was double this at the bottom. The lake was being studied during the summer, when temperatures were considerably higher, in the hope that it would provide a model for projects to use the Sun's energy in artificial solar ponds and for novel forms of desalination plants.

SUNSHINE SENSE.—The classic advice "A little of what you fancy does you good—but beware of too much" applies in good measure to sunbathing, according to American researchers. Moderate exposure of the skin to direct sunlight is essential to health but over-exposure can lead not only to painful burns but highly dangerous cancers, warned Drs. Farrington Daniels, Jr., Ian C van der Leun and Brian E. Johnson, specialists in dermatology at the New York Hospital, Cornell Medical Centre, writing in *Scientific American*. It was well established that ultraviolet radiation can produce skin cancer. This had been shown experimentally in mice and there was much clinical evidence of the same effect in man. Fair skinned people were particularly prone to develop skin cancers, these cancers occurring mainly in exposed areas of the head and the back of the hands and the affected skin showed other evidence of radiation damage. These signs of damage, commonly found in the "cowboys" of American ranches, sailors and others who spent a great deal of time outdoors, included thinning of the skin, dark blotches and chronic redness of the skin and sometimes yellowing from increase of elastic fibres. Skin cancer, they warned, was an important problem for persons of Northern European descent, particularly the Irish and Scots.

While sunlight is essential for the existence of life on Earth it is potentially lethal to living matter. The dangerous part is at the short-wavelength end of the spectrum from X-rays to ultra-violet. Oxygen in the outer part of the atmosphere absorbs most of the dangerous radiation but enough makes its way to the Earth's surface to cause damage. "Contrary to a common notion, two or three hours on the beach is by no means a short exposure to direct sunlight. People are misled at the beach by the cooling effect of the breeze and water," wrote the American doctors. "Not feeling an intense heating effect from the sun, they do not realize that they are nonetheless being burned by the invisible ultra-violet rays."

■asking in the early morning or late-afternoon sun almost never produces sunburn. This is be-

cause when the sun is low in the sky the greater thickness of the atmosphere its radiation has to pass through scatters the shorter waves. Sunworshippers, particularly those with sensitive skin, would be wise, therefore to do their sunbathing when the sun was not too high.

The suntan pigment, melanin, is the skin's main defence against ultraviolet radiation. Even in an untanned skin melanin serves to protect the genetic material of the cells by concentrating in a cap that screens the nucleus of each cell against ultraviolet radiation. But melanin is not the only defence against sunburn. A tanned skin can suffer from intense exposure and even dark-skinned Negroes can become sunburned when first visiting the beach. Yet an albino skin, with virtually no pigment, can develop some toleration to ultraviolet radiation. These other protections include the horny layer of the skin surface as well as urocanic acid, a substance in the epidermis that is an effective absorber of ultraviolet rays. The importance of sunlight in forming Vitamin D, and the need to supplement it under Britain's dull skies, has been emphasized by the appearance of rickets in the babies of dark-skinned immigrants. In their native climate the mother's milk, plus sunlight, is enough to keep the babies healthy. In the U.K. the babies, often completely swaddled against the cold, need vitamin supplements.

The American researchers commented on the human propensity for using artificial aids against sunlight rather than building up natural defences. Anti-sunburn ointments and lotions fell into three categories, substances which absorbed some of the ultraviolet rays, substances that absorbed all the ultraviolet wavelengths and opaque ointments containing white pigments, such as zinc and titanium oxides, which cut off all the light. But either they did not adhere well or were uncomfortably greasy, apart from doing away with the physical benefits of sunbathing in the last two cases. It was better to build up natural tolerance, gradually, over a period of weeks.

SWEETER THAN SWEET.—The sweetest natural substance, 1,500 times sweeter than sugar, has been isolated in an American laboratory from a Nigerian berry, *Dioscoreoethyllum cumminsii*. In a search for a new sweetening material that did not have the bitter after-taste of present artificial sweeteners, Dr. George E. Inglett, of the United States Agriculture Department's Northern Regional Research Laboratory, had a quite extraordinary success. The newly discovered substance is fifty times as sweet as sodium cyclamate, a widely used artificial sweetener which was getting adverse publicity during the year. As an alternative for the tongue-twisting botanical name of the Nigerian berry the American workers proposed "Serendipity Berry". Surprisingly the fruit is not cultivated nor even used at the moment but it could turn out to be an important commercial crop in tropical countries. (*Science Journal*)

TAMERLANE'S CASTLE.—Ruins discovered on what was once an island, now sunk below the surface, in the middle of the Central Asian lake Issyk-Kul were identified as a fortress prison built by Tamerlane the Great (1336-1405). In that fortress, mediaeval writings record, the lame military genius—Timur-Lenk or Timur the Lame—whose edict ran from China to the Mediterranean and who conquered much of India, held hostage his distinguished captives. Perhaps in the dungeons of this fortress, not too far from Tamerlane's capital, Samarkand, were held some of the kings in Marlowe's play. Issyk-Kul, which lies over 5,000 feet above sea-level, was smaller in those days. The whole area is earth-

quake prone and the castle was probably destroyed and the island overwhelmed and submerged in a disastrous convulsion in the fifteenth century. The sunken castle still showed the remains of building of brick and stone, paved courtyards and clay water conduits. An archaeological expedition, organized by the Kirghiz Academy of Sciences, also found much pottery and finely glazed tiles. Other settlements found beneath the now swollen Lake were evidently built round its brink between the sixth and twelfth centuries.

TENDER, TASTY AND TRANQUILLIZED.—A journey halfway around the world and back may seem a little far just to chase a cow around a field but it was done by a British scientist, in the interests of science and the nation's Sunday dinners. The weekend joint is likely to be better, he confirmed, if the cow is not chased immediately before being slaughtered. That may seem a likely, even obvious finding and a rather negative one but something more positive came out of it. This was that pigs could do with a stiff dose of tranquilizer before going to the slaughterhouses. Pork from tranquilized pigs is likely to be better than that from nervous ones.

Professor Maurice Ingram, Director of the Meat Research Institute, which was opened during the year, reported on the journey and work of one of his staff. With cow-chasing in Britain banned by law it was not possible to check here the old belief that if a cow is chased before being slaughtered there may be trouble with the meat. But the Australian journey showed that this is so and that the more nervous the cow the quicker the meat is likely to go off. Even without being chased an Australian cow is likely to be nervous at the sight of a man for many spend their lives without seeing one until they are herded together for slaughter.

The theory is that extra acid is produced in the muscles of an animal when it is nervous and this acid can reduce the keeping quality of the meat by a third or even a half. A dose of tranquilizer, by cutting down production of acid, can ensure maximum keep time. Pigs, being more nervous animals than cows, are more likely to produce acid and so respond more to tranquilizers administered before slaughter. Tranquillizers can counter another trouble, watery pork. This phenomenon, when the meat has no colour, is flabby and loses its juices is more common on the Continent, but there is danger of it becoming a problem in Britain, said Professor Ingram. Reports from pig-breeding research centres showed that the latest types of pigs are proving to be ten times as likely as older types to produce watery pork. The Landrace breed, the main one used for high production, is one hundred times as likely. Watery pork also seems to be caused by excitability and acid in the muscle and so could also be treated by tranquilizers—provided that objections are not raised on aesthetic grounds or because of chemical effects.

The Institute was also investigating how to make meat tender by reproducing the effect of hanging it without actually putting it through that costly, time consuming operation. Tenderizing is done naturally by enzymes during the hanging process. The Americans use substitute enzymes obtained from breadfruit while the Russians get theirs from figs. British scientists were looking for something better.

THE SEED'S INTERNAL CALENDAR.—“Animal clocks” have been a favourite study for zoologists and physiologists for some time and have led to warnings to statesmen and businessmen about the dangers of rapid jet flights to important conferences. With the human body, like other animal bodies, geared to a twenty-four hour rhythm a quick

change to another part of the Earth's surface could mean that instead of a man having all his wits about him at an important afternoon meeting he could be struggling against the below-par conditions of his worst time of day.

Most work has been on the twenty-four hour rhythm of animals, which persists even in the six months' day or night of the Arctic and Antarctic. But a one year rhythm was noted in plants by Dr. G. Seidman and Dr. W. B. Riggan at the National Center for Air Pollution Control, in Cincinnati, Ohio, and studying this led them to suggest that there is a calendar in the embryo plant within a seed. They found that the sensitivity of plants to car exhaust fumes decreased during the winter months. This appeared to be because the stomata, the small openings mainly on the lower parts of leaves through which plants take in oxygen and carbon dioxide and expel water vapour, are affected by an annual rhythm. The Americans grew runner bean seeds which had been kept at room temperature, planting some each day for a year. Some plants were grown in a normal greenhouse in which temperature, light, atmosphere pressure and humidity varied normally. Others were grown in artificial conditions in a growth chamber in which the periods of light and dark, temperature and so on were kept at a fixed level throughout the year. A similar annual rhythm was found in seeds grown in both conditions, with stomatal opening being least in December. Another finding was that plants grown from November to February did not open their stomata as much as those grown from March to October.

If stomatal opening was a response to normal growing conditions of day length, brightness of light or temperature then those plants grown in the artificial constant conditions of the growth chamber should have shown no variation. Other workers have shown that instructions about germination time and conditions are given to the embryo plant in a seed by the mother plant. Dr. Seidman and Dr. Riggan now suggest that an annual clock or calendar starts marking off the days and months in the embryo when the seed is formed, keeps going as long as the seed remains alive and passes on the annual rhythm to the plant when it germinates.

THE SMELL OF HOME.—A further example of the use of the sense of smell in guiding an animal back to its home territory was reported from the U.S.A. Evidence that salmon smell their way home, discovered at Washington University, was reported in *Whitaker*, 1968. The more recent work, from the other side of the United States, at Stanford University, California, was described in *Science*. It involved newts. Despite the accepted view that newts use the sun to orient their direction of travel, observations by Dr. David Grant and his colleagues indicated that newts can smell the distinctive scent of home from as much as five miles away. The same technique was used as with the salmon. The olfactory nerves of 600 newts were cut and then the newts were released two miles away from their home stream. Only fifteen were recaptured at the stream and in all of these the olfactory nerve was found to have regenerated. When a group of newts that had not been operated on were released at the same spot over 90 per cent. found their way back safely. A second experiment in which the newts' sense of smell was destroyed by chemical means produced similar results.

Frogs, it seems, cannot orient themselves when the sun is hidden, but then they move mostly in fine weather. Newts and salamanders do most of their migrating when the skies are overcast and when it is

raining. Dr. Grant suggests that odour may be an important but not necessarily the only clue in guiding newts home. Although the newts which had lost their sense of smell did not find their way home their movements did not appear to be entirely purposeless; they seemed to be relying on some guidance mechanism, though it appeared ineffective without odour. Because newts can orientate themselves before and after their aquatic breeding season and because their migratory route is over land it seems unlikely that they are attracted by anything in the water, as salmon are. But the odours of patches of forest are distinctive and can carry strongly enough to be picked up by even the human nose at relatively long distances.

THREAT TO BEES.—Bees have good claims to be regarded as the most important of all insects. Even by man's economic standards their activities as pollinators are more valuable than the honey they produce, though the honey is a useful export crop for a number of countries. Dying colonies of bees have been a reproach against the use of general insecticides and so led to an argument in favour of systemic insecticides, compounds which are taken up by the plant's sap and which prove poisonous to sucking insects such as greenfly or leaf-eating larvae. But evidence from Rothamsted Experimental Station, the agricultural research centre near St. Albans, during the summer, cast doubt on the assumption that these compounds are safe for bees. At least one of the systemic insecticides was found to be able to get into the nectar of some flowers collected by honeybees to feed their grubs or make into honey for winter stores. Experiments showed that nectar from fuchsia, nasturtium and beans, grown in pots and given a large dose of dimethoate killed honeybees and fruit flies. The dimethoate content reached a peak four days after treatment and a level one hundred times that of another systemic compound, phorate. When the dimethoate dose usually used in agriculture was applied to the plants the amount in the nectar reached half a part per million, which meant that bees could accumulate a lethal dose over several days of nectar collecting and that honey could be contaminated. Not only was there a threat in this insecticide to bees but the findings cast doubts on the future reputation of honey, so long regarded as the purest and safest of all sweet foodstuffs.

TORREY CANYON.—A report on the *Torrey Canyon* disaster, from the Plymouth Marine Laboratory, revealed that of the oil released when the supertanker grounded in the Scillies, less reached England than reached France, 13,000 metric tons as against 21,000 tons, and that about half sank in the Bay of Biscay. The report was reserved about the use of detergents in dealing with oil pollution and advocated sinking it by using powdered chalk, with which the French had success, or heavier particles. On the other hand a report from the Government Committee of Scientists, chaired by Sir Solly Zuckerman, favoured burning the oil at sea or, if this is not practicable in future disasters, detergent treatment. More research was needed, it said, on sinking agents. One formula which came out of the Plymouth work was that an oil slick at sea moves at one thirtieth of the velocity of the wind, with a slight adjustment for tide, so, in any future calamity of this type, a check on the movement of the oil should be possible without extensive air searches.

Oil scientists at a meeting of the Institute of Petroleum were dubious about the effects of bombing and burning, a was attempted with the *Torrey Canyon*. Eventually, it was argued, it would

just result in the release of more oil from a stricken tanker. It was reported that a special polyurethane foam for absorbing oil spills had been developed. This was easily made aboard ship by mixing two liquids which produced a hundred-fold expansion in approximately one minute. The foam, a bread-like material, could be easily shredded into small pieces of $\frac{1}{2}$ to 1 inch size—the smaller the size of the shreds the quicker it worked but the pieces had to be big enough to be picked up by nets from the sea. The foam absorbed 100 times its own weight of oil, was cheap, £5 worth absorbing one ton of oil, and could be re-used after the oil had been squeezed out. Against this it was reported that the 700,000 gallons of detergents sprayed on the *Torrey Canyon* slicks cost over £400,000 and dispersed perhaps some 10,000 tons of oil. Other work by oil scientists had shown another, possibly much cheaper way of dealing with oil by sinking it without using the costly materials usually recommended for this which run out at about the same price as detergent. The suggested system was to dredge sand from a sandbar, treat it to make it oleophilic and then spread it over the oil. The cost should be about £2 a ton and laboratory tests had shown that a large dredger could deal with 10,000 tons of oil in two days.

One form of marine life does not object to oil, it turns out. One hundred species of marine bacteria can feed on it and find it so attractive that they multiply at an incredible rate in its presence. One bacterium can produce billions of offspring in a single day with an oil meal to hand. But for the bacteria to get to the oil it has to be spread in a relatively thin film and not allowed to form the lumps which, for some unexplained reason, it usually produces after some hours in the sea.

TREATING "CORONARIES" BY SLEEP.—The oldest of all medical treatments, sleep, was shown to be able to save the lives of victims of that modern killer, coronary thrombosis, in an experiment in the Intensive Care Ward of Charing Cross Hospital, London. It succeeds, according to Dr. P. G. Nixon, reporting in the *Lancet*, because it reduces pain and fear immediately and completely. Half the deaths from coronary thrombosis follow irregular beatings of the heart as disturbances in the electrical impulses in the heart muscle, which control the rate of heartbeat, lead to a fatal condition known as ventricular fibrillation. Often, however, the abnormal heartbeat is not due directly to the effects of the clot of blood on the heart muscle but to the intense pain and sense of doom which comes with the coronary attack. In this and similar conditions of stress the body manufactures chemical substances which themselves accentuate any abnormal heart rhythm. Lessening the pain by morphia often results in the disappearance of heart irregularities as the patient becomes tranquil but morphia, whatever its effect on the pain, does not get rid of the mental stress. Sleep, however, can and does.

In the experiment 59 patients, all admitted within 24 hours of a coronary attack, were put to sleep by the intravenous administration of drugs. As they slept their heart activity was recorded continuously. Three times a day they were allowed to waken to take liquid food and to exercise their legs to prevent the formation of further clots. The sleep therapy was discontinued when the patient awakened rested, free from anxiety and pain and showed no abnormal heart rhythm. This was after an average of two and a half days sleep, the extremes being one day and seven. None of the 59 patients developed the arrhythmia of the heart which usually results in the death of 14 per cent. of coronary patients even when treated in hospital.

THE NATIONAL PARKS

The ten National Parks described below in their order of designation have been established in England and Wales—the legislation noted on p. 369 does not apply to Scotland. These areas are not public property and visitors are not free to wander over private land within the Park boundaries. They have been marked out for special care aimed at two prime purposes: to preserve and enhance their natural beauty, and to promote their enjoyment by the public.

Peak District National Park (542 sq. miles).—Mainly in Derbyshire but extending into Staffordshire, Cheshire, the West Riding of Yorkshire and the City of Sheffield. In the south and east are limestone uplands, and finely wooded dales with swift, clear rivers and unspoilt stone villages. Northwards, moorlands, edged by gritstone crags, attract hill walkers and climbers. There are information centres at Edale, Castleton and at Buxton (just outside the Park) and an information caravan tour of the Park.

Lake District National Park (866 sq. miles).—In Cumberland, Lancashire and Westmorland. Spectacular mountain scenery with wooded lower slopes enhanced by lakes and tarns. The area includes England's highest mountains (Scafell Pike, Helvellyn and Skiddaw) and largest lakes. Walking and rock-climbing are the principal recreations, but there are fishing, swimming, sailing, boating and winter sports as well. There are information centres at Ambleside and Windermere and two information vans tour the Park.

Snowdonia National Park (845 sq. miles).—In Caernarvonshire and Merioneth and a small section of Denbighshire in North Wales. A wild mountainous region, traversed by high passes, offering some of the finest rock-climbing and mountain walking for both beginner and expert. The main valleys, often finely wooded, hold a lake (or llyn) and are watered by rivers with cascading falls. There are information centres at Bala, Blaenau Ffestiniog, Dolgellau, Llanberis and Llanrwst and an information van tours the park.

Dartmoor National Park (365 sq. miles).—In Devon, the highest area of high moorland in southern England, famous for its granite "tors" often weathered into strange shapes. Fine hanging oak woods adorn the river valleys which lead up into the Moor. The Park is rich in prehistoric relics and offers fine walking and riding. An information van is sited at Two Bridges during the summer months.

Pembrokeshire Coast National Park (225 sq. miles).—A spectacular section of Britain's coastline, where rocky cliffs alternate with bays and sandy coves. In the north is Mynydd Prescelly, abounding in prehistoric relics. The Park includes the fine estuary of Milford Haven, Tenby, the Cathedral of St. David's, and Carew and other Norman castles. There are information centres at Tenby, St. David's and Haverfordwest.

North York Moors National Park (553 sq. miles).—In the North Riding of Yorkshire, the Park stretches from the Hambleton Hills in the west to the coastline above Scarborough. On the coast sheltered bays and sandy beaches alternate with headlands harbouring villages such as Staithes and Robin Hood's Bay. The heart of the Park offers tracts of open moorland, intersected by beautiful wooded valleys. Mount Grace Priory and the abbeys of Rievaulx and Byland are within the Park.

Yorkshire Dales National Park (680 sq. miles).—An area of upland moors, cut by deep valleys, in the North and West Ridings of Yorkshire, the Park includes some of the finest limestone scenery in Britain: Kilnsey Crag in Wharfedale, Gordale Scar, and Malham Cove in Malhamdale. In the Park also are Swaledale and Wensleydale, the three peaks of Ingleborough, Whernside and Pen-y-Ghent, and

many relics of the past such as the Roman fort at Bainbridge and Bolton Abbey in Wharfedale. There is an information centre at Clapham and an information van tours the West Riding area of the Park.

Exmoor National Park (265 sq. miles).—Mainly in Somerset but extending into Devonshire, this is a moorland plateau seamed with finely wooded combes. The well-known coastline between Minehead and Combe Martin Bay is exceptionally beautiful. In the east are the Brendon Hills. There are information centres at Minehead and at the Lyn and Exmoor Museum, Lynton.

Northumberland National Park (398 sq. miles).—A region of hills and moorland, stretching from Hadrian's Roman Wall in the south to the Cheviot Hills on the Scottish Border. The area is rich in historic interest. There are information centres at Ingram and Once Brewed and an information van tours the Park.

Brecon Beacons National Park (519 sq. miles).—The most recent National Park, established in 1957, is centred on "The Beacons" with its three peaks: Corn Du, Cribyn and Pen-y-Fan, rising to nearly 3,000 feet. Bounded in the east by the Black Mountains in Monmouthshire, its western boundary rests on the Black Mountain in Carmarthenshire. The Usk valley, Llangorse Lake, Brecon Cathedral, Carreg Cennen Castle and Llanthony Abbey are all within the Park. There are information centres at Abergavenny and Brecon, a mountain centre near Libanus and a van tours the Park.

AREAS OF OUTSTANDING BEAUTY

Generally these are smaller in extent than the National Parks. No special arrangements for their administration are laid down and there is no special provision for the development of facilities for open-air recreation. The areas so far designated are:—

Anglesey (84 sq. miles).—Except for breaks around the urban areas and in the vicinity of Wylfa, the designated area extends along the entire coastline with its many isolated stretches. The rugged cliffs, sandy bays, small coves and miles of soft dunes are famed for their beauty, as also are the Menai Straits, separating the island from the mainland.

Cannock Chase (26 sq. miles).—This is an area of high heathland in Staffordshire, relieved by varied scenery in which parklands adjoin farms, woodlands and pleasant villages. Deer continue to roam over the Chase.

Clitheroe Harbour (29 sq. miles).—Well known for its small boating and sailing facilities, the area extends from Hayling Island in the west to Apple-dram in the east and contains the whole of Thorney Island.

Chilterns (309 sq. miles).—The well-known chalk downlands from Goring in South Oxfordshire northeastwards through Buckinghamshire, Hertfordshire and Bedfordshire to Dunstable and Luton, including the outlying group of hills beyond Luton. Contains several National Trust properties and Whipsnade Zoo.

Cornwall (360 sq. miles).—Comprising a number of separate areas including Bodmin Moor and some of the finest and best-known coastal scenery in Britain. Most of the Land's End peninsula; the coast between St. Michaels Mount and St. Austell with Falmouth omitted; the Fowey Estuary and

Rame Head are all included: in north Cornwall most of the coast to Bedruthan Steps, north of Newquay, and between Perranporth and Godrevy Towns.

Cotswolds (582 sq. miles).—Contains the great limestone escarpment overlooking the Vales of Gloucester and Evesham. The remainder is high undulating country and narrow wooded valleys traversed by shallow rapid streams. Noted for its beautiful villages.

East Devon (103 sq. miles).—The area comprises the fine stretch of coastline between Orcombe Rocks, near Exmouth and the Dorset area near Lyme Regis, with Sidmouth, Beer and Seaton omitted. Inland Gittisham Hill, East Hill and Woodbury and Aylebeare Commons are all included.

North Devon (66 sq. miles).—Comprising three sections of fine coastline—the whole of the Hartland peninsula; from Bideford Bar to the western limits of Ilfracombe, and from east of Ilfracombe to the boundary of the Exmoor National Park. Clovelly, Braunton Burrows, Woolacombe and Combe Martin ■■■ all included.

South Devon (128 sq. miles).—It includes the magnificent coast between Bolt Head and Bolt Tail, ■■■ National Trust property; Salcombe, Slapton Sands and Dartmouth, and the four estuaries and valleys of the Yealm, Erme, Avon and Dart.

Dorset (400 sq. miles).—This is the largest area so far designated. It includes the whole of the coastline between Lyme Regis and Poole, with the Isle of Portland and Weymouth omitted, and stretches inland to include the Purbeck Hills and the downs, heaths and wooded valleys of the Hardy country.

Forest of Bowland (310 sq. miles).—A fine tract of high open moorland running westward from near Settle and Bolton by Bowland in the Pennines, to Caton and Scotton in Central Lancashire. A small outlying area east of the River Ribble includes Pendle Hill and Pendleton Moor.

Gower (73 sq. miles).—Partly in the County of Glamorgan and partly in Swansea, South Wales, the area is known for its beautiful coastline, its rocky limestone cliffs, sandy bays and coves and for its wooded ravines stretching inland.

East Hampshire (151 sq. miles).—The area stretches from the outskirts of Winchester to the Hampshire-Sussex border at a distance of about 10 miles inland from the south coast.

South Hampshire Coast (30 sq. miles).—14 miles of coastline on the northern shores of the Solent, between Hurst Castle and Calshot Castle, south-east of Fawley, with the central part of the area extending inland up the Beaulieu River for about six miles, including a beautiful part of the New Forest. Along much of the coast woods of oak and Scots pine stretch down to the water's edge, while at the western end are some attractive salt marshes.

Leyn (60 sq. miles).—An isolated peninsula in

North Wales of unique character, still largely unspoilt by the hand of man.

Malvern Hills (40 sq. miles).—The area embodies the whole range of the Malvern Hills in the counties of Gloucester, Hereford and Worcester. Such well-known features as the Worcestershire Beacon, North Hill, the Herefordshire Beacon, and Midsummer Hill, a National Trust property, are within the area.

Norfolk Coast (174 sq. miles).—With coastal scenery ranging from salt marsh and mudflats, sand-dunes and shingle ridges to sea cliffs, this area includes six miles of the south-east coast of the Wash, an almost continuous coastal strip three to five miles in depth from Hunstanton to Bacton, with a further small strip between Sea Palling and Winterton-on-Sea. The area, which is rich in wild-life, also includes part of the Sandringham Estate.

Northumberland Coast (50 sq. miles).—Low cliffs and rocky headlands with active fishing villages comprise this area which stretches from just south of Berwick to Amble. It includes Holy Island, with the oldest monastic ruins in the country; the Farne Islands, and the great castles of Bamburgh, Dunstanburgh and Warkworth.

Quantock Hills (38 sq. miles).—The main feature of this area in Somerset is the range of red sandstone hills rising to a height of 1,260 feet at Will's Neck above Crow Combe.

Shropshire Hills (300 sq. miles).—This area includes the fine landscape around Church Stretton, with Caer Caradoc, the Long Mynd, the Stiperstones, and the long ridge of Wenlock Edge from which it extends north-east to the Wrekin and the Ercall.

Solway Coast (41 sq. miles).—A stretch of beautiful coastline from above Maryport to the estuaries of the Rivers Eden and Esk (with Silloth omitted) backed by the Solway Plain and noted for its historic and scientific interests.

Surrey Hills (160 sq. miles).—The Hog's Back and the ridge of the North Downs from Guildford to Titsey in the east are within this area, as are Leith Hill, Hindhead Common, the Devil's Punch Bowl; the well-known villages of Abinger, Shere, Hambleton and Chiddingfold; Box Hill and Frensham Ponds.

Sussex Downs (379 sq. miles).—The area includes the chalk escarpment of the South Downs from Beachy Head to the West Sussex/Hampshire border, with such well-known features as Firle Beacon and Chanctonbury Ring, and stretches down to the coast between Eastbourne and Seaford. In the west the boundary adjoins the East Hampshire and Surrey Hills areas.

Isle of Wight (73 sq. miles).—A number of separate areas comprising unspoiled stretches of coastline, the Yar Valley, the high downland behind Ventnor and the fine chalk downland ridge east of Newport to Culver Cliff and Foreland.

WIND FORCE MEASURES

The Beaufort Scale of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of these numbers 0-17, each representing a certain strength or velocity of wind at 10 m. (33 ft.) above ground in the open.

Scale No.	Wind Force	M.p.h.	Knots	Scale No.	Wind Force	M.p.h.	Knots
■	Calm	1	1	9	Strong gale	47-54	41-47
■	Light air	2-3	2-3	10	Whole gale	55-63	48-55
■	Slight breeze	4-7	4-6	11	Storm	64-72	56-63
3	Gentle breeze	8-12	7-10	■■■	Hurricane	73-82	64-71
4	Moderate breeze	13-18	11-16	13	—	83-92	72-80
5	Fresh breeze	19-24	17-22	14	—	93-103	81-89
6	Strong breeze	25-31	22-27	15	—	104-114	90-99
7	High wind	32-38	28-33	16	—	115-125	100-108
8	Gale	39-46	34-40	17	—	126-130	109-118

WEATHER IN THE UNITED KINGDOM, 1967-1968

(1967) August—Temperatures reached 30° C. (86° F.) at Southend and Herne Bay on the 1st. Over most of the country, however, the first four days were generally cool, with occasional showers on the 1st and 2nd and thundery showers, but long sunny periods, on the 3rd and 4th. The 5th was dry and sunny, but rain spread from the west during the evening. During the next few days temperatures rose steadily, but further rain-belts spread across the country. Unusually intense rains occurred on the 8th in the Forest of Bowland and adjacent Lune valley, with falls exceeding 3 in. in 2 hours and reaching 4·6 in. in 90 mins. The flood damage in the Rossendale Valley was estimated at half a million pounds. Further thunderstorms occurred over a wider area on the 9th, 10th and 11th. The 12th was cooler with showery weather. Dry weather prevailed on the 13th until the evening, when rain spread from the west, with scattered thunderstorms on the 14th, and heavy rains in southern England on the 15th. Heavy rains occurred in the north of Scotland on the 15th and 16th. The 17th was sunny, but rain reached north-west England during the night and spread to much of the country on the 18th, clearing south-east England during the afternoon of the 19th. Temperature fell to -0.6° C. (31° F.) at Balmoral (Aberdeenshire) during the night 18th-19th. An anticyclone, covering Scotland on the 19th, spread over the country on the 20th to give a spell of fine sunny weather until the 28th, apart from widespread coastal fog on the 23rd and 24th. Some rain occurred in the north after the 25th. Showers also occurred in the north on the 29th and in the west and north on the 30th and 31st, although mainly dry weather continued in the south-east. Over the country as a whole August was rather cooler, drier and less sunny than usual.

September—During the first five days a series of fronts and depressions crossed the country from the west bringing stormy weather and sunny breaks, but generally cooler weather. At Tiree, in the west of Scotland, the total rainfall reached 3 in. Gusts exceeding 80 m.p.h. were recorded at Portland Bill and Holyhead on the 5th. On the 6th and 7th pressure rose over the country to give sunny periods, although showers continued until the 8th. The 8th and 9th were generally dry and sunny, after the clearance of overnight fog. Rain occurred in the west of Scotland on the 9th and spread to most of the United Kingdom during the 10th and 11th. At Aberporth, near Cardigan, 2·4 in. of rain occurred in 36 hours during this developing depression. Temperature reached 21.7° C. (71° F.) at Grantown-on-Spey on the 10th. The 12th became fine and sunny, while the 13th and 14th gave 10 hours of sunshine in many western districts, but dull weather and thundery rains in south-east England. The 15th and 16th were cloudy and dry. The night, 16th-17th, became clear with low temperatures, followed by widespread fog in the Midlands, parts of eastern and southern England and also in eastern Scotland. Rain spread from the west on the 17th and again during the night 18th-19th, when there were heavy falls in the Mourne Mountains. North-westerly winds on the 20th and 21st brought cooler, brighter weather to most districts, but a fall of 3·46 in. in the Wirral on the 20th resulted in local flooding. The 22nd was sunny. Cloudy weather persisted during the remainder of the month, with widespread rains, especially on the 24th and 25th and, with southerly winds, steadily rising temperatures. Southend reported 24.4° C. (76° F.) on the 28th. At Lerwick, Shetland, the month was the dullest September since 1921.

October—On the 1st 4·21 in. was recorded at Bryn Gwynant (Snowdonia) and on the 3rd heavy rains occurred in the Lake District and Wales. The 4th and 5th were mainly dry and cool. Further heavy rains occurred on the 6th in the Lake District and in central and south-west Scotland. With south-west winds temperature rose on the 6th and by the 8th reached 21.1° C. (70° F.) at Southampton, while the night 8th to 9th was the mildest October night in London for 6 years. Unusually heavy falls on the 8th and 9th resulted in flooding in south-west Scotland and the Lake District. At Great Langdale (Westmorland) about 6 in. fell within 24 hours. Flooding also occurred in North Wales on the 10th. Cooler westerly winds spread to most districts on the 11th, with rain in south-east England on the 12th. The 12th and 13th were generally sunny. Stormy wet weather, with gales in the west, returned on the 14th and on the 15th temperature fell sharply in Scotland. A further depression moving across the Midlands on the 16th brought much rain to England and Wales, 5·48 in. being recorded in Brecon Beacons and more than 2 in. in parts of the Midlands, where widespread flooding occurred. Gales were widespread in England and Wales on the 16th and 17th. The 18th was cold, dry and sunny, but milder weather with south-west winds spread to much of the country on the 19th. There was continuous rain in the south-east on the 21st. Dry weather prevailed in the south, 22nd to 24th, but it was unsettled in the north. With a depression moving eastwards to the north of Scotland gales were widespread on the 25th and 26th, with heavy rains on the 25th. On the 27th stormy weather returned with widespread rains and a gust of 94 m.p.h. at Portland Bill. The 28th and 29th were cooler, the 30th was sunny in the south, but rain spread from the west late in the day and reached most districts on the 31st.

November continued the unsettled, stormy weather of October. Gales were widespread on the 1st and 2nd, gusts of 75 m.p.h. being recorded at Ballykelly (Londonderry) and Brawdy (Pembroke) on the 1st and of 89 m.p.h. at Portland Bill on the 2nd. More than 2 in. of rain occurred in Northern Ireland and southern England on the 1st. Thunderstorms developed on the 2nd. Following a brighter day the 4th was wet in southern England and amounts in the Upper Tees Valley for the 4th-5th exceeded 4 in. By the 5th winds from the north-west spread over the country, but the 7th became dry and sunny in south-east England. On the 8th a ridge of high pressure spread southwards to give a generally mild spell until the 14th, temperatures reaching 16.7° C. (62° F.) at stations in southern England on the 11th. Fog was, however, widespread during the nights 7th-8th, 8th-9th over the Midlands. Depressional rains occurred in the north, especially in north-west England on the 10th.

By the 15th northerly winds spread over the country and anticyclonic weather developed to give a spell of quiet, cold weather, with hazy sunshine and night-fogs, especially from the 20th-24th in the Midlands and northern districts. Temperature fell to -8.3° C. (17° F.) near Rugby on the 18th. On the 24th rain spread southwards over the country to give on the 25th the first measurable rain for 11 days at many places in southern England. Higher ground in Wales became snow covered on the 26th and in northern England on the 27th. The last three days were milder but unsettled, with belts of rain crossing the country from the west, followed by sunny periods. The month was on the whole drier, cooler and

sunnier than the average. It was the sunniest November at Southampton since 1925.

December—The 1st and 2nd were generally dull and mild with widespread fog in England and Wales, dense locally. Temperatures reached 14.4°C . (58°F .) in the Durham area on the 1st. Strong winds and rain occurred in northern Scotland on the 3rd and 4th, but much of England and Wales remained dry, with sunny periods. A belt of rain moved southwards across the country on the 5th. From the 6th to 10th the weather was dominated by a cold airstream from the north, with widespread frosts at night but sunny days. Temperature fell to -13.3°C . (8°F .) at Wallingford (Berkshire) on the 9th and to -14.4°C . (6°F .) at Carnwath (Lanarkshire) on the 10th. Snow fell over much of the country during the 6th to 11th, being heavy on the 8th and 9th in the north and west, and along the south coast, where some roads were blocked. Little snow remained by the 12th, except on high ground, but the rain and rapid thaw resulted in flooding in the west. The 12th to 14th were mainly dry, apart from fog and coastal drizzle. On the 15th northerly winds and rain spread across the country and the 16th was generally cold but sunny. Cold weather continued on the 17th until mild south-westerly winds brought rain to south-west England. Further rain occurred in southern England during the night, 18th to 19th. The 19th and 20th were generally dry and cold. With winds from the south-west on the 21st temperatures rose to reach 14.4°C . (58°F .) at Gillingham (Kent) on the 22nd. Cold front rain spread across the country on the 23rd and with winds from the north-west showers occurred on the 24th and 25th, while there was more continuous rain in the south-east. The 26th and 27th were generally dry with decreasing temperatures. Northerly winds during the last four days brought showers, which fell as snow in the east.

