The Museum descends direct from the Museum of Manufactures (later called Museum of Ornamental Art) opened in Marlborough House in 1852. The nucleus was a selection of objects bought for £5,000 from the Great Exhibition of 1851 which, with objects illustrating historic styles, was to be devoted to the "application of fine art to the objects of utility" and "the improvement of the public taste in design." The Museum was moved in 1857 to become part of the collective South Kensington Museum. Most of the older buildings date from 1860-82; the new parts from 1899-1909. The South Kensington Museum was re-named the Victoria and Albert Museum in 1899, and only became an exclusively art museum in 1909. Besides comprising the departments named below, the Museum contains the national collections of post-classical sculpture (excluding modern), of British miniatures and of water-colours, the National Art Library, and of art lantern slides. The branch museum at Bethnal Green (composed of a building formerly at South Kensington) was opened in 1872. The Victoria and Albert Museum also administers the Wellington Museum (Apsley House); Ham House, Richmond and Osterley Park, Middlesex. Administrative expenses of the Museum were estimated at £1,046,000 for 1968-69. Director and Secretary, J. W. Pope-Hennessy, C.B.E. £5,375

NATIONAL ENVIRONMENT RESEARCH COUNCIL

Alhambra House, 27/33 Charing Cross Road, W.C.2
[01-930-9232]

The Natural Environment Research Council was established by Royal Charter on June 1, 1965, under the Science and Technology Act, 1965, to encourage, plan and conduct research in those sciences, both physical and biological, that relate to man's natural environment.

The component bodies of the Council are: the Institute of Geological Sciences, the Institute of Hydrology, the National Institute of Oceanography, the Nature Conservancy, the British Antarctic Survey and the Research Vessel Unit.

It is also responsible for supporting: the Marine Biological Association, the Scottish Marine Biological Association, the Freshwater Biological Association, the Fisheries Helmithology Unit and the Marine Invertebrate Biology Unit.

These bodies have their own governing boards or advisory committees. In addition the Council advises the Ministry of Agriculture, Fisheries and Food and the Department of Agriculture and Fisheries for Scotland on the research programmes of their fisheries laboratories. It also has responsibility for long-term forestry research in consultation with the Forestry Commission. Much of the Council's activities is related to university research in the environmental sciences, which it supports by post-graduate training awards, research grants and fellowships.

ROYAL OBSERVATORIES

Royal Greenwich Observatory
Herstmonceux, Sussex
[03-2181-3171]

The Royal Observatory was established at Greenwich in 1675 by Charles II for improving methods of navigation. Latterly the growth of London, with its smoke and bright lights, seriously hampered astronomical observations there, and it was decided in 1946 to move the telescopes to Herstmonceux Castle in Sussex. The removal was completed by 1958. The meridian of zero longitude still passes through the old site, which now houses the Department of Navigation and Astronomy of the National Maritime Museum.

At the Observatory astronomical measurements are made of the positions, motions and distances of the heavenly bodies, and of such physical characteristics as their luminosities, masses and temperatures. Two meridian instruments and six equatorially-mounted telescopes are devoted to this work, and the Isaac Newton telescope, a 98-inch reflector for the use of any qualified British astronomer, was completed in 1967. The Observatory is responsible for the time service of the United Kingdom and the time zones of the world are based on Greenwich Mean Time.

The Cape Observatory was founded by Order in Council in 1820 to continue in the Southern Hemisphere the work being undertaken by Greenwich in the North. Extensive programmes are carried out to ascertain the positions, distances, magnitudes and radial velocities of stars.

Astronomer, R. H. Stoy, C.B.E., Ph.D.

Royal Observatory
Blackford Hill, Edinburgh 9
[031-667-3321]

The Observatory, founded by the Astronomical Institution in 1818 on Calton Hill, was moved to its present site in 1896. Its work, which is closely linked to that of the Astronomy Department of Edinburgh University, is concerned with the physics of stars and interstellar matter and the

structure and evolution of the Galaxy. Observational data are secured with four telescopes on Blackford Hill and one at an outstation at Monte Porzio, Italy. Satellite tracking is pursued at a second outstation in Peeblesshire. Much of the work of the Observatory is directed to the design and construction of new instruments and to the introduction of automation into astronomy. The Library contains the valuable collection of Lord Crawford.

MINISTRY OF OVERSEAS DEVELOPMENT

Eland House, Stag Place, Victoria, S.W.1
[01-834-2377]

The Ministry of Overseas Development was set up in October, 1964, to deal with the assistance given by the British Government to overseas countries for development purposes. The Department is responsible for direct financial aid in the form of capital; for contributions from Britain to the work of the United Nations and its specialized agencies in development; and for technical assistance to overseas countries, mainly by way of providing specialist staff abroad and training facilities in the United Kingdom. In order to help discharge its technical assistance functions the Ministry of Overseas Development absorbed the former Department of Technical Co-operation, and the technical organizations allied to it.

[01-481-2000]

The Port of London Authority was established under the Port of London Act, 1908 on March 31, 1909, for the purpose of administering, preserving and improving the Port of London.

Under the Harbour Revision Order, 1967, the Board was reduced to not fewer than 15 and not more than 16 members as from October 1, 1967. The members are appointed by the Minister of Transport after consultation with interested organizations as follows: National Ports Council (2 members). The Chamber of Shipping of the United Kingdom and the London General Shipowners' Society (3). The London Chamber of Commerce and the British Shippers' Council (3). The London Wharfingers' Association (1). The Association of Master Lightermen and Barge Owners in London (1). The Greater London Council (1). The Corporation of the City of London (1). The Corporation of Trinity House (1). Persons representative of organized labour (2). The sixteenth member is the Director-General who is co-opted by the Board.

The working of the Port for the nine months ended Dec. 31, 1967, showed a deficit of £1,600,000. Chairman, The Viscount Simon, C.M.G. Vice-Chairman, Sir Andrew Crichton.

MINISTRY OF POWER
Thames House South, Millbank, S.W.1

[01-222-7000]

The Ministry of Power has a general responsibility for the fuel and power industries and for iron and steel. The Minister appoints the boards in the nationalised coal, electricity, gas and iron and steel industries and their capital investment plans and programmes of research are subject to his approval. The Ministry is responsible for Government relations with the petroleum industry. The Minister

has a statutory responsibility for safety and health in mines and quarries, a function which he discharges largely through the Inspectorate of Mines and Quarries. Under the Chief Scientist to the Ministry, the work of the Safety in Mines Research Establishment reflects the Minister's special responsibility in this field. The Minister is also responsible for the licensing and inspection of nuclear installations (other than those of the Atomic Energy Authority or of other Government Departments) in England and Wales with particular reference to safety. Since 1962 the construction and operation of pipe-lines has also been subject to his control. The search for and getting of petroleum and natural gas in the United Kingdom and on those parts of the Continental Shelf in the United Kingdom jurisdiction are subject to the Minister's control by licensing.

MINISTRY OF PUBLIC BUILDING AND WORKS
Lambeth Bridge House, Albert Embankment, S.E.1

101-735-7611

The Ministry of Public Building and Works has responsibilities which include the design, building and furnishing of Government offices and of our Embassies abroad; the building programmes of the Navy, Army and Air Force, at home and overseas; the construction of equipment for scientific research stations; building for the Post Office; maintaining the Royal Palaces; maintenance and new construction for the Houses of Parliament; managing the Royal Parks; preserving historic buildings and ancient monuments; co-ordinating building research and development throughout the Government services; and encouraging the building and civil engineering industries and the building materials industries to adopt the best modern methods and techniques.

The Ministry is responsible for nearly all the construction work directly carried out by the Government. It encourages efficiency and increased production in building by its development projects and by supplying technical information and making known the results of research.

PUBLIC TRUSTEE OFFICE

Sardinia Street, Kingsway, W.C.2

101-405-43001

This is a Government Office (opened in 1908) by means of which the State acts as executor and trustee under ■ will, or as trustee under a settlement, and in other capacities of a like nature. The value of the trusts accepted up to March 31, 1968, was £707,000,000.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. The appointment is effected in the same way as ■ private trustee, or by an Order of the Court. He can act solely or jointly with others.

In the case of a will, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be ■ joint one with others. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as administrator with, or without, the will annexed.

Strict secrecy is observed in all matters dealt with in the Department. Accounts in simple form are furnished to the beneficiaries as required. An interview with the Public Trustee or with any of his senior officers can be arranged at any time. A pamphlet giving particulars and details of the fees can be obtained free of cost from the Office of the Public Trustee, Kingsway, W.C.2.

PUBLIC WORKS LOAN BOARD

29 Old Jewry, E.C.2

[01-606-6234]

The Board is an independent statutory body, consisting of 12 unpaid Commissioners appointed by the Crown to hold office for 4 years; 3 Commissioners retire each year and may be re-appointed.

The functions of the Commissioners, derived chiefly from the Public Works Loans Act, 1875, and the National Loans Act, 1968, are to consider applications for loans by Local Authorities and other prescribed bodies, and, when loans are approved, to collect the repayments.

Funds for loans are authorised from time to time by Parliament and are drawn from the National Loans Funds. Rates of interest on the Board's loans and fees to cover management expenses are fixed by the Treasury.

During the year ended March 31, 1968, advances totalling £465,664,325 were made.

HOUSE OF LORDS RECORD OFFICE

House of Lords, S.W.1

[01-930-0240]

Until 1497 the records of Parliament were normally transmitted at the end of a session to Chancery, and are now therefore preserved in the Public Record Office. Since 1497, however, the records of Parliament have been kept within the Palace of Westminster. They are in the custody of the Clerk of the Parliaments, who in 1946 established a record department to supervise their preservation and their production to students. The Search Room of this office is open to the public throughout the year, Mondays to Fridays inclusive, from 10 to 5. The records preserved number some 2,000,000 documents, and include Acts of Parliament from 1497, Journals of the House of Lords from 1510, Minutes and Committee proceedings from 1610, and Papers laid before Parliament, from 1531. Amongst the records are the Petition of Right, the Death Warrant of Charles I, the Declaration of Breda and the Bill of Rights. The House of Lords Record Office can also arrange access for students to the Journals of the House of Commons (from 1547), and to other surviving records of the Commons (from 1572), which include plans and annexed documents relating to Private Bill legislation from 1818. The records of both Houses are preserved in the Victoria Tower at the Houses of Parliament.

ROYAL COMMISSION ON HISTORICAL MANUSCRIPTS

Quality House, Quality Court, Chancery Lane

W.C.2

[01-242-2081]

National Register of Archives, [01-242-3205]

The Historical Manuscripts Commission was first appointed by Royal Warrant in 1869, and was empowered to make enquiry into the place of deposit of collections of manuscripts and papers of historical interest and with the consent of the owners to publish their contents. The Commission was reconstituted by Royal Warrant in 1959, with wider terms of reference, including the preservation of records and assistance to other bodies working in the same field. The Master of the Rolls, who is the Chairman of the Commission, now exercises

through the Commission his responsibility under the Law of Property (Amendment) Act 1924, and the Tithe Act, 1936, for manorial and tithe documents. The Commission has published over 200 volumes of printed reports upon manuscripts of historical import, and under its authority is compiled the *National Register of Archives*, which now contains over 12,000 typed reports upon privately-owned records, with extensive indexes, and may be consulted by historical researchers. At present a grant-in-aid is made through the Commission to the *Records Preservation Section* of the British Records Association. The Commission undertakes to advise owners upon the preservation and use of their manuscripts and records.

Chairman, The Master of the Rolls.

Commissioners, The Marquess of Salisbury, K.G., P.C.; Prof. E. F. Jacob, D.Phil., F.B.A., F.S.A.; Prof. Sir J. G. Edwards, D.Litt., F.B.A.; Prof. G. R. SCIENCE RESEARCH COUNCIL

State House, High Holborn, W.C.1
[01-242-1262]

The Science Research Council, established by Royal Charter following the passing of the Science and Technology Act, came into existence on April 1, 1965.

It covers the whole field of fundamental science, other than those parts which are the responsibility of the Agricultural, Medical, Natural Environment and Social Sciences Research Councils. It supports research in engineering and technology in universities. Its charter makes provision for it to carry out research and development through its own establishments; to encourage and support similar research by any other person or body; to provide and operate equipment for common use by universities, technical colleges and like institutions; to make grants for postgraduate studies and to disseminate knowledge of science and technology.

The Scottish Home and Health Department was constituted in June 1966 following a redistribution of the functions of the former Scottish Home Department and the former Department of Health for Scotland, and is responsible for the central administration in Scotland of functions relating to law and order and of the National Health Service and associated welfare services. It is the Department concerned with the Scottish police and probation services, criminal justice, legal aid and the services needed by the courts; and it is directly responsible for the administration of Scottish prisons and Borstal institutions. The Department is the central authority in Scotland for the fire service and civil defence and for legislation concerning shops, theatres, cinemas and licensed premises.

The Department is responsible for the central administration in Scotland of the National Health Service comprising the hospital service, the general medical, dental and ophthalmic services and the local authority health services. The associated welfare services include the supervision of local arrangements for the care of the aged and handicapped, and medical and surgical treatment of war pensioners.

The National Insurance Advisory Committee was appointed on Oct. 28, 1947, under the National Insurance Act, 1946 to give advice and assistance to the Minister in connection with the discharge of his functions under the Act, and to perform any other duties allotted to it under the Act.

These other duties include the consideration of preliminary drafts of regulations to be made under the National Insurance Acts, and of representations received thereon. When the regulations are laid before Parliament, the Committee's Report on the preliminary draft is laid with them, together with a statement by the Minister showing what amendments to the preliminary draft have been made, what effect has been given to the Committee's recommendations, and, if effect has not been given to any recommendation, the reasons for not adopting it. The Minister may also refer to the Committee for consideration and advice any questions relating to the operation of the Acts (including questions as to the advisability of amending the Acts).

Chairman, The Lord Evans of Hungershall.

Members, The Lord Collison, C.B.E.; J. A. Faris; Mrs. I. M. Howland, C.B.E.; L. E. Kenyon, C.B.E.; Miss A. M. Patrick; D. H. Roper, O.B.E.; Prof. R. M. Titmuss, C.B.E.; N. C. Turner.

H. M. Stationery Office was established in 1786 and is the British Government's central organization for the supply of printing, binding, office supplies, automatic data processing equipment and office machinery of all kinds, and published books and periodicals, for the Public Service at home and abroad; it also undertakes duplicating, distributing and computer bureau services for government departments. The Stationery Office is the publisher for the government, and has bookshops for the sale of government publications in London, Edinburgh, Cardiff, Manchester, Bristol, Birmingham and Belfast; leading booksellers in the larger towns act as agents; and there are wholesale departments in London, Edinburgh and Belfast from which booksellers may obtain supplies. It is also the agent for the sale of publications of the United Nations and its specialized agencies and for certain other international organizations. The Controller of the Stationery Office is under Letters Patent the Queen's Printer of Acts of Parliament and in him is vested the Copyright in all British Government documents.

Government publications are of wide and varied range and over 6,000 publications are produced each year. They include the *London Gazette*, which has been issued since 1665, and *Hansard*, the verbatim report of the proceedings in both Houses of Parliament, available on the morning following the debate. The Stationery Office has in stock some 80,000 titles and its subscriptions and standing order lists contain about 200,000 names. The annual sales total about 27,000,000 copies.

The aggregate net estimate for the department for 1968-69 was £36,739,000 (an increase of £6,689,000 on the same estimate for 1967-68).

Generally the department obtains its supplies from commercial sources by competitive tender. For printing and binding, however, the Stationery Office has its own printing works and binderies which produce about one-third of the total require-

ment, including telephone directories, pension allowance books, national savings certificates and stamps, postal orders, premium bonds, National Insurance stamps, road fund licences, television and wireless licences.

The staff employed on April 1, 1968, was 7,613, including 1,885 in warehouses and 2,756 at printing works; the total space occupied was 2,000,000 square feet, including 1,250,000 sq. ft. for warehouse space and 475,000 sq. ft. for the printing works. *Controller*, H. Pitchforth..... £6,300

SUGAR BOARD*52, Mark Lane, E.C.3*

[01-400-6221]

The Sugar Board was constituted under the Sugar Act, 1956, on October 15, 1956. The Board buys the sugar which the United Kingdom has contracted to buy under the Commonwealth Sugar Agreement at prices negotiated triennially by the Government and resells the sugar commercially at world prices. The Board also provides temporary finance for the British Sugar Corporation and receives from or pays to the Corporation any surplus or deficit arising on the production and refining of home-grown beet sugar. The Board, in turn, balances its accounts, taking one year with another, by receiving a surcharge or making a distribution payment, on all imported and home-produced sugar.

MINISTRY OF TECHNOLOGY*Millbank Tower, Millbank, S.W.1*

[01-834 2255]

The Ministry of Technology has the general responsibility for guiding and encouraging the application of advanced technology and new processes in British Industry. It has a particular responsibility for research on, and the development and procurement of aircraft, guided weapons, nuclear weapons and electronic equipment for the Services; for research on, and development of, certain classes of equipment for civil use (e.g. some civil aircraft and industrial gas turbines) and for certain aspects of space research and technology.

The Ministry is the sponsor Department for the mechanical and electrical engineering industry generally, including electronics, telecommunications, instruments, computers, machine tools, motor vehicles, electrical and process plant, aircraft and aero engines and shipbuilding. It also has responsibility for engineering standards and weights and measures and Ministerial responsibility for the British Standards Institution. It has direct control of 15 research and development establishments and can call on the research facilities of the Atomic Energy Authority and some 45 grant-aided autonomous co-operative industrial research associations. It has a network of regional officers and industrial liaison officers who maintain nation-wide contact with industry.

In addition to its responsibilities towards the Services in the field of aviation, the Ministry is concerned with the development, production and proving of civil aircraft and for the promotion of exports of civil and military aircraft, aero-engines, guided weapons and aircraft equipment.

The Minister of Technology is responsible for the United Kingdom Atomic Energy Authority

and for the National Research Development Corporation.

The aggregate net estimate for the Ministry in 1968-69 amounts to £21,810,000. The gross estimate for the Ministry in 1968-69 amounts to £686,221,000.

THAMES CONSERVANCY
Burdett House,
15 Buckingham Street, W.C.2
[Trafalgar: 2441]

The conservation of the River Thames was originally granted to twelve Conservators in 1857. In 1909 the Port of London Authority took over all rights, powers and duties of the Conservators in respect of the river below Teddington. The Conservators of the River Thames under the Thames Conservancy Acts and Orders, 1932 to 1966, now have jurisdiction over the River Thames from Cricklade in Wiltshire to a point about 265 yards below Teddington Lock, and are constituted the Drainage Board of the Thames Catchment Area for the purposes of the Land Drainage Acts, 1930 and 1961. The principal duties of the Conservators as a Navigation Authority are the maintenance and improvement of the navigation, and the registration and regulation of craft. The Conservators exercise jurisdiction for the prevention of pollution over the Thames Catchment Area (both surface and underground water), and over the fisheries in the River Thames from Cricklade to Teddington.

The Conservators also exercise the new water resources functions of River Authorities under the Water Resources Act, 1963, in respect of both surface and underground water in the Thames Catchment Area and underground water in London (the London "Excluded" Area), including the prevention of pollution.

The Conservators' income is obtainable by precept from the Councils of the various counties, county boroughs and London boroughs within the Thames Catchment Area, from the Greater London Council, licence fees and charges for water abstracted. In addition, the Conservators derive income from various navigation tolls, fees, licences and rents.

THE TRANSPORT HOLDING COMPANY

Argosy House, 215 Great Portland Street, W.1

[01-636-8688]

The Transport Holding Company is a statutory
company established under the Transport Act,

1962, to own and manage all the transport investments of the former British Transport Commission except those transferred to the Railways, London Docks and British Waterways Boards, and any other such investments which may be acquired from time to time.

The transferred investments are in the form of shares in companies, including bus companies, road haulage activities, travel agencies and shipping services. These vested in the Holding Company on January 1, 1963.

THE TREASURY
Great George Street, S.W.1

[01-930-1234]

The office of the Lord High Treasurer has been continuously in commission for well over 200 years. The Lords Commissioners of H.M. Treasury consist of the First Lord of the Treasury (who is also the Prime Minister), the Chancellor of the Exchequer and five Junior Lords. This Board of Commissioners is assisted at present by a Chief Secretary, a Parliamentary Secretary, a Financial Secretary and a Minister of State, who are also Ministers, and joint Permanent Secretaries. The Prime Minister and First Lord is not primarily concerned in the day-to-day aspects of Treasury business, and the Parliamentary Secretary and the Junior Lords are Government Whips in the House of Commons. The management of the Treasury devolves upon the Chancellor of the Exchequer, and, under him, on the Chief Secretary, the Financial Secretary and the Minister of State. The Chief Secretary, with the assistance of the Minister of State, is particularly responsible for the control of public expenditure. The Financial Secretary is concerned with matters of home and overseas finance, supervises the management of the civil service and discharges the traditional responsibility of the Treasury for the largely formal procedures of voting of funds by Parliament. All ministers are concerned in tax matters.

COUNCIL ON TRIBUNALS

6 Spring Gardens, Cockspur Street, S.W.1

[01-930-8691]

The Council on Tribunals, with its Scottish Committee, was constituted in 1958 under the provisions of the *Tribunals and Inquiries Act* of that year to act as an advisory body in the field of administrative tribunals and statutory inquiries.

Its principal functions are (a) to keep under review the constitution and working of the various tribunals which have been placed under its general supervision by the Act; (b) to report on particular matters relating to any tribunal which may be referred to it by the Lord Chancellor and the Secretary of State for Scotland; and (c) to report on matters relating to statutory inquiries which may be similarly referred to it or which the Council may determine to be of special importance. In addition, the Council must be consulted both about rules of procedure for statutory inquiries and before rules are made for any of the tribunals under its general supervision, and it may make general recommendations about appointments to membership of such tribunals. The numerous tribunals which have been placed under the Council's supervision are concerned with a wide variety of matters varying from agriculture and road traffic to independent schools and pensions. They include the main National Health Service and National Insurance Tribunals, together with such tribunals as the Air Transport Licensing Board, Industrial Tribunals, the Lands Tribunal, the Mental Health Review Tribunals, Local Valuation Courts, Furnished Houses Rent Tribunals, Rent Assessment Committees and the Transport Tribunal. The Council's jurisdiction with regard to inquiries is being extended by Orders under Section 1 of the Tribunals and Inquiries Act, 1966.

The Scottish Committee of the Council considers Scottish tribunals and matters relating only to Scotland.

The Members of the Council are appointed by the Lord Chancellor and the Secretary of State for Scotland. The Scottish Committee is composed partly of members of the Council designated by the Secretary of State for Scotland and partly of other persons appointed by him. The Parliamentary Commissioner for Administration is *ex officio* a member both of the Council and of the Scottish Committee.

The Council submits an annual report on its proceedings and those of the Scottish Committee to the Lord Chancellor and the Secretary of State for Scotland, which must be laid before Parliament.

Chairman, The Baroness Burton of Coventry.

Members, D. B. Bogle, C.B.E., W.S.; Mrs. E. Bayliss; The Hon. R. E. B. Beaumont, C.B.E., T.D.; Mrs. K. M. Bell; The Lord Collison, C.B.E.; Sir Edmund Compton, K.C.B., K.B.E. (*Parliamentary*

TRINITY HOUSE

Tower Hill, E.C.3

[01-480-6601]

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamounts in Scotland, Ireland, the Channel Islands and Gibraltar, while the Corporation is also the chief Pilotage Authority in the United Kingdom, and in its capacity as a private corporation or guild it administers certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners, their widows and spinster daughters. The Corporation controls nearly 90 lighthouses and over 30 lightships, and maintains a fleet of 9 lighthouse tenders and a fleet of pilot vessels. The Active Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues levied on shipping using the ports of the United Kingdom. The accounts are submitted annually to Parliament.

COMMISSIONS, ETC.

Foreign Compensation Commission
Alexandra House, Kingsway, W.C.2

The Commission was set up by the *Foreign Compensation Act*, 1950, to distribute funds paid by foreign governments as compensation for expropriated British property and other losses sustained by British nationals. The *Foreign Compensation Act*, 1962, provided, *inter alia*, for the payment out of moneys provided by Parliament of additional compensation in respect of claims arising in connection with certain events in Egypt. The Commission has completed the final distribution of the funds contributed by Yugoslavia, Czechoslovakia,

Bulgaria and Poland. Under an agreement made with Her Majesty's Government, Roumania has completed payments and the final distribution on Roumanian claims is imminent. Distribution is being made on Hungarian claims as sufficient funds become available from Hungary under the agreement made with Her Majesty's Government. The Commission has registered certain British claims in Czechoslovakia and also in the Baltic States and territories ceded to the Soviet Union. The £27,500,000 compensation paid by the Government of the United Arab Republic under the

financial agreement of Feb. 28, 1959, has been fully distributed, and Egyptian claims are now being paid from funds provided by Parliament.

Housing Corporation,
 Sloane Square House, S.W.1
 [01-730 9991]

Set up on Sept. 1, 1964 to promote the growth of housing societies and, through them, to stimulate the building of new houses and flats for letting at cost-rents or for co-ownership. The societies are expected to raise about two-thirds of the money from building societies or other financial institutions. The remainder will come from the Housing Corporation lending on second mortgage. £100,000,000 is being made available for this purpose by the Government to the Corporation. Loans will be repayable over 40 years.

Chairman, H. Ashworth.

Members, D. H. D. Alexander, O.B.E., T.D.; H. Campbell; E. Clark; Mrs. P. Crabbe; W. S. Jones, C.B.E.; A. Meikle, C.B.E.; Sir Edward Norman.

COUNCIL OF INDUSTRIAL DESIGN

28 Haymarket, S.W.1

The Council of Industrial Design, with its Scottish Committee, was set up in December, 1944, by the President of the Board of Trade, "to promote...the improvement of design in the products of British Industry." For manufacturers, the Council provides advice on the application of design policy, and recommends designers from its Record of Designers. For retailers, it provides courses for buyers and salesmen on design appreciation, and organizes exhibitions in retail stores. For the public it provides selective exhibitions of well designed goods.

The Council has a Design Centre for British Industries at 28 Haymarket, S.W.1, and a Scottish Design Centre at 46 West George Street, Glasgow, C.2.

The Council maintains a selective, pictorial and sample record of well designed goods in current production known as *Design Index*, which is available for consultation at the Design Centre. The Council also maintains a photograph library and slide loan service, press and information services and a lecture panel, and publishes a monthly journal *Design*.

Chairman, Sir Duncan Oppenheim.
Chairman of Scottish Committee, M. J. G. Wylie.
Director, Sir Paul Reilly.
Chief Executive, Scottish Committee, R. G. Clark.

NATIONAL ELECTRONICS COUNCIL

Abell House, John Islip Street, S.W.1

[01-834-4422]

The National Electronics Council (formerly the National Electronics Research Council) was reconstituted in 1967. Its task is to consider and advise the Government on the applications of electronics to the national life, and to encourage research and education in electronics.

Chairman, The Earl Mountbatten of Burma, K.G., P.C.

Secretary, P. F. G. Twinn.

THE NATIONAL TRUST

40-42 Queen Anne's Gate, Westminster, S.W.1

The National Trust was founded in 1895 by Miss Octavia Hill, Sir Robert Hunter and Canon

Rawnsley, their object being to preserve as much as possible of the history and beauty of their country for its people. It has since become an organization incorporated by Act of Parliament to ensure the preservation of lands and buildings of historic interest or natural beauty for public access and benefit. It is independent of the State and relies mainly on the voluntary support of private individuals for working funds. The State, however, allows it certain tax exemptions. A further, and more recently instituted, branch of the Trust's work is the acquisition and preservation, with the co-operation of the Royal Horticultural Society, of gardens of national importance. It also has under its care bird sanctuaries and nature reserves, together with several hundred farms.

The National Trust now administers more than 300,000 acres of land in England, Wales and Northern Ireland; and in this area are over 2,000 properties. These properties have come into its hands mainly by gift or bequest; but since 1946 certain land and buildings accepted by the Treasury in lieu of death duties have been handed over to the Trust, the Treasury compensating itself from the National Land Fund. The properties acquired by the National Trust before last year include the Ashridge Estate (Bucks. and Herts.); Cliveden (Bucks.); West Wycombe Park and village (Bucks.); Wicken Fen (Cambs.); Lyme Park (Cheshire); Cotehele House (Cornwall); Pentire Head (Cornwall); St. Michael's Mount (Cornwall); Trencier (Cornwall); Dovedale (Derbys. & Staffs.); Arlington Court Estate (Devon); Hatfield Forest (Essex); Chedworth Roman Villa (Glos.); Hidcote Manor Gdn. (Glos.); Knole (Kent); over 70,000 acres in the Lake District including the Buttermere Valley, Monk Coniston Estate, Scafell Pike and Troutbeck Park Farm; Tattershall Castle (Lincs.); Osterley Park (Middx.); Blickling Hall Estate (Norfolk); Farne Islands (Northumberland); Clumber Park (Notts.); Holnicote Estate (Somerset); Montacute House (Somerset); Flatford Mill (Suffolk); Box Hill (Surrey); Ham House (Surrey); Bodiam Castle (Sussex); Petworth House (Sussex); Charlecote Park (Warwicks.); Lacock Abbey and village (Wilt.); Stourhead Estate (Wilt.). Derwent Estate (Yorks. and Derbys.); Hardwick Hall (Derbys.); Bodnant Gardens (N. Wales); Powis Castle (Mont.); Castlecoole (N. Ireland); Hanbury Hall (Warwicks.); Lanhydrock (Cornwall); Tintinhull House (Somerset); Nymans Gardens (Sussex); Sheffield Park Gardens (Sussex); Uppark (Sussex); Nostell Priory (Yorks.); Staunton Harold Church (Leics.); Penard Cliff (Glam); Blundell's Old School (Devon); Castleward (N. Ireland).

Recent acquisitions include more than 100 coastal properties obtained as a result of the Trust's campaign to save the coastline. In the first three years the campaign raised £1,175,000 and brought 125 miles of coast under the Trust's protection.

THE NATIONAL TRUST FOR SCOTLAND

5 Charlotte Square, Edinburgh ■

The National Trust for Scotland was founded in 1931, and its objects are similar to those of the National Trust. Like that organization, it is incorporated by Act of Parliament, is dependent for finance upon legacies, donations and the subscriptions of its members, is recognised as a charity for tax exemption purposes, and enjoys certain privileges under various Finance Acts regarding death duties.

The Trust administers about 60 major properties covering over 80,000 acres. Great houses in its care include:—The Birns, West Lothian; Brodick Castle, Isle of Arran; Crathes Castle, Kincardine-

shire; Culzean Castle, Ayrshire; Falkland Palace, Fife; Hill of Tarvit, Fife, and Leith Hall and Craigievar Castle, Aberdeenshire.

In the Trust's care are also several noteworthy gardens. Some are associated with the great houses, others are:—Inverewe, in Wester Ross; the re-created 17th century garden of Pitmedden in Aberdeenshire; and Threave in Kirkcudbrightshire, where a School of Practical Gardening is run.

Among the mountainous country owned by the Trust is the Pass of Glencoe and the mountain group "The Five Sisters of Kintail" and the estate of Torridon in Wester Ross.

Islands in the Trust's care include the St. Kilda group, and the Fair Isle. At Bannockburn, Killiecrankie, Glenfinnan and Culloiden, the Trust owns sites associated with Scottish history.

Among smaller properties are houses associated with famous Scots:—the birthplaces of Barrie in Kirriemuir, Carlyle in Ecclefechan, and Hugh Miller in Cromarty; and Burns' Bachelors' Club, Tarbolton and Souter Johnnie's House, Kirkoswald in Ayrshire.

At Culross in Fife, and at Dunkeld, Perthshire, the restoration of attractive groups of houses led to the creation of a special fund under which such properties are bought, restored and sold. Under this scheme a number of properties in the coastal burghs of East Fife and elsewhere have been and are being restored.

THE PILGRIM TRUST

Millbank House, ■ Great Peter Street, S.W.1
Trustees, Richard Fleming, M.C. (Chairman); The Lord Franks, P.C., G.C.M.G., K.C.B., C.B.E.; The Earl of Crawford and Balcarres, K.T., G.B.E.; The Lord Bridges, K.G., P.C., G.C.B., G.C.V.O., M.C.; W. F. Oakeshott; The Lord Harlech, P.C., K.C.M.G.; The Hon. Mr. Justice Fisher; The Rt. Hon. Sir Edward Boyle, Bt., M.P.
Secretary, Sir Edward Ford, K.C.B., K.C.V.O.

The Pilgrim Trust was founded in 1930 by the late Edward S. Harkness of New York, who placed in the hands of British trustees £2,000,000 for the benefit of Great Britain. Since then the Trust has been able to make substantial grants for the repair of ancient buildings, the preservation of the countryside, the support of learned societies, the preservation of historical records, the purchase of works of art and the assistance of social welfare schemes.

Since its foundation the Trust has made grants amounting to over £5,299,813 and in 1967 the Trustees voted sums totalling £358,945. These grants were made under the following three heads:—Preservation, £208,798, Art and Learning, £86,242, Social Welfare, £63,905.

In 1967 the largest single grant made by the Trustees was a contribution of £75,000, spread over five years, towards the funds of the Historic Churches Preservation Trust. The sum of £50,000 was voted towards the preservation of the fabric of York Minster, the largest single grant ever made for a Cathedral. Sums of £10,000 each were also voted towards the restoration of houses in the Fife coastal towns (under the auspices of the National Trust for Scotland), towards the restoration of Salisbury Cathedral and Thoresby College, King's Lynn, Norfolk; for the provision of new hostel accommodation in the North-Eastern Division of the National Council of the Y.M.C.A., and for the provision of a Home and Clinic to be known as St. Christopher's Hospice in South-East London.

Other grants during the year included sums of £7,500 for the establishment of a Youth Centre at St. Martin-in-the-Fields in London and for the preservation of the fabric of the redundant church

of St. Peter in the East, Oxford, on its acquisition for secular use by St. Edmund Hall, Oxford; £6,000 towards the cost of research on transcription of Braille by computer to be carried out by the Royal National Institute for the Blind, and £5,500 towards the cost of archaeological excavations in Oxford to be carried out under the auspices of the Oxford Excavation Committee.

THE CIVIC TRUST

18 Carlton House Terrace, S.W.1
[01-839-6476]

Founded in 1957 to promote high standards of architecture and civic planning in Great Britain and to improve the appearance of our towns and country. The Trust is an independent organisation whose income comes from leading industrial and commercial companies. Its funds and general policy are controlled by a board of Trustees. It has initiated hundreds of schemes to brighten and tidy up streets all over Britain, and with the help of volunteers has removed many "eyesores" which mar the countryside. The moving of hundreds of semi-mature trees into London as a pilot scheme has stimulated the introduction of new equipment for the transplanting of large trees at low cost. By conferences and reports it focuses attention on current problems of planning and architecture. It provides a centre from which over 600 local amenity societies can obtain advice and support. Whenever possible it seeks to co-operate with existing organisations which are already working effectively in these fields.

THE ARTS COUNCIL OF GREAT BRITAIN

105 Piccadilly, W.1

The Arts Council of Great Britain is incorporated under Royal Charter with the following objects:

- (a) to develop and improve the knowledge, understanding and practice of the arts;
- (b) to increase the accessibility of the arts to the public throughout Great Britain; and
- (c) to advise and co-operate with Government Departments, local authorities and other bodies on any matters concerned whether directly or indirectly with the foregoing objects.

The members of the Council, who may not exceed 20 in number, are appointed by the Secretary of State for Education and Science after consultation with the Secretary of State for Scotland and the Secretary of State for Wales. With the approval of the two latter, the Council appoints separate committees for Scotland and Wales known as the Scottish Arts Council and the Welsh Arts Council respectively.

The Council receives a grant-in-aid from the Government, and for the year 1968-69 the amount was £7,750,000.

Chairman, The Lord Goodman.

Secretary-General, R. H. Willatt.

THE BRITISH COUNCIL

65 Davies Street, W.1

The British Council was established in 1934 to promote a wider knowledge of Britain and the English language abroad, and to develop closer cultural relations with other countries. It received its Royal Charter in 1940. Most of its funds are provided by Parliament; the gross budget for 1968-69 is £13,217,000, and it administers a further £4,480,000 as agent for other Government Departments. It has representatives in some 70 countries, much of its work being devoted to education in Asia and Africa.

In its work of promoting English language teaching, the Council's main task is to advise and assist educational authorities overseas, particularly

in the training of teachers; it also maintains an English Teaching Information Centre in London; it assists in producing English-by-Television programmes overseas. It helps with the development of science teaching at school level. It runs or supplies about 200 libraries overseas, and makes grants to assist public library development in some Commonwealth countries, particularly in East and West Africa. It arranges exhibitions abroad of British books and periodicals.

It promotes educational, professional, scientific and other exchanges with overseas countries primarily by sponsoring visits in both directions. It sends British experts abroad on short advisory visits and recruits British teachers for service overseas. It awards scholarships and bursaries for study in Britain, and provides services in Britain for professional visitors.

President, General Sir Ronald Adam, Bt., G.C.B., D.S.O., O.B.E.

Chairman, The Lord Fulton.

Director-General, Hon. Sir John Henniker-Major, K.C.M.G., C.V.O., M.C.

THE PRESS COUNCIL

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. This constitution was materially amended in 1963 by the introduction of an independent chairman and up to 20 per cent. lay membership. The objects of the Council are (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to consider complaints about the conduct of the Press or the conduct of persons and organizations towards the Press; to deal with these complaints in whatever manner might seem practical and appropriate and record resultant action; (4) to keep under review developments likely to restrict the supply of information of public interest and importance; (5) to report publicly on developments that may tend towards greater concentration or monopoly in the Press (including changes in ownership, control and growth of Press undertakings) and to publish statistical information relating thereto; (6) to make representations on appropriate occasions to the Government, organs of the United Nations and Press organizations abroad; and (7) to publish periodical reports recording the Council's work and to review, from time to time, developments in the Press and the factors affecting them.

The membership of the Council consists of editorial and managerial nominees of The Newspaper Publishers Association Ltd. (5), The Newspaper Society (3), The Periodical Publishers Association Ltd. (2), The Scottish Daily Newspaper Society (2), Scottish Newspaper Proprietors' Association (1), The Guild of British Newspaper Editors (2), The National Union of Journalists (4) and The Institute of Journalists (2).

BRITISH NATIONAL EXPORT COUNCIL

6-14 Dean Farrar Street, S.W.1

[01-930-3121]

The formation of the British National Export Council was announced by the President of the Board of Trade on July 20, 1964. It is a partnership between industry, commerce and Government for collective export promotion and for co-ordination of export councils and committees, now numbering 12, each concerned with a different market overseas. It is financed partly by Government and partly by voluntary contributions from industry and commerce. It is sponsored by the City, the Confederation of British Industry, the Association of British Chambers of Commerce and the Trades Union Congress.

Director General, P. F. D. Tennant, C.M.G., O.B.E.

BRITISH STANDARDS INSTITUTION

British Standards House, Park Street, W.1

The British Standards Institution is the recognized authority in the U.K. for the preparation and publication of national standards for industrial and consumer products. The Institution originated in 1901, when the Institution of Civil, Mechanical and Electrical Engineers, together with the Iron and Steel Institute and the Institution of Naval Architects, formed a joint Engineering Standards Committee—which subsequently became the British Engineering Standards Association. A Royal Charter was granted in 1929 and with the extension of the scope of the organization to include the building, chemical and textile industries its title was later changed to "British Standards Institution".

The Institution, in consultation with the interests concerned, now prepares standards relating to nearly every sector of the nation's industry and trade. There are over 5,000 British Standards covering specifications of quality, construction, dimensions, performance or safety; methods of test and analysis; glossaries of terms; and codes of practice. Over 450 new and revised British Standards are published each year.

THE BANK OF ENGLAND

Threadneedle Street, E.C.2

The Bank of England was incorporated in 1694 under Royal Charter. It is the banker of the Government on whose behalf it manages the Note Issue, the profits on which are paid to H.M. Treasury. It also manages the National Debt and administers the Exchange Control regulations. As central reserve bank of the country, the Bank keeps the accounts of British banks, who maintain with it a proportion of their cash resources, and of most overseas central banks; but it has gradually withdrawn from new commercial business.

As from March 1, 1946, the capital stock, amounting to £14,553,000, was transferred to a nominee of the Treasury (the Treasury Solicitor), under the provisions of the Bank of England Act, 1946, holders receiving in exchange 3 per cent. Treasury Stock, to such an amount as provided them with annual interest equal to the annual gross dividend of the previous 20 years (12 per cent).

Governor, Sir Leslie Kenneth O'Brien, G.B.E. (*1971).
Deputy Governor, Sir Maurice Henry Parsons (*1971).

Directors, William Maurice Allen (*1970); James Vincent Bailey (*1972); The Lord Carron (*1971); Jasper Quintus Hollom (*1969); William

British Standards are issued for voluntary adoption though in a number of cases compliance with a British Standard is required by legislation. The Institution operates certification schemes under which industrial and consumer products are certified as complying with the relevant British Standard and manufacturers satisfying the requirements of such schemes may use the Institution's registered certification mark (known as the "Kite" mark). Other testing and certification services, together with information services, are available to industry, including help in meeting technical requirements in export markets.

The Institution is financed by voluntary subscriptions, an annual Government grant, the sale of its publications and fees for testing and certification. There are more than 12,000 subscribing members of B.S.I., including public authorities, trade and technical bodies, professional institutions, manufacturers, distributors and large scale purchasers.

Chairman of General Council, G. H. Beeby.
Director-General, H. A. R. Binney, C.B.

THE CONSUMER COUNCIL

3 Cornwall Terrace, N.W.1

The Consumer Council was set up in March 1963 by the President of the Board of Trade. Its functions are to inform itself about the consumer's problems and about matters affecting his interests, and promote action to deal with these, either by itself, by the Government, or by other interested organizations.

There are twelve members of the Council, including the Chairman and the Director, appointed by the President of the Board of Trade. The Chairman receives £1,000 a year and the members may draw £500 a year each.

The Council receives an annual grant from the Board of Trade. For 1968-69, the sixth year of operation, the amount was £210,000.

Chairman, The Lord Donaldson of Kingsbridge, O.B.E.

Members, Miss E. Ackroyd (*Director*): Prof. M. W. Beresford; J. L. L. Bryson; Mrs. J. Buchan; T. W. Cynog-Jones; Prof. A. L. Diamond; T. Fenwick; Prof. A. W. McIntosh; Miss V. Makins; Mrs. M. Miller; Mrs. P. Perks.

THE LONDON CLEARING BANKS

COMMITTEE OF LONDON CLEARING BANKERS
(1821), 10 Lombard Street, E.C.3.

The Committee consists of the Chairmen of the eleven Clearing Banks listed in the Almanack (see pp. 449-454) and meets regularly to discuss matters of common interest. It is the body through which the Bank of England communicates official policy to the banks and through which the banks may present their views to the Bank of England and the Treasury. The Committee controls the London Bankers' Clearing House.

Secretary, R. H. Barkshire, C.B.E.

Deputy Secretaries, L. M. Mears; M. C. Swift, M.C.

Asst. Secretaries, G. B. Scrine; M. N. Karmel.

INTER-BANK COMPUTER BUREAU
10 Lombard Street, E.C.3

The Inter-Bank Computer Bureau forms part of the money transfer service operated by the Clearing Banks, the Scottish Banks and the Bank of England, its main function being the inter-change of Standing Orders between the Banks. The Bureau also processes data relating to Bank Giro Credits and Debits originated under the Direct Debiting scheme, through the medium of magnetic or punched paper tape, on behalf of customers of the Banks.

Manager, R. M. Ashby.

BANKERS' CLEARING HOUSE
10 Lombard Street, E.C.3.

This is the organization through which the Clearing Banks and the Bank of England exchange cheques drawn on each other and settle their indebtedness to one another. The clearing system came into being in London during the second half of the eighteenth century, and has served as a pattern for the Clearing Houses that have been established since throughout the world.

To obtain payment for any cheque received from a customer for his credit, a banker must present it for payment to the bank on which it is drawn, and the Bankers' Clearing House affords a quick and efficient means of doing this. On an average day 2,000,000 cheques with a total value of £1,800 million, are exchanged and paid for by the eleven Clearing Banks and the Bank of England on behalf of their branches throughout England and Wales of which number over 10,000.

At present two cheque clearings are operated each business day. The Town Clearing, which takes place from 2.30 p.m. until 3.45 p.m. (from 11.30 a.m. until 11.55 a.m. on Saturdays), enables cheques of £2,000 and over (£5,000 and over on Saturdays) to be cleared the same day, provided that such cheques are drawn on, and paid into, a Town Clearing branch. There are over ninety branches of the Clearing Banks so designated within a half-mile radius of the Clearing House.

The General Clearing, which takes place each morning, handles all cheques, drawn on branches of the member banks, which cannot be passed through the Town Clearing or cleared under local arrangements. Since April, 1960, a Credit Clearing has been operated, through which the member banks exchange credit items in respect of monetary transfers between their customers. The daily average for this Clearing is 500,000 items with a total value of over £30 million.

At the end of the day each member bank works out the net balance resulting from its transactions in that day's Town Clearing, the previous day's General Clearing and Credit Clearing, and such differences as need to be adjusted. This net balance is either credited to or deducted from the bank's own account at the Bank of England.

SAVINGS BANKS

Post Office Savings Bank.—On Dec. 31, 1967, there were approximately 21,928,318 active deposit accounts in the Post Office Savings Bank, with the sum of £1,672,678,571 due to depositors in ordinary accounts and £116,084,205 in investment accounts. On December 31, 1967, Government Stocks and Banks to the amount of £974,485,261 stood to the credit of holders in the Post Office Savings Bank Section of the Post Office Register. Interest on Post Office Savings Bank ordinary deposits is allowed at 2½ per cent. per annum. A higher rate of interest is paid on deposits in Post Office Savings Bank Investment Accounts (the current rate can be ascertained at any Savings Bank Post Office). To open an Investment Account a depositor must have a balance of at least £50 in an ordinary account. A depositor may have more than one account in either series but both types of account are subject to an aggregate limit of £5,000 with certain exceptions for trust and trustee accounts.

On Dec. 31, 1967, the average amount held in Ordinary Accounts was £77 3s. 1d.; in investment accounts, approximately £300.

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community.

On Nov. 20, 1967, there were 12,031,953 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £2,499,313,873 which comprised £2,265,760,346 due to depositors in the Ordinary and Special Investment Departments, £196,207,703 Stocks and Bonds held for depositors and £37,345,824 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 1,427 (principal and subordinate) in November, 1967, can be obtained from the Trustee Savings Bank Association, 22 Manchester Square, W.1.—Chairman, E. A. G. Caroe, C.B.E.; Secretary, J. F. D. Miller.

PREMIUM SAVINGS BONDS

One of the most popular forms of saving in the United Kingdom is through Premium Savings Bonds. These bonds are ■ United Kingdom Government security and were first introduced on November 1, 1956. Instead of earning interest, however, each bond offers to its holder the chance of winning ■ money prize in a prize draw. Bonds are issued in values ranging from £1 to £500 and each £1 buys one bond, which has one chance in the prize draw.

Bonds are sold only to individuals, not to groups or corporate bodies. No more than 1,250 bonds can be held by any one person. The bonds are sold at Post Offices, Banks, Trustee Savings Banks and through certain National Savings Groups. Holders may redeem bonds at any time by completing a form which is available at Post Offices and Banks.

Prizes are paid from a fund formed by the interest, at present 4½ per cent., *per annum*, carried into the draw by each eligible bond. A bond becomes eligible for the draw three clear calendar months following the month of purchase and goes into every subsequent draw whether or not it has won ■ prize. Prizes range in value from £5,000 to £25 every month with one £25,000 prize every week, the winning numbers being selected by the electronic random number indicator equipment—usually called "ERNIE." Winning numbers are printed monthly in the *London Gazette*. Bonds are eligible for inclusion in all prize draws up to 12 months after the death of the holder. These terms also apply to bonds purchased before August 1, 1960 (Series "A").

It is estimated that by the end of June, 1968, bonds to the value of £991,800,000 had been sold. Of these £343,200,000 had been cashed, leaving £648,600,000 still invested. After the 133rd draw in June, 1968, more than 4,824,000 prizes had been distributed since the draws started. These prizes had ■ total value of £178,654,400.

NATIONAL SAVINGS CERTIFICATES

The amount, including accrued interest, remaining to the credit of investors in National Savings Certificates on March 31, 1968, was approximately £2,614,900,000. In 1967-68, £314,700,000 was subscribed and £256,900,000 (excluding interest) was repaid.

Note.—Certificates may be bought in denominations of 1, 2, 3, 4, 5, 10, 20, 50, 100 and 200 £x units.

UNIT TRUSTS

A Unit Trust is a method of investment by which money subscribed in varying amounts by individual investors is pooled in a fund, the investment and management of which is subject to the strict legal provisions of a Trust Deed. The fund is invested in carefully-selected stocks and shares by a management company and the investments so acquired are held by a Trustee (normally a bank or insurance company). Therefore, through his subscription to the Trust Fund, each subscriber acquires a fractional interest in the block of securities in which the Fund is invested, while the dividends received from the investments form the income of the trust. The net income is paid to all investors in the Trust Fund in proportion to the size of their holdings. The management company and the Trustee, who must be effectively independent of each other, are parties to the Trust Deed which must be authorized by the Board of Trade (or the Ministry of Commerce in Northern Ireland) before any public offer of units for sale may be made.

Although the record of unit trusts has been outstandingly good over the past 12 years, investment of this nature neither guarantees increasing income nor ensures continual capital appreciation. They are essentially a medium or long-term form of investment—the rate of repurchases of units by the management companies of all authorized unit

trusts in 1967 being only about 6 per cent. of the average value of funds invested.

Units are readily marketable, being bought or sold at the price (based on the value of the underlying securities) ruling at the time the order for sale or repurchase is received by the Management Company. The Board of Trade regulates the charges which Unit Trust managers may make. These charges are taken by way of an initial service charge (which is included in the sale price of a unit), and a semi-annual management fee levied on the value of the fund and taken out of either income or capital. Over a 20-year life of a Trust, the initial service charge, together with management fees, may not total more than 13½ per cent. In order to avoid the need for quoting unit prices with awkward fractions of a penny the managers are also entitled to round off the price of a unit by 3d. or 1 per cent. (whichever is the lower).

Savings Schemes

Most management companies operate savings schemes whereby an investor is able to make contributions at intervals which are utilized to purchase units at the current price, the cash balance remaining from any such purchase being carried forward and added to the next contribution. The dividend income is either paid directly to the investor every

six months, or, more generally, is used by arrangement to purchase further units for his account. In either case any unit-holder who is not liable to tax at the standard rate of tax deducted can claim appropriate relief from the Inland Revenue. Without doubt, the Savings schemes linked with life assurance have provided one of the most rapid growth sectors of the Unit Trust movement in recent years. These schemes enable a person to accumulate a sum of money for retirement, etc. with the protection of life assurance cover for the duration of the planned period of saving. At the end of this period, the investor receives all the units acquired or their cash value. If death occurs beforehand, the dependants receive all the units bought up to date, plus a cash sum equivalent to the total remaining contributions necessary to have completed the savings programme. Tax relief is available on these contributions as with other life assurance premiums.

Arrangements for Children

In general, units cannot be registered in the name of a child but they can be registered in the name of a parent or any other adult, and the registered holding can be designated with the initials of the child. Alternatively, money can be settled on a child under one of the various children's gift plans operated and the units held in trust. Income distributions, less income tax, are invested in further units, and additional units may be purchased at any time. When the child reaches a certain chosen later age, the units become his property absolutely, and in most cases he can reclaim income tax deducted from the income distributions. From the point of view of the settlor, income from the gift does not give rise to any liability on him for income tax or surtax and there are advantages in respect of estate duty.

The unit trust movement, which has been in operation for some thirty years, has experienced an upsurge in business in recent years and this is reflected in the following figures.

	Value of Funds at the Year End—£ million	No. of Holdings
1959	199·9	516,980
1960	201·4	654,520
1961	236·6	672,010

1965	521·9	1,419,100
1966	581·8	1,637,487
1967	853·6	1,711,157
1968 (30 June)	1,190·4	1,851,000

Allowing for duplication, there were over 1,000,000 separate investors at the end of 1967.

The Association of Unit Trust Managers of 306-8 Salisbury House, Finsbury Circus, E.C.2 was formed on October 13, 1959 and membership is open to any management company of an authorized unit trust scheme. It publishes an annual directory of members who represent approximately three-quarters of the funds invested in the movement. The Association's main object is to act as a consulting body amongst its members in order to agree strict standards of unit trust practices for the protection of the interest of unit holders and management companies, and to maintain the good name of the Unit Trust Movement.

The following details at November 30, 1967, relating to the management groups operating in Great Britain and Northern Ireland has been extracted from the *Unit Trust Year Book 1968*, published by Unitholder Publications Ltd.:

THE QUEEN'S AWARD TO INDUSTRY

The Queen's Award to Industry was instituted by H. M. the Queen by Royal Warrant published on March 22, 1966, "to recognise outstanding achievements in industry either in increasing exports or in technological innovation."

The Award is related to the production of goods by any branch of British industry, including agriculture and horticulture, and is made to organisations and not to individuals. The Award is normally made to particular industrial units, but units or agencies of central or local government with industrial functions, as well as research associations, educational institutions and bodies of similar character are eligible provided that they can show they have contributed to industrial efficiency in the field in which the scheme is concerned.

The Award is made for industrial efficiency, assessed in terms of achievement such as: a substantial and sustained increase in total exports over 3 years; a substantial and sustained increase in the percentage of total exports to total business over 3 years; a percentage of exports to total business which is considerably and consistently higher than the average for the applicant's sector of industry; a spectacular increase over a shorter period than three years where there is a reasonable prospect that the performance can be maintained; a breakthrough in a particularly difficult market; the greatest value of export sales by any group or company in a given year; a significant advance in the application of advanced technology to a production or development process in British industry; the production for

sale of goods which incorporate new and advanced technological qualities.

Export achievement is based on visible exports, including, where appropriate, construction work by British companies overseas. In the case of technological achievement, Awards are confined to finished products or processes resulting from or involved in the normal course of commercial production.

Industrial concerns are invited to apply for the Award and the names of winners of the Award are announced each year on the Queen's Birthday, April 21. There were 85 recipients in 1967, the third year of the Award, and the same number in 1968. Holders of The Queen's Award are entitled to display its emblem; they receive a Grant of Appointment and a representation of the emblem cast in stainless steel and embedded in a transparent block. The emblem may appear on the goods themselves.

CONFEDERATION OF BRITISH INDUSTRY

21 Tothill Street, London, S.W.1.

[01-930-6711]

The Confederation of British Industry was founded in August 1965 to promote the prosperity of British industry. It combines in a single, democratic and voluntary association the rôles previously played by the British Employers' Confederation, the Federation of British Industries and the National Association of British Manufacturers.

The C.B.I. is recognized nationally and internationally as the representative organization of British industry. It acts as a national point of reference for all those who seek the views of industry as a whole, and it advises the Government on all aspects of Government policy which affect the interests of industry, both at home and abroad.

Membership of the C.B.I. consists of some 14,000 companies and 300 trade associations and employers' organizations. In addition to these full members the nationalized industries are able to apply for membership as industrial associates, and thereby to work with the C.B.I. on problems that are the concern of all industry. A third category of Commercial Associates enables the C.B.I. to draw upon the special knowledge of those who render services to industry.

The governing body of the C.B.I. is the Council, which meets monthly in London. It is assisted by some 30 expert standing committees which advise on the main aspects of industrial policy. As well as ensuring the formulation of representative views at the centre, the C.B.I.'s regional organization helps members to debate problems within a local context. There is a C.B.I. Regional Council and office staff in each of the standard industrial development regions of the United Kingdom, including Northern Ireland. These Regional Councils send their representatives to the governing body. The C.B.I. is represented in more than 100 centres overseas.

The C.B.I. provides its members with a wide range of services and practical advice on economic, commercial, technical, social and export questions. Member companies pay subscriptions, fixed according to a scale based on the numbers employed. President, Sir Stephen Brown, K.B.E. Deputy President, A. G. Norman. Vice-Presidents, Sir Peter Runge; L. Jenkins. Director-General, J. Davies. Secretary, J. Gough.

NOTE ON CIVIL COURTS.—Smaller civil actions heard locally in County Courts which, with some exceptions, deal with all common law cases where the sum involved is less than £400. Jurisdiction given by special statutes is of the widest range and cases under such statutes are dealt with irrespective of the amount involved. County Courts are presided over by paid Judge sitting alone. The county court for the City of London is the Mayor's and City of London Court, which deals with small cases and has also jurisdiction unlimited in amount. Bankruptcy cases arising in London are dealt with in the London Bankruptcy Court, Victory House, Kingsway, W.C.2; those arising out of London are dealt with in the county courts.

Actions in the High Court are distributed among the several Divisions of the High Court according to their nature. Certain classes of actions, e.g., those dealing with the administration of estates of deceased persons, partnerships, trusts and mortgages, specific performance of contracts between vendors and purchasers of real estates, including contracts for leases, partition or sale of real estates, wardship of infants and the care of infants' estates, and company and bankruptcy cases, are usually commenced in the Chancery Division. The Queen's Bench Division deals with most ordinary civil cases. Actions may be tried in London or the Assizes. The Probate, Divorce and Admiralty Division has jurisdiction in matters concerning wills, divorces, and Admiralty, prize and shipping cases.

LAW COMMISSION

England and Wales

Lacon House, Theobald's Road, W.C.1

Set up on June 16, 1965, under the Law Commissions Act, 1965, to make proposals to the Government for the examination of the Law and for its revision where it is unsuited for modern requirements, obscure, or otherwise unsatisfactory. It recommends to the Lord Chancellor programmes for the examination of different branches of the law and suggests whether the examination should be carried out by the Commission itself or by some other body. The Commission is also responsible for the preparation of Consolidation and Statute Law Revision Bills.

Chairman, The Hon. Mr. Justice Scarman, O.B.E.

Members, L. C. B. Gower; N. Lawson, Q.C.; N. S. Marsh, Q.C.; A. Martin, Q.C.

Secretary, J. M. Cartwright Sharp.

COUNTY COURTS

In 1967 the total number of proceedings in County Courts of England and Wales (including the Mayor's and City of London Court) was 1,624,657 (as against 1,562,753 for the year 1966). The number of debtors imprisoned under the *Debtors Act*, was 3,155 (1966), and 3,329 (1967) and of the last number 1,065 served the full terms of imprisonment for "Contempt of Court" in failing to comply with the order for payment.

CROWN COURTS

The Criminal Justice Administration Act, 1956, authorized the setting up of two new courts, known as the *Crown Court of Liverpool* and the *Crown Court of Manchester*. These Courts took over the jurisdiction of the former Courts of Quarter Session for Liverpool and Manchester and the criminal jurisdiction of the Assize Courts for the West Derby and Salford Divisions of Lancashire. The Courts are normally presided over by the Recorders of Liverpool and Manchester who have power to refer assize cases for trial by a judge of the High Court.

THE ARMED FORCES

MINISTRY OF DEFENCE

Main Building
Whitehall, S.W.1
[01-930-7022]

On April 1, 1964 a unified Ministry of Defence was created which absorbed the four separate departments which had previously been responsible for defence matters, namely the Admiralty, the War Office, the Air Ministry and the Ministry of Defence. This Department is now responsible for the formulation of defence policy and the control and administration of the armed forces.

The Ministry is broadly organized into central staffs, who are concerned with general defence policy and strategy, and staffs, under the Admiralty Board, the Army Board and the Air Force Board of the Defence Council, who are responsible for the control and administration of the three Services. The Minister in charge of the department is the Secretary of State for Defence and he is assisted by a Minister of Defence for Administration, a Minister for Equipment and Parliamentary Under-Secretaries of State, one for each Service.

ROYAL MARINES

The Corps of Royal Marines (instituted 1664) is trained for service on sea and land. The primary duty of the Royal Marines is the provision of five commando units, three of which are at present serving abroad. They also serve at sea in H.M. Ships and provide landing-craft crews, special boat sections (frogmen) and other detachments for amphibious operations. The Corps also provides

bands for H.M. ships and R.N. and R.M. shore establishments. Estimated strength of the Royal Marines in 1967-1968, 9,070 all ranks.

The Territorial and Army Volunteer Reserve came into being on April 1, 1967, replacing the Army Emergency Reserve and the Territorial Army. This force is divided into four categories, each with a separate role.

The Special Army Volunteer Reserve (S.A.V.R.)—the "Ever Readies"—are members of T. & A.V.R. I. with an establishment of about 1,600 and up to about 3,500 individuals from T. & A.V.R. II and the Regular Army Reserves. They are liable for call-out at any time at the discretion of the Secretary of State for Defence for a period not exceeding six months.

The T. & A.V.R. II are a force of all arms with an establishment of 50,000. Their role is to support and reinforce the Regular Army in times of national emergency.

The T. & A.V.R. III are a lightly equipped force some 23,000 strong and are trained as basic infantrymen for the role of assisting the police and civilian authorities in the event of a nuclear attack. It was announced in Jan. 1968 that T. & A.V.R. III was being disbanded.

T. & A.V.R. IV. This category consists of miscellaneous units and includes Officers' Training Corps and the T. & A.V.R. Bands.

T. & A.V.R. I and II are known as the "Volunteers" and T. & A.V.R. III as the "Territorials".

NAVY, ARMY AND AIR FORCE INSTITUTES

Imperial Court, Kennington Lane, S.E.11.

Navy, Army and Air Force Institutes, known to the Services as NAAFI, is H.M. Forces' official trading organization. In addition to the provision of clubs and canteens at home and overseas and in H.M. Ships, NAAFI is responsible for the provision of a large part of the items required for the messing of H.M. Forces. Registered under the Companies Act as a Association not for profit, NAAFI exists for the exclusive benefit of the serving element of H.M. Forces.

For the year ended April 29, 1967, rebate and discount amounting to £3,027.901 were paid to the Services. Extra rebate totalling £353.790 was also placed at the disposal of the Service Ministries for the welfare of the Forces.

ROYAL OBSERVER CORPS

Bentley Priory, Stanmore, Middlesex

Established 1925, the Royal Observer Corps is a uniformed voluntary civilian organization originally set up to identify and track the movement of aircraft in war. In 1955 the Corps assumed the modern role of detecting nuclear bursts and monitoring radioactive fall-out in support of the United Kingdom Warning and Monitoring Organization. The Corps is affiliated to the Royal Air Force and is administered by Strike Command.

Air Commodore-in-Chief, H.M. THE QUEEN.

Commandant, Air Commodore D. F. Rixson, O.B.E., D.F.C., A.F.C.

THE UNION JACK SERVICES CLUBS

Patron: H.R.H. the Duke of Gloucester.

President: Major-Gen. Sir Julian Gascoigne, K.C.M.G.

Comptroller: Col. C. A. la T. Leatham.

Secretary: Lt.-Cdr. H. Cole, R.N.

THE UNION JACK CLUB

Waterloo Road, S.E.1 Tel.: 1ox-928-6401

Opened in 1907, this is one of our great National Institutions, where all the facilities of their own large residential Club are available to Sailors, Soldiers and Airmen on leave in or passing through London. Comfortable bedrooms and good meals are available at moderate charges, and the amenities include library and writing room, smoke room, lounge bar, billiards room, colour television, radio,

barber's shop, laundrette, baggage room and club shop. The Club is open throughout the day and night and has a total accommodation of 936 beds.

All serving men below commissioned rank are automatically members of the Club and honorary membership is extended to the Forces of other Powers visiting England. A limited number of ex-Servicemen may be elected to individual membership and, subject to the priority given to serving personnel, accommodation on a temporary honorary basis may be made available to other ex-service men on written application.

The Club also provides excellent facilities for Reunion occasions at reasonable charges.

The Union Jack Families Club, Exton Street, Waterloo, S.E.1. Established in 1923, this Club provides accommodation and meals at moderate charges for the wives and children (with or without their husbands and fathers) of members and ex-members of the Royal Navy, Army and Royal Air Force, below commissioned rank. Accommodation available for 200. Warden: Miss M. F. Robertson.

The Union Jack Women's Services Club. Is incorporated into the Families Club in Exton Street, Waterloo, and is, for Service and ex-Service women (including those of the Forces Nursing Services), the counterpart of the Union Jack Club. The Club has accommodation for 31 in single and shared rooms, and all the usual facilities of a residential Club.

RELATIVE RANK—SEA, LAND AND AIR

SERVICE PAY AND PENSIONS

Pay and Pensions of the Armed Forces are reviewed regularly at intervals of not more than two years, taking into account movements in civilian earnings in a range of occupations. The following tables show rates of pay effective from April 1, 1966, detailed in *Service Pay and Pensions* (Cmnd. 2903) in 1966. In general the rates shown below are for United Kingdom-based regulars of the three Services; where Army ranks only are shown, rates apply equally to equivalent ranks in the other Services.

Increases 1968

On May 30, 1968, the Government announced a 7 per cent. rise in pay for the Armed Forces as a whole, back-dated to April 1, 1968. Actual increases were expected to vary according to rank, the lower ranks receiving a larger percentage increase than higher ranks. The Prices and Incomes Board in their report to the Government recommended an increase of 3s. per day in the rent allowance for married servicemen not allotted married quarters. Detailed figures of the new pay scales for officers and other ranks had not been published at the time of going to press, but provisional figures provided by the Ministry of Defence on May 30, 1968 for married servicemen renting private accommodation indicated that privates would get an extra 35s. a week, 11·6 per cent. more; lieutenant-colonels an extra 87s. 6d. a week, or 7·5 per cent more; the percentage to vary through the ranks.

Women's rates of pay maintain the ratio of approximately 85 per cent. of the equivalent men's rates.

THE CHURCH OF SCOTLAND

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly), to whom Her Majesty the Queen has granted precedence in Scotland, during his term of Office, next after the Lord Chancellor of Great

Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives up to £7,500 towards his expenses. The country, for Church purposes, is divided into 12 Synods and 59 Presbyteries, and there are about 2,000 ministers and licentiates engaged in ministerial and other work. There are now 63 in all, including: (1) The Presbyteries of England and (2) The Presbyteries of (a) Northern

Europe, (b) Southern Europe, (c) Spain and Portugal. The figures at Dec. 31, 1967, are:—

Congregations, 2,150; total membership 1,220,023. In 21 Overseas Mission fields, there are European missionaries (and in addition many missionaries' wives, most of whom are doing mission work in the various fields).

THE METHODIST CHURCH

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revd. John Wesley (born June 17, 1703; died March 2, 1791) and his brother, Revd. Charles Wesley (born Dec. 18, 1707; died March 29, 1788).

On September 20, 1932, the Wesleyan Methodist Church, the Primitive Methodist Church and the United Methodist Church were united and became "The Methodist Church."

The Methodist Church is governed primarily by the Conference, secondarily by the District Synods (held in September and May), consisting of all the ministers and of selected laymen in each district, over which a chairman is appointed by the Conference; and thirdly by circuit quarterly meeting of the ministers and lay officers of each circuit. The authority of both Synods and Quarterly Meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.

President of the Conference (July, 1968-69), Rev. E. G. Rupp, M.A., D.D., D.Theol.

Vice-President of the Conference (July, 1968-69), J. C. Blake, C.B.

Secretary of the Conference, Rev. E. W. Baker, M.A., Ph.D., 1 Central Buildings, Westminster, S.W.1. *President Designate* (1969-70), Rev. B. S. O'Gorman. *Vice-President Designate* (1969-70), T. K. J. Leese.

Statistics.—In 1967 in association with the Conference in Great Britain (at home and in overseas Districts) there were 4,403 Ministers, 30,498 Local Preachers, 773,074 Members and Probationers, and 12,141 Churches.

The World Methodist Council, founded 1881, reorganized 1951, associates Methodism throughout the world in 82 countries.

The Methodist Church was founded in 1739 by the two brothers Wesley and rapidly spread throughout the British Isles and to America before 1770. The Methodist Church in Great Britain was united in 1932 by the fusion of the Wesleyan Methodist Church which was the original section, the Primitive Methodist Church, which arose through the evangelists Hugh Bourne and William Clowes in 1810, and the United Methodist Church, itself a fusion in 1907 of the Methodist New

Connexion which dated from 1797, the Bible Christian Methodist Church, which dates from 1815 and the United Methodist Free Churches which originated in controversies in 1828 and 1849. The Methodist Church of America was formed by a union of three great Methodist denominations in 1939.

METHODIST CHURCH IN IRELAND

The Methodist Church in Ireland has 235 Ministers, 328 Lay Preachers, 30,173 Adult and 19,226 Junior Members, 1,715 Sunday School Teachers and 12,798 Scholars.

President (1968-69), Rev. G. G. Myles, M.A. *Secretary*, Rev. H. Sloan, 90 Osborne Park, Belfast, 9.

THE UNITED CHURCH OF CANADA

The United Church of Canada is the result of the union (1925) of Methodist, Presbyterian and Congregational Churches in Canada. *Sec. of General Council*, Rev. Ernest E. Long, B.A., D.D., LL.D., The United Church House, 85 St. Clair E., Toronto.

INDEPENDENT METHODISTS

Independent Methodists.—This body is Congregational in its organization, with an unpaid Ministry. Its first Conference was held in 1805. In 1968 there were in Great Britain 235 Ministers, 6,957 Members, 143 Chapels and 7,192 Sunday School scholars. *Joint Secretaries*, W. Drummond Brown, 11 Ashley Drive, Swinton, Lancs.; D. S. Downing, 4 Meadow Avenue, Loughborough, Leics.

WESLEYAN REFORM UNION

This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland and Northern counties. In 1968 there were in Great Britain 22 Ministers, 243 Lay Preachers, 5,217 Members, 156 Chapels and 6,146 Sunday scholars. *President* (1968-69), T. Ashby, Sheffield. *General Secretary and Connexional Editor*, Rev. A. Halladay, Wesleyan Reform Church House, 123 Queen Street, Sheffield, 1.

THE CALVINISTIC METHODIST CHURCH OF WALES

The CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is a constituent of the Pan-Presbyterian Council or Alliance. It is also a member of the British Council of Churches and the World Council of Churches. It has foreign missions in Assam and India.

In 1967 the body numbered—chapels and other buildings, 1,338; ministers in pastoral charge, 388; elders, 6,748; communicants 116,674; Sunday-school teachers and officers 8,433; Sunday-school scholars 55,309. Contributions for various religious purposes (including the ministry), £1,079,058.

One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children.

THE INDEPENDENTS

AND THE BAPTISTS

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches united to form

the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine provinces were formed, each with a Moderator. There

52 county and other Associations in the British Isles, with 2,759 churches and preaching stations with 2,772 ministers and 198,488 members in England and Wales. The Congregational Church in England and Wales was formed in 1966. President of the Congregational Church in England and Wales (1968-69), Rev. C. A. Haig, LL.B. Minister Secretary, Rev. J. Huxtable, M.A., Livingstone House, 21 Carteret Street, S.W.1.

The Countess of Huntingdon's Connexion, with 37 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. Most of the churches are affiliated with the Congregational Church in England and Wales.

Secretary, H. W. L. Keeping. Offices, 4 Elgin Park, Redland, Bristol 6.

THE CONGREGATIONAL UNION OF SCOTLAND. In 1795 James and Robert Haldane left the Church of Scotland and the churches which they founded

Other Religious Denominations.

The General Assembly of Unitarian and Free Christian Churches has about 226 ministers, 330 chapels and other places of worship in Great Britain and Ireland. *Gen. Sec., Rev. John Kielty, Essex Hall, Essex Street, W.C.2.*

The Salvation Army, first known as the Christian Mission, was founded by William Booth, in the East End of London in 1865. In 1878 it took its present name and adopted a quasi-military method of government. Since then it has become established in 70 countries of the world. The head of the denomination, known as the General, is elected by a High Council consisting of all the Commissioners of the Army. In 1966 there were, in Great Britain, 1,199 Corps (Churches), 2,977 Officers engaged in evangelistic work and 53,933 Local Officers (lay workers). The latest statistics for the world (1966) — 16,190 Corps and 25,248 Officers. *General, Frederick Coutts, c.b.e.*

International Headquarters:—101 Queen Victoria Street, E.C.4.

The Brethren number about 80,000, of whom five-eighths belong to the "Open" body. The Society of Friends (Quakers) consists of 20,980 members in Great Britain, and has 440 places of worship (*Recording Clerk, Arthur J. White*).

THE JEWS

It is estimated that about 450,000 Jews are resident in the British Isles, some 280,000 being domiciled in Greater London.

The Board of Deputies of British Jews, established in 1760, is the representative body of British Jewry and is recognized by H.M. Government. The basis of representation is mainly synagogal, but secular organizations are also represented. It is a deliberative body and its objects are to watch over the interests of British Jewry, to protect Jews against any disability which they may suffer by reason of their creed and to take such action as may be conducive to their welfare. *President of the Board of Deputies (Woburn House, Upper Woburn Place, W.C.1), M. M. Fidler. Secretary, A. J. Marks.*

CHIEF RABBI—The Very Rev. I. Jakobovits, Ph.D. *Secretary, Rabbi A. Rose, Office, Adler House, Tavistock Square, W.C.1.*

The Beth Din (Court of Judgment) is a rabbinic body consisting of *Dayanim* (Assessors) and the Chief Rabbi, who is President of the Court. The Court arbitrates when requested in cases between Jew and Jew and gives decisions on religious ques-

formed the Congregational Union in 1812, which in 1896 united with the Evangelical Union (founded in 1843 by James Morison). There are 127 Churches of the Congregational Union of Scotland with a membership of 28,502. Of the 144 Ministers, 94 are Pastors. *President, Rev. D. Sutherland, Aberdeen. Secretary, Rev. J. T. George, 215 West George Street, Glasgow, C.2.*

The BAPTISTS have over 27,500,000 members in all countries. They are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1812-13. In the British Isles there were, in 1967, 2,115 pastors and deaconesses. The members numbered 284,999, young people (14-20), 55,907, juveniles (under 14) 197,422. *President of the Baptist Union of Great Britain and Ireland (1968-69), Rev. G. R. Beasley-Murray. Secretary, Rev. D. S. Russell. Office, 4 Southampton Row, W.C.1.*

The total number in the world is about 197,000 (123,000 are in U.S.A. and Canada). *Central Offices (Great Britain), Friends House, Euston Road, N.W.1, (Ireland), 6 Eustace Street, Dublin. The Oxford Group (Moral Re-Armament), Hdqrs., 4 Hays Mews, Berkeley Square, W.1.* The First Church of Christ, Scientist, in Boston, Massachusetts, U.S.A. *District Manager, Committees on Publication for Great Britain and Ireland, Ingersoll House, 9 Kingsway, W.C.2), has 321 branch churches and societies in Great Britain and Ireland. The Moravian Church, 5 Muswell Hill, N.10, has in the U.K. 40 congregations and preaching stations, with 2,773 communicants. The Free Church of England (otherwise called The Reformed Episcopal Church) has 34 churches in England. *Gen. Sec., Rev. W. C. Watkins, 8 Brassey Avenue, Broadstairs, Kent. The Seventh Day Adventists (Hdqrs., Stanborough Park, Watford, Herts.), have 122 organized churches, 57 companies and 11,319 members in the British Isles. At Woking, Surrey, is the Shah Jehan Mosque for Moslems, the first in Great Britain, built in 1889. There are also Mosques at Southfield, S.W.18, Commercial Road, E.1, Birmingham, Manchester, Cardiff, Newcastle upon Tyne, South Shields, Coventry and Glasgow.**

THE ROMAN CATHOLIC CHURCH

HIS HOLINESS POPE PAUL VI (Giovanni Battista Montini), Roman Pontiff, born in Concesio, Italy September 26, 1897; ordained priest May 29, 1920; nominated *Archbishop of Milan*, November 2, 1954; *Cardinal*, December 15, 1958; elected Pope June 21, 1963; crowned June 30, 1963.

THE SACRED COLLEGE OF CARDINALS, when complete, consisted of six Cardinal Bishops, fifty Cardinal Priests and fourteen Cardinal Deacons. This number was fixed by Pope Sixtus V in 1586. Pope John XXIII created 52 new Cardinals. The present Pope created 27 new Cardinals on Feb. 22, 1965 and a further 27 on June 26, 1967. In August 1968 there were 104 Cardinals. The Cardinals are advisers and assistants of the Sovereign Pontiff and form the supreme council or Senate of the Church. On the death of the Pope they elect his successor. The assembly of the Cardinals at the Vatican for the election of a new Pope is known as the Conclave in which, in complete seclusion, the Cardinals elect by secret ballot; a two-thirds majority is necessary before the vote can be accepted as final. When a Cardinal receives the necessary votes the Dean of the Sacred College formally asks him if he will accept election and the name by which he wishes to be known. On his acceptance of the office the Conclave is dissolved and the First Cardinal Deacon announces the election to the assembled crowd in St. Peter's Square. On the first Sunday or Holyday following the election the new Pope is crowned with the tiara, the triple crown, the symbol of his supreme spiritual authority. A new pontificate is dated from the coronation.

LONDON CATHEDRALS, CHURCHES, ETC.

ST. PAUL'S CATHEDRAL, City of London, E.C.4 (x675-1720), cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). The choir and high altar were restored in 1958 after war damage and the North Transept in 1962. The American War Memorial Chapel was consecrated in November, 1958. The Chapel of the Most Excellent Order of the British Empire in the Crypt of the Cathedral was dedicated on May 20, 1960. Nave and transepts free; Fees to the following parts (on weekdays only, 11 a.m. to 3.30 p.m. and—during Summer Time only—4.45 p.m. to 6 p.m.); Crypt, 1s.; Library, whispering gallery, and stone gallery, 2s.; golden gallery 1s.; ball, 1s.; total, 5s. Service on Sundays ■ 8, *10.30, *3.15, and *6.30. Weekdays at 8, *10, *4. Also Fridays, *12.30 p.m. short mid-day service. (*Services are choral.)

WESTMINSTER ABBEY, S.W.1 (built A.D. 1050-1760).—Open on weekdays at 8 a.m. Admission to Royal Chapels by fee of 2s. (children 6d.) (weekdays) except on Fridays (open free). Transepts and Nave open on Sundays only between services. Holy Communion at 8; matins at 10.30; Holy Communion at 11.30. Evensong at 3. Evening service with Sermon at 6.30; Daily—Holy Communion at 8 a.m.; Westminster School Service at 9 a.m.; matins 10.30 a.m.; 10 a.m. (choral) Tues. and Fri.; evensong (choral), 5.0 p.m. (Saturday and Bank Holidays, 3 p.m.). Chapel of Henry VII, Chapter House and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I, Edward III, Henry V, Mary Queen of Scots, Queen Elizabeth I), and many other monuments and objects of interest, including the grave of "An Unknown Warrior" and St. George's Chapel at the W. end of Nave (1920), and Poets' Corner. The Coronation Chair encloses the "Stone of Scone" brought from Scotland by Edward I in 1297.

SOUTHWARK CATHEDRAL, south side of the Thames, near London Bridge, S.E.1.—Mainly 13th century, but the nave is largely rebuilt. Known as St. Mary Overie before 1540. Open 7.30 a.m. to 6.30 p.m., free. Sunday services, Holy Communion, 8.30 and 11 a.m., Morning Prayer, 10 a.m., Evening Prayer, 3 p.m., Discussion, 6.30 p.m. Weekdays: Matins, 7.40 a.m.; Evensong, 5.30 p.m. (choral except Thursdays and Saturdays) (5 p.m. on Saturdays). Holy Communion, 8 a.m., also 5.45 p.m. Thursdays and 1.10 p.m. Fridays. The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; Shakespeare effigy backed by view of Southwark and Globe Theatre in S. aisle; the altar screen (erected 1520) has been restored; the tomb of Bishop Andrews (died 1626) is near screen. The Early English Lady Chapel (behind the choir), restored 1930, is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner); and is still used for this purpose. John Harvard, after whom Harvard University is named, was baptized here in 1607.

TEMPLE CHURCH, The Temple, E.C.4.—The nave forms one of five remaining round churches in England. Rebuilding of the church was completed

in 1958. Sunday morning services, open to the public, 11.15 a.m., except in August and September. Master of the Temple, Rev. R. L. P. Milburn, M.A. Reader, Rev. W. D. Kennedy-Bell, M.A.

PROFESSIONAL EDUCATION

NOTE.—References to university courses in the sections following cover first degrees; the considerable facilities available at universities for post-graduate study or research are not treated.

ACCOUNTANCY

Degrees.—Under a scheme arranged by the Joint Standing Committee of the Universities and the Accountancy Profession (details from Secretary of Joint Standing Committee, Institute of Chartered Accountants in England and Wales) it is possible to obtain within 5½ years both a university degree and a professional qualification. The participating Universities are: Aston in Birmingham, Bath, Birmingham, Bradford, Bristol, Hull, Kent at Canterbury, Leeds, Liverpool, London (London School of Economics and Political Science), Manchester, Newcastle upon Tyne, Nottingham, Sheffield, Southampton, Wales (University Colleges at Aberystwyth and Cardiff). In addition the University of Strathclyde awards a degree in Accountancy.

Full-time courses of nine months' duration are held at twelve colleges of further education all provisionally designated as "Polytechnics" at Bristol, Coventry, Leeds, Liverpool, London (City of London College; City of Westminster College; Enfield College of Technology; Kingston College of Technology), Manchester, Newcastle upon Tyne, Nottingham and Portsmouth.

Professional Bodies.—The main bodies granting membership on examination after a period of practical work are:

INSTITUTE OF CHARTERED ACCOUNTANTS IN ENGLAND AND WALES, 56 Goswell Road, E.C.1.

INSTITUTE OF CHARTERED ACCOUNTANTS OF SCOTLAND, 27 Queen Street, Edinburgh, 2, and 218 St. Vincent Street, Glasgow, C.z.

TECHNICAL EDUCATION

(See also: AERONAUTICS; BUILDING; COMPUTER SCIENCE; ENGINEERING; FUEL TECHNOLOGY; MINING; OPTICS; PATENT AGENCY; PRINTING AND TEXTILES.)

Regional Advisory Councils

Set up in 1947 (i) to bring education and industry together to find out the needs of young workers and advise on the provision required, and (ii) to secure reasonable economy of provision. They also have certain responsibilities in connection with the procedure for the approval by the Department of Education and Science of advanced courses, and issue handbooks, etc., giving, for the guidance of students and teachers, information about the facilities available within a region or district for various types of training (e.g. electrical engineering, textiles, building and chemistry). There are ten Regional Advisory Councils, in England and Wales:—

REGION I (LONDON AND HOME COUNTIES).—Regional Advisory Council for Technological Education, Tavistock House South, Tavistock Square, W.C.1.

REGION 2 (SOUTHERN).—Regional Council for Further Education, 9 Bath Road, Reading.

3 (SOUTH-WEST).—Regional Council for Further Education, Lower Castle Street, Bristol, 1.

4 (WEST MIDLANDS).—Advisory Council for Further Education, Pitman Buildings, Corporation Street, Birmingham, 4.

5 (EAST MIDLANDS).—Regional Advisory Council for the Organization of Further Education, Robbins Wood House, Aspley, Nottingham.

6 (EAST ANGLIA).—Regional Advisory Council for Further Education, County Hall, Martineau Lane, Norwich.

7 (YORKSHIRE).—Council for Further Education, Bowling Green Terrace, Jack Lane, Leeds 11.

■ (NORTH-WEST).—Regional Advisory Council for Further Education, Africa House, 54 Whitworth Street, Manchester, 1.

9 (NORTHERN).—Advisory Council for Further Education, 5 Grosvenor Villas, Grosvenor Road, Newcastle-upon-Tyne, 2.

10 (WALES).—Welsh Joint Education Committee, 30 Cathedral Road, Cardiff.

Technical Colleges

Nearly all technical colleges in England and Wales are maintained or assisted by local education authorities. There are about 560 colleges of which 25 are regional colleges providing a substantial amount of higher education including, in particular, full-time and sandwich courses. They also carry out some less advanced work. A wide range of mainly part-time vocational courses are provided by the other colleges, of which over a third offer courses to H.N.C. level or its equivalent and the remainder to O.N.C. or its equivalent. However, the existing pattern is being altered and in future the development of full-time (and to a lesser extent part-time) higher education will be concentrated in some 30 institutions, to be known as Polytechnics, which will be based upon existing colleges. This reorganization is not yet complete.

Regional Colleges. These are colleges which do a substantial amount of higher education, including in particular, full-time and sandwich courses. However they also carry out some less advanced work. There are at present 25 regional colleges:—

SUNDERLAND TECHNICAL COLLEGE.—*Princ.*, M. Hutton, Ph.D.

TREFOREST: GLAMORGAN COLLEGE OF TECHNOLOGY.—*Princ.*, D. P. Evans, C.B.E., Ph.D.

In addition to these colleges, there are some 7,500 Evening Institutes and similar types of establishment providing a wide variety of non-vocational classes for adults.

There are also four *National Colleges* providing advanced and post-graduate courses for the comparatively few students from certain highly specialized industries for whom it would be impracticable to provide the highest level of education on a local basis. These colleges, which are financed partly by contributions from the industries concerned but principally by means of grants from the Department of Education and Science, are:—

NATIONAL COLLEGE FOR HEATING, VENTILATING, REFRIGERATION AND FAN ENGINEERING, Borough Polytechnic, Borough Road, S.E.1.—*Princ.*, D. R. Scott, M.Sc., Ph.D.

NATIONAL COLLEGE OF RUBBER TECHNOLOGY, Northern Polytechnic, Holloway Road, N.7.—*Princ.*, J. Glazer, Ph.D.

NATIONAL LEATHERSELLERS COLLEGE, Tower Bridge Road, S.E.1.—*Princ.*, J. P. Danby, Ph.D., B.Sc.

NATIONAL COLLEGE OF AGRICULTURAL ENGINEERING, Silsoe, Bedford.—*Princ.*, P. C. J. Payne, Ph.D.

Scottish Technical Education Consultative Council

The Consultative Council represents both sides of industry and educational interests. The Council's object is "to secure the widest possible measure of consultation on vocational further education between employers, employees and those responsible for its provision, and to advise, and generally to promote, the development of such education".—Sec., Mrs. E. C. G. Craghill, Scottish Education Department, York Buildings, Edinburgh, 2.

Scottish Technical Colleges

Technical education is available at approximately 100 day-course schools and colleges in Scotland, including those which specialize in a particular subject. The following are among those recognized by the Scottish Education Department as "central institutions" (colleges for higher technical learning); other Scottish central institutions appear under Agriculture, Art, Domestic Science and Music.

Industrial Training Foundation 18 Thurloe Place, S.W.7

Formed in 1964 with the support of the Ministry of Labour (now Department of Employment and Productivity) and the Department of Education and Science to assist in implementing the Industrial Training Act 1964.

It provides a service for all industries and all categories of employees through its six regional offices. A Training Officer and Advisory Service assists individual firms in the development of training programmes and makes available the part-time services of its qualified training officers. This service also provides assistance in maintaining training records required by Industrial Training Boards and advice on dealing with questionnaires and

grant claims. The main objectives of the ITF are: assessment of training needs; management development; provision of courses for training officers and instructors; training of supervisors and operators; the organization and administration of group training schemes.

A further objective of the ITF under its training officer service is the operation and expansion of the Engineering Industries Group Apprenticeship (EIGA) formed in 1953, which serves 1,000 firms throughout the country and provides 3,000 training places.

TEXTILES

Degrees in Textiles or Fibre Science are awarded by the Universities of Bradford, Leeds, Manchester (Manchester Institute of Science and Technology) and Strathclyde. Courses leading to degrees in Textile Technology granted by the Council for National Academic Awards are provided by the Scottish Woollen Technical College and in Textile Marketing by Huddersfield College of Technology.

THE TEXTILE INSTITUTE, 10 Blackfriars Street, Manchester 3, is an examining body.—*Gen. Sec.*, D. B. Moore, B.A.

Vietcong made attacks on 47 towns throughout South Vietnam. 20. Fighting broke out again on outskirts of Saigon when South Vietnamese troops fought three large Vietcong forces. March 7. Heavy losses were incurred by U.S. and Government forces when North Vietnam troops overran camp 6 miles west of Da Nang base. 14. It was announced in Saigon that 20,000 U.S. troops had been killed in battle in Vietnam from New Year's Day 1961, until present week. 21. In Saigon, President Nguyen Van Thieu announced plans to expand South Vietnam armed forces by 135,000 men to total in excess of 800,000. April 19. North Vietnam rejected all sites for preliminary peace contacts suggested by U.S.A. and insisted on Warsaw as meeting place. U.S. jet bombers flew 145 missions against North Vietnam, highest daily total of year. May 5. Vietcong launched "second wave" offensive against Saigon and other targets in South Vietnam. 13. U.S. command announced that Vietcong attack on Saigon had been repulsed and enemy had lost nearly 3,000 men. 16. It was stated that 562 U.S. servicemen had been killed in action, highest number for any week of Vietnam war; 1,153 were wounded. 23. It was announced that 7,504 U.S. servicemen had been killed since beginning of year. June 2. Four South Vietnam colonels, including Saigon police chief, were killed in explosion at command post in Saigon. Aug. 18. Vietcong launched eighteen separate attacks on allied positions in different parts of South Vietnam, mostly in areas near Cambodian and Laotian borders. 20. Nearly a whole platoon of U.S. and South Vietnamese was wiped out when its position was overrun by Vietcong battalion south of Da Nang. 27. Military sources in Saigon announced that South Vietnamese troops had killed 7,500 guerrillas since new spate of insurgent attacks which began nine days earlier. Sept. 9. U.S. headquarters reported that two U.S. ships had destroyed 58 North Vietnamese supply boats in Gulf of Tonkin.

THE CENTENARIES OF 1969

Domestic problems in 1869 centred almost exclusively on Mr. Gladstone's Bill for the disestablishment and disendowment of the Church of Ireland. The large Government majority secured an easy passage for it through the Commons; but its possible fate in the Lords was the subject of much conjecture. For a time a constitutional conflict seemed possible, but this was averted by negotiations in which, among others, the Queen and Dr. Tait, the recently appointed Archbishop of Canterbury, were concerned. The second reading was carried in the Lords on June 19 by a majority of 33. Many amendments were made in Committee and further clashes between the two Houses in consequence threatened; but compromise prevailed, and the Bill duly received the Royal Assent on July 26.

The Queen declined to open Parliament in person, partly on the ground that she did not wish to appear to take a partisan attitude in the Irish Church question. For much of the year her Ministers were again exercised with the problem of inducing her to appear more frequently in public. The Viceroy of Egypt paid a short visit to England at the end of June in return for that of the Prince and Princess of Wales to Egypt in February, and the Queen agreed to invite him to a Breakfast in the grounds of Buckingham Palace. She was also present when he reviewed the Household troops at Windsor. Later in the year on Nov. 6, the Queen opened the new Blackfriars Bridge and Holborn Viaduct, an occasion which proved a triumphant success, in spite of the reluctance with which Her Majesty faced the undertaking.

During the year London was the scene of many other improvements. Southwark Park was opened on June 18, and Finsbury Park on Aug. 7. A further extension of the Thames Embankment, from Westminster Bridge to Vauxhall, was completed in the autumn, and on Dec. 6 the first part of the East London Railway, from New Cross to Wapping, was opened.

On the other hand, the Royal Dockyard at Deptford and Woolwich Dockyard, both of which had been used for naval purposes since Tudor days, were closed during the year, in March and September respectively.

Outside London, the new Albert Docks at Hull were opened by the Prince of Wales on July 22, and the famous William Wallace monument near Stirling was completed in September.

The year was in general one of peace and a reduction in the naval and military estimates was one of the factors which enabled Mr. Lowe, the Chancellor of the Exchequer, to reduce income tax by a penny — to 5d. in the pound. There was a considerable reduction in the activities of the Fenians, though the Mayor of Cork was compelled to resign in consequence of an inflammatory speech which he had made. Some Fenian prisoners were released during the year, but the Government resisted appeals for a more general amnesty.

The appointment of Dr. Frederick Temple, Headmaster of Rugby (and later Archbishop of Canterbury) to the bishopric of Exeter aroused considerable opposition, because he had contributed to *Essays and Reviews*, a work which had been regarded as heterodox, though no criticism was made of Dr. Temple's own essay. A number of protests were made, but Dr. Temple's appointment was duly confirmed, though eight bishops declined to take part in his consecration.

Among disasters during the year was a fatal panic at the Theatre Royal, Bristol, where on Dec. 27, 18 people were trampled or crushed to death in the passage leading to the pit and gallery.

In the United States, General Grant was inaugurated as President on March 4. Hopes for the final settlement of the long-standing controversy over the Alabama were deferred. The agreement signed in Nov. 1868 by the British Government and Mr. Reverdy Johnson, the U.S. Minister in London, was rejected by the U.S. Senate on April 13 by 54 votes to 1, Senator Sumner making a violently anti-British speech. In September, President Grant's Secretary of State, Mr. Hamilton Fish, sent a vigorous despatch to London, but the Foreign Secretary, Lord Clarendon, declined to accept his arguments.

In the autumn, Napoleon III decided to abate his system of personal rule and introduce the principle of ministerial responsibility to the Legislature. The Senate approved his proposal and an Imperial decree giving effect to it was promulgated on Sept. 8. On Dec. 27 the Emperor authorized M. Emile Ollivier, the Liberal leader, to form a Government representing the majority of the Legislative Body.

One of the last great acts of pageantry during the Second Empire took place in November when, with much ceremony, the Suez Canal was opened. The yacht *Aigle*, with the Empress Eugénie on board, led a fleet of vessels through the Canal and entered the Red Sea on Nov. 19. The Emperor of Austria, the Crown Prince of Prussia and Prince William of Orange were also present, all as guests of the Khedive.

Sporadic fighting continued in Spain during 1869. The Constituent *Cortes* decided in favour of a monarchy and appointed Marshal Serrano as Regent, but by the end of the year no King had been chosen, the throne having been declined by the fifteen-year-old Duke of Genoa, a nephew of King Victor Emmanuel of Italy.

On Dec. 11 the Vatican Council opened in Rome, with about 600 members present.

An early manifestation of international sport took place on Aug. 27, when Oxford University rowed against Harvard, defeating them by 1½ lengths.

It was noted on March 24 that "a journey on bicycles from Liverpool to London had been undertaken by two members of the Liverpool Velocipede Club."

Among publications of the year were Browning's *The Ring and the Book*, Trollope's *Phineas Finn*, Mark Twain's *The Innocents Abroad*, Matthew Arnold's *Culture and Anarchy*, and Lecky's *History of European Morals*. Professor Freeman completed his *History of the Norman Conquest*.

In August John Ruskin was elected the first Slade Professor of Fine Art.

AGRICULTURE

Agricultural Holdings

The number of agricultural holdings in Great Britain, excluding rough grazing and holdings consisting solely of mountain and heathland, is:—

TOTAL NUMBER	338,296	61,308	399,603

NOTE.—A farm may consist of more than one holding. It is estimated that there are about 300,000 full-time farmers in Great Britain, and, in addition, about 55,500 part-time or "hobby" farmers.

According to the latest available figures, of the total number of agricultural holdings in Great Britain 78 per cent. were of 100 acres or less in area. In England, the average size was 76 acres, compared with Scotland's 71 acres and an average of 52 acres in Wales. In England and Wales, 95 per cent. of all rural dwellings now have access to a piped water supply, and by 1962, 86.9 per cent. of all farms were provided with a mains supply of electricity. The number of farm horses has fallen by 82 per cent since 1939 and Britain now has one of the highest tractor densities in the world.

Agricultural Prices

Production.—The gross output of agriculture in 1967–68 was expected to be about 6 per cent. higher than in the preceding two years, with an index of agricultural net output forecast at 144 (1966–67, 136; 1955–57=100).

During 1967–68 the dairy herd has expanded and milk yields have been good; the beef herd has also increased, although less than in the preceding year. The increases would have been greater but for the foot-and-mouth epidemic. Pig production has fallen slightly, but the breeding herd is now expanding strongly. The sheep breeding flock has fallen, but by less than in the previous year. Poultry meat production continues to rise, while egg production has risen by more than is required to meet the increase in demand. On the cropping side, total cereals production has continued to rise. There has been a fall in the barley acreage more than offset by increases in the wheat and oats acreages and by the effects of good yields. The potato acreage has risen.

Farming Income.—The forecast for 1967–68 is £510,000,000, actual farming net income, compared with the estimate for 1966–67, £491,500,000. Adjusted to normal weather conditions the forecast becomes £497,500,000—£13,500,000 more than the adjusted figure for 1966–67. This in turn was an increase of £28,000,000 over the figure for 1965–66. As the number of full-time farm businesses continues to decline, the average net income per farm will have improved by more than is suggested by the figures of net income for the whole of agriculture.

Agricultural Support.—The cost to the Exchequer of agricultural support in 1967–68 was estimated at £270,000,000—some £40,000,000 higher than expenditure in 1966–67. The estimate for 1968–69 is £286,000,000. In addition, agriculture benefits from the new investment incentives which replace the former Investment allowances. Investment incentives are estimated to cost £52,500,000 in the year 1968–69, about three-quarters of the increases in costs falling on the industry in a full year—estimated at £68,500,000.

Farming Net Income, 1951-67 (U.K.)

The following table shows the aggregate farming net income in each year since 1951-52, compared with the three-year moving average of actual net income. Figures allow for depreciation. Net income is defined as the reward for the manual and managerial labour of the farmer and his wife and for the use of the occupier's investment. Figures given are assessed from the

statistics of income and expenditure for all farms in the United Kingdom. £'000,000

**ELECTRICITY PRODUCTION AND FINANCE
England and Wales**

In the year ended March 31, 1968, the electricity industry sold 150,467 million units to all consumers, an increase of 6·4 per cent over 1966-67. Average price per unit to consumers was 1·848d. compared with 1·775d. in 1966-67. At the end of the year there were 17,831,025 consumers, 1·6 per cent. more than at March 31, 1967.

63,565 million units were supplied to industry (an increase of 3·6 per cent, 56,376 million to domestic users (8·2 per cent. more) and 22,054 million to commercial users (10·2 per cent. more). 9,046 million units were sold on off-peak tariffs, an increase of 36 per cent. over 1966-67.

On March 31, 1968, the Electricity Generating Board had 216 power stations (1967, 226) with a maximum output capacity of 41,944 MW, an increase in capacity of 9·0 per cent. over 1967. Additional output capacity in 1967-68 was 3,932 MW. C.E.G.B. power stations supplied 162,693 million kWh in 1967-68, 6·5 per cent. more than in 1966-67. Maximum simultaneous demand met during the year was 35,818 MW (1966-67, 33,973).

Generating Board lines in operation during the year totalled 9,964 miles (1966-67, 9,898) and the number of substations rose from 775 to 821.

The industry employed 221,342 persons at March 31, 1968, 7,178 less than in 1966-67.

The following results are those of the Electricity Council and Area Boards in England and Wales, the figures being rounded off.

* Houses constructed by new traditional methods (Housing Act, 1940).

New Houses and Flats

Of the 159,347 new dwellings completed by local authorities in England and Wales in 1967, 48·7 per cent. were flats. 39·1 per cent. of the new dwellings had 3 bedrooms, 32·4 per cent. had 2 bedrooms, 25·8 per cent. had 1 bedroom and 2·7 per cent. 4 or more bedrooms.

Cost.—In the first quarter of 1962, the average tender approved by the Ministry of Housing and Local Government was £1,380 (or 28s. 0½d. per square foot) for a traditional three-bedroom house of an average floor area of 984 sq. feet (including out-buildings). The average tender price for this type of house at the beginning of 1956 was £1,443 (or 31s. 6½d. per square foot), with a smaller average floor area of 918 square feet. In 1966, the average tender price for all types of three-bedroom houses (including new traditional houses) was £2,782 or 58s. 4½d. per sq. ft., providing an average floor area per house of 945 sq. ft.

Conversions and Improvements

In 1967, applications for grants under the Housing Acts for the improvement or conversion of 113,142 houses were approved, including applications made by local authorities for the conversion of 1,630 dwellings, for improvements to 18,736 dwellings and for provision of standard amenities in 8,442 dwellings. Applications by private persons and housing associations were approved for 3,456 conversions, improvements in 22,784 dwellings and provision of standard amenities in 58,094 dwellings.

Slum Clearance and Repair

In 1967, 73,082 houses were demolished or closed in England and Wales, including 51,517 in scheduled clearance areas, and 185,132 persons were moved to other housing in consequence. At the end of 1967, a total of 24,073 unfit houses were retained in temporary occupation. As a result of informal action by local authorities, 69,375 unfit dwellings were made fit; in formal proceedings under the Health and Housing Acts, a further 24,117 dwellings were made fit by their owners or by local authorities in default of action by the owners.

Tonnage launched to Lloyd's Register Class—Of the world tonnage launched during 1967, 27.3 per cent (4,305,614 tons) was to Lloyd's Register Class. This figure includes 99,622 tons (91.2 per cent.) of the tonnage built in British yards.

BRITISH RAILWAYS IN 1967

The British Railways Board was set up, along with four other separate nationalized transport undertakings, by the terms of the Transport Act, 1962. This Act dissolved the British Transport Commission and shared its assets between the new bodies which assumed their responsibilities on January 1, 1963. Under the Act the finances of the railways were reconstructed and previous restrictions were modified to give them greater commercial freedom than they had enjoyed in the past.

For the purposes of management and operation the railways are divided into five Regions each of which is headed by a Regional Railway Board. They cover the following areas:

1. London Midland Region—bounded by a line joining Carlisle, Oldham, Nottingham, Bedford, London, Banbury, Kidderminster, Aberystwyth.

2. Western Region—west of a line joining Yeovil, Westbury, Reading, London and the southern border of the L.M. Region.

3. Southern Region—south of a line joining Dorchester, Salisbury, London and the Thames.

4. Eastern Region—east of a line joining London, Peterborough, Sheffield, Bradford and Carlisle.

5. Scottish Region—north of a line joining Carlisle and Berwick.

Financial Results, 1967.—The balance sheet for 1967 showed an increase of £18,300,000 in the total deficit of the British Railways Board. The total deficit of £153,000,000 compared with £137,700,000 for 1966, while the railway working deficit (before taking interest charges or revenue from other activities into account) was £90,400,000 compared with £71,600,000 for the previous year.

Reorganization.—In 1966 the Government decided that steps should be taken to reorganize the nationalized transport undertakings including the radical remodelling of the railway system to meet the current needs of the country. The British Transport Commission, later British Railways Board, was given the task of formulating proposals for the railways. Accordingly, in March 1963, after carrying out a number of detailed traffic studies, the Board published its report on the reshaping of British Railways. The report analysed

the problems facing the railways, examined in detail the main groups of existing and potential traffics and the methods of dealing with them, and set out proposals which the Board considered essential if the contemplated improvements were to be achieved. The main proposals included: the closure of many branch lines and about 2,500 of the 7,000 stations to passenger traffic and the discontinuance of many stopping passenger services; selective improvement of inter-city passenger services and the elimination of duplicate routes; reduction in passenger rolling stock by damping down of seasonal traffic peaks; co-ordination of railway and post office parcels services; increase in block train movement of coal; the shedding of uneconomic freight traffic and the building up of through train traffic; development of "Liner train" network for traffic flows of less than train load dimensions; concentration of freight sundries traffic on about 100 main depots; reduction of the freight wagon fleet; and continued replacement of steam by diesel locomotives for main-line operation up to a total requirement of about 4,250.

The accounts for 1967 show that a deficit of £153,000,000 was incurred. 1967 was a bad year financially. Revenue fell considerably, mainly because of the depressed state of the national economy, and although substantial savings in working costs were made the financial results were markedly worse than those for 1966. Production was particularly low in coal mining and in iron and steel, while total manufacturing output was below that of 1966; consequently there were substantial reductions in the railways' basic types of traffic. Another factor which helped to swell the deficit was the Government's refusal, because of the "freeze", to allow certain increases in fares and charges, including some approved by the Transport Tribunal for London as long ago as July 1966. Apart from the economic, commercial and political factors, there was during 1967 considerable industrial unrest in the country, by no means confined to railways, resulting in unofficial action and damaging stoppages.

Considerable progress was made during 1967 in improving the railway system. Three major electrification schemes were completed. In the Midlands, the extension to Birmingham, Wolverhampton and Stoke of the Euston main-line electric services, gave added effect to the fast and efficient services between London, Manchester and Liverpool. In the south, the completion of the Waterloo-Bournemouth electrification enabled steam traction to be abolished from Southern Region, and in the north the extension of the Glasgow suburban electrification brought the popular Blue Trains to the whole of the South Bank of the Clyde as far as Gourock and Wemyss Bay. The rapid expansion of the Freightliner door-to-door service for general merchandise is shown by the fact that by the end of 1967 the fast, permanently coupled trains were carrying 4,200 loaded containers a week compared with 1,200 a week at the beginning of the year.

Modernization.—The final stage of the London (Euston) — Manchester — Liverpool electrification scheme, embracing Birmingham and Stoke-on-Trent, was brought into operation. The journey time between Euston and Birmingham inclusive of an intermediate stop, was reduced to 95 minutes, giving an average speed of 71 m.p.h. At the same time, changes were made in the pattern of service between Plymouth, Bristol, Birmingham and Manchester and between Birmingham and Southampton. In July the introduction of electric services between London and Bournemouth was coupled

with a complete reorganization of the whole of the Southern Region time-table which had been largely unchanged for about 30 years. The second stage of the Glasgow suburban electrification, serving the area from Glasgow to Gourock and Wemyss Bay was brought in with a partial service in June and a full service in September.

A large and up-to-date terminal at Stratford, East London, equipped to handle international freight traffic generally, was opened in June. Carrying by the Freightliner system continued to increase rapidly. New services were introduced on 13 routes to bring the network to 21. London was linked with South Wales, Heysham (a Belfast service), Sheffield, Newcastle, Leeds, Cardiff and Stockton; Birmingham with Glasgow, Newcastle with Stockton; Glasgow with Leeds and Sheffield; and Cardiff with Manchester, Liverpool and Sheffield. In addition, the London-Liverpool and London-Manchester services were duplicated and a third service was introduced on the London-Glasgow route. During the year over 100,000 loaded containers were carried, and the monthly rate of business grew from 5,000 containers to 17,500. Further progress was made in 1967 in reducing the number of stations handling freight from 1,497 at the beginning of the year to 1,176 at the end. Greater utilization of rolling stock enabled the fleet of freight wagons to be reduced by nearly 86,000. The stock of steam engines was reduced to 362, all due for withdrawal in 1968.

Passenger Services.—The Inter-City network was further improved in 1967, faster journey times were achieved by eliminating some intermediate stops and by exploiting the capability of 100 m.p.h. sections of line. On the east coast route, additional Inter-City trains to the West Riding and Newcastle were introduced, as well as Pullman service between London and Hull. Diesel-electric Pullman sets were concentrated on the Western Region and introduced on high-speed services between Paddington and Swansea, and Paddington and Oxford.

Track and Maintenance.—Further advances were made in the mechanization of permanent way maintenance. Another 470 miles of continuous welded rail were laid, bringing the total mileage to 3,340 on principal routes. Speeds of 100 m.p.h. are now permissible over some 700 single track miles. Following the completion of an assessment of the strength of more than 10,000 bridges carrying public roads over the railways, work began on strengthening about 1,200 of them. By the end of the year work had been completed on 132 bridges and started on a further 67. It was intended to complete the programme by April 1969.

Signals.—Progress on the installation of the automatic warning system, which gives the train driver an audible indication inside his cab of the state of signals ahead reached by the end of the year a total of 1,799 route miles, in addition to the 1,400 route miles fitted with the Western Region system. 82 automatic half-barrier level crossings were installed during the year, bringing the total in service

to 202. A modified system of track circuiting, which renders insulated rail joints unnecessary with continuously welded track on electrified lines, reached its final stage of development.

OPERATING STATISTICS

At the end of 1967, British Railways had 36,498 miles of standard gauge lines and sidings in use, representing 13,172 miles of route of which 2,014 miles were electrified. Standard rail on main lines has a weight of 90 lbs. per yard. British Railways had 5,445 locomotives (steam, 341, diesel and diesel electric, 4,742 and electric, 341); 3,988 diesel multiple-unit vehicles, 7,493 electric multiple-unit passenger carriages with a capacity of 1,247,887 seats or berths in 1967. Loaded train miles run in passenger service totalled 202,756,000. 837,350,000 passenger journeys were made during the year, including 202,756,000 made by holders of season tickets. The average distance of each passenger journey on ordinary fare was 24·09 miles; and on season ticket, 17·16 miles. Passenger stations in use in 1967 numbered 2,750 and freight stations 748.

Freight.—There were 466,623 freight vehicles and 7,401 other vehicles in the non-passenger-carrying stock. 122,203,000 tons of coal and coke were carried in 1967. 35,723,000 tons of iron and steel and 42,823,000 tons of other traffic. Loaded train miles run in freight service totalled 61,011,000. 35,075 railway road vehicles were in use in 1967 and 31,038 containers.

Staff and Wages

On Dec. 31, 1967, British Railways employed a total staff of 318,092, compared with 338,740 on Dec. 31, 1966. Average weekly earnings of selected grades at April 15, 1967 (with numbers of staff) were:— Male Clerks (31,350) £21 6s.; Train Drivers (25,784) £26; Head Shunters (5,614) £21 16s.; Lengthmen and Relayers (15,211) £21 16s.

ROADS

On April 1, 1967, the total mileage of public roads in Great Britain, excluding green lanes and unsurfaced roads, was 196,110, of which 148,283 are in England, 28,865 in Scotland and 18,962 in Wales. There were 461 miles of motorways, 8,333 miles of Trunk Roads and 20,020 miles of Principal Roads. The remaining 167,096 miles were classified and unclassified roads.

Highway Authorities.—The Minister of Transport became the highway authority for some 8,190 miles of road in Great Britain under the Trunk Roads Acts of 1936 and 1946 (now consolidated in the Highways Act, 1959). These roads, which comprise the national system of routes for through traffic, are known as trunk roads and the Minister (in Scotland from April 1, 1956, the Secretary of State and in Wales from April 1, 1965, the Secretary of State) is responsible for their maintenance and improvement. Under the Local Government Act, 1929, county councils in England and Wales became (from April 1, 1930) the highway authorities for all roads in rural districts except trunk roads, and all county roads outside county boroughs and metropolitan boroughs. County boroughs are responsible for all roads within their boundaries with the exception of trunk roads. Borough and urban district councils are the highway authorities for roads other than trunk roads and county roads which lie within their area.

The system of classifying roads for grant purposes was revised with effect from April 1, 1967. Under the new system highway works are divided into two categories only: improvements and maintenance. Capital grants are payable at the rate of 75 per cent. but only for improvements on a single class of local authority road known as "principal roads". (The mileage of principal roads is roughly equivalent to that of the old Class I system). All road maintenance and improvements on non-principal roads is now aided through a non-specific revenue grant, the rate support grant.

Grants made to Highways Authorities in England for the year 1967-68 amounted to £72,000,000 (provisional) and £73,000,000 in 1968-69. In Wales, grants to highway authorities in respect of principal roads in 1967-68 were estimated at £2,530,000 and in Scotland, £12,199,000.

Motorways.—The network is based on five main routes—London-Yorkshire (M.1), Medway Towns (M.2), London-South Wales (M.4), Birmingham-Bristol (M.5) and Birmingham-Carlisle (M.6). In the Birmingham area M.1, M.5 and M.6 will be connected by shorter motorways known as the Midland Links. Other motorways planned are London-Basingstoke (M.3), London-Cambridge (M.11), London-Crawley (M.23), North Cheshire (M.56), Manchester-Preston (M.61) and Lancashire-Yorkshire (M.62). Motorways by-pass Darlington, Doncaster and Stevenage on A.1, and Maidstone on A.20, while other motorways will bypass Durham and Baldock on A.1, Port Talbot on A.48 and High Wycombe, Beaconsfield and Gerrards Cross on A.40.

At the end of June, 1968, 531·05 miles of motorway were open to traffic in England and Wales and 119·01 miles were under construction. 179·75 miles of the M.1 were in use, and 14·7 miles of the northern extension were under construction. Of the 62·3 miles of the M.4 that were in use, 18·6 miles were in Wales, from the completed Severn Bridge to Newport. On M.6 125·6 miles (incl. 14·3 Midland Link motorways) were open from North of Birmingham to Carnforth. Work had begun on 15·5 miles of the Midland Link motorways and a continuous 53 mile motorway was in use from the southern outskirts of Birmingham to Ross-on-Wye in Herefordshire.

Tyne Tunnel.—On Oct. 13, 1967, the Tyne road tunnel was opened by H.M. the Queen. The tunnel crosses the Tyne at Jarrow, six miles downstream from the nearest bridge and replaces two ferries. Estimated cost of the tunnel including approaches was £13,000,000. Tolls are charged for use of the tunnel.

Motor Vehicles.—By the quarter ended Sept. 30, 1967, the number of vehicles with licences current in Great Britain totalled 14,016,000: Cars, 10,303,000; Motor cycles and tricycles, 1,443,000; Buses, Coaches and Taxicabs, 94,000; Goods Vehicles, 1,624,000; Agricultural Vehicles, 469,000; Exempt vehicles, 83,000.

Taxation.—Net Exchequer receipts from Motor Vehicle duties in 1966-67 totalled £262,013,917, compared with £250,838,540 in 1965-66. Estimated receipts in 1967-68 were £281,000,000 and in 1968-69, £302,000,000.

British Road Accident Statistics

Road accident figures were first recorded in Great Britain in 1909. In that year about 100,000 motor vehicles were licensed; and there were 1,070 fatal road accidents and 26,001 accidents resulting in non-fatal injuries (excluding those attributed to pedal cycles). As the number of motor vehicles on the roads increased, so did the annual casualty figures. Statistics of road accident deaths and injuries were first recorded in 1926. In that year there were 4,803 fatal and 119,484 non-fatal accidents, resulting in 4,886 deaths and 133,888 serious and slight injuries; and by then there were

about 1,720,000 vehicles in use. Road casualty figures have been compiled, in increasing detail, since that time by the Ministry of Transport. The accompanying figures have been provided for the Almanack by the Royal Society for the Prevention of Accidents.

The following table lists the totals of road deaths and injuries in this country since 1930. The reporting of non-fatal injuries was suspended during the early part of the last war; and in fact during the rest of the war the reporting of slight injury cases was probably incomplete. Fatalities now exclude those occurring after 30 days. Over the years the volume of road traffic has increased steadily, particularly since the war: deaths and injuries, particularly the latter, have also tended to rise, but not to the same extent.

In 1967 there were 369,978 road casualties, including 7,319 deaths. Compared with 1966,

accidents, deaths and injuries all decreased appreciably. There were 14,021,000 licensed vehicles in use on 202,600 miles of road. In other words, there were 69 vehicles for every mile of road, or one vehicle for every 25 yards. Twenty road users were killed and 994 injured on an average day throughout the year. There was a death every 72 minutes and a non-fatal casualty every 87 seconds.

LIGHTHOUSES

The expenditure of the three General Lighthouse Authorities (*The Trinity House*, the *Commissioners of Northern Lighthouses* and the *Commissioners of Irish Lights*) is met from the General Lighthouse Fund which was established under the Merchant Shipping (Mercantile Marine Fund) Act, 1898. The Fund also bears the expenditure of maintaining certain lighthouses abroad. The Fund derives its main income from light dues levied on shipping in United Kingdom and Irish ports. In the financial year 1966-67 the income of the Fund was £6,391,079, made up of £6,163,167 from light dues and £227,912 from miscellaneous receipts.

Expenditure in that year totalled £5,165,527, including £4,961,493 in respect of the maintenance of lighthouses, etc., by the three General Lighthouse Authorities, £140,008 in respect of lighthouses abroad and £63,486 in miscellaneous expenditure, including the cost of collecting light dues. The surplus of £1,225,552, together with receipts from the investments of the General Lighthouse Fund totalling £150,873 was carried to the Net Revenue Account. From this account are made allocations to depreciation and reserves from which, during the year, capital outlay of £664,747 was met.

AERODROMES AND AIRPORTS

There are 164 aerodromes in the United Kingdom, Northern Ireland, the Isle of Man and the Channel Islands which are either State owned or licensed for use by civil aircraft. A number of unlicensed airfields not included in this list are also available for private use by permission of the owner or controlling authority.

S= Aerodrome owned and operated by the State.

BAA= Aerodrome operated by the British Airports Authority.

M= Aerodrome owned or operated by Municipal Authority.

J= Military airfield available for civil use by prior permission.

H= Licensed helicopter station.

Those aerodromes which are designated as Customs airports are printed in bold type. Customs facilities are available at certain other aerodromes by special arrangement.

Crown services for the conveyance of Government letters and despatches by posts or stages were set up under a Master of the Posts about 1516. Public correspondence was officially accepted for the first time for conveyance by these services at fixed postage rates in 1635, but they were still under direct Crown control. In 1657 a Post Office was created under a Postmaster-General by Oliver Cromwell, and responsibility for the carrying of all letters was thus transferred to Parliament. Charles II ratified this arrangement by statute in 1660.

THE POST OFFICE

A Money Order Office was inaugurated in 1792, uniform Penny Post in 1840, the Book Post in 1848, the Post Office Savings Bank in 1861, Post Office Telegraphs in 1870, Postal Orders and the Post Office Telephone Service in 1881 and the Parcel Post in 1883.

The Post Office also acts as agent for many Government Departments in the collection and payment of money.

The financial arrangements brought into effect by the Post Office Act, 1961, separated Post Office finances from the Exchequer and established the Post Office Fund on April 1, 1961.

MAIL SERVICES

A total of 11,500,000,000 items of correspondence was posted in the United Kingdom in 1967-68 compared with 11,400,000,000 in 1966-67. Parcels handled by the Post Office during the year numbered 216,600,000, a decrease of 5.7 million in the year.

Inland services conveyed 6,128,000,000 letters (excluding 214,000,000 items of pools post), 371,000,000 postcards, 3,857,000,000 printed papers and samples (excluding 257,000,000 pools post), 146,000,000 newspapers and 203,600,000 parcels. These figures include 48,200,000 registered items, 25,300,000 recorded delivery items and 107,800,000 business replies.

Overseas Services conveyed 318,000,000 letters, postcards and printed papers at surface mail rates and 209,000,000 at air mail rates. 9,800,000 overseas parcels were handled at surface rates and 3,200,000 at air mail rates. In the overseas services 9,000,000 registered and insured items were conveyed.

During the year 27·2 million licences were issued compared with 25·7 million in 1966-67. Broadcast Receiving Licences issued totalled £78·1 million, while Road Vehicle and other licences amounted to £61·3 million.

NOTE.—Figures above exclude transactions other than at Post Office counters.

STAFF

On March 31, 1968 the total staff of the Post Office numbered 412,557 compared with 406,641 in March, 1967. The total includes 31,000 part-

time workers counted as a half each. Staff were divided as follows: Administration 10,709; Postal Operating 176,024; Telecommunications Operating 90,297; Engineering 121,179; Supply Departments 7,734; Motor Transport 6,614.

In addition 22,827 Sub-Postmasters are employed on an agency basis.

DEVELOPMENT AND MODERNIZATION PLANS, 1968-69

Industrial and Management consultants are working with the Post Office on a fundamental and widely based investigation into ways of raising the level of productivity and profitability of the postal services.

In co-operation with the Ministry of Technology and industry it is hoped to speed up the postal mechanization programme. It has been decided:

(1) To press ahead firmly with the introduction of the preferred range of envelopes which has been agreed internationally and which is needed to help mechanization (to conform to the preferred range, envelopes should be: (a) at least 3½" x 5½" (90 mm x 140 mm) and not larger than 4½" x 9½" (120 mm x 235 mm); (b) oblong in shape, with the longer side at least 1·414 times the shorter side; (c) made from paper weighing at least 63 grammes per sq metre). A higher tariff will be applied eventually to minimum weight (up to 2 oz.), items posted in envelopes outside the preferred range. Co-operation has been sought from Government Departments, Nationalized Industries and local authorities to introduce preferred envelopes as soon as possible.

(2) To introduce progressively a national postal coding system, which is essential to the full success of postal mechanization.

(3) To undertake a major review of postal services offered to the public to see whether or not they can be better geared to modern conditions.

Inland Telecommunications.—Plans have been made to increase the number of trunk circuits from about 66,000 to about 77,000 during the year, by means of new cables and radio links and by modifying existing cable and radio systems to give greater capacity. The total number of telephone connections at March 31, 1968, 7,387,225, was expected to be increased to more than 7,800,000 by March 31, 1969 (a net increase of about 493,000). The number of telephones, including extension instruments, is expected to be about 13·3 million by the end of the year (March 1969). The telephone waiting list was approximately 137,914 on March 31, 1968.

Development of the telephone service to fully automatic standard is planned to be complete by 1970. During 1968-69 about 97 manual exchanges were due to be converted to automatic working and 98 per cent. of subscribers will then have automatic service. Subscriber Trunk Dialling facilities had been introduced by the end of March, 1968, at 1,742 exchanges serving 5·62 million subscribers (76·1 per cent. of the U.K. total). By March, 1969, about 85 per cent. of the subscribers should have the facility. It is planned to introduce about 4,500 new Telex lines during the year, bringing the total to 26,800 by March 31, 1969.

The National Giro is the new current account banking service of the Post Office. All account records are kept in one place—the National Giro Centre at Bootle, Lancashire. There, one of the largest complexes of modern computers and data processing equipment in Europe is used to process customers' instructions, keep accounts up to date and produce daily statements.

Giro hopes to have more than one million

accounts within a few years of opening. Anyone over the age of 16 can open an account with an initial deposit of £5. They will be provided with personalized stationery: transfer/deposit forms for transferring funds from their account to other Giro customers and for making deposits to their own account; payment orders—Giro cheques—for paying people not Giro customers and for making withdrawals.

All cash, in and out of Giro accounts, is handled

at post offices of which over 20,000 do Giro business. People who do not have accounts with Giro are able to pay into accounts at post offices by filling in a simple form and handing this and the cash over the counter.

All transfers between accounts, deposits and postage are free. Stationery is provided at cost. A charge of 9d. is made for cash withdrawals up to £50, and 2s. for £50 and over. For payments into account non-Giro customers are charged 9d.

† All figures refer to the area which is now Northern Ireland. Figures for N. Ireland in 1921 and 1931 are estimates based on the Censuses held in 1926 and 1937. The last Census was on Oct. 9, 1966.

NOTES.—1. Before 1801 there existed no official return of the population of either England or Scotland. Estimates of the population of England at various periods, calculated from the number of baptisms, burials and marriages, are: in 1570, 4,160,221; 1600, 4,811,718; 1630, 5,600,517; 1670, 5,773,646; 1700, 6,045,008; 1750, 6,517,035.

2. By June 30, 1967, the total population of the United Kingdom was estimated to have risen to 55,068,400 (England, 45,680,870; Wales, 2,709,930; Scotland, 5,186,600; Northern Ireland, 1,491,000).

ISLANDS.—The figures given above do not include islands of the British seas. Populations of these islands at census years since 1900 were:—

INCREASE OF THE PEOPLE

In England and Wales during the 19th Century, intercensal increases in the population ranged from 18·06 per cent. to 11·65 per cent., an average of 14 per cent. every ten years; there was an average proportion of 1,050 females to 1,000 males. Between the censuses of 1951 and 1961 the increase was 5·3 per cent. The proportion of 1,088 females to 1,000 males in 1931 declined to 1,082 in 1951 and to 1,066 in 1961.

Estimates of the future total population of the United Kingdom, based on the mid-1960 annual estimate, have been prepared by the Government Actuary in consultation with the Registrars-General. It is assumed in their projections below that, at ages under 45, death rates will decline

steadily until at the end of 25 years they are at one-half of the present rates; at ages over 45, rates of decline become progressively smaller as age advances; after 25 years death rates at all ages will remain at the levels then reached; annual births are assumed to average 880,000 during the first 5 years, thereafter rising gradually to 1,000,000 in 1999. The ratio of male to female births is taken as 1·06 throughout and a net outward migration of 30,000 persons per year is assumed.

THE ANNUAL ESTIMATES OF POPULATION

Since 1948, estimates of the total population and of populations of counties and other local authority areas at June 30 each year have been prepared by the Registrars-General and published by Her Majesty's Stationery Office. The following table shows the estimated home population of the United Kingdom at June 30, 1967, and its distribution. Estimated populations at the same date for the counties and other administrative areas will be found on pp. 631 et seq.

Murder

The Murder (Abolition of Death Penalty) Act, 1965, came into force on November 9, 1965, and is to remain in force until July 31, 1970, and then expire unless Parliament determines otherwise. Its main provisions are as follows.

Section 1(1) abolishes the death penalty for mur-

der and provides that a person aged 18 or over convicted of murder shall be sentenced to imprisonment for life. Section 1(a) provides that on sentencing any person convicted of murder to imprisonment for life the Court may at the same time declare the period which it recommends to the Secretary of State as the minimum period which in its view should elapse before the Secretary of State orders the release of that person on licence. Section 2 provides that no person convicted of murder shall be released by the Secretary of State on licence under s. 27 of the Prison Act, 1952, unless the Secretary of State has prior to such release consulted the Lord Chief Justice together with the trial judge if available.

In 1967 184 offences of murder of persons of one year or over were known to the police. As a result of court proceedings in 1968, 22 of the offences were reduced to manslaughter—one, in which one offender was concerned, on appeal. In 15 offences of murder the murderer was undetected at the time of going to press.

146 victims were murdered by 140 known murderers or suspects. Of these 50 victims were murdered by 34 persons who committed suicide before arrest and one victim by one person who committed suicide while in police custody. For the murder of 95 victims proceedings were taken against 105 persons.

One person proceeded against for murder died while on remand during proceedings at Magistrates' Court and one charge of murder was withdrawn at Magistrates' Court on the instruction of the Director of Public Prosecutions. Two persons proceeded against were discharged under s. 7 of the Magistrates' Courts Act, 1952. The remaining 101 persons were committed for trial.

Nine persons, including one concerned in the murder of 4 victims, were found unfit to plead, one was found not guilty by reason of insanity and 23 were acquitted. Three persons convicted were detained during H.M. Pleasure (under 18 years of age). Of 57 persons convicted of murder and sentenced to life imprisonment, 3 were concerned in the murder of 7 victims. One of these persons

was accused of the murder of 3 victims. The trials of 8 cases were pending at the time of the report.

THE NATIONAL LOANS FUND

Under the National Loans Act, 1968, effective from April 1, 1968, most of the Government's domestic lending and the whole of the Government's borrowing transactions are removed from the Consolidated Fund and brought to account in the National Loans Fund. Revenue from taxation and miscellaneous receipts, including interest and dividends on loans made from Votes, continue to be paid into the Consolidated Fund. After ordinary expenditure on Supply Services (details of which appear under Civil Estimates and Defence Estimates in the preceding pages) and on Consolidated Fund Standing Services (e.g. payment in respect of interest, etc. on the National Debt, The Civil List, Annuities, Pensions for Political, Civil and Judicial Services,

Parliamentary and Judicial Salaries and Allowances), the surplus on the Consolidated Fund is payable into the National Loans Fund.

The table following shows issues in 1967-68 and in 1968-69 from the National Loans Fund to nationalized industries. Loans to other public corporations were estimated for 1968-69 at £146,000,000 (1967-68, £74,000,000) and to local authorities £505,000,000 (£369,000,000). Including loans within Central Government (principally in respect of the purchase of military aircraft from U.S.A., £147,000,000), total issues from the National Loans Fund were estimated at £1,744,000,000 for 1968-69 (1967-68, £1,748,000,000, from the Consolidated Fund).

U.K. EXTERNAL LIABILITIES AND CLAIMS IN STERLING

In the middle of 1939 United Kingdom net external liabilities amounted to rather more than £500 million. During the war years overseas sterling holdings rose extremely fast reaching nearly £3,600 million at the end of 1945. Of this total a large proportion represented obligations to other countries arising from the exigencies of war rather than working balances or normal reserves voluntarily held in London. More recently, a revised statistical series has been introduced—U.K. External Liabilities and Claims in Sterling; this is shown in the following table by type of liability and claim.

December 31

1966	1,656	2,589	900	5,145
1967	1,540	2,443	1,356	5,339

The most noticeable change in post war figures has been the emergence of the United Kingdom's indebtedness to international organizations such as the International Monetary Fund. At the end of 1967 this debt amounted to £1,540 million; the remaining net liabilities of £3,799 million included £482 million which represented to a large extent the day to day working balances of the overseas banking and business community. (1) including Rhodesia in 1965 and Burma in 1965 and 1966. (2) including Rhodesia in 1966 and 1967 and Burma in 1967.

The object of the balance of payments accounts is to show the outcome of transactions between residents of the United Kingdom and overseas residents. In principle, transactions are recorded when the ownership of goods or assets changes and when services are rendered. Transactions are classified in three main groups:—The Current account includes imports and exports of goods and services, investment income and private transfers. The Long Term Capital account includes inter-government loans, other official capital and private investment. Monetary Movements include changes in the gold and convertible currency

reserves and in official holdings of other currencies, changes in overseas sterling holdings and other capital transactions of a monetary nature.

NOTES.—Imports and exports (f.o.b.).—The f.o.b. value is the value of imports and exports entering and leaving the United Kingdom excluding the costs of insurance and freight.

Invisibles.—This is the net balance arising from receipts and payment for such items as shipping, aviation, insurance and travel, interest, profits and dividends.

Inter Government Loans.—The entries under this heading cover drawings and repayments of loans made by the U.K. government to overseas governments and vice versa.

U.K. subscriptions to International Organizations.—Under this heading are grouped the U.K.'s subscriptions to the International Monetary Fund and other similar bodies.

Private Investments.—This is a reflection of investments made in the United Kingdom by foreigners which is offset against the amount invested abroad by United Kingdom companies and individuals.

Exchange Adjustments.—The net total of contra entries arising from the revaluation in sterling terms of certain official monetary or banking assets and liabilities including the Sterling counterpart

of drawings on central bank assistance, or included to account for the fact that the pre-devaluation forward commitments of the Exchange Equalization Account are recorded as being settled on maturity at the new parity.

Miscellaneous Capital.—All identified capital transactions not specifically provided for are included here. One example ■ borrowing overseas by United Kingdom tobacco companies to finance purchases of tobacco.

Changes in External sterling liabilities.—This section records the net changes in the sterling holdings of international organizations and sterling area and non-sterling area countries.

Gold and convertible currency reserves.—The alterations to our reserves of gold and foreign currencies are shown in this section. These reserves are buttressed by our right to make application for short-term assistance from the International Monetary Fund.

Balancing item.—This is the amount necessary to balance the account: it represents the net total of the errors and omissions in other items.

BANKRUPTCIES

Large Failures.—In 48 cases of bankruptcy starting in 1967, estimated liabilities exceeded £40,000; in 36 of these cases the estimated liabilities were between £40,000 and £100,000 and in 11 between £100,000 and £500,000; in the remaining 4 cases estimated liabilities were between £508,000 and £977,000. In 1966 there were 28 cases where the estimated liabilities exceeded £40,000, the largest being £2,946,000.

In 1967 there were eight deeds of arrangement with estimated liabilities over £40,000, the largest being £241,000.

Failures in some of the principal trades in 1967 (with 1966 figures) were: Builders, 483 (1966, 481); Directors and promoters of companies, 272 (217); Farmers, 166 (155); Grocery and provision retailers 158 (159); Painters and decorators, 121 (90); Road haulage contractors, 117 (95); Hotel keepers and publicans, 105 (99); Restaurant and snack bar proprietors, 104 (110); Confectioners-tobacconists-newsagents, 83 (88); General stores proprietors, 80, (52).

INDUSTRIAL AND COMMERCIAL FINANCE CORPORATION LIMITED

Piercy House, 7 Copthall Avenue, E.C.2.
[01-628-4040]

Founded in 1945 by the English and Scottish joint-stock Banks, and the Bank of England, as a contribution to post-war reconstruction, with initial resources of £45,000,000, since enlarged by a series of debenture issues to more than £100,000,000. I.C.F.C. is independently managed and is not Government subsidized. It was formed for the specific purpose of providing long-term loan capital and share capital to small and medium sized businesses in Great Britain with no ready access to the capital market. In 22 years it has provided over £175,000,000 to more than 2,000 businesses engaged in 52 industries and trades. Since 1951, branches have been established in 14 cities.

Facilities, which range from £5,000 to £300,000 on a first application and up to £500,000 for a second or subsequent application from an existing customer, are provided in the form of

long-term loans and share capital as well as other forms. For its own requirements, and to assist its customers, I.C.F.C. has an Industrial Department comprising engineers skilled in present-day production methods, and a staff of accountants versed in modern accounting and costing techniques. Rates, which vary with the security available and the inherent soundness and prospects of the business, are in line with the market rates current for long-term capital. The rate quoted in a particular case is generally fixed for the entire period of the loan, and is charged on the outstanding amount only. A small inclusive negotiation fee is charged on acceptance of an offer, out of which the Corporation pays its own investigation and legal costs.

Chairman, The Lord Sherfield, G.C.B., G.C.M.G.

General Manager, L. V. D. Tindale.

Secretary, S. V. Warren.

LOCAL GOVERNMENT IN THE UNITED KINGDOM

ENGLAND AND WALES

Local government is carried on by directly elected councils whose powers and duties are defined by statute, under the general supervision of various departments of the central government. Departments principally concerned are the Ministries of Housing and Local Government, Health, Transport and the Department of Education and Science; and, in matters affecting law and order, police, fire services, care of children, civil defence preparations, etc., the Home Office. Supervision is by means of inspections and enquiries, issue of Regulations and Orders, approval of bye-laws, loan sanctions for capital expenditure, examination of accounts and the administration of government grants.