Year 1967.—The mean temperature was close to the 1931-60 average over Scotland, slightly above over England and Wales and slightly below over Northern Ireland. It was the warmest year over England and Wales since 1961 and over Scotland since 1964. Over the country as a whole the three months January to March were milder than any similar period since 1961. Rainfall exceeded the 1916-50 average by 3.1 in. over England and Wales; 3.4 in. over Scotland and 2.6 in. over Northern Ireland. The total excess of the three years 1965-67 amounted to 11.3 in., 6.1 in. and 9.6 in. respectively over England and Wales, Scotland and Northern Ireland. River flooding was more frequent than usual in 1967. The deficiencies in the very dry year 1964 were 7.8 in., 6.7 in., and 4.9 in. over these three countries. The outstanding features of the rainfall of 1967 were the wet March in Scotland; the very wet May; the dry summer, June to August; the wet September and October, followed by the dry November and December; and the intense rains of August 8 when severe flooding occurred in Lancashire, especially near Wray. The total duration of bright sunshine was 104, 99 and 97 per cent. over England and Wales, Scotland and Northern Ireland respectively. Over England and Wales 1967 was the sunniest year since 1962 and over Scotland since 1963. Sunshine exceeded the average over the country generally in January, February, March, June, October, November and December, while in July the excess was confined mainly to England and Wales. The sunniest stations included Eastbourne, Shanklin and Bognor Regis, with 2,010, 1,988 and 1,920 hours of bright sunshine respectively. The sunniest stations in Wales, Scotland and Northern Ireland were Dale Fort (Milford Haven), Dunbar (on the

south-east coast) and Kilkeel (Down) with 1,708, 1,715 and 1,506 hours respectively.

January (1968)—On the 1st and 2nd rain and snow spread slowly across the country; severe snowstorms occurred in the north of Scotland on the 3rd. On the 4th and 5th cold weather, with snow showers, continued in the north, but temperatures reached 14°C . (57°F .) in parts of Devon. The south-westerly winds brought heavy rains to the south-west on the 6th and again during the night, 8th to 9th, with widespread flooding. Snow fell in central England and lay in places to a depth of one foot by the 9th. Anticyclonic weather persisted during the 10th and 11th and temperatures fell to 14.4°C . (6°F .) at Cromer on the 13th. On the 13th mild south-westerly winds spread from the Atlantic, with heavy rains, preceded by snow in eastern districts, followed by widespread flooding in parts of Wales and south-west England. A deepening depression moving eastwards on the 14th brought strong winds to northern districts, a gust of 134 m.p.h. being recorded on Great Dun Fell (Westmorland) while more than 2 in. of rain fell in parts of western Scotland. Extensive gale damage, with some loss of life, occurred in central Scotland, especially in Glasgow. Further disturbances brought a renewal of gale force winds and heavy rains on the 16th and 18th. On the 19th an anticyclone developed over the English Channel and covered the British Isles on the 22nd. Dry, dull, weather prevailed with fog at night in the Midlands and eastern England. Fog persisted all day on the 22nd in parts of Scotland. As the anticyclone moved westwards rather mild north-westerly winds spread to much of the country, which by the 27th brought long periods of rain. The anticyclone drifted eastwards on the 28th and Ross-on-Wye recorded 8.2 hours of bright sunshine. From the 28th to 31st mild south-westerly winds prevailed, temperature reaching 14°C . (57°F .) in places on the 30th.

February—The 1st was generally one of the few mild days of the month. By the evening winds became north-westerly, bringing initially thunderstorm rains and then snow showers, which spread to most of the country by the 2nd and 3rd. A deepening depression from Iceland on the 4th brought snow and strong winds, many roads in Scotland and northern England becoming blocked. Snow lay 6 in. deep over much of Scotland and 2-4 in. deep over northern England, temperatures of -8°C . (18°F .) being recorded ■ far south ■ Bournemouth. Further snow fell during the next few days; a fall of 12-18 in. on the 6th in the Midlands caused traffic dislocation. Freezing fog persisted in parts of central and north-west England throughout the 8th. On the 9th weather became less cold and the 10th and 11th were dry and sunny in the north-west with rain in the south-east. On the 12th sleet or snow occurred over the Midlands and in the north, with rain in the south, and at Penzance temperature reached 12.8°C . (55°F .) The 13th was dull but milder weather became more widespread. With winds from the east the 14th was wet in the south-east, but sunny in the north-west. An anticyclone developed over the country on the 14th and fine weather was widespread until the 19th, when much of the country became dull and rain spread to the south-west. Fog persisted in the Midlands during the 19th and 20th, while rain and snow occurred in southern England on the 21st and 22nd. In Scotland sunny periods and snow showers occurred during the 18th to 22nd, temperature falling to -18.3°C . (-1°F .) on the 21st at Braemar (Aberdeenshire). From the 23rd most of the country experienced dry, cold, anticyclonic weather with sunny periods, the 28th was

milder with increasing southerly winds and by the 29th rain spread from the Atlantic to western Scotland.

March—The 1st and 2nd were generally dry with widespread night frosts, temperature falling to -9.4°C . (15°F .) in the northern Pennines on the 1st. Dry, sunny weather was widespread during the 3rd to 5th, but rain occurred in the north. There was a rise of temperature on the 4th, with gales from the north-west in Scotland on the 5th. Colder weather returned on the 6th and 7th with strong winds from the north and snow showers in Scotland and eastern England. A ridge of high pressure moved southwards across the country on the 8th bringing dry, sunny weather. Rain reached Scotland on the 9th, spreading to the Midlands on the 10th and eastern districts on the 11th, but the south-east experienced sunny periods from the 9th to 12th. On the 13th places along the coast of north Devon recorded their first measurable rain for 28 days. Unsettled stormy weather continued generally until the 25th and over much of Scotland, Northern Ireland and north of England until the 29th. Gales were widespread from the 16th to 23rd. Thunderstorms occurred in eastern England on the 15th and in Scotland on the 17th. The gales of the 17th with snow and hail caused snowdrifts which blocked many roads in Scotland. On the 17th and 18th dust storms occurred in East Anglia. There were heavy rains in the north-western half of the country between the 24th and 29th, on the 26th amounts exceeded 6 in. in the Western Highlands. During the 25th to 29th a large anticyclone developed to the south of the country, bringing southerly winds to southern and central England. Temperatures reaching 25°C . (77°F .) in parts of Norfolk on the 29th. Night frost resulted in large diurnal ranges of temperature, amounting to 25°C . (45°F .) at Cardington (Bedfordshire). By the 30th winds veered to the north-west giving more normal temperatures with rain at times.

April—The 1st was dull with some rain. On the 2nd northerly winds spread over the country bringing snow, which lay to a depth of 2 in. over much of the Midlands. On Great Dun Fell in the northern Pennines a temperature of -11.4°C . (6°F .) was recorded and at Beer (Devon) temperature fell 10°C . (18°F .) in 2 hours. The cold northerly winds continued until the 5th, with widespread snow and sleet showers and severe night frosts. An anticyclone spread from the south on the 6th to give long periods of sunshine over England and Wales, although snow showers continued over Scotland. As the anticyclone moved northwards most of the country experienced cold, dry, sunny weather until the 14th, but in Scotland temperature rose above average after the 9th. Warm, unsettled weather prevailed from the 15th to 22nd with frontal rains spreading across the country. Thunderstorms occurred in eastern England on the 17th and 18th, while a more intense thunderstorm on the 21st resulted in flooding in the south-west. The 21st and 22nd were unusually warm in central and eastern England, afternoon temperatures reaching 25°C . (77°F .) in places, including London. An anticyclone spread from the south to give mainly dry, sunny weather from the 23rd to 26th, but the 23rd temperatures fell rapidly by some 7°C . (13°F .) from that of the previous day. Sea-fog occurred along the south coast on the 22nd and 23rd, and fog was fairly widespread on the 25th. Light frontal rains reached the south-west on the 26th and spread to much of the country on the 27th. The 28th was generally showery and the 29th and 30th cold and wet. The total sunshine was above average over

most of the country apart from south-east Scotland and south-west England.

May—The weather of the first four days was generally cold and unsettled, with widespread thunderstorms, especially on the 4th. Heavy rains occurred in Scotland, but places in the south of England recorded 10 hours of sunshine each day. As the depression moved to the north-east of the country winds from the north prevailed, with thunderstorms in England and Wales on the 5th and 6th and heavy rains in Scotland on the 5th. The northerly winds continued over Scotland and the north of England during the 7th and 8th bringing snow showers, while heavy rains occurred over southern England. Temperature on the 8th fell to -5.6°C . (22°F .) near Norwich and to -7.8°C . (18°F .) in the Cairngorms. Cold unsettled weather continued from the 9th to 11th, but the 12th was fine and sunny in the south, as a ridge of high pressure crossed southern England. Temperature continued below average over Scotland on the 13th, while the southern half of England had further rains and average temperature. Sea fog affected south and west coasts on the 14th and 15th, while the remainder of the south continued mild and the north cool. During the 16th to 18th the west was generally dry and sunny, but northern winds brought cold weather to eastern districts. The period, 19th to 23rd, was mainly cloudy with a few showers, apart from the south-west where sunshine exceeded 14 hours on most days. By the 23rd temperature rose to about normal. On the 24th frontal rains with local thunderstorms occurred in south-west England and these outbreaks continued during the 25th to 27th. The remainder of the month was mainly sunny and warm, temperatures reaching 24.4°C . (76°F .) at Southampton on both the 28th and 29th. Most of the country had less sunshine than usual and in parts of eastern Scotland it was the coldest May this century.

June—Surface winds were initially light and variable with warm, sunny weather on the 1st and scattered thunderstorms in the Midlands and south-east on the 2nd and 3rd. As much as 3.3 in. fell in 140 mins. on the 3rd near Ely (Cambridgeshire) and local flooding occurred in the Midlands and eastern England. Scattered thunderstorms spread to eastern Scotland on the 4th. Rains occurred in southern England on the night 5th-6th, but the 6th was generally sunny. Westerly winds brought rain to much of the country on the 7th, which continued in south-east England during the 8th. As an anticyclone moved slowly across the country from the south-west dry, warm, sunny, weather prevailed from the 9th to 13th, day temperatures reaching 27.8°C . (82°F .) on the 10th and 11th at places in northern central Scotland. Thunderstorms spread to southern England on the 14th, but Scotland experienced a period of prolonged sunshine from the 8th until the 17th. Sea fog affected southern coastal areas from the 14th to 17th. By the 18th depressions from the Atlantic brought rain to the Western Highlands and later to the southern half of the country. Further depressions brought periods of rain, accompanied by local hail on the 20th, 21st and 23rd. Heavy rains occurred in southern England on the 27th, especially in the south-west, with some flooding in the Midlands, southern and eastern England on the 27th and 28th. As a ridge of high pressure developed over the country on the 29th southerly winds developed and weather became dry and warm in southern England. Temperature reached 28.9°C . (84°F .) near Stratford-on-Avon on the 30th, while thunderstorms developed in the south during the evening. The total sunshine was below average in eastern and southern England, while rainfall exceeded twice the

average in parts of the south-west and near Norwich and Ely.

July.—Early on the 1st, dust varying in colour from white to dark red, was brought down by rain in many parts of southern England between Devon, Essex and Derby, coming originally from Spain or north Africa. Temperature on the 1st reached 33.3°C . (92°F) in London. Thunderstorms in the south-west on the 1st, spread northwards to much of the country on the 2nd and 3rd. Flooding was widespread in the west and Midlands as rivers overflowed, especially in south-east Devon where considerable damage to crops and property was reported. Hailstorms in Devon and South Wales added to the damage. Sunny, dry weather was widespread from the 4th to 6th, but on the 7th rains spread across Cornwall to the Midlands and continued in the east of England on the 8th. The 9th was generally sunny. On the 10th another depression brought heavy thunderstorm rains to ■■■■■

unusually large area extending from the neighbourhood of the Severn Estuary to the Wash, the rain clearing East Anglia on the 11th. Flooding occurred in many areas between Exeter, Birmingham and Peterborough, seven people being reported drowned and hundreds of bridges washed away. As much as 175 mm. (6.9 in.) fell at Chew Stoke, to the south of Bristol. On the 12th and 13th showers spread from the west, while thunderstorms caused local flooding in the Midlands and East Anglia. Northerly winds on the 15th and 16th brought cooler, showery weather. An anticyclone developed over the country on the 17th and dominated the weather for the remainder of the month, but rain occurred in the north of Scotland on the 20th and 21st. Thunderstorms developed in many districts on the 22nd and 23rd. North-east winds brought cool, dry weather until the 31st, when thunderstorms occurred in southern England, with some flooding in Essex.

TEMPERATURE AND RAINFALL RECORDS

GENERAL: The maximum shade temperature of the air on record is 136°F . (57.8°C) at San Louis, Mexico, on Aug. 11, 1933; the extreme lowest recorded temperature is in Antarctica e.g., -127°F . (-88.3°C) at Vostok on Aug. 24, 1960. In the upper air temperatures as low as -143°F . (-97.2°C) have been recorded—e.g. over Halley Bay, Antarctica, on Aug. 9, 1959 at about 27 kms.

The wettest place in the world is considered to be the neighbourhood of Cherrapunji in Assam where annual averages exceeding 400 inches have been obtained, of which 90 per cent. usually falls in the six months April to September, and annual totals have reached 905 inches.

U.K.: The maximum shade temperature recorded in the air at 4 feet above the ground is 100.5°F . (38.1°C) at Tonbridge, Kent (July 22, 1868). The lowest shade temperature is -17°F . (-27.2°C) at Braemar (Feb. 11, 1895).

The greatest rainfall recorded in a day was at Martinstown, near Dorchester, 11.00 inches in the 24 hours commencing 9 a.m. (July 18, 1955). Annual totals exceeding 240 inches were recorded at The Stye, Borrowdale, in 1872, 1923, 1928 and 1954; at Ben Nevis Observatory in 1898 and at Llyn Llydaw, Snowdon, in 1909. The smallest annual total is 9.29 inches at Margate in 1921 and the largest may be regarded as 257 inches at Sprinkling Tarn in 1954.

Most of the principal book publishers are members of The Publishers Association, whose address is 19 Bedford Square, London, W.C.1.—President, Peter du Sautoy (Faber & Faber, Ltd.); Secretary, R. E. Barker.

BOOK PRODUCTION AND BOOK EXPORTS

Figures issued by The Publishers Association (based on information supplied to its Chartered Accountants by individual publishers) show a marked and continuing increase in book exports in recent years. The totals for the years 1956 to 1967 are shown below:

Year	Total value of Books produced	Total value of Books exported
	in U.K.	from U.K.
1956.....	56,659,484	20,870,594
1957.....	60,456,095	22,505,440
1958.....	63,608,654	23,817,453
1959.....	66,945,183	25,393,960
1960.....	75,426,683	29,833,866
1961.....	£78,911,506	£31,738,057

Year	Total value of Books produced	Total value of Books exported
	in U.K.	from U.K.
1962.....	81,376,301	34,493,754
1963.....	90,142,709	39,043,851
1964.....	98,189,220	43,225,649
1965.....	104,876,998	46,123,190
1966.....	119,578,145	51,417,786
1967.....	£125,782,262	£53,838,418

BOOKS PUBLISHED IN GREAT BRITAIN IN 1967

This table, from *The Bookseller* of December 30, 1967, shows the books published in 1967 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 1s. have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property and Copyright Department, Board of Trade*, 25 Southampton Bldgs., W.C.2.

Subject to the provisions of the Copyright Act, 1956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. No registration nor other formalities are required in order to obtain the protection of the Act. Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films

and television and sound broadcasts. Libraries entitled to receive free copies of books published in the United Kingdom are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 20s. for a Book, or 5s. for Fine Art; certified copies 10s. in either case. The fee for a search is 5s.

ANNUAL REFERENCE BOOKS

WOOL FEDERATION, BRITISH, Commerce House, Bradford.—Sec., J. K. Turner.

THE COST OF LIVING

The first cost-of-living index to be calculated in Great Britain was the one which took July, 1914, as 100 and was based on the pattern of expenditure of working-class families in 1904. Since 1947 the Index of Retail Prices has superseded the cost-of-living index, although the older term is still often popularly applied to it. This index is designed to reflect the month-by-month changes in the average level of retail prices of goods and services purchased by the majority of households in the United Kingdom, including practically all wage-earners and most small and medium salary-earners. For spending coming within the scope of the index, a representative list of items is selected and the prices actually charged for these items are collected at regular intervals. In working out the index figure, the price changes are "weighted"—that is, given different degrees of importance—in accordance with the pattern of consumption of the average family.

Consumer Price Index

However, a more useful guide when considering changes in the average level of prices of all consumer goods and services, particularly over a number of years, is the consumer price index. This index, which has been calculated back to 1938, covers the expenditure of all consumers defined for national income purposes, and compares the price of goods and services actually purchased in a given year with the prices of the same goods and services in the base year. It is a by-product of calculations of changes in expenditure at constant prices and is derived by dividing the annual estimates of total consumers' expenditure at current prices by the corresponding estimates at 1958 prices.

The consumer price index and the retail price index therefore give slightly different results because of the differences both in method of construction and in coverage.

Purchasing Power of the £

The purchasing power of money varies inversely with prices. For example, if prices are doubled over a period of time the purchasing power is halved; if prices rise by 50 per cent., the purchasing power falls by 33½ per cent.; and so on. The consumer price index, which is devised annually, is normally used for estimating changes in the internal purchasing power of the pound, although for years prior to 1938 it is necessary to fall back on the original cost-of-living index. Over short periods of time (e.g. a few months) or when interest is centred particularly upon the purchasing power of the pound for households such as those of wage earners and medium salary earners, the index of retail prices is used.

The following cost-of-living tables have been compiled by using these official series of indices:

"Cost of Living" Index Purchasing Power of £
1958 = 100 1958 = 100 1958 = 205.

			£ s. d.
1914	.. 23	.. 439	4 7 9
1920	.. 57	.. 176	1 15 3
1930	.. 36	.. 277	2 15 3
1938	.. 36	.. 281	2 16 2
1946	.. 60	.. 166	1 13 2
1950	.. 73	.. 137	1 7 5
1951	.. 80	.. 126	1 5 1
1952	.. 84	.. 119	1 3 8
1953	.. ■■■	.. 117	1 3 4
1954	.. 87	.. 114	1 2 11
1955	.. 90	.. 111	1 2 1
1956	.. 94	.. 106	1 1 2
1957	.. 97	.. 103	1 0 7
1958	.. 100	.. 100	1 0 0
1959	.. 101	.. 100	19 11
1960	.. 101	.. 99	19 8
1961	.. 104	.. 96	19 2
1962	.. 108	.. 92	18 6
1963	.. 110	.. 91	18 3
1964	.. 113	.. 89	17 9
1965	.. 118	.. 85	17 0
1966	.. 122	.. 82	16 4
1967	.. 125	.. 80	16 0

There are no official figures for the years 1939-1945.

The method employed to estimate the rise in the cost of living in a given period is illustrated by the following example. To find the rise in the cost of living between 1946 and 1956:

From consumer price index (1958 = 100)

$$\frac{1946 = 60}{1956 = 94} \text{ Then if } 1946 = 100,$$

$$1956 = \frac{94}{60} \times 100 = 157.$$

The purchasing power of money varies inversely with prices. Thus, if the cost of living index (1958 = 100) is 125 in 1967, then the purchasing power of the £ compared with 20s. in 1958 is:-

$$\frac{100}{125} = \text{£}0.80 = 16s.$$

It should be noted that these figures can only be approximate.

TRADES UNION CONGRESS (T.U.C.)
Congress House, 23-28 Great Russell Street, W.C.1.

[01-636-4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the representatives of which meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1967-68) totalled 160 with an aggregate membership of 8,725,604.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with motions from affiliated societies on questions of policy and organization. Although 160 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only one large British union is not affiliated to the T.U.C.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the trade union movement, with authority to promote common action on general questions, and to assist trade unions in the work of organization. The General Council is elected by Congress and is composed of 39 members (37 representing 19 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group and with the number of representatives each group is entitled to have on the General Council. *Women Members.*—In 1968, a total of 1,766,480 women were members of unions in the T.U.C. The largest groups were members of the Transport and General Workers Union (194,691), National Union of General and Municipal Workers (199,869) Union of Shop, Distributive and Allied Workers (132,137), and National Union of Public Employees (136,000).

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such cases being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also if there appears to be justification to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the trade union movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty or suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council, the trade union movement maintains systematic relations with the Government and Government Departments, with the Confederation of British Industry and with a large number of other bodies. A major instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet level; in this body the Confederation of British

Industry and the boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration, affecting industry. The General Council is represented on the National Economic Development Council, established to examine problems associated with faster economic growth. The Council includes Ministers dealing with economic and industrial affairs, representatives of public and private industry and independent members. The General Council nominates members to serve on numerous other bodies, e.g. Central Training Council, National Insurance Advisory Committee, British Productivity Council, Consumer's Councils, etc. Chairman (1968-69), J. E. Newton. General Secretary, Rt. Hon. G. Woodcock, C.B.E. Assistant General Secretary, V. Feather, C.B.E.

SCOTTISH TRADES UNION CONGRESS

12 Woodlands Terrace, Glasgow, C.3.

The Congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. In 1968 it consisted of 11 unions with a membership of 827,154 and 43 directly affiliated Trades Councils. The majority of the unions organize throughout Britain and affiliate on their membership in Scotland through their 13 Scottish unions.

The Annual Congress in April elects a 17-member General Council on the basis of 10 industrial sections. Congress has been prominent in pressing for economic expansion and full employment in Scotland and the development of the social services, most of which are separately organized in Scotland.

Chairman (1968-69), E. Humphries. General Secretary, J. Jack, C.B.E.

TRADE UNIONS

A list of the Trade Unions affiliated to the Trades Union Congress in September, 1968. The number of members of each Union is shown in parenthesis.

- ACTORS' EQUITY ASSOCIATION, BRITISH (incorporating The Variety Artistes' Federation).—(17,408).—*Sec.*, G. Croasdell, O.B.E., 8 Harley Street, W.1.

WRITERS' GUILD OF GREAT BRITAIN (1,477).—Sec., A. Griffiths, 430 Edgware Road, W.2.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total income of these Associations in 1967 was £15,400,000 per annum, of which £3,633,000 was provided by the Ministry of Technology and the remainder by subscriptions of individual members or through other sources. Total expenditure was £14,600,000.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1957. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Ministry of Technology keep a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented by substantial grants from the Government, through the Ministry of Technology.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations.

There are now 45 Research Associations and a number of other organizations in receipt of grants from the Ministry. They cover most of the principal industries of the country, as follows:—

Brushes.

BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, 90 Cowcross Street, E.C.1.—Dir., D. I. Fothergill.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—Dir., H. Morrogh, F.R.S.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—Dir., N. F. Astbury, C.B.E., Sc.D.

Civil Engineering.

CONSTRUCTION INDUSTRY RESEARCH AND INFORMATION ASSOCIATION, Old Queen Street House,

6 Storey's Gate, S.W.1.—Dir., A. R. Collins, M.B.E., D.Sc.

Coal Utilization.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—Dir.-Gen., L. C. F. Blackman, Ph.D.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, Coke Research Centre, Chesterfield, Derbyshire.—Dir., G. W. Lee, O.B.E., D.Sc.

Cotton, Silk, etc.

COTTON, SILK AND MAN-MADE FIBRES RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester, 20.—Dir., D. W. Hill, C.B.E., D.Sc., Ph.D.

Cutlery.

CUTLERY AND ALLIED TRADES RESEARCH ASSOCIATION, Doncaster Street, Sheffield, 3.—Dir., E. A. Oldfield.

Drop Forging.

DROP FORGING RESEARCH ASSOCIATION, Shepherd Street, Sheffield, 3.—Director, P. H. R. Lane, Ph.D.

Electrical.

ELECTRICAL RESEARCH ASSOCIATION, Cleeve Road, Leatherhead, Surrey.—Dir., B. C. Lindley, Ph.D.

Flour Milling.

FLOUR MILLING AND BAKING RESEARCH ASSOCIATION, Research Station, Chorleywood, Rickmansworth, Herts.—Dir., G. A. H. Elton, D.Sc., Ph.D.

Food Manufacture.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—Dir. of Research, A. W. Holmes, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE PRESERVATION RESEARCH ASSOCIATION, Chipping Campden, Glos.—Dir., H. R. Hinton.

Furniture.

FURNITURE INDUSTRY RESEARCH ASSOCIATION, Maxwell Road, Stevenage, Herts.—Dir., G. A. McMillan.

Gelatine and Glue.

GELATINE AND GLUE RESEARCH ASSOCIATION,

Warwick Street, Birmingham 12.—Dir., A. Courts, D.Sc., Ph.D.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Northumberland Road, Sheffield 10.—Dir., R. G. Newton, D.Sc., Ph.D.

Heating and Ventilating.

HEATING AND VENTILATING RESEARCH ASSOCIATION, Old Bracknell Lane, Bracknell, Berks.—Dir., N. S. Billington, O.B.E.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thorneywood, 7 Gregory Boulevard, Nottingham.—Dir., W. A. Dutton.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, Cranfield, Bedford.—Dir., L. E. Prosser, O.B.E.

Industrial Psychology.

NATIONAL INSTITUTE OF INDUSTRIAL PSYCHOLOGY, 14 Welbeck Street, W.1.—Dir., R. B. Buzzard.

Instrumentation.

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, South Hill, Chislehurst, Kent.—Dir., S. S. Carlisle.

Jute.

BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee.—Dir., H. P. Stout, Ph.D.

Lace.

LACE RESEARCH ASSOCIATION, Glaistead Drive West, Bilborough, Nottingham.—Dir., D. I. Griggs.

Laundering.

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, The Laboratories, Hill View Gardens, Hendon, N.W.4.—Dir., J. Leicester.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—Dir., R. L. Sykes, Ph.D.

Linen.

LINEN INDUSTRY RESEARCH ASSOCIATION, Research Institute, Lambeg, Lisburn, Co. Antrim.—Dir., H. A. C. Todd.

Machine Tools.

MACHINE TOOL INDUSTRY RESEARCH ASSOCIATION, Hulley Road, Hurdsfield, Macclesfield, Cheshire.—Dir., A. E. De Barr.

Motor Vehicles.

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—Dir., R. H. Macmillan.

Mycology.

COMMONWEALTH MYCOLOGICAL INSTITUTE, Ferry Lane, Kew, Surrey.—Dir., G. C. Ainsworth, Ph.D.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—Dir., A. J. Kennedy, D.Sc., Ph.D.

CO-OPERATIVE SOCIETIES—GREAT BRITAIN

During the period 1957–1967 Co-operative Retail Trading Societies (almost all "consumer societies") expanded their membership and assets by 5 per cent. and 11 per cent. respectively as shown by the following particulars covering the 727 societies on the register at the end of 1967 and 1,045 societies in 1957:

Year	Number of Members	Share Capital	Sales	Year's Surplus	Interest ■■■ Shares	Dividends on Sales	Total Assets
1967	12,723,000	£600's 227,134	£600's 1,051,416	£600's 40,526	£600's 7,312	£600's 30,482	£600's 501,116
1957	12,148,000	249,454	954,290	66,594	7,119	53,366	453,058

In addition, 123 Co-operative Wholesale and Productive Trading Societies (with a total membership of 50,000) were on the register at the end of 1967. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1967 amounted £565,157,000, their assets at the end of the year totalling £180,461,000.

Paint.

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—Dir., G. de W. Anderson, Ph.D.

Paper, Board, Printing and Packing

RESEARCH ASSOCIATION FOR THE PAPER AND BOARD, PRINTING AND PACKAGING INDUSTRIES, Randalls Road, Leatherhead, Surrey.—Dir., G. L. Riddell, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Melton Mowbray, Leics.—Dir., D. F. Galloway, C.B.E., Ph.D.

Rubber and Plastics.

RUBBER AND PLASTICS RESEARCH ASSOCIATION OF GREAT BRITAIN, Shawbury, Shrewsbury, Shropshire.—Dir., W. F. Watson, D.Sc., Ph.D.

Ships.

BRITISH SHIP RESEARCH ASSOCIATION, Prince Consort House, 27–29 Albert Embankment, S.E.1.—Dir., R. Hurst, G.M., Ph.D.

Shoes.

SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Road, Kettering, Northants.—Dir., A. R. Payne, D.Sc.

Springs

SPRING RESEARCH ASSOCIATION, Doncaster Street, Sheffield 3.—Dir., R. Haynes, Ph.D.

Steel Castings.

BRITISH STEEL CASTINGS RESEARCH AND TRADE ASSOCIATION, East Bank Road, Sheffield, 2.—Directors, J. Bolton; H. T. Hall, ph.D.

Tar.

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, Cleckheaton, Yorks.—Dir., D. McNeil, O.B.E., Ph.D.

Timber.

TIMBER RESEARCH AND DEVELOPMENT ASSOCIATION, Hughenden Valley, High Wycombe, Bucks.—Dir., J. S. McBride.

Toxicology.

BRITISH INDUSTRIAL BIOLOGICAL RESEARCH ASSOCIATION, Woodmansterne Road, Carshalton, Surrey.—Dir., R. F. Crampton, Ph.D.

Water.

WATER RESEARCH ASSOCIATION, Ferry Lane, Medmenham, Marlow, Bucks.—Dir., R. G. Allen, Ph.D.

Welding.

BRITISH WELDING RESEARCH ASSOCIATION, Abingdon Hall, nr. Cambridge.—Dir., R. Weck, Ph.D.

Whiting, Chalk and Lime.

WELWYN HALL RESEARCH ASSOCIATION, The Hall, Church Street, Welwyn, Herts.—Dir., W. G. Mills.

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION, Torridon, Headingley Lane, Leeds 6.—Dir., B. E. King, Ph.D.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 362):—

Unit of Animal Genetics, University of Edinburgh, King's Buildings, West Mains Road, Edinburgh, 9.—*Hon. Director*, D. S. Falconer, B.Sc., Ph.D.

Unit of Experimental Agronomy, Department of Agriculture, University of Oxford.—*Hon. Director*, Prof. G. E. Blackman, F.R.S.

Unit of Flower Crop Physiology, Horticultural Research Laboratories Shinfield Grange, Shinfield, Reading, Berks. *Hon. Dir.*, Prof. O. V. S. Heath, D.Sc., F.R.S.

Unit of Muscle Mechanism and Insect Physiology, Dept. of Zoology, University of Oxford, Parks Road, Oxford.—*Hon. Dir.*, Prof. J. W. S. Pringle, M.B.E., Sc.D., F.R.S.

Unit of Nitrogen Fixation, University of Sussex, Stammer, Brighton.—*Director*, Prof. J. Chatt, Ph.D., Sc.D., F.R.S.

Unit of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Prof. C. P. Whittingham, Ph.D.

Unit of Reproductive Physiology and Biochemistry, 307 Huntingdon Road, Cambridge.—*Director*, T. R. R. Mann, C.B.E., M.D., Sc.D., Ph.D., F.R.S.

Unit of Soil Physics, School of Agriculture, Cambridge.—*Hon. Dir.*, E. C. Childs, Sc.D., Ph.D.

Unit of Statistics, University of Edinburgh, 19 Buccleuch Place, Edinburgh 8.—*Director*, Prof. D. J. Finney, Sc.D., F.R.S., F.R.S.E.

Unit of Structural Chemistry, Inveresk House, Strand, London, W.C.2.—*Hon. Dir.*, Prof. Sir Ronald Nyholm, D.Sc., Ph.D., F.R.I.C., F.R.S.

Systemic Fungicide Unit, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, C.B.E., D.Sc., Ph.D., F.R.S.

Institute for Research on Animal Diseases, Compton, Newbury, Berks.—*Director*, W. M. Henderson, D.Sc., M.R.C.V.S.

Institute of Animal Physiology, Babraham, Cambs.—*Director*, R. D. Keynes, Ph.D., Sc.D., F.R.S.

Animal Breeding Research Organisation, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, H. P. Donald, Ph.D., D.Sc., F.R.S.E.

Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, T. C. Carter, O.B.E., D.Sc., F.R.S.E.

Statistics Group, School of Agriculture, Cambridge.—*Officer-in-Charge*, R. C. Campbell, Ph.D.

Radiobiological Laboratory, Letcombe Regis, Wantage, Berks.—*Director*, R. Scott Russell, D.Sc., Ph.D.

Ditton Laboratory, Larkfield, Maidstone.—*Director*, R. G. Tomkins, Ph.D.

Pest Infestation Laboratory, London Road, Slough, Bucks.—*Director*, E. A. Parkin, D.Sc., Ph.D.

Weed Research Organization, Begbroke Hill, Kidlington, nr. Oxford.—*Director*, J. D. Fryer.

Food Research Institute, Earlham Food Research Laboratory, Recreation Road, Norwich.—*Director*, Prof. S. R. Elsden, B.A., Ph.D.

Meat Research Centre, Langford, nr. Bristol.—*Director*, Prof. M. Ingram, Ph.D.

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture and Fisheries for Scotland.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. J. P. Hudson, M.B.E., G.M., Ph.D.

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E.

Animal Virus Research Institute, Pirbright, Surrey.—*Director*, J. B. Brooksby, D.Sc., Ph.D., M.R.C.V.S.

East Malling Research Station, Maidstone, Kent.—*Director*, F. R. Tubbs, C.B.E., M.Sc., Ph.D.

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, F. W. Toohey, O.B.E., B.Sc.

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, E. K. Woodford, O.B.E., Ph.D.

Hannah Dairy Research Institute, Ayr.—*Director*, J. A. B. Smith, C.B.E., D.Sc., Ph.D., F.R.S.E.

Hill Farming Research Organisation, 29 Lauder Road, Edinburgh, 9.

Hop Research Centre, Wye College, Ashford, Kent. *Head of Dept.*, R. A. Neve, B.Sc., Ph.D.

Houghton Poultry Research Station*, Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

John Innes Institute, Colney Lane, Norwich.—*Director*, Prof. R. Markham, Ph.D., F.R.S.

Macauley Institute for Soil Research, Craigiebuckler, Aberdeen.

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, C. J. Moss, B.Sc.

National Institute of Agricultural Engineering, Scottish Station, Bush and Dryden Estates, Milton Bridge, Penicuik, Midlothian.—*Director*, W. J. West.

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, B. G. F. Weitz, O.B.E., D.Sc., M.R.C.V.S.

National Vegetable Research Stn. Wellesbourne, Warwickshire.—*Director*, D. W. Wright.

Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, C.B.E., Ph.D., F.R.S.

Welsh Plant Breeding Station, Plas Gogerddan, nr. Aberystwyth.—*Director*, Prof. P. T. Thomas, C.B.E., B.Sc., Ph.D.

Scottish Plant Breeding Station, Pentlandfield, Roslin, Midlothian.—*Director*, N. W. Simmonds.

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, J. L. Blaxter, Ph.D., D.Sc., F.R.S., F.R.S.E.

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, Sir Frederick Bawden, F.R.S.

Scottish Horticultural Research Institute, Invergowrie, Dundee.—*Director*, C. H. Cadman, Ph.D.

* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

LIFE ASSURANCE AND FIRE AND GENERAL INSURANCE

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1967.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsurance parts of the risks.

CONSIDERATION FOR ANNUITIES.—These are the amounts received to provide various types of Annuities.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of

British offices is about 18½%, of which about 6½% is expended on commission and 12% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATION.—The valuation returns which are required to be made by the companies to the Board of Trade indicate liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used), and that interest will be earned at a certain rate. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity 1s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 3s. 6d.

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from 3s. 6d. A minimum premium of £1 is required under all of these insurances.

Most fire insurance companies transact accident

(including Motor) and miscellaneous business and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc. and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all householders' ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

† 1966 figures.

C—Commonwealth Office.

* Commercial Union—Including figures of associated companies.

* Confederation Mutual—Includes consideration for annuities.

■ Eagle Star—Including funds of acquired businesses.

* Ecclesiastical—Year ending Feb. 28, 1968.

■ Guardian—Including funds of acquired businesses.

■ Imp. Life of Canada—Includes consideration for Annuities.

* Nat. Mut. of Austrl.—Year ending Sept. 30, 1967.
Includes consideration for Annuities.

* Pioneer—Year ending March 31, 1968.

* Royal—Including figures of associated companies.

* Sentinel—Year ending March 31, 1967.

■ Standard—Year ending Nov. 15, 1967.

* Sun Alliance & London—Formed 1967—Incorporating Funds established 1720, 1824 & 1883.

LIFE ASSURANCES IN FORCE

British Life Assurance Statistics show that £13,800,000 ordinary assurance policies to the amount of £23,400,000,000 were in force at the end of 1967, with total yearly premiums of £553,000,000 compared with £13,300,000, £20,100,000,000 and £493,000,000 respectively in 1966. These figures include the Ordinary Branch business of Friendly Societies.

IMMEDIATE ANNUITIES (payable half-yearly, in arrear), FOR EVERY £100 PAID (See notes, p. 1145)

* NOTE.—The Valuation period ■ for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

† Plus special additions.

Atlas.—Three years ending December 31, 1967. Plus 35% of Bonuses attaching prior to December 31, 1964.

Caledonian.—Three years ending December 31, 1967.

Clerical, Med., & Gen.—Plus 3% of existing Bonuses.

Interim—Plus 2%.

Colonial Mutual—On ■ increasing scale.

Commercial Union.—Three years ending Dec. 31, 1966.

Eagle Star.—Three years ending December 31, 1966.

Ecclesiastical.—Five years ending February 28, 1964.

Equity & Law.—Three years ending Dec. 31, 1967. Plus £2 3s. Od. on existing Bonus. Interim—Plus £2% on existing Bonus.

Friends Prov. & Cent.—Plus 10% of Bonus allocated prior to Dec. 31, 1964.

General.—New compound bonus series from Jan. 1, 1967.

Guardian.—Two years ending Dec. 31, 1967.

Ideal Life.—Three years ending December 31, 1965.

Legal and Genl.—Three years ending Dec. 31, 1965.

Plus 12½% of existing Bonus. United Kingdom only.

Life Assoc. of Scot.—Three years ending Dec. 31, 1966.

Liverpool Victoria.—Three years ending Dec. 31, 1965.

Marine & Genl.—Increasing by 10s. % after 12 years.

National Employers.—Special Profit-sharing System.

National Mutual.—Two years ending December 31, 1966.

National Mut. of Austr.—One year ending Sept. 30, 1967. Current Series.

National Provident.—Three years ending Dec. 31, 1966. Plus 20s. % if in force prior to 1966.

Noble Lowndes—Three years ending Oct. 31, 1967.

Northern.—Rates for United Kingdom. Plus supplementary Bonus 15/-. Interim—plus 10/-%.

Norwich Union—Current Series from Jan. 1, 1965.

Phoenix.—Three years ending Dec. 31, 1966.

Pioneer.—One year ending March 31, 1968. [Policies.

Provident Mutual.—Plus special additions for pre-1961

Royal Exchange.—Three years ending December 31, 1966.

Plus 15% of Bonus attaching prior to December 31, 1966.

Scottish Equitable.—Three years ending Dec. 31, 1965.

Scottish Life.—New series compound Bonus from January 1, 1968.

Scottish Mutual.—Three years ending Dec. 31, 1967. Plus 12½% of Bonus still attaching.

Sentinel.—Three years ending March 31, 1968.

Standard.—One year ending Nov. 15, 1967.

Sun Life.—Three years ending Dec. 31, 1966. Plus 12½% of Bonus attaching.

United Kingdom.—Three years ending December 31, 1965.

Plus 10% of Bonus attaching.

University.—Four years ending Dec. 31, 1966. Plus 10% of Bonus attaching.

Yorkshire.—One year ending December 31, 1967.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then

declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates ■ hereafter given are "next birthday" unless otherwise stated

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100

Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits	Age at Entry	With Profits	Without Profits
21	£ s. d.	£ s. d.	31	£ s. d.	£ s. d.	41	£ s. d.	£ s. d.
21	1 18 9	1 2 0	31	2 9 9	1 9 8	41	3 5 7	2 2 10
22	1 19 9	1 2 7	32	2 11 1	1 10 8	42	3 7 9	2 4 8
23	2 0 9	1 3 3	33	2 12 6	1 11 9	43	3 10 1	2 6 6
24	2 1 9	1 3 11	34	2 13 11	1 12 11	44	3 12 5	2 8 7
25	2 2 10	1 4 8	35	2 15 5	1 14 2	45	3 14 10	2 10 9
26	2 3 11	1 5 5	36	2 16 11	1 15 5	46	3 17 4	2 12 11
27	2 5 1	1 6 0	37	2 18 7	1 16 9	48	4 2 8	2 17 8
28	2 6 3	1 6 10	38	3 0 3	1 17 3	50	4 9 3	3 3 5
29	2 7 5	1 7 9	39	3 1 11	1 18 9	55	5 9 1	4 0 0
30	2 8 7	1 8 8	40	3 3 10	2 1 3	60	6 13 11	5 2 4

The next table shows the annual premiums for a policy of £100 payable at death, with and without profits. Normally premiums are payable throughout life but with some Offices they cease at age 85 or earlier, according to age at entry. It is not sufficient to judge ■ life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such

interim bonuses compare with valuation bonuses especially in cases of endowment assurance. A without profit Insurance provides the maximum amount of cover at the lowest cost and if ■ Office as in some cases, is prepared to allow the option of converting the Insurance at any time to "with" profits either for whole of Life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail ■ higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ANNUAL PREMIUMS FOR ASSURANCE OF £100 PAYABLE AT DEATH.

MALE LIVES (lower premiums are quoted by many offices for female lives)

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-

earning capacity—see first page of Life Assurance. Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy. The following table shows the annual premiums for various ages at entry, charged by the offices named, to secure £100 at the end of 15, 20 and 25 years, or at death, if previous, with profits.

MALE LIVES (lower premiums are quoted by many offices for female lives)

Friendly Societies—Great Britain

Acts 1896–1968

Friendly societies are mutual insurance societies in which the members subscribe for provident benefits, in particular sickness, death, endowment and old age benefits. Those friendly societies that are known as "collecting societies" because they collect members' premiums for life assurance by house-to-house visits of collectors or agents are subject to the provisions of the Industrial Assurance Acts as well as the Friendly Societies Acts. The totals in ordinary type in the table below relate to registered friendly societies proper (including both centralized societies and the Orders with their branches); those in italics relate to collecting societies.

End of Year	No. of Societies on Register	Membership	Assurances or Policies	Total Funds
		Thousands		£000's
1966.....	9,002	80	5,503	291,932
1938.....	19,600	149	8,491	151,613
1913.....	25,475	71	6,783	51,489
				<i>416,637</i>
				<i>84,837</i>
				<i>11,165</i>

The first column headed "No. of Societies on Register" in the above table includes (for 1966) 846 societies without branches and 35 societies with branches ("Orders"), the remainder being the separately registered branches of the Orders.

As compared with the previous year the number of societies without branches decreased by 22 and the number of branches by 327; the number of Orders was unchanged. Total membership decreased by 76,000 but was still in excess of 5½ millions.

Although recent years have seen the growth of societies registered for such specific purposes as the provision of institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1966 Friendly Societies proper paid out £5·7 millions in sickness benefit and £2·3 millions in death benefit.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The latest available figures of membership and funds set out below indicate the relative strength of several leading old established societies, including the three largest Orders which operate through registered districts and branches subject to a central body:—

FRIENDLY Soc.—Name with (in brackets) Year Established	Membership	Total Funds
	£000's	
National Deposit Friendly Society (1868).....	471,000	26,208
Hearts of Oak Benefit Society (1842).....	449,000	19,065
Independent Order of Odd Fellows, Manchester Unity (1810).....	349,000	29,362
Ancient Order of Foresters (1834).....	291,000	21,659
Independent Order of Rechabites, Salford Unity (1835).....	145,000	7,227

COLLECTING Soc.—Name and Year Established	No. of Industrial Assurances Premium Paying	Total Funds
	£000's	
Liverpool Victoria Friendly Society (1843).....	10,853,000	4,114,000
Royal Liver Friendly Society (1850).....	6,653,000	2,119,000
Scottish Legal Life Assurance Society (1852).....	2,167,000	990,000
	<i>264,550</i>	<i>125,719</i>
	<i>31,846</i>	

Long before the term "Friendly Society" came into use, the seeds of voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution to insure relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the oldest operating in Scotland, being the "Incorporation of Carters in Leith" established as long ago as 1555. The oldest

society now on the register in England is the Bottesford Friendly Society established in Leicestershire in 1747.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies

deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but tax exemption (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

Important changes in the conditions under which friendly societies enjoy tax exemption were made by the Finance Act, 1966. In general, societies registered after May 3, 1966 are not entitled to any tax exemption on their life or endowment business. The same restriction applies to any society registered after December 31, 1957, which during the period of three months ending May 3, 1966 entered into a life or endowment contract on payment of a single premium. Other societies continue to enjoy tax exemption on life and endowment business which satisfies the requirements of Schedule 8 of the Act. These conditions are broadly that the term of an endowment assurance must not be less than ten years and the premiums

must be of equal or rateable amounts payable at yearly or shorter intervals over the whole term of the policy. At the same time by Part II of the Schedule the limits of assurance imposed on friendly societies were raised. The limits for tax exempt business remained unchanged at £500 gross and £104 per annum by way of annuity, but in addition a society is permitted to insure up to £2,000 as lump sum (£3,000 under a mortgage protection policy) and £208 per annum by way of annuity. All these limits are exclusive of bonuses. Profits arising from the business under the new limits are liable to tax.

The Friendly and Industrial and Provident Societies Act, 1968 received the Royal Assent on July 26, 1968. It makes substantial changes in the statutory requirements for the keeping and auditing of the accounts of societies registered under the Friendly Societies Act, 1896 and the Industrial and Provident Societies Act, 1965. The system of "approved auditors" is abolished and the requirements are brought generally into line with those of the Companies Act. A number of provisions in the Act apply only to friendly societies and affect their periodical actuarial valuations among other matters. The requirements for giving notice of a meeting of a collecting society at which an amendment of rules is to be proposed are also varied.

Building Societies—Great Britain

Act 1962.

Building Societies are associations incorporated with limited liability under the Building Societies Act. All Building Societies are required to register their rules and file their accounts with the Registry of Friendly Societies. The following particulars showing the growth of Building Societies (as also that of Co-operative and Friendly Societies tabulated on pp. 1127 and 1144) are based on the Chief Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

In almost every way 1967 was a record year for building societies. Advances on mortgage amounted to £1,463 millions, an increase of £218 millions on the previous year's figure which was then the highest recorded. The total assets of all societies increased during 1967 by £1,140 millions to £7,446 millions. The rate of increase was 18·07 per cent. compared with 14 per cent. in 1966.

The bulk of the money advanced by building societies is to owner occupiers to assist them to buy their homes. The average advance on new mortgages in 1967 was £2,933 as compared with £2,143 in 1963, an indication of the ever-increasing cost of house property and of the greater percentage of the price of a house which mortgagors expect to borrow. There is also a tendency for mortgage loans to extend for a longer period than the usual 20 years. Of the total advances in 1967, 8·45 per cent. were on repayment terms extending for periods of 26 years or more.

The number of societies on the register dropped from 576 at the beginning of 1967 to 554 at the end of the year. Twenty-three societies were removed from the register during the year, twenty-one of them as a result of unions or transfers of engagements. The only society added to the register during the year was formed by the union of existing societies. Two societies with assets exceeding £10 million transferred their engagements. The Church of England Building Society (assets £20 millions) transferred to the Maidenhead and Berkshire Building Society (assets £21 millions)

which changed its name to the South of England Building Society. The Shern Hall (Methodist) Building Society (assets £14 millions) transferred to the Magnet and North West Building Society (assets £20 millions) which changed its name to Magnet Building Society. The one union was between the Rugby Building Society (assets £11 millions) which united with the Warwick and Warwickshire Permanent Building Society (assets £6 millions) to form the Rugby and Warwick Building Society.

Shareholders added £1,892 millions to their accounts during 1967. Withdrawals from these accounts totalled £1,088 millions. Mortgage balances increased from £5,219 millions at the end of 1966 to £6,038 millions at the end of 1967. The remainder of the total assets consisted mainly of investments and cash. The investments in which societies may invest their surplus funds are restricted to those authorized by the Building Societies (Authorized Investments) Order, 1962.

For the year 1967 interest received by societies from borrowers amounted to £405 millions. Interest payments to shareholders and depositors totalled £269 millions. Expenses at £42 millions for 1967 averaged only about 2s. 3d per £100 of the mean total assets. Of this total advertising accounted for 6 per cent. and commission and agency fees 12 per cent.

The rate of interest usually charged on mortgage advances to new borrowers who are owner-occupiers is at present 7½ per cent. Interest rates paid on share and deposit accounts are usually 4½ and 4¼ per cent. respectively (income tax on both share and deposit interest being paid by the societies).

Section 1 of the House Purchase and Housing Act, 1959, empowered the Chief Registrar to designate building societies for the purposes of the section. Societies that had been designated up to the time of going to press are marked "D" in the list which follows. Deposits in a designated building society rank as "narrower-range investments requiring advice" and shares in such a society as "wider-

range investments" under the First Schedule to the Trustee Investments Act, 1961.

The basic requirements for designation throughout 1967 were those contained in the Building Societies (Designation for Trustee Investment) Regulations, 1964. These regulations prescribed £½ million as the minimum asset requirement and at the end of 1967 there were 300 societies with assets exceeding this amount. Of these 300 societies, 284 fulfilled the other requirements of the Regulations and 240 had been designated. The total assets of designated societies at the end of 1967 amounted to 98·9 per cent of the assets of all building societies.

Arising out of the Hardie report the requirements for designation have been amended by new Regulations which came into force on April 1, 1968. A society applying for designation is now required to have assets of £1 million. However a society satisfying the former assets requirement can be designated if it applied before March 28, 1968, and designation is granted before the end of 1968.

Under the Building Societies Acts, the Chief Registrar exercises certain power of control over building societies. Section 11 of the Prevention of Fraud (Investments) Act, 1958, under which the Registrar had prohibited certain societies from investing in investments was repealed by the Building Societies Act, 1960 (but without prejudice to any order currently in force) and the Chief Registrar was empowered to direct that a building society shall not advertise at all or to give directions to a particular society as to the matter included in its advertisements. In addition he may make an order prohibiting a building society from accepting further investments. The Chief Registrar's Report to Parliament for 1967 disclosed that at the end of that year 10 orders under the 1958 Act were still in force while 7 orders under the 1960 and 1962 Acts prohibiting the acceptance of further investments were in force at the end of 1967. Directions controlling advertising were in force in respect of 5 societies at the end of the year.

BUILDING SOCIETIES, GREAT BRITAIN, 1967—with 1966 in italics.

NATIONAL HEALTH SERVICE

The National Health Service came into being on July 5, 1948, as a result of the *National Health Service Act*, 1946. The Act placed a duty on the Minister of Health to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people and the prevention, diagnosis and treatment of illness. There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines. The Minister of Health is responsible to Parliament for seeing that Health Services of all kinds of the highest possible quality are available to all who need them. He is advised by the Central Health Services Council (and certain Standing Advisory Committees dealing with special subjects), which he appoints after consultation with the various interested bodies.

The National Health Service which covers a comprehensive range of hospital, specialist, practitioner (medical, dental, ophthalmic), pharmaceutical, appliance and local authority services, is available to every man, woman and child in the country. Everyone resident in the country is entitled to use the Service as a whole or any complete part of it. No insurance qualification is necessary. Most of the cost of running the Service is met by the Exchequer—that is, from taxes. Other sources of finance are: (i) the weekly National Health Service contributions (since September, 1957), which are estimated to produce about £162,000,000, approximately 12·3 per cent. of the total cost of the Service in 1968-69. (For convenience these are collected with the National Insurance contribution in a single combined weekly stamp); (ii) local taxation, which with Exchequer grants pays for 87·0 per cent. of the cost of local health authority services; (iii) partial charges to patients for spectacles, dentures and dental treatment and amenity beds in hospital. The cost of the Health and Welfare Services in England and Wales rose from £860,000,000 in 1960-61 to an estimated total of £1,546,000,000 in 1968-69. In Scotland the National Health Service vote totalled £141,979,000 for 1968-69, compared with a revised estimate of £141,585,000 in 1967-68.

THE HEALTH SERVICES

Family Doctor Service

In England and Wales the Family Doctor Service is organized by 134 Executive Councils which also organize the Dental, Pharmaceutical and Supplementary Eye Services for their areas. With few exceptions there is an Executive Council for each county and county borough area; members, who serve voluntarily, are appointed by local doctors, dentists and pharmacists (12), the Local Health Authority (8) and the Minister of Health (5). Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 20,000 general practitioners do so. They may at the same time have private fee-paying patients. Family doctors are paid for their Health Service work in accordance with a scheme of remuneration which includes *inter alia* a basic practice allowance, capitation fees, reimbursement of certain practice expenses and payments for "out of hours" work.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor in whose list he is, or by informing the local Executive Council (in which case 14 days must elapse before the other doctor can accept him). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents", and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Drugs, Medicines and Appliances.—The number of chemists (including drug stores and appliance suppliers) in England and Wales, within the National Health Service at December 31, 1966, was 14,237. 271,205,554 prescriptions were dispensed in 1967.

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 10,400 of the dentists available for general practice have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part

in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (e.g. fillings), provision of dentures in some cases, emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the extraction of teeth and the provision of dentures (in some cases); extensive and prolonged treatment of the gums; inlays and crowns (in some cases); special appliances and oral surgery and certain other items.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for such types of treatment as crowns, inlays or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1952, charges were introduced for dentures; these were increased in May, 1961, to £2 5s.-£2 15s. for the supply of one denture or up to £5 for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. This charge was increased to £1 10s. from May 1, 1968. No charge is made for the clinical examination of a patient's mouth. Expectant mothers or mothers who have had a child during the preceding twelve months, children under 16, or 16 or over, but still in full-time attendance at school, do not pay charges. Other patients between 16 and 20 years of age pay charges for dentures only.

Supplementary Ophthalmic Service

Supplementary Ophthalmic Services, which are administered by Executive Councils, form part of the ophthalmic services available under the National Health Service and provide for the testing of sight and supply of glasses to meet more normal needs only. Diagnosis and specialist treatment of eye conditions is available through the Hospital Eye Service as well as the provision of glasses of a special type. Testing of sight may be carried out by any ophthalmic medical practitioner or ophthalmic optician, and glasses supplied by any ophthalmic optician or dispensing optician taking part in the Services. On the first occasion a person wishes to

use the Services he must obtain a medical recommendation from his doctor that his sight needs testing. No further recommendation is required subsequently and the Services may be used direct.

Until 1951 there were no charges under the Supplementary Ophthalmic Service except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses. In May, 1951, charges to patients of 10s. for each lens, plus the actual cost of the frames, were introduced. As from May 16, 1961, charges to patients have been increased to 12s. 6d. for each single-vision lens or 20s. for each bi-focal lens. As hitherto, children's glasses in the standard type of children's frame remain free of charge. As from May, 1961, schoolchildren aged 10 years or over may be supplied with lenses without charge if any other type of N.H.S. frame is used. The charge for the frame must then be paid.

Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The Minister has a duty to provide hospital accommodation and specialist services to such an extent as he considers necessary to meet all reasonable requirements for the treatment of the acutely ill, maternity cases, the chronic sick and those suffering from tuberculosis or infectious diseases as well as the mentally disordered. Convalescent treatment is also provided for those who need it and surgical and medical appliances are supplied in appropriate cases.

In the main, this part of the Service is organized by 15 Hospital Boards (see pp. 385-6); in 14 of these regions there is a University having a teaching hospital or medical school. Hospitals are administered on behalf of the Boards by about 330 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations and are at present 12s. or 24s. per day. In such a case the patient pays nothing for the cost

THE ORDER OF ST. JOHN (1888)

St. John's Gate, Clerkenwell, E.C.1

The Order had its origin in Jerusalem where a hospice for the relief of Christian pilgrims was founded in the eleventh century. Initially a monastic order, it later became militarized and its Knights fought alongside the Crusaders against the spread of Islam. After the loss of the Holy Land, the Order became sovereign in Rhodes and then in Malta. Its priories in England and Scotland were dissolved at the same time as the monasteries. The Grand Magistracy eventually settled in Rome after its expulsion from Malta in 1798. In 1827 the Knights of France assisted in the revival of what is now the Grand Priory in the British Realm of the Most Venerable Order of the Hospital of St. John of Jerusalem. A Royal Charter was granted to the Order in 1888 by Queen Victoria, and the first Grand Prior was King Edward VII, while Prince of Wales. The Badge is a white eight-pointed cross, embellished in alternate angles with a lion and a unicorn; the riband is of black watered silk. The work of the Order consists of the maintenance of two Foundations—The Ophthalmic Hospital in Jerusalem (founded 1882) and The St. John Ambulance Association and Brigade, 1 Grosvenor Crescent, S.W.1, which is concerned with education in First Aid and kindred subjects and provides trained personnel for attendance on the public where the rendering of First Aid may be required. Lord Prior, The Lord Wakehurst, K.G., K.C.M.G.

of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the specialist as well. Since January 1, 1967, medical fees for private patients in National Health Service hospitals are a matter for agreement between doctor and patient.

Arrangements to obtain the service or advice of a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to visit the patient at home if he is unable, for medical reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above or dentures or glasses of a special type supplied at the patient's request). With certain exceptions, hospital out-patients have to pay fixed charges for dentures and glasses.

Local Authority Health and Welfare Services

The authorities mainly concerned with the care of patients in their own homes are the County Councils, County Borough Councils, London Borough Councils and the City of London. There are 175 local health and welfare authorities in England and Wales and 29 other authorities with delegated health and welfare functions. The only local health authority function of the Greater London Council is the provision of the ambulance service.

Local Health Services provide such services as midwifery; ante-natal, post-natal and infant welfare clinics, and priority dental services for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of home help on health grounds; special care and after-care of the sick; health education; local mental health services; and also vaccination and immunization. Most authorities also provide a chiropody service with priority for the elderly, physically handicapped persons and expectant mothers. The provision of Health Centres is also a local Health Authority responsibility in England and Wales. In Scotland such centres are the responsibility of the Secretary of State for Scotland.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, chiropody, nursing requisites, bedding and other services for care and after-care, for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. A charge may also be made for yellow fever vaccinations. The Local Health Authorities may only charge what is reasonable, having regard to the [redacted] of the users.

NATIONAL INSURANCE AND RELATED CASH BENEFITS

For Combined Contributions, see p. 1160.

The State insurance and assistance schemes in force from July 5, 1948, comprised schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory benefits in place of national assistance and non-contributory old age pensions, and provided for the establishment of a new Ministry of Social Security, with overall responsibility for the existing insurance schemes and family allowances scheme and the new scheme of non-contributory benefits, in place of the Ministry of Pensions and National Insurance and the National Assistance Board, which were abolished. The new Ministry was set up on August 6, 1966.

Acts consolidating the provisions of the National Insurance, Industrial Injuries, Family Allowances and National Health Service Contributions Acts passed since 1946 were brought into effect on September 6, 1965, and the Statute Law Revision (Consequential Repeals) Act, 1965, which repealed the provisions of the old Acts came into effect on the same date.

NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1965, as amended by the National Insurance Acts, 1966 and 1967, the Family Allowances and National Insurance Acts, 1967 and 1968, and the Public Expenditure and Receipts Act, 1968, and Regulations made under those Acts.

The scheme provides, in return for regular weekly flat-rate contributions, weekly flat-rate cash benefits as stated below. For employees over 18 earning over £9 a week (unless contracted out as members of approved occupational pension schemes) there are additional contributions graduated according to earnings, with related graduated additions to retirement pensions for themselves or their widows.

The National Insurance Act, 1966, provided for the payment to persons over 18 of earnings-related short-term benefits supplementing unemployment and sickness benefit and widow's allowance, and for extra graduated contributions to pay for the earnings-related supplements.

The National Insurance Act, 1967, increased flat-rate retirement pensions and other insurance benefits, together with flat-rate contributions, from the week beginning October 30, 1967. Further increases in flat-rate contributions provided for by the Public Expenditure and Receipts Act, 1968, on account mainly of the continuing trend towards more sickness claims and earlier retirement, took effect from May 6, 1968.

INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pension age becomes insured under the Acts.

There are three classes of insured persons namely:

- Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.
- Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.
- Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

The estimated number of persons in respect of whom flat-rate contributions were payable in 1965

was as follows: employed, 23·57 million; self-employed, 1·42 million; non-employed, 0·23 million.

National Insurance contributions are payable by insured persons, by employers of employed persons (see p. 1160), and out of moneys provided by Parliament.

The ordinary flat-rate contributions are usually paid by means of stamps on a single insurance card; the stamp also covers the National Health Service contributions; in the case of employed persons the Industrial Injuries contribution; the Selective Employment Tax payable by all employers; and, in the case of employees aged 18 and over, the employer's contribution to the Redundancy Fund.

Since June 1, 1963, employed persons over age 18 earning more than £9 in any week (who are not contracted out as members of approved occupational pension schemes) and their employers have each paid, in addition to the flat-rate contribution covering earnings up to £9 a week, a graduated contribution of 4½ per cent. of earnings over £9 and up to £18 a week. People in class 1 who are contracted out pay a higher flat-rate contribution (see pp. 1156, 1160).

To meet the cost of earnings-related supplements to unemployment and sickness benefit and widow's allowance under the National Insurance Act, 1966, additional graduated contributions of about ½ per cent. of earnings between £9 and £30 a week are payable both by employed contributors over 18 (including employees who are contracted out of the graduated pension scheme) and by their employers (see pp. 1156, 1160).

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay the National Insurance flat-rate contribution or not.

Men aged 70 and over and women aged 65 and over in classes (1) and (2) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions, including any graduated contributions, if they have not retired from regular employment. Normally no contributions are payable by men over 65 or women over 60 in class (3).

Regulations state the cases in which insured persons may be excepted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are excepted.

From April, 1961, the yearly Exchequer contribution, subject to a minimum of £170 million a year, is equal to one-quarter of the national insurance portion of the contributions paid by employers and employed persons (excluding graduated contributions) and one-third of the national insurance portion of self-employed and non-employed contributions.

BENEFITS

The Acts give the following benefits:—

Unemployment benefit.

Sickness benefit.

Maternity benefits, including maternity grant and maternity allowance.

Widow's benefits, including widow's allowance, widowed mother's allowance and widow's pension.

Child's special allowance.

Guardian's allowance.

Retirement pension.

Death grant.

The benefits available to the various classes of insured persons are as follows:

Employed persons....	All benefits.
Self-employed persons.	All benefits except unemployment benefit.
Non-employed persons	All benefits except unemployment and sickness benefits and maternity allowance.

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Chief National Insurance Commissioner and National Insurance Commissioners.

UNEMPLOYMENT BENEFIT

The standard weekly rates of flat-rate benefit are as follows:

Man, single woman or widow over 18...	
Married woman over 18: ordinary rate	
Person under 18: ordinary rate	
Increase of benefit for only child or elder or eldest child (where payable).....	
Increase of benefit for second child (where payable).....	
Increase of benefit for each additional child (where payable).....	
Increase of benefit for adult dependant (where payable).....

Normal Contribution Conditions.—The claimant must have paid 26 Class 1 contributions since he last became insured, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class 1 contributions during the preceding contribution year.

Waiting Period.—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated as "linked up" if not separated by more than 13 weeks. From March 10, 1969, benefit will not be payable for the first six days (excluding Sundays and holidays) of any period during which employment is suspended but not terminated by the employer, e.g., short-time working or lay-off.

Duration of Benefit.—Benefit is payable in a period of interruption of employment or 312 days (a year).

Requalification for Benefit.—A person who has exhausted benefit requalifies therefor when he has paid 13 Class 1 contributions.

Disqualifications.—There are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment or training.

Earnings-related Supplement.—The supplement payable to claimants over 18 and under pensionable age who are entitled to flat-rate unemployment benefit is one third of the amount by which average weekly earnings exceed £9, subject to a maximum supplement of £7 (payable where average earnings are £30 a week or more) and a maximum total benefit, including increases for dependants, of 85 per cent. of earnings. Average weekly earnings will normally be taken as one-fiftieth of total earnings in the previous income tax year. The supplement starts from the thirteenth day of a period of interruption of employment and lasts for

up to a maximum of six months. Periods of unemployment or sickness not separated by more than 13 weeks are treated as one period of interruption of employment. Where employment is suspended but not terminated by the employer, the supplement is not payable for the first six days (except Sundays and holidays) in any continuous period of suspension.

Numbers Unemployed.—During the year 1967 the average number of persons registered as unemployed in Great Britain was 559,500. In November, 1966, 276,000 persons were receiving unemployment benefit.

SICKNESS BENEFIT

Standard Rates of flat-rate Benefit.—Same as for unemployment benefit.

Normal Contribution Conditions.—Same as for unemployment benefit, except that Class 1 as well as Class 2 contributions and credits are counted.

Waiting Period.—Same as for unemployment benefit. Days of sickness are "linked up" with days of unemployment falling within the same period of 13 weeks.

Duration of Benefit.—A person who has paid 156 Class 1 or Class 2 contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 312 days (one year); but he will requalify for benefit when he has paid contributions for 13 weeks.

Disqualifications.—Regulations provide for disqualifying a person for receiving sickness benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in a way which would retard his recovery.

Earnings-related Supplement.—The supplement and the rules as to duration are the same as for the supplement to unemployment benefit.

Number of Claims.—During 1966, about 10·9 million new claims for sickness benefit were received.

MATERNITY BENEFITS

Maternity Grant.—A cash grant of £22 is payable on the mother's own insurance or on her husband's, whether she is confined at home or in hospital. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at a reduced rate.

Maternity Allowance.—A woman who is gainfully occupied receives in addition a maternity allowance of 90s. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During the year ended March 31, 1966, maternity grants were paid for about 936,000 births; in addition, about 246,000 women received weekly maternity allowances.

WIDOW'S BENEFITS

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by the husband are (a) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (b) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50.

Widow's Allowance.—A woman who at her husband's death is under 60 (or over 60, if he had not retired), receives (during the first 26 weeks of widowhood) a cash allowance usually of 127s. a week with increases of 45s. 6d. for the first or only child, 27s. 6d. for the second child and 25s. 6d. for each other child, in addition to family allowances. Women widowed on or after October 5, 1966, before the husband's retirement, also receive a supplement to widow's allowance amounting to one-third of the husband's average weekly earnings between £9 and £30 (reckoned in the same way as for earnings-related supplements to unemployment and sickness benefit) (see p. 1154).

Widowed Mother's Allowance.—When the 26 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of 135s. 6d. a week as long as she has a child of qualifying age, and in addition 27s. 6d. a week for the second child and 25s. 6d. for each additional child, as well as family allowances. A widowed mother's personal allowance, usually 90s. a week, is payable to widows who, when their widow's or widowed mother's allowance ends, have living with them a child under 19, who has left school and is not an apprentice.

Widow's Pension.—A widow receives this pension usually of 90s. a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or (ii) when her widowed mother's allowance or widowed mother's personal allowance ends, if she is then over 50 (40 if widowed before February 4, 1957) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon re-marriage. The National Insurance etc. Act, 1964, abolished the earnings rule previously applied to widowed mother's allowance and widow's pension.

If a woman who was married before July 5, 1948, to a man insured under the old scheme immediately before that date does not qualify for widow's benefit, she may qualify for a widow's basic pension, usually, since March 29, 1965, of 30s. a week.

At the end of 1966, about 580,000 widows were receiving widowed mother's allowance, widow's pension or widow's basic pension, and about 40,000 widow's allowances were current.

CHILD'S SPECIAL ALLOWANCE

A woman whose marriage has been dissolved or annulled and who has not re-married is paid a special allowance on the ex-husband's death. The normal condition is that she has a child to whose maintenance he was contributing at least 5s. a week in cash or its equivalent. The allowance is 45s. 6d. a week for the first or only child, 27s. 6d. for the second child and 25s. 6d. for each other child, in addition to family allowances. The contribution conditions for the allowance are substantially the same as for widow's benefit.

GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's

allowance of 45s. 6d. a week while the child is of qualifying age. At the end of 1966 about 4,900 allowances were being paid.

RETIREMENT PENSIONS

A flat-rate retirement pension is payable for life to an insured person who (a) is over pension age (65 for a man and 60 for a woman), (b) has retired from regular employment, and (c) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (b).

The standard flat-rate pension for an insured person or widow is 90s. a week, plus 56s. for a dependent wife who is not qualified for a pension, plus 28s. for the first or only child, 10s. for the second child and 8s. for each other child, in addition to family allowances.

Where the insured person postpones retirement beyond minimum pension age, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for women), in respect of contributions paid as an employed or self-employed person during the five years after reaching minimum pension age. The increment to pension is now 1s. for every 9 contributions. A retirement pensioner between the ages of 65 and 70 (60 and 65 for women) can choose to be treated as not retired and thus earn pension increments by temporarily forgoing his pension and paying contributions during employment or self-employment.

A man aged 65 to 70 (or a woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of £6 10s. and a further sixpence for each shilling of net earnings in excess of £8 10s.

The Normal Contribution Conditions for the flat-rate pension are (a) that 156 contributions of any class have been paid (104 if insurance began before September 30, 1946), and (b) that the yearly average of contributions paid or credited is not less than 50s.

Special Provisions as to Women.—Subject to certain conditions, a married woman over the age of 60 or a woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 56s. a week when he retires at 65 or after or reaches 70. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 6d. during his lifetime and 1s. on widowhood for every 12 (from October, 1967, 9) contributions paid by the husband as an employed or self-employed person while he is over 65 and under 70 and she is over 60, and her pension in widowhood is increased by 6d. for every 12 of these contributions paid by him on or after December 25, 1961, while she is under 60 (from October, 1967, 9). A widow who qualifies for retirement pension on her own insurance can receive, in addition to any increments she may earn by deferring her own retirement and paying contributions beyond age 60, half of all the 1s. increments which her husband earns by deferring retirement and paying contributions on or after December 25, 1961.

Unemployment and sickness benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment at the same rate as the retirement pension they would have been entitled to had they retired from regular employment.

At the end of 1966 retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 6,534,000 persons, about 167,000 more than a year earlier.

THE GRADUATED PENSION SCHEME

Since April, 1961, when the graduated pension scheme came into operation, National Insurance contributions and retirement pensions have been

graduated, within specified limits, according to earnings. The scheme does not apply to employed persons under 18, or to self-employed or non-employed persons (see p. 1160).

Graduated Contributions.—Employed persons over 18 (including men over 65 and under 70, and women over 60 and under 65, who have not retired), unless contracted out ■ members of occupational pension schemes satisfying certain conditions, pay a weekly flat-rate contribution covering earnings up to £9 ■ week, plus ■ graduated contribution on all earnings over £9 and up to £18 a week, plus, since October 5, 1966, ■ extra graduated contribution on earnings between £9 and £30 to pay for the earnings-related supplements to unemployment and sickness benefit and widow's allowance.

The flat-rate contribution, which includes the separate National Health Service and Industrial Injuries contributions, the Selective Employment Tax (employer only) and the employer's contribution to the Redundancy Fund, is 7*s.* 1*d.* for ■ employed ■ (of which the employee pays 1*s.* 8*d.* and the employer 5*s.* 5*d.*) and 4*s.* for an employed woman (of which the employee pays 1*s.* 1*d.* and the employer 3*s.* 1*d.*) (see p. 1160).

On earnings above £9 and up to £18 a week the graduated basic contribution is about 8½ per cent. of earnings divided equally between employer and employee. On earnings above £18 ■ week it is the same as on earnings of £18 a week, viz., 1*s.* 5*d.* 4*s.*, divided equally between employer and employee. On earnings above £9 and up to £30 a week the extra graduated contribution to meet the cost of the earnings-related supplements is about one per cent. of earnings shared equally between employer and employee; on earnings above £30 a week this extra contribution is the same as on earnings of £30 a week, viz., 4*s.* 2*d.* divided equally between employer and employee (see p. 1160).

The graduated contribution is the same for men and women. Employed married women, and widows receiving certain benefits, are still able to choose not to pay the flat-rate contribution (other than the 7*d.* Industrial Injuries contribution), but, unless contracted out, they pay their share of the graduated contribution on their earnings over £9 a week.

The graduated contributions are in general payable on the gross earnings (including overtime pay, bonus, etc.) received in each week (or month, etc.) taken separately, and not on the cumulative total over the year.

Contracted-out employees (whatever their earnings) and their employers pay flat-rate contributions which, in the case of employees aged 18 and over, are higher than those payable by or for employees who are not contracted out (see p. 1160). Since October 5, 1966, they have also each been liable for graduated contributions of about ½ per cent. of all earnings in the range £9 to £30 a week to provide for the cost of earnings-related supplements; on earnings above £30 a week each pays the same ■ on earnings of £30 a week, viz., 2*s.* 1*d.*

The flat-rate contributions are usually paid by means of a combined weekly stamp. The graduated contributions are collected through the P.A.Y.E. system, in association with income tax.