County Councils.—Constituted by the Local Government Act, 1888, they were made responsible for administrative duties which were previously performed by the justices of the peace in quarter sessions. In the main their functions relate to the more important services. In most cases the area of the administrative county is that of the geographical county excluding county boroughs. Lincolnshire, Suffolk, Sussex and Yorkshire are exceptions, being divided into parts, each with a separate council, for administrative convenience. Councils consist of a chairman, aldermen and councillors. The chairman, who may receive remuneration, is elected annually by the council, either from among the aldermen or councillors or from persons eligible for election — aldermen or councillors. The aldermen form a quarter of the council; they are elected by the councillors from among themselves or persons eligible to be councillors and hold office for six years, half retiring every three years. Councillors are elected by local government electors for three years. Excluding Greater London there are 58 county councils in England and Wales (see pp. 631-3; Wales, pp. 675-6).

County Borough Councils.—Boroughs with populations of 50,000 or more in 1888 and some ancient counties of cities were constituted by the Local Government Act, 1888, as county boroughs; their councils were given the same powers and duties as county councils, but they are also governed by the general law affecting boroughs and have the same constitution. Until 1926 other boroughs reaching 50,000 population could seek county borough status but the figure was then raised to 75,000. The Local Government Act, 1958, again raised the figure to 100,000, and placed a 15-year prohibition on Private Bills for this purpose. (Although important, level of population is only one factor in the attainment of county borough status.) There are 83 county borough councils in England and Wales (see pp. 657-68; Wales, 675-6). For representation of the political parties on county councils after the elections of April, 1967, see p. 671.

The district councils within a county are borough councils (other than county borough councils), urban district councils and rural district councils.

Borough Councils.—Constituted in their present form by the Municipal Corporations Act, 1882. Urban or Rural district councils may by royal charter be incorporated as boroughs. Borough councils consist of a mayor, aldermen and councillors. The mayor, who presides at council meetings and may be paid, and the aldermen are elected and hold office for the same terms as chairmen and aldermen of county councils (see above). Councillors are elected by the burgesses (local government electors of the borough) for a term of three years, one-third of the council retiring each year. The lists on

pp. 671-2 indicate how the political parties were represented on the councils of the more important boroughs in 1968. Excluding the London boroughs there are 259 non-county boroughs in England and Wales (see pp. 664-8; Wales, p. 675).

Urban and Rural District Councils.—The Public Health Act, 1875, consolidated legislation on public health and conferred various powers and duties on local sanitary authorities and these bodies were constituted by the Local Government Act, 1884, as urban and rural district councils. They are corporate bodies and have a common seal. District councils consist of a chairman, elected annually by the council, and councillors elected for a term of three years. The chairman may receive an allowance. An important part of their responsibility is in the local administration of the Public Health Acts and Housing Acts. Urban district councils are also highway authorities. Both types of authority levy rates; they may raise loans for various purposes and make bye-laws with the sanction of the central Government. There are 522 urban district councils (see pp. 669-70 and 675) and 471 rural district councils in England and Wales.

Parish Councils and Parish Meetings.—Local government responsibility is for the area of the civil parish in rural areas and for purely secular matters. Parish meetings consist of all the local government electors of the parish under a chairman chosen by the meeting and must be held at least twice a year where there is no parish council. Parish councils consist of a chairman and a number of councillors which may vary from five to twenty-one, elected for three years. Parishes with a population of more than 300 must have a parish council. A parish meeting must be held annually and is presided over by the chairman of the parish council. Rates to meet the expenses of the parish council are levied by the rural district council.

London.—The Greater London Area embraces the old counties of London and Middlesex (except Potter's Bar, Staines and Sunbury-on-Thames) and parts of the neighbouring counties of Essex, Herts., Kent and Surrey and the whole of the county boroughs of Croydon, East Ham and West Ham.

For those functions which need to be considered for the whole of the Area, the Greater London Council (see pp. 634-6) is responsible; such functions as traffic, major roads and overall planning. All other matters are the concern of the 32 London borough councils (12 inner and 20 outer; see p. 642); the City of London, besides retaining its previous functions, has the powers of a London borough.

Local Government Reorganization.—In May, 1966, the Royal Commission on Local Government in England was appointed to consider the structure of local government in England outside Greater London and to make recommendations. Local government reorganization in Wales is being dealt with separately.

Local Government Elections

Generally speaking all British subjects or citizens of the Republic of Ireland of 21 years or over resident on the qualifying date in the area for which the election is being held are entitled to vote at local government elections. There is also a non-resident qualification. A register of electors is prepared and published annually by local electoral registration officers. In 1966 there were 9,127,700 local government electors in county boroughs, 16,204,100 in municipal boroughs, urban districts, the City of London and the Greater London boroughs, and 6,494,836 in rural districts. The total electorate of Greater London, including the

City, was 5,410,393. These figures exclude "Y" voters, i.e. persons having their 21st birthday between Oct. 12 and June 16, who are entitled to vote at elections held after Oct. 1 following. Ordinary county council elections are held triennially in April and elections for other authorities annually or triennially in May.

Voting takes place at polling stations arranged by the local authority and under the supervision of a presiding officer specially appointed for the purpose. Candidates, who are subject to various statutory qualifications and disqualifications designed to secure that they are suitable persons to hold office, must be nominated by two electors and, except in rural district or parish council elections, must secure the assent of eight other electors to the nomination. County council elections are based on divisions of the county regulated by the Home Secretary, each of which returns a single member; most boroughs, including county and London boroughs, are divided into wards, each electing its own members; other authorities may be so divided or may remain as single units depending upon their size.

Local Government Services

Local authorities must in their areas provide the services and carry out the functions required by various Acts of Parliament. They may provide additional services under general permissive legislation or under "local" Acts of Parliament which they have promoted — Private Bills. The nature of the duties imposed on local authorities and the scope of the services which they provide vary according to the type of authority. The only all-purpose council is that of the county borough. In the counties functions are divided between the county council and the borough and district councils and there is considerable delegation of functions by the county council to these other authorities, e.g. in education and planning matters. Principal subjects of local government administration are:—

Public health services (prevention of epidemics, abatement of sanitary nuisances, etc.) under the Public Health Act, 1936; local health services under the National Health Service; Care of deprived children; Welfare services for the aged and infirm and for the handicapped, under the National Assistance Act, 1948.

Housing; Land drainage; Water supply; Sewerage; Refuse collection and disposal; Baths and washhouses; Cemeteries.

Town and country planning; Parks and recreation grounds; Smallholdings and allotments.

Roads and bridges; Road safety; Street lighting; Harbours, docks and piers; Passenger transport.

Education; Public libraries, museums and art galleries; Municipal entertainments; Civic restaurants; Information centres.

Police; Fire services; Civil defence services.

Food and drugs inspection; Weights and measures.

Local Government Committees and Staff

Detailed administration of local government services is commonly carried out by committees, matters of policy being decided by the council as a whole; the appointment of certain committees is made compulsory by Act of Parliament. Committees may be executive or advisory; they may be constituted on a permanent basis as Standing Committees or as Special Committees set up for a limited period to deal with a particular subject; their powers and duties are laid down in the Standing Orders of the Council (subject in some cases to special statutory provisions). Where

services such as water supply and sewerage are shared between two or more authorities, Joint Committees or Boards of representatives of the authorities concerned are set up to administer the services.

The executive policy of the local authority is carried out by a salaried staff varying in number according to the type of authority. The chief official is, in boroughs, the Town Clerk, and elsewhere the Clerk of the Council, and these appointments, together with those of certain other executive officers, are compulsory. Appointments of staff (including professional, technical and clerical classes, and manual workers) are made to a set establishment.

Local Government Finance

Local government is financed from various sources. (1) *Rates*.—Levied by county borough, borough and district councils and in London by the City Corporation and the London boroughs. Sums required by the Greater London Council and by county councils are included in the rates levied by London and non-county borough and district councils. Rates are levied by a poundage tax on the rateable value of property in the area of the rating authority. Under the General Rate Act, 1967, rating authorities are required to charge a lower rate in the pound on dwellings than on property generally in their area. Differentials of 5d. and 10d. in the pound respectively were prescribed for 1967-68 and 1968-69. New valuation lists, prepared by valuation officers of the Board of Inland Revenue, came into force on April 1, 1963, and all rateable property is now rated on the basis of 1963 values. Agricultural land and buildings are exempt from rates. Under the General Rate Act, 1967, local authorities may decide to charge half rates on empty property; otherwise empty property is not rateable. The General Rate Act also makes provision for rate rebates for domestic ratepayers with small incomes. (2) *Government Grants*.—From 1948-49 to 1958-59, the Exchequer made annual equalization grants to counties and county boroughs whose rateable value was below the average rateable value per head of weighted population in England and Wales to bring their respective rateable values up to the average level. Equalization grants replaced the former "block" grants paid to local authorities until 1948, which included an element of compensation for loss of revenue through de-rating. Percentage grants covered an agreed proportion of expenditure on approved services such as education, health, police and fire services. Special grants were also made.

The Local Government Act, 1958, provided for a new general grant, payable from 1959-60 onwards, in replacement of a number of specific grants, of which the largest were for the education, local health, fire and child care services. It also provided for the replacement of the equalization grant, payable under the 1948 Act, by a rate-deficiency grant based on rate products instead of rateable values, and payable to county districts as well as counties and county boroughs.

The Local Government Act, 1966, provides rate support grant, to be paid to local authorities from 1967-68 in place of the general grant and rate-deficiency grant. The aggregate of Exchequer grants on revenue account is estimated in advance for a period of not less than two years, though not necessarily at the same level for each year of the period, and it may subsequently be increased if there is an unforeseen increase in the level of prices, costs and remuneration. From the aggregate is deducted the estimated amount of the specific grants for the year in aid of revenue expenditure

and the balance is the rate support grant. This is then divided into three parts known as the needs, resources and domestic elements.

The *needs element* is broadly similar to the general grant, though covering a wider field. It is distributed to county and county borough councils, the Common Council of the City of London, London Borough Councils and the Council of the Isles of Scilly by reference to population, the numbers of pupils and students at different stages of education and on other objective factors which are readily ascertainable and afford a fair and reasonable measure of the relative needs of each authority. The *resources element* is payable to any local authority whose rate resources per head of population fall below the national average. The *domestic element* is payable to all rating authorities who are required by the General Rate Act, 1967, to reduce the rate levied on dwelling houses by a number of pence fixed by the Minister of Housing and Local Government. The current level of relief is fivepence in 1967-68 and tenpence in 1968-69.

(3) *Loans*.—Local authorities may raise loans on the security of the rates, normally with the sanction of the Minister of Housing and Local Government, for capital expenditure on housing, roads, markets, municipal transport services, sewerage works, etc. On March 31, 1966, there were outstanding loans in England and Wales to the amount of £9,280,212,000; against this total the sum of £28,300,000 stood at the credit of various sinking funds.

Average Rates.—In 1968-69 average rates levied in England and Wales were: County Boroughs 13s. 3d.; Inner London Boroughs, 11s. 9d.; Outer London Boroughs, 12s. 3d.; Non-County Boroughs, 13s. 8d.; Urban Districts, 13s. 5d. Rural Districts, 11s. 8d.

The figures above are from the *Annual Return of Rates* issued by The Institute of Municipal Treasurers and Accountants (Incorporated).

SCOTLAND

Scotland is divided for local government purposes into counties, burghs and districts, and local authorities are similar to those in England and Wales.

County Councils.—First constituted in 1889, they are responsible for local government of the geographical area of the county excluding for most purposes the large burghs. For certain purposes the counties of Perth and Kinross, and Moray and Nairn are combined. County councils include representatives from the landward areas and from all the burghs which are within the county for any purpose, town councils electing representatives from among their own members. Councillors are elected triennially. The chairman of the county council is the convener of the County. There are 33 county councils in Scotland (see pp. 679-80).

Town Councils.—The town councils of the counties of cities (Edinburgh, Glasgow, Aberdeen and Dundee) are all-purpose authorities similar to the county borough councils in England and Wales and are presided over by the Lord Provost. Town councils consist of a provost (chairman), bailies and councillors. The provost and bailies (the equivalent of aldermen in England) are elected by the councillors from among themselves and hold office for three years; they are the magistrates of the burgh.

Large burghs other than the counties of cities, are independent for all purposes except that for valuation, electoral registration, education and, in some cases, police, they are included in the county; small burghs are within the county not only for these purposes but also for such purposes as classified roads, planning, etc.

There are 201 town councils in Scotland (counties of cities, 4; other large burghs, 21; small burghs 176). The additional small burgh is Cumbernauld, which achieved that status on May 16, 1968. (See pp. 680-1; 683-4.)

District Councils.—Outside the burghs the county council is responsible for most local government functions but district councils have statutory functions with regard to recreation grounds, rights of way, allotments, bus shelters and other local matters. Two counties—Kinross and Nairn—are not divided into districts. District councils consist of elected members and the county councillors for the district *ex officio*. There are 198 district councils in Scotland.

Local Government Electors.—In Scotland there are 1,86,761 electors in counties of cities, 602,148 in other large burghs, 646,607 in small burghs and 975,975 in landward areas—Total 3,411,491.

Product of 1d. rate in Scottish Cities

The estimated product of 1d. rate in Glasgow in 1967-68 was £130,212; in Edinburgh, £71,829; in Dundee, £23,408. Amounts of rates raised per head (1967-68) were: Glasgow, £43 19s. 8d.; Edinburgh, £33 3s. 3d.; Dundee, £30 17s. od.

NORTHERN IRELAND

The structure of local government in Northern Ireland is similar to that of England and Wales. Types of local authority are: county councils, 6; county boroughs, 2; non-county boroughs or municipal councils, 9; urban district councils, 25; and rural district councils, 27. (See p. 591.)

Electors.—The register published on Feb. 15, 1967, contained the names of 694,483 local government electors. Of this total, 106,774 related to the County Borough of Belfast and 23,312 to Londonderry County Borough. A new electoral register will be published on Feb. 15, 1970.

Local Government Debts.—The total amount of outstanding loans and capitalized annuities in Northern Ireland on March 31, 1967, was £204,438,830 (excluding Hospitals).

POLICE

The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Home and Health Department and those of Northern Ireland by the Ministry of Home Affairs.

In 1967 there were 3,525 women police in England and Wales; in Scotland there were 382.

On Dec. 31, 1967, the number of special constables enrolled in England and Wales was: Men, 38,088; Women, 1,839; Scotland (April, 30, 1968); Men, 4,953; Women, 115.

On Dec. 31, 1967, the Metropolitan Police had a total strength of 19,996, including 545 women; City Police, 753, including 20 women.

LONDON FIRE BRIGADE

Headquarters, Albert Embankment, S.E.1.

The London Fire Brigade set up on April 1, 1965, under the London Government Act, 1963, consists of the Brigades of the former counties of London and Middlesex (excluding the districts of Staines, Sunbury and Potters Bar), the former county boroughs of East Ham, West Ham and Croydon and of parts of Essex, Herts, Kent and Surrey.

The Brigade is organized in 3 Commands (Eastern, Northern and Southern) and 11 Divisions. It has 116 land and 11 river stations. Whole-time authorized establishment, 5,389. There are 507 land appliances and 11 fire boats in commission. Fire calls (estimated), 60,000 per annum.

Chief Officer, L. W. T. Leete, C.B.E.

Deputy Chief Fire Officer, F. S. Mummery, C.B.E.

Assistant Chief Officers, J. K. H. Cunningham; M.B.E.; H. F. Chisnall; A. G. W. Sellwood, M.B.E.; F. R. Trust, M.B.E.; A. J. Milbery (Eastern Command); R. R. Lloyd, O.B.E. (Southern Command); (Northern Command) (vacant).

BRITISH ISLES

THE KINGDOM OF ENGLAND

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between $55^{\circ} 46'$ and $49^{\circ} 57' 30''$ N. latitude (from the mouth of the Tweed to the Lizard), and between $1^{\circ} 46'$ E. and $5^{\circ} 43'$ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean, Wales and the Irish Sea. It has a total area of 50,332 sq. miles (land, 50,056; inland water 276) and a population estimated (June 30, 1967) of 45,680,870.

Relief.—There is a natural orographic division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the Pennine Chain, running N. by W. to S. by E., with its highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the Cumbrian Mountains, which contain in Scafell Pike (3,210 feet) the highest land in England, and east of the Pennines are the Yorkshire Moors, their highest point being Urra Moor (1,489 feet). South of the Pennines are the Peak of Derbyshire (2,088 feet) and Dartmoor (High Willhays, 2,030 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Longmynd (1,696 feet), and Brown Clee (1,792 feet); in Herefordshire the Black Mountain (2,310 feet), in Worcestershire the Malvern Hills (1,395 feet), in Monmouthshire (now usually grouped with Wales) the Sugar Loaf (1,955 feet) and Coity (1,905 feet), and the Cotswold Hills of Gloucestershire contain Cleeve Cloud (1,134 feet).

Hydrography.—The Thames is the longest and most important river of England, with a total length of 210 miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (69 miles from its mouth) and forms county boundaries almost throughout its course; on its banks are situated London, the capital of the British Commonwealth; Windsor Castle, the home of the Sovereign, Eton College, the first of the public schools, and Oxford, the oldest university in the kingdom. The Severn is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16½ miles), which admits vessels of 350 tons to Gloucester. The Severn Tunnel, 14 miles below the Sharpness Bridge, begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, is 1 mile 624 yards in length (of which 2½ miles are under the river). A road

bridge over the Severn estuary, between Haysgate, Mon., and Almondsbury, Glos., with a centre span of 3,240 ft. was opened by Her Majesty the Queen on September 8, 1966. Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lakes are noteworthy rather for their picturesque scenery and poetic associations than for their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ullswater and Derwentwater.

Islands.—The Isle of Wight is separated from Hampshire by the Solent; total area 147 sq. miles, population (estimated, 1967) 98,040. The climate is mild and healthy, and many watering places have grown up during the last century. Capital, Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay, Seaview and Bembridge. The Scilly Islands, 25 miles from Land's End, consist of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited. The capital is Hugh Town, in St. Mary's. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. Lundy (=Island), 11 miles N.W. of Hartland Point, Devon, is about 2 miles long and about ½ mile broad (average), with a total area of about 1,050 acres (mainly picturesque), and a population of about 20; it contains the seat of the proprietor of the island and 3 lighthouses (one disused).

Climate.—The mean annual air temperature reduced to sea-level varies from 52° F. at Penzance and the Scilly Islands to 48° F. near Berwick-on-Tweed. In January the south and west are warmer than the east, the mean temperature reduced to sea-level being less than 40° F. over the eastern half of the country. In July the warmest districts are more definitely in the south and inland, the range being from 63° F around London to less than 50° F. in the extreme north. The decrease of mean temperature with height is about 1° F. per 300 ft. The coldest month of the year is January and the warmest July. Sea temperature reaches its maximum rather later than air temperature. The average annual rainfall decreases from west to east, owing to the preponderance of south-west winds, and also increases with altitude. The annual average, 1916–1950, varies from about 40 in. in the neighbourhood of the Thames Estuary and locally in Cambridgeshire to more than 100 in. over the mountains of the Lake District. Rather more rain falls in the summer half-year in parts of the east, but in the west much more falls in the winter half-year. The months of least rain are March to June and the wettest months October to January. The mean annual number of hours of bright sunshine varies from 1,750 hours along the south-east coast to less than 1,300 hours in the neighbourhood of the Pennine range. June is the sunniest month, followed by May, July and August in that order.

EARLY INHABITANTS

Prehistoric Man.—Palæolithic and Neolithic remains are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (10 miles N. of Salisbury, Wiltshire) which consists of two circles of menhirs (the largest monolith being 22½ feet in height). The village of *Avebury* and its surroundings were scheduled in 1937, and in 1943 about 1,000 acres at Avebury were purchased by the National Trust, thus preserving the Circle of megalithic monuments, the Avenue, Silbury Hill, etc., relics of Stone Age culture of 1900–1800 B.C., which make this one of the most important archaeological sites in Europe. The Devil's Arrows, near Boroughbridge, Yorkshire, are regarded as the finest remaining megalithic monoliths in northern Europe; the tallest arrow is 30 ft. 6 in. high and its greatest circumference is 16 ft. In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age other Celtic races of *Brythons* and *Belgae*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C. The Emperor Claudius, nearly 100 years later (A.D. 42), dispatched Aulus Plautius, with a well-equipped force of 40,000 all arms, and himself followed with reinforcements in the same year. The British leader from A.D. 48–51 was *Caratacus* (*Caractacus*), who was finally captured and sent to Rome. By A.D. 70 the conquest of South Britain was completed, a great revolt under *Boadicea*, Queen of the Iceni, being crushed in A.D. 61. In A.D. 122, the Emperor Hadrian visited Britain and built a continuous rampart, since known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway). The work was entrusted by the Emperor Hadrian to Aulus Platorius Nepos, legate of Britain from 122 to 126, and it is now regarded as "the greatest and most impressive relic of the Roman frontier system in Europe." The Romans administered Britain as a Province under a Governor, with a well-defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. Well-preserved Roman towns have been uncovered at (or near) *Silchester* (*Calleva Atrebatum*), 10 miles south of Reading, *Wroxeter* (*Viroconium*), near Shrewsbury, and *St. Albans* (*Verulamium*) in Hertfordshire. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from *Ermine Street* (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman province of Britain from Gaul in the 3rd century (or possibly earlier), *Alban*, "the protomartyr of Britain," being put to death a

Christian during the persecution of Diocletian (June 22, 303), at his native town *Verulamium*. The Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attended the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties. A system of coast defence was organized from the Wash to Southampton Water, with forts at Brancaster, Burgh Castle (Yarmouth), Walton (Felixstowe), Bradwell, Reculver, Richborough, Dover, Stutfall, Pevensey and Porchester (Portsmouth). About A.D. 350 incursions in the north of Irish (Scoti) and Picts became most formidable, and towards the end of the 4th century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders and Britain was cut off from Rome. The last Roman garrison was withdrawn from Britain in A.D. 442 and the S.E. portion was conquered by the Saxons. The Latin-speaking Celts of England were replaced by their heathen and Teutonic conquerors, to the submergence of the Christian religion and the loss of Latin speech. According to legend, the British King *Vortigern* called in the Saxons to defend him against the Picts, the Saxon chieftains being *Hengist* and *Horsa*, who landed at Ebbsfleet, Kent, and established themselves in the Isle of Thanet. Bede, a Northumbrian monk, author of the Ecclesiastical History at the opening of the 8th century, described these settlers as Jutes, and there are traces of differences in Kentish customs from those of other Anglo-Saxon kingdoms.

Anglo-Saxons and Normans.—What happened in Britain during the 150 years which elapsed between the final break with Rome and the coming of St. Augustine is shrouded in the deepest mystery. The Jutes, the Saxons and the Angles (whose gods Twi, Woden, Thor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbispocracies at Canterbury and York, and England appears to have been again converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex Kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegeft*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating (at Stamford Bridge, Yorkshire, Sept. 25) an invading army under Harald Hadrada, King of Norway (aided by the outlawed Earl Tostig, of Northumbria, younger son of Earl Godwin), he was himself defeated at the *Battle of Hastings* on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy.

Lords Lieutenant of Counties.—The actual words used in the Letters Patent relative to these appointments are "Her Majesty's Lieutenant of and in the County of . . ." and this is the official title whether the individual appointed be a Peer or a Commoner. In documents of the highest formality the proper term is therefore "Her Majesty's Lieutenant." In less formal and informal documents and colloquially, the style "Lord Lieutenant" has been applied to H.M. Lieutenants, Peers and Commoners alike, for many years. The duties of the Lord Lieutenant are to advise the Lord Chancellor as to the appointment of magistrates to the county bench, to appoint Deputy Lieutenants and to raise the militia, if need be, in time of riot or invasion. The Lord Lieutenant is usually a peer or a baronet and a large landowner and is often appointed *custos rotulorum* (keeper of the records).

GREATER LONDON COUNCIL

The Greater London Council and 32 London Borough Councils were constituted under the London Government Act, 1963. They replaced, on April 1, 1965, the London County Council, the Middlesex County Council, the County Borough Councils of Croydon, East Ham and West Ham, 28 metropolitan borough, 39 non-county borough and 15 urban district councils. The boundaries and constitution of the Corporation of the City of London were not affected.

Under the Act, Greater London became for the first time a clearly defined local government area with a population of 7,880,760 (1967 estimate) and an area of 620 square miles, including, in addition to the former counties of London and the greater part of Middlesex, parts of Metropolitan Essex, Kent, Surrey and Hertfordshire.

The Greater London Council consists of 100 councillors and 16 aldermen. Elections are held every third year. For the first two elections in April 1964 and 1967, the electoral areas were the 32 London Boroughs, each returning two, three or four councillors according to the size of the electorate. Aldermen, who are chosen by the councillors, hold office for six years, half their number retiring every third year. The Chairman, Vice-Chairman and Deputy Chairman are elected annually by the councillors and aldermen. The political head of the administration is the Leader of the Council, elected by the majority party. The Council meets fortnightly at 2.30 p.m. on Tuesdays except in holiday periods. Of the 13 standing committees, five meet fortnightly, seven monthly and the other as required.

The services provided by the G.L.C. include planning, roads, traffic management and control, fire and ambulance services, refuse disposal, housing, parks, licensing, main drainage and sewage disposal. For many of these services it shares responsibility with the London Borough Councils and the City Corporation.

Planning.—The Council as planning authority for Greater London ■ a whole is preparing a strategic development plan which will lay down basic planning policies and principles for the whole area, including proposals for a future road system. This Greater London Development Plan is to be ready for submission to the Minister of Housing and Local Government by July, 1969. Within its framework, the London Borough Councils and the City Corporation will prepare their own detailed local development plans. Town planning control of private development proposals is mainly the concern of the London Boroughs but the G.L.C. has some responsibilities in this field. As planner and developer the Council is involved in many major schemes. Notable examples are the Thamesmead project and the Covent Garden and Piccadilly areas.

Traffic and transport.—The Council is responsible for the construction, improvement and maintenance of metropolitan roads, at present 550 miles in length. As the traffic authority for all roads in Greater London it prepares or approves schemes for one-way working, traffic signals, clearways, waiting and loading restrictions and speed limits and makes the orders which enforce them. It maintains the Thames tunnels, the Woolwich Free Ferry, and the 14 Thames bridges from Waterloo to Kingston and, jointly with the Surrey County Council, the Hampton Court bridge.

The Government, in the White Paper *Transport in London*, has declared its intention of giving the Council the primary responsibility for overall transport planning, including the fullest possible

integration of all forms of public transport, traffic measures and the development of the most important roads, in close association with land use planning.

Housing.—The Council shares with the London Borough Councils responsibility for housing in London and it accommodates 5,000 families ■ year in towns outside London. Its present stock of homes is 245,000 and its building programme in London, increasingly by industrialized prefabrication, 7,500 ■ year.

Expanding towns.—An important aspect of the Council's policy is the decentralization of population and industry to towns expanding under agreements with the G.L.C. made under the Town Development Act, 1952. The Council has such agreements with 30 towns and is negotiating with several other towns which wish to expand.

Main drainage and sewage purification.—The Council provides the main drainage service for about seven million people in the 500 square miles of the Greater London sewerage area, dealing with some 500,000,000 gallons of sewage a day. The sewage is carried by gravity and by pumping through over 500 miles of main sewers to seven sewage treatment works, including the three largest in Western Europe (the Beckton (Newham), Crossness (Bexley) and Mogden (Hounslow) Works), where it is treated and the residual sludge removed for disposal.

Refuse disposal.—The Council has been responsible since April 1, 1965, for the disposal of refuse throughout Greater London—some 3,000,000 tons of refuse being handled each year. It operates thirty-two transfer stations (where refuse is transferred into bulk carrying vehicles, barges or railway wagons); fourteen incinerators; a pulverization plant and ■ composting plant. Refuse is used for infilling at thirty land reclamation sites. The Boroughs continue to be responsible for refuse collection.

Land drainage, pollution control and flood prevention.—The Council is the land drainage authority for an area of 400 square miles, known as the London Excluded Area. Within this area the Council is responsible for improvement, maintenance and prevention of flooding on all main metropolitan watercourses; for other metropolitan watercourses the Council shares the responsibility with the London Borough Councils concerned. Pollution control is exercised over all watercourses in the area, except the tidal Thames itself and the tidal stretches of its tributaries. The Council is responsible for flood prevention along 92 miles of river bank of the Thames and its tidal tributaries.

Fire and Ambulance Services.—The Council runs both the fire and ambulance services for its whole area (see p. 627). **The London Ambulance Service.**—With a fleet of nearly 1,000 vehicles, based at 76 stations and manned by 2,500 operational and control staff, the London Ambulance Service has about ■ sixth of the total ambulance resources of England and Wales. Including help given by the hospital car service as agents, more than 3,000,000 patients are carried each year.

Parks.—The Council maintains more than 160 former L.C.C. parks and open spaces covering about 7,500 acres. The London Borough Councils and the City Corporation between them provide a further 28,000 acres. Over 1,500 open-air entertainments are arranged in G.L.C. parks each summer and almost all games and sports are provided for. At Crystal Palace, in addition to the Council's 70 acre park is the Crystal Palace National Re-

creation Centre, owned by the Council and managed by the Central Council of Physical Recreation.

Education.—The local education authority for an area corresponding with the area of the twelve inner London boroughs and the City of London is the Inner London Education Authority, a special committee of the G.L.C. consisting of the members of the Council elected for the inner London boroughs together with a representative of each inner London Borough Council and of the Common Council. The Council charges to the rating authorities in the Inner London Education Area the expenditure of the I.L.E.A., the amount being determined by the Authority. This unique arrangement preserves the continuity of the service which has developed since 1870 as a unity without regard to local boundary divisions.

The total number of pupils on the rolls of the Authority's nursery, primary and secondary schools (including special schools for handicapped children) is 479,325. There are 28 nursery, 750 county (including 3 at Children's homes), 360 voluntary and 94 special schools, staffed by the equivalent of 19,741 full-time teachers. Vocational instruction, cultural studies and recreational activities for persons over compulsory school age are arranged at the various establishments for further education. The Authority maintains 18 technical colleges and schools of art and makes grants to 14 polytechnics and other institutions. There are 6 colleges of commerce, 3 general and commercial colleges and

13 colleges for further education. Non-vocational classes are offered at 35 evening and literary institutes, 21 recreational institutes and 25 youth centres. Nine colleges for the training of teachers are also managed by the Authority. The 20 outer London Borough Councils are the education authorities for their Boroughs.

Expenditure.—The gross revenue expenditure of the G.L.C. in 1968-69 will be nearly £199,000,000 and that of the I.L.E.A. over £126,000,000, making a total of £325,000,000. Of this about 47 per cent. (£152,000,000) will be met from rates, 40 per cent. (£132,000,000) from income from services, rents, etc., and the balance (£41,000,000) from Government grants. The amount raised by rates varies for different areas according to the services provided. Capital expenditure of the G.L.C. and the I.L.E.A., mainly met by borrowing, will amount to about £164,000,000. More than half of this will be used for housing and loans for house purchase.

Other features of the G.L.C.'s administration include its responsibility for the Royal Festival Hall, Queen Elizabeth Hall and Purcell Room and the Hayward Gallery; the maintenance of the Iveagh Bequest, Ken Wood, several other buildings of historic interest and two museums. The new research and intelligence unit, now being established, is concerned with information and research on any matters concerning Greater London. The results of its work will be available to government departments, local authorities and the public.

THE CORPORATION OF LONDON

The City of London is the historic centre at the heart of London known as "the square mile" around which the vast metropolis has grown over the centuries. The City's population was estimated at 4,530 on June 30, 1967. The civic government is carried on by the Corporation of London through the Court of Common Council, a body consisting of the Lord Mayor, 25 other Aldermen and 159 Common Councilmen. The legal title of the Corporation is "the Mayor and Commonalty and Citizens of the City of London."

The City is the financial and business centre of London and includes the head offices of the principal banks, insurance companies and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall and the 15th century Guildhall, to the massive splendour of St. Paul's Cathedral and the architectural beauty of Wren's spires.

The City of London at the time of the revolt of the Iceni (A.D. 61) was described by Tacitus

(born A.D. 55; died A.D. 120) as "a busy emporium for trade and traders." In Saxon times it was, in reality, a small independent federated State of Wards (holding *wardmotes*) with a *folk-mote*, predecessor of the present Common Council, for general affairs. Its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and granted a charter, which is still preserved. The mayoralty was established on the recognition of the corporate unity of the citizens by Prince John in 1101, the first Mayor being Henry Fitz Ailwyn, who filled the office for 21 years and was succeeded by Fitz Alan (1212-15). A new charter was granted by King John in 1215, directing the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398,

1406, 1419); and many modern cases have occurred. The earliest instance of the phrase "Lord Mayor" in English is in 1444. It is used more generally in the latter part of the 15th century and becomes variable from 1535 onwards. At Michaelmas the Liverymen in Common Hall choose two Aldermen who have served the office of Sheriff for presentation to the Court of Aldermen, and one is chosen to be Lord Mayor for the ensuing mayoral year. The Lord Mayor is presented to the Lord Chief Justice at the Royal Courts of Justice on the second Saturday in November to make the final declaration of office, having been sworn in at Guildhall on the preceding day. The procession to the Royal Courts of Justice is popularly known as the *Lord Mayor's Show*.

Aldermen are mentioned in the 11th century and their office is of Saxon origin. They were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council*, elected annually on December 17, was, at an early date, substituted for a popular assembly called the *Folkmote*. At first only two representatives were sent from each ward, but the number has since been greatly increased.

Sheriffs were Saxon officers; their predecessors were the *wic-reeves* and *portreeves* of London and Middlesex. At first they were officers of the Crown, and were named by the Barons of the Exchequer; but Henry I. (in 1132) gave the citizens permission to choose their own Sheriffs, and the annual election of Sheriffs became fully operative under King John's charter of 1199. The citizens lost this privilege, far as the election of Sheriff of Middlesex is concerned, by the Local Government

Act, 1888; but the Liverymen continue, heretofore, to choose two Sheriffs of the City of London, who are appointed on Midsummer Day, and take office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The office of Chamberlain is an ancient one, the first contemporary record of which is 1276. The Town Clerk (or Common Clerk) is mentioned in 1274 and the Common Serjeant in 1291.

Activities.—The work is assigned to a number of committees which present reports to the Court of Common Council. These Committees are:—City Lands, Bridge House Estates, Coal, Corn and Rates Finance, Improvements and Town Planning, Streets, Central Markets, Billingsgate and Leadenhall Markets, Spitalfields Market, Police, Port and City of London Health, Library (Library, Records, Art Gallery and Museum), City of London Schools, Freemen's School, Music (Guildhall School of Music and Drama), General Purposes, Establishment, Civil Defence, Housing, Gresham (City side), Epping Forest and Open Spaces, West Ham Park, Policy and Parliamentary, Privileges, Welfare, Guildhall Reconstruction, Barbican, Central Criminal Court (Extension) and Licensing Planning.

The Honourable the *Irish Society*, which manages the Corporation's Estates in Ulster, consists of a Governor and 5 other Aldermen, the Recorder, and 19 Common Councilmen, of whom one is elected Deputy Governor.

The *City's Estate*, in the possession of which the Corporation of London differs from other municipalities, is managed by the City Lands Committee, the Chairmanship of which carries with it the title of "Chief Commoner."

The Right Honourable the Lord Mayor 1967–1968*

Sir Gilbert (Samuel) Inglefield, G.B.E., T.D., D.Sc., born 1909, Alderman of Aldersgate, 1959; Sheriff of London 1963; Lord Mayor, 1967. £18,750

THE CITY GUILDS (LIVERY COMPANIES)

The Livery Companies of the City of London derive their name from the assumption of a distinctive dress or livery by their members in the 14th century.

The order of precedence (according to 2nd Report of Municipal Corporations' Commissioners, 1837) and omitting extinct companies, is given in parentheses after the name of each Company. There are 84 Guilds in existence. The Comb-makers, Silk-throwers, Silkmen, Pinmakers, Soap-makers, Hatbandmakers, Long-bow Stringmakers, Woodmongers, Starchmakers and Fishermen are extinct.

About 10,000 Liverymen of the Guilds are entitled to vote at elections in Common Hall.

Public and Private Buildings in London

ADELPHI, Strand, W.C.2.—Adelphi Terrace and district commemorate the four architect brothers, James, John, Robert and William ADAM, who laid out the district (formerly Durham House) at the close of the 18th century. Four of the streets in the Adelphi were formerly called James, John, Robert, and William Streets to commemorate these founders of the Adam style of architecture and internal decoration. They are now Adam Street, John Adam Street, Robert Street and Durham House Street. Extensive rebuilding took place between the two World Wars, and there are now few 18th-century houses left in the district. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens), the commemorative streets being Charles Street, Villiers Street, Duke Street, Of Lane, Buckingham Street (Of Lane is now "York Buildings").

AUSTRALIA HOUSE, Strand, W.C.2.—A handsome and imposing building, erected 1911-14 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. **NEW SOUTH WALES**, **QUEENSLAND**, **VICTORIA** and **WESTERN AUSTRALIA** have separate offices in the Strand; **TASMANIA** at Golden Cross House, Charing Cross, and **SOUTH AUSTRALIA** at S.A. House, 50 Strand, W.C.2.

BALTIC EXCHANGE, St. Mary Axe, E.C.3.—The world market for the chartering of cargo ships. The present Exchange was built in 1903 and the new wing opened by Her Majesty the Queen on Nov. 21, 1956.

BANK OF ENGLAND, Threadneedle Street, E.C.2. (Not open to sightseers.)—The Bank of England, founded in 1694, has always been closely connected with the Government. The present building, completed in 1940 to the designs of Sir Herbert Baker, incorporates features reminiscent of the earlier architects, Sampson (1734), Sir Robert Taylor (1765) and Sir John Soane (1788). A Bank piquet is mounted every evening by the Brigade of Guards.

BRIDGES.—The bridges over the Thames (from East to West) are the *Tower Bridge* (built by the Corporation of London and opened in 1894), with its bascules, affording a fine view of the Pool and of the metropolis; *London Bridge* (opened after rebuilding in 1831, and until 1750 the only bridge over the Thames in London), with the London Monument (*q.v.*) and Fishmongers' Hall; *Southwark Bridge* (opened in 1819, and rebuilt by the Corporation of London, 1922); *Blackfriars Bridge* (opened in 1869 and widened by the Corporation of London in 1908); width, 105 ft.; *Waterloo Bridge* (Rennie), width, 42 ft. 6 ins. (opened in 1817) commanding a fine view of western London (rebuilt by L.C.C. and re-opened 1944); *Hungerford Bridge* (railway bridge with a footbridge); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet; rebuilt and re-opened in 1862; width, 84 ft.) with *Thornycroft's Boadicea* at the north-eastern end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall (*q.v.*) and St. Thomas's Hospital; *Lambeth Bridge* (rebuilt by L.C.C. and opened in 1932) leading from Lambeth Palace to Millbank; *Vauxhall Bridge* (rebuilt in 1906) leading to Kennington Oval; *Chester Bridge*, leading from Chelsea Hospital to Battersea Park (reconstructed and widened 1937); and *Albert Bridge* (1873); *Battersea Bridge* (opened in 1890); *Wandsworth Bridge*

(opened in 1873; rebuilt and re-opened in 1940); *Putney Bridge* (opened in 1886 and widened in 1933) where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammersmith Bridge* (rebuilt 1887); *Barnes Bridge* (for pedestrians only, 1933); *Chiswick Bridge* (opened in 1933); *King Edward VII Bridge*, Kew (rebuilt in 1902), leading to the Royal Botanic Gardens, Kew; *Twickenham Lock Bridge*; *Twickenham Bridge* (opened in 1933); *Richmond Bridge* (opened in 1777); *Kingston Bridge* and *Hampton Court Bridge* (rebuilt, 1933).

BUCKINGHAM PALACE, St. James's Park, S.W.1. (Not open to the public.)—Was purchased by King George III in 1762 from the heir of the Duke of Buckingham, and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Re-fronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

The Queen's Gallery, containing a changing selection of the finest pictures and works of art from all parts of the royal collection, was opened to the public on July 25, 1962. Open: Tues.-Sat., 11-5 p.m.; Sundays, 2-5 p.m.; Bank Holiday Mondays, 11-5 p.m. (Closed on other Mondays.) Admission, 2s. 6d., entering from Buckingham Palace Road.

The Royal Mews is open to visitors on Wednesdays and Thursdays throughout the year (except in Ascot Week), 2-4 p.m. The following charges, the net proceeds of which are devoted to charities, are payable on admission: Adults, 2s. 6d.; Children, 1s.

CANADA HOUSE, Trafalgar Square, S.W.1.—A conspicuous building on the Western side of the Square, housing the Office of the High Commissioner for Canada in the United Kingdom. Designed by Sir Robert Smirke in 1820, it was renovated and embellished when acquired from the Union Club in 1924. Further major alterations have been completed to incorporate the former Royal College of Physicians building, also designed by Sir Robert Smirke, which was acquired in 1964. The renovated building was re-opened in March, 1967. The exteriors of the two buildings were originally designed to create the appearance of a single building by presenting a common façade facing Trafalgar Square. Certain interior features of the original building are preserved and the spacious, richly furnished room now occupied by the High Commissioner is much admired. Surrounded by Offices of Canadian Banks, Steamship, Railway and other Companies, the Canadian Building is one of London's landmarks. It was opened by King George V. in June, 1925.

CANONBURY TOWER, Canonbury, N.1.—The largest remaining part of a 16th-century house originally built by the Priors of St. Bartholomew, and since 1952 used as the headquarters of a non-professional theatre company. Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen nearby.

CARLYLE'S HOUSE, 24 Cheyne Row, Chelsea, S.W.3. The home of Thomas Carlyle for 47 years until his death in 1881, and containing much of his furniture, etc. Now the property of the National Trust. Open daily, except Tuesdays, 10-1, 2-6, or dusk, if earlier. Sundays, 2-6. Admission, 2s.; Children and Students, 1s.

CATHOLIC CENTRAL LIBRARY, St. Francis Friary, 47 Francis Street, S.W.1.—Founded as a private

library in 1914, it was taken over in 1959 by the Franciscan Friars of the Atonement. Stock of 45,000 volumes for lending and reference, on many aspects of religion (devotional, Church history, doctrine, etc.), sociology, fine arts, literature, history, travel, biography and fiction. Books are sent by post when required. Hours of opening: Mon.-Fri. 10.30-6.30; Sat. 10.30-4.30.

CEMETRIES.—In *Kensal Green Cemetery*, North Kensington, W.10 (70 acres), are tombs of W. M. Thackeray, Anthony Trollope, Sydney Smith, Shirly Brooks, Wilkie Collins, Tom Hood, W. Mulready, George Cruikshank, John Leech, Leigh Hunt, Brunel ("Great Eastern"), Ross (Arctic), Charles Kemble and Charles Mathews (Actors). In *Highgate Cemetery*, N.6., are the tombs of George Eliot, Herbert Spencer, Michael Faraday, Karl Marx and G. J. Holyoake. In *Abney Park Cemetery*, Stoke Newington, N.16, are the tomb of General Booth, founder of the Salvation Army, and memorials to many Nonconformist Divines. In the *South Metropolitan Cemetery*, Norwood, S.E.27, are the tombs of C. H. Spurgeon, Lord Alverstone, Douglas Jerrold, John Belcher, R.A., Theodore Watts-Dunton, Dr. Moffat (Missionary), Sir H. Bessemer, Sir H. Maxim, Sir J. Barnby, Sir A. Manns, and J. Whitaker, F.S.A. (*Whitaker's Almanack*). In the churchyard of the former *Marylebone Chapel* are buried Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician). The chapel itself was demolished in 1949. **CREMATORIA.**—*Ilford* (City of London); *Norwood*; *Hendon*; *Streatham Park*; *Finchley* (St. Marylebone) and *Golder's Green* (12 acres), near Hampstead Heath, with "Garden of Rest" and memorials to famous men and women.

CENOTAPH.—Whitehall, S.W.1.—(Literally "empty tomb"). Monument erected "To the Glorious Dead," ■■ memorial to all ranks of the Sea, Land and Air Forces who gave their lives in the service of the Empire during the First World War. Erected ■■ temporary memorial in 1919 and replaced by a permanent structure in 1920. Unveiled by King George V. on Armistice Day, 1920. An additional inscription was added after the 1939-45 War, to commemorate those who gave their lives in that conflict.

CHARTERHOUSE.—Charterhouse Square, E.C.1. (Master, Rev. T. S. Nevill, M.A.; Registrar and Clerk to the Governors, N. Long-Brown, M.A., LL.B.). ■ Carthusian monastery until 1538, purchased from the Earl of Suffolk in 1611 by Thomas Sutton as a home for aged "Brothers" and a School (at Godalming since 1872). The buildings are partly 14th (but mainly 16th) century. They suffered much damage during the 1939-45 War but are now restored and can accommodate nearly 40 "Brothers." Visitors must apply to the Registrar for permission to see the Hall, etc. (Charge for admission, 4s. 9d. per person). Roger Williams, the founder and governor of Rhode Island, U.S.A., was on June 25, 1621, elected ■ scholar of Sutton's Hospital. Other famous Carthusians are John Wesley; the poets Crashaw and Lovelace; Addison and Steele; Sir William Blackstone and Thackeray, who described "Greyfriars School" (Charterhouse) in "The Newcomes."

CHELSEA PHYSIC GARDEN. Royal Hospital Road, S.W.3.—A garden of general botanical research, established in latter part of 17th century by the Society of Apothecaries, occupies site presented in 1722 by Sir Hans Sloane. Transferred in 1899 to the Trustees of the London Parochial Charities. Tickets of admission for approved students obtainable from the Clerk to the Trustees, 10 Fleet Street, E.C.4.

CHELSEA ROYAL HOSPITAL (founded by Charles II, in 1682, and built by Wren; opened in 1692), Royal Hospital Road, Chelsea, S.W.3, for old and disabled soldiers. Great Hall, Chapel, Museum open daily 10 to 12 and ■ to 5, and on Sunday afternoons. Council Chamber open on Sundays, 11.45 to 12 and 2 to 4 p.m. The extensive grounds include the former Ranelagh Gardens. Governor, General Sir Frank Simpson, G.B.E., K.C.B., D.S.O.; Lieut.-Governor and Secretary, Major-General Sir Nigel Tapp, K.B.E., C.B., D.S.O.

COLLEGE OF ARMS OR HERALDS' COLLEGE, Queen Victoria Street, E.C.4.—Her Majesty's Officers of Arms (Kings, Heralds and Pursuivants of Arms) were incorporated by Richard III, and granted Derby House on the site of the present College building by Philip and Mary. The building now in use was built after the Fire of London. The powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to State ceremonial are largely exercised through the College, which is the official repository of English coats of arms and pedigrees. Enquiry may be made to the Officer on duty in the Public Office every day between 10 a.m. and 4 p.m. Saturdays, 10 to 1.

COMMONWEALTH INSTITUTE, Kensington High Street, W.8.—A permanent exhibition in a new building opened on Nov. 6, 1962, by Her Majesty the Queen, replacing the former Imperial Institute opened in 1893 in S. Kensington. An interesting feature of the new building is its paraboloid copper-sheathed roof. The Institute contains, in 60,000 square feet arranged in 3 galleries, ■ visual representation of the history and geography of the Commonwealth countries and dependencies: on the ground floor, exhibits of Canada, Australia, New Zealand, India, Pakistan and Ceylon; on the middle gallery, the African territories; and on the upper gallery, the other territories of the Commonwealth. Art gallery; Cinema, showing documentary films daily.

Open, week-days, 10-5.30; Sundays, 2.30-6. Admission free. Closed Good Friday, Christmas Eve and Christmas Day.

COUNTY HALL, Westminster Bridge, S.E.1.—The Headquarters of the Greater London Council (see pp. 634-6) built on the Pedlar's Acre, Bishop's Acre, Four Acres and Float Mead, Lambeth, from the designs of Ralph Knott, with a river facade of 750 ft. Foundation stone laid by King George V., March 9, 1912, and the ceremonial opening of the first three sections of the building on July 17, 1922. In 1930 the two central sections of the north and south blocks were completed on a site to the east of the main building. The extension to the north block was completed in 1958 and to the south block in 1963. The main building contains, in addition to office accommodation, the council chamber, ■ conference hall, committee and conference rooms; education library for teachers; county record office; and a members' library with maps, prints, drawings, books and manuscripts on London, which is open to the public for reference purposes. *Archivist and Librarian*, Miss E. D. Mercer, F.S.A. The Council, when in session, meets in public in the council chamber fortnightly on Tuesday afternoons at 2.30 p.m. The times for public inspection of the building are, on Saturdays and Bank Holidays (except Christmas Day) from 10.30-1; 1.30-4 p.m. Admission free.

CUSTOM HOUSE, Lower Thames Street, E.C.3.—Built early in 19th century, with a wide quay on Thames. The Long Room is about 190 ft. long.

DICKENS HOUSE, 48 Doughty Street, W.C.1.—In this house Charles Dickens lived from 1837 to 1839, and here he completed *Pickwick Papers*. It is the headquarters of The Dickens Fellowship, and

contains many relics of the novelist. It is open to the public daily, 10 to 12.30 and 2 to 5 (Sundays and Bank Holidays excepted); admission 2s. 6d; students, 1s. 6d; children, 6d.

DR. JOHNSON'S HOUSE, Gough Square, Fleet Street, E.C.4.—An imposing late 17th-century house, in the garret of which, with the aid of six amanuenses, Samuel Johnson compiled his Dictionary. The garret, damaged by bombs in 1941, was restored and reopened in 1948. Open daily (except Sundays and Bank Holidays) from 10.30 to 4.30 or 5 (according to season). Admission 2s.; Students, 1s.

ELY PLACE, Holborn Circus, E.C.1.—The site of the London house of former Bishops of Ely, Ely Place is a private street whose affairs are administered by Commissioners under a special Act of Parliament. The 14th-century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk.

FULHAM PALACE, Bishop's Avenue, Fulham, S.W.6.—The courtyard is 16th century, remainder 18th and 19th century. Residence of the Bishop of London. Grounds of about 9 acres.

GEFFRYE MUSEUM, Kingsland Road, E.2.—Open on Tuesdays to Saturdays 10 to 5, Sundays 2 to 5. Closed on Christmas Day and on Mondays except Bank Holidays. Admission free.

The Museum is housed in a building erected originally as almshouses in 1715. It was eventually purchased by the London County Council and opened as a museum in 1914. The exhibits are shown in a series of period rooms dating from 1600 to the present day, each containing furniture and domestic equipment of a middle-class English home. Photographic enlargements illustrate the costume of each period. An 18th century wood-worker's shop and a downhearth kitchen are also shown. Temporary exhibitions and periodic series of evening lectures and recitals are held in the Lecture Hall. There is a reference library of books on furniture, social history and art. Special arrangements for children visiting the Museum in school parties and in their leisure time. Curator, Mrs. M. Harrison, M.B.E.

GEORGE INN, Southwark.—Near London Bridge Station. Given to National Trust in 1937. Last galleried inn in London, built in 1677.

GUILDFHALL, King Street, City, E.C.2 (dating from early 15th century).—Burnt out by incendiary bombs, 1940. The main hall and crypt have been restored. The Library, Museum and Art Gallery adjoining mainly escaped damage, and are in part open to the public. Admission free. The Library (with Commercial Reference Room adjoining) contains Plan of London, 1570; Deed of Sale with Shakespeare's signature; first, second and fourth folios of Shakespeare's plays, etc. Open free on week-days 10-5 and Sundays (May-Sept.), 2-5. Keeper of the Guildhall, W. Parker.

HONOURABLE ARTILLERY COMPANY'S HEADQUARTERS, City Road, E.C.1.—The H.A.C. (Sec.-Lt.-Col. P. Massey, M.C.) received its charter of incorporation from Henry VIII in 1537, and has occupied its present ground since 1642. The Armoury House dates from 1735. Four of its members who emigrated in the 17th century, founded in 1638 the Ancient and Honorable Artillery Company of Massachusetts. The H.A.C. is the senior regiment of the Army Volunteer Reserves, and maintains a Headquarters with an Officer Training Wing, and Artillery and Infantry components.

HORNIMAN MUSEUM AND LIBRARY, London Road, Forest Hill, S.E.23. Open daily except Christmas Eve and Christmas Day, 10.30 to 6, Sundays 2 to 6. Admission free. The Museum was presented in 1901 to the London County Council by the founder, Mr. F. J. Horniman, M.P.

The Museum has three main departments, ethnology, musical instruments and natural history. In the ethnology department the large collections include exhibits illustrating man's progress in the arts and crafts from prehistoric times. The natural history department includes an aquarium. Reference library. Schools Service. Free concerts and lectures (autumn to spring). Curator, D. M. Boston.

HORSE GUARDS, Whitehall, S.W.1.—Archway and offices built about 1753. The mounting of the guard (Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into *Horse Guards' Parade* (230,000 sq. ft.), where the Colour is "trooped" on the Queen's Official Birthday. (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W.1.—After its destruction by fire in 1834, the Palace of Westminster was re-built in 1840-68 from the designs of Sir Charles Barry and Augustus Welby Pugin, at a cost of over £2,000,000.—Open to visitors on Saturdays, on Easter Monday and Tuesday, Spring Bank Holiday Monday and Tuesday; Mon., Tues. and Thursdays in August and Thursdays in September, if neither House be sitting. Admission at the Sovereign's Entrance, House of Lords, on the above-mentioned days, from 10 a.m. to 4.30 p.m. Closed to visitors on Christmas Day, Boxing Day and Good Friday. Admission to the Strangers' Gallery of the House of Lords as arranged by a Peer or by queue via St. Stephen's Entrance. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall after the House meets. The present House of Commons was used for the first time on October 26, 1950, the original Chamber having been destroyed by bombs in 1941. The Victoria Tower (House of Lords) is about 330 ft. high, and when Parliament is sitting the Union Jack flies by day from its flag-staff. The Clock Tower of the House of Commons is about 320 ft. high and contains "Big Ben", the Hour Bell, named after Sir Benjamin Hall, First Commissioner of Works when the original bell was cast in 1856. This bell which weighed 16 tons 11 cwt., was found cracked in 1857. The present bell (13½ tons) is a recasting of the original and was first brought into use in July, 1859. A light is displayed from this tower at night when Parliament is sitting.

INNS OF COURT.—The Inner and Middle Temple, S. of Fleet Street, E.C.4, and N. of Victoria Embankment, to which the gardens extend, have occupied (since early 14th century) the site of the buildings of the Order of Knights Templars. *Inner Temple Hall* is open to the public on Monday-Friday, 10-11.30 a.m. and 2.30-4 p.m., except during Vacations. *Temple Church*, restored in 1958 after severe damage by bombing, is open on weekdays 10-5 p.m. and the public are admitted to Sunday services (see p. 502). *Middle Temple Hall* (sixteenth century) is open to the public, Monday-Friday, 10-12 and 3-4.30 p.m.; Saturday, 10-4.30. Closed 1-2 p.m. and Sundays. In Middle Temple Gardens (not open to the public) *Shakespeare* (Henry VI, Part I.) places the incident which led to the "Wars of the Roses" (1455-85). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C.2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. The records show the Society as being in existence in 1422. The new Hall and Library Buildings are

modern, although the Library is first mentioned in 1474, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Holborn/Gray's Inn Road, W.C.1. Early 14th century. Hall (16th Cent.); Chapel (Services 11.15 a.m. during Law Dining Terms only). Holy Communion 1st Sunday in every month except Aug.-Sept. Public welcome. Library (30,000 vols. mss. and printed books) may be viewed by appointment. Gardens open to the public from 12 noon-2 p.m. (May-July), 9.30 a.m.-5 p.m. (Aug.-Sept.). The Inn although badly damaged during the last war has been completely restored to its former beauty with gracious red brick buildings overlooking grass covered squares and gardens. Strong Elizabethan associations. No other "Inns" are active, but what remains of *Staple Inn* is worth visiting as a relic of Elizabethan London; though heavy damage was done by a flying-bomb, it retains a picturesque gabled front on Holborn (opposite Gray's Inn Road). *Clement's Inn* (near St. Clement Danes' Church), *Clifford's Inn*, Fleet Street, and *Thavies Inn*, Holborn Circus, are all rebuilt. *Serjeant's Inn*, Fleet Street (damaged by bombing), and another (demolished 1910) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1922.

JEWISH MUSEUM, Woburn House, Upper Woburn Place, W.C.1.—Opened in 1932, the Museum contains a comprehensive collection of Jewish antiquities, liturgical paraphernalia and "Anglo-Judaica." Open free (Mon.-Thurs.), 2.30-5; (Fri. and Sun.), 10.30-12.45. Closed on Saturdays, Jewish Holy days and Bank Holidays. Conducted tours of parties by arrangement with the Secretary/Curator.

KEATS HOUSE AND MUSEUM, Keats Grove, Hampstead, N.W.3.—In two houses here, now made into one, John Keats lived at various times between 1818 and 1820. The house and the museum are open free, weekdays, 10 a.m. to 6 p.m. The Keats Memorial Library (5,000 volumes) in the adjoining Branch Library is open free on weekdays 9.30-8 p.m.; Saturday, 9.30-5 p.m.

KENSINGTON PALACE, W.8.—Built by Christopher Wren for King William III (1689-94), and continued as a royal residence until 1760. The birthplace of Queen Victoria in 1819. State apartments, re-opened to the public in 1956 under administrative control of the London Museum, contain pictures from the royal collections, royal costumes and furniture formerly belonging to Queen Mary. Hours of Opening: (March 1-Sept. 30) 10 a.m.-6 p.m.; Sundays, 2-6 p.m.; (Oct. 1-Feb. 28) 10-5; Sundays, 2-5 p.m. Kensington Gardens (q.v.) adjoin.

LAMBETH PALACE, S.E.1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Chaplain.

LIVERY COMPANIES' HALLS.—The Principal Companies (see pp. 639-641) have magnificent halls, but admission to view them has generally to be arranged beforehand. Among the finest or more interesting may be mentioned the following: Goldsmiths' Hall, Foster Lane. The present hall was completed in 1835, and contains some magnificent rooms. Exhibitions of plate have been shown here periodically in recent years. Fishmongers' Hall, London Bridge (built 1831-3), now admirably restored after severe bomb damage, also contains fine rooms. Apothecaries' Hall, Water

Lane, was rebuilt in 1670, after the Great Fire, and has library, hall and kitchen which are good examples of this period, together with a pleasant courtyard. Vintners' Hall, Upper Thames Street, was also rebuilt after the Great Fire, and its hall has very fine late 17th century paneling. The Watermen and Lightermen's Company is not, strictly speaking, a Livery Company, but its hall, in St. Mary-at-Hill, is a good example of a smaller 18th century building, with pilastered façade. It was completed in 1780. Stationers' Hall, in Stationers' Hall Court, behind Ludgate Hill, another post-Fire Hall, standing in its own court, has a particularly finely carved screen. Barbers' Hall, Monkwell Street, with a Hall attributed to Inigo Jones, was completely destroyed by bombing, but is to be rebuilt. The new hall is to be built some 30 ft. from the old site to enable one of the bastions and part of the wall of the Roman fort to remain exposed to view. Mercers' Hall, Cheapside, built to replace the hall destroyed by bombing, was opened in 1958.

LLOYD'S, Lime Street, E.C.3.—Housed in the Royal Exchange for 150 years and in Leadenhall Street from 1928-1957. The present building was opened by H.M. Queen Elizabeth the Queen Mother on Nov. 14, 1957. The underwriting space has an area of 44,250 sq. ft.

LORD'S CRICKET GROUND, St. John's Wood Road, N.W.8.—The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket, the scene of some of the principal matches of the season and Middlesex County headquarters. Tennis court in building behind members' pavilion.

MANSION HOUSE, City, E.C.4.—(Reconstructed 1930-31.) The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. Central Meat, Fish, Fruit, Vegetable, and Poultry Markets, Smithfield; Leadenhall Market (Meat and Poultry); Billingsgate (Fish), Thames Street; Spitalfields, E.1 (Vegetables, Fruit, etc.), enlarged 1928, and opened by the late Queen Mary; London Fruit Exchange, Brushfield Street (built by Corporation of London 1928-29) faces Spitalfields Market. Other markets are—Covent Garden, W.C.2 (established under a charter of Charles II, in 1661) and Borough Market, S.E.1, for vegetables, fruit, flowers, etc.

MARLBOROUGH HOUSE, Pall Mall, S.W.1.—The London home of Queen Mary until her death in 1953. Built by Wren for the great Duke of Marlborough about 1710, the house finally reverted to the Crown in 1835. Prince Leopold lived there until 1831, and Queen Adelaide from 1837 until her death in 1849. In 1863 it became the London house of the Prince of Wales. The Queen's Chapel, Marlborough Gate, begun in 1623 from the designs of Inigo Jones for the Infanta Maria of Spain, and completed for Queen Henrietta Maria, is open to the public for services during part of the year. In 1959 Marlborough House was given by the Queen as a Commonwealth centre for Government conferences and it was opened as such in March, 1962. It is open to the public at certain times when conferences are not taking place.

LONDON MONUMENT, (commonly called "The Monument"), Monument Street, E.C.3.—Built from designs of Wren, 1671-77, to commemorate the Great Fire of London, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric

column is 120 ft. high (the moulded cylinder above the balcony supporting a flaming vase of gilt bronze is 42 ft. in addition), and is based on a square plinth 40 ft. high, with fine carvings on W. face (making total height of 202 ft.). Splendid views of London from gallery at top of column (311 steps). Admission (until 20 minutes before closing time) 6d., Monday to Saturday, 9 a.m. to 6 p.m. (Oct.-March to 4 p.m.); Sundays—May to Sept. 2-6 p.m. Closed Christmas Day, Boxing Day and Good Friday. Parties of 30 or more school children in charge of an adult, 3d. each.

MONUMENTS.—VICTORIA MEMORIAL in front of Buckingham Palace; ALBERT MEMORIAL, South Kensington; AIR, Victoria Embankment; BEACONSFIELD, Parliament Square; BEATTY and JELLICO, Trafalgar Square; BELGIAN, Victoria Embankment; BOADICEA (or "Boudicca"), Queen of the Iceni, E. PERCIVAL DAVID FOUNDATION OF CHINESE ART, 53 Gordon Square, W.C.1.—Set up in 1950 to promote the study and teaching of the art and culture of China and the surrounding regions, and provide facilities necessary to that end. The Foundation contains the collection of Chinese ceramics formed by Sir Percival David and his important library of books on Chinese art. To

these was added a gift from the Hon. Mountstuart Elphinstone of part of his collection of Chinese monochrome porcelains. The galleries were opened to the public in 1952. The Foundation is administered on behalf of the University of London by the School of Oriental and African Studies. **Hours of opening:** Galleries, Mon. 2 to 5 p.m.; Tues. to Fri. 10.30 a.m. to 5 p.m.; Sat. 10.30 a.m. to 1 p.m.; Library, Mon. 2.30 to 4.30 p.m.; Tues. to Fri. 10.30 a.m. to 12.30 p.m.; 1.30 to 4.30 p.m.; Sat. 10.30 a.m. to 12.30 p.m. **Head of the Foundation.** Prof. W. Watson.

PORT OF LONDON.—The Port of London comprises the tidal portion of the River Thames from Teddington to the sea, a distance of 92 miles and four dock systems covering an area of 4,160 acres, of which 688 acres are water. The governing body is the Port of London Authority, whose Head Offices in Trinity Square, E.C.3, were designed by Sir Edwin Cooper. Particulars of the docks are as follows:—*Surrey Commercial Docks, S.E. 16.*—Area 392 acres, including 134 acres water. The chief centre of the London and Provincial Soft-wood Trade. Also handles Hardwood, Grain and general cargo. *India & Millwall Docks, E.14.*—Area 455 acres including 127 acres water. Principal commodities handled are Rum, Sugar, Grain, Hardwood, Fruit, Plywood and Wood pulp. *Royal Victoria & Albert & King George V Docks, E.16.*—Area 1,056 acres including 230 acres water—have special facilities for handling Frozen and Chilled Meat, Grain, Tobacco and Bananas. Large quantities of Wool, Fruit, Dairy Produce and general cargo are also dealt with. The *King George V. Dock*, opened in 1921, provides accommodation for vessels up to 30,000 tons. *Tilbury Docks, Essex.*—Area 927 acres, including 155 acres water. These docks are 2½ miles below London Bridge and are used principally by vessels plying on the Australian, Indian, other Eastern routes, West Africa and the Continent. The Cargo Jetty in the River at Tilbury is available for vessels to discharge or load part cargoes. Tilbury Passenger Landing Stage provides accommodation for liners at all states of the tide and adjoins Tilbury Riverside Station. A large dock extension is in progress at Tilbury which will provide 6 deep-water container berths and 3 packaged timber berths. The project, estimated to cost £30,000,000, will include a river-side grain terminal with a high rate of discharge and was expected to be operational in January, 1969, capable of handling vessels up to 60,000 tons.

Plans to sell St. Katharine Docks to the Greater London Council were announced on Jan. 23, 1968.

PRINCE HENRY'S ROOM, 27 Fleet Street, E.C.4.—Early 17th century timber-framed house containing fine room on first floor with paneling and moulded plaster ceiling. Open Mon. to Fri. 1.45 p.m. to 5 p.m.; Sat. to 4.30 p.m. Closed Christmas Day and Good Friday. Available occasionally for evening lettings to societies, etc. on application to the Architect, County Hall, S.E.1.

ROMAN LONDON.—Though visible remains are very few, almost every excavation for the foundations of new buildings in the City reveals Roman remains. Sections of the City wall, often however merely a mediæval re-build on the Roman foundations, are the most striking remains still to be seen. Fragments may be seen near the White Tower in the Tower of London, Trinity Square, No. 1 Crutched Friars, All Hallows, London Wall—its semi-circular vestry being built on the remains of a round bastion—St. Alphege, London Wall, recently restored by the Corporation of London and showing a striking succession of building and

repairs from Roman till later mediaeval times. St. Giles, Cripplegate and, by permission only, the great bastion beneath the pavement of the yard of the G.P.O. in Giltspur Street. Recent excavations in the Cripplegate area have revealed that a fort was built in this area and later incorporated in the town wall in this north-west corner of the City. Evidence from these excavations proves that the fort was not built until about 100-120 A.D., and the date of the town wall must therefore be considerably later. Remains of a bath building are preserved beneath the Coal Exchange in Lower Thames Street and other foundations may be seen in the Crypt of All Hallows Barking by the Tower. The governmental headquarters of the town was a great basilica, more than 400 ft. long from east to west, the massive walls of which have been encountered, extending from Leadenhall Market across Gracechurch Street as far as St. Michael's, Cornhill. Excavations during the past few years have shown that buildings over the river front were erected on huge oaken piles and a framework of timber for a considerable distance both east and west of the present London Bridge. The "Roman Bath," in Strand Lane, which is not now held by most authorities to be of Roman origin, is maintained by the G.L.C. on behalf of the National Trust, and is open to the public on weekdays from 10 a.m. to 12.30 p.m. (Admission, 1s.). Excavations since 1948 on a bombed site in Walbrook, on the banks of the old Wall Brook, have produced many interesting discoveries, including a Temple of Mithras, from which the splendid marble statues have been placed in Guildhall Museum, now in the Royal Exchange, where many other relics from the Roman City may be seen.

ROYAL EXCHANGE, E.C.3 (founded by Sir Thomas Gresham, 1566, opened as "The Bourse" and proclaimed "The Royal Exchange" by Queen Elizabeth I, 1571, rebuilt 1667-69 and 1842-44).—Open to the public, free. Statues of Queen Elizabeth I, Charles II, Queen Victoria, Sir Thomas Gresham and others; mural paintings in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie and others. The carillon of the Royal Exchange (reinstated 1950) plays English, Scottish, Irish, Welsh, Canadian and Australian melodies at 9 a.m., 12 noon and 3 and 6 p.m. With the exception of the courtyard and ambulatory (now used for exhibitions, art displays, etc.) and the shops the whole of the building is occupied by departments of the Royal Exchange Assurance Group (which has had its head office there since 1720) and is administered by the Gresham Committee (Clerk, Mercer's Hall, Ironmonger Lane, E.C.2).

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W.7.—Map Room open to public, free.

ROYAL MINT, Tower Hill, E.C.3 (building erected 1871), where coins for the United Kingdom and abroad are struck. Admission by order only, application for which should be made to the Deputy Master of the Mint, at least 3 months in advance of intended visit. (In summer and in school holiday periods, 6 months notice may be necessary). Hours of admission, 9.20 a.m. to 2.30 p.m., Mon. to Fri., except Bank Holidays, etc., when the Mint is closed. Additional tours at 2.50, 4.45 and 5 p.m., Mon. and Thurs.

ST. JAMES'S PALACE, in Pall Mall, S.W.1.—(Not open to the public.) Built by Henry VIII; the Gatehouse and Presence Chamber remain, and part of the Chapel Royal, which in 1955 was reopened to the public for services during part of the year. A royal residence from 1697 to 1762. Representatives of Foreign Powers are still accredited "to the Court of St. James's" and (by the permission

of the Crown) the Conference of the Allies (1919) and later conferences have been held here.

ST. JOHN'S GATE, Clerkenwell, E.C.1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate house (early 16th century) and crypt of Church (12th century) alone survive. The gatehouse may be inspected on application to the Secretary at the Chancery.

SIR JOHN SOANE'S MUSEUM, 13 Lincoln's Inn Fields, W.C.2. The house and galleries, built 1812-24, are the work of the founder, Sir John Soane (1753-1837) and contain his collections, arranged as he left them, in pursuance of an Act procured by him in 1833. Exhibits include the Sarcophagus of Seti I. (c. 1290 B.C.), classical vases and marbles, Hogarth's *Rake's Progress* and *Election* series, paintings by Canaletto, Reynolds, Turner, Lawrence, etc., and sculpture by Chantrey, Flaxman, etc. Soane's library of 8,000 vols. and a collection of 20,000 architectural drawings are available for study. Open Tues.-Sat. inclusive, 10 a.m. to 5 p.m. Closed Bank Holidays and throughout August. Curator, Sir John Summerson, C.B.E., F.R.A. Inspector, Miss D. Stroud, M.B.E., F.S.A.

SOMERSET HOUSE, Strand, W.C.2, and Victoria Embankment, W.C.2.—The beautiful river façade (600 ft. long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1554 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the Board of Inland Revenue and other branches of the Civil Service and by the Principal Probate Registry.

STOCK EXCHANGE, E.C.2.—The foundation stone of the present building was laid in 1801, but the building was almost entirely reconstructed in 1854 from the designs of Thomas Allason. The Stock Exchange is being rebuilt as a large tower block 331 feet high and a new trading floor to the west of the block. Completion is planned for 1972.

The Stock Exchange provides a market for the purchase and sale of about 9,500 securities quoted in the Stock Exchange Daily Official List and valued at over £100,000,000,000 and also securities listed on other Exchanges. At present the members of the Stock Exchange, who consist of brokers (agents for clients) and jobbers (dealers in specific securities) number about 3,300. Visitors' Gallery (entrance, 8 Throgmorton Street) open between 10 a.m. and 3.15 p.m. from Monday to Friday. Admission free and without ticket. Film show.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Sir J. W. Bazalgette for the Metropolitan Board of Works, 1864-70 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by R. Hon. W. H. Smith, M.P., in 1874); the Albert Embankment on the S. side (from Westminster Bridge to Vauxhall), 1866-60; the Chelsea Embankment, 1871-74. The total cost exceeded £2,000,000. Sir J. W. Bazalgette (1819-91) also inaugurated the London main drainage system, 1858-65. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The headquarters of the G.L.C. include an embankment on the Surrey side.

THAMES TUNNELS.—The Rotherhithe Tunnel (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road

East, with Lower Road, Rotherhithe; the total length is 1 mile 332 yards, of which 474 yards are under the river. The cost of the tunnel and its approaches was £1,506,914. The first *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connecting East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The cost of the tunnel with its approaches was about £1,323,663. A second tunnel (for vehicles only) was opened in August, 1967, at a cost of about £9,000,000 and the old tunnel closed while improvements are carried out. The relative lengths of the tunnels measured from East India Dock Road to the Gate House on the south side are 6,215 ft. (old tunnel) and 6,152 feet. *Greenwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E.16, to High Street, Woolwich, S.E.18. The length of the subway is 552 yards, and its cost was about £86,000. The *Thames Tunnel* (1,300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C.1 and E.C.3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square. A movement, sponsored by the Council for Tower Hill Improvement, aims at creating more open space around the Tower by the demolition of encroaching buildings and by opening Trinity Square Gardens to the public, thus restoring to Tower Hill its ancient title to be the City's pleasure or "Board-room."

TOWER OF LONDON, E.C.3.—Admission to a general view of the Tower, the White Tower (Armouries), the Beauchamp and Bloody Towers and the Chapels Royal—2s.; children, 1s.; to Jewel House—2s., Children 1s. The Tower of London is closed on Sundays during the Winter period and on the mornings of the Summer time period, Good Friday and Christmas Day. On Sundays throughout the year the public is admitted to Holy Communion, 8.15 a.m. and Morning Service, 11.15 a.m. Open on weekdays, May 1 to Sept. 30, 10 a.m. to 5 p.m.; Oct. 1 to mid-March, 10 a.m. to 4 p.m.; mid-March to April 30, 10 a.m. to 4.30 p.m.; Sundays, first to last Sundays of Summer Time, 2 p.m. to 5 p.m. **CONSTABLE**, Field-Marshal Sir Gerald Templer, K.G., G.C.B., G.C.M.G., K.B.E., D.S.O.; **LIEUTENANT**, Lieut.-General Sir Richard W. Craddock, K.B.E., C.B., D.S.O.; **RESIDENT GOVERNOR AND KEEPER OF THE JEWEL HOUSE**, Col. Sir Thomas Butler, Bt., D.S.O., O.B.E.; **MASTER OF THE ARMOURIES**, A. R. Duffy; **CHAPLAIN AT THE CHAPEL ROYAL OF ST. PETER AD VINCULA**, Rev. J. G. Nicholls.

The White Tower is the oldest and central building in Her Majesty's Royal Palace and Fortress of the Tower of London. It was built at the order of William I. and constructed by Gundulph, Bishop of Rochester, in the years 1078-98. The Inner Wall, with thirteen towers, was constructed by Henry III. in the 12th century. The Moat was extended and completed by Richard I. and the Wharf first mentioned in 1228. The Outer Wall was completed in the reign of Edward I. and now incorporates 11 towers and 11 bastions. The last

Monarch to reside in the Tower of London was James I. The Crown Jewels came to the Tower in the reign of Henry III. All coinage used in Great Britain was minted in the Outer Ward of the Tower of London until 1810 when the Royal Mint was formed. The Tower of London has had a military garrison since 1078. The Chapel Royal of St. John the Evangelist, within the White Tower (1080-1088) is the oldest Norman church in London.

WELLINGTON MUSEUM, Apsley House, Hyde Park Corner, W.1.—Admission on weekdays and Bank Holidays, 10 to 6; Sundays, 2.30 to 6. Closed Good Friday and Christmas Day. Adults 1s., Children, 6d. Organized School parties admitted free. Apsley House was designed by Robert Adam for Lord Bathurst and built 1771-8. It was bought in 1817 by the Duke of Wellington, who in 1828-29 employed Benjamin Wyatt to enlarge it, face it with Bath stone and add the Corinthian portico. The Museum contains many fine paintings, services of porcelain and silver plate and personal relics of the 1st Duke of Wellington (1769-1852) and was given to the Nation by the present Duke. It was first opened to the public in 1952, under the administration of the Victoria and Albert Museum.

WESTMINSTER HALL, S.W.1 (built by William Rufus, A.D. 1087-1100 and altered by Richard II., 1377-99), adjacent to and incorporated in the Houses of Parliament—Westminster Hall is part of the old Palace of Westminster and survived the fire, which destroyed most of the remainder of the Palace (Oct. 16, 1834) and the bombs of 1941. The Hall is about 240 ft. long, 68 ft. wide, and 90 ft. high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I was tried in the Hall. Extensive repairs to the Hall have recently been carried out. Admission: During sessions—Mon. to Thurs., 10 a.m. until 1.30 p.m., provided neither House is sitting. Sat. 10 a.m.-5 p.m. During Recess—Mon. to Fri., except Good Friday, Christmas Day and Boxing Day, 10 a.m.-4 p.m.; Sat., 10 a.m.-5 p.m.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI in 1440, the scholars numbering 1,212 in July, 1967. Buildings date from 1442.

GREENWICH, S.E.10.—Greenwich Hospital (since 1873, the Royal Naval College) was built by Charles II, from designs by Inigo Jones, and by Queen Anne and William III, from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391-1447), son of Henry IV. Henry VIII, Queen Mary I and Queen Elizabeth I were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI died there. In the principal quadrangle is a marble statue of George II, by Rysbraeck. (For National Maritime Museum, see p. 408.) Painted Hall and Chapel open daily except Thursdays from 2.30 p.m. to 5 p.m. (closed on Sundays, Oct.-April inclusive). Visitors are also admitted to Morning Service in the Chapel at 11 a.m., summer and winter, except during College vacations. Greenwich Park (185 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II, from the designs of Le Nôtre. On a hill in Greenwich Park is the former Royal Observatory (founded 1675). Part of its buildings at Greenwich have been taken over by the Maritime Museum and named Flamsteed House, after John Flamsteed (1646-1719), first Astronomer

Royal. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1728, and restored after severe damage during the Second World War. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII was christened in the former church. *Charlton House*: built in the early 17th century (1607-1612) for Adam Newton, tutor to Prince Henry, brother to Charles I. The house is largely in the Jacobean style of architecture. *Cutty Sark*, the last of the famous tea clippers, which has been preserved as a memorial to ships and men of a past era. The ship is fully restored and re-rigged, with a museum of sail on board, Open to visitors: weekdays, 11 to 5 (Summer, 6 p.m.); Sundays and Boxing Day, 2.30 to 5. The yacht *Lively Lady* in which Sir Alec Rose sailed single-handed round the world, 1967-68, is preserved alongside *Cutty Sark*.

HAM HOUSE, Richmond.—A notable example of 17th-century domestic architecture, long the home of the Tollemache family (Earls of Dysart). The contents, described as "probably the finest and most varied collection of Charles II.'s reign to survive," were purchased for the Victoria and Albert Museum which now administers the house. Ham House may be seen on Tues.-Sun. inclusive and on Bank Holidays, 2-6 p.m., March-Oct., 12-4 p.m., Nov.-Feb. Closed Mon. (except Bank Holidays), Christmas Day and Good Friday. Open daily including Sundays and Monday Bank Holidays (but not other Mondays and not the day after a Monday Bank Holiday), 2-6 or till dusk, Saturdays and Sundays, 10-1 and 2-6. Closed all January, Good Friday and Christmas Day. Admission (non-members), 2s. 6d.; children, 1s.; parties of 20 or more, 2s.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old Quaker Meeting House (1688) at Jordans, in the burial ground of which

lies William Penn (Pennsylvania); a barn built out of the timbers of the *Mayflower* by the 17th-century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

KEW, Surrey, was a favourite home of the early Hanoverian monarchs. *Kew House*, the residence of Frederick, Prince of Wales, and later of his son, George III, was pulled down in 1803, but the earlier Dutch House, now known as *Kew Palace*, survives. It was built in 1631 and acquired by George III as an annex to *Kew House* in 1781. The famous *Kew Gardens* (see p. 650) were originally laid out as a private garden for *Kew House* for George III's mother in 1759 and were much enlarged in the nineteenth century, notably by the inclusion of the grounds of the former Richmond Lodge.

KINGSTON-UPON-THAMES, Surrey (about 12 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings adjoining the Guildhall.

MARBLE HILL HOUSE, Twickenham, Middlesex.—Example of the English Palladian style. Re-opened 1966, after restoration work on the elevations of the house, entrance hall, main staircase and first floor rooms. The Great Room and mahogany staircase are noteworthy. Open (April-Sept.), 10-6 p.m., Tues. to Sun., and on Bank Holiday Mondays; (Oct. & March), 10-5 p.m.; (Nov.-Feb.), 10-4 p.m. Admission free.

NATIONAL ARMY MUSEUM, Royal Military Academy, Sandhurst, Camberley, Surrey.—Established by Royal Charter. Official museum for British Army, Honourable East India Company, Indian Services and Colonial Forces. There is a special section for the Irish regiments disbanded in 1922.

OSTERLEY PARK, Isleworth.—House and park of 300 acres given to the National Trust by the Earl of Jersey in 1949. Part of the Elizabethan house, built in 1577 for Sir Thomas Gresham, remains, but it was largely remodelled by Robert Adam, and the staterooms are among the best examples of Adam decoration. Open daily, except Mondays, (Mar.-Oct.) 2-6 p.m.; (Nov.-Feb.) 12 noon-4 p.m. Closed Monday (except Bank Holidays), Christmas Day and Good Friday. Admission 1s., children 6d.

RICHMOND, Surrey, contains the red brick gateway of *Richmond Palace* (Henry VII., 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the former home of Queen Mary's mother (the Duke of Windsor was born there, June 23, 1894). The *Star and Garter Home* for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,358 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained ■ wonderful view of the Valley of the Thames.

RUNNIMEDe.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in charter, since known ■ *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Carta Island* (claimed as the actual site of the sealing), presented to the National Trust in 1930 by Lady Fairhaven and her sons.

A memorial at *Cooper's Hill*, near Runnymede, to members of the Commonwealth air forces who lost their lives in the Second World War while serving from bases in the United Kingdom and north-western Europe and have no known grave, was unveiled by the Queen on October 17, 1953. Her Majesty on May 14, 1965 unveiled a memorial to the late President of the United States, John F. Kennedy, on ground nearby.

ST. ALBANS.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1115. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. The site of the pre-Roman city of King Tasciovanus and the remains of the ancient City of Verulamium, with well preserved theatre and many other features, excavated in recent years. St. Michael's Church, with tomb of Sir Francis Bacon.

STOKE POGES (2 miles from Slough station, Western Region) contains the 14th-century Church with the Churhyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1772.

SYON HOUSE, Brentford.—The town seat of the Duke of Northumberland. The house is part of the buildings of the Nunnery of Syon, erected by permission of Henry VI in 1431. At the Dissolution of the Nunnery the Estate reverted to the Crown. In 1578 it was granted to the 9th Earl of Northumberland and in 1632 the house was repaired under superintendence of Inigo Jones. In 1766 the interior was transformed by Robert Adam, who also built the entrance gateway. The lion on the river-front was brought here in 1874 on the demolition of Northumberland House in the Strand. New gardens opened, 1968. Open (April, May, June), Wed.-Sat.; (July-Sept.), Wed.-Sun. 1 p.m. to 4.30 p.m. Also Bank Holiday Sundays and Mondays.

WALTHAM ABBEY (or **WALTHAM HOLY CROSS**), 13 miles from London (Eastern Region).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England (consecrated May 3, 1060) and the traditional burial place of King Harold II (1066), and a Lady Chapel of Edward II, with crypt below. New evidence of the position and style of several buildings, which once stood on the site of the Augustinian monastery, were revealed by the prolonged drought in the summer of 1953. At Waltham Cross, 1 mile from

the Abbey, is one of the crosses (partly restored) erected by Edward I to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066-87).—22 miles from London, by Western and Southern Regions. The Castle Precincts are open daily, free of charge, from 10 a.m. to sunset. THE PRINCIPAL

BIRMINGHAM

BIRMINGHAM (Warwickshire) is the second City in Britain and the chief centre of the hardware trade. The municipal area is about 80 sq. miles, with a population (estimated 1967) of 1,101,990. It is estimated that over 1,500 distinct trades are carried on in the city, the chief industries being the manufacture of buttons, bedsteads, plastic goods, chocolate, chemicals, electro-plate, guns, machine tools, glass, motor-cars and motor cycles, motor tyres, nuts and bolts, pens and nibs, tubes, paint and enamels, tools, toys, electrical apparatus, wire, jewellery and brass working, etc.

Water is supplied by the City Corporation,

ENGLISH CITIES

which also owns the transport undertaking, airport, markets, restaurants and Municipal Bank. The first section of Birmingham's new Queen Elizabeth Hospital, erected at Edgbaston at a cost of approximately £1,000,000, is claimed to be the finest of its type in Europe. The city has started work on the construction of an inner ring road round the centre of the city, with many improvements in the shopping centre including the redevelopment of the old market centre in the Bull Ring at a cost of £8,000,000.

The principal buildings are the Town Hall, built in 1832-1834; the Council House and Corporation Museum and Art Gallery (1878); Victoria

Law Courts (1891); the University (1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church); the Roman Catholic Cathedral of St. Chad (Pugin) and the Methodist Central Hall. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 39 Aldermen and 117 Councillors. The generally accepted derivation of "Birmingham" is the *ham* or dwelling-place of the *ing* or the family of *Beorma* presumed to have been a Saxon. Between the 11th and 16th centuries the de Berminghams were Lords of the Manor.

The Lord Mayor (1968-69), C. V. G. Simpson.
Recorder, M. V. Argyle, M.C., Q.C. (1965).
Stipendiary Magistrate, J. F. Milward (1951).
Town Clerk, T. H. Parkinson (1960).
Clerk of the Peace, G. M. Butts.

BRADFORD

BRADFORD (Yorkshire, West Riding), 192 miles N.N.W. of London and 8 miles W. of Leeds, is a centre of the woollen and worsted trade. The municipal area is 25,504 acres (about 40 square miles), with a population (estimated, 1967) of 296,860.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works and quarries of freestone.

The chief public buildings, in addition to the 15th century Cathedral (formerly the Parish Church) and Bolling Hall (14th century), are the City Hall (1873), the tower of which contains a clock with dials, chimes and a carillon, Cartwright Hall (1904) commemorating the inventor of the power loom, the Windsor Baths and the Queen's Hall (1905), Grammar School (Charter 1662), St. George's Hall (Concert Hall, 1853), Technical College (1882), the Mechanics' Institute (1832), Wool Exchange (1867), Kirkgate Market Hall (1872), Britannia House (1933) and Bradford University.

The Saxon township was created a parliamentary borough in 1832, a borough in 1847, a county borough in 1889, and a city in 1897. The title of Lord Mayor was conferred on the Chief Magistrate in 1907. The Corporation consists of a Lord Mayor, 19 Aldermen and 57 Councillors.

The Lord Mayor (1968-69), A. Walton.
Recorder, J. F. S. Cobb, Q.C. (1964).
Town Clerk, H. Patten (1960).
Clerk of the Peace, W. K. Scott (1966).

BRISTOL

BRISTOL, situated on the borders of Gloucestershire and Somerset, is a City and County of itself, and is 110 miles W. of London. The present municipal area is 27,068 acres, with a population (estimated, 1967), of 429,020.

Among the various industries are aircraft and aero-engine construction, general and nuclear engineering, boot and shoe manufacture, chocolate and cocoa, tobacco, pottery, paper bags, cardboard and allied products, printing, chemical industry and ship-building and repairing. Bristol is noted for its maritime history and the docks within the Port are the City Docks, 6 miles from the entrance to the river Avon; the Royal Edward and Avonmouth Docks, at the mouth of the river; and the Portishead Dock, to the west of the river entrance. The principal imports are grain, flour and other cereal products, cocoa, tea, coffee, molasses, feeding stuffs, livestock, bananas and other fruit, provisions, frozen meat, sugar, metals, ores, phosphates, oil-seeds,

paper, petroleum and chemicals, fertilizers, sugar, timber, tobacco, wines and spirits, wood pulp and general merchandise, and the chief exports are metals and machinery, chemicals, strontia, unmanufactured clay, motor vehicles and parts, coke, carbon black, petroleum, cider and perry, cocoa waste, electrical apparatus, tea, wines and spirits and manufactured goods. A municipal airport was opened at Lulsgate in May, 1957.

The chief buildings, in addition to the 12th century Cathedral (with later additions), with Norman Chapter House and gateway, the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth I as "the fairest, goodliest, and most famous parish church in England"), and Wesley's Chapel, Broadmead, are the Merchant Venturers' Almshouses, the Council House (opened by H.M. the Queen in April, 1956), Guildhall, Exchange (erected from the designs of John Wood in 1743), City Museum and Art Gallery, Central Library, Cabot Tower, the University and Clifton College, Red Lodge (Tudor), Georgian House, and Blaise Castle and Mansion with Folk Museum. The Clifton Suspension Bridge, with a span of 702 feet over the Avon, was projected by Brunel in 1836 but was not completed until 1864. The beautiful Clifton Down adjoins Durdham Down (making a total of 442 acres), with Leigh Woods and Nightingale Valley on the opposite side of the river; Ashton Court Estate (840 acres) was acquired by Bristol Corporation in Jan., 1960.

Bristol was a Royal Borough before the Norman Conquest. In 1373 it received from Edward III a charter granting it county status and in 1899 its Mayor became a Lord Mayor. The Corporation includes 28 Aldermen and 84 Councillors. The earliest forms of the name are *Brigstowe* and *Bristow*.

The Lord Mayor (1968-69), Mrs. M. E. Castle, O.B.E.
Sheriff (1968-69), G. Thomas.
Recorder, Sir Thomas Molony, Q.C. (1964).
Town Clerk, T. J. Urwin.
Clerk of the Peace, T. D. Corpe, O.B.E.

CAMBRIDGE

CAMBRIDGE, a settlement far older than its ancient University, lies on the Cam or Granta, 51 miles north of London and 65 miles south-west of Norwich. It has an area of 10,060 acres and a population (estimated, 1967) of 100,340.

The city is a parliamentary and quarter sessions borough, county town and regional headquarters. Its industries, which include radio and electronics, flour milling, cement making and the manufacture of scientific instruments, are extensive but nowhere obtrusive. Among its open spaces are Jesus Green, Sheep's Green, Coe Fen, Parker's Piece, Christ's Pieces, the University Botanic Garden, and the Backs, or lawns and gardens through which the Cam winds behind the principal line of college buildings. East of the Cam, King's Parade, upon which stand Great St. Mary's Church, Gibbs' Senate House and King's College Chapel with Wilkins' screen, joins Trumpington Street to form one of the most beautiful thoroughfares in Europe.

University and College buildings provide the outstanding features of Cambridge architecture but several churches (especially St. Benet's, the oldest building in the City, and St. Sepulchre's, the Round Church) also make notable contributions. The modern Guildhall (1939) stands on a site of which at least part has held municipal buildings since 1224.

The City Council consists of a Mayor, 14 Aldermen and 42 Councillors. Four of the Councillors are elected by the Colleges and Halls and two by Grace of the Senate of the University. Two of the

Aldermen are elected by the Council from the University and College representatives.

Mayor (1968-69), H. C. Finbow.

Recorder, W. H. Griffiths, M.C., Q.C. (1964).

Town Clerk, J. W. Elven (1966).

Clerk of the Peace, C. H. Parker.

CANTERBURY

CANTERBURY, the Metropolitan City of the Anglican Communion, has an unbroken history going back to prehistoric times. It was the Roman Durovernum and the Saxon Cantwaraburg (stronghold of the men of Kent). Here in 597 St. Augustine began the conversion of the English race to Christianity, when Ethelbert, King of Kent, was baptized. In 1170 the rivalry of Church and State culminated in the murder in Canterbury Cathedral, by Henry II.'s knights, of Archbishop Thomas Becket, whose shrine became a great centre of pilgrimage as described by Chaucer in his *Canterbury Tales*. After the Reformation pilgrimages ceased, but the prosperity of the City was strengthened by an influx of Huguenot refugees, who introduced weaving. In the first Elizabethan era Christopher Marlowe, the poetic genius and precursor of Shakespeare, was born and reared in Canterbury, and there are literary associations also with Defoe, Dickens and Barham, author of the *Ingoldsby Legends*, and Somerset Maugham.

Air attacks in the last war caused severe damage, but enabled part of the Roman street plan to be discovered. In the rebuilding a great effort was made to harmonize modern architecture with the ancient setting with the result that Canterbury now possesses a most attractive and prosperous shopping centre.

The Cathedral, with its glorious architecture ranging from the eleventh to the fifteenth centuries, is world-famous. Modern pilgrims are attracted particularly to the Martyrdom, the Black Prince's Tomb and other historic monuments, the Warriors' Chapel and the many examples of mediæval stained glass.

Of the Benedictine St. Augustine's Abbey, burial place of the Jutish Kings of Kent (whose capital Canterbury was) only extensive ruins remain. St. Martin's Church, on the eastern outskirts of the City, is stated by Bede to have been the place of worship of Queen Bertha, the Christian wife of King Ethelbert, before the advent of St. Augustine.

The mediæval City Walls are built on Roman foundations and the fourteenth century West Gate is one of the finest buildings of its kind in the country.

The University of Kent at Canterbury, which admitted its first students in September, 1965, had 1,582 students in 1967-68.

The city is a county borough and county of itself, with an area of 4,810 acres and a population (estimated, 1967) of 32,910. Before the institution of the Mayoralty in 1448 it was governed by bailiffs and earlier still by prefects or provosts.

Mayor (1968-69), H. J. Buckworth.

Recorder, E. D. Sutcliffe, Q.C. (1968).

Sheriff (1968-69), Mrs. E. M. Rothermel.

Town Clerk and Clerk of the Peace, J. Boyle.

COVENTRY

COVENTRY (Warwickshire) is a city and a county borough, 92 miles N.W. of London, and an important industrial centre. It has a population (Registrar-General's estimate, 1967) of 333,830.

Coventry owes its real beginnings to Leofric, Earl of Mercia and his wife Godiva in 1043, when they founded a priory. It became one of the richest medieval towns, receiving its Charter of Incorporation in 1345. The beautiful guildhall of St. Mary

dates from about this time, three of its churches date from the 14th and 15th centuries. Sixteenth century almshouses may still be seen. Coventry's first cathedral was destroyed at the Reformation, its second in the 1940 blitz (its walls remain) and the great new cathedral designed by Sir Basil Spence, consecrated in 1962, now draws innumerable visitors.

Recent public buildings include the Art Gallery and Museum, College of Technology, modern Police Headquarters and a £1,000,000 Central Baths. The University of Warwick on the city outskirts admitted its first undergraduates in autumn 1965.

Coventry returns three M.P.'s. The City Council own the water and transport undertakings, airport, markets, restaurants and a civic theatre. It is governed by a Lord Mayor and a Council of 72. Coventry produces cars, agricultural machinery, machine tools (the world's largest machine tool organization), radio and television, telecommunications, telephones, man-made fibres.

Lord Mayor (1968-69), L. Lamb.

Recorder, James Ross, Q.C. (1968).

Town Clerk, Sir Charles Barratt.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, 22 miles from the North Sea and 205 miles N. of London. The municipal area is 17,537 acres, with a population (estimated, 1967) of 295,900.

Hull is one of the great seaports of the United Kingdom. It has docks covering a water area of 200 acres, well equipped for the rapid handling of cargoes of every kind, and its many industries include oil-extracting, saw-milling, flour-milling, engineering and chemical industries. It also claims to be the premier distant-water fishing port.

The City, restored after very heavy air raid damage during World War II, is well laid out with fine thoroughfares. It has good office and administrative buildings, its municipal centre being the Guildhall, its educational centre the University of Hull and its religious centre the Parish Church of the Holy Trinity, 272 feet in length.

Kingston upon Hull (anciently known as Wyke) was so named by Edward I. who granted the first of its Charter privileges in 1299. Later privileges included the creation of the office of Mayor (1331); Charter of Incorporation—the creation of the county of the town, with the power, annually exercised, to elect a Sheriff (1440); county area extended (1447); power given to elect a High Steward (1598); City status accorded (1897) and the office of Mayor raised to the dignity of Lord Mayor (1914). The Lord Mayor presides over a Council of 21 Aldermen and 63 Councillors, representing the 21 wards of the City.

The Lord Mayor (1968-69), W. Birkhead.

Recorder, H. C. Scott, Q.C. (1965).

Sheriff (1968-69), Sir Leo Schultz, O.B.E.

Stipendiary Magistrate, D. N. O'Sullivan (1952).

Town Clerk and Clerk of the Peace, J. H. W. Glen.

LEEDS

LEEDS (Yorkshire, West Riding) is a junction for road, rail and canal services and an important commercial centre, situated in the lower Aire Valley, 195 miles by road N.N.W. of London.

Leeds has a wide variety of manufacturing industries, notably cloth and ready-made clothing, heavy and light engineering, leather and chemical products.

The municipal area is 40,619 acres, the population (estimated, 1967), 507,780.

The principal buildings are the Civic Hall (1933), the Town Hall (1858), the Municipal Buildings and Art Gallery (1884), the Corn Exchange (1863) and the University. The Parish Church (St. Peter's) was rebuilt in 1841; the 17th century St. John's Church has a fine interior with a famous English Renaissance screen; the last remaining 18th century church is Holy Trinity, Boar Lane (1727). Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Lacy in 1152, is one of the most complete examples of Cistercian houses now remaining. Temple Newsam, birthplace of Lord Darnley, was acquired by the Corporation in 1922. The present house, a stately building in red brick, was largely re-built by Sir Arthur Ingram in about 1620. Adel Church, about 5 miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I in 1626, made a county borough in 1889, and created a city in 1893. The Lord Mayor presides over a Council of 30 Aldermen and 90 Councillors. The earliest forms of the name are *Loidis* or *Leedes*, the origin of which is obscure.

The Lord Mayor (1968-69), J. Rafferty.

Recorder, R. Lyons, Q.C. (1965).

Stipendiary Magistrate, J. H. E. Randolph (1965).

Town Clerk, N. C. Haslegrave (1964).

Clerk of the Peace, T. A. Whittington (1952).

LEICESTER

LEICESTER is situated geographically in the centre of England, 100 miles north of London. The City dates back to pre-Roman times and was one of the five Danish *Burhs*. In 1589 Queen Elizabeth I granted a Charter to the City and the ancient title was confirmed by Letters Patent in 1919. An Assize Court was established at Leicester Castle at the time of Edward I and the Castle is still so used. The title of Lord Mayor was conferred upon the Chief Magistrate in 1928. Leicester has an area of 18,141 acres and a population, estimated, June, 1967, of 282,800.

The principal industries of the city are hosiery, boots and shoes, and light engineering. The growth of Leicester ■ a hosiery centre increased rapidly from the introduction there of the first stocking frame in 1670; in 1833 there were 14,000 knitting frames in the city, which to-day has some of the largest hosiery factories in the world. Hosiery produced includes stockings and every kind of woollen and cotton underwear, outerwear, fabrics and gloves, much of which is exported. Leicester is also a centre for the ancillary industries.

The boot and shoe industry specializes in ladies' and children's shoes and sports footwear. It is the centre for wholesaling and distribution and, as in the case of hosiery, the boot and shoe industry has attracted to Leicester many of the ancillary trades. The production of boot and shoe manufacturing machinery and plant is carried out on a very large scale.

Engineering, developed partly for the supply of machinery to the hosiery and boot and shoe industries, has become one of the foremost industries in the city. Printing and the manufacture of motor tyres and cellulose goods are also carried on.

The principal buildings in the city are the Town Hall; the University; Colleges of Art and Technology; De Montfort Hall, one of the finest concert halls in the provinces, with accommodation for over 3,000 persons, and the Museum and Art Gallery. The ancient Churches of St. Martin (now Leicester Cathedral), St. Nicholas, St. Margaret,

All Saints, St. Mary de Castro, and buildings such as the Guildhall, the 14th century Newarke Gate, the Castle and the Jewry Wall Roman site still exist. Leicester has a large number of parks and open spaces.

The Lord Mayor (1968-69), K. W. Bowder, O.B.E. *Recorder*, H. A. Skinner, Q.C. (1966).

Town Clerk, R. R. Thornton.

Clerk of the Peace, S. W. Whait.

LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Irish Sea and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 27,819 acres (which includes 2,840 acres in the bed of the river Mersey) (about 43 square miles, excluding the bed of the river), with a population (1967 Registrar-General's estimate) of 705,310. Quays on both sides of the river are about 38 miles long, and the Gladstone Dock can accommodate the largest vessels afloat. Net tonnage of ships entering and leaving the port annually exceeds 62,000,000 tons. The main imports are petroleum, grain, ores, non-ferrous metals, sugar, wood, oil, fruit and cotton.

The Corporation owns large industrial estates at Speke, Kirkby and Aintree, on which many modern factories have been built. These three estates have provided work for some 65,000 people. In 1943 ■ lease for 99 years was taken of the Elizabethan mansion at *Speke Hall* at ■ nominal rent.

The principal buildings are the Anglican Cathedral, erected from the designs of Sir Giles Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; the Metropolitan Cathedral of Christ the King, designed by Sir Frederick Gibberd and consecrated in 1967; St. George's Hall, erected 1838-1854, and regarded as one of the finest modern examples of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Walker Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Philharmonic Hall.

Constructed between 1925 and 1934, the *Mersey Tunnel* connecting Liverpool and Birkenhead ■ opened to traffic on July 18, 1934, the total cost being estimated at £6,077,800. More than 17,000,000 vehicles pass through the Mersey Tunnel annually. Work has now started on a second tunnel between Liverpool and Wallasey.

Liverpool was incorporated as a borough early in the 13th century and was created ■ city in 1880. The Corporation consists of ■ Lord Mayor and a City Council of 40 Aldermen and 120 Councillors.

The Lord Mayor (1968-69), J. E. Thompson.

Recorder, R. K. Brown, O.B.E., T.D., Q.C. (1967).

Stipendiary Magistrate, Leslie Mervyn Pugh (1965).

MANCHESTER

MANCHESTER (Lancashire) (the *Mancumium* of the Romans, who occupied it in A.D. 78) is 189 miles N.W. of London. The municipal area is 27,255 acres (about 43 square miles), the population (estimated, 1967), 616,520.

Manchester is a commercial rather than ■ industrial centre, the industries being largely in the neighbouring towns. Within 25 miles radius, lives a population of 4,500,000 engaged in engineering, chemical, clothing, food processing and textile industries and in providing the packing, transport, banking, insurance and other distributive

facilities for those industries. The city is connected with the sea by the Manchester Ship Canal, opened in 1894, 35½ miles long, and accommodating ships up to 15,000 tons. Manchester Airport handles approximately 1,500,000 passengers yearly.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A., together with a large extension; the Royal Exchange, built in 1869 and enlarged in 1921; the Central Library (1934); the Art Gallery; Heaton Hall; the Gallery of English Costume; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); the University Institute of Science and Technology; the 15th-century Cathedral (formerly the parish church) and the Free Trade Hall. Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The City Council consists of 38 Aldermen and 114 Councillors.

The Lord Mayor (1968-69), H. Stockdale. *Recorder*, W. G. Morris (1967).

Stipendiary Magistrate, J. Bamber (1965). *Town Clerk*, G. C. Ogden, C.B.E. (1966).

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Northumberland) a City and County on the north bank of the River Tyne, 11 miles from the North Sea and 272 miles N. of London, has an area of 11,401 acres and a population (estimated 1967) of 251,650. A Cathedral and University City, it is the administrative, commercial and cultural centre for north-east England and the principal port. It is an important manufacturing centre with a wide variety of industries.

The principal buildings include the Castle Keep (12th century), Black Gate (13th century), West Walls (13th century), St. Nicholas's Cathedral (15th century, fine lantern tower), St. Andrew's Church (12th-14th century), St. John's (14th-15th century), All Saints (Georgian masterpiece), St. Mary's Roman Catholic Cathedral (1844). Trinity House (17th century), Sandhill (16th century houses), Guildhall (Georgian), Grey Street (1834-39), Central Station (1846-50), Central Library (1882, houses Bewick Collection), Laing Art Gallery (1904), University of Newcastle Physics Building (1962), Civic Centre (1963). Open spaces include the Town Moor (927 acres) and Jesmond Dene. Seven bridges span the Tyne at Newcastle.

The City derives its name from the "new castle" (1080) erected as a defence against the Scots. In 1400 it was made a County, and in 1882 a City. The City Corporation comprises ■ Lord Mayor (1966), 20 Aldermen and 60 Councillors.

Lord Mayor (1968-69), R. S. Gray.

Recorder, C. R. Dean, Q.C. (1965).

Principal City Officer, W. F. Harris.

NORWICH

NORWICH (Norfolk) is an ancient City and County 110 miles N.E. of London. It grew from an early Anglo-Saxon settlement near the confluence of the Rivers Yare and Wensum, and now serves as provincial capital for the predominantly agricultural region of East Anglia. The name is thought to relate to the most northerly of a group of Anglo-Saxon villages or "wics". The present

City comprises an area of 8,165 acres, with a population (estimated, 1967) of 118,610; (estimated April 1, 1968, following boundary extensions), 119,990.

Norwich serves its surrounding area as a market town and commercial centre, banking and insurance being prominent among the City's businesses. Continuously from the fourteenth century, however (when Flemish immigrants helped to establish Norwich as the centre of the woollen industry until the Industrial Revolution) it has combined industry with commerce, and manufactures of a wide variety are now produced in the City. The biggest single industry is the manufacture of shoes and other principal trades are engineering, printing, and the production of chemicals, clothing, confectionery and other foodstuffs. Norwich is accessible to seagoing vessels by means of the River Yare, entered at Great Yarmouth, 20 miles to the east.

Among many historic buildings are the Cathedral (completed in the twelfth century and surmounted by a fifteenth century spire 325 feet in height), the Keep of the Norman Castle (now serving as a museum and also housing the Colman Collection of works by the Norwich School of painters), the fifteenth century flint-walled Guildhall, some thirty mediaeval parish churches, St. Andrew's and Blackfriars' Halls, the Tudor houses preserved in Elm Hill and the Georgian Assembly House. The administrative centre of the City is the City Hall, built in 1938. A new central library, opened in 1963, is adjacent to the City Hall. The University of East Anglia has been established in Norwich and received its first students in 1963. The buildings of the University occupy a spacious site at Earlham on the City's western boundary.

The City's first known Charter was granted in 1158 by Henry II and its privileges and form of self government were prescribed successively by later Charters until the enactment of the Municipal Corporations Act, 1835. The City Council consists of the Lord Mayor, 16 Aldermen and 48 Councillors:

The Lord Mayor (1968-69), E. Gambling. *Sheriff* (1968-69), J. A. Plumstead.

Recorder, R. M. O. Havers, Q.C. (1968). *Judge of the Guildhall Court of Record*, R. Ives. *Town Clerk*, G. G. Tilsley.

Clerk of the Peace, B. O. L. Prior, T.D.

NOTTINGHAM

NOTTINGHAM (Nottinghamshire) stands on the River Trent, 124 miles N.N.W. of London in one of the most valuable coalfields of the country with excellent railway, water (being connected by canal with the Atlantic and the North Sea), and road facilities. The municipal area is 18,364 acres and population (estimated, 1967), 309,740.

The principal industries are hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, the manufacture of tobacco, chemicals, furniture, typewriters and mechanical products.

The chief buildings are the 17th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), Wollaton Hall (1580-88) owned by the Corporation and now a Natural History Museum, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842-4), the Council House (1929), the Guildhall and Court House (1888), Shire Hall, Albert Hall, the University and Newstead Abbey, home of Lord Byron.

Nottingham or *Nottingham*, "the village or home of the men of Snöt" (the Wise), is the Anglo-Saxon name for the Celtic *Tulgobauc*, "Cave Homes." The city possesses a Charter of Henry II, and was created a city in 1897. The Corporation con-

sists of 17 Aldermen and 52 Councillors (including the Lord Mayor).

The Lord Mayor (1968-69), Mrs. W. J. Case.
Recorder, M. A. L. Cripps, D.S.O., T.D., Q.C. (1961).
Town Clerk, P. M. Vine.
Clerk of the Peace, G. A. Wharton, M.B.E., T.D.

OXFORD

OXFORD is a University City, an important industrial centre, and a county, assize, and market town.

It has been a City from time immemorial and a County Borough since 1889. It has an area of 8,785 acres and a population (estimated, 1967) of 109,350. Oxford is a parliamentary constituency returning one member and is governed by a Council of 68 members of whom 8 are, by special enactment, elected by the University.

Industry played a minor part in Oxford until the motor industry was established in 1912. To-day this and the adjoining pressed steel works employ about 15,000.

It is for its architecture that Oxford is of most interest to the visitor, its oldest specimens being the reputed Saxon tower of St. Michael's church, the remains of the Norman castle and city walls and the Norman church at Iffley. It is chiefly famous however, for its Gothic buildings, such as the Divinity Schools, the Old Library at Merton College, William of Wykeham's New College, Magdalen College and Christ Church and many other college buildings. Later centuries are not represented by so many examples, but mention can be made of the exquisite Laudian quadrangle at St. John's College, the renaissance Sheldonian Theatre by Wren, Trinity College chapel, and All Saints Church; Hawksmoor's mock-Gothic at All Souls College, and the superb example of eighteenth century architecture afforded by Queen's College. In addition to individual buildings, High Street and Radcliffe Square, just off it, both form architectural compositions of great beauty. Most of the Colleges have gardens, those of Magdalen, New College, St. John's (designed by "Capability" Brown) and Worcester being the largest.

The visitor will always find some of the college chapels, halls and gardens open for public inspection between 10 a.m. and 5 p.m.

Lord Mayor (1968-69), P. S. Spokes.
Recorder, E. B. Gibbons, Q.C. (1966).
Town Clerk, A. T. Brown (1966).
Clerk of the Peace, E. G. Shelton.

PLYMOUTH

PLYMOUTH is situated on the borders of Devon and Cornwall at the confluence of the Rivers Tamar and Plym, 210 miles from London, with an area of 19,936 acres and a population (estimated, 1967) of 247,400.

Following extensive war damage, the city centre comprising a large shopping centre, municipal offices, law courts and public buildings, has been re-built. The main employment is provided by H.M. Dockyard. Many new industrial firms have become established in the post war period. In conjunction with the Cornwall County Council, the Tamar Bridge was constructed linking the City by road with Cornwall.

Parliament in 1439 passed the Plymouth Act of Incorporation and Plymouth is therefore the first creation of a Municipal Corporation in England by statute. The Lord Mayor presides over a Council consisting of 22 Aldermen and 66 Councillors.

The Lord Mayor (1968-69), I. C. Lowe.
Recorder, E. S. Fay, Q.C. (1964).
Town Clerk, S. Lloyd Jones.

PORTSMOUTH

PORPSMOUTH, a city, county and parliamentary borough, with an area of 14½ sq. miles, occupies Portsea Island, Hampshire, with boundaries extending to the mainland. Portsmouth is 70 miles by road from London (90 minutes by electric train). It has a population (estimated, 1967) of 219,110.

Industries include the Royal Dockyard, the principal centre of employment with a labour force exceeding 20,000, which with the naval station, occupies the south-western part of the Island. The holiday and tourist industry, centred on the coast at the resort area of Southsea, caters annually for 150,000 visitors and 800,000 day trippers. Other industries are shipbuilding and maintenance, aircraft engineering and the manufacture of corsets, cardboard boxes, confectionery, baby products, refrigerators and brushes. The commercial port (the Camber) and the airport are owned and run by the City Corporation.

Among many tourist attractions are Lord Nelson's flagship, H.M.S. *Victory*; Charles Dickens' birthplace at 393 Commercial Road, now a Dickens museum; Southsea Castle, now a museum of military history, and the Round Tower and Point Battery, which for hundreds of years have guarded the entrance to Portsmouth Harbour. Southsea is particularly noted for its panoramic views of the busy shipping lanes of the Solent and Spithead.

Lord Mayor (1968-69), F. A. J. Emery-Wallis.
Recorder, D. A. Grant, Q.C. (1967).
Town Clerk, J. R. Haslegrave, O.B.E., T.D.

SHEFFIELD

SHEFFIELD (Yorkshire, West Riding), the centre of the special steel and cutlery trades, is situated 259 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city is set in a beautiful countryside, its residential suburbs penetrating the Peak District of Derbyshire.

Sheffield has an area of 45,363 acres (nearly 6a square miles), including 3,393 acres of publicly owned parks and woodland, and a population (estimated, 1967) of 534,100. Though its cutlery, silverware and plate have long been famous, Sheffield has other and now more important industries—special and alloy steels, engineering and tools in great variety. Titanium is one of the city's latest products. Refractory materials, silver refining, brush making, the manufacture of confectionery, canning, typefounding and the making of snuff are other contrasting industries in Sheffield.

The parish church of St. Peter and St. Paul, founded in the twelfth century, became the Cathedral Church of the Diocese of Sheffield in 1914. Parts of the present building date from about 1435. The principal modern buildings are the Town Hall (1897 and 1923), the Cutlers' Hall (1832), the University (1905 and recent extensions, including 18-storey Arts Tower), City Hall (1932), Central Library and Graves Art Gallery (1934), and Castle Market Building (1959).

Sheffield was created a borough on Aug. 24, 1843, a county borough in 1888 and a city in 1893, the Mayor becoming a Lord Mayor in 1897. It was made an Assize Town in 1955. The Corporation consists of 27 Aldermen and 81 Councillors. *The Lord Mayor* (1968-69), Mrs. P. Sheard.
Recorder, P. S. Price, Q.C. (1965).
Master Cutler (1968-69), (45th Master of the Company of Cutlers in Hallamshire), G. S. Willis, O.B.E., T.D.

Town Clerk, D. B. Harrison.
Clerk of the Peace, R. H. Boyers, D.F.C.

SOUTHAMPTON

SOUTHAMPTON is Britain's premier passenger port. As the majority of ocean travellers to this country arrive at Southampton, the City is recognized as "The Gateway to Britain". The first Charter was granted by Henry II and Southampton was created a county of itself in 1447. In February, 1964, Her Majesty The Queen granted city status by Royal Charter. The City has an area of 12,059 acres excluding tidal waters and a population (estimated 1967) of 209,790. It is a parliamentary and quarter sessions borough. The University of Southampton (1952) had 3,835 students in 1967-68.

The Civic Centre, completed in 1939, comprises four blocks, municipal offices and law courts, guildhall, library and art galleries. The tower, which is a notable land-mark for shipping using Southampton Water and which can be seen for many miles from vantage points in the surrounding countryside, incorporates a clock and bells. Public open spaces total over 1,000 acres in extent and comprise 8 per cent. of the city's area. The Sports Centre is 267 acres in extent. The Common covers an area of 328 acres in the central district of the city and is mostly natural parkland.

The City Council consists of 18 aldermen and 54 councillors.

*Mayor (1968-69), H. L. Davies, B.E.M.
Recorder, Raymond Stock, Q.C. (1966).
Town Clerk, G. Guest (1968).*

STOKE-ON-TRENT

STOKE-ON-TRENT (Staffordshire), familiarly known as The Potteries, stands on the River Trent 157 miles N. of London. The present municipal area is 22,916 acres (36 square miles), with a population (estimated, 1967) of 275,730. The city is the main centre of employment for the half-million population of North Staffordshire. It is the largest clayware producer in the world (chinaware, earthenware, sanitary goods, refractories, bricks and tiles) and has a large coal mining output drawn from one of the richest coalfields in Western Europe, with proved reserves exceeding one thousand million tons. The city has iron works, steelworks, foundries, chemical works, engineering plants, rubber works, paper mills, and a very wide range of manufactures including textiles, furniture, electrical goods, vehicle components, toys, machinery, plastic materials, metal stampings, glass and glazes.

Extensive reconstruction has been carried on since 1930. A unique feature of the city is that it has six "centres" and more shops and public halls than other areas of comparable size. The city was formed by the federation in 1910 of the separate municipal authorities of Tunstall, Burslem, Hanley, Stoke-upon-Trent, Fenton, and Longton, all of which are now combined in the present City of Stoke-on-Trent. Each of the six areas still has its own public buildings and amenities, but all civic administration is controlled centrally by the city council.

The city has 72 councillors and 24 aldermen, and elects 3 Members of Parliament.

*The Lord Mayor (1968-69), Mrs. D. Robinson.
Recorder, G. K. Mynett, Q.C. (1961).
Town Clerk, L. K. Robinson.*

WINCHESTER

WINCHESTER, the ancient capital of England, is situated on the River Itchen 65 miles S.W. of London and 12 miles north of Southampton. The City has an area of 3,888 acres and a population (estimated, 1967) of 30,740; it is a parliamentary

and quarter session borough, an assize town and the county town of Hampshire.

Occupation of the city area can be traced back to 1800 B.C. but organized settlements appeared later. Saxon history is somewhat obscure but Winchester became the capital of Wessex and in the 9th century capital of all England. Alfred the Great made Winchester a centre of education. William the Conqueror marched straight from his victory at Hastings to Winchester where he established a new Palace, his Treasury and his capital. Here he compiled Doomsday Book as the returns came in from the shires. Winchester remained the capital for many years, but its decline as a capital began with the civil war between Stephen and Matilda; and by 1138 it had lost its favourable position.

Winchester is rich in architecture of all types but the Cathedral takes first place. The longest Gothic cathedral in the world, it was rebuilt in 1079-1093 and exhibits splendid examples of Norman, Early English and Perpendicular styles. Winchester College, founded in 1393, is one of the most famous public schools, the original building remaining almost unaltered.

It is not certain when Winchester was first designated a city but it is probable that the term was applied between 650 and 700. Winchester is one of the oldest corporations in the country; the first written record of a Mayor occurs in 1200. *Mayor (1968-69), S. Green.*

Town Clerk and Clerk of the Peace, R. H. McCall.*

YORK

YORK is a county borough, an archiepiscopal seat, the county town of Yorkshire and a county in its own right, standing at the junction of the three Ridings. York has an area of 7,295 acres, and a population (estimated, 1967) of 105,550. The city returns one member to Parliament and is governed by a Lord Mayor, 13 Aldermen and 39 Councillors.

The recorded history of York dates from A.D. 71, when the Roman Ninth Legion established a base which later became the fortress of Eboracum. It is mentioned in the Domesday Book. By the 14th century the city had become prosperous and was used as the chief base against the Scots. It became a great mercantile centre, chiefly owing to its control of the wool trade, but under the Tudors its fortunes declined, though Henry VIII made it the headquarters of the Council of the North, so preserving its status as the Northern capital.

With its development as a railway centre in the 19th century the commercial life of York expanded and it is now a flourishing modern city. The principal industries are the manufacture of chocolate, railway coaches, scientific instruments, glass containers and sugar.

It is rich in examples of architecture of all periods, but its finest features are the Minster with its stained glass, and the mediæval city walls and gateways, guildhalls and churches. Other notable examples of domestic architecture are the Georgian mansions of The Mount, Micklegate and Bootham. Its museums are world-famous, and its Art Gallery contains an important collection of paintings from the 14th to the 20th century. The University of York was opened in 1963 at Heslington on the City's eastern boundary. *Rt. Hon. Lord Mayor (1968-69), Mrs. M. M. Armitage.*

*Recorder, H. G. Bennett, Q.C. (1968).
Sheriff (1968-69), J. T. Faulkner.
Town Clerk and Clerk of the Peace, T. C. Benfield.*

PATRON

St. George, Patron Saint of England.—St. George is believed to have been born in Cappadocia, of Christian parents, in the latter part of the 3rd century and to have served with distinction as a soldier under the Emperor Diocletian, including a visit to England on a military mission. When the persecution of Christians was ordered, St. George sought a personal interview to remonstrate with the Emperor and after a profession of faith resigned his military commission. Arrest and torture followed and he was martyred at Nicomedia on April 23, 303, a day ordered to be kept in remembrance as a national festival by the Council of Oxford in 1222, although it was not until the reign of Edward III that he was made patron saint of England. His connection with a dragon seems to date from the close of the 6th century and to be due to the transfer of his remains from Nicomedia to Lydda, close to the scene of the legendary exploit of Perseus in rescuing Andromeda and slaying the monster, credit for which became attached to the Christian martyr.

St. David, Patron Saint of Wales.—St. David is believed to have been born near the beginning and to have died towards the end of the 6th century. St. David was an eloquent preacher and became Primate of South Wales while Bishop of Caerleon on Usk, but he afterwards moved the seat of the Primacy from Caerleon to Menevia, now St. David's. At the request of Henry I he was canonized in the

SAINTS

early part of the 12th century and became the tutelary saint of Wales, his annual festival being observed on March 1.

St. Andrew, Patron Saint of Scotland.—St. Andrew, one of the Christian Apostles and brother of Simon Peter was born at Bethsaida on the Lake of Galilee and lived at Capernaum. He preached the Gospel in Asia Minor and in Scythia along the shores of the Black Sea and became the patron saint of Russia. It is believed that he suffered crucifixion at Patras in Achaea, on a *crux decussata* (now known as St. Andrew's Cross) and that his relics were removed from Patras to Constantinople and thence to St. Andrews, probably in the 8th century, since which time he has been the patron saint of Scotland. The festival of St. Andrew is held on November 30, a church festival indicated in the calendar by red letters.

St. Patrick, Patron Saint of Ireland.—St. Patrick was born in England about 389 and was carried off to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. He was ordained deacon at Auxerre and having been consecrated Bishop in 432 was despatched to Wicklow to reorganize the Christian communities in Ireland. He founded the see of Armagh and introduced Latin into Ireland as the language of the Church. He died in 461 and his festival is celebrated on March 17.

THE PRINCIPALITY OF WALES AND MONMOUTHSHIRE

Position and Extent.—Wales and Monmouthshire occupy the extreme west of the central southern portion of the island of Great Britain, with a total area of 8,006 sq. miles (5,130,107 acres); they are bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, and Hereford, and on the W. by St. George's Channel. Across the Menai Straits is the Welsh island-county of Anglesey or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826 (freed from toll as from Jan. 1, 1941) and by the tubular railway bridge (1,100 ft. long) of the former L.M. & S. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Dun Laoghaire and Dublin (70 miles).

Population.—The population at the Census of 1961 was 2,641,000 (inclusive of Monmouthshire); Registrar-General's estimate (June 30, 1967), 2,709,930.

Relief.—Wales is mostly mountainous, the chief systems being those of North Wales (Snowdon 3,560 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-mawddwy 2,970 ft.); Powys (Plinlimmon 2,468 ft., Drygan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,906 ft., Pen-y-gader fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysylte branch of the Shropshire Union Canal across the valley. The estuary of the *Dee* is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, and Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

The Welsh Language.—Statistics published on Sept. 11, 1962, show that only 656,000 persons (of three years and over) in Wales and Monmouthshire were able to speak Welsh at the time of the 1961 Census, compared with 715,000 at the 1951 Census. One per cent. of the population could speak Welsh only, compared with 4 per cent. in 1931. The proportion of people speaking Welsh fell from 28.9 per cent. in 1951 to 26 per cent in 1961. As in 1951, the Western Counties, Anglesey, Caernarvon, Merioneth (75.9 per cent.), Cardigan and Carmarthen had the highest proportion of Welsh speakers.

Flag.—A red dragon on a green and white field (per fess argent and vert a dragon passant gules). The flag was augmented in 1953 by a royal badge on a shield encircled with a riband bearing the words *Ddraig Goch Ddyry Cychwyn* and imperially

crowned. Only the unaugmented flag is flown on Government offices in Wales and, where appropriate, in London. Both flags continue to be used elsewhere.

EARLY HISTORY

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* and *Belgae* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caratacus* (Caractacus or Caradog), Chieftain of the Catuvellauni and son of *Cunobelinus* (Cymbeline) King of the Trinovantes. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic *Goidels* and *Brythons* into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated Wales from Cornwall and the battle of Chester (613) cut off communication with Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the *Dee* to the *Wye* (Offa's Dike). In the 9th century Rhodri Mawr united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Deheubarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last named being Howel Dda, who codified the laws of the country, while Lewelyn ap Seisyllt (husband of the heiress of *Gwynedd*) again united the provinces and reigned as Prince from 1016 to 1022.

The Norman Conquest.—After the Norman conquest of England, William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the *Wye* to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of Griffith ap Rhys and routed the Norman-Flemish forces at the fords of the *Teifi* (Cardigan) in 1136. From the early years of the 13th century the house of *Gwynedd*, in the north, gained an ascendancy over the whole of Wales, and Llywelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign. Llywelyn ap Gruffydd (grandson of Llywelyn ap Iorwerth), the last native prince, was killed in 1282 during hostilities between the Welsh and English. On Feb. 7, 1301, Edward of Caernarvon, son of Edward I., was created Prince of Wales.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (*Eisteddfod*), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in a age many centuries before the Christian era.

CARDIFF

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Rhymney and Ely, was declared to be the capital of Wales on Dec. 20, 1955. The port of the South Wales coalfields, it has an area of 22,736 acres and a population (estimated 1967) of 289,320. Within the city there is a great variety of industry including iron and steel works, rolling mills and foundries, patent fuel works, engine wagon works, motor vehicle factories, flour mills, breweries, jam, vinegar and ice factories, enamel-ware and hollow-ware, paint works, furniture and bedding, clothing and footwear, sweets and confectionery, tobacco, electrical goods and appliances, food products and building materials.

The principal buildings are Cardiff Castle, built in the 11th century, Llandaff Cathedral, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, the Institute of Science and Technology, City Hall, Law Courts, Glamorgan County Hall, Offices of Government Departments, and "The Temple of Peace and Health." The city returns 3 members to Parliament.

Rt. Hon. Lord Mayor (1968-69), J. R. Lyons.

Stipendiary Magistrate, J. C. Rutter (1966). Recorder, W. L. Mars-Jones, M.B.E., Q.C. (1968). Town Clerk and Clerk of Peace, S. Tapper-Jones.

SWANSEA

SWANSEA (in Welsh, Abertawe), a seaport of Glamorgan, is a County Borough, at the mouth of the River Tawe. The trade of the port includes coal, patent fuel, ores, and the import and export of oil. There is also a large ship-repairing industry. The municipal airport is situated at Fairwood Common, Gower, a few miles away from the town. The municipal area is 24,241 acres, with a population (estimated, 1967) of 170,940.

The principal buildings are the Norman Castle (rebuilt in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton and the Guildhall, containing Brangwyn panels. Swansea was chartered by the Earl of Warwick, circa 1158-1184, and further charters were granted by King John, Henry III., Edward II., Edward III., and James II., a from Cromwell and a Lord Marcher. The borough returns 2 members to Parliament. Mayor (1968-69), D. A. Jenkins. Recorder, Alun Talfan Davies, Q.C. (1968). Town Clerk, I. J. Watkins.

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between $60^{\circ} 52' 30''$ and $54^{\circ} 38'$ N. latitude and between $1^{\circ} 45' 32''$ and $6^{\circ} 14'$ W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean ■ the N. and W., and the North Sea on the E. The greatest length of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 29,798 square miles (or 19,068,724 acres) exclusive of inland water, tidal water and foreshore. The population (1961 Census) was 5,178,490, an increase of 82,075 or 1·6 per cent. since the census of 1951; Registrar-General's estimate (June 30, 1967), 5,186,600. The average density of the population in 1961 was 174 persons per square mile, compared with 171 persons per sq. mile in 1951.

Land's End to John o' Groats.—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), ■ total distance of 603 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends farther N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV (1488-1513).

Relief.—There are three natural orographic divisions of Scotland. The Southern Uplands have their highest points in Merrick (2,764 feet), Rinnis of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Broad Law (2,754 feet) in Peebles. The Central Lowlands include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad Northern Highlands extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the Great Glen; they contain, in the central Grampian Hills, Ben Nevis (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,296 feet). The Cheviot Hills form ■ natural boundary between Scotland and England, their highest point being The Cheviot (2,676 feet).

Hydrography.—The principal river of Scotland is the Clyde (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque Falls of Clyde, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stonebyres Linn (80 feet), above and below Lanark. The Tweed (96 miles) has important woollen industries in its valley. The Tay, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the Tay Bridge (10,289 ft.), opened in 1887, and the Tay Road Bridge (7,365 ft.), opened by H.M. Queen Elizabeth the Queen Mother on Aug. 18, 1966. The Dee (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The Spey (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows

into the Moray Firth. The Forth (66 miles), navigable to Stirling, is spanned by the Forth (Railway) Bridge (1889), constructed at ■ cost of £3,000,000, with ■ length of 5,330 ft., and the Forth (Road) Bridge, with ■ total length of 6,156 ft. (over water) and a single span of 3,300 ft. The latter was completed in 1964 at ■ cost of £20,000,000.

The waterfall, Eas-Coul-Aulin in Sutherland with ■ total height of 658 ft. and the Falls of Glomach in Ross-shire, with a drop of 370 feet, are the highest in the British Isles; the Grey Mare's Tail (Dumfries-shire) is 200 feet.

The lochs are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is Loch Lomond (24 miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; Loch Ness (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Mearc in the northern Highlands.

Climate.—The general climatic values for Scotland are given below, together with the corresponding values for England and Wales within brackets—mean air temperature reduced to sea level 47.1° F. (49.7); rainfall, 50.3 inches (35.2); number of days with rain 217 (188); mean hours per day of bright sunshine, 3.36 (3.96).

Gaelic Language.—The preliminary report on the 1961 Census of Scotland showed that 76,587 persons were Gaelic speakers, compared with 95,447 in 1951. 1,079 persons spoke Gaelic only and not English (compared with 2,178 in 1951), though it was considered from experience that this figure would be reduced after full examination of the Census returns. The majority of Gaelic speakers lived in the counties of Ross and Cromarty (38.29 per cent.) and Inverness (24.44 per cent.). 75,508 persons spoke both Gaelic and English, compared with 93,269 in 1951.

Commerce.—The principal exports are machinery, ships and vehicles, iron and steel manufactures, non-ferrous metals, woollen and worsted yarns and products, food and drink and textile materials. Whisky continues to be the leading export to dollar countries.

THE SCOTTISH ISLANDS

There were 147 inhabited islands in the Kingdom at the time of the 1951 Census, with a total population of 141,972, the number of inhabited islands having fallen by 18 since the census of 1931. Preliminary indications from the 1961 Census were of relatively large decreases in the populations of the islands since 1951. Among the islands showing ■ decline in population were Islay 3,866 (9.5 per cent. decrease); Mull (including Iona, etc.), 1,674 (14.6); Coll and Tiree, 1,143 (20.0); Harris Group, 3,285 (17.7); Skye, Raasay, etc., 7,765 (20.0); Barra Group, 1,407 (22.1); N. Uist Group, 1,921 (13.5).

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the Pentland Firth, is the island county of Orkney, ■ group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with ■ population (1961) of 18,743, a decrease of 11.8 per cent. compared with 1951 (estimated 1965, 18,245). Kirkwall, in Mainland, the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain brochs (Pictish towers) and other Pictish and Scandinavian remains. Scapa Flow, between Mainland and Hoy, was the war station of the Grand Fleet from 1914-19 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Zetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Zetland or Shetland, ■ group of about 100 islands and islets, of which one-fifth are inhabited. The total area of the group is 552 square miles, with ■ population (1961 Census, prelim.) of 17,800 (estimated 1965, 17,514). Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for handknitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles ($60^{\circ} 51' 30''$ N. lat.).

Western Islands.—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 200 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. *The Hebrides*.—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorenses*, ■ name that survives in the Anglican bishopric of "Sodor and Man." The *Inner Hebrides* include the island of *Skye* (643 square miles)—capital, Portree, famous as a refuge of Prince Charlie after his defeat at Culloden, Inverness-shire, in 1746, which contains the *Cuillins* (Sgurr Alasdair 3,309 feet), *Red Hills* (Ben Caillach, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles), containing *Ben More* (3,169 feet), *Ben Buy* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura* (Beinn-an-Oir, 2,571 feet and Beinn Chaolais, 2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis with Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of Stornoway (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callanish*, ■ well-preserved series of monolithic circles, cruciform in general arrangement, but usually regarded as ■ heathen monument of the remote Stone Age.

EARLY HISTORY

Prehistoric Man.—The *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body, seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands. Celtic *Goidels*, *Brythons* and *Belgae* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Graipius" Hills, but after a victory at *Mons Graipius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked

by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall* (Tyne to Solway Firth).

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by *Scots* (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brythons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between *Pict* and *Brython* is still to be seen in the *Catrail*, or *Picts' Work Dyke*, of Roxburgh (from Torwoodie, near Galashiels, to Peel Fell in the Cheviots). Christianity was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the *Picts* and *Scots*, the *Brythonic Waelisc* (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the *Scots* under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of *Malcolm I* (943-954) the *Brythons* or *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by *Malcolm II* (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). *James IV* and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 *James VI*, the Stuart King of Scotland and the heir to the Tudor line of England (his mother, *Mary Queen of Scots*, was the great-granddaughter of *Henry VII*), succeeded *Queen Elizabeth I* on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of *James VII* and II, the crown devolved upon *William III* (grandson of *Charles II*) and *Mary* (daughter of *James VII* and II) and, their issue failing, upon *Anne* (second daughter of *James VII* and II). *Anne's* children died young, and the throne devolved upon *George I* (great-grandson of *James VI* and I). In 1689 *Graham of Claverhouse* "roused the Highlands" on behalf of *James VII* and II, but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sheriffmuir, but the movement died down until 1745, when *Prince Charles Edward* defeated the Royalist troops under *Sir John Cope* at Prestonpans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII and III" (the title claimed for his father by *Prince Charles Edward*) fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the *Duke of Cumberland* at *Culloden* (April 16, 1746).

The *Hebrides* did not become part of the Kingdom of Scotland until 1266, when they were ceded to *Alexander III* by *Magnus of Norway*. *Orkney* and *Shetland* fell to the Scottish Crown as ■ pledge for the unpaid dowry of *Margaret of Denmark* wife of *James III*, in 1468, the Danish suzerainty being formally relinquished in 1590.