The graduated pension.—The graduated addition to the flat-rate retirement pension for each contributor is at the rate of 6*d.* ■ week for each unit of graduated contributions paid by him or her since the start of the new scheme, including the extra ½ per cent. contribution payable since October 5, 1966. A unit of contributions is £7 10*s.* for men, and £9 for women, of graduated contributions paid by the employee. A widow gets

a graduated addition to her flat-rate retirement pension equal to half of any graduated addition earned by her late husband, plus any addition earned by her own graduated contributions.

Graduated additions are subject to the usual condition of retirement and initially are subject to the same earnings rules as the flat-rate retirement pension (see p. 1155). Persons who defer retirement will continue to pay graduated contributions until they retire or reach 70 (65 for women) whether retired or not, when they will qualify for graduated additions to pension in respect of graduated contributions they have paid. In addition, half of the graduated additions they have forgone by deferring retirement will be treated as extra graduated contributions paid by them and will count towards further graduated pension.

Contracting out.—Adult employees who have retirement pension rights in an occupational pension scheme can be contracted out of the graduated part of National Insurance retirement pensions if the following conditions are satisfied:

- (1) the occupational scheme is financially sound;
- (2) it provides the employees contracted out with retirement pension rights at least equal to the maximum graduated pension that could have been earned in the State scheme for ■ corresponding period of service up to age 65 (women 60);
- (3) pension rights at least up to this amount are preserved should the employee change his job.

To be contracted out, an employee must be in ■ employment covered by a Certificate of Non-participation issued to his employer by the Registrar of Non-participating Employments. In general, the application for a certificate must come from the employer. An employer who wishes to contract out all or particular groups of employees must first give notice to the employees and others concerned (e.g. trustees, insurers, committee of management) and allow a period for consultation, and the Registrar can defer the issue of ■ certificate to allow time for further consultation. There is ■ right of appeal to the Adjudicator against a refusal by the Registrar to issue a certificate.

If ■ application was not made in sufficient time before the new scheme came into force, graduated contributions will be payable until a certificate is issued and takes effect. It is open to an employer to seek the Registrar's advice ■ to whether a pension scheme is suitable for contracting out before a formal application is made. A leaflet R. 1, which explains the arrangements for contracting out and for modifying schemes for the purpose of satisfying the contracting out conditions can be obtained from the Registrar of Non-participating Employments, 287 High Holborn, London, W.C.1.

DEATH GRANT

A death grant is payable on the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widower. The normal grant is for an adult £30, a child aged 6-17 £22 10*s.*, ■ child aged 3-5 £15, a child under 3 £9. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £15.

The normal contribution conditions for death grant are that (a) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (b) either not less than 45 contributions of any class have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th

birthday if later) is not less than 45. No grant is payable for deaths of persons already over pension age on July 5, 1948. For deaths in 1965 about 399,000 grants were awarded.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

FINANCE

Under the National Insurance Acts two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance Fund, and payments are made out of the Fund to meet the cost of benefits and administration. Under the National Health Service Contributions Act, provision is made for separate National Health Service contributions to be collected in conjunction with the National Insurance contributions, in place of payments formerly made from the Fund towards the cost of the National Health Service. (See p. 1160.)

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1967, were as follows:—

Receipts	£'000
Balance, April 1, 1966.....	220,408
Flat-rate contributions from employers and insured persons.....	1,165,337
Exchequer contribution.....	287,000
Graduated contributions.....	357,316
Income from investments.....	10,691
Transfer from the Reserve Fund of income from investments, etc.....	42,649
Other receipts.....	532
	<hr/>
	2,083,933

Payments	£'000	£'000
Benefit:—		
Unemployment benefit...	78,322	
Sickness benefit.....	261,809	
Maternity benefit.....	37,000	
Widow's benefit.....	141,000	
Guardian's allowance.....	510	
Child's special allowance..	45	
Retirement pension.....	1,271,551	
Death grant.....	7,984	
	<hr/>	1,798,222
Administration expenses.....	61,676	
Other payments.....	16,456	
Balance, March 31, 1967.....	207,579	
	<hr/>	2,083,933

Payments exceeded receipts during the year by £12·83 million. Compared with 1965-66, receipts increased by £47·40 million and payments by £85·28 million.

The balance in the Reserve Fund at March 31, 1967, was £1,168·6 million.

INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, now operates under the National Insurance (Industrial Injuries) Act, 1965, amended by the National Insurance Act, 1966, the National

Insurance (Industrial Injuries) (Amendment) Act, 1967, the National Insurance Act, 1967, the Family Allowances and National Insurance Acts, 1967 and 1968, and Regulations made under those Acts. The National Insurance Act, 1967, provided for increases in the rates of benefit and in amounts of contribution, with effect from the week beginning October 30, 1967.

The Workmen's Compensation Acts continue to apply, subject to certain amendments, to cases arising before the Industrial Injuries scheme started. Statutory schemes have also been made providing for the payment of allowances supplementing workmen's compensation in certain circumstances, and for the payment of benefits in certain cases where neither workmen's compensation nor Industrial Injuries benefits are payable.

INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance scheme (excluding members of the Forces), and numbered in 1965 23·5 million, of whom more than one-third were women.

CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable by insured persons and employers respectively are 10d. and 11d. for men over 18, 7d. and 8d. for women over 18, 5d. and 5d. for boys under 18, and 3d. and 4d. for girls under 18. Normally contributions are paid by means of stamps on a single insurance card, the same stamp also covering the flat-rate National Insurance and the National Health Service contributions, etc. (see p. 1160).

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time of starting work, but if employed while of school age pay no contributions.

BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity. The day of the accident is not usually treated as a day of incapacity. The rules as to "waiting days" have, since October 6, 1966, been brought into line with those for sickness benefit under the National Insurance scheme (see p. 1154). Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of 14s. (days being paid for at one-sixth of the weekly rate), plus 5s. for one adult dependant, plus 2s. for the first or only child, 1s. for the second child, and 8s. for each other child, in addition to family allowances. Other juveniles receive lower rates. Where a claimant who is entitled to sickness benefit under the National Insurance scheme draws injury benefit instead, any earnings-related supplement to sickness benefit to which he is entitled will be paid with the injury benefit (see p. 1154).

Disability Benefit is payable if at or after the end of the injury benefit period the insured person suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in

the form of a percentage) assessed by a medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred in result of the loss of faculty) as compared with a normal person of the same age and sex. In cases of disablement of less than 20 per cent., except in pneumoconiosis or byssinosis cases, benefit normally takes the form of a gratuity paid according to a prescribed scale, but not exceeding £500. Where the degree of disablement is 20 per cent. or more, or if it is due to pneumoconiosis or byssinosis, the benefit is a weekly pension payable either for a limited period or for life according to the following scale:

Degree of disablement	Weekly Rate
	s. d.
100 per cent	152 0
90 "	137 0
80 "	121 6

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive lower rates.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance or if his disablement is exceptionally severe. An increase of 56s. for an adult dependant and of 28s. for the first or only child, 10s. for the second child, and 8s. for each other child (in addition to family allowances) is also payable where the pensioner is either entitled to an unemployability supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw other national insurance benefits in full in addition to disablement pension.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of 127s. a week for the first 26 weeks and thereafter of 101s. or less a week according to circumstances, plus 45s. 6d. for the first or only child, 27s. 6d. for the second child and 25s. 6d. for each other child, in addition to family allowances.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending courses of vocational training or rehabilitation approved by the Ministry of Labour.

Industrial Diseases, etc.—The Industrial Injuries Act extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions (e.g. as to insurability and liability to contribute) by the Minister, and of " disablement questions "

by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the National Insurance Commissioners, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g., whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioners.

Over four-fifths of a million new awards of injury benefit are made each year. The number of disablement pensions in payment at September 30, 1965 was 198,000, of which 48,600 were in respect of pneumoconiosis. During the year ended September 30, 1965, the number of special hardship allowances in payment increased from 127,700 to 133,000. The annual number of awards of death benefit is nearly 2,000; at the end of 1965, about 25,500 widows' pensions and 13,600 allowances to dependent children were in payment.

FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Industrial Injuries Act, viz., the Industrial Injuries Fund.

NON-CONTRIBUTORY CASH BENEFITS

The National Assistance scheme in force from 1948 to 1966 was designed to substitute for certain existing services provided by the State or by local authorities a unified State service of financial assistance according to need. The service was administered by the National Assistance Board, the ultimate responsibility to Parliament resting with the Minister of Pensions and National Insurance. The National Assistance Board also administered non-contributory old age pensions payable, according to a test of means, under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and over, and had power to supplement old age pensions by national assistance in case of need.

The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory allowances and pensions in place of national assistance and of non-contributory old age pensions, and vested responsibility for these non-contributory benefits

in a new Ministry of Social Security in place of the Ministry of Pensions and National Insurance and the National Assistance Board. A Supplementary Benefits Commission within the Ministry of Social Security is now responsible, subject to Regulations made by the Minister, for operating the scheme of non-contributory benefits.

The supplementary pension may be claimed by persons over pension age and the supplementary allowance by persons aged 16 or over but under pension age, who are not in full-time work. The benefit payable is the amount, assessed under the provisions of the Act, by which the claimant's income requirements exceed his resources. The scale of *normal* income requirements (exclusive of rent) since the week beginning October 7, 1968, is as follows:

	Ordinary	Blind	persons
	s. d.	s. d.	
Married couple	149 0	173 6	(a)
Single householder	91 0		
Other persons:—			
Aged 21 or over	74 0	115 6	
Aged 18-20	61 0	81 0	
Aged 16-17	53 0	69 0	
Aged 13-15	41 0	41 0	
Aged 11-12	39 0	39 0	
Aged 5-10	32 0	32 0	
Aged under 5	27 ■	27 0	

(a) 189s. 6d. when both are blind.

For long-term cases, in place of discretionary additions under national assistance to meet small special needs, there is an addition of 20s. a week to the income requirements. It applies to those over pension age who claim supplementary pensions (with certain exceptions), and also to those below pension age, other than the unemployed, after they have been in receipt of an allowance for two years.

The amount to be added for rent if the claimant (or his wife or her husband) is the householder is normally his net rent and rates in full; and in the case of the non-householder aged 18 or over, 11s. ■ week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and for certain disregards.

Individual awards of benefit are determined by the Commission; a claimant who is dissatisfied with the amount assessed has a right of appeal to an independent Appeal Tribunal.

The Commission may vary an assessment if there are exceptional circumstances but, in the case of a claim to supplementary pension, may not reduce it. The Commission also has powers, similar to those in the national assistance scheme, to award lump-sum payments to meet non-recurring exceptional requirements, and to meet charges for appliances or services supplied under the National Health Service, e.g. for glasses, dentures or dental treatment.

The number of weekly assistance allowances in payment by the National Assistance Board in November, 1966, was 2,104,000.

At the end of September, 1966, about 115,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise out of the employment field. Nearly three-quarters of the allowances were paid in supplementation of insurance pensions and benefits. During the period January 1 to November 27, 1966, the Board also made single payments amounting to £12,700,000. In addition, assistance amounting to £1,563,000 was given to meet charges under the National Health Service for spectacles, dentures and dental treatment.

The maximum rate of non-contributory old age pension at the time of its cessation was 28s. 4d. a week. The number of pensions in payment had fallen to 56,000 by the end of November 1966, when they were replaced by supplementary pensions.

The total net expenditure of the Board during the period Jan. 1 to Nov. 27, 1966, was about £237,020,000.

FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 6, 1946, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 5s. a week for each child in a family other than the elder or eldest. The scheme now operates under the Family Allowances Act, 1965, as amended by the Family Allowances and National Insurance Acts, 1967 and 1968. Increases in the allowance took place in 1952, 1956 and 1967 and twice in 1968. From October 8, 1968, under the Family Allowances and National Insurance Act, 1968, the allowance was increased to 18s. for second children and 20s. for subsequent children, and consequential reductions were made in dependency benefit for second and subsequent children under the National Insurance Acts and the Industrial Injuries Acts.

The Ministry of Social Security Act, 1966, transferred the administration of the family allowances scheme from the Ministry of Pensions and National Insurance to the new Ministry of Social Security. The allowance is payable (through the Post Office) while a child is of school age or, if handicapped, under 16, and up to 19 if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Social Security Office. Claims are decided by the National Insurance adjudication authorities.

At the end of 1966, allowances were in payment for nearly 4 million families (comprising nearly 10½ million children). It is estimated that in the year ended March 31, 1966, over £146 million was paid in allowances (excluding administrative expenses), as compared with £63 million in 1951 and nearly £143 million in 1964-65.

(For details of Flat-Rate and Graduated National Insurance Contributions, see p. 1160.)

COMBINED WEEKLY FLAT-RATE CONTRIBUTIONS

Since May 6, 1968, the main combined weekly flat-rate contributions for National Insurance, the National Health Service and, in the case of employed persons, Industrial Injuries Insurance, paid by means of stamps on a single insurance card, have been as follows:—

	Employees contracted out			Employees not contracted out			Self-employed persons	Non-employed persons
	Employee	Employer	Total	Employee	Employer	Total		
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.		
Men 18 and over...	19 1	18 1	37 2	16 8	15 8	32 4	22 2	17 7
Women 18 and over	15 7	15 1	30 8	14 1	13 7	27 8	18 4	13 10
Boys under 18.....				10 8	10 7	21 3	12 6	9 11
Girls under 18.....				8 11	8 10	17 9	10 8	8 1
	FLAT-RATE CONTRIBUTIONS {							

All employers now pay with national insurance contributions the Selective Employment Tax (37s. 6d. a week for each man employed, 18s. 9d. for each woman, 18s. 9d. for each boy under 18, and 12s. for each girl under 18). Employers of persons aged 18 and over pay a further 1s. 3d. for men and 7d. for women in the combined contribution as a contribution to the Redundancy Fund under the Redundancy Payments Act. Further details of the various contributions including the special rates for certain employed married women, widows and people over pension age are obtainable at local Social Security Offices.

GRADUATED NATIONAL INSURANCE CONTRIBUTIONS (see p. 1156)

Employed men and women aged 18 or over who are not contracted out of the graduated pension scheme pay in addition to the ordinary flat-rate contribution a weekly graduated contribution (collected in association with P.A.Y.E. income tax). This amounts to approximately 4½ per cent. of that part of their pay between £9 and £18 a week plus ½ per cent. of pay between £18 and £30 a week, and ranges from 1d. a week by employees earning £9 os. 1d. a week to 9s. 9d. a week by employees earning £30 a week or more. The employer pays the same amount. Contracted-out persons aged 18 or over and their employers each pay about ½ per cent. of earnings between £9 and £30 a week; this ranges from 1d. a week each on earnings of £9 os. 1d. a week to 2s. 1d. a week on earnings of £30 a week or over.

Examples of the weekly graduated contributions payable by weekly paid employees are given below:

Total Weekly Pay	If not contracted out	If contracted out	Total Weekly Pay	If not contracted out	If contracted out

15	5 11	9	27	9 7	1 11
18	■ 8	1 1	30 or more	9 9	■ 1

Fuller details are given in leaflets available at local Social Security Offices.

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1958. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1958 that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and the applicant must be either:—

- (a) Twenty-five years of age or over; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1958) of the infant; or
- (c) the mother or father of the infant.

Two spouses may jointly adopt an infant, but unless one of them is the mother or father of the infant, condition (a) or (b) above must be satisfied in respect of one of the applicants and the other spouse must have attained the age of twenty-one.

Except in relation to an infant who is not a United Kingdom national (where special provisions apply), the consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g., where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1958 Act places restrictions on societies which make arrangements for the adoption of children.

The Adoption Act, 1964, provides for effect to be given to adoption orders made in Northern Ireland, the Isle of Man and the Channel Islands.

The Adoption Act 1968 (which applies to Scotland) enables an adoption order to be made on the application of a person who is either habitually resident in Great Britain or possesses British nationality. The Act also provides for the recognition of certain overseas adoptions.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1958, cover the law relating to the adoption of children in Scotland, where a Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1958, which is a consolidating Act, also applies, with modifications, to Scotland, and reference is also made to the Adoption Act, 1960 which amends the law with respect to revocation of adoption orders. The Succession (Scotland) Act, 1964, gives the adopted child the same rights of succession as a child born to the adopter in wedlock, but deprives him of any such rights in the estates of his natural parents.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers,

including short certificates which contain reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail;
 2. the occupier of the house in which the birth happened;
 3. a person present at the birth; or
 4. the person having charge of the child.
- The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings. The registration of a birth will be free when it takes place within 42 days. In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. The fee payable for this is 3s. od. There are special provisions relating to late registration. Under the Public Health Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's Office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act, 1957, applicable also to Scotland.

SCOTLAND

New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act, 1965, which amends and re-enacts provisions in former Acts. Personal notification within 21 days of any birth, must be given to the registrar of (a) the registration district in which the birth took place, or (b) any registration district in which the mother of the child was ordinarily resident at the time of the birth and (c) in the case of a foundling child, dead or alive, when the place of birth is not known, the registration district in which the child, or the body was found. When a child is born (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the child is conveyed therein to any

place in Scotland, the birth shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by the father or mother of the child, and if they fail, by one of the following: (a) any relative of either parent who has knowledge of the birth; (b) the occupier of the premises in which the child was, to the knowledge of that occupier, born; (c) any person present at the birth; (d) any person having charge of the child. Failure without reasonable cause involves a penalty not exceeding £20.

The name of the father of an illegitimate child may be entered in the register of births at the time of registration if jointly requested by the mother and father, and the latter's name may also be recorded at a later date on declarations by both parents. A free abbreviated certificate of birth will be issued to the informant at the time of registration. Provision is made for the re-registration of the birth of a person made legitimate by the subsequent marriage of the parents or whose birth entry is affected by any matter respecting status or paternity, or has been so made as to imply that he is a foundling.

A still-birth must be registered and a certificate, signed by the doctor or certified midwife present at the birth or who has examined the body of the child, must be produced.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5s. 3d., viz., 1s. 6d. for search, and 3s. 9d. for the certificate. (When application is made by post the charges are 10s.) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be obtained from the incumbent of the church in which the marriage took place (the customary fee being 3s. 9d.); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, a modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parentage, may be obtained from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of 9d. (inclusive of search) and on furnishing certain particulars.

There is a possibility that the fees set out above may be altered in 1969.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House. The Society of Genealogists, 37 Harrington Gardens, S.W.7, possesses many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part, of about 4,000 Parish Registers.

Scottish Registers of Births, Deaths and Marriages.—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained personally at the General Register Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of 8s. for a full extract entry of birth, death or marriage, and 3s. for a short certificate of birth. When the period searched is over 20 years additional fees are payable. A

short certificate of registration of deaths is issued free of charge for National Insurance purposes in certain cases.

There are also available at the General Registry Office old parish registers of date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of 10s. A fee of 30s. is payable for a general search of all the Scottish registers.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Pakistan, Ghana, Malaysia, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho and Barbados (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Aliens Acts, 1914–1943, though these Acts did not affect the status of any person born before Jan. 1, 1945.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:

(1) Birth on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

(a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;

(b) children born to fathers who are enemy aliens in enemy occupied territory.

2. *Descent*, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:-

- (a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or
- (b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or
- (c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or
- (d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. *Registration* by the Home Secretary upon application by:-

- (a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period so ending as the Home Secretary may in the special circumstances of any particular case accept; or, in certain circumstances, if he is serving under an international organization of which the United Kingdom Government is a member, or is in the employment of a body established in the United Kingdom;
- (b) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

A person in respect of whom a recommendation for deportation or a deportation order is in force under the Commonwealth Immigrants Act, 1962, is not entitled to be registered, although the Home Secretary may register such a person.

4. *Naturalization*.—In order to be eligible for a certificate of naturalization an alien must:-

- (a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and
- (b) be of good character and have a sufficient knowledge of the English language; and
- (c) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of

his application, or such shorter period as the Home Secretary may in a particular case accept.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:-

- (i) (a) he would, if born after that date, have qualified for citizenship by birth; or
- (b) he is a person naturalized in the United Kingdom and Colonies; or
- (c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or
- (ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or
- (iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
- (iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or
- (v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1958, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:-

- (i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war. Under the British Nationality Act, 1964, a person who has ceased to be a citizen of the United Kingdom and Colonies as a result of a declaration of renunciation is entitled to registration as a citizen of the United Kingdom and Colonies if he can satisfy the Home Secretary on a number of matters;
- (ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;
- (iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:-
 - (a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or

- (b) in time of war, traded with the enemy; or
- (c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months' imprisonment; or
- (d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.
- (v) Under a series of Acts, 1958-1968, which contain special provisions relating to Ghana, Cyprus, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, South Africa, Malaysia, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho, Barbados, Aden, Perim and Kuria Muria Islands and Mauritius.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 2, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (a) No action lies in tort against the Crown or the individual Crown servant for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered in-and postal packet (in which case the action must be brought within one year of posting), not being a telegram. (b) The Crown and any member of the armed forces are immune from liability in tort in respect of death of, or personal injury to, another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were con-

fined to the Court of Session, proceedings may now be brought in the Sheriff Court.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. Section 2(1) of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1966, removes the privilege whereby the wages of Crown servants, other than serving members of the armed forces, are exempt from assessment in execution.

DEATHS, BURIAL AND CREMATION DEATHS

(For Certificates, see under BIRTHS)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to fifteen shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1926*, s. 1).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.*, s. 3).

"Still-born" child. (See under Births (Registration), p. 1161).

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased is of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of

members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act, 1957.

Deaths (Registration) in Scotland.—New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act 1965 which amends and re-enacts provisions in former acts.

Personal notification within ■ days must be given to the registrar of (a) the registration district in which the death took place or (b) any registration district in which the deceased was ordinarily resident immediately before his death, and (c) when ■ body is found and the place of death is not known, either the registration district in which the body was found or any other registration district appropriate by virtue of the preceding paragraph. When a person dies (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the body is conveyed therein to any place in Scotland the death shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by one of the following: (a) any relative of the deceased; (b) any person present at the death; (c) the deceased's executor or other legal representative; (d) the occupier, at the time of the death, of the premises where the death took place; (e) if these fail, any other person having knowledge of the particulars to be registered. Failure to comply involves a penalty not exceeding £20.

The medical practitioner who attended the deceased during his last illness must sign a certificate of the cause of death. If there is no such medical practitioner, any medical practitioner who is able to do so, may sign the certificate. At the time of registering the death the registrar shall, without charge, give the informant ■ certificate of registration, and the person to whom the certificate is given must hand it to the undertaker previous to interment or cremation.

BURIAL

The duty of burial is incumbent ■ the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of ■ woman, and the parent of ■ child, also of ■ householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to ■ relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable: legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard ■ faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, *see* above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing

fully with the cremation of ■ body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. Cremation may not take place if the deceased has prohibited that form of disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016), as amended by the Cremation Regulations 1965 (No. 1146).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) **Nullity of Marriage.**—Marriage is void ab initio if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of the parties, if one of the parties was insane, or if one of the parties was under the age of consent, i.e., 16—Marriage Act, 1949. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate ■ marriage may also be a ground for ■ nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1965, which in this context has no application to Scotland, a marriage is also voidable (i.e., ■ decree of nullity may be obtained) on the following grounds—(a) respondent's wilful refusal to consummate the marriage; (b) that either party at the time of marriage was a mentally disordered person or subject to recurrent attacks of insanity or epilepsy; (c) that at the time of marriage the respondent was suffering from communicable venereal disease; (d) that at the time of the marriage the respondent was pregnant by another man. In cases, (b), (c) and (d), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1965, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled. Further, even if a marriage is void, ■ child of such a union can sometimes be treated ■ legitimate if at the time of conception or of the marriage (if later) either or both of the parties reasonably believed that the marriage was valid (Legitimacy Act, 1959).

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (a) above, even though there has been no normal intercourse, but it may in certain circumstances enable ■ petition for Divorce to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a defence

to ■ charge of desertion against the aggrieved party.

In one High Court case the judge held that ■ husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in the circumstances of the particular cases, ■ divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights*.—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce*.—The third class of suit includes a suit for judicial separation (which does not dissolve ■ marriage) and ■ suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (a) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1965, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such ■ character as to have caused injury or ■ reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct which the sufferer should not be expected to endure, continued until health breaks down or is likely to break down constitutes legal cruelty, without proof of any intention to injure, so that the respondent's insanity is not necessarily a defence to ■ charge of cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties agree to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in divorce proceedings as judgment against the respondent by default.) Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) condonation of the respondent's adultery or cruelty, i.e., complete forgiveness which restores the *status quo* (although condoned cruelty may be revived by later misconduct). Adultery or cruelty is not to be treated as condoned by reason only of ■ resumption of co-habitation for one period not exceeding three months if it took place with a view to ■ reconciliation (Matrimonial Causes Act, 1965, s. 42(2)). There are also certain discretionary bars, ■ e.g. where there is collusion i.e. a bargain concerning the commencement or conduct of the suit; or where the petitioner has been guilty of adultery; or un-

reasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1965 Act, s. 5.)

Intervention by Queen's Proctor.—At any time during the progress of ■ suit, and before the decree *nisi* is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*. The marriage subsists until the decree is made absolute, usually three months after decree *nisi*. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, p. 1175. By section 33 ■ decree *nisi* cannot be made absolute until the court is satisfied that arrangements have been made for the care and upbringing of every child of the family who has not attained the age of sixteen which are satisfactory or the best which can be devised in the circumstances or that it is impracticable for the parties before the court to make any such arrangements.

Maintenance, etc..—The court has wide powers to make orders as to maintenance or alimony (usually payable to ■ innocent wife), and ■ to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1965, the court may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the court may also deal with custody of and access to the children.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, whether the suit succeeds or is dismissed, the court can make orders as to the custody of and access to the children and ■ to their upkeep and education, and these orders can be made not only in respect of children of the marriage but also in respect of a child of one party who has been accepted as one of the family by the other party. A guilty spouse will normally be entitled to reasonable access to the children and may even be awarded the custody if the court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child will not thereby be deprived of his other rights as the child's *guardian* unless the court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by ■ immediate separation. It is most desirable to consult ■ solicitor in every such case.

MAGISTRATES' SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or has been convicted of certain assaults or has deserted his wife, or has been guilty of persistent cruelty to her or to an infant child of the family, or of wilful neglect to maintain her or such ■ child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from ■ venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on similar grounds, so far as they are applicable to him. In particular a wife can sometimes be guilty of the offence of wilful neglect to provide reasonable maintenance for her husband or children and an order can be made against her (there is no such

remedy in the High Court or county court). The court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum in its discretion to the wife and may order her to make a similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or both of the spouses of a weekly sum to the person entrusted with legal custody in respect of each child of the family up to the age of 16. If the court thinks the child would still be a dependant although over that age, similar payments may be ordered for support of the child up to the age of 21. The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct conducted to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wilful neglect or misconduct conducted to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

SCOTLAND DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are grounds for divorce:

1. **Adultery.**—A mere confession by the defendant is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded, but the adultery shall not be held to have been condoned if co-habitation was continued or resumed with a view to effecting a reconciliation, for any one period not exceeding three months; Divorce (Scotland) Act, 1964.

2. **Desertion.**—The defendant must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years, but in calculating the period no account is taken of any one period not exceeding three months during which the parties resumed co-habitation with a view to reconciliation. It must be shown that the desertion was without reasonable cause, and it is a defence to an action on this ground

that during that period the pursuer has refused a genuine and reasonable offer by the defendant to adhere; Divorce (Scotland) Act, 1964. Refusal by one spouse to have marital relations with the other for any period of three years without any overt act of desertion does not constitute desertion. Here also, collusion is fatal to the success of the action.

3. **Incurable Insanity.**—The defendant must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. **Cruelty.**—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses. The fraudulent activity of one spouse involving the other may amount to cruelty. There must be no condonation but, as in the case of an action on the ground of adultery, the Divorce (Scotland) Act, 1964 provides a reconciliation period not exceeding three months.

5. **Unnatural Sexual Offences.**—An extract of the criminal conviction is sufficient proof.

Maintenance etc. Under the Succession (Scotland) Act, 1964, legal rights are not extinguished on divorce as was formerly the case. The Act gives the Court power to order the guilty spouse to pay either a capital sum or a periodic allowance or both.

A husband, being liable for his wife's debts, may be ordered to pay her costs, even though he has successfully defended the action. A guilty co-respondent, if named as a defendant, may be required to pay costs and damages.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (a) adultery, (b) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for alimony.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

HIRE-PURCHASE ENGLAND AND WALES

Protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act, 1965, which applies to hire-purchase agreements under which the hire-purchase price, i.e., the total sum payable by the hirer to complete the purchase of the goods, does not exceed £2,000. The Act also provides that where the hirer is a body corporate, the Act is not to apply at all.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and the agreement must be in writing signed by the hirer himself and by or on behalf of the owner and any guarantor. The agreement must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instal-

ment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*). If the agreement is complete as soon as the hirer signs it he must be given a copy there and then; in all other cases he must be given one copy when he signs and another within seven days of the completion of the agreement. There are also Board of Trade regulations dealing with such matters as the size of the print. In breach of any of these conditions the owner can neither recover the goods from the hirer nor enforce the agreement or any security given, although the Court can dispense with any of the conditions save that as to the signed agreement. The same result ensues (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 2s. 6d. for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he remains liable for any instalments already due, he will be under no further obligation *under the agreement*. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due he must pay the difference to the owner unless the court considers that a lesser sum is sufficient to compensate the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

An important new provision in the Act gives the hirer the right to cancel the agreement and recover all sums paid if he signed it at a place other than trade premises. This right (which was designed to cover the activities of door-step salesmen) must be exercised within 4 days of receiving the second copy.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

SCOTLAND

Formerly the provisions governing hire-purchase in Scotland were very different from England, but a change was made by the Hire Purchase Act, 1964, which in effect extended to Scotland the English code. Now, the Hire Purchase (Scotland) Act, 1965, provides a Scots code corresponding to, but not identical with, the English enactments found in the Hire Purchase Act, 1965, referred to above.

ILLEGITIMACY AND LEGITIMATION

ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the child becomes chargeable to the local authority, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education — in their discretion. The evidence of the woman must be corroborated in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during

marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence. If however the husband and wife are separated under an Order of the Court, a child conceived by the wife during such separation is presumed not to be the husband's child.

LEGITIMATION.—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Under the Act of 1959, marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimate child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimised, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimised person, his spouse or issue may take property under an intestacy occurring after the date of legitimisation, or under any disposition (e.g., a will) coming into operation after such date, ■ if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstance of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimised by and on the date of the subsequent marriage of its parents and there is now no objection to there having been an impediment to the marriage of the parents at the time of the child's conception—see the Legitimation (Scotland) Act, 1968, which came into operation on June 8, 1968, on which date thousands of existing illegitimate children were regarded as legitimised. Whilst there is no rule of succession through illegitimate relationship, the Legitimacy Act, 1926, provides that (x) Illegitimate

children of a woman dying intestate, without lawful issue, succeed to the deceased's estate, and (2) that the mother of an illegitimate, who dies intestate, without lawful issue, will succeed to the deceased's estate. By the Registration of Births, Deaths and Marriages (Scotland) Act, 1965, a child so legitimated, who has already been registered as illegitimate, may be registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

TESTATE

ENGLAND AND WALES

As regards deaths on or after January 1, 1967, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952, and the Family Provision Act, 1966. The 1952 and 1966 Acts increased the benefits of a surviving spouse of an intestate, and the 1952 Act extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1966 Act, so that if the death occurred before 1967 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £8,750 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £30,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £8,750 or £30,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two

grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

For further details, see Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952, and the Family Provision Act, 1966.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

The Succession (Scotland) Act, 1964, which came into force in September 1964 provides that the whole estate of any person dying intestate after the commencement of the Act shall devolve without distinction between heritable and moveable property, besides altering the law of succession in other respects. By that Act the surviving spouse of an intestate may, as prior right (in addition to legal rights, see below), claim the matrimonial home (or in certain circumstances the value thereof), with its furniture and plenishings not exceeding £5,000 in value, plus the sum of £2,500 if the deceased left issue or, if no issue, the sum of £5,000. Legal rights, referred to above, are:—

Jus relicti: right of surviving husband to one-half or one-third of deceased's net moveable estate, after satisfaction of prior rights.

Jus relictae: the corresponding right of a surviving wife in her deceased husband's estate.

Legitimi: right of surviving children to one-half or one-third of the net moveable estate of deceased parents after satisfaction of prior rights—see p. 1179. There are no legal rights in heritage.

In general, the lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals, and so on in the ascending scale, but the Act of 1964 has made important modifications. The right of representation, i.e., the right of the issue of a person, who would have succeeded if he had survived the intestate, is open to any line of succession where previously it was limited to apply only when there were next of kin or the issue of predeceasing next of kin. The surviving mother of an intestate now has equal rights of succession with the surviving father, where formerly these were restricted. The intestate's maternal relations, who prior to the Act had no rights of succession, are now on an equal footing with his paternal relations. A surviving spouse, if there are no children, succeeds to the whole estate. Where the intestate is survived only by parents, and by brothers and sisters (collaterals) half of the estate is taken by the parents and the other half by the brothers and sisters, those of the whole blood being preferred to those of the half blood; where, however, succession opens to collaterals—(which expression can include the brothers and sisters of an ancestor of the intestate)—of the half blood, they shall rank equally amongst themselves, whether related to the intestate (or his ancestor) through their father or their mother.

JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who

are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although qualified to serve [see below] he is exempt from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS

England and Wales.—Every man and woman between the ages of 21 and 60 years [persons over 60 are exempt but not disqualified] residing in England or Wales being the owner, legally or under a trust, of freehold land worth £10 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 22 years) in the county in which they live; or being a householder rated in respect of premises of a net annual value of at least £20 (or in London or Middlesex £30); is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1954, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss of expenses. See *Jurors' Allowances Regulations, 1967*.

Disqualifications.—The disqualification of ex-prisoners is dealt with by section 74 of the Criminal Justice Act, 1967.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; keepers of public mental hospitals; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists, registered practising dentists, registered practising veterinary surgeons; midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strand; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament.

As to their own counties: members of the G.L.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s, town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions are exempt from serving on the County Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

Section 13 of the Criminal Justice Act, 1967, pro-

vides that the verdict of a jury in criminal proceedings need not be unanimous.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949 (amended by the Juries Act, 1954 with Regulations following thereon), applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, recently increased.

The number of a jury in a civil cause in the Court of Session is twelve. In a criminal trial the number is fifteen, and in inquiries by Sheriff and jury under the Fatal Accidents Inquiry (Scotland) Act, 1895, or the Fatal Accidents and Sudden Deaths Inquiry (Scotland) Act, 1906 the number is five. In Scotland there is no Coroner's Inquest.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT

ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the law on this subject is complicated by the mass of legislation thereon. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important provisions include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Acts, 1927 and 1954, which do not extend to Scotland. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to unfurnished dwelling houses—the complicated mass of legislation now embodied in the Rent Act, 1968, which does not extend to Scotland or Northern Ireland. If a house is within this Act, the tenant may have a personal right to reside in the house and can only be ousted on cer-

tain grounds. Further, each house within the Act has a rent limit, and the rent recoverable by the landlord is limited to this rent.

Houses let at a rent which includes board or substantial attendance or furniture are also governed by the Rent Act, 1968.

The Rent Act, 1957, made considerable inroads into the importance of rent control by removing many houses from control altogether and fixing new maximum rent limits for all houses which remain subject to control. The principal changes effected by this Act were:

1. Any house whose rateable value on November 7, 1956, exceeded £40 in London and elsewhere £30, was automatically decontrolled.

2. No tenancies beginning on or after July 6, 1957, were subject to control unless the person to whom the tenancy was granted was already a protected tenant of that house.

3. For all houses remaining subject to control the maximum rent was determined by reference to the gross value shown in the rating valuation list on November 7, 1956.

Important changes were made by the Rent Act, 1965, without immediately affecting the system of control and determination of rents of property let before July 6, 1957, within the £40/30 limits of rateable value on the 1956 rating lists. If a tenancy of a dwelling-house was not already subject to Rent Act control immediately before 8 December 1965, the 1965 Act brought that tenancy within the Rent Acts provided the rateable value in March, 1965, did not exceed £400 in London and £200 elsewhere in Great Britain. Such a tenancy is known as a regulated tenancy. Broadly, the maximum rent recoverable from the tenant under such a tenancy is the rent payable under the terms of the agreement between landlord and tenant, save that if within the previous three years the house has been the subject of another regulated tenancy, then the limit is the rent payable under that earlier tenancy. However, provision is made by the Act for the registration of rents, and if a rent is registered under the Act that is the maximum rent which can be recovered. The Act provides for the appointment of rent officers and rent assessment committees to determine a fair rent to be registered.

The Act also provides that if any person with intent to cause the residential occupier of any premises to give up the occupation thereof does any act calculated to interfere with the peace or comfort of the residential occupier or members of his household, he shall be guilty of an offence. A further provision prevents a landlord enforcing a right to possession against a tenant (who is not already protected by any security of tenure legislation) without a court order, and there are special rules in such cases relating to agricultural employees.

(4) Part I of the Landlord and Tenant Act, 1954, applies to most tenancies of houses for over twenty-one years at a ground rent. Where it applies, the contractual tenancy is continued until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on limited grounds.

Further, under the Leasehold Reform Act, tenants of houses under leases for over twenty-one years at a rent less than two-thirds of the rateable value of the house are in most cases given a right to purchase the freehold or to take an extended lease for a term of fifty years, provided the tenant at the time when he seeks to exercise the right has been occupying the house as his residence for the last five years or for periods amounting to five years in the last ten years.

(5) A notice to quit any dwellinghouse must be given at least four weeks before it is to take effect.

(6) Under the Housing Act, 1962 (which does not extend to Scotland), in a lease of a dwellinghouse granted after October 24, 1961, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed: (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949 (amended by the Agriculture Act, 1958), which is a consolidating Act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Acts, 1949 and 1964 give a measure of security to tenants of shops. These Acts enable the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the 1949 Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Acts apply to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated statutes known as The Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, largely govern the relations between landlord and tenant in regard to certain unfurnished houses—including parts thereof if let as separate dwellings—and it is important to note that notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. The Housing (Repairs and Rents) (Scotland) Act, 1954, provides for increase in rent of a controlled dwelling house on which repairs of a certain value have been carried out. The Rent of Furnished Houses Control (Scotland) Act, 1943 contains provisions applicable to houses or parts of houses let with furniture and with or without services, also to unfurnished premises let with services. These

Acts were subsequently altered or modified by the Rent Act, 1957. Under it (1) Dwelling houses, the rateable value of which was on November 7, 1956, over £40, were released from control. (2) All tenancies coming into operation on or after July 6, 1957, were free from control, except where a new tenancy was granted to a statutory tenant already in occupation. (3) Provision was made for the increase of rent by a maximum of one quarter of all controlled houses. (4) The repairs increase of two-fifths provided for in the 1954 Act was increased to one-half.

However, the main provisions of the Rent Act, 1965 (see above) apply to Scotland and substantially extend the application of the Rent Acts.

The Rent Act, 1957, further provides that a notice to quit a dwelling house (furnished or unfurnished) must be sent at least four weeks before the date on which it is to take effect.

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid and Advice Act, 1949, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself and the Regulations made thereunder but the administrative details are embodied in a scheme made by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, certain local courts, and civil proceedings in Magistrates Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other — excepted from the scheme, — are also relator actions, election petitions and proceedings by way of judgment summons.

Eligibility for legal aid in civil proceedings depends upon — applicant's "disposable income" and "disposable capital." Legal aid cannot be granted if the former exceeds £700 per annum, and a person may be refused assistance if he has — disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to one third the excess of his disposable income above £250, together with the whole excess of his disposable capital above £125. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; — deduction of up to £75 may be made in respect of dependants. Except in cases where the spouses are living apart, or have a contrary interest, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the Ministry of Social Security, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for

London. However, if the application is made in respect of proceedings in an *appellate* court and the applicant is resident in England or Wales, application should generally be made to any Area Committee—if resident elsewhere, to the Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. The costs of the assisted person's solicitor and counsel will be paid out of the legal aid fund. Under the Legal Aid Act, 1964, the court may order that the costs of a successful unassisted party shall be paid out of the legal aid fund.

LEGAL ADVICE

Legal advice from — solicitor on the Legal Aid Panel is now available to anyone over the age of sixteen. Persons on Supplementary Benefits can get it free of charge, whilst those whose means are within the limits set out below can get it for 2s. 6d. An application form should be obtained from a Citizens' Advice Bureau, Court Office or from one of the Law Society's Legal Aid Offices, or from a solicitor whose name is on the panel, and, after completing the form, it should be taken to a solicitor on the panel and an interview requested. A person is entitled to advice on any one legal question only from one solicitor; and for not more than one hour and thirty minutes, but application for further advice may be made to the Area Committee. Lists of solicitors concerned may be consulted at the places mentioned above.

Legal advice is available for 2s. 6d. to — person whose capital is £125 or less and whose income has not been more than £7 10s. during the seven days up to and including the day of application for legal advice. Capital and income of husband and wife must be added together for this purpose, unless they are living apart or the applicant seeks advice on a matter in which the spouse has a contrary interest. In working out capital, the value of the applicant's house, its contents and the value of clothing and tools can be ignored. In working out income, deduction of £2 5s. may be made for a spouse living with or maintained by the applicant, of £1 7s. for each child maintained by the applicant, and of £2 5s. for any other adult person maintained by the applicant. There may also be deducted any income tax and any National Insurance, Industrial Injuries or National Health contributions paid by the applicant during the week immediately before the date of obtaining legal advice.

Quite apart from the above statutory scheme for legal advice, there exists — voluntary scheme under which any person may apply to a solicitor who is on the panel for advice for — fee of £1 for up to thirty minutes. If the matter cannot be disposed of in thirty minutes, the solicitor should give an estimate of the approximate cost of any further advice or steps which may be necessary.

It should be mentioned that under both schemes a solicitor, even though he is on the panel, is entitled to decline to give advice to the applicant without giving any reason to the applicant.

OTHER LEGAL AID.

Neither of the advice schemes covers further action such as writing letters. If however a person wants something more than advice but something less than proceedings, he may obtain a certificate to take steps to assert or dispute — claim where the question of proceedings has not yet arisen, but if it did arise legal aid could be granted for those proceedings. This type of legal aid could cover writing letters, obtaining evidence, and negotiating settlements. The certificate limits the amount to be spent under it, and does not cover any step in proceedings, nor can counsel be instructed. It is available to — person whose disposable capital does

not exceed £125 and who was either receiving supplementary benefits under the Ministry of Social Security Act, 1966 or has a disposable income not exceeding £325 per annum. In assessing disposable capital deductions are made in respect of dependants, and further deductions for them are made in assessing disposable income. Where the applicant's disposable income exceeds £253 he must pay a contribution of up to £1 for each £3 above £250.

LEGAL AID IN CRIMINAL CASES

The Criminal Justice Act, 1967, Part IV provides for legal aid in criminal proceedings. A criminal court (e.g., magistrates' court, Assizes, Quarter Sessions) has power to order legal aid to be granted where it appears desirable to do so in the interests of justice. The court shall make an order in certain cases, e.g., where a person is committed for trial on charge of murder. However, the court may not make an order unless it appears to the court that the person's means are such that he requires assistance in meeting the costs of the particular proceedings in question. Application should be made to the appropriate court where proceedings are to take place.

An applicant may be required to make a contribution towards the costs of the action. In order to ascertain the amount of this contribution he will have to produce written evidence of his means. Any assessment of means will be carried out by the Supplementary Benefits Commission, which will report to the court. No contribution will be required from a person who has insufficient means.

Any practising barrister or solicitor may act for a legally aided person in criminal proceedings unless excluded by reason of misconduct. In general where legal aid is given it will normally include representation by both counsel and solicitor. However, in connection with magistrates' courts, representation will be by solicitor alone unless it is a serious offence.

Where any doubt arises about the grant of a legal aid order that doubt is to be resolved in favour of the applicant. The court also has power to amend or revoke a legal aid order. Legal aid may also be granted in connection with appellate proceedings, e.g., on appeal to the Criminal Division of the Court of Appeal under the Criminal Appeal Act, 1968.

SCOTLAND

Civil Proceedings

The Legal Aid and Solicitors (Scotland) Acts, 1949 and 1960 provide a scheme which is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Representation of the People Act, 1949), and small debt proceedings (*i.e.*, under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action.

Investigation into the applicant's financial means is carried out by the Supplementary Benefits Commission after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action. The Legal Aid Act, 1964, which applies to Scotland with certain modifications, provides for the payment (to a limited extent) out of the legal aid fund of costs incurred by successful opponents of legally aided litigants.

LEGAL ADVICE

Since March, 1959, legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England. Application forms are available in the offices of all Legal Aid Committees and Citizens' Advice Bureaux.

Criminal Proceedings

Legal Aid (Scotland) (Criminal Proceedings) Regulations, 1964, which came into operation in October 1964, provide for the administration of criminal legal aid.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, *which is the usual place of worship* of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is *in addition to* any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being, then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (*see below*), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

- (i) **A Common Licence**, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (*1 The Sanctuary, Westminster, S.W.1*) and (for marriages in London) at the Bishop of London's Diocesan Registry (*1 The Sanctuary, S.W.1*), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for *all* England and Wales. No instructions, either verbal or in writing, can be received, except from one of the

parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (*see below*) is £2 15s.] No previous notice is required and the licence is available as soon as it is issued. Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties ■ one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

- (ii) A Special Licence granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although ■ stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without ■ licence):—

- A marriage in a registered building (e.g., a nonconformist church registered for the solemnization of marriages therein).
- A marriage in a register office.
- A marriage according to the usages of the Society of Friends (commonly called Quakers).
- A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- A marriage according to the rites of the Church of England (see above—in this case the marriage ■ only be *without* licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (*without* licence)—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be

given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.

- (ii) Marriage by certificate (*with* licence)—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof ■ solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (*see below*) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

- (i) *Without* licence.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.

- (ii) *With* licence.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than ■ Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place ■ any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) In ■ Registered Building.—The marriage must generally take place at ■ building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act,

1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

(ii) *In a Register Office.*—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Registry Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

(iii) *Other Cases.*—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract a marriage with:-

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and 2nd Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, i.e., if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the proclamation of banns or publication by the Registrar, or by a Sheriff's licence. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must either have his or her usual residence in the Registration District, or have resided there for at least 15 days before the ceremony or have a parent so residing there. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns, or (b) notice by the Registrar. Banns must be proclaimed in a parish church situated within the registration district of the qualifying address of each party. It is ordered that the proclamation of banns should be made twice, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 7s. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, amended by the Marriage (Scotland) Act, 1956, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons with qualifying residence in Scotland or having parents so residing. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate. Such certificate of publication is only valid for three months. Regulations made under the Births, Deaths and Marriages (Scotland) Act, 1965 provide that the cost of publication is 5s. and the certificate 2s. The Naval Marriages Act, 1908, regulates the publication of banns or of notice on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. The fee for the ceremony is £1. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal method of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence (valid for ten days) which is otherwise deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, viz. marriage by co-habitation and habit and repute. If parties live together constantly a husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

**MASTER AND SERVANT
WAGES AND HOLIDAYS**

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to manual workers, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, e.g., by cheque, money order, postal order or into a banking account. The Truck Acts did not relate to the amount of wage to be paid to the employee, but to-day minimum wage rates for particular trades are prescribed by numerous statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and if the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In Scotland, as in England, inability to produce receipts does not necessarily bar defence to action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1962, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952. But under the provisions of the Land Commission Act, 1967 (which applies to Scotland), a betterment levy is payable where the development value of land is realized after April 5, 1967.

What is Development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not deemed Development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1963 specified a number of types of development for which no permission is required e.g., enlargement of dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal of permission lies to the Minister, and from the Minister, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against enforcement notice lies to the Minister. See also the Act of 1968.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of compensation. See also the Town and Country Planning (Scotland) Act, 1959. The Highlands and Islands Development (Scotland) Act, 1965 is concerned with the promotion of the economic and social development of parts of Scotland.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, amended in some respects, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a prerequisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registers Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October and that

year and February 15 of the following year. Detailed provisions are laid down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g., those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, i.e., occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939. This Act empowers the Court to order maintenance out of the testator's estate for the benefit of certain "dependants," i.e., a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the defendant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of "son" or "daughter" under the Act. For further details as to the limits of an order, the Act, as amended by the Family Provision Act, 1966, should be consulted.

Since the object of the Act is to provide maintenance for dependants, an application is not likely to be successful where the estate is very small, e.g., two or three hundred pounds.

There are similar provisions under the Matrimonial Causes Act, 1965, whereby the court may order provision out of a deceased's estate for the support of a former husband or wife where the marriage has been dissolved or annulled.

REASONS FOR MAKING A WILL.—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" — it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of codicils should be left to the lawyer. A will should be written in ink and very legibly, on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1969] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence Thomas Smith and in the presence of each other have hereunto set our Testator; names as witnesses.

William Jones (signed) of Green Gables, South Street, Reading, tailor.

Henry Morgan (signed) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:

2. I give to — of — the sum of £— and to — of — the sum of £— and to — of — all my books (or as the case may require).

3. All the residue of my property real and personal I give to — of —.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving particular property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

RESIDUARY LEGATEES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be a witnessing witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made on his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or portion of the estate is left may be appointed sole executor, or one of two executors. The addresses

of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man.

REVOCATION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise destroying the will with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made in person at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

It is also possible to make application for a grant of probate or letters of administration through an officer of Customs and Excise authorised for the purpose, provided the net value of the estate is less than £1,000 and that the gross value for estate duty purposes is less than £3,000.

Further, certain property can be disposed of on death without a grant of probate or administration, or in pursuance of a nomination made by the deceased, provided the amount involved does not exceed £500. See the Administration of Estates (Small Payments) Act, 1965.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one

shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (*her jus relictae*), and the children are entitled to another one-third share equally between them (*their legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* *legitim* is increased to a one-half share in the estate. The remaining portion is known as the *dead's part*. A surviving husband and children have comparable rights (*jus relieti* and *legitim*) in the wife's estate. It should be noted that the amount of any claim of *jus relieti*, *jus relictae* or *legitim* out of an estate shall be calculated by reference to so much of the net moveable estate as remains after the satisfaction of any prior claims under the Succession (Scotland) Act, 1964,—see Intestacy, Scotland, *supra*. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Formerly a minor could dispose only of moveables but since the passing of the Succession (Scotland) Act, 1964 he has a like capacity to test on heritable property. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 pounds Scots (£8 6s. 8d. sterling)) and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e. written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will,

either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

Presumption of Survivorship.—The Succession (Scotland) Act, 1964, referred to above provides that where two persons die in circumstances indicating that they died simultaneously or if it is uncertain which was the survivor, the younger will be deemed to have survived the older; but if the persons so dying were husband and wife, neither shall be presumed to have survived the other.

THE OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963.

This Act, which extends to Scotland with minor modifications, applies to office premises, shop premises and railway premises being, in each case, premises where persons are employed to work. Shop premises include a building which is not a shop but of which the main use is the carrying on there of a retail trade or business; a building occupied by a wholesaler where goods are kept for sale wholesale (except a warehouse belonging to the owner of a dock, wharf or quay); and a building to which the public can resort for the purpose of having goods repaired. However, the Act does not apply to premises if the only employees are the spouse, parent, grandparent, child, grandchild or brother or sister of the employer, and it does not apply to premises if the period of time worked there during each week does not normally exceed 21 hours.

The following is a very brief summary of the main provisions affecting premises to which the Act applies—

1. The premises and all furniture etc., must be kept clean, and no dirt or refuse must be allowed to accumulate.
2. No overcrowding so as to cause risk of injury to health is permitted.
3. Provisions must be made for maintaining a reasonable temperature in rooms, and a thermometer must be provided on each floor of a building.
4. Provision must be made for securing adequate ventilation.
5. Provision must be made for securing sufficient and suitable lighting.
6. Suitable and sufficient sanitary conveniences and washing facilities (including a supply of clean, running hot and cold or warm water and, in addition, soap and clean towels or other suitable means of cleaning or drying) must be provided at accessible places; and also an adequate supply of wholesome drinking water.
7. Accommodation must be provided for clothing which is not in use.
8. For each sedentary worker there must be provided a seat of a design, construction and dimensions suitable for that worker.
9. Where persons employed to work in shop premises eat meals there, suitable and sufficient facilities for eating them must be provided.
10. All floors, stairs and passages must be of sound construction and properly maintained.
11. Every dangerous part of any machinery must be securely fenced, unless it is in such a position or of such construction as to be as safe as if it were fenced. No person under 18 can clean machinery if he is thereby exposed to risk of injury from a moving part.
12. No person can be required to lift or carry a load so heavy as to be likely to injure him.
13. A first-aid box or cupboard must be provided.
14. Means of escape in case of fire must be provided, as must appropriate fire-fighting equipment.
15. Where an accident occurs which causes death to an employee or disables him from working for more than 3 days, the occupier of the premises must at once send notice of the accident to the appropriate authority.

BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the Journal of that Society entitled "Interruptions in the regular rise and fall of temperature in the course of the year." Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7-14, April 11-14, May 9-14, June 29-July 4, August 6-11, November 6-13, and the warm periods July 12-15, August 12-15, and December 3-14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold or warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularities." Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5-17 stormy; Jan. 18-24 anticyclonic; Jan. 24-Feb. 1 stormy; Feb. 8-16 anticyclonic; Feb. 21-25 cold; Feb. 26-Mar. 9 stormy; Mar. 12-19 anticyclonic; Mar. 24-31 stormy; April 10-15 stormy; April 23-26 unsettled; June 1-21 summer monsoon; July 10-24 warm; Aug. 20-30 stormy; September 1-17 anticyclonic; Sept. 17-24 stormy; Sept. 24-Oct. 4 anticyclonic; Oct. 5-12 stormy; Oct. 16-20 anticyclonic; Oct. 24-Nov. 13 stormy; Nov. 15-21 anticyclonic; Nov. 24-Dec. 14 stormy; Dec. 18-24 anticyclonic; Dec. 25-Jan. 1 stormy.

It is interesting to compare these generalized statements with the daily values given for Greenwich. The cold or warm spells rarely cover precisely the periods given for the Buchan Spells, but cold or warm spells can be found fairly closely to some of these dates.

TAXES, STAMP DUTIES AND LICENCES

SELECTIVE EMPLOYMENT TAX

This new tax was imposed by the Finance Act 1966, section 44, but the details regarding repayment to certain employers and ■ number of other matters are contained in the Selective Employment Payments Act 1966, the Finance Acts 1967 and 1968 and the Revenue Act 1968. The Finance Act 1966 imposes on the employer the liability to pay selective employment tax "in respect of each person in respect of whom the employer is liable to pay ■ employer's insurance contribution for that week"—the reference to the week is because the tax is imposed in respect of each contribution week beginning on or after September 5, 1966. The result of the above is that all employers must pay the tax in respect of all employees who work for the employers for more than eight hours in a week; the only exceptions relate to the Forces and certain seamen. The weekly amount of the tax is now as follows:—

Male over 18.....	37s. 6d.
Female over 18.....	18s. 9d.
Male under 18.....	18s. 9d.
Female under 18.....	12s. od.

The tax is collected together with the employer's insurance contributions (*i.e.*, contributions payable by him under the National Insurance Acts), but, in so far as collected in Great Britain, is paid by the Minister of Social Security into the Exchequer.

The tax is collected from all employers, but to manufacturing employers it was to be repaid together with a premium; to certain other employers the tax is repaid without ■ premium; the third group of employers pay the tax but obtain no repayment. However, since the Revenue Act 1968, the premium is only payable in respect of establishments within ■ development area.

SELECTIVE EMPLOYMENT PREMIUM

Section 1 provides for repayment by the Minister of Labour of selective employment tax and payment of ■ premium to certain employers; the weekly amount of the premium varies with the tax paid as follows:

Tax	Premium
37s. 6d.	37s. 6d.
18s. 9d.	18s. 9d.
12s. od.	12s. od.

The tax and premium are payable in respect of employment in an establishment in ■ development area engaged by way of business in certain activities, research or training, set out in more detail below, but in order to qualify for repayment of tax and payment of premium more than half of the employees must be employed wholly or mainly in connection with such activities, research or training, and must not be employed wholly or mainly in non-qualifying activities, *i.e.*, broadly, activities carried on for office purposes, or activities by way of carriage of goods by road in connection with a business by the owner of the business, or activities by way of the sale of goods.

The activities which qualify for repayment of tax and payment of premium are set out in detail in Orders III to XVI of the Standard Industrial Classification—the main headings are as follows:—

Food, Drink and Tobacco—including grain milling, making bread, etc., curing bacon, making butter, manufacturing sugar, jam, etc., preserving fruit, manufacturing animal food, brewing ale and distilling gin and whisky, and manufacturing tobacco.

Chemicals and Allied Industries, including manufacturing coke, refining petroleum, tar distilla-

tion, compounding patent medicines, and production of crude oil from seeds and fish.

Metal Manufacture, including smelting, refining and alloying. Engineering and Electrical goods.

Shipbuilding and Marine Engineering, including repair of ships.

Vehicles—including repair of locomotives.

Metal goods not elsewhere specified, including assaying, smelting and refining of gold, silver and platinum.

Textiles, including preparation of fabrics.

Leather, leather goods and fur, including curing skins and dressing furs.

Clothing and footwear.

Bricks, pottery, glass, cement, etc.

Timber, furniture, etc., including saw milling.

Paper, printing and publishing, including printing of wallpaper, printing and publishing newspapers and magazines.

Other manufacturing industries—not otherwise specified.

Also included are activities by way of the manufacture from exposed film of cinematograph films for public exhibition and any scientific research or training relating to any of the activities specified above.

SELECTIVE EMPLOYMENT REFUND

Section 2 deals with repayment by the appropriate Minister—normally the Minister of Labour—of selective employment tax, but without payment of any premium. The repayment is payable in respect of employment in an establishment engaged by way of business in certain activities set out below, but in order to qualify more than half of the employees must be employed wholly or mainly in connection with those activities and must not be employed wholly or mainly in non-qualifying activities. Non-qualifying activities are defined above, but in this context do not include the carriage of goods by road in connection with ■ business by the owner of the business (except in relation to road haulage contractors).

The main activities which qualify for repayment of the tax are as follows: Sea fishing and whaling; Fishing in inland waters and the operation of fish farms; Mining and quarrying; Production and distribution of electricity and water; Railways; Road passenger transport, including taxis and car hire; Road haulage contracting; Sea transport; Port and inland water transport; Air transport; Postal services and tele-communications; Extraction of coal from open-cast workings; Agriculture, horticulture and forestry; and relevant scientific research or training.

PAYMENTS TO CERTAIN PUBLIC BODIES

Section 3 enables "the designated Minister" (*i.e.*, designated by the Treasury) to repay the tax to certain public bodies with, in certain cases, ■ premium as well, except in respect of employees employed in National Coal Board depots which are outside the curtilage of ■ colliery and wholly or mainly engaged in wholesale or retail dealing in coal, or employed in premises occupied by British Transport Hotels Ltd., or employed by Thos. Cook and Son Ltd. and any wholly-owned subsidiary, or employed by the Post Office Savings Bank.

The public bodies within section 3 are ■ follows:

1. The National Coal Board.
2. The Electricity Council.
3. The Central Electricity Generating Board.
4. An Area Electricity Board.
5. The North of Scotland Hydro-Electric Board.

6. The South of Scotland Electricity Board.
7. The Gas Council.
8. An Area Gas Board.
9. The British Railways Board.
10. The London Transport Board.
11. The British Transport Docks Board.
12. The British Waterways Board.
13. The Transport Holding Company.
14. Any company which is a wholly-owned subsidiary of any of the bodies specified in paragraphs 9 to 13 or which would be such a subsidiary if any two or more of those bodies constituted a single body corporate.
15. Cable and Wireless Ltd.
16. The Commonwealth Development Corporation.
17. The British Overseas Airways Corporation.
18. B.O.A.C. Associated Companies Ltd.
19. B.E.A. 20. BEA Helicopters Ltd.
21. The British Airports Authority.
22. The United Kingdom Atomic Energy Authority so far as its activities are financed out of the United Kingdom Atomic Energy Authority Trading Fund.

The parts of the undertakings set out above which qualify for the payment of the premium are as follows, but only if situate in a development area—

The Brickworks Executive of the National Coal Board; The Coal Products Division of the National Coal Board; The Tredomen and Cowdenbeath workshops of the National Coal Board; The London Transport Railway Overhaul Workshops at Acton; Workshops of the British Waterways Board which are wholly or mainly engaged in manufacturing or repairing waterway equipment; Workshops and railway signal works of the British Railways Board which are wholly or mainly engaged in manufacturing or repairing railway equipment; Star Bodies (B.R.S.) Ltd.; The Engineering and Maintenance Division of the British Overseas Airways Corporation; The Engineering Department of British European Airways Corporation; BEA Helicopters Limited. Activities financed out of the United Kingdom Atomic Energy Authority Trading Fund.

PAYMENTS TO LOCAL AUTHORITIES, ETC.

Section 4 enables "the appropriate Minister" (i.e., in relation to an employer in Scotland or in Wales or Monmouthshire, the Secretary of State; in any other case, the Minister of Housing and Local Government) to make payments to certain employers by reference to the amounts paid by way of selective employment tax. The employers within the section include local authorities, development corporations, statutory water undertakers and internal drainage boards.

REFUNDS TO CHARITIES

Section 5 provides for the refund by the Minister of Labour of selective employment tax paid by charities, subject to certain conditions, including production to the Minister of records of the payment of the tax. For this purpose, in England and Wales, "charity" means a body registered under the Charities Act, 1960 or certified as a charity not requiring registration or as an ecclesiastical corporation, and includes Greenwich Hospital. In the application of this section to Scotland, "charity" has the same meaning as in the Income Tax Acts, and the Minister is not bound to make any payment unless the Secretary of State certifies that the employer is a charity within that meaning.

REFUNDS FOR CERTAIN HOUSEHOLDS

Section 6 deals with repayment by the Minister of Social Security to certain employers (not being

charities as above defined) of selective employment tax paid in respect of an employee in a qualified household for more than eight hours a week in giving domestic or nursing assistance, subject to the Supplementary Benefits Commission being satisfied that the requirements of section 6 are fulfilled. A qualified household is a private household which includes a person (not being the employee) over the age of seventy, or which includes a person in need of such assistance by reason of infirmity, sickness or other incapacity (including pregnancy) or which includes a child under sixteen (not being a child of the family of the employee). However, no repayment can be made in respect of the child under sixteen if the household includes both parents of the child, although the household must contain one (but not more) member who is either a parent or a spouse of a parent of the child and who is normally engaged for more than eight hours in the week in work other than domestic work of the household. If the household includes no such parent or spouse but includes a person (fulfilling the eight-hour qualification) who appears to the Supplementary Benefits Commission to be discharging the function of a parent with respect to the child, and does not include a spouse of such person, then repayment will be made.

Other Refunds—Finance Acts 1967 and 1968

1. Where an employer has paid the tax in respect of an employee for any contribution week beginning on or after 4th September 1967 in which the employee worked in that employment for less than 21 hours, the Minister shall refund to that employer a sum equal to half the tax paid, except where (a) the employee was for the purposes of the tax a boy or girl under the age of 18, or (b) the contract normally involved that employee's working for 21 or more hours weekly. If the contribution week begins on or after 2nd September 1968, the refund is two-thirds of the tax paid.

2. Where an employer has paid the tax in respect of an employee who, during a continuous period of more than 13 contribution weeks, has been employed by him wholly outside the U.K., the Minister shall refund to that employer the tax paid in respect of that employee for those weeks, provided that the 14th of such weeks began on or after 4th September 1967.

3. There are further detailed restrictions on the payment of the above refunds, and the Finance Act 1968 deals with payments in respect of a person over 65.

REGISTERS AND ENFORCEMENT

In the case of employments within section 1 or 2, the Minister required to make repayments must compile registers of establishments falling within the repayment and premium provisions; registration is made on application by the employer in a prescribed form. The Minister is not bound to make any payment before registration of the establishment, nor in respect of any contributions week as respects which the employer does not produce records of payment of selective employment tax. An establishment is deemed to have been registered as from the date on which the application for registration was received by the Minister or such earlier date as it appears to the Minister to be equitable to allow.

Any person authorized by the Minister may enter on registered business premises, or any premises occupied by a charity who have claimed repayment of the tax, in order to examine and make copies of records of payment of the tax, and such person may require anyone on the premises to give him such information as he may reasonably request as to the activities carried on in the establishment.

INCOME TAX 1968-69

By the Finance Act, 1965, a new tax, the Corporation Tax was introduced and applies to the income and profits of bodies corporate. The Corporation Tax is outside the scope of this article which must therefore be read throughout as not applying to bodies corporate. Income Tax remains chargeable on the income of all individuals and persons other than bodies corporate, as in previous years.

Income Tax is a tax on annual income, represented by money, or money's worth. In general, the charge to tax is on the full amount of income arising for the year of assessment, the fiscal year which runs from April 6 in one year to April 5 in the next, subject to the deductions authorized by the Income Tax Acts. Under Schedule D, however, the assessment is made on the profits or gains of a continuing trade or profession for the year preceding the year of assessment, which is called the "basis year." The profits are arrived at on ordinary accountancy principles and then adjusted for tax purposes. The profits for the accounting year of the trade or profession which ends in the year preceding the year of assessment, are the profits of the "basis year."

Broadly, the charge to tax is on income arising in the United Kingdom, or on income received from home or abroad, by residents in the United Kingdom. An individual is resident and ordinarily resident in the United Kingdom if he is living here in the ordinary course of his life, or for an extended period; also, though normally he lives here, if he is abroad for occasional residence only; or if he visits the United Kingdom year by year, even though his main home is abroad.

The income of a married woman living with her husband is aggregated with his income. Separate assessment may be claimed, but the tax due remains the same.

Income Tax is imposed at the rates specified by the annual Finance Acts. There are graduated rates of tax, the principal rate being called the "Standard Rate," which for 1968-69 is 8s. 3d. in the £. There is an additional income tax on higher incomes called "Sur-tax." The enactments relating to income tax were consolidated in the Income Tax Act, 1952, as amended by subsequent Finance Acts and the Income Tax Management Act, 1964.

The Tables which follow show the income tax payable for 1968-69 and surtax (if any) for 1967-68, payable on Jan. 1, 1969, by an individual on the amount of income specified, after deduction of the personal allowance, children's allowance (where appropriate) and, in the case of earned income, the earned income relief. These tables are also valid for 1965-66 excluding the 10 per cent. surcharge for that year, and for 1966-67. The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown in the Tables.

Assessment.—The Income Tax Acts provide for tax to be assessed and collected under a number of Schedules which deal with separate sources of income:

Schedule A—abolished finally from 1964-65, as also the maintenance relief previously available. Rents now assessed under Schedule "D", Case VIII (see below).

Under Schedule B.—Assessment under this Schedule is now restricted to woodlands in the U.K. managed on a commercial basis and with a view to the realization of profits. The assessment on woodlands will be based on one-third of the annual value of the land arrived at on the normal rating basis on the assumption that the lands were let and occupied

in their natural and unimproved state. The taxpayer has the option to be assessed under Schedule D Case I on the results shown by accounts instead.

Under Schedule C.—Assessed on the paying agent. Not of concern to the individual tax payer.

Under Schedule D.—This schedule is divided into eight cases as follows:—Cases I and II—Profits of trades, businesses, commercial activities on land including farming, professions or vocations.

Case III.—Interest on Government stocks not taxed at source (e.g. War Loan, Defence Bonds, National Development Bonds), bank deposit interest, discounts, etc. Interest on Post Office Savings Bank and Trustee Savings Bank accounts up to £15 is exempt from income tax but assessable to Surtax grossed at standard rate. This exemption applies to both husband and wife separately. Interest on the new Post Office Investment Deposits and also Trustee Savings Bank Special Investment Accounts is, however, not exempt.

Cases IV and V.—Interest from foreign or Commonwealth securities, rents, dividends and all other unearned income: assessed on full amount arising, whether remitted or not, where persons domiciled and ordinarily resident in the U.K. But on amount

remitted, where person not domiciled in the U.K. or a British subject not ordinarily resident. In cases of Income earned abroad (e.g. from businesses, trades, and professions) and pensions, assessed only on amount remitted and only where person entitled is resident in U.K.

Case VI.—Sundry profits and casual receipts not assessed under any other case, e.g. insurance commission, post cessation receipts, certain premiums paid to persons other than landlords and numerous other receipts treated as income and specifically charged hereunder. As to furnished lettings, see under Case VIII below.

Case VII—Short-term gains.—Introduced by Finance Act, 1962, on gains made from disposals within six months of acquisitions in the case of stocks and shares and three years for land; extended by Finance Act, 1965, to gains made within twelve months on both these classes and in addition tangible assets realizing more than £1,000. The principal exceptions being private cars, private residences, wasting assets which are tangible movable property and small gifts. Such gains are treated as unearned income, assessable to income tax and surtax. Within the tax year profits and losses are aggregated: any balance of loss can only be carried forward against future years' profits. Liability is

confined to persons resident and ordinarily resident in the U.K.

Case VIII.—Under this case are assessed ground rents, certain other receipts from land (other than mineral rents and royalties) and rents (less expenditure on maintenance, insurance and repairs and, where appropriate depreciation allowances on plant and machinery included in the letting and industrial buildings or agricultural installation allowances) and, since April, 1963, premiums on leases for less than fifty years. Such premiums are assessed on amount received, less 2 per cent for every year after the first year. "Lease" includes any tenancy. Furnished lettings are normally assessed in Case VI without distinguishing the receipts as between the space let and the furniture hire: but rent for the space can be distinguished and assessed in Case VIII, the profit on hire being assessed in Case VI.

Losses.—Under Cases I, II, VI, VII and VIII losses can in general be carried forward and allowed against corresponding income or profits of subsequent fiscal years without time limit. Losses under Cases I and II can alternatively be set off against other income of the same fiscal year and the year next following.

Capital Gains.—A separate long-term gains tax has been introduced by the Finance Act, 1965, and this applies to gains realized on chargeable assets disposed of after April 6, 1965 provided the gain is not chargeable under Case VII. In the case of assets owned on April 6, 1965 and disposed subsequently, only the proportion of the gains attributable to the period after that date is chargeable. These gains are not charged to income tax and surtax as income, but in accordance with separate rules. The detailed rules of this new tax are outside the scope of this article.

For 1967/68 onwards exemption is given where the total gains in the year do not exceed £50.

The calculation of gains and losses on quoted securities held at April 6, 1965 which are disposed of after March 19, 1968 may be made solely by reference to the market value at April 6, 1965, if the taxpayer elects to deal with all his holdings in this way. Separate elections may, however, be made in relation to fixed interest stocks and preference shares and/or other quoted shares.

The rate of Capital Gains Tax payable by an individual is 30 per cent, but one half the net gains may be charged at the taxpayer's marginal rate of tax (including Surtax) where this produces a lower charge.

Under Schedule E.—Income from all offices, employments and pensions, including salaries, wages, emoluments, directors' fees, etc. Assessed on the actual earnings for the year of assessment. If, however, the individual is (a) not resident (or resident but not ordinarily resident) then the assessment is confined to the emoluments for services performed in the U.K. Or (b) although resident, the duties were performed wholly abroad when the assessment is confined to the amount remitted to the U.K. Necessary expenses are allowable, including fees and subscriptions to certain professional bodies and learned societies and within strict limits, depreciation allowances.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to directors and employees enjoying emoluments of £2,000 p.a. or more are assessable. From 1965-66 onwards expenses incurred in providing business entertainment (including hospitality of any kind and gifts) are not allowable except when provided for an overseas customer. Where any person has premises available for his use by reason of his employment and either pays no rent or pays less

than the annual value he will be charged to tax on the annual value less any rent paid. Certain payments made on retirement or removal from a person's office or employment (in excess of £5,000) are assessable to tax on him.

Exemptions.—Unemployment, sickness and maternity benefit and grant, and death grant payable under the National Insurance Acts are not assessable to income tax, but (retirement, widows, etc.) pensions and family allowances are included in the charge under this schedule. Under Finance Act, 1966, statutory redundancy payments are exempt from tax.

Where the emoluments are paid by an employer in the U.K., deduction of income tax is made by the employer, at the time of payment, in accordance with employee's code number. As to P.A.Y.E. (pay as you earn) see further below.

Under Schedule F.—From April 6, 1966, onwards income tax will be charged on all dividends and distributions of a U.K. resident company. Tax will be deducted at standard rate and has to be accounted for monthly by the Company to the Inland Revenue.

ALLOWANCES.—The following allowances and deductions are given, in calculating the income tax payable:—

Personal Allowance.—To single person.... £220
To married man living with or normally

maintaining his wife (but in year of marriage allowance is reduced by £10 for each fiscal month (i.e., ending May 5, June 5, etc.) which ended before the date of marriage)... £340

When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. A married woman permanently separated from her husband is treated as a single woman.