Scotland is represented in Parliament by 71 members.

PRINCIPAL SCOTTISH CITIES

EDINBURGH

EDINBURGH, the Capital of the Kingdom, has a municipal area of 34,781 acres, and a population (estimated, 1967) of 467,986. The city is built on a group of hills and contains in Princes Street one of the most beautiful thoroughfares in the world. The principal buildings are the Castle, which includes St. Margaret's Chapel, the oldest building in Edinburgh, and near it, the Scottish National War Memorial; the Palace of Holyroodhouse; Parliament House, the present seat of the judiciary; the University; St. Giles' Church (restored 1879-83); St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott); the General Register House (Robert Adam); the National and the Signet Libraries; the National Gallery; the Royal Scottish Academy; and the National Portrait Gallery. The city is governed by a town council of 71 Members and sends 7 Members to Parliament.

Rt. Hon. Lord Provost, Sir Herbert Brechin, C.B.E.
Town Clerk, W. Borland.

City Chamberlain, A. L. Imrie, C.B.E.

GLASGOW

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 39,725 acres and a

population (estimated, 1967) of 960,527. The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries in the world. The principal industries are iron and steel works, ship-building, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills and furniture. The chief buildings are the Early English former Cathedral built during the first half of the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infiraries, the Art Galleries and the Mitchell Library. The city is governed by a town council of 112 Members, and sends 15 Members to Parliament.

Rt. Hon. Lord Provost, J. Johnston.

Town Clerk, J. F. Falconer, M.B.E.

City Chamberlain, G. B. Esslemont, C.B.E.

ABERDEEN

ABERDEEN, a City and a Royal Municipal and Parliamentary Burgh, 126 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 11,034 acres, with a population (estimated, 1967) of 182,117. The chief industries are tourist traffic, quarrying and granite working, white fish,

salmon and herring fisheries, engineering, chemicals, ship-building, paper-making, woollen and linen manufacture. From an architectural point of view, Aberdeen is famous for its many beautiful buildings, including Marischal College, reputed to be the most imposing white granite building in the world, King's College (1494), St. Machar Church (1378), the Auld Brig o' Balgownie (1320) and the Municipal Buildings. There is a sea beach promenade, which stretches for fully two and a half miles along golden sands, and at Hazelhead an open public park of 800 acres, of which 200 are wooded, with one of the finest public golf courses in Scotland. The climate is bracing and healthy. The city is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provost (1967-70), R. S. Lennox.

Town Clerk, J. C. Rennie.

City Chamberlain, W. G. A. McInnes.

DUNDEE

DUNDEE, a City and Royal Burgh, on the North bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 12,229 acres, and a population (estimated, 1967) of 182,284. Principal buildings are the University, the Institute of Art and Technology, High School, Albert Institute and the Caird Hall Buildings. There is a magnificent public park of 400 acres at Camperdown and other parks of 646 acres and an observatory at Balgay Park. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, ship-building, engineering, dyeing, fruit, etc., canning, linoleum manufacturing, watch and clock making, and brewing. The city is governed by a Town Council of 37 members and sends 2 Members to Parliament.

The Lord Provost (1967-70), A. Mackenzie, O.B.E.

Town Clerk, G. S. Watson.

City Chamberlain, J. C. Milne.

CHEIFS OF CLANS AND NAMES IN SCOTLAND

The following list of Chiefs comprises the persons officially recognized — such by inheritance of the ancestral arms "without brisur or mark of cadency" under the Act 1672 c. 47, and/or relative supporters, under decree of the Lyon Court. It does not include self-styled, or Society-selected "chiefs", but the hereditary Heads of Families who conform to the evidence that "clan and family mean exactly the same thing"; and the definitions of Sir George Mackenzie of Rosehaugh, Lord Advocate to Charles II, that the undifferenced arms denote the "Chief for so we call the Representative of the Family . . . and in the Erse (Gaelic) with us the Chief of the Family is called the Head of the Clan,"—and the unanimous opinions of the Law Lords in *Seaforth v. Allangrange*, 1921, to the same effect that the undifferenced shield of arms denotes the Chief of the Clan; which in this hereditary familial sense of parental organization or *kin*, is denoted by the determination of armorial succession by decree of the Court of the Lord Lyon. These organizations were termed "Names" in the Lowlands, where all members bore the same basic surname, and "Clans" in the Border and Highland areas where surnames were a later development and evolved from complicated genealogical descriptions, the "clan name" being normally that of the chief.

Northern Ireland

(For geographical and historical notes on Ireland, see Index)

Final results of the Census of Population held in Northern Ireland on October 9, 1966, showed a total population of 1,484,775 (males, 723,884; females, 760,891) an increase of 59,733 or 4·2 per cent. over the total at the Census of 1961. A question on religion was not asked at the 1966 Census. In 1961 the number of persons in the various religious denominations (expressed in percentages of the total population) were: Roman Catholic, 34·9; Presbyterian, 29; Church of Ireland, 24·2; Methodist, 5; others 4·9; not stated, 2. Northern Ireland has a total area of 5,462 sq. miles (land, 5,206 sq. miles; inland water and tideways 256 sq. miles) with a density of population of 283 persons per sq. mile in 1966.

Constitution and Government.—Under the Government of Ireland Act, 1920, a separate Parliament and Executive Government were established for Northern Ireland. Under the Constitution certain legislative and fiscal powers are reserved to the Parliament of the United Kingdom.

The Northern Ireland Parliament consists of a House of Commons of 52 elected members (who receive an allowance) and a Senate of 2 ex officio Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. At the General Election of November, 1965, and subsequent by-elections, there were elected, Unionists 37, Northern Ireland Labour 2, Nationalists 9, Republican Labour 2, National Democrats 1, Liberal 1. Northern Ireland continues under the Act of 1920 to return 12 members to the House of Commons at Westminster.

The Executive power is vested in the Governor on behalf of Her Majesty the Queen; he holds office for 6 years, and is advised by 9 Ministers responsible to Parliament.

Governor. His Excellency the LORD GREY OF NAUNTON, G.C.M.G., K.C.V.O., O.B.E.,* born April 15, 1910; appointed Governor, July 31, 1968 (Government House, Hillsborough, Northern Ireland)... £4,000 plus allowances.

Private Secretary and Principal A.D.C., Maj. R. Stephens, C.V.O., E.R.D.

FINANCE

The greater part of the taxation in Northern Ireland is imposed and collected by the United Kingdom Government. After deducting the cost of collection, certain services reserved to the United Kingdom Parliament, and the Imperial Contribution, the balance is paid over to Northern Ireland's Exchequer. The Contribution so made by Northern Ireland to the cost of United Kingdom services, *i.e.* Navy, Army and Air Force, National Debt, etc. for the period from 1962 to March 31, 1968, amounted to £453,74,344. The United Kingdom contribution has been provisionally fixed at £500,000 for 1967-68 and £2,000,000 for 1968-69.

PRODUCTION

Industries.—The total value of the industrial production of Northern Ireland in 1966 was approximately £920,000,000, and employment on industrial production was given to about 226,000 persons. The products of the engineering, shipbuilding and aircraft industries which employed 54,000 persons, were valued at £118,000,000. The textile industries, employing 47,000 persons, produced yarns, fabrics, household textiles, handkerchiefs, carpets, hosiery, ropes and a wide variety of other products valued at approximately £142,000,000. The food, drink and tobacco industries, giving employment to 29,000 persons, produced goods valued at £406,000,000 and clothing to the value of £39,000,000 was manufactured in 1966, of which £14,500,000 represented shirts and collars, which are manufactured principally in Londonderry. Other industries of importance to the economy of Northern Ireland are synthetic rubber, cardboard boxes and packing cases, furniture and building materials.

Minerals.—2,194 persons were employed in mining and quarrying operations in Northern Ireland in 1967, and the minerals raised were valued at £5,190,165.

Fisheries.—The total value of sea and freshwater fish caught in 1967 was £1,001,293.

COMMUNICATIONS

Seaports.—The net tonnage of shipping using the principal ports in 1966 was about 10,000,000 tons.

Belfast.—Nightly passenger and freight services operate to Glasgow, Heysham and Liverpool.

Regular vehicle ferry services maintained to Ardrossan, Preston and Liverpool and general cargo services operate to the major ports in Great Britain and to foreign ports.

Larne.—A twice daily passenger, vehicle ferry and general cargo service to Stranraer, a regular vehicle ferry service to Preston and a cargo service to Ardrossan are operated.

Londonderry.—A cargo service is maintained to Glasgow and a container service operates to Preston and Liverpool. Shipping services also operate from Coleraine, Newry, Portrush and Warrenpoint to Liverpool and Garston.

Road and Rail Transport.—The reorganization of public transport in Northern Ireland was completed by the Transport Act (N.I.), 1967, which provided for the abolition of the Ulster Transport Authority and the establishment of the Northern Ireland Transport Holding Company. The Holding Company took over the assets of the Authority and is responsible for the supervision of the subsidiary companies, Ulsterbus Ltd. which operates the public road passenger services and Northern Ireland Railways Co. Ltd. which provides the railway services. A few privately operated bus services are provided in rural areas under licence. Road freight services are provided by a large number of hauliers operating competitively under licence. The Belfast Corporation provides omnibus services in the Belfast area.

Air Transport.—Passenger and freight services operate between Belfast Airport and airports throughout Great Britain. In 1967 almost one million passengers, 20,000 metric tons of freight and 3,000 metric tons of mail were carried. Services are also operated between Londonderry (Ballykelly) and Glasgow.

BELFAST

BELFAST, ■ City, the seat of Government of Northern Ireland, situated at the mouth of the River Lagan at its entrance to Belfast Lough, has a municipal area of 15,815 acres, exclusive of tidal water (1,223) and a population (1967) of 398,405. The city received its first charter of incorporation in 1613 and has since grown, owing to its easy access by sea to Scottish coal and iron, to be a great industrial centre. The chief industries are ship-building and the manufacture of aircraft, machinery, textiles, ropes and tobacco. Belfast is an important seaport with extensive docks.

The principal buildings are of ■ relatively recent date and include the Parliament Buildings at Stormont, the City Hall, the Law Courts, the Public Library and the Museum and Art Gallery. The Queen's University (previously Queen's College) was chartered in 1908.

The city returns 16 members to the Parliament of Northern Ireland and 4 members to the House of Commons at Westminster. Belfast was created a city in 1888 and the title of Lord Mayor was conferred in 1897.

Lord Mayor (1968-69), W. D. Geddis.

Town Clerk, D. Jamison.

LONDONDERRY

LONDONDERRY, a City and County Borough,

situated on the River Foyle, has a population (estimated, 1967) of 56,300 and was reputedly founded in 546 by St. Columba. Londonderry (formerly *Derry*) has important associations with the City of London. The Irish Society, under its royal charter of 1613, fortified the city and was for long closely associated with its administration.

Famous for the great siege of 1688-89, when for 105 days the town held out against the forces of James II until relieved by sea, Londonderry was an important naval base throughout the Second World War. Interesting buildings are the Protestant Cathedral of St. Columb's (1633) and the Guildhall reconstructed in 1912 and containing a number of beautiful stained glass windows, many of which were presented by the livery companies of London. The famous Walls are still intact and form a circuit of almost ■ mile around the old city. The manufacture of shirts and collars is the staple industry. Other industries include motor and mechanical engineering and fancy box making. New industries established in Londonderry in the post-war period include the manufacture of synthetic fibre and rubber, tyre cord and light engineering. A large part of Ulster's agricultural export trade passes through the port.

Mayor (1968-69), W. Beatty.

Town Clerk, R. H. Henderson.

THE ISLE OF MAN (MONA)

an island in the Irish Sea, in lat. 54° 3'–54° 25' N., and long. 4° 18'–4° 47' W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), of which 76,829 acres are under cultivation. Population (1961 Census), 50,423 (males, 23,226; females, 27,197). In 1967 the births numbered 712 and the deaths 844. 165 persons were returned at the Census of 1961 as able to speak the Manx language, compared with 4,657 in 1901 and 355 in 1951. The Island's main industry is catering for holidaymakers (numbering about 500,000 in the year) from all parts of the British Isles. Some agricultural produce is exported.

Government.—The Isle of Man is governed by ■ Legislature, called the Tynwald, consisting of two branches—the Legislative Council and the House of Keys. The Council consists of the Lieutenant-

Governor, the Bishop of Sodor and Man, the First Deemster, the Attorney-General, 2 members appointed by the Lieutenant-Governor, and 5 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the adult male and female population, 13 from the six *sheadings*, 7 from Douglas, 2 from Ramsey, and ■ each from Castletown and Peel. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof

is signed by the Lieutenant-Governor and the Speaker of the House of Keys.

Finance.—An annual contribution of 5 per cent. of the net "Common Purse" Receipts amounting to approximately £160,000 is made to the Imperial Government. In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the War (1914-18). The Isle of Man has made, in all, free gifts of £1,250,000 to the British Government and has lent £1,000,000 free of interest, £500,000 of the latter being converted into a free gift on June 15, 1948; of the balance of £500,000, a sum of £250,000 was repaid by the Treasury in October, 1961, and interest has since that date been paid on the remaining £250,000 invested in 3 p.c. Savings Bonds, 1960/70.

The chief source of revenue is found in the customs duties, the only direct taxation being income tax. Income tax ranges from 2s. od. in the £ on the first £250 of taxable income, the standard rate being 4s. 3d. in the £. There are no surtax or death duties, surtax having been abolished from

April 6, 1961. There are 31 primary, 6 secondary schools, a college of further education and a domestic science college, in addition to King William's College and the Buchan School for Girls; the net expenditure on public education in 1967-68 was £1,004,284.

CAPITAL, ¶ Douglas. Population (1966), 19,518. ¶ Castletown (2,378) is the ancient capital; the other towns — ¶ Peel (2,739), and ¶ Ramsey (3,880).

FLAG.—Three legs armed conjoined in yellow on a red ground.

THE CHANNEL ISLANDS

Situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the Dukedom of Normandy now belonging to the Crown, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 48,083 acres, or 75 square miles. In 1961 the population of Jersey was 63,345, and of Guernsey, etc. 47,198 (Guernsey, 45,150; Alderney, 1,449; Sark, 560).

The climate is mild, and the soil exceptionally productive. The land under cultivation is about 38,765 vergées (2½ vergées = 1 acre) in Jersey, and about 16,500 vergées (2½ vergées = 1 acre) in Guernsey, the principal product of the soil of Jersey being potatoes and tomatoes, and of Guernsey tomatoes, flowers and fern. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The Lieutenant-Governors and Commanders-in-Chief of Jersey and Guernsey are the Personal Representatives of the Sovereign and the channel of communication between H.M. Government and the Insular Governments. The Bailiffs of Jersey and Guernsey, appointed by the Crown, are Presidents both of the Assembly of the States (the Insular Legislature) and of the Royal Court in their respective Bailiwicks.

The official language is English and ¶ Norman-French *patois* is also in use (except in Alderney). The principal imports are coal and coke, building material and groceries and provisions, and the chief exports potatoes, tomatoes, grapes, flowers, granite and cattle. The chief town of Jersey is ¶ St. Helier — the south coast; the principal town of Guernsey is ¶ St. Peter Port, on the east coast, and of Alderney is St. Anne's. A telephone exchange was opened on Alderney in May, 1949 and there is one in Sark. Herm is also connected to Guernsey by telephone.

The Commonwealth

The Commonwealth is a free association of the United Kingdom and the 28 sovereign independent states listed below together with their dependencies (mostly small islands which are dependencies of Britain, Australia or New Zealand) and the Associated States of the Eastern Caribbean. The Member States of the Commonwealth (in the order in which they are treated in the next section of the *Almanack*) are:

CANADA	MALAWI
AUSTRALIA	MALAYSIA
NEW ZEALAND	MALTA G.C.
BARBADOS	MAURITIUS
BOTSWANA	NIGERIA
CEYLON	PAKISTAN
CYPRUS	SIERRA LEONE
GAMBIA	SINGAPORE
GHANA	SWAZILAND
GUYANA	TANZANIA
INDIA	TRINIDAD AND TOBAGO
JAMAICA	UGANDA
KENYA	ZAMBIA
LESOTHO	WESTERN SAMOA

AREA AND POPULATION.—The total area of the British Commonwealth is estimated to be about 14 million square miles. Details of the areas and populations of the Member States and dependencies appear in the following pages and are also tabulated on pp. 196-200. The total population of the Commonwealth is estimated to be approaching 800,000,000.

GOVERNMENT.—Most members of the Commonwealth are parliamentary democracies, their laws being made with the consent of a freely elected parliament after discussion in that parliament, the executive government holding office by virtue of a majority in parliament. However, Ghana (1966) and Nigeria (1966) have suspended their constitutions and are under military rule.

Queen Elizabeth II is recognized as Queen and Head of State in the following Member countries of the Commonwealth: Britain, Canada, Australia, New Zealand, Ceylon, Sierra Leone, Jamaica, Trinidad and Tobago, Malta, The Gambia, Guyana, Barbados and Mauritius. In each of these countries (except Britain) Her Majesty is personally represented by a Governor-General, who in many respects holds the same position in relation to the administration of public affairs as is held by the Sovereign in Britain (with the exception of certain constitutional functions which are performed by Her Majesty personally). The Governor-General is appointed by the Queen on the recommendation of the Government of the country concerned and is wholly independent of the British Government; in many cases he is ■ national of the country in which he holds office.

India, Pakistan, Ghana, Nigeria, Cyprus, Uganda, Tanzania, Kenya, Malawi, Zambia, Singapore and Botswana are Republics with Presidents as Head of State; Malaysia has one of the State Rulers as elected Monarch (*Yang Di-Pertuan Agong*) and Head of State; Lesotho and Swaziland are monarchies which have their own Kings. All Members of the Commonwealth accept the Queen as the symbol of the free association of the Member Nations of the Commonwealth and as such, Head of the Commonwealth.

The status of member nations was defined by the Imperial Conference of 1926 and given legal substance by the Statute of Westminster, 1931, in which the Commonwealth nations were described ■ "autonomous communities within the British Empire, equal in status, in no way subordinate one to another, but united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations." (Modifications were subsequently made for the Republics and the Monarchies of which Her Majesty is not sovereign.) Other parts of the Commonwealth,

such as the Dependent Territories and Associated States, are regarded as forming part of the Commonwealth by virtue of their relationship with Member states of the Commonwealth.

CONSULTATION.—The most important means of consultation between Governments are Prime Ministers' Meetings. These Meetings, which replaced the more formal pre-war Imperial Conferences, have been held at frequent intervals since 1944. They are a useful means whereby Commonwealth Heads of Government consult together on major issues of international affairs and other matters which affect them all. It is not their practice to pass Resolutions or seek to formulate common and binding policies on international issues; but they have on occasion made general statements of principle to which they all subscribe and policies of individual Governments are clearly often influenced by the information and ideas exchanged at these meetings. In addition to meetings of Prime Ministers, there are annual meetings of Finance Ministers, as well as less frequent meetings between Ministers or officials responsible for subjects such as Trade, Education, Medicine and Law.

A Commonwealth Secretariat was established in 1965, staffed from Commonwealth countries (see pp. 368-9).

RHODESIA.—Southern Rhodesia was united with Northern Rhodesia and Nyasaland in ■ federation which lasted from 1953 until 1963, since when Nyasaland has become independent (as Malawi, 1964) and Northern Rhodesia (as Zambia, 1964). Southern Rhodesia made a unilateral declaration of independence on Nov. 11, 1965, and its constitutional status had not been settled by the summer of 1968.

CITIZENSHIP AND NATIONALITY.—Each member of the Commonwealth of Nations defines the citizenship and nationality of its own people and determines the status of other Commonwealth nationals within its own boundaries. In most cases, though not in all, they possess a common status ■ British subjects (or Commonwealth citizens). Even where there is no such provision for ■ common status, the Members of the Commonwealth differentiate, in greater or less degree, as regards the grant of privileges, between citizens of the Commonwealth and aliens. The Republic of Ireland, which in 1949 ceased to be a member of the Commonwealth, is not regarded by the other Commonwealth nations as ■ foreign country or her citizens as foreigners.

THE JUDICATURE.—The Supreme Judicial Authority of dependencies in the Commonwealth is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and also from the Courts of certain members of the Commonwealth (New Zealand, Ceylon, Sierra Leone, Jamaica, Trinidad and Tobago, Uganda (constitutional cases only) and Kenya. The Committee consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of judges of other Commonwealth countries. The members of the Commonwealth have each a broadly similar judicial system, judges (except in the Republics, Sierra Leone and Uganda, where they are appointed by the President) being appointed by the Governor-

General on the advice of the Government concerned. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

DEFENCE.—Each of the independent members of the Commonwealth is completely responsible for its own defence and all are members of the United Nations. The United Kingdom and Canada belong to N.A.T.O.; the United Kingdom and Pakistan are in C.E.N.T.O.; the United Kingdom, Australia, New Zealand and Pakistan are members of S.E.A.T.O.; Australia and New Zealand are signatories of the Pacific Security Treaty. The United Kingdom has defence agreements with Malaysia, Malta and Mauritius, and is a signatory to the Treaty of Guarantee of Cyprus.

THE ASSOCIATED STATES.—Early in 1967 the former colonies of Antigua, Dominica, Grenada, St. Kitts-Nevis-Anguilla and St. Lucia became "non-dependent" States in association with Great Britain. Legal effect was given to this status by the West Indies Act, 1967. The main features of the association are that each State is responsible for its own internal affairs, may amend its own Constitution and may sever the association by unilateral declaration, subject to the observance of procedures contained in the Constitution of each State. Her Majesty's Government retains responsibility for the external affairs and defence of each territory.

OVERSEAS DEPENDENCIES.—The United Kingdom, Australia and New Zealand have dependencies for which they are independently responsible. (See following sections.)

Colony (or Settlement): a territory belonging by settlement, conquest or annexation to the British Crown.

Protectorate: a territory not formally annexed, but in respect of which, by treaty, grant, usage, sufferance, and other lawful means, Her Majesty has power and jurisdiction.

Protected State: a territory under a ruler which enjoys Her Majesty's protection, over whose foreign affairs she exercises control but in respect of whose internal affairs she does not exercise jurisdiction.

Condominium: a territory for which responsibility is shared by two administering powers.

Leased Territories: this term applies only to that part of the mainland of China which was in 1898 leased to Great Britain for 99 years and is administered by the Government of Hong Kong.

Other Commonwealth Dependencies.—Australia is responsible for the Trust Territory of Papua and New Guinea. In addition Australia and New Zealand administer a number of island territories and extensive Antarctic areas.

DEVELOPMENT AND FINANCE.—Complete financial autonomy is enjoyed by all members of the Commonwealth. In some countries, customs tariffs are lower for merchandise of Commonwealth origin than for imports from foreign countries. The British Government provides guarantees for the capital issues made by dependent territories and also provides budgetary assistance in many cases as well as direct loans and grants to assist development.

Under the Colonial Development and Welfare Act, 1940, annual sums of £5,000,000 were made available for developments and £500,000 for research for a ten-year period. Succeeding Acts increased the total sum to be made available and extended the period to be covered.

A summary of the sums made available and periods to which they applied is contained in the table below. An Act of 1959 also authorized the provision of loans from the Exchequer towards the cost of approved development programmes. Similar information on these loans is also included in the summary.

PHYSIOGRAPHY

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec was captured by the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1783 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been part of the Hudson Bay Territory, and was united to Vancouver Island in 1866.

Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41'.

Relief.—The relief of Canada is dominated by the mountain ranges running north and south on the west side of the Continent, by the Pre-Cambrian shield on the east, with, in between, the northern extension of the North American Plain. From the physiographic point of view Canada has six main divisions. These are: (1) Appalachian-Acadian Region, (2) the Canadian Shield, (3) the St. Lawrence-Great Lakes Lowland, (4) the Interior Plains, (5) the Cordilleran Region and (6) the Arctic Archipelago. The first region occupies all that part of Canada lying southeast of the St. Lawrence. In general, the relief is an alternation of highlands and lowlands, and is hilly rather than mountainous. The lowlands area seldom rises over 600 feet above sea level. The great Canadian Shield comprises more than half of the area. The interior as a whole, is undulating, low plateau (general level 1,000 to 1,500 feet), with the more rugged relief lying along the border between Northern Quebec and Labrador. Throughout the whole water or muskeg-filled depressions separate irregular hills and ridges, 150 to 200 feet in elevation. Newfoundland as an outlying portion of the shield consists of glaciated, low rolling terrain broken here and there by mountains. The flat relief of the St. Lawrence-Great Lakes lowland varies from 500 feet in the east to 1,700 feet south of Georgian Bay. The whole area in the western part slopes gently to the Great Lakes. The most striking relief is provided by the eastward facing scarp of the Niagara escarpment (elevation 250 to 300 feet). The Interior plains, comprising the Prairie Provinces, slope eastward and northward a few feet per mile. The descent from west to east is made from 5,000 feet to less than 1,000 feet, in three distinct levels, with each new level being marked by an eastward facing coteau or scarp. Horizontal strata and peneplanation make for slight relief of the level to rolling type. Five fairly well-developed topographic divisions mark out the Cordilleran region of western Canada. These are: (1) coastal ranges, largely above 5,000 feet with deep fjords and glaciated valleys, (2) the interior plateau, around 3,500 feet and comparatively level, (3) the Selkirk ranges, largely above 5,000 feet, (4) the Rocky Mountains with their chain of 10,000 to 12,000-feet peaks, and (5) the Peace River or Tramontane region with its rolling diversified country. The Arctic Archipelago, with its plateau-like character has an elevation between 500 and 1,000 feet, though in Baffin Land and Ellesmere Island the mountain ranges rise to 8,500 and 9,500 feet. Two tremendous waterway systems, the St. Lawrence and the Mackenzie, providing thousands of miles of water highway, occupy a broad area of lowland with their dominant axis following the edge of the shield.

Climate.—The climate in the eastern and central portions presents greater extremes than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months.

GOVERNMENT

The Constitution of Canada has its source in the British North America Act of 1867 which formed a Dominion, under the name of Canada, of the four provinces: Ontario, Quebec, New Brunswick and Nova Scotia; to this Federation the other Provinces have subsequently been admitted. Under this Act Canada came into being on July 1, 1867 (Canada Day), and under the Statute of Westminster, which received the royal assent on Dec. 11, 1931, Canada and the Provinces were exempted (in common with other self-governing Dominions of the Commonwealth of Nations) from the operation of the Colonial Laws Validity Act, the Statute of Westminster having removed all limitations with regard to the legislative autonomy of the Dominions. Provinces admitted since 1867 are: Manitoba (1870), British Columbia (1871), Prince Edward Island (1873), Alberta and Saskatchewan (1905) and Newfoundland (1949).

The Executive power is vested in a Governor-General appointed by the Sovereign on the advice of the Canadian Ministry, and aided by a Privy Council.

NATIONAL DEFENCE

On Aug. 1, 1964, the Headquarters of the Royal Canadian Navy, the Canadian Army and the Royal Canadian Air Force were integrated to form a single Canadian Forces Headquarters (C.F.H.Q.) under a single Chief of Defence Staff. The role of C.F.H.Q. is to provide military advice to the Minister of National Defence and to control and administer the Canadian Forces.

On February 1, 1968, the total strength of the Canadian Armed Forces was 99,871 made up of the following: Sea Elements, 17,189; Land Elements, 39,277; Air Elements, 43,351.

Navy.—The Royal Canadian Navy has principal commands at Halifax, N.S., and Esquimalt, B.C.

In September, 1965, the R.C.N. had 44 ships in commission, including one light fleet carrier, 26 destroyer escorts, 17 ocean escorts, one mobile repair ship, one fleet replenishment ship, two submarines and one diving depot ship.

Army.—The Canadian Regular Army consists of a field force of four Infantry Brigade Groups, and training, logistic support and headquarters units. One Infantry Brigade Group is stationed in Europe as part of NATO forces. Forces in Canada are organized into four Commands and 11 Military Areas, with Army Headquarters at Ottawa. The Reserves include the Canadian Army (Militia), the Regular Reserve, the Supplementary Reserve, the Canadian Officers' Training Corps, the Cadet Services of Canada and the Reserve Militia.

Air Force.—The Royal Canadian Air Force has the following commands: Air Defence Command, St. Hubert, P.Q.; 1 Air Division, Metz, France; Air Transport Command, Trenton, Ont.; Air Material Command, Rockcliffe, Ont.; Maritime Air Command, Halifax, N.S.; Training Command, Winnipeg, Man. The R.C.A.F. has 26 squadrons in service, 20 being regular and 6 auxiliary.

EDUCATION AND LANGUAGE

Education is under the control of the Provincial Governments, the cost of the publicly controlled schools being met by local taxation, aided by provincial grants. There were (1966-67) 18,911 publicly controlled schools with 5,044,067 pupils. In addition there were 189,837 pupils in 1,300 private elementary, secondary and commercial schools. There are special schools for Indians with 32,290 pupils (1966-67). In 1966-67, there were 386 universities and colleges with a full-time university grade enrolment of 232,672. Sixty-two of the total were degree-granting institutions.

Canada has two official languages, English and French. At the 1961 census 67·4 per cent. of the total population gave English and 19·1 per cent. gave French as their native tongue. Some 2,231,172 (or 12·2 per cent.) are bilingual.

CANADIAN PRODUCTION

Agriculture.—About 33 per cent. of the total land area of Canada is classified as farm land and approximately half of this is under cultivation, the remainder being woodland or suitable only for grazing purposes. Three-quarters of the land at present cultivated is found in the prairie region of Western Canada. The cash benefits for the sale of farm products in 1965 was \$3,804,095,000. Livestock and poultry contributed \$1,544,712,000; field crops \$1,635,153,000 and dairy products \$556,371,000.

Livestock.—On June 1, 1968, the livestock included 359,800 horses, 12,566,000 cattle, 891,200 sheep, 5,682,000 hogs and 85,793,700 poultry. The total milk production in 1967 was 18,304,000,000 lb.; butter, 335,002,000 lb.; factory cheese, 191,162,000 lb.; concentrated milk products, 759,878,000 lb.; ice cream mix, 28,134,000 gallons.

Fur Production.—There were 2,203 fur farms in Canada in 1966-67 producing 1,825,851 pelts valued at \$22,657,363, mink contributing 99 per cent. of the total. Wild life pelts totalled 3,395,899 with a value of \$12,446,008.

Fisheries.—The total value of the fish marketed in 1965 was \$315,745,000.

Forestry.—About 48 per cent. of the total land area is in forests, with almost 1,000,000 sq. miles capable of producing merchantable timber. The value of forest products in 1965 was: newsprint \$927,800,000; lumber \$749,200,000; paper (other than newsprint) \$462,100,000; pulp (exports only) \$493,000,000.

Minerals.—Canada was, in 1967, the world's greatest producer of nickel and zinc, and ranked second in asbestos, molybdenum sulphur, and uranium. The value of principal minerals produced in 1967 was: crude petroleum (\$886,484,500); copper (\$503,513,408); nickel (\$467,196,178); iron ore (\$455,242,942); zinc (\$314,904,646); natural gas (\$198,228,000); asbestos (\$8,163,011,249); sand and gravel (\$158,129,000); cement (\$146,401,454); gold (\$111,483,225). The total value of mineral production was \$4,403,579,072.

Shipping.—The registered shipping on Dec. 31, 1966, including inland vessels, was 25,735 vessels with gross tonnage 3,550,786.

Canals.—In 1966 the number of vessel passages through 11 Canadian canal systems was 23,466 and the registered net tonnage was 80,137,020. The St. Lawrence Canals and the Welland Canal carried 32,794,817 and 42,758,794, or 94 per cent. of the total.

Civil Aviation.—The number of revenue-producing passengers carried in 1967 (all carriers) was 11,596,102. Revenue cargo 187,092 tons.

Motor Vehicles.—Total motor vehicle registrations numbered 7,035,261 in 1966.

Post.—There were 10,838 post offices on March 31, 1968, and 5,561 rural and urban mail routes serving 670,266 households and businesses. Total postal revenue was \$337,000,000 in the fiscal year 1967-68; total expenditure \$404,200,000.

YUKON TERRITORY

The Yukon Act, 1952, as amended, provides for the administration of the Territory by a Commissioner acting under instructions from time to time given by the Governor in Council or the Minister of Indian Affairs and Northern Development. Legislative powers, analogous to those of a provincial government, are exercised by the Commissioner in Council. The Council comprises seven members elected from electoral districts in the Territory. The area of the Territory is 207,076 square miles with a population (June 1, 1966) of 14,382 (estimated, June 1, 1967, at 15,000). Mining is the chief industry, though trapping remains important and there is considerable timber production. Mining production, including silver, lead, gold and zinc, was valued at \$14,700,071 in 1967.

SEAT OF GOVERNMENT.—Whitehorse. Pop. (1966) 4,771.

Commissioner., J. Smith.
Administrator., F. B. Finland.

NORTHWEST TERRITORIES

Area 1,304,903 square miles; population (estimated, June 1, 1968) 31,000.

The Northwest Territories are subdivided into the districts of Mackenzie, Keewatin and Franklin.

The chief industry of the Northwest Territories is mining, with a total value of \$115,071,438 in 1967. Zinc and lead contributed 83 per cent. of the total. Gold, tungsten and silver are the next most valuable minerals.

SEAT OF GOVERNMENT.—On May 1, 1967, the territorial government was moved from Ottawa to Yellowknife, and all meetings of the Council are held there.

Commissioner., S. M. Hodgson.

The present representation of parties is 55 Social Credit Party, 6 Progressive Conservatives, 3 Liberals and 1 Independent.

Production.—The mining, manufacturing and construction industries have increased in economic impact so much more forcibly, that agriculture is no longer of prime importance in Alberta.

The net value of production by industries (estimated 1967) is: mining \$870,000,000; manufacturing \$565,000,000; construction \$703,100,000; agriculture \$575,000,000; electric power \$80,000,000; forestry \$7,000,000; trapping \$1,800,000; fisheries \$800,000. Total \$2,802,600,000.

Mining (1967 estimates):—Crude oil \$613,241,500; natural gas \$162,031,000; natural gas by-products \$102,305,000; sulphur \$66,600,000; cement \$17,910,266; coal \$12,200,000.

Manufacturing.—The gross value of output in 1966 was \$1,430,200,000. Number of industrial establishments 1,800, total employees 46,000, salaries and wages \$227,000,000. The leading industries are meat packing, oil refining, dairy and poultry products, iron and steel products, industrial chemicals and plastics, flour and feed milling, timber products, pulp and paper mills, printing and publishing, and brewing and distilling.

Finance.—Net Funded Debt, Mar. 31, 1967, \$12,608,799. Revenue \$609,177,488. Expenditure \$539,554,344.

Finances.—Estimated current Revenue for 1968-69, \$700,000,000. Estimated current Expenditure, including all capital expenditure, \$866,000,000. There is no direct debt.

Production and Industry.—The production levels of the four leading industries were estimated for 1967 as follows: forestry \$1,000,000,000; minerals, \$392,800,000; agriculture, \$191,500,000; fisheries, \$98,000,000. Manufacturing activity is based largely on the processing of products of the four main basic industries. The principal manufacturing centres are Vancouver, New Westminster, Victoria, North Vancouver and Port Moody. Forestry and forest-based industries form the most important

economic activity, accounting for approximately 35 per cent. of total production. British Columbia is the leading province of Canada in the quantity and value of its timber and sawmill products. Mining, the second most important economic activity, is based on copper, zinc, lead, molybdenum, natural gas and iron concentrates. Molybdenum production is approximately 83 per cent. of the Canadian total. The most important agricultural products are livestock, poultry, fruits and dairy products. Salmon accounts for approximately 70 per cent. of the value of fisheries. Other species include halibut, herring, soles, cod, and crab. The climate is healthy, quite moderate on the coast and continental east of the coast mountains. The economy is dependent upon markets outside the province for the disposal of most of the products of her industry. Canadian markets receive lumber, plywood, canned salmon, zinc and fruit. World markets receive lumber, newsprint, woodpulp, aluminium, zinc, canned salmon, lead and fruit.

Transport.—The province has deep water harbours which are well serviced by railways and modern paved highways. Vancouver is the base for regular scheduled air routes to other parts of Canada, the United States, Europe, Mexico, South America, Hawaii, Australia, and Japan.

Principal Cities.—**CAPITAL,** VICTORIA. Metropolitan population (1966 census) 173,455. **Vancouver** (founded in 1886), the largest city in the Province, metropolitan population (1966 census) 892,286, is the western terminus of the C.P.R. and the C.N.R. (the C.N.R. also has a terminus at Prince Rupert) and the southern terminus of the P.G.E., and possesses one of the finest natural harbours in the world. Other towns and cities are New Westminster (38,013), Chilliwack (28,681), Prince George (24,471) and Kelowna (17,006).

MANITOBA

Area and Population.—Manitoba, originally the Red River settlement, is the central province of Canada. The Province has a considerable area of prairie land but is also a land of wide diversity combining 400 miles of sea-coast, large lakes and rivers covering an area of 39,225 square miles and Cambrian rock which covers about three-fifths of the Province. The total area is 251,000 square miles with a population, estimated, 1967, of 662,000.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 12 Ministers, who are members of the Legislative Assembly of 57 members. Each member of the Legislative Assembly receives an annual sessional indemnity of \$7,200.

Finances.—The revenues of the provincial government for the year ended March 31, 1966, were \$210,709,000, and the expenditure \$195,442,000.

Agriculture and Live Stock. —The total land area in Manitoba is 135,536,000 acres, of which 9,004,000 acres were under field crops in 1966. The gross value of agricultural production in 1966 was estimated at \$511,000,000, of which field crops represented \$340,000,000. Farm animals in 1966 numbered 1,089,000 cattle, 480,000 pigs, 47,000 sheep, 34,000 horses and 5,940,000 poultry.
--

Manufactures. —The gross value of manufactured products in 1966 was estimated at \$947,000,000. Manufacturing enterprises employed about 48,500 persons. The chief industrial centres are Winnipeg, St. Boniface, St. James, Brandon and Selkirk. The largest manufacturing industry is the food and beverage industry, followed by iron and steel products. Petroleum has grown into one of the most important industries in Manitoba.
--

Principal Cities. — CAPITAL, WINNIPEG, population (estimated, 1966), 254,937 (Greater Winnipeg, 509,000). Other centres are Brandon (29,570) and Portage La Prairie (12,784).

NEW BRUNSWICK

Area and Population. —NEW BRUNSWICK is situated between 45°–48° N. lat. and 63° 47'–69° W. long. and comprises an area of 27,085 square miles with an estimated population (Oct., 1967) of 623,000. It was first colonized by British subjects in 1761, and in 1783 by inhabitants of New England, who had been dispossessed of their property in consequence of their loyalty to the British Crown.

Government. —The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 58 members elected by the people. At the General Election of October 23, 1967, 32 Liberal and 26 Conservative members were returned.

Finance.—The estimated revenue for the year ending March 31, 1969 is \$308,953,629 and the ordinary expenditure \$322,047,299.

Agriculture and Live Stock.—The total land area is 17,582,720 acres. Settlement is encouraged and improved farms are obtainable at reasonable rates. The chief commercial fish are lobsters, sardines, herring, cod and salmon.

Manufactures.—The principal manufacturing centre is Saint John. Extensive copper, lead and zinc deposits are being developed in Restigouche County. Coal is found, also silver, antimony, manganese, and other minerals.

Principal Cities.—CAPITAL Ψ Fredericton: population (1966), 22,460. Ψ Saint John (pop. 91,198) is one of the principal winter ports of Canada and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (45,847); Bathurst (15,256); Edmundston (12,517); Campbellton (10,175).

NEWFOUNDLAND

Area and Population.—The Island of Newfoundland is situated between $46^{\circ} 37' - 51^{\circ} 37'$ N. latitude and $52^{\circ} 44' - 59^{\circ} 30'$ W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle on the N.W. and by Cabot Strait on the S.W. The island is about 317 miles long and 316 miles broad and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.) and Cape Ray (S.W.) at the angles. It comprises an area of 156,185 sq. miles (inclusive of Labrador) with a population (June, 1967) of 500,000.

Government.—On March 31, 1949, the island, with its dependency of Labrador, became the 10th Province of the Dominion of Canada. The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 42 members.

The Legislature.

A General Election was held on Sept. 8, 1966.

The present state of parties is: Liberal, 39; Progressive Conservative, 3.

Speaker of the House of Assembly, Hon. G. W. Clarke.

Finance.—The estimated net general revenue in 1966-67 was \$121,536,000 and the net general expenditure \$142,790,000.

Production and Industry.—With the exception of Gander, Bishop's Falls, Badger, Millertown, Buchans, Howley, Deer Lake and that portion of the West Coast between St. George's and Port aux Basques the inhabitants are chiefly located on the coast-line of the shore and bays. In 1965 there were fourteen mines in operation, of which five were iron, five base metal and four non-metallic mineral mines. There were also eight establishments mining structural materials such as sand and gravel, stone, cement and clay. Five pulp and paper mills are in operation. The value in 1966 of mineral products was \$242,000,000, including iron ore, \$182,000,000. Copper, zinc and asbestos contributed \$37,000,000.

Railways.—The main line of the railway extends from St. John's on the east coast to Port aux Basques on the west coast—a distance of 547 miles—with branches connecting with the ports of Argentia, Carbonear, Bonavista and Lewisporte, a total mileage of 705. There are also 230 miles of private line. Communication between various points on the coast and between Port aux Basques and North Sydney, Nova Scotia, is maintained by a fleet of 20 motor vessels and 5 steam vessels, operated by the Newfoundland Railway.

Principal Cities.—The Capital, Ψ St. John's (population, 1966 Census, Greater St. John's 90,838), contains two cathedrals, several banks and numerous public buildings. The second city of Newfoundland is Corner Brook (27,116). Other centres are Wabana (7,884), Gander (7,183) and Carbonear (4,584).

LABRADOR

Labrador, the most northerly district in the Province of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, at the north-east entrance to the Straits of Belle Isle, on the south, to Cape Chidley, at the eastern entrance to Hudson's Straits on the north. The territory under the jurisdiction of Newfoundland has an area estimated at 112,826 square miles, with a population (1966) of 21,157. Labrador is noted for its cod fisheries. It also possesses valuable salmon, herring, trout and seal fisheries, and large water power resources.

NOVA SCOTIA

Area and Population.—NOVA SCOTIA is a peninsula between $43^{\circ} 25' - 47^{\circ}$ N. lat and $59^{\circ} 40' - 66^{\circ} 25'$ W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,068 square miles (325 miles of which consists of lakes, rivers and inlets of the sea); total population (1967 estimate), 763,000.

Finance.—The revenue in 1966-67 was estimated at \$162,88,810 and the expenditure \$154,28,360; the funded debt (March 31, 1967) was \$454,210,000.

Agriculture and Live Stock.—According to the 1966 census Nova Scotia has a total land area of 13,275,000 acres, of which 1,851,895 acres are held as farm land. At the same census, the total number of occupied farms was listed at 9,621. Of the total area in farm land, 314,143 acres are devoted to the production of principal field crops.

The Annapolis Valley section of Nova Scotia is famous for its fruit production, with an average crop of 3,000,000 bushels annually.

The number of live stock is estimated (1968) as follows: horses, 5,500; cattle and calves, 146,000; sheep and lambs, 38,000; hogs, 65,000; poultry, 2,793,000.

Manufactures.—The value of manufacturing shipments in 1967 exceeded \$598,155,000. Petroleum refining, fish products, primary steel, pulp and paper mills, and shipbuilding are the major industries in terms of output. The principal industrial centres are Sydney, Halifax, Trenton, Amherst, Truro and Yarmouth.

Fisheries.—The total landed value of the fisheries in 1967 was \$48,638,000, including lobsters, \$10,903,000; scallops, \$7,483,000; cod, \$6,295,000; haddock, \$6,353,000; and swordfish, \$3,293,000.

Minerals.—3,738,487 tons of coal were produced in 1967. Gypsum production was 3,599,240 tons, barite totalled 169,423 tons, salt output was 477,389 tons, anhydrite 252,646 tons and limestone 435,575 tons. Silver production exceeded 550,000 oz.; production of lead was 3,175,000 lbs. and of zinc 2,089,000 lb. Cement production began in 1965 and reached 210,000 tons in 1966. Metallurgical grade limestone and dolomite totalled 530,000 tons and salt production reached a record of 494,000

tons. Preliminary figures show the total value of mineral output at just over \$79,000,000 in 1967.

Principal Cities.—CAPITAL, Ψ HALIFAX, population of Metropolitan area (1966) 198,193, one of the terminals of the Canadian National Railway, with a magnificent harbour, one of the principal winter ports of Canada, and the entrepôt of a large trade with the West Indies, South America and Europe. One of the largest bridges in the British Commonwealth spans the harbour and connects the city of Dartmouth and surrounding area with the city of Halifax. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries; other cities and towns are Sydney, Glace Bay and New Waterford (see below), Truro (13,226), Amherst (10,551), New Glasgow (10,489) and Yarmouth (8,319).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, was incorporated with Nova Scotia in 1819. It contains an area of 3,975 sq. miles, population (1966) 166,943. The chief city, Sydney (pop. 33,007), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the third largest steel works in Canada. Glace Bay and New Waterford, also coal mining centres, have populations of 23,516 and 9,725 respectively. The Canadian National Railway provides service to the island. A large rail-highway causeway joins the island to the mainland.

ONTARIO

Area and Population.—The Province of Ontario contains a total area of 412,582 sq. miles, with a population (estimated 1967) of 7,115,000.

Government.—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 117 members elected for five years. The state of the parties in July, 1968, was 69 Progressive Conservatives, 28 Liberals, and 20 New Democratic Party.

Finance.—The estimated Net Ordinary Revenue of the Ontario Government for 1967-68 was \$2,112,399,000 and the estimated Net Ordinary Expenditure was \$2,334,482,000. The estimated Net Capital Debt was \$1,538,331,000 on March 31, 1968.

Live Stock.—In 1966 the numbers of live stock included—horses, 75,355; cattle, 3,136,956; sheep and lambs, 265,396; swine, 1,935,595, and poultry, 29,549,639.

Forestry.—Productive forested lands comprise 105,262,000 acres or about 40 per cent. of the land of the Province. Pulp and paper is one of the most important manufacturing industries.

Manufacture and Minerals.—Ontario is the chief manufacturing province of Canada and leads the other Provinces in mineral production.

CAPITAL.—Ψ Toronto (population at the 1966 Census: Metropolitan area, 2,158,496; municipal area, 1,881,691), with extensive shipping interests on the Great Lakes, and the chief centre of Ontario. Other towns are: Ottawa, the national capital (494,535); Ψ Hamilton, the "Birmingham of Canada" (449,116); Ψ Windsor, connected by bridge and tunnel with Detroit, Mich., U.S.A. (211,697); London (207,396); Kitchener (192,275); and Sudbury (117,075).

FEDERAL CAPITAL

OTTAWA, the Federal Capital, 111 miles west of Montreal and 247 miles north-east of Toronto, is a city on the south bank of the Ottawa river. The city was chosen as the Capital of the Province of Canada in 1857 and was later selected as the site of the Dominion capital. Ottawa contains the Parliamentary Buildings, the Public Archives, Royal Mint, National Museum, National Art Gallery and the Dominion Observatory. Manufacturing is also carried on, food production, printing and publishing being of greatest importance. Ottawa is connected with Lake Ontario by the Rideau Canal. The population of the Federal Capital was 290,741 at the Census of 1966 and of Metropolitan Ottawa, 494,535.

PRINCE EDWARD ISLAND

Area and Population.—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (estimated, 1967) 210,000.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and Legislative Assembly of 32 members elected by the people, 16 as Councillors and 16 as Assemblymen.

Finance.—The revenue for the year 1966–67 was \$1,899,560,148; ordinary expenditure amounted to \$1,838,172,993. The funded debt (March 31, 1967) was \$1,064,518,110.

Production and Industry.—The principal manufacturing centres are Montreal, Montreal East, Quebec, Trois-Rivières, Sherbrooke, Shawinigan Falls, Drummondville and Lachine. Forest lands cover 378,125 sq. miles, of which 220,625 sq. miles are productive, 137,578 sq. miles with merchantable softwood, mixed wood and hardwood, and 81,457 sq. miles with young growth. 1967 forest production included: wood pulp, 1,278,000 tons; paper and paperboard, 1,289,000 tons; pulpwood, 6,863,000 cunits (100 cu. ft. of solid wood).

Total value of shipments in the manufacturing industries in 1967 was \$10,249,000,000. Value of 1965 shipments in the chief industries: Food and beverages, \$1,730,140,000; Paper and allied industries, \$1,024,404,000; Primary metal industries, \$1,197,561,000; Textiles, \$714,850,000; Clothing, \$687,802,000.

Agriculture and Fisheries.—In 1967 total farm receipts were: Crops, \$58,900,000; Livestock and livestock products, \$511,400,000; Other farm receipts, \$63,900,000. 1,904,017 cwt. of fish to the value of \$7,299,300 were landed in 1967.

Mineral Production.—Minerals to the value of \$736,033,010 were mined during 1967, the chief minerals being: copper, \$151,355,859; iron ore, \$135,474,839; zinc, \$70,404,291; gold, \$31,625,893; asbestos, \$138,828,849.

Miscellaneous Statistics.—1,733,256 motor vehicles were registered in 1966, including 1,126,219 passenger vehicles. Quebec has 16 television and 57 radio broadcasting stations and 14 newspapers are published in the Province. Telephones in use in 1966 numbered 2,173,000. The average annual income per head in 1967 was estimated at \$2,000. Total personal incomes, \$11,740,000,000.

Principal Cities.—CAPITAL, Ψ Quebec (population, estimated, 1967, 164,190), historic city visited annually by thousands of tourists, and one of the great seaport towns of Canada; and Ψ Montreal (population, 1,435,000), the commercial metropolis, and the principal centre of the Canadian grain export trade, founded by the French at the confluence of the Ottawa and St. Lawrence Rivers, May 16, 1642. Other important cities are Laval (206,000); Verdun (88,928); Sherbrooke (76,284); Hull (60,385); and Trois Rivières (58,128).

SASKATCHEWAN

Area and Population.—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west and has an area of 251,100 square miles (of which the land area is 220,182 sq. miles), with a population (1967 estimate) of 955,000. Saskatchewan extends along the Canada-U.S.A. boundary for 393 miles and northwards for 761 miles. Its northern width is 276 miles.

Government.—The Government is vested in the Lieutenant-Governor, with a Legislative Assembly of 59 members. There is an Executive Council of 12 members. The Legislative Assembly is elected

for 5 years and the state of the parties in June, 1968 was: Liberals, 35; N.D.P., 24.

PHYSICAL FEATURES

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the mainland is 2,941,526 square miles, the island of Tasmania having an area of 26,383 square miles, and making a total area for the Commonwealth of 2,967,909 square miles. The coast-line of Australia is approximately 12,446 miles (including Tasmania, 900 miles), and its geographical position is between $10^{\circ} 41' - 39^{\circ} 8'$ ($43^{\circ} 39'$, including Tasmania) South latitude and $113^{\circ} 9' - 153^{\circ} 39'$ East longitude; the greatest length East to West is 2,500 miles, and from North to South 2,000 miles. Its nearest distance from England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of more than 7,300 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the continent; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, Flinders, and Mitchell, which debouch into the Gulf of Carpentaria.

The scarcity of the natural water supply in the interior has, however, been mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. A major development work in progress is the use of the waters of the Snowy River in south-eastern New South Wales for hydro-electricity generation and irrigation. Minerals comprise bauxite, coal, copper, gold, gypsum, iron, lead, limestone, mineral sand, pyrite, silver, uranium, and zinc in large quantities, antimony, asbestos, barite, beryllium, chromite, dolomite, felspar, magnesite, manganese, mica, salt, silica-talc, tantalite-columbite, tin, tungsten, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested. Two small commercial oilfields have been discovered, and one is already in production. Several natural gas deposits have been found (in Queensland, Western Australia, Northern Territory, South Australia and off the coast of Victoria) and commercial development of some of them is under consideration. Large iron ore deposits are being developed in the north of Western Australia.

Climate.—The seasons are: summer, December to February; autumn, March to May; winter, June to August, spring, September to November. Australia is less subject to extremes of climate than are regions of similar size in low parts of the world, though the climate varies considerably from the tropical to the alpine.

GOVERNMENT

The Commonwealth of Australia was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. The Government is that of a Federal Commonwealth within the British Commonwealth of Nations, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of twenty-six Ministers of State. Under the Constitution the Federal Government has acquired and may acquire certain defined powers surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control, immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Federal Government also controls such matters as social services, patents and copyright, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connection with matters exclusively under Federal control, but where a State law is inconsistent with law of the Commonwealth the latter prevails to the extent of the inconsistency.

FLAG.—Blue ground, with Union Jack in top corner of hoist above large seven pointed star; Southern Constellation on fly. **AUSTRALIA DAY.**—January 26.

THE LEGISLATURE

The Parliament of the Commonwealth of Australia consists of the Queen, ■ Senate and a House of Representatives. The Constitution provides that the number of members of the House of Representatives shall be, as nearly as practicable, twice the number of Senators. An Act, assented to on May 18, 1948, provided for an increase in the number of members of the Senate from thirty-six to sixty, and as a result the number of members of the House of Representatives was increased from 74 to 123. There are now 124 members in the House of Representatives, including one member each for the Northern Territory and the Australian Capital Territory. Members of the Senate are elected for six years by universal suffrage, half the members retiring every third year and each of the six States returning an equal number.

The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of five members for each State. The present state of parties in the House of Representatives is Liberal 60, Country Party 21, Labour 42 and Independent 1. Members of both Houses receive \$A7,000 per annum, with allowances and free air and rail travel on parliamentary business.

DEFENCE

Subject to the authority of Cabinet the Minister and Department of Defence are responsible for the formulation and general application of a unified defence policy relating to the Defence Forces and their requirements. Separate Ministers and Departments of the Navy, Army and Air are responsible for the administration of their respective Services in accordance with defence policy. The Minister and Department of Supply are responsible for the supply, manufacture and overhaul of services and goods, including munitions, for the Defence Forces and for defence research and development, in accordance with approved policy.

Royal Australian Navy

Under the Naval Defence Acts, 1910-68, the naval forces of the Commonwealth are administered by ■ Naval Board of Administration responsible to the Minister of State for the Navy.

The Royal Australian Navy consists of an aircraft carrier, a fast troop transport, ■ destroyers, 4 escort ships, ■ submarines, a destroyer tender, a fleet tanker,

10 patrol boats, a survey ship, an escort ship ■ oceanographic duties, a destroyer and ■ escort ship employed as training ships, and support craft. In addition, a submarine is on loan from the Royal Navy for anti-submarine training. In reserve there are 4 destroyers and frigates and several support craft.

Two submarines are being built in the United Kingdom; 2 escort ships and 10 patrol boats in Australia.

The strength of the Royal Australian Navy on June 30, 1968 was 1,814 officers and 14,640 sailors.

Army

Under the Minister for the Army, the Military Board is charged with the control and administration of all matters relating to the Australian Military Forces. Command and control is exercised through the framework of Army Headquarters and Commands geographically related to States—Northern Command, Eastern Command, Southern Command, Central Command, Western Command, Tasmania Command, Northern Territory Command and Papua and New Guinea Command.

Since 1957, the basis of the readiness of the Army has been with emphasis on South-East Asia ■ area of primary strategic importance to Australia. The strength of the Regular Army, including National Servicemen, was approximately 43,000 at the end of May 1968. The field force organization has been expanded with emphasis on a substantial increase in the combat element and high priority logistic units. The aim has been to give greater flexibility in deployment to meet the present requirement for "cold" and limited warfare with light, airportable formations.

Compulsory selective service to increase the numbers in the Regular Army applies to young men in their 20th year. The number inducted ■ present is 8,400 a year. Recruits serve two years full time, followed by three years in the Reserve. They are liable for overseas service.

A volunteer Regular Army Emergency Reserve of approximately 1,000 former Regular Army members has been formed and can be called out when the Governor-General considers it desirable.

The strength of the Citizen Military Forces has been increased to approximately 35,700 and the strength of the Army cadets to 43,352. In addition, the Pacific Islands Regiment has two battalions and supporting units; total strength, about 2,300.

Air

The total strength of the R.A.A.F. on June 30, 1968, was 21,564. There were 17 flying squadrons, one surface to air missile squadron, 4 maintenance squadrons, 18 training units, 3 aircraft depots, one airfield construction squadron, 2 control and reporting units, 5 auxiliary squadrons, 6 university squadrons and 7 A.T.C. squadrons. Six flying squadrons, one maintenance squadron and supporting personnel were serving outside Australia in the South-East Asian theatre.

The Debt per head of population at Dec. 31, 1967, was \$A1,002.80.

SOCIAL SECURITY BENEFITS

Age and Invalid Pensions and allowances (maximum weekly rates—subject to a means test):—

(a) Standard Rate—payable to a single, widowed or divorced pensioner, a married man whose wife receives a wife's allowance or a married pensioner whose spouse is not receiving a pension, benefit or tuberculosis allowance, \$A13.

(b) Married Rate—married couple, both pensioners, \$A11.75 each. For a married person whose spouse is receiving a benefit, tuberculosis allowance or a Service pension the rate is also \$A11.75.

(c) Allowances—Wife's allowance, \$A6; guardian's allowance, \$A4; supplementary allowance (available for standard rate pensioners who pay rent or pay for board and lodging or for lodgings), \$A2. A child's allowance (free of means test) is payable for the first dependent child of a pensioner and additional pension (subject to means test) for each other dependent child. Dependent child means a child under 16 years or a full-time student child aged 16 to 21 years if wholly or substantially dependent on the pensioner. The maximum rate of allowance or additional pension is \$A1.50 for each eligible child.

Widows' Pensions (maximum weekly rates) (subject to a means test).—"A" class widows (having one or more children)—\$A17 (incl. \$A4 mother's allowance) plus \$A1.50 for each child under 16 years or until 21 years if it is receiving full-time education; "B" class widows (not less than 50 years of age, without dependent children, or on reaching the age of 45 years having had dependent children) \$A11.75; "C" class widows (under 50 years, without children, but in necessitous circumstances within the 26 weeks following their husbands' deaths) \$A11.75. Supplementary assistance of \$2 a week is also payable to a widow pensioner who pays rent, or pays for board and lodging or for lodgings.

Maternity Allowance.—Where there are no other children under 16 years, \$A30, where there are one or two other children, \$A32; where there are three or more children, \$A35. An extra \$A10 is paid for each additional child in multiple births.

Child Endowment.—For children under 16 years in a family—\$A0.50 for the first child; \$A1.00 for the second child; \$A1.50 for the third child; and then increasing by cumulative amounts of 25 cents, making \$A1.75 for the fourth child, \$A2.00 for the fifth child and so on. For each full-time student child, aged 16 to 21 years, in a family the rate is \$A1.50. \$A1.50 is also payable for each child under 16 years or eligible student child in an approved Institution.

Unemployment, Sickness and Special Benefits (subject to a means test)—\$A8.25 per week for a married person or unmarried adult, plus \$A6 for a dependent spouse (or unpaid housekeeper if claimant has one or more dependent children under 16 years and no such benefit is payable for his wife), plus \$A1.50 for each child under 16 years. For unmarried persons aged 16 and 17 years the rate is \$A3.50 and from 18 to 20 years, \$A4.75.

Hospital Benefits.—Insured patients in approved hospitals, \$A2 a day; eligible pensioners and their

dependents in public wards of public hospitals, \$A5 a day.

Uninsured patients, in approved hospitals, other than pensioners, \$A0.80 a day; a benefit of \$A2 a day is payable for a patient in an approved nursing home whether or not he is a member of a hospital insurance organization.

Tuberculosis Benefits (subject to a means test).—Single person, \$A16.25 per week, or \$A13 a week if receiving free hospital treatment; married person with dependent spouse, \$A26.75 a week plus \$A1.50 for each dependent child.

In 1966-67 Australia produced 1,763,142,000 lb. of wool (as in the grease), estimated value, \$A812,230,000; 218,446 tons of butter; 68,716 tons of cheese; and 49,868 tons (cured weight) of bacon and hams. The total meat production (beef, veal, mutton, lamb and pig meat) in terms of fresh meat was 1,591,162 tons.

Mines and Minerals.—In 1967 the mine production of gold was 799,538 fine oz. and of black coal 34,799,480 tons. Smelter and refinery production of principal metals in 1967 was: pig iron, 4,977,334 tons; ingot steel, 6,188,784 tons; copper (refined), 66,030 tons; blister copper, 73,329 tons; lead (incl. bullion), 290,956 tons; tin, 3,594 tons; zinc, 194,472 tons; silver, 9,770,954 fine oz. Value of output of all mining and quarrying in 1966, \$A625,718,000.

Manufactures.—In 1966-67 there were in Australia 62,501 industrial establishments, employing 1,309,458 persons; wages paid amounted to \$Am. 3,408.1; value of plant and machinery \$Am. 4,709.1; land and buildings \$Am. 4,064.5; of materials, fuel, etc., used \$Am. 9,026.0; value added by manufacture \$Am. 6,888.2; and value of total output \$Am. 15,913.3.

Trade Unions.—In 1967 there were 324 separate trade unions in Australia with a total membership of 2,151,300.

The Trans-Australian (Government) Railway, 4 ft. 8½ in. gauge, connects Kalgoorlie, W.A., with Port Pirie, S.A. (1,108 miles) and so forms a link (including Kalgoorlie–Perth 372 miles) between Perth and Brisbane, Q., ■ total length of 3,314 miles.

The gross earnings of all Government lines in 1966-67 were \$A509,920,000, working expenses \$A478,921,000, and net earnings \$A31,000,000. In 1966-67 passenger journeys numbered 454,735,000 and 68,484,000 tons of goods and livestock were carried. There are 234 miles of electrified line in New South Wales and 263 miles in Victoria.

Tramways, Trolley-buses and Omnibuses.—The total route mileage on June 30, 1967, under Government and semi-Government control was 222 for trams, 65 for trolley-buses and 6,329 for omnibuses.

Shipping.—The entrances and clearances (one entrance and one clearance per voyage, irrespective of the number of ports visited) of vessels engaged in overseas trade at the various Australian ports in 1966-67 were: entered 3,934 (27,271,387 tons); cleared 3,970 (27,411,353 tons).

The total, including local shipping, entering the ports of the capital cities during 1966-67 was: Sydney 3,792 vessels of 14,242,192 tons, Melbourne 2,970 (12,317,890), Brisbane 1,466 (6,621,006), Adelaide 1,926 (5,472,731), Fremantle 1,172 (6,310,144) and Hobart 559 (1,572,364). At June 30, 1967, the Australian trading fleet of vessels 200 tons gross and over comprised 146 vessels with a

total 822,487 tons gross. Of these, 131 vessels totalling 722,442 tons gross were coastal trading vessels.

Posts and Telegraphs.—In the year ended June 30, 1967, there were 7,658 post offices dealing with 2,232,881,000 letters, 417,980,000 packets and newspapers, 13,097,000 registered articles and 10,196,000 parcels. 21,372,000 internal telegrams were despatched and 4,187,000 international telegrams received and despatched. At June 30, 1967, there were 6,519 telephone exchanges with 2,234,703 services and 3,178,278 instruments.

Broadcasting and Television.—On June 30, 1967, the Australian Broadcasting Commission operated 85 stations, including 17 short-wave stations in Australia. Privately owned commercial broadcasting stations totalled 111. On June 30, 1967, there were in force in Australia 2,538,040 listeners' licences, including 1,988,326 combined broadcast and television receiving licences. On June 30, 1967, 79 television stations were in operation, 23 in the various State capitals (including Canberra), and 56 in country areas. Television licences in force at June 30, 1967, numbered 2,405,135 (including combined licences, ■ above).

Motor Vehicles.—At June 30, 1967, there were 4,106,632 motor vehicles registered in Australia. These comprised 3,140,485 cars and station wagons, 73,454 motor cycles, and 892,693 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1966-67 was \$174,856,000.

Civil Aviation.—At June 30, 1967, there were 484 recognized landing grounds, including 377 licensed public aerodromes, in the various States and Territories, and 13 flying boat bases and alighting areas. Aircraft on the Australian Register at June 30, 1967, numbered 2,970. Mileage flown on regular internal air services in 1966-67 was 56,759,000 and on overseas services owned by Australia, 29,261,000.

CAPITAL

CANBERRA, the Capital of the Australian Commonwealth, is 203 miles by rail (150 by air) from Sydney, N.S.W. and was acquired in 1911 from the State of N.S.W. for the Australian Capital. The original area was 911 sq. miles, increased in 1917 by the acquisition of 28 sq. miles at Jervis Bay. Canberra contains the Australian (1914-18 and 1939-45) War Memorial, Parliament House, Commonwealth Offices, and the Australian National University, and is connected with the N.S.W. railway system by a line (5 miles) to Queanbeyan and by good roads to Melbourne and Sydney. Frequent air services also link it with the State capitals. The population of Canberra city district at June 30, 1967, was 100,938. Total population of the Australian Capital Territory at June 30, 1967, was 193,592.

THE NORTHERN TERRITORY

The Northern Territory has a total area of 520,280 square miles, and lies between 129°-138° East longitude and 11°-26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia. The headquarters of the Administrator are at Darwin. Under the provisions of the Northern Territory (Administration) Act a Legislative Council has been established. The Council, which has power to make ordinances for the peace, order and good government of the Territory consists of six official members, three non-official members and eight elected members. The official and non-official members are appointed by the Governor-General on the recommendation of the Administrator, and the elected members are elected by adult franchise. The Presi-

dent of the Legislative Council is elected by the Council from among the non-official and elected members. Ordinances passed by the Council must be presented to the Administrator who may declare his assent, withhold his assent or reserve the ordinance for the Governor-General's pleasure. The Administrator may return an ordinance to the Legislative Council with recommended amendments; but the ordinance with or without amendments must be again presented to the Administrator for assent. Certain ordinances must be reserved for the Governor-General's pleasure. The Governor-General may return an ordinance with recommended amendments and this ordinance with or without amendments shall again be presented to the Administrator, who shall reserve it for the Governor-General's pleasure. Ordinances assented to by the Administrator may be disallowed by the Governor-General, and the Governor-General may return ordinances to the Administrator with recommended amendments.

The population of the Northern Territory (including aborigines) at Dec. 31, 1967, was estimated to be: males 33,189, females 27,450, total 60,639. The number of aborigines at the Census of 1966 was 21,119.

Beef cattle raising is the chief pastoral activity, and the staple industry of the Territory. On June 30, 1967, there were 1,097,000 cattle, 38,000 horses and 8,000 sheep in the Territory. The northern part of the Territory is capable under improved pastures of carrying successfully and profitably ■ great expansion of the beef cattle industry. Export abattoirs established at Darwin and Katherine in 1963 have created stable markets for pastoralists. A cold store has been constructed in Darwin. Hides and skins exported from the Northern Territory during the year ended June 30, 1966, were ■ follows:—cattle 48,586, sheep 3,500, crocodile 1,752 and buffalo 762.