Children.—For each child under 16 (or over that age at the beginning of the fiscal year and receiving full time instruction at a recognized educational establishment, or who is articled or apprenticed) and who does not have income in that year exceeding £115 in his own or her right, the allowances are:—

- (a) Child over 16 at commencement of fiscal year..... £165
- (b) Child over 11 at commencement of fiscal year..... £140
- (c) Other children (each)..... £115

Scholarship or bursary does not count for this purpose. Marginal relief is given where a child's income exceeds £115. The child relief will then be reduced by £x for each £1 by which the child's income exceeds £115. "Child" includes step-child and adopted child. Child allowance is due to the person who has the custody of and

maintains the child. If more than one person could claim the allowance; e.g. if ■ husband and wife are divorced or separated, the allowance will be apportioned between them, as necessary. These allowances are reduced by £36 for each child for whom Family Allowance is due for the whole year 1968-69 and by an appropriately smaller amount where the allowance is received for only part of the year.

For and from the year 1969-70 the income of unmarried infants not regularly working (other than earned income and income arising from compensation for personal injury to the child) is to be aggregated with the parents' income and treated for tax purposes as the parents' income.

The "Family Allowance" for children is payable to the mother but ranks only for the Earned Income Allowance.

Dependent Relatives.—The maximum deduction for each dependent relative is normally £75. By the Finance Act, 1967, where the claimant is a woman (other than a married woman living with her husband) the maximum deduction is £110. These allowances are reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowances) exceeds £235. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband, or whose marriage has

been dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided *pro rata*.

Daughter.—A person who by reason of his or her old age or infirmity, has to retain the services of a daughter resident with him or her is entitled to an allowance of £40.

Housekeeper or person looking after children.—An allowance to:

- (a) Widows and Widowers: Housekeeper allowance of £75 in respect of a housekeeper as such or ■ female relative or female employee engaged to look after children. These females must be resident.
- (b) Unmarried man: Housekeeper allowance of £75 in respect of a female relative living with and maintained by him, to look after brothers or sisters for whom he is entitled to child allowance.
- (c) All other claimants: An allowance of £75 where entitled to child allowance whether or not employing or maintaining ■ resident housekeeper. If the claimant is a female she must additionally, throughout the year of assessment be either incapacitated or in full-time employment or occupation. Up to 1966-67 this allowance was only given where ■ resident housekeeper was maintained or employed, otherwise this allowance was £40.

Blind persons.—An allowance of £100 less 7/9ths of any tax free disability receipts may be claimed by a registered blind person, provided that the Daughter's allowance of £40 is not also claimed. Where both spouses are blind the maximum allowance is £200 less 7/9ths of any free disability receipts. Proportionate relief for persons registered as blind during part only of the year of assessment was contained in the Finance Act, 1965.

Earned Income.—Allowance of the following fractions of earned income (after deducting allowances for necessary expenses, superannuation, etc.):

Up to £4,005—Two-ninths.

The next £5,940—One-ninth.

Maximum amount on which relief can be obtained is thus £9,945.

Married woman earning income in her own right has deduction of earned income relief and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £220 plus Reduced Rate Reliefs as shown below.

Small Income Relief.—All incomes up to £450 treated as earned income; i.e. relief of two-ninths of income is allowed. Marginal relief is given where income slightly exceeds £450 up to a maximum of £705.

Age Relief.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £900. Where the total income exceeds £900, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

Age exemption.—Persons over 65 years of age are exempt from tax if their total incomes do not exceed:

Single person £415
Married couple (either being over 65) £665

Marginal relief is given where income slightly exceeds these amounts, up to a maximum of £230.

Pension Contributions.—Contributions by both employed and self-employed persons to officially approved superannuation funds, or premiums paid (within certain limits) to provide for retirement annuities are allowed as deductions.

Life Assurance Premiums.—Relief is given for premiums paid under assurance policies on life of taxpayer or his wife. A capital sum must be payable at death. Where the total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 the deduction is two-fifths of the premiums. Where annual premium exceeds 7 per cent. of capital assured, the allowable premium is restricted to 7 per cent. of capital sum. The amount on which relief is given must not exceed one-sixth of net total income. Relief is also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer.

Policies effected after March 19, 1968, do not qualify for the relief outlined above and the proceeds less premiums paid will be subject to Surtax assessment unless in general terms the following conditions are also satisfied: (a) The policy is for a term of at least 10 years; (b) The premiums are spread reasonably evenly; and (c) where the policy is an endowment policy the capital sum payable on death is not less than 75 per cent. of the total premiums payable.

Purchased Life Annuities.—The capital element of annuities for a term referable to a life, which are purchased for money or money's worth from a

person whose business is to grant annuities (with certain exceptions) is not taxable as income.

Reduced Rate Relief.—Rates of tax on taxable income are:

	in the £
On first £100	4s. ■
On next £200	6s. od.
On balance	8s. 3d.

Repayment Claims.—Where relief or allowance due has not been given in the assessment of the taxpayer, or where tax has been deducted from income received in excess of the amount of tax due in respect of total income, repayment may be claimed in general, within six years after the end of the year of assessment.

Error or Mistake.—Relief may be claimed if assessment is excessive because of some error or mistake in the return or statement made by the taxpayer. Application for relief must be made to the Inspector within six years after the end of the fiscal year in which the assessment was made.

Building Society Interest.—Majority of societies operate under special arrangement with Inland Revenue and interest is paid to depositors and shareholders "free of income tax." But such interest must be included in taxpayer's total income for assessment to surtax, grossed at the standard rate.

Victoria Cross and George Cross.—Annuities paid to holders of the Victoria Cross and George Cross as such are disregarded for income tax purposes.

Surtax is an additional duty of income tax, chargeable on total income (the amount of income chargeable to income tax by deduction or assessment) of individuals. Less the following deductions: (a) approved pension and superannuation contributions including retirement annuity premiums paid by self-employed persons; (b) losses on trading activities for which relief against income tax allowed for the same year; (c) earned income relief as allowed for income tax. Where the earned income less earned income relief exceeds £2,000, a further deduction is allowed of the excess over £2,000, with a limit for this purpose of £2,000; (d) interest paid on loans, mortgages, overdrafts, etc., but from March 19, 1968, in general, interest on sums borrowed to pay life assurance pensions is not deductible; (e) payments under certain Deeds of Covenant as to which see below; (f) all personal allowances granted for income tax excluding relief on life assurance premiums, to the extent that the total exceeds £220.

The net sum is chargeable on a sliding scale follows:

	Nil
On first £2,000	
On each £ of first £500	2s. in the £
next £500	2s. 6d. "
" £1,000	3s. 6d. "
" £1,000	4s. 6d. "
" £1,000	5s. 6d. "
" £2,000	6s. 6d. "
" £2,000	7s. 6d. "
" £2,000	8s. 6d. "
" £3,000	9s. 6d. "

On each £ above £15,000 10s. od. ■

Surtax is payable on January 1 following year of assessment, so that surtax for 1967-68 is payable on January 1, 1969. A surcharge of 10 per cent. of the surtax liability for 1965-66 was levied, payable on September 1, 1967.

Special Charge.—This levy applies to persons who were domiciled in the U.K. in 1967-68 or were resident for that year and ordinarily resident for the ten years to April 5, 1968. The levy is based on the aggregate investment income for 1967-68 assessed to Surtax less personal allowances as

allowed for Surtax. It does not apply to persons who died during the year 1967-68. The net investment income will be charged at the following rates:

Slice of investment income	Rate of charge
£3,000-4,000	2s. od in the £
£4,000-5,000	3s. od. " "
£5,000-8,000	6s. od. " "
Over £8,000	9s. od. " "

Investment income ~~means~~ in general all income other than earned income.

Where the Special Charge payable relates wholly or partly to Trust income, the individual may give notice to the Surtax Controller requiring that the appropriate proportion of the charge be assessed on the Trustees. Alternatively, where he pays the charge in full he may recover the part appropriate to the Trust income from the Trustees. Where income derives from a Foreign Trust the Surtax Controller should be asked to discharge the proportion of the charge appropriate to that income. The Special Charge is payable on Jan. 1, 1969, and interest at 4 per cent. (without deduction for tax) will be added (if it exceeds £5) on any amount unpaid at that date.

Seven-year Covenants.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration, the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after April 6, 1965, whether in favour of a charitable body or in favour of an individual, may no longer be deducted from the covenantor's total income for surtax purposes. There are three exceptions to this: payments under a partnership agreement to a former partner, his widow or dependants, similar payments in connection with the acquisition of business made under liability incurred for full consideration; and settlements made by one party to a marriage for the other or for the children of the marriage, in consequence of divorce, nullity or separation. A separation may be under a court order or by agreement or in such circumstances that the separation is likely to be permanent.

Settlements in favour of taxpayer's own infant children.—The Income of any such Settlement made since April 22, 1936, is treated as that of the Settlor for all income tax purposes if:—

- (a) the settlement can be revoked within a period of six years (unless the child becomes bankrupt).
- (b) the income is paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply after the child attains 21 or marries.

Double Taxation Relief.—Agreements for the avoidance of Double Taxation have been made between the United Kingdom and Antigua, Australia, Austria, Barbados, Belgium, Botswana, British Honduras, British Solomon Islands, Brunei, Burma, Canada, Cyprus, Denmark, Dominica, Falkland Islands, Faroe Islands, Fiji, Finland, France, Gambia, Germany (Federal Rep.), Ghana, Gilbert and Ellice Islands, Greece, Grenada, Guernsey, Guyana, Ireland (Rep.), Iran, Isle of Man, Israel, Italy, Jamaica, Japan, Jersey, Kenya, Lesotho, Malawi, Malaysia, Malta, Mauritius, Montserrat, Netherlands, Netherlands Antilles, New Zealand, Nigeria, Norway, Pakistan, Portugal, Rhodesia (suspended), St. Christopher and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Singapore, South Africa, South West Africa, Southern Yemen, Swaziland, Sweden, Switzerland, Tanzania, Trinidad and Tobago, Uganda, United States of America, Virgin Islands and Zambia.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are liable, in general, in respect of income from United Kingdom sources.

Certain Double Taxation agreements, however, exempt or partially exempt U.K. interest. Some agreements (e.g. that with Malta) exempt dividends from U.K. tax altogether while others (e.g. that with United States) provide for a modified rate of U.K. tax deduction (usually 15 per cent.) from U.K. dividend income.

All persons not ordinarily resident are exempt from U.K. tax on interest from beneficial holdings of:

3½% War Stock 1952 or after, 4% Victory Bonds, 4% Funding Loan 1960-90, 3% Savings Bonds (all issues), 5½% Funding Loan 1982-84, 5% Exchequer Stock 1976-78, 4% Exchequer Stock 1968, 5½% Funding Stock 1978-80, 5½% Treasury Stock 2008-12, 5½% Funding Loan 1987-91, 6% Exchequer 1970, 6½% Exchequer 1969, 6% Funding Loan 1993, 6½% Treasury 1976, 6½% Exchequer 1971, 6½% Treasury 1995-98, 6½% Exchequer 1972, 6½% Funding Loan 1985-87, 6½% Treasury Stock 1971, and 6½% Exchequer 1973.

Such persons become resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident here.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is:

- (a) a British subject;
- (b) a present or former servant of the Crown; or widow of a former Crown servant;
- (c) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection;
- (d) a resident of the Isle of Man or the Channel Islands; or
- (e) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family;
- (f) entitled to such allowances under the Double Tax Agreement with the country of his residence.

Post War Credits.—Those Credits arising out of the temporary reduction of certain income tax allowances during the years 1941-42 to 1945-46 inclusive are repayable to women over 55 and men over 60 years of age, and to widows entitled to Credits in their own right. Where a man or woman has died, repayment is made to personal representatives or beneficiaries, irrespective of age.

Holders of Credits are also entitled to repayment if certified as blind persons or in-patients of hospitals or nursing homes, or if in receipt of any of the following: National Assistance, Constant Attendance Allowance or Unemployability Supplement, Sickness or Injury Benefit, Disablement Pensions, Workmen's Compensation 1956 Supplement; or if registered as unemployed. There is a qualifying period of 26 weeks in certain categories (12 weeks for National Assistance). Interest from October 1, 1959 will be added to the sum repayable.

Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ADMINISTRATION

Income Tax under Schedules B, D and E, is assessed by H.M. Inspectors of Taxes. Schedule B assessments are made by the Inspector for the district in which the woodlands are situated. Assessments under Schedules D and E are made by the Inspector of Taxes for the district in which the Trade, Profession or Employment is carried on, or from which the Pension is paid, otherwise assessments are made in the district in which the taxpayer resides. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the notice was issued within the time limit for such appeals, as stated on the notice. The grounds of appeal should be given. If the assessment cannot be agreed with H.M. Inspector, the appeal will be heard by the General Commissioners. Alternatively, certain appeals are made to the Special Commissioners. An appeal may be made by way of Case Stated from the Appeal Commissioners' decision to the High Court on points of law.

Income Tax is payable to the Collector of Taxes.

Surtax is assessable by the Commissioners of Inland Revenue. Returns of total income are made to the Controller of Surtax except where a full return of income is made to H.M. Inspector of Taxes. Appeals are made to the Special Commissioners and thence to the Courts by way of Case Stated.

Surtax is payable to the Accountant and Comptroller General.

Penalties may be incurred for failure to make proper returns of income or false claims for allowances.

Every person chargeable to income tax must give notice of chargeability within one year (unless an income tax return has already been made).

Interest at 4 per cent. simple (previously 3 per cent) is charged where tax assessed under Schedule "D", Surtax or Capital Gains Tax is unpaid two months after it has become due, where the amount of tax charged exceeds £1,000 and where the interest payable exceeds £5.

Tax Reserve Certificates—Provision for future tax liabilities may be made by the purchase of

Tax Reserve Certificates. When surrendered in payment of income tax (other than Schedule "E"), Surtax or Capital Gains Tax interest is allowed for a maximum period of two years, provided the certificates tendered were purchased more than one month before the date the tax became payable. Such interest is not subject to tax.

P.A.Y.E.

Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Notice of Coding should be checked on receipt and H.M. Inspector of Taxes informed of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by successive employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year. Form P60 should be preserved in case it is needed in connection with any application for earnings-related supplements to sickness or unemployment benefits. Provided the correct allowances are given in determining the code number and the income from which the deduction is made is the correct amount assessable, the Inspector is not required to make a formal assessment under Schedule E, unless the taxpayer is also liable to Surtax. Where assessments are required (and the taxpayer may call for his assessment) any over deduction of tax is repaid or under-deduction recovered in a later year: under-deductions of less than £1 are ignored.

OTHER TAXES AND STAMP DUTIES

NOTE.—(1) The instruments for which the use of adhesive postage stamps is "permitted" include:—

Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life)—s. 99. Receipts—s. 101 (2).

(2) The Commissioners as a general rule allow deeds etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY:

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed abroad, the period begins to run from the date of arrival here.

AGREEMENT for Lease, see LEASES.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (see *post*, p. 1191) with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (see s. 59 (1), Stamp Act, 1891). If *ad val.* duty

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

	£ s. d.
Agreements under hand only. Attested copies or contracts: after 30 days from their first execution...	10 0 0

"	15	"	20	4s.
"	20	"	35	5s.
"	35	"	60	10s.
"	60	"	80	15s.
"	80	"	100	20s.
"	100	"	300	5s. per £25
	300 per every £50 or part			10s.

NOTE. The rate chargeable in respect of a transfer of Commonwealth government stock is a quarter those set out above. Where the consideration does not exceed £5 the duty is 3d.

"Marketable Security" includes the Registered Bonds and Debentures generally of Companies, Corporations, and Public Bodies.

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, see below, p. 1194) of any property (except stock or marketable securities for which, see above), where the consideration for the sale does not exceed £5,500

Exceeds £5,500 but does not exceed £7,000 for every £50 and any fraction of £50.....

Exceeds £7,000, for every £50 and any fraction of £50.....

If the consideration does not exceed £5,500 (or £7,000, in the case may be) the Conveyance or Transfer on Sale must contain a certificate of value certifying that the transaction does not form part of a larger transaction or series of transactions in respect of which the amount or value in the aggregate amount or value of the consideration exceeds £5,500 (or £7,000, as the case may be).

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of 10s. for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

However, if the consideration does not exceed £300, and the instrument does not contain a certificate of value, then if the consideration for the sale does not exceed £1 5s. the duty is 3d.

Where the consideration:

Exceeds £1	5s. but does not exceed	£2	10s.	6d.
"	10s.	"	3 15s.	9d.
"	3 15s.	"	5	1s.
"	5	"	10	2s.
"	10	"	15	3s.
"	15	"	20	4s.
"	20	"	35	5s.
"	35	"	60	10s.
"	60	"	80	15s.
"	80	"	100	20s.
"	100	"	300	5s. per £25

If in such a case the instrument is certified at £7000 it is stamped at $\frac{1}{2}$ the above rates.

CONVEYANCE ■ TRANSFER of any other kind.....fixed duty

Included under this head ■ Transfers for nominal consideration within

L s. d.
o 10 o

any of the following categories:-

(a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust; or on the retirement of a trustee.

(b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferee, (iii) from one nominee to another nominee of the same beneficial owner.

(c) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of the loan.

(d) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.

(e) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (Note.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy in discharged.)

(f) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(g) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(h) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(i) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10s. should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) or (c) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909-10) Act, 1910." A certificate in other cases should be signed by a solicitor or other person (e.g., a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10s. fixed duty is duly stamped.

COVENANT—For repayment of money,

The rates of duty set out above apply to Great Britain. There are different estate duty rates obtaining in Northern Ireland.

The amount of duty payable in certain circumstances on property passing on two deaths occurring within 5 years of one another is reduced. (Finance Act, 1958.)

A reduction of 45 per cent. of the above rates is applied to the "agricultural value" of agricultural property; and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "industrial inheritances" and "machinery or plant" (Finance Act, 1954, s. 28).

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless

Rate
per cent.
Nil

made more than twelve months before death; other gifts are liable for duty, unless made more than seven years before death (although if the donor dies at any time within the fifth year after making the gift, the value of the property the subject of the gift is for estate duty purposes reduced by 15 per cent.; if he dies within the sixth year it is reduced by 30 per cent.; and if he dies within the seventh year it is reduced by 60 per cent.) gifts made in consideration of marriage by ■ parent or grandparent to either spouse or by one spouse to the other excepted as to the first £5,000 (or £1,000 if made by any other person). Gifts forming part of deceased's reasonable normal expenditure and gifts not exceeding £100 in value or amount (or in certain circumstances £500) also accepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable ■■ the Estate Duty on personality from the day after the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest is charged on all unpaid instalments from twelve months after death.

Marginal relief may be claimed where the value of the estate is slightly above a figure at which the estate becomes liable to ■ higher rate of duty. In such a case the amount of duty will be the top value at the lower rate plus the excess value of estate over that top value. Thus, if an estate is valued at £8,050, duty at 4% would be £322; but the duty will actually be 3% on £8000 = £240 + £50 = £290.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

LOCAL TAXATION LICENCES

DOG, GAME AND GUN LICENCES

In England and Wales, Dog, Game and Gun Licences are administered by the respective County Councils and County Borough Councils and the proceeds retained by them; and in Scotland by the Commissioners of Customs and Excise. Licences are issued for the Councils by the Post Office.

DOGS, of any kind (annually, from first day of month of issue), Great Britain..... £ s. d.

Dogs under 6 months of age, and those kept solely for the purpose of tending sheep or cattle on a farm, or by shepherds, or by blind persons for their guidance, exempt from Duty.

Dogs under 6 months of age, and those kept solely for the purpose of tending sheep or cattle on a farm, or by shepherds, or by blind persons for their guidance, exempt from Duty.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, on duty or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits.

MECHANICALLY PROPELLED VEHICLES

Road licences and driving licences for mechanically-propelled vehicles are issued in England and Wales by county councils and by county borough councils (Scotland, 4 cities and Greenock, Motherwell, Paisley, Coatbridge and Kirkcaldy), on behalf of the Ministry of Transport. Renewal licences are issued in certain circumstances by the Post Office. Details of the excise duties chargeable on motor vehicles are set out in the Vehicles (Excise) Act, 1962, which provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty if it were in use.

Rates of duty for motor car and motor cycle licences taken out after March 19, 1968, are shown below. For Hackney Carriages the rates of duty are: Hackney carriage with seating capacity not exceeding 20 persons, £12 10s. od.; additional for each person above (excluding the driver) for which the vehicle has seating capacity, 10s. od.

Not exceeding 2 oz..... 4d.

For each further 2 oz. or less..... 2d.

LIMITS: Size and weight: Abroad: British Commonwealth 24×12×12 in., 5 lb. Elsewhere: as for Letters B ii, 1 lb. If in form of roll, everywhere as for Letters, A. To all overseas destinations the minimum limits of size are as for letters.

SMALL PACKETS (See also p. 1200).

British Commonwealth and Foreign—(certain countries only)

Not exceeding 8 oz. 1s. 6d. (minimum charge)

Not exceeding 10 oz. 1s. 8d.

For each further 2 oz. or less..... 4d.

LIMITS: Maximum size, as for letters A and B ii. Minimum limits of size as for letters; Weight, 2 lb.

INSURED BOXES (See also p. 1200).

British Commonwealth and Foreign—(certain countries only)

Not over 10 oz..... 2s. 11d. (minimum charge)

For each further 2 oz. or less..... 7d.

Plus appropriate fee for insurance.

LIMITS: Maximum size, 12×8×4 in. Minimum size limits ■ for letters other than in the form of a roll; weight, 2 lb.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or delivered. The name and address of sender should be inside and (not too prominent) on the outside of every parcel, and preferably be to the left of and at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas letters intended for insurance or any parcels for abroad; but if on foot or cycle not more, without notice, than 22 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is., or I. of Man are liable to customs duty; except in last case, the sender must declare contents when posting. Addressee must pay a clearance fee of 2s. 9d. if any duty be payable. Senders can undertake to pay customs charges of Irish Republic and some overseas countries (a deposit is required). The sender of a parcel from the Channel Islands may also pay the customs charges etc., at the time of posting.

Inland:—(Limit of size: length, 3 ft. 6 in.; length and girth combined, 6 ft.):—

AIR MAIL SERVICES

For mode of packing, prohibitions, limits of size, &c., see Post Office Guide.

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe. Air mail labels should not be fixed to these latter items or delay will result. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet PL89).

Air Letters, postage 9d., written on special Air Letter forms may be sent to all countries outside Europe. The special forms may be obtained at post offices.

Printed papers. Phonopost Packets, Samples, Small Packets (to countries which admit them) and Newspapers may be sent by air to countries outside Europe at the rates shown in col. 4 below. Minimum charge for Small Packets 1s. 6d. For Phonopost, see note below. **Newspapers:** Publications registered at the G.P.O. as newspapers may be sent at the reduced rates indicated in the footnote below. There is no air mail service to Europe for these

U.K. and Irish Republic:—

		office of posting.

items. If the quickest transmission is desired, the letter post rate should be paid.

European Countries

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offers earlier delivery. The rates are:—

Letters, 9d. for the first ounce,
5d. for each additional ounce.

Postcards, 5d.

For Gibraltar and Malta the rates are:—

Letters, 5d. for the first ounce,
2d. for each additional ounce.

Postcards, 5d.

Air mail labels should not be used.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1205-7.

Countries Outside Europe

Rates for letters, postcards and printed papers, etc. appear below; for air parcel rates, see pp. 1205-7.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above; Air Parcel Rates, pp. 1205-7. For details of insurance and times of posting at London Chief Office and of transmission to principal cities, consult G.P.O. Air Mail Leaflet at any Post Office.

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed

to the Controller, Export Licensing Branch, Board of Trade, Hillgate House, 35 Old Bailey, E.C.4.

Under the Exchange Control Act, 1947, senders of trade letter packets or parcels exceeding £2,000 in value to most foreign countries, includ-

ing the U.S.A., and also to Canada, must furnish with each consignment a currency declaration (form C.D.6) which, with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £100 in value must furnish with the packet or parcel a currency declaration C.D.6.

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes, Phonopost Packets and Small Packets (to those countries which accept them) or in Letters.

CERTIFICATE OF POSTING.—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1d.).

RECORDED DELIVERY (inland, not to Irish Republic). Charge: 9d.—This service provides for a record of posting and delivery. Advice of delivery, a further 9d. at time of posting, 1s. od. after time of posting. Money and jewellery are not allowed, and contents must not exceed £2 in value. The service does not apply to parcels.

UNPAID PACKETS, except Business Reply packets and redirected parcels are charged double postage on delivery; **UNDERPAID PACKETS,** double the deficiency.

UNDELIVERABLE POSTAL PACKETS.—*Inland packets chargeable with a postage of 4d. or more, undelivered, are returned to sender without charge, if his address is found either outside or inside. If the sender's address is not available, letters containing nothing of importance are destroyed; packets containing anything of importance, and parcels, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. Packets chargeable with postage not exceeding 4d.* (1) Those bearing on the outside the name and address of the sender are returned direct and unopened. (2) Those not bearing on the outside the name and address of the sender and not marked "Newspaper Post" or posted subject to the special conditions under which rebate of postage has been allowed, are opened by an officer deputed for the purpose. If they contain the sender's address, they are returned to him unless the contents consist only of newspapers, magazines or commercial advertising material. (3) Those not bearing on the outside the name and address of the sender and marked "Newspaper Post" or posted subject to the special conditions under which rebate of postage has been allowed, are destroyed unopened. (4) Those not bearing on the outside the name and address of the sender which when opened are found to contain only newspapers, magazines or commercial advertising material are destroyed. *British packets undelivered abroad* are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Parcels further incur other charges unless abandonment is requested at the time of posting.

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 1s. 3d.; (valid within the Commonwealth and Irish Republic only, 7d). Sold at Chief Offices.

POSTE RESTANTE (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called

for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 24 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels and business reply* may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be redirected free of charge, within the same time limits, only if the original and the corrected addresses are both within the same local parcel delivery area (or within the London Postal Area). *Registered packets*, which must be taken to a Post Office, are re-registered free only up to day after delivery. (2) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of letters, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months (except for parcels re-directed outside the local parcel delivery area see above); thereafter for each different surname and each new address costs 5s. for 12 months, and 10s. for each subsequent year. Separate forms must be filled in for the forwarding of telegrams.

REGISTRATION, INLAND.—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 3s., exclusive of postage. Advice of delivery, a further 9d. at time of posting, 1s. after time of posting. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any packet apparently meant for registration and wrongly posted (3s. less any prepaid excess postage); (b) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10s. or more in value (3s.).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to recorded delivery packets, unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels (including items sent to the Irish Republic):* The fees for registration are 3s.

covering compensation up to £100; 3s. 3d., £200; 3s. 6d., £300; 3s. 9d., £400 (maximum). (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) *Recorded delivery packets:* Maximum compensation £2 provided no contents inadmissible. *Unregistered parcels and unregistered packets* conveyed by Express Messenger all the way: Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money or any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by registered letter post in one of the special envelopes sold officially (see p. 1185) and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, is £5. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN (except for parcels and printed paper items posted in bulk), is in force to all countries with the exception of Chagos Islands, Maldive Islands, or North Vietnam. No compensation is payable for the loss of or damage to valuable articles or other items sent in an unregistered letter. Fee 3s. If claimed within a year, compensation (in the U.K., £3 8s.) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

INSURANCE, BRITISH COMMONWEALTH AND FOREIGN, may be effected on packets to many countries at the following rates:—3s. 2d. for £28; 2d. each further £14 up to 7s. 6d. for £392 and 7s. 8d. for £400 (lower maxima in many countries). For H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as *letters*; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 10s. may be given for loss or damage in the U.K. to uninsured parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (not letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, INLAND (not to or from Irish Republic, nor to H.M. Ships).—A sum (Trade Charge) up to £50 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office. Fees (extra to usual postal charges): For Trade Charge up to £10, 3s. 6d., £25, 4s. od., £50, 4s. 6d.

CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for

collection: 4½d. for Trade Charge (amount to be collected) not exceeding £1, with 2½d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8s. 6d.), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4d. in U.K.) not prepayable. If Trade Charge cannot be collected, special rules for undeliverable C.O.D. parcels apply.

EXPRESS and SPECIAL SERVICES (INLAND).

In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. (1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 3s. per mile, or part of a mile, with 4d. on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. Waiting fees: 10 minutes free, each further 10 minutes or less, 1s.:—(2) *After transmission by post*, on addressee's application (3s. per mile, or part of a mile, and 6d. for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (3s. + postage). This service is restricted to First Class letters and to parcels. Packets must be marked "Special Delivery," and letters bear a broad blue or black vertical line back and front. A similar line must be drawn completely round a packet or parcel. (4) *Special delivery on Sunday of postal packets (except parcels)* handed in on Saturdays. Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available only: (1) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (2) Good Friday: to London only from towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Trafalgar Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London 4 p.m.—6.30 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is 9s. od. in addition to postage. Not available for parcels. (5) (*Raillex*.) Postal packets not liable to registration are despatched by rail, met, and specially delivered in Great Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges irrespective of weight but not exceeding 1 lb. 2oz. od. but packets handed in in Northern Ireland or forwarded from Jersey and Guernsey to Great Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey. It should be marked "Railway Parcel, to be handed to Post Office messenger at Station."

RAILWAY LETTERS, &c.—A First Class letter, not liable to registration, may be handed in at the parcel or passenger booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between Great Britain and Jersey, Guernsey and Douglas

(I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): at stations in Great Britain, Jersey, Guernsey and Douglas (I.O.M.), 2 oz., 1s. 1d.; 4 oz., 1s. 10d.; 1 lb. (maximum), 2s. 10d.; at stations in Northern Ireland, 2 oz. (maximum), 8d. The maximum weight for letters to the Irish Republic is 2 oz. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, see preceding paragraph, Services (5) and (6).

AIRWAY LETTERS.—On certain internal air routes operated by the British European Airways Corporation and Cambrian Airways Ltd., First Class letters may be handed in at the airport or town terminal for conveyance by the next available direct air service to be transferred to the post at the distant airport or town terminal or to be called for at the airport or town terminal. Fees (besides postage): ■ oz. 3s. 7d.; 4 oz., 4s. 3d.; 1 lb. (maximum), 5s. 2d. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic or to any country overseas. Full information can be obtained from any office of B.E.A.C. or Cambrian Airways Ltd.

INTERNATIONAL EXPRESS SERVICE.—From the office of delivery by special messenger is available to or from certain countries. In some countries the service is restricted to certain towns. 2s. is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P.O. Guide.)

POST CARDS (Inland).—Minimum size $3\frac{1}{2} \times 5\frac{1}{2}$ in., maximum $4\frac{3}{4} \times 9\frac{1}{4}$ in. Cards outside these sizes will eventually be charged extra. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under $\frac{1}{16}$ th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

BUSINESS REPLY SERVICE (Inland, excluding Irish Republic). This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of 1d. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

POSTAGE FORWARD PARCEL SERVICE.—This service enables a person or firm to receive parcels from clients without prepayment of postage. A special label is used for this service and a licence to do this must be obtained from the local Head Postmaster.

ARTICLES FOR THE BLIND (Inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Postage free.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind", with name and address of sender. Packets must be capable of easy ex-

amination in the post. They may be sent post free by surface route to all parts.

SAMPLE POST (not to Irish Republic).—For abroad the sample post is restricted to (a) samples of merchandise of no commercial value which are sent free of charge to advertise it and which are not intended for sale; (b) tubes of serum or vaccine, or medicines which are urgently required and difficult to obtain and are sent in the public interest by officially recognized laboratories or institutions. Packets must be capable of easy examination in the post. (See p. 1195.)

SMALL PACKETS POST (Commonwealth & Foreign).

—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (See p. 1195.)

NEWSPAPER POST (INLAND).—For newspapers registered at the G.P.O." (p. 1195).

Copies of registered newspapers may be posted by the publishers or their agents in wrappers open at both ends, in unsealed envelopes approved by the Postmaster General for the purpose or without covers and tied with string which can be removed without cutting. Wrappers and envelopes must be prominently marked NEWSPAPER Post in the top left-hand corner and be easily removable for the purpose of examination. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undeliverable and reference to a page.

Newspapers posted by the public or supplements to registered newspapers despatched apart from their ordinary publications are transmitted under the conditions governing the First or Second Class Letter Services.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold for the respective values of 1d., 1d., 2d., 3d., 4d., 5d., 6d., 7d., 8d., 9d., 10d., 1s., 1s. 6d., 1s. 9d., 2s., 6d., 5s., 10s., and £1. Books containing 6 each at 4d., 2s.; 6 each at 1d., 1s. each at 4d., 4s. 6d.; 1s. each at 4d., 6s.; 4 each at 1d., 1s. each at 4d.; 1s. each at 5d., 10s.; Rolls of 1d., 1d., 2d., 3d., 4d., 5d., or 6d. stamps are also sold.

REGISTERED LETTER ENVELOPES with a 3s. 5d. embossed stamp (3s. for registration and 5d. for postage) are of three sizes: G, $6\frac{1}{2}$ " by $3\frac{1}{2}$ " 3s. 8d. each; H, 8" by $4\frac{1}{2}$ " 3s. 9d. each; K, $11\frac{1}{2}$ " by 6" 4s. od. each.

FORCES AIR LETTER FORMS issued against purchase of 4d. stamp.

LETTER CARDS with 4d. stamp: 5d. each; with 5d. stamp: 6d. each.

POST CARDS with impressed 4d. stamp: 5d. each.

EMBOSSED ENVELOPES with 4d. stamp: A ($5\frac{1}{2}$ " by $3\frac{1}{2}$ ") 5d. each; B ($9\frac{1}{2}$ " by $4\frac{1}{2}$ ") 6d. each. With 5d. stamp: A ($5\frac{1}{2}$ " by $3\frac{1}{2}$ ") 6d. each; B ($9\frac{1}{2}$ " by $4\frac{1}{2}$ ") 7d. each.

Air Letter Forms impressed with 9d. stamp, 9d. each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms or newspaper-wrappers may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 9d. inland (and to Irish Republic), 9d. overseas orders (to certain countries). Payment may be stopped (fee 9d.); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding £10, 2s. od.; and for each additional £10, 2d., to £50 (maximum), 2s. 8d. No order may contain

a fractional part of *xd.* The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of certain Revenues (e.g., Income Tax) if demand note is produced (see Post Office Guide).

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from most Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day, Boxing Day and Good Friday special arrangements apply (see Post Office Guide).

Poundage at the following rate, *plus* cost of official Telegram of Advice, 5s. for Inland Orders and 6s. for Irish Republic Orders. Poundage

Up to £10	2s. 6d.
Over £10 and up to £20	2s. 8d.
Over £20 and up to £30	2s. 10d.
Over £30 and up to £40	3s. od.
Over £40 and up to £50	3s. 2d.

Ordinary Money Orders for Abroad.

Poundage, up to £2, 2s.; £5, 3s.; £10, 4s., and thereafter 2s. per £10 or part thereof. Limits of amount vary according to destination but in any case may not exceed £40; validity, normally 12 months.

Telegraph Money Orders for Abroad.

Poundage as below, *plus* cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries).

Poundage	
Up to £2	3s. 6d.
Over £2 and up to £5	4s. 6d.
Over £5 and up to £10	5s. 6d.
Over £10 and up to £20	7s. 6d.
Over £20 and up to £30	9s. 6d.
Over £30 and up to £40	11s. 6d.

Application to remit money orders to countries outside the Scheduled Territories (formerly known as the sterling area) must be made on a special declaration form upon which the purpose of the remittance must be stated. This form is obtainable at any money order office, where it may be ascertained whether any particular country with which a money order service is in operation is outside the Scheduled Territories.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and/or paid in many countries within the Commonwealth and in a few other countries. Transmission of postal orders to any country outside the Scheduled Territories (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are *paid* (but not *issued*) in Irish Republic. They are printed with counterfoil, for 1s. and every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to £1 1s. then for £2 and every multiple of £1 up to £5. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage: 1s., 3d.; 1s. 6d. to £1 1s., 4d.; £2 to £5, 6d. The name of payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 5s. od. (to Irish Republic 12 words or less 6s. od.), each further word 5d. Standard Greetings telegrams on appropriately designed forms in golden decorative envelopes cost 5s. 6d. for 12 words or less, each extra word 5d. Greetings telegrams for special occasions on a large *de luxe* folded card with matching envelope cost 7s. od. for 12 words or less, each extra word 5d. Greetings telegrams may be tendered by telephone or handed in any day prior to day of delivery. Priority rate (not available to or from Irish Republic) 2s. extra. A redirection charge of 5s. od. per telegram is made if the original and new addresses are in the same delivery area or London Postal District. In all other cases the redirection charge is at the ordinary inland rate. Telegrams, except Press telegrams, handed in on Sundays and (exc. Scotland) Good Friday or Christmas Day are charged 2s. 6d. extra. Replies may be prepaid within the limits of 2s. 6d. (minimum) and £1 (maximum); the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph, telex or telephone account rendered by the Post Office, or its value refunded to sender, the addressee or person applying on behalf of the sender of the original telegram, on completion of the declaration on the back of the voucher. Receipt for charges free on request. Certified copy 2s. 6d.; application to the local Head Postmaster must be within 3 months of the date of sending. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that any necessary charge will be collected on delivery.

TELEGRAPH OFFICES ALWAYS OPEN IN LONDON:—Trafalgar Sq., 24–28 William IV Street, W.C.2.

OVERSEAS TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to places abroad are shown below and on pp. 1206–8. The minimum charge for an ordinary telegram is as for 7 words. To any place in the British Commonwealth the full rate does not exceed 1s. 10d. per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge 9s. 2d. for 11 words or less (including the indication=GLT=) and 11d. for each additional word except to Bermuda, Canada, Cyprus, Jamaica, Trinidad and Tobago and certain Commonwealth points in the Caribbean to which lower charges apply, and they are normally delivered the day following the day of handing in.

Most countries admit Letter Telegrams at half the full rate for messages in plain language of lengthy though less urgent character for which the minimum charge is as for 22 words including the appropriate indication=ELT= for European countries and =LT= for countries outside Europe. ELT messages are not delivered until at least 5 hours from the time of handing in and LT messages normally during the day following.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in facsimile to many places in the world. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Post Office or Overseas Telegraph Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The charge for radiotelegrams is 1s. 8d. per word (standard rate) for all vessels other than (x) British trawlers and (z) British vessels REGULARLY engaged in voyages not exceeding 1,000 miles to or from a port in the British Isles. Radiotelegrams at the Standard rate should be addressed Portishead Radio unless the sender nominates another coast station. Radiotelegrams for British trawlers should be charged at the reduced rate of 1s. per word and addressed Wick Radio unless the sender nominates another coast station. Radiotelegrams for British vessels REGULARLY engaged in voyages not exceeding 1,000 miles to or from a port in the British Isles should also be charged at the reduced rate of 1s. per word and addressed to the nearest coast station unless the sender nominates another coast station. The address should contain (x) the name or rank of the addressee, (z) the name of the ship and (a) the name of the coast station in the British Isles if the sender knows that the ship is within range of that station; or the name of a foreign coast station if the message is to be routed through such a station.

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of 1s. 1d. a word and in the Home Fleet at a charge of 8½d. a word. The address should contain (x) the name of the addressee and his rank or rating, (z) the word "Warship" (or "Submarine"), (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or in the case of the Home Fleet, the words "Home-water Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels in Home Waters at a reduced rate of 8½d. per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words "R.A.F. Vessel" before the name of the ship.

The minimum charge is as for seven words.

RADIOTELEPHONE SERVICE

Radiotelephone services are available between telephone subscribers (but not from coin-box telephones or call offices unless the caller is a holder of a telephone credit card) in Great Britain, Northern Ireland, the Channel Islands and the Isle of Man and suitably equipped ships. The service is generally available at all hours of the day and night, but the periods of communication with a particular ship vary with the ship's position and are dependent on radio conditions.

Calls are normally made through the coast stations, listed below, and callers should ask the local exchange telephone operator for SHIPS' TELEPHONE SERVICE adding, if known, the telephone number and name of the coast station through which the call should be made. If the name of the coast station is not known the caller will be connected to the nearest coast station. When connected to the coast station operator, the caller should ask for SHIPS' RADIOTELEPHONE CALL giving the name of the ship and the name (or designation) of the person required.

Anglesey Radio.....	Amlwch 541
Cullercoats Radio.....	Whitley Bay 23479
Humber Radio.....	Mablethorpe 3447
Iffracombe Radio.....	Iffracombe 3453
Land's End Radio.....	St. Just 493
Niton Radio.....	Niton 495
North Foreland Radio....	Thanet 20592
Oban Radio.....	Oban 2059
Portpatrick Radio.....	Portpatrick 311

Stonehaven Radio.....	Stonehaven 2917
Thames Radio (restricted short range VHF services)	Thanet 20592
Wick Radio.....	Wick 2271

There is also a restricted short range radiotelephone service available through Clyde Radio. To obtain calls through this service subscribers should ask the local exchange telephone operator for

CLYDE RADIO VHF RADIOTELEPHONE SERVICE GREENOCK 22255.

Charges vary according to the position of the ship. Ships in Zone A (All waters within the limits 13°W, 9°E, 45°N and 63°N) the charge is 12s. 6d. for a 3 minute call (minimum charge) and 4s. 2d. per additional minute. Ships in Zone B (All Northern waters beyond Zone A) and within the limits 35°W, 35°E and 35°N and the whole of the Mediterranean Sea) the charge is £1. 16s. for a 3 minute call (minimum charge) and 12s. per additional minute. Ships in Zone C (All waters beyond those defined in Zones A and B) the charge is £3 for a 3 minute call (minimum charge) and £1 per additional minute.

The service is available, in Zone A only, for calls to and from H.M. Ships on the Home Station (excluding H.M. Ships proceeding to and from overseas naval stations). The charges are the same as those for merchant ships but as H.M. Ships do not normally keep watch for private radiotelephone calls from the shore, no attempt should be made to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on the ship. The caller must be able to give the name of the coast station through which the call is to be made, or the approximate position of the ship at the time the call is required.

The holder of a telephone credit card issued in Great Britain, Northern Ireland, the Channel Islands or the Isle of Man may use it to make radiotelephone calls to ships at sea from any telephone in this country (including coin-box telephones and call offices) and have the charges debited to his own account.

INLAND TELEPHONES

The quarterly rental for single exclusive lines is £4. For shared service, in which two subscribers share one line but have practically the same facilities as those provided by individual lines, each subscriber pays £2 per annum less than for exclusive line service. A condition of telephone service is that all new and removing residential subscribers since January, 1948, are liable to share their lines if called upon to do so. Subscriber trunk dialling (STD) facilities are provided at an increasing number of exchanges. Local and dialled trunk calls from these exchanges are charged in 2d. units (6d. from pay-on-answer coin-box lines): the length of time per unit depends on the distance of the call, from four minutes for a local call to eight seconds for distances over 50 miles. Additional time is allowed during the cheap after 6 p.m. and weekend rates. From other exchanges local calls are charged 2½d. from residence telephones, 3d. from business telephones and 4d. from a call office or coin-box line where STD is not available. All trunk calls are obtained via the operator. Operator-controlled trunk calls from any exchange have a three minute minimum charge which varies with the distance but does not exceed 5s. (8s. to Irish Republic). Call office charge for operator controlled trunk calls is 1s. extra (6d. during the cheaper rates). Trunk calls via the operator are cheaper during the cheap rate period. Personal calls (to specified person) 2s. od. extra, if the person cannot be found nothing further is charged. For fuller information see Preface to Telephone Direc-

tory, Dialling Instruction Booklet (where appropriate) and Post Office Guide.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is £160 per annum. Charges for inland calls between exchanges 35 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are about two-thirds of equivalent charges for daytime telephone calls; to extra-European countries the charges are generally the same as for telephone calls, i.e. £1 per minute and in some cases £1.5s. per minute. The minimum call charge is three minutes except for subscriber-dialled calls to the U.S.A., New Zealand and Canada where the minimum call charge is one minute. Automatic equipment allowing messages to be sent at the maximum speed of 400 characters (about 70 words) per minute can be rented in addition. Descriptive booklet available from all Telephone Managers; for local address see Telephone Directory.

DATEL SERVICES

Data transmission facilities are provided to cater for transmission speeds ranging from 50 to about 2400 bits per second. They are:

Datel 100: This service uses private telegraph circuits and the public telex network with maximum transmission speeds of 100 and 50 bits per second respectively. The service has been extended internationally using the public telex network for transmission to several countries in Western Europe.

Datel 200: This service provides for the transmission of data in both directions simultaneously at speeds up to 200 bits per second on telephone circuits using Post Office modems.

Datel 300: This is a low cost data collection system operating at about 20 characters per second over the public network. Complete outstation equipment is provided by the Post Office together with the instation modem. Two systems will be provided. The card system, which will be available early 1969, transmits information from 80 column punched cards and a numeric keyboard. The tape system, available Summer 1969, will transmit information from paper tape or edge punched cards.

Datel 600: This provides for transmission of data on telephone circuits at speeds up to 600 bits per second, and on certain connections, 1200 bits per second, using Post Office modems. The service has been extended internationally for transmissions between the United Kingdom and the majority of W. Europe and N. America.

Datel 2400: This service, using Post Office modems No. 7, enables transmission at a rate of 2,400 bits per second over private circuits with improved characteristics. The modem has facilities to send at speeds of 600 or 1,200 bits per second over the public network in the event of private circuit failure.

Wideband circuits: Specially designed circuits for the transmission of high speed data can be made available if required. A Post Office modem to transmit data at 48,000 bits per second is being developed and should be available in 1969.

OVERSEAS TELEPHONES

Callers on STD exchanges in Birmingham, Edinburgh, Glasgow, Liverpool, London and Manchester can dial calls themselves to Belgium, France, Germany, Luxembourg, the Netherlands and Switzerland. For calls via the operator London subscribers on automatic exchanges should dial:—

to Austria, Belgium, Germany, Italy, Luxembourg, the Netherlands and Scandinavia 105
to the rest of Europe 104

to places outside Europe 108
to Ships (ask for Ships Telephone service) ... 100
All other callers should ask for the Continental or International service.

Continental Service.

The rates quoted are for calls from all places in Great Britain, Northern Ireland, the Isle of Man and the Channel Islands to any place in the country concerned, except the U.S.S.R., where there are two charging zones. For Personal Calls an additional charge equivalent to one minute's conversation is made. The minimum charge for a call made via the operator is that for a 3-minute call. Directly dialled calls are charged in 2d. units.

International Service.

Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to some countries are limited. A surcharge is made for personal calls to Canada and the mainland of the U.S.A. For all other countries a person to person call may be booked without extra charge; if it fails (or the call is cancelled) a Report Charge is made (4s. to 9s. od.) but not if the call matures. On Radio Services a time allowance is made for interruption by adverse conditions. At night (10 p.m. to 10 a.m.) and on Sundays a reduced rate is available on the services with Canada, U.S.A., Cuba and Mexico. Reduced Sunday rates apply also in the services with most countries in Central America and in certain other services.

Calls to Ships

For calls to ships at sea, ask the local operator for "Ships Telephone Service".

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

(For Express Services see p. 1199.)

On SUNDAY THROUGHOUT THE U.K. there is no delivery of letters, &c. There is a collection for night despatch in most places. IN LONDON, the Trafalgar Square Branch Office is open always. OUTSIDE LONDON, some Head Offices and a few country telegraph Sub-offices open 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps, telegrams, registration and with some exceptions telegraph money orders up to £5, Savings Bank withdrawals up to £10, and National Savings Stamps encashment up to £3; all other offices are closed.

Christmas Day, Boxing Day and Good Friday

London: There are no deliveries of letters and parcels on Christmas Day, Boxing Day or Good Friday. All offices except Trafalgar Square Branch office are closed.

Outside London: In Scotland, normal weekday deliveries except on Christmas Day when there is one delivery of letters and parcels; offices open as usual on Boxing Day and Good Friday; on Christmas Day some town sub-offices are shut, and after noon many chief offices are open only for telegraph business. In England, Wales and Northern Ireland there are no deliveries of letters and parcels on Christmas Day or Boxing Day; on Good Friday there is one delivery; offices are closed on Christmas Day; head offices and some country telegraph sub-offices are open from 9 a.m. to 10.30 a.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Other Public Holidays

In Scotland on New Year's Day office hours and classes of business are on Sundays; no delivery of letters and parcels and no collection. Post Office counter and postal services on other public holidays in the U.K. vary in accordance with local conditions—details may be obtained from the local Head Postmaster.

BROADCAST RECEIVING LICENCES

(Licence costs shown are those effective from Jan. 1, 1969)

Sound

Broadcast receiving licences (excluding television) may be obtained at most post offices, price £1 5s. od.

Television

Broadcast receiving licences (for radio and television) are obtainable at most post offices for £6 (excluding colour) and £11 (including colour). The colour television licence includes reception of television programmes in black and white.

If the applicant holds an unexpired (£1 5s. od.) sound licence, it should be surrendered when the sound and television licence is applied for and a refund of 2s. id. will be given for each unexpired month or part of a month. Similarly if an applicant holds an unexpired (£5) combined sound and television (excluding colour) licence, it should be surrendered when the sound and colour television (including colour) licence is applied for and a refund of 10s. will be given for each unexpired month or part of a month.

Blind Persons

Blind persons who produce the required certificates of registration may obtain free sound licences or concessionary sound and television (excluding colour) licences for £4 15s. od. and a sound and television (including colour) licence for £9 15s. od.

Demonstration Licences

Demonstration licences for radio and television dealers cover the use of radio and television sets (in monochrome and colour) at their business

premises only, including separate premises used solely for repairing and testing radio and television sets. They are issued for 5s.

Licensing Requirements

One licence (which needs to be a colour television licence if a colour television set is used anywhere in the household) covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loudspeakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a radio or television set fitted in a motor car.

Period of Validity

An initial licence (except a demonstration licence) is dated to expire twelve months from the last day of the month preceding that of issue. A renewal licence covers a period of twelve months from the date on which the previous licence expires. The demonstration licence is valid for a period of seven years dating from the first day of the month in which it is sold.

Savings Facilities

Special savings cards, for use with 2s. od. National Savings stamps, are available at all post offices. These cards are intended to help licensees save towards the cost of their renewal licence.

RIVER AUTHORITIES (ENGLAND AND WALES)

The Water Resources Act, 1963, established for England and Wales the 29 river authorities listed below. River Authorities have functions and duties in relation to land drainage, prevention of pollution and the regulation and improvement of fisheries, taken over from the former River Boards. They have the added responsibility, under the Act, of developing conservation schemes to provide the extra water required by water undertakings and industry. Much of the revenue required for water conservation will be obtained through River Authorities' Charging Schemes to be introduced on April 1, 1969. A river authority derives its income from precepts on the general rates of those counties and county boroughs within the river authority area. In the list below, the name of the Clerk to the Authority is added to its address.

River Authorities

AVON AND DORSET, 3 St. Stephen's Road, Bournemouth, Hants.—D. W. Treadgold.

BRISTOL AVON, Green Park Road, Bath, Som.—G. M. Yates.

CORNWALL, St. John's, Western Road, Launceston.—J. H. Morgan.

CUMBERLAND, 256 London Road, Carlisle.—R. Birkett.

DEE AND CLWYD, Vicar's Lane, Chester.—H. H. Crann.

DEVON, County Hall, Exeter.—H. G. Godsall.

EAST SUFFOLK AND NORFOLK, The Cedars, Albermarle Road, Norwich.—S. V. Ellis.

ESSEX, Rivers House, Springfield Road, Chelmsford.—G. L. Sturgess.

GLAMORGAN, Tremain's House, Croychurch Road, Bridgend.—W. E. Wright.

GREAT OUSE, Great Ouse House, Clarendon Road, Cambridge.—J. S. Bissett.

Gwynedd, Highfield, Caernarvon.—M. G. Crewe. **HAMPSHIRE**, The Castle, Winchester.—A. H. M. Smyth.

ISLE OF WIGHT, County Hall, Newport.—L. H. Baines.

KENT, Rivers House, London Road, Maidstone.—A. G. Stirk.

LANCASHIRE, 48 West Cliff, Preston.—H. Holmes. **LINCOLNSHIRE**, 50 Wide Bargate, Boston.—G. E. Phillipps, M.B.E.

MERSEY AND WEAVER, Liverpool Road, Great Sankey, Warrington.—R. E. Woodward, M.B.E. **NORTHUMBRIAN**, 110 Osborne Road, Newcastle upon Tyne, 2.—N. H. Thomas.

SEVERN, Portland House, Church Street, Malvern, Worcs.—J. G. M. Rimmer. **SOMERSET**, 12 King Square, Bridgwater.—T. J. M. Barrington.

SOUTH-WEST WALES, Penyfai House, Penyfai Lane, Llanelli.—E. A. Griffiths. **SUSSEX**, 137/139 Preston Road, Brighton 6.—B. R. Thorpe.

TRENT, 266 Derby Road, Nottingham.—I. R. Drummond.

USK, The Croft, Goldcroft Common, Caerleon, Newport, Mon.—W. J. R. Howells.

WELLAND AND NENE, North Street, Oundle, Nr. Peterborough.—D. S. Akroyd.

WYE, 4 St. John Street, Hereford.—J. A. Weston. **YORKSHIRE OUSE AND HULL**, 21 Park Sq. South, Leeds 1.—D. C. North.

Catchment Boards

THAMES CONSERVANCY, 15 Buckingham Street, W.C.2.—G. E. Walker, O.B.E.

LEE CONSERVANCY CATCHMENT BOARD, Brettenham House, Lancaster Place, W.C.2.—J. L. Spiller, D.F.C.

BRITISH MONETARY UNITS

COIN

GOLD COINS	
+Five Pound £5	CUPRO-NICKEL
+Two Pound £2	Crown 5s.
+Sovereign £1	Half-Crown 2s. 6d.
+Half-Sovereign 10s.	Florin 2s.
+ Discontinued.	Shilling 1s.
BRONZE COINS	
Penny 1d.	Sixpence 6d.
Halfpenny ½d.	* Threepence 3d.
NICKEL-BRASS	
	5 New Pence
	10 New Pence
SILVER	
Maudy Money‡	Threepence 3d.
Fourpence 4d.	Twopence 2d.
Threepence 3d.	Penny 1d.

* Not struck in cupro-nickel. ‡ Gifts of special money distributed by the Sovereign annually on Maundy Thursday to the number of aged poor persons corresponding to the Sovereign's own age.

Gold Coin.—Gold ceased to circulate during the First World War. Under Exchange Control laws it is now illegal for a resident in the U.K. to hold gold coin other than collectors' pieces. Even collectors, under the Exchange Control (Gold Coins Exemption) Order of April 27, 1966, must apply for official permission if their collection includes more than four gold coins minted after 1837. A new collector, however, must obtain permission to hold even one such coin.

The English sovereign, however, is still used as currency in certain Middle East countries and to meet foreign demand during the years 1957–1967 the Royal Mint struck some 42 million sovereigns.

Silver.—Prior to 1920 our silver coins were struck from standard silver—an alloy of which 925 parts in 1,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. From January 1, 1947 all 'silver' coins, except Maundy money, have been struck from cupro-nickel—an alloy of copper 75 parts and nickel 25 parts. Maundy coins since 1947 have been struck from standard silver.

Nickel-brass is an alloy of copper 79 parts, zinc 20 parts and nickel 1 part.

Bronze, introduced in 1860 to replace copper, is an alloy of copper 97 parts, zinc 2½ parts and tin ½ part. These proportions are subject to slight variation.

The 'Remedy' is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Mint.

The legal weight of a penny is one-third and of a halfpenny one-fifth of an ounce avoirdupois. The halfpenny is one inch in diameter.

Legal tender of coin.—Gold, dated 1838 onwards, if not below least current weight, is legal tender to any amount. Silver, dated 1816 onwards, and cupro-nickel are legal tender for sums up to £2, nickel-brass 3d. up to two shillings and bronze up to one shilling. Farthings ceased to be legal tender on December 31, 1966.

Royal Mint Output in 1967.—Production of coins at the Royal Mint during 1967 was 1,366,000,000 pieces, the second highest total ever, and only slightly less than the previous year's record total of 1,400,000,000. For the United Kingdom, over 441,000,000 coins were struck including almost 23,000,000 dated 1966. The figures were:—20,696,000 half-crowns, 22,194,000 florins, 6,000 shillings (all dated 1966), 78,372,000 sixpences, 49,440,000 threepences, 163,699,200 pennies (a new record figure), 100,356,000 halfpennies, 6,650,000 gold sovereigns and 4,026 silver Maundy coins. New cupro-nickel coins issued totalled £9,890,000, of which £6,840,000 represented an expansion of the amount of this coin in circulation. The re-

covery of silver coins continued and over £860,000 was withdrawn for refining. Overseas coinages were struck for a record number of 39 Commonwealth and foreign countries.

Over the five years 1963/67, average annual production at the mint totalled 1,167,885,108 pieces, a rise of more than 60 per cent over the annual average figure for the previous five year period. In the light of this large increase in output and the extra burden placed on the Mint by the advent of decimal currency, it was announced in April, 1967, that a new Royal Mint would be built at Llantrisant, near Cardiff. For almost a century the Mint has been restricted for space at the 4½ acre site at Tower Hill and the new building in Wales will, for the first time in many years, provide sufficient space and allow the introduction of modern plant and methods.

Coins in Circulation.—On January 1, 1968, a total of 8,335,390,000 coins of all denominations was estimated to be in circulation in the United Kingdom. Values of coins in circulation (£million) were: 5s., 26·56; 2s. 6d., 489·82; 2s., 658·43; 1s., 1,056·71; 6d., 1,888·10; 3d. (silver), 70·69; 3d. nickel brass, 868·47; 1d., 2,322·64; ½d., 953·97.

BANK NOTES

Bank of England notes are issued in denominations of 10s., £1, £5 and £10 for the amount of Fiduciary Note Issue and the value of the gold held in the Issue Department of the Bank. All notes are legal tender in England and Wales, and notes of denominations less than £5 are legal tender in Scotland and Northern Ireland. The Bank of England is the only bank legally obliged to change a note on demand for the equivalent in other notes and coin.

Notes for £20, £50, £100, £500 and £1,000 which were issued until April 22, 1943, ceased to be legal tender on May 1, 1945. However, on February 29, 1968, notes of these values were still outstanding to a total of some £1,026,000—including 63 notes of £1,000.

The £10 note—after an interval of 21 years—was restored on February 21, 1964. This completed the series bearing portraits of the Queen, plans for which were announced in November, 1959.

The last of the old white £5 notes, dated up to September 20, 1956, and the £5 notes issued between 1957 and 1963, bearing a portrait of Britannia, ceased to be legal tender on March 13, 1961 and June 27, 1967, respectively. The old series of £1 notes issued during the years 1928 to 1960 and the 10s. notes of the same type issued from 1928 to 1961—those without the portrait of the Queen—ceased to be legal tender on May 28 and October 29, 1962, respectively. Bank notes which are no longer legal tender are payable when presented at the head office of the Bank of England in London.

A new series of bank notes, generally smaller in size than the notes at present in issue, is to be introduced over the next few years. The first of the series will be a £20 note, which the Bank of England plan to introduce in 1970. There will be no 10s. note in the new series as the present 10s. note will be replaced by the 50 new penny coin in October 1969. Because the £1 note in the new series will be similar in size to the present 10s. note, it will not be introduced before 1972 so as to allow adequate time for the latter's withdrawal. The £5 and £10 denominations will follow at an even later date.

Note circulation is highest at the two peak spending periods of the year—around Christmas

and the beginning of August. On December 19, 1967, it reached a peak of £3,214 million, which was £163 million higher than the previous peak figure of £3,051 million attained on August 1, 1967.

£5 notes continue to enjoy popularity and now represent 52 per cent. of the total value of notes in circulation as against 14 per cent. in 1956. On the other hand, the proportion of £1 notes has dropped from 76 per cent. to 32 per cent. and that of 10s. notes from 5 per cent. to a little under 4 per cent. The percentage of £10 notes in circulation has increased steadily since 1965 and now represents 8 per cent. of the total. On February 29, 1968, the values of notes in circulation were £10: £242 million; £5: £1,577 million; £1: £972 million; and 10s.: £107 million.

Partly because of a rapidly-growing preference by the public for new notes rather than used ones, the demand for new bank notes has increased greatly in recent years. Between 1957 and 1966 the average life of a £1 note fell from nineteen months to eight, and that of a 10s. note from six months to five. Consequently it was necessary for the Bank of England to print approximately four times as many notes per head of the population as are issued in comparable countries abroad.

The high cost of note replacement is the primary reason for the decision to introduce a 50 new penny coin in place of the 10s. note. The campaign by the Bank of England and the commercial banks to encourage the public to accept more used but clean

notes, though not as successful in 1967 as in the previous year, was nevertheless valuable and the number of lower sum notes issued was again less than in recent years. The continued increase in the number of £5 and £10 notes issued is evidence of the success of the banks' efforts to stimulate the use of higher sum notes and the £20 note is being introduced to encourage this trend further.

Other bank notes.—Bank Notes are issued by five Scottish banks—Bank of Scotland, Royal Bank of Scotland, British Linen Bank, National Commercial Bank of Scotland, Ltd., Clydesdale Bank Ltd. All issue notes for £1, £5, £10, £20 and £100. There are no Scottish 10s. notes. Scottish notes are not legal tender but in Scotland they enjoy a status equal to that of the Bank of England note. *Channel Isles and the Isle of Man*.—The States of Jersey and of Guernsey and the Government of the Isle of Man issue notes for 10s., £1 and £5. These are legal tender only in their respective islands.

Although none of the series of notes specified above are legal tender in the United Kingdom they are generally accepted by the banks irrespective of their place of issue. At one time English banks made a small commission charge for handling Scottish and Irish notes but this was abolished some years ago.

Currency Notes.—Under the provision of the Currency and Bank Notes Act, 1928, Currency Notes (popularly known as Treasury Notes) of the value of 10s and £1 were replaced by the issue of Bank of England notes of the same denominations as from November 22, 1928.

HALL-MARKS ON GOLD AND SILVER WARES

Hall-marks are the symbols stamped on gold or silver articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold or silver articles are required by law to be hall-marked before they are offered for sale. Hall-marking was instituted in 1300 under a statute of Edward I.

Normally a complete modern hall-mark consists of four symbols—the maker's mark, assay office mark, standard mark and date letter. Additional marks have been authorized from time to time.

Maker's Mark.—Instituted in 1363, the maker's mark was originally a device such as a bird or *fleur-de-lys* and now consists invariably of the initials of the Christian and surnames of the maker or of the firm.

Assay Office Mark.—The existing assay offices and their distinguishing marks are:—

LONDON (Goldsmiths' Hall).

A leopard's head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697-1720 this mark was used in London for gold only and not for silver.

BIRMINGHAM..... An anchor.

SHEFFIELD..... A York rose

EDINBURGH..... A castle.

Offices formerly existed in other towns, e.g. Chester, Glasgow, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

Standard Mark.—Instituted in 1544. The current legal standards and their marks are as follows:—

SILVER.—Sterling silver (92·5 per cent. silver) is marked by English assay offices with a lion passant and by the Edinburgh Assay Office with a thistle. A full-length figure of Britannia was impressed on

fine silver plate (95·84 per cent. silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

GOLD.—22 carat articles (91·6 per cent. gold) are marked by English offices with a crown followed by the figure 22; by the Edinburgh office with the figure 22 following the standard mark for sterling silver (*see above*).

18 carat articles (75 per cent. gold) are marked by English assay offices with a crown followed by the figure 18.

All British assay offices mark 14 carat gold (58·5 per cent. gold) with the figures 14·585 and 9 carat gold (37·5 per cent. gold) with the figures 9·375.

Date Letter.—Instituted in 15th Century. The date letter denotes the year in which an article was assayed or hall-marked. Each alphabetical cycle has a distinctive style of lettering or shape of shield. The date letters are different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. The date letter is changed at the London Office in May each year and at Birmingham and Sheffield in July. Specimen shields and letters used by the London Office in each period from 1438 to date are shown below.

OTHER MARKS

Duty Mark.—In 1784 an additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty in 1890.

Silver Jubilee and Coronation Marks.—Voluntary marks were authorized to be used at manufacturers' request to commemorate the silver jubilee of King George V and Queen Mary and the

Coronation of Her Majesty Queen Elizabeth II. The Jubilee Mark was used on silver made in 1933, 1934 and 1935 and the Coronation Mark on gold and

silver with date letter 1952/3 or 1953/4.

Foreign Wares.—Since 1842 foreign wares imported into Great Britain have been required to be hall-marked before sale. The marks consist of the importer's mark, a special assay office mark (see below), the decimal figures denoting fineness (together with the carat figure in the case of gold) and the annual date letter. The current assay office marks for foreign wares are as follows:—

LONDON.—The sign of the Constellation Leo.

BIRMINGHAM.—Equilateral triangle.

SHEFFIELD.—The sign of the Constellation Libra.

EDINBURGH.—St. Andrew's Cross.

**London (Goldsmiths' Hall) Date Marks

WEIGHTS AND MEASURES

The Weights and Measures Act of 1963, enacts the legal measures for Great Britain, basing them upon "United Kingdom primary standards" in the custody of the Standards Department of the Board of Trade. The primary standards are the yard, pound, metre and kilogramme. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1963 defines the GALLON as the space occupied by 10 pounds weight of distilled water of density 0.998 859 gramme per millilitre weighed in air of density 0.001 217 gramme per millilitre against weights of density 8.136 grammes per millilitre. The METRE and the LITRE have the meanings assigned by order of the Board of Trade to reproduce in English the international definition of these measures in force at the time of making of the orders.

New definitions for an *international yard* and *pound* were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States: *international yard* = 0.914 4 metre. *international pound* = 0.453 592 37 kilogramme.

The following list shows the definitions of measures set out in the Weights and Measures Act, 1963 and some useful conversions. See also Conversion Tables, p. 1216.

Measurement of Length

Imperial Units

Mile = 1,760 yards.
Furlong = 220 yards
Chain = 22 yards.
YARD = 0.914 4 metre.
Foot' = $\frac{1}{3}$ yard.
Inch" = $\frac{1}{36}$ yard.

1 mil = $\frac{1}{1000}$ inch.
■ inches (in.) = 1 foot (ft.).
3 feet = 1 yard (yd.).
6 feet = 1 fathom.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
■ furlongs = 1 mile = 1,760 yards.

Metric Units

Kilometre = 1,000 metres.
METRE (see above) = 1.094 yards.
Decimetre = 1/10 metre.
Centimetre = 1/100 metre.
Millimetre = 1/1000 metre.

10 millimetres (mm.) = 1 centimetre (cm.) = 0.393 701 inch.
10 centimetres = 1 decimetre (dm.) = 3.937 011 inches.
10 decimetres = 1 METRE (m.) = 1.093 614 yards.
10 metres = 1 dekametre (dam.) = 10.936 143 yards.
10 dekametres = 1 hectometre (hm.) = 109.361 43 yards.
10 hectometres = 1 kilometre (km.) = 0.621 371 mile.

A kilometre is approximately *five-eighths* of a mile, so that 8 kilometres may be regarded as 5 miles.

Measurement of Area

Imperial Units

Square mile = 640 acres.
Acre = 4,840 square yards.
Rood = 1,210 square yards.
SQUARE YARD = a superficial area equal to that of a square each side of which measures one yard.
Square foot = 1/9 square yard.
Square inch = 1,144 square foot.

144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
4 roods = 1 acre.
10 square chains = 1 acre = 4,840 sq. yards.
640 acres = 1 square mile.

Metric Units

Hectare = 100 ares.
Decare = 10 ares.
Are = 100 square metres.
SQUARE METRE = a superficial area equal to that of a square each side of which measures one metre.
Square decimetre = 1/100 square metre.
Square centimetre = 1/100 square decimetre.
Square millimetre = 1/100 square centimetre.

■ sq. centimetre = 0.155 sq. inch.
■ sq. METRE = 10.763 9 sq. feet = 1.195 99 sq. yds.
1 are (a.) = 0.098 8 rood.
■ hectare (10,000 sq. metres) (ha.) = 2.471 05 acres.
■ sq. kilometre = 0.386 102 sq. mile.

Measurement of Volume

Imperial Units

CUBIC YARD = a volume equal to that of a cube each edge of which measures one yard.
Cubic foot = 1/27 cubic yard.
Cubic inch = 1/1728 cubic foot.

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Metric Units

CUBIC METRE = a volume equal to that of a cube each edge of which measures one metre.
Cubic decimetre = 1/1000 cubic metre.
Cubic centimetre = 1/1000 cubic decimetre.

1 cubic metre (cbm. or m³) = 35.314 7 cu. ft. = 1.307 95 cu. yds.
(x cu. metre) is used as a unit of measurement of timber.
■ cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; ■ cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

Measurement of Capacity

Imperial Units

GALLON (see above)
Quart = $\frac{1}{4}$ gallon.
Pint = $\frac{1}{2}$ quart.
Gill = $\frac{1}{4}$ pint.
Fluid ounce = $\frac{1}{20}$ pint.

4 gills = a pint.
■ pints = 1 quart.
4 quarts = 1 GALLON
■ gallon = 160 fluid ounces.
= 277.274 cubic inches.

Bushel = 8 gallons.
Peck = 2 gallons

2 gallons = 1 peck.
4 pecks = 1 bushel.
8 bushels = 1 quarter.
A chaldron is 36 bushels = $4\frac{1}{2}$ quarters.

■ hectolitre = 7.496 9 bushels.
■ hectolitre per hectare = 1.11 bushels per acre.
■ quintal = 3.674 3 bushels.
■ quintal per hectare = 1.49 bushels per acre.

Measurement of Capacity—continued

Fluid drachm = $\frac{1}{8}$ fluid ounce. | See Apothecaries Weight (below)
 Minim = $\frac{1}{160}$ fluid drachm.

Metric Units

Hectolitre = 100 litres.

LITRE = The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under a pressure of one standard atmosphere (14.696 lb. per sq. inch).

Decilitre = $\frac{1}{10}$ litre.

Centilitre = $\frac{1}{100}$ litre.

Millilitre = $\frac{1}{1000}$ litre.

centilitre (cl.) = 0.070 4 gill.

decilitre (dl.) = 0.175 98 pint.

LITRE* (1/1,000 cubic metre) (lit.) = 1.759 8 pints
 $= 0.88$ Imp. quart = 0.22 Imp. gallon = 61.025 5 cu. inch = 0.035 315 7 cu. ft.

hectolitre (hl.) = 21.997 5 Imp. gallons = 26.417 1 U.S. gallons = 2.749 Imp. bushels = 2.8377 U.S. bushels.

Measurement of Mass or Weight

Imperial Units

Ton = 2,240 pounds.

Hundredweight = 120 pounds.

Cental = 100 pounds.

Quarter = 28 pounds.

Stone = 14 pounds.

POUND = 0.453 592 37 kilogram.

Ounce = $\frac{1}{16}$ pound.

Dram = $\frac{1}{16}$ ounce.

Grain = $\frac{1}{7000}$ pound.

7000 grains (gr.) = 1 pound (lb.).

16 drams (dr.) = 1 ounce (oz.).

16 ounces = 1 POUND (lb.).

14 pounds = 1 stone.

28 pounds = 1 quarter (of a cwt.).

4 quarters (112 lb.) = 1 hundredweight (cwt.).

20 hundredweight ($2,240$ lb.) = 1 ton.

20 pennyweights (dw.) = 1 Troy ounce.

For gold and silver the ounce, divided decimaly, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. A Troy POUND (= 5,760 grains) is legalized in the United States.

Ounce apothecaries' = 480 grains.

Drachm = $\frac{1}{8}$ ounce apothecaries.

Scruple = $\frac{1}{16}$ drachm.

See Apothecaries Weight (below)

Metric Units

Metric ton = 1,000 kilograms.

Quintal = 100 kilograms.

1 centigram (cg.) = 0.154 32 grains.

1 decigram (dg.) = 1.543 2 grains.

1 gramme (grm.) = 15.432 4 grains.

1 dekagram (dag.) = 5.643 8 drams.

1 hectogram (hg.) = 3.527 4 oz.

1 KILOGRAM (kg.) = 32.150 7 oz. Troy = 35.273 4 oz. Avoirdupois = 2.204 62 lb. Avoirdupois.

1 myriagram = 22.046 2 lb. Avoirdupois.

1 quintal (q.) = 100 kg. = 220.5 lb. Avoirdupois = 1.968 4 cwt.

1 tonne (t.) = 0.984 207 U.K. or long ton = 1.102 31 U.S. or short ton.