Agriculture in the Northern Territory hitherto has been confined to small farm settlements in the Darwin, Katherine, Daly River, Alice Springs, Adelaide River and Pine Creek areas. Principal crops grown in the Territory are grain sorghum, vegetables and fruit (pineapples, paw-paws, bananas and citrus). However, extensive experiments are being carried out, particularly in the area between Darwin and Katherine to determine what crops can be successfully grown in the Northern Territory on ■ commercial scale. Experimental work on pastures is also being undertaken.

The mineral industry has always contributed largely to the income of the Northern Territory and the value of mineral production exceeds that of the beef cattle industry. The principal minerals produced are copper, gold, uranium, manganese, iron-hematite, mica and tin. In 1966-67, the total value of minerals produced (excluding uranium) was \$A20,500,000.

Tourism is an important industry and in 1966-67 about 48,000 tourists visited the Territory.

The chief rivers of the Territory are Victoria, Adelaide, Daly, Roper, South Alligator, McArthur, Liverpool, and Goyder. The first six are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. A limited amount of pearl fishing is carried on from Darwin. The mother of pearl shell is of good quality.

The railway extends from Darwin to Larrimah (316 miles) and Alice Springs is connected by rail with Adelaide. A good bitumen road (the Stuart Highway) links Darwin with Alice Springs (956 miles) and another bitumen road, the Barkly Highway, runs from this road near Tennant Creek to Mt. Isa in Queensland (403 miles). The Commonwealth Government's programme for

reconstructing nine other roads (1,600 miles, costing \$28,000,000) in the Northern Territory, to such a standard as will facilitate the movement of beef cattle by large road trains, is already well advanced.

Regular shipping services operate to Darwin from the Eastern States and Western Australia and oversea ships call frequently to discharge general cargoes and petroleum products and to load export cargoes. There is also a service from Brisbane to Gulf of Carpentaria ports. During 1966-67, 275 vessels entered Darwin and 280,521 tons of cargo were handled.

There are regular air services between Darwin and the capital cities and two airlines operate internal services.

Darwin (estimated population of the urban area at the 1966 Census, 20,413) occupies an elevated site 97 ft. above sea level, overlooking Port Darwin. Alice Springs is situated in the MacDonnell Ranges. Climate of the Northern Territory ranges from dry in the south to wet-monsoonal in the north.

Administrator of the Northern Territory (Darwin), R. L. Dean, C.B.E.

TERRITORY OF PAPUA AND NEW GUINEA

The *Papua and New Guinea Act, 1949*, which came into force on July 1, 1949, approved the placing of the Territory of New Guinea under the Trusteeship system of the United Nations and the agreement by which Australia became the sole administering authority. It provides for the Government of the Territory of Papua and the Territory of New Guinea in an Administrative Union.

In 1968 membership of the House of Assembly was increased to 94 members. The number of open electorates was increased to 60 and 15 electorates were created for candidates having prescribed minimum educational qualifications. There are 10 official members appointed by the Governor-General on the nomination of the Administrator.

The House of Assembly elects its own Speaker and ■ Nominations Committee to select 15 elected members as nominees for Ministerial office. The Australian Minister for External Territories, after receiving the recommendation of the Administrator, may then appoint from this list, 7 Ministerial members and ■ Assistant Ministerial Members. The Ministerial Members are responsible in the House for the functions of seven departments within the Administration while the Assistant Ministerial Members have more limited functions. The Ministerial members have seats on the Administrator's Executive Council which also includes 3 official members and an Administrator's nominee from the elected members of the House of Assembly. The Council advises on matters which the Administrator is required by ordinance to refer to it and on any other matters which he may consider appropriate.

The Territory of Papua, which ■ placed under the authority of the Commonwealth of Australia in 1906, comprises the south eastern portion of the island of New Guinea, together with the Trobriands, Woodlark, D'Entrecasteaux and Louisiade groups of islands and is separated from Australia by Torres Strait. The Territory lies wholly within the Tropics, between the 141st and the 155th meridians of east longitude and the 5th and 12th parallels of south latitude. The total area is 86,100 sq. miles, of which 83,325 are ■ the mainland. The non-indigenous population of Papua and New Guinea at June 30, 1967, was 38,082; the indigenous

population was 2,219,444, of whom nearly 900,000 live in the Highlands Districts of the Territory. Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best-known rivers are the Fly (730 miles long, including its tributary, the Strickland, and navigable by vessels with a draught of up to ■ ft. for about 500 miles) and the Purai. The climate is favourable to the cultivation of tropical products.

The Trust Territory includes (1) North-Eastern New Guinea, the northern section of east New Guinea between 2° 35'-8° S. lat., and 142°-148° E. long., with a total area of 69,095 sq. miles. This includes adjacent islands (Manam, Karkar, Long, Bagabag, Schouten and D'Urville or Kairiru Island). The chief centres are Lae, Bulolo, Finschhafen, Wau, Madang, Wewak, Goroka and Mount Hagen; (2) Bismarck Archipelago, including New Britain, New Ireland, and islands adjacent to both; (3) Admiralty Islands (chief town, Lorengau, in Manus Island); and (4) the two northernmost Solomon Islands (Bougainville and Buka with adjacent islands). The estimated area of the islands is 23,065 square miles, making a total ■ for the territory of 92,160 square miles.

The principal river in N.E. New Guinea is the Sepik, 690 miles long, and navigable for about 300 miles by vessels with a draught of up to 13 ft.

The most important road links Lae with the populous and developing highlands. This road is being upgraded and improvements have been completed to Goroka. Other major roads are between Lae and Wau and Oro Bay (being extended beyond Kokoda), and in the hinterlands of Port Moresby, Rabaul, Madang and Wewak.

Trans-Australian Airlines and Ansett-A.N.A. operate regular air services from Australia to Port Moresby. Internal scheduled and charter services are provided by T.A.A., Ansett Mandated Airlines, Papuan Air Lines and other companies. There are regular services to the British Solomon Islands and to West Irian. Qantas calls at Port Moresby on its Far East Service between Australia and Manila.

Several shipping companies operate regular cargo and passenger services between the Territory and Australia, Europe and the Far East. In 1966-67 oversea shipping entries at the eight main Territory ports totalled 1,617 ships, and over a million tons of cargo were handled through these ports.

The climate is hot and moist along the coast, becoming cooler and drier as the higher altitudes are reached. It is suitable for the growth of all tropical products. At present the main products are copra, coffee, cocoa, rubber and timber; tea, oil palm and pyrethrum are expected to increase in importance (particularly plywood), the mining of gold has declined considerably, but copper mines are being established on Bougainville and are expected to provide one of the largest sources of income for the Territory.

SEAT OF ADMINISTRATION.—Administrative Headquarters of the Territory of Papua and New Guinea is Port Moresby, the principal port and town of Papua (non-indigenous population, June 30, 1966 (preliminary census figures), 9,912). Rabaul (in New Britain), is the largest port in the Territory and second town, while Lae (in Morobe District) is the third port and town, being the outlet for the Motobo plywood and gold mining district and for the Highlands region, and one of the principal air centres in the Territory.

Administrator, D. O. Hay, D.S.O.

Port Moresby is 1,800 miles from Sydney.

NORFOLK ISLAND

This island is about 1,035 miles from Sydney and 400 miles north of New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1770. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 53 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The island is a popular tourist resort, and a large proportion of the population depends on tourism and its ancillaries for employment. Population (estimated, June 30, 1967), 1,509.

Seat of Government and Administration Offices, Kingston. The Norfolk Island Council advises the Administrator on policy and the control of public finance.

An airfield was constructed in 1943, and bi-weekly air services operate from Australia and New Zealand.

Administrator, Air Cdr. R. N. Dalkin, D.F.C. (R.A.A.F., ret.).

Deputy Administrator and Official Secretary, J. G. Cowap.

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands were declared British possession in 1857. In 1878 they were placed under the control of the Governor of Ceylon and were later annexed to the Straits Settlements and incorporated with Singapore. On Nov. 23, 1955 their administration was transferred to the Commonwealth of Australia. They are two separate atolls comprising some 27 small coral islands with a total area of about 5½ square miles, situated in the Indian Ocean in latitude 12° 5' South and longitude 96° 53' East. The main islands are West Island (the largest, about 6 miles from north to south) on which are the aerodrome and the administrative centre, and most of the European community; Home Island, the headquarters of the Clunies Ross Estate; Direction Island, on which is situated the Department of Civil Aviation's marine base; and Horsburgh. North Keeling Island, which forms part of the Territory, lies about 15 miles to the north of the group and has no inhabitants. The climate is equable and pleasant, being usually under the influence of the south-east trade winds for about three-quarters of the year. A fortnightly air charter service operates between Perth and the Cocos Islands. The population (June 30, 1967) was 631.

Official Representative, J. R. Burbrook.

CHRISTMAS ISLAND

Until the end of 1957 a part of the then Colony of Singapore. Christmas Island was administered as a separate colony until October 1, 1958, when it became Australian territory by Order in Council. It is situated in the Indian Ocean about 224 miles S. of Java Head and 529 miles E. of the Cocos

(Keeling) Islds. Area, 52 sq. miles. Population (estimated, June 30, 1967), 3,653. The island is densely wooded and contains extensive deposits of phosphate of lime.

Official Representative, Brig. L. D. King, O.B.E., T.D.

THE ANTARCTIC CONTINENT

The area of the Antarctic Continent is estimated at approximately 5 million square miles. The greater part of the coastline has been charted with varying degrees of accuracy, but considerable portions of the interior have not been visited, or at best have been seen only from the air. The question of territorial rights is complicated and there is no general international agreement thereon.

The *Australian Antarctic Territory* was established by an Order in Council, dated February 7, 1933, which placed under the government of the Commonwealth of Australia all the islands and territories, other than Adélie Land, which are situated south of the latitude 60°S. and lying between 160° E. longitude and 45° E. longitude. The Order came into force on August 24, 1936, after the passage of the Australian Antarctic Territory Acceptance Act, 1933. The boundaries of Terre Adélie were definitely fixed by a French Decree of April 1, 1938, as the islands and territories south of 60° S. latitude lying between 136° E. longitude and 142° E. longitude. The Australian Antarctic Territory Act 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable, in force in the Australian Antarctic Territory.

On February 13, 1954, the Australian National Antarctic Research Expeditions (ANARE) established a station on MacRobertson Land at latitude 67° 36' S. and longitude 62° 53' E. The station was named Mawson in honour of the late Sir Douglas Mawson and was the first permanent Australian station to be set up on the Antarctic continent. Meteorological and other scientific research is conducted at Mawson, which is the centre for coastal and inland survey expeditions.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on January 13, 1957, at latitude 68° 35' S. and longitude 77° 59' E. The station was named Davis in honour of the late Captain John King Davis of Melbourne, who commanded a number of famous Antarctic ships. The station was temporarily closed down in January 1965. In February, 1959, the Australian Government accepted from the United States Government custody of Wilkes Station on Vincennes Bay, at latitude 66° 15' S. and longitude 110° 33' E. A new station of advanced design is being constructed close to Wilkes which it will eventually replace. ANARE have also operated a station, since the 1947-48 Antarctic season, at Macquarie Island, approximately 850 miles south-east of Hobart. Macquarie Island is a dependency of the State of Tasmania.

On December 1, 1959, Australia signed the Antarctic Treaty with Argentina, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, the U.S.S.R., the United Kingdom and the United States, Poland, Czechoslovakia and Denmark have subsequently acceded to the Treaty. The Treaty reserves the Antarctic area south of 60° S. latitude for peaceful purposes, provides for international co-operation in scientific investigation and research, and preserves, for the duration of the Treaty, the status quo with regard to territorial sovereignty, rights and claims. The Treaty came into force on June 23, 1961.

For other British dependencies in the Antarctic see New Zealand, p. 735.

STATES OF THE COMMONWEALTH OF AUSTRALIA

NEW SOUTH WALES

The State of New South Wales is situated entirely between the 28th and 38th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 square miles (exclusive of 939 square miles of Australian Commonwealth Territory which lies within its borders).

POPULATION.—The estimated population at December 31, 1967, was: Males, 2,180,721; Females, 2,166,588. Total, 4,347,309.

Births, Deaths and Marriages.

Year	Births	Deaths	Marriages
1964	80,518	39,487	32,633
1965	78,069	38,949	35,176
1966	77,758	40,546	35,575
1967	78,841	39,613	37,077

Vital Statistics.—Annual rate per 1,000 of mean population in 1967:—Births, 18.30; Deaths, 9.19; Marriages, 8.60. Deaths under 1 year per 1,000 live births, 18.41.

Religions.

The members of the Church of England in New South Wales, according to the Census of 1966, number 1,622,066. Roman Catholic (including "Catholic") 1,174,779, Presbyterian 353,084, Methodist 305,733, Congregational 23,017, Baptist 55,774, Orthodox 96,606, Lutheran 30,019, Salvation Army 17,368, and Hebrew 25,913. The religion of 382,447 persons was not stated in the census schedules.

PHYSIOGRAPHY.

Natural features divide the State into four strips of territory extending from north to south, viz., the Coastal Divisions; the Tablelands, which form the Great Dividing Range between the coastal districts and the plains; the Western Slopes of the Dividing Range; and the Western Plains. The highest points are Mounts Kosciusko, 7,328 feet, and Townsend, 7,266 feet. The coastal district is well watered by numerous rivers flowing from the ranges into fertile flats which form their lower basins. The western portion of the State is watered by the rivers of the Murray-Darling system and immense reservoirs have been constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,702 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, part of which forms the boundary between the States of New South Wales and Victoria. Other inland rivers are: Lachlan, Bogan, Macquarie, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is equable and very healthy. At the capital (Sydney) the average mean shade temperature is 64°. The mean (shade) temperature ranges for the various divisions of the State are as follows: coastal, 60° in the south to 69° in the north; northern and central tableland, 53° to 62°; southern tableland, 44° to 57°; and for the rest of the State (western slope, central plains, Riverina and western), 60° in the south to 69° in the north.

GOVERNMENT.

New South Wales was first colonized by a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 Responsible Government was granted, the present Constitution being founded on the Constitution Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

GOVERNOR.

Governor of New South Wales, Sir (Arthur) Roden Cutler, V.C., K.C.M.G., C.B.E., assumed office Jan. 20, 1966 \$A20,000
Lieutenant-Governor, Hon. Sir Kenneth Whistler Street, K.C.M.G. (1950).

THE LEGISLATURE.

The Legislature consists of the Sovereign and the two Houses of Parliament (the Legislative Council and the Legislative Assembly). The Legislative Council consists of 60 members, elected jointly by both Houses of Parliament. Membership is for 12 years, 15 members retiring in rotation triennially. The Legislative Assembly consists of 94 members. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. A provident fund for members of the Legislative Assembly was established in 1946; a pension is payable to those who on ceasing to be members have served in three parliaments. Natural-born or naturalized persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and 1 month in the electoral district are entitled to the franchise. Voting is compulsory. At the State General Elections in February, 1968, there were 2,356,977 persons enrolled. In contested elections 2,218,543 persons (1,081,635 men and 1,136,908 women) voted, representing 94 per cent. of persons enrolled.

EDUCATION.

Education.—Education is compulsory between the ages of 6 and 15 years. It is non-sectarian and free at all state schools. The average weekly enrolment in 1967 in 2,626 state schools was 703,186 and the average daily attendance during the year was 651,433. In addition to the state schools there were, in 1967, 808 private colleges and schools, with an average weekly enrolment of 226,456 scholars, 676 being Roman Catholic schools with 195,094 scholars. The five universities had an enrolment of 36,763 students (21,528 full-time, 11,984 part-time and 3,252 external students) in 1967; 16,378 at Sydney (incorporated 1850), 12,812 at the University of New South Wales (1948), 4,402 at New England (1954), 1,271 at Macquarie (1964) and 1,902 at Newcastle (1965). The State expenditure on Education was \$A256,033,000 in the year 1966-1967. Students attending the State agricultural colleges and farm schools numbered 2,290 in 1967.

FINANCE.

1967	830,685,000	833,832,000

* Excluding the self-balancing Road Transport and Traffic Fund.

The Public Debt of New South Wales at June 30, 1967, was \$A2,666,906,000, of which an amount of \$A254,493,000 was repayable in London (interest \$A11,678,000), \$A69,935,000 was repayable in New York (interest \$A3,659,000), \$A3,602,000 was repayable in Canada (interest \$A207,000), \$A3,233,000 was repayable in Switzerland (interest \$A145,000), \$A2,561,000 was repayable in the Netherlands (interest \$A128,000) and \$A2,333,082,000 was held in Australia, with annual interest bill of \$A12,312,000.

Banking, etc.—There were (April 1968) 12 trading banks with deposits of \$A2,532,039,000. Savings bank deposits amounted to \$A2,066,425,000, representing \$A475 per head of the population. The amount assured in New South Wales in Life Assurance Societies in 1966 was \$A3,358,809,000 ordinary, \$A494,042,000 superannuation and \$A355,926,000 industrial. The membership of Friendly Societies was 134,105, and the funds at June 30, 1966, were \$A24,642,000. Members of Trade Unions at Dec. 31, 1966, numbered 753,649, the funds of 192 Unions being \$A9,000,000. Balances outstanding on Instalment Credit for retail sales on June 30, 1967, were \$A562,400,000.

PRODUCTION AND INDUSTRY.

Value of Production.—In 1966-67 the net value of production of the primary and manufacturing industries was \$A4,101,433,000, primary \$A1,163,206,000, manufacturing \$A2,938,227,000. The values for the principal primary industries were: pastoral \$A351,488,000, agricultural \$A407,909,000, dairy and farmyard \$A143,053,000, and mining and quarrying (1966) \$A216,904,000.

Agriculture.—During the year to Mar. 31, 1967, 12,045,000 acres were under cultivation.

The total area under wheat was 7,382,914 acres, of which 7,135,046 acres were harvested for grain, and 102,740 acres for hay. The production of wheat was 202,501,000 bushels of grain and 163,028 tons of hay. Other important crops in 1966-67 were 2,471,000 bushels of maize, 41,003,000 bushels of oats, 210,939 tons of rice, besides other kinds of grain, 126,183 tons of potatoes, and 19,046 cwt. of dried leaf tobacco. Sugar-cane to the extent of 1,171,441 tons was crushed; while 3,920,595 bushels of bananas were obtained; almost every kind of fruit and vegetable is grown. There were 21,257 acres of vineyards, of which 18,899 acres were bearing.

Land Tenure.—The total extent of land alienated and in process of alienation from the Crown on June 30, 1967, was 66,910,000 acres, while the area of land under lease, etc., from the Crown was 113,108,000 acres, and the balance 18,019,000 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of the Australian Capital Territory, is 198,037,000 acres.

Pastoral, etc.—The country is admirably adapted for sheep-farming, the principal breed of sheep being the celebrated merino, which was introduced

in 1957. On Mar. 31, 1967, there were 146,129 horses, 4,145,660 cattle, 63,848,000 sheep and lambs, 513,575 pigs. In 1966-67, 622,745,000 lb. (stated as in the grease) of wool were produced, 86,393,000 lb. of butter, 12,024,000 lb. of cheese, and 34,421,000 lb. of bacon and ham.

Forests.—The estimated forest area is 23,977,000 acres, of which State forests cover 6,940,000 acres and 1,076,000 have been set aside as timber reserves.

Mining Industry.—The principal minerals are coal, lead, zinc, rutile, zircon and tin. The total value of minerals won in 1966 was \$A263,751,000; the value of output of the coal-mining industry was \$A117,626,000, and of the silver-lead-zinc industry, \$A81,405,000. The mining industry gave employment to 22,767 miners during 1966. In 1967, 26,813,000 tons of coal were produced.

Factories.—In 1966-67 there were 24,849 factories. The average number of persons employed during the year was 524,054. The value of production, i.e. value added to raw materials was \$A2,938,227,000. Large iron and steel works with subsidiary factories are in operation at Newcastle and Port Kembla in proximity to the coalfields. Products of the regions include iron and steel of various grades, pipes, boilers, steel wire and wire netting, copper wire, copper and brass cables and tin-plate. The production (1966-67) of pig-iron was 4,083,000 tons, and of steel ingots 5,477,000 tons.

OVERSEAS TRADE.

Year ended June 30	Oversea Imports \$A (f.o.b.)	Oversea Exports \$A (f.o.b.)
1964.....	1,035,618,000	801,114,000
1965.....	1,277,405,000	803,734,000

1967.....	1,323,597,000	878,446,000

The chief exports in 1966-67 were wool, iron and steel, wheat, other foodstuffs, coal, minerals, machinery, chemicals, and hides and skins. Chief imports were machinery, motor vehicles, textiles, crude petroleum, chemicals, paper products, aircraft and parts, iron and steel, medical instruments, etc., plastic materials, pharmaceuticals, printed matter and foodstuffs.

TRANSPORT AND COMMUNICATIONS.

Shipping.—Excluding coastal trade, 4,006 vessels entered ports of N.S.W. during the year ended June 30, 1966, the net tonnage being 19,699,000. The shipping entries at Sydney, including coastal, were 3,879 vessels of 14,007,000 net tonnage.

Roads and Bridges.—There are 131,300 miles of roads and streets in New South Wales, including 31,100 miles of natural surface and cleared only. The total expenditure by the Government and the local councils on roads, bridges, &c., in 1964-65 was \$155,822,000. Sydney Harbour bridge was completed and opened for traffic in March, 1932. It carries eight lanes of roadway with a total width of 84 ft., two footways each 10 ft. wide, and two lines of railway. At mean high water there is a headway of 174 ft.

Motor Vehicles.—At Jan. 31, 1968, there were 1,487,687 registered motor vehicles (cars, 963,663).

Railways.—The railways of New South Wales are controlled by the State, which also operates omnibus services. At June 30, 1967, the mileage of the State railways open for traffic was 6,055, revenue in the year 1966-67 being \$A217,635,000.

Aviation.—Sydney is the principal oversea terminal in Australia. Traffic movements at Sydney airport in 1966-67 were: passengers 2,919,219

(2,435,284 domestic, 483,935 international); freight, 50,336 short tons (37,005 domestic, 13,331 international); aircraft, 72,545 (64,141 domestic, 8,404 international).

Posts, Telegraphs and Telephones.—The postal, telegraphic, telephonic and radio services are administered by the Commonwealth Government. At June 30, 1967, there were 2,386 post offices in New South Wales. The postal matter carried during 1966-67 included 738,134,000 letters and registered articles and 162,848,000 newspapers and parcels posted for delivery in Australia. The overseas mails consisted of 52,037,000 registered articles and letters and 12,964,000 newspapers and parcels received. During the year 7,571,000 telegrams were despatched to places within Australia and 1,073,000 cablegrams were despatched and 1,061,000 received. Transit time between Sydney and London is approximately 2½ days for airborne mail and between 4 and 6 weeks for seaborne mail. The telephone services in operation numbered 860,179.

Radio and Television.—In June, 1967, there were 20 National Broadcasting Stations in New South Wales and 38 commercial stations operating under licence. The number of broadcast listeners' licences was 950,788. At June 30, 1967, there were 26 television stations (12 national, 14 commercial) in operation and the number of viewers' annual licences was 851,516.

TOWNS.

Ψ SYDNEY, the chief city and capital and the largest city in Australia, stands on the shores of Port Jackson, with a water frontage of 152 miles; the depth of water at the Heads is not less than 80 ft. and at the wharves up to 40 ft. There are extensive facilities for handling cargo, and for storing and loading grain in bulk or bags; also for replenishing coal and oil bunkers. For 20 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the harbour is 13,600 acres, or about 21 square miles, of which approximately one-half has a depth of not less than 30 ft.: the rise and fall of the tide is from 3 to 6 ft.

The parks in or adjacent to the metropolitan area include the Royal National Park which measures about 36,800 acres, Kuring-gai Chase 38,300 acres, Lane Cove National Park 840 acres and Centennial Park 470 acres.

The Sydney Statistical Division embraces an area of approximately 1,573 square miles, with a population of 2,591,720 (at June 30, 1967). The Newcastle and Wollongong Statistical Districts contain populations of 332,660 and 182,560 respectively.

The population of principal municipalities located outside the boundaries of these statistical areas are: Broken Hill 30,220, Wagga Wagga 26,500, Albury 25,670, Tamworth 22,080, Orange 21,470, Goulburn 20,940, Lismore 19,920, Bathurst 17,280, Blue Mountains 16,820 (part not included in Sydney Statistical Division) and Grafton 16,090.

DEPENDENCY OF NEW SOUTH WALES.

LORD HOWE ISLAND (436 miles north-east of Sydney). Lat. 31° 33' 4" S., Long. 159° 4' 26" E. Area 3,200 acres. Pop. June 30, 1967, 285. The affairs of the Island and the supervision of the Kentia palm seed industry are controlled by an elected Island Committee and a Board at Sydney. Office, Chief Secretary's Department, Sydney.

QUEENSLAND

This State, situated in lat. 10° $40'$ – 29° S. and long. 138° – 153° $30'$ E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 667,000 square miles (i.e., equal to more than 5½ times the area of the British Isles).

POPULATION.—At June 30, 1967, the population numbered 1,701,623 persons (862,963 males and 838,660 females).

Births, Deaths and Marriages

Year	Births	Deaths	Marriages
1965	33,551	14,114	12,967
1966	32,843	14,861	13,325
1967	34,692	14,736	13,634

Vital Statistics:—Annual rate per 1,000 of mean population in 1967; Births, 20·4; Deaths, 8·7; Marriages 8·0. Deaths under 1 year, 19·5 per 1,000 live births.

Religions.

At the Census of 1966 there were 522,540 Church of England, 425,669 Roman Catholics (including Catholics undefined), 188,492 Presbyterians, 179,591 Methodists, 40,237 Lutherans, 26,032 Baptists, 13,896 Orthodox, 9,949 Congregationalists, 66,063 other Christians, and 1,629 Hebrews.

PHYSIOGRAPHY.

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Selwyn and Kirby Ranges divide the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt into the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1967 was $69\cdot0^{\circ}$, the maximum and minimum shade temperatures being $103\cdot7^{\circ}$ and $40\cdot3^{\circ}$; mean barometer, 30.04 inches. The coastal regions are warm and moist, but the rainfall decreases away from the coast and is scanty in the far west. The rainfall in Brisbane during 1967 was 70·8 inches, compared with average rainfall of 43·0 inches.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 13 members.

EDUCATION.

Education is compulsory between the ages of 6 and 15, and is free in state primary and secondary schools. On Aug. 1, 1967, there were 1,307 state schools, including 242 providing secondary education, in operation, with 10,735 teachers and an enrolment of 281,457 children, and 334 private and 8 grammar schools, with an enrolment of 86,928. There were 15 state technical colleges and 2 state institutes of technology with 1,035 full-time, 17,573 part-time, and 5,312 correspondence students. The state agricultural college had 397 full-time students. The state-aided University had an enrolment of 7,299 full-time students in 1967. State expenditure on education in 1966–67 was \$A58,260,000.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1966–67 was \$A861,269,000 (agriculture \$A318,954,000, dairying \$A74,568,000, pastoral \$A276,402,000, poultry and bee-keeping \$A19,460,000, mining \$A146,080,000, forestry \$A17,199,000, fisheries

\$A6,959,000, hunting and trapping **\$A1,647,000**, and net value of manufacturing **\$A592,607,000**.)

Land Tenure.—Of the total area of 426,880,000 acres **37,672,000** acres were alienated or in process of alienation at Dec. 31, 1967, and **361,029,000** acres were held under Crown leases.

Agriculture and Livestock.—The total area under crop in 1966-67 was **4,569,484** acres. The most important crop was sugar-cane, under which there were **626,872** acres, producing **2,202,809** tons of raw sugar, **1,227,377** acres were under wheat (yielding **35,730,399** bushels), **151,010** under maize (**4,947,759** bushels), **403,500** under sorghum (**10,171,707** bushels), and **383,735** under barley (**13,194,144** bushels). The livestock on March 31, 1967, included **6,919,158** cattle, **899,288** being dairy cattle, **19,305,316** sheep, **182,283** horses, and **467,572** pigs.

Forestry.—At June 30, 1967, **6,719,000** acres were permanently dedicated State forests and **1,944,000** acres were timber reserves. Total Australian grown timber processed amounted to **400,000,000** super feet.

Minerals.—There are rich deposits of bauxite, copper, lead, silver, uranium and zinc, and deposits of gold, tin, limestone, ironstone, wolfram and mineral sands. Coal is mined in the Ipswich (near Brisbane) and some northern districts, and there is extensive production by open-cut method in Central Queensland. Commercial production of oil began at Moonie in South Queensland in 1964 and at Alton nearby in 1966. The output in 1967 included gold, **\$A3,066,000**; coal, **\$A25,642,000**; copper **\$A54,152,000**; tin **\$A4,213,000**; silver **\$A10,622,000**; lead **\$A17,417,000**; zinc **\$A10,023,000**.

Factories.—In 1966-67, **6,013** factories employed **117,937** persons. Value of production (value added to raw materials) was **\$A592,607,000**. Much production was the processing of primary products, e.g. sugar, meat, butter, flour, timber, minerals and fruit. Included in other factory production were the products from engineering, railway, metal, chemical fertilizer works, cement, paper and woollen mills and oil refineries. An alumina works at Gladstone began production in 1967.

1966	20,319	9,323	9,051
1967	20,386	9,071	9,434

Religions.

Religion is free and receives no State aid. At the Census, 1966, the persons belonging to the principal religious denominations were as follows: Church of England, **286,154**; Methodists, **227,483**; Congregationalists, **18,288**; Baptists, **22,235**; Lutherans, **59,281**; Roman Catholics, **220,576**; Presbyterians, **42,687**; and Churches of Christ, **25,344**.

PHYSIOGRAPHY.

The most important physical features of South Australia are broad plains, divided longitudinally by four great secondary features, which form barriers to east-west movement, and which have thus largely determined the direction of roads and railways, the sites of towns and villages and the manner of distribution of the population. These four barriers are Spencer Gulf, Gulf St. Vincent, the Mt. Lofty-Flinders Ranges and the River Murray.

The long, deeply-indented coastline, which provides a few major, and a multitude of lesser harbours, trends generally south-eastward. Pleasant weather conditions and good rainfall are experienced in most coastal areas.

The north-western portion of the State is mostly desert, while north of latitude 32°S. the country is unpromising by comparison with the fertile land which surrounds the hill country of the east. The Murray, which flows for some 400 miles through the south-eastern corner, is the only river of importance.

The lack of rivers and fresh-water lakes in the settled areas has necessitated the building of a number of reservoirs, which have been supplemented since 1941 by the construction of pipelines from the River Murray.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (June-August) averaging 54°, and the summer (November-March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from over 100 years' record is 22 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while in Adelaide the precipitation has fallen as low as 10.11 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of Ministers.

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory and free. In 1966 there were 699 State schools, with 247,251 scholars. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 179 with 44,043 scholars.

There are two universities: the University of Adelaide, founded in 1874, and the Flinders University of South Australia, opened in 1966, with a total enrolment of 6,626 full-time students in 1967. A State Institute of Technology has also been established, and there are technical schools at 24 country centres and also special trade schools for apprentices and domestic art centres. The public library, museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE. (For years ended June 30)

Banking.—There are 9 trading banks in Adelaide, including the Commonwealth Trading Bank and the State Bank of South Australia, having total average deposits of \$A390,961,000 in December quarter, 1967. The nine savings banks had deposits of \$A628,464,000 at December 31, 1967.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1966-67 was: crops \$A184,085,000, pastoral \$A169,226,000, dairying \$A39,034,000, fisheries, game and poultry, and forestry \$A27,057,000.

Land Tenure.—Of the total area of the State (243,000,000 acres), 16,500,000 acres have been sold or are in the process of alienation by the Crown under systems of deferred payment; 128,300,000 acres are held under pastoral leases and 23,700,000 under other miscellaneous leases.

Agriculture.—The total area cultivated is 13,805,000 acres—under wheat, 1966-67, 2,960,000 acres, hay 482,000, oats 509,000, barley 1,107,000. Wheat harvest 1966-67, 53,816,000 bushels; barley, 23,698,000 bushels. Oranges, lemons, apples,

apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. In 1966-67, there were 57,000 acres of vines with a production of 20,225,000 gallons of wine and 17,327 tons of currants and raisins. Considerable quantities of fruits (fresh and dried), wine and brandy, are annually sent to overseas countries, principally the United Kingdom, and to other Australian States. Some areas of the State, particularly near Adelaide, are also very suitable for growing all kinds of root crops and vegetables.

Live Stock (March 31, 1967).—There were 17,864,000 sheep, 687,000 cattle, 222,000 pigs. Wool production (1966-67), 237,493,000 lb.

Minerals.—Iron, pyrite, gypsum, salt, coal, limestone, clay, &c., are found. The total mineral output was valued at \$A69,345,000 in 1967, including iron ore valued by the South Australian Director of Mines at \$A40,047,000.

Manufactures.—In 1966-67 there were 6,222 factories, employing 118,220 hands, the gross value of the output being \$A1,345,159,000. Plant, machinery, land and buildings were valued at \$A767,310,000.

Transport and Communications.—There were (June, 1967) 3,852 miles of railway in South Australia, 150 miles of tram and bus routes and 75,000 miles of roads, including roads and tracks outside local government areas. The railway mileage includes the South Australian part of the Transcontinental Railway from Port Pirie (South Australia) to Kalgoorlie (Western Australia) which forms a link in the system from Brisbane to Fremantle (654 miles), and also part of the Commonwealth line from Port Augusta to the Northern Territory (581 miles) as well as private railways (76 miles). There are a number of excellent harbours, of which Port Adelaide is the most important. In 1966-67, 2,009 vessels with net tonnage of 9,517,000 entered South Australian ports direct from overseas or interstate. Nationality of these vessels was—Australian 870, United Kingdom 425, other Commonwealth 104 and foreign 610. There are 921 post offices in the State.

Civil Aviation.—There are 27 Government or licensed aerodromes, and 827,223 passengers and 10,640 tons of freight were carried in 1966-67.

Motor Vehicles.—The registrations on Dec. 31, 1967, were 422,770, equal to 1 per 2.65 persons.

Wireless and Television (1967)—Broadcasting stations 16; listeners' licences 278,069. Television stations 7; viewers' licences 254,504.

Vital Statistics.—The birth rate in 1967 was 20.04, death rate 8.57, marriage rate 8.53 per 1,000. Infant mortality (1967) 17.2 per 1,000 births.

Religions.

In 1966 there were 166,023 members of the Church of England, 71,089 Roman Catholics, 43,084 Methodists, 17,498 Presbyterians, 4,530 Congregationalists and independents, and 7,759 Baptists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,300 ft. in height, and expanses of level, open plains. There are numerous rivers, the Gordon, Derwent and Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not often reach the island. At Hobart the mean maxima and minima temperatures are: January 70° 5' and 52° 8'; July 52° 7' and 41° 1'. The western side of the island is very wet, the eastern side being much drier; the average rainfall varies from 20 inches to 140 inches in different parts.

GOVERNMENT

The island was first settled by a British party from New South Wales in 1803, becoming a separate colony in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 responsible government was established. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), but is exercised by Cabinet Ministers responsible to the Legislature, of which they are members.

GOVERNOR.

Governor of Tasmania, His Excellency Lieut.-Gen. Sir Edric Montague Bastyan, K.C.M.G., K.C.V.O., K.B.E., C.B., appd. Feb. 14, 1968; assumed office Sept. 24, 1968.

THE MINISTRY.

Premier, Treasurer and Minister for Mines, Hon. E. E. Reecce.

Deputy Premier and Attorney-General, Hon. R. F. Fagan.

Lands and Works, Hon. D. A. Cashion.

Chief Secretary, Hon. B. K. Miller.

Agriculture, Hon. A. C. Atkins.

Education, Hon. W. A. Neilson.

Housing, Hon. S. V. Ward.

Transport, Hon. H. J. McLoughlin.

Health, Hon. M. G. Everett, Q.C.

AGENT-GENERAL IN LONDON.

Agent-General for Tasmania, Hon. A. J. White.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 19 members, elected for six years (3 retiring annually, in rotation, except in every sixth year, when four retire) and a *House of Assembly* of 35 members, elected by proportional representation for five years in five 7-member constituencies, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the franchise for the Council is restricted, requiring a property or educational qualification for both sexes, but war service is a qualification for enrolment. The composition of the House of Assembly in June, 1968, was: 19 Labour, 15 Liberal and 1 Centre Party.

President of the Legislative Council, Hon. Sir Henry Baker, R.C.M.G., D.S.O.

Clerk of the Council, G. W. Brimage.

Speaker of the House of Assembly, Hon. J. L. Madden.
Clerk of the House, C. K. Murphy, C.B.E.

THE JUDICATURE.

The *Supreme Court of Tasmania*, with civil, criminal, ecclesiastical, admiralty and matrimonial jurisdiction, was established by Royal Charter on October 13, 1823.

Chief Justice, Hon. Sir Stanley Burbury, K.B.E.
Associate Judges, Hon. M. P. Crisp; Hon. G. H. Crawford; Hon. F. M. Neasey; Hon. D. M. Chambers.

Local Courts established under the Local Courts Acts, 1896, are held before Commissioners who are legal practitioners, with a jurisdiction up to \$1,500. Courts of General Sessions, constituted by a chairman who is a Justice of the Peace and at least one other Justice, are established in the municipalities for the recovery of debts and demands not exceeding \$100. Courts of Petty Sessions are established under the Justices Act, 1959, constituted by Police Magistrates sitting alone, or any two or more justices. A single justice may hear and determine certain matters.

EDUCATION.

Government schools are of three main types: primary, secondary and matriculation schools. On Aug. 1, 1967, there were 74,265 scholars enrolled in 297 Government schools. There were also 65 independent schools with an enrolment of 14,913. The University of Tasmania at Hobart, established 1890, had 1,623 full-time students, 643 part-time students and 177 external students in 1967.

FINANCE.

1964-65	\$A 76,464,632	\$A 76,464,632	\$A 456,091,000
1965-66	\$A 83,564,333	\$A 85,585,387	\$A 502,933,000
1966-67	\$A 92,676,009	\$A 93,248,028	\$A 535,606,000

Banking.—The average weekly deposits of cheque-paying banks during December, 1967, were \$A120,447,000; the savings bank deposits, December 31, 1967, were \$A173,479,000.

PRODUCTION AND INDUSTRY.

The net value of production in 1966-67 was \$A311,264,000—agriculture and pastoral \$A50,947,000, mines and quarries \$A25,828,000, other primary industries \$A39,918,000 and manufactures \$A194,571,000.

Agriculture and Live Stock.—Of the total area of the State (16,885,000 acres) there were, in 1966-67, 456,022 acres of crops. The principal crops are potatoes, apples and other fruit, hay, hops, oats, peas, turnips, barley and wheat. The live stock included (March 31, 1967) 521,700 cattle, 4,321,000 sheep, 86,000 pigs and 6,700 horses. The wool production (1966-67) was 43,153,000 lb.

Electrical Energy.—Tasmania, the smallest Australian state, ranks third as a producer of electrical energy—all of it derived from water power, with a output of 4,119,205,000 kW in 1967. By reason of its low-cost electrical energy, Tasmania is the Commonwealth's only local source of electrolytic zinc, ferro-manganese, newsprint and calcium carbide and the provider of the bulk of Australian requirements of aluminium and fine papers. The Hydro-Electric Commission is constructing a network of ten stations on north-western rivers, a thermal station at Bell Bay and a hydro station in the south-west. Present and planned future output are: 1968, 904,000 kW; 1971, 1,322,000 kW; 1975, 1,560,000 kW.

Forestry.—State forest areas in 1966-67, 2,668,105 acres. The quantity of timber (excluding firewood) of various species cut in 1966-67 was 717,908,000 true super feet, including 240,000,000 true super feet for wood-pulp.

Minerals.—The chief ores mined are those containing copper, zinc, tin, silver and lead. The value of output of all mines and quarries in 1967 was \$A34,501,000.

Manufactures.—The chief manufactures for export are: refined metals, preserved fruit and vegetables, butter, woollen manufactures, paper, confectionery and sawn timber; the net value of production in 1966-67 was \$A194,571,000, the value of land, buildings, plant and machinery for 1,771 establishments being \$A403,141,000.

CAPITAL, Ψ HOBART, which was founded in 1804. Population (June 30, 1967), 120,842.

Other towns (with population at June 30, 1967) are Ψ Launceston (61,023), Ψ Devonport (15,188), Burnie-Somerset (18,490), Ulverstone (6,990) and New Norfolk (6,308).

Transmission of mails from London to Hobart, 34 days by sea; 5 days or less by air.

VICTORIA

The State of Victoria comprises the south-east corner of Australia, at that part where its mainland territory projects farthest into the southern latitudes; it lies between 34° - 39° S. latitude and 141° - 150° E. longitude. Its extreme length from east to west is about 493 miles, its greatest breadth is about 290 miles, and its extent of coast-line is about 980 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,884 square miles.

Population.—The population at Dec. 31, 1967, was 3,303,631 (1,655,935 males and 1,647,696 females).

Births, Deaths and Marriages.

Year	Births	Deaths	Marriages
1964	64,990	27,548	24,169

1966	64,008	28,673	27,080
1967	65,485	28,373	28,004

Vital Statistics.—Annual rate per 1,000 of population in 1967: Births, 19·98; Deaths, 8·66; Marriages, 8·55. Deaths under 1 year per 1,000 births, 16·80.

Religions.

Members of the Church of England at the date of the census in 1966 numbered 923,078, Roman Catholics 889,495, Presbyterians 387,108, Methodists 279,300, Orthodox 100,387, Baptists 41,419, Churches of Christ 39,263, Lutheran 37,637 and Hebrew 31,058. The number of persons who did not state their religion was 333,734.

PHYSIOGRAPHY.

The Australian Alps and the Great Dividing Range pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The length of the Murray River, which forms part of the northern boundary of Victoria, is about 1,200 miles along the Victorian bank. Melbourne, the capital city, stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The climate of Victoria is characterized by warm summers, rather cold winters, and rain in all months with a maximum in winter or spring. Prevailing winds are southerly from November to February inclusive, with a moderate percentage of northerlies often associated with high temperatures. Northerly or westerly winds predominate from March to October inclusive. Rain on an average falls in Melbourne on 143 days per year, the annual average being 25·91 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales and was created a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of Ministers.

Governor of the State of Victoria, His Excellency Maj.-Gen. Sir Rohan Delacombe, K.C.M.G., K.B.E., C.B., D.S.O., born Oct. 25, 1906, assumed office May 8, 1963. \$A20,500

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 15. At Aug. 1, 1967, there were 1,880 Primary Schools attended by 333,659 pupils, 41 Primary-Secondary Schools with 16,287 pupils, and 234 Secondary Schools (excluding Junior Technical Schools) with an enrolment of 138,863. There were also 95 Technical Schools, most of which had both junior and senior sections, with an enrolment of 51,472 junior and 84,259 senior students.

At Aug. 1, 1967, 185,522 pupils attended 578 independent schools, 483 of which are Roman Catholic, as the Roman Catholic Church in the State maintains an independent scholastic organization.

There are three State-aided Universities—Melbourne, Monash and La Trobe. Enrolments for 1967 at Melbourne were 14,618, and at Monash 7,229. La Trobe received its first intake of 530 students in 1967.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1966-67 was \$A1,053,248,000, agricultural \$A324,556,000, pastoral \$A376,196,000, dairying \$A197,844,000, poultry and bee-keeping \$A57,658,000, trapping

£A4,244,000, forestry £A34,991,000, mining and quarries £A52,778,000, fisheries £A4,980,000. The net value of production of primary industries was £A801,358,000. Wool, wheat, flour, butter, live stock, fruits, milk and cream, meats, poultry and eggs are staple products.

Agriculture.—Of the 9,168,000 acres under cultivation in 1966-67, 3,128,000 were wheat crops and 1,079,000 oats, 1,558,000 acres were cut for hay, and 2,751,000 acres were lying fallow. In 1966-67, 3,555,000 gallons of wine were produced.

Live Stock.—There were on rural holdings in March, 1967, 31,239,000 sheep, 3,528,000 cattle, and 351,000 pigs. The quantity of wool produced in 1966-67 was 378,457,000 lb., valued at £A80,946,000.

Minerals.—Production of gold in 1967 was 11,318 fine oz. Other minerals raised consisted principally of coal (black and brown), limestone, kaolin, fireclay, white clay and gypsum. Production of brown coal in 1967 amounted to 23,383,607 tons.

FINANCE.

The revenue and expenditure of the Consolidated Revenue Fund and the State debt for those years given as follows:

Year	Revenue	Expenditure	Debt
	£A	£A	£A
1964-65	480,667,818	480,667,818	1,679,338,000

Banking, etc.—State Savings Bank deposits at June 30, 1967, amounted to £A966,056,000; in addition, deposits in the Commonwealth Savings Bank (in the State of Victoria) amounted to £A443,049,000, and in other savings banks £A517,608,000.

Insurance (other than Life).—There were 236 companies or other bodies transacting business in Victoria during the year 1966-67. Total revenue amounted to £A221,001,000, made up of premium income £A209,519,000 and other income £A11,482,000. Expenditure totalled £A191,191,000, comprising claims £A127,833,000, commission and agents' charges £A20,227,000 and other expenditure £A43,131,000.

Secondary Industry.—In 1966-67 there were 314,070 males and 131,487 females (including working proprietors) employed in Victoria factories. Salaries and wages paid totalled £A1,168,000,000. The total cost of materials used, containers, tools replaced and repairs to plant was £A2,617,000,000, and of power, fuel and light, lubricants and water £A134,000,000. Gross value of output was £A5,051,000,000 and added value (net value of production) £A2,236,000,000. Principal factory products are motor vehicles and light engineering products, foodstuffs, chemicals, textiles, clothing, paper and rubber products.

TRANSPORT.

Victoria State Railways.—At June 30, 1967, there were 4,218 miles of railway open for traffic. The revenue and expenditure for the year ended June 30, 1967, were £A104,508,891 and £A103,423,004 respectively. Total traffic mileage was 20,035,039 and passenger journeys numbered 146,267,665. The tonnage of goods and live stock carried was 12,074,550.

Shipping.—During the year ended June 30, 1966, 3,753 vessels with net tonnage 16,379,661 entered Victorian ports and 3,754 vessels with total net tonnage of 16,383,974 were cleared.

Motor Vehicle Registrations.—The number of vehicles on the register at Dec. 31, 1967, was: cars and station wagons, 923,500; utilities and vans, 126,915; trucks and omnibuses, 94,872, and motor cycles, 13,601.

OVERSEAS TRADE

The export trade (excluding inter-state trade) consists largely of agricultural and pastoral products. The principal overseas imports of the State are aircraft and parts, apparel and textiles, manufactured fibres, machines and machinery, motor vehicles and tractors, metals and metal manufactures, rubber and rubber manufactures, crude petroleum, paper, drugs and chemicals, synthetic resins and food-stuffs of vegetable origin.

CITIES, TOWNS AND BOROUGHS.

MELBOURNE, the capital city, which is an archiepiscopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principal features of the city. The Melbourne Statistical Division contained on June 30, 1967, ■ population estimated at 2,230,580. Other cities and towns are: **Geelong**, 105,059; **Ballarat**, 56,290; **Bendigo**, 42,208; **Moe-Yallourn**, 23,198; **Shepparton**, 17,506; **Warrnambool**, 17,499; **Wangaratta**, 15,175; **Traralgon**, 14,079.

WESTERN AUSTRALIA

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 113° 9' E. long., and from 13° 44' to 35° 8' S. lat. Its extreme length is 1,480 miles, and 1,000 miles from east to west; total area 975,920 sq. miles.

POPULATION.—At December 31, 1967, the population was estimated at 892,763 (males, 454,743; females, 438,020). The figures include full-blood aborigines.

Year	Births	Deaths	Marriages
1963	17,290	5,976	5,755
1964	16,685	6,429	6,023
1965	16,186	6,274	6,448
1966	17,007	6,772	7,001
1967	18,023	6,779	7,430

Religions.—Census of 1966—Church of England 316,153, Roman Catholics 213,659, Methodists 80,840, and Presbyterians 44,055.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Meharry (4,104 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a seaward slope to the Indian Ocean, into which flow many streams, notably the Preston, Collie, Murray, Swan, Murchison,

Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the King Leopold ranges into the Indian Ocean and the Drysdale and Ord into the Timor Sea. The greater portion of the State may be described as an immense tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which varies from stretches of clayey soils to the sand dunes of the far interior. The climate is one of the most temperate in the world. The total rainfall at Perth during 1967 was 40.86 inches, the average for the previous 91 years 34.82. Of the total area two-thirds is suitable for pastoral purposes.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 Responsible Government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon the Constitution Act, 1889, the Constitution Acts Amendment Act, 1899, and amending Acts. The Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

The Legislative Assembly (elected March, 1968) is composed of Australian Labor Party 23, Liberal and Country League 19, Country Party 9.

PHYSIOGRAPHY

New Zealand consists of a number of islands of varying size in the South Pacific Ocean, and has also administrative responsibility for a large tract in the Antarctic Ocean. The two larger and most important islands, the North and South Islands of New Zealand, are separated by only a relatively narrow strait. The remaining islands are very much smaller and, in general, are widely dispersed over a considerable expanse of ocean. The boundaries, inclusive of the most outlying islands and dependencies, range from 8° South latitude to south of 66° South latitude, and from 160° East longitude to 150° West longitude.

Geographical Features.—The two principal islands have a total length of 1,040 miles, and a combined area of 102,374 square miles. A large proportion of the surface is mountainous in character. The principal range is that of the Southern Alps, extending over the entire length of the South Island and having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several volcanoes, two of which are active, others being dormant or extinct. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,525 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 1½ wide), the Franz Josef and the Fox are the best known. The North Island is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for use in navigation. The more important include the Waikato (270 miles in length); Wanganui (180), and Clutha (210). Lakes (Taupo, 234 sq. miles in area; Wakatipu, 113; and Te Anau 133) are abundant, many of them of great beauty.

Climate.—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits of some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 59° F. in the North to about 49° F. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is

from approximately 13 to over 250 inches. The number of rainy days is generally in the neighbourhood of 160 to 180 in the North Island and between 110 and 140 in the South, except in the southern portion of the west coast. The amount of sunshine is generally over 2,000 hours per annum and ranges between 1,600 to 2,500 hours.

GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Janszoon Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642.

The islands were visited, and charted, in 1769 by Captain Cook, who returned to them in 1770, 1774 and 1777. From 1800 onwards sealers and whalers settled along the coasts, and trade in timber and flax followed. Christianity was introduced in 1814, and in 1832 a British Resident was appointed. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, created a separate colony distinct from New South Wales. Organized colonization on a large scale commenced in 1840 with the New Zealand Company's settlement at Wellington. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Imperial Act of 1852, and on the New Zealand Constitution (Amendment) Act of Dec. 10, 1947. The Statute of Westminster was formally adopted by New Zealand in 1947. The executive authority is entrusted to a Governor-General appointed by the Crown and aided by an Executive Council, within a Legislature consisting of one chamber, the House of Representatives.

FLAG. Blue ground, with Union Jack in top left quarter, four five-pointed red stars with white borders on the fly. On June 20, 1968, a new naval ensign bearing the Southern Cross was adopted, replacing the British white ensign.

POLICE

On March 31, 1968, the strength of the Police Force was 2,847 of all ranks, equivalent to 1 for every 968 of the population. The total cost of police protection in 1967-68 was \$12,179,000.

DEFENCE

A unified Ministry of Defence was set up on Jan. 1, 1964. The Ministry is responsible, under the Minister of Defence, for the whole field of national defence. The former Navy, Army and Air Departments have been abolished, but the three Armed Services retain their separate identities within the Ministry. Defence expenditure in 1967-68 amounted to \$87,111,000.

Navy.

The Royal New Zealand Navy was greatly expanded during the Second World War and a number of small vessels were built in New Zealand. The naval forces include the Women's Royal New Zealand Naval Service, and Volunteer Reserve forces in four divisions. The strength is 4 frigates, 1 survey ship, 1 Antarctic support ship, 1 minesweepers and 1 fleet auxiliary in commission; 2 frigates, and 2 ocean minesweepers in reserve. Active naval personnel numbers 321 officers and 2,554 ratings. A cruiser or a frigate is normally attached to the Far East Station.

Army.

The New Zealand Army consists of the Regular Force, the Territorial Force, the Army Reserve and the Cadet Corps. The strength of the Regular Force at August 31, 1967, was 5,807 and of the Territorial Force 12,717.

In 1962 selective national service was introduced to build the Territorial Force up to 10,000. The Army is now organized on the basis of one Regular Brigade Group, supported by three Territorial Brigade Groups. One battalion of the Regular Brigade Group is stationed as part of the Commonwealth Far East Strategic Reserve in Malaysia. An infantry company has been withdrawn from this battalion for deployment with the N.Z. artillery battery in South Vietnam.

Air.

The Royal New Zealand Air Force was constituted as a separate defence service in 1937. The Air Force now consists of the Regular Air Force, the Air Force Reserve, the Women's Royal New Zealand Air Force and the Air Training Corps. One Air Force transport unit is based outside New Zealand in Singapore. The strength of the Regular Force at August 31, 1967, was 4,353.

FINANCE

Into the Consolidated Revenue Account (New Zealand's main public account) are paid the proceeds of income tax, social security income tax, sales tax, customs and excise duties and other taxes. Revenue from taxation is also paid into the National Roads Fund principally from a tax on motor spirits and registration and licence

fees for motor vehicles. Figures of the Consolidated Revenue Account shown in this table are quoted on a gross basis, i.e. credits have not been deducted from departmental expenditure, but have been included as receipts.

Year ended March 31	Revenue	Expenditure

1965	903,708,000	894,496,000
1966	974,462,000	970,940,000
1967	1,051,334,000	1,050,609,000*
1968	1,096,696,000	1,095,318,000

* Includes \$NZ.608,531,000 for the social services, \$NZ.63,191,000 for development of primary and secondary industries and \$NZ.87,111,000 for defence.

Revenue from taxation in 1967-68 amounted to \$NZ.1,022,400,000, of which \$NZ.949,400,000 represented receipts into the Consolidated Revenue Account, and \$NZ.63,000,000 receipts into the National Roads Fund.

DEBT.

The gross Public Debt amounted on March 31, 1968, to \$NZ.2,671,000,000, of which \$NZ.329,400,000 was domiciled in London and \$NZ.105,600,000 in the U.S.A., and \$NZ.65,100,000 represented World Bank loans.

CURRENCY.

On July 10, 1967, New Zealand changed to decimal currency. The basic unit is the N.Z. dollar, divisible into 100 cents. On Nov. 21, 1967, New Zealand devalued its currency by 19·45 per cent. in relation to the U.S. dollar, bringing the N.Z. dollar to parity with the Australian dollar. At IMF par value the \$NZ. became worth £0·4667 sterling.

BANKING.

There are five trading banks (with numerous branches) doing business, two of which are predominantly New Zealand banks. Of these the Bank of New Zealand is owned by the State. At May 29, 1968, assets of all trading banks in respect of New Zealand business amounted to \$NZ.738,800,000; liabilities, \$NZ.744,800,000; and the value of notes in circulation amounted to \$NZ.116,500,000. The Reserve Bank of New Zealand commenced business on August 1, 1934. The note-issuing powers of other banks have since been withdrawn and the Reserve Bank notes are legal tender. Net overseas assets of banks (on account of New Zealand business only) at June 26, 1968, amounted to \$NZ.209,300,000, of which \$NZ.121,600,000 and \$NZ.28,000,000 represented the Reserve Bank's holdings of sterling exchange and overseas investments respectively. Trading banks' advances, including discounts on July 31, 1968, totalled \$NZ.510,600,000 compared with \$NZ.513,100,000 in the previous year. Deposits with trading banks in mid-July, 1968, amounted to \$NZ.741,000,000 (1967, \$NZ.735,100,000).

Post-office and trustee savings banks had, at the close of the year 1967-68, 3,323,000 accounts having \$NZ.1,242,133,000 to their credit. Private savings banks have been operated by the trading banks since Oct. 1964, and at March 31, 1968, deposits totalled \$NZ.237,222,000.

EDUCATION.

Schools are free and attendance is compulsory between the ages of 6 and 15. There are opportunities for apt pupils to proceed to University.

In 1966 there were 2,262 public primary schools, with 412,561 scholars; there were also 342 registered private primary schools with 56,050 scholars and 122 Maori primary schools with 9,110 scholars. The secondary education of boys and girls in the cities and large towns is carried on in 294 state secondary schools, 71 state secondary departments of district high schools, 125 private secondary schools and 7 Maori private secondary schools. The total number of pupils receiving full-time secondary education in July 1966 was 162,138 and in addition there were 74,398 part-time students attending technical classes and 13,247 receiving part-time tuition from the Technical Correspondence School. The university system consists of the University of Auckland, the University of Waikato, Massey University of Manawatu, Victoria University of Wellington, the University of Canterbury and the University of Otago. The Lincoln university college of agriculture is associated with the University of Canterbury. The university system is co-ordinated by the University Grants Committee. The Universities had a total of 26,313 students in 1967.

The total expenditure on Education out of public funds in 1967-68 was \$NZ.174,564,000.

Agriculture and Forestry.—The total area of New Zealand (excluding its Island Territories) is 66,390,700 acres; of this, approximately 42,893,000 acres are occupied land, 22,591,000 acres being under cultivation. The output of sawn timber for 1967-68 was 674,900,000 board ft., of which 458,700,000 board ft. represented exotic varieties, mainly pine.

2 A*

Livestock.—Livestock on farms at Jan. 31, 1968, included 3,505,715 dairy cattle (of which 2,131,359 were dairy cows in milk during season), 4,241,152 beef cattle (of which 1,337,899 were beef breeding cows), and 602,695 pigs. At June 30, 1967, sheep numbered 60,003,000, including 41,273,000 breeding ewes.

Manufactures.—Statistics of factory production show (1965-66) 9,945 factories in operation, employing 222,851 persons. Salaries and wages amounted to \$NZ.455,020,000; cost of materials used, \$NZ.1,416,403,000. Total value of production, \$NZ.2,374,447,000.

Minerals.—Coal output in 1967 was 2,369,000 tons. Gold-mining was formerly an important industry, but production has declined greatly in recent years. Gold produced in 1967 was 10,703 oz. Other minerals produced on a relatively small scale are copper, silver, iron ore, manganese ore, tungsten and asbestos. Valuable deposits of natural gas have been discovered in Taranaki, and this is to be piped to main North Island centres. New Zealand has large resources of potential iron ore in the black sands of many of its beaches and steelworks are being built near Auckland to utilize such deposits.

TRADE.

Provisional figures of New Zealand's trade in 1967 were: Imports, \$NZ.783,205,000, compared with \$NZ.792,771,000 in 1966; Exports, \$NZ.725,534,000 compared with \$NZ.767,281,000 in 1966.

Trade with U.K.

	1966	1967
Imports from U.K. .	£126,334,000	£99,404,000
Exports to U.K.	186,978,000	185,573,000

New Zealand produce exported to the U.K. in the months ending June 1967 was valued at \$NZ.314,047,000 and included butter, valued at \$NZ.91,407,000, cheese (\$NZ.30,362,000); meat (\$NZ.121,222,000); dried and condensed milk (\$NZ.6,725,000); wool (\$NZ.37,157,000); and fruit (\$NZ.3,884,000).

Railways.—In March, 1967, there were 3,212 route miles of Government railway in operation. The number of passengers carried on Government lines in 1967-68, including season-ticket holders, was 22,186,000. Goods railed amounted to 10,581,000 tons. Railway total revenue and expenditure were \$NZ.88,756,000 and \$NZ.87,878,000 in 1966-67.

Motor Vehicles.—On March 31, 1968, there were 1,110,354 motor vehicles licensed, including 87,765 cars, and 48,518 motor cycles and power cycles. The number of persons per motor vehicle was 2.5.

Shipping.—During 1967 the vessels entered from overseas ports numbered 3,331 (net tonnage 15,621,000) and those cleared for overseas 3,334, (net tonnage 15,648,000).

Post Office Statistics.—During 1967-68 internal postal services handled 568,248,000 items, including 269,069,000 letters and 282,913 items of printed matter. Overseas mails included 1,557,948 lb. of airmail received and 928,944 lb. dispatched. Telephones totalled 1,119,422.

Civil Aviation.—In 1967-68 domestic scheduled services flew 11,981,000 miles and carried 1,173,100 passengers. Freight carried amounted to 59,000 tons. In 1966-67 international services to and from New Zealand carried 362,800 passengers, 4,578 tons of freight and 1,148 tons of mail.

THE ISLANDS OF NEW ZEALAND.

In addition to North, South, Stewart and Chatham Islands:—

The Three Kings (discovered by Tasman on the Feast of the Epiphany), in $34^{\circ} 9'$ S. lat. and $172^{\circ} 8' 8''$ E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in $50^{\circ} 32'$ S. lat. and $166^{\circ} 13'$ E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (used as a weather station). *Antipodes Group* ($40^{\circ} 41' 15''$ S. lat. and $178^{\circ} 43'$ E. long.) uninhabited. *Bounty Islands* ($47^{\circ} 4' 43''$ S. lat., $170^{\circ} 0' 30''$ E. long.). *Snares Islands* and *Solander* (uninhabited).

The Kermadec Group (population 10 in 1966) between $29^{\circ} 10'$ to $31^{\circ} 30'$ S. lat., and $177^{\circ} 45'$ to 179° W. long., includes Raoul or Sunday, Macaulay, Curtis Islands, L'Esperance, and some islets.

Cook and other Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga (9,895), Aitutaki (2,617), Mangaia (2,001), Atiu (1,328), Mauke (670), Matiaro (293), Manuae (15), Takutea (uninhabited), Palmerston (85), Penrhyn or Tongareva (591), Manihiki (584), Rakahanga (321), Pukapuka or Danger (684), Suvarrow (6), Nassau (167). The population figures for individual islands are estimates of Sept. 1966, the total for the Group being 19,251. Niue, which is geographically part of Cook Islands, but which is administered separately, had a population (estimated March 31, 1967) of 5,227. The chief exports of the Cook Islands are fruit juice, clothing, copra, tomatoes, citrus fruit and pearl shell. The trade is chiefly with New Zealand, Australia, Japan, the U.K. and the U.S.A. The exports in 1966 were valued at \$NZ.1,740,000; imports at \$NZ.3,196,000 for

Cook Islands, and at \$NZ.109,000 and \$NZ.526,000 for Niue Island.

The High Commissioner of the Cook Islands is employed in a dual rôle, since he represents both the Queen and the New Zealand Government. Since Aug. 4, 1965, the Islands have enjoyed complete internal self-government, executive power being in the hands of a Cabinet consisting of the Premier and five other ministers. The new Constitution Act was passed by the New Zealand Parliament in November 1964, but did not come into force until it had been endorsed by the 22-member Legislative Assembly of the Cook Islands, elected in April 1965.

The New Zealand citizenship of the Cook Islanders is embodied in the Constitution, and assurances have been given that the changed status of the Islands will in no way affect the consideration of subsidies or the right of free entry into New Zealand for exports from the group.

A Resident Commissioner is also stationed at Niue and is assisted in the executive government of that island by the Niue Island Assembly.

The revenue of the Cook Islands in 1966–67, exclusive of grants from the New Zealand Government of \$NZ.1,747,000 was \$NZ.1,296,000, and expenditure, \$NZ.3,072,000. Revenue of Niue in 1966–67, exclusive of grants \$NZ.729,000 from the New Zealand Government, was \$NZ.577,000, and expenditure \$NZ.1,387,000.

Tokelau (or Union) Islands.—A group of atolls (Fakaofa, Nukunono and Atafu) (population 1,900 in Sept. 1966), proclaimed part of New Zealand as from Jan. 1, 1948.

THE ROSS DEPENDENCY.

The Ross Dependency, placed under the jurisdiction of New Zealand by Order in Council dated July 30, 1923, and defined as all the islands and territories between 160° E. and 150° W. longitude which are situated south of the 60° S. parallel. The Ross Dependency includes Edward VII Land and portions of Victoria Land. For some years there have been permanent bases in the area, staffed by survey and scientific personnel.

Barbados

Barbados, the most easterly of the West India islands, is situated in latitude $13^{\circ} 14'$ N. and longitude $59^{\circ} 37'$ W. The island has a total area of 166 square miles, the land rising in a series of tablelands marked by terraces to the highest point, Mt. Hillaby (1,104 ft.). It is nearly 22 miles long by 14 miles broad. Some 46 acres are covered by forest and 68,875 acres are cultivated. Climate.—Barbados has a pleasant climate with annual average temperature 26.5° C. (79.8° F.) and rainfall varying from yearly average of 75 inches in the high central district to 50 inches in some of the low-lying coastal areas. Population.—Since the Census held in 1960, the population has risen from 232,820 to an estimated total of 250,686 on March 31, 1967. The main population divisions in 1960 were: Negro, 207,156; White, 10,083; Mixed, 13,993; Others, 1,588. CAPITAL.— Ψ Bridgetown (population, estimated 1967, 12,161; with St. Michael (1960), 94,209). Other towns with 1960 populations are Christ Church (33,425); St. Philip (17,255); St. George (17,075); St. James (13,611); St. Peter (10,860) and St. Thomas (10,026). Bridgetown, the only port of entry, has a deep-water harbour with berths for 8 ships, opened in 1961. Some loading of sugar is done at Speightstown and oil is pumped ashore at one installation on the West Coast. NATIONAL DAY.—Nov. 30 (Independence Day).