Measurement of Electricity

Units of measurement of electricity, the AMPERE (unit of electrical current), the OHM (unit of electrical resistance), the VOLT (unit of difference of electrical potential) and the WATT (unit of electrical power) have the meanings assigned to them respectively by order of the Board of Trade, to reproduce in English the international definition in force at the date of the making of the order.

Kilowatt = 1000 watts.

Megawatt = 1,000,000 watts.

Apothecaries' Weight

Measures of Weight.

20 grains = 1 scruple (sr.).

3 scruples = 1 drachm (31.).

8 drachms = 1 ounce.

Measures of Capacity.

60 minimis (min.) = 1 fluid drachm.

8 fluid drachms = 1 fluid ounce.

5 fluid ounces = 1 gill.

4 gills = 1 pint.

8 pints = 1 GALLON.

90 degrees = 1 right angle or quadrant.

Diameter of circle $\times 3.141 6$ = circumference.

Diameter squared $\times .7854$ = area of circle.

Diameter squared $\times 3.141 6$ = surface of sphere.

Diameter cubed $\times .523 6$ = solidity of sphere.

One degree of circumference $\times 57.3$ = radius.*

Diameter of cylinder $\times 3.141 6$; product by length or height, gives the surface.

Diameter squared $\times .7854$; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

Cubic Inch..... = 252.458 grains.

Gallon (277.274 cu. in.) = 10 lb. (distilled).

Cubic foot, = 62.321 lb.

35.943 cubic ft. (224 gals.) = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Angular or Circular Measure

60 seconds ('') = 1 minute (').

60 minutes = 1 degree (°).

THERMOMETER COMPARISONS

Comparison between Scales of Fahrenheit,
Réaumur, and Centigrade.

$$\begin{aligned} \text{CONVERSION.} & \quad F = C + R + 32 \\ \text{Let } F = \text{ Fahr.} & \quad F = \frac{9}{5}C + 32 \\ C = \text{Cent.} & \quad C = \frac{5}{9}(F - 32) \\ R = \text{Réaumur.} & \quad R = \frac{4(F - 32)}{9} \end{aligned}$$

NOTE.—The normal temperature of the human body is 98.4° F. , or $37^{\circ}(36.9^{\circ})\text{ C.}$, or 29.5° R. Freezing point $= 32^{\circ}\text{ F.} = 0^{\circ}\text{ C.} = 0^{\circ}\text{ R.}$; Boiling point $= 212^{\circ}\text{ F.} = 100^{\circ}\text{ C.} = 80^{\circ}\text{ R.}$ Temperature "Absolute Zero," which is at 273° C. below 0° C. , 459.4° below 0° F. , and 258.4° below 0° R. and is denoted by the letter "K."

An Inch of Rain on the surface of an acre (43,560 sq. feet) $= 3,630$ cubic feet $= 100.992$ tons.

Cisterns: A cistern 4 feet by $\frac{1}{2}$ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lbs. in addition to its own weight.

Million, Billion, etc.

Value in the United Kingdom

Million.	thousand \times thousand (10^6)
Billion.	million \times million (10^{12})
Trillion.	million \times billion (10^{18})
Quadrillion.	million \times trillion (10^{24})

Value in U.S.A.

Million.	thousand \times thousand (10^6)
Billion.	thousand \times million (10^9)
Trillion.	million \times million (10^{12})
Quadrillion.	million \times billion U.S. (10^{15})

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

PAPER AND BOOK MEASURES

Writing Paper

Royal Folio.....	=	20	×	12½	"
Music.....	=	14	×	10½	"

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

INTERNATIONAL PAPER SIZES

Simplification of the large number of stock paper sizes in use in the United Kingdom has been proceeding since publication of British Standard 730 in 1937. Recommendations made by the International Organization for Standardization were accepted by the United Kingdom in 1959 and it is considered that general adoption of the international or A size will bring great economies to users of paper.

The basis of the international series of paper sizes is a rectangle having an area of one square metre, the sides of which are in the proportion of $1:\sqrt{2}$. In other words, taking one side ■ X and the other as Y, this basic size provides the equation— $X:Y = 1:\sqrt{2}$; and $X \times Y = 1$. It may be noted that the proportions $1:\sqrt{2}$ have ■ geometrical relationship, the side and diagonal of any square being in this proportion. As the basic size is one square metre in area, this means that $X=841$ millimetres and $Y=1,189$ millimetres. The effect of this arrangement is that if the short side is doubled or the longer side halved, i.e., if the area of the sheet is doubled or halved, the shorter side and the longer side of the new sheet are still in the same proportion $1:\sqrt{2}$. This feature is particularly useful where photographic enlargement or reduction is used, as the proportions remain the same.

Description of the A series is by the capital A followed by ■ figure. The basic size has the description Ao and the higher the figure following the letter, the greater is the number of sub-divisions and therefore the smaller the sheet. Half Ao is A1 and half A1 is A2. Where larger dimensions are required the A is preceded by ■ figure. This 2A means twice the size of Ao; 4A is four times the size of Ao.

It is an essential feature of these series that the dimensions are of the trimmed or finished sizes.

'A' SERIES OF TRIMMED SIZES

Designation	SIZE	
	mm	inches
A o	841 × 1189	33·11 × 46·81
A 1	594 × 841	23·39 × 33·11
A 2	420 × 594	16·54 × 23·39
A 3	297 × 420	11·69 × 16·54
A 4	210 × 297	8·27 × 11·69
A 5	148 × 210	5·83 × 8·27
A 6	105 × 148	4·13 × 5·83
A 7	74 × 105	2·91 × 4·13
A 8	52 × 74	2·05 × 2·91
A 9	37 × 52	1·46 × 2·05
A 10	26 × 37	1·02 × 1·46

Subsidiary Series.—A series of B sizes has been devised for use in exceptional circumstances when sizes intermediate between any two adjacent sizes of the A series are needed.

'B' SERIES OF TRIMMED SIZES

Designation	SIZE	
	mm	inches
B o	1000 × 1414	39·37 × 55·67
B 1	707 × 1000	27·83 × 39·37
B 2	500 × 707	19·68 × 27·83
B 3	353 × 500	13·90 × 19·68
B 4	250 × 353	9·84 × 13·90
B 5	176 × 250	6·93 × 9·84
B 6	125 × 176	4·92 × 6·93
B 7	88 × 125	3·46 × 4·92
B 8	62 × 88	2·44 × 3·46
B 9	44 × 62	1·73 × 2·44
B 10	31 × 44	1·22 × 1·73

In addition there is ■ series of C sizes which is used much less. A is for magazines and books, B for posters, wall charts and other large items, C for envelopes particularly where it is necessary for an envelope (in C series) to fit into another envelope. The size recommended for business correspondence is A4.

Long Sizes.—Long sizes are obtainable by dividing any appropriate sizes from the two series above into three, four or eight equal parts parallel with the shorter side in such a manner that the proportions mentioned in paragraph ■ (above) are not maintained, the ratio between the longer and the shorter sides being greater than $\sqrt{2}:1$. In practice long sizes should be produced from the A series only.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples:—1 centimetre = 0.394 inch and 1 inch = 2.540 centimetres. 1 metre = 1.094 yards and 1 yard = 0.914 metre. 1 kilometre = 0.621 mile and 1 mile = 1.609 kilometres.

Length		Area		Volume		Weight (Mass.)								
Centimetres.	Inches.	Square Centimetres.	Square Inches.	Cubic Centimetres.	Cubic Inches.	Long Tons.	Short Tons.	Metric Tonnes.	Short Tons.

SYMBOLS FOR CORRECTING PROOFS

Supplied by WILLIAM CLOWES & SONS LTD, Beccles, Suffolk, Printers of "WHITAKER"

Letter(s) or word(s) requiring alteration should be struck through IN INK in the text and the substitution should be written in the nearest margin followed by / (the symbol used to denote that the marginal mark is concluded). Insertions should be indicated by ↗ or ↘ at the conclusion of the marginal mark and at the desired place in the text.

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Delete (take out)	↙ or ↘	/ — Vertical stroke to delete one or two letters; horizontal line to delete more	Take letter(s) or word(s) from beginning of one line to end of preceding line	(back) or take back	—
Delete and close up	↙ or ↘	Strike out letter(s) not required and add "close up" mark above and below	Begin a new paragraph	n.p.	before first word of new paragraph
Close up: delete space between letters	○	○ linking letters or words	No new para. here or run on previous matter with later matter	run on	between paras. or other matter
Use ligature (fi, fl, ff, etc.) or diphthong (æ, œ)	○ enclosing ligature or diphthong required	○ enclosing letters to be altered	Spell out in full the abbreviation, contraction, or figure	spell out	Encircle words, etc., or figures concerned
Insert space between letters or words	# ↗ ↘	under letter(s) or word(s) crossed out but to be retained	Insert omitted portion of copy	out - see copy	Attach the relevant copy to the proof, indicating omitted portion
Leave as printed (i.e. a cancellation of previous marking)	stet	Inserted or substituted letter(s), figure(s), or sign(s) under which this is placed to be superscript (i.e. high alignment) ¹	7	↗ for insertions For substitutions encircle letter(s), figure(s), or sign(s) to be altered
Invert type (of letter(s) upside down)	○	Encircle letter(s) to be altered	Inserted or substituted letter(s), figure(s), or sign(s) over which this is placed to be subscript (low alignment) ²	7	↗ for insertions For substitutions encircle letter(s), figure(s), etc., to be altered
"Battered" letter(s) to be replaced by similar but undamaged characters	X	Encircle letter(s) or word(s) to be replaced and write the correct letter(s) in the margin	Change to lower case	l.c.	Encircle letter(s) to be altered
Push down space or "high" letter(s) or word(s)	— ↗ ↘	Encircle space, letter(s), or word(s) affected	Replace "wrong fount" by letter(s) of correct fount	w.f.	Encircle letter(s) or word(s) to be altered
Transpose	tr. or trs.	— ↗ ↘ between letters or words, numbered when necessary	Change to capital letters	caps.	= under letter(s) or word(s) to be altered
Take letter(s) or word(s) from end of one line to beginning of next line	take over or over	—	Change to small capitals	s.c.	= under letter(s) or word(s) to be altered

↖ indicates — superior (superscript) figure one

↗ indicates an inferior (subscript) figure two

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Use capital letters for initial letter(s) (as desired) and small capitals for rest of word(s)		under initial letter(s) and under the remainder of the word(s)	Move lines to the left		at right side of group of lines to be moved (indicating approx. position)
Change to bold type		Draw wavy line under letter(s) or word(s) to be altered	Move portion of matter so that it is positioned ■ indicated		at limits of required position
Change to roman type		Encircle letter(s) or word(s) to be altered	Raise lines		↑ over lines to be raised
Change to italic type		Draw this straight line under letter(s) or word(s) to be altered	Lower lines		↓ under lines to be lowered
Letter(s) or word(s) to be underlined		under letter(s), word(s), etc., to be underlined	Correct the vertical alignment		
Equalize space between words		between words	Straighten lines		through lines to be straightened
Reduce space		between words	Insert parentheses (round-shaped brackets)		
Space to be inserted between lines or paragraphs		Amount of space should be indicated	Insert [square] brackets		
To be placed in centre of line, etc.		Position to be indicated by	Insert hyphen		
Indent one en (approx. space occupied by n of type in use)		indicating approximate position	Insert en (=half-em) rule (see above)		
Indent one em (approx. space occupied by M of type in use)		Ditto	Insert one-em rule (see above)		
Indent two ems (approx. space occupied by MM of type in use)		Ditto	Insert two-em rule (see above)		
Move to the left		Ditto	Insert apostrophe		
Move to the right		Ditto	Insert single quotation marks		
Move lines to the right		at left side of group of lines to be moved (indicating approx. position)	Insert double quotation marks		
Punctuation			Insert ellipsis		
			Insert leader (visual guide to alignment in contents pages, etc.)		
			Insert shilling stroke (oblique)		

Punctuation . / : / © ® ? / ? / ! / ! /

COMPOUND INTEREST TABLE

TABLE I.—SHOWING THE SUM TO WHICH AN ANNUITY OF £1 ACCUMULATING AT COMPOUND INTEREST WILL AMOUNT IN FROM ONE TO FIFTY YEARS AT VARIOUS RATES.

TABLE II.—SHOWING THE AMOUNT WHICH £1 ACCUMULATING AT COMPOUND INTEREST WILL REACH IN FROM ONE TO FIFTY YEARS AT VARIOUS RATES.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year less £1, must be taken. Thus, for £1 at $\frac{1}{2}$ per cent. for 25 years, take 26 years, £36·012, and deduct £1·35·012.

COMPANIES

(Registered by the Board of Trade Registrar of Companies, Companies House, 55-71 City Road, E.C.1. The Registry of Business Names is also located at Companies House.)

In 1935 there were 14,826 public and 124,143 private companies on the Register with paid-up capital of £3,936,000,000 and £1,730,000,000 respectively.

During 1967, 31,292 new companies having a share capital were registered in Great Britain (England and Wales, 30,125; Scotland, 1,167), with nominal capital of £136,935,000. There were 16,583 public and 553,237 private companies, making a total of 569,820 companies on the Registers at the end of 1967. The number of public companies with a share capital was 10,570, the paid-up capital of these companies being £12,684,000,000.

							IN PERPETUITY				
							33 33				

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent?

ANSWER:—19·14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 55, in receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER:—Looking at the Table of Expectation of Life (See Index), it will be seen that the expectation for age 50 is about 23 years; and from

the above table an annuity certain for 23 years interest at 5 per cent., is worth 13·49 years purchase. The present payment required would therefore be £1,349 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this Example.

FUEL AND POWER MEASURES

British Thermal Unit (B. Th. U.)=The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39·1 degrees F.

Unit of electricity (kilowatt-hour)=Output of 1,000 watts for one hour. 1 k.w.h.=3,413 B.Th.U.

Therm=100,000 B.Th.U.=29·3 k.w.h.

Atmosphere=pressure of 14·223 lb. per sq. in.=1 kilogram per sq. cm.

Petroleum

Barrel=35 Imperial gallons=42 U.S. gallons.

Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi-Arabia, Iraq, etc.) varies from 7·0 barrels per metric tonne to 7·7 barrels, and in the smaller oil producing states (e.g., Albania) is as low as 6·7 barrels per tonne. Crude petroleum in the United Kingdom, 7·355 barrels per metric tonne (2,205 lbs.); 7·472 barrels per long ton (2,240 lbs.).

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

Details of the charitable bequests of 38 women and 21 men form the appended alphabetical list comprising the principal charitable bequests noted since our last issue. The gross figure of the estate is shown in each case, but deductions of debts, charges, etc., from this figure, and the subtraction of estate duty from the net estate have to be made, together with legacies made by the testators, before the residuary estate, i.e. the final distributable figure for the organizations shown, can be arrived at.

Despite the demands of the Treasury by way of death duties, the estates of six of the testators show final gifts of £500,000 for various purposes. Miss Clara C. Tailby, of Edgbaston, Birmingham, and Mrs. Ida D. M. Taylor, of Bickley, Kent, both left nearly £100,000 to aid the blind, children, and the R.N.L.I., with a proportion of Mrs. Taylor's estate to St. Bartholomew's Hospital, London, "but not for vivisection". Among other bequests to the lifeboat institution is a sum of £25,000, from the estate of Dorothy Una Ratcliffe, the poet and writer, for a lifeboat—to be named "Lord Brotherton"—stationed on the Yorkshire coast. She also left £25,000 for additions to the Brotherton Collection at Leeds University. Lord Brotherton was her uncle-in-law. Sir John Wardlaw-Milne, the former Tory M.P. for Kidderminster, left an unusual legacy of £100,000 to the States of Jersey, towards the cost of a Kursaal, and the remainder of his estate to aid children and the old and deprived, with a smaller share to the lifeboat institution. The care and protection of animals again figures prominently in the list and is headed by a gift of £60,000, under the will of Mrs. Lettice M. D. Macneal, of Jamaica, to the Cats Protection League, Slough. Among estates not listed here, Mrs. May Barnes, of Bath, left a large legacy for stray and abandoned cats, as she felt that dogs generally had the sympathy of the public, and a Worthing woman, Miss Alice Stubbings, left £10,000 for the care of her dogs. At the other end of the scale, Miss Grace Munro, of Bristol, left £25 to Bristol's Chief Constable to provide loaf sugar for the city's mounted police horses. The sugar was translated to carrots by the police authorities on the grounds of energy and economy. Miss Phyllis A. Dobson, of Nottingham, left £25,000 to benefit animals, and the R.S.P.C.A. receive £32,000 under the Will of Mrs. Mabel L. Kent, of Saltdean, Sussex.

Among bequests to the National Trust is the residue of the £1-million estate of Mrs. Hannah Gubbay, of Barnet, Herts., a cousin of Sir Philip Sassoon, and nearly £40,000 from the estate of Mrs. Dorothy M. Harris, of Penn, Wolverhampton. Other millionaire estates with benefits to charitable bodies include Mr. Louis Dreyfus, chairman of the world famous music publishers Chappell & Co. Ltd., and Mr. Francis B. Winham, a former estate agent's clerk who became a "man of property". The City of London's Skinners Company benefit by £500,000 under the Will of Mr. David O. Beale, a farmer and company director, of Basingstoke, and £20,000 goes to the London Homes for the Elderly Ltd., from the estate of Sir George H. Wilkinson, Bart, K.C.V.O., London's Lord Mayor in the 1940-41 blitz. Mr. George L. Nicholls, a London solicitor, left the residue of his £606,638 estate, subject to a life interest, to aid the deaf and dumb, the blind, and children. The Cheshire Homes, Dr. Barnardo's, and St. Dunstan's share £50,000 under the Will of Mr. Harry Allwright, a retired butcher, of Birchington, Kent, and Mr. James J. Barlow, of Lower Parkstone, Dorset, apart from £10,000 to Trinity College, Cambridge, left the Midland Bank—his executor—to distribute the £80,000 of his residuary estate to such charitable institutions as they think fit.

A share in the £54,761 estate of Miss Emily O. J. Hubert is left to "Suicides (The Samaritans)" for their admirable work for the lonely and disturbed, and Mr. Samuel A. H. Hutchinson, of Bognor Regis, a quiet, retired poultry farmer, left £5,000 each to the R.N.L.I., and the Royal Hospital and Home for Incurables, Putney, and among other legacies £500 to a Littlehampton woman who was his luncheon companion on many occasions in enjoyment of "her lively conversation and merry laugh which have been a tonic to me". Over £25,000 to aid lepers is shown in the will of Miss Amelia O. Stott, of Worthing, and £75,000 is left to their respective parish

churches by Miss Nora K. Macswinney, of Haywards Heath, Miss Emily G. Osborn, of Turvey, Beds., and Miss Daisy M. Pollard, of Diss, Norfolk.

Legacies for research and education are shown in the list, with the largest amount of over £250,000, being left for research into the cause and cure of cancer.

Bequests of eyes and bodies for anatomical examination, under the respective acts, become increasingly familiar under Wills, and the world wide interest in heart transplants probably foreshadows legislation in this country on the transfer of organs. The case of the South African Dr. Blaiberg is echoed in the grant of 1m. rand (about £590,000) to Cape Town University for research on heart disease and organ transplants, the gift coming from eight South African mining finance houses.

Name	Gross Value	
Mr. Blake Harwood Agate, of Worthing.	£23,710	£5,000 to Christ's Hospital, Horsham.
Mr. Harry Allwright, of Birchington, Kent.	£115,170	£5,000 to the Imperial Cancer Research Fund and the residue equally between Dr. Barnardo's, St. Dunstan's and Cheshire Homes.
Miss Violet Mary Arnold, of Barnes, S.W.13.	£62,925	The residue to Beverley Housing Association Ltd., Barnes.
Mr. James Jardine Barlow, of Lower Parkstone, Poole	£224,759	£10,000 to Trinity College, Cambridge, and the residue for charitable purposes as his executor decides.

Joint Hon. Treasurers: A. C. SINDEN, Esq., R. P. FAWKNER-CORBETT, Esq.

Because teenage delinquency continues to increase it is vital that further remedies are necessary. You will remember that the youthful years are exciting with an urgency that needs adventurous and even hazardous satisfaction and this we provide but, owing to financial stringency, in insufficient quantity. Today's youth are tomorrow's adults so if you and yours look for stability in the years ahead, support those societies that help the young to become reliable people. We opened a School of Adventure in the West Highlands in 1964 but many further establishments are a necessity. Literature and Annual Report sent on request.

Why BARNARDO'S in the welfare state?

Each year in Britain, many thousands of children need help. Yet the already overloaded Welfare State just cannot cope with them all. This is where Barnardo's step into the breach. Please, help us continue our vital work—it depends entirely on voluntary support.

Why Barnardo's need your help

We have over ■ hundred Homes here and abroad.

We place as many children as possible with foster parents.

We operate a Family Care Service in co-operation with Local Authorities and other voluntary agencies to help children without separating them from their parents.

We have five special schools for the care and education of severely physically handicapped children.

We help unsupported mothers to care for their children.

We provide special care for maladjusted children.

We run Adventure Training courses for boys and girls.

We organise full time training courses in child care.

Ask your secretary to send the coupon for literature and further details of our work.

To: Dr. Barnardo's 233
Stepney Causeway, London, E.I.

Please send me full details about the work of Barnardo's.

KING GEORGE'S JUBILEE TRUST

Patron:
HER MAJESTY
THE QUEEN

Chairman:
H.R.H. The Duke of
Gloucester, K.G., K.T.

The Trust exists for the benefit of young people in the United Kingdom. It makes grants to voluntary youth organisations, and aids pioneer projects for youth.

Its experience over the years ensures that funds are used to the best advantage. Since its foundation in 1935, grants of more than £1.8 million have been made.

Young people need challenge, opportunity, and leadership, to encourage a sound sense of values and responsibility. Towards these objectives the Trust devotes its funds and energies.

Please support this constructive work by a donation, covenant or bequest.

Suggested wording for bequests:

"I hereby bequeath the sum of £... free of duty to King George's Jubilee Trust, 166 Piccadilly, W.I. for use in accordance with the terms of its Trust Deed."

RELIEF IS NOT ENOUGH

Hunger, poverty and illiteracy are suffered by more than half the world's people, and ■ great deal of magnificent work is being done to provide immediate relief where it is most needed.

But unless children who are now deprived of food and education are to look forward to a lifetime of dependence upon others, steps must be taken to ensure that the most able of them are so trained as to be able to serve their own people in the most constructive ways.

RELIEF, ALTHOUGH DESPERATELY NEEDED, IS NOT ENOUGH

To whom must the under-developed and developing nations look for their trained teachers, skilled administrators, qualified doctors and nurses, technical and scientific experts? We believe that it is the responsibility of the wealthier nations to provide opportunities for ■ high standard of education and professional or practical training to enable children to play, in later life, ■ significant part in the affairs of their own countries. The Pestalozzi Children's Village, where selected children from the less-developed countries receive education and training in an international atmosphere, is ■ positive contribution to this end.

Donations, gifts under Deed of Covenant and bequests are urgently needed.

FORM OF BEQUEST

I hereby bequeath the sum of pounds free of duty to the Pestalozzi Children's Village Trust, Sedlescombe, Battle, Sussex, for the general purposes of that Trust, and I direct that the receipt of the Honorary Treasurer shall be a good discharge of such legacy.

THE RT. HON. LORD SAINSBURY, PRESIDENT

PESTALOZZI CHILDREN'S VILLAGE TRUST

Sedlescombe, Battle, Sussex

By Will or Codicil or Covenant...

May we suggest to Legal or Financial Advisers that when questions of their clients' benefactions arise the worthiness of the Royal Air Force Benevolent Fund may be wholeheartedly and deservedly commended.

Briefly, The Royal Air Force Benevolent Fund provides help to R.A.F. personnel disabled while flying or during other service. It assists the widows and dependants of those who lose their lives and helps with such vital issues as housing and the children's education. It gives practical assistance to those suffering on account of sickness and general distress.

The need for help in nowise lessens in peace or war. Our immeasurable gratitude to that "Immortal Few" can hardly cease while memory itself endures.

WHEN THINGS GO WRONG AT HOME...

The man away on active service needs someone to stand in for him – to cope with the situation and let him know that all is well. That someone is one of SSAFA's 12,000 voluntary representatives to be found all over Britain. And long after the Serving man has returned to civilian life he and his family can still call on SSAFA for help and advice.

That's why SSAFA's work is varied as life itself. It can and does push back fear and loneliness, relieve past debt and bring new hope to shattered families.

This work – like anything worth while – costs money and is maintained almost entirely by voluntary subscription.

Donations and legacies please to :

Why we need your help in 1969.

THE ARMY BENEVOLENT FUND

Some people find it difficult to believe that in 1969 there is any need to support a Service Charity. After all, they argue, the Second World War ended 24 years ago and surely there cannot be many veterans of the 1914-18 War left.

But a closer look at the facts proves this to be untrue.

During 1968, Army Benevolence received over 50,000 calls for help—that's nearly 1,000 calls a week—from serving soldiers, ex-soldiers and their families. Over £600,000 in grants were made in 1968 but we need £750,000 every year to meet the minimum needs of

the Army. In other words, the wars may be over but the benevolent work still goes on. We are not only concerned with death and injury in the course of duty but also when catastrophe unexpectedly strikes the ex-soldier, bringing a life or career abruptly to an end and plight to his wife and family.

But don't just take our word for it; for full details about the work of the Fund, write to:

**The Army Benevolent Fund (Dept. 40),
20 Grosvenor Place, London, S.W.1.**

Because teenage delinquency continues to increase it is vital that further remedies are necessary. You will remember that the youthful years are exciting with an urgency that needs adventurous and even hazardous satisfaction and this we provide but, owing to financial stringency, in insufficient quantity. Today's youth are tomorrow's adults so if you and yours look for stability in the years ahead, support those societies that help the young to become reliable people. We opened a School of Adventure in the West Highlands in 1964 but many further establishments are ■ necessity. Literature and Annual Report sent on request.

If you need a reason to recommend the Missions to Seamen

...use one of these

■ The world's ports are a unique mixture of races, cultures and religions. The Missions are often the only Christian sanctuary. ■ Britain depends more than ever on her seamen, and in a complex world, the Missions help bridge the gap between man and man ; and man and God. ■ The Flying Angel has a world-famous tradition to upkeep ; to provide all the benefits of a local chapel wherever it is needed. ■ Sea traffic is getting busier all the time. More and more men are needing their Flying Angel Clubs. The Missions must expand. ■ Like everything else, the Missions' costs are increasing. Our seamen depend on the Flying Angel for the essential comforts of home and Christian fellowship.

Please advise your clients to leave a generous bequest.

HELP the CENTRAL CHURCH FUND *WITH A BEQUEST*

As a faithful member of the Anglican Church you may want to leave a share of your estate in order to benefit the general purposes of the Church of England, after your lifetime.

You can best give effect to this desire by including in your Will a bequest to the Central Church Fund, expressed in the following suggested form of words:—

“I give and bequeath to the Central Board of Finance of the Church of England, whose registered office is at Church House, Dean’s Yard, Westminster, London, S.W.1. . . . per cent of the residue of my estate to be credited to the Central Church Fund and to be applied both as to capital and income to such ecclesiastical charitable purposes in the Church of England as the said Board shall in its absolute discretion decide, and I declare that the receipt of the Secretary for the time being of the said Board shall be sufficient discharge to my executors for the same.”

Association has established many Centres of its own and hires rooms for services,
lectures, clubs, etc.

Gifts and Legacies gratefully acknowledged by:
Secretary, R.A.D.D. 7-11 Armstrong Road, London W.3.

THE BRITISH COUNCIL FOR REHABILITATION OF THE DISABLED...

CALL US **REHAB** FOR SHORT. We've taken ■ new symbol to go with the name, but we're still the B.C.R.D. Our work hasn't changed one bit.

We still help disabled people, whatever their ailments, age or status. **REHAB** educates, instructs and trains. We provide a chance to recover a lost place in society to over 1,000 people every year. In a nutshell, **REHAB** seeks to make tax-payers out of tax-consumers—to the advantage of all concerned.

Your support, by gift, subscription or legacy, will always be welcome. Our Honorary Treasurer is available at Tavistock House South, Tavistock Square, London, W.C.1. Telephone EUSTon 4037/8. He can tell you about our organisation, what it stands for, and how best you can help us work. (Cheques may be made out to **REHAB**.)

We may have a new symbol but
we will never change our enthusiasm.

(Registered as a Charity in accordance with National Assistance Act, 1948, and Charities Act, 1966.)

General Secretary: Ian R. Henderson

CENTRAL COUNCIL FOR THE DISABLED

(Formerly Central Council for the Care of Cripples)

34 ECCLESTON SQUARE, LONDON, S.W.1

(Registered in accordance with the
Charities Act, 1960)

Founded in 1919, this is the national co-ordinating body for over 200 local affiliated bodies. Its objects are to promote measures for the discovery, treatment, training and general welfare of the disabled.

Standing commitments include liaison with international organisations and orthopaedic hospitals; the maintenance of a school for handicapped children and an advisory service; the operation of a travelling exhibition of aids and a case committee for the making of small grants.

Among other present activities, research is being carried out on domestic design, clothing, and leisure projects for the disabled; and a campaign is in being to make all public buildings accessible to them.

Dependent Upon Voluntary Contributions

A legacy that carries an hereditary benefit

When you are making your will, always remember that there is one legacy that automatically carries with it a simple memorial. A legator of the Royal Hospital and Home for Incurables is named an Hereditary Governor, and on his death this title and perquisites pass automatically to the next of kin. The Hereditary Governorship carries with it the full rights of Governorship for life, i.e. a signed Governor's certificate, and the right to attend all General Meetings and vote at them. A man's generosity to men and women who have been cruelly and incurably crippled is suitably remembered.

THE BLIND ARE PEOPLE LIKE YOU...

Many people who are blind were once able to see as you do. Then what seemed catastrophe struck them. They knew that courage alone was not enough and that help was needed to re-build shattered lives.

At this very moment there are people having to face the distressing truth that they will never see again. They need help desperately—new help for the future through rehabilitation and training—and the help of *your* contribution towards the cost of these services. The Greater London Fund for the Blind asks for £250,000 ■ year for services which restore purpose, confidence and hope to lives without sight. **Please send a contribution—or remember the Fund in your Will.**

Please help us to FIGHT CANCER

In the up-to-date laboratories of the Imperial Cancer Research Fund, every weapon of modern science is being used to fight all forms of cancer, including leukaemia. Founded in 1902 on the initiative of the Royal Colleges of Physicians and Surgeons, the I.C.R.F. is now playing a role of major international importance in this great work. But research is costly. Over £1 million is needed annually. Will you please help — now?

An appeal is made for donations, subscriptions and legacies to further the humane work of the Society on behalf of animals. Annual Report sent free on application to the Secretary

PRESENT IMPERFECT

and future uncertain, if you happen to be one of the thousands of sufferers of M.S. – Multiple Sclerosis (also known as Disseminated Sclerosis) – in Great Britain. M.S., a disease of the central nervous system which renders victims partially or even totally incapacitated strikes like a thief in the night. As yet, it is incurable.

M.S. is one of modern society's most baffling diseases and The Multiple Sclerosis Society of Great Britain and Northern Ireland exists to further vital research, to help sufferers. We rely heavily upon voluntary contributions, endowments, legacies.

CANCER RELIEF

Money is urgently needed for—

- Special comforts for patients with only a few weeks to live.
- Special foods—particularly for throat cancer patients.
- Fares for hospital visits—especially for children.
- Nursing and Convalescent Home fees.
- Regular grants to patients in their own homes.

Medical Social Workers of nearly all hospitals avail themselves of the services of the N.S.C.R. now costing over £265,000 per annum.

By a donation to the N.S.C.R. you can gladden a heart in one of thousands of poor afflicted homes—*please give what you can, or make a bequest*

QUEEN ELIZABETH'S FOUNDATION FOR THE DISABLED

Photograph by courtesy of the Times

Patron: Her Majesty Queen Elizabeth the Queen Mother

This many-sided organisation provides vocational training, residential workshops, holiday and convalescent amenities, and medical rehabilitation for men and women suffering from physical and mental disabilities. Nearly 1,000 disabled people receive help from one or other of the four units of the Foundation each year. Progress, however, is limited through lack of extra funds. The Foundation urgently needs help to enable them to train the handicapped to live a fuller and more useful life. Your legacy or donation, large or small, will be put to vital use wherever it is most needed.

YOU COULD LEAVE THE BLIND A BETTER WORLD.

In a world made for the sighted, the blind need help, not pity. The Royal London Society for the Blind provides practical help - by educating children, training and employing adults, supervising blind people working at home, maintaining resi-

dential clubs. It urgently needs legacies, donations and subscriptions to continue and extend this work. When you give advice on a will, please remember that you can help to leave the blind a better world.

Somebody worth remembering

But for her a kind thought isn't enough. This lady spent most of her life working as a State Registered Nurse, State Certified Midwife and Health Visitor. Now after a lifetime of constant giving, she's in need of help herself.

RUKBA provides annuities for many like her—those struggling to maintain themselves on fixed incomes which are now quite inadequate. These incomes are brought to a more reasonable level by RUKBA and, in some cases, residential homes with nursing attention are made available.

We must give something back to those who have spent a lifetime teaching, nursing and in other similar professions.

Also to the widows of professional and service men and daughters who have cared for aged parents.

Please give to RUKBA—by cheque, covenant, banker's order or bequest. Generously and soon.

The Royal United Kingdom
Beneficent Association: founded 1863.
Further details and literature from:
General Secretary, RUKBA,
13 Bedford Street, London, W.C.2.

*This is
a true story.
About just
one of the
many helpers
now helped
by RUKBA.*

NO RELATIVES— BUT FRIENDS WHO CARE!

Thousands of old people in Britain live alone—many in single rooms, cheerless for want of sunlight in summer, damp and cold through lack of adequate heating in winter.

The D.G.A.A. concentrates on those with small pensions or dwindling resources, giving immediate aid when it is most needed and often providing the means for old people to continue to live in their own homes. When they are no longer able to look after themselves the D.G.A.A. provides for them in Nursing and Residential Homes and assists with fees in private homes.

Over £500,000 is needed annually for this work.

To lonely old people the letters D.G.A.A. mean 'friends who care'. Please be ■■■ of them.

The D.G.A.A. helps many of all ages in dire distress, including women with young families whose incomes have been curtailed by death or desertion.

Donations and Legacies ■■■ urgently needed.

DISTRESSED GENTLEFOLK'S AID ASSOCIATION

A MOST WORTHY CAUSE

The HOMES OF ST. BARNABAS provide in lovely country ■■■ really happy and secure old age to some 40 retired Anglican Clergy. Each has his comfortable quarters and full use of the fine library and common rooms. There are Chapels where those who are able celebrate and conduct the Services. There is an infirmary wing under a S.R.N. Each resident pays what he can but that is insufficient. Please help to fill the gap by:

LEGACY · COVENANT · DONATION

Full particulars from: The Warden, Homes of St. Barnabas, Dormans, Lingfield, Surrey

These facts show how varied is the R.S.P.C.A. work for animals and how deserving it is of all the support you can give

In a year the R.S.P.C.A.—

INVESTIGATES over 20,000 complaints of cruelty.

PROSECUTES about 1,000 offenders—and cautions about 6,000.

TREATS over 300,000 animals through its free veterinary treatment schemes.

FINDS good homes for about 70,000 animals.

HOMES nearly 1,000,000 animals and birds at R.S.P.C.A. London Airport Hostel.

ANSWERS 20,000 calls at Headquarters All-Night Emergency Service.

LECTURES nearly 5,000 times to schools and youth organisations.

HANDLES over 10,000 animals in Mobile Units.

PLEASE GIVE GENEROUSLY TO THE RSPCA

You can become a Member of the R.S.P.C.A. by subscribing £1 per annum, or a Life Member for a donation of £30.

Send to: The Secretary, R.S.P.C.A. 105 Jermyn Street, London, S.W.1, or to your local branch.

a task that grows!

The task of rearing a bird in this modern world is no longer the bird's alone! More than ever they need YOUR help for they are threatened from all sides by daily increasing pressures. Even our delightful garden birds are endangered in many areas, while some rarer species may be reduced to a handful, limited to special localities. Will you help us to secure a future for birds with a gift or a legacy or by becoming a member?

We are a society of 40,000 amateurs and experts.

Membership £1.11.6 p.a. or 15/- if under 21.

Informative bi-monthly magazine "Birds". Also fast-growing Young Ornithologists' Club for 18 and under, magazine "Bird Life".