Government.—Barbados was first settled by the British in 1627 and was a Crown Colony from 1652 until it became an independent state within the Commonwealth on November 30, 1966. The Legislature consists of the Governor-General, a Senate and a House of Assembly. The Senate comprises 21 members appointed by the Governor-General, of whom 12 are appointed on the advice of the Prime Minister, 2 on the advice of the Leader of the Opposition and 7 by the Governor-General at his discretion to represent religious, economic or social interests in the Island or such other interests as the Governor-General considers ought to be represented. The House of Assembly comprises 24 members elected every five years by adult suffrage. In 1963 the voting age was reduced to 18. Following the last General Election held on November 3, 1966, seats in the House of Representatives were held as follows: Democratic Labour Party, 14; Barbados Labour Party, 8; Barbados National Party, 2. Governor-General, Sir Winston Scott, G.C.M.G. (1967) (+ duty allowance \$9,600) \$19,200

Botswana

Botswana (formerly the British Protectorate of Bechuanaland) lies between latitudes 18° and 20° S. and longitudes 20° and 28° W and is bounded by the Cape and Transvaal Provinces of South Africa on the south and east, by Rhodesia, the Zambezi and Chobe (Linyanti) Rivers on the north and north-east and by South West Africa on the west. Botswana extends some 500 miles by 550 miles, with a total area of 220,000 square miles. The climate of the country is generally sub-tropical, but varies considerably with latitude and altitude. A plateau at a height of about 4,000 feet divides Botswana into two main topographical regions. To the east of the plateau streams flow into the Marico, Notwani and Limpopo Rivers; to the west lies a flat region comprising the Kalahari Desert, the Okavango Swamps and the Northern State Lands area. The Kalahari Desert is a level tract closely covered with thorn bush and grass, extending 300 miles to the west and bounded by the Makarikari salt pans and the Boteti River in the north. Its rainfall varies from 20 inches in the east to 9 inches in the south-west. The Okavango Swamps, 6,500 square miles in area, lie in the remote north-western corner of Botswana, and, apart from the Limpopo and Chobe Rivers, are the only source of permanent surface water in the country. North of the Boteti River and the Makarikari depression the Kalahari Desert gives way to forest and dense bush of the Northern State Lands. Large areas of the country support only herds of game. Elephant numbers have been estimated at 10,000. **Population.**—Botswana has a population estimated Jan. 31, 1967, at 593,000. The annual increase is believed to be about 3 per cent. The eight principal Botswana tribes (with population in 1964) are Bakgatla (32,118), Bakwena (73,088), Bangwakatse (71,289), Bamalete (13,861), Bamangwato (199,782), Barolong (10,662), Batawana (42,347) and Batlowka (3,735). The non-African population at the Census of 1964 numbered only 7,830. **CAPITAL.**—Gaborone, estimated population, 18,000. Other business centres are Francistown (11,000) and Lobatsi (8,000). The four largest towns are Serowe (34,182), Kanye (34,045), Molepolole (29,625) and Mochudi (17,712). **FLAG.**—Horizontal bands of blue, white, blue, with a black stripe on the white band.

Government.—On September 30, 1966, Bechuanaland became a Republic within the Commonwealth under the name Botswana. The President of Botswana is Head of State and appoints as Vice-President a member of the National Assembly who is his principal assistant and leader of Government business in the National Assembly. The Assembly consists of the President, 31 members elected on a basis of universal adult suffrage, 4 specially elected members, the Attorney-General (non-voting) and the Speaker. There is also a House of Chiefs. 28 seats in the House of Assembly were won by the Bechuanaland Democratic

Party at the first General Election in 1965 and its leader, Sir Seretse Khama, became the country's first Prime Minister and subsequently President. Botswana is a member of the United Nations and of the Organisation for African Unity.

Chief Justice of Botswana, Hon. Mr. Justice J. R. D. Young.
Attorney-General, A. G. Tilbury, C.B.E.

The country is essentially pastoral, although sorghum, maize, beans, pumpkins, melons and some cotton are sown. Cattle thrive, in spite of the drought of 1965, during which some 200,000

died. At the end of that year they numbered 1,097,835.

Schemes for improvements in agriculture, medical services, education and communications, and schemes for combating soil erosion, investigating mineral resources, improving water supplies, irrigation dams, tribal grapiaries and roads and for improving living conditions are being carried out.

Education.—In 1966, there were 251 primary schools with enrolment of 76,000 and 9 secondary schools with enrolment of 1,409. There were also two teacher training establishments with enrolment of 296. The principal languages in use in the country are English and Setswana.

Communications.—The railway from Kimberley to Vryburg and Mafeking traverses Botswana on its way to Rhodesia and Zambia. There are telegraph and telephone lines from Cape Province through from Mafeking, via Gaberones and Francistown to Bulawayo and Salisbury.

Ceylon

AREA AND POPULATION

Ceylon is an island in the Indian Ocean, off the southern tip of the peninsula of India and separated from it by a narrow strip of shallow water, the Palk Strait. Situated between 5° 55'–9° 50' N. latitude and 79° 42'–81° 52' E. longitude, it has an area of 25,332 square miles, including 333 square miles of inland water. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles, no point in Ceylon being more than 80 miles from the sea.

At the Census of 1963, the population was 10,582,064, an increase of 30.7 per cent. over the 1953 Census.

Races and Religions

The races of Ceylon are low-country Sinhalese, Kandyans Sinhalese, Ceylon Tamils, Indian Tamils, Ceylon Moors, Indian Moors, Burghers and Eurasians, Malays and Veddas. Generally Sinhalese who trace their descent to a low-country district are classified as low-country Sinhalese, others as Kandyan Sinhalese. The Western and Southern Provinces, the Southern (Chilaw) District and the Western parts of Puttalam District are low-country areas; the Central and North Central Provinces, Uva, Sabaragamuwa, Kurunegala and the Sinhalese divisions of the districts of Batticaloa, Trincomalee and Vavuniya are regarded as Kandyan districts. At the 1953 Census 42.3 per cent. of the population were low-country Sinhalese, 28.8 per cent. Kandyan Sinhalese. The religion of the great majority of inhabitants is Buddhism, introduced from India, according to ancient Sinhalese chronicles, in 300 B.C. Next to Buddhism, Hinduism has a large following.

PHYSIOGRAPHY

Ceylon is a compact area, except for the Island of Mannar and an almost detached portion in the north, the Jaffna Peninsula and its satellite islands of Delft, Kayts, etc. The relief of the island includes a mountainous area in the south-central region of 3,000 to 7,000 feet above sea level, surrounded by an upland belt of about 1,000 to 3,000 feet and a narrow coastal plain broadening out to a vast tract in the north. The coastal plain continues for a distance out to sea on a continental shelf and a coral reef, for the most part submerged, lies close to the coast. On the Central Ridge of the hill country are some of the highest peaks in Ceylon, Pidurutalagala (8,281 ft.), Kirigalpotta (7,857 ft.) and Totapola (7,741 ft.) and the high plains Nuwara Eliya (over 6,000 ft.), Elk Plains (6,000 ft.) and Horton Plains (over 7,000 ft.). The other principal peaks are Adam's Peak (7,360 ft.), Namunukula (6,679 ft.), Knuckles (6,112 ft.) and Haycock (2,167 ft.). The Peninsula of Jaffna and the Island of Mannar are featureless level stretches.

The Mahaveli-ganga, 206 miles long, is the largest river of Ceylon. Rising on the western side of the central hilly ridge, it flows north and east to empty into the Koddiyar Bay on the east coast. Other rivers are the Kelaniganga (90 miles), Aruvi-aru (104), Kala-oya (97), Yam-oya (94) and Deduru-oya (87).

Waterfalls girdle the central mountainous massif and offer some of the best scenic features in the island; Dunhinda (Badulla), Diyaluma (Koslanda), Elgin (Hatton Plateau) and Perawella are among the outstanding falls. Forests, jungle and scrub cover the greater part of the island, often being intermingled. The forests, of varying species, extend from fairly near the coast right into the hill country. In areas over 2,000 feet above sea level grasslands (*pataanas* or *talawas*) are found. Their total area is some 250 square miles, principally in the Province of Uva.

Climate.—The climate of Ceylon is warm throughout the year, with a high relative humidity. Temperatures average 80° F. during the year in the lowlands, falling off in the hills to 60° F. at elevations over 6,000 ft. Day humidity is over 70 per cent, and night humidity over 85 per cent. Temperature ranges vary little between wet and dry seasons. In the hilly areas morning mists sometimes occur. Traces of ground frost appear occasionally at night, at the highest levels, and disappear at sunrise. Thunderstorms occasionally give hail, but snow is completely absent. Rainfall is generally heavy, with marked regional variations; the heaviest falls (200–250 inches) are recorded on the south-west slopes of the central hills. Some depressional or cyclonic activity occurs generally during October to December.

GOVERNMENT

Early in the sixteenth century the Portuguese landed in Ceylon and founded settlements, eventually conquering much of the country. Portuguese rule in Ceylon lasted 150 years during which the Roman Catholic religion was established among the Sinhalese inhabitants and to some extent Portuguese modes of living adopted. In 1658, following a twenty-year period of decline, Portuguese rule gave place to that of the Dutch East India Company which was to exploit Ceylon with varying fortunes until 1796.

The Maritime Provinces of Ceylon were ceded by the Dutch to the British on February 16, 1798, becoming a British Crown Colony in 1802 under the terms of the Treaty of Amiens. With the annexation of the Kingdom of Kandy in 1815, all Ceylon came under British rule.

On February 4, 1948, Ceylon became a self-governing state and a member of the British Commonwealth of Nations under the *Ceylon Independence Act* 1947. The Parliament of Ceylon consists of (a) The Queen (represented by the Governor-General) and (b) two houses, namely, the Senate and the House of Representatives. The Executive consists of the Prime Minister and a Cabinet chosen from the party which has the majority in the House of Representatives.

Cyprus

Area, Climate and Population.—Cyprus with an area of 3,572 square miles, is the third largest island in the Mediterranean Sea, exceeded in size by Sicily and Sardinia. Its greatest length is 140 miles and greatest breadth 60 miles. It is situated at the extreme north-east corner of the Mediterranean in latitude 35° N. and longitude 33° 30' E. It is about 40 miles distant from the nearest point of Asia Minor, 60 miles from Syria and 240 miles from Port Said. The main topographical features of Cyprus are: (a) A narrow limestone range of mountains extending in an unbroken chain for nearly 100 miles along the north coast, at an average height of 2,000 feet; (b) A broad central plain, running for some 60 miles from west to east; (c) An extensive igneous massif rising to over 6,000 feet in the west of the island; and (d) Narrow coastal plains between the mountains and the sea. The rivers are little more than mountain torrents. There is no permanent stream of any volume.

Cyprus has a somewhat intense Mediterranean climate (with a hot dry summer and a variable warm winter). There are two contrasted seasons, winter and summer, while the intermediate ones are short and transitional. The winter is generally sunny with frequent cold spells between the beginning of December and end of February. The mean temperatures of the coldest month range from 35° to 50° F.

The rainy season lasts from October to April with average total rainfall of about 20 inches. The summers are hot, dry and almost cloudless. July and August are the warmest months, with mean temperatures ranging from 80°-85° F in the lowlands, to 70° in the mountains. At the end of 1967 the estimated population was 614,000. There are two major communities, Greek Cypriots (78 per cent) and Turkish Cypriots (18·2 per cent); and minorities of Armenians, Maronites and others. The population increases on the average at about 1·7 per cent. annually. Birth rate is moderately high (24·4 per thousand in 1966) and the death rate (6· per thousand) is one of the lowest in the world. Infant mortality rate is about 29 per thousand.

CAPITAL.—Nicosia, near the centre of the island, with a population of 109,000 (including suburbs); the other principal towns are Limassol (population 49,000), Famagusta (40,000), Larnaca (21,000), Paphos (11,000) and Kyrenia (4,000). Nicosia is distant from London 2,028 miles by air.

FLAG.—Gold map of Cyprus on a white ground, surmounting crossed olive branches (green).

President.—Archbishop Makarios, elected Dec. 14, 1959; assumed office Aug. 16, 1960; re-elected Feb. 25, 1968.

CABINET

A joint Greek-Turkish Cabinet was formed in 1960, but the three Turkish members ceased to attend, following events in Dec. 1963, and their Ministries were taken over by Greek Ministers.

COMMUNICATIONS

There are about 11,700 miles of motorable roads in Ceylon, of which 9,450 miles are bitumen surfaced. In December 1967 there were 156,754 motor vehicles on register—83,743 private cars and cabs, 8,846, coaches, 28,511 lorries, 11,352 tractors, 6,322 trailers, 17,704 motor cycles and 277 others.

In 1967, 2,486 ocean-going merchant vessels of a total net register tonnage of 10,117,542 entered the port of Colombo.

In 1967 there were 2,335 Money Order Offices, 1,288 Telegraph Offices and 30,632 Telephones.

A commercial wireless telegraph station has a range of 500 miles by day and about 1,000 to 2,000 miles by night and handles ship-to-shore traffic.

Since 1965 Air Ceylon has been chartering a VC-10 aircraft from B.O.A.C. for operation on a weekly service on the route: London—Rome—Karachi—Colombo—Kuala Lumpur—Singapore. Air Ceylon's regional services are operated direct to Madras four times weekly. Services between Jaffna and Tiruchirappalli operate thrice weekly and two services a week are operated to Bombay.

GOVERNMENT

Cyprus was formally annexed to Great Britain Nov. 5 1914, on the outbreak of war with Turkey. From 1925 to 1960 it was a crown colony administered by a Governor, assisted by an Executive Council and also for a time by a partly-elected Legislative Council. A state of emergency was declared in November, 1955, and Archbishop Makarios was deported. Further proposals for a workable constitution made in 1956 and a seven-year-plan for the government of Cyprus in association with Greece and Turkey were rejected by the Greek Government and Greek Cypriots. Archbishop Makarios was released in March, 1957, but was not allowed to return immediately to Cyprus. Following a meeting at Zürich between the Prime Ministers of Greece and Turkey, a conference was held in London and an agreement was signed on February 19, 1959, between the United Kingdom, Greece, Turkey and the Greek and Turkish Cypriots which provided that Cyprus would be a Republic.

Constitution.—Under the Cyprus Act, 1960, the island became an independent sovereign republic on August 16, 1960. The constitution provides for a Greek Cypriot President and a Turkish Cypriot Vice-President elected for a five-year term by the Greek and Turkish communities respectively. The House of Representatives elected for five years by universal suffrage of each community separately, consists of 35 Greek and 15 Turkish members. The 1960 Constitution proved unworkable in practice and, following the submission of proposals for its revision presented by President Makarios, intercommunal troubles started in December 1963.

British Sovereign Areas.—The United Kingdom retained full sovereignty and jurisdiction over two areas—Akrotiri-Episkopi-Paramali and Dhekelia-Pergamos-Ayios Nicolaos-Xylophagou—and use of roads and other facilities. The British Administrator of these areas is appointed by the Queen and is responsible to the Secretary of State for Defence.

Production and Industries.—About 40 per cent. of those gainfully employed take part in agriculture, the chief agricultural products being:—cereals, vine products, potatoes, carrots, carrots, citrus and other fresh and dried fruit, tobacco and legumes. Various kinds of livestock are raised, principally sheep, goats, pigs and poultry. The value of agricultural and livestock exports in 1967 was about £17,286,000. Mining is an important industry in Cyprus; the value of minerals exported in 1966 was £12,225,000. The principal minerals are cupreous and copper concentrates, copper and iron pyrites, and asbestos. There is no heavy industry, but a wide variety of light manufacturing industries. Tourism is becoming an increasingly important source of revenue.

Communications.—Famagusta is the main seaport. In 1967, 2,370 steam and motor ships (net tonnage 4,304,534) and 32 sailing vessels (tonnage 3,538) engaged in the foreign trade. Air passenger traffic in, out and through Nicosia airport totalled 236,890 persons and freight amounted to 3,395 metric tons.

The Gambia

The West African river Gambia was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth I, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and in early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It consists of a narrow strip of land, estimated at 4,003 sq. miles, lying on both sides of the River Gambia to a distance of about 300 miles, mainly between $13^{\circ} 15' - 13^{\circ} 45'$ N. and $13^{\circ} 45' - 13^{\circ} 65'$ W. The river is navigable to ocean-going vessels for 150 miles and to river steamers up to 300 miles from its mouth. The capital and chief port, Bathurst, is situated on the island of St. Mary at the mouth of the River. The total population of the country was 315,486 at the 1963 Census. The climate of Bathurst is extremely pleasant except during the rainy season from June to October, when it sometimes becomes uncomfortably warm. Rainfall 30-60 inches a year.

CAPITAL.—Ψ Bathurst. Population (1963 census), 27,809.

FLAG.—Three equal horizontal stripes; the top stripe red, the bottom stripe green, and the central stripe blue with a white band on either side one quarter of the width of the blue stripe.

Governor-General. His Excellency Alhaji Sir Farimang Singhateh, G.C.M.G. £4,100

Government.—On February 18, 1965, the Gambia became an independent state within the Commonwealth. The Governor-General is appointed by the Queen on the advice of the Prime Minister. The House of Parliament which elects its own Speaker consists of 32 elected members, 4 elected Head Chiefs, 11 nominated members and the Attorney-General who is a public officer. The Cabinet consists of the Prime Minister and Ministers appointed from among Members on his advice.

Communications.—Bathurst is 2,600 miles from London; the mail boat from Liverpool takes seven days. There is one direct air service weekly via Las Palmas and three weekly, changing at Dakar. Ocean-going vessels entering the ports in 1965 totalled 189 (tonnage 608,695). Civil aviation movements at the international aerodrome of Yundum 17 miles from Bathurst, numbered 1,092. Internal communication is by road and river. There are some 730 miles of motor road, including about 120 miles of bituminous surface road communicating between Bathurst and areas on South Bank. There are eight Government wireless stations and a V.H.F. telephone service linking

Bathurst with the principal towns in the provinces. In 1962 a broadcasting service was started.

Education.—There are 90 primary schools (70 Government and 20 others), 12 post-primary schools or departments, and 4 secondary schools, all recognized for School Certificate Examination. The total school enrolment in 1966-67 was 17,907 pupils, including 5,190 girls. The vocational training centre in Bathurst offers courses in carpentry, metal work, shorthand and typing. Yundum College provides training for teachers.

Production.—Most of the population is engaged in agriculture, the chief product being ground-nuts which is the single important cash crop. Other crops are rice, millet and various kinds of fruit and vegetables. Fishing and livestock production are considerable. No minerals are at present being exploited and there are practically no manufactures other than ground-nut processing.

The chief exports are ground-nut products, which account for over 90 per cent. of total exports, the main markets being Italy and United Kingdom. Other exports are palm kernels, dried fish and hides. Foodstuff imports include rice, sugar, flour and kola nuts. Manufactured goods of all kinds are imported, the chief being textiles and apparel, vehicles, machinery, metal goods and petroleum products.

Ghana

Ghana (formerly the British Colony of the Gold Coast) is situated on the Gulf of Guinea, between $3^{\circ} 15' W.$ long. and $1^{\circ} 12' E.$ long. It is bounded on the north by the Republic of Upper Volta, on the west by the Republic of Ivory Coast, on the east by the Republic of Togo, and on the south by the Atlantic Ocean. It extends about 334 miles along the coast-line and inland to an average distance of 440 miles or to $11^{\circ} N.$ lat. Although a tropical country, Ghana is cooler than many countries within similar latitudes.

Area and Population.—Ghana has ■ total area of 92,100 sq. miles with a total population of 7,945,000. Distribution by administrative regions is as follows:—

Region	Area Sq. miles	Population Census, 1960
Eastern	8,750	1,094,196
Western and Central	13,150	1,377,547
Ashanti	9,750	1,109,133
Bronz Ahafo	14,900	587,920
Volta	8,000	777,285
Northern and Upper	37,600	1,288,917

Figures for the Eastern Region exclude the population of the Greater Accra (Accra Capital) District, which has ■ population of 532,600. This area has now been created a region, bringing the total number of regions to nine.

CAPITAL.—Ψ ACCRA. Population of the Capital District (including Accra Tema City Council area, and Accra Rural area) (estimated, 1966), of 532,600. Other towns are Kumasi, Tamale, Sekondi-Takoradi, Cape Coast, Sunyani, Ho, Koforidua, Tarkwa and Winneba. Accra is 3,920 miles by sea from Liverpool, transit 12 to 30 days.

FLAG.—Horizontal bands of red, green and yellow. **FORCES DAY.**—July 1 (Republic Day).

GOVERNMENT

The Gold Coast region of West Africa was first visited by European traders in the fifteenth century. The Gold Coast Colony, Ashanti, the Northern Territories and Trans-Volta-Togoland, the constituent parts of the new State, came under British administration at various times, the original Gold Coast Colony, the coastal and Southern areas, being first constituted in 1874; Ashanti in 1901; and the Northern Territories Protectorate in 1902. The territory of Trans-Volta-Togoland, part of Togo, ■ former German colony, was mandated to Britain by the League of Nations after the First World War, and remained under British administration as ■ United Nations Trusteeship after the Second World War. After a plebiscite in May, 1956, under the auspices of the United Nations, the territory was integrated with the Gold Coast Colony.

The former Gold Coast Colony and associated territories became the independent state of Ghana and a member of the British Commonwealth on March 6, 1957, under the *Ghana Independence Act*, 1957 and adopted ■ Republican constitution on July 1, 1960.

On Feb. 24, 1966, the Army seized power and Dr. Nkrumah and his ministers were dismissed. The National Liberation Council is the ultimate political and military authority in Ghana performing the functions of ■ Presidential Council. There is an Executive Council (its membership is predominantly civilian) in which, subject to the powers of the N.L.C., executive power of the State is vested and which is responsible for the general direction and control of the Government of Ghana.

A National Advisory Committee co-ordinates general policy and proposals for presentation to the N.L.C. The Committee consists of the non-N.L.C. members of the Executive Council and 15 other civilians.

A draft constitution, published on Jan. 26, 1968, proposed the election of a President who would have no executive powers, an elected National Assembly of 140 members and an independent judiciary. Appointment of an *Ombudsman* was also proposed.

LEGISLATURE

The Republican constitution of Ghana came into effect on July 1, 1960. It provides for a Parliament consisting of the President and the National Assembly of 198 members, with a maximum term of 5 years. At least one session of a month's duration is held each quarter. Voting is on a basis of adult suffrage. The National Assembly was dissolved after the military take-over in 1966.

Houses of Chiefs

The Constitution guarantees the office of Chief in Ghana as existing by customary law and usage and provides for the establishment of a House of Chiefs in each of the ■ Regions. Houses of Chiefs have power under the Constitution to consider any matters referred to them by a Minister and may at any time offer advice to any Minister.

COMMUNICATIONS

There are four aerodromes in Ghana, situated at Accra, Takoradi, Kumasi and Tamale. Accra Airport is ■ international airport and is the terminus for services from the United Kingdom, the Northern, Ashanti and Western Regions. There is a National Meteorological Service, providing forecasting, climatological and agrometeorological services.

Railway communications consist of ■ main line running from Takoradi to Kumasi thence to Accra, a distance of 357 miles, with branches from Kojokrom to Sekondi (3 miles), Tarkwa to Prestea (18 miles) and Achimota to Tema (16 miles). A link of 51 miles between the Huni-Valley-Kade line at Achias Junction and the Accra-Kumasi line at Kotoku was opened in 1956. Total route mileage is 501 miles 3' 6" gauge track. On Dec. 31, 1964, the mileage of all-weather roads was 5,519, comprising 3,388 miles of bitumen surface and 2,131 miles

gravel surface. In addition there are 700 miles of roads at present maintained by the regional organization and local authorities.

Takoradi Harbour consists of two breakwaters enclosing a water area of 220 acres. Seven quay berths are situated on the lee breakwater—five are used for the handling of general cargo, one is leased specially for manganese exports and one is used for shallow draft colliers. Tema Harbour—Africa's largest artificial harbour and a prospective major port of the South Atlantic—was opened in 1962. There are 12 berths for larger ocean going vessels. An oil berth has also been built to serve the Ghaiip refinery which has been constructed at Tema. As part of the Tema Harbour project, a new township has been built where many industries are already operating.

Guyana

GUYANA, the former colony of British Guiana, which includes the Counties of Demerara, Essequibo and Berbice, is situated on the north-east coast of South America and has a total area of 83,000 square miles with a seaboard of more than 500 miles. The population at December 31, 1967, was estimated at 691,900. There are about 31,460 aboriginal Indians. The territory is bounded on the south by Brazil, on the east by Surinam, on the west by Venezuela, and on the north and N.E. by the Atlantic. The coastline is very like the Netherlands, below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the Guyana-Venezuela-Brazil boundaries is Mt. Roraima, a flat topped mountain 9,000 feet above sea-level. There are many beautiful waterfalls in Guyana: on the Potaro River (a tributary of the Essequibo) is the Kaieteur Fall, with a clear drop of 742 feet and a total fall of 822 feet, and on the Essequibo, the Horse Shoe Falls (discovered in 1934); a fall, with a drop of some 500 feet, discovered in 1934 on the Ipobe River, a tributary of the Kuribrong, has been named the Marina Fall, and other falls were discovered in 1938 on the Kamarang River, 80 miles north-east of Mt. Roraima. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate on the coast is pleasant and healthy for the greater part of the year. In the Aug.-Oct. period it is hot. The mean temperature is 80·3°, its extremes during 86 years ranging between 68° and 96°, but these are very rare, the usual extremes being 70° and 90°. In the interior the mean temperature is higher—82·6°, its extremes ranging from 66° to 103°. The yearly rainfall is subject to marked variation, its mean on the coast lands averaging about 90 inches with an average of 58 inches on the savannahs. The daily average sunshine is nearly 7 hours and, except when rain is falling, dull and cloudy weather is rarely experienced.

Government.—Guyana, which became independent on May 26, 1966, is a sovereign democratic state with a Governor-General appointed by the Queen. The constitution makes provision for a Republican system to be adopted after January 1, 1969, if the majority of the National Assembly is in favour, and provides for citizenship and the safeguard of fundamental freedoms of the individual. It retains the electoral system of Proportional Representation or "single list" system, each voter casting his vote for a party list of candidates. The Prime Minister and Cabinet are responsible collectively to a National Assembly of 53 members elected by secret ballot; the voting age is 21. Amendments to important sections of the Constitution require the support of a majority of voters in a referendum, or in certain circumstances, a two-thirds majority of all members of the National Assembly.

An important feature of the Constitution is its provision for the appointment of an *Ombudsman*. The life of the existing Assembly, presided over by a Speaker, who may or may not be a Member of the Assembly is four years, but future Assemblies will continue for up to five years from the date of the first meeting after the dissolution of the previous Assembly. The present Government, which came to power following the General Election on December 7, 1964, is a coalition of the People's National Congress (22 members) and United Force (7 members) with the People's Progressive Party (24 members, 3 of whom have since resigned, 2 joining the People's National Congress and one sitting as an Independent member) as the Opposition. The Attorney-General and the Ministers of Information and Trade are members of the Cabinet but not elected members of the National Assembly.

CAPITAL.—Georgetown. Estimated population, including environs, 176,100. New Amsterdam has a population of 15,000.

JUDICATURE

The Supreme Court of Judicature consists of ■ Court of Appeal and a High Court. There are also Courts of Summary Jurisdiction. The Court of Appeal consists of the Chancellor, as President, the Chief Justice and such number of Justices of Appeal as may be prescribed by Parliament. This Court came into operation on June 30, 1966. *Chancellor and President of the Court of Appeal, Hon. Sir Kenneth Stevewright Stoby.*

Chief Justice, Hon. H. B. S. Bollers.

Justices of Appeal, Hon. E. V. Luckhoo, Q.C.; Hon. G. L. B. Persaud; Hon. P. A. Cummings.

The High Court consists of the Chief Justice, as President, and nine Puisne Judges. It is ■ court with unlimited jurisdiction in civil matters and exercises exclusive jurisdiction in probate, divorce and admiralty, and certain other matters. It also sits ■ a Full Court of the High Court of the Supreme Court of Judicature comprising not less than 2 Puisne Judges and then its jurisdiction is almost entirely appellate.

Chief Justice and President of the High Court, Hon. H. B. S. Bollers.

Puisne Judges, Hons. Akbar Khan; V. E. Crane; A. Chung; G. A. S. Van Sertima; D. Jhappan; C. J. E. Fung-a-Fatt; H. L. Mitchell; F. Vieira; K. M. George.

Production, etc.—Much of the country is forest. The cultivated portion (about 600,000 acres, of which 98,000 are under sugar-cane and 311,000 in rice) is largely confined to the narrow coastal alluvial belt. There are extensive deposits of gold, diamonds, manganese, bauxite and mica.

Communications.—There were 12,070 telephones in use in 1967; the Georgetown Automatic Exchange had 5,474 direct extension lines involving

9,256 stations. 17 sub-automatic and 3 manual exchanges provided an additional 1,677 direct extension lines with 2,814 telephone stations. 39 land-line telegraph stations are maintained at coastal post offices and telegraph stations in the interior, providing communications with the coast. In Georgetown a central radio station, operated by the Guyana Telecommunication Corporation, provides radio-telephone communication with 5 branch offices, 14 stations operated by other Government departments, and 35 private concerns. Overseas radio and telephone services are provided by Cable and Wireless (W.I.) Ltd., in association with the Guyana Telecommunication Corporation. At the end of 1967, there were 47 district post offices at which all classes of postal business were transacted and 13 travelling post offices and postal agencies. There are two broadcasting stations, which are operated on a commercial basis by private enterprise. There are 95 miles of railway, and the Guyana Airways Corporation (Government) provides internal air-services.

Education.—On August 31, 1967, there were 381 Government-owned and Government-aided all-age schools in the country. These had an enrolment of 167,905 pupils. The 25 Government-owned and 14 Government-aided Secondary Schools had an enrolment of 17,615 students, while there were about 34 private Secondary Schools with ■ estimated 9,450 students. At the Government Training College and the 5 vocational schools there were 600 and 1,926 students respectively. The University of Guyana has an enrolment of 630.

CONSTITUTION

The Constitution of India came into force on January 26, 1950. The Constitution provides for a single and uniform citizenship for the whole of India, with the right of vote for every adult citizen.

EXECUTIVE

The executive of the Indian Union consists of the President (Rashtrapati), the Vice-President and the Council of Ministers. The President is elected for five years by an electoral college consisting of all elected members of Parliament and of the various State Legislative Assemblies. The Vice-President is also elected for five years by members of the two Houses of Parliament. As head of the State the President exercises his functions with the aid and advice of the Council of Ministers headed by the Prime Minister. The Council is collectively responsible to the House of the People.

LEGISLATURE

The Legislature of the Union is called Parliament. It consists of two Houses known as the Council of States (*Rajya Sabha*) and the House of the People (*Lok Sabha*). The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest are indirectly elected by the Legislative Assemblies of the various States. The Council is not subject to dissolution, one-third of its members retiring every two years. The House of the People consists of not more than 500 members directly elected from

territorial constituencies in the States and on the basis of adult franchise and not more than 25 members to represent the Union Territories, chosen in such manner as Parliament provides. The House has a maximum duration of five years.

Subject to the provisions of the Constitution the Union Parliament can make laws for the whole of India and the State legislatures for their respective units. The distribution of legislative powers is governed by a system of three lists—the Union, the State and the Concurrent—under which all legislative activity has been mapped out. The Union Parliament has exclusive powers to legislate on 97 subjects of all-India importance, such as defence, foreign affairs, communications, railways, currency and banking, insurance, customs duties, etc. The State List contains 66 headings, e.g. public order and police, justice, education, public health, local government, agriculture, etc. The Concurrent List contains 47 subjects of common interest to the Union and the States.

OFFICIAL LANGUAGE

The Constitution (Art. 343) provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English, which was originally to continue as the official language for a period of 15 years from the commencement of the Constitution (January 1950), will, under the Official Language Act, 1963, still be used after that time in addition to Hindi.

THE JUDICATURE

The Supreme Court of India, consisting of a Chief Justice and not more than 13 associate judges, is the highest court in respect of constitutional matters. It is also the final Court of Appeal in the country.

Chief Justice, Mohammad Hidayatullah (1968) Rs. 60,000

 A. N. Grover..... each Rs. 48,000

DEFENCE

The supreme command of the armed forces is vested in the President. Administrative and operational control resides in the Army, Navy and Air Headquarters under the supervision of the Ministry of Defence.

The Army has 4 Commands, Southern, Eastern, Western and Central, with headquarters at Poona, Calcutta, Simla and Lucknow respectively. A Territorial Force was inaugurated in Oct. 1949. A National Cadet Corps, with senior, junior, and girls' divisions, has also been raised.

The Indian Navy consists of an aircraft-carrier, two cruisers and a number of destroyers, frigates, minesweepers and auxiliary vessels. A Naval aviation wing and a hydrographic office have also been set up.

The Indian Air Force is organised in five major formations, the Western, Eastern and Central Air Commands, and the Training and Maintenance Commands.

EDUCATION

In 1964-65, there were 2,898 pre-primary schools, 385,250 primary schools, 96,150 secondary schools, 266,080 vocational and technical schools including special education schools, 1,606 arts, science and commerce colleges, including research institutions and 2,370 colleges for professional and other education. There were 70 universities at the end of 1967.

PRODUCTION

About 70 per cent. of the inhabitants of India are dependent on agricultural pursuits. Most of the agricultural holdings are less than 5 acres. Food crops occupy four-fifths of the cultivated land. There are about 176,000,000 cattle, or about a quarter of the world's cattle population.

Jamaica

Jamaica is situated in the Caribbean Sea south of the eastern extremity of Cuba and lies between latitudes $17^{\circ} 43'$ and $18^{\circ} 32'$ North, and longitude $76^{\circ} 11'$ and $78^{\circ} 21'$ West. The island was discovered by Columbus on May 4, 1494, and occupied by the Spanish from 1509 until 1655 when a British expedition, sent out by Oliver Cromwell, under Admiral Penn and General Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid. Jamaica became an independent state within the British Commonwealth on August 6, 1962.

Area and Population.—Jamaica is 4,411 square miles in area and is divided into three counties (Surrey, Middlesex and Cornwall) and 14 parishes. The surface of the island is extremely mountainous, the highest peak being 7,402 ft. above sea level. The greatest length from east to west (Morant Point to Negril Point) is 146 miles and the extreme breadth 51 miles. At the end of 1967, Jamaica's population was estimated to be 1,893,000. Jamaica, for climatic and other reasons is a popular tourist resort, attracting visitors mainly from the U.S.A. The total number of visitor arrivals in 1967 was 332,838. Tourist expenditure in 1967 was estimated at £28,700,000, compared with £28,000,000 in 1966.

Physical Features.—The topography consists mainly of coastal plains, divided by the Blue Mountain Range in the east, and the hills and limestone plateaux which occupy the central and western areas of the interior. The central chain of high peaks of the Blue Mountains is over 6,000 feet above sea level, and the Blue Mountain Peak, the highest of these, reaches an elevation of 7,402 feet. The rivers flow down from the central mountainous area. Most of the rivers are narrow and fast flowing, and some have rapids. In general those flowing south are longer and are fed by more tributaries than those flowing north. None is navigable except the Black River, and that only for small craft.

CAPITAL.—The seat of government is Kingston, the largest town and seaport (estimated population of the Corporate area of Kingston and St. Andrew in 1967, 525,290). Other towns are Montego Bay (28,000) and Spanish Town (17,000).

NATIONAL DAY.—First Monday in August (Independence Day).

GOVERNMENT

The Legislature consists of a Senate of 21 nominated members and a House of Representatives consisting of 53 members elected by universal adult suffrage. The number of members cannot be fewer than 45 nor more than 60. The Senate has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives. The Constitution provides for a Leader of the Opposition.

COMMUNICATIONS

There are several excellent harbours, Kingston being the principal port. The island is intersected by 2,682 miles of main road, of which 1,730 are asphalted. There are 241 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages.

There are two international airports capable of handling the largest civil jet aircraft, the Palisadoes Airport on the south coast serving Kingston, and the Montego Bay Airport on the north coast serving the major tourist areas. In addition there are licensed aerodromes at Port Antonio and Ocho Rios which are used by Jamaica Air Service on scheduled domestic flights. There are nearly 40 private airstrips.

Air Jamaica, the national airline formed by the Government of Jamaica in association with B.O.A.C. and British West Indian Airways, which was inaugurated on May 1, 1966, operates scheduled services between U.S.A. and Jamaica. Ten other international carriers provide air communication with Europe, North, Central and South America and the Caribbean islands. They are:—B.O.A.C., British West Indian Airways, Air Canada, Pan American World Airways, K.L.M., Delta, Lufthansa, Cayman Brac Airways, Mexicana Airlines and Air Caribbean Transport Ltd.

Scheduled internal routes are operated by Jamaica Air Services Ltd. There is also an air taxi service.

PRODUCTION

Most of the staple products of tropical climates are grown. Sugar and rum are manufactured and exported (the latter is still counted the best in the world), and fine quality coffee is grown in certain areas of the Blue Mountains. Sugar production in 1967 amounted to 449,000 tons. There is trade in fruits, chiefly bananas, with U.K. Citrus, cocoa, coffee, pimento and ginger are important export crops. Jamaica has developed a breed of dairy cattle

known as Jamaica Hope and a beef breed, the Jamaica Black. Jamaica is now the largest producer of bauxite in the world; output for 1967 was 9,085,000 tons. The bauxite deposits are worked by one Canadian and three U.S. companies; the Canadian company processes bauxite into alumina. Further expansion of the industry is in progress. Gypsum is also mined, production in 1967 being 199,423 tons. Cement is manufactured locally, the output of the factory being 330,000 tons in 1967. The Esso Oil Refinery processes 26,000 barrels of crude oil daily. The Jamaica Industrial Development Corporation is responsible for implementing the Government's industrial development programme. This Corporation administers incentive legislation which was enacted to stimulate the establishment of industries locally. In addition to undertaking promotional activities both locally and abroad, the Corporation maintains branch offices in Montego Bay, Jamaica, in the United States, Canada and the United Kingdom. In the last decade, manufacturing has grown from the processing of a few agricultural products into the production of a whole new range of commodities dependent on both local and foreign raw materials.

Kenya

Kenya is bisected by the equator and extends approximately from latitude 4° N. to latitude 4° S. and from longitude 34° E. to 41° E. From the coast of the Indian Ocean in the east, the borders of Kenya are with Somalia in the east and Ethiopia and Sudan in the north and north-west. To the west lie Uganda and Lake Victoria. On the south is Tanzania. The total area is 224,960 square miles (including 5,224 square miles of water). At the end of June, 1967, the population was estimated at 9,948,000, including small Asian, European and Arab minorities. The country is divided into 7 Provinces (Nyanza, Rift Valley, Central, Coast, Western, Eastern and North-Eastern).

CAPITAL.—Nairobi, situated at latitude 2° S. and longitude 36° 49' E. at 5,453 feet above sea level, covers an area of 266 sq. miles and has a population of about 400,000. It is 307 miles by road from Mombasa, the country's main port. Mombasa possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Eldoret, Kisumu, Nakuru and Nyeri.

Nairobi: transit from London about 26 days by sea; by air, 1 day.

NATIONAL DAY.—December 12.

GOVERNMENT

Kenya became an independent state and a member of the British Commonwealth on December 12, 1963, after six months of internal self-government. The National Assembly has two Houses, the Senate and the House of Representatives. Kenya became a Republic on Dec. 12, 1964.

Production.—Agriculture provides about 38 per cent. of the national income; the principal exports in 1966 included: coffee, £18,780,099; tea, £8,714,061; petroleum products, £5,678,340; sisal, £3,340,089; meat products, £2,993,846; pyrethrum, £2,396,634; wattle extract, £1,111,181; hides and skins, £2,573,208. The great variation in altitude and ecology provide conditions under which a wide range of crops can be grown. These include wheat, barley, pyrethrum, coffee, tea, sisal, coco-nuts, cashew nuts, cotton, maize, and a wide variety of tropical and temperate fruits and vegetables. The total area of high potential land on which concentrated alternate husbandry can be practised, amounts to only 16,761 sq. miles, or 11·9 per cent. of the total land area. The remainder is arid or semi-arid country suitable for stock raising. In the areas of high potential, many of the old, large scale farms, formerly farmed by Europeans, have been bought by the Government for settlement of landless people.

In 1966 Kenya's forest area totalled 4,159,304 acres, of which 228,228 acres were under plantation. Timber exports in 1966 were valued at £601,920, including charcoal (£48,715) and wood carvings, £383,911.

Prospecting and mining are carried on in many parts of the country, the principal minerals produced being soda ash, salt and limestone. Small amounts of gold and silver are also mined. Value of all minerals produced in 1965 was £2,500,000.

Hydro-electric power has been developed, particularly on the Upper Tana and Mathioya Rivers. Owen Falls Dam scheme in Uganda is connected to Nairobi and electricity is available throughout the

country. The first stage of an important national hydro-electric project was inaugurated by the President in 1965—the Seven Forks Project, which is expected to produce 280 mW on completion within 12 years. Total cost of the project was estimated at £37,000,000.

There has been considerable industrial development over the last 15 years and Kenya has a wide variety of industries processing agricultural produce and manufacturing an increasing range of products from local and imported raw materials. New industries have recently come into being such as an oil refinery, three textile mills, dehydrated vegetable processing and motor battery manufacture as well as many smaller schemes which have added to the country's already considerable consumer goods. The market served comprises all the East African territories and the volume of exports to adjoining African and Indian Ocean countries is increasing year by year. Industrial areas have been developed in all the principal towns and light industrial areas exist in many rural areas. The Kenya Government is actively encouraging investment in the industrial sector and has recently passed a Foreign Investments Protection Act to protect such investments.

The main imports are manufactured goods, classified chiefly as materials, machinery and transport equipment, mineral fuels, lubricants and related fuels, food and chemicals.

Communications.—The East African Railways and Harbours are a self-contained and self-financing service of the East African Common Services Organization; the railway, which is metre gauge, has a total route mileage of open line of 3,670 miles (1,270 miles in Kenya). In addition the East African Railways and Harbours operate a marine service on Lakes Victoria and Tanganyika, with a route mileage of 3,469 miles. There are also 2,367 miles of road services providing regular transport to the Southern Highlands of Tanzania, and beyond the railhead at Pakwach in Uganda. East African Railways and Harbours control the four seaports of Mombasa, Tanga, Dar-es-Salaam and Mtwara. Mombasa, Dar-es-Salaam and Mtwara have deep-water berths and Tanga is a lighterage port.

Scheduled trunk airline services are operated to and from Kenya, through Nairobi airport, by East African Airways, B.O.A.C., Air India, Air France, Central African Airways, Scandinavian Airlines System, British United Airways, Alitalia, Ethiopian Airlines and El Al Israel Airlines, while regional scheduled services were also run by East African Airways, Ethiopian Airlines, Aden Airways, Central African Airways, Air Congo, Air Malawi and Zambia Airways.

The country has approximately 26,000 miles of road including 3,850 miles of trunk roads and 6,200 miles of secondary roads. There is a total of 1,336 miles of bitumen-surfaced roads, apart from town streets, etc.

Lesotho

Lesotho (formerly Basutoland) is an enclave within the Republic of South Africa and is bounded north and west by the Orange Free State, east by Natal and East Griqualand, and south by the Cape Province, with an area of 11,716 square miles. The land, which is mountainous, rising to over 11,000 ft. in places, is held in trust for the Basotho by the King. The population of Lesotho is approximately 1,000,000. **CAPITAL.**—Maseru, population (1967), 10,000. Maseru is distant from London 7,668 miles. Transit via the Cape about 20 days; by air, 3 days.

Government.—Lesotho consists of nine districts each with its Principal Chief working in close co-operation with an Administrative Secretary. It is governed under parliamentary democracy and has two houses of Parliament, a Senate composed of 22 Principal and Ward Chiefs who are members by virtue of their position as Chiefs and 11 Nominees of the King; and a Legislative Assembly composed of 60 Elected Members and a Cabinet. The Parliament has power to legislate for all persons in Lesotho in respect of all matters. The Lesotho Courts of Law consists of: (a) The Court of Appeal, (b) The High Court, (c) The Subordinate Courts including the Courts of Judicial Commissioners and the Basotho Courts. Appeals lie to the Privy Council by leave of the Chief Justice of Lesotho.

Head of State, His Majesty King Moshoeshoe II, acceded 1966.

British Council Representative, P. J. Hall.

Education.—In 1966 there were 1,111 primary schools and 24 secondary schools. The total enrolment at secondary schools in 1966 was 2,776. 220 Lesotho students entered university courses in 1966.

Communications.—There are no railways in Lesotho with the exception of 1 mile of the South

African Railways which enters Lesotho at Maseru from the Orange Free State. A main road runs from Buthe Buthe in Northern Lesotho to Quthing in the South. It connects all the Government Stations with the exception of Qacha's Nek and Mokhotlong. Qacha's Nek is accessible by road from Matatiele in East Griqualand and there is a jeep service up the Sani Pass to Mokhotlong. There are 28 air-strips in the Territory, of which 5 are used by a regular internal air service. One of the 5 in Maseru is now being used by a twice weekly external service between Maseru and Jan Smuts Airport. The service began on October 2, 1967. The internal air service carries mail and goods to and from otherwise inaccessible mountain regions and in addition there is a Flying Doctor service. The remaining air-strips are used mainly by traders and missions.

Production, etc.—The economy of Lesotho is mainly agrarian. At the last enumeration (1966) live stock numbers were: Cattle, 278,940; Sheep, 1,477,340; Goats, 817,257; and Horses, 80,000. 9,494,051 lb. of wool, valued at R1,996,861, and 2,351,443 lb. of mohair, valued at R942,904 were exported in 1965-66.

FINANCE

Lesotho is a poor and unproductive country. The principal sources of revenue are customs and excise duty, taxes, and wool and mohair export duty.

The total estimated revenue for 1966-67 was R9,856,311 including a United Kingdom grant of R5,733,431. The expenditure is R9,615,351. There is no direct trade between the Territory and the U.K.

Malawi

MALAWI, formerly the Nyasaland Protectorate, comprises Lake Malawi (formerly Lake Nyasa) and its western shore, with the high table-land separating it from the basin of the Luangwa River, the watershed forming the western frontier with Zambia; south of the lake Malawi reaches almost to the Zambezi and is surrounded by Portuguese East Africa (Mozambique) the frontier lying on the west on the watershed of the Zambezi and Shire Rivers, and to the east on the Ruvo, a tributary of the Shire and Lakes Chiuta and Chilwa. This boundary reaches the eastern shore of Lake Malawi and extends up to the mid-point of the lake for about half its length where it returns to the eastern and northern shores to form a frontier with Tanzania.

Malawi has a total area of 45,411 sq. miles (land area, 36,145). The provisional population total from the Census of August 1966 is 4,042,412 (52 per cent. female) (Africans, 4,023,193, Asians 10,880, Europeans 7,046). Coloureds are classified as Africans.

CAPITAL.—Zomba (population 19,616). The city of Blantyre, incorporating Blantyre and Limba, is the major commercial and industrial centre and headquarters of the Southern region. Other main centres are: Lilongwe, headquarters of the Central Region and the site chosen for the new capital of Malawi for which an initial loan of £4,700,000 has been promised by the South African Government; Mzuzu, headquarters of the Northern Region; Cholo, Mlanje, Fort Johnston, Mzimba and Nkhotakota.

FLAG.—Horizontal stripes of black, red and green, with rising sun in centre of the black stripe.

Government.—Malawi became a republic on July 6, 1966, having assumed internal self-government on February 1, 1963 and is a member of the Commonwealth. There is a Cabinet consisting of the President and 8 other Ministers. The National Assembly consists of 50 members, each elected by universal suffrage. Under the Constitution Act, 1966, the President exercises power to nominate in addition up to five members to represent special interests. Being a one-party State (the Malawi Congress Party), all elected members

are required to be members of the Party. The Assembly, which usually meets three times a year, is presided over by a Speaker, who need not himself be a member of it.

President, Minister of External Affairs, Justice, Works and Supplies, Dr. Hastings Kamuzu Banda.

British Council Representative, R. P. K. Harrison, M.B.E., Glyn Jones Road, Blantyre.

Education.—Primary education is the responsibility of local authorities in both urban and rural areas. The Ministry is responsible for policy, school curricula, secondary education, teachers' and technical training. Religious bodies, with Government assistance, still play an important part in primary and secondary education and teacher training. Further training is pursued at the University of Malawi, opened in September 1965. In January 1967, there were 177 students studying for degrees and 300 for diplomas at five constituent colleges.

Communications.—A single-track railway runs from the south-western area of Lake Malawi (itself

served by two passenger and a number of cargo boats) through Blantyre to the southern frontier into Mozambique, crossing the Zambezi River by a bridge 12,050 feet long, and connecting with the Mozambique port of Beira, which handles the bulk of the country's imports and exports. Work started in May, 1968, on a rail link with the Northern Mozambique port of Nacala which is planned to be complete by the end of 1970. A good-class earth road system covers the whole country and is already tarmacadamized from Mlanje through Blantyre and Zomba to Liwonde where the new Nacala rail link will cross the Shire River and run in an easterly direction, and also from Lilongwe to the lake-shore at Salima, northern terminus of the railway. Construction has already started on a double width bitumen road from Liwonde through Lilongwe and will eventually extend to the Zambian border at Moinjini.

Agriculture is the country's mainstay, the principal exports being tea, tobacco, cotton and ground-nuts. The value of exports of these crops in 1967 was: tea, £4,525,000; tobacco, £4,232,000; groundnuts, £3,434,000; maize, £1,638,000; cotton, £716,000; dried vegetables, £764,000. Other agricultural exports include tung oil, rice, sisal, casava and coffee. Sugar production started in the Lower Shire, Southern Region, in August 1966. Imports are mainly clothing materials, vehicles, fuels and machinery.

Malaysia

Malaysia, comprising Malaya, Sabah and Sarawak, forms a crescent well over 1,000 miles long between latitudes 1° and 7° North latitude and longitudes 100° and 119° East. It occupies two distinct regions—the Malay Peninsula which extends from the Isthmus of Kra to the Singapore Strait and the North-West Coastal area of the Island of Borneo. Each is separated from the other by 400 miles of the South China Sea. The total area is about 130,000 square miles of which about 75 per cent. is still forest and underdeveloped.

Climate.—The whole region is open to maritime influences and is subject to the interplay of wind systems which originate in the Indian Ocean and the South China Sea. The year is commonly divided into the Southwest and Northwest monsoon seasons. Rainfall averages about 100 inches throughout the year, though the annual fall varies from place to place and from year to year. The average daily temperature throughout Malaysia varies from 70° Fahrenheit to 90° Fahrenheit, though in higher areas temperatures are lower and vary widely.

CAPITAL.—Kuala Lumpur, also capital of Selangor (estimated population, 500,000). Chief town of Sarawak is Kuching (51,403). Chief town of Sabah is Jesselton 21,497.

LANGUAGE.—Malay is the national language. In Sabah and Sarawak English continues to be the official language until the State Legislatures decide otherwise. **RELIGION.**—Islam is the official religion of Malaysia, each Ruler being the head of religion in his State, though the Heads of State of Sabah and Sarawak are not heads of the Muslim religion in their States. The Yang di-Pertuan Agong is the head of religion in Malacca and Penang. There is no State religion in Sabah or Sarawak and the Constitution guarantees religious freedom. **NATIONAL DAY.**—August 31 (*Hari Malaysia*).

FLAG.—Equal horizontal stripes of red (7) and white (7); 14 point yellow star and crescent in blue canton.

GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, as a result of an agreement between H.M. the Queen and the Rulers of the Malay States, whereby Her Majesty relinquished all powers and jurisdiction over the Malay States and over the Settlements of Penang and Malacca which then became States of the Federation. After prolonged discussions in Kuala Lumpur and London, the Federation was enlarged on Sept. 16, 1963, by the accession of the further states of Singapore, Sabah (formerly British North Borneo) and Sarawak, and the name of MALAYSIA was adopted from that date. In view of strong opposition by Indonesia and the Philippines to Sabah and Sarawak joining Malaysia, its establishment was postponed briefly to allow the Borneo territories to be visited by United Nations' official observers who reported that the people of Sarawak and Sabah were in favour of joining Malaysia. On Aug. 9, 1965, Singapore seceded from the Federation.

The Constitution was designed to ensure the existence of a strong Federal Government and also a measure of autonomy for the State Governments. It provides for a constitutional Supreme Head of the Federation (His Majesty the Yang di-Pertuan Agong) to be elected for a term of 5 years by the Rulers from among their number, and for a Deputy Supreme Head (His Highness the Timbalan Yang di-Pertuan Agong) to be similarly elected. The Malay Rulers are either chosen or succeed to their position in accordance with the custom of the particular state. In other states of Malaysia choice of the Head of State is in the discretion of the Yang di-Pertuan Agong after consultation with the Chief Minister of the State. The first heads of state appointed for Sarawak, Sabah and Singapore jointly by H.M. the Queen and the Yang di-Pertuan Agong were the Governor of Sarawak, the Yang di-Pertua Negara (Sabah) and the Yang di-Pertuan Negara (Singapore). Save in certain instances provided in the Constitution, the Supreme Head acts in accordance with the advice of a Cabinet appointed by him from among the members of Parliament on the advice of the Prime Minister. The Supreme Head appoints as Prime Minister the person who in his judgment is likely to command the confidence of the majority of the members of the House of Representatives.

LEGISLATURE

The Federal Parliament consists of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) consists of 58 members under a President (*Yang di-Pertua Dewan Negara*), 26

elected by the Legislative Assemblies of the States (2 from each) and 32 appointed by the Yang di-Pertuan Agong from persons who have achieved distinction in major fields of activity or are representative of racial minorities, including the Aborigines. The House of Representatives (Dewan Ra'ayat), consists of 144 members (States of Malaya, 104; Sarawak, 24; and Sabah, 16). Members are elected on the principle of universal adult suffrage with a common electoral roll. Sabah had its first direct elections in 1967, and direct elections to the Legislative Assembly in Sarawak were due in 1968. The House of Representatives is presided over by a Speaker who is either a member of the House or is qualified to be elected as a member.

Speaker, C. M. Yusoff.

The Constitution provides that each State shall have a simplified version of the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the Menteri Besar or Chief Minister and a single chamber Legislative Assembly. Three *ex officio* members sit in the Executive Council besides these elected members. They are the State Secretary, the State Legal Adviser and the State Financial Officer. The State Constitutions provide for the Ruler or Governor to appoint as Menteri Besar or Chief Minister, to preside over the Executive Council, a member of the Legislative Assembly who in his judgment is likely to command the confidence of the majority of the members of the Assembly. The Legislative Assemblies are fully elected on the same basis ■ the Federal Parliament.

Legislative powers are divided into a Federal List, a State List and ■ Concurrent List, with residual powers vested in the State Legislatures. The Federal List comprises broadly, external affairs, defence, civil and criminal law and justice, the machinery of government, finance, commerce and industry, communications and transport, power, education, medicine and labour and social security. The State List includes land, agriculture and forestry, local government and services and the machinery of state government. In the Concurrent List are, *inter alia*, social welfare, wild-life, animal husbandry, town and country planning, public health and drainage and irrigation.

JUDICATURE

The Judicial System consists of a Federal Court and two High Courts of co-ordinate jurisdiction and status, one in the States of Malaya and one in the Borneo States. The Federal Court is presided over by the Lord President. This Court has exclusive jurisdiction to determine appeals from decisions of a High Court. The High Court consists of ■ Chief Justice and other judges. Subordinate Courts consist of Sessions Courts, Magistrates' Courts and Local Courts called Penghulus Courts.

*Lord President of the Federal Court, Tan Sri Syed
Sheh Barakbah.*

*Chief Justice of the High Court of Malaya, Tan Sri
Azuri bin Haji Mohamed.*

*Chief Justice of the High Court in the Borneo States,
Dato P. E. H. Pike.*

DEFENCE

The Malaysian Armed Forces consist of the Army, Navy and Air Force, together with volunteer and auxiliary forces for each arm. The responsibility for command, discipline and administration under the general authority of the Supreme Head of Malaysia, rests with the Armed Forces Council under the Chairmanship of the

Minister of Defence. The Council is not responsible for the operational use of the Forces. The Chief of the Armed Forces Staff is the senior military member of the Council.

A Committee of the Cabinet known as the National Defence Council is responsible for policy connected with higher defence. This Council is under the chairmanship of the Prime Minister.

An agreement exists between the Government of the United Kingdom and the Government of Malaysia on external defence and mutual assistance under which the United Kingdom has the right to maintain in Malaysia such military forces, including a Commonwealth Strategic Reserve, as are agreed to be necessary to enable it to meet its obligations. The Australian and New Zealand Governments are associated with this agreement.

PRODUCTION AND TRADE

Malaysia is essentially an agricultural country. It is the world's leading producer and exporter of natural rubber, tin and palm oil. Other major export commodities are timber and timber products, canned pineapples, iron ore, copra, palm kernels, pepper, sago and crude petroleum. With the rapid expansion in the manufacturing sector, Malaysia is also increasing her export of manufactured and semi-manufactured products. Another commodity which is produced throughout Malaysia is rice, the staple food of Malaysians. In 1967 Malaysia produced about two-thirds of its domestic rice requirements with the remaining portion being imported, mainly from Thailand. To achieve self-sufficiency, various measures aimed at increasing output and productivity including wider use of improved seeds and fertilizers, expansion of double-cropping through the provision of more irrigation facilities and research programmes to improve rice yields, are being introduced.

Imports, on the other hand, consist mainly of foodstuffs, manufactured consumer goods, machinery, mineral fuels and lubricants, chemicals, textiles and tobacco—both for feeding her growing population and to accelerate the pace of her economic growth and development. However, with increasing industrialization and fairly rapid industrial expansion, her imports of manufactured consumer goods are steadily declining.

Foreign Trade of Malaysia

Malaysia's total trade has declined in value from \$7,224·5 million in 1966 to \$7,946·3 million in 1967—a direct result of the decline in the prices of her primary exports, in particular, rubber, tin, palm oil and iron ore. Imports also declined as a result of rapid expansion in industrialization, thereby increasing import substitution of consumer goods.

Malta, G.C.

Malta lies in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94·9 square miles. Malta includes also the adjoining island of Gozo (area 25·9 sq. miles); Comino and minor islets. The estimated population on Dec. 31, 1966 was 318,109.

Malta was in turn held by the Phoenicians, Greeks, Carthaginians, Romans and Arabs. In 1090 it was conquered by the Norman Count Roger of Normandy. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and the island was subsequently blockaded by the British fleet. The Maltese people freely requested the protection of the British Crown in 1802 on condition that their rights and privileges would be preserved and respected. In 1806 it sustained the famous siege, when the last great effort of the Turks was successfully withheld by Grandmaster La Vallette. The islands were finally annexed to the British Crown by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withheld the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged. In recognition of the part played by the Maltese people, King George VI awarded the George Cross to the island.

The climate, although not tropical, is hot in summer. The islands are intensively cultivated. The chief export crops are potatoes and onions. Wheat, barley, clover and tomatoes are extensively grown on dry lands, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and non-irrigated land. Agriculture and fishing are among the principal occupations of the inhabitants.

Mdina (Notabile), the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Old Seminary; its population has now dwindled to 835, but its suburb, Rabat, has 12,250 inhabitants. Notabile has been entirely eclipsed in importance by the modern capital, Ψ Valletta, which was founded in 1566. The Grand Harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call and ship repairing centre for vessels, being about half-way between Gibraltar and Port Said.

Government.—Following the report of a Constitutional Commission under the chairmanship of Sir Hilary Blood, a new Constitution for Malta was introduced by the Malta (Constitution) Order in Council, 1961, under which the Island became known as "the State of Malta". On Sept. 21, 1964, the Malta (Constitution) Order in Council, 1961, was revoked and replaced by the Malta Independence Order, 1964, by the terms of which Malta became an independent state within the Commonwealth. Elections under the Malta Independence Order, 1964, were held in March, 1966, for the 50 seats in the House of Representatives and they resulted as follows: Nationalist Party, 28 seats; Malta Labour Party, 22 seats. Maltese and English are the official languages of administration and Maltese is ordinarily the official language in all the courts of law and the language of general use in the islands.

During the same year, 574 students were registered with the Royal University of Malta. There were 78 private schools with 9,049 boys and 8,547 girls, of which 26 were subsidized by the Government. Adult education classes had an attendance of 662 in 1966-67. English and Maltese are taught in all classes in Government primary schools. In religion the Maltese are Roman Catholics. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phoenician tongues. There is ■ Maltese order of nobility, recognized by the Crown, consisting of 28 families.

Mauritius

Mauritius is an island group lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'-57° 46' E. long. and lat. 10° 58'-20° 33' S., and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1962 was: Mauritius, 681,619; Rodriguez, 18,335; Lesser Dependencies, 1,062, made up of Europeans (mainly of French extraction), Asiatic races and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1966) at: Mauritius 782,044; Rodriguez, 20,600.

Mauritius was discovered in 1511 by the Portuguese; the Dutch visited it in 1508, and named it Mauritius, in honour of the Stadholder, Prince Maurice of Nassau. From 1638 to 1710 it was held as ■ small Dutch colony and in 1715 the French took possession but did not settle it until 1721. Mauritius was taken by ■ British force in 1810. A British garrison remained on the island until its withdrawal in June 1960. The French language and French law have been preserved under British rule.

Climate.—Mauritius enjoys a sub-tropical maritime climate, with sufficient difference between summer and winter to avoid monotony; further variation is introduced by the wide range of rainfall and temperature resulting from the mountainous nature of the island. Humidity is rather high throughout the year and rainfall is sufficient to maintain a green cover of vegetation, except for a brief period in the driest districts.

CAPITAL.—Port Louis, population (1967), 136,200; other centres are Beau Bassin and Rose Hill (60,800); Curepipe (50,500); Vacoas and Phoenix (47,450) and Quatre Bornes (44,150). **FLAG.**—Red, blue, gold and green stripes.

Government.—A Crown Colony for 158 years, Mauritius became an independent state within the Commonwealth on March 12, 1968. The Constitution defined by Order in Council in 1964 was slightly altered in 1966 on the recommendation of the Banwell Commission, the effect being to increase the membership of the Legislative Assembly to 70, 62 elected by block voting in multi-member constituencies (including ■ members for Rodriguez) and 8 specially-elected members. Of the latter, 4 seats go to the "best losers" of whichever communities in the island are under-represented in the Assembly after the General Election and the four remaining seats are allocated on the basis of both party and community. The Constitution provides for the appointment of a Governor-General who acts on the advice of the Council of Ministers, collectively responsible to the Legislative Assembly. At the General Election held in August, 1967, the Independence Party led by Sir Seewoosagur Ramgoolam obtained 39 seats and the Parti Mauricien led by Mr. Gaetan Duval, 23 seats. After appointment of the specially elected members the composition of the Legislative Assembly was: Independence Party, 43; Parti Mauricien, 27. Mauritius became the 124th member of the United Nations on April 24, 1968.

Defence.—A defence agreement signed between Britain and Mauritius on Mar. 12, 1968, provides for joint consultation on any request by the Government of Mauritius for assistance in the event of a threat to the island's internal security. The agreement runs for six years. It provides various rights and defence facilities in Mauritius for the United Kingdom, which agrees to help in training and equipping local police and security forces.

Education.—Regular classes are run up to University entrance level, but facilities are available for the preparation of University external degrees. Primary education is provided in 340 schools of which 168 are government and 55 aided. Secondary education is given in four government schools—one with a technical stream—13 aided and 127 private schools. There are also 3 senior primary schools one of which is co-educational, 5 vocational training centres, and a teacher training college. Education is not yet compulsory but over 89 per cent. of children in the primary age group go to primary school and more than 1 child in 4 in the secondary age group goes to secondary school. Recurrent expenditure on education in 1965–66 totalled Rs.26,882,866.

Communications.—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered in 1966 amounted to 1,847,628 tons, and the shipping cleared to 1,856,875 tons. There were 78 post-offices and postal agencies, 51 telegraph offices, 19 telephone-exchange offices and 14,399 telephone installations in the island. Mauritius is served by the international airport situated at Plaisance, in the south-east of the island, about 5 miles from Mahébourg. Scheduled services are operated by B.O.A.C., Air France, Qantas, South African Airways, Central African Airways and East African Airways. There are 8 daily newspapers published, mostly in French with occasional articles in English, and 4 Chinese daily papers. The Mauritian Broadcasting Corporation has a monopoly of radio broadcasting in the country. Television was introduced in February, 1965.

Production, etc..—Of the total cultivable area of about 227,000 acres, 216,000 are under sugar, about 250 under aloe (regular plantations), 450 under maize, 7,100 under tea, 1,300 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1967 was 638,300 metric tons, 3,118 metric tons per acre.

Finance.—The main sources of revenue are income tax, customs and excise duties (mainly on imports) and there is an export tax on sugar.

Rodrigues, 350 miles east-north-east of Mauritius, area, 40 square miles. Population (1966) 20,600. Cattle, salt fish, sheep, goats, pigs and onions are the principal exports. The island is under the administration of a Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Governor of Mauritius. Magistrate, P. Y. Espitalier-Noël.

Other Dependencies.—Two of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coconut oil. The other islands, including Six Islands, Peros Banhos, Salomon, Diego Garcia and Trois Frères, are now known as British Indian Ocean Territories and are no longer dependencies.

Republic of Nigeria

(For MAP, see Index).

Area and Population.—The Republic of Nigeria is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west and north by Dahomey and Niger and on the east by the Cameroons Republic. It has an area of 356,669 square miles with a population of approximately 55,000,000. The population is almost entirely African. There are some 28,000 Europeans, Americans, Lebanese and others engaged in Government posts, commerce and Missionary work.

A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is a zone 50–100 miles wide of tropical rain forest and oil-palms. North of this the country rises and the vegetation changes to open woodland and savannah. In the extreme north the country is almost desert. There are few mountains, but in Northern Nigeria the central plateau rises to an average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy

season is from about April to October; rainfall varies from under 25 inches a year in the extreme north to 250 inches on the eastern coast line. During the dry season the *harmattan* wind blows from the desert; it is cool and laden with fine particles of dust.

CAPITAL.—Ψ LAGOS, estimated population, 700,000. Other important towns are Ibadan (1,000,000), Kano (295,432), Iwo (158,583), Ogbomosho (319,881), Oyo (112,349), Oshogbo (208,966), Onitsha (163,032), Ife (130,050), Abeokuta (187,292), Illesha (165,822), Enugu (138,457), Aba (131,003), Maiduguri (139,965), Katsina (90,538), Port Harcourt (179,563), Sokoto (89,817), Zaria (166,170). **FLAG.**—Three equal vertical bands, green, white and green. **NATIONAL DAY.**—October 1 (Republic Day).

GOVERNMENT

Following the military take-over of January 16, 1966, the Federal and Regional Constitutions were suspended, in relation to the offices of President, Prime Minister, Regional Governors and Regional Premiers, and Parliament and the Regional Legislatures were dissolved. The country was divided into 12 new States by decree in May, 1967—six in the former Northern Region, three in the former Eastern Region, the former Mid-West Region remaining as before, the Colony Province of the former Western Region and Lagos forming a new Lagos State, and what remains of the former Western Region. A Federal Military Government, made up of a Supreme Military Council and a Federal Executive Council perform the functions of the former Federal Government and Council of Ministers, while a Regional Military Governor administers each of the 12 States with an Executive Council comprising senior representatives of the Armed Forces and Police in each State and civilians appointed by the Military Governor in his discretion. See also EVENTS OF THE YEAR.

The President

The office of President was suspended in Jan. 1966.

Education.—The University of Ibadan became a fully independent university on Oct. 1, 1962 (2,687 full-time students in 1966). The University at Nsukka, E. Central State (1966) had 2,579 full-time students in 1966. The Universities of Lagos, Zaria and Ife were formally established in 1962. In 1965-66 the University of Lagos had 656 full-time students, Ife 923 and Zaria 956. Free and universal primary education for all children within the 6-12 year age group is now available in West and East Nigeria and in the Territory of Lagos.

Railways.—The Nigerian railway system, which is controlled by the Nigerian Railway Corporation, is the most extensive in Africa. There are 1,870 route miles of lines. There are two major bridges, one over the Niger at Jebba and one over the Benue at Makurdi. The latter is 2,624 ft. long, and it is believed to be the second longest in Africa. The North-western main line runs from Lagos to Kano (700 miles) through the important towns of Abeokuta, Ibadan, Ilorin, Jebba, Minna, Kaduna and Zaria. From Kano the line continues in a north-easterly direction to its terminus at Nguru. This line is also linked with Sokoto by a scheduled railway-road service from Gusau. The eastern line runs from Port Harcourt deep-water quay on the Bonny river through the thickly populated oil palm area to Enugu, where it serves the collieries. It then crosses the Benue and joins the north-western line at Kaduna, 569 miles from Port Harcourt. A branch line runs to Bauchi, Gombe and Maiduguri.

Roads.—There are 45,000 miles of motorable road. Most of the roads have gravelled or earth surfaces, but about 5,500 miles are tarred. An extensive programme of bituminous surfacing is now being carried out. A road bridge over the lower Niger between Onitsha and Asaba, providing a through trunk road between East and Mid-West Nigeria, was opened on Jan. 4, 1966.

Civil Aviation.—Trunk route services operated by Nigerian and the principal international airlines bring Nigeria within less than 12 hours of the Western European capitals and South Africa. There are also services to other parts of Africa and to the United States. A network of internal air services connects the main centres. Comprehensive radio navigational aids are installed at Kano and Lagos airports, and basic radio navigational facilities are provided at the twelve other aerodromes in regular use. Several flying strips are also in use by light aircraft. There is a network of meteorological reporting stations.

Production and Industry.—Nigeria is mainly an agricultural country. Four of the country's main agricultural products, *viz.* palm-oil and palm kernels, cocoa, cotton and ground nuts are of the greatest importance in Nigeria's export trade (see figures under "Trade" below). Since the economic blockade of the Eastern States, oil has been succeeded as the principal source of export revenue by cocoa and ground-nuts. Other crops include benniseed, capsicums, cassava, coffee, copra, guinea-corn, gum arabic, kola-nuts, maize, millet, piassava, rice, rubber, tobacco and yams. There are important tin and coal-mining industries, at Jos and Enugu respectively. The coal is mainly used within the country. Nigeria is the principal source of supply of the world's requirements of columbite. Timber and hides and skins are other major exports. Some of the country's more important industrial installations include a steel rolling mill, a tin smelter, a petroleum refinery, a flour mill, a sugar factory, several cement plants and textile factories. Of growing importance is the local assembly of motor vehicles, bicycles, radio sets, fans and sewing machines. Other major manufactures include soap, cigarettes, beer, soft drinks, vegetable oils, canned food, confectionery, metal containers, plywood, footwear, tyres and tubes, paints, pharmaceuticals, plastic goods, glass containers, cement products, and roofing sheets.

Trade.—The principal imports are cotton piece goods, unmanufactured tobacco and cigarettes, jute

bags and sacks, artificial silk piece-goods, motor-vehicles and spares, bicycles and spare parts, other machinery, cement, corrugated iron sheets, stock-fish, and petroleum products. The principal exports are cocoa, groundnuts, palm-kernels, palm oil, timber (sawn and logs), hides and skins, cotton, columbite, tin ore, rubber and crude oil.

Pakistan

Area and Population.—The Islamic Republic of Pakistan consists of two geographical units of West Pakistan and East Pakistan situated respectively to the north-west and north-east of the Republic of India and separated by about 1,100 miles of Indian territory. Pakistan has a total area of 365,529 sq. miles (W. Pakistan, 310,403 sq. miles; East Pakistan, 55,126 sq. miles). Total population of the Republic was estimated at 102,876,000 on June 30, 1965.

Government.—Pakistan was constituted a Dominion under the Indian Independence Act, 1947, which received the Royal Assent on July 18, 1947.

In terms of the Act the Dominion of Pakistan consisted of former territories of British India. The Punjab States of Bahawalpur and Khairpur, with a Muslim population of almost 80 per cent. and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) were defined by a Boundary Commission presided over by Sir Cyril Radcliffe, K.B.E., Q.C. (now Viscount Radcliffe). The following States have also acceded to Pakistan: the Baluchistan State of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. The States of Junagadh and Manavadar which had acceded to Pakistan, were occupied by India on November 8, 1947.

Pakistan became a Republic on March 23, 1956, when the provisions of the Constitution came into force. On October 7, 1968, however, this Constitution was abrogated and Pakistan came under martial law. General (now Field Marshal) Mohammed Ayub Khan, Commander-in-Chief of the Pakistan Army, was appointed the Chief Martial Law Administrator. On October 28, 1958, General Mohammed Ayub Khan also became President of Pakistan. On March 1, 1962, the President announced a new Constitution, setting up a system of Government in which all executive authority vests in the President.

CAPITAL.—Rawalpindi (population 1961, 340,175). Pending construction of the proposed new federal capital (Islamabad), Rawalpindi is the seat of government. The National Assembly sits at Dacca. **FLAG.**—The National Flag of Pakistan is dark green, with white vertical stripe at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star. **NATIONAL DAY.**—March 23.

British Council Representative, N. N. Tett, O.B.E.

THE JUDICATURE

There is a Supreme Court of Pakistan. In addition the High Court of West Pakistan sits at Lahore, Karachi and Peshawar, and the High Court of East Pakistan at Dacca.

Chief Justice of the Supreme Court, Mr. Justice S. A. Rahman.

Defence.—The Army has ■ Infantry Regiments, ■ Armoured Corps units, 8½ Artillery Regiments and 34 Engineer units. **Navy.**—The Navy consists of 1 cruiser, 5 destroyers, ■ frigates, 6 minesweepers, 1 survey ship, ■ salvage vessel, 1 harbour oiler and auxiliary vessels.

Education.—School education in Pakistan is organized into 4 stages: Primary stage (5-10); Middle or Lower Secondary stage (10-12); Secondary stage (12-14), Higher Secondary stage (14-16). Institutions of higher education include colleges and universities for general as well as professional and technical education.

Teacher Training institutions are of three levels, turning out teachers for each of the stages above. Examinations for the first two stages are conducted by the Education Department for award of certificates. For the third stage examinations are conducted by the Universities and degrees are awarded upon successful completion of the courses. Funds for the maintenance of the Government institutions and for grants to non-government institutions and the universities are provided in the Provincial budgets. The Central Government annually makes development grants to provincial governments towards the implementation of their Five Year Plan.

There are about 61,000 primary and 9,000 secondary schools, 400 arts and science colleges, 18 medical colleges, 130 teachers' training institutions, 44 polytechnics and 12 universities, including 2 engineering and 2 agricultural universities.

Production.—Pakistan's economy is chiefly based on agriculture, which is the occupation of about 85 per cent. of the population. Production (in thousands) of principal crops in 1966-67 was: rice, 10,767 tons; wheat, 4,324 tons; sugar cane, 29,705 tons; cotton, 2,573 bales; jute, 6,400 bales; tobacco, 392 million lbs. and tea, 64.5 million lbs. Pakistan has one of the longest irrigation systems in the world. The total area irrigated is about 30.3 million acres.

Other Products: Pakistan also produces burlap, hides and skins, leather, wool, ammonium sulphate, natural gas, soda ash, paper, newsprint, cement,

fish, sports goods, surgical appliances and engineering goods, including switchgear, transformers, cables and wires.

Trade.—Pakistan imported manufactured goods and raw materials to the value of Rs.5,192,252,000 in 1966-67 and exported mainly agricultural products valued at Rs.2,912,726,000. Principal imports are listed as: machinery, food grains, iron and steel manufactures, transport equipment, electrical goods, mineral oils, chemicals, drugs and medicines, and vegetable oils. Principal exports are raw jute and jute manufactures, raw cotton and yarn and piece goods, rice, leather and leather goods, and fish.

Trade with U.K.

	1966	1967
Imports.....	£52,574,000	£50,768,000
Exports.....	31,916,000	32,926,000

Finance.—The exchange rate of the Pakistan rupee is Rs.100 = £8.835 (August, 1968).

The State Bank has a capital of about Rs.30,000,000, 51 per cent. of which is held by the State. Total bank deposits in Pakistan on December 31, 1967, were Rs.1,001.87 crores.

The 1968-69 Budget showed income receipts of Rs.688,930,000 and expenditure (including development expenditure) of Rs.557,210,000.

Communications.—There are 13,021 post offices, 172,000 telephones, 12,500 miles of metalled roads, 13,300 miles of gravel roads, and over 100,000 miles of earth road, and about 5,000 miles of perennial and seasonable navigable channels in Pakistan. Railways have a total route mileage of 7,115. Roads in West Pakistan and waterways in East Pakistan, together with the railways, are the principal means of transportation.

Main seaports are Karachi (annual handling capacity 4,500,000 tons of cargo) serving West Pakistan and Chittagong (annual handling capacity over 3,000,000 tons of cargo) serving East Pakistan. The Chalna Anchorage, established in East Pakistan in 1960, has a handling capacity of about 1,500,000 tons a year. The main airport at Karachi occupies an important position on international trunk routes and is equipped with modern facilities and equipment. Pakistan International Airlines (P.I.A.) operates air services between the principal cities within the country ■ well as abroad. It has recently started flights to the U.S.S.R., China, Nepal and the U.A.R.

Post and telegraph facilities are available to every country in the world.

PROVINCES OF PAKISTAN

PROVINCES OF THE ISLAMIC
REPUBLIC OF PAKISTAN

x. WEST PAKISTAN

The Establishment of West Pakistan Act, 1955, came into force on October 3, 1955, and incorporated: (1) the former Governors' Provinces of the Punjab, North-West Frontier and Sind; (2) the former Chief Commissioners' Provinces of Baluchistan and Karachi; (3) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (4) the Tribal Areas of Baluchistan, the Punjab and the North-West Frontier and the States of Amb, Chitral, Dir and Swat, into the Province of West Pakistan with effect from October 14, 1955.

At the 1961 Census the total population, excluding the Federal Territory of Karachi, was 42,947,835 (including 97,540 non-Pakistanis).

West Pakistan (including the Federal Territory), has an area of 310,403 square miles; 97.2 per cent. of the population are Muslim; 0.5 per cent. Caste

Hindu; 1.0 per cent. Scheduled Caste Hindu and 1.4 per cent. Christian. Running through West Pakistan are five great rivers, the Indus, and its tributaries, Jhelum, Chenab, Ravi, and Sutlej. The upper reaches of these rivers are in Kashmir and their sources are in the lofty Himalayas.

West Pakistan is one of the richest wheat-producing areas populated by ■ hardy peasantry with great martial traditions. Of the other crops grown, cotton, rice, gram, jowar, oil-seeds, sugar-cane and tobacco are the most important. There are large deposits of rock salt, which with cotton forms the principal exports. The Province is served by the Pakistan Western Railway. The Pakistan International Airlines network covers practically the whole of the Province.

Chief City and Headquarters of West Pakistan: Lahore (population, 1961 census 1,206,477).

Karachi is the chief city and port, with a population of 1,916,000.

Governor, Muhammad Musa, M.B.E.

2. EAST PAKISTAN

The Province of East Pakistan: area, 55,126 sq. miles, population (1961 census), 50,840,235 (of whom 80·4 per cent. are Muslim; 8·6 per cent. Caste Hindu; 0·8 per cent. Scheduled Caste Hindu; 0·7 per cent. Buddhist; 0·3 per cent. Christian and 0·1 per cent. others), comprises the Eastern territories of the partitioned province of Bengal and Sylhet, formerly a district of Assam (excluding

certain thanas in the Karimganj sub-division).

East Pakistan is the principal producer of raw jute in the world. Other chief agricultural products are rice, tea, oilseeds, pulses, areca nuts and sugar cane. The chief industries are jute and cotton mills, paper, newsprint and chemical fertilizer.

CHIEF CITY (and Headquarters of East Pakistan):
Dacca. Population 556,712 (1961 census).

Governor, Abdul Monem Khan.

Sierra Leone

Area and Population, etc.—The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The total area of Sierra Leone is about 27,925 sq. miles, and the total population (1963 Census provisional figures) is 2,183,000, of whom about 2,000 are Europeans, 3,000 Asiatics, 30,000 non-native Africans, and the remainder native Africans. For administrative purposes, the interior portion of Sierra Leone is divided into 3 Provinces covering 12 Districts, each administered by a Resident Minister. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the South.

CAPITAL.—Freetown (population 85,000). Freetown, which possesses the finest and most important harbour in West Africa, is 3,078 miles from Liverpool; transit 9 days by sea; 2 days by air; there are also air connections with most of the capital cities of the world, and an internal air service between Freetown and some of the more important towns in Sierra Leone. FLAG.—Three horizontal stripes of leaf green, white and cobalt blue. NATIONAL DAY—April 27.

Government.—Sierra Leone became a fully independent state and a member of the British Commonwealth on April 27, 1961. Under the 1961 Constitution, Her Majesty the Queen's representative is the Governor-General, who is appointed on the advice of the Prime Minister. The House of Representatives consists of a Speaker and not fewer than 60 members, elected from constituencies established by an Electoral Commission. The House has full power to legislate. The Governor-General is advised by a Cabinet consisting of the Prime Minister and not less than 7 other ministers, who must be elected members of the House of Representatives. The Ministers are appointed by the Governor-General on the recommendation of the Prime Minister.

In March, 1967, general elections were held, but before the results had been announced the Chief of the Sierra Leone Army declared martial law and placed the Governor-General and the Prime Minister under house arrest. On March 23 a group of Army and police officers assumed power, dissolving the House of Representatives and suspending the Constitution. This group subsequently formed the National Reformation Council, with Col. Andrew Juxon-Smith as Chairman. The Council constitutes the supreme authority, and has taken over the powers vested in the Governor-General.

It was announced that on April 26, 1968, Mr. Siaka Stevens, formerly Leader of the Opposition in the House of Representatives, had been sworn in as Prime Minister and had formed a new Cabinet. Governor-General, Mr. Justice Banjo-Tejan Sie (Acting).

Chief Justice, Hon. Banja Tejan-Sie, C.M.G.

Puisne Judges, R. B. Marke, C.B.E.; J. B. Marcus Jones; S. C. W. Betts.

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch line of 83 miles extends in a north-easterly direction from Bauya to Makeni. A mining company, the Sierra Leone Development Company, owns a railway which runs for 52½ miles from the iron ore

deposits at Marampa to the shipping port of Pepel. There are about 4,250 miles of road in the country, of which about 330 miles are bitumen-surfaced. There is a trunk line network of radio, and overhead telephone and telegraph routes of approximately 3,000 miles, linking the Western areas with the other provinces.

The Freetown international airport is situated at Lungi, across the Sierra Leone River from Freetown. The main port is Freetown, which has one of the largest natural harbours in the world, and where there is a deep water quay, capable of berthing two large or three small ships. There are smaller ports at Pepel and Bonthe. The Sierra Leone Broadcasting Service operates a direct service, and is responsible for the Freetown Transistor Radio Service. Broadcasts are made daily in several of the more important indigenous languages, in addition to English.

Education.—In 1963 primary education was provided in a total of 700 schools, of which all but 21 were assisted from public funds. The total enrolment was 105,800. Primary education is neither free nor compulsory, but the fees are small and equipment is provided free of charge. The percentage of children attending school varies considerably in different parts of the country. There are 44 secondary schools in the country, with an enrolment in 1963 of 10,283. One school provides a secondary technical education; the remainder are grammar schools. Technical educa-

tion is provided in the two Government Technical Institutes, situated in Freetown and Kenema, in two Trade Centres and in the technical training establishments of the mining companies. Teacher training is carried out in two Government and four Church Mission training colleges in the Provinces, and in the Milton Margai Training College near Freetown. The University College (Fourah Bay College) was founded by the Church Missionary Society and is affiliated to the University of Durham. It has faculties of pure and applied science and of arts.

Trade.—In the Western area, farming is largely confined to the production of cassava and garden crops, such as maize and vegetables, for local consumption. In the Provincial areas, the principal agricultural product is rice, which is the staple food of the country, and export crops such as palm kernels, cocoa beans, coffee and ginger.

Singapore

The Republic of Singapore consists of the island of Singapore and a number of smaller islands, covering a total area of 224·5 square miles. Singapore Island is 26 miles long and 14 miles in breadth and is situated just north of the Equator off the southern extremity of the Malay Peninsula, from which it is separated by the Straits of Johore. A causeway, carrying a road and railway, crosses the three-quarters of a mile to the mainland. The highest point of the island is 581 feet above sea level. **Climate.**—The climate is hot and humid and there are no clearly defined seasons. Rainfall averages 95 inches a year and temperature ranges from 21°-34° C. (70°-93° F.). **Population.**—Estimated at 1,955,600 on June 30, 1967, the population is multi-racial with a preponderance of Chinese. The racial groups were estimated in 1967 to be divided as follows: Chinese—1,454,500; Malays—283,500; Indians and Pakistanis—159,400; Other (Europeans, Eurasians, etc.), 58,200. At least 8 Chinese dialects are used and Malay, Mandarin, Tamil and English are the official languages. **NATIONAL DAY.**—August 9.

Government.—Singapore, where Sir Stamford Raffles had first established a trading post under the East India Company in 1819, was incorporated with Penang and Malacca to form the Straits Settlements in 1826. The Straits Settlements became a Crown Colony in 1867. Singapore fell into Japanese hands in 1942 and civil government was not restored until 1946, when it became a separate colony. Internal self-government and the title "State of Singapore" were introduced in 1959. Singapore became a state of Malaysia when the Federation was enlarged in September, 1963, but left Malaysia and became an independent sovereign state within the Commonwealth on August 9, 1965. Singapore adopted a Republican constitution from that date, the Yang di-Pertuan Negara being re-styled President. There is a Cabinet collectively responsible to a fully-elected Parliament of 51 members.

HEAD OF STATE

Communications.—Singapore is one of the largest seaports in the world, with deep water wharves and ship repairing facilities. Ships also anchor in the roads, unloading into lighters. 26,640,000 tons of cargo was handled in 1966. Singapore Airport, 6½ miles from the centre of the city, has a runway 9,000 feet long. There are 24 miles of railway connected to the Malaysian rail system by the causeway across the Straits of Johore, and 966 miles of roads, 524 miles of which are metalled roads maintained by the Government. There are both wireless and wired broadcasting services carrying commercial advertising. Television was introduced in 1963.

Production, etc.—Manufactures comprise a wide range of industries including the processing of rubber, pineapples, coconut oil, shipbuilding and repairing, saw-milling, steelrolling, motor assembly, printing and the manufacture of rubber foot-wear, soap, dry cell batteries, beer, soft drinks, tin containers, glassware, shoe polish, yarn, aluminium utensils, bricks, tiles and metal windows. The traditional concentration on the processing of primary products (rubber, tin, rattan), the provision of shipbuilding, docking and facilities, light engineering works and motor assembly plants have been supplemented in recent years by various industrial projects relating to chemical, mechanical, electrical, metal working, engineering, building materials and food industries.

Singapore's Second Development Plan, 1966–70, is in progress at a total estimated cost of

\$1,500,000,000. Under the first Plan, 1961–65, 50,000 subsidized housing units were constructed and several industrial estates. The largest of these, at Jurong, forms the nucleus of a new town, with 3,000 acres zoned for light and heavy industries and its own deep water port under construction. Major projects of the 1966–70 Plan include an extension to the East Lagoon of the Singapore Harbour (\$50m.), the Johore River Water Supply Scheme (\$40m.) and a new electric power station at Jurong.

Swaziland

Swaziland is the smallest of the former three High Commission Territories in Southern Africa. Geographically and climatically, it is divisible into four physiographic provinces; the broken mountainous Highveld of the west, adjacent to the Drakensburg, with altitudes averaging over 4,000 ft., the Middleveld which is mostly mixed farming country, about 2,000 ft. lower and the Lowveld, a hot woodland region, bounded on the east by the Lubombo mountains, with an average altitude of 1,500 ft. The Lubombo mountains form the fourth physiographic province. Four rivers, the Komati, Usutu, Mbuluzi and Ingwavuma, flow from west to east, cutting their way through the Lubombo mountains to the Indian Ocean. The exploitation of these rivers is particularly important to the agricultural development of the middle and bush veld, where irrigation projects are giving the scenery a different aspect. The total area is 6,705 sq. miles and the population in May 1966 was 389,000.

CAPITAL.—Mbabane (population, 14,000), the headquarters of the Government, is situated on the hills at an altitude of 3,800 ft. There are townships in the districts of Manzini (population 16,000), Hlatikulu (1,000); Stegi (1,400), Geodgegung (1,700), Pigg's Peak (1,400), Havelock Mine (4,100), Big Bend (2,900) and Mhlume (2,200). **FLAG.**—One crimson, two blue, two yellow bands; black and white shield in centre.

Government.—The Kingdom of Swaziland came into being on April 25, 1967, under a new internal self-government constitution and became an independent kingdom in membership of the Commonwealth on September 6, 1968. Parliament consists of a Senate and House of Assembly. The House of Assembly has 24 elected members and six members who are nominated by the King. The Attorney-General is also a member but has no vote. The Senate has 12 members—six elected by the House of Assembly and six appointed by the King.

King of Swaziland, His Majesty Sobhuza II, K.B.E.

Education.—In 1967 there were 380 schools, with 63,000 pupils of all races.

Communications.—Swaziland's first railway was completed in 1964. It is about 140 miles long, starting at Ngwenya, 13 miles north-west of Mbabane, and connecting at the Mozambique frontier with an extension to the existing line between Lourenco Marques and Goba. Principal export traffic on the railway is the iron ore mined at Bomvu Ridge, near Ngwenya, by the Swaziland Iron Ore Development Company. A large part of the country's passenger and goods traffic is carried by privately-owned motor transport services. Besides these, the South African Railways Road Motor Services maintain regular goods and passenger services between Mbabane and Manzini and the main railheads in South Africa which serve Swaziland—Breyton, Piet Retief, Komatipoort, Hectorspruit and Golela. There are post offices,

telegraph and telephone offices at all the chief centres.

Production.—Iron ore, which is sold to Japan, is the country's largest single export and in 1967 was worth R.11,320,800. Other major exports are sugar (R.9,547,100 in 1967), asbestos (R.5,858,000) and wood pulp and other forest products (R.6,880,200).

Finance.—Total revenue for 1968–69 was estimated at R.10,774,487, compared with R.8,392,180 in 1967–68. Expenditure was estimated at R.15,263,977 (1967–68, R.11,097,589). There is a United Kingdom grant-in-aid of R.4,478,490 for the year (1967–68, R.1,800,000). Public debt amounted to R.29,270,000 on March 31, 1967.

Tanzania

Tanganyika, the mainland part of the United Republic of Tanzania (Tanganyika and Zanzibar), occupies the east-central portion of the African continent, between 1°–11° 45' S. lat. and 29° 20'–40° 38' E. long. It is bounded on the N. by Kenya and Uganda; on the S.W. by Lake Nyasa, Malawi and Zambia; on the S. by Mozambique; on the W. it is bounded by Ruanda, Burundi and the Congoese Republic; on the E. the boundary is the Indian Ocean. Tanganyika has a coastline of about 500 miles and an area of 362,820 sq. miles (including 20,650 sq. miles of water). The greater part of the country is occupied by the Central African plateau from which rise, among others, Mt. Kilimanjaro, the highest point on the continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Serengeti National Park, which covers an area of 6,000 sq. miles in the Arusha, Mwanza and Mara Regions, is famous for its variety and number of species of game.

The African population consists mostly of tribes of mixed Bantu race. The total population of Tanzania was estimated in 1967 at 12,231,342, of which the Africans form a very large majority, while the Europeans, the Asians, and other non-Africans form a small minority. The total population of Zanzibar at the 1967 census was 354,360, including Pemba (164,243). Swahili is the national and official language. English is the second official language, both for educational and government purposes.

Zanzibar.—Formerly ruled by the Sultan of Zanzibar, and a British Protectorate until Dec. 10, 1963, Zanzibar consists of the islands of Zanzibar and Pemba, Lamu, Manda, Patta, and Siu. It has a total area of approximately 1,000 square miles. The islands produce a large part of the world's supply of cloves and clove oil, and coconuts, coconut oil and copra are also produced.

Zanzibar became internally self-governing on June 24, 1963 and fully independent on Dec. 10, 1963. A revolutionary party seized power on Jan. 12, 1964, and the Sultan was forced to leave the country. Later Zanzibar united with Tanganyika (see below).

CAPITAL.—Ψ Dar es Salaam (population 272,515). Other towns are Ψ Tanga (60,935); Mwanza (34,855); Tabora (20,994); Mtewara (20,414); Arusha (32,348); and Moshi (26,969). In Zanzibar, the chief town and seaport of that name (population, 45,284) provides facilities for shipping and trade. There are also aerodromes at Zanzibar and at Pemba.

FLAG.—Green, yellow, black and blue, with black diagonal centre stripe, and two small yellow diagonal stripes dividing upper triangle part which is green, and lower triangle part which is blue. **NATIONAL DAY.**—December 9.

President of the United Republic, Julius Kambarage Nyerere, b. 1922; elected Nov. 1962; took office Dec. 9, 1962.

GOVERNMENT

Following a constitutional conference held in Dar es Salaam in March, 1961, Tanganyika became an independent state and a member of the British Commonwealth on December 9, 1961.

Tanganyika became a Republic, within the Commonwealth, on December 9, 1962, with an executive President, elected by universal suffrage, who is both the Head of State and Head of the Government. A presidential election will be held whenever Parliament is dissolved, and the presidency is closely linked with the official party, the Tanganyika African National Union (TANU), since Tanzania is a one-party state. The National Assembly is composed of 107 elected members from the mainland, 10 members appointed by the President (from both Tanganyika and Zanzibar), 25 National Members (elected by the National Assembly after nomination by various national institutions), 20 Regional Commissioners, up to 32 members of the Zanzibar Revolutionary Council, and up to 20 other Zanzibar members appointed by the President in agreement with the President of Zanzibar.

On April 25, 1964, following a parliamentary ratification of an agreement signed by the President of the Republic of Tanganyika and the President of the People's Republic of Zanzibar and Pemba, Tanganyika united with Zanzibar to form a new sovereign state. By this agreement, the President of the United Republic is Julius K. Nyerere; the First Vice-President is Sheikh Abeid Amani Karume (former President of Zanzibar

and Pemba) and the Second Vice-President is Rashidi Mfaume Kawawa (of Tanganyika) who is also the leader of the Government business in the National Assembly of the United Republic. The Vice-Presidents and Ministers form the Cabinet of the Union Government, which is presided over by the President. There are 8 Zanzibar Ministers and junior Ministers in the Union Government and 10 other Zanzibar members in the National Assembly of the United Republic.

Zanzibar has its own legislature which legislates for matters which are not under the Union Government, e.g. education, agriculture, health and community development.

First Vice-President, Sheikh Abeid Amani Karume.

Second Vice-President, R. M. Kawawa.

EDUCATION

Education is a joint undertaking by the Government, local authorities and voluntary agencies, including missions. Most schools are either wholly or partly financed by Government or by local authorities.

Technical and vocational education is provided at two Government trade schools and at the Dar es Salaam Technical College. A college has been

established at Chang'ombe, Dar es Salaam. For higher education Tanganyika students go to Makerere University College in Uganda, the Royal Technical College in Kenya, the University College of Dar es Salaam or to Universities and Colleges outside East Africa—mainly in Britain.

PRODUCTION AND TRADE

The economy is based mainly on the production and export of primary produce and the growing of foodstuffs for local consumption. The chief commercial crops are sisal, cotton, coffee and oilseeds. The most important minerals are diamonds, gold, lead and mica. Hides and skins are another valuable export. Industry is at present largely concerned with the processing of raw materials for either export or local consumption. There is also a healthy growth of secondary manufacturing industries, including factories for the manufacture of leather and rubber footwear, knitwear, razor blades, cigarettes and textiles, and a wheat flour mill.

Trinidad and Tobago

AREA AND POPULATION

Trinidad, the most southerly of the West Indian Islands, lies close in the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between $10^{\circ} 2'$ — $10^{\circ} 51'$ N. lat. and $60^{\circ} 56'$ — $61^{\circ} 56'$ W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,864 square miles, and a population (Census of 1960) of 827,957 (including Tobago). The racial groups at the 1960 census were: African 43 per cent., East Indian 36 per cent., Mixed or Coloured 16 per cent., European 2 per cent., Chinese 1 per cent. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range, lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., E. Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from 70° to 90° F. and rainfall ranging from 100 inches in the north-east to 50 inches in the west. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Tobago lies between $11^{\circ} 8'$ and $11^{\circ} 21'$ N. lat. and between $60^{\circ} 30'$ and $60^{\circ} 50'$ W. long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W. of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888. The island is 26 miles long, and $7\frac{1}{2}$ broad, and has an area of 116 sq. miles, with a population (Census of 1960) of 33,333. It is one of the healthiest of the West Indies and popular tourist resort. The main town is Ψ Scarborough.

Other Islands.—Corozal Point and Icacos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important.

CAPITAL.— Ψ Port of Spain (pop. 93,954), one of the finest towns in the West Indies, with sewerage, electric lighting, omnibus and telephone services. Other towns of importance are Ψ San Fernando (pop. 39,830), about 33 miles south of the capital, and Arima (pop. 10,982).

NATIONAL DAY.—August 31 (Independence Day).

GOVERNMENT

The Territory of Trinidad and Tobago became an independent state and a member of the British Commonwealth on August 31, 1962, under the Trinidad and Tobago Independence Act, 1962. There is a Parliament consisting of a Senate and a House of Representatives with an elected Speaker. The Senate has 24 members nominated by the Governor-General, 24 appointed on the advice of the Prime Minister, 4 on the advice of the Leader of the Opposition, and 7 to represent religious, economic or social interests, chosen after consultation with appropriate organizations.

Education.—The system of education has been reformed to co-ordinate more closely the interlocking levels—primary, post-primary/secondary and higher. The system provides for education of the pupils from 5 to 12 in primary schools and from 12 plus to 18 in Government and assisted secondary schools—grammar, modern and 2 technical schools. The Government Polytechnic Institute was established in 1959.

Communications.—There are 108 miles of public railway and the total mileage of main and local roads maintained is 2,527. There are 179 post offices and postal agencies, 51 of which transact savings bank and money order business. There is

an internal telegraph system and two local broadcasting stations.

Trinidad is well served by steamship lines and there are deep water wharf facilities at Port of Spain. Eleven international scheduled airlines operate to and through Trinidad (Piarco), which acts as a focal point for air traffic between the Americas. A domestic air service between Trinidad and Tobago is operated by B.W.I.A. Air transit to London, 14 hrs.; to New York, 17 hrs.

Production.—Oil is the principal export. A remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea. The soil of Trinidad is rich and productive, the most important products being sugar, molasses, rum, cocoa, citrus and coffee.

Uganda

Situated in Eastern Africa, Uganda is flanked by the Congolese Republic, the Sudan, Kenya and on the south by Tanganyika and Rwanda. Large parts of Lakes Victoria, Edward and Albert are within its boundaries, as are Lakes Kyoga and Salisbury and the course of the River Nile from its outlet from Lake Victoria to the Sudan frontier post at Nimule. Despite its tropical location, Uganda's climate is tempered by its situation some 3,000 ft. above sea level, and well over that altitude in the highlands of the Western and Eastern Regions. Temperatures seldom rise above 85° F. (29° C.) or fall below 60° F. (15° C.). The rainfall averages about 50 inches a year, which means that the country is covered in a lush green cloak for most of the year. Uganda has excellent tourist facilities, including three National Parks with a wide variety of wildlife and flora, good hotels, air and land communications to service these Parks, and a wide range of scenery. The revenue from tourism is at present about £3,700,000 but the potential is much greater.

Area and Population.—Uganda has an area of 91,000 square miles (water and swamp 16,400 square miles) and population estimated at a little over 7,740,000. The total includes some 9,000 Europeans and 93,000 Asians. The official language of Uganda is English. The main local vernaculars are of Bantu, Luo and Hamitic origins. KI-Swahili is generally understood in trading centres. **CAPITAL**—Kampala (population of Greater Kampala, 200,000). **FLAG.**—Six horizontal stripes of black, yellow and red (repeated) with a crested emblem on a white orb in the centre. **NATIONAL DAY**—October 9 (Independence Day).

Government.—Uganda became an independent state and a member of the Commonwealth on October 9, 1962, after some 70 years of British rule. Parliament consists of the President and the National Assembly, composed of the Speaker, 82 elected members and 11 specially elected members. Uganda became a Republic on September 8, 1967. Under the 1967 Constitution, the executive authority of Uganda is vested in the President, who is assisted by a Cabinet of Ministers. Unlike the Presidential system in the United States and other countries, in Uganda the President is a Member of the National Assembly, and takes an active part in the Assembly's deliberations.

Education.—Education is a joint undertaking by the Government, Local Authorities and, to some extent, Voluntary Agencies. The education system is divided into three distinct sectors—Primary, Secondary and Post-Secondary. The Primary course covers the first seven years of schooling. There were 434,995 pupils in grant-aided Primary Schools in 1962, which rose to 641,639 pupils in 1967. Education at secondary level falls into four categories—Secondary schools, which are of the Grammar type of school with a course extending over six years to Higher School Certificate; Technical Schools; Farm Schools; and Primary Teacher Training Colleges. Further education is provided at the Uganda Technical College, the National Teachers' College, the Uganda College of Commerce; and Agricultural Colleges. There is also in addition to these, several departmental training schools training staff for different departments. The Medical Department alone has eight such schools training nurses, midwives, medical assistants, health inspectors, and other medical staff.

University level education is available at Makerere University College and the two other constituent colleges of the University of East Africa; the University College, Nairobi, in Kenya, and the University College, Dar es Salaam, in Tanzania.

Uganda students also go to universities and colleges outside East Africa for higher education.

Communications.—There is a first-class international airport at Entebbe, with direct flights to many places in Africa, America, Asia and Europe. There are 10 other state airports in Uganda. There are 3,702 miles of all-weather and 11,230 miles of other roads. Nearly 45 per cent. of the trunk roads are metalled, the remainder and all feeder roads are gravel roads of good standard. A railway network joins the capital to the western, eastern and northern centres. Lake, marine, road and rail services are operated by the E. African Railways and Harbours Administration.

Finance.—Currency is the Uganda shilling (= 1s. sterling). Total revenue in 1966-67 was, U.S. \$17,233,000 and expenditure U.S. \$602,325,000. Estimated capital account revenue 1966-67, U.S. \$6,112,000; expenditure, U.S. \$397,722,000.

Trade, etc.—The value of the principal foreign export commodities in 1967 were: coffee, £34,600,000; cotton, £15,161,000; copper, £5,467,000; and tea, £3,476,000. Other crops grown include tobacco, sugar and groundnuts. Hydroelectric power is produced from the Owen Falls power station which has a capacity of 150,000 kWh. Plans are under way for the building of a second hydroelectric power station to produce 180,000 kWh.

Zambia

The Republic of Zambia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. Its area is 290,586 square miles, and its boundaries are 3,515 miles in length.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers, and the Luano valley, the greater part of Zambia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 6,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country.

Although Zambia lies within the tropics, and fairly centrally in the great land mass of the African continent its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

At Dec. 31, 1966, the estimated population of Zambia was 3,894,400, including some 79,400 non-Africans.

Government.—At the dissolution of the Federation of Rhodesia and Nyasaland, on December 31, 1963, Northern Rhodesia (as Zambia was then known) achieved internal self-government under a new constitution which contained provisions for the protection of fundamental rights, a Constitutional Council, the office of a Governor, a Legislature, a House of Chiefs, the Cabinet, the Judiciary, the Public Service and finance. Zambia became an independent republic within the Commonwealth on October 24, 1964—75 years after coming under British rule and nine months after achieving internal self-government. The country has a democratic constitution with a President as Head of State and Commander-in-Chief of the armed forces. He must be a citizen of Zambia and be at least 30 years old.

Parliament.—Parliament consists of the President and a National Assembly of 75 members elected for 5 years on a basis of universal suffrage by all citizens of 18 years of age and over. The President has the power to nominate up to five additional special members in order to enhance the representative character of the Assembly, or to obtain services of particular value. President Kaunda, under this section of the constitution, has nominated five members, one of whom has been made a member of the Cabinet. The President is not a member of the National Assembly but may address it at any time. After the 1969 general election the National Assembly will have 105 members. Under transitional provisions the present 10 reserved roll (non-African) seats will continue until the first dissolution of the Assembly. If that dissolution takes place before the expiry of the full term of the existing Parliament (March, 1969), the President can decide whether the reserved seats should continue up to that date. The National Assembly is presided over by a Speaker, elected by the Members of the Assembly. The United National Independence Party has 66 of the 75 elected seats. There is also a House of Chiefs, representing 230 chiefs throughout Zambia, with advisory functions.

CAPITAL.—Lusaka, situated in the Central Province (estimated population, Dec. 1966, 151,400). Other centres are Livingstone, Kabwe (*formerly* Broken Hill), Chipata (*formerly* Fort Jameson), Mazabuka, Mbala

(formerly Abercorn), Kasama, Solwezi, Mongu, Mansa, Ndola, Luanshya, Mufulira, Chingola, Chililabombwe (formerly Bancroft), Kalulushi and Kitwe, the last six towns being the main centres on the Copper-belt.

President, Dr. Kenneth David Kaunda, assumed office October 24, 1964.

WESTERN SAMOA
Head of State, H.H. Malietoa Tanumafili II, C.B.E.

Prime Minister, Hon Fiame Mata'afa Faumuina Mulinu'u II, C.B.E.

Formerly administered by New Zealand (latterly with internal self-government), Western Samoa became, on January 1, 1962, the first fully-independent Polynesian State. It is for the present being treated as ■ member country of the British Commonwealth, pending a final decision by the Government.

Western Samoa consists of the islands of Savai'i (662 sq. miles) and of Upolu, which with its adjacent islands, has an area of 435 sq. miles. All the islands are mountainous. Upolu, the most fertile, contains the harbours of Apia and Saluatafa. The islanders are mostly Christians of

dent, all other judges being appointed on the recommendation of the Judicial Service Commission consisting of the Chief Justice, the chairman of the Public Service Commission, a senior Justice of Appeal and one Presidential nominee.

Chief Justice of Zambia, J. R. Blagden, O.B.E., T.D.

Justice of Appeal, B. Doyle.

Puisne Judges, T. Pickett; I. M. Evans; N. J. G. Ramsey; F. J. Whelan; M. McCall.

Education.—In 1967 there were 539,353 pupils in primary schools and 34,139 in secondary schools. In 1967-68 the estimated Government expenditure on education, including both recurrent and capital fund expenditure, was K48,600,000.

Production and Employment.—The total value of marketed farm produce in 1965-66 was K31,000,000. Principal products were tobacco, maize, groundnuts, cotton, livestock and vegetables.

Mineral production was valued at K442,982,000 in 1967. The production of copper totalled 679,300 short tons. Ore reserves in the Copper-belt exceed 883,000,000 tons. On August 24, 1968, the first diesel fuel arrived by the new pipeline running 1,058 miles through Tanzania and Zambia to Ndola, the terminal.

In Dec. 1966, 344,401 persons were estimated to be in full employment. Included in this figure are: mining and quarrying, 54,982; agriculture, forestry and fishing, 35,359; construction, 77,550; commerce, 28,480; manufacturing, 32,253.

Finance and Currency.—Zambia adopted decimal currency on Jan. 16, 1968, the unit being the Kwacha, equivalent to 10s. of the former currency. Since devaluation of sterling the Kwacha = 11s. 8d. sterling.

THE BAHAMAS

The Bahama Islands are an archipelago lying in the Atlantic Ocean between $20^{\circ} 55' - 27^{\circ} 22' N.$ Lat; $72^{\circ} 40' - 79^{\circ} 20' W.$ Long. They extend from the coast of Florida on the north-west almost to Haiti on the south-east. The group consists of 700 islands, with 30 of these inhabited, and 2,400 cays comprising an area of more than 5,380 square miles. The population, at the 1963 census, was 130,220 (estimated, Dec., 1967, 145,896). The principal islands include: Abaco, Acklins, Andros, Berry Islands, Bimini, Cat Cay, Cat Island, Crooked Island, Eleuthera, Exumas, Grand Bahama, Harbour Island, Inagua, Long Cay, Long Island, Mayaguana, New Providence (on which is located the capital, Nassau), Ragged Island, Rum Cay, San Salvador and Spanish Wells. San Salvador was the first landfall in the New World of Christopher Columbus on October 12, 1492.

The Bahamas were settled by British subjects when the islands were deserted. The ownership of the Bahamas was taken over in 1782 by the Spanish, but the Treaty of Versailles in 1783 restored them to the British.

Tourism is the economic mainstay of the Bahamas, whose salubrious climate and fine beaches attracted 915,273 visitors in 1967.

Industries.—A plant for the manufacture of cement has been established in Freeport, Grand Bahama, where there are also a number of light industries. A rum distillery has commenced production in New Providence. Other industries are those associated with the treatment of local agriculture (including sugar production) and marine produce, salt extraction and handwork, and timber-felling for plywood.

Education.—Education is compulsory between the ages of 5 and 14. There are 311 state-maintained or aided schools with a total roll of 34,504; there are also 76 unaided schools with a total roll of 10,953.

Civil Aviation.—Facilities for external traffic are provided by Pan-American World Airways, B.O.A.C., Air Canada, Bahamas Airways Ltd., Eastern Air Lines and North-East Air Line, while Bahamas Airways, Bahamas Air Traders Island Flying Service and Colony Airlines provide internal schedule and charter flights to the outlying islands. There are 14 return flights between Nassau and Miami, several daily flights between Nassau-Palm Beach-Fort Lauderdale and Tampa, and a regular service between Nassau and Montego Bay, Jamaica, besides regular trunk communication with London, New York, Toronto, Montreal, Bermuda and Kingston.

Communications.—There is a General Post Office in Nassau, 3 branch offices in New Providence and 109 sub-offices in the Out Islands. In 1967, 25,450,000 letters and prints were handled. Wireless and telephone services are in operation to all parts of the world. There are 87 radio stations among the islands.

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (about only of which are inhabited) situated in the west of the Atlantic Ocean, in $32^{\circ} 15' N.$ lat. and $64^{\circ} 51' W.$ long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The total area is now approximately 20.59 sq. miles which includes 2-3 sq. miles leased to, or re-claimed by, the U.S. authorities between 1941 and 1957 under the terms of the 99 year lease. The civil population (1967) was 50,097. The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1515, but no settlement was made until 1609 when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding, but since 1943 almost entirely destroyed by blight. At one time the islands enjoyed a flourishing export in onions, potatoes, and green vegetables, but the imposition of tariffs in U.S.A. and the growing shortage of arable land made further growing for export unprofitable. The lily bud trade with Canada and U.S.A. and locally manufactured concentrates and pharmaceuticals are now the Colony's leading exports. Little food is produced except vegetables and fish, other foodstuffs being imported.

The Colony's economic structure is based on its importance as a tourist resort and an air and naval base and from these sources most of its revenue is derived. It is now within two hours' air travel from New York, and in 1967 a total of 281,167

visitors arrived in Bermuda. The airport is used by B.O.A.C., Pan-American Airways, Air-Canada, Eastern and Qantas air lines and most cruise ships dock at Hamilton.

Education cost £1,913,496 in 1967. Free elementary education was introduced in May, 1949. Free secondary education was introduced in 1965 for those children in the aided and maintained schools who were below the upper limit of the statutory school age (16 from 1969 onwards), and also for those children entering the secondary academic schools who were awarded "free" places as a result of an examination.

There are 2 broadcasting and television services, and overseas telephone and telegraph services are maintained. The use of motor cars was banned in the island from 1908 until 1946.

GOVERNMENT

Internal self-government was introduced on June 8, 1968. There are a Legislative Council of 11 Members and an elected House of Assembly of 40 Members. The Governor retains responsibility for external affairs, defence, internal security and the police.

Voters must be British subjects of twenty-one years of age or older at the time of registration, and if they do not possess Bermudian status, they must have been ordinarily resident in Bermuda for the whole of the period of three years immediately before registration. Registration is held every year during the months of February and March. Candidates for election must qualify as electors and must possess Bermudian status.

BRITISH HONDURAS

British Honduras, in Central America, lies within $18^{\circ} 29' 50''$ to $15^{\circ} 53' N.$ latitude and $89^{\circ} 13' 28''$ to $87^{\circ} 21' 30'' W.$ longitude. Its extreme length and breadth are approximately 286 m. and 118 m. respectively; it is bounded on the north and north-west by Mexico (Quintana Roo Province, formerly Yucatan); on the west and south by Guatemala; and on the east by the Caribbean Sea. The total area (including offshore islands) is about 8,867 sq. miles, with an estimated population (1966) of 114,255 (58,060 males and 56,195 females). The climate generally is damp and warm, but not unhealthy. The temperature ranges from 47° to $94^{\circ} F.$ The average lies between 75° and 80° , but this is considerably tempered by the prevailing sea-breezes.

The greater part of the country is covered by forest, of which 59 per cent. is high rain forest, 15.5 pine forest and dry savannah, 5.5 wet savannah and mangrove forest, the remaining 20 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasture for cattle. The north of the territory and the southern coastal plain (8 to 10 miles wide) is nearly flat, and near the sea is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 20 per cent. of the area of the territory is over 1,000 feet in elevation above mean sea-level.

The staple products are obtained from the forests, and include mahogany, cedar, and chicle (the basis of chewing-gum). Agricultural crops which grow readily include sugar cane, coconuts, citrus fruit, plantains, pineapples, mangoes, maize, cucumbers, rice, varieties of beans and peas. Bananas also grow well in certain localities. All varieties of citrus fruits flourish, and in particular grape-fruit, of which a very high grade is exported. Lobster tails and shrimps are also exported.

In 1967 there were 165 Government and grant-aided primary schools and 8 unaided private elementary schools in the country, the total enrolment being 30,000. There are also 16 secondary schools with a total enrolment of 2,400.

There are 37 post offices in the country. A new transmitting and receiving station at Ladyville has been completed. External telegraph and radio-telephone services are operated by Cable and Wireless Ltd. Air services are scheduled twice weekly to and from the capitals of Panama, Honduras, Mexico, Salvador, Guatemala, Nicaragua, Costa Rica and Jamaica. There is a three times weekly service from and to New Orleans, a four times weekly service from and to Miami and a weekly service to Mexico City. A local scheduled air service links the six districts into which the country is divided.

CAPITAL, Ψ Belize City. Population (1960 Census) 32,867 (Belize District, estimated, Dec. 31, 1967, 42,000); Belize was badly damaged by a hurricane in October, 1961, and it was announced in 1965 that a new capital would be built, 50 miles inland; \$20,000,000 in grants and aid from U.K. will be used. The project began in mid-1967. Other towns are Ψ Corozal (12,319), Cayo (16,484), Ψ Stann Creek (13,435), Orange Walk (13,266), Toledo (9,804).

GOVERNMENT

Under the Constitution introduced on Jan. 1, 1964, the Governor retains special responsibility for defence, external affairs, internal security and the safeguarding of the terms and conditions of service of public officers. For so long as the Government continues to receive grant-in-aid from the U.K. Government, the Governor also has special responsibility for maintaining or securing financial and economic stability and for ensuring that any condition attached to any financial grant or loan made by the U.K. Government is fulfilled. The Governor appoints as Premier the person who appears to him to be likely to command the support of a majority in the House of Representatives. Ministers are appointed by the Governor on the advice of the Premier.

The National Assembly comprises a House of Representatives and a Senate. The House of Representatives consists of 18 members elected by universal adult suffrage. The Speaker may be elected by the House from among its own members, or from outside; the Deputy Speaker is elected by the House from among its own members. The Senate consists of 8 members appointed by the Governor (5 on the advice of the Premier, 2 on the advice of the leader of the Opposition and 1 after consulting such persons as he considers appropriate). THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 42, of which 11 are uninhabited, and have a total area of about 59 square miles. The principal are Tortola, the largest (situate in 18° 27' N. lat. and 64° 40' W. long.), Virgin Gorda, Anegada and Jost Van Dyke. The population is 8,610 (1965). Communication is by daily launch service to St. Thomas; also an external telephone service linking Tortola with Bermuda and the rest of the world. Airports on Beef Island and Virgin Gorda are used by small planes. The principal exports are livestock, fish, charcoal, vegetables and fruit, for which the principal market is St. Thomas. Rum is distilled on a small scale. The only legal unit of currency is the U.S. dollar.

BRUNEI

Sultan, H. H. Hassanal Bolkiah Mu'izzadin Wad-daulah, C.M.G., acceded 1967, crowned Aug. 1, 1968.

Brunei is a British Protected State on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (estimated, 1967), 83,877, of whom two-thirds are of Malay or other indigenous race and one-third Chinese. The chief town, Brunei, with its rural area, has a population of about 37,000. The country has a humid tropical climate.

On September 29, 1959, the Sultan of Brunei promulgated the first written Constitution and entered into a new Agreement with H.M. The Queen. The Constitution (since amended) provides for a Privy Council, a Council of Ministers and a Legislative Council. Under the Agreement the British Government continues to be responsible for defence and external affairs, and a High Commissioner is appointed. The post of British Resident was abolished in 1959 and many of his functions were transferred to the Sultan in Council. A Menteri Besar (Chief Minister) is appointed by the Sultan, and is responsible to him for the exercise of executive authority. The Sultan presides over the Privy Council, and the Council of Ministers, and the Speaker over the Legislative Council.

H.M. HIGH COMMISSION

Jalan Residency, Brunei.

High Commissioner, His Excellency Arthur Robin Adair, C.V.O., M.B.E. (1967).

Currency.—On June 12, 1967, Brunei started to issue its own currency, the Brunei dollar of 100 cents, which it was agreed would be fully interchangeable with the currencies of Malaysia and Singapore.

Imports from the U.K. in 1967 totalled £2,083,000 (1966, £1,560,000).

FALKLAND ISLANDS

These, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between $52^{\circ} 15' - 53^{\circ}$ S. lat. and $57^{\circ} 40' - 62^{\circ}$ W. long. They consist of East Falkland (area 2,610 sq. miles), West Falkland (2,090 sq. miles) and upwards of 200 small islands in the aggregate, the estimated population at Dec. 31, 1967, being 2,122. Mount Usborne, the loftiest peak, rises 3,312 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to a part at least of the group in 1771. The settlement was destroyed by the Americans in 1831. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. The climate is cool. At Stanley the monthly temperature varies between 49° F in January and 35.5° F in July. The air temperature has never been known to exceed 77° F or to fall below 12° F.; it is notably windy. The islands are chiefly moorland. The population is almost totally British, and is principally engaged in sheep-farming to which practically all the land in the colony is devoted, 627,367 sheep being carried in 1967. Wool, hides and sheepskins are exported. The only town is Stanley on the coast of East Falkland.

FIJI

This is a group of 322 islands (of which only 106 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between $15^{\circ} 45' - 21^{\circ} 10'$ S. lat. and 176° E.— 178° W. long. is 7,083 square miles. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanua Levu, Taveuni and Kadavu. The climate is oceanic. Shade temperatures seldom rise above 93° F. or fall below 60° except in the mountains. On the windward sides of the larger islands rainfall is copious and vegetation luxuriant; on the leeward (or dry) sides the vegetation is sparse and scattered. The chief products are sugar cane, coconuts, gold, rice, bananas, pineapples, yams, and dalo or taro (clocosia).

The population (census 1966) was 476,727 (240,960 Indians, 202,176 Fijians, 9,687 part Europeans, 6,590 Europeans, 12,165 other Pacific races, and 5,149 Chinese).

GOVERNMENT

Under the Fiji (Constitution) Order, 1966, there is a Governor and Commander-in-Chief appointed by the Queen, an executive Council of Ministers appointed by the Governor and a Legislative Assembly of not more than 4 official and 36 elected members. Of the latter 9 Fijians, 9 Indians and 7 General members are elected on three communal rolls (General members are Chinese, European and other races, except Indians). In addition, 2 Fijian members are elected by the Great Council of Chiefs. A further 9 members are elected under a system of cross voting, under which seats are reserved in equal proportions for members of the three main groups; these members are elected by all racial groups voting together. There are a Speaker and Deputy Speaker.

The Council of Ministers listed below includes four official Ministers, the Chief Secretary, Attorney-General, Minister of Finance and Minister for Fijian Affairs and Local Government; a Minister without Portfolio and one Assistant Minister for Social Services.

CAPITAL.—Suva, in the island of Viti Levu. Population (1966 Census), 54,157.

Fiji is approximately 11,000 miles from the United Kingdom; transit time from London via Panama Canal about 28–30 days. Air connections are provided between the United Kingdom and Fiji via Canada, United States of America, Mexico and the Middle East through Australia, New Zealand, Singapore and Noumea. The following trunk route operators provide services through Nadi Airport: Qantas, Pan American, British Overseas Airways, Air New Zealand, U.T.A., Air India and Canadian Pacific Airlines. Flights connecting with Fiji operate to Auckland, Sydney-Perth and Darwin and points beyond; Honolulu, San Francisco or Los Angeles or Vancouver and points beyond; Tahiti and points beyond; Pago Pago; Noumea and points beyond. Fiji is one of the main aerial crossroads in the Pacific.

Fiji Airways Ltd. are based at Nausori Airport near Suva and operate HS-748, DC-3 and Heron aircraft. Fiji Airways operate scheduled domestic services within the Fiji islands and from Suva provide connection to Nadi, Labasa, Savusavu and Matei. On Regional services Fiji Airways scheduled flights operate to Tonga, Western Samoa, Vila and Santo in the New Hebrides, Honiara in the Solomon Islands, Funafuti and Tarawa in the Gilbert and Ellice Islands and the newly independent island of Nauru. Air Pacific Ltd. operate Charter flights within the Fiji group of islands and provide services to the island of Ovalau and to Ba and Korolevu on Viti Levu.

GIBRALTAR,

a rocky promontory, 3½ miles in length, ½ a mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. The population at the census of Oct. 1961 was 24,502 (estimated, 1967), 25,281.

Gibraltar is a naval base of vital strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779–83, when General Elliot afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit, perfumery, coffee, fuel oil, motor vehicles, radios, cameras and cinematograph projectors, mechanical lighters, razor blades, watches and clocks. Import duties are low and Gibraltar is a popular shopping centre. The gradual change from a fortress city to an attractive holiday centre has led to a flourishing tourist trade.

The Department of Education runs 8 secondary schools and 12 primary schools. There are also private infant schools. Teacher training and University Scholarships are provided, 5,016 pupils are

at present in Government schools, and the Government expenditure on education in 1967 was £223,681.

HONG KONG

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52'-114° 30' E. long.

The capital city, Victoria, situated on the island of Hong Kong, is 8½ miles S.E. of Canton and 40 miles E. of the Portuguese colony of Macao at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland; the harbour (23 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equaling that of Victoria. The total area of the Colony is 398½ sq. miles with a population which has varied considerably during recent years owing to unsettled conditions in China. In Dec. 1962 it was thought to be about 3,526,500.

The island of Hong Kong is about 11 miles long and from 2 to 5 miles broad, with a total area of 29 square miles; at the eastern entrance to the harbour it is only separated from the mainland by a narrow strait (Lei Yue Mun), 500-900 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is 1,805 feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3,140 ft.

Climate.—Although Hong Kong lies within the tropics it enjoys unusually varied weather for a tropical area. The mean monthly temperature ranges from 13° C. in February to 28° C. in July. Spring is cloudy and humid, often with spells of fog and drizzle. Summer days are hot with temperatures exceeding 33° C. several times in most years. The average annual rainfall is 2,168·8 mm., of which nearly 80 per cent. falls between May and September. Tropical cyclones passing at various distances from Hong Kong sometimes cause high winds and heavy rain particularly in July, August and September. Autumn and early winter are the most pleasant seasons with sunny, dry and mild weather. In late winter there is more cloud and strong northerly winds can cause temperatures to drop below 10° C. and frost is not uncommon.

Communications.—Hong Kong, one of the world's finest natural harbours, possesses excellent wharves at which vessels up to 800 ft. in length and 34 ft. draught can be berthed. An ocean terminal pier with an overall length of 1,250 ft. has been constructed. Excellent dockyard facilities are available and the dry docks are capable of taking all classes of vessels up to 35,500 deadweight tons in the case of bulk oil tankers, or 750 ft. in length and 34 ft. beam in the case of passenger liners and large dry cargo vessels. The net tonnage of shipping which entered the port for the year ending March, 1967, amounted to 21,627,092.

Hong Kong Airport, Kai Tak, situated on the north shore of Kowloon Bay, is some 3 miles from the centre of Kowloon, and is regularly used by 24 airlines and 10 charter airlines which provide frequent services to Europe, America and neighbouring territories, China excepted. The Colony, with its modern runway of 8,350 ft., is an important link on the main air routes of the Far East. B.O.A.C. operates 12 services per week to London, 9 via Europe and 3 via U.S.A. Full night flying facilities, precision approach radar, and an instrument landing system are available at the airport.

Education.—In March, 1968, there were 2,513 schools with 1,065,534 pupils. 51·5 per cent. of the pupils are financed wholly or in part by the Government. The University of Hong Kong has a full-time residential student strength of 2,425 (including 732 women) in Faculties of Arts, Science, Medicine, and Engineering and Architecture. There is also a Centre of Asian Studies and a Department of Extra-Mural Studies. The Chinese University of Hong Kong, inaugurated in Oct., 1963, has a full-time enrolment of 1,965 students (of whom 821 are women) in Faculties of Art, Science, and Commerce and Social Science. There is also a Department of Extra-Mural Studies.

TRADE

Hong Kong is now established as an industrial territory with an economy based on exports rather than the domestic market. Domestic industry, producing mainly light manufactures, has grown rapidly in recent years and now provides the bulk of goods for the export trade; the Colony's traditional role as an entrepôt, while still considerable, has become less important, and the value of the re-export trade is less than 24 per cent. of total exports.

Hong Kong produces a wide range of articles, including cotton piece-goods, cotton yarn, silk and rayon brocades, garments of all types, woollen knitwear, footwear, household enamel and aluminium ware, plastic articles (including household

ware, toys and artificial flowers), rattan and hard-wood furniture, iron and steel bars, transistor radios, photographic equipment, foodstuffs and beverages, cigarettes, jade, jewellery and ivory, and an extensive range of metal products.

Diversification of manufacture continues to be a major feature of recent industrial developments, as are industrial partnerships with foreign companies in a wide and varied field of manufactures. New products include wigs, automatic telephone dialling machines, electric household appliances such as rice cookers and toasters, T.V. receiving sets and T.V. tuners, high grade semi-conductors, electronic modules and other electronic components, steel pipes, rigid P.V.C. tubes and corrugated sheeting, P.V.C. covered fabrics, mixed cotton-synthetic fabrics and extruded aluminium sections. Modern manufacturing processes have also been introduced to local industry; these include the permanent crease process for ready-made garments, soil release processing for garments and the manufacture of polyester fabrics. The marked improvement in both quality and output of items for which precision engineering is required, has continued.

The adverse balance on visible trade is offset by a favourable balance on invisible account—remittances from overseas Chinese, investments, exchange, shipping and insurance profits, and the spending of tourists, etc. In 1967 Hong Kong's principal customers for its domestic products, in order of value of trade, were U.S.A., the United Kingdom, Singapore, Canada, Japan, the Federal Republic of Germany, Australia and Indonesia. China continued to be the Colony's principal supplier, followed by Japan, the United Kingdom, U.S.A., Thailand, the Federal Republic of Germany, Formosa and Australia.

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, is administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malekula, Epi, Ambrym, Efate, Erromanga, Tanna, Aneityum, Aoba, Maebo and Pentecost. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have staffs of national officers who assist them in general administrative work and the running of social services (health and education) financed from national funds, part of which come from the Metropolitan Governments. In addition they control the "joint" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The estimated population (1964) was 65,650, of which 62,700 was the estimated number of native inhabitants. The first full census was held in May, 1967. Principal products are copra, coffee, cocoa, frozen fish, frozen meat, manganese, kauri timber, sandalwood and shell. Imports for 1966 totalled £2,822,721, of which £1,295,980 was the value of imports from Australia. Exports in 1966 were valued at £3,721,100. Condominium Budget, 1967: £952,000. British National Service Budget \$A1,963,799; French National Service Budget, 268,901,000 New Hebrides francs (100 FNH = \$A1).

Attached to the New Hebrides are the Banks (309 sq. miles, pop. 2,475) and Torres (40 sq. miles, pop. 164) Islands.

Seat of New Hebrides Administration—Vila, Efate, pop. about 4,000.

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony, including the Central and Southern Line Islands; (2) The British Solomon Islands Protectorate; (3) The New Hebrides (British Service). The headquarters of the High Commissioner are at Honiara in the British Solomon Islands Protectorate.

The Gilbert and Ellice Islands Colony, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. The total land area of the Colony is about 360 sq. miles. The population of the Colony at December 31, 1967, was estimated at 52,000. Expressed in Australian currency, the estimated revenue of the Colony in 1967 was \$3,282,810; expenditure, \$4,836,033.

The Government maintains one boys' and one girls' boarding school and 32 primary schools—27 of which are Island Council's schools. Government has largely taken over from the Missions the burden of primary education and at the end of 1967 the total number of children attending Mission primary schools was 3,903, compared with 6,367 at Government primary schools.

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakei, Abaiang, Tarawa (Headquarters of the Colony), Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nikunau, Onotoa, Tamana and Arorae. The area of the group is 711 sq. miles. The Ellice Group of 9 islands (Nanumea, Nanumanga, Nuitao, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Niulakita) lies between lat. 5° 30' and 11° S.E. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated 1965) 5,800. Ocean Island (or Banaba), in lat. 0° 52' S. and long. 169° 35' E. was proclaimed British in 1900. The Line Islands between lat. 4° 40' and 2° N. and long. 160° 20' and 157° W. include Fanning, Washington and Christmas Islands. Fanning and Washington Islands were included in the Colony in 1916, Christmas Island in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the Phoenix Islands (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phoenix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under agreement made on April 6, 1939. Canton Island has been abandoned both by the Americans and by the Colony Government personnel, which together with the Americans jointly administered the island under the 1939 agreement. It is now completely uninhabited except for a large number of sea-gulls which constituted a menace to planes when the island was used as an international airport. The Colony personnel left the island on February 12, 1968, whereas the Americans left a little earlier on December 22, 1967.

In each island of the Gilbert and Ellice Groups (except Niulakita) there is a local Government with

an Island Council employing officials for the general administration of the community. The Colony is administered by the High Commissioner through a Resident Commissioner.

The British Solomon Islands Protectorate, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Isabel, the Shortland Group, Vella Lavella, Kolombangara, Ranongga, Gizo, the New Georgia Group, the Florida Group, Guadalcanal, the Russell Islands, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikoro, Tikopia, Swallow (or Reef Islands) and Duff Groups, the Stewart Islands and the Ontong Java Atoll.

The Protectorate is situated between 5°-13° S. lat. and 155°-170° 20' E. long. It has a total land area of about 11,500 sq. miles. The latest estimated population figures are: Melanesians, 136,000; Polynesian, 5,340; Micronesian, 1,960; European, 1,340; Chinese 640; Others, 350. Total 145,630. Estimated revenue (1968) \$A8,138,224 (including Colonial Development and Welfare Funds (\$A2,198,190) and grant-in-aid from the United Kingdom (\$A1,870,454)); estimated expenditure (1968) \$A8,202,414. The main imports are food-stuffs, consumer goods, machinery and building materials. Principal exports are copra, timber and trochus shell. A small export of cocoa has recently begun, and tourism is developing. In 1960 the Advisory Council was replaced by a nominated Legislative Council and Executive Council. In 1964 provision was made for a new constitution and the first general elections were held in 1965. In 1967 a general election was held to elect 14 members of the Legislative Council instead of the previous 8. The present Council comprises three ex officio members, up to 12 public service members and 14 elected members, and can have up to two additional nominated members, although none has been appointed. The Executive Council consists of eight members, drawn from members of the Legislative Council and appointed by the High Commissioner, who presides over both Councils.

The High Court of the Western Pacific constituted by the Western Pacific (Courts) Order in Council, 1961, consists of a Chief Justice, one Puisne Judge and one Senior Magistrate. The Court is a Superior Court of Record and possesses all the jurisdiction which is vested in Her Majesty's High Court of Justice in England.

RHODESIA

Rhodesia, comprising Matabeleland, Mashonaland and Manicaland, is that part of the territory named after Cecil Rhodes lying south of the Zambezi River, its political neighbours being Zambia and Portuguese East Africa on the N.; the Transvaal and Botswana on the S. and W.; and Portuguese East Africa on the E. The total area is 150,820 square miles. The estimated population, at Dec. 31, 1965 numbered 224,000 Europeans, 21,100 Asiatics and Coloureds and 4,080,000 Africans, giving a combined total of approximately 4,330,000; estimated 1967, 4,530,000.

The majority of Africans of Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the territory are the descendants of the Amandebele who conquered

and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the territory's 96,600,000 acres, 40,125,600 have been allocated to Tribal Trust Lands and 4,276,500 to African Purchase Areas. 35,673,900 acres (including African townships where they fall in European areas) are put aside for the Europeans. 5,889,000 acres are unreserved and may be inhabited by either race and 10,560,500 acres are set aside as Forest area and National land (all races).

EDUCATION

African education comes under the Minister of Education in the Rhodesian Government. Estimated expenditure for 1968-69 is £7,464,550. There are 3,186 primary schools, 88 secondary schools, 6 special schools for physically handicapped, 116 aided farm schools, 17 homecraft schools, 72 part-time evening schools, 80 study groups and 40 teacher training schools. The total enrolment of African pupils in 1968 was 686,000. In 1967 there were 18,753 African teachers and 602 European teachers for African schools. Full secondary schools provide education up to the Cambridge School Certificate level, and Junior secondary schools give ■ vocational schooling up to Junior Certificate level. Five secondary schools offer the Higher School Certificate. Other educational institutes are the Domboshawa School of Social Service and Chibero Agricultural College. At the University College in Salisbury, of the total enrolment of 893 full-time students for 1968, there were 325 Africans of whom 142 were fully subsidized by the Government and 15 partially subsidized. At present 95 per cent. of African children between the ages of 6 to 16 years receive ■ minimum of 5 years' primary education and over half of this number receive a full 8 years' primary education.

GOVERNMENT

Rhodesia obtained self-government in 1923 and has ■ legislative Assembly of 65 members and ■ Cabinet of 13 members.

Municipal self-government has been established ■ the city of Salisbury, the city of Bulawayo, and ■ the towns of Umtali, Gwelo, Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged and at the end of 1968 there were 68 Native Councils.

Governor, His Excellency Hon. Sir Humphrey Vicary Gibbs, K.C.M.G., K.C.V.O., O.B.E. (1959).

ST. HELENA

Probably the best known of all the solitary islands in the world, St. Helena is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with an estimated population at July, 1966, of 5,000.

St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. ♀ St. James's Bay, on the north-west of the Island, possesses a good anchorage.
